Message from the President

During the six months ended November 30, 2013, the municipal market was affected by a number of factors. For several months ending in April 2013, municipal bonds had been trading in a relatively fixed range and exhibited muted price volatility. That trend changed abruptly during May 2013, when stronger-than-anticipated economic data led the media to suggest a great rotation from bonds to equities. In light of continuing low interest rates, this theory suggested that investors with ample cash reserves would abandon bonds to pursue higher returns in the stock market.

After addressing the Joint Economic Committee of the U.S. Congress on May 22, Federal Reserve Chairman Ben Bernanke suggested in response to questions that the Federal Open Market Committee (FOMC) might begin tapering its extensive bond-purchase program, widely known as quantitative easing.

Interest rates responded by moving higher, and municipal bonds underperformed U.S. Treasury securities throughout the summer. In large measure, the underperformance was due to Detroit s Chapter 9 bankruptcy filing and Puerto Rico s fiscal crises. The weakness resulted in substantial outflows from municipal bond funds.

Meanwhile, the FOMC decided that economic conditions did not yet warrant tapering direct bond purchases. Instead, the FOMC specified the economic conditions under which a less accommodative policy might be warranted. Throughout the reporting period, no tapering materialized and the FOMC maintained the federal funds target rate in a range between zero and 0.25%.

During the reporting period, many municipal issuers came to market, seeking to take advantage of low interest rates. As supply and demand shifted, however, the municipal market remained quite challenging for issuers and investors alike.

Through all of these market developments, the portfolio managers of MainStay DefinedTerm Municipal Opportunities Fund focused on the Fund s investment objective and investment strategies. Using disciplined investment techniques, they sought to achieve results consistent with their mandate.

The following semiannual report contains more detailed information about the specific market events, securities and decisions that affected MainStay DefinedTerm Municipal Opportunities Fund during the six months ended November 30, 2013. Past performance is no guarantee of future results.

We thank you for choosing MainStay DefinedTerm Municipal Opportunities Fund, and we look forward to serving your financial needs over time.

Sincerely,

Stephen P. Fisher

President

Fund Performance and Statistics (Unaudited)

Performance data quoted represents past performance. Past performance is no guarantee of future results. Because of market volatility, current performance may be lower or higher than the figures shown. Index performance is shown for illustration purposes only. You cannot invest directly into an index. Investment return and principal value will fluctuate, and as a result, when shares are sold, they may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit mainstayinvestments.com/mmd.

- 1. Total returns assume dividends and capital gains distributions are reinvested.
- 2. The Barclays Municipal Bond Index is an unmanaged index considered representative of the broad market for investment-grade, tax-exempt bonds with a maturity of at least one year. Bonds subject to the alternative minimum tax or with floating or zero coupons are excluded. An investment cannot be made directly in an index.
- 3. The average Lipper general & insured municipal debt fund (leveraged) is representative of funds that, by portfolio practice, either invest primarily in municipal debt issues rated in the top four credit ratings or invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity, and/or reverse repurchase agreements. This benchmark is a product of Lipper Inc. Lipper Inc. is an independent monitor of fund performance. Results are based on average total returns of similar funds with all dividend and capital gain distributions reinvested.
- 4. Premium/Discount is the percentage (%) difference between the market price and the NAV price. When the market price exceeds the NAV, the Fund is trading at a Premium. When the market price is less than the NAV, the Fund is trading at a Discount.
- 5. Managed Assets is defined as the Fund s total assets, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the purpose of creating effective leverage (i.e. tender option bonds) or Fund liabilities related to liquidation preference of any preferred shares issued).
- Leverage is based on the use of proceeds received from tender option bond transactions, issuing Preferred Shares, funds borrowed from banks or other institutions or derivative transactions, expressed as a percentage of Managed Assets.
- 7. Alternative Minimum Tax (AMT) is a separate tax computation under the Internal Revenue Code that, in effect, eliminates many deductions and credits and creates a tax liability for an individual who would otherwise pay little or no tax.

Credit Quality as of November 30, 2013 (Unaudited)

Ratings apply to the underlying portfolio of bonds held by the Fund and are rated by an independent rating agency, such as Standard & Poor s (S&P), Moody s Investors Service, Inc. and/or Fitch Ratings, Inc. If ratings are provided by the ratings agencies, but differ, the higher rating will be utilized. If only one rating is provided, the available rating will be utilized. Securities that are unrated by the rating agencies are reflected as such in the breakdown. Unrated securities do not necessarily indicate low quality. S&P rates borrowers on a scale from AAA to D. AAA through BBB represent investment grade, while BB through D represent non-investment grade.

MainStay DefinedTerm Municipal Opportunities Fund 6

Portfolio Management Discussion and Analysis (Unaudited)

Questions answered by portfolio managers Robert DiMella, CFA, John Loffredo, CFA, Michael Petty, Scott Sprauer and David Dowden of MacKay Shields LLC, the Fund s Subadvisor.

How did MainStay DefinedTerm Municipal Opportunities Fund perform relative to its benchmark and peers for the six months ended November 30, 2013?

For the six months ended November 30, 2013, MainStay DefinedTerm Municipal Opportunities Fund returned 12.10% at net asset value applicable to Common shares and 15.71% at market price. At net asset value and at market price, the Fund underperformed the 2.45% return of the Barclays Municipal Bond Index¹ and the 7.58% return of the average Lippergeneral & insured municipal debt fund (leveraged) for the six months ended November 30, 2013.

What factors affected the Fund s relative performance during the reporting period?

The Fund was positioned with a longer-maturity, lower-investment-grade rating profile than the Barclays Municipal Bond Index. As municipal mutual fund outflows increased from June through August 2013, however, the municipal yield curve³ steepened and credit spreads⁴ widened. These conditions detracted from the Fund s performance relative to the Barclays Municipal Bond Index. On the upside, a lack of Puerto Rico bonds was a positive contributor to the Fund s performance relative to the Barclays Municipal Bond Index, as Puerto Rico was the worst-performing sector of the Index during the reporting period. (Contributions take weightings and total returns into account.)

How was the Fund s leverage strategy implemented during the reporting period?

The Fund's leverage percentage stayed within a specified range during the reporting period. As of November 30, 2013, the Fund's leverage was equal to 36.7% of the Fund's managed assets. However, the decline in municipal prices during the summer sell-off and the corresponding higher yields allowed the Fund to take advantage of a wider spread between long-term municipal bonds and short-term floater financing costs in its tender option bonds. These factors enabled the Fund to raise its dividend, to the benefit of the Common shareholders. While yields on most municipal bonds increased during the reporting period, the Fund's cost of borrowing on its leverage remained stable.

What was the Fund s durationstrategy during the reporting period?

As municipal rates increased substantially from June through August, we increased the Fund s duration to be longer than that of the Barclays Municipal Bond Index. As of November 30, 2013, the Fund had a duration of 9.68 years. As of the same date, the duration of the Barclays Municipal Bond Index was 5.39 years. We continue to use a position in U.S. Treasury futures to hedge some of the Fund s higher exposure in longer-maturity issues.

What specific factors, risks or market forces prompted significant decisions for the Fund during the reporting period?

A combination of factors affected the municipal market during the reporting period. Among these were stronger economic data, which prompted speculation about a rotation from bonds to equities, and suggestions that the Federal Reserve might taper its bond purchases. Financial difficulties in Detroit and Puerto Rico also affected the market. Together, these forces drew money away from municipal mutual funds in 2013. As a closed-end fund, MainStay DefinedTerm Municipal Opportunities Fund was not directly subject to the industrywide outflows. Nevertheless, these redemptions caused municipal yields to move materially higher and drove bond prices lower. This rapid change in market sentiment created opportunities for the Fund to reposition itself in several ways. We focused on selling securities that had fallen in value, as we sought to realize losses that could offset current and future gains in the Fund. Because we reinvested at higher yields, the transactions allowed us to increase monthly tax-exempt dividend distributions to holders of Common shares. During periods of institutional market illiquidity, we targeted the strong appetite for individual bonds among retail investors to execute sales at prices we viewed as favorable relative to the market. We used the proceeds to buy bonds that became available as a result of industry outflows.

During the reporting period, which market segments were the strongest contributors to the Fund s performance and which market segments were particularly weak?

Relative to the Barclays Municipal Bond Index, the most significant positive contribution to the Fund s performance came from our decision to avoid bonds issued by the Commonwealth

- 1. See footnote on page 5 for more information on Barclays Municipal Bond Index.
- 2. See footnote on page 5 for more information on Lipper Inc.
- 3. The yield curve is a line that plots the yields of various securities of similar quality typically U.S. Treasury issues across a range of maturities. The U.S. Treasury yield curve serves as a benchmark for other debt and is used in economic forecasting.
- 4. The term spread may refer to the difference in yield between a security or type of security and comparable U.S. Treasury issues. The term may also refer to the difference in yield between two specific securities or types of securities at a given time.
- 5. Duration is a measure of the price sensitivity of a fixed-income investment to changes in interest rates. Duration is expressed as a number of years and is considered a more accurate sensitivity gauge than average maturity.

mainstayinvestments.com 7

of Puerto Rico. Puerto Rico bonds underperformed the general municipal market by more than 15 percentage points. The most significant detractors from the Fund s relative performance were yield-curve positioning and credit quality. Longer-maturity municipals underperformed municipal bonds with shorter maturities, and credit spreads widened during the reporting period.

Did the Fund make any significant purchases or sales during the reporting period?

As the Fund remained focused on diversification, no individual purchase or sale was considered significant.

How did the Fund s sector, industry or state weightings change during the reporting period?

There were no material changes to the Fund s sector weightings during the reporting period. Sectors that we continued to favor were marginally increased, including transportation and water/sewer bonds. During the reporting period, we took the oppor-

tunity to lower the Fund s exposure to the special tax and health care sectors. From a state perspective, we opportunistically increased the Fund s exposure to Illinois bonds after a sell-off during the summer pushed prices lower. We also reduced exposure to Ohio and Virginia bonds.

How was the Fund positioned at the end of the reporting period?

As of November 30, 2013, the Fund was overweight relative to the Barclays Municipal Bond Index in the special tax and health care sectors. From a quality perspective, we favored credits rated A and BBB,⁶ though we increased the overall credit quality of the portfolio during the reporting period, including the percentage of AA⁷ rated credits. As of November 30, 2013, the Fund s duration was longer than that of the Barclays Municipal Bond Index.

- 6. An obligation rated A by Standard & Poor s (S&P) is deemed by S&P to be somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. In the opinion of S&P, however, the obligor s capacity to meet its financial commitment on the obligation is still strong. An obligation rated BBB by S&P is deemed by S&P to exhibit adequate protection parameters. It is the opinion of S&P, however, that adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation. When applied to Fund holdings, ratings are based solely on the creditworthiness of the bonds in the portfolio and are not meant to represent the security or safety of the Fund.
- 7. An obligation rated AA by S&P is deemed by S&P to differ from the highest-rated obligations only to a small degree. In the opinion of S&P, the obligor s capacity to meet its financial commitment on the obligation is very strong. When applied to Fund holdings, ratings are based solely on the creditworthiness of the bonds in the portfolio and are not meant to represent the security or safety of the Fund.

The opinions expressed are those of the portfolio managers as of the date of this report and are subject to change. There is no guarantee that any forecast made will come to pass. This material does not constitute investment advice and is not intended as an endorsement of any specific investment.
