FINANCIAL OVERVIEW

Table of Contents**EXPLANATION OF OUR USE OF NON-GAAP FINANCIAL MEASURES**

In addition to the results of operations presented in accordance with generally accepted accounting principles (GAAP), our management uses, and this Investor Fact Book contains, certain non-GAAP financial measures, such as diluted earnings per common share excluding merger-related and restructuring expenses, other intangible amortization and a change in accounting principle, dividend payout ratios on common shares on a basis that excludes merger-related and restructuring expenses, other intangible amortization and a change in accounting principle, and a tangible return on equity excluding merger-related and restructuring expenses, other intangible amortization and a change in accounting principle. We believe these non-GAAP financial measures provide information useful to investors in understanding our underlying operational performance, our business and performance trends, and facilitate comparisons with the performance of others in the financial services industry.

Specifically, we believe that the exclusion of merger-related and restructuring expenses permits evaluation and a comparison of results for ongoing business operations, and it is on this basis that our management internally assesses our performance. Those non-operating items also are excluded from our segment measures used internally to evaluate segment performance in accordance with GAAP because management does not consider them particularly relevant or useful in evaluating the operating performance of our business segments.

In addition, because of the significant amount of deposit base intangible amortization, we believe that the exclusion of this expense provides investors with consistent and meaningful comparisons to other financial service firms. Also, our management makes recommendations to our board of directors about dividend payments based on reported earnings excluding merger-related and restructuring expenses, other intangible amortization and a change in accounting principle, and has communicated certain cash dividend payout ratio goals to investors. We believe that the cash dividend payout ratio is useful to investors because it provides investors with a better understanding of and permits investors to monitor our dividend payout policy.

Although we believe that the above mentioned non-GAAP financial measures enhance investors' understanding of our business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The reconciliation of these non-GAAP financial measures from GAAP to non-GAAP is presented below.
