ANNUAL TARIFF READJUSTMENT PROCESS

The Brazilian electricity regulator, ANEEL, approved an 8.05% annual tariff readjustment index for Enersul, for the period from April 2007 to March 2008.

INVESTOR RELATIONS

DEPARTMENT

Considering the financial adjustments included in the last period's tariffs (non-recurring items), which are associated to the recovery of tariff differences incurred in the past, the current tariff readjustment results in an effective average tariff increase of 3.20% to be applied to Enersul's tariffs from April 2007.

Miguel Viana, Head of IR

Elisabete Ferreira

Ricardo Farinha

Within an annual tariff readjustment process, ANEEL recognizes in the tariffs of the distribution companies the pass-through of some cost components incurred in the previous twelve months, namely i) the annual change in non-controllable costs (Parcela A) and ii) the adjustment of the controllable costs (Parcela B) to inflation (IGP-M) corrected by an X Factor. In addition, the regulator also recognizes financial adjustments, which usually correspond to the recovery, for a twelve months period, of the non-controllable costs incurred in the past that were not covered through the tariffs.

Table of Contents

Additionally, in this last tariff readjustment, ANEEL made a new deferral of the last part of the 2003 tariff repositioning, amounting to R\$56.4 million (which would correspond to 6.26% of the current readjustment) to be received in the tariff revision that will occur in April 2008.
