STERLING BANCORP AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

Note 1. Significant Accounting Policies

Nature of Operations. Sterling Bancorp (the “parent company”) is a financial holding company, pursuant to an election made under the Gramm-Leach-Bliley Act of 1999. Throughout the notes, the term the “Company” refers to Sterling Bancorp and its subsidiaries. The Company provides a full range of financial products and services, including business and consumer loans, commercial and residential mortgage lending and brokerage, asset-based financing, factoring/accounts receivable management services, trade financing, leasing, deposit services, trust and estate administration and investment management services. The Company has operations principally in New York and conducts business throughout the United States.

The Company’s financial statements are prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) which, effective for all interim and annual periods ending after September 15, 2009, principally consist of the Financial Accounting Standards Board Accounting Standards Codification (“FASB Codification”). FASB Codification Topic 105: *Generally Accepted Accounting Principles* establishes the FASB codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with generally accepted accounting principles. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal securities laws are also sources of authoritative guidance for SEC registrants. All guidance contained in the FASB Codification carries an equal level of authority. All non-grandfathered, non-SEC accounting literature not included in the FASB Codification is superseded and deemed non-authoritative.

Basis of Presentation. The consolidated financial statements include the accounts of Sterling Bancorp and its subsidiaries, principally Sterling National Bank and its subsidiaries (the “bank”), after elimination of intercompany transactions. The consolidated financial statements as of and for the interim periods ended September 30, 2009 and 2008 are unaudited; however, in the opinion of management, all adjustments, consisting of normal recurring accruals, necessary for a fair presentation of such periods have been made. Certain reclassifications have been made to the prior year’s consolidated financial statements to conform to the current presentation. The interim consolidated financial statements should be read in conjunction with the Company’s annual report on Form 10-K for the year ended December 31, 2008 (the “2008 Form 10-K”).

Use of Estimates. The preparation of financial statements in accordance with U.S. GAAP requires management to make assumptions and estimates which impact the amounts reported in those statements and are, by their nature, subject to change in the future as additional information becomes available or as circumstances vary. Actual results could differ from management’s current estimates as a result of changing conditions and future events. The current economic environment has increased the degree of uncertainty inherent in these significant estimates. Several accounting estimates are particularly critical and are susceptible to significant near-term change, including the allowance for loan losses and asset impairment judgments, such as other-than-temporary declines in the value of securities and the accounting for income taxes. The judgments used by management in applying these critical accounting policies may be affected by a further and prolonged deterioration in the economic environment, which may result in changes to future financial results. For example, subsequent evaluations of the loan portfolio, in light of the factors then prevailing, may result in significant changes in the allowance for loan losses in future periods, and the inability to collect outstanding principal may result in increased loan losses. Certain reclassifications have been made to the prior years’ consolidated financial statements to conform to the current presentation.

Fair Value Measurements. On January 1, 2008, the Company adopted the provisions of FASB Codification Topic 820: *Fair Value Measurements* which defines fair value, establishes a framework for measuring fair value under U.S. GAAP, and expands disclosures about fair value measurements (See Note 9. Fair Value Measurements). The Company also adopted FASB Codification Topic 825: *Financial Instruments* on January 1, 2008 but did not elect the fair value option for any of its financial assets or financial liabilities.

Edgar Filing: STERLING BANCORP - Form 10-Q

Note 2. Loans

STERLING BANCORP AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

The Company invests principally in obligations of U.S. government corporations and government sponsored enterprises and other investment-grade securities. The fair value of these investments fluctuates based on several factors, including credit quality and general interest rate changes. The Company determined that it is not more likely than not that the Company would be required to sell before anticipated recovery.

At September 30, 2009, approximately \$153 million, representing approximately 21.2%, of the Company's held to maturity and available for sale securities are comprised of securities issued by financial service companies/banks including trust preferred securities (21 issuers), corporate debt (16 issuers) and equity securities (8 issuers). These investments may pose a higher risk of future impairment charges as result of a continued deterioration of the U.S. economy. The Company would be required to recognize impairment charges on these securities if they suffer a decline in value that is considered other-than-temporary. Numerous factors, including lack of liquidity for re-sales of certain investment securities, absence of reliable pricing information for investment securities, adverse changes in business climate, adverse actions by regulators or unanticipated changes in the competitive environment could have a negative effect on the Company's investment portfolio and may result in other-than-temporary impairment on certain investment securities in future periods.

At September 30, 2009, the Company held 2 mortgage-backed securities issued by U.S. government sponsored enterprises and 1 agency debt security, in the available for sale portfolio, that were in an unrealized loss position for more than 12 months. Management has concluded that the unrealized losses are due to changes in market interest rates and/or changes in securities markets which resulted from temporary illiquidity and/or uncertainty in those markets. As a result, the unrealized losses are deemed to be temporary.

At September 30, 2009, the Company held 26 debt securities positions issued by commercial and industrial enterprises, in the available for sale portfolio, all of which are paying in accordance with their terms and have no deferrals of interest or principal. All of these debt securities mature within the next 16 months. Management performs an initial credit review prior to purchasing these securities and monitors their performance on a quarterly basis. Based upon management's review of the issuers, their performance record for paying all principal and interest when due and the relatively short-term maturity of each issue, the unrealized losses are deemed to be temporary.

At September 30, 2009, the Company held 7 securities positions of single-issuer, trust preferred securities and 31 security positions of corporate debt securities issued by financial institutions, in the available for sale portfolio, all of which are paying in accordance with their terms and have no deferrals of interest or other deferrals. In addition, management analyzes the performance of the issuers on a periodic basis, including a review of the issuers most recent bank regulatory report to assess credit risk and the probability of impairment of the contractual cash flows of the applicable securities. Based upon management's third quarter review, all of the issuers have maintained performance levels adequate to support the contractual cash flows of the securities.

			\$ 5,603	\$ 5,179	\$ (424)

At September 30, 2009, the Company held 3 mortgage-backed debt securities, in the held to maturity portfolio, that were in an unrealized loss position for more than 12 months. All of these securities were obligations of U.S. government corporations or government sponsored enterprises which guarantee principal and interest payments. Management has concluded that the unrealized losses are due to changes in market interest rates and/or changes in securities markets which resulted from temporary illiquidity and/or uncertainty in those markets. Further, management has made an evaluation that it has the intent to hold these securities until their maturity and it is not more likely than not that the Company would be required to sell before anticipated recovery. As a result, the unrealized losses are deemed to be temporary.

Information regarding sales and/or calls of the available for sale securities is as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in thousands)			
Proceeds	\$ 143,682	\$ 0	\$ 396,526	\$ 0
Gross gains	1,221	0	5,160	0
Gross losses	0	0	0	0

There were no sales and/or calls of held to maturity securities in 2009 or 2008.

During the three months ended September 30, 2008, the Company incurred an other-than-temporary impairment charge of approximately \$1.2 million on a corporate debt security that was recorded in securities losses. The charge resulted from management's regular review of the investment portfolio and reduced the carrying amount of the security to approximately \$2.6 million. This corporate debt security was sold in October 2008 at a price equal to its reduced carrying amount.

In addition, in the second quarter 2008, the Company incurred an other-than-temporary charge of approximately \$507 thousand against a single-issuer, investment grade trust preferred security that was recorded in securities losses. The charge resulted from management's regular review of the valuation of the investment portfolio and reduced the carrying amount of the security to approximately \$493 thousand. This trust preferred security was sold in June 2009 at a price in excess of its reduced carrying amount, resulting in a \$233,000 gain.

Investment securities are pledged to secure trust and public deposits, securities sold under agreements to repurchase, borrowings from the Federal Home Loan Bank of New York, and/or the Federal Reserve Bank of New York, and/or other purposes required or permitted by law.

Note 4. Noninterest income and expenses

The following tables set forth the significant components of noninterest income and noninterest expenses:

Note 5. Employee Benefit Plans

The following table sets forth the components of net periodic benefit cost for the Company's noncontributory defined benefit pension plan and unfunded supplemental retirement plan.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
	(in thousands)			
Service cost	\$ 620	\$ 510	\$ 1,626	\$ 1,503
Interest cost	959	809	2,467	2,313
Expected return on plan assets	(760)	(714)	(1,906)	(2,009)
Amortization of prior service cost	17	17	50	50
Recognized actuarial loss	974	415	2,570	1,255
Net periodic benefit cost	\$ 1,810	\$ 1,037	\$ 4,807	\$ 3,112

The Company has contributed approximately \$2.0 million to the defined benefit pension plan in 2009.

Note 6. Income Taxes

The Internal Revenue Service ("IRS") has completed its examination of the Company's federal tax returns for the years 2002 through 2004 and has issued a report disallowing certain bad debt deductions arising from the worthlessness of loans made to customers. The Company, assisted by outside counsel, has prepared a written protest which vigorously challenges all of the IRS findings and the Company will exercise its right to a conference with the Appeals Office of the IRS to discuss the issues and arguments raised in the Company's protest. The Company and its outside counsel believe that the bad debt deductions were proper and that the position of the IRS is unsupported as a matter of fact and law.

Note 7. Segment Reporting

The Company provides a broad range of financial products and services, including commercial loans, asset-based financing, factoring and accounts receivable management services, trade financing, equipment leasing, corporate and consumer deposit services, commercial and residential mortgage lending and brokerage, trust and estate administration and investment management services. The Company's primary source of earnings is net interest income, which represents the difference between interest earned on interest-earning assets and the interest incurred on interest-bearing liabilities. The Company's 2009 year-to-date average interest-earning assets were 61.2% loans (corporate lending was 67.6% and real estate lending was 27.6% of total loans, respectively) and 36.8% investment securities and money market investments. There are no industry concentrations exceeding 10% of loans, gross, in the corporate lending segment. Approximately 75% of loans are to borrowers located in the metropolitan New York area. In order to comply with the segment reporting guidance under U.S. GAAP, the Company has determined that it has three reportable operating segments: corporate lending, real estate lending and company-wide treasury.

Note 9. Fair Value Measurements

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are independent, knowledgeable, able to transact and willing to transact.

FASB Codification Topic 820: *Fair Value Measurements and Disclosures* establishes a hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair values hierarchy is as follows:

- *Level 1 Inputs* - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Examples of financial instruments generally included in this level are U.S. Treasury securities, equity and trust preferred securities that trade in active markets and listed derivative instruments.
- *Level 2 Inputs* - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means. Examples of financial instruments generally included in this level are corporate debt, mortgage-backed certificates issued by U.S. government corporations and government sponsored enterprises, equity securities that trade in less active markets and certain derivative instruments.
- *Level 3 Inputs* - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own judgments about the assumptions that market participants would use in pricing the assets or liabilities. Examples of financial instruments generally included in this level are private equities, certain loans held for sale and other alternative investments.

In general, fair value of securities is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon market prices determined by an outside, independent entity that primarily uses as inputs, observable market-based parameters. Fair value of loans held for sale is based upon internally developed models that primarily use as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. A more detailed description of the valuation methodologies used for assets and liabilities measured at fair value is set forth in the 2008 Form 10-K.

Certain financial assets and financial liabilities, including impaired loans, are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table summarizes the period end fair value of financial assets, based on significant

Edgar Filing: STERLING BANCORP - Form 10-Q

unobservable (Level 3) inputs, measured on a non-recurring basis:

	September 2009	December 31, 2008
--	-------------------	----------------------

(in thousands)

Impaired loans	\$ 3,741	\$ 4,203
----------------	----------	----------

Non-Financial Assets and Non-Financial Liabilities: Certain non-financial assets measured at fair value on a non-recurring basis include foreclosed assets (upon initial recognition or subsequent impairment), non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment.

STERLING BANCORP AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

During the third quarter of 2009, certain foreclosed assets, upon initial recognition, were remeasured and reported at fair value through a charge-off to the allowance for loan losses based upon the fair value of the foreclosed asset. The fair value of a foreclosed asset, upon initial recognition, is estimated using level 2 inputs based on observable market data or level 3 inputs based on customized discount criteria. Foreclosed assets measured at fair value upon initial recognition totaled \$1.3 million (utilizing level 2 valuation inputs) during the three months ended September 30, 2009. In connection with the measurement and initial recognition of the foregoing foreclosed assets, the Company recognized charge-offs in the allowance for loan losses totaling \$331 thousand. Other than foreclosed assets measured at fair value upon initial recognition, two foreclosed properties were remeasured at fair value during the three months ended September 30, 2009 resulting in a \$90 thousand charge to noninterest expense.

FASB Codification Topic 825: *Financial Instruments* requires disclosures about the fair value of financial instruments for interim reporting periods as well as in annual financial statements. For those financial instruments that are not recorded at fair value in the Consolidated Balance Sheets, but are measured at fair value for disclosure purposes, management follows the same fair value measurement principles and guidance as for instruments recorded at fair value.

Much of the information used to arrive at “fair value” is highly subjective and judgmental in nature and therefore the results may not be precise. The subjective factors include, among other things, estimated cash flows, risk characteristics, credit quality and interest rates, all of which are subject to change. With the exception of investment securities and long-term debt, the Company’s financial instruments are not readily marketable and market prices do not exist. Since negotiated prices for the instruments that are not readily marketable depend greatly on the motivation of the buyer and seller, the amounts that will actually be realized or paid per settlement or maturity of the instruments could be significantly different.

A more detailed description of the methods, factors and significant assumptions utilized in estimating the fair values for significant categories of financial instruments is set forth in the 2008 Form 10-K.

Notes to Consolidated Financial Statements
(Unaudited)

Note 10. New Accounting Standards

On January 1, 2009, the Company adopted amendments to FASB Codification Topic 815: *Derivatives and Hedging*, which expand the disclosure requirements to provide greater transparency about (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedge items are accounted for, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, U.S. GAAP requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. The adoption of these amendments did not have a significant impact on the Company's financial statements.

FASB Codification Topic 855: *Subsequent Events* establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. U.S. GAAP specifies that (i) the period after the balance sheet date during which a reporting entity's management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and (iii) disclosures an entity should make about events or transactions that occurred after the balance sheet date. The Company evaluates subsequent events through the date that the financial statements are issued. Subsequent events guidance under U.S. GAAP became effective for the Company's financial statements for periods ending after June 15, 2009 and did not have a significant impact on the Company's financial statements.

FASB Codification Topic 860: *Transfers and Servicing* includes amendments to improve the relevance, representational faithfulness and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. The amendments to U.S. GAAP guidance on transfer and servicing of financial assets eliminate the concept of a "qualifying special-purpose entity", change the requirements for derecognizing financial assets and requires additional disclosures about all continuing involvements with transferred financial information about gains and losses (resulting from transfers) during the period. These amendments will be effective January 1, 2010 and are not expected to have a significant impact on the Company's financial statements.

Amendments to FASB Codification Topic 810: *Consolidation* change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design as well as its ability to direct the activities of the entity that most significantly impact the entity's economic performance. The amendments to U.S. GAAP require additional disclosures about the reporting entity's involvement with variable-interest entities, as well as any significant changes in risk exposure due to that involvement and its effect on the entity's financial statements. These amendments will be effective January 1, 2010 and are not expected to have a significant impact on the Company's financial statements.

STERLING BANCORP AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

In April 2009, FASB issued the following Staff Positions that amended the FASB Codification:

Effective for the Company's interim period ended June 30, 2009, FASB Codification Topic 820: *Fair Value Measurements and Disclosures* was amended to provide additional guidance for estimating fair value when the volume and level of activity for the asset or liability have decreased significantly. The amendments also provide guidance on identifying circumstances that indicate a transaction is not orderly. The adoption of these amendments did not have a material impact on the Company's financial statements.

FASB Codification Topic 825: *Financial Instruments* now requires enhanced disclosures about the fair value of financial instruments in interim reporting periods of publicly traded companies that were previously only required to be disclosed in annual financial statements. The provisions of these amendments were effective for the Company's interim period ending on June 30, 2009. Since the new requirements only enhance disclosure about fair value of financial instruments in interim periods, the adoption of these amendments did not have a material impact on the Company's financial statements.

FASB Codification Topic 320: *Investments-Debt and Equity Securities* was amended to make the other-than-temporary impairment guidance more operational and to improve the presentation and disclosure of other-than-temporary impairment on debt and equity securities in the financial statements. Existing U.S. GAAP regarding the recognition and measurement of other-than-temporary impairment of equity securities remains unchanged. The amendments were effective for the Company's interim period ending on June 30, 2009, and their adoption did not have a material impact on the Company's financial statements.

FASB Codification Topic 805: *Business Combinations* was amended to require that assets acquired and liabilities assumed in a business combination that arise from contingencies be recognized at fair value if fair value can be reasonably estimated. If fair value of such an asset or liability cannot be reasonably estimated, the asset or liability would generally be recognized in accordance with FASB Codification Topic 450: *Contingencies*. Certain guidance on accounting for contingencies in a business combination is no longer provided by U.S. GAAP. Instead, entities are required to develop a systematic and rational basis for subsequently measuring and accounting for assets and liabilities arising from contingencies. The amendments eliminate the requirement to disclose and estimate the range of outcomes of recognized contingencies at the acquisition date. For unrecognized contingencies, entities are required to include only the disclosures specified in FASB Codification Topic 805. Under these amendments, contingent consideration arrangements of an acquiree that are assumed by the acquirer in a business combination should be treated as contingent consideration of the acquirer and should be initially and subsequently measured at fair value in accordance with U.S. GAAP on business combinations. The amendments to FASB Codification Topic 805: *Business Combinations* are effective for assets or liabilities arising from contingencies the Company acquires in business combinations occurring after January 1, 2009.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following commentary presents management's discussion and analysis of the financial condition and results of operations of Sterling Bancorp (the "parent company"), a financial holding company under the Gramm-Leach-Bliley Act of 1999, and its subsidiaries, principally Sterling National Bank. Throughout this discussion and analysis, the term the "Company" refers to Sterling Bancorp and its subsidiaries and the term the "bank" refers to Sterling National Bank and its subsidiaries. This discussion and analysis should be read in conjunction with the consolidated financial statements and supplemental data contained elsewhere in this quarterly report and the Company's annual report on Form 10-K for the year ended December 31, 2008. Certain reclassifications have been made to prior years' financial data to conform to current financial statement presentations.

OVERVIEW

The Company provides a broad range of financial products and services, including business and consumer loans, commercial and residential mortgage lending and brokerage, asset-based financing, factoring/accounts receivable management services, deposit services, trade financing, equipment leasing, trust and estate administration and investment management services. The Company has operations in the New York metropolitan area and conducts business throughout the United States. The general state of the U.S. economy and, in particular, economic and market conditions in the metropolitan New York area have a significant impact on loan demand, the ability of borrowers to repay these loans and the value of any collateral securing these loans and may also affect deposit levels. Accordingly, future general economic conditions are a key uncertainty that management expects will materially affect the Company's results of operations.

For the nine months ended September 30, 2009, the bank's average earning assets represented approximately 97.7% of the Company's average earning assets. Loans represented 61.1% and investment securities represented 36.8% of the bank's average earning assets for the first nine months of 2009.

The Company's primary source of earnings is net interest income, and its principal market risk exposure is interest rate risk. The Company is not able to predict market interest rate fluctuations, and its asset-liability management strategy may not prevent interest rate changes from having a material adverse effect on the Company's results of operations and financial condition.

Although management endeavors to minimize the credit risk inherent in the Company's loan portfolio, it must necessarily make various assumptions and judgments about the collectibility of the loan portfolio based on its experience and evaluation of economic conditions. If such assumptions or judgments prove to be incorrect, the current allowance for loan losses may not be sufficient to cover loan losses and additions to the allowance may be necessary, which would have a negative impact on net income.

There is intense competition in all areas in which the Company conducts its business. The Company competes with banks and other financial institutions, including savings and loan associations, savings banks, finance companies and credit unions. Many of these competitors have substantially greater resources and lending limits and provide a wider array of banking services. To a limited extent, the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, consumer finance companies and insurance companies. Competition is based on a number of factors, including prices, interest rates, service, availability of products and geographic location.

Edgar Filing: STERLING BANCORP - Form 10-Q

The Company regularly evaluates acquisition opportunities and conducts due diligence activities in connection with possible acquisitions. As a result, acquisition discussions, and in some cases negotiations, regularly take place and future acquisitions could occur.

INCOME STATEMENT ANALYSIS

Net interest income, which represents the difference between interest earned on interest-earning assets and interest incurred on interest-bearing liabilities, is the Company's primary source of earnings. Net interest income can be affected by changes in market interest rates as well as the level and composition of assets, liabilities and shareholders' equity. Net interest spread is the difference between the average rate earned, on a tax-equivalent basis, on interest-earning assets and the average rate paid on interest-bearing liabilities. The net yield on interest-earning assets ("net interest margin") is calculated by dividing tax-equivalent net interest income by average interest-earning assets. Generally, the net interest margin will exceed the net interest spread because a portion of interest-earning assets are funded by various noninterest-bearing sources, principally noninterest-bearing deposits and shareholders' equity. The increases (decreases) in the components of interest income and interest expense, expressed in terms of fluctuation in average volume and rate, are provided in the Rate/Volume Analysis shown on pages 47 and 48. Information as to the components of interest income and interest expense and average rates is provided in the Average Balance Sheets shown on pages 45 and 46.

Comparison of the Three Months Ended September 30, 2009 and 2008

The Company reported net income available to common shareholders for the three months ended September 30, 2009 of \$1.8 million, representing \$0.10 per share calculated on a diluted basis, compared to \$3.8 million, or \$0.21 per share calculated on a diluted basis, for the third quarter of 2008. The \$2.0 million decrease in net income available to common shareholders was primarily due to a \$5.0 million increase in the provision for loans losses, a \$1.5 million increase in noninterest expenses and a \$0.6 million increase in dividends and accretion related to the preferred shares issued to the U.S. Treasury under the TARP Capital Purchase Program, which more than offset a \$4.5 million increase in noninterest income, a \$0.3 million increase in net interest income and a lower provision for income taxes.

Net Interest Income

Net interest income, on a tax-equivalent basis, was \$22.3 million for the third quarter of 2009 compared to \$21.8 million for the 2008 period. Net interest income benefitted from higher average loan balances, lower interest-bearing deposit balances and lower cost of funding. Partially offsetting those benefits was the impact of lower yields on loans and investment securities, lower investment securities outstanding and higher borrowed funds balances. The net interest margin, on a tax-equivalent basis, was 4.53% for the third quarter of 2009 compared to 4.46% for the 2008 period. The net interest margin was impacted by the lower interest rate environment in 2009, the higher level of noninterest-bearing demand deposits and the effect of higher average loans outstanding.

Edgar Filing: STERLING BANCORP - Form 10-Q

Total interest income, on a tax-equivalent basis, aggregated \$27.1 million for the third quarter of 2009, down \$3.0 million from the 2008 period. The tax-equivalent yield on interest-earning assets was 5.53% for the third quarter of 2009 compared to 6.19% for the 2008 period.

Interest earned on the loan portfolio decreased to \$18.0 million for the third quarter of 2009 from \$20.4 million in the prior year period. Average loan balances amounted to \$1,189.0 million, an increase of \$16.3 million from an average of \$1,172.7 million in the prior year period. The increase in average loans, primarily due to the Company's business development activities, accounted for a \$0.2 million increase in interest earned on loans. The decrease in the yield on the loan portfolio to 6.25% for the third quarter of 2009 from 6.99% for the 2008 period was primarily attributable to the lower interest rate environment in 2009 and the mix of average outstanding balances among the components of the loan portfolio.

Interest earned on the securities portfolio, on a tax-equivalent basis, decreased to \$8.8 million for the third quarter of 2009 from \$9.5 million in the prior year period. Average outstandings decreased to \$726.9 million (36.8% of average earning assets) for the third quarter of 2009 from \$755.4 million (38.8% of average earning assets) in the prior year period. The decrease reflects the impact of the Company's asset/liability management strategy designed to shorten the average life of the portfolio. The average life of the securities portfolio was approximately 4.6 years at September 30, 2009 compared to 7.1 years at September 30, 2008. The average yield in the investment securities portfolio decreased to 4.87% from 5.01% reflecting the impact of the above referenced asset/liability management strategy coupled with calls of higher yielding securities.

Total interest expense decreased by \$3.5 million for the third quarter of 2009 from \$8.3 million for the 2008 period, primarily due to the impact of lower rates paid for interest-bearing deposits and borrowings and lower interest-bearing deposits.

Interest expense on deposits decreased to \$2.8 million for the third quarter of 2009 from \$5.1 million for the 2008 period, due to decreases in the cost of those funds and lower balances. The average rate paid on interest-bearing deposits was 1.23%, which was 84 basis points lower than the prior year period. The decrease in average cost of deposits reflects the lower interest rate environment during 2009. Average interest-bearing deposits were \$903.9 million for the third quarter of 2009 compared to \$976.7 million for the prior year period, reflecting the Company's strategy to reduce reliance on higher-priced deposits.

Interest expense on borrowings decreased to \$1.9 million for the third quarter of 2009 from \$3.2 million for the 2008 period, primarily due to lower rates paid for borrowed funds coupled with the benefit (reflected in the volume change) derived from the elimination of funding through dealer repurchase agreements and short-term Federal Home Loan Bank borrowings partially offset by increased short-term borrowings from the Federal Reserve Bank (reflected in the volume change). The average rate paid for borrowed funds was 1.58%, which was 107 basis points lower than the prior year period. The decrease in the average cost of borrowings reflects the lower interest rate environment in 2009. Average borrowings increased to \$490.8 million for the third quarter of 2009 from \$482.4 million in the prior year period, reflecting greater reliance by the Company on wholesale funding.

Provision for Loan Losses

Based on management's continuing evaluation of the loan portfolio (discussed under "Asset Quality" on page 38), the provision for loan losses for the third quarter of 2009 was \$7.0 million, compared to \$2.0 million for the prior year period. Factors affecting the larger provision for the third quarter of 2009 included further deterioration of economic conditions during the quarter, a \$4.3 million increase in net charge-offs, a \$13.0 million increase in nonaccrual loans and growth in the loan portfolio.

Noninterest Income

Noninterest income increased to \$11.7 million for the third quarter of 2009 from \$7.2 million in the 2008 period. The increase principally resulted from the benefit derived from securities gains recognized in the 2009 third quarter compared to securities losses recognized in the 2008 period. Also contributing to the increase were higher income related to accounts receivable management and factoring services, higher mortgage banking income and higher service charges on deposit accounts. In connection with an asset liability management program designed to reduce the average life of the investment securities portfolio, the Company sold in the third quarter approximately \$82 million of securities with a weighted average life of approximately 3 years at a gain of \$1.2 million. The Company expects to reinvest a significant portion of the proceeds in securities with an average life of less than two years. The 2008 amount was reduced by an other-than-temporary impairment charge for a debt security. The charge, which resulted from management's regular review of the valuation of the investment portfolio, amounted to approximately \$1.2 million and reduced the carrying amount of the security to \$2.6 million. Commissions and other fees earned from accounts receivable management and factoring services were higher primarily due to the impact of the acquisition of the business of DCD Finance Inc. on April 6, 2009. Partially offsetting that benefit was the impact of reduced volume of billing by clients providing temporary staffing. The increase in mortgage banking income was due to higher volume of loans sold.

Noninterest Expenses

Noninterest expenses for the third quarter of 2009 increased \$1.5 million when compared to the 2008 period. The increase was primarily due to the impact of the acquisition of the business of DCD Finance Inc. on April 6, 2009 and higher deposit insurance and pension costs. Partially offsetting those increases was a reduction in professional fees. The increase in deposit insurance cost was primarily due to the significant increase in quarterly FDIC premium rates. On September 29, 2009, the FDIC amended its plan for returning the Deposit Insurance Fund ("DIF") to its statutorily mandated minimum reserve ratio within eight years by, among other things, increasing assessment rates by a uniform three basis points effective January 1, 2011. In conjunction with the amended plan, the FDIC proposed a rule that would require insured institutions to prepay their estimated quarterly assessments through December 31, 2012 to strengthen the cash position of the DIF. The proposed rule would require the cash prepayment on December 30, 2009. The bank estimates that its prepayment would be approximately \$8.0 million.

Edgar Filing: STERLING BANCORP - Form 10-Q

The increase in pension expense was primarily the result of a weaker return on plan assets during 2008. The Company's defined benefit retirement plan was closed to new members effective as of January 3, 2007. There have been no new participants in the Company's Supplemental Executive Retirement Plan ("SERP"). The defined benefit plan was replaced by an enhanced 401(k) contribution for new employees. The Company still has funding obligations related to the defined benefit retirement and SERP plans and will recognize retirement expense related to these plans in future years, which will be dependent on the return earned on plan assets, the level of interest rates, salary increases, employee turnover and other factors. The reduction in professional fees was primarily due to lower audit and examination expenses.

Provision for Income Taxes

The provision for income taxes for the third quarter of 2009 decreased to \$1.2 million from \$1.5 million for the third quarter of 2008. The decrease was primarily due to the lower level of pre-tax income in the 2009 period.

Comparison of the Nine Months Ended September 30, 2009 and 2008

The Company reported net income available to common shareholders for the nine months ended September 30, 2009 of \$4.7 million, representing \$0.26 per share calculated on a diluted basis, compared to \$12.0 million, or \$0.66 per share calculated on a diluted basis, for the first nine months of 2008. The \$7.3 million decrease in net income available to common shareholders was primarily due to a \$13.9 million increase in the provision for loan losses, a \$4.4 million increase in noninterest expenses and a \$2.1 million increase in dividends and accretion related to the preferred shares issued to the U.S. Treasury under the TARP Capital Purchase Program, which more than offset a \$8.9 million increase in noninterest income, a \$1.6 million increase in net interest income and a lower provision for income taxes.

Net Interest Income

Net interest income, on a tax-equivalent basis, was \$65.4 million for the first nine months of 2009 compared to \$63.4 million for the 2008 period. Net interest income benefitted from higher average loan balances, lower interest-bearing deposit balances and lower cost of funding. Partially offsetting those benefits was the impact of lower yield on loans and investment securities, lower investment securities balances and higher borrowed funds balances. The net interest margin, on a tax-equivalent basis, was 4.58% for the first nine months of 2009 compared to 4.53% for the 2008 period. The net interest margin was impacted by the lower interest rate environment in 2009, the lower level of noninterest-bearing demand deposits and the effect of higher average loans outstanding.

Total interest income, on a tax-equivalent basis, aggregated \$80.2 million for the first nine months of 2009, down \$9.6 million from the 2008 period. The tax-equivalent yield on interest-earning assets was 5.64% for the first nine months of 2009 compared to 6.45% for the 2008 period.

Interest earned on the loan portfolio decreased to \$53.8 million for the first nine months of 2009 from \$61.2 million for the prior year period. Average loan balances amounted to \$1,185.0 million, an increase of \$54.7 million from an average of \$1,130.3 million in the prior year period. The increase in average loans, primarily due to the Company's business development activities, accounted for a \$2.7 million increase in interest earned on loans. The yield on the loan portfolio decreased to 6.32% for the first nine months of 2009 from 7.46% for the 2008 period, which was primarily attributable to the lower interest rate environment in 2009 and the mix of average outstanding balances among the components of the loan portfolio.

Edgar Filing: STERLING BANCORP - Form 10-Q

Interest earned on the securities portfolio, on a tax-equivalent basis, decreased to \$25.9 million for the first nine months of 2009 from \$28.1 million in the prior year period. Average outstandings decreased to \$712.2 million (36.8% of average earning assets) for the first nine months of 2009 from \$745.6 million (39.4% of average earning assets) in the prior year period. The decrease reflects the impact of the Company's asset/liability management strategy designed to shorten the average life of the portfolio. The average life of the securities portfolio was approximately 4.6 years at September 30, 2009 compared to 7.1 years at September 30, 2008. The average yield on the investment securities portfolio decreased to 4.86% from 5.02%, reflecting the impact of the above referenced asset/liability management strategy coupled with calls of higher yielding securities.

Total interest expense decreased by \$11.6 million for the first nine months of 2009 from \$26.5 million for the 2008 period, primarily due to the impact of lower rates paid for interest-bearing deposits and borrowings and lower interest-bearing deposit balances.

Interest expense on deposits decreased to \$9.1 million for the first nine months of 2009 from \$17.1 million for the 2008 period, primarily due to a decrease in the cost of those funds. The average rate paid on interest-bearing deposits was 1.35%, which was 96 basis points lower than the prior year period. The decrease in average cost of deposits reflects the lower interest rate environment during 2009. Average interest-bearing deposits were \$902.4 million for the first nine months of 2009 compared to \$990.8 million for the prior year period, reflecting the Company's strategy to reduce reliance on higher-priced certificates of deposit.

Interest expense on borrowings decreased to \$5.8 million for the first nine months of 2009 from \$9.3 million for the 2008 period, primarily due to lower rates paid for borrowed funds coupled with the benefit (reflected in the volume change) derived from the elimination of funding through dealer repurchase agreements partially offset by increased short-term borrowings from the Federal Reserve Bank (reflected in the volume change). The average rate paid for borrowed funds was 1.60%, which was 135 basis points lower than the prior year period. The decrease in the average cost of borrowings reflects the lower interest rate environment in 2009. Average borrowings increased to \$482.9 million for the first nine months of 2009 from \$421.8 million in the prior year period, reflecting greater reliance by the Company on wholesale funding.

Provision for Loan Losses

Based on management's continuing evaluation of the loan portfolio (discussed under "Asset Quality" on page 38), the provision for loan losses for the first nine months of 2009 was \$20.0 million, compared to \$6.1 million for the prior year period. Factors affecting the larger provision for the first nine months of 2009 included further deterioration of economic conditions during that period, a \$11.8 million increase in net charge-offs, a \$13.0 million increase in nonaccrual loans and growth in the loan portfolio.

Noninterest Income

Noninterest income increased to \$33.3 million for the first nine months of 2009 from \$24.5 million in the 2008 period. The increase principally resulted from securities gains recognized in the 2009 period compared to securities losses recognized in the 2008 period. Also contributing to the increase were higher income related to accounts receivable management and factoring services, higher mortgage banking income, and higher service charges on deposit accounts. In connection with an asset liability management program designed to reduce the average life of the investment securities portfolio, the Company sold approximately \$206 million of securities with a weighted average life of approximately 3.5 years. The Company expects to reinvest a significant portion of the proceeds in securities with an average life of less than two years. The 2008 amount was reduced by other-than-temporary impairment charges which resulted from management's regular review of the investment portfolio. One charge, taken in the second quarter of 2008 for a single-issuer, investment grade trust preferred security, amounted to approximately \$0.5 million and reduced the carrying amount of the security to \$0.5 million. A second charge, taken in the third quarter of 2008 for a debt security, amounted to approximately \$1.2 million and reduced the carrying amount of the security to \$2.6 million. Commissions and other fees earned from accounts receivable management and factoring services were higher primarily due to the impact of the acquisition of the business of DCD Finance Inc. on April 6, 2009. Partially offsetting that benefit was the impact of reduced volume of billing by clients providing temporary staffing. The increase in mortgage banking income was due to higher volume of loans sold.

Noninterest Expenses

Noninterest expenses for the first nine months of 2009 increased \$4.4 million when compared to the 2008 period. The increase was primarily due to the impact of the acquisition of the business of DCD Finance Inc. on April 6, 2009 and higher deposit insurance and pension costs. The increase in deposit insurance cost was due to a special assessment levied in the 2009 second quarter by the FDIC on all insured depository institutions totaling 5 basis points of each institution's total assets less Tier 1 capital as of June 30, 2009, not to exceed 10 basis points of domestic deposits. The special assessment is part of the FDIC's effort to rebuild the DIF. Deposit insurance expense during the nine months ended September 30, 2009 included a \$1.0 million accrual related to the special assessment. Also contributing to the increase in deposit insurance costs was the significant increase in quarterly FDIC premium rates. On September 29, 2009, the FDIC amended its plan for rebuilding the DIF. Under the amended plan, the FDIC increased assessment rates by a uniform three basis points effective January 1, 2011 and will not impose additional special assessments in 2009. In conjunction with the amended plan, the FDIC proposed a rule that would require insured institutions to prepay the cash position of the DIF. The proposed rule would require the cash prepayment on December 30, 2009. The bank estimates that its prepayment would be approximately \$8.0 million.

The increase in pension expense was primarily the result of weaker return on plan assets during 2008. The Company's defined benefit retirement plan was closed to new members effective as of January 3, 2007. There have been no new participants in the Company's SERP. The defined benefit plan was replaced by an enhanced 401(k) contribution for new employees. The Company still has funding obligations related to the defined benefit retirement and SERP plans and will recognize retirement expense related to these plans in future years, which will be dependent on the return earned on plan assets, the level of interest rates, salary increases, employee turnover and other factors.

Provision for Income Taxes

The provision for income taxes for the first nine months of 2009 decreased to \$3.9 million from \$6.5 million for the first nine months of 2008. The decrease was primarily due to the lower level of pre-tax income in the 2009 period.

BALANCE SHEET ANALYSIS*Securities*

At September 30, 2009, the Company's portfolio of securities totaled \$722.6 million, of which obligations of U.S. government corporations and government-sponsored enterprises amounted to \$502.3 million, (69.5% of total investment securities), corporate debt securities amounted to \$147.7 million (20.4% of total investment securities) and obligations of states and political subdivisions amounted to \$67.1 million (9.3% of total investment securities). The Company has the intent and ability to hold to maturity securities classified as "held to maturity". These securities are carried at cost, adjusted for amortization of premiums and accretion of discounts. The gross unrealized gains and losses on "held to maturity" securities were \$12.5 million and \$0.3 million, respectively. Securities classified as "available for sale" may be sold in the future, prior to maturity. These securities are carried at estimated fair value. Net aggregate unrealized gains or losses on these securities are included in a valuation allowance account and are shown net of taxes, as a component of shareholders' equity. Given the generally high credit quality of the portfolio, management expects to realize all of its investment upon market recovery or the maturity of such instruments and thus believes that any impairment in value is interest rate related and therefore temporary. "Available for sale" securities included gross unrealized gains of \$5.3 million and gross unrealized losses of \$1.4 million. After reviewing all investment securities the Company holds in order to determine if the decline in the fair value of any security appears to be other-than-temporary, management expects to realize all of its investment upon the maturity of such instruments and, thus, believes that any fair value impairment is temporary. Management has made an evaluation it is not more likely than not that the Company would be required to sell before anticipated recovery of the full carrying value of its investment.

In connection with an asset liability management program designed to reduce the average life of the investment securities portfolio, the Company sold approximately \$206 million of securities with a weighted average life of approximately 3.5 years during the first nine months of 2009. The Company expects to reinvest a significant portion of the proceeds in securities with an average life of less than two years.

The following table presents information regarding the average life and yields of certain available for sale ("AFS") and held to maturity ("HTM") securities:

	Weighted Average Life		Weighted Average Yield	
	AFS	HTM	AFS	HTM
September 30, 2009				
Mortgage-backed securities	3.8 Years	2.8 Years	4.51%	4.48%
Agency notes (with original call dates ranging between 3 and 36 months)	10.3 Years	5.8 Years	5.08%	5.45%
Corporate debt securities	1.7 Years	-	4.76%	-
Obligations of state and political subdivisions ⁽¹⁾ tax equivalent	5.2 Years	9.3 Years	6.04% ⁽¹⁾	6.38% ⁽¹⁾

Edgar Filing: STERLING BANCORP - Form 10-Q

Loan Portfolio

One of Management's objectives is to maintain the quality of the loan portfolio. The Company seeks to achieve this objective by maintaining rigorous underwriting standards coupled with regular evaluation of the creditworthiness of, and the designation of lending limits for, each borrower. The portfolio strategies include seeking industry and loan size diversification in order to minimize credit exposure and originating loans in markets with which the Company is familiar.

The Company's commercial and industrial loan and factored receivables portfolios represent approximately 56% of all loans. Loans in this category are typically made to small- and medium-sized businesses and range between \$25,000 and \$10 million. The Company's real estate mortgage portfolio, which represents approximately 23% of all loans, is comprised of mortgages secured by real property located principally in the states of New York, New Jersey, Virginia and North Carolina. The Company's leasing portfolio, which consists of finance leases for various types of business equipment, represents approximately 17% of all loans. Sources of repayment are the borrower's operating profits, cash flows and liquidation of pledged collateral. Based on underwriting standards, loans may be secured in whole or in part by collateral such as liquid assets, accounts receivable, equipment, inventory and real property. The collateral securing any loan or lease may depend on the type of loan or lease and may vary in value based on market conditions.

The following table sets forth the composition of the Company's loans held for sale and loans held in portfolio:

	September 30,			
	2009		2008	
	(dollars in thousands)			
	Balances	% of Total	Balances	% of Total
Domestic

Loans, net of unearned discounts	\$ 1,233,570	100.00%	\$ 1,198,913	100.00%

Asset Quality

Intrinsic to the lending process is the possibility of loss. In times of economic slowdown, the risk of loss inherent in the Company's portfolio of loans may increase. While management endeavors to minimize this risk, it recognizes that loan losses will occur and that the amount of these losses will fluctuate depending on the risk characteristics of the loan portfolio which in turn depend on current and expected economic conditions, the financial condition of borrowers, the realization of collateral and the credit management process.

During the first nine months of 2009, conditions across many segments of the economy continued to deteriorate, adversely affecting the financial condition of our small business borrowers as well as the value of our collateral. As a result of the adverse effects of existing economic conditions, nonaccrual loans increased \$13.0 million during the first nine months of 2009 (primarily reflecting a \$10.9 million increase in nonaccrual lease financing receivables), and charge-offs for the first nine months of 2009 were \$11.8 million higher than for the corresponding period in 2008 (primarily reflecting a \$11.2 million increase in charge-offs for lease financing receivables). The Company experienced a disruption in our collection efforts due to resignations, during the first quarter of 2009, of our collection manager and other members of the collection staff, which also resulted in increases in charge-offs and nonaccruals during the first nine months of 2009. We have since upgraded our collection staff, intensified our collection activities, tightened our credit standards and enhanced other credit evaluation criteria. Nevertheless, continuation and/or worsening of existing economic conditions will likely result in levels of charge-offs and nonaccrual loans that

will be higher than those in prior periods.

Edgar Filing: STERLING BANCORP - Form 10-Q

The following table sets forth the amount of non-performing assets (nonaccrual loans and other real estate owned). Also shown are loans that are past due more than 90 days and are still accruing because they are both well secured or guaranteed by financially responsible third parties and are in the process of collection.

	September 30,	
	2009	2008
	(in thousands)	
Gross loans	\$ -	\$ -
Nonaccrual loans		
Commercial and industrial	\$ 3,809	\$ 1,287
Lease financing receivables	13,276	2,411
Factored receivables	-	-
Real estate-residential mortgage	2,609	2,983
Real estate-commercial mortgage	-	-
Real estate-construction and land development	-	-
Loans to individuals	100	95
Total nonaccrual loans	19,794	6,776
Other real estate owned	1,837	1,991
Total non-performing assets	\$ 21,631	\$ 8,767
Loans past due 90 days or more and still accruing	\$ 1,523	\$ 976

At September 30, 2009, commercial and industrial nonaccruals represented 0.70% of commercial and industrial loans. There were 45 loans made to small business borrowers located in 5 states with balances ranging between approximately \$9,700 and \$254,000.

At September 30, 2009, lease financing nonaccruals represented 6.27% of lease financing receivables. The lessees of the equipment are located in 35 states. There were 281 leases ranging between approximately \$400 and \$345,100, 259 of which were under \$100,000. The value of the underlying collateral related to lease financing nonaccruals varies depending on the type and condition of equipment. While most leases are written on a recourse basis, with personal guarantees of the principals, the current value of the collateral is often less than the lease financing balance. Collection efforts include repossession and/or sale of leased equipment, payment discussions with the lessee, the principal and/or guarantors, and obtaining judgments against the lessee, the principal and/or guarantors. The balance is charged off when it is determined that collection efforts are no longer productive. Factors considered in determining whether collection efforts are no longer productive include any amounts currently being collected, the status of discussions or negotiations with the lessee, the principal and/or guarantors, the cost of continuing efforts to collect, the status of any foreclosure or other legal actions, the value of the collateral, and any other pertinent factors.

At September 30, 2009, residential real estate nonaccruals represented 1.95% of residential real estate loans held in portfolio. There were 15 loans ranging between approximately \$10,000 and \$332,000 secured by properties located in 10 states.

At September 30, 2009, other real estate owned consisted of 8 properties with values between approximately \$42,000 and \$499,000 located in 4 states.

Management views the allowance for loan losses as a critical accounting policy due to its subjectivity. The allowance for loan losses is maintained through the provision for loan losses, which is a charge to operating earnings. The adequacy of the provision and the resulting allowance for loan losses is determined by a management evaluation process of the loan portfolio, including identification and review of individual problem situations that may affect the borrower's ability to repay, review of overall portfolio quality through an analysis of current charge-offs, delinquency and nonperforming loan data, estimates of the value of any underlying collateral, an assessment of current and expected economic conditions and changes in the size and character of the loan portfolio. Other data utilized by management in determining the adequacy of the allowance for loan losses include, but are not limited to, the results of regulatory reviews; the amount of, trend of and/or borrower characteristics on loans that are identified as requiring special attention as part of the credit review process and peer group comparisons. The impact of this other data might result in an allowance greater than that indicated by the evaluation process previously described. The allowance reflects management's best estimate of probable losses within the existing loan portfolio and of the risk inherent in various components of the loan portfolio, including loans identified as impaired as required by FASB Codification Topic 310: *Receivables*. Thus, an increase in the size of the portfolio or in any of its components could necessitate an increase in the allowance even though there may not be a decline in credit quality or an increase in potential problem loans. A significant change in any of the evaluation factors described above could result in future additions to the allowance. At September 30, 2009, the ratio of the allowance to loans held in portfolio, net of unearned discounts, was 1.58% and the allowance was \$19.1 million. At such date, the Company's nonaccrual loans amounted to \$19.8 million. Loans 90 days past due and still accruing amounted to \$1.5 million. At September 30, 2009, loans judged to be impaired under U.S. GAAP guidance on receivables, amounted to \$3.7 million and had a valuation allowance totaling \$601 thousand, which is included within the overall allowance for loan losses. Included in the impaired loans are \$3.2 million in accruing impaired restructured loans as defined by U.S. GAAP guidance on receivables, with allowances for loan impairment of \$438 thousand. Based on the foregoing, as well as management's judgment as to the current risk in loans held in portfolio, the Company's allowance for loan losses was deemed adequate to absorb all probable losses on specifically known and other credit risks associated with the portfolio as of September 30, 2009. Net losses within loans held in portfolio are not statistically predictable and changes in conditions in the next twelve months could result in future provisions for loan losses varying from the provision recognized in the first nine months of 2009. Potential problem loans, which are loans that are currently performing under present loan repayment terms but where known information about possible credit problems of borrowers causes management to have serious doubts as to the ability of the borrowers to continue to comply with the present repayment terms, aggregated \$8.2 million and \$2.3 million at September 30, 2009 and September 30, 2008, respectively.

Edgar Filing: STERLING BANCORP - Form 10-Q

The following table sets forth certain information with respect to the Company's loan loss experience:
