# CSP INC. AND SUBSIDIARIES 

# NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS THREE MONTHS ENDED March 31, 2008 AND 2007 

## Organization and Business

CSP Inc. (CSPI or the Company) was founded in 1968 and is based in Billerica, Massachusetts. To meet the diverse requirements of its industrial, commercial, scientific, and defense customers worldwide, CSPI and its subsidiaries develop and market IT integration solutions and high-performance cluster computer systems. The Company operates in two segments, its Systems segment and its Service and System Integration segment.

## 1. Basis of Presentation

The accompanying financial statements have been prepared by the Company, without audit, and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the results of the interim periods presented. All adjustments were of a normal recurring nature. Certain information and footnote disclosures normally included in the annual financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America, have been condensed or omitted. Accordingly, the Company believes that although the disclosures are adequate to make the information presented not misleading, the financial statements should be read in conjunction with the footnotes contained in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2007.

## 2. Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates under different assumptions or conditions.

## 3. Earnings Per Share of Common Stock

Basic net income per common share is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted net income per common share reflects the maximum dilution that would have resulted from the assumed exercise and share repurchase related to dilutive stock options and is computed by dividing net income by the assumed weighted average number of common shares outstanding.

The reconciliation of the denominators of the basic and diluted net income per share computations for the Company's reported net income is as follows:

For the three and six months ended March 31, 2008, options of 169,000 and 149,000 , respectively, were excluded from the diluted net income per share calculation because their impact would have been anti-dilutive. For the three and six months ended March 31, 2007, options of 329,000 and 345,000 , respectively, were excluded from the diluted net income per share calculation because their impact would have been anti-dilutive.

## 4. Inventories

Inventories consist of the following:

|  | $\begin{gathered} \text { March 31, } \\ 2008 \end{gathered}$ |  |  | $\begin{gathered} \text { September 30, } \\ 2007 \end{gathered}$ |

| Total | \$ | 5,983 | \$ | 6,072 |

## 5. Long-Term Investments

As of March 31, 2008, we held investments totaling $\$ 6.9$ million (par value) which consist of long-term debt instruments with variable interest rates that periodically reset through an auction process ("auction rate securities"). All of our auction rate securities were originally acquired during the six months ended March 31, 2008 and have final maturity dates ranging from 2027 to 2057.

Recent auctions for our auction rate securities have failed. An auction failure, which is not a default in the underlying debt instrument, occurs when there are more sellers than buyers at a scheduled interest rate auction date and parties desiring to sell their securities are unable to do so. When an auction fails, the interest rate is adjusted according to the provisions of the associated security agreement, which generally results in an interest rate that is higher than the interest rate the issuer pays in connection with successful auctions.

Our investment in auction rate securities as of March 31, 2008 was diversified across seven separate issues and each issue maintains scheduled interest rate auctions in either 7-day or 28 -day intervals. All of our auction rate securities are currently rated Aaa by Moody's, AAA by Standard \& Poor's and/or AAA by Fitch, which are the highest ratings issued by each respective rating agency. An aggregate $\$ 4.8$ million (par value) of our auction rate securities which are classified as long term investments were issued by state agencies and are supported by student loans, for which repayment is substantially guaranteed by the U.S. government under the Federal Family Education Loan Program ("FFELP") or MBIA Insurance Co. The remaining $\$ 2.0$ million are closed end, preferred auction securities secured by the assets of the closed end funds. These funds are legally required to maintain assets of $200 \%$ of the face value of the preferred auction securities. The issuers of these closed end, preferred auction securities have given us notice that $\$ 1.5$ million will be redeemed in May 2008 and the remaining $\$ 500$ thousand will be redeemed in the near future but no specific date has been set.

Auction failures and the resulting lack of liquidity are affecting the entire auction rate securities market and we are currently unable to determine whether these conditions will be temporary. Some issuers have recently refinanced their auction rate securities and other issuers are in the process of doing so. As noted above we have been notified that some of our holdings will be redeemed. We are currently unable to determine whether other issuers of our auction rate securities will attempt and/or be able to refinance. Several of the financial institutions that conduct auctions and broker auction rate securities have indicated that they plan to develop secondary markets for auction rate securities, but we are currently unable to determine whether such plans will succeed or if alternate markets that provide for orderly purchases and sales of auction rate securities will otherwise develop. Although we acquired our auction rate securities with the intention of selling them in the near term, due to the aforementioned uncertainties, all of our auction rate securities not redeemed or not intended to be redeemed, have been classified as long-term investments. Assets so classified totaled $\$ 4.8$ million as of March 31, 2008. The $\$ 2.0$ million of closed end, preferred auction rate securities that are expected to be redeemed in 2008 were classified as short term investments and are included in current assets as of March 31, 2008.

## 7. Pension and Retirement Plans

In the United Kingdom and Germany, the Company provides defined benefit pension plans and defined contribution plans for the majority of its employees. Domestically, the Company also provides benefits through supplemental retirement plans to certain current and former employees. These supplemental plans provide benefits derived out of cash surrender values relating to current and former employee and officer life insurance policies, equal to the difference between the amounts that would have been payable under the defined benefit pension plans, in the absence of legislation limiting pension benefits and earnings that may be considered in calculating pension benefits, and the amounts actually payable under the defined benefit pension plans. Domestically, the Company provides for officer death benefits through post-retirement plans to certain officers.

The Company funds its pension plans in amounts sufficient to meet the requirements set forth in applicable employee benefits laws and local tax laws. Liabilities for amounts in excess of these funding levels are accrued and reported in the consolidated balance sheet.

Our pension plan in the United Kingdom is the only plan with plan assets. The plan assets comprise a diversified mix of assets including corporate equity securities, government securities and corporate debt securities.

The components of net periodic benefit costs related to the U.S. and international plans are as follows:

## 8. Income Taxes

On October 1, 2007, we adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes ("FIN 48"), which clarifies the accounting for uncertainty in income tax positions. This interpretation requires us to recognize in the consolidated financial statements only those tax positions determined to be more-likely-than-not of being sustained upon examination, based on the technical merits of the positions as of the reporting date. If a tax position is not considered more-likely-than-not to be sustained based solely on its technical merits, no benefits of the position are recognized. This is a different standard for recognition than was previously required. The more-likely-than-not threshold must continue to be met in each reporting period to support continued recognition of a benefit. At adoption of FIN 48, companies must adjust their financial statements to reflect only those tax positions that are more-likely-than-not to be sustained as of the adoption date. Any necessary adjustment is recorded directly to opening retained earnings in the period of adoption. The cumulative effect of adoption of FIN 48, as of October 1, 2007, resulted in an increase to retained earnings of $\$ 556,000$.

## Edgar Filing: CSP INC /MA/ - Form 10-Q

As of October 1, 2007, the total amount of unrecognized tax benefits was $\$ 260,000$, all of which would affect our effective tax rate if recognized. We recognize interest and potential penalties accrued related to unrecognized tax benefits in our provision for income taxes. There were no accrued interest and/or penalties in our tax provision for the quarter ended December 31, 2007, nor were there any accrued penalties and interest included in our liabilities for uncertain tax positions as of October 1, 2007 and March 31, 2008.

We file income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. We have not been notified of intent to audit, nor are we currently undergoing an income tax audit in any jurisdiction. With few exceptions, our returns are no longer subject to U.S. federal, state, or non-U.S. income tax examinations for the years before 2004.

Operating income (loss) is equal to sales, less: cost of sales, engineering and development and selling, general and administrative expenses, but is not affected by either non-operating charges/income or by income taxes.
Non-operating charges/ income consists principally of investment income and interest expense. All intercompany
transactions have been eliminated.
Total assets include deferred income tax assets and other financial instruments owned by the Company.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

## Forward-Looking Statements

The discussion below contains certain forward-looking statements related to, among others, but not limited to, statements concerning future revenues and future business plans. Actual results may vary from those contained in such forward-looking statements.

Markets for our products and services are characterized by rapidly changing technology, new product introductions and short product life cycles. These changes can adversely affect our business and operating results. Our success will depend on our ability to enhance our existing products and services and to develop and introduce, on a timely and cost effective basis, new products that keep pace with technological developments and address increasing customer requirements. The inability to meet these demands could adversely affect our business and operating results.

## Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an on-going basis, we evaluate our estimates, including those related to uncollectible receivables, inventory valuation, goodwill, income taxes, deferred compensation and retirement plans, and contingencies. We base our estimates on historical performance and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. A description of our critical accounting policies is contained in our Annual Report on Form 10-K for the fiscal year ended September 30, 2007 in the "Critical Accounting Policies" section of Management's Discussion and Analysis of Financial Condition and Results of Operations.

## Results of Operations

Overview of the six months ended March 31, 2008 Results of Operations
CSP Inc. operates in two segments:
Systems - the Systems segment consists of our MultiComputer division which designs, develops and manufactures signal processing computer platforms which are used primarily in military applications and the process control and data acquisition hardware business of our Modcomp division.

Service and System Integration - the Service and System Integration segment includes the computer systems’ maintenance and integration services and third-party computer hardware and software products businesses of our Modcomp subsidiary.

## Highlights include:

Revenue decreased by approximately $\$ 400$ thousand, or $1 \%$, to $\$ 39.6$ million for the six months ended March 31, 2008 versus $\$ 39.9$ million for the six months ended March 31, 2007.

The operating loss for the six months ended March 31, 2008 was $\$ 429$ thousand versus operating income of $\$ 2.1$ million for the six months ended March 31, 2007, for a decrease of approximately $\$ 2.5$ million, or $120 \%$.

- The net loss for the six months ended March 31, 2008 was $\$ 70$ thousand versus net income of $\$ 1.2$ million for the six months ended March 31, 2007, for a decrease of approximately $\$ 1.3$ million, or $106 \%$.

Net cash used by operations was approximately $\$ 4.7$ million for the six months ended March 31, 2008 compared to net cash provided by operations of $\$ 1.6$ million for the comparable period of 2007.

The following table details our results of operations in dollars and as a percentage of sales for the six months ended March 31, 2008 and 2007:

| \% increase (decrease) |  | (73) |  | 17\% |  | (1) |  |

Total revenues decreased by approximately $\$ 395$ thousand, or $1 \%$, in the first six months of fiscal year 2008 compared to the same period of fiscal year 2007. Systems segment revenue decreased by approximately $\$ 5.8$ million while Service and System Integration segment revenues increased by approximately $\$ 5.4$ million.

Product revenues decreased by approximately $\$ 1.5$ million, or $5 \%$ in the first six months of fiscal year 2008 compared to the first six months of fiscal 2007. Systems segment product revenue decreased by approximately $\$ 5.2$ million of this while Service and System Integration segment product revenue increased by approximately $\$ 3.7$ million.

14

The $\$ 5.2$ million decrease in the Systems segment product revenue was primarily due to the decrease in sales to Raytheon of $\$ 5.0$ million over the prior year period. Prior year sales to Raytheon were in connection with an order for sixteen systems that were shipped over the course of fiscal 2007. Sales to Raytheon for the six months ended March 31,2008 were approximately $\$ 38,000$ consisting of spare parts and repairs. In addition, sales to Kyokuto Boeki Kaisha ("KBK") decreased by $\$ 1.2$ million for the six months ended March 31, 2008 versus the prior year comparable period, while product sales to Lockheed Martin and General Dynamics increased by $\$ 721$ thousand and $\$ 187$ thousand, respectively.

The $\$ 3.7$ million increase in the Service and System Integration segment product revenue was due to a $\$ 1.9$ million increase in product sales from the segment's German operations and a $\$ 1.8$ million increase in shipments in the US operations. The German division increase was due in large part to the stronger Euro versus the US dollar during the six months ended March 31, 2008 versus the comparable period of fiscal 2007. This currency fluctuation accounted for approximately $\$ 1.4$ million of the increase. The remaining $\$ 500$ thousand increase was from increased sales volume, approximately $\$ 400$ thousand of which was with existing large customers, primarily Kabel Deutschland and Arcor AG \& Co, and approximately $\$ 100$ thousand from new customers. In the US operation, the increase was driven primarily by sales to several large new customers which accounted for approximately $\$ 2.6$ million of the increase. In addition, sales to the US division's largest existing customer increased by $\$ 2.2$ million. These increases were offset by total net decreases to all other customers totaling approximately $\$ 3.0$ million.

Service revenues increased by approximately $\$ 1.1$ million, or $17 \%$ for the first six months of fiscal year 2008 compared to the first six months of fiscal 2007. Service and System Integration segment service revenues increased by approximately $\$ 1.7$ million, while service revenue in the Systems segment decreased by approximately $\$ 561$ thousand. Approximately $\$ 1.5$ million of the increase in the Service and System Integration segment was derived from the German operation, approximately $\$ 600$ thousand of which was the result of the foreign currency fluctuation impact and approximately $\$ 800$ thousand was due to increased sales volume. The increase in sales volume was driven substantially from sales to three new customers. In addition, $\$ 143$ thousand of the increase in the Service and System Integration segment service revenue was from the US operation, which was driven primarily from sales to new customers. Service revenues in the Systems segment decreased primarily as a result of the absence of any royalty revenue from Lockheed Martin which totaled approximately $\$ 504$ thousand for the six months ended March 31, 2007.

Our sales by geographic area, based on the location to which the products were shipped or services rendered, are as follows:

|  | $\begin{gathered} \text { March 31, } \\ 2008 \end{gathered}$ |  | \% | $\begin{gathered} \text { March 31, } \\ 2007 \end{gathered}$ |  | \% | \$ Increase/ (Decrease) |  | \% Increase (Decrease) |

| Totals | \$ | 39,554 | 100\% | \$ | 39,949 | 100\% | \$ | ( 395) | (1)\% |

North American revenue, in the first six months of fiscal 2008, decreased versus the comparable period of fiscal 2007, largely due to the decrease in sales in the Systems segment related to the decrease in sales to Raytheon of $\$ 5.0$ million offset by the increases in sales to Lockheed Martin of \$217 thousand and General Dynamics of approximately \$187 thousand, referred to above combined with the increases in product and services sales in the US operation of Service and System Integration segment, which totaled $\$ 2.0$ million, also referred to above.

The increase in revenues in Europe for the six months ended March 31, 2008 versus the comparable period of fiscal 2007 was due primarily to the reasons set forth above with respect to sales volumes and foreign exchange rate

## Edgar Filing: CSP INC /MA/ - Form 10-Q

fluctuations in the German operations of the Service and System Integration segment. To summarize the data presented above, $\$ 2.0$ million of the increase was related to the foreign exchange rate change of a stronger Euro versus the US dollar, and $\$ 1.3$ million of the increase was related to increased sales volume. The decrease in sales in Asia was due to lower sales to KBK in the six month period ended March 31, 2008 versus the six months ended March 31, 2007.

| Services | $(26) \%$ | $3 \%$ | $(6) \%$ |  |  |  |
| Total |  |  |  |  |  |  |

Total cost of sales increased by approximately $\$ 1.9$ million for the six months ended March 31, 2008, over the comparable period in fiscal 2007, to $\$ 32.0$ million up from $\$ 30.1$ million in the prior year period. The increase in cost of sales was due, overall, to the increase in sales of the Service and System Integration segment, but reflected an overall $6 \%$ decline in gross margin to $19 \%$ for the current year six month period versus $25 \%$ in the prior year six month period. This decrease in the overall gross margin was due to (i) the lower level of System segment sales as discussed above, coupled with the significant decline in the gross margins in the Systems segment which decreased from $62 \%$ gross margin for the six months ended March 31, 2007 to $36 \%$ for the six months ended March 31, 2008, a decline of $26 \%$ in the gross margin. The decline was due, in large part to low production levels associated with the low level of sales resulting in a higher volume of unabsorbed overhead charged to cost of sales, and also to prior year Systems segment revenues having included approximately $\$ 504$ thousand in royalty revenue, which carry no cost of sales; versus no royalty revenue in the fiscal 2008 six months ended March 31, 2008.

Gross profit margins for the Service and System Integration segment increased by 3\% gross margin from 15\% for the prior year quarter to $18 \%$ for the six month period ended March 31, 2008 versus the prior fiscal year six month period. This increase was due primarily to higher product gross margin for this segment due primarily to a greater number of smaller orders, which generally carry higher gross margin than large, high volume orders, coupled with greater sales volume of products that carry higher margins than those sold in the prior year six month period.

## Engineering and Development Expenses

The following table details our engineering and development expenses by operating segment for the six months ended March 31, 2008 and 2007:

| Total | \$ | 1,179 | 100\% | \$ | 1,173 | 100\% | \$ | 6 | 1\% |

Engineering and development expenses increased by $\$ 6$ thousand, or approximately $1 \%$, in the first six months of fiscal 2008 compared to the first six months of fiscal 2007, reflecting approximately the same level of engineering and development activity for the six month period ended March 31, 2008 as that of the prior year comparable six month period.

## Selling, General and Administrative Expenses

The following table details our selling, general and administrative expenses by operating segment for the six months ended March 31, 2008 and 2007:

Total selling, general and administrative ("SG\&A") expenses increased by $\$ 207$ thousand, or $3 \%$, in the first six months of 2008 compared to the corresponding period of fiscal 2007. The decrease in Systems segment SG\&A as shown above, resulted from lower commission and bonus expense of approximately $\$ 190$ thousand, and lower audit fees of approximately $\$ 432$ thousand, offset by higher consulting fees of approximately $\$ 35$ thousand in connection with the Company's implementation of the requirements of the Sarbanes Oxley Act of 2002, section 404. The increase in SG\&A expenses in the Service and System Integration segment as shown in the table above resulted from higher commission and bonus expense due primarily to the higher sales volume in the US and German operations, of

approximately $\$ 390$ thousand, higher sales salary expenses of approximately $\$ 70$ thousand, higher marketing and business development expenses of approximately $\$ 73$ thousand, and the foreign currency fluctuation impact related to the higher Euro vs. the US dollar, which accounted for $\$ 165$ thousand of the increase in expense.

## Other Income/Expenses

The following table details our other income/expenses for the six months ended March 31, 2008 and 2007:

| For the Six Months Ended |  |  |

Total other income increased by $\$ 172$ thousand for the first six months of fiscal 2008 compared to the first six months of fiscal 2007, as shown above. The increase in interest income was due to higher rates earned on cash, cash equivalents and short-term investments, in addition to larger holdings of investments and interest bearing deposits in the current year period.

## Overview of the quarter ended March 31, 2008 Results of Operations

## Highlights include:

Revenue increased by approximately $\$ 2.8$ million, or $15 \%$, to $\$ 21.6$ million for the quarter ended March 31, 2008 versus $\$ 18.8$ million for the quarter ended March 31, 2007.

Operating income decreased by approximately $\$ 259$ thousand, or $72 \%$, to $\$ 100$ thousand for the quarter ended March 31, 2008 versus $\$ 359$ thousand for the quarter ended March 31, 2007.

- Net income decreased by $\$ 66$ thousand, or $26 \%$, to $\$ 189$ thousand for the quarter ended March 31, 2008 versus $\$ 255$ thousand for the quarter ended March 31, 2007.

As shown above, total revenues increased by approximately $\$ 2.8$ million, or $15 \%$, for the quarter ended March 31, 2008 compared to the same period of fiscal year 2007. While revenue in the Systems segment decreased in the current year quarter versus the prior year quarter by approximately $\$ 1.2$ million, revenues in the Service and System Integration segment increased by approximately $\$ 4.0$ million, resulting in the overall increase of $\$ 2.8$ million.

Product revenues increased by approximately $\$ 1.9$ million, or $12 \%$ for the quarter ended March 31, 2008 compared to the comparable period of fiscal 2007. This change in product revenues was made up of an increase in product revenues in the Service and System Integration segment of approximately $\$ 2.8$ million over the prior year quarter, offset by a decrease in product revenues in the Systems segment of $\$ 924$ thousand versus the prior year quarter.

The increase in the Service and System Integration segment product revenue was primarily due to an increase in product sales in the German operation of $\$ 2.1$ million, and a $\$ 746$ thousand increase in product sales in our US operations of this segment. Of the $\$ 2.1$ million increase from the German operations, approximately $\$ 1.2$ million was due to an increase in sales volume, while approximately $\$ 900$ thousand was due to the effect of a stronger Euro versus the US dollar, during the quarter ended March 31, 2008 versus the quarter ended March 31, 2007. The increase in sales volume of the German operation was substantially due to increases in sales to its largest customers Atos Origin GmbH and Kabel Deutschland which accounted for $\$ 1.2$ million of the increase. The $\$ 746$ thousand increase in product sales of the US operation of the Service \& System Integration segment was driven primarily by an increase of approximately $\$ 1.4$ million in sales to the US operation's largest customer. These increases were offset by total net

## Edgar Filing: CSP INC /MA/ - Form 10-Q

decreases to all other customers totaling approximately $\$ 700$ thousand.
The decrease in the Systems segment product revenues of approximately $\$ 924$ thousand for the quarter ended March 31,2008 versus the comparable period in fiscal 2007 was primarily the result of approximately $\$ 1.5$ million lower sales to KBK, offset by higher product sales to Lockheed Martin of approximately $\$ 600$ thousand.

As shown in the table above, service revenues increased by $\$ 925$ thousand, or $27 \%$ for the quarter ended March 31, 2008 compared to the comparable quarter of fiscal 2007. Service and System Integration segment service revenue increased by approximately $\$ 1.2$ million while Systems segment service revenue decreased by approximately $\$ 230$ thousand.

The $\$ 1.2$ million increase in sales in the Service and System Integration segment service revenue was due substantially to an increase in service sales of the German operation of approximately $\$ 1.1$ million. The increase was the result of increased services sales volume from the German division of approximately $\$ 713$ thousand which was derived from increased sales to several of the operation's large existing customers Atos Origin GmbH and Unitymedia NRW GmbH. In addition, the effect of a stronger Euro versus the US dollar, during the quarter ended March 31, 2008 versus the quarter ended March 31, 2007 resulted in an increase of approximately $\$ 340$ thousand in sales from the German operation.

The decrease in service revenues in the Systems segment of approximately $\$ 230$ thousand referred to above was primarily due to royalty revenue from Lockheed Martin in the six months ended March 31, 2007, which totaled approximately $\$ 198$ thousand, which did not recur in the quarter ended March 31, 2008.

Our sales by geographic area, based on the location to which the products were shipped or services rendered, are as follows:

The increase in North American revenue in for quarter ended March 31, 2008 versus the prior year quarter, was due to the increase in sales to Lockheed Martin and the increase in sales in the US operations of the Service \& System Integration segment, as discussed in above. The increases in sales to Europe are also discussed in the narrative above which refers to the increases in sales in the Service and Systems Integration segment that were derived from Germany. The decrease in Asia sales were the result of decreased sales to KBK, from the Systems segment, also referred to above.

## Cost of Sales and gross margins

Total cost of sales increased by approximately $\$ 2.8$ million for the quarter ended March 31, 2008, versus the quarter ended March 31, 2007, to $\$ 17.5$ million up from $\$ 14.7$ million in the prior year quarter. The increase in cost of sales was due, overall, to the increase in sales volume and revenues, and also reflects an overall $3 \%$ decline in gross margin to $19 \%$ for the current year quarter versus $22 \%$ in the prior year quarter. This decrease in the overall gross margin was due to (i) the lower level of System segment sales as discussed above, coupled with the significant decline in the gross margin in the Systems segment which decreased from $71 \%$ gross margin for the quarter ended March 31, 2007 to $46 \%$ for the quarter ended March 31, 2008, a decline of $25 \%$ in the gross margin. The decline was due to (i) low production levels in the quarter ended March 31, 2008 associated with the low level of sales resulting in a higher volume of unabsorbed overhead charged to cost of sales; and (ii) the quarter ended March 31, 2007 included approximately $\$ 200$ thousand of royalty revenue at $100 \%$ gross margin, which did not recur in the quarter ended March 31, 2008.

Gross profit margins for the Service and System Integration segment increased by $2 \%$ gross margin from $15 \%$ for the prior year quarter to $17 \%$ for the current year quarter ended March 31, 2008. This increase was due primarily to higher product gross margin for this segment due primarily to a greater number of smaller orders, which generally carry higher gross margin than large, high volume orders, coupled with higher service revenues in the current year quarter as a percentage of total revenues which carry higher gross margin than product revenues ( $22 \%$ versus $13 \%$ to $16 \%$ ).

## Engineering and Development Expenses

The following table details our engineering and development expenses by operating segment for the three months ended March 31, 2008 and 2007:

| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Engineering and development expenses decreased by approximately $\$ 90$ thousand, or $14 \%$, in the quarter ended March 31, 2008 compared to the same period of fiscal 2007. The decrease reflects lower expenditures to outside consultants in connection with the development of the next generation of MultiComputer products in the Systems segment and the elimination of engineering resource expenditures for non-billable development in the UK branch of the Service and Systems Integration segment.

## Selling, General and Administrative

The following table details our selling, general and administrative expense by operating segment for the three months ended March 31, 2008 and 2007:

|  | For the Three Months Ended |  |  |  |  |  |  |  |  |

| Total | \$ | 3,500 | 100\% | \$ | 3,173 | 100\% | \$ | 327 | 10\% |

Total selling, general and administrative ("SG\&A") expenses increased by $\$ 327$ thousand, or $10 \%$, in the quarter ended March 31, 2008 compared to the corresponding quarter of fiscal 2007. The Systems segment SG\&A expenses decreased by approximately $\$ 141$ thousand, while SG\&A expenses in the Services and System Integration segment increased by approximately $\$ 468$ thousand. The decrease in the System segment expense was due to a decrease in audit fees which were higher in the fiscal quarter ended March 31, 2007 due to compliance issues related to the completion of our statutory filings for the prior fiscal year that did not recur. The increase in SG\&A expense in the Service and System Integration segment was related to increase in sales commissions of approximately $\$ 210$ thousand related to the increased in sales revenue for the segment, increases in sales salaries and additional marketing expenses of approximately $\$ 75$ thousand, lease termination costs incurred in our UK operation of approximately $\$ 80$ thousand and the impact of currency fluctuation from the German operation which totaled approximately $\$ 95$ thousand.

## Other Income/Expenses

The following table details our other income/expenses for the three months ended March 31, 2008 and 2007:

| For the Three Months Ended |  |
| :--- | :---: |
| March 31, | March 31, |
| 2008 | 2007 |

(Amounts in thousands)

| Interest expense | $\$$ | $(22)$ | $\$$ | $(25)$ | $\$$ | 3 |
| :--- | :---: | :---: | :---: | :---: | ---: | ---: |
| Interest income |  | 215 | 132 |  | 83 |  |
| Foreign exchange gain | 21 |  | 7 | 14 |  |  |
| Other expense, net |  | $(3)$ |  | $(13)$ | 10 |  |
| Total other income, net | $\$$ | 211 | $\$$ | 101 | $\$$ | 110 |

Total other income increased by $\$ 110$ thousand for the three months ended March 31, 2008 compared to the same period of fiscal 2007, due primarily to an increase in interest income related to the general increase in interest rates in effect over the three months ended March 31, 2008 compared to the same period of fiscal 2007 coupled with higher balances of interest bearing investments and deposits in the current-year quarter.

## Income Taxes

## Income Tax Provision

The company recorded income tax expense of $\$ 122$ thousand and a tax benefit of $\$ 17$ thousand for the quarter and six months ended March 31, 2008, respectively, reflecting an effective income tax benefit rate of $20 \%$ for the six months ended March 31, 2008, compared to an income tax provision of $\$ 205$ thousand and $\$ 1.1$ million for the quarter and six months ended March 31, 2007, respectively, reflecting an effective tax rate of $46 \%$ for the six months ended March 31, 2007. The tax benefit for the six months ended March 31, 2008 was due to the carryback of the operating loss of our US operation for the six month period. For the six months ended March 31, 2007, our effective tax rate was higher than the U.S. statutory rate due to the increased profitability in the U.S. plus profitability of our European subsidiaries, primarily Germany.

In assessing the realizability of deferred tax assets, we considered our taxable future earnings and the expected timing of the reversal of temporary differences. Accordingly, we have recorded a valuation allowance which reduces the gross deferred tax asset to an amount which we believe will more likely than not be realized. Our inability to project future profitability beyond fiscal year 2008 in the U.S. and cumulative losses incurred in recent years in the U.K. represent sufficient negative evidence under SFAS 109 to record a valuation allowance against certain deferred tax assets. We maintained a substantial valuation allowance against our U.K. deferred tax assets as we have experienced continued cumulative losses and do not have any indication that the operation will be profitable in the future to an extent that will allow us to utilize much of our net operating loss carryforwards. To the extent that actual experience deviates from our assumptions, our projections would be affected and hence our assessment of realizability of our deferred tax asset may change.

## Liquidity and Capital Resources

Our primary source of liquidity is our cash and cash equivalents and short term investments, which decreased by approximately $\$ 10.2$ million to approximately $\$ 11.2$ million as of March 31, 2008 as compared to approximately $\$ 21.4$ million as of September 30, 2007. Significant items that account for this reduction in cash include (i) the reclassification of auction rate security investments totaling $\$ 4.8$ million, which historically were classified as short term, to long term investments; (ii) cash used by operating activities of approximately $\$ 4.7$ million (iii) cash used by

## Edgar Filing: CSP INC /MA/ - Form 10-Q

financing activities of approximately $\$ 343$ thousand and purchases of property, plant and equipment of $\$ 270$ thousand.

We reclassified $\$ 4.8$ million of auction rate security investments from short term to long term because recent auctions for these securities have failed. Because of these failed auctions, and the uncertainty as to whether future auctions will fail, we can not determine whether we will be able to liquidate these investments over the ensuing one-year period, and therefore have classified these investments to long term. (See also footnote 5, in the footnotes to financial statements and Part II Item 1A Risk Factors.)

Cash used in operations of approximately $\$ 4.7$ million was due substantially to an increase in accounts receivable of approximately $\$ 5.3$ million. This increase was due to orders shipping within the last thirty days of the period ended March 31, 2008, the receivables for which have not yet come due, therefore these amounts were uncollected as of March 31, 2008.

In financing activities, we used $\$ 539$ thousand to purchase treasury stock and received cash totaling $\$ 196$ thousand for CSPI common stock issued for stock options exercised pursuant to the Company's stock option and stock purchase plans.

If cash generated from operations is insufficient to satisfy working capital requirements, we may need to access funds through bank loans, sale of securities or other means. There is no assurance that we will be able to raise any such capital on terms acceptable to us, on a timely basis or at all. If we are unable to secure additional financing, we may not be able to complete development or enhancement of products, take advantage of future opportunities, respond to competition or continue to effectively operate our business.

Based on our current plans and business conditions, management believes that our available cash and investments and cash generated from operations will be sufficient to provide for our working capital and capital expenditure requirements for the foreseeable future.

## Inflation and Changing Prices

Management does not believe that inflation and changing prices had significant impact on sales, revenues or income from continued operations during the three and six month periods ended March 31, 2008 and 2007. There is no assurance that our business will not be materially and adversely affected by inflation and changing prices in the future.

## Item 3. Quantitative and Qualitative Disclosures about Market Risk

As disclosed in our Annual Report on Form 10-K for the year ended September 30, 2007, our major market risk exposure relates to adverse fluctuations in interest rates risk and foreign currency exchange risk. We believe our exposure associated with these market risks has not changed materially since September 30, 2007.

We are also exposed to market risk relating to our long-term investments in auction rate securities due to uncertainties in the credit and capital markets. As of March 31, 2008, the fair value of our investments in auction rate securities was $\$ 6.8$ million and $\$ 4.8$ million is classified as long term investments. The balance of $\$ 2.0$ million will be redeemed by the issuers at par value, approximately $\$ 1.5$ million in May, 2008 and the balance of $\$ 500$ thousand should be redeemed some time during the remainder of the year. The fair value of our long term auction rate securities may change significantly due to events and conditions in the credit and capital markets. The current fair value of our auction rate securities would be significantly lower if the market price of these securities were to decline. Assuming a $10 \%$ adverse change in the market price of these securities overall, the fair value would decline approximately $\$ 480$ thousand. However, each of our auction rate security investments have different features and are subject to different risks and therefore, any market decline would impact these securities to a different degree. While these investments and/or issuers are currently rated AAA by various credit rating agencies as of March 31, 2008, these securities/issuers could be subject to review for possible downgrade. Any downgrade in these credit ratings may result in additional decline in estimated fair value of our auction rate securities. Changes in the various assumptions used to value these securities and any increase in the markets' perceived risk associated with such investments may also result in a decline in estimated fair value.

## Item 4. Controls and Procedures

We evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2008. Our chief executive officer, our chief financial officer, and other members of our senior management team supervised and participated in this evaluation. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of March 31, 2008, the Company's chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

This quarterly report is not required to include, and does not include, a report of management's assessment regarding internal control over financial reporting or an attestation report of the company's registered public accounting firm.

## Changes in Internal Controls over Financial Reporting

During the quarter ended March 31, 2008, there were no changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

# Edgar Filing: CSP INC /MA/ - Form 10-Q 

## PART II. OTHER INFORMATION

## Item 1A. Risk Factors

There are numerous factors that affect our business and results of operations, many of which are beyond our control. In addition to the other information set forth in this quarterly report, you should carefully read and consider "Item 1A. Risk Factors" in Part I and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II of our Annual Report on Form 10-K for the year ended September 31, 2007, which contains descriptions of significant factors that might cause the actual results of operations in future periods to differ materially from those currently anticipated or expected. There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended September 31, 2007, except as set forth below:

## WE HAVE INVESTED A PORTION OF OUR CASH IN AUCTION RATE SECURITIES, THE MARKET FORWHICH HAS BECOME ILLIQUID. ALTHOUGH WE ACQUIRED THESE SECURITIES WITH THE INTENTION OF SELLING THEM IN THE NEAR TERM, WE MAY BE REQUIRED TO HOLD THEM INDEFINITELY.

As of March 31, 2008, we held $\$ 6.9$ million (par value) of which are long-term debt instruments with variable interest rates that periodically reset through an auction process ("auction rate securities"). All of our auction rate securities were originally acquired during the six months ended March 31, 2008 and have final maturity dates ranging from 2027 to 2057.

Recent auctions for our auction rate securities have failed. An auction failure, which is not a default in the underlying debt instrument, occurs when there are more sellers than buyers at a scheduled interest rate auction date and parties desiring to sell their securities are unable to do so. When an auction fails, the interest rate is adjusted according to the provisions of the associated security agreement, which generally results in an interest rate that is higher than the interest rate the issuer pays in connection with successful auctions.

Our investment in auction rate securities as of March 31, 2008 was diversified across 7 separate issues and each issue maintains scheduled interest rate auctions in either 7-day or 28-day intervals. All of our auction rate securities are currently rated Aaa by Moody's, AAA by Standard \& Poor's and/or AAA by Fitch, which is the highest rating issued by each respective rating agency. An aggregate $\$ 4.8$ million (par value) of our auction rate securities which are classified as long term investments were issued by state agencies and are supported by student loans for which repayment is substantially guaranteed by the U.S. government under the Federal Family Education Loan Program ("FFELP") or MBIA Insurance Co. The remaining $\$ 2.0$ million are closed end preferred auction securities secured by the assets of the closed end funds. The fund is legally required to maintain assets of $200 \%$ of the face value of the preferred auction securities. The issues have given us notice that $\$ 1.5$ million will be redeemed in May 2008 and the remaining $\$ 500$ thousand will be redeemed in the near future but no specific date has been set.

Auction failures and the resulting lack of liquidity are affecting the entire auction rate securities market and we are currently unable to determine whether these conditions will be temporary. Some issuers have recently refinanced their auction rate securities and other issuers are in the process of doing so. As noted above we have been notified that some of our holdings will be redeemed. We are currently unable to determine whether other issuers of our auction rate securities will attempt and/or be able to refinance. Several of the financial institutions that conduct auctions and broker auction rate securities have indicated that they plan to develop secondary markets for auction rate securities, but we are currently unable to determine whether such plans will succeed or if alternate markets that provide for orderly purchases and sales of auction rate securities will otherwise develop. Although we acquired our auction rate securities with the intention of selling them in the near term, due to the aforementioned uncertainties, all of our auction rate securities not intended to be redeemed have been classified as long-term investments on our consolidated balance sheet as of March 31, 2008 which is $\$ 4.8$ million. The $\$ 2.0$ million of auction rate securities that will be

## Edgar Filing: CSP INC /MA/ - Form 10-Q

redeemed in 2008 were classified as short term investments current assets on our consolidated balance sheet as of March 31, 2008.

We expect to fund short-term and long-term liquidity needs from our cash and cash equivalent and short term investments totaling $\$ 11$ million as of March 31, 2008, operating cash flow and, if necessary, funds borrowed under our $\$ 2.5$ million unsecured revolving credit facility or other future financing arrangements.
