**Explanatory Note**

TransDigm Group Inc. ( TD Group ) is filing this Amendment No. 1 (the Form 10-Q/A ) to our Quarterly Report on Form 10-Q for the quarter ended December 27, 2008, which was filed with the U.S. Securities and Exchange Commission on February 4, 2009 (the Original Filing ). We are filing this Amendment No. 1 to reflect restatements of our basic and diluted earnings per share and weighted average shares outstanding calculations to give effect to participating securities under the two-class method of calculating earnings per share. Historically, the Company had utilized the treasury stock method in order to give effect to outstanding in-the-money stock options. Under the two-class method, securities that participate in dividends, such as the Company s vested outstanding stock options which include non-forfeitable rights to dividends, are considered participating securities.

This Form 10-Q/A amends and restates Item 1. Financial Statements and Item 4. Controls and Procedures of the Original Filing, as amended, in each case, solely as a result of, and to reflect, the restatement.

Except as specifically noted above, this Form 10-Q/A does not modify or update disclosures in the Original Filing. Accordingly, this Form 10-Q/A does not reflect events occurring after the filing of the Original Filing or modify or update any related or other disclosures.

**2. UNAUDITED INTERIM FINANCIAL INFORMATION**

The financial information included herein is unaudited; however, the information reflects all adjustments (consisting solely of normal recurring adjustments) that are, in the opinion of management, necessary for a fair presentation of the Company's financial position and results of operations and cash flows for the interim periods presented. These financial statements and notes should be read in conjunction with the financial statements and related notes for the year ended September 30, 2008 included in its Form 10-K dated November 25, 2008. Certain earnings per share and weighted average shares outstanding information included in the Form 10-K dated November 25, 2008 has been restated in TD Group's Form 10-K/A dated February 10, 2010. The September 30, 2008 condensed consolidated balance sheet was derived from the TD Group's audited financial statements. The results of operations for the thirteen week period ended December 27, 2008 are not necessarily indicative of the results to be expected for the full year.

**3. NEW ACCOUNTING STANDARDS**

In February 2007, the Financial Accounting Standards Board ( "FASB" ) issued Statement of Financial Accounting Standards No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115" ( "SFAS 159" ). SFAS 159 provides companies with an option to report selected financial assets and liabilities at fair value. SFAS 159's objective is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. SFAS 159 is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. The adoption of SFAS 159 did not have a material impact on the Company's consolidated financial position or results of operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ( "SFAS 157" ), which is effective for fiscal years beginning after November 15, 2007 and for interim periods within those years. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2 ( "FSP 157-2" ), "Effective Date of FASB Statement No. 157," which allows for the deferral of the adoption date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or presented at fair value in the financial statements on a recurring basis to fiscal years beginning after November 15, 2008. The adoption of SFAS 157 for those assets and liabilities within the scope of

## Edgar Filing: TransDigm Group INC - Form 10-Q/A

FSP 157-2 is not expected to have a material impact on our financial position, results of operations or cash flows. The effective provisions of SFAS 157 are included in Note 10, Fair Value of Financial Instruments. In October 2008, the FASB issued FASB Staff Position FAS 157-3 ( FSP 157-3 ), Determining the Fair Value of a Financial Asset When the Market for

That Asset Is Not Active, which clarifies the application of SFAS 157 when the market for a financial asset is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP 157-3 became effective immediately upon adoption of SFAS 157. The adoption of SFAS 157 did not have a material impact on the Company's consolidated financial position or results of operations. See Note 10.

#### 4. ACQUISITIONS

**APC** On December 16, 2008, TransDigm Inc. acquired all of the outstanding capital stock of Aircraft Parts Corporation ( APC ) for approximately \$67.4 million in cash, subject to adjustment based on the level of working capital as of the closing date of the acquisition. APC is a designer and manufacturer of starter generators, generator control units and related components for turbine engines, all of which fit well with TransDigm's overall business direction. The Company expects that the \$49.0 million of estimated goodwill recognized for the acquisition will not be deductible for tax purposes.

**Unison Product Line** On September 26, 2008, TransDigm Inc., through its wholly-owned Champion Aerospace, LLC subsidiary, acquired certain assets related to the magneto and harness product line business of Unison Industries, LLC ( Unison product line ) for approximately \$68.3 million in cash, net of a purchase price adjustment of \$1.1 million received in November 2008. The acquired product line includes the highly engineered SLICK™ magnetos, harnesses and components, which are used on substantially all of the world's general aviation piston aircraft. These products fit well with Champion's existing product offerings and TransDigm's overall business direction. The Company expects that the \$58.4 million of estimated goodwill recognized for the acquisition will be deductible for tax purposes.

**CEF** On May 7, 2008, TransDigm Inc. acquired all of the outstanding capital stock of CEF Industries, Inc. ( CEF ) for approximately \$84.4 million in cash, net of a purchase price adjustment of \$0.5 million received in January 2009. CEF is a designer and manufacturer of specialized and highly engineered actuators, compressors, pumps and related components for the aerospace market, all of which fit well with TransDigm's overall business direction. The Company expects that the \$52.3 million of estimated goodwill recognized for the acquisition will not be deductible for tax purposes.

The Company accounted for the acquisitions of APC, Unison product line, and CEF (collectively, the Acquisitions ) as purchases and included the results of operations of the Acquisitions in its consolidated financial statements from the effective date of each acquisition. The Company is in the process of obtaining third-party valuations of certain tangible and intangible assets of the Acquisitions; thus, the values attributed to acquired assets in the consolidated financial statements are subject to adjustment. Pro forma net sales and results of operations for the Acquisitions, had they occurred at the beginning of the thirteen week periods ended December 27, 2008 and December 29, 2007, respectively, are not significant and, accordingly, are not provided.

#### 5. INVENTORIES

Inventories are stated at the lower of cost or market. Cost of inventories is determined by the average cost and the first-in, first-out (FIFO) methods for all locations except CEF, which determines the cost of inventories using the last-in, first-out (LIFO) method. Net inventory for CEF at December 27, 2008 was approximately \$15.0 million. Inventories consist of the following (in thousands):

## 7. PRODUCT WARRANTY

The Company provides limited warranties in connection with the sale of its products. The warranty period for products sold varies among the Company's operations, ranging generally from 90 days to six years. A provision for the estimated cost to repair or replace the products is recorded at the time of sale and periodically adjusted to reflect actual experience.

The following table presents a reconciliation of changes in the product warranty liability for the periods indicated below (in thousands):

	<b>Thirteen Week Periods Ended</b>	
	<b>December 27, 2008</b>	<b>December 29, 2007</b>
Liability balance at beginning of period	\$ 6,255	\$ 4,624
Accruals for warranties issued	838	623
Warranty costs incurred	(583)	(431)
Acquisitions	681	
Liability balance at end of period	\$ 7,191	\$ 4,816

## 8. INCOME TAXES

At the end of each reporting period, the Company makes an estimate of its annual effective income tax rate. The estimate used in the year-to-date period may change in subsequent periods. The Company recorded an income tax provision of \$21.3 million in the thirteen week period ended December 27, 2008 compared to \$15.4 million in the prior year period. The effective tax rate for the thirteen week period ended December 27, 2008 was 35.0% compared to 36.4% for the comparable period in the prior year. The lower effective tax rate was primarily due to the retroactive reinstatement of the research and development tax credit. The retroactive benefit for the previously expired period from January 1, 2008 to September 30, 2008 is reflected as a discrete item which lowered the Company's effective tax rate by approximately 1.0%.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction as well as in various state jurisdictions. Effective October 1, 2007, the Company adopted the provisions of FIN 48. In accordance with FIN 48, the Company recognized a cumulative-effect adjustment of \$1.7 million increasing its liability for unrecognized tax benefits, interest, and penalties and reducing the October 1, 2007 balance of retained earnings.

At September 30, 2008, the Company had \$2.8 million in unrecognized tax benefits, the recognition of which would have an effect of \$1.9 million on the effective tax rate. The Company does not believe that the tax positions that comprise the unrecognized tax benefit amount will change significantly over the next 12 months.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. At September 30, 2008, the Company had accrued \$0.9 million for the potential payment of interest and penalties.

There were no significant changes to any of these amounts during the first quarter of fiscal 2009.

As of December 27, 2008, the Company is subject to a U.S. Federal income tax examination for fiscal years 2007 and 2008. In addition, the Company is subject to state and local income tax examinations for fiscal years 2004 through 2008.

#### 9. EARNINGS PER SHARE CALCULATION (RESTATED)

We restated our basic and diluted earnings per share calculations to give effect to participating securities under the two-class method of calculating earnings per share. Historically, the Company had utilized the treasury stock method in order to give effect to outstanding in-the-money stock options. Under the two-class method, securities that participate in dividends, such as the Company's vested outstanding stock options which include non-forfeitable rights to dividends, are considered participating securities.

Earnings per share information is determined using the two-class method, which includes the weighted-average number of common shares outstanding during the period and other securities that participate in dividends (participating securities). Our vested stock options are considered participating securities because they include non-forfeitable rights to dividends. In applying the two-class method, earnings are allocated to both common stock shares and participating securities based on their respective weighted-average shares outstanding for the period. Diluted earnings per share information may include the additional effect of other securities, if dilutive, in which case the dilutive effect of such securities is calculated using the treasury stock method.

The following table sets forth the computation of basic and diluted earnings per share:

(in thousands, except per share data)	Thirteen Week Periods Ended

#### 10. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company has various financial instruments, including cash and cash equivalents, accounts receivable and payable, accrued liabilities, interest rate swaps and long-term debt. SFAS 157 (See Note 3) establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or

liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following table provides the liabilities carried at fair value measured on a recurring basis as of December 27, 2008 (in thousands):

	Fair Value at December 27, 2008	Fair Value Measurements Using Inputs Considered as		
		Level 1	Level 2	Level 3
Interest Rate Swaps <sup>(1)</sup>	11,702		11,702	
-				

(1) Included in Accrued liabilities and Other non-current liabilities on the Condensed Consolidated Balance Sheets.

Interest rate swaps are measured at fair value using quoted market prices for the swap interest rate indexes over the term of the swap discounted to present value versus the fixed rate of the contract. They are classified within Level 2 of the valuation hierarchy.

The carrying value of the Company's cash and cash equivalents, accounts receivable and payable, and accrued liabilities approximates their fair value due to the short-term maturities of these assets and liabilities. The estimated fair value of the Company's term loans approximated \$624 million at December 27, 2008 based on information provided by the agent under the Company's Senior Secured Credit Facility. The estimated fair value of the Company's 7/4% Senior Subordinated Notes approximated \$463 million at December 27, 2008 based upon quoted market prices.

#### **11. SUPPLEMENTAL GUARANTOR INFORMATION**

**ITEM 4. CONTROLS AND PROCEDURES**

As of December 27, 2008 and in connection with the preparation of the Original Filing, TD Group carried out an evaluation, under the supervision and with the participation of TD Group's management, including its Chief Executive Officer (Principal Executive Officer) and Chief Financial Officer (Principal Financial and Accounting Officer), of the effectiveness of the design and operation of TD Group's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that TD Group's disclosure controls and procedures were effective to ensure that information required to be disclosed by TD Group in the reports it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported, within the time periods specified by the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to TD Group's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, TD Group's management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in designing and evaluating the controls and procedures. Subsequent to the issuance of the Original Filing, management identified a material weakness relating to the application of the two-class method in calculating basic and diluted earnings per share. Solely as a result of this material weakness, management has revised its earlier assessment and has now concluded that TD Group's disclosure controls and procedures were not effective as of December 27, 2008. However, as of the date hereof, management believes that as a result of the remedial actions described below, we have remediated the material weakness in TD Group's disclosure controls and procedures, and that as of the date hereof, TD Group's disclosure controls and procedures are effective. Subsequent to the filing of the Original Filing, and in connection with the filing of this Form 10-Q/A, TD Group has put in place a review process in order to identify any participating securities and appropriately calculate the effect on basic and diluted earnings per share, and TD Group believes, as of the date hereof, that the material weakness has been remediated.

**Changes in Internal Control over Financial Reporting**

There have been no changes in TD Group's internal control over financial reporting that occurred during the thirteen week period ending December 27, 2008 that have materially affected, or are reasonably likely to materially affect, TD Group's internal control over financial reporting.
