

ROYAL BANK OF SCOTLAND GROUP PLC
Form 6-K
May 06, 2011

FORM 6-K
SECURITIES AND EXCHANGE COMMISSION
Washington D.C. 20549

Report of Foreign Private Issuer

Pursuant to Rule 13a-16 or 15d-16
of the Securities Exchange Act of 1934

For May 6, 2011

Commission File Number: 001-10306

The Royal Bank of Scotland Group plc

RBS, Gogarburn, PO Box 1000
Edinburgh EH12 1HQ

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F X

Form 40-F ____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ____

No X

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

The following information was issued as a Company announcement in London, England and is furnished pursuant to General Instruction B to the General Instructions to Form 6-K:

Risk and balance sheet management (continued)

Risk management: Credit risk

Credit risk is the risk of financial loss due to the failure of customers or counterparties to meet payment obligations. The quantum and nature of credit risk assumed across the Group's different businesses varies considerably, while the overall credit risk outcome usually exhibits a high degree of correlation with the macroeconomic environment.

Loans and advances to customers by geography and industry

The table below analyses loans and advances to customers excluding reverse repos and disposal groups.

	31 March 2011			31 December 2010		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m
Central and local government	5,650	1,514	7,164	6,781	1,671	8,452
Finance	47,797	7,559	55,356	46,910	7,651	54,561
Residential mortgages	142,920	5,678	148,598	140,359	6,142	146,501
Personal lending	32,362	3,482	35,844	33,581	3,891	37,472
Property	45,038	43,866	88,904	42,455	47,651	90,106
Construction	9,011	3,231	12,242	8,680	3,352	12,032
Manufacturing	24,621	6,295	30,916	25,797	6,520	32,317
Service industries and business activities	92,623	20,712	113,335	95,127	22,383	117,510
Agriculture, forestry and fishing	3,741	130	3,871	3,758	135	3,893
Finance leases and instalment credit	8,061	8,119	16,180	8,321	8,529	16,850
Interest accruals	673	193	866	831	278	1,109
Gross loans	412,497	100,779	513,276	412,600	108,203	520,803
Loan impairment provisions	(8,287)	(10,841)	(19,128)	(7,740)	(10,315)	(18,055)
Net loans	404,210	89,938	494,148	404,860	97,888	502,748

Key points

- Gross loans reduced by £7.5 billion in the quarter principally due to disposals, run-offs and transfers in Non-Core, partially offset by increased mortgage lending in UK Retail.
- The movement between Non-Core and Core property-related lending primarily reflected Non-Core returning loans to UK Corporate in preparation for the sale of the RBS England and Wales branch-based business to Santander.

Risk and balance sheet management (continued)

Risk management: Credit risk

Loans and advances to customers by geography and industry (continued)

The table below analyses loans and advances to customers excluding reverse repos and disposal groups by geography (by location of office).

Provisions as a % of total REIL & PPL	49%	45%	46%	49%	44%	46%

Notes:

- (1) Loans against which an impairment provision is held.
- (2) Loans where an impairment event has taken place but no impairment provision recognised. This category is used for fully collateralised non-revolving credit facilities.
- (3) Loans for which an impairment event has occurred but no impairment provision is necessary. This category is used for

advances and revolving credit facilities where the past due concept is not applicable.

- (4) Gross loans and advances to customers including disposal groups and excluding reverse repos.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loans, REIL and impairment provisions

Movement in REIL and PPL

The table below details the movement in REIL and PPL for the quarter ended 31 March 2011.

	REIL			PPL			Total		
	Core £m	Non- Core £m	Total £m	Core £m	Non- Core £m	Total £m	Core £m	Non- Core £m	Total £m
At 1 January 2011	15,207	23,391	38,598	473	160	633	15,680	23,551	39,231
Intra-group transfers	369	(369)	-	-	-	-	369	(369)	-
Currency translation and other adjustments	68	98	166	1	4	5	69	102	171
Additions	3,119	2,866	5,985	305	152	457	3,424	3,018	6,442
Transfers	81	(53)	28	(137)	(39)	(176)	(56)	(92)	(148)
Disposals, restructurings and repayments	(1,286)	(1,334)	(2,620)	(318)	(75)	(393)	(1,604)	(1,409)	(3,013)
Amounts written-off	(540)	(576)	(1,116)	-	-	-	(540)	(576)	(1,116)
At 31 March 2011	17,018	24,023	41,041	324	202	526	17,342	24,225	41,567

Key points

- REIL increased by £2.4 billion predominantly due to growth in Ulster Bank Group of £2.2 billion (Core - £1.0 billion; Non-Core - £1.2 billion).
- The Group's provision coverage was stable at 47% (see page 100); Core coverage reduced from 51% to 49% and Non-Core coverage increased marginally from 44% to 45%. The Core coverage is typically higher at 49%, due to a greater weighting of unsecured retail products within REIL and the proportion of latent provision on performing portfolios. Lower coverage of Non-Core reflects secured wholesale lending, particularly commercial real estate portfolios.
- The intra-group transfer of REIL relates to Non-Core returning loans to UK Corporate as part of the preparation for the sale of the RBS England and Wales branch-based business to Santander.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loans, REIL and impairment provisions (continued)

Movement in loan impairment provisions

The following table shows the movement in impairment provisions for loans and advances to customers and banks.

	Quarter ended					
	31 March 2011			31 December 2010		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m

Disposals	-	-	-	-	(3)	(3)
Amounts written-off	(514)	(438)	(952)	(745)	(771)	(1,516)
Recoveries of amounts previously written-off	39	80	119	29	67	96
Charge to income statement	852	1,046	1,898	912	1,243	2,155
Unwind of discount	(60)	(71)	(131)	(51)	(76)	(127)
At end of period	8,416	10,842	19,258	7,866	10,316	18,182

Loan impairment provisions on loans and advances

	31 March 2011			31 December 2010		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m
Latent loss	1,583	963	2,546	1,653	997	2,650
Collectively assessed	4,375	1,112	5,487	4,139	1,157	5,296
Individually assessed	2,329	8,766	11,095	1,948	8,161	10,109

Customer loans	8,287	10,841	19,128	7,740	10,315	18,055
Bank loans	129	1	130	126	1	127
Total loans	8,416	10,842	19,258	7,866	10,316	18,182
% of loans (1)	2.01%	10.42%	3.71%	1.88%	9.14%	3.44%

Note:

(1) Customer provisions as a % of gross customer loans including disposal groups and excluding reverse repurchase agreements.

Key points

- Loan impairment provisions increased by £1.1 billion, primarily in Ulster Bank Group (Core - £0.5 billion; Non-Core - £0.9 billion) reflecting the deteriorating economic environment in Ireland with lower asset values and consumer spending. Of the increase in Ulster Bank Group, £0.8 billion related to commercial real estate portfolios, £0.3 billion to other corporate lending and £0.2 billion to mortgage lending.
- The decrease in latent loss provision was primarily due to improved book quality and credit metrics in UK Corporate.

Risk and balance sheet management (continued)

Counterparty mtm netting							(290,462)	(330,397)
Cash collateral held against derivative exposures							(25,363)	(31,096)
Net exposure							45,223	65,584

At 31 March 2011, the Group also held collateral in the form of securities of £3.3 billion (31 December 2010 - £2.9 billion) against derivative positions.

The table below analyses the fair value of the Group's derivatives by type of contract.

Contract type	31 March 2011		31 December 2010	
	Assets £m	Liabilities £m	Assets £m	Liabilities £m
Exchange rate contracts	73,552	79,045	83,253	89,375
Interest rate contracts	259,006	250,515	311,731	299,209
Credit derivatives	22,704	21,689	26,872	25,344
Equity and commodity contracts	5,786	9,376	5,221	10,039
	361,048	360,625	427,077	423,967

Key points

- Net exposure, after taking account of mark-to-market and collateral netting arrangements, reduced by 31% to £45.2 billion.
- Exchange rate contracts decreased due to trading fluctuations and movements in forward rates.
- Interest rate contracts decreased due to greater use of over-the-counter contract compression through third party intermediaries, higher interest rate yields and sterling strengthening against the US dollar. These effects were partially offset by reduced use of clearing houses which resulted in the netting benefit declining from 60% to 57%.
- Credit derivative fair values declined mainly due to trade unwinds together with contract compressions and reduction in Non-Core relating to monolines (see below) and other index hedges, as credit spreads tightened across five and ten year maturities. The APS

derivative decreased by £0.5 billion principally reflecting lower covered assets as well as market factors.

The increase in derivative contracts against AQ3 rated counterparties reflected a combination of rating down grades and new deals.

Risk and balance sheet management (continued)

Risk and balance sheet management (continued)

Risk management: Credit risk: Country risk

Under the Group's country risk framework, country exposures are actively managed both for countries that represent a larger concentration and which, using the Group's country watchlist process, have been identified as exhibiting signs of actual or potential stress.

The table below shows the Group's exposure in terms of credit risk assets, to countries where the total exposure for borrowers domiciled in that country exceed £1 billion; where the country had an external rating of A+ or below from Standard & Poor's, Moody's or Fitch at 31 March 2011; and selected other countries. The numbers are stated gross of mitigating action which may have been taken to reduce or eliminate exposure to country risk events.

Credit risk assets consist of:

- Lending: cash and balances at central banks, loans and advances to banks and customers (including overdraft facilities, instalment credit and finance leases);
- Rate risk management (RRM); and
- Contingent obligations, primarily letters of credit and guarantees.

Reverse repurchase agreements and issuer risk (primarily debt securities - see page 105) are excluded. Where relevant, and unless otherwise stated, the data reflect the effect of credit mitigation techniques.

Japan	1,379	-	685	809	24	2,897	2,105	792	2,000
Greece	14	36	49	188	16	303	173	130	214

Key points

Credit risk assets relating to most of the countries above have remained broadly stable during the first quarter of 2011. Currency movements increased euro-denominated lending by 2.5% and reduced US dollar-denominated exposures by 3.4%. Reductions were seen in exposure to governments as well as in RRM exposures. This contrasted with financial institution and corporate exposures which increased in a number of countries. The increases in Non-Core exposures in some countries resulted primarily from drawings under committed facilities. In addition to credit risk asset components above, debt securities represent the main concentration for Japan and Greece.

Granular portfolio reviews continue to be undertaken with a view to adjusting the risk profile and to align to the Group's country risk appetite in light of the evolving economic and political developments.

Republic of Ireland - lending increased by almost £1.0 billion in the first quarter (increases in lending to corporate clients by £0.7 billion and personal lending by £0.3 billion), primarily due to exchange rate movements. In euro terms, lending was largely unchanged. RRM exposure fell by £0.7 billion.

Risk and balance sheet management (continued)

Risk management: Credit risk: Country risk (continued)

Key points (continued)

Italy - lending exposure increased by £0.6 billion as a result of increases in corporate activity (oil & gas) of £0.4 billion, largely

caused by drawings under committed facilities, and financial institutions (banks and funds) of £0.2 billion.

- Portugal - lending exposure was stable, with reductions in exposure to the government and financial institutions alongside a very small increase in corporate lending. RRM exposure decreased by almost £0.1 billion.
- Spain - lending exposure fell slightly due to a reduction in corporate exposure of £0.2 billion which was partially offset by an increase in exposure to financial institutions. RRM exposure decreased by £0.3 billion.
- Japan - lending exposure is £2.6 billion and has reduced by £0.3 billion since 31 December 2010 due to a reduction in government exposure. RRM accounts for an additional £2.2 billion of total exposure. Following the tsunami, impairment charges totalled approximately £77 million, of which £44 million relates to debt securities.
- Greece - lending exposure rose by £0.2 billion to £0.5 billion, due to an increase in the Core corporate portfolio.
- Limit controls are being applied on a risk-differentiated basis and exposure to most countries in North Africa and the Middle East reduced during the first quarter of 2011. Of the countries experiencing varying degrees of social and political unrest in North Africa and the Middle East, Bahrain accounted for lending exposure of £302 million (total credit risk assets - £338 million), Oman for £160 million (total credit risk assets - £237 million) and Egypt for £101 million (total credit risk assets - £130 million).

Risk and balance sheet management (continued)

Risk management: Credit risk: Commercial real estate

The commercial real estate lending portfolio totalled £85 billion at 31 March 2011, a 2% decrease over the quarter, from £87 billion at 31 December 2010. The Non-Core portion of the portfolio totalled £42 billion (50% of the portfolio) at 31 March 2011 (31 December 2010 - £46 billion, or 52% of the portfolio) and includes exposures in Ulster Bank Group as discussed on page 115. The analysis below excludes RRM and contingent obligations.

	33,355	33,149	8,206	12,660	87,370

Key points

- The decrease in exposure occurred primarily in the UK and US investment books. The asset mix has remained broadly unchanged since the end of 2010.
- The increase in Core UK Corporate exposures reflected Non-Core returning commercial real estate assets in preparation for the sale of the RBS England and Wales branch-based business to Santander. Excluding this transfer, Core UK Corporate exposure remained broadly stable.
- Of the total portfolio at 31 March 2011, £42.1 billion (31 December 2010 - £45.5 billion) is managed within the Group's standard credit risk processes, £8.7 billion (31 December 2010 - £9.2 billion) is receiving heightened credit oversight under the Group watchlist process ("watch") and £34.5 billion (31 December 2010 - £32.6 billion) is managed within Global Restructuring Group (GRG).
- Short-term lending to property developers without firm long-term financing in place is characterised as speculative. Speculative lending at origination continues to represent less than 2% of the portfolio. The Group's appetite for originating speculative commercial real estate lending is very limited. Current market conditions have resulted in some borrowers experiencing difficulty in procuring long-term finance. These borrowers are managed within the problem debt management process in "watch" or GRG.

- Tighter risk appetite criteria for new business origination were implemented during 2010 but will take time to be reflected in the performance of the portfolio. Whilst there has been some recovery in the value of prime properties in the UK, the Group observes that it has been selective. To date this improvement has not fed through into lower quality properties in the UK and has not been evident in other regions, notably the eurozone, Republic of Ireland and the US.
- Commercial real estate will remain challenging for key markets, such as UK, Ireland and US; new business will be accommodated by running-off existing exposure. Liquidity in the market remains low with the focus on refinancing and support for the existing client base.

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core)

Overview

Ulster Bank Group accounts for 10% of the Group's total gross customer loans or 9% of the Group's Core gross customer loans. The impairment charge of £1,294 million for Q1 2011 was £135 million higher than the £1,159 million impairment charge for Q4 2010. This was driven by continued deterioration across most portfolios during the quarter. High unemployment coupled with higher taxation and less liquidity in the economy continues to depress housing market confidence and consumer spending.

Core

Impairment losses for Q1 2011 of £461 million were £85 million higher than Q4 2010 losses of £376 million, reflecting the deteriorating economic environment in Ireland with rising default levels across both mortgage and other corporate non-property portfolios. Lower asset values together with pressure on borrowers with a dependence on consumer spending have resulted in higher corporate loan losses while higher unemployment, lower incomes and increased taxation have driven mortgage impairment increases.

Ulster Bank Group is helping customers in this difficult environment. Forbearance policies which are deployed through the 'Flex' initiative are aimed at assisting customers in financial difficulty. These policies were reviewed at the end of 2010 given the structural problem that exists in Ireland with the scale and duration of customers in financial difficulty. There were 9,200 customer accounts in a forbearance arrangement at 31 March 2011. This represents 5.5% (by volume) of the Ulster Bank Group mortgage portfolio, with 75% of these customers in amortising or interest only agreements.

Non-Core

The impairment charge increased from £783 million for Q4 2010 to £833 million for Q1 2011, primarily reflecting the deterioration in the development property portfolio.

Note:

(1) Funded loans.

Key points

- The increase in REIL reflects continuing difficult conditions in both commercial and residential sectors in the Republic of Ireland. Of the

REIL at 31 March 2011, 71% was in Non-Core (Q4 2010 - 74%).

- Provisions, including foreign currency effects, increased in the quarter from £6.0 billion to £7.4 billion and the coverage ratio increased to 46.4% from 43.8% at 31 December 2010. 68% of the provision at 31 March 2011 (31 December 2010 - 69%) relates to commercial real estate.

Residential mortgages

The table below shows how the continued decrease in property values has affected the distribution of residential mortgages by loan-to-value (LTV) (indexed). LTV is based upon gross loan amounts and, whilst including defaulted loans, does not account for impairments already taken.

	31 March 2011 %	31 December 2010 %
By average LTV (1)		
<= 50%	34.7	35.9
> 50% and <= 70%	13.0	13.5
> 70% and <= 90%	13.0	13.5
> 90%	39.3	37.1
Total portfolio average LTV	73.7	71.2
Average LTV on new originations during the period	69.0	75.9

Note:

(1) LTV averages calculated by transaction volume.

Key points

- The residential mortgage portfolio across Ulster Bank Group totalled £21.5 billion at 31 March 2011 - with 90% in the Republic of Ireland and 10% in Northern Ireland. At constant exchange rates, the portfolio remained at similar levels to 31 December 2010 (£21.2 billion) with little growth due to very low new business volumes. To date in 2011, 596 new mortgages were originated, of which 85% were in Northern Ireland.
- The 90 days arrears rate continues to increase due to the continued challenging economic environment. At 31 March 2011, the arrears rate was 6.6% (by volume) compared with 6.0% at 31 December 2010. The impairment charge for Q1 2011 was £233 million

compared with £159 million for Q4 2010. Repossession levels remain low totalling 37 properties at 31 March 2011 (76 for full year 2010). 78% of repossessions during the quarter were through voluntary surrender or abandonment of the property.

· Ulster Bank Group has a number of initiatives in place aimed at increasing the level of support to customers experiencing temporary financial difficulties. At 31 March 2011, 7.4% (by value) of the mortgage book (£1.6 billion) was on forbearance arrangements, the majority of these are performing (77%) and not 90 days past due.

Risk and balance sheet management (continued)

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core) (continued)

Commercial real estate

The commercial real estate lending portfolio in Ulster Bank Group increased marginally during the quarter to £18.1 billion at 31 March 2011, primarily due to exchange rate movements. The Non-Core portion of the portfolio totalled £12.8 billion (71% of the portfolio). Of the total Ulster Bank Group commercial real estate portfolio 25% relates to Northern Ireland, 61% to the Republic of Ireland and 14% to the rest of the UK.

Exposure by geography	Development		Investment		Total
	Residential	Commercial	Residential	Commercial	
	£m	£m	£m	£m	£m
31 March 2011					
Island of Ireland	2,848	6,556	5,090	1,143	15,637
UK (excluding Northern Ireland)	112	362	1,835	129	2,438
RoW	-	17	22	1	40
	2,960	6,935	6,947	1,273	18,115
31 December 2010					
Island of Ireland	2,785	6,578	5,072	1,098	15,533
UK (excluding Northern Ireland)	110	359	1,831	115	2,415
RoW	-	17	22	1	40
	2,895	6,954	6,925	1,214	17,988

Key points

· Commercial real estate remains a key driver of the increase in the defaulted loan book for Ulster Bank Group. The outlook remains challenging with limited liquidity in the marketplace to support refinancing.

- Ongoing reviews of the portfolio have led to a greater portion of the portfolio moving to specialised management in GRG.
