Table of Contents

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Ordinary Shares, par value Rs. 10 per share *	The New York Stock Exchange, Inc

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 506,381,170 Ordinary Shares and 64,176,374 A Ordinary Shares, including 58,916,055 Ordinary Shares represented by 58,916,055 American Depositary Shares outstanding as of March 31, 2010.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing.

U.S. GAAP International Financial Reporting Standards as issued Other

by the International Accounting Standards Board

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

* Not for trading, but only in connection with listed American Depositary Shares, each representing one share of common stock.

Table of Contents

In this annual report

References to we , our and us are to Tata Motors Limited and its consolidated subsidiaries, except as the context otherwise requires;

References to dollar , US dollar and US\$ are to the lawful currency of the United States of America; references to rupees and Rs. are to the lawful currency of India; references to JPY are to the lawful currency of Japan; and references to GBP are to the lawful currency of the United Kingdom; and EURO are to the lawful currency of States of European union; and Russian Ruble are to the lawful currency of Russia;

References to US GAAP are to accounting principles generally accepted in the United States, and references to Indian GAAP are to accounting principles generally accepted in India and references IFRS are to International Financial Reporting Standards and its interpretations as issued by International Accounting Standards Board;

References to an ADS are to an American Depositary Share, each of which represents one of our Ordinary Shares of Rs. 10/- each, and references to an ADR are to an American Depositary Receipt evidencing one or more ADSs;

References to light commercial vehicles, or LCVs, medium commercial vehicles, or MCVs, and heavy commercial vehicles, or HCVs, refer to vehicles that have gross vehicle weight, or GVW, of up to 7.5 metric tonnes, between 7.5 and 16.2 metric tonnes, and over 16.2 metric tonnes, respectively;

References to passenger cars are to vehicles that have a seating capacity of up to six persons, excluding the driver, and that are further classified into the following market segments: mini-cars which have a length of up to 3,400 mm; compact cars which have a length between 3,401mm and 4,000 mm; mid-size cars which have length of between 4,001mm and 4,500mm; executive cars which have a length between 4,501mm and 4,700 mm; and premium and luxury cars which have a length between 4,701mm and 5,000mm, and above 5,001mm, respectively;

References to utility vehicles, or UVs, and multi-purpose vehicles, or MPVs, are to vehicles that have a seating capacity of seven to twelve persons, excluding the driver, and van-type vehicles that have a seating capacity of seven to twelve persons, excluding the driver, respectively;

References to premium cars and SUVs are to a defined list of premium competitor cars and SUVs for our Jaguar Land Rover business;

Unless otherwise stated, comparative and empirical Indian industry data in this annual report have been derived from published reports of the Society of Indian Automobile Manufacturers, or SIAM; while international industry data have been derived from published reports of IHS Global Insight;

References to a particular Fiscal year, such as Fiscal 2010 , are to our Fiscal year ended on March 31 of that year;

Figures in tables may not add up to totals due to rounding;

Millimeters or mm are equal to 1/1000 of a meter. A meter is equal to approximately 39.37 inches and a millimeter is equal to approximately 0.039 inch;

Kilograms or kg are each equal to approximately 2.2 pounds, and metric tonnes are equal to 1,000 kilograms or approximately 2,200 pounds;

Litres are equivalent to 61.02 cubic inches of volume, or approximately 1.057 U.S. quarts of liquid measure; and

Revenues refers to Total Revenue net of excise duty unless stated otherwise.

Special Note Regarding Forward-looking Statements

All statements contained in this annual report that are not statements of historical fact constitute forward-looking statements. Generally, these statements can be identified by the use of forward-looking terms such as anticipate, believe, can, could, estimate, expect, intend, may, will and would or similar words. However, these words are not the exclusive means of identifying forward-looking statements. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, our revenue and profitability, planned projects and other matters discussed in this annual report regarding matters that are not historical fact. These forward-looking statements and any other projections contained in this annual report (whether made by us or any third party) involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements or other projections. Although we are a reporting company and will have ongoing disclosure obligations under U.S. federal securities laws, we are not undertaking to publicly update or revise any statements in this annual report, whether as a result of new information, future events or otherwise.

Table of Contents

The risks and factors that could cause our actual results, performances and achievements to be materially different from the forward-looking statements set out in Item 3.D and elsewhere in this annual report include, among others:

general political, social and economic conditions, and the competitive environment in India, United States, United Kingdom and Rest of Europe and other markets in which we operate and sell our products;

fluctuations in the currency exchange rate against the functional currency of the respective consolidated entities;

accidents and natural disasters;

terms on which we finance our working capital and capital and product development expenditures and investment requirements;

implementation of new projects, including mergers and acquisitions, planned by management;

contractual arrangements with suppliers;

government policies including those specifically regarding the automotive industry, including industrial licensing, environmental regulations, safety regulations, import restrictions and duties, excise duties, sales taxes, value added taxes, product range restrictions, diesel and gasoline prices and road network enhancement projects;

significant movements in the prices of key inputs such as steel, aluminum, rubber and plastics; and

other factors beyond our control.

Table of Contents**PART I****Item 1. Identity of Directors, Senior Management and Advisers.**

Not applicable.

Item 2. Offer Statistics and Expected Timetable.

Not applicable.

Item 3. Key Information.**A. Selected Financial Data.**

The following table sets forth selected financial data including selected historical financial information as of and for each of the Fiscal years ended March 31, 2010, 2009 and 2008 in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, or IFRS.

The selected IFRS consolidated financial data as of and for each of the Fiscal years ended March 31, 2010, 2009 and 2008 are derived from our audited IFRS consolidated financial statements included in this annual report together with the report of Deloitte Haskins & Sells, independent auditors, who have reported that they carried out their audit in accordance with standards of the Public Company Accounting Oversight Board (United States).

Selected IFRS financial data for the years ended March 31, 2007 and 2006 have not been included in this Annual Report on Form 20-F because IFRS financial statements for such periods have not previously been prepared and could not be without unreasonable effort and expense. We changed our basis of accounting to IFRS during the year ended March 31, 2009 and, in connection therewith, our consolidated financial statements for the year ended March 31, 2008 were restated to conform to IFRS. Prior to adoption of IFRS, we prepared financial statements in accordance with accounting principles generally accepted in the United States of America for purposes of our SEC reporting.

You should read our selected financial data in conjunction with Item 5 Operating and Financial Review and Prospects .

Selected Financial Data Prepared in Accordance with IFRS

	For each of the years ended March 31,			
	2010	2010	2009	2008
	(In US\$ millions, except share and per share amounts)	(in Rs. millions, except share and per share amount)

Exchange Rate Information

For convenience, some of the financial amounts presented in this annual report have been translated from rupee amounts into dollar amounts at the rate of Rs.44.90 = US \$1.00, based on the fixing rate in the City of Mumbai on March 31, 2010 for cable transfers in Indian rupees as published by the Foreign Exchange Dealers Association of India or FEDAI, the date of our most recent balance sheet included in this annual report. However, such translations do not imply that the rupee amounts have been could have been or could be converted into dollars at that or any other rate.

The following table sets forth, for the Fiscal years ended March 31, 2010, 2009, 2008, 2007 and 2006 information with respect to the exchange rate between the rupee and the dollar (in rupees per US dollar) as published by Bloomberg L.P.

Fiscal year ended March 31,	Period			
	Period End	Average	High	Low
2010	44.92	47.42	50.64	44.92
2009	50.73	45.82	51.97	39.77
2008	40.12	40.26	43.15	39.27
2007	43.48	45.24	46.88	43.04
2006	44.62	44.27	46.31	43.18

Table of Contents

The following table sets forth information with respect to the exchange rate between the rupee and the dollar (in rupees per US dollar) for the previous six months as published by Bloomberg L.P.

Month	Period			
	Period End	Average	High	Low
March 2010	44.92	47.43	50.64	44.92
April 2010	44.36	44.47	44.73	44.29
May 2010	46.37	45.82	47.70	44.52
June 2010	46.60	46.58	47.15	45.75

D. Risk Factors.

This section describes the risks that we currently believe may materially affect our business. The factors below should be considered in connection with any forward-looking statements in this annual report and the cautionary statements on page i. The risks below are not the only ones we face – some risks may be unknown to us, and some risks that we do not currently believe to be material could later turn out to be material. Although we will be making all reasonable efforts to mitigate or minimize these risks, one or more of a combination of these risks could materially impact our business, revenues, sales, and net assets, results of operations, liquidity and capital resources.

Risk associated with Our Business and the Automotive Industry.

Lack of improvement or worsening global economic conditions could have a significant adverse impact on our sales and results of operations.

The severe recessionary impact of the sub-prime financial crisis and the recent sovereign debt crisis in the Euro zone continue to be a cause of concern despite concerted efforts to contain the adverse impact of these events on global recovery.

The Indian automotive industry is affected substantially by the general economic conditions in India and around the world. The demand for automobiles in the Indian market is influenced by factors including the growth rate of the Indian economy, easy availability of credit, and increase in disposable income among Indian consumers, interest rates, freight rates and fuel prices. Even though India had little exposure to sub-prime assets, it was affected severely by the subprime crisis – consequential impact on global credit markets and the associated significant decline in exports. The GDP growth rate decelerated from 9% in Fiscal 2007-08 to 7.4% in Fiscal 2009-10. In response to the crisis, the Indian Government took measures in the form of a stimulus package targeted at critical industry segments including the automotive industry. The country's central bank, the Reserve Bank of India or RBI, also reversed its anti-inflationary policy to stimulate growth. These measures saw the automotive industry rebound gradually starting with the passenger vehicles market followed by the markets for light commercial vehicles and medium and heavy trucks. The automotive industry in general is cyclical and economic slowdowns in the past have affected the manufacturing sector including the automotive and related industries. Deterioration in key economic factors such as growth rate, interest rates and inflation as well as reduced availability of financing for vehicles at competitive rates may adversely affect our automotive sales in India and results of operations.

Table of Contents

Our Jaguar and Land Rover have significant presence in the UK, North America and Continental Europe and have the operations in many major countries across the globe. We also have automotive operations in South Korea, Spain and Thailand. The global economic downturn significantly impacted the global automotive markets, particularly in the United States and Europe, where our Jaguar Land Rover operations have significant sales exposure. Our strategy, which includes new product launches and expansion into growing markets such as China, Russia and Brazil, may not be sufficient to mitigate the decrease in demand for our products in established markets and this could have a significant adverse impact on our financial performance. In response to the recent economic slowdown, we further intensified efforts to review and realign our cost structure such as reducing manpower costs and other fixed costs. Further, our Jaguar Land Rover business is exploring opportunities to reduce breakeven levels through increased sourcing of materials from low cost countries, reduction in number of suppliers, reduction in number of platforms, reduction in engineering change costs, increased use of off-shoring and several other initiatives. Although consumer sentiments have improved in many developed markets since late 2009, if industry demand softens because of a major debt crisis, negative economic growth in key markets or other factors, our results of operations and financial condition could be substantially and adversely affected.

We have incurred a substantial amount of indebtedness which could adversely affect our future business performance and financial condition.

We had borrowed US\$3 billion under a short-term bridge loan facility for the acquisition of Jaguar Land Rover in fiscal 2009. This loan has been entirely repaid through funds raised by the issuance of equity and equity-linked instruments, the divestment of some of our investments, as well as through proceeds from Secured Non-Convertible Credit Enhanced Rupee Debentures. During fiscal 2008-09 and fiscal 2009-10, we set up working capital facilities at our Jaguar Land Rover operations, which were acquired on a cash-free, debt-free basis in June, 2008. The worsening global economic situation following our acquisition also required us to raise additional debt. Further, the funds we had committed for certain new products and expansion plans had to be assured. Thus, although we have paid down, part of our debt with equity and funds raised through sale of investments, we continue to have a significant amount of debt. As of March 31, 2010, we had a total debt of Rs.423,152 million.

Our level of indebtedness may affect us in several ways, including by: (i) requiring us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and other general corporate purposes, (ii) affecting our ability to generate sufficient cash for principal and interest payments and other amounts due in respect of the debt, (iii) materially impacting our ability to pay dividends in the future and/or (iv) leading to a downgrade of our credit rating by international and domestic rating agencies, thereby adversely impacting the interest rates and commercial terms on which additional financing is available to us.

We aim to pursue further suitable steps to de-leverage and de-risk our balance sheet from volatility through internal accruals, capital raising and divestment of investments. However, the execution of our deleveraging plan is subject to various risks, including, among other things: (i) failure to receive any regulatory or corporate approvals that are necessary, (ii) adverse market conditions, which have been particularly exacerbated by the dislocation of the fixed income and securitization markets following the global credit crisis, (iii) foreign currency movements and (iv) failure of our growth plans to materialize as anticipated.

We cannot assure you that all of the conditions for our deleveraging and funding plans will be satisfied. If we or any other relevant parties are unable to satisfy any of the conditions for our funding plans or to satisfy these conditions in the time frame that we expect, we may not be able to repay our debt in the time frame that we expect, which could materially adversely affect our future business performance and financial condition. In addition, our cost of borrowing depends in part on our credit ratings by international and domestic rating agencies. A downgrade of our rating for foreign or local currency borrowings could adversely impact our ability to raise funds as per our plans through the incurrence of debt and the interest rates at which such financing alternatives may be available to us.

Restrictive covenants in our financing agreements may limit our operations and financial flexibility and adversely impact our future results and financial condition.

Some of our financing agreements and debt arrangements set limits on and/or require us to obtain lender consents before, among other things, pledging assets as security. In addition, certain financial covenants may limit our ability to borrow additional funds or to incur additional liens. In the past, we have been able to obtain required lender consents for such activities. However, there can be no assurance that we will be able to obtain such consents in the future. If our financial or growth plans require such consents and such consents are not obtained, we may be forced to forego or alter our plans, which could adversely affect our results of operations and financial condition.

Table of Contents

In the event that we breach these covenants, the outstanding amounts due under such financing agreements could become due and payable immediately. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such other financing agreements becoming due and payable immediately. Defaults under one or more of our financing agreements could have a material adverse effect on our results of operations and financial condition.

Because of the acquisition of Jaguar Land Rover, our historical financial statements may not be comparable.

On June 2, 2008, we completed the acquisition of Jaguar Land Rover from the Ford Motor Company, or Ford. Therefore, our financial statements for the fiscal years ended March 31, 2009 and 2010 include the results of Jaguar Land Rover for the period commencing from June 2, 2008 to March 31, 2009 and for the fiscal year ended March 31, 2010, respectively. Our historical consolidated financial statements for the fiscal years ended on and before March 31, 2008 do not include the results of Jaguar Land Rover, and neither pro forma nor historical consolidated financial statements showing our combined results of operations and financial condition, including Jaguar Land Rover, have been prepared or are being provided in this annual report.

This may make it difficult to compare our past performance and financial condition or to estimate our consolidated performance in the future. Moreover, the global disruption of the automotive industry, including Jaguar Land Rover's markets, makes past performance of the business not necessarily indicative of future demand, trends or results.

Currency and exchange rate fluctuations could adversely affect our results of operations.

Our operations are subject to risk arising from fluctuations in exchange rates with reference to countries in which we operate. These risks primarily stem from the relative movements of the GBP, the US dollar, the Japanese Yen, the Euro and the Indian Rupee.

We import capital equipment, raw materials and components from, and also sell our vehicles in various countries. These transactions are denominated primarily in US dollars and Euros. Moreover, we have outstanding foreign currency denominated debt and are sensitive to fluctuations in foreign currency exchange rates. We have experienced and expect to continue to experience foreign exchange losses and gains on obligations denominated in foreign currencies in respect of our borrowings and foreign currency assets and liabilities due to currency fluctuations. Our Jaguar Land Rover operations have significant exposure considering our vehicle sales in the US, Europe and China. In addition, Jaguar Land Rover sources a significant portion of input material from European suppliers. A weakening of the GBP against the US dollar as well as a weakening of the Euro against the GBP, especially in the latter part of the Fiscal year, had a favourable impact on our Jaguar Land Rover operations. Similarly appreciation of the Indian Rupee against the US dollar also favourably impacted our borrowing cost and consequently, our results of operations.

Although we engage in currency hedging in order to decrease our foreign exchange exposure, a weakening of the Indian Rupee against the US dollar or other major foreign currencies may have an adverse effect on our cost of borrowing and consequently may increase our financing costs, which could have a significant adverse impact on our results of operations.

Financial instability in other countries could disrupt our business and cause the trading price of our Shares and ADSs to decrease.

The Indian automotive market and the Indian economy are influenced by economic and market conditions in other countries. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies and the economy as a whole, in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India. In the event that the current difficult conditions in the global credit markets continue, or if the recovery is slower than expected, or if there is any significant financial disruption, this could have an adverse effect on our cost of funding, loan portfolio, business, prospects, results of operations, financial condition and the trading price of our Shares and ADSs.

Intensifying competition could materially and adversely affect our sales and results of operations.

The global automotive industry is highly competitive and competition is likely to further intensify in view of the continuing globalization and consolidation in the worldwide automotive industry. Competition is especially likely to increase in the premium automotive categories as each market participant intensifies its efforts to retain its position in established markets while also developing a presence in emerging markets. The factors affecting competition include product quality and features, innovation and product development time, ability to control costs, pricing, reliability, safety, fuel economy, customer service and financing terms. There can be no assurance that we will be able to compete successfully in the global automotive industry in the future.

Table of Contents

The Indian automobile industry is highly competitive. We face strong competition in the Indian market from domestic as well as foreign automobile manufacturers. Improving infrastructure and robust growth prospects compared to other mature markets are attracting a number of international companies to India either through joint ventures with local partners or through independently owned operations in India. International competitors bring with them decades of international experience, global scale, advanced technology and significant financial resources. Consequently, domestic competition is likely to further intensify in the future. There can be no assurance that we will be able to implement our future strategies in a way that will mitigate the effects of increased competition in the Indian automotive industry.

Our future success depends on our ability to satisfy changing customer demands by offering innovative products in a timely manner and maintaining such products' competitiveness.

Our competitors can gain significant advantages if they are able to offer products satisfying customer needs earlier than we are able to and this could adversely impact our sales and results of operations. Unanticipated delays or cost overruns in implementing new product launches, expansion plans or capacity enhancements could adversely impact our results of operations.

Customer preferences especially in many of the developed markets seem to be moving in favour of more fuel efficient vehicles. Further, in many countries there has been significant pressure on the automotive industry to reduce carbon dioxide emissions. In many markets these preferences are driven by increased government regulation and rising fuel prices. Our operations may be significantly impacted if there is a delay in developing fuel efficient products that reflect changing customer preferences, especially in the premium automotive category. There can be no assurance that the market acceptance of our future products will meet our expectations, in which case we may be unable to realize the intended economic benefits of our investments and our results of operations may be adversely affected.

We are subject to risks associated with product liability, warranty and recall.

We are subject to risks and costs associated with product liability, warranties and recalls, should we supply defective products, parts, or related after-sales services, including by generating negative publicity, which may adversely affect our business, results of operations and financial condition. Such events could also require us to expend considerable resources in correcting these problems and could adversely affect demand for our products. We may also be subject to class actions or other large scale product liability or other lawsuits in various jurisdictions where we have a significant presence.

We are subject to risk associated with our automobile financing business.

We are subject to risks associated with our automobile financing business. Any defaults by our customers or inability to repay instalments as due, could adversely affect our business, results of operations and cash flows. In addition, any downgrades in our credit ratings may increase our borrowing costs and restrict our access to the debt markets. Over time, and particularly in the event of any credit rating downgrades, market volatility, market disruption or otherwise, we may need to reduce the amount of financing receivables we originate, which could adversely affect our ability to support the sale of our vehicles.

Underperformance of our distribution channels and supply chains may adversely affect our sales and results of operations.

Our products are sold and serviced through a network of authorized dealers and service centers across our domestic market, and a network of distributors and local dealers in international markets. We monitor the performance of our dealers and distributors and provide them with support to enable them to perform to our expectations. There can be no assurance, however, that our expectations will be met. Any under-performance by our dealers or distributors could adversely affect our sales and results of operations. We rely on third parties to supply us with the raw materials, parts and components used in the manufacture of our products. Furthermore, for some of these parts and components, we are dependent on a single source. Our ability to procure supplies in a cost effective and timely manner is subject to various factors, some of which are not within our control. While we manage our supply chain as part of our vendor management process, any significant problems with our supply chain in the future could affect our results of operations in an adverse manner.

Adverse economic conditions and falling vehicle sales have had a significant financial impact on some of our suppliers and distributors. Further deterioration of automobile demand and lack of access to sufficient financial arrangements for our supply chain could impair timely availability of components to us, while impairments to the financial condition of our distributors may impact our performance in some markets. In addition, if one or more of the other global automotive manufacturers were to become insolvent, this would have an adverse impact on the supply chains and may further affect our results of operations in an adverse manner.

Table of Contents

In respect of our Jaguar Land Rover operations, as part of a separation agreement from Ford, we have entered into a supply agreements with Ford and certain other third parties for critical components. Any disruption of such transitional services could have a material adverse impact on our operations and financial condition.

Increases in input prices may have a material adverse impact on our result of operations.

In Fiscal 2010 and 2009, consumption of raw materials, components and aggregates and purchase of products for sale constituted approximately 66.8% and 67.6% respectively, of total revenues. Prices of commodity items used in manufacturing automobiles, including steel, aluminium, copper, zinc, rubber, platinum, palladium and rhodium have become increasingly volatile over the past two years. Further, with many economies coming out of recession, prices of commodity items such as steel, non-ferrous, precious metals, rubber and petroleum product are expected to rise significantly. While we continue to pursue cost reduction initiatives, an increase in price of input materials could severely impact our profitability to the extent such increase cannot be absorbed by the market through price increases and/or could have a negative impact on the demand. In addition, because of intense price competition and our high level of fixed costs, we may not be able to adequately address changes in commodity prices even if they are foreseeable. Increases in fuel costs also pose a significant challenge to automobile manufacturers worldwide, including us, especially in the commercial and premium vehicle segments where increased fuel prices have an impact on demand.

The performance of our subsidiaries and affiliates may adversely affect our results of operations.

We have made and may continue to make capital commitments to our subsidiaries and affiliates, and if the business or operations of these subsidiaries and affiliates deteriorates, the value of our investments may be adversely affected.

We are subject to risks associated with growing our business through mergers and acquisitions.

We believe that our acquisitions provide us opportunities to grow significantly in the global automobile markets by offering premium brands and products. Our acquisitions have provided us with access to technology and additional capabilities while also offering potential synergies. However, the scale, scope and nature of the integration required in connection with our acquisitions present significant challenges, and we may be unable to integrate the relevant subsidiaries, divisions and facilities effectively within our expected schedule. The acquisition may not meet our expectations and the realization of the anticipated benefits may be blocked, delayed or reduced as a result of numerous factors, some of which are outside our control.

We will continue to evaluate growth opportunities through suitable mergers and acquisitions in the future. Growth through mergers and acquisitions involves business risks, including unforeseen contingent risks or latent business liabilities that may only become apparent after the merger or acquisition is completed. The key success factors will be seamless integration and effective management of the merged/acquired entity, retention of key personnel, and generating cash flow from synergies in engineering and sourcing, joint sales and marketing efforts, and management of a larger business. If any of these factors fails to materialize or if we are unable to manage any of the associated risks successfully, our results of operations could be adversely affected. If we are not able to manage these risks successfully, our results of operations could be adversely affected.

Our business is seasonal in nature and a substantial decrease in our sales during certain quarters could have a material adverse impact on our financial performance.

The sales volumes and prices for our vehicles are influenced by the cyclicity and seasonality of demand for these products. In the Indian market, demand for our vehicles generally peaks between January and March, although there is a decrease in demand in February just before release of the Indian fiscal budget. Demand is usually lean from April to July and picks up again in the festival season from September onwards, with a decline in December due to year-end. The automotive industry has been cyclical in the past and we expect this cyclicity to continue.

Our Jaguar Land Rover business is impacted by the bi-annual registration of vehicles in the United Kingdom where the vehicle registration number changes every six months, which in turn has an impact on the resale value of vehicles. This leads to an increase in sales during the period when the aforementioned change occurs. Most other markets such as the United States are driven by introduction of new model year products which typically occurs in the autumn of each year. Furthermore, western European markets tend to be impacted by the summer and winter holidays. The resulting sales profile influences operating results on a quarter-to-quarter basis.

Table of Contents

We rely on licensing arrangements with Tata Sons Limited to use the Tata brand. Any improper use of the associated trademarks by our licensor or any other third parties could materially and adversely affect our business, financial condition and results of operations.

Our rights to our trade names and trademarks are a crucial factor in marketing our products. Establishment of the Tata word mark and logo mark in and outside India is material to our operations. We have licensed the use of the Tata brand from Tata Sons Limited. If Tata Sons, or any of their subsidiaries or affiliated entities, or any third party uses the trade name Tata in ways that adversely affect such trade name or trademark, our reputation could suffer damage, which in turn could have a material adverse effect on our business, financial condition and results of operations.

We may be adversely affected by labor unrest.

All of our permanent employees, other than officers and managers, in India and most of our permanent employees in South Korea and the United Kingdom, including certain officers and managers, in relation to our automotive business, are members of labor unions and are covered by our wage agreements, where applicable with those labor unions.

In general, we consider our labor relations with all of our employees to be good. However, in the future we may be subject to labor unrest, which may delay or disrupt our operations in the affected regions, including the acquisition of raw materials and parts, the manufacture, sales and distribution of products and the provision of services. If work stoppages or lock-outs at our facilities or at the facilities of our major vendors occur or continue for a long period of time, our business, financial condition and results of operations may be adversely affected

Any inability to manage our growing international business may adversely affect our results of operations.

Our growth strategy relies on the expansion of our operations by introducing certain automotive products in other parts of the world, including Europe, China, Russia, Brazil and other parts of Asia. The costs associated with entering and establishing ourselves in new markets, and expanding such operations, may be higher than expected, and we may face significant competition in those regions. In addition, our international business is subject to many actual and potential risks, including language barriers, cultural differences and other difficulties in staffing and managing overseas operations, inherent difficulties and delays in contract enforcement and the collection of receivables under the legal systems of some foreign countries, the risk of non-tariff barriers, other restrictions on foreign trade or investment sanctions, and the burdens of complying with a wide variety of foreign laws and regulations.

If we are unable to manage risks related to our expansion and growth in other parts of the world, our business, results of operations and financial condition could be adversely affected.

Future pension obligations may prove more costly than currently anticipated and the market value of assets in our pension plans could decline.

We provide post retirement and pension benefits to our employees some of which are defined benefit plans.

Our pension liabilities are generally funded and the pension plan assets are particularly significant in respect of the Jaguar and Land Rover pension plans. We are currently discussing April 2009 valuations with authorities and the Jaguar and Land Rover trustees. In the event that the actuarially determined liabilities exceed the plan assets at the time of valuation, we would have to agree on new contributions with the trustees of the Jaguar and Land Rover pension to fund the deficit over such period of time as agreed. All new employees in our Jaguar Land Rover operations from April 19, 2010 will join a new defined contribution pension plan.

Lower return on pension fund assets, changes in market conditions, changes in interest rates, changes in inflation rates, and adverse changes in other critical actuarial assumptions, may impact the pension liabilities and consequently increase funding requirements, which will adversely affect our financial condition and results of operations.

Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject, and this may have a material adverse effect on our business.

While we believe that the insurance coverage that we maintain is reasonably adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under our insurance policies will be honored fully or timely. Accordingly, to the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our financial condition may be affected.

Table of Contents

Political and Regulatory Risks.

India's obligations under the World Trade Organization Agreement.

India's obligations under its World Trade Organization agreement could reduce the present level of tariffs on imports of components and vehicles. Reductions of import tariffs could result in increased competition, which in turn could adversely affect our sales and results of operations.

Environmental, Fiscal and Other Governmental regulations.

As an automobile company, we are subjected to extensive governmental regulations regarding vehicle emission levels, noise, safety and levels of pollutants generated by our production facilities. These regulations are likely to become more stringent and compliance costs may significantly impact our future results of operations. In particular, the U.S. and Europe have stringent regulations relating to vehicular emissions. The proposed tightening of vehicle emissions regulations by the European Union will require significant costs for compliance. While we are pursuing various technologies in order to meet the required standards in the various countries in which we sell our vehicles, the costs for compliance with these required standards can be significant to our operations and may adversely impact our results of operations.

Imposition of any additional taxes and levies designed to limit the use of automobiles could adversely affect the demand for our products and our results of operations. Changes in corporate and other taxation policies as well as changes in export and other incentives given by the various governments could also adversely affect our results of operations. For example, we are availing ourselves of excise duty exemptions for manufacturing facilities in the State of Uttarakhand and other incentives in certain states of India either through subsidies or loans from such states where we have manufacturing operations. The Government of India has proposed a comprehensive national goods and services tax, or GST, regime effective April 1, 2011, that will combine taxes and levies by the central and state governments into one unified rate structure. While both the Government of India and other state governments of India have publicly announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure might be affected by any disagreement between certain state governments, which could create uncertainty.

The Direct Tax Code Bill 2010, or DTC, proposes to replace the existing Income Tax Act, 1961 and other direct tax laws, with a view to simplify and rationalize the tax provisions into one unified code. The DTC bill which was placed before the Indian parliament for debate and discussion on August 30, 2010 is proposed to come into effect from April 1, 2012. The various proposals included in DTC bill are subject to review by Indian parliament and as such impact if any, is not quantifiable at this stage.

Regulations in the areas of investments, taxes and levies may also have an impact on Indian securities, including our Shares and ADSs. In this regard it is important to note that the Indian Government has recently released a new draft direct tax code which if brought into force will have a significant impact on the current tax regime, including in respect of our Shares and ADSs. For more information, see Item 4.B Business Overview Government Regulations Indian Taxes Goods and Services Tax of this annual report.

We may be adversely impacted by political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages/prices, epidemics and labor strikes.

Our products are exported to a number of geographical markets and we plan to expand our international operations further in the future. Consequently, we are subject to various risks associated with conducting our business outside our domestic markets and our operations may be subject to political instability in those markets, wars, terrorism, regional and/or multinational conflicts, natural disasters, fuel shortages, epidemics and labor strikes. Any significant or prolonged disruptions or delays in our operations related to these risks could adversely impact our results of operations.

Compliance with new and changing corporate governance and public disclosure requirements adds uncertainty to our compliance policies and increases our costs of compliance.

Changing laws, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and Securities and Exchange Commission, or SEC, regulations, SEBI regulations, New York Stock Exchange, or NYSE, listing rules and Indian stock market listing regulations, have increased complexity for us. These new or changed laws, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of ongoing revisions to such governance standards. We are committed to maintaining high standards of corporate governance and public

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

disclosure. However, our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management resources and time.

Table of Contents

In addition, new laws, regulations and standards regarding corporate governance may make it more difficult for us to obtain director and officer liability insurance. Further, our board members, managing director and chief executive officer as well as our chief financial officer could face an increased risk of personal liability in connection with the performance of their duties. As a result, we may face difficulties attracting and retaining qualified board members and senior management, which could harm our business. If we fail to comply with new or changed laws, regulations or differing standards, our business and reputation may be harmed.

Risks associated with Investments in an Indian Company.

Political changes in the Government of India could delay and/or affect the further liberalization of the Indian economy and adversely affect economic conditions in India generally and our business in particular.

Our business could be significantly influenced by economic policies adopted by the Indian Government. Since 1991, successive Indian Governments have pursued policies of economic liberalization and financial sector reforms.

The Indian Government has at various times announced its general intention to continue India's current economic and financial liberalization and deregulation policies. However, protests against privatizations, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well. While we expect any new government to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no assurance that such policies will be continued.

The Indian Government has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our ADSs and Shares may be affected by interest rates, changes in policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

A change in the Indian Government's policies in the future could adversely affect business and economic conditions in India and could also adversely affect our financial condition and results of operations. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally, and specifically those of our Company, as a substantial portion of our assets are located in India.

Terrorist attacks, civil disturbances, regional conflicts and other acts of violence, particularly in India, may disrupt or otherwise adversely affect the markets in which we operate, our business and our profitability.

India has from time to time experienced social and civil unrest and hostilities, including terrorist attacks and riots and armed conflict with neighboring countries. Events of this nature in the future could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our ADSs and Shares, and on the market for our vehicles.

Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, which include regulations applicable to our Board of Directors, and Indian law govern our corporate affairs. Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company incorporated in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions, including the United States. You may also have more difficulty in asserting your rights as a shareholder of our Company than you would as a shareholder of a corporation organized in another jurisdiction.

The market value of your investment may fluctuate due to the volatility of the Indian securities market.

The Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of their listed securities. The Indian stock exchanges, including the Bombay Stock Exchange Limited, or BSE, have experienced problems that, if they continue or recur, could affect the market price and liquidity of the securities of Indian companies, including our Shares. These problems in the past included temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

Table of Contents

There may be a differing level of regulation and monitoring of the Indian securities markets and the activities of investors, brokers and other participants, than in the United States. The Securities and Exchange Board of India, or SEBI, received statutory powers in 1992 to assist it in carrying out its responsibility for improving disclosure and other regulatory standards for the Indian securities markets. Subsequently, SEBI has prescribed regulations and guidelines in relation to disclosure requirements, insider dealing and other matters relevant to the Indian securities market. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in the United States.

Investors may have difficulty enforcing judgments against us or our management.

We are a limited liability company incorporated under the laws of India. Substantially all of our directors and executive officers named in this annual report are residents of India and all, or a substantial portion of our assets and the assets of these directors and executive officers are located in India. As a result, investors may find it difficult to (i) effect service of process upon us or these directors and executive officers in jurisdictions outside of India, (ii) enforce court judgments obtained outside of India, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and executive officers, (iii) enforce, in an Indian court, court judgments obtained outside of India, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and executive officers, and (iv) obtain expeditious adjudication of an original action in an Indian court to enforce liabilities, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and executive officers.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided under Section 13 of the Code of Civil Procedure, or the Civil Procedure Code.

Section 13 and Section 44A of the Civil Procedure Code provide that a foreign judgment shall be conclusive as to any matter thereby directly adjudicated upon except (i) where it has not been pronounced by a court of competent jurisdiction, (ii) where it has not been given on the merits of the case, (iii) where it appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where Indian law is applicable, (iv) where the proceedings in which the judgment was obtained were opposed to natural justice, (v) where it has been obtained by fraud or (vi) where it sustains a claim founded on a breach of any law in force in India.

Section 44A of the Civil Procedure Code provides that where a foreign judgment has been rendered by a superior court in any country or territory outside India which the Government has by notification declared to be a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the Civil Procedure Code is applicable only to monetary decrees not being in the nature of any amounts payable in respect of taxes or other charges of a like nature or in respect of a fine or other penalty.

The United States has not been declared by the Government of India to be a reciprocating territory for the purpose of Section 44A of the Civil Procedure Code. Accordingly, a judgment of a court in the United States may be enforced only by a suit upon the judgment and not by proceedings in execution. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with public policy. A party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amount recovered.

Risks associated with our Shares and ADSs.

Fluctuations in the exchange rate between the rupee and the US dollar may have a material adverse effect on the market value of our ADSs and Shares, independent of our operating results.

Fluctuations in the exchange rate between the rupee and the US dollar will affect, among others things, the US dollar equivalents of the price of the Shares in rupees as quoted on the Indian stock exchanges and, as a result, may affect the market price of the ADSs. Such fluctuations will also affect the US dollar equivalent of any cash dividends in rupees received on the Shares represented by the ADSs and the dollar equivalent of the proceeds in rupees of a sale of Shares in India.

The exchange rate between the rupee and the US dollar has changed substantially in the last two decades and may substantially fluctuate in the future. The value of the rupee against the US dollar was Rs.44.95 = US\$1.00 as of September 29, 2010.

Table of Contents***Holders of ADSs have fewer rights than shareholders and must act through the depositary to exercise those rights.***

Although holders of ADSs have a right to receive any dividends declared in respect of shares underlying the ADSs, they cannot exercise voting or other direct rights as a shareholder with respect to the shares underlying the ADSs evidenced by ADRs. Citibank, N.A. as depositary is the registered shareholder of the deposited shares underlying our ADSs, and therefore only Citibank, N.A. can exercise the rights of shareholders in connection with the deposited shares. Only if requested by us, will the depositary notify holders of ADSs of upcoming votes and arrange to deliver our voting materials to holders of ADSs. The depositary will try, in so far as practicable, subject to Indian laws and the provisions of our Articles of Association, to vote or have its agents vote the deposited securities as instructed by the holders of ADSs. If the depositary receives voting instructions in time from a holder of ADSs which fail to specify the manner in which the depositary is to vote the shares underlying such holder's ADSs, such holder will be deemed to have instructed the depositary to vote in favor of the items set forth in such voting instructions. If the depositary has not received timely instructions from a holder of ADSs, the holder shall be deemed to have instructed the depositary to give a discretionary proxy to a person designated by us, subject to the conditions set forth in the deposit agreement. If requested by us, the depositary is required to represent all shares underlying ADSs, regardless whether timely instructions have been received from the holders of such ADSs, for the sole purpose of establishing a quorum at a meeting of shareholders. Additionally, in your capacity as an ADS holder, you will not be able to bring a derivative action, examine our accounting books and records, or exercise appraisal rights. Registered holders of our Shares withdrawn from the depositary arrangements will be entitled to vote and exercise other direct shareholder rights in accordance with Indian law. However, a holder may not know about a meeting sufficiently in advance to withdraw the underlying shares in time. Furthermore, a holder of ADSs may not receive voting materials, if we do not instruct the depositary to distribute such materials, or may not receive such voting materials in time to instruct the depositary to vote.

Further, pursuant to Indian regulations, we are required to offer our shareholders preemptive rights to subscribe for a proportionate number of shares to maintain their existing ownership percentages prior to the issue of new shares. These rights may be waived by a resolution passed by at least 75% of our shareholders present and voting at a general meeting. Holders of ADSs may be unable to exercise preemptive rights for subscribing to these new Shares unless a registration statement under the Securities Act is effective or an exemption from the registration requirements is available to us. Our decision to file a registration statement would be based on the costs, timing, potential liabilities and the perceived benefits associated with any such registration statement and we do not commit that we would file such a registration statement. If any issue of securities is made to our shareholders in the future, such securities may also be issued to the depositary, which may sell such securities in the Indian securities market for the benefit of the holders of ADSs. There can be no assurance as to the value, if any, the depositary would receive upon the sale of these rights/securities. To the extent that holders of ADSs are unable to exercise preemptive rights, their proportionate interest in our Company would be reduced.

As a result of Indian Government regulation of foreign ownership the price of the ADSs could decline.

Foreign ownership of Indian securities is regulated and is partially restricted. In addition, there are restrictions on the deposit of Shares into our ADS facilities. ADSs issued by companies in certain emerging markets, including India, may trade at a discount to the underlying equity shares, in part because of the restrictions on foreign ownership of the underlying equity shares and in part because ADSs are sometimes perceived to offer less liquidity than underlying shares which can be traded freely in local markets by both local and international investors. See Item 10.D Exchange Controls. The ADSs could trade at a discount to the market price of the underlying shares.

Item 4. Information on the Company.**A. History and Development of the Company.**

We were incorporated on September 1, 1945 as a public limited liability company under the Indian Companies Act VII of 1913 as Tata Locomotive and Engineering Company Limited. Our name was changed to Tata Engineering and Locomotive Company Limited on September 24, 1960 and to Tata Motors Limited on July 29, 2003. We commenced operations as a steam locomotive manufacturer. This business was discontinued in 1971. Since 1954, we have been manufacturing automotive vehicles. The automotive vehicle business commenced with the manufacture of commercial vehicles under financial and technical collaboration with Daimler-Benz AG (now Daimler AG) of Germany. This agreement ended in 1969. We produced only commercial vehicles until 1991, when we started producing passenger vehicles as well.

In September 2004, we became the first company from India's engineering sector to be listed on the New York Stock Exchange.

Table of Contents

We offer a broad portfolio of automotive products, ranging from sub 1 ton to 49 ton gross vehicle weight, or GVW, trucks (including pickup trucks) to small, medium, and large buses and coaches to passenger cars, including the world's most affordable car – the Tata Nano, premium luxury cars and SUVs. By volume, we are the world's fourth largest truck manufacturer and the second largest bus manufacturer in above 8 ton category.

We have a substantial presence in India and also own Jaguar and Land Rover premium brand passenger vehicles. We are the largest automobile manufacturer by revenue in India, the largest commercial vehicle manufacturer in terms of revenue in India and among the top three passenger vehicle manufacturers in terms of units sold in India during fiscal 2010. We estimate that more than four million vehicles produced by us are currently being operated in India.

We operate five principal automotive manufacturing facilities in India: at Jamshedpur in the State of Jharkhand, at Pune in the state of Maharashtra, at Lucknow in the state of Uttar Pradesh, at Pantnagar in the state of Uttarakhand and at Sanand in the state of Gujarat. We also operate three principal automotive facilities in the United Kingdom through our Jaguar Land Rover business: at Solihull in the West Midlands, Castle Bromwich in the West Midlands and Halewood in Liverpool.

We have expanded our international operations through mergers and acquisitions and in India we have made strategic alliances involving non-Indian companies.

In 2004, we acquired the Daewoo Commercial Vehicles Company (renamed as Tata Daewoo Commercial Vehicle Company Limited, or TDCV), which is South Korea's second largest truck maker in terms of revenue. Together with TDCV we have developed our next generation trucks called the Prima range of trucks (earlier referred to as the World Truck).

In Fiscal 2005, we acquired a 21% stake in Hispano Carrocera S.A. (renamed as Tata Hispano Motors Carrocera S.A.), or Hispano, a well-known Spanish bus and coach manufacturer. During Fiscal 2010 we acquired the remaining 79% shares in Hispano. This is expected to further strengthen our capabilities and presence in the bus and coach product segment.

We have also been distributing and marketing Fiat branded cars in India since March 2006. We have a joint venture agreement with Fiat Group Automobiles S.p.A., Italy, located at Ranjangaon in Maharashtra to manufacture passenger cars, engines and transmissions for the Indian and overseas markets. Established in April 2008, the plant currently manufactures the Fiat Linea, the Fiat Punto, the Tata branded Indica Vista and Manza as well as components like engines and transmissions.

In May 2006, we entered into a joint venture agreement with Brazil-based Marcopolo S.A., or Marcopolo, a global leader in building bodies for buses and coaches, to manufacture and assemble fully-built buses and coaches in India, wherein we have a 51% ownership, the balance being held by Marcopolo. The joint venture commenced production during fiscal 2009.

In December 2006, we entered into a joint venture agreement with Thonburi Automotive Assembly Plant Co Ltd., Thailand, or Thonburi, to manufacture pickup trucks in Thailand. Currently, we own 86.78% of the joint venture, while Thonburi owns the remaining 13.22%. The joint venture, which began vehicle production in March 2008, will enable us to access the Thailand market, which is a major market for pickup trucks, and other potential markets in that region.

For some of our products, we are also expanding our international export operations, which have been continuing since 1961. Our vehicles are being marketed in several countries in Europe, Africa, the Middle East, South East Asia and South Asia. During fiscal 2008, Tata Motors (SA) Proprietary Limited, or TMSA, a joint venture company in which we hold 60% with the remaining 40% being held by Tata Africa Holdings (SA) (Pty.) Limited, was formed for the manufacture and assembly operations of our LCVs and M&HCVs in South Africa. In light of the recession and consequent market contraction in South Africa following the financial crisis in fiscal 2009, we temporarily deferred commencement of operation of the joint venture. With gradual revival in the business environment, we expect TMSA to commence operations in fiscal 2011.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In June 2008, we acquired the Jaguar Land Rover business from Ford Motor Company. Jaguar Land Rover is a global premium automotive business, which designs, manufactures and sells Jaguar luxury performance cars and Land Rover premium all-terrain vehicles. The Jaguar Land Rover business has internationally recognized brands, a strong product portfolio of award winning luxury performance cars and premium all-terrain vehicles, brand specific global distribution networks and strong research and development capabilities. We acquired three major manufacturing facilities located in Halewood, Solihull and Castle Bromwich and two advanced design and engineering facilities located at Whitley and Gaydon, all in the United Kingdom together with national sales companies spread across the world. We believe that this acquisition represents an important milestone in our growth strategy, allowing us to participate immediately in the luxury performance car and premium all-terrain vehicle segments and enhance our global market presence.

Table of Contents

We produce a wide range of automotive products, including:

Passenger Cars. Our passenger cars include the small car – the Tata Nano, the compact cars - Indica and the Indica Vista, the mid-sized cars - Indigo and the newly launched Indigo Manza and the station wagon version of the Indigo, the Indigo Marina. We have expanded our car lines by introducing several variants to suit different customer preferences. For example, the Indica gasoline variant, Xeta, is available with a dual fuel (petrol and liquified petroleum gas, or LPG) engine. Jaguar has established its presence in the premium car segment. With the discontinuation of production of the X-Type in December 2009, Jaguar currently produces three car lines XK, XF and XJ. A new generation of the Jaguar XJ was unveiled in London in July 2009.

Utility Vehicles. We manufacture a number of utility vehicles, or UVs, including the Sumo, and the sports utility vehicle, or SUV, Tata Safari and the lifestyle pickup, the Xenon XT. The Sumo, the Safari and the Xenon XT have variants to meet different consumer preferences such as the Safari DICOR 2.2 VTT range, powered by a new 2.2 L Direct Injection Common Rail (DICOR) engine and the Sumo Grande, an SUV with the comforts of a family car. We have unveiled our next generation of premium SUV powered by a 2.2 L DICOR engine, Aria, at the Auto Expo 2010. Land Rover produces five car lines under the brands of Range Rover and Land Rover, and provides us with presence in premium all-terrain vehicles. Range Rover is the premium range consisting of Range Rover and Range Rover Sport, and the Land Rover brand comprises of the Defender, Discovery and Freelander vehicles.

Light Commercial Vehicles. We manufacture a variety of light commercial vehicles, or LCVs, including pickup trucks, trucks and buses with a GVW of between 0.7 ton and 7.5 tons. This also includes the Ace, India's first indigenously developed mini-truck with a 0.7 ton payload, the Magic, a passenger variant for commercial transportation developed on the Ace platform, and the Winger.

Medium and Heavy Commercial Vehicles We manufacture a variety of medium and heavy commercial vehicles, or M&HCVs, which include trucks, buses, dumpers and multi-axled vehicles with GVW of between 9 tons to 49 tons. In addition, through TDCV we manufacture a range of high horsepower trucks ranging from 220 horsepower to 500 horsepower, including dump trucks, tractor-trailers, mixers and cargo vehicles. During fiscal 2010, we unveiled a new range of trucks, referred to as the as Prima line, to our customers in India, South Korea, and expect to extend the offering gradually to other countries such as South Africa, the other SAARC countries, Middle East and various countries in Africa.

We believe that the foundation of our growth over the last five decades has been a deep understanding of economic conditions and customer needs, and the ability to translate them into customer desired products through leading edge research and development. Our Engineering Research Centre, or ERC, established in 1966, has enabled us to successfully design, develop and produce our own range of vehicles. As a part of the acquisition of Jaguar Land Rover, we now have state of the art, engineering and design facilities. We believe the ERC along with the capabilities of our Jaguar Land Rover business will enhance our product engineering capability and facilitate speedy introduction of new products. Furthermore, we have a wholly-owned subsidiary, Tata Motors European Technical Centre PLC, or TMETC, in the United Kingdom, which is engaged in automobile research and engineering. In October 2008, TMETC acquired Miljobil Grenland AS, Miljobil Grenland, a Norwegian company specializing in the development and manufacture of electric vehicles and in the development and manufacture of lithium ion batteries. Electric vehicles form a significant part of our ongoing strategy. This acquisition has enabled us to secure a route to market for batteries for electric vehicles and enables us to develop convenient and sustainable solutions for electric and hybrid vehicles.

Through our other subsidiary and associate companies, we are engaged in engineering and automotive solutions, construction equipment manufacturing, automotive vehicle components manufacturing and supply chain activities, machine tools and factory automation solutions, high-precision tooling and plastic and electronic components for automotive and computer applications, and automotive retailing and service operations:

Tata Technologies Limited, or TTL our 82.47% owned subsidiary, engaged in providing specialized engineering & design services, product lifecycle management and product-centric IT services to leading global manufacturers. TTL's customers are among the world's premier automotive, aerospace and consumer durable manufacturers. TTL had nine functional subsidiary companies as at March 31, 2010. The consolidated revenue for TTL was Rs. 10,699 million in Fiscal 2010, decline of 12.9% from Rs. 12,286 million in Fiscal 2009, due to a downturn in US markets.

We hold a 40% equity interest in Telco Construction Equipment Company, or Telcon, which is engaged in the business of manufacturing and sale of construction equipment and related supporting services. Prior to March 30, 2010, we held a 60% equity interest in Telcon. However, on

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

March 30, 2010 we sold 20% of our equity interest in Telcon to Hitachi Construction Machinery Company Limited, Japan, or HCM. HCM already owns the remaining equity interest in Telcon not held by us. After such sale, Telcon is considered our associate and accounted for under the equity method.

Table of Contents

TML Distribution Company Limited or TDCL, our wholly-owned subsidiary, was incorporated on March 28, 2008. TDCL is engaged in the business of selling and providing logistics support for distribution of our products throughout India. TDCL commenced its operations in Fiscal 2009.

Our wholly-owned subsidiary, Tata Motors Finance Limited, or TMFL, was incorporated on June 1, 2006 with the objective of becoming a preferred financing provider for our dealer's customers by capturing customer spending over the vehicle life-cycle relating to vehicles sold by us. TMFL commenced operations on September 1, 2006. In India, TMFL is registered with the RBI as a Systemically Important Non-Deposit Taking Non-Banking Financial Company and is classified as an Asset Finance Company under the RBI's regulations on Non-Banking Financial Companies.

Our wholly-owned subsidiary, Tata Motors Insurance Services Limited, now known as Tata Motors Insurance Broking and Advisory Services Limited, undertakes the business of insurance and reinsurance broking, which commenced business in Fiscal 2008.

As of March 31, 2010, our operations included 67 consolidated subsidiaries and equity method affiliates, in respect of which we exercise significant influence.

As of March 31, 2010, we had approximately 49,856 permanent employees, including approximately 25,546 permanent employees at our consolidated subsidiaries.

Tata Incorporated serves as our authorized United States representative. The address of Tata Incorporated is 3 Park Avenue, 27th Floor, New York, NY 10016, United States of America.

Our Registered Office is located at Bombay House, 24, Homi Mody Street, Mumbai 400 001, India and our telephone number is +91-22-6665-8282 and our website address is www.tatamotors.com. Our website does not constitute a part of this annual report.

B. Business Overview.

We primarily operate in the Automotive segment. Our Automotive segment operations includes all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. The acquisition of Jaguar Land Rover business has enabled to enter the premium car market in the developed markets such as UK, USA and Europe. Tata Motors Limited is in the process of managing the global automotive business with an integrated and synergic strategy. Towards this objective, various steps have been initiated/being taken which mainly include sharing of resources, platforms, facilities for product development and manufacturing, sourcing strategy and mutual sharing of best practices. It is expected that through these measures, the group will achieve an overall improved performance of the Automotive business.

Our business segments are (i) automotive operations and (ii) all other operations. Our automotive operations include all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. We provide financing for vehicles sold by dealers in India. The vehicle financing is intended to drive sale of vehicles by providing financing to the dealer's customers and as such is an integral part of automotive business. Our automotive operations is further divided into Tata and other brand vehicles (including spares and financing thereof) and Jaguar and Land Rover.

Our other operations business segment includes information technology, or IT services, construction equipment manufacturing, machine tools and factory automation solutions, high-precision tooling and plastic and electronic components for certain applications and investment business.

Our Strategy

We believe that we have established a strong position in the Indian automobile industry by launching new products, investing in research and development and strengthening our financial position. We have been benefited from the expansion of our manufacturing and distribution network. We have pursued the strategy of increasing our presence in the global automotive markets and enhancing our product range and capability through strategic acquisitions/alliances. Our goal is to position ourselves as a major international automotive company by offering products across various markets by combining our engineering and other strengths as well as through strategic acquisitions. Our strategy to achieve these goals consists of the following elements:

Leveraging our capabilities: We have an extensive range of products in commercial vehicles (for both goods and passenger transport) as well as passenger vehicles. We have plans to leverage this broad product base further with our strong brand recognition in India, our understanding of local consumer preferences, well developed in-house engineering capabilities and extensive distribution network.

Table of Contents

We believe that our in-house research and development capabilities, our subsidiaries Jaguar Land Rover, TDCV and Hispano, our joint-ventures with Marcopolo of Brazil in India and with Thonburi in Thailand, and our relationship with Fiat, will enable us to expand our product range and extend our geographical reach. An example of this is the unveiling, during fiscal 2010, of our next generation of heavy trucks – Prima, which we co-developed along with our subsidiary TDCV. We believe that with the Prima we will match the best in the world in terms of performance at a lower life-cycle cost. Our launch of the Ace in May 2005, as the first sub one-ton payload mini-truck in India created a new category of vehicle in the Indian commercial vehicle industry. We rolled out the 100,000th Ace in a record time of 22 months after its launch. Similarly the launch of the Magic, a passenger variant from the same platform, has enabled us to tap into the potential increase in mass passenger transport in both rural and urban regions. We also launched the Winger, India’s only maxi-van, to cater to the intra-city and long-distance transportation needs of our customers.

In the passenger vehicles market, we entered the compact car segment with the Indica in 1998. We sold approximately 100,000 units of the Indica within 25 months of its launch in the market. On the same platform, we developed a sedan version, the Indigo, which was launched in 2002. We also launched several versions to expand our offerings over the years including an estate version and the country’s first stretched sedan concept. We are currently working to upgrade and expand our product offerings in the passenger car market. In August 2008, we launched a new generation of the Indica, the Indica Vista, with options of diesel and gasoline engines, from our joint venture with Fiat as well as our own engines and followed that in October 2009 with the launch of the next generation sedan, the Indigo Manza. We have also conceptualized, developed and commercially launched the Nano, a low cost car for safe family transportation, breaking several conventional ideas of automobile development. We believe that the Nano will enable us to capture a significant share of a large potential market for safe and affordable transportation. We believe that our investment in Miljobil Grenland will also enable us to develop convenient and sustainable solutions for electric and hybrid vehicles. Through Jaguar Land Rover we further expanded our product range into luxury performance cars and premium all-terrain vehicles and obtained three major manufacturing facilities and two advanced design and engineering facilities in the United Kingdom, that will further strengthen our capabilities.

Mitigating cyclicalities: The automobile industry is impacted by cyclicalities. To mitigate the impact of cyclicalities, we plan to continuously strengthen our operations through gaining significant presence across different segments, and a wide range of products and geographies. We also plan to continue to strengthen our business operations other than vehicle sales, such as financing of our vehicles, spare part sales, service and maintenance contracts, sales of aggregates for non-vehicle businesses, reconditioning of aggregates and sale of castings, production aids and tooling / fixtures, to reduce the impact of cyclicalities of the automotive industry.

Expanding our international business: We have a two-fold strategy of expanding our operations into other geographic areas, through strategic acquisitions and by expanding our product range into select geographies, where we have an opportunity to grow in markets with similar characteristics to the Indian market. Our international business strategy has already resulted in the continuous growth of our international operations in select markets and chosen segments over the last 5 to 6 years. For example, we have consolidated our position in Ukraine to become the largest competitor in the light bus market under seven meters and the third largest competitor in the under seven ton GVW light truck segment, in terms of unit sales in 2009 – 2010. We have also further consolidated our strong market share in commercial vehicles in other SAARC countries – Bangladesh, Nepal, Sri Lanka and Bhutan. TDCV continues to be the largest exporter of heavy commercial vehicles from South Korea. While we continue to export from India and South Korea into many of these markets, we are also establishing a manufacturing footprint where it is beneficial to do so. Additionally, our acquisition of Jaguar Land Rover has expanded our geographical presence significantly. Through Jaguar Land Rover we now offer products in the luxury performance car and premium all-terrain vehicle segments with globally recognized brands and we have diversified our business across markets and product segments. We will continue to build upon the internationally recognized brands of Jaguar Land Rover. We have established a joint venture along with Thonburi in Thailand to manufacture pickup trucks. During fiscal 2008, we established a joint venture company to undertake manufacture and assembly operations in South Africa, which has been one of our largest export markets from India, in terms of unit volume, which we expect will commence operations in fiscal 2011.

Reducing costs and breakeven points: We believe that our scale of operations provides us with a significant advantage in reducing costs and we plan to continue to sustain and enhance our cost advantage.

Our ability to leverage our technological capabilities and our manufacturing facilities among our commercial vehicle and passenger vehicle businesses enables us to reduce cost. For example, the diesel engine used in our Indica was modified for use in the Ace, which helped to reduce the project cost of the Ace. Similarly, platform sharing for the manufacture of pickup trucks and UVs enables us to reduce capital investment that would otherwise be required while allowing us to improve the utilization levels at our manufacturing facilities. Where it is advantageous for us to do so, we intend to add our existing low cost engineering and sourcing capability to vehicles manufactured under the Jaguar Land Rover brand.

Table of Contents

Our vendor relationships also contribute to our cost reductions. For example, we believe that the vendor rationalization program that we are undertaking will provide economies of scale to our vendors which would benefit our cost programs. We are also undertaking various internal and external benchmarking exercises that would enable us to improve the cost effectiveness of our components, systems and sub-systems.

In response to the recent economic slowdown, we further intensified efforts to review and realign our cost structure such as reduction of manpower costs and other fixed costs. Further, our Jaguar Land Rover business is exploring opportunities to reduce the break even levels through increased sourcing of materials from low cost countries, reduction in number of suppliers, reduction in number of platforms, reduction in engineering change costs, increased use of off-shoring and several other initiatives. We believe that our strategy to enhance global sourcing, particularly for Jaguar Land Rover, will enable us to realize significant cost savings.

Continuing focus on high quality and enhancing customer satisfaction: One of our principal goals is to achieve international quality standards for our products and services and we are pursuing various quality improvement programs, both internally and at our suppliers' operations. We have established a procedure for ensuring quality control of outsourced components. Products purchased from approved sources undergo a supplier quality improvement process. We also have a program for assisting vendors from whom we purchase raw materials or components to maintain quality. Each vendor is reviewed on a quarterly basis on parameters of quality, cost and delivery and preference is given to vendors with TS 16949 certification. For our Jaguar Land Rover business, the quality and delivery performance of our external vendors are measured on a daily basis and all such vendors are required to be certified to TS 16949 and ISO14001 standards. All vendors to our Jaguar Land Rover business are also required, in accordance with our stringent approval system, to formally warrant all new component part numbers shipped into our vehicle manufacturing operations. We maintain a stringent quality assurance program in our operations that includes random testing of production samples, frequent re-calibration of production equipment, analysis of post-production vehicle performance and ongoing dialogue with workers to reduce production errors.

Reliability and other quality targets are built into our new product introduction process. Assurance of quality is further driven by the design team which interacts with downstream functions like process planning, manufacturing and vendor management to ensure quality in design processes and manufacturing. We believe our extensive sales and service network has also enabled us to provide quality and timely customer service. We have deployed Oracle's Siebel customer relations management technology system at all dealerships and offices across India, which we believe will help to improve our responsiveness to market and customer service needs. Through close coordination supported by our IT systems, we monitor quality performance in the field and implement corrections on an ongoing basis to improve the field performance of our products thereby enhancing customer satisfaction.

In India, we showed the largest performance increment of any car manufacturer, improving six ranks from eleventh position in 2008 to fifth position for the year 2009 according to the JD Power Consumer Satisfaction Index. The new Jaguar XF launched in 2008 continues to receive several awards and accolades such as the Best Executive Car award by JD power UK survey, Best Executive Car award for the third consecutive year by the Diesel Car and the What Car? Magazines, Editor's Choice Award as Best Luxury Vehicle for 2010 by World of Wheels Magazine in Canada. Similarly, the Discovery 4 was adjudged the Best 4x4 by the Diesel Car and the What Car? Magazines in 2010.

Enhancing capabilities through the adoption of superior processes: Tata Sons and the entities promoted by Tata Sons, including us, aim at improving quality of life through leadership in various sectors of national economic significance. In pursuit of this goal, Tata Sons and the Tata Sons promoted entities have institutionalized an approach, called the Tata Business Excellence Model, or TBEM, which has been formulated along the lines of the Malcolm Baldrige National Quality Award to enable us to drive performance and attain higher levels of efficiency in our businesses and in discharging our social responsibility. The model aims to nurture core values and concepts embodied in various focus areas such as leadership, strategic planning, customers, markets and human resources, and to translate them to operational performance. Our adoption and implementation of this model seeks to ensure that our business can be conducted through superior processes in the future.

We have deployed a balance score card, or BSC, management system, developed by Dr. Robert Kaplan and Dr. David Norton of the Harvard Business School for measurement based management and feedback. We have also deployed a new product introduction, or NPI, process for systematic product development and product lifecycle management system for effective product data management across our organization. On the human resources front, we have adopted various processes to enhance the skills and competencies of our employees. We have also enhanced our performance management system, with appropriate mechanisms to recognize talent and sustain our leadership base. We believe these will enhance our way of doing business, given the dynamic and demanding global business environment.

Table of Contents

Customer financing With financing increasingly becoming a critical factor in vehicle purchases and the rising aspirations of consumers in India, we intend to expand our vehicle financing activities to enhance our vehicle sales. Further, in a scenario where there is lack of sufficient finance availability for vehicle sales in the Indian market, as was witnessed during the recent financial crisis, our finance business is expected to play a significant role in filling the gap created when financing from other banks and non banking financial companies dries up. In addition to improving our competitiveness in customer attraction and retention, we believe that expansion of our financing business would also contribute towards moderating the impact on our financial results of the cyclical nature of vehicle sales.

Continuing to invest in technology and technical skills: We believe we are one of the most technologically advanced indigenous vehicle manufacturers in India. Over the years, we have enhanced our technological strengths through extensive in-house research and development activities. Further, our research and development facilities at our subsidiaries, like TMETC, TDCV, TTL and Hispano, together with the two advanced engineering and design centers of Jaguar Land Rover, have increased our capabilities in product design and engineering. In our Jaguar Land Rover business, we are committed to continue to invest in new technologies to develop products that meet the opportunities of the premium segment, including developing sustainable technologies to improve fuel economy and reduce CO₂ emissions. We consider technological leadership to be a significant factor in continued success, and therefore intend to continue to devote significant resources to upgrade our technological base. We are also enhancing our capabilities in the development of convenient and sustainable solutions for electric and hybrid vehicles through our subsidiary Miljobil Grenland.

Maintaining financial strength: Our cash flow from operating activities in Fiscal 2010 and 2009 was Rs. 128,365 million and Rs. 25,194 million, respectively. The improved position in our operating cash flows is primarily a result of volume growth, implementation of cost reduction programs, and prudent working capital management. We have established processes for project evaluation and capital investment decisions with an objective to enhance our long term profitability.

Leveraging brand equity: We believe Indian customers associate the Tata brand name with reliability, trust and value, and our brand name is gaining significant international recognition due to the international growth strategies of various Tata Sons promoted entities. The Tata brand is used and its benefits are leveraged by Tata companies to their mutual advantage. We recognize the need for enhancing our brand recognition in highly competitive markets in which we compete with internationally recognized brands. We, along with Tata Sons and other Tata companies, will continue to promote the Tata brand and leverage its use in India, as well as in various international markets where we plan to increase our presence. Supported by the corporate level Tata brand, our product brands like Indica, Indigo, Sumo, Safari, Nano and Ace, along with Daewoo, Hispano, Jaguar, Range Rover and Land Rover are highly regarded, and will be nurtured and promoted.

Automotive Operations

In total, we sold 869,602, 672,747 and 597,197 vehicles in Fiscal 2010, 2009 and 2008 respectively, consisting of 675,761 units of Tata and other brand vehicles and 193,841 units of Jaguar Land Rover vehicles in Fiscal 2010. In terms of units sold our largest market is India where we sold 629,878 and 461,825 units during Fiscal 2010 and 2009, (constituting 72.4% of total sales in Fiscal 2010) followed by United Kingdom where we sold 55,070 units in Fiscal 2010 (constituting 6.3% of total sales). A geographical breakdown of our revenues is set forth in Item 5.A Operating Results Geographical breakdown .

Our total sales (including international business sales and Jaguar Land Rover sales) for Fiscal 2010, 2009 and 2008 are set forth in the table below:

Category	Fiscal 2010		Fiscal 2009*		Fiscal 2008	
	Units	%	Units	%	Units	%
Passenger Cars	279,465	32.10%	214,019	31.80%	182,291	30.50%
Utility Vehicles	181,489	20.90%	159,340	23.70%	50,130	8.40%
Light Commercial Vehicles	228,987	26.30%	160,787	23.90%	173,382	29.00%
Medium and Heavy Commercial Vehicles	179,661	20.70%	138,601	20.60%	191,394	32.10%
Total	869,602	100.00%	672,747	100.00%	597,197	100.00%

Revenues from our automotive operations were Rs. 897,970 million, Rs.691,778 million and Rs.337,040 million in Fiscal 2010, 2009 and 2008, respectively. Tata and other brand vehicles (including spares and financing thereof) constituted 45.4% of our total automotive revenues before inter-segment elimination in Fiscal 2010 while Jaguar Land Rover constituted 54.6%.

* Note: Jaguar Land Rover vehicle sales are included from June 2, 2008.

Table of Contents**Tata and other brand vehicles (including spares and financing thereof)**

We sold 675,761, 505,399 and 597,197 units of Tata and other brand vehicles in Fiscal 2010, 2009 and 2008 respectively. Of the 675,761 units sold in Fiscal 2010, 629,878 units were sold in India while 45,883 units were sold outside of India, compared to 461,825 units and 43,574 units respectively for Fiscal 2009. Our share in the Indian four-wheeler automotive vehicle market (i.e., automobile vehicles other than two and three wheeler categories) increased to 25.5% in Fiscal 2010 from 24.4% in Fiscal 2009. The increase was primarily the result of our improved market share in the commercial vehicle market. However, increased competitive intensity caused us to lose market share in the passenger vehicle market, mainly in the compact car and the utility vehicle segment

The following table sets forth our total sales of Tata and other brand vehicles:

Category	Fiscal 2010		Fiscal 2009		Fiscal 2008	
	Units	%	Units	%	Units	%
Passenger Cars	232,006	34.30%	166,962	33.00%	182,291	30.50%
Utility Vehicles	35,107	5.20%	39,049	7.70%	50,130	8.40%
Light Commercial Vehicles	228,987	33.90%	160,787	31.90%	173,382	29.00%
Medium and Heavy Commercial Vehicles	179,661	26.60%	138,601	27.40%	191,394	32.10%
Total	675,761	100.00%	505,399	100.00%	597,197	100.00%

The following table sets forth our market share in various categories in the Indian market-based on wholesale volumes:

Category	Fiscal 2010	Fiscal 2009	Fiscal 2008
Passenger Cars	16.00%	13.20%	14.20%
Utility Vehicles	12.40%	17.60%	20.10%
Light Commercial Vehicles	64.80%	65.40%	64.40%
Medium and Heavy Commercial Vehicles	63.30%	61.90%	60.40%
Total Four-Wheel Vehicles	25.50%	24.40%	26.10%

Note: Passenger cars include Fiat vehicles distributed by us.

Our performance in various categories of the Indian market is described below:

Passenger cars: An improved liquidity situation enabled by a benign monetary policy of the RBI and supported by reduced vehicle prices due to reduction of excise duty by 4% in December 2008, provided support for the passenger vehicle sales in Fiscal 2010. Following the revival of economic activity and improved consumer sentiments, the total passenger car industry grew by 24.8% compared with a decline of 1% in Fiscal 2009.

The small car category, which consists of mini and compact cars, constitutes over 60% of total domestic passenger car sales in India. In Fiscal 2010, the small car category grew by about 37.3% to 158,093 units compared with an almost flat growth rate of 0.7% in the previous year. Continuing positive market response to the new Indica Vista, which we launched in August 2008 and the start of delivery of the Tata Nano in July 2009, have enabled us to improve our market position in the small car market to 13.3% in Fiscal 2010 from 12.3% in Fiscal 2009. This was despite increased competition due to launch of several new products in the category. We also progressed on a fast pace of work on the Sanand plant and trial production of the Nanos started in Sanand in the last quarter of Fiscal 2010, with commercial production started in June 2010.

In the second half of Fiscal 2010, we launched the Indigo Manza, the next generation sedan built on the same platform as the new generation Indica Vista. We continue to offer products at a lower price point in the entry level mid-size sedan market through a portfolio including the old Indigo. The entry mid-size car category grew by 29.0% in fiscal 2010, while our market share increased significantly in the second half of the fiscal year with the launch of the Manza. We ended the fiscal year with a market share of approximately 30.3%.

We have also been distributing Fiat cars through the Tata-Fiat dealer network since March 2006. During fiscal 2010, we sold 24,774 Fiat cars. With the Fiat 500, Palio, Punto and Linea, Fiat acquired a position among the top nine car companies in the country. Our joint dealer network has also been expanded from 102 locations as of March 31, 2009 to 434 locations as of March 31, 2010.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

We commenced distribution of Jaguar and Land Rover vehicles through our exclusive dealership in India in the fiscal 2010. The brands have witnessed positive market response and we plan to increase our dealership footprint across the country to further expand their distribution.

Table of Contents

Utility Vehicles: The Utility Vehicle market which witnessed severe contraction in the Fiscal 2009 due to the increase in fuel prices and an additional excise duty imposed by the Government on vehicles with higher engine displacements experienced a strong rebound in the current Fiscal year with a growth of 13.9%. We launched the new Sumo Grande MKII in December 2009 to an encouraging market response and the Xenon XT, a lifestyle pickup, the Venture and Aria (unveiled at the Delhi Auto Expo to be launched in mid 2010-11), will assist in regaining market share in this segment. However increased competition and a relatively mature product portfolio adversely impacted our market share in this category which decreased to 12.4% in Fiscal 2010 from 17.6% in Fiscal 2009.

Light Commercial Vehicles (including pickups): Our range of LCVs includes small commercial vehicles, pickup trucks, trucks and commercial passenger carriers up to 7.5 GVW. The LCV market segment grew by 45.3% in fiscal 2010 mainly aided by the continuing expansion of the small commercial vehicle segment which also saw a new entrant. Our sales increased by 42.4% to 228,987 units. We launched new variants on the Ace platform, the Ace EX and the Super Ace, which are expected to help us in gaining market share going forward. However, entry of new competition in the small commercial vehicle category, where we enjoy strong market share, as well as expanding market size, resulted in our share of the Indian market falling to 64.8% in fiscal 2010 from 65.4% in fiscal 2009.

Medium and Heavy Commercial Vehicles: Our M&HCVs have a wide range of applications and are generally configured as trucks, tippers, buses, tankers, tractors or concrete mixers. We sold 179,661 units during fiscal 2010, resulting a market share of 63.3%. The M&HCV category was the most affected by the economic slowdown and lack of financing in fiscal 2009. However, the stimulus package provided by the Indian Government in the form of accelerated depreciation benefits, reduction of excise duties and improved liquidity situation, saw this segment experience revival in growth to 33.5% in fiscal 2010. In May 2009, we unveiled our new range of Prima trucks (earlier called the World Truck). The range comprises multi-axle trucks, tractor-trailers, tippers, mixers, and special application vehicles. We believe that improving infrastructure in India may create a market for such high performance trucks and may also enable us to compete more effectively in international markets. In addition to India, the Prima line has gradually been introduced in South Korea, South Africa, the other SAARC countries, the Middle East and other African countries.

Tata and other brand vehicles Sales and Distribution:

Our sales and distribution network in India as of March 2010 comprises of approximately 1,600 sales contact points for our passenger and commercial vehicle business. In line with our growth strategy, we formed a 100% subsidiary, TML Distribution Company Limited, or TDCL, in March 2008 to act as a dedicated logistics management company to support the sales and distribution operations of our vehicles in India. We believe this will improve the efficiency of our selling and distribution operations and processes.

TDCL provides logistics support for vehicles manufactured at our facilities and has set up stocking points at some of our plants and also at different places throughout India. TDCL helps us improve planning, inventory management, transport management and timely delivery. We believe it will make our delivery and inventory management more efficient. Additionally, we have completed the initial rollout of a new customer relations management system at all our dealerships and offices across the country and has been certified by Oracle as the largest Siebel deployment in the automotive market. The combined online customer relations management system initiative supports users both within our Company and among our distributors in India and abroad.

Through our vehicle financing division and wholly owned subsidiary, Tata Motors Finance Limited, or TMFL we also provide financing services to purchasers of our vehicles through our independent dealers, who act as our agents, and through our branch network. During Fiscal 2010 and 2009, approximately 25% and 31% respectively, of our vehicle unit sales in India were made by the dealers through financing arrangements where our captive vehicle financing divisions provided the credit. Total vehicle finance receivables outstanding as at March 31, 2010 and 2009 amounted to Rs.147,143 million and Rs.158,803 million respectively.

We use a network of service centers on highways and a toll-free customer assistance center to provide 24-hour on-road maintenance (including replacement of parts) to vehicle owners. We believe that the reach of our sales, service and maintenance network provides us with a significant advantage over our competitors.

We also market our commercial and passenger vehicles in several countries in Europe, Africa, the Middle East, South East Asia, South Asia and other African countries. We have a network of distributors in almost all of the countries where we export our vehicles, who work with us in appointing a local dealer for sales and servicing our product in various regions. We have also stationed overseas resident sales and service representatives in various countries to oversee our operations in their respective territories.

Table of Contents***Tata and other brand vehicles Competition:***

We face competition from various domestic and foreign automotive manufacturers in the Indian automotive market. Improving infrastructure and robust growth prospects compared to other mature markets, is now attracting a number of international companies to India who have either formed joint-ventures with local partners or have established independently owned operations in India. Global competitors bring with them decades of international experience, global scale, advanced technology and significant financial resources. Hence competition is likely to further intensify in the future. We have designed our products to suit the requirements of the Indian market based on specific customer needs such as safety, driving comfort, fuel efficiency and durability. We believe that our vehicles are suited to the general conditions of Indian roads, and the local climate and they comply with applicable environmental regulations currently in effect. We also offer a wide range of optional configurations to meet the specific needs of our customers. We intend to and are developing products to strengthen our product portfolio in order to meet the increasing customer expectation of owning world class products.

Tata and other brand vehicles Seasonality:

Demand for our vehicles in the Indian market is subject to seasonal variations. Demand generally peaks between January and March, although there is a decrease in demand in February just before release of the Indian Fiscal Budget. Demand is usually lean from April to July and picks up again in the festival season from September onwards with a decline in December due to model year change.

Tata and other brand vehicles Exports:

We are expanding our export operations, which have been ongoing since 1961. We market our commercial and passenger vehicles in several countries in Europe, Africa, the Middle East, South East Asia and South Asia. Our exports of vehicles manufactured in India increased by 1.6% in Fiscal 2010 to 34,088 units from 33,536 units in Fiscal 2009. Many of our key export markets continue to be impacted by the global economic slowdown and consequently our volumes were adversely impacted.

In Fiscal 2010, our top five export destinations from India accounted for approximately 80% and 78% of our exports of commercial vehicles and passenger vehicle units respectively. We are strengthening our position in the geographic areas we are currently operating in and exploring possibilities of entering new markets with similar market characteristics to the Indian market.

Tata Daewoo Commercial Vehicle Co. Ltd., Korea: TDCV recorded a 4.0% decline in its overall vehicle sales to 9,011 units in Fiscal 2010 from 9,137 units in Fiscal 2009, before inter-segmental elimination. TDCV's performance was adversely impacted by severe slowdown in its main export markets coupled with appreciating currency. The company exported 3,658 units in Fiscal 2010 compared to 4,280 units in Fiscal 2009, a decline of 14.5%. In the South Korean market, TDCV's market share declined to 26.1% in Fiscal 2010 from 27.1% in Fiscal 2009 in the M&HCV category, adversely impacted largely by financial instability of its sole distributor Daewoo Motor Sales Corporation, or DMSC. In April 2010 TDCV has established a separate marketing and distribution Company to cater to its products. The company successfully launched the new range of premium trucks Prima which has also been conferred with the prestigious award Grand Prize of 2009 Good Design Selection of Korea. TDCV also won an export order of 2,570 units from the IRAQ Ministry of Defense, out of which 1,500 units have been shipped in Fiscal 2010.

Tata Hispano Motors Carrocera, S.A. Spain: During Fiscal 2010 we acquired the balance 79% equity of the company and consequently hold 100% of the subsidiary and renamed it as Tata Hispano Motors Carrocera S.A. We continue to own the brand rights of Hispano. We believe that our subsidiary Hispano, with its design and development capabilities in manufacturing bodies for high-end buses, will complement our current range of light and medium commercial passenger carriers. We also believe that this investment will also help to increase our presence in the international bus market. Hispano reported sale of 248 units for Fiscal 2010. The volumes improved by 15% from 215 units sold in Fiscal 2009. This was mainly driven by formation of the new sales and marketing organization with renewed customer centric focus, through road shows, customer meets and customer plant visits.

Jaguar Land Rover

We acquired Jaguar Land Rover from Ford on June 2, 2008. As part of the acquisition, we acquired the global businesses relating to Jaguar Land Rover including three major manufacturing facilities and two advanced design and engineering centers in the United Kingdom, a worldwide sales and dealership network, intellectual property rights, patents and trademarks.

Table of Contents

The strengths of Jaguar Land Rover include its internationally recognized brands, strong product portfolio of award winning luxury performance cars and premium all-terrain vehicles, global distribution network, strong research and development capabilities, and a strong management team, which has strengthened its business operations. Our total sales of Jaguar Land Rover for Fiscal 2010 and Fiscal 2009 are set forth in the table below:

	Fiscal 2010**		Fiscal 2009*	
	Units	%	Units	%
Jaguar	47,459	24.50%	47,057	28.10%
Land Rover	146,382	75.50%	120,291	71.90%
Total	193,841	100.00%	167,348	100.00%

* For Fiscal 2009 sales are from June 2, 2008 to March 2009

** Included in sales of Model X-type (discontinued in December 2009)

Jaguar: Until recently Jaguar's principal products were the X-Type, XF, XJ and XK. In line with our strategy to build the Jaguar brand as a premium luxury sports car, we discontinued the production of the Jaguar X-Type, a compact-size four-door sedan, in December 2009. Consequently, Jaguar's principal products are the XK sports car (coupe and convertible), XF saloon and the XJ saloon. The Jaguar XK is an all-aluminum sports coupe and convertible available with naturally aspirated and supercharged V8 petrol engines. The Jaguar XF is medium-size four-door sports sedan, available with a range of turbocharged V6 diesel and V6/V8 petrol engines and standard automatic transmission. The Jaguar XJ is an all-aluminum large-size four-door sedan, offered with a range of V6 turbocharged diesel engines or V8 petrol engines, naturally aspirated and supercharged.

During the Fiscal 2010, we launched 2010 model year products including the introduction of a new normally aspirated and supercharged 5.0 litre petrol engine for the XF, XK and XKR and the all new XFR, along with an acclaimed new 3.0 litre diesel engine in the XF giving significantly improved performance and fuel economy.

The new Jaguar XJ was unveiled in London in July 2009 and had its public debut at the Frankfurt International Motor show in September 2009. The vehicle has received significant media acclaim ahead of customer deliveries commencing in the fiscal 2011. This is an important new model which has replaced the previous generation XJ. The new model features the next generation of Jaguar's aerospace-inspired aluminium body architecture, a choice of standard or long wheelbase models, enhanced power trains with all of Jaguar's new ultra-efficient Gen III 5.0 litre petrol and 3.0 diesel engines available, together with the highest standards of personal luxury and specification. Among the product innovations are an instrument cluster where traditional physical instruments have been replaced by a 12" thin film transistor, or TFT, screen.

Land Rover: Land Rover's principal products are the Defender, Freelander 2 (LR2), Discovery (LR3), Range Rover Sport and Range Rover. The Defender is Land Rover's most capable off-roader. The Freelander 2 (LR2) is versatile for both urban sophistication and off-road capability. The Range Rover Sport is the most exhilarating Land Rover which fuses the excitement of a Sports Tourer with the versatility of a Land Rover. The Range Rover is the flagship of the brand with a unique blend of pure British luxury, classic design with distinctive, high quality interiors and legendary ability. Land Rover products offer a range of power trains: - turbocharged V6 diesel, V6 petrol engines and V8 naturally aspirated and supercharged petrol engines; together with manual and automatic transmission.

During Fiscal 2010, we launched the 2010 model year Range Rover, Range Rover Sport and Discovery with significant improvements in performance, fuel economy and emissions.

The global financial crisis of Fiscal 2009 impacted the world automotive industry and its effect on the premium market was particularly pronounced, with industry volumes estimated to have fallen between 25% and 30%. The global financial crisis constrained business and consumer spending, particularly in the United States, the UK and Europe, which were partially offset by growth in developing markets such as China, Russia, Middle East and Eastern Europe

For the early part of Fiscal 2010, many of the markets in which Jaguar Land Rover operated experienced negative GDP growth but all major markets returned to positive GDP growth in the second half of Fiscal 2010, with strong growth expected to continue in many emerging markets such as China, India and South America.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

During Fiscal 2010, the automotive sector in the UK, Europe and the USA, benefited from a variety of vehicle scrappage schemes. Many of these schemes have now ceased. The scrappage schemes resulted in some Jaguar Land Rover sales, however we believe the impact on the premium car and 4x4/ SUV segments has been minimal and Jaguar Land Rover did not benefit significantly from the presence of these schemes. Recently, confidence within financial markets has been adversely affected by concerns over public sector debt, heightened by events such as the downgrading of certain European sovereign debt ratings.

Table of Contents

However despite these concerns our 2010 product launches and concerted marketing efforts enabled us to witness a relatively strong rebound in sales of the Jaguar and Land Rover brands. Although not directly comparable, as Fiscal 2010 (12-month period) and Fiscal 2009 (10-month period) do not cover equivalent periods for our Jaguar Land Rover business, Jaguar Land Rover unit sales (wholesales) in total increased to 193,841 units in Fiscal 2010 from sales of 167,348 units in Fiscal 2009. Jaguar volumes increased to 47,459 units during Fiscal 2010 from 47,057 in Fiscal 2009, the lower growth was a result of cessation of X-Type in December 2009 and the lack of availability of the new XJ which went on customer sale in Fiscal 2011. Land Rover volumes increased to 146,382 units from 120,291 units in Fiscal 2009, as a result of increased Range Rover, Range Rover Sport and Discovery 4 (LR4) sales. The company exported 138,546 units in Fiscal 2010 compared to 128,718 units in Fiscal 2009, an increase of 7.6%

Jaguar Land Rover's performance in key geographical markets on retail basis (Note that all comparisons to Fiscal 2009 for Jaguar Land Rover are to the period June 2, 2008 to March 31, 2009.)

United States

The US premium car segment volumes declined by 22% as compared to Fiscal 2009, with Jaguar down 17% for the same period. The US premium SUV segment volumes were down 5% versus the same period in the prior year with Land Rover up 2% for the same period. The US retail volumes for Fiscal 2010 for the combined brands were 38,756 units.

Jaguar retail volumes for Fiscal 2010 declined by 13% compared to fiscal 2009, leading to a 1% decrease in market share. The fall in market share was particularly influenced by the unavailability of the new Jaguar XJ model.

UK

The UK premium car segment volumes increased by 5% in Fiscal 2010 as compared to Fiscal 2009, with Jaguar up by 16% for Fiscal 2010. The UK premium SUV segment volumes increased by 25% in Fiscal 2010 as compared to Fiscal 2009, with Land Rover up 21% for the same period. The UK retail volumes for Fiscal 2010 for the combined brands were 57,056 units.

Europe (excluding Russia)

The combined European premium car segment and premium SUV segment volumes increased by 2% as compared to Fiscal 2009. The European retail for Fiscal 2010 for the combined Jaguar Land Rover brands were 50,584 units, representing a 16% decrease as compared to Fiscal 2009. Trading within certain European markets remained challenging during the period, especially with recent uncertainty in Greece with the downgrading of sovereign debt ratings leading to additional pressure within the financial markets. Several European countries introduced different versions of vehicle scrappage schemes and incentives, including Cyprus, France, Germany, Italy, Luxembourg, Portugal, Romania and Spain. These schemes did have some effect on overall volumes, but the impact on the Premium car and Premium SUV segments was minimal.

Russia

The Russia premium car segment volumes declined by 38% in fiscal 2010 as compared to fiscal 2009, with Jaguar down by 55% for fiscal 2010. The Russia premium SUV segment volumes declined 57% in fiscal 2010 as compared to fiscal 2009 with Land Rover down by 27% for fiscal 2010. The Russia retail volumes for fiscal 2010 for the combined brands were 8,831 units. The Russian economy was hard hit by the global economic crisis, particularly the sharp fall in oil prices and the drying up of foreign credits that Russian banks and companies relied upon.

China

The China premium car segment volumes (for imports) increased by 14% in fiscal 2010 as compared to fiscal 2009, with Jaguar up by 30% for fiscal 2010. The China premium SUV segment volumes (for imports) increased by 83% in fiscal 2010 as compared to fiscal 2009 with Land Rover up 56% for fiscal 2010. The China retail volumes for fiscal 2010 for the combined brands were 17,004 units.

Jaguar Land Rover Sales & Distribution:

We distribute Jaguar Land Rover vehicles in 74 markets across the world for Jaguar, and 102 markets across the world for Land Rover. Sales locations for Jaguar Land Rover vehicles are operated as independent franchises. Jaguar Land Rover is represented in its key markets through national sales companies as well as third party importers. Jaguar and Land Rover have regional offices in certain select countries that manage customer relationships, vehicle supplies and provide marketing and sales support to their regional importer markets. The remaining importer

markets are managed from the UK.

Table of Contents

Jaguar Land Rover products are sold through a variety of sales channels; through our dealerships for retail sale, for sale to fleet customers, including daily rental car companies, commercial fleet customers, leasing companies, and governments. Jaguar Land Rover does not depend on a single customer or small group of customers to the extent that the loss of such a customer or group of customers would have a material adverse effect on our business.

Jaguar Land Rover has now transitioned to financing arrangements with FGA Capital (JV between Fiat Auto and Credit Agricole) in UK/Europe and Chase Auto Finance in the US and local providers in certain other key markets.

Jaguar Land Rover Competition:

Jaguar Land Rover operates in a globally competitive environment and faces stiff competition from established premium and other vehicle manufacturers who aspire to move into the luxury performance car and premium SUV segments. Jaguar vehicles compete primarily against other European brands such as BMW, Mercedes Benz and Audi. Land Rover and Range Rover vehicles compete largely against SUVs manufactured by Audi, BMW, Infiniti, Lexus, Mercedes Benz, Porsche and Volkswagen. The Land Rover Defender competes with vehicles manufactured by Isuzu, Nissan and Toyota.

Jaguar Land Rover Seasonality:

The business of Jaguar Land Rover is impacted by the bi-annual registration of vehicles in the United Kingdom where the vehicle registration number changes every six months, which in turn has an impact on the resale value of the vehicles. This leads to a bunching up of sales during the periods when the change occurs. Seasonality in most other markets is driven by introduction of new model year derivatives. Furthermore, western European markets tend to be impacted by summer and winter holidays. The resulting sales profile influences operating results on a quarter to quarter basis.

Research and Development:

Our research and development activities focus on product development, environmental technologies and vehicle safety. Our Engineering Research Centre, or ERC, established in 1966, which is one of the few government recognized in-house automotive research and development centers in India. The Engineering Research Centre is integrated with all of the Tata Motors Global Automotive Product Design and Development Centers in South Korea, Spain and United Kingdom. In addition to this, we leverage key competencies through various engineering service suppliers and design teams of our suppliers.

Jaguar Land Rover research and development operations currently consist of a single engineering team, operating within a co-managed engineering facility, sharing premium technologies, powertrain designs and vehicle architecture. We are pursuing various initiatives, such as the introduction of Premium Lightweight Architecture (PLA), to enable our business to comply with the existing and evolving emissions legislations in the developed world, which we believe will be a key enabler of both reduction in CO₂ and further efficiencies in manufacturing and engineering. Over recent years, Jaguar Land Rover has made significant progress in reducing the development cycle times. The ERC in India and Jaguar Land Rover engineering and development operations in the UK have identified areas to leverage the facilities and resources to enhance the product development process and achieve economies of scale.

To augment the abilities of our Engineering Research Centre and to obtain access to leading-edge technologies to support the product development activities, which we plan to undertake to sustain and enhance our position in the increasingly competitive global markets, we established a wholly-owned subsidiary, TMETC, in the United Kingdom in 2006. We gained access to what we believe are leading edge propulsion and electric energy systems through our investment in Miljobil Grenland in 2009, by TMETC.

We endeavor to absorb the best of technologies for our product range to meet the requirements of a globally competitive market. All of our vehicles and engines are compliant with the prevalent regulatory norms in the respective countries in which they are sold. Our strategy to invest and develop our development capabilities have helped us in attaining significant achievements such as the design and development of India's first indigenously developed compact car, the segment creating mini-truck the Tata Ace and the world's most affordable family car the Tata Nano. In collaboration with our subsidiary TDCV, we developed the World Truck, now referred to as Prima, a sophisticated and contemporary M&HCV range with performance standards similar to those in developed markets, which we launched in India and in South Korea during fiscal 2010.

Table of Contents

In addition, our research and development activities also focus on developing vehicles running on alternative fuels, including CNG, liquefied petroleum gas, bio-diesel and compressed air and electric cars. We are in a constant endeavor to develop green vehicles and are presently developing an electric vehicle on the Indica Vista platform. We are pursuing alternative fuel options such as ethanol blending for development of vehicles fuelled by hydrogen. In our Jaguar Land Rover products, we are pursuing several initiatives including alternative energy technologies to meet the targeted reduction in CO₂ emissions in the next 5 years.

Initiatives in the area of vehicle electronics such as engine management systems, in-vehicle network architecture, telematics for communication and tracking and other emerging technological areas are also being pursued and which could possibly be deployed on our future range of vehicles. Likewise various new technologies and systems that would improve safety, performance and emissions of our product range are under implementation on our passenger cars and commercial vehicles.

We have a modern crash test facility for testing our new products for passenger safety. We have a pedestrian safety testing facility, a pendulum impact test facility and a bus rollover test facility, to develop products with various safety norms. We also have a hemi-anechoic chamber testing facility for developing vehicles with lower noise and vibration levels and an engine emissions testing facility to develop products meeting international standards.

For providing prompt service to the customer, development of enterprise level vehicle diagnostics system for achieving speedy diagnostics of complex electronics of modern vehicles has been underway. Also the initiative in telematics has further spanned into fleet management and vehicle tracking system using GNSS (Global Navigation Satellite Systems).

Our product design and development centers are equipped with computer-aided design, manufacture and engineering tools, with sophisticated hardware, software, and other information technology infrastructure, designed to create a digital product development environment and virtual testing and validation, resulting in a reduction in the product development cycle-time and data management. Rapid prototype development systems, testing cycle simulators, advanced emission test laboratories and styling studios are also a part of our product development infrastructure. We have aligned our end-to-end digital product development objectives and infrastructure, with our business goals and have made significant investments to enhance the digital product development capabilities especially in the areas of product development through Computer Aided Design/Computer Aided Manufacturing/Computer Aided Engineering/Knowledge Based Engineering/Product Data Management.

Over the years, we have devoted significant resources towards our research and development activities.

Intellectual Property

We create, own, and maintain a wide array of intellectual property assets that we believe are among our valuable assets throughout the world. Our intellectual property assets include patents and patent applications related to our innovations and products; trademarks related to our brands, and products, copyrights in creative content, designs for aesthetic features of products/components, trade secrets, and other intellectual property rights. We aggressively seek to protect our intellectual property in India and other countries.

We own a number of patents registered and have applied for new patents which are pending registration in India. We have also filed a number of patent applications outside India under the Patent Cooperation Treaty, which will be entered in different countries later. We obtain new patents through our ongoing research and development activities.

We own registrations for number of trade marks and have pending applications for registration in India and abroad. The registrations mainly include trademarks for our vehicles. We use the Tata brand, which has been licensed to us by Tata Sons Limited. We believe that establishment of the Tata word mark and logo mark in India and world over is material to our operations. As part of our acquisition of TDCV, we have the perpetual and exclusive use of the Daewoo brand and trademarks in Korea and overseas markets for the product range of TDCV.

As part of the acquisition of Jaguar Land Rover business, ownership/co-ownership of core intellectual property were transferred to us. Additionally, perpetual royalty free licenses to use other essential intellectual properties have been licensed to us for use in Jaguar and Land Rover vehicles. Jaguar and Land Rover own registered designs, to protect the design of their vehicles in several countries.

In varying degrees, all our intellectual property is important to us. In particular, the Tata brand is integral to the conduct of our business, a loss of which could have a material adverse effect on our business.

Table of Contents

Components and Raw Materials

The principal materials and components required by us for use in our vehicles are steel sheets and plates, castings, forgings and items such as tires, fuel injection equipment, batteries, electrical items and rubber and plastic parts, consumables (paints, oils, thinner, welding consumables, chemicals, adhesives and sealants) and fuels. We also require aggregates like axles, engines, gear boxes and cabs for our vehicles, which are manufactured by ourselves or by our subsidiaries, affiliates and strategic suppliers. We have long term purchase agreements for some critical components such as transmissions and engines. Most commodities have continued to experience large price volatility during Fiscal 2010. We have established contracts with some of the the commodity suppliers to cover our own as also our suppliers requirements to moderate the effect of such high volatility. Special initiatives were also undertaken to reduce material consumption through value engineering and value analysis techniques.

We have undertaken an e-commerce initiative through the development of a business-to-business site with the assistance of our subsidiary, TTL, for electronic interchange of data with our suppliers in India. This has enabled us to have real time information exchange and processing to manage our supply chain effectively. We use external agencies as third party logistic providers. This has resulted in space and cost saving.

As part of our strategy to become a low-cost vehicle manufacturer, we have undertaken various initiatives to reduce our fixed and variable costs. In India we started an e-sourcing initiative in 2002 through , which we procure some supplies through reverse auctions.

We have established a procedure for ensuring quality control of outsourced components. Products purchased from approved sources undergo a supplier quality improvement process. We also have a program for assisting vendors from whom we purchase raw materials or components to maintain quality. Each vendor is reviewed on a quarterly basis on parameters of quality, cost and delivery. Preference is given to vendors with TS 16949 certification. We also maintain a stringent quality assurance program that includes random testing of production samples, frequent re-calibration of production equipment and analysis of post-production vehicle performance and ongoing dialogue with workers to reduce production defects. Further, we have established a Strategic Sourcing Group for certain regions to consolidate, strategize and monitor our supply chain activities with respect to major items of purchase as well as major inputs of technology and services. The Strategic Sourcing Group is responsible for recommending, for the approval by the Management Committee, the long-term strategy and purchase decision for these items, negotiation and relationship with vendors with regard to these items, formulating and overseeing our purchasing policies, norms in respect of all items, evolving guidelines for vendor quality improvement, vendor rating and performance monitoring and undertaking company-wide initiatives such as e-sourcing and supply chain management/policies with respect to vehicle spare parts. We are also exploring opportunities for global sourcing of parts and components from lower cost countries, and have embarked on a vendor management program that includes vendor base rationalization, vendor quality improvement and vendor satisfaction surveys. We initiated steps to include our supply chain in our initiatives on social accountability, environment management activities including tree plantation and energy conservation.

The Jaguar Land Rover business works with a range of strategic suppliers to meet its requirements for parts and components. The Jaguar Land Rover business has established quality control programmes to ensure that externally purchased raw materials and components are monitored and meet its quality standards. Such programmes include site engineers from Jaguar Land Rover who regularly interface with suppliers and carry out visits to supplier sites to ensure that relevant quality standards are been adhered to. Site engineers are also supported by persons in other functions, such as program engineers who interface with new model teams as well as resident engineers co-located at Jaguar Land Rover plants, who provide the link between the site engineers and the Jaguar Land Rover plants. The Jaguar Land Rover business has and will continue to work with its suppliers to optimize its procurements and enhance its supplier base, including by sourcing certain of its raw material and component requirements from low cost countries.

Suppliers

We have an extensive supply chain for procuring various components. We also outsource many of the manufacturing processes and activities to various suppliers. In such cases, we provide training to outside suppliers who design and manufacture the required tooling and fixtures.

Our associate company Tata AutoComp Systems Ltd., or TACO, manufactures auto components and encourages the entry of internationally acclaimed auto component manufacturers into India by setting up joint ventures with them. Some of these joint ventures include: Tata Johnson Controls Limited for seats, Tata Yazaki Autocomp Ltd for wiring harnesses and Tata Toyo Radiators Ltd for radiator assemblies. These joint ventures supply components for our products.

Table of Contents

In order to leverage the scale benefits we have also developed a set of suppliers for our Indian operations, who have a larger customer portfolio apart from us. These suppliers include some of the large Indian automotive supplier groups having multiple product offerings, such as Anand Group, Sona Group, TVS Group etc, as also some large multinational suppliers, such as Bosch, Continental, Delphi, Denso etc. Also for our Jaguar Land Rover business, we continue to work with our suppliers to optimize procurements and enhance our supplier base, including sourcing certain of our raw material and component requirements from low cost countries.

In India, we have established vendor parks in the vicinity of our manufacturing operations and vendor clusters have been formed at our facilities at Pantnagar (Uttarakhand) and Sanand (Gujarat). This initiative is aimed at ensuring flow of component supplies on a real-time basis, thereby reducing logistics and inventory costs as well as lowering uncertainties in the long-distance supply-chain.

We have embarked upon a vendor management program that includes vendor base rationalization, vendor quality improvement and vendor satisfaction surveys. As part of driving continuous improvement in procurement, we have integrated our system for electronic interchange of data with our suppliers with the ERP. This has facilitated real time information exchange and processing to manage our supply chain more effectively.

We have established processes to encourage improvements via knowledge sharing among our vendor base through an initiative called Vendor Council consisting of our senior executives and representatives of major suppliers. The Vendor Council also helps in addressing common concerns through joint deliberations.

We import some components that are either not available in the domestic market or when equivalent domestically-available components do not meet our quality standards. We also import products to take advantage of lower prices in foreign markets, such as special steels, wheel rims and power steering assemblies.

Ford has been and continues to be a major supplier of parts and services to Jaguar Land Rover. In connection with our acquisition of Jaguar Land Rover in June 2008, supply agreements have been entered into with Ford, ranging in duration from seven to nine years, as further set out below:

Long term agreements have been entered with Ford for technology sharing and joint development providing technical support across a range of technologies focused mainly around powertrain engineering such that we may continue to operate according to our existing business plan.

Supply agreements, ranging for duration of seven to nine years, were entered into with Ford for (i) the long term supply of engines developed by Ford, (ii) engines developed by us but manufactured by Ford and (iii) engines from Ford-PSA co-operation.

In response to the pressure on our suppliers caused by the lower automotive demand and the general lack of liquidity due to the financial crisis in 2009, we worked closely with our vendors with short-and medium-term plans. The global recession saw some of our suppliers in a severely strained financial condition in response to which we have taken measures to assess financial risk potential within the vendor base and take appropriate actions to derisk our operations.

Capital and Product Development Expenditures:

Our capital expenditure totaled to Rs. 96,980 million and Rs. 101,197 million during Fiscal 2010 and 2009, respectively. Our capital expenditure during the past fiscal years related mostly to new product development and capacity expansion for new and existing products to meet the market demand and investments towards improving quality, reliability and productivity that are aimed at operational efficiency.

We intend to continue to invest in our business units and research and product development over the next several years in order to improve our existing product range, develop new products and platforms and to build and expand our presence in the passenger vehicle and commercial vehicle categories. We believe this would strengthen our position in India and help us to grow our presence in international markets.

As a part of this future growth strategy, we plan to make investments in product development, capital expenditure in capacity enhancement, plant renewal and modernization and to pursue other growth opportunities. Our subsidiaries also have their separate growth plans and related capital expenditures plans. These expenditures are expected to be funded largely through cash generated from operations, existing investible surplus in the form of cash and cash equivalents, investment securities and other external financing sources. In August 2010, we obtained the

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

shareholders approval through postal ballot to raise additional long term resources up to Rs. 47 billion in the domestic and/or international market, in one or more tranches and increased our borrowing limit from Rs. 200 billion to Rs. 300 billion.

Table of Contents

In Fiscal 2010, Jaguar Land Rover raised GBP338 million through a loan from the European Investment Bank (EIB). The funding will further advance Jaguar Land Rover's research and development programmes focused on technologies that will reduce CO₂ emissions from its vehicles. These activities will contribute to lower CO₂ emissions and the loan was granted under the European Clean Transport Facility.

Other Operations

In addition to our automotive operations, we are also involved in various other business activities, of which information technology services and construction equipment are the main activity. Net revenues from these activities totaled to Rs.33,483 million and Rs. 35,434 million in Fiscal 2010 and 2009, respectively, representing nearly 3.6% and 4.9% of our total revenues before inter-segment elimination in Fiscal 2010 and Fiscal 2009, respectively. On March 30, 2010, we sold controlling stake in our construction equipment subsidiary, Telco Construction Equipment Co. Ltd (Telcon).

Information Technology Services:

Tata Technologies Limited, or TTL, is our 82.47% owned subsidiary as of March 31, 2010. TTL, founded in 1989 and a part of Tata group, is a global leader in Engineering Services Outsourcing, or ESO, and Product Development IT services solutions for Product Lifecycle Management, or PLM, and Enterprise Resource Management, or ERM, to the world's leading automotive, aerospace and consumer durables manufacturers and their suppliers. The company's services include product design, analysis and production engineering, Knowledge based engineering, PLM, Enterprise Resource Planning and Customer Relationship Management systems. The company also distributes implements and supports PLM products from leading solution providers in the world such as Dassault Systèmes and Autodesk.

TTL has its international headquarters in Singapore, with regional headquarters in the United States (Novi, Michigan), India (Pune) and the UK (Luton). The Company has a combined global workforce of more than 4000 professionals serving clients worldwide from facilities in North America, Europe and the Asia-Pacific region. TTL responds to customers' needs through its subsidiary companies and through its two offshore development centers. TTL had 9 functional subsidiary companies as of March 31, 2010.

Through sustained focus on growing the share of its offshore business and efficient cost management, TTL witnessed growth in profitability in fiscal 2010 despite severe constraints and challenges. The consolidated revenues of TTL for Fiscal 2010 stood at Rs.10,699 million a decline of 12.9% against Rs.12,286 million in the previous year due principally to a downturn in U.S. markets.

Government Regulation

Indian Automotive Sector

Automotive Mission Plan, 2006-2016

The automotive mission plan (Plan 2006) laid down by the Ministry of Heavy Industries and Public Enterprises of the Government of India in December 2006, consists of recommendations to the task force of the Development Council on Automobile and Allied Industries constituted by the Government of India, in relation to the preparation of the mission plan for the Indian automotive industry. Plan 2006 recommends that a negative list of items, such as no duty concession for import of used or re-manufactured vehicles, or treatment of remanufactured automotive products as old products, should be negotiated for free trade agreements or regional trade agreements on a case-by-case basis with other countries. It recommends the adoption of appropriate tariff policy to attract more investment into the automobile industry, the improvement of power infrastructure to facilitate faster growth of automotive sector both domestically and internationally, policy initiatives such as encouragement of collaboration of the automotive industry with research and academic institutions, tax concessions and incentives to enhance competitiveness in manufacturing and promotion of research and technology development. For the promotion of exports in the automotive components sector, among other things, it recommends creation of special automotive component parks in special economic zones and creation of virtual special economic zones, which would enjoy certain exemptions on sales tax, excise and customs duty. Strengthening the inspection and certification system by encouraging public-private partnership and rationalization of the motor vehicles regulations are also among the major recommendations of the plan.

Table of Contents

A committee set up under the chairmanship of the Secretary, Heavy Industries and Public Enterprises consisting of all stake holders including representatives of the Ministry of Finance, representatives of interested parties relating to road transport, environment, commerce, industrial policy and promotion, labour, shipping, railways, human resource development, science and technology, new and renewable energy, petroleum and natural gas, and representatives of automotive industry, will monitor the implementation and progress of the Plan 2006.

The Auto Policy, 2002

The Auto Policy was introduced by the Department of Heavy Industry, Ministry of Heavy Industries and Public Enterprises of the Government of India in March 2002, with the aim, among others, to promote a globally competitive automotive industry and emerge as a global source for automotive components, establish an international hub for manufacturing small, affordable passenger cars, ensure a balanced transition to open trade at a minimal risk to the Indian economy and local industry, to encourage modernization of the industry and facilitate indigenous design, research and development and to develop domestic safety and environment standards at par with international standards.

Auto Fuel Policy, 2003

In 1992, the government of India issued emission and safety standards, which were further tightened in April 1996, under the Indian Motor Vehicle Act. Currently Bharat Stage IV norms (equivalent to Euro IV norms) are in force for four wheelers in 13 cities in India and Bharat Stage III norms (equivalent to Euro III norms) would be in force from October 1, 2010, in the rest of India. Our vehicles comply with these norms. The next change in emission regulations is yet to be discussed by Government of India.

Central Motors Vehicles Rules, 1989

Chapter V of the Central Motor Vehicle Rules, 1989, or the CMV rules, lays down provisions relating to construction and maintenance of motor vehicles. Among specifications pertaining to dimensions, gears, indicators, reflectors, lights, horns, safety belts and others, the CMV rules govern emission standards for vehicles operating on compressed natural gas, or CNG, petrol, liquefied petroleum gas and diesel. Bharat Stage IV Emission Norms (equivalent to Euro IV norms) are now applicable to all 4 wheelers as of April 1, 2010 in the cities of Delhi/National Capital Region, Mumbai, Kolkata, Chennai, Bangalore, Hyderabad, Ahmedabad, Pune, Surat, Kanpur and Agra. Manufacturers must comply with the emission standards as laid down in the CMV rules from time to time and are required to certify such compliance. Bharat Stage III Emission Norms (equivalent to Euro III norms) would be in force from October 1, 2010 for the rest of the country.

Additionally, pursuant to the CMV rules, every manufacturer must also submit the prototype of every vehicle to be manufactured by it for testing by the Vehicle Research and Development Establishment of the Ministry of Defense of the Government of India, or Automotive Research Association of India, Pune, or the Central Machinery Testing and Training Institute, Budni (MP), or the Indian Institute of Petroleum, Dehradun, or such other agencies as may be specified by the central government for granting a certificate by that agency as to the compliance of provisions of the Motor Vehicles Act, 1988 and these rules.

In case of CNG fitments by vehicle manufacturers on new petrol vehicles, each model manufactured must be a type approved pursuant to the prevailing mass emission norms as applicable for the category of new vehicle in respect of the place of its use.

The CMV Rules also require the manufacturers to comply with notifications in the Official Gazette, issued by central government to use such parts, components or assemblies in manufacture of such vehicle, of such standards as may be specified or the relevant standards as specified by the Bureau of Indian Standards.

Emission and Safety in India

In 1992, the Government of India issued emission and safety standards, which were further tightened in April 1996 under the Indian Motor Vehicle Act. From April 1, 2010, India migrated its emission norms to Bharat Stage IV (Euro IV) in the 11 metro cities and Bharat Stage III in the rest of the country. However, the deadline for pan-India rollout of BS III emission norms which was originally set for April 2010, is now delayed to October 2010.

We are also working on meeting all the regulations which we believe are likely to come into force in various markets in future. Our vehicle exports to Europe comply with Euro IV norms, and we believe our vehicles also comply with the various safety regulations in effect in the other international markets we operate in.

Table of Contents

The Indian automobile industry is progressively harmonizing its safety regulations with international standards in order to facilitate sustained growth of the Indian automobile industry as well as to make India a large exporter of automobiles.

India has been a signatory to the 1998 UNECE Agreement on Global Technical Regulations (GTR) since April 22, 2006 and has voted in favor of all the seven Global Technical Regulations. Tata Motors works closely with the Government of India to participate in WP 29 World Forum Harmonization activities.

India has a well established regulatory framework administered by the Indian Ministry of Shipping, Road Transport and Highways. The Ministry issues notifications under the Central Motor Vehicles Rules and the Motor Vehicles Act. Chapter V of the Central Motor Vehicles Rules, 1989, which deals with construction, equipment and maintenance of vehicles. Vehicles manufactured in the country must comply with relevant Indian standards and automotive industry standards. The Indian Ministry of Shipping, Road Transport and Highways finalized a road map on automobile safety standards in January 2002. The road map is based on current traffic conditions, traffic density, driving habits and road user behavior in India and is generally aimed at increasing safety requirements for vehicles under consideration for Indian markets.

The Essential Commodities Act, 1955

The Essential Commodities Act, 1955, as amended by the Essential Commodities (Amendment and Validation) Act, 2009, or the Essential Commodities Act, authorises the central government, if it finds it necessary or expedient to do so, to provide for regulating or prohibiting the production, supply, distribution, trade and commerce in the specified commodities under the Essential Commodities Act, in order to maintain or increase supplies of any essential commodity or to secure their equitable distribution and availability at fair prices, or to secure any essential commodity for the defence of India or the efficient conduct of military operations. The definition of essential commodity under the Essential Commodities Act includes component parts and accessories of automobiles .

Environmental Regulations

Manufacturing units or plants must ensure compliance with environmental legislation, such as the Water (Prevention and Control of Pollution) Act 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Environment Protection Act, 1986 and the Hazardous Wastes (Management and Handling) Rules, 1989. The basic purpose of these statutes is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (PCBs), which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking inspection to ensure that units or plants are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure and investigation.

Our manufacturing plants have received or are in the process of obtaining the Indian government s environmental clearances required for our operations. We are fully committed to our role as a responsible corporate citizen with respect to reducing environmental pollution. We treat the effluents at our plants and have made significant investments in lowering the emissions from our products.

In addition, the Ministry of Environment and Forests conducts environment impact assessments. The Ministry receives proposals for expansion, modernization and establishment of projects, and then the impact which such projects would have on the environment is assessed by the Ministry before it grants clearances for the proposed projects.

Regulation of Imports and Exports

Quantitative restrictions on imports into India were removed with effect from April 1, 2001, pursuant to India s World Trade Organization obligations, and imports of capital goods and automotive components were placed under the open general license category. In addition, we are also regulated by the provisions of the Customs Act, 1962 and the Central Excise Act, 1944.

Table of Contents

The FDI Policy

Automatic approval for foreign equity investments up to 100% is allowed in the automobile manufacturing sector under the FDI Policy.

Automobiles and automotive components can, generally, be imported into India without a license from the Government of India subject to their meeting Indian standards and regulations as specified by designated testing agencies. Cars, UVs and SUVs in completely built up or CBU condition can be imported at 60% basic customs duty. Commercial vehicles can be imported at basic customs duty of 10%, and components can be imported at basic customs duty ranging from at 10% to at 7.5% (for engine component).

Indian Taxes

See Item 10.E Additional Information Taxation for additional information relating to our taxation.

Excise Duty:

In the Indian Union Budget 2008-2009, the Government of India reduced the excise duty on small cars from 16% to 12%. The Government of India further reduced the excise duty rate from 12% to 8% in December 2008. This reduction was a part of government initiative towards revival of automobile industry from the recessionary situation. In February, 2010 this duty was increased by the Government of India from 8% to 10%. The excise duty on cars other than small cars presently stands at 22%. Small cars are defined to mean cars of length not exceeding 4,000mm and with an engine capacity not exceeding 1,500cc for cars with diesel engines and not exceeding 1,200cc for cars with gasoline engines.

The Government of India reduced the excise duty on motor vehicles for transport of more than 13 persons, including the driver, from 16% to 10% in February, 2010. Excise duty on chassis fitted with engines for such vehicles was also reduced from 16% + Rs.10,000 per chassis to 12% + Rs.10,000 per chassis which was further reduced to 8% + Rs.10,000 per chassis in December 2008.

Excise duty on trucks was reduced from 16% to 14% during the Indian Union Budget 2008-2009, which was further reduced to 10% in December 2008. The excise duty on trucks was again reduced from 10% to 8% in the Indian Union Budget 2009-2010. Excise duties on trucks were then increased from 8% to 10% in March 2010.

In December 2008, the excise duty on Safari, SUVs & UVs was reduced from 24% + Rs.20,000 per vehicle to 20% + Rs.20,000 per vehicle, which was further reduced to 20% + Rs.15,000 per vehicle in the Indian Union Budget 2009-2010. This was revised to 22% + Rs.15,000 per vehicle in the Indian Union Budget 2010-2011.

In addition, vehicle and component imports are also subject to a countervailing duty which is equivalent to the excise duty indicated above plus an additional customs duty at 4%, National Calamity Contingent duty (NCCD) at 1% (only for vehicles), educational cess at 2%, higher education cess at 1% and vehicle cess (only in case of vehicles) at 0.125%.

Valued Added Tax:

The Value Added Tax, or VAT, has been implemented throughout India. VAT enables set-off from sales tax paid on inputs by traders and manufacturers against the sales tax collected by them on behalf of the government, thereby eliminating the cascading effect of taxation. Two main brackets of 4% and 12.5%, along with special brackets of 0%, 1% and 20%, have been announced for various categories of goods and commodities sold in the country, and certain states have introduced additional VAT of 1% and 3% on specified commodities, including automobiles. In one of the states, surcharge of 10% on VAT has been introduced on automobiles. Central Sales Tax, however, continues to exist, although it is proposed to be abolished in a phased manner. Since its implementation, VAT has had a positive impact on us. Prior to the implementation of VAT, sales tax formed part of our total cost of material. However, the implementation of VAT would result in savings on sales tax component, as VAT paid on inputs can be set off against tax paid on outputs.

In the Indian Union Budget 2009-2010, the Central Sales Tax rate was reduced to 2%.

Table of Contents

Goods and Services Tax:

The Government of India is proposing to reform the indirect tax system in India with a comprehensive national goods and services tax, or GST, covering the manufacture, sale and consumptions of goods and services, effective from April 1, 2011. The proposed GST regime will combine taxes and levies by the central and state governments into one unified rate structure. The Government of India has publicly expressed the view that following the implementation of the GST, indirect tax incidence on domestically manufactured goods is expected to decrease along with prices on such goods.

We have and are availing ourselves of excise duty exemptions for manufacturing facilities in the state of Uttarakhand and other incentives in certain states of India either through subsidy or loan from such states where we have manufacturing operations. While both the Government of India and other state governments of India have publicly announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the effect of this or any other aspect of the tax regime following implementation of the GST.

Direct Tax Code:

The Direct Tax Code Bill 2010, or DTC, proposes to replace the existing Income Tax Act, 1961 and other direct tax laws, with a view to simplify and rationalize the tax provisions into one unified code. The DTC bill which was placed before the Indian parliament for debate and discussion on August 30, 2010, is proposed to come into effect from April 1, 2012. The various proposals included in DTC bill are subject to review by Indian parliament and as such impact if any, is not quantifiable at this stage.

Insurance Coverage:

The Indian insurance industry is predominantly state-owned and insurance tariffs are regulated by the Indian Insurance Regulatory and Development Authority. We have insurance coverage which we consider reasonably sufficient to cover all normal risks associated with our operations (including business interruptions) and which we believe is in accordance with industry standards in India. We have obtained coverage for product liability for some of our vehicle models in several countries to which we export vehicles. TDCV has insurance coverage as is required and applicable to cover all normal risks in accordance with industry standards in South Korea, including product liability. We have also taken insurance coverage on directors and officers liability to minimize risks associated with international litigations for us and some of our subsidiaries.

Jaguar Land Rover has global insurance coverage which Jaguar Land Rover considers to be reasonably sufficient to cover normal risks associated with our operations and insurance risks (including property, business interruption, marine and product/general liability) and which Jaguar Land Rover believes is in accordance with commercial industry standards.

We have also taken insurance coverage on directors and officers liability to minimize risks associated with international litigation.

Economic Stimulus Package and incentives:

In January 2009, the Government of India announced an Economic Stimulus Package targeting the automotive industry. The Public Sector banks were encouraged to fund the auto sector along with providing a line of credit to NBFCs, specifically for the CVs. The States were to be provided a one time assistance to purchase 15,000 buses for their urban transport system. There was a 4% cut in the central value added tax rate, or centvat, on cars and trucks and a 2% cut in centvat rate on motor vehicles for transport of more than 13 persons, including the driver. Further, in February 2009, the centvat was reduced from 10% to 8% for Trucks and buses and service tax was also reduced from 12% to 10%. The Government of India has also provided for an accelerated tax depreciation of 50% for commercial vehicles purchased between January 1 and September 30, 2009. The centvat rate and service tax have been restored to 10% and 12% since April 1, 2010.

The United States and some of the European governments had also introduced support schemes for the automotive industry within their countries. The UK government announced the Automotive Assistance Program, a program of support for the British car industry back in January 2009. The EIB has also announced a support package of aid to the car industry.

In January 2009 the United Kingdom government announced the United Kingdom Automotive Assistance Program, or AAP, to address funding requirements of the UK automotive industry. The AAP will facilitate the government loan guarantees on a case by case basis, for projects for which EIB (European Investment Bank) funding has been approved and to bring special value to the United Kingdom through the preservation of jobs and new investments which fulfill government objectives of low carbon emission. In March 2009, it was confirmed the UK government was to make available a grant of up to GBP27 million to support the production of a new model based on the compact and sustainable LRX

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Concept to be produced at the Halewood factory. The vehicle, confirmed for production, would be the smallest, lightest and most fuel efficient addition to the Range Rover family of luxury vehicles and will debut in 2010-11. This vehicle is planned to further enhance the Jaguar Land Rover commitment to sustainability.

Table of Contents

The United Kingdom government also introduced a vehicle scrappage incentive scheme on vehicles that are aged 10 years plus in order to stimulate car purchases within the United Kingdom market. The United States and several European countries including Cyprus, France, Germany, Italy, Luxembourg, Portugal, Romania and Spain, have also introduced versions of vehicle scrappage schemes and incentives.

Emission and Safety in Europe, the United Kingdom and the United States:

There has been a greater emphasis by governments on emission and safety levels for the automobile industry. Existing EU4 and EU5 regulations, and planned EU6 regulations place limits on particulate emissions and emissions of pollutants other than CO₂ and encourage fuel economy. The European Union has indicated that it will introduce legislation to reduce CO₂ emissions from passenger cars. Jaguar Land Rover carefully monitors environmental requirements and has plans to reduce the average CO₂ emissions of its vehicle fleet through the introduction of sustainable technologies, including modular lightweight vehicle architectures, smaller and more fuel efficient SUVs and development of technologies that use hybrid and alternative fuels. While Jaguar Land Rover has plans to reduce emissions, the risk remains that eventual legislation may impose requirements in excess of currently planned design actions. Also, consumers may demand further fuel efficiency and reduction in emissions. To comply with current and future environmental norms, Jaguar Land Rover may have to incur substantial capital expenditures and research and development costs to upgrade products and manufacturing facilities, which would have an impact on its cost of production and results of operation.

The regulatory environment continues to intensify with the European Union draft regulations, United States CAFE and national CO₂ actions and incentives. These have had a potentially negative impact on larger vehicle and premium segments, influenced by significant tax related impacts, particularly in smaller European markets.

Vehicles sold in Europe are subject to vehicle safety regulations established by the European Union or by individual countries that are similar to those in the United States. Major regulatory changes in Europe include:

The EU Commission has recently proposed new requirements for enhanced (phase 2) pedestrian protection. Pedestrian protection legislation may have a significant impact on the design of our future passenger cars;

The cooling agent currently used in vehicle air conditioning systems may not be used in all-new vehicle types beginning in 2011, and will be banned in pre-existing vehicle lines beginning in 2017. Alternative cooling agents will have to be developed, which are expected to result in significantly higher costs;

The EU Commission has proposed mandating tire pressure monitoring systems in the context of fuel economy legislation; and

The EU Commission has passed regulatory requirements to fit active safety systems, such as electronic stability control systems, collision mitigation braking systems and lane departure warning systems for heavy duty commercial vehicles.

In addition, within the framework of the United Nations Economic Commission for Europe, the European Union may establish new vehicle safety regulations (for example, regarding head restraints).

The U.S. National Highways Transport Safety Agency, or the NHTSA, issues federal motor vehicle safety standards covering a wide range of vehicle components and systems such as airbags, seatbelts, brakes, windshields, tires, steering columns, displays, lights, door locks, side impact protection, and fuel systems. We are required to test new vehicles and equipment and assure their compliance with these standards before selling them in the United States. We are also required to recall vehicles found to have defects that present an unreasonable risk to safety or which do not conform to the required Federal Motor Vehicle Safety Standards, and to repair them without charge to the owner. The financial cost and impact on consumer confidence of such recalls can be significant depending on the repair required and the number of vehicles affected. Jaguar Land Rover has no investigations relating to alleged safety defects or potential compliance issues pending before the NHTSA.

These standards add to the cost and complexity of designing and producing vehicles and equipment. In recent years the NHTSA has mandated, among other things:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

a system for collecting information relating to vehicle performance and customer complaints, and foreign recalls to assist in the early identification of potential vehicle defects as required by the Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act; and

enhanced requirements for frontal and side impact, including a lateral pole impact.

Table of Contents

Furthermore, the Cameron Gulbransen Kids Transportation Safety Act of 2007 (Kids and Cars Safety Act), passed into law in 2008, requires the NHTSA to enact regulations related to rearward visibility and brake-to-shift interlock and requires the NHTSA to consider regulating the automatic reversal functions on power windows. The costs to meet these proposed regulatory requirements may be significant.

Vehicle safety regulations in Canada are similar to those in the United States; however, many other countries have vehicle regulatory requirements which differ from those in the United States. The differing requirements among various countries create complexity and increase costs such that the development/production of a common product that meets the country regulatory requirements of all countries is not possible. Global Technical Regulations, or GTRs, developed under the auspices of the United Nations continue to have an increasing impact on automotive safety activities. In 2008, GTRs on electronic stability control, head restraints and pedestrian protection were each adopted by the UN World Forum for the Harmonization of Vehicle Regulations, and are now in different stages of national implementation. While global harmonization is fundamentally supported by the auto industry in order to reduce complexity, national implementation may still introduce subtle differences into the system.

Legal Proceedings

In the normal course of business, we face claims and assertions by various parties. We assess such claims and assertions and monitor the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. We record a liability for any claims where a potential loss is probable and capable of being estimated, and disclose such matters in our financial statements, if material. For potential losses which are considered reasonably possible, but not probable, we provide disclosure in the financial statements, but do not record a liability in our financial statements unless the loss becomes probable. Should any new developments arise, such as a change in law or rulings against us, we may need to make provisions in our financial statements, which could adversely impact our reported financial condition and results of operations. Furthermore, if significant claims are determined against us and we are required to pay all or a portion of the disputed amounts, there could be a material adverse effect on our business and profitability. Certain claims that are above Rs. 200 million in value are described in Note 36 to our consolidated financial statements included in this annual report. Certain claims that are below Rs. 200 million in value pertain to indirect taxes, labour and other civil cases. There are other claims against us which pertain to motor accident claims (involving vehicles that were damaged in accidents while being transferred from our manufacturing plants to regional sales offices) product liability claims and consumer complaints. Some of these cases relate to replacement of parts of vehicles and/or compensation for deficiency in services provided by us or our dealers.

We believe that none of the contingencies, either individually or in the aggregate, would have a material adverse effect on our financial condition, results of operations or cash flows.

C. Organizational Structure

Tata Sons is a holding company that has equity holdings in a range of businesses. The various companies promoted by Tata Sons, including us, are based substantially in India and had combined revenues of approximately US\$67.4 billion for fiscal 2010.

The operations of Tata Sons promoted entities are highly diversified and can be categorized under seven business sectors, namely, engineering, materials, energy, chemicals, consumer products, services, communications and information systems. These companies do not constitute a group under Indian Law.

Tata Sons has its origins in the trading business founded by Jamsetji Tata in 1874 that was developed and expanded in furtherance of his ideals by his two sons, Sir Dorabji Tata and Sir Ratan Tata, following their father's death in 1904. The family interests subsequently vested largely in the Sir Ratan Tata Trust, the Sir Dorabji Tata Trust and other related trusts. These trusts were established for philanthropic and charitable purposes and together own a substantial majority of the shares of Tata Sons Limited.

Table of Contents

By 1970, the operations of Tata Sons promoted entities had expanded to encompass a number of major industrial and commercial enterprises including The Indian Hotels Company Limited (1902), The Tata Steel Limited (Tata Steel) (1907), which became the sixth largest steel maker in the world after it acquired Corus, The Tata Power Company Limited (1910), Tata Chemicals Limited (1939), which is the world's second largest manufacturer of soda ash, and Tata Motors Limited (1945), which is among the top five commercial vehicle manufacturers in the world and has recently acquired Jaguar and Land Rover. Tata Motors, which made India's first indigenously developed car, the Indica, in 1998, and introduced the world's lowest-cost car, the Tata Nano in fiscal 2010. Other Tata entities include Voltas Limited (1954), and Tata Tea Limited (1962) now named Tata Global Beverages Ltd., which is the second largest branded tea company in the world, through its UK-based subsidiary Tetley. Tata Sons also promoted India's first airline, Tata Airlines, which later became Air India (India's national carrier), as well as India's largest general insurance company, New India Assurance Company Limited, both of which were subsequently taken over by the Government as part of the Government's nationalization program. Tata Consultancy Services Limited (TCS) is Asia's leading software services provider and the first Indian software firm to exceed sales of US\$4 billion. TCS has delivery centres in the US, UK, Hungary, Brazil, Uruguay and China, as well as India. In 1999, Tata Sons also invested in several telephony and telecommunication ventures, including acquiring a portion of the Indian Government's equity stake in the state owned Tata Communications Limited which is one of the world's largest wholesale voice carriers. Tata companies are building multinational businesses that will achieve growth through excellence and innovation, while balancing the interests of shareholders, employees and civil society.

We have for many years been a licensed user of the Tata brand owned by Tata Sons Limited, and thus have both gained from the use of the Tata brand as well as helped to sustain its brand equity. Tata Sons along with the Tata Sons promoted entities instituted a corporate identity program to re-position the brand to compete in a global environment. A substantial ongoing investment and recurring expenditure is planned to develop and promote a strong, well-recognized and common brand equity, which is intended to represent for the consumer a level of quality, service and reliability associated with products and services offered by the Tata Sons promoted entities.

Each of the Tata Sons promoted consenting entities pays a subscription fee to participate in and gain from the Tata brand identity. We believe that we benefit from the association with the Tata brand identity and, accordingly, Tata Motors Limited and certain of our subsidiaries have agreed to pay an annual subscription fee to Tata Sons Limited which is equal to 0.15%-0.25% of annual net income (defined as net revenues exclusive of excise duties and other governmental taxes and non-operating income), subject to a ceiling of 5% of annual profit before tax (defined as profit after interest and depreciation but before income tax). In the past, Tata Sons also has lowered the subscription fee, considering its requirement of outlay for activities related to brand promotion and protection. For the fiscal years ended March 31, 2009 and 2010, Tata Motors on a standalone basis paid an amount less than 0.25% of its annual net income as per Indian GAAP. Pursuant to our licensing agreement with Tata Sons Limited, we have also undertaken certain obligations for the promotion and protection of the new Tata brand identity licensed to us under the agreement. The agreement can be terminated by written agreement between the parties, by Tata Sons Limited upon our breach of the agreement and our failure to remedy the same, or by Tata Sons Limited upon providing six months notice for reasons to be recorded in writing. The agreement can also be terminated by Tata Sons Limited upon the occurrence of certain specified events, including liquidation.

The Tata Sons promoted entities have sought to continue to follow the ideals, values and principles of ethics, integrity and fair business practices originally established by the founder of Tata Sons, Mr. Jamsetji Tata, and his successors. To further protect and enhance the Tata brand equity, these values and principles have been articulated in the Tata code of conduct, which has been adopted by most of the Tata Companies that have access to the larger resources and services of the Tata Sons promoted entities. These companies have endeavored to maintain high standards of management efficiency and to promote the commercial success of Indian enterprises. The Tata Sons promoted entities have also made significant contributions towards national causes through promotion of public institutions in the field of science, such as the Indian Institute of Science and the Tata Institute of Fundamental Research, and in the field of social services through the Tata Institute of Social Sciences, the Tata Memorial Hospital and the National Center of the Performing Arts. Tata trusts are among the largest charitable foundations in the country.

A large number of the Tata Sons promoted entities hold shares in one another and some of our directors hold directorships on the boards of Tata Sons and/or Tata Sons promoted entities. However, there are no voting agreements, material supply or purchase agreements or any other relationships or agreements that have the effect of tying us together with other Tata Sons promoted entities at management, financial or operational levels. With the exception of Tata Steel Limited, which under our Articles of Association has the right to appoint one director to the Board, Tata Sons Limited and its subsidiaries do not have any special contractual or other power to appoint our directors or management beyond the voting power of their shareholdings in us. Except as set forth in the tables below under the heading "Subsidiaries and Affiliates" and except for approximately a 15.37% stake in Tata Services Ltd, a 10.27% stake in Tata Industries Limited and a 6.67% stake in Tata Projects Ltd, our shareholdings in other the Tata Sons promoted entities are generally insignificant as a percentage of their respective outstanding shares or in terms of the amount of our investment or the market value of our shares of those companies.

Table of Contents*Subsidiaries and Affiliates*

We had the following consolidated subsidiaries and equity method affiliates as of March 31, 2010:

	Name of the Subsidiary Company	Country of incorporation	% of holding
1	Sheba Properties Ltd.	India	100.00
2	Concorde Motors (India) Ltd.	India	100.00
3	HV Axles Ltd.	India	85.00
4	HV Transmissions Ltd.	India	85.00
5	TAL Manufacturing Solutions Ltd.	India	100.00
6	Tata Motors Insurance Broking and Advisory Services Ltd.	India	100.00
7	Tata Daewoo Commercial Vehicle Co. Ltd.	South Korea	100.00
8	Tata Motors European Technical Centre plc and its one subsidiary	UK ⁵	100.00 ⁴
9	Tata Technologies Ltd. and its nine functional subsidiaries	India ¹	82.47 ²
10	Tata Precision Industries Pte. Ltd., Singapore and its one subsidiary	Singapore	51.07
11	Tata Motors Finance Ltd.	India	100.00
12	Tata Motors (Thailand) Ltd.	Thailand	86.78
13	Tata Hispano Motors Carrocera S.A. and its one subsidiary	Spain ³	100.00
14	TML Holdings PTE Ltd., Singapore and its 38 subsidiaries	Singapore ¹	100.00
15	Tata Motors (SA) (Proprietary) Ltd.	South Africa	60.00
16	TML Distribution Company Ltd.	India	100.00
17	Tata Marcopolo Motors Ltd.	India	51.00

- 1 The subsidiaries are based in many countries abroad.
- 2 The holdings in these subsidiaries range between 82.47% to 83.23%.
- 3 The subsidiary is based in Morocco.
- 4 The holding in its subsidiary is 71.69%
- 5 The subsidiary is based in Norway.

	Name of the Affiliate Company	Country of incorporation	% of holding
1	Tata Cummins Ltd.	India	50.00
2	Nita Co. Ltd.	Bangladesh	40.00
3	Fiat India Automobiles Ltd.	India	50.00
4	Tata AutoComp Systems Ltd. and its 7 subsidiaries and 9 Affiliates	India	30.79 ¹
5	Automobile Corporation of Goa Ltd.	India	42.37
6	TATA HAL Technologies Ltd. ²	India	40.68
7	Telco Construction Equipment Co Ltd and its 4 subsidiaries and affiliate ⁴	India	40.00 ³
8	Jaguar Cars Finance Limited	UK	49.90

- 1 The holdings in these affiliates range between 15.39% to 30.79%.
- 2 Is an affiliate of Tata Technologies Ltd
- 3 The holdings in these affiliates range between 17.76% to 40.00%.
- 4 Subsidiary till March 30, 2010.

D. Property, Plants and Equipment**Facilities:**

We operate five principal automotive manufacturing facilities in India. The first facility was established in 1945 at Jamshedpur in the State of Jharkhand in eastern India. We commenced construction of a second facility in 1966 (with production commencing in 1976) at Pune, in the State

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

of Maharashtra in western India, and a third in 1985 (with production commencing in 1992) at Lucknow, in the State of Uttar Pradesh in northern India, a fourth at Pantnagar in the State of Uttarakhand, India, which commenced operations in fiscal 2008, and a fifth at Sanand in Gujarat for manufacturing of the Nano, which commenced operations in June, 2010. The Jamshedpur, Pune and Lucknow manufacturing facilities have been accredited with ISO/TS 16949:2000(E) certification. We have set up a plant for the manufacturing of Tata Marcopolo buses under our joint venture with Marcopolo at Dharwad in Karnataka and at Lucknow.

Table of Contents

The manufacturing facilities of TDCV are based in Gunsan, South Korea. TDCV has received the ISO/TS 16949 certification, an international quality systems specification given by SGS UK Ltd., an International Automotive Task Force, or IATF, accredited certification body. It is the first Korean original automobile equipment manufacturer to be awarded the same.

Fiat India Automobiles Limited, our joint venture with Fiat Group Automobiles S.p.A Italy, has its manufacturing facility located in Ranjangaon, Maharashtra. The plant is used for manufacturing Tata and Fiat branded cars as well as engines and transmissions for use by both partners.

Tata Motors (Thailand) Limited is our joint venture with Thonburi Automotive Assembly Plant Co Ltd for the manufacture and assembly of pickup trucks. We presently own 86.78% and Thonburi Automotive owns 13.22% of this venture. The manufacturing facility is located in Samutprakarn province, Thailand.

Our 100% stake in Tata Hispano Motors Carrocera S.A. provides us with access to two manufacturing units, one in Spain and another one in Morocco.

Following our acquisition of Jaguar Land Rover, we currently operate three principal automotive manufacturing facilities in the United Kingdom at Solihull, Castle Bromwich, and Halewood and have also established two product development facilities in the United Kingdom at Gaydon and Whitley. Most of these facilities are owned freehold or held through long-term leaseholds, generally with nominal rents.

Tata Motors European Technical Centre Plc ,UK, along with its Norwegian subsidiary, is specialized in the development and manufacture of electric cars and lithiumion batteries.

Description of environmental issues that may affect the Company s utilization of facilities:

Tata Motors Limited:

Automobile industry participants around the world are understandably concerned about climate change as they are exposed to various regulations for controlling the emissions contributing to climate change. We are also exposed to such regulatory risks related to climate change.

The design and development of fuel efficient vehicles and vehicle running on alternative renewable energy have become a priority as a result of fossil fuel scarcity and escalating price, and growing awareness about energy efficiency among customers.

We have adopted the Tata Group Climate Change Policy which addresses key climate change issues related to products, processes and services. We are committed to reduction of greenhouse gases emissions throughout the lifecycle of our products and development of fuel efficient and low Green House Gas (GHG) emitting vehicles is an integral part of our product development and manufacturing strategy.

Considering the climate change risk, we are actively involved in partnerships with technology providers to embrace the best energy efficient technologies not only for products but also for processes and are also participating actively in the various National Committees in India which are working on formulating policies and regulations for improvement of environment, including GHG reduction.

India, as a party to the United Nations Framework Convention on Climate Change, 1992 and its Kyoto Protocol, 1997 has been committed to addressing the global problem on the basis of the principle of common but differentiated responsibilities and respective capabilities of the member parties. At present, there are no legally binding targets for GHG reductions for India as it is a developing country. There are however opportunities for minimizing energy consumption through elimination of energy losses during manufacturing, thereby reducing manufacturing costs and increasing productivity.

In order to manage regulatory and general risks of climate change, we are increasingly investing in design and development of fuel efficient and alternative energy vehicles, beside implementing new advanced technologies to increase efficiency of internal combustion engines. We have manufactured a CNG version of buses, light commercial vehicles, an LPG version of passenger car, the Indica, and a CNG version of the ACE goods carrier and pickup, Xenon.

In September 2010, Tata Motors presented CNG-Electric Hybrid Low-floor Starbuses to the Delhi Transport Corporation (DTC). This is the first time in India that hybrid buses will be used for public transportation. The Tata Hybrid Starbus offers substantial improvements in fuel economy compared to a conventional bus. The usage of this technology leads to lower emissions, thereby contributing to cleaner air and a greener, more environment-friendly commercial passenger transportation application.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Further, we are using latest available low GWP refrigerants like R134A in products for minimizing contribution of GHG emissions. We also ensure that no refrigerant is released to atmosphere during any service, repair and maintenance. The refrigerant charge on the vehicle is first recovered before the system is serviced and recharged. In addition, we are voluntarily disclosing passenger vehicles fuel efficiency information in India in accordance with the decision by the Society of Indian Automobile Manufacturers (SIAM). We are also continually in the process of developing products that meet the current and future emission norms in India and other countries. For example we have products which meet the BS III and BS IV norms in India and are also working on products that will meet the impending Euro V norms in international markets.

We also strive to increase the proportion of energy sourced from renewables. We have incorporated environmentally sound practices as one of our prime objectives in our processes, products and services, and all manufacturing facilities at Pune, Jamshedpur, Lucknow and Pantnagar in India have an Environmental Management System, (EMS), in place and have achieved ISO-14001 certification. We have been implementing various Environment Management Programmes (EMPs) on energy conservation such as reduction in electricity and fuel consumption and thereby reducing greenhouse gases emissions. We are actively working towards a shift to gas fuels to meet process heat requirements.

Jaguar Land Rover:

Environmental, Fiscal and Other Governmental regulations: As an automobile company, we are subjected to extensive governmental regulations regarding vehicle emission levels, noise, safety and levels of pollutants generated by our production facilities. These regulations are likely to become more stringent and compliance costs may be significant. In particular, Jaguar Land Rover has significant operations in the US and Europe which have stringent regulations relating to vehicular emissions. The proposed tightening of vehicle emissions regulations by the European Union will require significant costs of compliance for Jaguar Land Rover. While we are pursuing various technologies in order to meet the required standards in the various countries in which we operate, the costs of compliance with these required standards can be significant to our operations and may adversely impact our results of operations.

Greenhouse Gas/CO₂/Fuel Economy Legislation: Legislation is now in place limiting the manufacturer fleet average greenhouse gas emissions in Europe for passenger cars starting January 2012 and in the US with their Federal GHG Standard running 2012-2016MY. In addition, many other markets either have or will shortly define similar GHG emissions standards (some of these include Canada, China, Japan, Korea, Switzerland, Australia, South Africa). In Europe implementation of Light Commercial Vehicle CO₂ standards would affect the Defender and a small number of Freelander and Discovery vehicles. Jaguar Land Rover is fully committed to meeting these standards and technology deployment plans incorporated into cycle plans are directed to achieving these standards. These technology deployment plans include the research, development and deployment of hybrid electric vehicles initially in Europe and USA and require significant investment. Additionally, local excise tax initiatives are also a key consideration in ensuring Jaguar Land Rover products meet customer needs for environmental footprint and cost of ownership concerns.

In Europe, non compliance penalties are in the form of millions of Euros in compensation. In the US, non compliance results in market exclusion.

California is currently developing a new Zero Emission Vehicle regulation mandating increased penetration of hybrid and plug in hybrid electric vehicles from 2014MY above and beyond the requirements of the Federal GHG Standard.

Non Greenhouse Gas Emissions Legislation: Existing EU5 regulations, planned EU6 and EU7 regulations in Europe; existing US California LEV2 regulations and planned LEV3 regulations place ever stricter limits on particulate emissions, oxides of nitrogen and hydrocarbons passenger cars and light duty trucks. These regulations require ever increasing levels of technology in engine control systems, on-board diagnostics and after treatment systems affecting base costs of our powertrains. Additional stringency of evaporative emissions also require more advanced materials and joints solutions to eliminate fuel evaporative losses, all for much longer warranted periods (up to 150,000 miles in US). While Europe and California lead the implementation of these emissions programmes, other nations and states follow on with adoption of these regulations 2-4 years after (e.g. EU5 Europe September 2009, China January 2012).

To comply with the current and future environmental norms, we may have to incur substantial capital expenditure and research and development costs to upgrade products and manufacturing facilities, which would have an impact on our cost of production and results of operation.

Imposition of any additional taxes and levies by the Indian government designed to limit the use of automobiles could adversely affect the demand for our products and our results of operations.

Installed Capacity:

As of March 31, 2010, our total vehicle production capacity in India determined on the basis of two production shifts per day and including capacity for the manufacture of replacement parts, was 1,117,143 units annually. In addition, we also have vehicle production capacity of 20,000 units annually in South Korea through the manufacturing facilities of TDCV. Our Marcopolo plant has capacity of 15,000 units; we have bus body building capacity of 330 units in Spain and 240 units in Morocco, and our joint venture in Thailand has capacity of 25,000 units.

Table of Contents

The following table shows our installed capacity as of March 31, 2010, and production levels by plant and product type in Fiscal 2010 and 2009:

	Fiscal Year ended March 31,		
	Installed Capacity*	Production (Units)	
	2010	2009	
Jamshedpur			
Medium and Heavy Commercial Vehicles	126,000	89,215	64,396
Pune			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles, Passenger Cars	544,000	299,251	307,279
Lucknow			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles	90,000	34,893	21,295
Pantnagar			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles	500,000	197,402	95,546
Jamshedpur & Dharwad			
Construction Equipment			4,948
Ahmedabad (Sanand)***			
Passenger Cars	Nil	Nil	Nil
Lucknow & Dharwad			
Bus bodies	15,000	6,399	873
Republic of Korea			
Gunsan			
Medium & Heavy Commercial Vehicles	20,000	9,706	9,341
Spain**			
Buses and bus body	330	170	151

Thailand			
Pick-up trucks	25,000	2,639	870

* On double shift basis including capacity for all plants (except Uttarakhand plant for which capacity is on three shift basis) for manufacture of replacement parts as of March 31, 2010.

** On single shift basis.

*** Installed capacity of 250,000 units on double shift basis as of April 2010.

At Jaguar Land Rover, manned capacity was adjusted in fiscal 2010 in response to changing demand to 194,000 units, and we are currently operating at 95% of that capacity.

Table of Contents**Properties:**

We produce vehicles and related components and carry out other businesses through various manufacturing facilities. In addition to our manufacturing facilities, our properties include sales offices and other sales facilities in major cities, repair service facilities, and research and development facilities.

The following table sets forth information, with respect to our principal facilities, a substantial portion of which are owned by us as of March 31, 2010. The remaining facilities are on leased premises.

Location	Facility or Subsidiary Name	Principal Products or Functions

- (1) Land at these locations have been taken under operating lease.
- (2) Some of the facilities are under operating lease and some are owned.

Table of Contents

Substantially all of our owned properties are subject to mortgages in favor of secured lenders and debenture trustees for the benefit of secured debenture holders. A significant portion of our property, plant and equipment is pledged as collateral securing indebtedness incurred by us. We believe that there are no material environmental issues that may affect our utilization of these assets.

We have additional property interests throughout the world for limited manufacturing, sales offices, dealer training and testing. The majority of these are housed within leased premises.

Property, plant and equipment as of March 31, 2010 includes building under construction of Rs. 3,157.1 million for the purposes of manufacturing automobiles. Consequent to the decision to relocate and construct a similar manufacturing facility at another location, the management is in the process of evaluating several options, under all of which, no adjustment to the carrying amount of the building is considered necessary.

Since the end of the year, a substantial proportion of our owned properties have become subject to mortgages in favor of secured lenders. In addition, a significant portion of our property, plants and equipment is pledged as collateral securing indebtedness incurred by us. We believe that there are no material environmental issues that may affect our utilization of these assets.

We consider all of our principal manufacturing facilities and other significant properties to be in good condition and adequate to meet the needs of our operations.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

You should read the following discussion of our financial condition and results of operations together with our consolidated financial statements prepared in conformity with IFRS and information included in this annual report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors including, but not limited to, those set forth in Item 3.D and elsewhere in this annual report.

A. Operating Results.

All financial information discussed in this section is derived from our financial statements included in this Annual Report on Form 20-F, have been prepared in accordance with International Financial Reporting Standards as issued by International Accounting Standards Board

Overview

In Fiscal 2010, our total revenue (net of excise duties) including finance revenues increased by 28.1 % to Rs. 926,263 million from Rs. 722,806 million in Fiscal 2009. We recorded a net income (excluding the share of loss attributable to non-controlling interest) of Rs. 38,029 million in Fiscal 2010 from net loss of Rs. 60,142 million in Fiscal 2009, increase of Rs. 98,171 million.

Automotive operations.

Automotive operations are our most significant segment, accounting for 96.9 % and 95.7% for Fiscal 2010 and 2009 respectively, of our total revenues. For Fiscal 2010, revenue from automotive operations before inter segment eliminations was Rs. 897,970 million as compared to Rs. 691,778 for Fiscal 2009.

Our automotive operations include:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

All activities relating to development, design, manufacture, assembly and sale of vehicles as well as related spare parts and accessories;

Distribution and service of vehicles; and

Financing of our vehicles in certain markets.

Table of Contents

Our automotive operations are further divided into Tata and other brand vehicles / spares and financing thereof, and the Jaguar Land Rover business. For fiscal 2010 Jaguar Land Rover contributed 54.7 % of our total automotive revenue and the balance Rs.407,594 million (45.3% of total) was contributed by Tata and other brand vehicles in India and outside of India.

Tata and other brands vehicles (including spares and financing thereof)

In Fiscal 2010, overall economic recovery and a benign liquidity environment along with government stimulus have driven demand in India. As the Indian economy bounced back and grew by 7.2% in Fiscal 2010, the automotive sector in India recorded steady growth in the first two quarters and recorded significant growth in the last two quarters of Fiscal 2010. Consequently, our vehicle sales increased by 33.7% to 675,761 units in Fiscal 2010 from 505,399 units in Fiscal 2009, resulting in a revenue (before inter-segment elimination) increase of 35.5% to Rs. 407,594 million in Fiscal 2010, compared to Rs. 300,889 million in Fiscal 2009.

Sale of our commercial vehicles in India increased by 40.4% to 368,996 units in fiscal 2010 from 262,730 units in fiscal 2009, our highest ever sales in the domestic commercial vehicle market. A strong product portfolio, coupled with our leadership in market reach and penetration, and extensive efforts toward finance enablement for customers, helped us in increasing our market share. The M&HCV category grew by 31.8% supported by strong growth in the Indian economy. We unveiled in May 2009, the range of our next generation of heavy trucks Prima. In the LCV category we experienced strong growth of 47.7%, to 211,177 units in fiscal 2010 from 142,985 units in fiscal 2009. While this was largely the result of growth in the small commercial vehicles segment due to overall positive economic factors, the other segments also grew significantly. We launched new variants on the Ace platform -Ace EX and Super Ace, which are expected to help us in gaining further market share. We also launched the 407 Pickup truck, which we expect to help us increase sales in the pickup truck segment.

Our passenger vehicle sales in India increased by 31.0% to 260,882 units in fiscal 2010 from 199,095 units in fiscal 2009, primarily due to increasing acceptance of the Indica Vista, the introduction of the Indigo Manza and the commencement of Nano deliveries from Uttaranchal. The small car segment continued to be the fastest growing segment of the passenger vehicle industry, with a growth rate of 27.4% according to SIAM. With the introduction of 9 new models, we now have a total of 25 models competing for market share in the small car segment. With the growing sales of the Vista and the introduction of the Nano and Fiat Punto, we improved our overall market share to 13.3% as against 12.3% in the previous year. We received a total of approximately 203,000 bookings for the Nano, in response to the launch of booking on March 23, 2009. Deliveries to our customers started in the month of July 2009. The Indigo Manza was launched in the month of October 2009 and since then we continued to gain market share in this segment and we registered our highest ever sale for the Indigo range of vehicles in March 2010.

In the UV category, we sold 34,514 units in fiscal 2010, representing a decline of 10.1% from 38,371 units in fiscal 2009, mainly due to increased competition and a relatively mature product portfolio that adversely impacted our performance in the market. We sold 24,774 Fiat cars in fiscal 2010 as compared to 7,149 units in the same period in fiscal 2009.

Our overall sales in international markets increased by 5.3% to 45,883 units in fiscal 2010 as compared to 43,574 units in fiscal 2009. Our exports of vehicles manufactured in India increased marginally by 1.6% in fiscal 2010 to 34,088 units from 33,536 units in fiscal 2009.

During Fiscal 2010, TDCV volumes declined by 1.4% to 9,011 units from 9,137 units in Fiscal 2009 before inter-segmental elimination, affected by a slowdown in its main export markets in the Gulf Cooperation Council block, coupled with an appreciating South Korean currency. As a result, TDCV exported 3,658 units in Fiscal 2010 compared to 4,280 units in Fiscal 2009, a decline of 14.5%. However, TDCV paved the way to strengthen its presence in the South Korean domestic market with the successful launch of its new range of Prima premium trucks. The financial instability of the company's sole distributor in the domestic South Korean market has brought new challenges but also an opportunity for the company to set-up alternate marketing and distribution channels. In heavy commercial vehicles, TDCV sold 3,080 vehicles domestically in Fiscal 2010 as compared to 2,684 vehicles for Fiscal 2009. In the medium duty truck market TDCV sold 2,273 vehicles domestically in Fiscal 2010 as compared to 2,173 units in Fiscal 2009. TDCV also won an export order of 2,570 units from the Iraq Ministry of Defense, out of which 1,500 units have been shipped during Fiscal 2010.

Revenue from our vehicle financing operations increased by 8.1% to Rs.21,797 million in Fiscal 2010 as compared to Fiscal 2009. The increase was attributable to strong growth in vehicles sales as explained above and operational efficiency in disbursement and collections.

Earnings before other income, interest and tax before inter-segment eliminations from Tata and other brand vehicles /spares and financing thereof increased to Rs.46,757 million in Fiscal 2010, compared to Rs.20,110 million in Fiscal 2009. The increase is mainly attributable to a strong portfolio coupled with successful launch of new products and the variants in commercial vehicles and passenger vehicles on the background of improved market scenario and other actions involving pricing and cost reduction.

Table of Contents

Automotive operations - Jaguar Land Rover

In Fiscal 2010, the external environment for the Jaguar Land Rover business remained unstable with depressed demand in most of the key markets, low confidence level in financial markets, volatility in exchange rates and rising input material prices. The market for premium cars remained weak especially in the first half of Fiscal 2010, but improved in the second half of Fiscal 2010, with growth witnessed in two consecutive quarters. Wholesale volumes for Fiscal 2010 were 193,841 units. The prior reporting period only covered ten months and therefore is not directly comparable, however, the overall trend showed an improvement. The financial results of the Jaguar Land Rover business continued to show improvement throughout the year.

Wholesale volumes for fiscal 2010 were 47,459 units for Jaguar and 146,382 units for Land Rover. Limited availability of the X-Type (production ceased in December 2009) and the XJ model (production ceased in May 2009) resulted in decreased sales, which was offset by the demand driven by the introduction of the new 2010 model year product launches. While not directly comparable, wholesale volumes were 47,057 units for Jaguar and 120,291 units for Land Rover in fiscal 2009.

On a retail basis, retail volumes in the UK for Fiscal 2010 totaled 57,056 while retail volumes in North America totaled 41,720 in Fiscal 2010. Retail in China continued to be strong across all products with total retail volumes of 17,004 in Fiscal 2010. Retail in Russia totalled 8,831 units in Fiscal 2010, significantly lower than previous periods reflecting difficult local market conditions as the Russian economy was hard hit by the global economic crisis including the sharp fall in oil prices and the drying up of foreign credit that Russian banks and companies rely upon. During the year, the automotive sector as a whole in the UK, Europe and the USA, benefited from a variety of vehicle scrappage schemes. However, we believe these schemes had minimal benefit for the premium vehicle segment in which the Jaguar Land Rover business operates.

The new Jaguar XJ was unveiled in London in July 2009 and had its public debut at the Frankfurt International Motor show in September 2009. The vehicle has received significant media acclaim ahead of customer deliveries commencing in fiscal 2011. The new model features the next generation of Jaguar's aerospace-inspired aluminium body architecture, a choice of standard or long wheelbase models, enhanced power trains with all of Jaguar's new ultra-efficient Gen III 5.0 litre petrol and 3.0 litre diesel engines available, together with the highest standards of personal luxury and specification. Among the product innovations is its instrument cluster with a 12" TFT screen.

The new LR-V8 5.0 supercharged petrol and LR-TDV6 3.0 diesel engines introduced in the 2010 model year, were designed to deliver significant improvements in performance, fuel economy and emissions. The 2010 model year Range Rover was available for sale from July 2009 with 2010 model year Range Rover Sport and Discovery 4/LR4 being available from September 2009.

Revenues (before inter-segment eliminations) in the Jaguar Land Rover were Rs.491,261 million for Fiscal 2010 compared to Rs.390,889 million for the period June 2, 2008 to March 31, 2009. For Fiscal 2010, the Jaguar Land Rover business reported earnings of Rs.878 million compared to a loss of Rs. 21,775 million for the period June 2, 2008 to March 31, 2009, before other income, interest, and tax. The increase in reported profits is attributable to an increase in sales volumes and improvement in operations.

Other Operations.

Other operations comprise primarily activities relating to production, designing and selling of construction equipment, engineering solutions and software operations. Our revenue from other operations before inter segment eliminations was Rs. 33,483 million in Fiscal 2010, a decline of 5.5 % from Rs. 35,434 million in Fiscal 2009. This decline was mainly due to the downturn in US markets, which affected the sales of our subsidiary TTL in the US. Revenues from other operations represented 3.6% and 4.9% of our total revenues, before inter-segment eliminations, in Fiscal 2010 and 2009 respectively. Earnings before other income, interest and tax were Rs.1,265 million and Rs. 2,534 million before inter-segment eliminations in Fiscal 2010 and 2009 respectively.

Geographical breakdown

We have pursued a strategy to increase exports of Tata and other brand vehicles to new and existing markets. The performance of our subsidiary in South Korea, TDCV and successful operations of INCAT and its subsidiaries following acquisitions by TTL facilitated a significant increase in our sales to international markets. TDCV's major export markets are Algeria, Libya, Ethiopia, and countries in the Middle East. Following the acquisition of the Jaguar Land Rover business in fiscal 2009, the proportion of our net sales earned from markets outside of India has increased significantly to 58.9% and 62.2% for fiscal 2010 and 2009 respectively.

Table of Contents

The following table sets forth our revenue from our key geographical markets:

Revenue	Fiscal 2010		Fiscal 2009		Fiscal 2008	
	Rs. in million	Percentage	Rs. in million	Percentage	Rs. in million	Percentage
India	380,846	41.1%	272,889	37.8%	298,315	80.6%
United Kingdom	116,646	12.6%	167,605	23.2%	1,576	0.4%
United States of America	100,018	10.8%	60,070	8.3%	5,973	1.6%
Rest of Europe	131,358	14.2%	91,071	12.6%	12,091	3.3%
Rest of the World	197,395	21.3%	131,171	18.1%	52,300	14.1%
Total	926,263		722,806		370,255	

Significant Factors Influencing Our Results of Operations.

Our results of operations are dependent on a number of factors, which include mainly the following:

General economic conditions. We, similar to the rest of the automotive industry, are substantially affected by general economic conditions. See Item 3.D Risk Factors Risks associated with Our Business and the Automotive Industry .

Interest rates and availability of credit for vehicle purchases. Our volumes are significantly dependent on availability of vehicle financing arrangements and the cost thereof. For further discussion of our credit support programs, see Item 4.B Business Overview Automotive Operations Sales and Distribution of Vehicles .

Excise duty and sales tax rates. In India the excise / sales tax rate structure affects the cost of vehicles to the end user and hence impacts demand significantly. For a detailed discussion regarding tax rates applicable to us, please see Item 4.B Business Overview Government Regulations Excise Duty .

Our competitive position in the market. For a detailed discussion regarding our competitive position, see Item 4.B Business Overview Automotive Operations Competition .

Cyclicality. Our results of operations are also dependent on the cyclicality in demand in the automotive market, new government and environmental regulations.

Environmental Regulations. There has been a greater emphasis on the emission and safety norms for the automobile industry by governments in the various countries in which we operate. Compliance with these norms will have a significant bearing on the costs and product life cycles in the automotive industry. For further details with respect to these regulations, please see Item 4.B Business Overview Government Regulations Emission and Safety .

Foreign Currency Rates. Our operations and financial position is quite sensitive to fluctuations in foreign currency rates in the countries in which we operate. Jaguar Land Rover earns significant revenue in the United States, Europe and China and also sources a significant portion of its input material from Europe. Thus any exchange rate fluctuations of GBP to Euro, GBP to US Dollars and GBP to other currencies would affect our financial results. We have significant borrowings in foreign currencies denominated mainly in US Dollars. Fluctuations in exchange rates also have an impact on the reported result of operations through translation differences. Our consolidated financial results are affected by foreign currency exchange fluctuations through both translation risk and

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

transaction risk. Changes in foreign currency exchange rates may positively or negatively affect our revenues, results of operations and net income.

To the extent that our financial results for a particular period will be affected by changes in the prevailing exchange rates at the end of the period, such fluctuations may have a substantial impact on comparisons with prior periods. However, the translation effect is a reporting consideration and does not impact our underlying results of operations.

Transaction risk is the risk that the currency structure of our costs and liabilities will deviate from the currency structure of sales proceeds and assets. However, we enter into hedging instruments to mitigate some of these transaction risks. These instruments enable us to reduce, but not eliminate, the impact of fluctuations in foreign currency exchange rates. Please see Item 11 Quantitative and Qualitative Disclosures About Market Risk for further detail.

Political and Regional Factors. Similar to the rest of the automotive industry, we are affected by political and regional factors. For a detailed discussion regarding these risks, please see Item 3.D Risk Factors Political and Regulatory Risks.

Table of Contents

Fiscal 2010 Compared to Fiscal 2009

Revenues.

Our total consolidated revenues (net of excise duty, where applicable) including finance revenues were Rs. 926,263 million in Fiscal 2010, an increase of Rs. 203,457 million or 28.1%, from Rs. 722,806 million in Fiscal 2009. The growth was driven by an increase in total vehicle volumes of 29.3%, improved realization per vehicle, and continued growth in our vehicle financing activity which resulted in a 29.8% increase in revenues from automotive operations.

Revenues from the domestic market (India) for Fiscal 2010 increased by 39.6 % to Rs. 380,846 million in Fiscal 2010 from Rs.272,889 million in Fiscal 2009. Revenues from markets outside India increased by 21.2% to Rs.545,417 million in Fiscal 2010 from Rs.449,917 million in Fiscal 2009. The revenues from market outside India mainly relate to Jaguar Land Rover.

The following is a discussion of our revenues for each of our business segments.

Revenues from Automotive Operations.

Automotive operations constitute the largest proportion of our total revenues. Revenues from automotive operations (before inter-segment elimination) increased by Rs.206,192 million to Rs. 897,970 million, or 29.8% from Rs. 691,778 million in Fiscal 2009.

This increase was primarily due to:

a 36.4% increase in vehicle unit sales in India;

a 13.7% increase in sales of vehicles outside of India;

an increase in spares and after sales activity; and

an 8.1 % increase in automotive financing revenues.

Revenue for the Jaguar Land Rover business increased by 25.7% to Rs.491,261 million. The increase was driven by improvement in the market for premium cars in the second half of Fiscal 2010. The prior reporting period only covered ten months and therefore is not directly comparable, however, the overall trend showed an improvement in Fiscal 2010 from Fiscal 2009.

Revenues from Other Operations

Revenues (net of excise duty, where applicable) from other operations were Rs.33,483 million in fiscal 2010, a decline of 5.5% from Rs.35,434 million in fiscal 2009, mainly due to the downturn in the US automotive and aerospace markets which affected the sales of Product lifecycle management (PLM) services by our subsidiary TTL. Revenues from other operations represent 3.6% and 4.9% of our total revenues, before inter-segment eliminations, in fiscal 2010 and 2009, respectively.

Cost and Expenses

Raw Materials and Purchase of Products for Sale (including change in stock): Raw material costs as a percentage of sales (excluding finance revenue) declined to 68.4% in Fiscal 2010 as compared to 69.6% in Fiscal 2009, due to our cost reduction initiatives, improved product mix, better price realization. Raw material costs for Fiscal 2010 were Rs. 618,705 million compared to Rs. 488,733 million in Fiscal 2009, reflecting an increase of Rs.129,972 or 26.6% from Fiscal 2009. The increase is mainly attributable to an increase in vehicle volumes.

Employee Cost: Our employee cost increased by 16.9% to Rs. 87,945 million in Fiscal 2010 from Rs.75,200 million in Fiscal 2009. The increase in our employee cost and of our subsidiaries (excluding the Jaguar Land Rover business) mainly relates to increases on account of

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

normal yearly increases in compensation, performance payments and wage revisions. The Jaguar Land Rover business constitutes a major portion of our employee cost. The increase reflects impact on account of compensation structure at Jaguar Land Rover as the comparative figure for fiscal 2009 is for a period June 2, 2008 to March 31, 2009. Further, increase also relates to increased pension costs on account revisions in actuarial and other assumptions. However, our employee cost as a percentage to sales reduced to 9.5% in fiscal 2010 from 10.4% in fiscal 2009.

Table of Contents

Other Expenses: Other expenses increased to Rs. 180,808 million in Fiscal 2010 from Rs. 175,614 million in Fiscal 2009. As a percentage of revenue these represented 19.5 % in Fiscal 2010 compared to 24.3% in Fiscal 2009. The major components of expenses are as follows:

	Year ended March 31,		Increase/(Decrease)
	2010	2009	
			(Rs. in millions)
Freight and Transportation expenses	25,065	24,129	936
Works Operation and Other Expenses	58,606	62,055	(3,499)
Publicity	29,354	26,154	3,200
Allowance for trade and other receivables, and finance receivables	6,510	8,525	(2,015)
Warranty and product liability expenses	22,524	23,862	(1,338)

- i) The increase in other expenses was mainly due to the change in composition and differences in cost structure following our acquisition of Jaguar Land Rover since the figures for the fiscal 2009 are for a period June 2, 2008 to March 31, 2009.
- ii) The increase in freight and transportation expenses mainly relate to volumes and increases in freight rates.
- iii) Despite an increase in volumes, works operation and other expenses decreased to Rs. 58,606 million in fiscal 2010 from Rs.62,055 million in fiscal 2009 and represented 6.3% and 8.6% of total revenue for fiscal 2010 and fiscal 2009, respectively. The decrease mainly relates to significant reduction in accrual of residual risk on vehicle sold in certain markets due to improved market conditions. The decreases in costs are a result of our continued cost management initiatives.
- iv) The increase in publicity related expenses was mainly necessitated by new product introduction campaigns for the Nano, Prima and New Jaguar XJ brands.
- v) Allowances pertaining to finance receivables decreased. The vehicle financing operations undertook many initiatives for improving efficiencies in evaluation, disbursements, management of non-performing and collection process.

vi) Warranty expenses have reduced due to change in product mix and lower per unit cost due to quality improvement, experience adjustment.

Expenditure capitalised: These represent employee costs, store and other manufacturing supplies and other works expenses incurred mainly towards product development projects and also includes costs attributable to internally constructed capital items. The increase reflects new products and other major product development plans.

Depreciation and Amortization: Our depreciation and amortization cost increased to Rs. 36,637 million in Fiscal 2010, compared to Rs. 28,040 million in Fiscal 2009. The increase in depreciation expenses is attributable to additions to property, plant and equipment in Fiscal 2009 and 2010. Further, the increased amortization is attributable to product development projects where production has commenced; new products are mainly Prima, Nano and other products.

Gain on sale of controlling equity interest in subsidiary: Gain on sale of controlling equity interest in subsidiary increased to Rs. 27,566 million in fiscal 2010 as compared to Rs. 1,405 million in fiscal 2009. In fiscal 2010, we sold the controlling stake (20%) in Telco Construction Equipment Company Limited (Telcon) resulting in a gain of Rs. 10,572 million and also adopted IAS 27 (amended in 2008) and recognised gain of Rs. 16,994 million attributable to fair value of the interest retained (40%) in Telcon.

Other income (net): We incurred a loss (net) of Rs. 419 million in Fiscal 2010, compared to a gain of Rs.14,295 million in Fiscal 2009. The other income for fiscal 2010 includes gain on sale of investment of Rs. 7,023 million and other miscellaneous income of Rs. 4,772 million which was offset by loss due to change in fair value of conversion option of Rs.11,174 million. Net decrease as compared to fiscal 2009 is attributable to loss due to change in fair value of conversion option of Rs.11,174 million as compared to gain of 2,807 million in fiscal 2009.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Interest expense (net): Our interest expense (net of interest capitalized) increased by 18.0% to Rs.40,396 million in fiscal 2010, compared to Rs.34,222 million in fiscal 2009. Although we have substituted part of our borrowed funds through issues of equity and internal cash generation and have lowered interest charges through borrowings at lower rates, additional capital expenditure and increases in working capital resulting from increased volumes and level of acceptances in fiscal 2010, were partly funded through additional borrowed funds resulting in increases in interest and discounting charges (net). The bridge loan taken for the acquisition of Jaguar and Land Rover business was fully repaid during fiscal 2010 through issue of equity, divestment of investments and proceeds of bonds and debentures. As a percentage of revenue these represented 4.4% in fiscal 2010 compared to 4.7% in fiscal 2009.

Table of Contents

Foreign exchange (gain)/loss (net): We had a foreign exchange gain of Rs.16,045 million in Fiscal 2010, compared to a loss of Rs. 48,143 million in Fiscal 2009. A significant portion of the exchange gain in the Fiscal 2010 reflect (a) exchange gain on foreign currency borrowing and (b) notional exchange gain on year end valuation of foreign currency borrowings.

Income Taxes: We had an income tax expense of Rs.14,772 million in Fiscal 2010, compared to Rs.842 million in Fiscal 2009.

The effective tax rate for Fiscal 2010 was 28.2% of net income before tax as compared to tax expense of 1.4 % of net loss before tax in Fiscal 2009.

- i. In Fiscal 2009, deferred tax asset amounting to Rs 12,071 million was not recognised for losses due to uncertainty of realization.
- ii. Certain foreign currency gains /losses, interest relating to borrowings for investments and loss on conversion option are not tax deductible /gain is not liable to tax. The impact for fiscal 2009 was Rs. 8,682 million (net).
As compared to expected tax expense (considering marginal rates of tax) of 32.6%, the tax expense of Fiscal 2010 was lower at 28.2% of net income before tax mainly due to:

- i. Tax benefit on account of R&D expenses of Rs 3,869 million.
- ii. Sale of investment, other capital gain and fair value of retained equity interest in erstwhile subsidiary not liable to tax / taxed at a lower rate impact Rs.7,314 million in Fiscal 2010.

For further details refer note 16 to our consolidated financial statements.

Non-controlling Interests in Consolidated Subsidiaries and Share of profit of equity accounted investees, net of tax: In Fiscal 2010 share of non-controlling interest was a loss of Rs. 448 million, as compared to loss of Rs. 632 million in Fiscal 2009. This is on account of decreased profitability of our subsidiaries and due to change in accounting policy during the year for allocation of total comprehensive income/losses. Refer Note 2 (v) to our consolidated financial statements.

Net Income/Loss

Our consolidated net income for Fiscal 2010 excluding our non-controlling share was Rs. 38,029 million, compared to net loss of Rs. 60,142 million in Fiscal 2009. Net income as a percentage of total revenues increased to 4.1% in Fiscal 2010 from net loss of 8.3% to total revenues in Fiscal 2009. This increase was the result of the following factors:

A 29.3% increase in vehicle unit sales in Fiscal 2010 compared to Fiscal 2009 resulting to 28.1% increase in sales revenue and better product mix;

a gain on sale of controlling equity interest in subsidiary and further gain from fair valuation of retained interest in Telcon;

a gain on account of exchange fluctuation;

a decrease in raw material cost as a proportion to our total revenues from 69.6% to 68.4%; and

a reduction in other expenses.

Fiscal 2009 Compared to Fiscal 2008

Revenues.

Our total consolidated revenues (net of excise duty, where applicable) including finance revenues were Rs. 722,806 million in Fiscal 2009, an increase of 95.2%, from Rs. 370,255 million in Fiscal 2008. The entire increase in revenue is attributable to the Jaguar Land Rover business. Excluding Jaguar Land Rover there was a decrease of 10.7% in total revenue in Fiscal 2009 compared to Fiscal 2008.

The following is a discussion of our revenues for each of our business segments.

Revenues from Automotive Operations.

Automotive operations constitute the largest proportion of our total revenues. Revenues from automotive operations (before inter-segment elimination) increased by Rs. 354,738 million to Rs. 691,778 million, or 105.3%, from Rs. 337,040 million in Fiscal 2008. While revenue from the Jaguar Land Rover business for the period from June 2, 2008 to March 31, 2009 was Rs. 390,889 million, there was a decline in revenue of Tata and other brand vehicles/spares of 10.7% to Rs. 300,889 million.

This decrease was primarily due to reduction of 13.0% in vehicle unit sold in India and 34.6% decline in sales of vehicles outside of India which was partly offset by vehicle price increase and 14.8% increase in automotive financing revenues.

Table of Contents

Revenues from Other Operations

Revenues (net of excise duty, where applicable) from other operations were Rs. 35,434 million in Fiscal 2009, a decline of 4.5% from Rs. 37,099 million in Fiscal 2008. This decline was mainly due to the sluggish demand experienced by our construction equipment subsidiary, Telcon, on account of the economic slowdown. However, TELCON continues to maintain its market leadership in the Indian excavator market and expanded its offering with new product introductions. With the integration of the INCAT business, TTL consolidated its position as one of the top solutions and software providers of leading engineering and PLM products in all major economic geographies. This business saw revenue growth of 12.1% in Fiscal 2009 compared with Fiscal 2008. Revenues from other operations represented 4.9% and 9.9% of our total revenues, before inter-segment eliminations, in Fiscal 2009 and 2008 respectively.

Cost and Expenses

We acquired the Jaguar land Rover business on June 2, 2008. Consequently the increase in cost and expenses for the fiscal 2009 is not fully comparable with cost and expenses for fiscal 2008.

Raw Materials and Purchase of Products for Sale (including change in stock): Raw material costs as a percentage to sales (excluding finance revenue) was 69.6% in Fiscal 2009 as compared to 70.1% in Fiscal 2008. We consume a number of raw materials in the manufacture of vehicles such as steel, aluminum, copper, precious metals and resins. During Fiscal 2009, the prices of steel, non ferrous and precious metals and rubber witnessed unprecedented increases, in a short period which could be only partially offset by our cost reduction initiatives.

Employee Cost: Our employee cost increased to Rs. 75,200 million in Fiscal 2009 from Rs. 28,764 million in Fiscal 2008. The increase is attributable to differences in salary/wage structure between India and UK/Europe. The increase in our employee cost as a percentage of total revenues increased to 10.4% in Fiscal 2009 from 7.8% in Fiscal 2008, primarily on account of the level of salaries in the UK as expressed in rupees. Several measures to lower the employee cost had been taken, such as block closures, reduction in temporary head count and voluntary retirement.

Other Expenses: Other expenses increased to Rs. 175,614 million in Fiscal 2009 from Rs.57,921 million in Fiscal 2008. As a percentage of revenue these represented 24.3% in Fiscal 2009 compared to 15.6% in Fiscal 2008. The major components of expenses are as follows:

	Year ended March 31,		Increase/(Decrease) (Rs. in millions)
	2009	2008	
Freight and Transportation expenses	24,129	10,472	13,657
Works Operation and Other Expenses	62,055	16,476	45,579
Publicity	26,154	3,475	22,679
Allowance for trade and other receivables and finance receivables	8,525	5,954	2,571
Warranty and product liability expenses	23,862	3,257	20,605

The increase in works operation and other expenses was mainly due to the change in composition and differences in cost structure following our acquisition of Jaguar Land Rover. Also the increase in freight and transportation expenses is attributable to increases in freight rates. Allowances pertaining to finance receivables increased due to general increase in delays/defaults on account of changes in market conditions. The company has stepped up the monitoring process of the delinquent cases. Increase in warranty expense relates to Jaguar Land Rover business and mainly attributable to longer warranty period and higher cost of settlement. The increase in publicity related expenses was mainly due to the new product launches at Jaguar Land Rover and in our Indian operations. We have embarked upon initiatives to reduce our costs across all areas.

Expenditure capitalised: These represent employee costs, store and other manufacturing supplies and other works expenses incurred mainly towards product development projects and also includes costs attributable to internally constructed capital items.

Depreciation and Amortization: Our depreciation and amortization cost increased to Rs.28,040 million in Fiscal 2009, compared to Rs.8,276 million in Fiscal 2008. The increase reflects significant increase in our asset base by way of expansion, product development and acquisition.

Gain on sale of controlling equity interest in subsidiary: Gain on sale of controlling equity interest in subsidiary increased to Rs. 1,405 million in fiscal 2009 as compared to Rs.148 million in fiscal 2008. This increase mainly relates to gain on sale of controlling interest in our subsidiary (TACO).

Table of Contents

Other income (net): Our other income increased to Rs.14,295 million in Fiscal 2009, compared to Rs.7,530 million in Fiscal 2008. The increase is mainly due to gain on sale of investments of Rs. 6,058 million in Fiscal 2009. It also includes gain due to change in fair value conversion option of Rs. 2,807 million for Fiscal 2009 and Rs.3,156 million for Fiscal 2008.

Interest expense (net): We availed a bridge loan of US \$ 3 billion for our acquisition of Jaguar Land Rover in Fiscal 2009. We had plans to prepay the bridge loan from the proceeds of fresh issuance of capital, divestments and internal cash generation. Due to the sudden deterioration in the economic environment, affecting our cash flows, we had to borrow further to finance our capital expenditure plans and working capital requirements. In order to support our vehicle sales, we increased our vehicle financing to customers, which, in turn, required additional borrowings. As a result of the above, total borrowings increased from Rs. 220,348 million in Fiscal 2008 to Rs. 435,815 million in Fiscal 2009. Further, there was a significant increase in borrowing rates in Fiscal 2009.

Foreign exchange (gain)/loss (net): We incurred a foreign exchange loss of Rs.48,143 million in Fiscal 2009, compared to a gain of Rs.1,902 million in Fiscal 2008. A significant portion of the exchange losses in the Fiscal 2009 reflect (a) exchange loss on foreign currency borrowing; (b) notional exchange loss on year end valuation of foreign currency borrowings; and (c) the Jaguar Land Rover business and the Indian operations suffered foreign exchange losses on account of fluctuations in US Dollar, GBP, Euro and Rupee during the year.

Income Taxes: We had an income tax expense of Rs.842 million in Fiscal 2009, compared to Rs. 9,470 million in Fiscal 2008. The effective tax rate for Fiscal 2009 was tax expense of 1.4% of net loss before tax as compared to 28.9% of net income before tax in Fiscal 2008.

- i. In Fiscal 2009, deferred tax asset amounting to Rs 12,071 million was not recognised for losses due to uncertainty of realization.
- ii. Certain foreign currency gain /loss, interest relating to borrowings for investments are not tax deductible /gain is not liable to tax. The impact for fiscal 2009 was expense (net) of Rs. 8,682 million as compared to tax benefit of Rs. 189 million in Fiscal 2008.
- iii. Tax benefit on account of R&D expenses of Rs 2,022 million for Fiscal 2009 as compared to Rs. 1,925 million in Fiscal 2008.
- iv. Sale of investment, other capital gain not liable to tax / taxed at a lower rate; Rs.1,733 million in Fiscal 2009 as compared to Rs.430 million in Fiscal 2008.

For further details refer note 16 to our consolidated financial statements.

Non-controlling Interests in Consolidated Subsidiaries and Share of profit of equity accounted investees, net of tax: In Fiscal 2009 share of non-controlling interest was a loss of Rs. 632 million, as compared to a gain of Rs. 1,226 million in Fiscal 2008. This is due to a decrease in profitability of some of our subsidiaries and losses incurred in a few subsidiaries which started operations in Fiscal 2008. Share of loss of equity method investees was Rs.3,464 million in Fiscal 2009, compared to a profit of Rs.52 million in Fiscal 2008. This change was primarily due to our proportionate share of loss in some of our affiliates, which are yet to scale operations, and also the impact of a slowdown in the automotive industry.

Net Income/Loss

Our consolidated net loss for Fiscal 2009 excluding the share of non-controlling interests was Rs.60,142 million, compared to net income of Rs.21,977 million in Fiscal 2008. This decline was the result of the following factors:

a sharp decline in sales volumes at our Indian and Jaguar Land Rover operations;

a significant increase in interest expenses; and

losses on account of exchange fluctuation.

Recent Accounting Pronouncements

Please refer to Note 2 (v) to our Consolidated Financial Statements for adopted and yet to be adopted accounting pronouncements as of March 31, 2010.

Critical Accounting Policies

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected. In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

Table of Contents

Impairment of Goodwill

Cash generating unit to which goodwill is allocated are tested for impairment annually at each balance sheet date, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to that unit and then to the other assets of the unit pro rata on the basis of carrying amount of each asset in the unit. Goodwill impairment loss recognized is not reversed in subsequent period.

Impairment of property, plant and equipment and intangible assets

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier, if there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of operations.

Table of Contents

Product Warranty

Vehicle warranties are provided for a specified period of time. Our vehicle warranty obligations vary depending upon the type of the product, geographical location of its sale and other factors.

The estimated liability for vehicle warranties is recorded at the time products are sold. These estimates are established using historical information on the nature, frequency, and average cost of warranty claims and our estimates regarding possible future incidence based on actions on product failures.

Changes in warranty liability as a result of changes in estimated future warranty costs and any additional costs in excess of estimated costs, can materially affect our net income. Determination of warranty liability is based on the estimated frequency and amount of future claims, which are inherently uncertain. Our policy is to continuously monitor warranty liabilities to determine the adequacy of our estimate of such liabilities. Actual claims incurred in the future may differ from our original estimates, which may materially affect warranty expense.

Employee Benefits

Employee benefit costs and obligations are dependent on assumptions used in calculating such amounts. These assumptions include salary increase, discount rates, health care cost trend rates, benefits earned, interest cost, expected return on plan assets, mortality rates and other factors.

While we believe that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect our employee benefit costs and obligations.

Recoverability/recognition of deferred tax assets

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Conversion options valuation

Fair value of conversion option in foreign currency convertible notes is determined using various option valuation models such as Black Scholes Merton model, Cox Ross Rubinstein model and Monte Carlo simulation. Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any valuation technique. Changes in fair valuation of conversion option could have material impact on the results of the Company. However, there are no direct cash flow consequences.

Property, plant and equipment

Property, plant and equipment as of March 31, 2010 includes building under construction of Rs 3,157.1 million for the purposes of manufacturing automobiles. Consequent to the decision to relocate and construct a similar manufacturing facility at another location, the management is in the process of evaluating several options, under all of which, no adjustment to the carrying amount of the building is considered necessary.

B. Liquidity and Capital Resources

We finance our capital requirements through cash generated from operations, debt, and equity we also raise funds through sale of investments including divestment in stakes of subsidiaries on a selective basis. As of March 31, 2010, our borrowings (including short term debt) were Rs. 423,152 million compared with Rs. 435,815 million as on March 31, 2009. For our loan maturity profile, see Liabilities and Sources of Financing .

We believe that we have sufficient resources available to us to meet our planned capital requirements. However, our sources of funding could be adversely affected by an economic slowdown or other macroeconomic factors in India and abroad, which are beyond our control. A decrease in the demand for our products and services could lead to an inability to obtain funds from external sources on acceptable terms or in a timely

manner or at all.

Table of Contents

In order to refinance our acquisition related borrowings and for supporting long term fund needs, we continued to raise funds in fiscal 2010 through issue of various equity, equity linked and debt securities. In May 2009, we issued debentures of Rs. 42,000 million with maturities ranging from 23 months to 83 months. In October 2009 we issued new equity shares in the form of Global Depository Shares aggregating to US\$ 375 million and simultaneously issued 4% unlinked convertible notes aggregating US\$ 375 million. We raised Rs. 9,529 million raised through divestment of investments which were used to prepay the entire outstanding acquisition related borrowing of US\$ 2 billion by October 2009, ahead of the stipulated timeline.

Additionally during fiscal 2010 we concluded the arrangement of facilities from third parties for working capital requirements at Jaguar Land Rover which was acquired in fiscal 2009 on a cash free debt free basis. Jaguar Land Rover has also availed of an 8 year amortising loan of GBP338 million from the European Investment bank, guaranteed by commercial banks and the loan was granted under the European Clean Transport Facility. The loan will be used for product development programs aimed at lowering CO₂ emissions.

While global credit markets witnessed an improvement in liquidity and risk aversion, following the exceptional circumstances of fiscal 2009, the recent events of the European sovereign crisis present a continued element of uncertainty. Our strategy is aimed to ensure that we have sufficient funding available with high degree of certainty throughout the business cycle. We have set up plans for aggressive cost reduction to improve generation of operating cash and also raising of funds through a combination of capital market intervention and divestment of investments.

Cash Flow Data

The following table sets forth selected items from our consolidated statements of cash flows for the periods indicated and shows the percentage change between periods.

	Rs. in million			Percentage change	
	2010	2009	2008	2009 to 2010	2008 to 2009
Net Cash provided by Operating Activities:	128,365	25,194	23,114	409.5%	9.0%
Net income/ (loss) after tax	37,581	(60,774)	23,203		
Adjustments to net income/ (loss) after tax	68,060	93,676	31,512		
Changes in Operating Assets and Liabilities	35,047	(2,040)	(24,748)		
Income tax paid	(12,323)	(5,668)	(6,853)		
Net Cash used in Investing Activities	(75,981)	(162,380)	(87,362)	-53.2%	85.9%
Purchase of Property, Plant and Equipment and Intangible Assets (Net)	(81,404)	(88,857)	(50,295)		
Net Investment, short term deposit , margin money and loans given	(8,327)	7,381	(30,361)		
Proceeds from sale of controlling/ equity ownership interest in subsidiary, net of cash	11,145	1,379	1,994		
Acquisitions	(426)	(98,644)	(90)		
Realization (deposit) of foreign currency deposit with banks		11,338	(11,224)

Effect of foreign exchange on cash flows	(5,782)	(6,840)	20		
Cash and cash equivalents, beginning of the year	22,827	11,416	7,655		
Cash and cash equivalents, end of the year	63,463	22,828	11,416		

See consolidated statement of cash flows on Pages F-7 and F-8 for details.

2010 compared to 2009

Our cash flow statement for Fiscal 2009 includes activities pertaining to acquired businesses of Jaguar Land Rover , Serviplem S.A and Comoplesa Lebrero S.A from the respective dates of acquisition and are not comparable to that extent with Fiscal 2010.

Table of Contents

Net cash provided by operating activities was Rs. 128,365 million and Rs. 25,194 million in fiscal 2010 and 2009 respectively. Our net income as adjusted for non-cash and other items increased to Rs. 105,642 million in fiscal 2010 from Rs. 32,902 million in Fiscal 2009. This was largely due to a strong growth in revenue and profitability in fiscal 2010.

There was net change in operating assets and liabilities of 35,047 million in fiscal 2010 which has contributed to cash increase. For fiscal 2009, there was a net cash decrease of Rs. 2,039 million.

In fiscal 2010, the accounts payable and acceptances increased by Rs. 43,083 million and Rs. 26,073 million respectively, mainly due to increase in manufacturing activity and production volumes and the finance receivables lowered by Rs. 6,833 million primarily due to improvement in the processes relating to disbursement and collections. These changes contributed to cash increase.

The above increase in cash was partly offset by increase in the trade receivables and inventory of Rs.25,532 millions and Rs.19,173 million in fiscal 2010, The increase primarily relate to volume growth.

Increase in trade receivables amounting Rs. 25,532 million due to increase in sales volume.

Increase in inventories to Rs.19,173 million mainly on account of increased production due to higher sales volume.

Net cash used in investing activities decreased to Rs.75,981 million in Fiscal 2010 from Rs.162,380 million in Fiscal 2009.

Net cash used was purchase of Property, Plant and Equipment and Intangible Assets was Rs. 81,404 million for fiscal 2010 against Rs. 88,857 million for fiscal 2009. Our capital expenditure relates mostly to capacity expansion of our production facilities especially extension of our Jamshedpur production facilities for Prima, upgrading the production facilities at Castle Bromwich and Solihull for new products and product development costs for proposed / new product launches as well as on quality and reliability improvement projects.

In Fiscal 2010, Rs. 11,145 million were realized from the sale of 20% of the shares in our subsidiary (Telcon) and we sold available for sale investments, which released Rs.10,057 million, this mainly represent sale of our shares in Tata Steel. In Fiscal 2009 we sold investments, which released Rs.16,125 million, these mainly represent sale of our shares in Tata Steel, TCS, Tata Teleservices.

In Fiscal 2010 we made purchase of available for sale investments of Rs. 9,896 million, mainly in mutual funds (classified as available for sale).

Payment made for the Jaguar Land Rover and Serviplem acquisitions during Fiscal 2009 was Rs. 98,644 million (net of cash acquired).

Net cash outflow from financing activities was Rs.5,966 million for fiscal 2010 and for fiscal 2009 there was inflow of Rs.155,437. The following are the major changes in financing during Fiscal 2010.

GDSs issue net of issue expenses resulted in cash inflow of Rs. 17,231 million. (Rights issue of shares net of issue expenses. (Rs. 41,097 million in fiscal 2009)

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Net repayment of short term borrowings was Rs. 45,527 million in fiscal 2010 as compared to net short term borrowing of Rs. 145,965 million in fiscal 2009. In fiscal 2009 the short term bridge of Rs.127,223 million was raised, and Rs.48,778 million was repaid during fiscal 2009. In Fiscal 2010, Rs. 48,229 million was repaid and the tenure of the balance bridge loan was amended extending the final maturity by 18 months upto December 31, 2010. This bridge loan of Rs. 47,240 million has been fully repaid during fiscal 2010.

We paid interest of Rs.34,842 million.(Rs.32,047 million in fiscal 2009)

2009 compared to 2008

Our cash flow statement for Fiscal 2009 includes activities pertaining to acquired businesses of Jaguar Land Rover, Serviplem S.A and Comoplesa Lebrero S.A. from the respective dates of acquisition.

Net cash provided by operating activities was Rs. 25,194 million and Rs.23,114 million in Fiscal 2009 and 2008, respectively. Our net income as adjusted for non-cash and other items declined to Rs.32,902 million in Fiscal 2009 from Rs. 54,715 million in Fiscal 2008. Sudden and significant deterioration of the world economy, resulting in a significant decline in sales volumes, adversely affected our income and operating cash flows.

The following factors contributed to cash decrease on account of change in operating assets and liabilities of Rs. 2,040 million in 2009.

Decrease in other current liabilities amounting Rs. 45,615 million due to reduction in manufacturing activity.

Table of Contents

The above decrease was partially offset by the following factors:

Decrease in trade receivables amounting Rs. 19,487 million due to decrease in sales volume.

Decrease in inventories amounting Rs. 15,049 million mainly on account of reduction actions and reduction in manufacturing activity due to lower sales volume.

Net cash used in investing activities increased to Rs.162,380 million in Fiscal 2009 from Rs. 87,362 million in Fiscal 2008, mainly on account of our acquisition of Jaguar Land Rover and investments in property, plant and equipment as highlighted below:

Payment made for the Jaguar Land Rover and Serviplem acquisitions during the year was Rs. 98,644 million (net of cash acquired).

Purchase of property, plant and equipment and expenditure on intangible assets (product development projects) in Fiscal 2009 were Rs. 47,608 million and Rs. 42,082 million respectively. Our capital expenditure relates mostly to capacity expansion of our production facilities, especially at Uttarakhand and Pune, setting up the facility at Sanand and the introduction of new products, quality and reliability improvement projects.

In Fiscal 2009, we sold available for sale investments and equity interests in subsidiaries, which resulted in a cash inflow of Rs.16,125 million and Rs. 1,379 million respectively. These mainly represent sale of our shares in Tata Steel, TCS, Tata Teleservices and our former subsidiary Tata AutoComp Systems Limited (TACO).

A foreign currency deposit of Rs. 11,338 million was encashed during Fiscal 2009 for acquisition investment. Net cash inflow from financing activities was Rs. 155,437 million and Rs. 67,989 million in Fiscal 2009 and 2008 respectively. Our acquisition of Jaguar Land Rover during Fiscal 2009 and the impact on operating results due to economic downturn affected our financing. The following are the major changes in financing during Fiscal 2009.

Rights issue of shares net of issue expenses were Rs. 41,097 million.

Net change in short term borrowings was Rs. 145,965 million . This mainly relates to the bridge loan for the Jaguar and Land Rover acquisition.

We paid interest of Rs. 32,047 million.

Certain of our subsidiaries and equity method affiliates have contractual and other limitations in respect of their ability to transfer funds to us in the form of cash dividends, loans or advances. However this has not had and is not expected to have any impact on our ability to meet our cash obligations.

Balance Sheet Data

Total assets were Rs. 909,181 million and Rs. 782,629 million and as of March 31, 2010 and 2009, respectively. The increase of Rs. 126,552 million represents the following.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The total current assets have increased by Rs. 84,931 million. The increase (net of depreciation and amortization) in the Property, Plant and Equipment and Intangible assets, was Rs. 32,936 which represent our capital expenditure towards expansion and set up of new facilities and product development projects.

As of March 31, 2010, we had cash and cash equivalents of Rs.63,463 million, compared to Rs.22,827 million as of March 31, 2009. This increase is mainly due to surplus cash at Jaguar Land Rover. Cash and cash equivalents includes Rs. 2,232.6 million as of March 31, 2010 held by a subsidiary that operates in a country where exchange control restrictions prevent the balances being available for general use by Tata Motors Limited and other subsidiaries.

Finance receivables (net of allowances) including non-current portions were Rs. 147,143 million as of March 31, 2010 compared to Rs.158,803 million as of March 31, 2009, primarily due to improvement in the processes relating to disbursement and collections. For further detail see Finance Receivables .

As of March 31, 2010, inventories stood at Rs. 110,675 million compared to Rs. 107,956 million as of March 31, 2009, the increase is attributable to greater volumes.

Trade receivables increased by 35.7% to Rs. 70,169 million as of March 31, 2010 from Rs.51,697 million as of March 31, 2009 due to higher volumes and higher value product sold.

Table of Contents

Our investment portfolio (short term and long term investments) increased from Rs. 9,265 million as of March 31, 2009 to Rs. 17,240 million as of March 31, 2010, primarily due to purchase of available for sale investments mainly including mutual funds and increase in fair values thereof.

Our investments in equity accounted investees increased from Rs.8,012 million as of March 31, 2009, to Rs. 27,299 million as of March 31, 2010. The increase is mainly due to gain of Rs. 16,994 million recognized on fair valuation of the balance (40%) of our stake in Telcon which is now accounted for as an associate.

Our other current assets increased from Rs. 26,826 million as of March 31, 2009 to Rs. 38,125 million as March 31, 2010. The increase is attributable to an increase in tax recoverable and statutory deposits.

Our other financial assets including non-current financial assets increased from Rs. 29,678 million as of March 31, 2009 to Rs. 33,532 million as of March 31, 2010. The increase is due to an increase in restricted deposits.

Total shareholders' equity was Rs. 102,223 million and Rs. 38,726 million as of March 31, 2010 and 2009, respectively. We raised US\$375 million (Rs.17,231 million inclusive of Rs.16,932 million of additional paid up capital, net of issue expenses) through the issue of Global Depository Receipts, or GDRs. In addition, we had offered to non-U.S. noteholders of outstanding 0% JPY 11,760 million (due 2011), or JPY 2011 Notes, and 1% US\$300 million (due 2011) convertible notes, or US\$ 2011 Notes, an option to convert their notes into Ordinary Shares at enhanced conversion ratios during a limited offer period. Noteholders representing 93.46% of the outstanding JPY 2011 Notes, or JPY 10,710 million principal amount, and 76.54% of US\$ 2011 Notes, or US\$229.63 million principal amount, outstanding prior to the offering, opted to convert their notes into Ordinary Shares. As a result, we allotted 26,643,266 equity shares to the noteholders, who exercised the option. As a result of this process, Rs.21,241 million of convertible notes were converted into equity and decreased our debt.

Our reserves changed from a deficit of Rs.28,004 million as of March 31, 2009, to a surplus of Rs. 4,224 million as of March 31, 2010, mainly due to net income of Rs. 37,581 million for fiscal 2010 as compared to a net loss of Rs.60,774 million for fiscal 2009.

Our total debt stood at Rs. 423,152 million as of March 31, 2010 compared to Rs. 435,815 million as of March 31, 2009. Short term debt including the current portion of long-term debt was Rs. 218,754 million as of March 31, 2010 compared to Rs. 319,629 million as of March 31, 2009. Short term debt excluding current portion decreased by 99,991 million mainly due to repayment of bridge loan. Certain loans from banks availed by some of the subsidiary companies carry covenants restricting repayment of intra group loans and payment of dividend.

The long-term debt, excluding the current portion, increased to Rs. 204,397 million as of March 31, 2010 from Rs. 116,186 million as of March 31, 2009. The long term debt excluding the current portion increased by 88,211 million, as a result of issue of 2% Non-convertible debentures of Rs. 42,000 million for repayment of debt incurred in connection with acquisition of Jaguar Land Rover. Fixed deposits from public and shareholders (unsecured) increased by Rs.20,867 million from Rs.12,153 million as of March 31, 2010. There was an increase in loans taken from bank to Rs. 45,960 million as on March 31, 2010 from Rs.17,183 million as on March 31, 2009.

Current liabilities other than short-term debt increased by Rs. 67,604 million in Fiscal 2010 due to increase in accounts payable, acceptances and other current liabilities. Increase in acceptances is attributable to an increase in production volumes.

Liabilities and Sources of Financing

We fund our short-term working capital requirements with cash generated from operations, overdraft facilities with banks, short and medium term borrowings from lending institutions, banks and commercial paper. The maturities of these short and medium term borrowings and debentures are generally matched to particular cash flow requirements. We had short-term borrowings (including the current portion of long-term debt) of Rs. 218,754 million and Rs. 319,629 million as of March 31, 2010 and 2009 respectively. We had unused short-term credit facilities of Rs. 90,956 million and Rs.19,822 million as of March 31, 2010 and 2009, respectively.

During the year the working capital limits from consortium banker has been increased to Rs. 120,000 million from previous working capital limits of Rs. 80,000 millions. The working capital limits are secured by hypothecation of existing current assets of the company viz. stock of raw material, stock in process, semi-finished goods, stores and spares not relating to plant and machinery (consumable stores and spares), bills receivables and book debts including vehicle finance receivable and all other moveable current assets except cash and bank balances, loans and advances of the company both present and future. The working capital limits are renewed annually.

Table of Contents

On April 27, 2004, we had raised US\$300 million by way of 1% convertible notes due in 2011, the US\$ 2011 Notes. The noteholders has an option to convert these notes into Ordinary Shares or ADSs determined at an initial conversion price of Rs.780.40 per Share at a fixed rate of conversion of Rs.43.85 per US\$1.00, from and including June 7, 2004 to and including March 28, 2011. The conversion price of the notes was reset to a price of Rs.736.72 per Share at a fixed rate of conversion of Rs.43.85 per US\$1.00, on account of our rights issue in fiscal 2009 and GDS issue in fiscal 2010. The conversion price remains subject to certain adjustments. In the event of certain changes affecting taxation, we have an option to redeem in whole but not in part, these notes at any time. Unless previously converted, redeemed or purchased and cancelled, these notes will be due for redemption on April 27, 2011 at 121.781% of the principal amount. During fiscal 2010, we offered to non-U.S. noteholders an option to convert their US\$ 2011 Notes into Ordinary Shares during a limited offer period from March 23, 2010 to March 29, 2010. Noteholders, who did not participate, would continue with all the terms of their Notes as applicable prior to this limited period offer. During this period, as per the terms of invitation memorandum, noteholders could opt to receive shares at enhanced conversion terms. Noteholders representing 76.54% of the outstanding notes, or US\$229.63 million principal amount, opted to convert their US\$ 2011 Notes into Ordinary Shares. Following the conversion, the remaining 70,366 outstanding US\$ 2011 Notes may at the option of the noteholders be converted into 4,188,225 ADSs or Ordinary Shares at any time up to March 28, 2011.

In March 2006, we issued JPY11,760 million (Rs.4,500.3 million) zero coupon convertible notes due in 2011, the JPY 2011 Notes. The noteholders have an option to convert these notes into Ordinary Shares or ADSs determined at an initial conversion price of Rs.1,001.39 per Share with a fixed rate of exchange on conversion of Rs.1.00 per JPY2.66, from and including May 2, 2006 to and including February 19, 2011. The conversion price of the notes was subsequently reset to a price of Rs.945.34 per share at a fixed rate of conversion of Rs.1.00 per JPY2.66, on account of our rights issue in fiscal 2009 and GDS issue in fiscal 2010. The conversion price remains subject to certain adjustments. Further, we have a right to redeem in whole, but not in part, these notes at any time on or after March 20, 2009 but prior to February 8, 2011, subject to certain conditions. In the event of certain changes affecting taxation, we have an option to redeem these notes, in whole but not in part, at any time. Unless previously converted, redeemed or purchased and cancelled, these notes will be due for redemption on March 21, 2011, at 99.253% of the principal amount. In fiscal 2009, we bought and cancelled 30 JPY 2011 Notes (principal value of JPY300 million). During fiscal 2010, we offered to non-U.S. noteholders, an option to convert their JPY 2011 Notes into Ordinary Shares during a limited offer period from March 23, 2010 to March 29, 2010. Noteholders, who did not participate, would continue with all the terms of their Notes as applicable prior to this limited period offer. During this period, as per the terms of invitation memorandum, noteholders could opt to receive Shares at enhanced conversion terms. Noteholders representing 93.46% of the outstanding JPY 2011 Notes, or JPY 10,710 million outstanding principal amount, opted to convert their notes into Ordinary Shares. Following the conversion, the remaining 75 outstanding JPY 2011 Notes may at the option of the noteholders be converted into 298,258 ADSs or Shares at any time up to February 19, 2011.

In July 2007, we raised funds aggregating USD 490 million (Rs.19,927.1 million at issue) by issue of Zero Coupon Convertible Alternative Reference Securities, or CARS due on July 12, 2012, which allows us to give the note holders an option to convert the CARS into qualifying securities as per the terms of issue after appropriate adjustment to the conversion price. If we do not exercise this option, the conversion may be made by the note holders from and including October 11, 2011 to and including June 12, 2012, into ordinary shares or ADSs at an initial conversion price of Rs. 960.96 per share (equivalent to USD 23.67 at a fixed rate of exchange on conversion of Rs. 40.59 per USD) which is subject to adjustment in certain circumstances. The conversion price of the notes was reset to a price of Rs 907.87 per share on account of our rights issue in fiscal 2009 and further to a price of Rs 907.17 per share on account of our GDS issue in fiscal 2010, at a fixed rate of conversion of Rs. 40.59 per USD. We have a right to redeem in whole, but not in part, these Notes at any time on or after October 11, 2011, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled as per the terms of issue, these will be redeemed on July 12, 2012 at 131.82% of the outstanding principal amount. During fiscal 2009, we bought and cancelled 170 Notes (Principal value of USD 17 million). There are no conversion during fiscal 2010.

Further, as of March 31, 2010, 4,730 outstanding Notes may at the option of the note holders be converted into 21,163,696 ADSs or shares at any time from and including October 11, 2011 to and including June 12, 2012.

On June 2, 2008, we completed the acquisition of Jaguar Land Rover business for purchase consideration of US\$2.5 billion in an all cash transaction from Ford, which in turn contributed approximately US\$600 million to the Jaguar Land Rover business pension plans. The purchase consideration paid by JaguarLandRover Limited was financed through a capital contribution of US\$500 million and a short-term bridge loan of US\$3 billion from a group of lenders. We repaid US\$2 billion upto end of May, 2009 and amended the balance acquisition finance facility of US\$1 billion, which may be drawn in US dollars and Euros to be repaid in four tranches by December 2010. We have repaid all the US dollars and Euro tranches of the loan as of October 2009, 14 months prior to the last tranche which was due in December 2010, the due date of the last tranche.

In October 2008, we raised an aggregate of Rs.41,393.3 million through a simultaneous but unlinked rights issue of (i) 64,276,164 Ordinary Shares of Rs.10 each at a premium of Rs.330/- per share aggregating Rs.21,853.9 million in the ratio of one Ordinary Share for every six Ordinary Shares; and (ii) 64,276,164 A Ordinary Shares of Rs.10 each at a premium of Rs.295 per A Ordinary Share aggregating Rs.19,604.2 million in the ratio of one A Ordinary Share for every six ordinary shares. Proceeds of rights issue were used to prepay part of bridge loan drawn

taken for the acquisition of the Jaguar Land Rover business.

Table of Contents

In May 2009, we raised resources through further divestments and issued secured non-convertible credit enhanced rupee debentures in four tranches, having tenors up to seven years, aggregating Rs.42,000 million on a private placement basis. Proceeds were used to prepay part of the short-term bridge loan taken for the acquisition of the Jaguar Land Rover business.

In October 2009, we issued 29,904,306 new equity shares in the form of Global Depositary Shares, or GDSs, at a price of US\$12.54 per GDS, aggregating US\$375 million and 4% convertible notes due 2014, aggregating US\$375 million (Rs.17,941.9 million at time of issue). The noteholders of the 4% notes due 2014 have an option, subject to the terms and conditions of the issue, to convert these notes into Ordinary Shares or GDSs or ADSs. The conversion may be made by the noteholders, in the case of Shares or GDSs, at any time during the period from and including November 25, 2009 to and including October 9, 2014 and, in the case of ADSs, at any time from and including October 15, 2010 to and including October 9, 2014, at an initial conversion price of Rs. 623.88 per Share (equivalent to USD13.48 per share at a fixed rate of exchange on conversion of Rs. Rs.46.28 = US\$1.00) that is subject to adjustment in certain circumstances. The conversion price of the notes were subsequently reset to a price of Rs.613.77 per Ordinary share at a fixed rate of exchange of Rs. 46.28 = US\$ 1.00, as a result of the enhanced conversion offer and payment of dividend for fiscal 2010, with effect from September 4, 2010. We have the right to redeem in whole, but not in part, these notes at any time on or after October 15, 2012, subject to certain conditions. In the event of certain changes affecting taxation, we have an option to redeem these notes, in whole but not in part, at any time. Unless previously converted, redeemed or purchased and cancelled as per the terms of issue, these notes will be redeemed on October 16, 2014 at 108.505% of the outstanding principal amount. There has been no conversion during fiscal 2010. We utilized the above proceeds to repay the outstanding bridge loan.

Following the conversion 3,750 outstanding notes may at the option of the Note holders be converted into 28,276,064 GDSs or shares at any time up to October 9, 2014 and into 28,276,064 ADSs at any time from and including October 15, 2010 to and including October 9, 2014.

In February 2010, Jaguar Land Rover obtained loan of GBP 338 million from European Investment Bank (EIB). The loan is to finance development of micro and full hybrid drive trains and research into more energy efficient car bodies by Jaguar Land Rover. The loan is structured with guarantee support from banks.

Principal Sources of Funding Liquidity

The Company has access to funds from debt markets through commercial paper programs, non convertible debentures, fixed deposits from public and other debt instruments. The Company also constantly monitors funding options available in the debt and capital markets with a view to maintaining financial flexibility. The funding requirements are met through a mixture of equity, convertible or non-convertible debt securities and other long-term/short-term borrowings. The Company's policy is aimed at combination of short-term and long-term borrowings.

The Company is also pursuing alternatives for meeting its long term funding requirements.

See Note 38 of our audited consolidated financial statements for additional disclosures on financial instruments related to liquidity, foreign exchange and interest rate exposures and use of derivatives for risk management purpose.

The following table sets forth our short-term and long-term debt position:

	Fiscal 2010	Fiscal 2009
	(Rs. in millions)	
Total short-term debt (excluding current portion of long-term debt)	151,262	251,253
Total current portion of long-term debt	67,493	68,376
Long-term debt net of current portion	204,397	116,186
Total Debt	423,152	435,815

During Fiscal 2010 and 2009, the effective weighted average interest rate on our long-term debt was 9.43% and 9.39% per annum, respectively.

Table of Contents

The following table sets forth a summary of the maturity profile for our outstanding long-term debt obligations as of March 31, 2010.

Payments Due by Period	Rs. in millions
Within one year	67,493
After one year and up to two years	54,904
After two year and up to five years	120,080
After five year and up to ten years	29,414
Total	271,891

Some of our financing agreements and debt arrangements set limits on and / or require prior lender consents for, among other things, undertaking new projects, issuing new securities, changes in management, mergers, sale of undertakings and investment in subsidiaries. In addition, certain financial covenants may limit our ability to borrow additional funds or to incur additional liens.

Certain of our financing arrangements also include covenants to maintain certain debt-to-equity ratios, debt-to-earnings ratios, liquidity ratios, capital expenditure ratios and debt coverage ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. Our ability to raise additional debt in the future is subject to a variety of uncertainties including, among other things, economic and other conditions in India that may affect investor demand for our securities and those of other Indian entities, our financial condition and results of operations.

As a result of our increase in our long-term debt during Fiscal 2010 as compared to Fiscal 2009, the ratio of net debt to shareholders' equity (total debt less cash and cash equivalents and liquid marketable securities divided by total shareholders' equity) under IFRS decreased from 10.6 as of March 31, 2009 to 3.4 as of March 31, 2010. Details of the calculation of this ratio are set forth in Exhibit 7.1 to this annual report.

(1) The following table sets forth our contingent liabilities as of the dates indicated.

	Fiscal 2010	Fiscal 2009
	(Rs. in millions)	
Income Tax	4,330	4,454
Excise Duties	2,429	1,821
Sales Tax	4,867	5,424
Other Taxes and Claims*	1,312	2,045
Other Contingencies	270	54
Total	13,208	13,798

* Other taxes and claims include claims by other revenue authorities and distributors. See Item 4.B Business Overview Legal Proceedings , of this annual report.

(2) Rs 26,761 million and Rs.43,899 million in Fiscal 2010 and 2009, respectively, represent executory contracts on capital accounts otherwise provided for.

On an ongoing basis, our legal department reviews pending cases, claims by third parties against us and other contingencies. For the purposes of financial reporting, we periodically classify these matters into gain contingencies and loss contingencies. Gain contingencies are not recognized until the contingency has been resolved and amounts are received or receivable. For loss contingencies that are considered probable, an estimated loss is recorded as an accrual in our accounts and, if the matter is material, the estimated loss is disclosed in our financial statements. We do not consider any of these matters to be individually sufficiently material to warrant disclosure in our financial statements. Loss contingencies that are considered possible are not provided for in our financial statements, but if we consider such contingencies to be material, individually or in the aggregate, they are disclosed in our financial statements. Most loss contingencies are classified as possible unless clearly frivolous, in which case they are classified as remote and are monitored by our legal department on an ongoing basis for possible deterioration. We do not disclose remote matters in our financial statements. See note 36 of our audited consolidated financial statements for additional information regarding our material claims and contingencies.

Table of Contents

Since fiscal 1997, we have been benefited from participation in the Export Promotion Capital Goods Scheme, or the EPCG Scheme, which permits us to import capital equipment under a special license at a substantially reduced customs duty. Our participation in this scheme is subject to us fulfilling an obligation to export goods manufactured or produced by the use of capital equipment imported under the EPCG Scheme to the value of a multiple of the cost of insurance and freight value of these imports or customs duty saved over a period of 6, 8 & 12 years from the date of obtaining the special license. We currently hold 67 licenses that require us to export our products of a value of approximately Rs.117.83 billion between 2002 and 2017, and we carefully monitor our progress in meeting our incremental milestones. After fulfilling some of the export obligations, we have remaining obligations to export products of a value of approximately Rs.11.19 billion by March 2017. In the event that the export obligation under the EPCG Scheme is not fulfilled, we would have to pay the differential between the reduced and normal duty on the goods imported along with interest. In view of our past record of exceeding our export milestones, and our current plans with respect to our export markets, we do not currently foresee any impediments to meeting our export obligation in the required time frame.

Tata and other brand vehicles Sales and Distribution:

Through our vehicle financing division and wholly owned subsidiary, Tata Motors Finance Limited, or TMFL we also provide financing services to purchasers of our vehicles through our independent dealers, who act as our agents, and through our branch network. During Fiscal 2009 and 2010 approximately 31% and 25% of our vehicle unit sales in India were made by the dealers through financing arrangements where our captive vehicle financing divisions provided the credit. Total vehicle finance receivables outstanding as at March 31, 2010 and 2009 amounted to Rs.147,143 million and Rs.158,803 million respectively.

Finance Receivables

In Fiscal 2010 and 2009 25% and 31% respectively, of our sales volumes were financed under loan contracts to our dealer's customers. As of March 31, 2010, 2009 and 2008 our customer finance receivable portfolio comprised 615,616 and 588,055 contracts, respectively, with gross finance receivable of approximately Rs. 184,143 million and 195,445 million respectively. We follow specified internal procedures including quantitative guidelines for selection of our finance customers to assist in managing default and repayment risk in our portfolio. We originate all the contracts through our authorized dealers and direct marketing agents with whom we have agreements. All our marketing, sales and collection activities are undertaken through dealers or directly by us including our division known as Tata Motor finance and our subsidiary company Tata Motors Finance Limited.

We securitize or sell most of our finance receivables in the normal course of business. We undertake a sale of the receivables in respect of finance agreements due from pools of purchasers. The constitution of these pools is based on criteria that are decided by credit rating agencies and/or based on the advice that we receive as to the marketability of a pool. We undertake these securitizations of our receivables in either or both of the following forms:

assignment of the receivables due from purchasers under hire-purchase / loan agreements; and

securitization of receivables due from purchasers by means of private placement.

We act as collection agent on behalf of the investors, representatives, special purpose vehicles or banks in whose favor the receivables have been assigned, for the purpose of collecting receivables from the purchasers on the terms and conditions contained in the applicable deeds of securitization in respect of which pass-through certificates are issued to investors in case of special purpose vehicles, or SPVs. We also secure the payments to be made by the purchasers of amounts constituting the receivables under the hire-purchase/loan agreements to the extent specified by rating agencies by any one or all of the following methods:

by furnishing to the investors collateral, in respect of the obligations of the purchasers and the undertakings to be provided by us;

by furnishing, in favor of the investors, 9% to 37% of the gross receivables as cash collateral either by way of a fixed deposit or bank guarantee to secure the obligations of the purchasers and our obligations as the collection agent, based on the quality of receivables and rating assigned to the individual pool of receivables by the rating agency (ies); and

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

by way of over-collateralization or by investing in subordinate pass-through certificates to secure the obligations of the purchasers. For further details refer Note 38(b) to our consolidated financial statements.

Table of Contents

Capital Expenditure

Capital expenditure totaled Rs. 96,980 million, Rs.101,197 million and Rs.51,386 million during fiscals 2010, 2009 and 2008, respectively. Our automotive operations accounted for a majority of this capital expenditure. Our capital expenditures during the past three years have related mostly to (i) capacity expansion of our production facilities, (ii) the introduction of new products such as the Nano, World Truck, Tata 407 Pick up, Tata Super ACE, Tata ACE EX, Magic, Winger and Sumo Grande, (iii) the development of planned future products and technologies and (iv) quality and reliability improvements aimed at operating cost reductions.

Capital expenditure in the Jaguar Land Rover business amounted to Rs. 57,602 million, which mainly included expenditure on tooling and product development for proposed product introductions. The Jaguar Land Rover business continues to make investments in new technologies through its research and development activities to develop products that meet the requirements of the premium segment including developing sustainable technologies to improve fuel economy and reduce CO₂ emissions.

We intend to continue to invest in our business units and research and development over the next several years, including committed capital expenditures for our ongoing projects, new projects, product development programs, and mergers, acquisitions and strategic alliances to build and expand our presence in the passenger vehicle and commercial vehicle categories. Some of our recently launched, and anticipated new products are as follows:

Indica Vista Drivetech4: On April 30, 2010, we launched an all-new Indica Vista range, the Indica Vista Drivetech4, with a specially designed Eurotech gearbox that provides for engine durability, high torque at low RPMs, minimal vibration, precise gear shifting and recirculation of cooled gas which reduces emissions.

Tata Indigo e-CS: On May 19, 2010, we launched the all new Tata Indigo e-CS, a sedan offering an ARAI approved mileage of 23.03 kilometres per litre for the 1.4 litre CR4 common rail diesel engine. Built on the existing Tata Indigo platform, the Tata Indigo e-CS succeeds the Tata Indigo CS.

Range Rover Evoque: On June 17, 2010, we revealed the Range Rover Evoque. This all-new coupe is expected to join Range Rover and Range Rover Sport in the product line-up during the summer of 2011. The Range Rover Evoque will be the smallest, lightest and most fuel efficient Range Rover ever produced. Customers will have a choice of both 4WD and 2WD versions, with sub 130g/km CO₂ emissions.

All New Jaguar XJ: In September 2009, the all new Jaguar XJ had its public debut at the Frankfurt International Motor show. In May 2010, we commenced retail customer deliveries of the Jaguar XJ. This is an important new model which has replaced the previous generation XJ. The new model features the next generation of Jaguar's aerospace-inspired aluminum body architecture, a choice of standard or long wheelbase models, enhanced power trains with all of Jaguar's new ultra-efficient Gen III 5.0 litre petrol and 3.0 diesel engines available, together with what we believe to be the highest standards of personal luxury and specification. Among the product innovations are an instrument cluster where traditional physical instruments have been replaced by a 12" thin film transistor (TFT) screen.

Inauguration of new plant at Sanand

On June 2, 2010, we opened a new 725 acre plant for the Tata Nano at Sanand in the state of Gujarat. The initial capacity of the plant is 250,000 cars per year to be achieved in phases, expandable up to 350,000 cars per year, with space for additional capacity expansion. The new plant was completed in 14 months commencing November 2008 and the surrounding integrated facility comprises of the plant and an adjacent 375 acre vendor park to house key component manufacturers for the Tata Nano. We also began community development activities in areas surrounding the new plant on health, education, employability and environment enhancement.

The new Tata Nano plant at Sanand has been equipped with state-of-the-art equipment, including sophisticated robotics and high speed production lines with motors systems to monitor carbon levels, tree plantation, sustainable water sourcing through water harvesting and ground water recharging and harnessing solar energy for illumination.

Table of Contents**Approval for Raising of Long Term Capital Funds**

Pursuant to the resolution passed by the Board of Directors on June 28, 2010 and approved by the resolution passed on August 10, 2010 by the shareholders of the Company through postal ballot, Company is authorized, among other things, raising funds equivalent to about Rs.47 billion through a combination of issue of Ordinary Shares, A Ordinary Shares, convertible bonds, debentures, warrants or other equity linked instruments in the domestic and/or international markets in one or more tranches, to issue upto 50 million A Ordinary Shares on execution of conversion option by the holders of outstanding CARS aggregating US\$473 million, for increasing the borrowings limits from Rs.200 billion to Rs.300 million and for creation of security on our properties upto Rs.300 million.

The funds to be raised pursuant to the above shareholders resolution are expected to be used for financing our growth plans as well as for reducing our debt. The timing and structure of the fund raising will be decided depending upon market conditions.

C. Research and Development, Patents and Licenses, etc.

Please see Item 4.B of this annual report for the information required by this item.

D. Trend Information.

Please see Item 5.A of this annual report for the information required by this item.

E. Off-balance Sheet Arrangements

We had provided guarantees to banks and others in respect of loans and credit facilities availed of by our joint venture, Fiat India Automobiles Ltd. These guarantees, which aggregated to Rs.8,565.3 million as of March 31, 2009, expired in fiscal 2010.

F. Tabular Disclosure of Contractual Obligations

Type	Total	Payment due by period (Rs in millions)			
		Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years

Total	619,261	205,969	209,264	95,323	108,705

Item 6. Directors, Senior Management and Employees.**A. Directors and Senior Management.****Board of Directors.**

Under our Articles of Association, the number of our Directors cannot be less than three nor more than fifteen. At present, there are twelve Directors, including a nominee Director of Tata Steel Limited, or Tata Steel.

Our Articles of Association provide that the Board of Directors of Tata Steel, which, with its subsidiary, owns, as of June 30, 2010, 6.76% of our Ordinary Shares and none of A Ordinary Shares, has the right to nominate one Director (the Steel Director) to the Board. Dr. J.J. Irani is the

current nominee Director of Tata Steel.

Table of Contents

In addition, our Articles of Association provide that (a) our debenture holders have the right to nominate one Director (the Debenture Director) if the trust deeds relating to outstanding debentures require the holders to nominate a director; and (b) financial institutions in India, have the right to nominate two Directors, (the Financial Institutions Directors) to the Board pursuant to the terms of the loan agreements. Currently, there is no Debenture Director or Financial Institutions Director on the Board. Our Directors are not required to hold any of our shares by way of qualification.

As of June 30, 2010, our Directors and Senior Management, in their sole and joint names, beneficially held an aggregate of 200,441 Ordinary Shares (approximately 0.04% of our issued share capital) and 24,312 A Ordinary Shares (approximately 0.04% of our issued share capital). In addition, some of our Directors hold as trustees for various non-affiliated trusts, an aggregate of 354,976 shares (representing approximately 0.06% of our issued share capital).

The following table provides information about our Directors, Executive Officers and Chief Financial Officer as at June 30, 2010:

Name ⁽²⁾	Position	Date of Birth/ Business Address ⁽¹⁾	Year appointed as Director or Executive Officer or Chief Financial Officer	Expiration of Term	Number of Ordinary shares beneficially owned as of June 30, 2010,	Number of A Ordinary shares beneficially owned as of June 30, 2010

- (3) Ceased to be director with effect from September 1, 2010.

Table of Contents

Biographies

Set forth below is a short biography of each of our Directors, Senior Management and Chief Financial Officer:

Mr Ratan N Tata (Chairman), Mr Tata holds a B.Sc. (Architecture) degree in structural engineering from Cornell University, USA and has completed the Advanced Management Program at Harvard Business School, USA. He joined the Tata Group in 1962. As Chairman of Tata Industries Limited since 1981, he was responsible for transforming the company into a group strategy think-tank and a promoter of new ventures in high technology businesses. In 1991, Mr Tata was appointed Chairman of Tata Sons Limited, the holding company of the Tata entities and currently holds the chairmanships of major Tata companies. During his tenure, the Tata Group's revenues have grown over ten-fold to annualized revenues of \$67.4 billion.

Mr Tata is on the Central Board of the Reserve Bank of India, a Member of the Prime Minister's Council on Trade and Industry besides being a member of various global councils. He is also the chairman of two of the largest private sector promoted philanthropic trusts in India. Mr Tata is associated with various organizations in India and abroad.

The Government of India honored Mr Tata with its second highest civilian award, the Padma Vibhushan, in 2008. Mr Tata was conferred with NDTV Automotive Man of the Year 2008 award. He has also been conferred an honorary doctorate in business administration by the Ohio State University, an honorary doctorate in technology by the Asian Institute of Technology, Bangkok, an honorary doctorate in science by the University of Warwick, and an honorary fellowship by the London School of Economics. Mr Tata has been on the Company's Board since August 14, 1981 including 14 years in an executive capacity and is actively involved with product development and other business strategies pursued by the Company. One of his achievements include designing and developing an indigenous Indian car - Indica which besides creating a record of sorts, is one of the leading products in its category in the car market. The Nano - the fuel efficient, low-cost, eco-friendly people's car envisioned by Mr Tata was commercially launched in March 2009. The Company was also awarded the Wall Street Journal Technology Innovation Award for the Tata Nano, in the transportation sector.

Mr. Ravi Kant (Vice-Chairman): Mr. Ravi Kant holds a Bachelor of Technology degree from the Indian Institute of Technology, Kharagpur and a Masters in Science from the University of Aston, Birmingham, UK. He was conferred with an Honorary D.Sc. by the Aston University, in Birmingham in July 2008. He is an Honorary Industrial Professor at the University of Warwick, UK. Mr Kant was awarded the BMA Management Man of the Year Award 2008-09 and has also been recognized with distinguished Alumunus Awards for Mayo College, Ajmer and IIT, Kharagpur. Mr. Ravi Kant is also on the Governing Board of Vale Columbia Centre on Sustainable International Investment, National Institute of Design, Ahmedabad and SMILE TRAIN - an international cleft lip/ palate charity organization. Mr Kant is the Chairman of IIM, Rohtak and was also the President of the Society of Indian Automobile Manufacturers.

Mr. Kant has wide and varied experience in the manufacturing and marketing field, particularly in the automobile industry. Prior to joining the Company, he has been with Philips India Limited, LML Limited, Titan Watches Limited, Kinetic Engineering Limited and Hawkins Cookers Limited. Mr. Kant has been with the Company since July 2000 as the executive director (commercial vehicle business unit) responsible for manufacturing & marketing of the Commercial Vehicle Business Unit and was appointed as the Managing Director on July 29, 2005. Mr Kant superannuated on June 1, 2009 as per the Company's retirement policy and the terms of his appointment. Mr Kant was appointed as the Non-Executive Vice-Chairman on the Board of Directors of the Company with effect from June 2, 2009. Mr Kant is also on the Board of various joint venture companies of the Tata Motors Group, Voltas Limited and Tata Industries Limited.

Table of Contents

C. Board Practices.

The Board size of twelve directors is commensurate with our size and in line with the industry. The Board consists of executive, non-executive and independent directors. Appointments of new directors are considered by the full Board and our shareholders at each year's Annual General Meeting.

The roles of the Chairman and the Chief Executive Officer are distinct and separate with appropriate powers being delegated to the CEO & Managing Director to perform the day to day activities of the Company.

The Board, along with its Committees, provides leadership and guidance to our management, in particular with respect to corporate governance, business strategies and growth plans, the identification of risks and their mitigation strategies, entry into new businesses, product launches, demand fulfillment and capital expenditure requirements, and the review of our plans and targets.

The Board has delegated powers to the Committees of the Board through written/stated terms of reference and oversees the functioning operations of the Committees through various circulars/minutes circulated to it. The Board also undertakes our subsidiaries' oversight functions through review of their performance against their set targets, advises them on growth plans and where necessary, gives strategic guidelines.

Committees.

The Audit Committee is comprised of the following three independent directors: N Munjee, Chairman, S. M. Palia and R. A. Mashelkar. The scope of the Audit Committee includes:

Reviewing the quarterly financial statements before submission to the Board, focusing primarily on:

any changes in accounting policies and practices and reasons for any such change;

major accounting entries involving estimates based on an exercise of judgment by management;

qualifications in draft audit reports;

significant adjustments arising out of audits;

compliance with accounting standards;

analysis of the effects of alternative GAAP requirements on the financial statements;

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

compliance with listing and other legal requirements concerning financial statements;

disclosure of related party transactions;

review Reports on the Management Discussion and Analysis of financial condition, Results of Operations and the Directors Responsibility Statement;

overseeing our financial reporting process and the disclosure of its financial information, including any earnings press release, to ensure that the financial statements are correct, sufficient and credible; and

disclosures made under the CEO and CFO certification to the Board and investors.

Reviewing with the management, external auditor and internal auditor the adequacy of our internal control systems and recommending improvements to the management.

Reviewing, with the management, the statement of uses / application of funds raised through an issue (public issue, rights issue, preferential issue, etc.), the statement of funds utilized for purposes other than those stated in the offer document/ prospectus/ notice and the report submitted by the monitoring agency monitoring the utilization of proceeds of a public or rights issue and making appropriate recommendations to the Board to take up steps in this matter.

Table of Contents

Recommending the appointment / removal of the statutory auditor, fixing audit fees and approving non-audit, consulting services provided by the firms of statutory auditors to us and our subsidiaries; and evaluating auditors' performance, qualifications and independence.

Reviewing the adequacy of the internal audit function, including the structure of the internal audit department, coverage and frequency of internal audits, appointment, removal, performance and terms of remuneration of the chief internal auditor.

Oversight of our external financial reporting and monitoring components of internal control over financial reporting.

Discussing with the internal auditor and senior management, significant internal audit findings and following thereon.

Reviewing the findings of any internal investigation by the internal auditor into matters involving suspected fraud or irregularity or a failure of internal control systems of a material nature and reporting any such matters to the Board.

Discussing with the external auditor before the audit commences the nature and scope of such audit, as well as conducting post-audit discussions to ascertain any areas of concern.

Reviewing our financial and risk management policies.

Reviewing the functioning of the Whistle-Blower mechanism (which is an extension of the Tata Code of Conduct).

Reviewing the financial statements and investments made by our subsidiary companies.

Look into the reasons for any substantial defaults in payment to the depositors, debenture-holders, shareholders (in case of non-payment of declared dividend) and creditors, if any;

Reviewing the effectiveness of the system for monitoring compliance with laws and regulations.

Approving the appointment of the Chief Financial Officer.

The Committee has also adopted policies for the approval of services to be rendered by our independent statutory auditor, based on a procedure for ensuring such auditor's independence and objectivity, as well as for the oversight of audit work for streamlining the audit process across our subsidiaries.

The Remuneration Committee is comprised of two independent and two non-executive directors, namely N.N. Wadia, Ratan N. Tata, S.Bhargava and Ravi Kant and is empowered to review the remuneration of whole-time directors, retirement benefits to be paid to them and dealing with matters pertaining to Employees' Stock Option Scheme.

We have not issued any stock options to our directors/employees.

The Investor Grievance Committee is comprised of S. M. Palia and Ravi Kant and oversees the redressing of investors' complaints pertaining to securities transfers, interest/dividend payments, non-receipt of annual reports, issue of duplicate certificates and other miscellaneous complaints. Its scope also includes delegation of powers to our executives or the share transfer agents to process share transfers and other

investor-related matters.

The Executive Committee of the Board is comprised of Ratan N. Tata , Ravi Kant, J. J. Irani, N. N. Wadia, Carl-Peter Forster and P M Telang. This Committee came into effect on July 25, 2006, upon the dissolution of the Finance Committee and the Committee of the Board. The Committee reviews revenue and capital expenditure budgets, long-term business strategy, the organizational structure, raising of finance, property related issues, review and sale of investments and the allotment of securities within established limits.

The Ethics and Compliance Committee sets forth policies relating to the implementation of the Tata Code of Conduct for Prevention of Insider Trading and takes on record the monthly reports and dealings in securities by the Specified Persons . It also implements appropriate actions in respect of violations of the Tata Code of Conduct. The Ethics and Compliance Committee is comprised of S.M. Palia, Chairman and R. Gopalakrishnan (ceased to be director w.e.f September 1, 2010). Mr. C. Ramakrishnan, our Chief Financial Officer, is the Compliance Officer under the said Code.

The Nominations Committee was constituted with the objective of identifying independent directors to be inducted on the Board from time to time to refresh its membership. The Nominations Committee is comprised of N. N. Wadia, Chairman, Ratan N. Tata, S. M. Palia and Ravi Kant.

Table of Contents

Apart from the Committees described above, the Board of Directors also constitutes committee(s) of directors with specific terms of reference as it may deem fit.

D. Employees.

We consider our human capital as a critical factor to our success. Under the aegis of Tata Sons and the Tata Sons promoted entities, we have drawn up a comprehensive human resource strategy (the Human Resource strategy) addresses key aspects of human resource development such as:

Code of conduct and fair business practices.

A fair and objective performance management system linked to the performance of the businesses which identifies and differentiates high performers while offering separation avenues for non-performers.

Creation of a common pool of talented managers across Tata Sons and the Tata Sons promoted entities with a view to increasing their mobility through inter-company job rotation.

Evolution of performance based compensation packages to attract and retain talent within Tata Sons and the Tata Sons promoted entities.

Development of comprehensive training programs to impart and continuously upgrade the industry/function specific skills.

In line with the Human Resource strategy, we, in turn, have implemented various initiatives in order to build better organizational capability that we believe will enable us to sustain competitiveness in the global market place. Our human resources focus is to attract talent, retain the better and advance the best.

Some of the initiatives to meet this objective include:

Recruitment across the country to meet the requirements of the expansion plans.

Extensive process mapping exercise to benchmark and align the human resource processes with global best practices.

Introduction of a globally benchmarked employee engagement survey.

Succession planning through identification of second level of managers for all units, locations, functions.

Implementation of a Fast Track Selection Scheme, which is a system for identifying potential talent in the areas of general, commercial and operations management and offering them opportunities for growth within the organization. Our human resources team has been invited to replicate this system in other Tata Companies.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Our Talent Management Scheme which includes the identification of high performers and high potentials through various routes such as our Performance Management System and Development Centers. Subsequent to the identification process, we provide them with challenging assignments for faster development.

Introduction of performance rating based salary review and quality linked variable payment for supervisory category of employees. Other initiatives include:

Extensive brand building initiatives at university campuses to increase recruiting from premium universities

Introduction of an employee self service portal and employee help desk for the benefit of employees.

We employed approximately 49,856 and 49,473 (includes Jaguar Land Rover) permanent employees as of March 31, 2010 and 2009 respectively. The average number of temporary employees for the Fiscal year ended March 31, 2010, was approximately 24,813.

The following table set forth a breakdown of persons employed by our business segments and by geographic location as of March 31, 2010.

Segment	No. of Employees	Location	No. of Employees
Automotive	45,328	India	32,128
Other	4,528	Abroad	17,728
Total	49,856	Total	49,856

Table of Contents

Training and Development

We are committed to building the competences of our employees and improving their performance through training and development. Our focus is on identifying gaps in our employees' competencies and preparing employees for changes in competitive environments, as well as to meet organizational challenges.

Some of the focus areas in training in the last year centered on leadership, innovation management and internationalization besides other training programmes to drive a change in our employees' outlook as we continue to develop as a global competitor. Developmental initiatives for our senior leadership were undertaken through international programs at various premier institutions around the world. The entire senior leadership was also taken through cultural sensitivity programme conducted by world renowned faculty. Certain employees have also been selected for the Fulbright fellowships for leadership in management. In addition, in order to emphasize the sharing of skills across our locations and functions extensive technical training programs were organized in Pune, Jamshedpur and Lucknow. The technical exposure was enhanced further through international training and participation at international seminars.

At Jamshedpur, Pune and Lucknow in India, we have also established training divisions that impart basic skills in various trades like milling, grinding and welding to our young apprentices. We received the National Best Training Establishment award from the Government of India for the eighth time.

Union Wage Settlements

All our regular employees in India, other than management, are members of labor unions. We have generally enjoyed cordial relations with our employees at our factories and offices.

Employee wages are paid in accordance with wage agreements that have varying terms (typically three years) at different locations. The expiration dates of the wage agreements with respect to various locations are as follows:

Location	Wage Agreement valid until
Pune CVBU	August 31, 2012
Pune PCBU	March 31, 2010*
Jamshedpur	March 31, 2010#
Mumbai	December 31, 2012
Lucknow	March 31, 2011
Jaguar Land Rover	October 31, 2010

* Signed on 29th September, 2010. Further valid until March 31, 2013.

Signed on 11th August, 2010. Further valid until March 31, 2013.

A cordial industrial relations environment has been maintained in all our manufacturing units.

The performance rating system, introduced for the first time, for the bargainable category in Mumbai and PCBU has completed two full cycles and the feedback of the process received from all the quarters has been encouraging. Return-ability in wage settlements was built in by introducing quality linked payments based on a quality index as perceived by the customer.

Operatives support in the outsourcing low value added activities and in the implementation of other reforms that impact quality, cost cutting and productivity improvements across all locations.

E. Share Ownership.

The information required by this item is set forth in Item 6.A of this annual report.

Table of Contents**Item 7. Major Shareholders and Related Party Transactions.****A. Major Shareholders**

We are a widely held, listed company with approximately 343,433 shareholders for Ordinary Shares and 17698 shareholders for A Ordinary Shares of record. (1) Citibank, N.A. as depositary for our ADRs and GDRs, was the holder on record on June 30, 2010 of 58,920,462 shares and 905,064 shares respectively on behalf of the beneficial owners of deposited shares.

* The A Ordinary Shareholders are entitled to receive dividend for any financial year at five percentage points more than the aggregate rate of dividend declared on Ordinary Shares for that financial year but are entitled to one vote for every ten A Ordinary Shares held as per the terms of its Issue and Articles of Association of the Company.

From March 31, 2007 to March 31, 2010, the holdings of our largest shareholder, Tata Sons Limited (together with its subsidiaries), have increased from 22.45% to 30.58%, as a result of their subscribing to the Rights Issue 2008 including any unsubscribed portion thereof. The holdings of Tata Steel Ltd. (together with its subsidiaries) have decreased from 8.62% as of March 31, 2007 to 6.15% as of March 31, 2010. Daimler AG which previously had a shareholding of 4.71% sold their shares in March 2010. The shareholding of Citibank N.A. as depositary for our ADRs and GDRs, has declined from 10.97 % to 10.56%. The shareholding of Life Insurance Corporation of India Ltd. has increased from

6.10% to 9.61%.

Table of Contents

According to our register of shareholders and register of beneficial shareholders, as of July 14, 2010, there were 73 record holders of our shares with addresses in the United States, whose shareholdings represented approximately 0.03% of our outstanding Ordinary Shares on that date, excluding any of our shares held by United States residents in the form of depositary shares. Because some of these shares were held by brokers or other nominees, the number of record holders with addresses in the United States may be fewer than the number of beneficial owners in the United States.

The total permitted holding of Foreign Institutional Investors, or FIIs, in our paid up share capital has been increased to 35% by a resolution passed by our shareholders on January 22, 2004. The holding of FIIs in us as of June 30, 2010, was approximately 22.86%. See Item 10.D Exchange Controls for further details.

None of our shares of common stock entitles the holder to any preferential voting rights.

Under the Takeover Regulations of India, any person who acquires more than 5%, 10%, 14%, 54% or 74% of our shares or who is entitled to exercise voting rights with respect to more than 5%, 10%, 14%, 54% or 74% of our shares must file a report concerning the shareholding or the voting rights with us and the stock exchanges on which our ordinary shares are traded. Please see Item 9.A The Offer and Listing Markets for information with respect to these stock exchanges. Similar disclosures would be applicable under the Insider Trading Regulations of India with respect to any person who acquires more than 5% of our shares or voting rights with respect to the shares. Any increases or decreases by 2% or more in the shareholding by such persons must also be disclosed. Furthermore, under our listing agreement with the stock exchanges where our shares are listed, we are required to periodically disclose to such stock exchanges the name and percentage of shares held by persons or entities that hold more than 1% of our Ordinary Shares. For the purposes of the above, reporting and takeover requirements under our listing agreements, shares withdrawn from our ADS/GDS facility will be included as part of a person's shareholding in us.

To our knowledge, we are not, directly or indirectly, owned or controlled by any other corporation or by any government or by any other natural or legal persons severally or jointly. We are not aware of any arrangements the operation of which may at a later time result in our change of control.

For details regarding voting rights, please refer to Item 10.B Memorandum and Articles of Association Voting Rights .

B. Related Party Transactions.

For a description of our related party transactions, please refer to Note 41 to our Consolidated Financial Statements

C. Interests of Experts and Counsel.

Not applicable.

Item 8. Financial Information.

A. Consolidated Statements and Other Financial Information. Financial Statements.

The information required by this item is set forth beginning on page F-1 of this annual report.

Legal or Arbitration Proceedings.

The information on legal or arbitration proceedings required by this item is set forth in Item 4.B of this annual report.

Dividend Policy.

Any dividend declared by Tata Motors is based on the profits available for distribution as reported in the unconsolidated statutory financial statements of Tata Motors prepared in accordance with Indian GAAP. Further, Indian law mandates that dividend be declared out of distributable profits only after the transfer of a specified percentage of net income computed in accordance with current regulations to a general reserve. Based on the net income available for appropriation, dividends are recommended by the Board of Directors for approval by the shareholders at our Annual General Meeting. Further, the Board of Directors may also pay an interim dividend at its discretion. Since Fiscal year 1956, we have had an uninterrupted dividend distribution except for the Fiscal years 2001 and 2002. We returned to dividend distribution in Fiscal 2003. In view of our profitable performance, we declared dividends (excluding dividend tax) totaling Rs. 3,116 million, 5,784 million and

Rs.5,781 million for Fiscal 2010, 2009 and 2008 to the shareholders.

Table of Contents

B. Significant Changes.

Other than as set forth in this annual report, no significant change has occurred with respect to us since the date of our audited consolidated IFRS financial statements included elsewhere in this annual report.

Item 9. The Offer and Listing

A. Offer and Listing Details.

There has been no SEC-registered offering of our shares in the United States.

The details on our share and ADS price history are included in Item 9.C Markets below.

B. Plan of Distribution.

Not applicable.

Item 10. Additional Information.**A. Share Capital**

Our authorized Share Capital is Rs.39 billion divided into 700 million Ordinary Shares of Rs.10/- each, 200 million A Ordinary Shares of Rs.10/- each (the Ordinary Shares and the A Ordinary Shares are hereinafter together referred to as Ordinary Shares or Shares unless otherwise specifically mentioned to the contrary) and 300 million Convertible Cumulative Preference Shares of Rs.100/- each.

Under the Companies Act, as well as our Articles of Association, if our share capital is divided into different classes of shares, all or any of the rights or privileges attached to each class of shares may be varied, modified or abrogated with the consent in writing of the holders of not less than three-fourths of the issued shares of that class, or with the sanction of a special resolution passed at a separate meeting of the holders of the issued shares of that class. Our Articles of Association further provide that the rights conferred upon the holders of the shares of any class issued with preferential or other rights shall not, unless otherwise expressly prohibited by the terms of the issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking *pari passu* thereto.

In accordance with the Articles and under the Companies Act, we may issue Ordinary Shares with differential rights as to voting and/or dividend (A Ordinary Shares) up to an amount not exceeding 25% of the total issued Ordinary Share Capital of the Company or such other limit as may be prescribed by applicable laws/regulations.

Our Shareholders of the Company vide postal ballot dated August 10, 2010 have approved the raising of long term resources under Section 81(1A) of the Companies Act, 1956 and Issuance of A ordinary shares on exercise of conversion option by holders of Zero Coupon Convertible Alternative Reference Securities (CARS).

Table of Contents

B. Memorandum and Articles of Association

Objects and Purposes

Our principal objects, as provided by Clause 3 of our Memorandum of Association, include:

manufacturing, marketing, import, export, hiring and letting on hire of commercial vehicles, automobile cars, two wheeler vehicles, heavy and construction equipment including components, accessories and spare parts in relation thereto;

to carry on the business as manufacturers and dealers of machinery articles and goods of all classes;

to carry on the business of manufacturing materials which may be usefully combined with our manufacturing and engineering business; and

to carry on the business of financing and re-financing of all types of vehicles, construction equipment, capital equipment and services by way of credit, hire purchases, leases and loans.

Directors

Under the Companies Act, as well as our Articles of Association, each of our Directors, who is in any way directly or indirectly concerned or interested in a contract or arrangement or proposed contract or arrangement entered into or to be entered into by or on our behalf is required to disclose the nature of his interest at a meeting of the first meeting of the Board held after the Director becomes concerned. Under the Companies Act, as well as the Articles of Association, an interested Director is not allowed to take part in the discussion of, or vote on, any contract, arrangement or proposal in which the Director is interested.

Under the Companies Act and our Articles of Association, we are restricted from making loans to Directors and the prior approval of the Central Government is required before we can make any loans, directly or indirectly, to any Director or provide, directly or indirectly, any guarantees or security in connection with any loan made by a third party to a Director.

Under our Articles of Association, a director is not required to hold any qualification shares. Our Articles of Association do not prescribe an age limit for the retirement of the Directors. As per the policy adopted by our Board, executive directors retire at the age of 65 and non-executive directors retire at the age of 75.

Under our Articles of Association, the number of our Directors cannot be less than three nor more than fifteen.

Dividends

Under the Companies Act, unless the Board recommends the payment of a dividend, the shareholders at a general meeting have no power to declare any dividend. Subject to certain conditions laid down by Section 205 of the Companies Act, no dividend can be declared or paid by a company for any Fiscal year except out of the profits of the company calculated in accordance with the provisions of the Companies Act or out of the profits of the company for any previous Fiscal year(s) calculated pursuant to the provisions of the Companies Act.

Under our Articles of Association, the shareholders at a general meeting may declare a lower, but not higher, dividend than that recommended by the Board. Dividends are generally declared as a percentage of the par value. The dividend recommended by the Board and approved by the shareholders at a general meeting is distributed and paid to shareholders in proportion to the paid-up value of their shares as on the record date for which such dividend is payable. In addition, the Board may declare and pay interim dividends. The shares to be issued upon the conversion of the ADSs will be fully paid-up when delivered as provided herein. Under the Companies Act, dividends can only be paid in cash to shareholders listed on the register of shareholders on the date which is specified as the record date or book closure date. No shareholder is entitled to a dividend while any lien in respect of unpaid calls on any of their shares is outstanding.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Shares issued upon conversion of ADSs will rank *pari passu* with our existing Ordinary Shares of Rs. 10/- each in all respects including entitlement of the dividend declared.

Dividends must be paid within 30 days from the date of the declaration and any dividend which remains unpaid or unclaimed after that period must be transferred within seven days to a special unpaid dividend account held at a scheduled bank. Any money which remains unpaid or unclaimed for seven years from the date of such transfer must be transferred by us to the Investor Education and Protection Fund established by the Government pursuant to which no claim shall lie against us or the said Fund.

Table of Contents

Under the Companies Act, we may only pay a dividend in excess of 10% of paid-up capital in respect of any year out of the profits of that year after we have transferred to our reserves a percentage of our non consolidated Indian GAAP profits for that year ranging between 2.5% to 10% depending on the rate of dividend proposed to be declared in that year. The Companies Act further provides that if the profit for a year is insufficient, the dividend for that year may be declared out of the non consolidated Indian GAAP accumulated profits earned in previous years and transferred to reserves, subject to the following conditions: (i) the rate of dividend to be declared may not exceed the lesser of the average of the rates at which dividends were declared in the five years immediately preceding the year, or 10% of paid-up capital; (ii) the total amount to be drawn from the accumulated profits from previous years may not exceed an amount equivalent to 10% of paid-up capital and free reserves and the amount so drawn is first to be used to set off the losses incurred in the financial year before any dividends in respect of preference or equity shares; and (iii) the balance of reserves after withdrawals must not be below 15% of paid-up capital.

The holders of A Ordinary Shares will receive dividends for any financial year at five percentage points more than the aggregate rate of dividend declared on Ordinary Shares for that financial year.

Capitalization of Reserves and Issue of Bonus Shares

Our Articles of Association permit us by a resolution of our shareholders in a general meeting to resolve that amounts standing to the credit of reserves or securities premium can be capitalized by the issue of fully paid bonus shares (also referred to as a stock dividend) or by crediting shares not fully paid-up with the whole or part of any sum outstanding. Bonus shares must be issued pro rata to the amount of capital paid-up on existing shareholdings. Any issue of bonus shares would be subject to the guidelines issued by SEBI in this regard.

Calls on Shares, Pre-Emptive Rights and Alteration of Share Capital

Under the Companies Act, as well as our Articles of Association, the Board of Directors may from time to time make such calls as they think fit upon the members of the Company in respect of all moneys unpaid on the shares held by them respectively and each member is required to pay the amount of every call so made on him to the Company.

Subject to the provisions of the Companies Act, we may increase our share capital by issuing new shares on such terms and with such rights as we, by action of shareholders in a general meeting, determine. These new shares will be offered to existing shareholders listed on the members register on the record date in proportion to the amount paid-up on these shares at that date. The offer will be made by notice specifying the number of shares offered and the date (being not less than 15 days from the date of the offer) after which the offer, if not accepted, will be deemed to have been declined. After this date, the Board may dispose of the shares offered in respect of which no acceptance has been received, in such manner as the Board thinks most beneficial to us. The offer is deemed to include a right exercisable by the person concerned to renounce the shares offered to such person in favor of any other person provided that the person in whose favor these shares have been renounced is approved by the Board in their absolute discretion.

Under the Companies Act, new shares may be offered to any persons whether or not those persons include existing shareholders, if a special resolution to that effect is passed by the shareholders of the company in a general meeting. The issuance of shares upon conversion of our outstanding Convertible Notes has been duly approved by a special resolution of our shareholders and our shareholders have waived their pre-emptive rights with respect to these shares.

The Company can also alter its share capital by way of a reduction of capital or by undertaking a buy-back of shares under the prescribed SEBI guidelines.

Our Articles of Association provide that, by a special resolution passed at the general meeting, we may consolidate or sub-divide our share capital, convert all or any of our fully paid-up shares into stock and re-convert that stock into fully paid-up shares or cancel shares which have not been taken up by any person. The Company may also from time to time by special resolution reduce its capital.

Table of Contents

General Meetings of Shareholders

We must hold our Annual General Meeting each year within 15 months of the previous Annual General Meeting and in any event not later than six months after the end of each accounting year, unless extended by the Registrar of Companies at our request for any special reason. Our Board of Directors may convene an Extraordinary General Meeting of shareholders when necessary or at the request of a shareholder or shareholders holding in the aggregate not less than 10% of our capital. Written notices convening a meeting setting out the date, place and agenda of the meeting must be given to members at least 21 days prior to the date of the proposed meeting. A general meeting may be called after giving shorter notice if consent is received from all shareholders in the case of an Annual General Meeting, and from shareholders holding not less than 95% of our paid-up capital in the case of any other general meeting. Currently, we give written notices to all members and, in addition, give public notice of general meetings of shareholders in a daily newspaper of general circulation in Mumbai. General meetings are generally held at some place in Mumbai. The quorum for a general meeting of the company is five shareholders personally present.

A company intending to pass a resolution relating to matters such as, but not limited to, amendment in the objects clause of the memorandum, buy back of shares under the Companies Act, giving loans or extending guarantee in excess of limits prescribed under the Companies Act, and guidelines issued thereunder, is required to obtain the resolution passed by means of a postal ballot instead of transacting the business in the general meeting of the company. A notice to all the shareholders shall be sent along with a draft resolution explaining the reasons therefore and requesting them to send their assent or dissent in writing on a postal ballot within a period of 30 days from the date of posting the letter. Postal ballot voting also allows shareholders to cast their votes by electronic means.

Voting Rights

At a general meeting upon a show of hands, every member holding shares and entitled to vote and present in person has one vote. Upon a poll, the voting rights of each shareholder entitled to vote and present in person or by proxy is in the same proportion as the capital paid-up on each share held by such holder bears to the total paid-up capital. Voting is by show of hands, unless a poll is ordered by the Chairman of the meeting or demanded by shareholder or shareholders holding at least 10% of the voting rights in respect of the resolution or by those holding paid-up capital of at least Rs.50,000. The Chairman of the meeting has a casting vote.

Holders of ADSs and of GDSs are not entitled to attend or vote at shareholders meetings. Holders of ADSs may exercise voting rights with respect to the Ordinary Shares represented by ADSs only in accordance with the provisions of our ADS deposit agreement and Indian law. A holder of ADSs may withdraw from the ADS facility the related underlying shares and vote as a direct shareholder, but there may not be sufficient time to do so after the announcement of an upcoming vote. If requested by us, the depository will notify holders of ADSs of upcoming votes and arrange to deliver our voting materials to holders of ADSs. The materials will describe the matters to be voted on and explain how holders of ADSs on a record date specified by the depository may instruct the depository to vote on the deposited securities underlying the ADSs as directed by the holders of ADSs. For the instructions to be valid, the depository must receive them in writing on or before a date specified by the depository. The depository will try, insofar as practicable, subject to Indian laws and the provisions of our Articles of Association, to vote or have its agents vote the deposited securities as instructed. The depository will only vote as instructed and is not entitled to exercise any voting discretion. If the depository timely receives voting instructions from a holder of ADSs and which fails to specify the manner in which the depository is to vote the shares underlying such holder's ADSs, such holder will be deemed to have instructed the depository to vote in favor of the items set forth in such voting instructions. If the depository does not receive timely instructions from a holder of ADSs, the holder shall be deemed to have instructed the depository to give a discretionary proxy to a person designated by us, subject to the conditions set forth in the deposit agreement. If requested by us, the depository is required to represent all shares underlying the outstanding ADSs, regardless whether timely instructions have been received from the holders of such ADSs, for the sole purpose of establishing a quorum at a meeting of shareholders.

The Depository for the holders of the GDRs shall exercise voting rights in respect of the GDSs by issue of an appropriate proxy or power of attorney in terms of the deposit agreement pertaining to the GDRs.

Ordinary resolutions may be passed by simple majority of those shareholders present and voting at the meeting. Special resolutions require that the votes cast in favor of the resolution must be at least three times the votes cast against the resolution. The Companies Act provides that in order to amend the Articles of Association, a special resolution is required to be passed in a general meeting. Dissolutions, mergers or consolidations, transfers of the whole or a significant part of our business to another company or taking over the whole of the business of any other company and, in any case where shareholding of public financial institutions and banks exceeds 25%, appointment of statutory auditors, each require a special resolution. Our Articles of Association do not permit cumulative voting for the election of our directors.

Table of Contents

A shareholder may exercise his or her voting rights by proxy to be given in the form required by our Articles of Association. The instrument appointing a proxy is required to be lodged with the company at least 48 hours before the time of the meeting. A shareholder may, by a single power of attorney, grant a general power of representation regarding several general meetings of shareholders. Any of our shareholders may appoint a proxy. A corporate shareholder is also entitled to nominate a representative to attend and vote on its behalf at general meetings. A proxy may not vote except on a poll and does not have a right to speak at meetings. A shareholder which is a legal entity may appoint an authorized representative who can vote in all respects as if a shareholder both on a show of hands and a poll.

The Companies Act allows for a company to issue shares with differential rights as to dividend, voting or otherwise subject to other conditions prescribed under applicable law. In this regard, the laws require that for a company to issue shares with differential voting rights the company must have had distributable profits in terms of the Companies Act for a period of three financial years, the company has not defaulted in filing annual accounts and annual returns for the immediately preceding three years, the articles of association of such company must allow for the issuance of such shares with differential voting rights and such other conditions set forth in the Companies (Issue of Share Capital with Differential Voting Rights) Rules, 2001 must be fulfilled.

In the case where a resolution is put to vote on a poll, such voting entitlement (excluding fractions, if any), will be applicable to holders of A Ordinary Shares. As per the terms of issue, the outstanding A Ordinary Shares shall be entitled to one vote for every ten A Ordinary Shares held.

In the case where a resolution is put to vote in the meeting and is to be decided on a show of hands, the holders of A Ordinary Shares shall be entitled to the same number of votes as available to holders of Ordinary Shares.

Convertible Securities/Warrants

We may issue from time to time debt instruments that are partly and fully convertible into shares and/or warrants to purchase shares.

Register of Shareholders and Record Dates

We are obliged to maintain a register of shareholders at our registered office in Mumbai or at some other place in the same city. The register and index of our beneficial owners maintained by a depository under the Depositories Act, 1996 is deemed to be a part of the index of members and register of shareholders. We recognize as shareholders only those persons who appear on our register of shareholders and we cannot recognize any person holding any Share or part of it upon any trust, express, implied or constructive, except as permitted by law. In the case of shares held in physical form, we register transfers of shares on the register of shareholders upon lodgment of the share transfer form duly complete in all respects accompanied by a share certificate or if there is no certificate, the letter of allotment in respect of shares transferred together with duly stamped transfer forms. In respect of electronic transfers, the depository transfers shares by entering the name of the purchaser in its books as the beneficial owner of the shares. In turn, we enter the name of the depository in our records as the registered owner of the shares. The beneficial owner is entitled to all the rights and benefits as well as the liabilities with respect to the shares that are held by the depository.

For the purpose of determining the shareholders, the register may be closed for periods not exceeding 45 days in any one year or 30 days at any one time. In order to determine the shareholders entitled to dividends, we keep the register of shareholders closed for approximately 21 days, generally in June or July of each year. Under the listing regulations of the stock exchanges on which our outstanding shares are listed, we may, upon at least 15 days advance notice to these stock exchanges, set a record date and/or close the register of shareholders in order to ascertain the identity of shareholders entitled to the dividend. The trading of shares and the delivery of certificates in respect thereof may continue while the register of shareholders is closed.

Annual Report and Financial Results

Our Indian GAAP audited financial statements for the relevant Fiscal year, the directors' report and the auditors' report, (collectively the Annual Report), must be prepared before the Annual General Meeting. These also include other financial information, a corporate governance section and management's discussion and analysis report and general shareholders' information and are also made available for inspection at our registered office during normal working hours for 21 days prior to our annual general meeting.

Table of Contents

Under the Companies Act, we must file the Annual Report with the Registrar of Companies within seven months from the close of the accounting year or within 30 days from the date of the annual general meeting, whichever is earlier. As required under listing agreements with the applicable stock exchanges, copies are required to be simultaneously sent to all the stock exchanges on which our shares are listed. We must also publish our financial results in at least one English language daily newspaper circulating in the whole or substantially the whole of India and also in a newspaper published in the language of the region where our registered office is situated.

We submit information, including our Annual Report, half yearly financial statements, report on corporate governance and the shareholding pattern statement, in accordance with the requirements of the listing agreement with the Singapore Stock Exchange.

Transfer of Shares

Shares held through depositories are transferred in book-entry form or in electronic form in accordance with the regulations laid down by the SEBI. These regulations provide the regime for the functioning of the depositories and the participants and set out the manner in which the records are to be kept and maintained and the safeguards to be followed in this system. Transfers of beneficial ownership of shares held through a depository are exempt from stamp duty. We have entered into an agreement for these depository services with National Securities Depository Limited and the Central Depository Services (India) Limited.

The SEBI requires that all investors hold our shares in book-entry form for trading and settlement purposes, except for transactions that are not made on a stock exchange and transactions that are not required to be reported to the stock exchange.

The requirement to hold shares in book-entry form will apply to ADS holders when the shares are withdrawn from the depository facility upon surrender of the ADSs. In order to trade in our shares in the Indian market, the withdrawing ADS holder will be required to comply with the procedures above.

Our Ordinary Shares are freely transferable, subject only to the provisions of the Companies Act under which, if a transfer of shares contravenes the SEBI provisions or the regulations issued under it or any other law for the time being in force or the Sick Industrial Companies (Special Provisions) Act, 1985, or SICA, or any other similar law, the Indian Company Law Board may, on an application made by the company, a depository incorporated in India, an investor, the SEBI or other parties, direct a rectification of the register of records. If a company without sufficient cause refuses to register a transfer of shares within two months from the date on which the instrument of transfer is delivered to the company, the transferee may appeal to the Indian Company Law Board seeking to register the transfer of equity shares. The Indian Company Law Board may in its discretion, issue an interim order suspending the voting rights attached to the relevant equity shares before completing its investigation of the alleged contravention. Under the Companies (Second Amendment) Act, 2002, the operative provisions of which are yet to come into force, the Indian Company Law Board is proposed to be replaced with the National Company Law Tribunal. Further, under the Sick Industrial Companies (Special Provisions) Repeal Act, 2003, or the SICA. The SICA is sought to be repealed and the Board of Industrial and Financial Reconstruction, as constituted under the SICA, is to be replaced with the National Company Law Tribunal.

Pursuant to the Listing Agreement, in the event we have not effected the transfer of shares within one month or where the Issuer has failed to communicate to the transferee any valid objection to the transfer within the stipulated time period of one month, the Issuer is required to compensate the aggrieved party for the opportunity loss caused during the period of the delay.

The Companies Act provides that the shares or debentures of the public listed company (like the Issuer) shall be freely transferable. Our Articles of Association provide for restrictions on the transfer of shares, including granting power to the board of directors in certain circumstances to refuse to register or acknowledge transfer of shares or other securities issued by us. However, under the Companies Act the enforceability of these transfer restrictions is unclear.

Table of Contents

Acquisition of Our Own Shares

The Company is prohibited from acquiring its own shares unless the consequent reduction of capital is effected by an approval of at least 75% of its shareholders voting on the matter in accordance with the Companies Act, 1956 and is also sanctioned by a High Court of competent jurisdiction. Moreover, subject to certain conditions, a company is prohibited from giving, whether directly or indirectly and whether by means of a loan, guarantee, the provision of security or otherwise, any financial assistance for the purpose of or in connection with a purchase or subscription made or to be made by any person of or for any shares in the company or its holding company. However, pursuant to amendments to the Companies Act, companies have been empowered to purchase its own shares or other specified securities out of their free reserves, or the securities premium account or the proceeds of any shares or other specified securities (other than the kind of shares or other specified securities proposed to be bought back) subject to the following conditions:

- (i) the buy back should be authorized by the Articles of Association;
- (ii) a special resolution has been passed at our general meeting authorizing the buy back;
- (iii) the buy back is limited to 25% of the total paid up capital and free reserves;
- (iv) the debt owed by the company (including all amounts of unsecured and secured debt) is not more than twice the capital and free reserves after the buy back; and
- (v) the buy-back is in accordance with the Securities and Exchange Board of India (Buy-Back of Securities) Regulations, 1998.

The condition mentioned above in (ii) would not be applicable if the buy-back is for less than 10% of the total paid-up equity capital and free reserves of the company and provided that this buy-back has been authorized by the board of directors of the company. A company buying back its securities is required to extinguish and physically destroy the securities so bought back within seven days of the last date of completion of the buy-back. Further, a company buying back its securities is not permitted to buy-back any securities for a period of one year from the buy-back and to issue securities for six months. The aforesaid restriction relating to the one year period does not apply to a buyback authorized by a special resolution of the shareholders in general meeting. Every buy-back has to be completed within a period of one year from the date of passing of the special resolution or resolution of the Board, as the case may be.

A company is also prohibited from purchasing its own shares or specified securities through any subsidiary company including its own subsidiary companies or through any investment company (other than a purchase of shares in accordance with a scheme for the purchase of shares by trustees of or for shares to be held by or for the benefit of employees of the company) or if the company is defaulting on the repayment of deposit or interest, redemption of debentures or preference shares or payment of dividend to a shareholder or repayment of any term loan or interest payable thereon to any financial institution or bank, or in the event of non-compliance with other provisions of the Companies Act.

Liquidation Rights

Subject to the rights of creditors, workmen and of the holders of any other shares entitled by their terms of issue to preferential repayment over the shares, in the event of our winding up, the holders of our shares are entitled to be repaid the amounts of capital paid-up or credited as paid-up on these shares, or in case of shortfall, proportionately. All surplus assets after payments due to workmen, the holders of any preference shares and other creditors belong to the holders of the equity shares in proportion to the amount paid up or credited as paid-up on these shares respectively at the commencement of the winding-up.

C. Material Contracts.

Except as given below, neither Tata Motors Limited nor any of its consolidated subsidiaries or associated companies is a party to any material contract other than contracts entered into in the ordinary course of business:

the Tata Brand Equity and Business Promotion Agreement incorporated by reference into this annual report as Exhibit 4.1, which is described in Item 4.C of this annual report;

the agreement entered into by us with Mr. P.M. Telang for his appointment as Managing Director-India Operations, which is incorporated by reference into this annual report; as Exhibit 4.2;

the agreement for the sale and purchase of Jaguar and Land Rover, which is incorporated by reference in this annual report as Exhibit 4.3;

Table of Contents

the agreement dated May 27, 2010 entered into by us with Mr. Carl-Peter Forster included as Exhibit 4.4 in this annual report, and

the Secondment agreement dated June 1, 2010 entered into by Jaguar Land Rover with Mr. Carl-Peter Forster.

D. Exchange Controls.

General

Prior to June 1, 2000, foreign investment in Indian securities, including the acquisition, sale and transfer of securities of Indian companies, was regulated by the Foreign Exchange Regulation Act, 1973, or FERA, and the notifications issued by the Reserve Bank of India or RBI thereunder.

With effect from June 1, 2000, foreign investment in Indian securities is regulated by the Foreign Exchange Management Act 1999, or FEMA (as amended from time to time), and the rules, regulations and notifications made under FEMA. A person resident outside India can transfer any security of an Indian company or any other security to an Indian resident only under the terms and conditions specified in FEMA and the rules and regulations made thereunder or as permitted by the RBI.

The RBI issued the Foreign Exchange Management (Transfer or issue of Security by a Person Resident Outside India) Regulations 2000, or the Regulations, to regulate the issue of Indian securities including American depository receipts to persons resident outside India and the transfer of Indian securities by or to persons resident outside India. The Regulations provide that an Indian entity may issue securities to a person resident outside India or record in its books any transfer of security from or to such person only in the manner set forth in FEMA and the rules and regulations made thereunder or as permitted by the RBI.

Foreign Direct Investment

The Government of India, pursuant to its liberalization policy, set up the Foreign Investment Promotion Board, or the FIPB, to regulate all foreign direct investment into India. Foreign Direct Investment, means investment by way of subscription and/or purchase of securities of an Indian company by a non resident investor. FIPB approval is required for investment in some sectors, including housing, petroleum (other than refining), defense and strategic industries. Also, the following investments would require the prior permission of the FIPB:

investments, including a transfer of shares, in excess of specified sectoral caps;

investments by a foreign investor who has an existing joint venture or technology transfer/trade mark agreement in the same field as at January 12, 2005. However, prior FIPB approval will not be required in case of investment made by a venture capital fund registered with SEBI or where the investment in the existing joint venture is less than 3.0 per cent. or where the existing joint venture is defunct or sick;

investments by an unincorporated entity;

investment in industries for which industrial licensing is compulsory; and

all proposals relating to acquisition of shares of an Indian company by a foreign investor (including individuals of Indian nationality or origin residing outside India (a Non-Resident Indian), the activities of which company are not under the automatic route under existing Indian foreign investment policy or where the Indian company is engaged in the financial services sector or where the acquisition of shares attracts the provisions of the Takeover Code. However, the prior permission of the FIPB is not required anymore for the transfer of shares from residents to non-residents in the financial services sector or, in transactions subject to the Indian Takeover Code in cases where approvals are required from the RBI, under the Takeover Code, or the Insurance Regulatory and Development Authority.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Subject to certain exceptions, Foreign Direct Investment and investment by individuals of Indian nationality or origin residing outside India, or Non-Resident Indians, in Indian companies does not require the prior approval of the FIPB or the RBI. The Government has indicated that in all cases where Foreign Direct Investment is allowed on an automatic basis without FIPB approval the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The foregoing description applies only to an issuance of shares by, and not to a transfer of shares of, Indian companies.

Table of Contents

The Government has set up the Foreign Investment Implementation Authority, or the FIIA in the Ministry of Commerce and Industry. The FIIA has been mandated to (i) translate foreign direct investment approvals into implementation, (ii) provide a proactive one-stop after-care service to foreign investors by helping them obtain necessary approvals, (iii) sort out operational problems and (iv) meet with various government agencies to find solutions to foreign investment problems and maximize opportunities through a co-operative approach.

Pricing

The price of shares of a listed Indian company issued to non-residents under the foreign direct investment scheme on an automatic basis cannot be less than the price worked out in accordance with the guidelines issued by the SEBI for the preferential allotment of shares where the shares of such company are listed.

Every Indian company issuing shares or convertible debentures in accordance with the Regulations is required to submit a report to the RBI within 30 days of receipt of the consideration and another report within 30 days from the date of issue of the shares to the non-resident purchaser.

The above description applies only to an initial issue of shares or convertible debentures by an Indian company.

Portfolio Investment by Foreign Institutional Investors

In September 1992, the Government issued guidelines that enable foreign institutional investors, including institutions such as pension funds, investment trusts, asset management companies, nominee companies and incorporated/institutional portfolio managers referred to as Foreign Institutional Investors, or FIIs, to make portfolio investments in all securities of listed and unlisted companies in India. Investments by registered Foreign Institutional Investors or Non-Resident Indians made through a stock exchange are known as Portfolio Investments. Foreign investors wishing to invest and trade in Indian securities in India under these guidelines are required to register with the SEBI and obtain a general permission from the RBI under the Foreign Exchange Management Act, 1999. However, since the SEBI provides a single window clearance, a single application must be made to the SEBI. Foreign investors are not necessarily required to register with the SEBI under the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations 1995 (the Foreign Institutional Investor Regulations) as Foreign Institutional Investors and may invest in securities of Indian companies pursuant to the Foreign Direct Investment route discussed above.

Foreign Institutional Investors who are registered with the SEBI are required to comply with the provisions of the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations, 1995, or Foreign Institutional Investor Regulations. A registered foreign institutional investor may buy, subject to the ownership restrictions discussed below, and sell freely securities issued by any Indian company, realize capital gains on investments made through the initial amount invested in India, subscribe to or renounce rights offerings for shares, appoint a domestic custodian for custody of investments made and repatriate the capital, capital gains, dividends, income received by way of interest and any compensation received towards sale or renunciation of rights offerings of shares. A Foreign Institutional Investor may not hold more than 10% of the total issued capital of a company in its own name; a corporate/individual sub-account of the Foreign Institutional Investor may not hold more than 5% of the total issued capital of a company, and a broad based sub-account may not hold more than 10% of the total issued capital of a company. The total holding of all Foreign Institutional Investors in a company is subject to a cap of 24% of the total paid up capital of a company, which can be increased to the relevant sectoral cap/ceiling applicable to the said company under the Foreign Direct Investment Regime with the passing of a special resolution by the shareholders of the company in a general meeting.

FIIs are permitted to purchase shares and convertible debentures, subject to the FII limits, of an Indian company either through:

a public offer, where the price of the shares to be issued is not less than the price at which the shares are issued to Indian residents, or

a private placement, where the price of the shares to be issued is not less than the price according to the terms of the relevant guidelines or the guidelines issued by the former Controller of Capital Issues.

Registered FIIs are generally subject to tax under Section 115AD of the Income Tax Act of 1961. There is uncertainty under Indian law as to the tax regime applicable to FIIs that hold and trade in ADSs and Shares. See Item 10.E Taxation Taxation of Capital Gains and Losses Indian Taxation .

Table of Contents

Portfolio Investment by Non-Resident Indians

A variety of methods for investing in shares of Indian companies are available to Non-Resident Indians. These methods allow Non-Resident Indians to make Portfolio Investments in shares and other securities of Indian companies on a basis not generally available to other foreign investors. In addition to Portfolio Investments in Indian companies, non-resident Indians may also make foreign direct investments in Indian companies pursuant to the Foreign Direct Investment route discussed above.

Transfer of shares and convertible debentures of an Indian company by a person resident outside India

The Government has granted general permission to persons residing outside India to transfer shares and convertible debentures held by them to an Indian resident, subject to compliance with certain terms and conditions and reporting requirements. A resident who wishes to purchase shares from a non-resident must, pursuant to the relevant notice requirements, file a declaration with an authorised dealer in the prescribed Form FC-TRS, together with the relevant documents and file an acknowledgment thereof with the Indian company to effect transfer of the shares to his name. However, in such cases, the person to whom the shares are being transferred is required to obtain the prior permission of the Central Government of India to acquire the shares if such person has an existing venture in the same field as at January 12, 2005 (subject to the exceptions set out above). Further, a non-resident may transfer any security held by such resident to a person resident in India by way of gift.

Moreover, the transfer of shares between an Indian resident and a non-resident (except NRI) does not require the prior approval of the Government or RBI, provided that: (i) the activities of the investee company are under the automatic route pursuant to FDI Policy and the transfer is not subject to regulations under the Indian Takeover Code; (ii) the non-resident shareholding complies with sector limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Indirect Foreign Investment

In April 2010, the Indian Government issued the Consolidated FDI Policy (Policy) setting out guidelines for foreign investment in India. The Policy *inter alia* prescribes the guidelines for (i) the calculation of total indirect foreign investment in Indian companies, (ii) transfer of ownership or control of Indian companies in sectors with caps from resident Indian citizens to non-resident entities and (iii) guidelines on downstream investments by Indian companies. Pursuant to the Policy, for the purposes of computation of indirect foreign investment in an Indian company, foreign investments in its parent company, by FIIs (holding as of March 31, 2010), NRIs, ADRs, GDRs, FCCBs, FDI, convertible preference shares and convertible currency debentures are required to be taken together.

Sponsored ADR Schemes

By notification dated November 23, 2002, the RBI has permitted existing shareholders of Indian companies to sell their shares through the issuance of ADRs against the block of existing shares of the Indian company, subject to the following conditions:

The facility to sell the shares would be available *pari passu* to all categories of shareholders.

The sponsoring company whose shareholders propose to divest existing shares in the overseas market through issue of ADRs will give an option to all its shareholders indicating the number of shares to be divested and the mechanism how the price will be determined under the ADR norms. If the shares offered for divestment are more than the pre-specified number to be divested, shares would be accepted from the existing shareholders in proportion to their existing shareholdings.

The proposal for divestment of the shares would have to be approved by a special resolution of the Indian company.

The proceeds of the ADR issue raised abroad shall be repatriated into India within a period of one month from the closure of the issue. However, the proceeds of the ADR issue can also be retained abroad to meet the future foreign exchange requirements of the company and by a recent notification this facility has been extended indefinitely until further notice.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The issue related expenses in relation to public issue of ADRs under this scheme would be subject to a ceiling of 4% of the issue size in the case of public issues and 2% of the issue size in the case of private placements. The issue related expenses would include underwriting commissions, lead managers charges, legal expenses and reimbursable expenses. The issue expenses shall be passed on to the shareholders participating in the sponsored issue on a *pro rata* basis.

Table of Contents

Transfer of ADRs by Non-residents

The Ministry of Finance, Government of India, has granted general permission for the transfer of ADRs outside India and also permitted non-resident holders of ADRs to surrender ADRs in exchange for the underlying shares. Pursuant to the terms of the relevant deposit agreement an investor who surrenders ADRs and withdraws shares is permitted to re-deposit such shares subject to the total issued ADRs and obtain ADRs at a later time.

Fungibility of ADRs/GDRs

In March 2001, the RBI permitted the re-conversion of shares of Indian Companies into ADRs/GDRs, subject to the following conditions:

the Indian company has issued ADRs/GDRs;

the shares of the Indian company are purchased by a registered stock broker in India in the name of the Depository, on behalf of the non-resident investor who wishes to convert such shares into ADRs/GDRs;

shares are purchased on a recognized stock exchange;

the shares are purchased with the permission of the custodian of the ADRs/GDRs of the Indian company and are deposited with the custodian;

the issuer company has authorized the custodian to accept shares from non-resident investors for re-issuance of ADRs/GDRs;

the number of shares so purchased do not exceed the ADRs/GDRs converted into underlying shares, and are in compliance with the sectoral caps applicable under the Foreign Direct Investment regime; and

the non-resident investor, broker, custodian and the overseas depository comply with the provisions of the Depository Receipt Mechanism and the guidelines issued thereunder from time to time.

Also the RBI has prescribed that the domestic custodians are the entity required to ensure compliance with the RBI guidelines and to file reports with the RBI from time to time. The domestic custodian is also required to perform the following functions:

provide a certificate to the RBI and the SEBI stating that the sectoral caps for foreign investment in the relevant company have not been breached;

monitor the total number of ADRs/GDRs that have been converted into underlying shares by non-resident investors;

liaise with the issuer company to ensure that the foreign investment restrictions, if any, are not being breached; and

file a monthly report about the ADRs/GDRs transactions under the two-way fungibility arrangement with the RBI and the SEBI.

E. Taxation

This section describes the material U.S. federal income tax consequences to U.S. holders (as defined below) and the Indian stamp duty and income and service tax consequences to non-residents (as defined below) of owning shares or ADSs. It applies to you only if you hold your shares or ADSs as capital assets for tax purposes. This section does not apply to you if you are a member of a special class of holders subject to special rules, including:

a dealer in securities,

a trader in securities that elects to use a mark-to-market method of accounting for securities holdings,

a tax-exempt organization,

a life insurance company,

a person liable for alternative minimum tax,

a person that actually or constructively owns 10% or more of our voting stock,

a person that holds shares or ADSs as part of a straddle or a hedging or conversion transaction, or

a U.S. holder (as defined below) whose functional currency is not the U.S. dollar.

Table of Contents

With regard to United States tax, the following discussion addresses only the material U.S. federal income tax consequences for persons that are U.S. holders. You are a U.S. holder if you are a beneficial owner of shares or ADSs and you are, for U.S. federal income tax purposes:

a citizen or resident of the United States,

a domestic corporation,

an estate whose income is subject to U.S. federal income tax regardless of its source, or

a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

With regard to Indian tax, the following discussion addresses only the tax consequences for persons that are non-residents of India, as defined in the Indian Income Tax Act of 1961 (the Income Tax Act), and is based on the provisions of Section 115AC and other applicable provisions of the Income Tax Act and the Issue of Foreign Currency Convertible Bonds and Ordinary Shares (Through Depository Receipt Mechanism) Scheme, 1993 promulgated by the Government of India (together, the Section 115AC Regime).

If a partnership holds shares or ADSs, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. If you hold shares or ADSs as a partner in a partnership, you should consult your tax advisor with regard to the U.S. federal income tax treatment of an investment in our shares or ADSs.

This discussion addresses only U.S. federal income taxation and Indian stamp duty and income and service taxation. In addition, this section is based in part upon the representations of the depository and the assumption that each obligation in the deposit agreement F and any related agreement will be performed in accordance with its terms.

The Direct Tax Code 2010, or DTC, proposes to replace the existing Income Tax Act, 1961, with a view to simplify and rationalize the tax provisions into one unified rate structure. The DTC which was placed before the Indian parliament for debate and discussion on August 30, 2010 is proposed to come into effect from April 1, 2012. The various proposals included in DTC are subject to review by Indian parliament and as such impact if any, is not quantifiable at this stage.

This summary is not intended to constitute a complete analysis of the individual tax consequences to non resident holders for the acquisition, ownership and sale of ADSs and equity shares.

Taxation of Dividends

Indian Taxation

Dividends paid to non-residents of India will not be subject to Indian tax. However, the Company will be liable to pay a dividend distribution tax, currently at the rate of 15% (plus a surcharge at 10% and an additional education tax (cess) at the rate of 3% on the sum of the dividend distribution tax and surcharge) on the total amount distributed as a dividend. The effective rate of dividend distribution tax is 17%.

Distributions to non-residents of India of additional ADSs or shares or rights to subscribe for such shares made with respect to ADSs or shares are not subject to Indian tax.

U.S. Federal Income Taxation

Under the U.S. federal income tax laws, and subject to the passive foreign investment company (PFIC) rules described below, if you are a U.S. holder, the gross amount of any dividend we pay out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) is subject to U.S. federal income taxation. If you are a non-corporate U.S. holder, dividends paid to you in taxable years beginning before January 1, 2011, that constitute qualified dividend income will be taxable to you at a maximum tax rate of 15% provided that you hold

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

the shares or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meet other holding period requirements. Dividends we pay with respect to our shares or ADSs generally will be qualified dividend income.

Table of Contents

The dividend is taxable to you when you, in the case of shares, or the Depository, in the case of ADSs, receive the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend distribution that you must include in your income as a U.S. holder will be the U.S. dollar value of the rupee payments made, determined at the spot rupee/US dollar rate on the date the dividend distribution is includible in your income, regardless of whether the payment is in fact converted into US dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date you include the dividend payment in income to the date you convert the payment into US dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for US federal income tax purposes, will be treated as a non-taxable return of capital to the extent of your basis in the shares or ADSs and thereafter as capital gain.

For foreign tax credit purposes, dividends will generally be income from sources outside the United States and will, depending on your circumstances, be either passive or general income for purposes of computing the foreign tax credit limitation allowable to you.

Distributions of additional shares to you with respect to shares or ADSs that are made as part of a pro rata distribution to all of our shareholders generally will not be subject to U.S. federal income tax.

Taxation of Capital Gains and Losses

Indian Taxation

Capital Gains. Under Section 115AC and other applicable provisions of the Income Tax Act, any gain realized on the sale outside India of the ADSs from one non-resident of India to another non-resident of India is not subject to Indian capital gains tax. However, it is unclear whether a capital gain derived from the sale of rights by a non-resident of India to another non-resident of India outside of India may be subject to Indian capital gains tax.

Capital gains arising to the non-resident investor on the transfer of equity shares (including shares received in exchange of the ADSs) whether in India or outside India to a non-resident investor or Indian resident, will be liable for income tax under the provisions of the Income Tax Act.

Equity shares (including shares issuable on the exchange of the ADSs) held by a non-resident investor for a period of more than 12 months are treated as long-term capital assets. If the equity shares are held for a period of 12 months or less, the capital gains arising on the sale thereof are to be treated as short-term capital gains. A non-resident holder's holding period (for purposes of determining the applicable Indian capital gains tax rate) in respect of shares received in exchange for ADSs commences on the date of the advice of withdrawal of such shares by the relevant depository to its custodian.

For the purpose of computing capital gains tax on the sale of the equity shares, the cost of acquisition of equity shares received in exchange for ADSs will be determined on the basis of the prevailing price of the shares on the Indian Stock Exchanges as on the date on which the relevant depository gives notice to its custodian for the delivery of such equity shares upon redemption of the ADSs, while the cost of acquisition of shares directly converted from the ADSs will be determined on the basis of the price prevailing on the Indian Stock Exchanges on the date of conversion into equity shares.

Gain realized on the sale of listed equity shares held for more than 12 months will not be subject to Indian capital gains tax if the Securities Transaction Tax (STT) has been paid on the transaction. The STT will be levied on and collected by a domestic stock exchange on which equity shares are sold at the rate of 0.025% to 0.125% depending upon the nature of the transaction.

Any gain realized on the sale of equity shares held for more than 12 months on which no STT has been paid will be subject to Indian capital gains tax at the rate of 10% plus applicable surcharge on income tax and education cess at the applicable rates.

Capital gains realized in respect of equity shares held (calculated in the manner set forth in the prior paragraph) for 12 months or less (short-term gain) on which STT is paid in the manner and rates set out above, is subject to tax at the rate of 10% plus applicable surcharge on income tax and an education cess at the applicable rate. In the event that no STT is paid, short term gain is subject to tax at variable rates with the maximum rate of 40% plus applicable rate of surcharge on income tax and education cess at the rate of 3% of the tax and surcharge. The actual rate of tax on short term gains depends on a number of factors, including the legal status of the non-resident holder and the type of income chargeable in India.

Table of Contents

Tax on capital gains is to be deducted at source by the person paying for the shares in accordance with the relevant provisions of the Income Tax Act.

Capital Losses. The Section 115AC Regime does not deal with capital losses arising on a transfer of shares. In general terms, losses arising from a transfer of a capital asset in India can only be set off against capital gains and not against any other income. A short-term capital loss can be set off against a capital gain, whether short-term or long-term. However, long-term capital loss can only be set off against long-term capital gain and not against short-term capital gain. To the extent that the losses are not absorbed in the year of transfer, they may be carried forward for a period of eight assessment years immediately succeeding the assessment year for which the loss was first determined and may be set off against the capital gains assessable for such subsequent assessment years. In order to set off capital losses in this manner, the non-resident investor would be required to file appropriate and timely tax returns in India. The long-term capital loss arising on a sale of equity shares in respect of which STT is paid may not be available for set-off against any capital gains.

U.S. Federal Income Taxation

Generally, Subject to the PFIC rules discussed below, if you are a U.S. holder and you sell or otherwise dispose of your shares or ADSs, you will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the dollar value of the amount that you realize and your tax basis, determined in dollars, in your shares or ADSs. Capital gain of a non-corporate U.S. holder, is generally taxed at preferential rates where the holder has a holding period greater than one year. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

Passive Foreign Investment Companies. We believe that the Shares and ADSs should not be treated as stock of a PFIC for U.S. federal income tax purposes, but this conclusion is a factual determination that is made annually and thus may be subject to change. If we were to be treated as a PFIC, then unless you elect to be taxed annually on a mark-to-market basis with respect to your shares or ADSs, gain realized on the sale or other disposition of your shares or ADSs would in general not be treated as capital gain. Instead, if you are a U.S. holder, you would be treated as if you had realized such gain and certain excess distributions ratably over your holding period for the shares or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, together with an interest charged in respect of the tax attributable to each such year. With certain exceptions, your shares or ADSs will be treated as stock in a PFIC if we were a PFIC at any time during your holding period in your shares or ADSs. Dividends that you receive from us will not be eligible for the special tax rates applicable to qualified dividend income if we are treated as a PFIC with respect to you either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

Indian Tax Treaties

The provisions of the tax treaty entered into by India and the country of residence of the non-resident investor will be applicable to the extent they are more beneficial to the non-resident investor.

Dividend income is not subject to tax in India in the hands of the non-resident holder of the shares. If any shares are held by a non-resident investor following withdrawal thereof from the depository facility under the Deposit Agreement, the provisions of a tax treaty, if any, entered into by India and the country of residence of such non-resident investor will be applicable to determine the taxation of any capital gain arising from a transfer of such shares.

However, during the period of fiduciary ownership of shares in the hands of the overseas depository bank, the provisions of the tax treaty entered into by India and the country of residence of the overseas depository bank will be applicable to determine the taxation of any capital gains in respect of ADSs.

Indian Stamp Duty

Under Indian law, any transfer of ADSs will be exempt from liability to Indian stamp duty. Purchasers of shares who seek to register such shares on the share register of the company are required to pay Indian stamp duty at the rate of Rs. 0.25 for every Rs. 100 or part thereof of the market value of such shares. In order to register a transfer of shares in physical form with the company, it is necessary to present a stamped deed of transfer. An acquisition of shares in physical form from the Depository in exchange for ADSs representing such shares will not render an investor liable to Indian stamp duty but the company will be required to pay stamp duty at the applicable rate on the share certificate. However, since our shares are compulsorily deliverable in dematerialized form (except for trades of up to 500 shares which may be delivered in physical form), no stamp duty is payable on the acquisition or transfer of shares in dematerialized form.

Table of Contents

Indian Service Tax

Brokerage or commission fees paid to stockbrokers in India in connection with the sale or purchase of shares are now subject to an Indian service tax of 12% (plus a 2% education cess). A stockbroker is responsible for collecting such service tax at such rate and for paying the same to the relevant authority.

F. Dividends and Paying Agents

Not applicable.

Not applicable.

H. Documents on Display.

You may review a copy of this annual report at the Securities and Exchange Commission's public reference room at 100 F Street, N.E., Washington, D.C. 20549. You may call the SEC at 1-800-732-0330 for additional information on how to obtain copies of all or any portion of the documents we file with or furnish to the SEC. The Securities and Exchange Commission also maintains a web site www.sec.gov that contains reports, proxy statements and other information regarding registrants that file electronically with the Securities and Exchange Commission.

We are subject to the information requirements of the Securities Exchange Act of 1934 and, in accordance therewith, will file annual reports on Form 20-F within the time specified by the Securities and Exchange Commission and furnish other reports and information on Form 6-K with the Securities and Exchange Commission. These reports and other information can be inspected at the public reference room at the Securities and Exchange Commission. You can also obtain copies of this material from the public reference room or by calling or writing the Securities and Exchange Commission upon payment of a prescribed fee. As a foreign private issuer, we are exempt from the rules under the Securities Exchange Act of 1934 prescribing the furnishing and content of proxy statements to shareholders.

I. Subsidiary Information

Not applicable.

Item 11. Quantitative and Qualitative Disclosures about Market Risk

Our exposure to financial risks derives primarily from changes in interest rates and foreign exchange rates. To mitigate these risks, we utilize derivative financial instruments, including interest rate option contracts and currency swap agreements, the application of which is primarily for hedging purposes and not for speculative purposes.

Commodity price risk

Commodity price risk is the possibility of impact from changes in the price of commodities, such as non-ferrous metals (like aluminum), ferrous alloys (like steel) and others (like rubber), which we use in production of automotive vehicles and their components. We do not use derivative instruments to hedge the price risk associated with the purchase of these commodities.

See Note 38 of our audited consolidated financial statements for additional disclosures on financial instruments including disclosure on fair value of financial instruments.

Item 12. Description of Securities Other than Equity Securities.

A. Debt Securities.

Not applicable.

B. Warrants and Rights.

Table of Contents**C. Other Securities.**

Not applicable.

D. American Depositary Shares.*Fees Payable by ADS Holders*

Citibank, N.A., the depository of our ADR program, collects fees for issuance and cancellation of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them on such fees as per the Depositary agreement.

An ADS holder is required to pay the following service fees to the depository:

Service	Fees
Issuance of ADSs, Cancellation of ADSs, Distribution of ADSs pursuant to stock dividends, free stock distributions or exercise of rights and Distribution of securities other than ADSs or rights to purchase additional ADSs	Up to US\$0.05 per ADS issued
Distribution of cash dividends or other cash distributions	Up to US\$0.02 per ADS held
Depositary services	Up to US\$0.02 per ADS held on the applicable

record date(s) established by the depository

An ADS holder will also be responsible to pay certain fees and expenses incurred by the depository bank and certain taxes and governmental charges such as:

Service	Fees
Transfer and registration on the share register (for example, upon deposit and withdrawal of ordinary shares)	Registration and transfer fees
Converting foreign currency into US dollars	
Cable, telex and fax transmissions and delivery expenses	Expenses incurred by the depository
Transfer of securities (for example, when ordinary shares are deposited or withdrawn from deposit)	Taxes and duties for the transfer of securities
Delivery or servicing of ordinary shares on deposit	Fees and expenses incurred by the depository

The fees and charges an ADS holder may be required to pay may vary over time and may be changed by us and by the depository bank. ADS holders will receive prior notice of such changes.

Fees and Other Payments Made by the Depositary to U.S.

For Fiscal 2010, we have received from Depositary US\$ 2.31 million for standard out of pocket maintenance cost for ADR Programme consisting of continuing annual stock exchange listing fees, special investor promotion activities & issue related expenses, cost for preparing and audit of IFRS accounts, legal/ accounting fees associated with the foreign listing, miscellaneous expenses such as costs associated with voting of ADRs holders, payment made to proxy firms, etc.

Item 15: Controls and Procedures.

Disclosure Controls and Procedures

Tata Motors performed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures as of March 31, 2010. Based on this evaluation, our Chief Executive Officer and Managing Director, Mr. Carl-Peter Forster, our Managing Director - India Operations, Mr. P. M. Telang and our Chief Financial Officer, Mr. C. Ramakrishnan have concluded that our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act) are effective.

Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective, as of March 31, 2010, to provide reasonable assurance that the information required to be disclosed in filings and submissions under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions about required disclosure.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with IFRS. Our internal control over financial reporting includes policies and procedures that:

- i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets;
- ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Our management conducted an assessment of the effectiveness of our internal control over financial reporting based on the framework established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that our internal control over financial reporting as at March 31, 2010 is effective.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

The effectiveness of our internal control over financial reporting as at March 31, 2010 has been audited by Deloitte Haskins & Sells, an independent registered public accounting firm, as stated in their report appearing on the accompanying consolidated financial statements in Item 18, which expresses an unqualified opinion on the effectiveness of our internal control over financial reporting as at March 31, 2010.

Changes in Internal Control over Financial Reporting

During the period covered by this annual report, there were no changes in our internal control over financial reporting that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents**Item 16A. Audit Committee Financial Expert.**

Our Board has determined that Mr. Palia, an independent director and a member of our Audit Committee, is an audit committee financial expert as defined under the applicable rules of the SEC issued pursuant to Section 407 of the Sarbanes Oxley Act of 2002.

Item 16B. Code of Ethics.

We have adopted the Tata Code of Conduct (hereinafter referred as to the Code) a written Code of Ethics which is applicable to all our employees, including the chief executive officer, chief financial officer, principal accounting officer, senior management, as well as all officers working in accounts, finance, treasury, internal audit, taxation, legal, secretarial, investor relations, Disclosure Committee, Audit Committee, Board of Directors and other departments. We have a separate Code of Conduct applicable to Non-Executive Directors. The Codes are available at all our offices and are publicly available on our website www.tatamotors.com.

In August 2004, our Audit Committee adopted a Policy (the Whistle Blower Policy) that provided a formal mechanism for all our employees to approach our Management (or the Audit Committee in cases where the concern involves the Senior Management) and make protective disclosures to the Management about unethical behaviour, actual or suspected fraud or violations of the Company's Code of Conduct or ethics policy. The Whistle Blower Policy was updated on January 29, 2009. The Whistle Blower Policy is an extension of the Tata Code of Conduct, which requires every employee to promptly report to the Management any actual or possible violation of the Code or an event such employee becomes aware of that could affect our business or reputation. The disclosures reported are addressed in the manner and within the time frames prescribed in the Whistle Blower Policy. The said policy is available on our website www.tatamotors.com.

Item 16C. Principal Accountant Fees and Services.

Our financial statements prepared in accordance with IFRS, are audited by Deloitte Haskins & Sells (Registration No. 117366W), or DHS, a firm registered with the Public Company Accounting Oversight Board (PCAOB) in the United States and an Indian firm of Chartered Accountants registered with the Institute of Chartered Accountants of India (ICAI).

DHS has served as our independent public accountant for each of the years ended March 31, 2010 and March 31, 2009, for which audited financial statements appear in this annual report.

The following table presents the aggregate fees for professional services and other services rendered by DHS and the various member firms of Deloitte to us including some of our subsidiaries in Fiscal 2010 and 2009.

	2010 US\$ in million	2010 Rs. in million	2009	
Audit Fees	6.3	284.9	263.5	Audit and review of financial statements
Tax Fees	0.2	7.8	16.0	Tax audit, certification of foreign remittances and tax advisory services
All Other Fees	0.2	10.1	8.0	Other certifications and advisory services
Total	6.7	302.8	287.5	

Audit Committee pre-approval for services rendered by independent accountants:

We have adopted a policy for pre-approval of services to be rendered by our independent accountants for us and our subsidiaries based on an elaborate procedure for ensuring auditor independence and objectivity.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

At the beginning of each year, the Audit Committee approves the proposed services, including the nature, type and scope of services contemplated and/or the related fees to be rendered by these firms during the year.

In addition, Audit committee pre-approval is also required for those engagements that may arise during the course of the year that are outside the scope of the initial services and such fees are pre-approved by the audit Committee.

We do not engage our independent accountants for prohibited services .

Our Audit Committee recommends the appointment and compensation of independent accountants.

In case of urgent requirements, our CFO and the Chairman of our Audit Committee jointly approve any services that may be rendered by our independent accountants or their member firms and such services are subsequently ratified at the next Audit Committee meeting.

Table of Contents

The pre-approval is not required where the fees proposed to be paid for the non-audit services do not exceed 5% of the total amount of fees paid by us to our independent accountants and their member firms during the Fiscal year, provided that such services were not recognized as non audit services at the time of the engagement of services. Such services are also brought to the attention of the Audit Committee at the next meeting.

Item 16D. Exemptions from the Listing Standards for Audit Committees.
Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.
None.

Item 16F. Change in Registrant's Certifying Accountant.
None.

Item 16G. Corporate Governance.

The following is a summary comparison of significant differences between our corporate governance practices and those required by the NYSE for non-U.S. issuers.

Independent directors: The Board has determined the independence of its directors pursuant to applicable Indian listing requirements. Six directors of the Board of Directors are independent directors pursuant to such requirements. Under such requirements, a non-executive director is considered independent if he:

apart from receiving director's remuneration, does not have any material pecuniary relationships or transactions with us or our promoters, our directors, our senior management or our holding company, its subsidiaries and associates which may affect the independence of the director;

is not related to promoters or person occupying management position at the board level or at one level below the board;

has not been our executive in the immediately preceding three financial years;

is not a partner or an executive or was not a partner or an executive during the preceding three years, of our statutory audit firm or internal audit firm or a legal/consulting firm that has a material association with us.

is not a material supplier, service provider or customer or a lessor or lessee of the Company, which may affect their independence; and

is not our substantial shareholders, owning two percent or more of our voting shares.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

is not below 21 years of age.

Non-management directors meetings: There is no such requirement under applicable Indian legal requirements.

Remuneration Committee and the Audit Committee: The requisite number of members of our Remuneration Committee are independent, as defined under applicable Indian legal requirements. All members of our Audit Committee are independent as defined under Rule 10A-3 under the Exchange Act. The constitution and main functions of these committees as approved by our Board are described above and, we believe, comply with the spirit of the NYSE requirements for non-U.S. issuers.

Item 17. Financial Statements.

We have elected to provide the financial statements and related information specified in Item 18 in lieu of Item 17.

Item 18. Financial Statements.

The information required by this item is set forth beginning on page F-1 of this annual report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Tata Motors Limited

Mumbai, India

We have audited the accompanying consolidated balance sheets of Tata Motors Limited and subsidiaries (the Company or Tata Motors) as of March 31, 2010 and 2009, and the related consolidated statements of operations, comprehensive income / loss, cash flows, and changes in equity for each of the three years in the period ended March 31, 2010. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Tata Motors Limited and subsidiaries as of March 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2010, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

As discussed in Note 2(v), the Company changed its method of accounting for changes in ownership interests in subsidiaries and business combinations in the year ended March 31, 2010.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of March 31, 2010, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated September 29, 2010, expressed an unqualified opinion on the Company's internal control over financial reporting.

Our audit for the year ended and as of March 31, 2010, also comprehended the translation of Indian rupee amounts into United States dollar amounts and in our opinion, such translation has been made in conformity with the basis stated in Note 2(w). The translation of the consolidated financial statements amounts into United States dollars have been made solely for the convenience of the readers.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Tata Motors Limited

Mumbai, India

We have audited the internal control over financial reporting of Tata Motors Limited and subsidiaries (the Company) as of March 31, 2010, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Item 15 under Controls and Procedures of the accompanying Form 20-F titled Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2010, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended March 31, 2010 of the Company and our report dated September 29, 2010, expressed an unqualified opinion on those financial statements.

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements

1. Background and operations

Tata Motors Limited and its subsidiaries, collectively referred to as (the Company or Tata Motors), designs, manufactures and sells a wide range of automotive vehicles. The Company provides financing for the vehicles sold by dealers of the Company in certain markets. The Company also manufactures engines for industrial and marine applications, as well as construction equipments, including hydraulic excavators, cranes and wheel loaders, aggregates such as axles and transmissions for commercial vehicles and factory automation equipment, and provides information technology services (also refer note 30 regarding sale of controlling equity interest in Telco Construction Equipment Company Limited (Telcon) a subsidiary engaged in manufacture and sale of construction equipments).

Tata Motors Limited is a public limited company incorporated and domiciled in India and has its registered office at Mumbai, Maharashtra, India.

The consolidated financial statements were approved by the Board of Directors and authorised for issue on September 29, 2010.

On June 2, 2008, the Company acquired Jaguar Land Rover businesses (referred to as JLR) which included three manufacturing facilities and two advanced engineering centers in the UK, and a worldwide sales network (refer

note 35(a)).

The financial statements as of and for the year ended March 31, 2009, include the operations of acquired businesses of Jaguar Land Rover , Serviplem S.A and Comoplesa Lebrero S.A. from the respective date of acquisition and hence are not comparable with the year ended March 31, 2010 and March 31, 2008 (refer note 35).

As on March 31, 2010, Tata Sons Limited (or Tata Sons), together with its subsidiaries, owns 28.0% of the ordinary shares and 50.97% of A ordinary shares of Tata Motors Limited, and has the ability to significantly influence the Company s operations (refer note 25 for voting rights relating to ordinary shares and A ordinary shares).

2. Significant accounting policies

a. Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (referred to as IFRS) as issued by the International Accounting Standards Board (referred to as IASB).

b. Basis of preparation

The consolidated financial statements have been prepared on historical cost basis except for certain financial instruments measured at fair value.

c. Basis of consolidation

Subsidiaries

The consolidated financial statements include Tata Motors Limited and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The results of subsidiaries acquired or disposed of during the year are included in the consolidated financial statements from the effective date of acquisition and up to the effective date of disposal, as appropriate.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Under the Jaguar Land Rover acquisition process in the financial year ended March 31, 2009, certain distribution divisions / National Sales Companies were carved out of Ford entities and were to be transferred by Ford Motor Company upon completion of formalities and receipt of local regulatory approvals. As per the sale and purchase agreement, the Company is entitled to receive and was liable for post acquisition profits and losses and therefore, the results of operations and financial position of such divisions / companies are incorporated in the consolidated financial statements. These distribution divisions / National Sales Companies have been transferred in the current fiscal 2010.

F-12

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

Inter-company transactions and balances including unrealized profits are eliminated in full on consolidation.

Non-controlling interests in the net assets (excluding goodwill) of consolidated subsidiaries are identified separately from the Company's equity. The interest of non-controlling shareholders may be initially measured either at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis (refer note 2(v)). Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if it results in the non-controlling interest having a deficit balance (refer note 2(v)).

Changes in the Company's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Company's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company (refer note 2(v)).

When the Company loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. Amounts previously recognized in other comprehensive income in relation to the subsidiary are accounted for (i.e. reclassified to profit or loss or transferred directly to retained earnings) in the same manner as would be required if the relevant assets or liabilities were disposed of. The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IAS 39 *Financial Instruments: Recognition and Measurement* or, when applicable, the cost on initial recognition of an investment in an associate or jointly controlled entity (refer note 2(v)).

Associates and jointly controlled entities (equity accounted investees)

Associates are those entities in which the Company has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the Company holds between 20 and 50 percent of the voting power of another entity. Jointly controlled entities are those entities over whose activities the Company has joint control, established by contractual agreement and requiring unanimous consent for strategic financial and operating decisions.

Equity accounted investees are accounted for using the equity method and are recognized initially at cost. The Company's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Company's share of the income and expenses and equity movements of equity accounted investees, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Company's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee.

When the Company transacts with an associate or jointly controlled entity of the Company, unrealized profits and losses are eliminated to the extent of the Company's interest in its associate or jointly controlled entity.

d. Business combination

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. Acquisition related costs are recognized in profit or loss as incurred (refer note 2(v)). The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition are recognized at their fair value at the acquisition date, except certain assets and liabilities required to be measured as per the applicable standard.

Purchase consideration in excess of the Company's interest in the acquiree's net fair value of identifiable assets, liabilities and contingent liabilities is recognized as goodwill. Excess of the Company's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over the purchase consideration is recognized, after reassessment of fair value of net assets acquired, in the statement of

operations.

F-13

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

e. Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

- i) Note 11(3) Property, plant and equipment
- ii) Note 13 Impairment of goodwill
- iii) Note 14(1) Impairment of indefinite life intangible assets
- iv) Note 16 Recoverability/recognition of deferred tax assets
- v) Note 20 Provision for product warranty
- vi) Note 34 Assets and obligations relating to employee benefits
- vii) Note 38(a) and (d)(iv) Determination of fair value of conversion option

f. Revenue recognition

Revenue is measured at fair value of consideration received or receivable.

i. Sale of products

The Company recognizes revenues on the sale of products, net of discounts, sales incentives, customer bonuses and rebates granted, when products are delivered to dealers or when delivered to a carrier for export sales, which is when title and risks and rewards of ownership pass to the customer. Sale of products includes export and other recurring and non-recurring incentives from Governments (referred to as incentives). Sale of products is presented net of excise duty where applicable and other indirect taxes.

Revenues are recognized when collectability of the resulting receivable is reasonably assured.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Revenues include incentives of Rs. 5,725.7 million, Rs. 4,155.6 million and Rs. 3,040.4 million for the year ended March 31, 2010, March 31, 2009 and March 31, 2008, respectively.

ii. Finance revenues

Finance and service charges are accrued on the unpaid principal balance of finance receivables using the effective interest method.

g. Cost recognition

Costs and expenses are recognized when incurred and are classified according to their nature.

Expenditure capitalized represents employee costs, stores and other manufacturing supplies, and other expenses incurred for construction including product development undertaken by the Company.

h. Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

i) Product warranty expenses

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidences based on actions on product failures. The timing of outflows will vary as and when warranty claim will arise, being typically up to four years.

ii) Residual risk

In certain markets, the Company is responsible for the residual risk arising on vehicles sold by dealers under leasing arrangements. The provision is based on the latest available market expectations of future residual value trends. The timing of the outflows will be at the end of the lease arrangements being typically up to three years.

i. Foreign currency

These consolidated financial statements are presented in Indian Rupees, which is the functional currency of Tata Motors Limited.

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated monetary assets and liabilities are remeasured into the functional currency at the exchange rate prevailing on the balance sheet date. Exchange differences are recognized in the statement of operations except to the extent, exchange differences, which are regarded as an adjustment to interest costs on foreign currency borrowings, are capitalized as part of borrowing costs.

For the purpose of consolidation, the assets and liabilities of the Company's foreign operations, are translated to Indian Rupee at the exchange rate prevailing on the balance sheet date, and the income and expenses at the average rate of exchange for the period. Exchange differences arising are recognized as currency translation reserve under equity.

j. Income taxes

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the statement of operations except, when they relate to items that are recognized outside profit or loss (whether in other comprehensive income or directly in equity), in which case tax is also recognized outside profit or loss, or where they arise from the initial accounting for business combination. In the case of a business combination the tax effect is included in the accounting for the business combination.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

k. Earnings per share

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Partly paid up shares are included as fully paid equivalents according to the fraction paid up. Diluted earnings per share has been computed using the weighted average number of shares and dilutive potential shares, except where the result would be antidilutive.

F-15

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)*****l. Inventories***

Inventories (other than those recognized consequent to the sale of vehicles subject to repurchase arrangements) are valued at the lower of cost and net realizable value. Cost of raw materials and consumables are ascertained on a first in first out basis. Cost, including fixed and variable production overheads, are allocated to work-in-progress and finished goods determined on a full absorption cost basis. Net realizable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses.

Inventories include vehicles sold subject to repurchase arrangements. These vehicles are carried at cost to the Company and are amortized in changes in stocks and work in progress to their residual values (i.e. estimated second hand sale value) over the term of the arrangement.

m. Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

Freehold land is measured at cost and is not depreciated.

Cost includes purchase price, taxes and duties, labor cost and direct overheads for self constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is provided on a straight-line basis over estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

	Estimated useful life (years)
Buildings	20 to 40
Plant and equipment	9 to 30
Computers	3 to 6
Vehicles	3 to 10
Furniture and fixtures	3 to 20

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Depreciation is not recorded on capital work-in-progress until construction and installation are complete and the asset is ready for its intended use. Capital-work-in-progress includes capital advances.

n. Intangible assets

Intangible assets purchased including acquired in business combination, are measured at cost or fair value as of the date of acquisition where applicable less accumulated amortization and accumulated impairment, if any. Intangible assets with indefinite lives are reviewed annually to determine whether indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

Amortization is provided on a straight-line basis over estimated useful lives of the intangible assets.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The amortization period for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates.

Capital work-in-progress includes capital advances.

F-16

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

Customer related intangibles consist of order backlog and dealer network.

	Estimated amortization period
Patents and technological know-how	2 to 12 years
Order backlog	3 months
Dealer network	20 years
Intellectual property rights	7 to 9 years
Software	2 to 8 years

Internally generated intangible asset

Research costs are charged to the statement of operations in the year in which they are incurred.

Product development costs incurred on new vehicle platform, engines, transmission and new products are recognized as intangible assets, when feasibility has been established, the Company has committed technical, financial and other resources to complete the development and it is probable that asset will generate probable future economic benefits.

The costs capitalized include the cost of materials, direct labor and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Interest cost incurred is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortized over a period of 36 months to 120 months or on the basis of actual production to planned production volume over such period.

Capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment, if any.

o. Leases

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

Assets taken on finance lease

A finance lease is recognized as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Initial direct costs, if any, are also capitalized and, subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets taken on operating lease

Leases other than finance leases, are operating leases, and the leased assets are not recognized on the Company's balance sheet. Payments made under operating leases are recognized in the statement of operations on a straight-line basis over the term of the lease.

p. Impairment

i) Goodwill

Cash generating unit to which goodwill is allocated are tested for impairment annually at each balance sheet date, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to that unit and then to the other assets of the unit pro rata on the basis of carrying amount of each asset in the unit. Goodwill impairment loss recognized is not reversed in subsequent period.

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

ii) Property, plant and equipment and other intangible assets

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually at each balance sheet date, or earlier, if there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of operations.

As of March 31, 2010 and 2009, none of the Company's property, plant and equipment and intangible assets were considered impaired.

q. Employee benefits

i) Pension plans

The Jaguar Land Rover subsidiaries operate several defined benefit pension plans, which are contracted out of the second state pension scheme. The assets of the plan are held in separate trustee administered funds. The plans provide for monthly pension after retirement as per salary drawn and service period as set out in rules of each fund.

Contributions to the plans by the subsidiary group take into consideration the results of actuarial valuations. The plans with a surplus position at the year end have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognized.

A separate defined contribution plan is available to employees of a major subsidiary group, Jaguar Land Rover. Costs in respect of this plan are charged to the statement of operations as incurred.

ii) Gratuity

Tata Motors and some of its subsidiaries in India have an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. Tata Motors and such subsidiaries make annual contributions to gratuity funds established as trusts. Tata Motors and some of its subsidiaries in India account for the liability for gratuity benefits payable in the future based on an actuarial valuation.

iii) Superannuation

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Tata Motors and some of its subsidiaries in India have two superannuation plans, a defined benefit plan and a defined contribution plan. An eligible employee on April 1, 1996 could elect to be a member of either plan.

Employees who are members of the defined benefit superannuation plan are entitled to benefits depending on the years of service and salary drawn. The monthly pension benefits after retirement range from 0.75% to 2% of the annual basic salary for each year of service. Tata Motors and such subsidiaries account for superannuation benefits payable in future under the plan based on an actuarial valuation.

F-18

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

With effect from April 1, 2003, this plan was amended and benefits earned by covered employees have been protected as at March 31, 2003. Employees covered by this plan are prospectively entitled to benefits computed on a basis that ensures that the annual cost of providing the pension benefits would not exceed 15% of salary.

Separate irrevocable trusts are maintained for employees covered and entitled to benefits. Tata Motors and its subsidiaries contribute up to 15% of the eligible employees' salary to the trust every year. Such contributions are recognized as an expense when incurred. Tata Motors and such subsidiaries have no further obligation beyond this contribution.

iv) Bhavishya kalyan yojana (BKY)

Bhavishya Kalyan Yojana is an unfunded defined benefit plan for employees of Tata Motors and some of its subsidiaries. The benefits of the plan include pension in certain cases, payable upto the date of normal superannuation had the employee been in service, to an eligible employee at the time of death or permanent disablement, while in service, either as a result of an injury or as certified by the appropriate authority. The monthly payment to dependents of the deceased/disabled employee under the plan equals 50% of the salary drawn at the time of death or accident or a specified amount, whichever is higher. Tata Motors and these subsidiaries account for the liability for BKY benefits payable in the future based on an actuarial valuation.

v) Provident fund and family pension

In accordance with Indian law, eligible employees of Tata Motors and some of its subsidiaries are entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The contributions, as specified under the law, are made to the provident fund and pension fund set up as an irrevocable trust by Tata Motors and its subsidiaries or to respective Regional Provident Fund Commissioner and the Central Provident Fund under the State Pension scheme. Tata Motors and its subsidiaries are generally liable for any shortfall in the fund assets based on the government specified minimum rates of return or pension and recognizes such shortfall, if any, as an expense in the year incurred.

vi) Severance indemnity

Tata Daewoo Commercial Vehicle Company Limited (TDCV), a subsidiary company incorporated in Korea has an obligation towards severance indemnity, a defined benefit retirement plan, covering eligible employees. The plan provides for a lump sum payment to all employees with more than one year of employment equivalent to 30 days' salary payable for each completed year of service.

vii) Post-retirement medicare scheme

Under this unfunded scheme, employees of Tata Motors Limited and some of its subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from the Company as part of an Early Separation Scheme, on medical grounds or due to permanent disablement are also covered under the scheme. Tata Motors and such subsidiaries account for the liability for post-retirement medical scheme based on an actuarial valuation.

Actuarial gains and losses

Actuarial gains and losses relating to retirement benefit plans are recognized directly in other comprehensive income in the period in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognized in the statement of operations in the period in which they arise.

Measurement date

The measurement date of retirement plans is March 31.

F-19

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****r. Dividends**

Any dividend declared by Tata Motors Limited is based on the profits available for distribution as reported in the unconsolidated statutory financial statements of Tata Motors Limited prepared in accordance with Generally Accepted Accounting Principles in India (Indian GAAP). Further, Indian law mandates that dividend be declared out of distributable profits only after the transfer of a specified percentage of net income computed in accordance with current regulations to a general reserve. Accordingly, in certain years the net income reported in these financial statements may not be fully distributable. As of March 31, 2010 and March 31, 2009, the amounts available for distribution were Rs. 79,173.4 million and Rs. 60,213.0 million respectively.

s. Segments

The Company primarily operates in the automotive segment. The automotive segment comprises of two reportable segments i.e. Tata and other brand vehicles, including financing thereof and Jaguar Land Rover. Other operating segments do not meet the quantitative thresholds for disclosure and have been aggregated.

t. Financial instruments**i) Classification, initial recognition and measurement**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities.

Financial instruments are recognized on the balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognized at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognized in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Financial assets and financial liabilities at fair value through profit or loss: Derivatives, including embedded derivatives separated from the host contract, unless they are designated as hedging instruments, for which hedge accounting is applied, are classified into this category. These are measured at fair value with changes in fair value recognized in the statement of operations.

Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortized cost using the effective interest method less any impairment losses.

These includes trade receivables, finance receivables, balances with banks, short-term deposits with banks, other financial assets and investments with fixed or determinable payments.

Available-for-sale financial assets: Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial assets categories. Subsequently, these are measured at fair value and changes therein, other than impairment losses are recognized directly in other comprehensive income, net of applicable deferred income taxes.

Dividends from available- for-sale debt securities are recognized in the statement of operations when the right to receive payment has been established.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, are measured at cost.

When the financial asset is derecognized, the cumulative gain or loss in equity is transferred to the statement of operations.

F-20

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

Foreign currency convertible notes: Convertible notes issued in foreign currency are convertible at the option of the holder into Ordinary Shares, Global Depository Shares, American Depository Shares or Qualified Securities of the Company as per the terms of the issue. Conversion option which is not settled by exchanging a fixed amount of cash for a fixed number of shares is accounted for separately from the liability component as derivative and initially accounted for at fair value. The liability component is recognized initially at the difference between the fair value of the note and the fair value of the conversion option. Directly attributable costs are allocated to the liability component and the conversion option in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of the foreign currency convertible notes is measured at amortized cost using the effective interest method. The conversion option is subsequently measured at fair value at each reporting date or on the date of conversion, as applicable, with changes in fair value recognized in statement of operations.

The conversion option is presented together with the related liability.

Equity instruments: An equity instrument in any contract that evidences residual interests in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Other financial liabilities: These are measured at amortized cost using the effective interest method.

ii) Determination of fair value:

The fair value of a financial instrument on initial recognition is normally the transaction price (fair value of the consideration given or received). Subsequent to initial recognition, the Company determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

iii) Derecognition of financial assets and financial liabilities:

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

Financial liabilities are derecognized when these are extinguished, that is when the obligation is discharged, cancelled or has expired.

iv) Impairment of financial assets:

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

Loans and receivables:

Objective evidence of impairment includes default in payments with respect to amounts receivable from customers.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Impairment loss in respect of loans and receivables is calculated as the difference between their carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognised in the statement of operations. If the amount of an impairment loss decreases in a subsequent period, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. The reversal is recognized in the statement of operations.

F-21

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

Available-for-sale financial assets:

If the available-for-sale financial assets is impaired, the difference between the financial asset's acquisition cost (net of any principal repayments and amortization) and the current fair value, less any previous impairment loss recognized in the statement of operations, is reclassified from equity to statement of operations. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized, the impairment loss is reversed. The reversal is recognized in the statement of operations. Reversal of impairment loss on equity investments classified as available-for-sale, is not recognized in the statement of operations. Increase in their fair value after impairment, is recognized in other comprehensive income.

Impairment loss on equity investments carried at cost is not reversed.

u. Hedge accounting:

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to highly probable forecast transactions. The Company designates these forward contracts in a cash flow hedging relationship by applying the hedge accounting principles.

These forward contracts are stated at fair value at each reporting date. Changes in the fair value of these forward contracts that are designated and effective as hedges of future cash flows are recognized in other comprehensive income (net of tax), and the ineffective portion is recognized immediately in the statement of operations. Amounts accumulated in equity are reclassified to the statement of operations in the periods in which the forecasted transactions occurs.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognized in equity is retained there until the forecast transaction occurs.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognized in equity is immediately transferred to the statement of operations for the period.

v. New accounting pronouncements

The Company adopted/early adopted following standards/amendments to standards and interpretations:

IAS 27 Consolidated and Separate Financial Statements: Amendments to IAS 27 are applicable for annual periods beginning on or after July 1, 2009. However, the Company early adopted IAS 27 in its financial statements for the year ended March 31, 2010.

The revisions to IAS 27 principally affect the accounting for transactions or events that result in a change in the Group's interests in its subsidiaries. The adoption of the revised Standard has affected the accounting of

the retained interest in a subsidiary subsequent to disposal of controlling interest;

the changes in the ownership interest in a subsidiary that do not result in the change in control; and

the non-controlling interests having a deficit balance.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The above changes have been applied from April 1, 2009 in accordance with the relevant transitional provisions.

When control of a subsidiary is lost as a result of a transaction, event or other circumstance, the revised Standard requires that the Company derecognize all assets, liabilities and non-controlling interests at their carrying amount. Any retained equity interest in the former subsidiary is recognized at its fair value at the date control is lost, with the resultant gain or loss recognized in profit or loss.

Effective April 1, 2009, the Company early adopted IAS 27 (amended in 2008) and recognised gain in the statement of operations of Rs. 13,279.6 million (net of deferred tax liability of Rs. 3,713.9 million) attributable to recognizing the interest retained in Telco Construction Equipment Company Limited (Telcon) at fair value upon sale of the Company's controlling equity interest in Telcon.

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

In prior years, in the absence of specific requirements in IFRSs, increase in interest in existing subsidiaries was treated in the same manner as the acquisition of subsidiaries (with certain exceptions), with goodwill being recognized, where appropriate. For decreases in interests in existing subsidiaries that did not result in a loss of control, the difference between the consideration received and the carrying amount of the share of net assets disposed of was recognized in profit or loss. Under the amended IAS 27, all such increases and decreases are dealt with in equity, with no impact on goodwill or profit or loss.

In respect of acquisition of additional equity interest in a subsidiary during the year ended March 31, 2010, the difference of Rs. 579.3 million between the fair value of the consideration paid and the amount by which the non-controlling interest was adjusted has been recognized in additional paid-in capital.

In prior years, share in total comprehensive income attributable to the non-controlling interests in excess of the non-controlling interest's interest in the subsidiary's equity were attributed against the interests of the Company except to the extent that the non-controlling interests has a binding obligation and is able to make an additional investment to cover the losses. Under the amended IAS 27, total comprehensive income is attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

The Company would have absorbed loss of Rs. 458.1 million attributable to non-controlling interests as per the earlier accounting policy.

The impact of the changes described above on basic and diluted earnings per share is disclosed in note 43.

IFRS 3 Business Combinations (as revised in 2008): This standard replaced IFRS 3 issued in 2004. The revised standard is applicable to business combinations for which the acquisition date is on or after the first annual reporting period beginning on or after July 1, 2009. However, the Company early adopted IFRS 3 consequent to early adoption of IAS 27 in its financial statements for the year ended March 31, 2010. The early adoption does not have any impact on the financial statements for the year ended March 31, 2010. The main changes in the revised standard are:

Acquisition-related costs are recognized as expenses in the statement of operations in the period in which these are incurred.

In business combinations achieved in stages, any previously held equity interest in the acquiree is remeasured to its acquisition date fair value and the resulting gain or loss is recognized in the statement of operations.

Any changes in contingent consideration classified as a liability at the acquisition date is recognized in the statement of operations.

Non-controlling interests in the entity acquired may be measured either at fair value, or at the proportionate share of the acquiree's net identifiable assets.

The Company also early adopted amendments to other IFRSs, made consequent to amendment of IAS 27 and revision of IFRS 3.

Improvements to IAS 39 Financial Instruments: Recognition and Measurement issued in April, 2009: An additional criteria for assessment of whether a call, put or prepayment option is closely related embedded derivative or not was issued by way of improvements to IAS 39 in April, 2009. The amendments are applicable for annual periods beginning on or after January 1, 2010. However, the Company early adopted the improvements in its financial statements for the year ended March 31, 2010.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

As per the amendment, if the prepayment penalty reimburses the lender for the present value of the lost interest for the remaining term of the loan contract, the prepayment option is treated as closely related to the host contract.

IFRS 8 Operating Segments effective for annual periods beginning on or after January 1, 2009. This standard replaced IAS 14 Segment Reporting. This standard specifies how an entity should disclose information about its segments, which enables users to evaluate the nature and financial effects of its business activities and the economic environments in which it operates. IFRS 8 does not have any impact on net income, earnings per share and identification of reportable segments. Comparative information has been restated in accordance with IFRS 8.

IAS 1 (revised) Presentation of Financial Statements effective for annual periods beginning on or after January 1, 2009. The revised standard has introduced terminology changes (including revised titles for the financial statements) and changes in the format and content of the financial statements. The revision to IAS 1 does not have any impact on net income and earnings per share.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

IFRS 7 Financial Instruments Disclosures (amendment) effective for annual periods beginning on or after January 1, 2009. The amendment requires enhanced disclosures about fair value measurement and liquidity risk. In particular, the amendment requires disclosure of fair value measurements by level of a fair value measurement hierarchy. As per these amendments, comparative information need not be presented in the current year. As the amendments only results in additional disclosures, there is no impact on net income and earnings per share.

The following pronouncements, issued by the IASB, are not yet effective and have not yet been adopted by the Company. The Company is evaluating the impact of these pronouncements on the consolidated financial statements.

IFRS 9 Financial Instruments, was issued by IASB in November 2009 as part of its project for revision of the accounting guidance for financial instruments. The new standard provides guidance with respect to classification and measurement of financial assets. The standard will be effective for annual periods beginning on or after January 1, 2013. Early application is permitted.

IFRIC Interpretation 17 Distributions of Non-cash Assets to Owners, was issued by IASB in November 2008, which is applicable for annual periods beginning on or after July 1, 2009. Early application is permitted. This interpretation provides guidance on accounting for arrangements whereby an entity distributes non-cash assets to shareholders either as a distribution of reserves or as dividends. IFRS 5 has also been amended to require that assets are classified as held for distribution only when they are available for distribution in their present condition and the distribution is highly probable.

IFRIC Interpretation 19 Extinguishing Financial Liabilities with Equity Instruments: IFRIC 19 is applicable for annual periods beginning on or after July 1, 2010. This interpretation addresses accounting of equity instruments issued in order to extinguish all or part of a financial liability. The issue of equity instruments to extinguish an obligation constitutes consideration paid. The consideration is measured at the fair value of the equity instruments issued, unless that fair value is not readily determinable, in which case the equity instruments should be measured at the fair value of the obligation extinguished. Any difference between the fair value of the equity instruments issued and the carrying value of the liability extinguished is recognized in profit or loss.

In April, 2009 and May, 2010, IASB issued improvements to IFRS a collection of amendments to certain International Financial Reporting Standards as part of its program of annual improvements to its standards, which is intended to make necessary, but non-urgent, amendments to standards that will not be included as part of another major project. The amendments resulting from these improvements mainly have effective dates for annual periods beginning on or after January 1, 2010, although entities are permitted to adopt them earlier. The Company has early adopted improvements to IAS 39 Financial Instruments: Recognition and Measurement issued in April, 2009.

w. Convenience translation

The consolidated financial statements have been expressed in Indian rupees (Rs.), Tata Motors Limited functional currency. For the convenience of the reader, the financial statements as at and for the year ended March 31, 2010 have been translated into U.S. dollars at US\$ 1.00 = Rs. 44.9000, based on fixing rate in the City of Mumbai on March 31, 2010 for cable transfers in Indian rupees as published by the Foreign Exchange Dealers Association of India (FEDAI).

Such translation should not be construed as representation that the rupee amounts have been or could be converted into U.S. dollars at that or any other rate, or at all.

3. Cash and cash equivalents

Cash and cash equivalents consist of the following:

As of March 31,

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

	2010		2010 (In millions)		2009	
Cash balances	US\$	7.2	Rs.	325.3	Rs.	379.0
Balances with banks (including deposits with original maturity of upto three months)		1,406.2		63,137.6		22,448.2
Total	US\$	1,413.4	Rs.	63,462.9	Rs.	22,827.2

Cash and cash equivalents includes Rs. 2,232.6 million as of March 31, 2010 held by a subsidiary that operates in a country where exchange control restrictions prevent the balances being available for general use by Tata Motors Limited and other subsidiaries.

F-24

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****4. Finance receivables**

Finance receivables primarily consist of loans, the details of which are as follows:

	2010	As of March 31, 2010 (In millions)	2009
Total loan installments to be received	US\$ 4,101.3	Rs. 184,143.1	Rs. 195,445.2
Less: unearned interest income	635.2	28,519.2	29,227.2
	3,466.1	155,623.9	166,218.0
Less: allowance for credit losses	188.9	8,481.1	7,415.2
Total	US\$ 3,277.2	Rs. 147,142.8	Rs. 158,802.8
Current portion	1,581.5	71,007.8	70,027.9
Non-current portion	1,695.7	76,135.0	88,774.9
Total	US\$ 3,277.2	Rs. 147,142.8	Rs. 158,802.8

Changes in the allowance for credit losses in finance receivables are as follows:

	2010	Year ended March 31, 2010 2009 (In millions)		2008
Balance at the beginning	US\$ 165.1	Rs. 7,415.2	Rs. 2,788.0	Rs. 1,809.4
Allowances made during the year	109.7	4,922.6	7,153.2	4,343.4
Written off	(85.9)	(3,856.7)	(2,526.0)	(3,364.8)
Balance at the end	US\$ 188.9	Rs. 8,481.1	Rs. 7,415.2	Rs. 2,788.0

5. Allowance for trade and other receivables

Change in the allowances for trade and other receivables are as follows:

	2010	Year ended March 31, 2010 2009 (In millions)		2008
Balance at the beginning	US\$ 62.3	Rs. 2,798.8	Rs. 1,937.0	Rs. 1,712.6
Acquisition / (sale) of subsidiary (net)	(5.9)	(265.0)	713.3	
Allowance made during the year	35.2	1,587.0	1,371.9	1,610.1
Written off	(22.5)	(1,009.5)	(1,135.2)	(1,372.4)
Foreign exchange translation differences	(2.0)	(87.6)	(88.2)	(13.3)

Balance at the end **US\$ 67.1** **Rs. 3,023.7** **Rs. 2,798.8** **Rs. 1,937.0**

6. Investments

Investments consist of the following:

	2010	As of March 31, 2010 (In millions)	2009
Available-for-sale, at fair value	US\$ 322.0	Rs. 14,456.3	Rs. 6,418.8
Unquoted equity investments, at cost	52.8	2,369.5	2,376.0
Loans and receivables	9.2	414.0	469.9
Total	US\$ 384.0	Rs. 17,239.8	Rs. 9,264.7

Available-for-sale, financial assets (investments) are as follows:

	2010	As of March 31, 2010 (In millions)	2009
Quoted equity shares	US\$ 80.4	Rs. 3,608.2	Rs. 5,501.6
Mutual funds	237.5	10,662.3	765.5
Corporate bonds and other debt instruments	4.1	185.8	151.7
Total available for sale securities	US\$ 322.0	Rs. 14,456.3	Rs. 6,418.8

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The contractual maturity of the Company's available-for-sale corporate bonds and other debt instruments as of March 31, 2010 is as follows:

	Amortized Cost (In millions)		Fair value	
Due in year ending March 31,				
2011	Rs.	56.3	Rs.	56.3
2012		18.8		21.1
2013		25.6		27.5
2014		48.1		53.6
2015		24.5		27.3
Thereafter				
	Rs.	173.3	Rs.	185.8
	US\$	3.9	US\$	4.1

The contractual maturity of the Company's loans and receivables as of March 31, 2010 is as follows:

	In millions
Due in year ending March 31,	
2011	Rs. 61.5
2012	
2013	332.5
2014	
2015	
Thereafter	20.0
	Rs. 414.0
	US\$ 9.2

The current and non-current classification of investments are as follows:

	2010	As of March 31, 2010 (In millions)	2009
Current investments	US\$ 246.3	Rs. 11,058.7	Rs. 834.1
Non-current investments	137.7	6,181.1	8,430.6
Total	US\$ 384.0	Rs. 17,239.8	Rs. 9,264.7

The fair value of the unquoted equity investments cannot be reliably measured as the variability in the range of fair value estimates is significant and the probabilities of the various estimates cannot be reasonably assessed.

7. Other financial assets - current

Other financial assets current consist of the following:

	2010	As of March 31, 2010 (In millions)	2009
Derivative financial instruments	US\$ 1.5	Rs. 68.2	Rs. 137.6
Advances and other receivables recoverable in cash	97.0	4,350.0	2,103.5
Inter corporate deposits	11.6	522.8	2,864.9
Margin money	9.9	446.3	838.2
Others			2,833.4
Total	US\$ 120.0	Rs. 5,387.3	Rs. 8,777.6

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

Margin money with banks is restricted cash deposits, and consists of collateral provided in exchange of guarantees issued by banks for transfer of finance receivables.

Inter corporate deposits as of March 31, 2009 includes Rs. 2,650 million given to a joint venture of the Company. During the year ended March 31, 2010, the Company has modified the terms of inter corporate deposit. This loan has been subordinated for all principal, interest, and other amounts incurred or to be incurred at any time due and owing under the said subordinated loan to the repayments to be made by the joint venture to certain specific lenders. Subject to certain conditions, the loan is convertible into equity of the joint venture at the option of the joint venture (refer note 10).

Others as of March 31, 2009 include Rs. 2,447.9 million receivable from Ford Motor Company, in respect of certain national sales companies, which were transferred to the Company during the year ended March 31, 2010, on completion of pending formalities and receipt of local regulatory approvals.

8. Inventories

Inventories consist of the following:

	2010	As of March 31, 2010 (In millions)	2009
Raw materials and consumables	US\$ 424.6	Rs. 19,064.0	Rs. 19,815.9
Work-in-progress	216.8	9,734.3	11,261.1
Finished goods	1,823.5	81,876.3	76,878.7
Total	US\$ 2,464.9	Rs. 110,674.6	Rs. 107,955.7

Inventories of finished goods include Rs. 8,455.9 million and Rs. 7,562.5 million as of March 31, 2010 and March 31, 2009, respectively, relating to vehicles sold subject to repurchase arrangements.

Cost of inventories (including cost of purchased products) recognised as expense during the years ended March 31, 2010, March 31, 2009 and March 31, 2008 amounted to Rs. 716,420.2 million, Rs. 577,315.2 million and Rs. 287,895.6 million, respectively.

During the years ended March 31, 2010, March 31, 2009 and March 31, 2008 the Company recorded inventory write-down expense of Rs. 6,169.4 million, Rs. 4,923.2 million and Rs. 438.4 million, respectively.

9. Other current assets

Other current assets consist of the following:

2010	As of March 31, 2010 (In millions)	2009

Notes:

1. Net carrying amounts of property, plant and equipment under finance lease arrangements were as follows:

	2010	As of March 31, 2010 (In millions)	2009
Land	US\$ 13.0	Rs. 583.2	Rs. 603.2
Buildings	7.4	331.0	402.2
Plant and equipment	45.4	2,037.5	2,619.1
Computers	5.6	250.8	340.3
Furniture and fixtures			12.9
Total	US\$ 71.4	Rs. 3,202.5	Rs. 3,977.7

2. Land and buildings includes freehold land of Rs. 13,574.4 million and Rs. 9,841.4 million as of March 31, 2010 and March 31, 2009 respectively.

3. Capital work-in-progress as of March 31, 2010 includes buildings for the purposes of manufacturing automobiles of Rs. 3,157.1 million. Consequent to the decision to relocate and construct a similar manufacturing facility at another location, the management is in the process of evaluating several options, under all of which, no adjustment to the carrying amount of the building is considered necessary.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****12. Leases**

The Company has taken land, buildings, plant and equipment, computers and furniture and fixtures under operating and finance leases. The following is the summary of future minimum lease rental payments under non-cancellable operating leases and finance leases entered into by the Company:

	2010		As of March 31,			2009	
	Operating	Finance	(In millions)			Operating	Finance
			Present value of minimum lease payments	Minimum Lease Payments	Minimum Lease Payments		
Not later than one year	Rs. 682.9	Rs. 512.2	Rs. 500.0	Rs. 668.2	Rs. 550.9	Rs. 534.1	
Later than one year but not later than five years	1,342.2	1,522.6	1,297.4	1,218.6	1,715.9	1,474.3	
Later than five years	8,707.6	501.0	371.0	8,980.2	919.3	664.1	
Total minimum lease commitments	Rs. 10,732.7	Rs. 2,535.8	Rs. 2,168.4	Rs. 10,867.0	Rs. 3,186.1	Rs. 2,672.5	
	US\$ 239.0	US\$ 56.5	US\$ 48.3				
Less: future finance charges		(367.4)			(513.6)		
Present value of minimum lease payments		Rs. 2,168.4			Rs. 2,672.5		
Included in the financial statements as:							
Other current financial liabilities (refer note 19)			Rs. 500.0			Rs. 534.1	
Other non-current financial liabilities (refer note 23)			1,668.4			2,138.4	
			Rs. 2,168.4			Rs. 2,672.5	
			US\$ 48.3				

Total operating lease rent expense was Rs. 1,683.6 million, Rs. 1,167.5 million and Rs. 293.2 million for the years ended March 31, 2010, 2009 and 2008, respectively.

Significant leasing arrangements include lease of land under operating lease for a period of 90 years with a renewal option for a further period of 90 years. Minimum lease payments for a period later than five years includes Rs. 8,470.3 million relating to this leasing arrangement.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****13. Goodwill**

	2010	As of March 31, 2010 (In millions)	2009
Balance at the beginning	US\$ 119.2	Rs. 5,350.8	Rs. 4,029.6
Goodwill arising on business combination			1,440.3
Write off of goodwill	(0.2)	(10.9)	(17.0)
On sale of controlling equity interest in subsidiary/change in ownership interest	(30.4)	(1,363.2)	(13.0)
Currency translation differences	(10.2)	(458.4)	(89.1)
Balance at the end	US\$ 78.4	Rs. 3,518.3	Rs. 5,350.8

As of March 31, 2010, goodwill of Rs. 185.3 million and Rs. 3,333.0 million relates to the automotive and related activity segment (Tata and other brand vehicles including financing thereof) and others segment respectively. As of March 31, 2009, goodwill of Rs. 180.7 million and Rs. 5,170.1 million relates to the automotive and related activity segment (Tata and other brand vehicles including financing thereof) and others segment respectively.

As of March 31, 2010, goodwill of Rs. 3,333.0 million has been allocated to software consultancy and services cash generating unit. The recoverable amount of the cash generating unit has been determined based on value in use. Value in use has been determined based on future cash flows after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions.

As of March 31, 2010, the estimated cash flows for a period of 5 years were developed using internal forecasts, and a pre-tax discount rate of 9.11 %. The cash flows beyond 5 years have been extrapolated assuming zero growth rates. The management believes that any reasonably possible change in the key assumptions would not cause the carrying amount to exceed the recoverable amount of the cash generating unit.

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

Notes:

- 1) The useful life of trademarks and brands in respect of the acquired Jaguar Land Rover businesses have been determined to be indefinite as the Company expects to generate future economic benefits indefinitely from these assets. The indefinite life intangible assets have been allocated to the Jaguar Land Rover businesses. The recoverable amount of the cash generating unit has been determined based on value in use. Value in use has been determined based on future cash flows after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions.

The estimated cash flows for a period of five years were developed using internal forecasts, and a pre-tax discount rate of 10.9%. The cash flows beyond five years have been extrapolated assuming zero growth rate. The management believes any reasonably possible change in the key assumptions would not cause the carrying amount to exceed the recoverable amount of the cash generating unit.

- 2) In -process development project of Rs. 1,903.2 million was acquired on business combination during the year ended March 31, 2009 (refer note 35(a))

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****15. Investments in equity accounted investees:****a) Associates:**

Summarized financial information in respect of the Company's associates is as follows:

	2010	As of March 31, 2010 (In millions)	2009
Total assets	US\$ 1,018.4	Rs. 45,726.1	Rs. 19,579.6
Total liabilities	715.9	32,144.3	14,177.9
Carrying amount of investment in associates	US\$ 505.2	Rs. 22,683.5	Rs. 3,048.3

Carrying amount of investment in associates as of March 31, 2010 includes Rs. 19,325.0 million consequent to fair valuation of retained equity interest of 40% in Telcon (refer note 30).

	2010	Years ended March 31, 2010 2009 (In millions)		2008
Total revenue	US\$ 823.9	Rs. 36,992.5	Rs. 25,196.6	Rs. 19,684.5
Total profits/(loss) for the period	23.2	1,042.2	(540.1)	1,403.4
Company's share in profit/ (loss)*	US\$ 9.5	Rs. 428.3	Rs. (88.4)	Rs. 653.8

The Company acquired additional equity shareholding in one of the associates and increased its ownership to 42.37% from 37.79% during the year ended March 31, 2009, for a total consideration of Rs. 68.8 million.

Fair value of investment in an equity accounted associate for which published price quotation is available was Rs. 630.5 million and Rs. 364.4 million as of March 31, 2010 and 2009 respectively. Carrying amount as of March 31, 2010 and 2009 was Rs. 1,045.5 million and Rs. 1,093.9 million respectively.

b) Jointly controlled entities:

Summarized financial information in respect of the Company's jointly controlled entities (adjusted for the percentage of the ownership held by the Company) is as follows:

	2010	As of March 31, 2010 (In millions)	2009
Current assets	US\$ 216.6	Rs. 9,725.4	Rs. 7,384.2
Non-current assets	387.6	17,404.4	16,134.2
Current liabilities	290.2	13,030.2	20,034.6
Non-current liabilities	239.7	10,761.0	141.3
Carrying amount of investment in jointly controlled entities	US\$ 102.8	Rs. 4,615.1	Rs. 4,963.9

	2010	Year ended March 31,		2008
		2010	2009	
	(In millions)			
Income	US\$ 371.4	Rs. 16,676.2	Rs. 3,895.0	Rs. 8,514.7
Expenses	404.7	18,169.6	7,263.5	9,123.0
Company's share of profit/ (loss)*	US\$ (36.9)	Rs. (1,657.6)	Rs. (3,375.6)	Rs. (601.7)

The Company has 50% equity shareholding with equivalent voting power in Fiat India Automobiles Ltd., a joint venture established in India.

c) Summary of carrying amount of investments in equity accounted investees:

	2010	As of March 31,	
		2010	2009
	(In millions)		
Carrying amount of investment in associates	US\$ 505.2	Rs. 22,683.5	Rs. 3,048.3
Carrying amount of investment in jointly controlled entities	102.8	4,615.1	4,963.9
Total	US\$ 608.0	Rs. 27,298.6	Rs. 8,012.2

* Company's share of profit/(loss) of the equity accounted investees has been determined after giving effect for the subsequent amortization/depreciation and other adjustments arising on account of fair value adjustments made to the identifiable net assets of the equity accounted investees as at the date of acquisition and other adjustments arising under the equity method of accounting.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

As of March 31, 2010, unrecognized deferred tax assets amount to Rs. 46,269.6 million and Rs. 907.8 million, which can be carried forward indefinitely and upto a specified period, respectively. These relate primarily to business losses and capital allowances. The deferred tax asset has not been recognized on the basis that its recovery is not probable in the foreseeable future.

Tata Motors Limited (on standalone basis, being its tax status) is liable to pay Minimum Alternate Tax (MAT). Under the Indian Income tax laws, the tax paid under MAT provisions can be carried forward and set-off against future income tax liabilities computed under normal tax provisions within a period of ten years. Deferred tax assets as at March 31, 2010 of Rs. 2,471.8 million towards depreciation, Rs. 2,055.4 million towards business loss and Rs. 7,318.0 million towards credit for MAT paid, have been recognized on the basis of estimated taxable income for future years and computation of tax liability.

Unrecognized deferred tax assets expire unutilized based on the year of origination as follows:

March 31,	In millions	
	Rs.	US\$
2011	37.0	0.8
2012	113.5	2.5
2013	4.6	0.1

Foreign currency convertible notes*Zero coupon foreign currency convertible notes (USD) due 2009*

On April 27, 2004, Tata Motors Limited raised US\$ 100 million by way of Zero coupon convertible notes due for redemption on April 27, 2009. The noteholders had an option to convert these notes into ordinary shares or ADSs of Tata Motors Limited determined at an initial conversion price of Rs. 573.106 per share (converted at fixed rate of exchange on conversion of Rs. 43.85 per USD), from and including June 7, 2004 to and including March 28, 2009. The conversion price was subject to certain adjustments. Further, Tata Motors Limited had a right to redeem in whole, but not in part, these Notes at any time on or after April 27, 2005, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled, these Notes were due for redemption on April 27, 2009, at 95.111% of the principal amount.

7,313,842 ordinary shares were allotted during the period April 27, 2004 to March 31, 2008, consequent to conversion of 95,590 Notes with an aggregate value of Rs. 5,792.3 million.

During the year ended March 31, 2009, 153,025 ordinary shares were allotted consequent to conversion of 2,000 Notes with an aggregate value, net of Rs. 0.1 million being stamp duty expenses on conversion, of Rs. 100 million. Further, 2,410 Notes with an aggregate value of Rs. 148.6 million outstanding as at March 31, 2009 were redeemed on maturity.

1% foreign currency convertible notes (USD) due 2011

On April 27, 2004, Tata Motors Limited also raised US\$ 300 million by way of 1% Convertible Notes due for redemption on April 27, 2011. The noteholders have an option to convert these notes into ordinary shares or ADSs of Tata Motors Limited determined at an initial conversion price of Rs. 780.40 per share (converted at fixed rate of conversion of Rs. 43.85 per USD), from and including June 7, 2004 to and including March 28, 2011. The conversion price of the Notes was reset to a price of Rs. 737.29 per share on account of our rights issue in fiscal 2009 and further to a price of Rs. 736.72 per share on account of our GDS issue in fiscal 2010, at a fixed rate of conversion of Rs. 43.85 per USD. The conversion price remains subject to certain adjustments. In the event of certain changes affecting taxation, Tata Motors Limited has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on April 27, 2011 at 121.781% of the principal amount.

There was no conversion till March 31, 2009.

During the year ended March 31, 2010, the Company had offered to non-US noteholders of outstanding Notes, an option to convert their Notes into Ordinary Shares during a limited offer period from March 23, 2010 to March 29, 2010. During this period, as per the terms of Invitation Memorandum, noteholders could elect to receive shares at enhanced conversion terms. Noteholders, who did not participate, would continue

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

with all the terms of their Notes as applicable prior to this limited period offer. 18,816,152 ordinary shares were allotted on conversion of 229,634 Notes, with an aggregate value, net of Rs. 12.3 million being stamp duty expenses on conversion, of Rs. 15,733.2 million (USD 350.4 million), to noteholders who exercised the option.

Further, as of March 31, 2010, 70,366 outstanding Notes may at the option of the noteholders be converted into 4,188,225 ADSs or shares at any time up to March 28, 2011.

F-43

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)***Zero coupon foreign currency convertible notes (JPY) due 2011*

On March 20, 2006, Tata Motors Limited issued Yen 11,760 million (Rs. 4,500.3 million) Zero Coupon Convertible Notes due for redemption on March 21, 2011. The noteholders have an option to convert these Notes into ordinary shares or ADSs of Tata Motors Limited determined at an initial conversion price of Rs. 1,001.39 per share (converted at fixed rate of exchange on conversion of Rs. 1.00 per Yen 2.66), from and including May 2, 2006 to and including February 19, 2011. The conversion price of the Notes was reset to a price of Rs 946.07 per share on account of our rights issue in fiscal 2009 and further to a price of Rs 945.34 per share on account of our GDS issue in fiscal 2010, at a fixed rate of conversion of Rs. 1 per Yen 2.66. The conversion price remains subject to certain adjustments. Further, Tata Motors Limited has a right to redeem in whole, but not in part, these Notes at any time on or after March 20, 2009 but prior to February 8, 2011, subject to certain conditions. In the event of certain changes affecting taxation, Tata Motors Limited has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on March 21, 2011, at 99.253% of the principal amount.

There was no conversion till March 31, 2009. During the year ended March 31, 2009, the Company bought back and cancelled 30 Notes (Principal value of JPY 300 million).

During the year ended March 31, 2010, the Company had offered to non-US noteholders of outstanding Notes, an option to convert their Notes into Ordinary Shares during a limited offer period from March 23, 2010 to March 29, 2010. During this period, as per the terms of Invitation Memorandum, noteholders could opt to receive shares at enhanced conversion terms. Noteholders, who did not participate, would continue with all the terms of their Notes as applicable prior to this limited period offer. 7,827,114 ordinary shares were allotted on conversion of 1,071 Notes, with an aggregate value, net of Rs. 5.1 million being stamp duty expenses on conversion, of Rs. 5,507.5 million (USD 122.7 million), to noteholders who exercised the option.

Further, as of March 31, 2010, 75 outstanding Notes may at the option of the noteholders be converted into 298,258 ADSs or shares at any time up to February 19, 2011.

Zero coupon convertible alternative reference securities (USD) due 2012(CARS)

On July 12, 2007, Tata Motors Limited raised funds aggregating USD 490 million (Rs.19,927.1 million at issue) by issue of Zero Coupon Convertible Alternative Reference Securities (CARS) due on July 12, 2012, which allow Tata Motors Limited to give the noteholders an option to convert the notes into qualifying securities as per the terms of issue after appropriate adjustment to the conversion price. If Tata Motors Limited does not exercise this option, the conversion may be made by the noteholders from and including October 11, 2011 to and including June 12, 2012, into ordinary shares or ADSs of Tata Motors Limited, at an initial conversion price of Rs. 960.96 per share (equivalent to USD 23.67 at a fixed rate of exchange on conversion of Rs. 40.59 per USD) which is subject to adjustment in certain circumstances. The conversion price of the notes was reset to a price of Rs 907.87 per share on account of our rights issue in fiscal 2009 and further to a price of Rs 907.17 per share on account of our GDS issue in fiscal 2010, at a fixed rate of conversion of

Rs. 40.59 per USD. Tata Motors Limited has a right to redeem in whole, but not in part, these Notes at any time on or after October 11, 2011, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled as per the terms of issue, these will be redeemed on July 12, 2012 at 131.82% of the outstanding principal amount.

During the year ended March 31, 2009, the Company bought back and cancelled 170 Notes (Principal value of USD 17 million).

There has been no conversion till March 31, 2010.

Further, as of March 31, 2010, 4,730 outstanding Notes may at the option of the noteholders be converted into 21,163,696 ADSs or shares at any time from and including October 11, 2011 to and including June 12, 2012.

4% foreign currency convertible notes (USD) due 2014

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

On October 15, 2009, Tata Motors Limited raised funds aggregating USD 375 million (Rs. 17,941.9 million at issue) by issue of 4% Convertible Notes due on October 16, 2014. The noteholders have an option to convert these Notes into ordinary shares or GDSs or ADSs of Tata Motors Limited. The conversion may be made by the noteholders, in the case of Shares or GDSs, at any time during the period from and including November 25, 2009 to and including October 9, 2014 and, in the case of ADSs, at any time from and including October 15, 2010 to and including October 9, 2014, at an initial conversion price of Rs. 623.88 per share (equivalent to USD13.48 per share at a fixed rate of exchange on conversion of Rs. 46.28 per USD). The conversion price is subject to adjustment in certain circumstances. Tata Motors Limited has a right to redeem in whole but not in part, these Notes at any time on or after October 15, 2012, subject to certain conditions. In the event of certain changes affecting taxation, Tata Motors Limited has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled as per the terms of issue, these Notes will be due for redemption on October 16, 2014 at 108.505 % of the principal amount.

F-44

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

There has been no conversion till March 31, 2010.

Further, as of March 31, 2010, 3,750 outstanding Notes may at the option of the noteholders be converted into 27,817,850 Shares or GDSs at any time up to October 9, 2014 and into 27,817,850 ADSs at any time from and including October 15, 2010 to and including October 9, 2014.

The embedded conversion option in foreign currency convertible notes/ convertible alternative reference securities is not clearly and closely related to the host debt contracts as the conversion options will be settled by delivery of fixed number of shares for fixed amounts of foreign currency which represents variable amount of cash in Indian Rupees, the functional currency of Tata Motors Limited. Change in the fair value of the conversion option is recognized in the statement of operations.

Loan from banks

Loan from banks includes loan of Rs 20,023.8 million from European Investment Bank (EIB) to Jaguar Land Rover. The loan is to finance development of micro and full hybrid drive trains and research into more energy efficient car bodies by Jaguar Land Rover. The loan is structured with guarantee support from banks.

Certain loans from banks availed by some of the subsidiary companies carry covenants restricting repayment of intra-group loans and payment of dividend.

Buyers credit

The buyers line of credit from banks is repayable within three years from drawdown dates.

Collateralized debt obligation

These represent amount received against finance receivables securitized/ assigned, which does not qualify for derecognition.

Fixed deposits from public and shareholders

These are unsecured deposits for a fixed tenor of up to three years bearing interest rates ranging from 8% to 12.25%.

For details of carrying amount of assets pledged as security for secured borrowings refer note 39.

F-48

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****27. Notes to reserves and dividends*****Capital redemption reserve***

The Indian Companies Act, 1956 (the Companies Act) requires that where a company purchases its own shares not out of proceeds of a fresh issue but out of free reserves, then a sum equal to the nominal value of the shares so purchased shall be transferred to a capital redemption reserve account, which may be applied to issue fully paid bonus shares. Tata Motors Limited established this reserve pursuant to the redemption of preference shares issued in earlier years.

Debenture redemption reserve

The Companies Act requires that where a company issues debentures, it shall create a debenture redemption reserve from profits every year until such debentures are redeemed. Manufacturing companies are required to maintain a minimum proportion of the outstanding redeemable debentures as a reserve. The amounts credited to the debenture redemption reserve may not be utilized by the company except to redeem debentures.

Reserve for research and human resource development

In terms of Article 9 of the Act on Special Taxation Restriction in Korea, Tata Daewoo Commercial Vehicle Company Limited (TDCV, a subsidiary company) is entitled for deferment of tax in respect of expenditure incurred on product development cost subject to fulfillment of certain conditions, by way of deduction from the taxable income, provided TDCV appropriates an equivalent amount from Retained Earnings to Reserve for Research and Human Resource Development .

The deferment is for a period of three years and from the fourth year onwards one-third of the reserve is offered to tax and an equal amount is then transferred from the reserve to Retained earnings available for appropriation .

Special reserve

The special reserve represents the reserve created by two subsidiaries of Tata Motors Limited pursuant to the Reserve Bank of India Act, 1934 (the RBI Act) and related regulations applicable to those companies. Under the RBI Act, a non-banking finance company is required to transfer an amount not less than 20 per cent of its net profit to a reserve fund before declaring any dividend. Appropriation from this reserve fund is permitted only for the purposes specified by the RBI.

Earned surplus reserve

Under the Korean commercial code, Tata Daewoo Commercial Vehicle Company Limited (TDCV, a subsidiary company) is required to appropriate at least 10% of cash dividend declared each year to a legal reserve until such reserves equal to 50% of capital stock. This reserve may not be utilized for cash dividends, but may only be used to offset against future deficit, if any, or may be transferred to capital stock.

Dividends

The final dividend is recommended by the Board of Directors and is recorded in the books of account upon its approval by the shareholders. Tata Motors Limited is liable to income tax on distribution of profits. Tata Motors Limited paid dividend per share of Rs. 6/- for Ordinary Shares and Rs. 6.50 for A Ordinary Shares during the year ended March 31, 2010 and Rs. 15/- per Ordinary Share during both the years ended March 31, 2009 and March 31, 2008. In the meeting of Board of Directors of Tata Motors Limited held on May 27, 2010, the Board recommended a dividend of Rs. 15/- per Ordinary Share and Rs. 15.50 per A Ordinary Share, which has been subsequently approved by the shareholders in their Annual General Meeting held on September 1, 2010. The total amount of dividend of Rs. 10,017.2 million, including tax on distributed profits of Rs. 1,426.8 million, was paid subsequent to September 1, 2010.

28. Employee Cost

Total	US\$ 4,026.9	Rs. 180,807.7	Rs. 175,613.6	Rs. 57,920.9

30. Gain on sale of equity interests in subsidiary

a) During the year ended March 31, 2010, Tata Motors sold controlling equity interest in its subsidiary, Telco Construction Equipment Company Limited (Telcon) to Hitachi Construction Machinery Company Limited (Tata Motors Technology and equity partner in Telcon) for a cash consideration of Rs. 11,595.0 million. A gain of Rs. 27,565.5 million has been recorded on this transaction. This includes gain of Rs. 16,993.5 million attributable to fair valuation of retained interest of 40% in Telcon. Consequently, Tata Motors holding in Telcon has been reduced from 60% to 40%

(refer note 2(v)).

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The assumptions used in accounting for the pension and post retirement medical plans are set out below:

	Year ended March 31,					
	Pension Benefits			Post retirement medical Benefits		
	2010	2009	2008	2010	2009	2008
Discount rate	6.75% - 8.50%	6.75% - 8.50%	7.75% - 8.50%	8.50%	8.50%	8.50%
Rate of increase in compensation level of covered employees	2.00% - 8.00%	0.00% - 7.50%	5.00% - 8.50%	NA	NA	NA
Increase in health care cost	NA	NA	NA	4.00%	4.00%	4.00%
Expected rate of return on plan assets	8.00%	8.00%	8.00%	NA	NA	NA

The expected return on plan assets is determined considering several applicable factors mainly including the composition of the plan assets held, assessed risks of asset management, historical results of the return on plan assets and the Company's policy for plan asset management.

Plan Assets

The Company's pension plan asset allocation as of March 31, 2010 and 2009 by category are as follows:

Asset category:	Pension benefits Plan assets as of March 31,	
	2010	2009
Debt securities	76%	78%
Balances with banks	24%	22%
	100%	100%

The Company's policy is driven by considerations of maximizing returns while ensuring credit quality of the debt instruments. The asset allocation for plan assets is determined based on investment criteria prescribed under the Indian Income Tax Act, 1961, and is also subject to other exposure limitations. The Company evaluates the risks, transaction costs and liquidity for potential investments. To measure plan asset performance, the Company compares actual returns for each asset category with published bench marks.

The Company expects to contribute Rs. 772.8 million to the funded pension plans in fiscal 2011.

The table below outlines the effect on the service cost, the interest cost and the defined benefit obligation in the event of an increase of 1% in the assumed rate of increase in health care cost:

	2010	Year ended March 31,	
		2010	2009
		(In millions)	
Effect on defined benefit obligation	US\$ 2.9	Rs. 130.3	Rs. 85.6
Effect on service cost and interest cost	US\$ 0.3	Rs. 12.4	Rs. 5.8

The table below outlines the effect on the service cost, the interest cost and the defined benefit obligation in the event of a decrease of 1% in the assumed rate of decrease in health care cost:

	2010	Year ended March 31, 2010 (In millions)	2009
Effect on defined benefit obligation	US\$ (0.9)	Rs. (41.3)	Rs. (73.9)
Effect on service cost and interest cost	US\$ (0.2)	Rs. (11.0)	Rs. (7.9)

The Company expects to contribute Rs. 8,038.7 million to the funded pension plans of Jaguar Cars Limited and Land Rover , UK in fiscal 2011.

Defined contribution plan

The Company's contribution to defined contribution plans aggregated Rs. 2,156.4 million, Rs. 2,077.7 million and Rs 1,528.6 million for years ended March 31, 2010, 2009 and 2008 respectively.

F-61

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****35. Acquisitions**

During the year ended March 31, 2009, the Company had the following acquisitions.

a) Jaguar Land Rover Businesses (JLR)

On June 2, 2008, the Company acquired Jaguar Land Rover businesses (JLR) from Ford Motor Company.

JLR is engaged in the design, development, manufacture and sale of high performance luxury/sports cars and four wheel drive off-road vehicles and related components. The JLR businesses include three major manufacturing facilities, two advanced design and engineering centers in the United Kingdom and a worldwide sales and dealership network.

The consideration was Rs. 107,652 million (US\$ 2.5 billion), which was financed through a bridge loan facility provided by a syndicate of banks. The cost of acquisition includes Rs 2,159.6 million, being expenses directly attributable to the acquisition.

The excess of fair value of net assets acquired over the cost of acquisition is Rs. 6,569.6 million and represents 6% of the total acquisition cost. This excess is mainly attributable to significant value of the two iconic brands - Jaguar and Land Rover.

The Company has accounted for the acquisition under the purchase method in accordance with IFRS 3-Business Combinations (as issued in 2004). Accordingly, the financial results of the acquired businesses for the period from June 2, 2008 to March 31, 2009 have been included in the consolidated financial statements of the Company.

The acquisition had the following effect on the Company's assets and liabilities on the acquisition date.

Allocation of purchase price of JLR

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

Since the date of acquisition, the acquired entities contributed loss of Rs. 32,615.6 million to the consolidated net loss for the year ended March 31, 2009.

- * Includes indefinite life trademarks and brands of Rs. 51,570.2 million, patents and technological know-how of Rs. 12,259.7 million, customer related intangibles of Rs. 7,398.9 million, in process research and development of Rs. 1,903.2 million and software of Rs. 1,592.2 million.

Deferred tax liability of Rs. 13,519.3 million has been recognized on the fair value adjustments. Also, a deferred tax of an equivalent amount has been recognized on unused tax losses and capital allowances. It is expected that any reversals of the deferred tax liability would be able to offset against the reversal of the deferred tax asset.

b) *Serviplem S.A.*

Telco Construction Equipment Co. Ltd. (Telcon), the then subsidiary of Tata Motors, on April 2, 2008, completed the acquisition of Serviplem S. A., Zaragoza, Spain (Serviplem) by acquiring 79% of its share capital, for a cash consideration of Rs 2,221.5 million. A part of the consideration of Rs 1,200 million is payable to the erstwhile shareholders in installments by 2011. The cost of acquisition includes Rs. 44.5 million being expenses directly attributable towards acquisition.

Serviplem is in the business of manufacturing Concrete Transit Mixers, Dry Bulk Tanks and Pumps with the brand name Baryval . Baryval Assistencia Tecnica S.L. is a 60% subsidiary of Serviplem S.A. engaged in the business of assembling transit mixers on trucks. Inner Mongolia North Baryval Engineering Special Vehicle Corporation Ltd (NBSV), a 56% subsidiary of Serviplem, has a manufacturing base in Baotou, China.

The Company has accounted for the acquisition under the purchase method in accordance with IFRS 3-Business Combinations (as issued in 2004).

c) *Comoplesa Lebrero, S. A.*

On April 9, 2008, Telcon completed the acquisition of Comoplesa Lebrero, S. A., Zaragoza, Spain (Lebrero) by acquiring 60% of its ordinary shares for a cash consideration of Rs 226.6 million. The cost of acquisition includes Rs. 17.1 million being expenses directly attributable towards acquisition. Lebrero with whom Telcon was associated since 2002 as its technology partners, is in the business of manufacturing compactors and tandem rollers. Eurl Lebrero France is a 100% subsidiary of Lebrero and is functioning as a trading office of compactors manufactured by Lebrero.

The Company has accounted for the acquisition under the purchase method in accordance with IFRS 3-Business Combinations (as issued in 2004).

The acquired entities contributed a loss of Rs 249.0 million to the consolidated net loss attributable to the shareholders of Tata Motors Limited for the year ended March 31, 2009.

- d) Total consolidated revenue of the Company and net loss of the Company would have been Rs. 849,364.8 million (unaudited) and Rs. 43,540.0 million (unaudited) respectively, had all the acquisitions been effective for the full year 2008-09.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****36. Commitments and contingencies**

In the normal course, the Company faces claims and assertions by various parties. The Company assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel, wherever necessary. The Company records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered possible, but not probable, the Company provides disclosure in the financial statements but does not record a liability in its accounts unless the loss becomes probable.

The following is a description of claims and assertions where a potential loss is possible, but not probable. Management believes that none of the contingencies described below, either individually or in aggregate, would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Litigation

The Company is involved in legal proceedings, both as plaintiff and as defendant. There are claims which management does not believe to be of material nature, other than those described below.

Income Tax

The Company has ongoing disputes with income tax authorities relating to tax treatment of certain items. These mainly include disallowed expenses, tax treatment of certain expenses claimed by the Company as deductions, and the computation of, or eligibility of, certain tax incentives or allowances.

Most of these disputes/disallowances, being repetitive in nature, have been raised by the income tax authorities consistently in most of the years.

The Company has a right of appeal to the High Court or Supreme Court against adverse decisions by the appellate authorities for matters involving substantial question of law. The income tax authorities have similar rights of appeal.

As of March 31, 2010, the income tax demands by the income tax authorities aggregated Rs. 1,461 million, which includes Rs. 73 million in respect of equity accounted investees (Rs. 1,534 million, which includes Rs. 19 million in respect of equity accounted investees, as of March 31, 2009) (all figures are net of consequential relief), which are being contested by the Company in appeal and in respect of which the Company expects to succeed based on favorable decisions in earlier assessment years. There are matters aggregating Rs. 1,014 million, which includes Rs. Nil in respect of equity accounted investees (Rs. 1,072 million, which includes Rs. Nil in respect of equity accounted investees, as of March 31, 2009) in respect of which the Company has won in appeals which have been further contested by the income tax authorities before the higher appellate authorities. There are other matters/disputes pending in appeal aggregating

Rs. 1,855 million, which includes Rs. Nil in respect of equity accounted investees (Rs. 1,848 million, which includes

Rs. 4 million in respect of equity accounted investees as of March 31, 2009).

Excise Duty and Service Tax

As of March 31, 2010, there were pending litigations on various counts relating to Excise Duty and Service Tax involving demand of Rs. 2,429 million, which includes Rs. 96 million in respect of equity accounted investees (Rs. 1,821 million, which includes Rs. 36 million in respect of equity accounted investees, as of March 31, 2009). These demands challenged the basis of valuation of the Company's products and denial of the Central Value Added Tax (CENVAT) credit on inputs. The details of the demands for more than Rs. 200 million are as follows:

The excise authorities had denied CENVAT credit of Rs. 221 million (Rs. 269 million as of March 31, 2009) in earlier years, on certain accessories supplied with the vehicles and on other technical grounds. The matter is being contested by the Company before the appellate authorities. Further, valuation dispute of Tata Motors amounting to Rs. 744 million (Rs. 219 million as of March 31, 2009) includes an amount

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

of Rs. 730 million (Rs. 205 million as of March 31, 2009) pertaining to valuation of chassis sent to body builders for building body on its enroute to regional sales office.

F-65

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The excise authorities had raised a demand of Rs. 371 million (Rs. 371 million as of March 31, 2009). This is a Classification Dispute wherein the excise department had alleged that certain models of the Company's commercial vehicle- Tippers will attract NCCD (National Calamity Contingency Duty) of 1% on the ground that there are similarities between Tippers and Dumpers. The Company is contending that there are many technical differences between the two products. The appeal is pending before the Tribunal.

The Excise Authorities have raised a demand of Rs. 237 million (Rs. Nil as of March 31, 2009) on pre delivery inspection (PDI) and free after sales service charges incurred by dealers on Indica and Indigo cars out of their retailing margin. The department has taken a view that PDI and after sale services are provided by dealer on behalf of the Company and hence, should be included in excisable value of the vehicle. The case is pending before Tribunal, which has granted unconditional stay.

Sales Tax

The total sales tax demands (including interest and penalty), which are being contested by the Company amount to Rs. 4,867 million, which includes Rs. 1,013 million in respect of equity accounted investees as of March 31, 2010 (Rs. 5,424 million, which includes Rs. 323 million in respect of equity accounted investees, as of March 31, 2009). The details of the demands for more than Rs. 200 million are as follows:

The Sales Tax authorities in certain states have raised disputes totaling up to Rs. 506 million as of March 31, 2010 (Rs. 721 million as of March 31, 2009), treating the stock transfers of vehicles from the Company's manufacturing plants to sales offices and the transfers between two sales offices as sales liable for levy of sales tax. The matter has been remanded to Commercial Taxes Tribunal of Jharkhand by the Central Sales Tax Appellate Authority in case of one of the years.

Under the notification issued by the sales tax authority, Jharkhand, the rate of sales tax was reduced to 4%. Consequently, the interstate sales tax also became 4% and since it was not concessional rate against a Declaration Form, the collection of Declaration Forms was not mandatory. However, the Jharkhand sales tax authorities raised the demand aggregating Rs. 723 million as of March 31, 2010 (Rs. 909 million as of March 31, 2009), on the ground that Declaration Forms were not collected. The notification was valid until May 10, 2002. In addition to the above issue, the sales tax authorities have raised demands aggregating Rs. 158 million as of March 31, 2010 (Rs. 123 million as of March 31, 2009), for non-submission of Declaration Forms at various locations. The Company expects to get relief in appeal on submission of Forms.

Sales tax demand aggregating Rs. 1,440 million as of March 31, 2010 (Rs. 2,473 million as of March 31, 2009) has been raised by Jamshedpur sales tax authorities disallowing the purchase of raw material from Jharkhand vendors at concessional rate of 2% in case the final product is stock transferred for sale outside the state. The sales tax authorities are relying on a notification issued by the Jharkhand Government. The Commercial Taxes Tribunal, Jharkhand in its recent decision for the assessment year 2005-06, has remanded the issue to the Joint Commissioner (Appeals) for fresh adjudication.

Other Taxes and Dues

Other amounts for which the Company may contingently be liable aggregating Rs. 1,312 million, which includes Rs. 44 million in respect of equity accounted investees as of March 31, 2010 (Rs. 2,045 million, which includes Rs. 53 million in respect of equity accounted investees, as of March 31, 2009) include the following cases involving more than Rs. 200 million:

The municipal authorities in certain states levy octroi duty (a local indirect tax) on goods brought inside the municipal limits at rates based on the classification of goods. Demands aggregating Rs. 572 million as of March 31, 2010 (Rs. 572 million as of March 31, 2009) had been raised demanding higher octroi duties on account of classification disputes relating to components purchased for the manufacture of vehicles. The dispute relating to classification is presently pending before the Supreme Court and the other dispute is pending before the Bombay High Court on remand by the Supreme Court.

As of March 31, 2010, Property Tax amounting to Rs. 201 million (Rs. 177 million as of March 31, 2009) has been demanded by Pimpri Chinchwad Municipal Corporation (PCMC) on vacant land in possession of the Company. The Company has filed SLP (Special Leave Petition) before the Supreme Court against an unfavorable decision of the Bombay High Court. The Supreme Court has disposed of the SLP and remanded the matter back to PCMC for fresh adjudication.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****Other claims**

There are other claims against the Company, majority of which pertain to motor accident claims (including third parties affected in accidents while the Company's vehicles were being transferred from the Company's manufacturing plants to regional sales offices or from one sales office to the other) and product liability claims/consumer complaints. Some of the cases also relate to replacement of parts of vehicles and/or compensation for deficiency in the services by the Company or its dealers.

Guarantees

The Company has provided guarantees aggregating Rs. Nil as of March 31, 2010 (Rs. 8,565.3 million as of March 31, 2009) to banks and others in respect of loans/credit facilities availed by its joint venture.

Commitments

The Company has entered into various contracts with vendors and contractors for the acquisition of plant and machinery, equipment and various civil contracts of capital nature aggregating Rs. 19,185 million, which includes Rs. 1,988 million in respect of equity accounted investees as of March 31, 2010 (Rs. 35,100 million, which includes Rs. 2,415 million in respect of equity accounted investees, as of March 31, 2009), which are yet to be executed.

The Company has entered into various contracts with vendors and contractors for the acquisition of intangible assets of capital nature aggregating Rs. 9,564 million as of March 31, 2010 (Rs. 11,214 million as of March 31, 2009), which are yet to be executed.

For commitments related to leases, refer note 12.

37. Capital Management

The objective of the Company for capital management is to create value for shareholders, to safeguard business continuity and support the growth of the Company.

The Company determines the amount of capital required on the basis of annual operating plans and long-term product and other strategic investment plans. The funding requirements are met through equity, convertible and non-convertible debt securities and other long-term/short-term borrowings. The Company's policy is aimed at combination of short-term and long-term borrowings.

The Company monitors the capital structure on the basis of total debt to equity ratio and maturity profile of the overall debt portfolio of the Company.

Total debt includes all long and short-term debts as disclosed in notes 18 and 22 to the consolidated financial statements. Equity comprises all components excluding loss on cash flow hedges and foreign currency translation reserve.

The following table summarizes the capital of the Company:

	2010	As of March 31, 2010 (In millions)	2009
Equity*	US\$ 2,856.7	Rs. 128,264.9	Rs. 60,033.5

Total	Rs. 1,396.9	Rs. 815.2	Rs. 653,974.0	Rs. 656,186.1	Rs. 636,177.6

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3 as described below.

Quoted prices in an active market (Level 1): This level of hierarchy includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities. This category mainly includes quoted equity shares, quoted corporate debt instruments and mutual fund investments.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Valuation techniques with observable inputs (Level 2): This level of hierarchy includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This level of hierarchy includes Company's Over-the-counter (OTC) derivative contracts.

Valuation techniques with significant unobservable inputs (Level 3): This level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The main items in this category are conversion option liability in foreign currency convertible notes and unquoted available-for-sale financial assets, measured at fair value.

Conversion of notes during the year	(93.1)	(4,181.4)		
Balance at the end	US\$ 248.0	Rs. 11,136.3	US\$ 2.4	Rs. 106.8

* Total loss recognized in the statement of operations for the year ended March 31, 2010 includes Rs 7,096.6 million in respect of conversion option liability in foreign currency convertible notes outstanding as of March 31, 2010.

Notes

The short term financial assets and liabilities are stated at amortized cost which is approximately equal to their fair value.

The fair value of finance receivables have been estimated by discounting expected cash flows using rates at which loans of similar credit quality and maturity would be made as of March 31, 2010 and March 31, 2009.

Available-for-sale securities are carried at their fair values, which are generally based on market price quotations. The fair value in respect of the unquoted equity investments cannot be reliably measured. The fair value of borrowings which have a quoted market price in an active market is based on its market price and for other borrowings the fair value is estimated by discounting expected future cash flows, using a discount rate

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

equivalent to the risk free rate of return, adjusted for the credit spread considered by the lenders for instruments of the similar maturity.

Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Company could have realized or paid in sale transactions as of respective dates. As such, the fair value of the financial instruments subsequent to the respective reporting dates may be different from the amounts reported at each year end.

F-70

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****b) Transfer of financial assets**

The Company transfers finance receivables in securitization transactions / direct assignments. In such transactions the Company surrenders control over the receivables though it continues to act as an agent for the collection of receivables. In most of the transactions, the Company also provides credit enhancements to the transferee.

Consequent to the existence of credit enhancements in such transactions, the Company continues to have the obligation to pay to the transferee, limited to the extent of credit enhancement, even if it does not collect the equivalent amounts from the original asset and continues to retain substantially all risks and rewards associated with the receivables, and hence, such transfer /assignments do not meet the derecognition criteria resulting into the transfer not being recorded as sale. Consequently, the proceeds received from the transfer are recorded as collateralized debt obligation.

Further the Company transfers certain trade receivables under the debt factoring arrangements. These do not qualify for derecognition due to the recourse arrangement in place.

The carrying amount of trade receivables and finance receivables along with the associated liabilities is as follows:

Nature of Asset	2010		As of March 31, 2010		2009	
	Carrying amount of asset sold	Carrying amount of associated liabilities	Carrying amount of asset sold	Carrying amount of associated liabilities	Carrying amount of asset sold	Carrying amount of associated liabilities
	(In millions)					
Trade receivables	US\$ 450.3	US\$ 450.3	Rs. 20,216.9	Rs. 20,216.9	Rs. 12,106.9	Rs. 12,106.9
Finance receivables	1,606.7	1,666.8	72,142.5	74,838.3	89,004.9	91,422.7

c) Cash flow hedges

As of March 31, 2010, there are no designated cash flow hedges.

As per its risk management policy, the Company uses foreign currency forward contracts to hedge its risk associated with foreign currency fluctuations relating to highly probable forecast sales transactions. The fair value of such forward contracts as of March 31, 2010, March 31, 2009 and March 31, 2008, was a net loss of Rs. Nil, Rs 1,396.9 million and Rs. Nil respectively.

Changes in fair value of forward exchange contracts to the extent determined to be an effective hedge is recognized in other comprehensive income and the ineffective portion of the fair value change is recognized in statement of operations. Accordingly, the fair value change of net loss of Rs. Nil, Rs. 875.1 million (net of tax) and Rs. Nil, was recognized in other comprehensive income during the year ended March 31, 2010, March 31, 2009 and March 31, 2008, respectively.

d) Financial risk management

In the course of its business, the Company is exposed primarily to fluctuations in foreign currency exchange rates, interest rates, equity price, liquidity and credit risk, which may adversely impact the fair value of its financial instruments.

The Company has a risk management policy which not only covers the foreign exchange risks but also other risks associated with the financial assets and liabilities like interest rate risks and credit risks. The risk management policy is approved by the board of directors. The risk management framework aims to:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Create a stable business planning environment by reducing the impact of currency and interest rate fluctuations on the Company's business plan.

Achieve greater predictability to earnings by determining the financial value of the expected earnings in advance.

F-71

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)****i) Market risk**

Market risk is the risk of any loss in future earnings, in realizable fair values or in future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rate, equity price fluctuations, liquidity and other market changes. Future specific market movements cannot be normally predicted with reasonable accuracy.

i) (a) Foreign currency exchange rate risk:

The fluctuation in foreign currency exchange rates may have potential impact on the statement of operations, equity, where any transaction references more than one currency or where assets/liabilities are denominated in a currency other than the functional currency of the respective consolidated entities.

Considering the countries and economic environment in which the Company operates, its operations are subject to risks arising from fluctuations in exchange rates in those countries. The risks primarily relate to fluctuations in US Dollar, Japanese Yen and Euro against the respective functional currencies of Tata Motors Limited and its subsidiaries.

The Company, as per its risk management policy, uses forex and derivative instruments primarily to hedge foreign exchange and interest rate exposure. Further, any movement in the functional currencies of the various operations of the Company against major foreign currencies may impact the Company's revenues in international business. Any weakening of the functional currency may impact the Company's cost of imports and cost of borrowings and consequently may increase the cost of financing our capital expenditures.

The Company evaluates the impact of foreign exchange rate fluctuations by assessing its exposure to exchange rate risks. It hedges a part of these risks by using derivative financial instruments in line with its risk management policies.

The foreign exchange rate sensitivity is calculated by aggregation of the net foreign exchange rate exposure and a simultaneous parallel foreign exchange rates shift in the foreign exchange rates of all the currencies by 10% against the respective functional currency of Tata Motors Limited and its subsidiaries.

The following analysis has been worked out based on the gross exposure as of the Balance Sheet date which could affect the statement of operations. There is no exposure to the statement of operations on account of translation of financial statements of consolidated foreign entities. Further the exposure as indicated below is mitigated by some of the derivative contracts entered into by the Company as disclosed at clause (iv) below.

The following table set forth information relating to foreign currency exposure (other than risk arising from derivatives disclosed at clause (iv) below) as of March 31, 2010:

	US Dollar	Euro	JPY (In millions)	Others*	Total
Financial assets	Rs. 26,517.9	Rs. 12,821.3	Rs. 1,602.0	Rs. 14,833.5	Rs. 55,774.7
Financial liabilities	75,943.5	42,532.6	6,259.8	7,476.1	132,212.0
Net exposure asset/(liability)	Rs. (49,425.6)	Rs. (29,711.3)	Rs. (4,657.8)	Rs. 7,357.4	Rs. (76,437.3)

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

* Others include currencies such as Singapore dollars, Swiss Franc, Australian dollars, South African Rand, Chinese Yuan, Thai baht, Korean won etc.
10% appreciation/ depreciation of the respective foreign currencies with respect to functional currency of Tata Motors Limited and its subsidiaries would result in decrease / increase in the Company's net income before tax by approximately Rs 7,643.7 million for the year ended March 31, 2010.

F-72

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The following table set forth information relating to foreign currency exposure (other than risk arising from derivatives disclosed at clause (iv) below) as of March 31, 2009:

	US Dollar	Euro	JPY (In millions)	Others*	Total
Financial assets	Rs. 11,923.3	Rs. 8,368.4	Rs. 99.0	Rs. 4,400.5	Rs. 24,791.2
Financial liabilities	196,148.0	12,926.2	10,783.1	5,028.0	224,885.3
Net exposure asset/(liability)	Rs. (184,224.7)	Rs. (4,557.8)	Rs. (10,684.1)	Rs. (627.5)	Rs. (200,094.1)

* Others include currencies such as Singapore dollars, Swiss Franc, Australian dollars, etc. 10% appreciation/depreciation of the respective foreign currencies with respect to functional currency of Tata Motors Limited and its subsidiaries would result in increase/decrease in the Company's net loss before tax by approximately Rs 20,009.4 million for the year ended March 31, 2009.

The following table set forth information relating to foreign currency exposure (other than risk arising from derivatives disclosed at clause (iv) below) as of March 31, 2008:

	US Dollar	Euro	JPY (In millions)	GBP	Others*	Total
Financial assets	Rs. 15,881.8	Rs. 3,356.3	Rs. 25.0	Rs. 193.4	Rs. 254.3	Rs. 19,710.8
Financial liabilities	49,768.9	6,070.2	6,347.4	1,943.1	607.1	64,736.7
Net exposure asset/(liability)	Rs. (33,887.1)	Rs. (2,713.9)	Rs. (6,322.4)	Rs. (1,749.7)	Rs. (352.8)	Rs. (45,025.9)

* Others include currencies such as Swiss Franc, Singapore dollars, Remnibi, Australian dollars, etc. 10% appreciation/depreciation of the respective foreign currencies with respect to functional currency of Tata Motors Limited and its subsidiaries would result in decrease/increase in the Company's net income before tax by approximately Rs 4,502.6 million for the year ended March 31, 2008.

(Note: The impact is indicated on the income/loss before tax basis).

i) (b) Interest rate risk

Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rates. Any movement in the reference rates could have an impact on the cash flows as well as costs.

The Company is subject to variable interest rates on some of its interest bearing liabilities. The Company's interest rate exposure is mainly related to debt obligations. The Company also uses a mix of interest rate sensitive financial instruments to manage the liquidity and fund requirements for its day to day operations like short-term non-convertible bonds and short term loans.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In its financing business, the Company enters into transactions with customers which primarily result in receivables at fixed rates. In order to manage this risk, the Company has a policy to match funding in terms of maturities and interest rates and also for certain part of the portfolio, the Company does not match funding with maturities in order to take advantage of market opportunities.

The Company also enters into arrangements of securitization of receivables in order to reduce the impact of interest rate movements.

F-73

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

As of March 31, 2010, March 31, 2009 and March 31, 2008, net financial liability of Rs. 103,987.9 million, Rs. 202,756.4 million and Rs. 40,101.0 million respectively, was subject to the variable interest rate. Increase/decrease of 100 basis points in interest rates at the balance sheet date would result in an impact (decrease/increase in case of net income and increase/decrease in case of net loss) of Rs. 1,039.9 million, Rs. 2,027.6 million and Rs. 401.0 million on income/loss for the year ended March 31, 2010, March 31, 2009 and March 31, 2008, respectively. The model assumes that interest rate changes are instantaneous parallel shifts in the yield curve. Although some assets and liabilities may have similar maturities or periods to re-pricing, these may not react correspondingly to changes in market interest rates. Also, the interest rates on some types of assets and liabilities may fluctuate with changes in market interest rates, while interest rates on other types of assets may change with a lag.

The risk estimates provided assume a parallel shift of 100 basis points interest rate across all yield curves. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The period end balances are not necessarily representative of the average debt outstanding during the period.

This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

(Note: The impact is indicated on the income/loss before tax basis).

i) (c) Equity Price risk

Equity Price Risk is related to the change in market reference price of the investments in equity securities.

The fair value of some of the Company's investments in available-for-sale securities exposes the Company to equity price risks. In general, these securities are not held for trading purposes. These investments are subject to changes in the market price of securities. The fair value of available-for-sale equity securities as of March 31, 2010, March 31, 2009 and March 31, 2008 was Rs. 3,608.2 million, Rs 5,501.6 million and Rs. 27,273.9 million, respectively. A 10 % change in equity prices of available-for-sale securities held as of March 31, 2010, March 31, 2009 and March 31, 2008, would result in an impact of Rs. 360.8 million, Rs. 550.2 million and Rs. 2,727.4 million on equity, respectively.

The Company has investments in unquoted equity shares, the fair value of which cannot be reliably measured, of Rs. 2,369.5 million as of March 31, 2010 and Rs. 2,376.0 million as of March 31, 2009.

(Note: The impact is indicated on equity before consequential tax impact, if any).

ii) Credit risk

Credit risk is the risk of financial loss arising from counterparty failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks

Financial instruments that are subject to concentrations of credit risk principally consist of investments classified as loans and receivables, trade receivables, finance receivables, loans and advances, derivative financial instruments, financial guarantee issued for equity accounted investees (other than the Company's share). None of the financial instruments of the Company result in material concentrations of credit risks.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk was Rs. 329,431.3 million as of March 31, 2010 and Rs. 272,221.8 million as of March 31, 2009, being the total of the carrying amount of cash balance with banks, short term deposits with banks, trade receivables, finance receivables, margin money, financial assets and financial guarantee, excluding equity investments.

Financial assets that are neither past due nor impaired

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

None of the Company's cash equivalents, including time deposits with banks, are past due or impaired. Regarding trade receivables and other receivables, and other loans or receivables that are neither impaired nor past due, there were no indications as of March 31, 2010, that defaults in payment obligations will occur.

F-74

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)*****Credit quality of financial assets and impairment loss***

The ageing of trade receivables and finance receivables as of balance sheet date is given below. The age analysis have been considered from the due date.

	2010		As of March 31, 2010		2009	
	Gross	Allowance	Gross	Allowance	Gross	Allowance
Trade receivables						
Period (in months)						
Not due	US\$ 1,263.9	US\$ (1.9)	Rs. 56,751.0	Rs. (87.0)	Rs. 38,958.1	Rs. (143.5)
Overdue 1-3 months	256.7	(4.7)	11,525.0	(211.9)	9,186.5	(23.1)
Overdue 3-6 months	56.6	(21.3)	2,541.2	(956.4)	3,057.3	(830.4)
Overdue more than 6 months	38.1	(24.6)	1,710.2	(1,102.6)	2,504.0	(1,011.8)
Total	US\$ 1,615.3	US\$ (52.5)	Rs. 72,527.4	Rs. (2,357.9)	Rs. 53,705.9	Rs. (2,008.8)

	2010		As of March 31, 2010		2009	
	Gross	Allowance	Gross	Allowance	Gross	Allowance
Finance receivables						
Period (in months)						
Not due*	US\$ 3,199.1	US\$ (71.3)	Rs. 143,634.0	Rs. (3,201.0)	Rs. 155,855.2	Rs. (3,773.6)
Overdue up to 11 months	132.2	(22.0)	5,937.5	(987.1)	6,322.1	(782.1)
Overdue more than 11 months	134.8	(95.6)	6,052.4	(4,293.0)	4,040.7	(2,859.5)
Total	US\$ 3,466.1	US\$ (188.9)	Rs. 155,623.9	Rs. (8,481.1)	Rs. 166,218.0	Rs (7,415.2)

* Allowance in the Not due category includes allowance against installments pertaining to impaired finance receivables which have not yet fallen due.

iii) Liquidity risk

Liquidity risk refers to the risk that the Company cannot meet its financial obligations. The objective of liquidity risk management is to maintain sufficient liquidity and ensure that funds are available for use as per requirements.

The Company has obtained fund and non fund based working capital lines from various banks. Further, the Company has access to funds from debt markets through commercial paper programs, non-convertible debentures, fixed deposits from public and other debt instruments. The Company invests its surplus funds in bank fixed deposit and liquid and liquid plus schemes of mutual funds, which carry no-low mark to market risks. The Company has also invested 15% of the public deposits (taken by the Company) falling due for repayment in the next 12 months in bank deposits, to meet the regulatory norms of liquidity requirements.

The Company also constantly monitors funding options available in the debt and capital markets with a view to maintaining financial flexibility.

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The table below provides details regarding the contractual maturities of financial liabilities, including estimated interest payments as of March 31, 2010:

	Carrying amount	Due in 1 st Year	Due in 2 nd Year	Due in 3 rd to 5 th Year (In millions)	Due after 5 Years	Total contractual cash flows	Total contractual cash flows
Non derivative financial liabilities							
Accounts payable and acceptances	Rs. 257,353.8	Rs. 257,353.8	Rs.	Rs.	Rs.	Rs. 257,353.8	US\$ 5,731.6
Borrowings and interest accrued thereon	424,124.7	235,048.0	65,485.5	142,069.9	44,435.7	487,039.1	10,847.2
Other financial Liabilities	18,057.8	9,978.3	2,818.7	4,063.4	3,175.3	20,035.7	446.2
Derivative liabilities	78.6	78.6				78.6	1.8
Total	Rs. 699,614.9	Rs. 502,458.7	Rs. 68,304.2	Rs. 146,133.3	Rs. 47,611.0	Rs. 764,507.2	US\$ 17,026.8

Contractual maturity of borrowings includes cash flows relating to collateralized debt obligation. This represents the amount received against the transfer of finance receivables in securitization transactions/ direct assignments which do not qualify for derecognition. The liability of the Company in such cases is limited to the extent of credit enhancements provided. The contractual maturity of such collateralized debt obligation is as follows:

	Carrying amount	Due in 1 st Year	Due in 2 nd Year	Due in 3 rd to 5 th Year (In millions)	Total contractual cash flows	Total contractual cash flows
Collateralized debt obligation	Rs. 74,595.2	Rs. 46,247.7	Rs. 26,418.8	Rs. 10,479.8	Rs. 83,146.3	US\$ 1,851.8

For the purpose of compiling the contractual cash flows, it has been assumed that the foreign currency convertible notes will be repaid on maturity. If these are converted, the amount repayable will reduce as follows:

	Carrying amount	Due in 1 st Year	Due in 2 nd Year	Due in 3 rd to 5 th Year (In millions)	Total contractual cash flows	Total contractual cash flows
Foreign currency convertible Notes	Rs. 51,517.4	Rs. 1,147.0	Rs. 4,702.1	Rs. 49,518.3	Rs. 55,367.4	US\$ 1,233.1

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The table below provides details regarding the contractual maturities of financial liabilities, including estimated interest payments as of March 31, 2009.

	Carrying amount	Due in 1 st Year	Due in 2 nd Year	Due in 3 rd to 5 th Year	Due after 5 Years	Total contractual cash flows
	(In millions)					
Non derivative financial liabilities						
Accounts payable and acceptances	Rs. 199,504.9	Rs. 199,504.9	Rs.	Rs.	Rs.	Rs. 199,504.9
Borrowings and interest accrued thereon	437,317.5	333,152.6	54,048.6	84,880.9		472,082.1
Other financial liabilities	17,277.3	9,167.0	3,353.7	3,896.9	1,399.0	17,816.6
Derivative liabilities	2,086.4	2,086.4				2,086.4
Total	Rs. 656,186.1	Rs. 543,910.9	Rs. 57,402.3	Rs. 88,777.8	Rs. 1,399.0	Rs. 691,490.0

Contractual maturity of borrowings includes cash flows relating to collateralized debt obligation. This represents the amount received against the transfer of finance receivables in securitization transactions/ direct assignments which do not qualify for derecognition. The liability of the Company in such cases is limited to the extent of credit enhancements provided. The contractual maturity of such collateralized debt obligation is as follows:

	Carrying amount	Due in 1 st Year	Due in 2 nd Year	Due in 3 rd to 5 th Year	Total contractual cash flows
	(In millions)				
Collateralized debt obligation	Rs. 90,775.4	Rs. 52,807.9	Rs. 33,620.6	Rs. 17,324.0	Rs. 103,752.5

For the purpose of compiling the contractual cash flows, it has been assumed that the foreign currency convertible notes will be repaid on maturity. If these are converted, the amount repayable will reduce as follows:

	Carrying amount	Due in 1 st Year	Due in 2 nd Year	Due in 3 rd to 5 th Year	Total contractual cash flows
	(In millions)				
Foreign currency convertible notes	Rs. 46,437.4	Rs. 213.6	Rs. 6,029.0	Rs. 51,521.7	Rs. 57,764.3

iv) Derivative financial instruments and risk management

The Company has entered into variety of interest rate and foreign currency forward contracts and options to manage its exposure to fluctuations in foreign exchange rates and interest rates. The counter party is generally a bank. These financial exposures are managed in accordance with its risk management policies and procedures.

The Company also enters into interest rate swaps and interest rate currency swap agreements, mainly to manage exposure on its fixed-rate or variable-rate debt. The Company uses interest rate derivatives or currency swaps to hedge exposure to exchange rate fluctuations on principal and interest payments for borrowings denominated in foreign currencies.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Specific transactional risks include risks like liquidity and pricing risks, interest rate and exchange rates fluctuation risks, volatility risks, counterparty risks, settlement risks and gearing risks.

F-77

Table of Contents**Tata Motors Limited and subsidiaries****Notes to Consolidated Financial Statements (Continued)**

The Company is also exposed to equity price risk, interest rate risk and currency risk on embedded derivative, i.e., conversion option in foreign currency convertible notes/convertible alternative reference securities which are accounted for separately.

Fair value of derivative financial instruments other than conversion options are generally based on quoted market prices or quotations obtained from inter-bank market participants.

Fair value of conversion option in foreign currency convertible notes/convertible alternative reference securities is determined using various option valuation models such as Black Scholes Merton model, Cox Ross Rubinstein model and Monte Carlo simulation. These models consider various inputs, such as stock price as at the date of valuation, strike price of the option as per terms of issue of the instrument, time to expiry, volatility of the underlying share price, risk free interest rate, expected dividend rate, etc.

Main assumptions used in valuation of conversion option in foreign currency convertible notes (FCCN)/ convertible alternative reference securities (CARS) as of March 31, 2010:

	Currency	Share price in foreign currency	Assumptions	
			Volatility in share price	Risk free interest rate
FCCN due in 2011	USD	16.6	64.0%	0.9%
FCCN due in 2011	JPY	1,548.3	66.0%	0.7%
CARS due in 2012	USD	16.7	45.0%	1.4%
FCCN due in 2014	USD	16.7	35.0%	2.5%

Main assumptions used in valuation of conversion option in foreign currency convertible notes (FCCN)/ convertible alternative reference securities (CARS) as of March 31, 2009:

	Currency	Share price in foreign currency	Assumptions	
			Volatility in share price	Risk free interest rate
FCCN due in 2011	USD	3.0	72.9%	0.8%
FCCN due in 2011	JPY	292.0	77.8%	0.4%
CARS due in 2012	USD	2.7	45.0%	1.2%

The fair value of derivative financial instruments including embedded derivative is as follows:

	2010	As of March 31, 2010 (In millions)	2009
Forward exchange contracts, options and interest rate swaps	US\$ (0.3)	Rs. (10.4)	Rs. (1,948.8)
Embedded derivative- conversion option	(248.0)	(11,136.3)	(125.7)
Total	US\$ (248.3)	Rs. (11,146.7)	Rs. (2,074.5)

The loss on derivative contracts recognized in the statement of operations was Rs. 10,788.1 million for the year ended March 31, 2010.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The loss on derivative contracts recognized in the statement of operations was Rs. 659.3 million for the year ended March 31, 2009. The loss on forward contracts recognised in other comprehensive income during the year ended March 31,2009 was Rs. 875.1 million (net of tax).

The gain on derivative contracts recognized in the statement of operations was Rs. 3,971.1 million for the year ended March 31, 2008.

In respect of Company's forward and option contracts (excluding conversion option), a 10% appreciation/ depreciation of the foreign currency underlying such contracts would have resulted in an approximate gain of Rs. 98.3 million and an approximate loss of Rs. 304.0 million respectively, in the Company's statement of operations for the year ended March 31, 2010.

F-78

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements (Continued)

In respect of Company's forward and option contracts (excluding conversion option), a 10% appreciation/ depreciation of the foreign currency underlying such contracts would have resulted in an approximate loss of Rs. 649.9 million and an approximate gain of Rs. 683.2 million respectively, in the Company's hedging reserve as of March 31, 2009 and an approximate loss of Rs. 337.6 million and an approximate gain of Rs. 365.3 million respectively, in the Company's statement of operations for the year ended March 31, 2009.

In respect of Company's forward and option contracts (excluding conversion option), a 10% appreciation/ depreciation of the foreign currency underlying such contracts would have resulted in an approximate loss of Rs. 2,853.9 million and gain of Rs. 2,771.5 million respectively, for the year ended March 31, 2008.

Exposure to gain/loss on derivative instruments offset to some extent the exposure to foreign currency risk, interest rate risk as disclosed above.

In respect of embedded derivative, conversion option:

A 10% increase/decrease in Company's share price volatility would have resulted in an approximate loss of Rs. 2,328.1 million and an approximate gain of Rs. 2,240.2 million respectively, for the year ended March 31, 2010.

A 10% increase/decrease in Company's share price volatility would have resulted in an approximate loss of Rs. 37.5 million and an approximate gain of Rs. 30.1 million respectively, for the year ended March 31, 2009.

A 10% increase/decrease in Company's share price volatility would have resulted in an approximate loss of Rs. 1,001.1 million and an approximate gain of Rs. 673.0 million respectively, for the year ended March 31, 2008.

A 10% appreciation/depreciation in the underlying foreign currency would have resulted in an approximate gain of Rs. 2,100.8 million and an approximate loss of Rs. 2,748.0 million respectively, for the year ended March 31, 2010.

A 10% appreciation/depreciation in the underlying foreign currency would have resulted in an approximate gain of Rs. 16.6 million and an approximate loss of Rs. 18.4 million respectively, for the year ended March 31, 2009.

A 10% appreciation/depreciation in the underlying foreign currency would have resulted in an approximate gain of Rs. 321.7 million and an approximate loss of Rs. 513.9 million respectively, for the year ended March 31, 2008.

A 100 basis points and 25 basis points increase/decrease in US interest rates and Japan interest rates would have resulted in an approximate loss of Rs. 373.9 million and an approximate gain of Rs. 367.5 million respectively, for the year ended March 31, 2010.

A 50 basis points and 25 basis points increase/decrease in US interest rates and Japan interest rates would have resulted in an approximate loss of Rs. 2.1 million and an approximate gain of Rs. 1.9 million respectively, for the year ended March 31, 2009.

A 100 basis points and 25 basis points increase/decrease in US interest rates and Japan interest rates would have resulted in an approximate loss of Rs. 34.9 million and an approximate gain of Rs. 22.9 million respectively, for the year ended March 31, 2008.

The above analysis assumes that all other variables (other than variable under consideration) remain constant.

(Note: The impact is indicated on the income/loss before tax basis).

39. Collaterals

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Inventory, trade receivables, finance receivables, other financial assets, property, plant and equipment with a carrying amount of Rs. 320,102.7 million and Rs. 219,982.7 million are pledged as collateral/security against the borrowings and contingent liability as of March 31, 2010 and March 31, 2009 respectively.

Fair value of collaterals for which the Company has taken possession and held as of March 31, 2010 and March 31, 2009, amounted to Rs. 539.7 million and 1,918.1 million, respectively. The collateral represents vehicles financed by the Company and the Company normally disposes-off these vehicles through auction process.

40. Segment reporting

Tata Motors primarily operates in the Automotive segment. The Automotive segment includes all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. The Company provides financing for vehicles sold by dealers in India. The vehicle financing is intended to drive sale of vehicles by providing financing to the dealers customers and as such is an integral part of automotive business. The financing activity is assessed as an integral part of the overall automotive business. The operating results of the financing activity does not include all of the interest or cost of funds employed for the purposes of financing, and therefore the operating results of this activity is not used to make decisions about resources to be allocated or to assess performance.

The Company's products mainly include Tata and other brand vehicles and Jaguar and Land Rover vehicles.

The Company is in the process of managing the automotive business globally with an integrated and synergic strategy. Towards this objective, various steps have been initiated/being taken which mainly include sharing of resources, platforms, facilities for product development and manufacturing, sourcing strategy and mutual sharing of best practices.

As of March 31, 2010, the Automotive segment is bifurcated into the following two reportable segments.-

Tata and other brand vehicles, including financing thereof and Jaguar Land Rover.

The Company's other segment comprises primarily activities relating to production, designing and selling of construction equipment, engineering solutions and software operations (also refer note 30 regarding sale of controlling equity interest in Telcon a subsidiary engaged in manufacture and sale of construction equipments). None of the other operating segments meets the quantitative thresholds specified in IFRS 8, and accordingly, have been aggregated.

The segment information presented is in accordance with the accounting policies adopted for preparing the consolidated financial statements of the Company. Segment revenues, expenses and results include transfer between segments. Such transfers are undertaken either at competitive market prices charged to unaffiliated customers for similar goods or at contracted rates. These transfers are eliminated on consolidation.
