Form 425
May 04, 2011
Table of Contents

Filed by Alpha Beta Netherlands Holding N.V.

Pursuant to Rule 425 under the Securities Act of 1933, and

deemed filed pursuant to Rule 14a-12 under the

Securities Exchange Act of 1934

Subject Companies:

NYSE Euronext

(Commission File No. 001-33392)

Deutsche Börse AG

May 4, 2011

In connection with the proposed business combination transaction between NYSE Euronext and Deutsche Börse AG, Alpha Beta Netherlands Holding N.V., a newly formed holding company (Holdco), filed with the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*) (BaFin) a German language offer document (*Angebotsunterlage*) in connection with Holdco's exchange offer for Deutsche Börse ordinary shares, which has been reviewed by the BaFin pursuant to the German Takeover Act (*Wertpapiererwerbs- und Übernahmegesetz*) and the publication of which was permitted by the BaFin on May 2, 2011 (the BaFin-approved offer document). The BaFin-approved offer document was published in German by Holdco on May 4, 2011. An English translation of the BaFin-approved offer document, which has not been reviewed by BaFin, is attached hereto as Exhibit 1.

Holdco has also filed a registration statement on Form F-4 with the U.S. Securities and Exchange Commission (the SEC) that includes (1) a proxy statement of NYSE Euronext that will also constitute a prospectus for Holdco and (2) an exchange offer prospectus of Holdco to be used in connection with Holdco's offer to acquire Deutsche Börse ordinary shares held by U.S. holders. The registration statement was declared effective by the SEC on May 3, 2011, and the exchange offer prospectus that will be mailed to U.S. holders of Deutsche Börse ordinary shares is attached hereto as Exhibit 2. The documents set forth in Exhibits 1 and 2 contain the same offer terms and conditions and are substantially the same, except for certain modifications and updates to the disclosures made by Holdco in connection with the filing of the registration statement on May 3, 2011 which are reflected in the exchange offer prospectus in Exhibit 2. These modifications and updates do not affect the BaFin-approved offer document.

Safe Harbor Statement

In connection with the proposed business combination transaction between NYSE Euronext and Deutsche Boerse AG, Alpha Beta Netherlands Holding N.V. (Holdco), a newly formed holding company, has filed, and the SEC has declared effective on May 3, 2011, a Registration Statement on Form F-4 with the U.S. Securities and Exchange Commission (SEC) that includes (1) a proxy statement of NYSE Euronext that will also constitute a prospectus for Holdco and (2) an offering prospectus of Holdco to be used in connection with Holdco's offer to acquire Deutsche Boerse AG shares held by U.S. holders. NYSE Euronext will mail the definitive proxy statement/prospectus (when finalized) to its stockholders in connection with the vote to approve the merger of NYSE Euronext and a wholly owned subsidiary of Holdco, and Holdco will mail the offering prospectus to Deutsche Boerse AG shareholders in the United States in connection with Holdco's offer to acquire all of the outstanding shares of Deutsche Boerse AG. Holdco has also filed an offer document with the German Federal Financial Supervisory Authority (*Bundesanstalt fuer Finanzdienstleistungsaufsicht*) (BaFin), the publication of which was permitted by the BaFin pursuant to the German Takeover Act (*Wertpapiererwerbs- und Übernahmegesetz*), and which was published on May 4, 2011.

Investors and security holders are urged to read the definitive proxy statement/prospectus (when it becomes available), the offering prospectus and the offer document regarding the proposed business combination transaction because they contain important information. You may obtain a free copy of the definitive proxy statement/prospectus (when it becomes available), the offering prospectus and other related documents filed by NYSE Euronext and Holdco with the SEC on the SEC's Web site at www.sec.gov. The definitive proxy

Table of Contents

statement/prospectus (when it becomes available) and other documents relating thereto may also be obtained for free by accessing NYSE Euronext's Web site at www.nyse.com. The offer document is available at Holdco's Web site at www.global-exchange-operator.com.

This document is neither an offer to purchase nor a solicitation of an offer to sell shares of Holdco, Deutsche Boerse AG or NYSE Euronext. The final terms and further provisions regarding the public offer are disclosed in the offer document that has been approved by the BaFin and in documents that have been filed with the SEC.

No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the U.S. Securities Act of 1933, as amended, and applicable European regulations. Subject to certain exceptions to be approved by the relevant regulators or certain facts to be ascertained, the public offer is not being made directly or indirectly in or into any jurisdiction where to do so would constitute a violation of the laws of such jurisdiction, or by use of the mails or by any means or instrumentality (including without limitation, facsimile transmission, telephone and the internet) of interstate or foreign commerce, or any facility of a national securities exchange, of any such jurisdiction.

This announcement and related materials do not constitute in France an offer for ordinary shares in Holdco. The relevant final terms of the proposed business combination transaction will be disclosed in the information documents reviewed by the competent European market authorities.

Participants in the Solicitation

NYSE Euronext, Deutsche Boerse AG, Holdco and their respective directors and executive officers and other members of management and employees may be deemed to be participants in the solicitation of proxies from NYSE Euronext stockholders in respect of the proposed business combination transaction. Additional information regarding the interests of such potential participants will be included in the definitive proxy statement/prospectus and the other relevant documents filed with the SEC when they become available.

Forward-Looking Statements

This document includes forward-looking statements about NYSE Euronext, Deutsche Boerse AG, Holdco, the enlarged group and other persons, which may include statements about the proposed business combination, the likelihood that such transaction could be consummated, the effects of any transaction on the businesses of NYSE Euronext or Deutsche Boerse AG, and other statements that are not historical facts. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance and actual results of operations, financial condition and liquidity, and the development of the industries in which NYSE Euronext and Deutsche Boerse AG operate may differ materially from those made in or suggested by the forward-looking statements contained in this document. Any forward-looking statements speak only as at the date of this document. Except as required by applicable law, none of NYSE Euronext, Deutsche Boerse AG or Holdco undertakes any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

1 General information and notes for shareholders

1.1 Implementation of the exchange offer pursuant to the German Securities Acquisition and Takeover Act

This offer document (the **exchange offer document**) describes the voluntary public takeover offer (the **exchange offer**) of Alpha Beta Netherlands Holding N.V., a public limited liability company (*naamloze vennootschap*) incorporated and existing under the laws of the Netherlands, having its official seat (*statutaire zetel*) in Amsterdam, the Netherlands, and registered with the Dutch Trade Register of the Chamber of Commerce (*Kamer van Koophandel*) under number 52019756, having its registered office at Beursplein 5, 1012 JW Amsterdam, the Netherlands (**Holdco** or the **Bidder**) in accordance with the German Securities Acquisition and Takeover Act (*Wertpapiererwerbs- und Übernahmegesetz*, the **German Takeover Act**), to the shareholders of Deutsche Börse Aktiengesellschaft, Frankfurt am Main, Germany, registered in the commercial register (*Handelsregister*) of the Local Court (*Amtsgericht*) of Frankfurt am Main under HRB 32232 (**Deutsche Börse**) and, together with its affiliated companies, the **Deutsche Börse group**) and with its business address at Mergenthaler Allee 61, 65760 Eschborn, Germany (Deutsche Börse's shareholders being the **shareholders of Deutsche Börse**), except for the shareholders of Deutsche Börse excluded from the exchange offer as set forth in section 1.2.

Shareholders of Deutsche Börse whose place of residence, seat or habitual abode is in Japan (**Japanese shareholders of Deutsche Börse**) are requested to note in particular the details in section 1.2 and section 1.5.

The exchange offer is made exclusively in accordance with the laws of the Federal Republic of Germany (**Germany**), in particular pursuant to the German Takeover Act in conjunction with the Regulation on the Content of the Offer Document, the Consideration for Takeover Offers and Mandatory Offers and the Release from the Obligation to publish and to make a Tender Offer (*Verordnung über den Inhalt der Angebotsunterlage, die Gegenleistung bei Übernahmeangeboten und Pflichtangeboten und die Befreiung von der Verpflichtung zur Veröffentlichung und zur Abgabe eines Angebots* *WpÜG-Angebotsverordnung*, the **German Takeover Act Offer Regulation**) and in accordance with applicable U.S. securities laws, including Regulation 14E under the U.S. Securities Exchange Act of 1934, as amended (**Exchange Act**).

With respect to the Holdco shares to be issued in this exchange offer and the merger (as described in section 6.1), in the United States of America (herein referred to as the **United States**), a registration statement on Form F-4 (the **Registration Statement**) is required pursuant to applicable U.S. securities laws, including Section 5 of the U.S. Securities Act of 1933, as amended (the **Securities Act**), and Rule 145 thereunder, that has to become effective. However, there is the alternative of a so-called Early Commencement which means that the exchange offer may begin before the Registration Statement has become effective (see section 13.3.3). Immediately upon filing with the SEC, registration statements become public. The SEC reviews a company's registration statement after it is filed. Once the company has satisfactorily addressed all SEC comments in an amended registration statement, the registration statement will be declared effective by the SEC.

Annex 2 contains information pursuant to Section 2 no. 2 German Takeover Act Offer Regulation in conjunction with Section 7 German Securities Prospectus Act (*Wertpapierprospektgesetz*, the **German Securities Prospectus Act**) and Commission Regulation (EC) No 809/2004 (April 29, 2004), as amended, implementing Directive 2003/71/EC of the European Parliament and of the Council as regards information contained in prospectuses as well as the format, incorporation by reference and publication of such prospectuses and the dissemination of advertisements (**Prospectus Regulation**). Annex 2 forms part of this exchange offer document and should be read together with this exchange offer document.

There are no further documents other than Annex 1 (Persons acting jointly with Deutsche Börse Aktiengesellschaft) and Annex 2 (Information pursuant to Section 2 no. 2 German Takeover Act Offer Regulation in conjunction with Section 7 German Securities Prospectus Act and the Prospectus Regulation), which form part of this exchange offer document.

Table of Contents

This exchange offer document has been reviewed and its publication has been permitted by the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, **BaFin**), it has not been approved by any other authority. BaFin has reviewed the exchange offer document pursuant to the German Takeover Act and has approved its publication. The English translation of the exchange offer document has not been reviewed by BaFin.

In this exchange offer document, the registered no-par-value shares (*auf den Namen lautende Stückaktien*) of Deutsche Börse (ISIN DE0005810055), are referred to as the **Deutsche Börse shares**. The ordinary voting shares of the Bidder with a nominal value of 1.00 as described in section 6.3 are referred to as **Holdco shares**. Holdco will increase its authorized capital as described under section 6.3.2(i) in order to allow Holdco to issue the necessary shares for the exchange offer. The newly issued ordinary Holdco shares that will be used as consideration under this exchange offer are referred to as the **Holdco offer shares** (see section 4.1).

With this exchange offer, the Bidder is not making any public offer pursuant to any laws other than the laws of Germany, the laws of the United Kingdom of Great Britain and Northern Ireland (**United Kingdom**) and to some extent the laws of the United States. Consequently, unless required by mandatory law, no other announcements have been made, and no other registrations, approvals, admissions or authorizations have been applied for or granted, in respect of this exchange offer document and/or the exchange offer outside Germany (with respect to the publication and dissemination please refer to section 1.4). As a result, the shareholders of Deutsche Börse cannot rely upon the application of foreign laws for investor protection.

Shareholders of Deutsche Börse who have their place of residence, seat or place of habitual abode in the United States (**U.S. shareholders of Deutsche Börse**) are informed that the exchange offer is subject to specific publication and procedural regulations under German law, which may differ from those that would be applicable to a company with shares listed in the United States or otherwise registered under the Exchange Act. For instance, the exchange offer differs from the process of a tender offer for a company with shares listed in the United States or otherwise registered under the Exchange Act with regard to the right of withdrawal, time allowed for acceptance and settlement.

1.2 Shareholders excluded from the exchange offer

On April 20, 2011, BaFin permitted pursuant to Section 24 German Takeover Act to exclude Japanese shareholders of Deutsche Börse from the exchange offer. The exchange offer therefore cannot be accepted by them.

This does not apply to qualified institutional investors (*tekikaku kikan toshika*) (as defined in Article 2 para. 3 (i) of the Financial Instruments and Exchange Act of Japan (Law No. 25 of 1948, as amended) (**FIEA**)) (the **Japanese institutional investors** or the **admitted shareholders in Japan**).

The Japanese shareholders of Deutsche Börse (except for the admitted shareholders in Japan) are referred to as the **excluded Japanese shareholders**. For more information on the acceptance of the exchange offer outside of Germany, the United States and the United Kingdom, see also section 1.5.

1.3 Publication of the decision to make the exchange offer

On February 15, 2011, the Bidder published its decision to make the exchange offer in accordance with Section 10 para. 1 sentence 1 German Takeover Act. The publication is available on the internet at <http://www.global-exchange-operator.com>. The English translation of the exchange offer document will be filed by the Bidder with the SEC immediately after approval of the German exchange offer document by BaFin and, subsequently, will be available electronically through the SEC's Electronic Data Gathering, Analysis and Retrieval (**EDGAR**) system. The English translation of the exchange offer document can be located on EDGAR at <http://www.sec.gov/edgar/searchedgar/companysearch.html>. From this website, search Alpha Beta Netherlands Holding N.V. under the tab company name. Alternatively, the publication can be accessed from the same website by entering the registration number, which is 333-173347, under the tab file number.

Table of Contents

1.4 Publication and dissemination of this exchange offer document

In accordance with Section 14 para. 3 German Takeover Act, the Bidder will publish this exchange offer document in German (as well as an English translation which has neither been reviewed nor approved by BaFin) on the internet at <http://www.global-exchange-operator.com> on May 4, 2011. The Bidder will make available copies of the exchange offer document for distribution in Germany free of charge at Deutsche Bank AG, Taunusanlage 12, 60262 Frankfurt am Main, Germany (fax no.: +49 (69) 910 3 87 94; e-mail: DCT.Tender-Offers@db.com). The announcement regarding (i) the availability of copies of this exchange offer document in Germany for distribution free of charge and (ii) the internet address at which this exchange offer document is being published will be published in the electronic Federal Gazette (*elektronischer Bundesanzeiger*) on May 4, 2011. In the United States, the Bidder has filed a Registration Statement, and will also file the English translation of this exchange offer document until May 4, 2011, the latest, with the SEC. The Bidder will send the English translation to the U.S. shareholders of Deutsche Börse known to it. In addition, the U.S. shareholders of Deutsche Börse can request, free of charge, the delivery of the English translation of the exchange offer document to the United States either through the aforementioned internet address or by making use of the aforementioned contact details at Deutsche Bank AG. The Bidder will also publish in *The Wall Street Journal* (U.S. edition) where copies of this exchange offer document free of charge will be available and at which internet address this exchange offer document is published. The aforementioned publications serve the purpose of complying with the mandatory provisions of the German Takeover Act and of complying with the Exchange Act.

This exchange offer document has been prepared without taking into account any particular person's objectives, financial situation or needs. Shareholders of Deutsche Börse should, before acting on the information contained in this exchange offer document, consider the appropriateness of the information having regard to their personal objectives, financial situation or needs.

With respect to this exchange offer being made to shareholders of Deutsche Börse whose place of residence, seat or habitual abode is in Australia, the Bidder relies on the class order exemptions CO 09/68, CO 04/671, CO 05/850 and CO 03/606 to the Australian securities law requirements granted by the Australian Securities and Investments Commission (ASIC). This exchange offer document does not constitute a disclosure document under Chapter 6D of the Australian Corporations Act 2001 (Cwlth), was not and will not be lodged with ASIC nor approved by it, and is not, and under no circumstances is to be construed as, an advertisement or a public offering of shares in Australia. No representation is made that this exchange offer document includes those details about Holdco offer shares which are required under Chapter 6D of the Australian Corporations Act 2001 (Cwlth). Please note that as this exchange offer document has not been prepared exclusively for an Australian audience, it may contain references to dollar amounts which are not Australian dollars, may contain financial information which is not prepared in accordance with Australian law or practices, may not address risks associated with investment in foreign currency denominated investments, and does not address Australian tax issues.

Shareholders of Deutsche Börse whose last address is to the Bidder's knowledge in Canada will be sent the same materials as those sent to U.S. shareholders of Deutsche Börse under the exchange offer. In addition, a brief non-binding summary of the key terms of the exchange offer in French will be sent to shareholders of Deutsche Börse whose last address is to the Bidder's knowledge in the Province of Québec.

No publications of the exchange offer document are planned beyond the aforementioned.

This exchange offer and this exchange offer document shall not constitute an issuance, publication or public advertising of an offer pursuant to laws and regulations of jurisdictions other than those of Germany, United Kingdom and the United States. In particular, this exchange offer document, or any summary or excerpt thereof, shall not be directly or indirectly distributed, disseminated or circulated outside Germany or the United States other than as described in this section 1.4 (and the Bidder has not authorized any third party accordingly, except for the publications and disseminations described in this

Table of Contents

section 1.4) if and to the extent this is not in compliance with applicable foreign regulations, or depends on the issuance of authorizations, compliance with official procedures or any other legal requirements, and such conditions are not satisfied. The Bidder is not responsible for ensuring that the publication, distribution, dissemination or circulation of the exchange offer document outside Germany, the United Kingdom and the United States is consistent with the provisions of legal systems other than those of Germany, the United Kingdom and the United States.

The Bidder will make this exchange offer document available upon request to the respective Custodian Banks (as defined in section 12.2) for distribution to shareholders of Deutsche Börse residing in Germany, the United Kingdom and the United States only. Beyond this, the Custodian Banks may not dispatch, distribute, disseminate or circulate this exchange offer document to shareholders of Deutsche Börse not residing in Germany, in the United Kingdom or in the United States, unless this is done in compliance with the securities laws of the relevant applicable jurisdiction.

1.5 Acceptance of the exchange offer outside Germany, the United Kingdom and the United States

DUE TO THE JAPANESE INSTITUTIONAL INVESTORS EXEMPTION (ARTICLE 2 PARAGRAPH 3 LIT. II A OF THE FIEA) THE HOLDCO OFFER SHARES HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER ARTICLE 4 PARAGRAPH 1 OF THE FIEA. ACCORDINGLY, SUBJECT TO THE JAPANESE INSTITUTIONAL INVESTORS EXEMPTION, THE HOLDCO OFFER SHARES MAY NOT BE OFFERED OR SOLD WITHIN JAPAN OR TO OR FOR THE ACCOUNT OR BENEFIT OF ANY PERSON IN JAPAN OR TO OTHERS FOR RE-OFFERING OR RESALE WITHIN JAPAN OR TO OR FOR THE ACCOUNT OR BENEFIT OF ANY PERSON IN JAPAN, EXCEPT SUCH RE-OFFER OR RE-SALE IS MADE TO A JAPANESE INSTITUTIONAL INVESTOR. THIS OFFER DOCUMENT DOES NOT CONSTITUTE A PUBLIC OFFER TO JAPANESE SHAREHOLDERS OF DEUTSCHE BÖRSE (EXCEPT WITH RESPECT TO THE ADMITTED SHAREHOLDERS IN JAPAN).

Acceptance of the exchange offer outside Germany, the United States and the United Kingdom may be subject to legal restrictions. With the exception of the admitted shareholders in Japan, the exchange offer may not be accepted by Japanese shareholders of Deutsche Börse.

This exchange offer is made by way of a single global offering. Shareholders of Deutsche Börse who are not admitted shareholders in Japan and come into possession of this exchange offer document outside Germany, the United States or the United Kingdom and/or who wish to accept the exchange offer outside Germany or the United States are advised to inform themselves of the relevant applicable legal provisions and to comply with them. The Bidder assumes no responsibility for the acceptance of the exchange offer outside Germany, the United Kingdom or the United States (in particular Japan except with respect to the admitted shareholders in Japan) being permissible under the relevant applicable legal provisions. The Bidder will treat as invalid any declaration of acceptance that appears to have been executed in or dispatched or sent from Japan (except with respect to admitted shareholders in Japan). Irrespective of the above, the exchange offer may be accepted by the admitted shareholders in Japan. Such admitted shareholders in Japan will be entitled to participate in the exchange offer on a private placement basis.

Shareholders of Deutsche Börse who wish to accept the exchange offer with the exception of the admitted shareholders in Japan must not use either postal services in Japan or other means or instruments (for example transmission by fax, telex or telephone) or use the international or foreign trading facilities or the facilities of a national securities exchange in Japan for a purpose that is either directly or indirectly linked to the acceptance of the exchange offer. Declarations of acceptance or other documents referring to the exchange offer with the exception of declarations of acceptance by the admitted shareholders in Japan may not be executed or stamped in Japan or dispatched in any other way from Japan. All shareholders of Deutsche Börse accepting the exchange offer with the exception of the admitted shareholders in Japan must provide addresses outside Japan for receipt of the Holdco offer shares and the delivery of any offer-related documents.

Table of Contents

The Holdco offer shares will be freely transferable except for certain restrictions as set forth in this exchange offer document. Any resale of Holdco offer shares acquired pursuant to the exchange offer by:

- (a) Shareholders of Deutsche Börse resident in Australia must be made in accordance with Australian law. The resale of Holdco offer shares made through an exchange or a market outside of Australia or to a person outside of Australia or to Australian Sophisticated and Professional Investors (as defined in Section 708 paras. 8 and 11 of the Australian Corporations Act 2001 (Cwlth)) will not be restricted under Australian law;
- (b) Shareholders of Deutsche Börse resident in Canada must be made through (i) an exchange or a market outside of Canada, to a person or company outside of Canada or pursuant to an exemption from the prospectus requirements of applicable Canadian securities laws; and (ii) an appropriately registered dealer or pursuant to an exemption from the dealer registration requirements of applicable Canadian securities laws;
- (c) Japanese institutional investors must be made to Japanese institutional investors or to non-residents within the meaning set forth in Article 6 para. 1 (vi) of the Foreign Exchange and Foreign Trade Act of Japan (Law No. 228 of 1949) as amended, only.

Unless required by mandatory law, no action has been or will be taken in any jurisdiction other than Germany, the United Kingdom or the United States that would permit a public offering of the Holdco offer shares, or permit possession or distribution of this exchange offer document or any advertising material relating to the Holdco offer shares, except as described in section 1.4.

2 Information regarding statements contained in this exchange offer document

2.1 General

Except as otherwise stated, references to time in this exchange offer document are references to Central European Daylight Savings Time.

To the extent that expressions such as currently, at the present time, at the moment, now, at present or today are used in this exchange offer document, they refer to the point in time of publication of this exchange offer document, except as otherwise expressly stated. Despite this, in each case the information is based on the Bidder's level of information at the time of signing of this exchange offer document. To the extent that the information relates to circumstances that are not in the sphere of influence of the Bidder, persons acting jointly with the Bidder or their respective subsidiaries, there may have been changes since the signing of this exchange offer document which have not been reflected in this exchange offer document.

References in this exchange offer document to a banking day relate to a day on which the banks in Frankfurt am Main, Germany, as well as in the City of New York, New York, United States, are open for general business. References in this exchange offer document to a trading day refer to a day on which the stock exchanges in Frankfurt am Main, Germany, as well as in the City of New York, New York, United States, are open for trading. References to EUR or euro refer to the legal currency of Germany, the Netherlands and certain other member states of the European Union as from January 1, 1999; references to \$, USD or U.S. dollar refer to the legal currency of the United States.

The Bidder has not authorized any third party to make statements about the exchange offer or this exchange offer document. If unauthorized third parties nevertheless make such statements, these shall neither be attributable to the Bidder, nor to persons acting jointly with the Bidder.

2.2 Status and source of information in the offer document

The information about Deutsche Börse group, NYSE Euronext, a Delaware corporation (NYSE Euronext), and the affiliated companies of NYSE Euronext contained in this exchange offer document is based, among other things, on information made available in a due diligence exercise with regard to

Table of Contents

Deutsche Börse group, NYSE Euronext and the affiliated companies of NYSE Euronext of limited duration and scope which was carried out prior to the conclusion of the business combination agreement (as defined in section 4.2). After initial discussions regarding a possible business combination of Deutsche Börse and NYSE Euronext had been stopped in early December 2008 after unauthorized news stories regarding the existence of such discussions, new discussions were held starting August 2010 regarding the possibility of reinitiating the contemplation of a potential transaction. In the course of the discussions over the following months, individual items of financial information of Deutsche Börse and NYSE Euronext were exchanged. On January 28, 2011, NYSE Euronext and Deutsche Börse each provided one another with access to an electronic dataroom containing, among other things, financial and legal due diligence materials. The results of this due diligence were discussed in Amsterdam, the Netherlands, from January 31 to February 2, 2011 as well as in subsequent follow-up meetings (see section THE COMBINATION on pages 73 et seq. of Annex 2 regarding these discussions.).

Additional information was provided to the Bidder by Deutsche Börse group and NYSE Euronext in the course of the preparation of this exchange offer document, including oral information. In addition, the Bidder made use of information which is publicly available for the preparation of the exchange offer document. This included, in particular, in relation to Deutsche Börse group, information published on the internet at <http://www.deutsche-boerse.com>, the financial reports of Deutsche Börse, the articles of association of Deutsche Börse and information derived from the commercial register, and, in relation to NYSE Euronext and the affiliated companies of NYSE Euronext, information published on the internet at <http://www.nyse.com> and the financial reports of NYSE Euronext. The Bidder cannot rule out that the information about Deutsche Börse group, NYSE Euronext or the affiliated companies of NYSE Euronext described in this exchange offer document has changed since its publication.

In addition, the Bidder points to the fact that current members of the management board of the Bidder are also employed by Deutsche Börse (Marcus Thompson) and NYSE Euronext (Stéphane Biehler) (see section 6.4.1) and are also the sole members of the board of directors of the current sole shareholder of the Bidder (see section 6.5).

2.3 Forward-looking statements, intentions of the Bidder

This exchange offer document and the documents referred to in it contain certain forward-looking statements. Such statements are, in particular, indicated by terms such as expects, believes, attempts, estimates, intends, assumes and endeavors. Such statements express intentions, current expectations of the Bidder with regard to possible future events. Descriptions, views, intentions and forward-looking statements are, except as otherwise expressly stated, based on certain information available to the Bidder at the time of publication of this exchange offer document and on certain assumptions, intentions and assessments made by the Bidder at that time. They are subject to risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. The Bidder cautions you that forward-looking statements are not guarantees of the occurrence of such future events or of future performance and that in particular the actual results of operations, financial condition and liquidity, and the development of the industry in which Deutsche Börse group NYSE Euronext and the affiliated companies of NYSE Euronext operate may differ materially from those made in or suggested by the forward-looking statements contained in this exchange offer document.

2.4 Updates

The Bidder will update this exchange offer document to the extent permissible and required under the German Takeover Act, and will comply with its obligations under U.S. law in accordance with the Exchange Act to inform security holders of any material change in the information published, sent or given to security holders. The Bidder will also, as applicable, publish additional accompanying information regarding the exchange offer, which will be made available on the Bidder's website at <http://www.global-exchange-operator.com>, and will file such information in English on the SEC's website under the link to the EDGAR system described in section 1.3.

Table of Contents**3 Summary of the exchange offer**

The following summary contains an overview of selected matters set out in this exchange offer document. It is supplemented by, and should be read in conjunction with, the information and matters set out elsewhere in this exchange offer document. Therefore, this summary does not contain all information that may be relevant for the shareholders of Deutsche Börse. For this reason, the shareholders of Deutsche Börse should carefully read the entire exchange offer document including the Annexes.

Bidder:	Alpha Beta Netherlands Holding N.V., Beursplein 5, 1012 JW Amsterdam, the Netherlands
Target Company:	Deutsche Börse Aktiengesellschaft, 60485 Frankfurt am Main, Germany, with its business address at Mergenthalerallee 61, 65760 Eschborn, Germany
Subject matter of the exchange offer:	Acquisition of all registered no-par-value shares (<i>auf den Namen lautende Stückaktien</i>) of Deutsche Börse (ISIN DE0005810055), each representing a pro rata amount of 1.00 per share of the registered share capital (<i>Grundkapital</i>), in each case with all ancillary rights existing at the time of completion of this exchange offer (including dividend entitlements in respect of which no resolution has been passed by the general shareholders meeting (<i>Hauptversammlung</i>) of Deutsche Börse at the time of completion of the exchange offer).
Offer Consideration:	1 Holdco offer share in exchange for 1 Deutsche Börse share as set forth in section 4.1 in more detail.
Conditions:	<p>The exchange offer and the agreements which come into existence as a result of accepting the exchange offer will only be consummated if the following conditions are satisfied (see also section 14.3):</p> <p>(a) Minimum Condition</p> <p>The sum of the total number of Deutsche Börse shares in relation to which the exchange offer has been accepted and withdrawal has not been validly declared and the total number of Deutsche Börse shares that the Bidder already holds or has acquired, equals at least 75% of the sum of Deutsche Börse shares issued as of the end of the offer acceptance period and the number of total future Deutsche Börse option shares (as defined in section 7.3).</p> <p>(b) Competition Approvals</p> <p>(i) On or prior to March 31, 2012, the EU Commission has, or is deemed to have, cleared the combination (as defined in section 6.1) pursuant to the EC Merger Regulation.</p> <p>(ii) On or prior to March 31, 2012, any waiting period including any extension thereof, applicable to the combination pursuant to the Hart-Scott-Rodino Act of 1976 shall have expired or been terminated with the consequence that the combination may be consummated.</p>

(c) Effectiveness of the registration statement

7

Table of Contents

The registration statement (see section 13.3) regarding the Holdco shares to be issued to the Bidder in the context of the exchange offer and the merger

(i) shall have been declared effective by the SEC prior to the end of the offer acceptance period and

(ii) at the time of the expiration of the offer acceptance period shall not be subject of any stop order (see section 13.3.2) by the SEC pursuant to Section 8(d) of the Securities Act (as defined in section 1.1) or any proceeding initiated by the SEC seeking such a stop order.

(d) NYSE Euronext requisite vote

Prior to the end of the offer acceptance period, the NYSE Euronext requisite vote (as defined in section 9.2) shall have been obtained.

(e) Governmental and Judicial Proceedings

At the time of the expiration of the acceptance period neither any governmental entity nor legislative body nor court in

(i) the United States,

(ii) Germany,

(iii) the Netherlands,

(iv) France,

Edgar Filing: NYSE Euronext - Form 425

(v) the United Kingdom,

(vi) Portugal,

(vii) Belgium,

(viii) Switzerland or

(ix) Luxembourg,

shall have enacted any legislation, regulation, administrative act or injunction which is in force at the aforementioned time and would prohibit or make illegal the combination or the acquisition or ownership of the Deutsche Börse shares or of the NYSE Euronext shares by the Bidder.

(f) Other Approvals

On or prior to March 31, 2012, the following approvals will have been obtained:

(i) The SEC shall have approved the application under Rule 19b-4 Exchange Act (as defined in section 1.1) submitted by NYSE Euronext and/or its subsidiaries and by Deutsche Börse and/or its subsidiaries with respect to the combination;

(ii) the Dutch Minister of Finance shall have (upon recommendation of the Dutch Authority for the Financial Markets) issued a declaration of non-objection to the Bidder in connection with the combination pursuant to Section 5:32d of the Dutch Financial Supervision Act allowing Holdco to indirectly acquire the shares

Table of Contents

in Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V.;

(iii) the Dutch Minister of Finance (with advice from the Dutch Authority for the Financial Markets) or the Dutch Authority for the Financial Markets on behalf of the Dutch Minister of Finance, as applicable, shall have confirmed, reissued, renewed or amended, if so required by the Dutch Minister of Finance respectively the Dutch Authority for the Financial Markets, the existing declaration of non-objection issued to NYSE Euronext, NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Section 5:32d of the Dutch Financial Supervision Act, in each case allowing the relevant entity to acquire or hold, indirectly or directly, as the case may be, the shares of Euronext Amsterdam N.V., or the Minister of Finance and the Dutch Authority for the Financial Markets shall not have indicated that any such confirmation, reissuance, renewal or amendment is required;

(iv) the Dutch Minister of Finance and the Dutch Authority for the Financial Markets shall have reviewed and approved the combination and confirmed, reissued, renewed or amended, if so required by the Dutch Minister of Finance or the Dutch Authority for the Financial Markets, the existing exchange license granted to Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Sections 5:26 and 2:96 of the Dutch Financial Supervision Act, or the Dutch Minister of Finance and the Dutch Authority for the Financial Markets shall not have indicated that any such confirmation, reissuance, renewal or amendment is required;

(v) the Dutch Central Bank shall have issued a declaration of non-objection to Holdco pursuant to Section 3:95(1)(c) of the Dutch Financial Supervision Act allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. in their capacity as licensed operators of multilateral trading facilities, or it shall have indicated that such declaration of non-objection is not required;

(vi) the College of Euronext Regulators (see section 13.2.2 (ii)) shall have issued a declaration of non-objection to the combination pursuant to the memorandum of understanding as of June 24, 2010;

(vii) the Hessian Exchange Supervisory Authority did not prohibit the intended indirect acquisition of a significant participation in Deutsche Börse, Scoach Europa AG and Eurex Frankfurt AG within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act (*Börsengesetz*), or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;

Table of Contents

(viii) the Saxonian Exchange Supervisory Authority did not prohibit the intended indirect acquisition of a significant participation in European Energy Exchange AG and EEX Power Derivatives GmbH within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;

(ix) the Berlin Exchange Supervisory Authority did not prohibit the intended indirect acquisition of a significant participation in Tradegate Exchange GmbH within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;

(x) the BaFin did not prohibit the intended indirect acquisition of a significant participation in European Commodity Clearing AG, Eurex Clearing AG, Eurex Repo GmbH, Eurex Bonds GmbH and Clearstream Banking AG within the period available to it pursuant to Section 2c of the German Banking Act, or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;

(xi) the French Banking Regulatory Authority shall have granted the approval required pursuant to French Regulation 96-16 of the French Committee for the Regulation of Banking and Finance relating to the change of ownership and control of Euronext Paris S.A. in its capacity as credit institution;

(xii) the French Minister of the Economy shall have granted, upon advice of the French Financial Markets Authority, the approval required pursuant to Article L. 421-9 II of the French Monetary and Financial Code relating to the change of ownership and control of Euronext Paris S.A. and BlueNext S.A. in their capacity as regulated market operators;

(xiii) the U.K. Financial Services Authority shall have granted its approval in respect of the change of ownership and control of LIFFE Administration and Management pursuant to Chapter 1A of Part XVIII of the Financial Services and Markets Act 2000;

(xiv) the U.K. Financial Services Authority shall have granted its approval in respect of the change of ownership and control of LIFFE Services Limited, Secfinex Limited, Smartpool Trading Limited and Fix City Limited pursuant to Part XII of the Financial Services and Markets Act 2000 and Section SUP 11.3.4 R of the Regulatory Processes Supervision Manual of the FSA Handbook;

Edgar Filing: NYSE Euronext - Form 425

(xv) the Financial Services and Markets Authority of Belgium shall not have prohibited the intended change of ownership and control of Euronext Brussels S.A./N.V. within the period available to it pursuant to Article 19 of the Belgian Law of

Table of Contents

August 2, 2002, or it shall have issued a corresponding declaration of non-objection in respect of such intended change of ownership and control of Euronext Brussels SA/NV within this period;

(xvi) Euronext Brussels S.A./N.V. shall have received a confirmation by the Belgian Ministry of Finance regarding the preservation of its status as regulated market and as licensed market pursuant to Articles 3, 17 and 18 of the Belgian Law of August 2, 2002, or in the absence of such confirmation, Euronext Brussels S.A./N.V. shall not have received any notification by the Belgian Ministry of Finance to the contrary;

(xvii) the Portuguese Minister of Finance shall have explicitly approved of the change of ownership and control of Euronext Lisbon S.A. upon a positive legal opinion of the Portuguese Financial Supervisory Authority pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;

(xviii) the Portuguese Financial Supervisory Authority shall be notified of the change of ownership and control of Euronext Lisbon and has either not prohibited such change of control within the period available to it or has issued a declaration of non-objection to such change of control each pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;

(xix) the Portuguese Financial Supervisory Authority shall be notified of the change of ownership and control of Interbolsa and has either not prohibited such change of control within the period available to it or has issued a declaration of non-objection to such change of control each pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;

(xx) the Committee on Foreign Investments in the United States shall have granted written notice that the review of the combination under Section 721 of the U.S. Defense Protection Act of 1950 has been concluded and the Committee on Foreign Investments in the United States shall have determined that there are no unresolved national security concerns sufficient to warrant a recommendation that the U.S. President block the exchange offer and/or the merger under such Section 721 of the U.S. Defense Protection Act of 1950 and advised that action under such Section 721 has been concluded with respect to the combination;

(xxi) the Luxembourg Supervisory Authority for the Financial Sector did not prohibit the intended indirect acquisition of Clearstream Banking S.A., Clearstream International S.A. and Clearstream Services S.A. within the statutory period available to it pursuant to Articles 6 (5), 6 (16), 18 (5) and 18 (17) of the Luxembourg Financial Sector Act of April 5, 1993, or it issued corresponding declarations of non-objection with regard to the acquisition within this period;

(xxii) the Luxembourg Supervisory Authority for the Insurance Sector did not prohibit the intended indirect acquisition of Risk

Table of Contents

Transfer Re S.A. within the statutory period available to it pursuant to Articles 94 1 (4) and 94 1 (15) of the Luxembourg Insurance Act of December 6, 1991, or it issued a corresponding declaration of non-objection with regard to the acquisition within this period.

(g) No Material Adverse Market Change

During the time between the publication of the exchange offer document and the end of the offer acceptance period, there shall not have occurred a suspension of the currency trading or debt markets in

(i) Frankfurt am Main, Federal Republic of Germany, and London, Great Britain, or

(ii) the City of New York, New York, USA

for more than three consecutive trading days.

(h) No offer material adverse effect relating to NYSE Euronext

During the time between the publication of the exchange offer document and the end of the offer acceptance period, there shall not have occurred an offer material adverse effect relating to NYSE Euronext (**the offer material adverse effect in relation to NYSE Euronext**).

An offer material adverse effect relating to NYSE Euronext is the occurrence of a circumstance or circumstances relating to NYSE Euronext, that, according to the assessment of an independent expert, has or have resulted in, or would reasonably be expected to result in, individually or in the aggregate, a decrease in the consolidated net revenues of NYSE Euronext of at least US\$ 300,000,000 in the 2011 financial year and/or 2012 financial year of NYSE Euronext, to the extent the decrease is recurrent. Consolidated net revenues of NYSE Euronext are the total revenues less transaction-based expenses pursuant to the consolidated financial statement 2010.

An offer material adverse effect relating to NYSE Euronext will only be deemed to have occurred if, on or before the day before the publication of the results of the exchange offer pursuant to

Edgar Filing: NYSE Euronext - Form 425

Section 23 para. 1 sentence 1 no. 2 German Takeover Act, an independent expert from Deloitte & Touche GmbH Wirtschaftsprüfungsgesellschaft (**independent expert**), using the due and careful consideration of a diligent professional, has delivered an opinion that an offer material adverse effect has occurred. Upon request of the Bidder, the independent expert will undertake an evaluation of whether an offer material adverse effect relating to NYSE Euronext has occurred. The independent expert shall further carry out his evaluation without undue delay. The opinion of the independent expert is binding on and non-appealable by the Bidder and Deutsche Börse shareholders and will be published by the Bidder without undue delay in the electronic Federal Gazette (*elektronischer Bundesanzeiger*), the *Frankfurter Allgemeine Zeitung* and *The Wall Street Journal* (US edition) with reference to the exchange offer.

Table of Contents

- (i) No offer material adverse effect relating to Deutsche Börse

During the time between the publication of the exchange offer document and the end of the offer acceptance period, there shall not have occurred an offer material adverse effect relating to Deutsche Börse (**the offer material adverse effect relating to Deutsche Börse**).

An offer material adverse effect relating to Deutsche Börse is the occurrence of a circumstance or circumstances relating to Deutsche Börse, that, according to the assessment of the independent expert, has or have resulted in, or would reasonably be expected to result in, individually or in the aggregate, a decrease in the consolidated net revenues of Deutsche Börse, of at least US\$ 300,000,000 in the 2011 financial year and/or 2012 financial year of Deutsche Börse, to the extent the decrease is recurrent. Consolidated net revenues of Deutsche Börse are the total revenues less volume-related costs pursuant to the consolidated financial statement 2010.

An offer material adverse effect relating to Deutsche Börse will only be deemed to have occurred if, on or before the day before the publication of the results of the exchange offer pursuant to Section 23 para. 1 sentence 1 no. 2 German Takeover Act, the independent expert, using the due and careful consideration of a diligent professional, has delivered an opinion that an offer material adverse effect relating to Deutsche Börse has occurred. Upon request of the Bidder the independent expert will undertake an evaluation of whether an offer material adverse effect relating to Deutsche Börse has occurred. The independent expert shall further carry out his evaluation without undue delay. The opinion of the independent expert is binding on and non-appealable by the Bidder and Deutsche Börse shareholders and will be published by the Bidder without undue delay in the electronic Federal Gazette (*elektronischer Bundesanzeiger*), the *Frankfurter Allgemeine Zeitung* and *The Wall Street Journal* (US edition) with reference to the exchange offer.

- (j) IRS Ruling or Rulings vis-à-vis NYSE Euronext

On or prior to the end of the offer acceptance period, NYSE Euronext shall have received one or more private letter rulings from the U.S. Internal Revenue Service (**IRS**) substantially to the effect that

- (i) the merger will qualify as a reorganization within the meaning of Section 368(a) of the U.S. Internal Revenue Code and/or the merger and the exchange offer, taken together, will qualify as an exchange within the meaning of Section 351(a) of the U.S. Internal Revenue Code; and

Edgar Filing: NYSE Euronext - Form 425

(ii) (A) the transfer of NYSE Euronext shares by U.S. persons for shares of the bidder will qualify for an exception to Section 367(a)(1) of the U.S. Internal Revenue Code under U.S. Treasury Regulation Sections 1.367(a)-3(c)(1) and 1.367(a)-3(c)(9), and (B) any U.S. person transferring NYSE Euronext shares to the Bidder who is a 5% transferee shareholder of NYSE Euronext (within the meaning of U.S. Treasury Regulation Section 1.367(a)-3(c)(5)(ii)) will qualify for the exception to Section 367(a)(1) of the U.S. Internal Revenue Code only upon entering a five-year

Table of Contents

gain recognition agreement pursuant to U.S. Treasury Regulation Section 1.367(a)-8.

(k) IRS-Ruling vis-à-vis Deutsche Börse

On or prior to the end of the offer acceptance period, Deutsche Börse shall have received a private letter ruling from the IRS substantially to the effect that the exchange offer will qualify as a transaction described in Section 351 (a) of the U.S. Internal Revenue Code and/or the exchange offer and the merger, taken together, will qualify as transaction described in Section 351(a) of the U.S. Internal Revenue Code.

Offer Acceptance Period:

May 4, 2011 to midnight, at the end of July 13, 2011 (Central European Daylight Savings Time)

Additional Offer Acceptance Period:

Provided that the offer acceptance period (as defined in section 5.2) is not extended, the additional offer acceptance period (as defined in section 5.3) is expected to begin on July 20, 2011 and to expire on August 2, 2011.

Acceptance:

Acceptance of the exchange offer must be declared in writing by the relevant shareholder of Deutsche Börse to the Custodian Bank (as defined in section 12.2) during the offer acceptance period or the additional offer acceptance period. Until settlement of the exchange offer pursuant to the terms and conditions of this exchange offer document, the Deutsche Börse shares, for which the declaration of acceptance (as defined in section 12.2) has become effective, remain in the accepting shareholder's securities account; they are, however, each re-booked under a different International Securities Identification Number (**ISIN**) and identified as tendered Deutsche Börse shares .

The declaration of acceptance will only become effective, as described in more detail in sections 12.2 and 12.5, upon the Deutsche Börse shares in respect of which the exchange offer has been accepted being re-booked, in a timely manner, at Clearstream Banking AG, Frankfurt am Main (**Clearstream**), under ISIN DE00A1KRND6 (tendered Deutsche Börse shares).

Withdrawal

Until the end of the offer acceptance period, the shareholders of Deutsche Börse may, at any time, withdraw from the agreements concluded as a result of the acceptance of the exchange offer.

Costs of Acceptance:

The acceptance of the exchange offer is free of costs and expenses for the accepting shareholders of Deutsche Börse holding their Deutsche Börse shares in collective safe custody with a Custodian Bank which, in turn,

holds these shares in custody in its securities account at Clearstream. Costs resulting from the transmission of the declaration of acceptance to the custodian bank will, however, not be reimbursed.

Costs and expenses charged by any other custodian banks or foreign intermediate custodians outside Germany shall be borne by each accepting shareholder of Deutsche Börse.

Edgar Filing: NYSE Euronext - Form 425

Further, any taxes related to the transfer of the tendered Deutsche Börse shares in exchange for Holdco offer shares must be borne by the relevant shareholder of Deutsche Börse. The same is true for any foreign stock exchange trading taxes or stamp duties as well as other taxes or fees which fall due when accepting the exchange offer.

Table of Contents

ISINs:	Deutsche Börse shares:	ISIN DE0005810055
	tendered Deutsche Börse shares:	ISIN DE00A1KRND6
	Holdco offer shares:	ISIN NL0009766997

Listing of Holdco offer shares:

The Bidder will apply prior to the time of delivery of the Holdco offer shares to the shareholders of Deutsche Börse under the exchange offer for admission of its shares, including the Holdco offer shares, to trading on the regulated market segment (*regulierter Markt*) of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard), as well as on the regulated market of Euronext Paris (*marché réglementé de Euronext Paris*) and on the New York Stock Exchange.

The Bidder will take all necessary actions that the Holdco offer shares which the accepting shareholders of Deutsche Börse will receive upon settlement of the exchange offer will have been admitted to trading (listed) at the time of delivery to the shareholders of Deutsche Börse who have accepted the exchange offer.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of the Holdco offer shares to the shareholders of Deutsche Börse having accepted the exchange offer.

Stock Exchange Trading of tendered Deutsche Börse shares:

It is intended to apply for the admission of the tendered Deutsche Börse shares (see section 12.2) to stock market trading on the regulated market of the Frankfurt Stock Exchange and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard), under ISIN DE00A1KRND6. It is intended, that the Deutsche Börse will assign a designated sponsor in order to provide for sufficient liquidity of the exchange trading in tendered Deutsche Börse shares. Trading in the tendered Deutsche Börse shares on the regulated market of the Frankfurt Stock Exchange is expected to begin on the second trading day after commencement of the offer acceptance period and to end no later than (i) after regular trading hours on the last trading day of the Frankfurt Stock Exchange within the additional offer acceptance period or (ii) after regular trading hours on the day the satisfaction of all completion conditions (unless been waived) is published (see section 14.4), whichever is the later date.

Publications:

The exchange offer document whose publication has been permitted by BaFin on May 2, 2011 and will be published on May 4, 2011 by way of announcement on the internet (together with an English translation) at [http:// www.global-exchange-operator.com](http://www.global-exchange-operator.com). The Bidder will make available copies of the exchange offer document for distribution in Germany free of charge at Deutsche Bank AG, Taunusanlage 12, 60262 Frankfurt am Main; Germany (fax no.: +49 (69) 9 10-3 87 94; e-mail: DCT.Tender-Offers@db.com). The announcement regarding (i) the availability of copies of this exchange offer document for distribution in Germany free of charge and (ii) the internet address at which this exchange offer document has been published will be published in the electronic Federal Gazette (*elektronischer Bundesanzeiger*) on May 4, 2011.

Table of Contents

In the United States, the Bidder has filed a Registration Statement, and will also file the English translation of this exchange offer document until May 4, 2011, the latest, with the SEC. The Bidder will send the English translation to the U.S. shareholders of Deutsche Börse known to it. In addition, the U.S. shareholders of Deutsche Börse can request, free of charge, the delivery of the English translation of this exchange offer document to the United States either through the aforementioned internet address or by making use of the aforementioned contact details at Deutsche Bank AG. The Bidder will also publish where copies of this exchange offer document free of charge will be available and at which internet address this exchange offer document is published in *The Wall Street Journal* (U.S. edition).

Shareholders of Deutsche Börse whose last address is to the Bidder's knowledge in Canada will be sent the same materials as those sent to U.S. shareholders of Deutsche Börse under the exchange offer.

In addition, a brief non-binding summary of the key terms of the exchange offer in French will be sent to shareholders of Deutsche Börse whose last address is to the Bidder's knowledge in the Province of Québec.

All notifications and announcements required pursuant to the German Takeover Act will also be published on the internet at <http://www.global-exchange-operator.com> (in German as well as in English) and in German in the electronic Federal Gazette. The Bidder will also file such notifications and announcements in English with the SEC and otherwise comply with its obligation under U.S. law with respect to informing security holders of any material change in the information published, sent or given to security holders.

Table of Contents

4 The exchange offer

4.1 Subject of the exchange offer

Subject to the terms and conditions set forth in this exchange offer document, the Bidder hereby offers to all shareholders of Deutsche Börse, except for the excluded Japanese shareholders (as defined in section 1.2), to acquire all outstanding registered no-par-value shares of Deutsche Börse (ISIN DE0005810055), each representing a pro rata amount of 1.00 per share of the registered share capital (*Grundkapital*), in each case together with all ancillary rights existing at the time of completion of the exchange offer (including dividend entitlements in respect of which no resolution has been passed by the general shareholders meeting (*Hauptversammlung*) of Deutsche Börse at the time of completion of this exchange offer).

The Bidder offers

1 Holdco offer share in exchange for 1 Deutsche Börse share

as consideration, each such Holdco offer share with a nominal value of 1.00 (the **offer consideration**).

American Depositary Receipts for Deutsche Börse shares (**ADRs**) may not be tendered into the exchange offer. Holders of ADRs may participate in the exchange offer after exchange of their ADRs into Deutsche Börse shares (please see section 12.9 for more details). This does not apply for Holders of ADR who are excluded Japanese shareholders who must not participate in the exchange offer as described under section 1.2.

This exchange offer is aimed at the acquisition of control over Deutsche Börse within the meaning of Section 29 para. 2 German Takeover Act and thus constitutes a takeover offer pursuant to Chapter (*Abschnitt*) 4 of the German Takeover Act. It also relates to the Deutsche Börse treasury shares as well as any new Deutsche Börse shares coming into existence as a result of stock options referred to in section 15.1 being exercised prior to the expiration of the offer acceptance period or the additional offer acceptance period.

4.2 Reasoned statement / recommendation by Deutsche Börse's management board and supervisory board

Pursuant to Section 27 para. 1 German Takeover Act the management board of Deutsche Börse (the **Deutsche Börse management board**) and the supervisory board of Deutsche Börse (the **Deutsche Börse supervisory board** ; Deutsche Börse management board and Deutsche Börse supervisory board together the **Deutsche Börse boards**) are required to give a reasoned statement in respect of the exchange offer and any amendments, as the case may be, and are required to publish such statement in accordance with Sections 34, 27 para. 3, 14 para. 3 sentence 1 German Takeover Act without undue delay after transmission of the exchange offer by the Bidder.

On February 15, 2011 Deutsche Börse announced in an ad-hoc announcement pursuant to Section 15 German Securities Trade Act (*WpHG*) that following the approval from the Deutsche Börse boards and the NYSE Euronext board of directors an agreement regarding the combination of Deutsche Börse and NYSE Euronext had been reached that day. The parties to such agreement are NYSE Euronext, Deutsche Börse, Holdco and Pomme Merger Corporation, a Delaware corporation (**Pomme Merger Corporation**).

It was also announced on February 15, 2011 in the ad-hoc announcement that in the opinion of the Deutsche Börse boards, a strategic business combination between Deutsche Börse and NYSE Euronext is in the interest of Deutsche Börse and the interest of its shareholders, and that therefore the Deutsche Börse boards have determined that they will, subject to fulfilling all of their legal duties in connection with the review of the exchange offer after its publication, recommend in accordance with Section 27 German Takeover Act that the shareholders of Deutsche Börse accept the exchange offer and tender their shares in the exchange offer.

Table of Contents

The agreement as signed on February 15, 2011, was amended by the parties to the agreement by an amendment dated May 2, 2011. The agreement as signed on February 15, 2011, including the amendment dated May 2, 2011, is hereinafter referred to as **business combination agreement** .

The material terms of the business combination agreement are summarized and described in the section **Business Combination Agreement** in Annex 2 to which reference is made. Pages G-2 et seq. of Annex 2 contain the agreement as of February 15, 2011, and the amendment dated May 2, 2011.

5 ACCEPTANCE PERIOD

5.1 Duration of the offer acceptance period

The period for acceptance of the exchange offer begins upon publication of this exchange offer document on May 4, 2011. It expires on **midnight, at the end of July 13, 2011 (Central European Daylight Savings Time)**.

5.2 Extensions of the offer acceptance period

In the circumstances set out below, the offer acceptance period will in each case be extended automatically as follows:

In the event of an amendment of the exchange offer pursuant to Section 21 German Takeover Act within the last two weeks prior to the expiration of the offer acceptance period, the offer acceptance period will be extended by two weeks (Section 21 para. 5 German Takeover Act) and, consequently, would be expected to end at midnight, at the end of July 27, 2011 (Central European Daylight Savings Time). This shall apply even if the amended exchange offer violates legal provisions.

If, during the offer acceptance period of this exchange offer, a competing offer is made by a third party for the Deutsche Börse shares (**competing offer**) and if the offer acceptance period for the present exchange offer expires prior to expiration of the acceptance period for the competing offer, the expiration of the offer acceptance period for the present exchange offer shall be determined by reference to the expiration of the acceptance period for the competing offer (Section 22 para. 2 German Takeover Act). This shall apply even if the competing offer is amended or prohibited or violates legal provisions.

The period for acceptance of the exchange offer, including all extensions of such period resulting from provisions of the German Takeover Act (but excluding the additional offer acceptance period described in section 5.3), is referred to as the **offer acceptance period** in this exchange offer document.

With regard to the right of withdrawal (*Rücktrittsrecht*) in the event of an amendment of the exchange offer or the launching of a competing offer, reference is made to the statements contained in section 17.

5.3 Additional offer acceptance period pursuant to Section 16 para. 2 German Takeover Act

Shareholders of Deutsche Börse who have not accepted the exchange offer within the offer acceptance period, may still accept the exchange offer within two weeks after publication of the results of the exchange offer by the Bidder pursuant to Section 23 para. 1 sentence 1 no. 2 German Takeover Act (the **additional offer acceptance period**), unless one of the completion conditions set out in section 14.1, which has not been validly waived before, has not been satisfied by the end of the offer acceptance period. In such case the agreements concluded through the acceptance of the exchange offer will not be executed (see section 14.3 of this exchange offer document).

The results of this exchange offer are expected to be published pursuant to Section 23 para. 1 sentence 1 no. 2 German Takeover Act within four banking days after expiration of the offer acceptance period, i.e. the expected date of publication is July 19, 2011. The additional offer

Edgar Filing: NYSE Euronext - Form 425

acceptance period is therefore expected to commence on July 20, 2011 and to end at midnight, at the end of August 2, 2011 (Central

Table of Contents

European Daylight Savings Time). The exchange offer can no longer be accepted following expiration of the additional offer acceptance period (please see, however, section 18(iv) in respect of a sell-out right for the shareholders of Deutsche Börse under certain circumstances).

6 Information on the Bidder

Shareholders are requested to read the following information regarding the Bidder in this section 6 in connection with the information provided on pages A-157 et seq. of Annex 2.

6.1 General

To date, Holdco has not conducted any material activities other than those incident to its formation and the matters contemplated by the business combination agreement, such as the formation of Pomme Merger Corporation (a wholly owned subsidiary of Holdco), the making of certain required securities law filings and the preparation of this exchange offer document (including the retention of a valuation expert to determine the value of Holdco shares to be offered as consideration under this exchange offer, see section 11.3).

As agreed in the business combination agreement, Deutsche Börse will become a subsidiary of Holdco through this exchange offer. NYSE Euronext will become a 100% subsidiary of Holdco by way of Pomme Merger Corporation being merged with and into NYSE Euronext against issuance of Holdco shares to the shareholders of NYSE Euronext (the **NYSE Euronext stockholders**) (the **merger**), which, together with the exchange offer, is referred to as the **combination**). Holdco and its subsidiaries after completion of the combination are referred to as the **Holdco group**.

6.2 Legal basis

Holdco was incorporated as a public limited liability company (*naamloze vennootschap*) under the laws of the Netherlands on February 10, 2011 and is registered with the Dutch Trade Register of the Chamber of Commerce (*Kamer van Koophandel*) under the registration number 52019756 under the legal name Alpha Beta Netherlands Holding N.V. Holdco currently does not use a commercial name different from its legal name.

Holdco has been formed for an unlimited duration. Its fiscal year is the calendar year.

Holdco's statutory seat (*statutaire zetel*) is in Amsterdam, the Netherlands, and its business address is Beursplein 5, 1012 JW Amsterdam, the Netherlands. As a company having its statutory seat in the Netherlands, Holdco is governed by Dutch law.

Following the completion of the combination, Holdco will serve as the holding company for Deutsche Börse Group, NYSE Euronext and the affiliated companies of NYSE Euronext. In the business combination agreement the parties to it agreed on the content and wording of the future articles of association of Holdco as well as the future rules of procedure of the Holdco board of directors that are supposed to be effective upon completion of the combination, in order to provide for the governance arrangements agreed between the parties as well as to comply with the relevant rules and requirements applicable to a listed company. Drafts of both documents are attached as annexes to the business combination agreement. They are set forth in Annex 2 as Exhibits B and C. As Holdco is also a party to the business combination agreement and was established prior to the date of the business combination agreement, its articles of association effective at the time of publication of this exchange offer document do not yet reflect the agreed upon provisions. Therefore, the parties to the business combination agreement have agreed that the amendment of the articles of association of Holdco and the implementation of the rules of procedure of the Holdco board of directors will become effective prior to the completion of the combination.

Prior to the completion of the combination, Holdco's general meeting of shareholders will therefore resolve to completely revise Holdco's current articles of association. The amendment of Holdco's articles of association will take effect through the execution of a notarial deed of amendment of Holdco's articles

Table of Contents

of association prior to the completion of the combination. Except for the summary, all references to Holdco's articles of association in this section 6 therefore refer to the form of Holdco's articles of association that will be in effect following execution of the notarial deed of amendment.

Following completion of the combination, Holdco's objects pursuant to article 3 of its articles of association will be: to incorporate, to participate in any way whatsoever in, to manage, to supervise businesses and companies, including without limitation businesses and companies of which the objects are to set up, develop, hold and operate, directly or indirectly, one or more exchanges or markets or other facilities with regard to the listing of, the trade in, the clearing and settlement of transactions in, and the custody of, securities and derivatives; to finance and/or acquire businesses and companies; to borrow, to lend and to raise funds, including through the issue of bonds, debt instruments or other securities or evidence of indebtedness as well as to enter into agreements in connection with aforementioned activities; to render advice and services to businesses and companies which belong to Holdco group and to third parties; to grant guarantees, to bind Holdco and to pledge its assets for obligations of businesses and companies which belong to Holdco group and on behalf of third parties; to perform any and all activities of an industrial, financial or commercial nature and to do all that is connected therewith or may be conducive thereto, all to be interpreted in the broadest sense.

6.3 Holdco share capital

Under Dutch law, the authorized share capital (*maatschappelijk kapitaal*) is the maximum amount of capital for which shares in a Dutch public limited liability company (*naamloze vennootschap*) can be validly issued. A Dutch public limited liability company may therefore only issue shares up to the aggregate amount of its authorized share capital as stipulated in its articles of association. Conceptually authorized share capital under Dutch law differs from the share capital (*Grundkapital*) of a German public limited liability company (*Aktiengesellschaft*), which consists of the issued shares. Furthermore, the authorized share capital of a Dutch public limited liability company is not to be mistaken for the term authorized capital (*Genehmigtes Kapital*) for a German public limited liability company and does not entail an authorization for the management board to issue new shares.

The authority to issue new shares in a Dutch public limited liability company is vested in the general meeting of shareholders. However, Dutch law provides that the general meeting of shareholders may delegate the authority to issue new shares to the management board.

Dutch law provides that at all times at least 20% of the authorized share capital must be issued (*geplaatst*) and that shares must be paid up (*worden volgestort*) immediately upon issuance.

Any increase of a Dutch public limited liability company's issued share capital (*geplaatst kapitaal*) exceeding its authorized share capital, requires a prior increase of the authorized share capital by way of an amendment of the articles of association to be adopted by the general meeting of shareholders. Such amendment of the articles of association is effected by the subsequent execution of a notarial deed of amendment before a Dutch civil law notary. Typically, the general meeting of shareholders will in its resolution authorize a Dutch civil law notary, a deputy or notarial assistant of the Dutch civil law notary to execute such deed of amendment.

If shares are to be issued by a Dutch public limited liability company in a number that would cause the existing authorized share capital to be exceeded, the following legal actions may be taken:

First, the general meeting of shareholders shall adopt a resolution to amend the articles of association to increase the authorized share capital.

Furthermore, the general meeting of shareholders shall resolve to issue new shares subject to the condition precedent of the amendment of the articles of association becoming effective, or will delegate the authority to issue new shares to the management board. The latter option may be useful if at the time of the resolution of the general meeting of shareholders, the exact number of shares to be issued is yet to be determined, which in the case at hand is, among others, dependent on the number of

Table of Contents

Deutsche Börse shares that have been tendered in the exchange offer. If the latter option is used, the issuance of new shares will be decided by the management board, such resolution again being subject to the condition precedent of the amendment of the articles of association increasing the authorized share capital becoming effective.

Pursuant to the resolution of the general meeting of the shareholders or the management board, as the case may be, to issue new shares, the company and the respective subscriber of the new shares will execute a deed of issuance of shares, which will also be subject to the condition precedent of the amendment of the articles of association increasing the authorized capital becoming effective.

As a final step, the deed of amendment of the articles of association of the company regarding the increase of the authorized share capital will be executed, thus giving effect to amendment of the articles of association, the resolution of the general meeting of shareholders, or the management board resolution, as the case may be, to issue new shares as well as the deed of issuance and thereby the issuance of the new shares.

As described below in section 6.3.2 (i), the Holdco shares which are required as consideration for the exchange offer and in the context of the merger respectively will be issued in accordance with this procedure. Because of the legal requirement that at least 20% of the authorized share capital must be issued and paid up immediately, and taking into account the number of Holdco shares to be issued, the increase of the authorized share capital required for the issuance of shares will have to become effective only immediately before the issuance of the shares itself.

6.3.1 Authorized and issued share capital at the time of publication of the exchange offer document

Currently, Holdco's authorized share capital (*maatschappelijk kapitaal*) amounts to 225,000, consisting of 180,000 ordinary shares with a nominal value of 1.00 and 45,000 shares belonging to the class of shares class D with a nominal value of 1.00 (the **class D shares**). Ordinary shares and class D shares can only be issued in registered form. Of such authorized capital, Holdco has issued all class D shares only at this point in time. All of Holdco's issued shares are fully paid up.

It is intended that on the same date of issuance of the Holdco shares as described under section 6.3.2(i) below or immediately hereafter, after the issuance of such shares, the class D shares will be cancelled or repurchased and subsequently cancelled by Holdco.

Unlike the Holdco shares, the class D shares can be cancelled against repayment of their nominal value and any mathematical reserves. Further, the class D shares have a limited right to dividends.

6.3.2 Development of authorized and issued share capital

(i) Increase of authorized share capital and issuance of Holdco-shares for the settlement of the exchange offer and the merger

On May 2, 2011, Holdco's general meeting of shareholders resolved to amend Holdco's articles of association and to increase its authorized share capital from 225,000 to 1,000,000,000 consisting of 500,000,000 ordinary shares with a nominal value of 1.00 per share (referred to as Holdco shares in this exchange offer document) and 500,000,000 preference shares with a nominal value of 1.00 per share (the **increase of the authorized share capital** or the **resolution to increase the authorized share capital**). In the resolution to increase the authorized share capital each (deputy) civil law notary or notarial assistant of Linklaters LLP in Amsterdam was authorized to execute the amendment of the articles of association. The notarial deed of amendment is to be executed upon request of Holdco as soon as the prerequisites for the completion of the exchange offer are fulfilled.

Holdco's general meeting of shareholders of May 2, 2011, has further resolved to authorize the Holdco board of directors to issue, or grant rights to subscribe for, Holdco shares for a period of five years from the date such resolution has been adopted or to exclude or limit subscription rights for the Holdco shares

Table of Contents

issued on this basis. The authority for the Holdco board of directors to issue, or grant rights to subscribe for, ordinary shares is limited to in the aggregate of:

such number of Holdco shares as is required to fulfil its obligations under the exchange offer, the merger and several other measures in connection with the combination; and

100,000,000 Holdco shares,

The aforementioned resolution also entails the authority to issue preference shares as described in detail below in section 6.3.2 (ii).

The current sole shareholder of Holdco, the Stichting Alpha Beta Netherlands (see section 6.5), has agreed in the context of the above resolutions of the general meeting not to withdraw these resolutions without consent of Holdco.

On the basis of the above resolutions of the general meeting Holdco is enabled to fulfill its obligations to deliver Holdco shares, including the Holdco offer shares, under the exchange offer and the merger without further action being required from Holdco's general meeting of shareholders.

The issuance of these Holdco shares in accordance with the actions set forth in section 6.3.1 above will be effected as follows:

after satisfaction of all prerequisites for the completion of the exchange offer, the Holdco board of directors will, pursuant to its delegated authority to issue shares, resolve to issue such number of Holdco shares as is required to fulfill the obligations to deliver Holdco shares under the exchange offer and the merger. This resolution will be subject to the condition precedent that Holdco's authorized share capital is increased by way of the amendment of its articles of association becoming effective.

Holdco will then in combination with the subscriber(s), i.e. Deutsche Bank AG as central settlement agent and exchange escrow agent with respect to the exchange offer (see section 12.1), enter into one or more deeds of issuance regarding the issuance of the respective Holdco shares which will also be subject to the condition precedent that Holdco's authorized share capital is increased by way of the amendment of its articles of association becoming effective.

Finally, Holdco will, in accordance with the requirements of the resolution of the general meeting to increase the authorized share capital, instruct a (deputy) civil law notary or notarial assistant to execute the notarial deed of amendment of the Holdco articles of association, thereby giving effect to the amendment of the articles of association regarding the increase of the authorized capital and, at the same time, to the board resolution to issue the Holdco shares as well as the deed or deeds of issuance of Holdco shares.

Ordinary shares and preference shares can only be issued in registered form. The ordinary shares will be embodied in one or more global share certificates, deposited with the relevant securities depository. A securities depository is not determined yet. Possibly, there will be two securities depositories for purposes of the settlement of Holdco shares. Thus, it is possible that there will be one central securities depository in respect of the global share certificate for the Holdco shares to be admitted to trading on the Frankfurt Stock Exchange and Euronext in Paris and another central securities depository in respect of the Holdco shares admitted to trading on the New York Stock Exchange. No share certificates will be issued in respect of preference shares.

The Holdco offer shares as well as the Holdco shares required for the merger will be issued for onward delivery through the custody banks system, in accordance with their regular settlement procedures for equity securities, to the Custodian Banks and any other intermediary custodian for credit to securities accounts of the shareholders of Deutsche Börse who validly tendered and did not effectively withdraw their Deutsche Börse shares in the exchange offer and the securities accounts of the NYSE Euronext stockholders. These newly issued Holdco shares are issued against contribution in kind consisting of tendered Deutsche Börse shares and NYSE Euronext shares.

Table of Contents

The Holdco shares, including the Holdco offer shares, will be freely transferable and capable of being encumbered with a right of pledge or usufruct. The Holdco offer shares will have full dividend rights since the incorporation of Holdco on February 10, 2011.

(ii) Preference shares

Pursuant to the resolution of the general meeting of Holdco's shareholders which was adopted on May 2, 2011, the Holdco board of directors is also authorized to issue preference shares with a nominal value of 1.00 per share. The authority for the Holdco board of directors to issue preference shares and related subscription rights is limited to such number as will not exceed the lower of (1) the maximum number of unissued preference shares forming part of the authorized share capital of Holdco at the time of issue and (2) the number of preference shares with an aggregate nominal amount equal to the aggregate nominal amount of the outstanding Holdco shares at the time of issue. At the time of publication of this exchange offer document, the Holdco board has not made use of such power and does not intend to make use of it.

The Holdco preference shares may in the future be issued to an independent entity, which would most likely be a Dutch foundation (*stichting*), with the objective of safeguarding the interests of Holdco, its businesses and the interests of shareholders and other stakeholders involved, from acquisitions of Holdco shares which could jeopardise Holdco's independence, continuity or (corporate) identity, including in particular an unsolicited attempt to effect a change of control regarding Holdco or a change in the management. An issue of preference shares, or the ability of Holdco to issue preference shares in the future, may have the effect of preventing, discouraging or delaying an unsolicited attempt to effect a change of control regarding Holdco or a change in the management and may enhance the ability of the Holdco board of directors to review and consider any proposals or actions of a bidder and/or any alternative courses of action. Holdco's articles of association will provide that within 24 months following the day of issuance of preference shares, a general meeting of shareholders will be held to consider the repurchase or cancellation of the Holdco preference shares. If the general meeting of shareholders does not resolve to repurchase or cancel the preference shares, then each 12 months after the last general meeting of shareholders at which such resolution was on the agenda, a general meeting of shareholders will be held to consider the repurchase or cancellation of the preference shares, until no preference shares remain outstanding.

6.3.3 Shareholder's register

Following the completion of the combination, a register of shareholders will be maintained by or on behalf of Holdco, which will be regularly updated. The register may, in whole or in part, be kept in more than one copy and at more than one address. Part of the register of shareholders may be kept outside of the Netherlands in order to comply with applicable foreign statutory provisions or rules of the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris and any other stock exchange where Holdco shares or depositary receipts of Holdco shares are listed.

6.3.4 Comparison of shareholder rights

After completion of the combination, Deutsche Börse shareholders who accept the exchange offer and acquire Holdco shares in exchange for their Deutsche Börse shares will be governed by Dutch law with respect to their shareholder rights, which may differ from German stock corporation law. An overview regarding the material differences between the rights of holders of Deutsche Börse shares before the completion of the combination, and the rights of holders of the Holdco shares after the combination is set forth on pages 402 et seq. of Annex 2. In the following, some of these differences shall be summarized:

- (i) Other than by the management, a general meeting of shareholders of Deutsche Börse may also be called if shareholders, whose holding in the aggregate equals or exceeds 5% of the share capital, demand such meeting in writing, stating the purpose of and reasons for such meeting. In the case of Holdco, shareholders representing in the aggregate at least 10% of the issued capital may also request the Holdco board of directors to convene a general meeting of shareholders, stating specifically the business to be discussed.

Table of Contents

- (ii) A qualified minority of shareholders of Deutsche Börse and of shareholders of Holdco, respectively, is entitled to demand that a matter be placed on the agenda of the general shareholders' meeting for resolution. In the case of Deutsche Börse, this requires the application of shareholders holding Deutsche Börse shares representing an aggregate of at least 5% of the issued share capital or in an aggregate nominal amount of at least 500,000. In the case of Holdco, the shareholder or shareholders making the request must represent at least one-hundredth part of Holdco's issued share capital or, according to the applicable official stock exchange price of the New York Stock Exchange, the Frankfurt Stock Exchange, Euronext Paris or any other stock exchange where shares or depositary receipts of shares are listed, a value of at least 50,000,000, or such other part of Holdco's issued capital as may be required in this respect by the laws of the Netherlands.

- (iii) Unless statutory law provides for the contrary, e.g. in the case of the conclusion of a domination and profit and loss transfer agreement which requires a majority of at least 75% of the votes cast, resolutions of the shareholders' meeting of Deutsche Börse will be adopted with a simple majority of the votes cast. To the extent that the laws of the Netherlands or Holdco's articles of association do not provide otherwise, all resolutions of the general meeting of shareholders will be adopted by a simple majority of the votes cast. However, for certain resolutions like amendments of the articles of association, mergers, or demergers, a majority of two-thirds of the votes cast at the relevant meeting of shareholders is required. In some cases, the two-thirds majority must represent more than one-half of Holdco's issued share capital.

- (iv) Under German as well as under Dutch stock corporation law, an existing shareholder of a stock corporation has a preferential right to subscribe for new shares in proportion to the number of shares such shareholder already holds in the corporation's existing share capital (preemptive rights or subscription rights; *Bezugsrechte*). However, under Dutch law this does not apply for the issuance of shares against consideration in kind, the issuance of preference shares or in other legally defined cases.

The subscription rights of shareholders of Deutsche Börse may only be excluded if so provided for in the same shareholders' resolution that authorizes the respective capital increase or share issuance. The resolution must be adopted with a majority of at least 75% of the share capital represented at the meeting. When exercising the authorized capital, the Deutsche Börse management board, with the approval of the Deutsche Börse supervisory board, may increase the share capital excluding subscription rights.

Holdco's general meeting of shareholders, or Holdco's board of directors if so authorized by the general meeting of shareholders for a period not exceeding five years, may restrict or exclude subscription rights. A resolution by the general meeting of shareholders to authorize Holdco's board of directors to exclude or restrict subscription rights requires a majority of at least two-thirds of the valid votes cast at the general meeting of shareholders if less than half of Holdco's issued share capital is present or represented. A simple majority is sufficient if more than half of Holdco's issued share capital is present or represented.

The Holdco articles of association will—in contrast to the articles of association of Deutsche Börse—presumably provide that no person, either alone or together with its related persons, may be beneficial owner of Holdco shares entitling to cast votes representing in the aggregate more than 40% of all voting rights. In certain cases the respective threshold may not exceed 20% of the voting rights. Further, the Holdco articles of association will—also in contrast to the articles of association of Deutsche Börse—possibly provide that no person, either alone or together with its related persons, may hold more than 20% of all voting rights. In both cases, the Holdco board of directors may grant exemptions from the aforementioned restrictions under certain conditions and with the approval of the SEC. Additionally, any such exemptions from the aforementioned restrictions must be approved by European regulators having appropriate jurisdiction and authority. With regard to further explanations of these limitations, reference

Table of Contents

is made to pages 385 et seq. of Annex 2 as well as to the articles of association of Holdco which are enclosed in attachment B of Annex 2.

Pursuant to Section 1 para. 3 sentence 1 and 2 German Takeover Act as well as the respective provisions of the Dutch Financial Supervision Act (*Wet op het financieel toezicht*), the Bidder has a (restricted) right of choice regarding the applicable national takeover law. The Bidder may choose between the applicability of German or French takeover law as long as the Dutch (takeover) law does not provide for mandatory provisions that apply to Holdco in respect to certain aspects (mandatory provisions of Dutch law can for example be found in relation to information of trade unions or employees in the context of takeovers). Currently, the Bidder has not decided whether it will be governed by German or French takeover law in the future. The Bidder will decide in due time prior to the beginning of the trading of its shares.

6.4 Directors and management

6.4.1 Current Holdco board of directors

Holdco is led by a one-tier board. Currently, Holdco is managed by a board of directors with two managing directors: Marcus Thompson, who is also head of financial accounting and controlling of Deutsche Börse, and Stéphane Biehler, who is also senior vice president, chief accounting officer and corporate controller of NYSE Euronext. The current managing directors were appointed by way of resolutions of the shareholders meeting of the Bidder immediately after the formation of the Bidder while Deutsche International Trust Company N.V., with its statutory seat in Amsterdam, the Netherlands, had initially been appointed as managing director for the purposes of foundation of the Bidder. Messrs. Thompson and Biehler are also sole members of the board of the sole shareholder of the Bidder (see section 6.5). Decisions of the management board of Holdco prior to the completion of the combination may only be made by both managing directors acting jointly.

Messrs. Biehler and Thompson will resign from their office at Holdco upon appointment of the members of the Holdco board of directors as described in section 6.4.2.

6.4.2 Holdco board of directors following the combination

In the context of the amendment of Holdco's articles of association and the implementation of the rules for the Holdco board of directors as described above in section 6.2, the board of directors will be newly appointed. Unless otherwise agreed by NYSE Euronext and Deutsche Börse, the Holdco board of directors, that will be composed of 17 members, will be established on the basis of a respective resolution of the general meeting of the Holdco shareholders within one month after the expiration of the offer acceptance period. In accordance with the provisions of the business combination agreement (see section 9.1), the board of directors will be composed of Dr. Reto Francioni, the current chief executive officer of Deutsche Börse, who is agreed to assume the position of the chairman of Holdco group (the **Holdco group chairman**); Duncan L. Niederauer, the current chief executive officer of NYSE Euronext, who is agreed to assume the position of the Holdco group chief executive officer (the **Holdco group CEO**), and 15 non-executive directors, consisting of nine non-executive directors designated for appointment upon nomination by Deutsche Börse and six non-executive directors designated for appointment upon nomination by NYSE Euronext.

The articles of association of Holdco to be in effect as of completion of the combination provide that directors are appointed by the general meeting of shareholders by resolution adopted by a two-thirds majority of the votes cast representing more than one-half of Holdco's issued share capital, or by a majority of the votes cast in case of persons nominated by Holdco's board of directors. Holdco's articles of association further provide that the board of directors has the power to submit a nomination for the appointment of directors with restricted binding effect (so called binding nomination pursuant to Section 2:133 Dutch Civil Code (**nomination with binding effect**)) to the general meeting of shareholders (also in the case of vacancies to be filled), in which case the persons nominated by the board of directors are

Table of Contents

appointed unless the nomination is overruled by a two-thirds majority of the votes cast representing more than one-half of Holdco's issued share capital.

The Holdco articles of association provide that each of the directors will be appointed at the annual general meeting of shareholders for a term that will expire at the end of the next annual general meeting of shareholders. Each of the Holdco directors will be nominated by the board of directors for re-election to the board of directors pursuant to a nomination with binding effect at each of the annual general meetings of shareholders occurring in 2012, 2013 and 2014. In addition, the Holdco group chairman and the Holdco group chief executive officer will each also be nominated by the board of directors pursuant to a nomination with binding effect for re-election to the board of directors at the annual general meetings of shareholders occurring in 2015.

In the event that the Holdco board of directors determines that (1) Holdco will qualify as a "foreign private issuer" as defined in Rule 3b-4(c) promulgated under the Exchange Act (such status is referred to as "FPI status") and will maintain FPI status on an ongoing basis through the end of the annual general meeting of shareholders occurring in 2016 and (2) the directors may be appointed by the general meeting of shareholders for a term that expires in 2015 (or in 2016 in the case of the Holdco group chairman and the Holdco group chief executive officer) and directors are not otherwise required by applicable law, regulation or stock exchange listing standards to be elected at each annual general meeting of shareholders, then the Holdco directors will be appointed by the general meeting of shareholders for a term ending at the end of the annual general meeting of shareholders occurring in 2015, except that the Holdco group chairman and the Holdco group chief executive officer will each initially be appointed for a term ending at the end of the annual general meeting of shareholders occurring in 2016.

After the annual general meeting of shareholders occurring in 2015, the number of directors will be decreased and the Holdco board of directors will consist of 12 members (without distinguishing between Deutsche Börse-directors and NYSE Euronext-directors) constituted as follows: one director being the Holdco group chairman, one executive director, being the Holdco group CEO, and 10 non-executive directors.

Prior to the annual general meeting of shareholders occurring in 2015 (or 2016 in the case of the Holdco group chairman and Holdco group CEO), in the event of a vacancy in a board seat previously occupied by a Deutsche Börse director or NYSE Euronext director, the remaining Deutsche Börse directors or NYSE Euronext directors, respectively, will recommend a replacement candidate to Holdco's Nomination, Governance and Corporate Responsibility Committee. Such recommendation to the Nominations, Governance and Corporate Responsibility Committee is binding if the vacant seat is that of the Holdco group chairman or the Holdco group CEO.

Holdco's general meeting of shareholders will at all times have the power to suspend or dismiss a member of the Holdco board of directors by a resolution adopted by a two-thirds majority of the votes cast, as far as this represents more than half of Holdco's issued capital. To the extent permitted under Dutch law, a director may also be suspended by the Holdco board of directors. A suspension may be extended several times but the total term of the suspension may not exceed three months, and the suspension will expire at the end of this period if no resolution has been adopted to either release the suspension or to dismiss the relevant director. For further information see pages A-161 et seq. of Annex 2.

The business and affairs of Holdco will, subject to the restrictions imposed by Holdco's articles of association, be managed by the Holdco board of directors. The Holdco board of directors may perform all acts necessary or useful for achieving Holdco's corporate purpose, subject to applicable law and Holdco's articles of association. Certain decisions of the Holdco board of directors must be submitted to the general meeting of shareholders for approval.

The Holdco board of directors is authorized to represent Holdco, as is the Holdco group CEO. In the event of a conflict of interest between Holdco and one of the members of the Holdco board of directors, the Holdco board of directors or the Holdco group CEO, as the case may be, will nonetheless be authorized to represent Holdco, unless the general meeting of shareholders has designated one or more

Table of Contents

persons to represent Holdco in such case. In the event of such a conflict of interest, the general meeting of shareholders will at all times be authorized to appoint another representative. Pursuant to the rules for the board of directors adopted pursuant to Holdco's articles of association, a member of the Holdco board of directors who has a conflict of interest with Holdco may not participate in the discussions and decision-making process regarding the subject or transaction to which such conflict of interest relates.

The Holdco board of directors will meet as often as it deems necessary, or at the request of the Holdco group chairman or the Holdco group CEO. In a meeting of the Holdco board of directors, each director will have the right to cast one vote. Resolutions of the Holdco board of directors on the following subjects will among other things require a majority of 66% of the total number of seats on the Holdco board of directors:

appointment and removal of the Holdco group chairman and of the Holdco group CEO pursuant to article 14.5, 15.1 and 16.1 of the articles of association of Holdco;

proposals for changes to Holdco's articles of association;

transformational M&A deals, which are defined to include transactions that, in view of their size and significance, very materially change the business of the Holdco group, either in size or direction or geographic presence, as well as certain transactions which require a shareholder vote under Dutch law;

major structural changes, which are defined as (1) any amendments to certain provisions of Holdco's articles of association; (2) changes or enhancements to the responsibilities and authorities of the Holdco group chairman until the end of the annual general meeting of shareholders held in 2016; or (3) changes or enhancements to the responsibilities and authorities of the Holdco group CEO until the end of the annual general meeting of shareholders held in 2016;

amendments to Holdco's rules for the board of directors until the end of the annual general meeting of shareholders held in 2016; and

changes to the duties and the composition of the board committees until the end of the annual general meeting of shareholders occurring in 2015.

All other resolutions of the Holdco board of directors will be adopted with a simple majority of the votes cast where a quorum (i.e., a majority of members of the board of directors) is present.

Pursuant to the Dutch Civil Code (*Burgerlijk Wetboek*) and Holdco's articles of association, resolutions of the Holdco board of directors concerning an important change in Holdco's identity or character of Holdco's business will be subject to the approval of the general meeting of shareholders. Such resolutions include: (1) the transfer of Holdco's business or nearly all of Holdco's business to a third party; (2) the entry into or termination of a long-term co-operation by Holdco or any of Holdco's subsidiaries with another legal entity or as a fully liable partner in a limited or general partnership if such co-operation or termination is of major significance to Holdco; and (3) the acquisition or disposal by Holdco or by any of Holdco's subsidiaries of a participation in another company, the value of which equals at least one-third of Holdco's assets as reflected on the consolidated balance sheet included in Holdco's most recently adopted consolidated annual accounts.

6.4.3 Global executive committee

Immediately following completion of the combination, the Holdco group CEO will appoint executive managers, together forming the members of the global executive committee of the Holdco group.

The composition of the global executive committee, its tasks and responsibilities and the decision making process will be set forth in the rules for the global executive committee which are enacted by the Holdco group CEO with the approval of the Holdco board of directors.

Edgar Filing: NYSE Euronext - Form 425

Amendments to the rules for the global executive committee will require the approval of both the Holdco group CEO and the Holdco board of directors and can therefore not be made by the Holdco group CEO acting unilaterally. The members of

Table of Contents

the global executive committee will execute Holdco's day-to-day business. Any appointment of members of the global executive committee will be made by the Holdco group CEO in close consultation with the Holdco group chairman and the Holdco board of directors. The global executive committee will consist of eight members, including the Holdco group CEO and seven other members. The only member of the global executive committee who will also serve as a director of Holdco will be Duncan L. Niederauer, the Holdco group CEO.

The following table sets forth information as to those who are agreed to be appointed as members of the global executive committee of the Holdco group and to be member of the global executive committee upon completion of the combination.

Name	Position
Duncan L. Niederauer	Holdco Group Chief Executive Officer
Andreas Preuß	Head of Global Derivatives, President and Deputy Group Chief Executive Officer
Gregor Pottmeyer	Holdco Group Chief Financial Officer
Lawrence E. Leibowitz	Head of Global Cash Trading and Listings and Chief Operating Officer of Holdco group
Jeffrey Tessler	Head of Global Settlement and Custody
Dominique Cerutti	Head of Technology Services/IT and President
Frank Gerstenschläger	Head of Market Data and Analytics
John K. Halvey	Holdco Group General Counsel/Head of Legal

Pages G-125 et seq. of Annex 2 contain the future rules of the global executive committee.

6.4.4 Further information on Holdco governance after completion of the combination

For further information on Holdco's governance after completion of the combination, please refer to the section entitled "BUSINESS OF HOLDCO AND CERTAIN INFORMATION ABOUT HOLDCO" on pages A-157 et seq. of Annex 2 hereto.

6.5 Shareholders

Stichting Alpha Beta Netherlands, a foundation (*stichting*) incorporated and existing under the laws of the Netherlands, having its official seat (*statutaire zetel*) in Amsterdam, the Netherlands, and registered with the Dutch Trade Register of the Chamber of Commerce (*Kamer van Koophandel*) under number 52008169, having its registered office at Herengracht 450, 1017 CA Amsterdam, the Netherlands, ("**Stichting** ") is currently the sole shareholder of Holdco. Stichting was founded on February 8, 2011. The objects of Stichting pursuant to section 3.1 of its articles of association are to acquire and hold shares in its own name in the capital of the Bidder and to exercise the rights attached to such shares, including the voting rights and collecting the dividends and other distributions due on these shares, to borrow funds and to acquire any form of financing in view of the acquisition of such shares, to lend funds to the Bidder through granting loans (including but not limited to non-recourse loans) or an issuance of notes or otherwise, to have the Bidder borrow funds, to have the Bidder issue notes, to alienate, sell or pledge shares in the capital of the Bidder, to have the Bidder provide a guarantee, as necessary, and to do all that is connected and conducive to the above in the broadest sense of the word. Due to its legal form as a Dutch foundation, Stichting does not have shareholders or unitholders. Stichting rather is an independent legal entity, controlled by its board of directors. Members of the board of directors are appointed by the board of directors itself. No third parties are authorized to give binding instructions to the board of directors of Stichting.

At the time of publication of the exchange offer document, the board of directors of Stichting consists of two directors: Messrs. Marcus Thompson and Stéphane Biehler, the current members of the management board of the Bidder (see section 6.4.1). Messrs. Thompson and Biehler were appointed as members of the

Table of Contents

management board shortly after Stichting's incorporation, while initially Deutsche International Trust Company N.V. had been the director of Stichting.

Immediately after the issue of the new ordinary shares of Holdco as described under section 6.3.2(i), it is intended that the class D shares will be cancelled or repurchased and subsequently cancelled. Hereafter, Stichting will cease to be a shareholder of Holdco.

6.6 Subsidiaries; (future) subsidiaries Deutsche Börse and NYSE Euronext

As at the time of publication of the exchange offer document, Holdco does not hold any equity interest in any other legal entity, except for a 100% stake in Pomme Merger Corporation.

As part of the combination, Pomme Merger Corporation will be merged with and into NYSE Euronext thus becoming a wholly owned subsidiary of the Bidder. In addition, Deutsche Börse will become a subsidiary of the Bidder after completion of the exchange offer. Regarding a more detailed description of Deutsche Börse reference is made to section 7. Regarding a more detailed description of NYSE Euronext reference is made to section 8. Further information regarding both companies can be found in Annex 2 in the sections Business of Deutsche Börse Group certain information about Deutsche Börse Group as well as Business of NYSE Euronext Group and certain information about NYSE Euronext (see pages A-183 *et seq.* and A-273 *et seq.* of Annex 2).

6.7 Persons acting jointly with the Bidder

As parties to the business combination agreement, NYSE Euronext, Deutsche Börse and Pomme Merger Corporation are persons acting jointly with the Bidder pursuant to Section 2 para. 5 sentence 1 German Takeover Act.

Pursuant to Section 2 para. 5 sentence 1 German Takeover Act in conjunction with Section 2 para. 5 sentence 3 German Takeover Act, subsidiaries are presumed to be persons acting jointly with the Bidder and with each other. At the time of publication of this exchange offer document, Pomme Merger Corporation is the only subsidiary of Holdco. Pomme Merger Corporation thus is also a person acting jointly with the Bidder pursuant to Section 2 para. 5 sentence 1 German Takeover Act in conjunction with Section 2 para. 5 sentence 3 German Takeover Act. The same applies to the sole shareholder of Holdco, Stichting.

Except for the aforementioned, there are no persons acting jointly with the Bidder within the meaning of Section 2 para. 5 German Takeover Act at the time of publication of this exchange offer document.

6.8 Deutsche Börse shares currently held by the Bidder and persons acting jointly with the Bidder and their subsidiaries, attribution of voting rights

Except for the Deutsche Börse treasury shares (see section 7.2) neither the Bidder nor any persons acting jointly with the Bidder within the meaning of Section 2 para. 5 German Takeover Act nor one of their subsidiaries hold any shares or voting rights in Deutsche Börse at the date of the publication of this exchange offer document and there are no voting rights attached to Deutsche Börse shares attributable to the Bidder, persons acting jointly with the Bidder or their subsidiaries pursuant to Section 30 German Takeover Act. Deutsche Börse is not entitled to any voting rights regarding the Deutsche Börse treasury shares pursuant to Section 71b German Stock Corporation Act (*Aktiengesetz, AktG*).

6.9 Particulars of securities transactions

In the period commencing six months prior to the publication of the decision to make the exchange offer on February 15, 2011 and ending with the publication of this exchange offer document on May 4, 2011, neither the Bidder nor persons acting jointly with the Bidder within the meaning of Section 2 para. 5 German Takeover Act nor their subsidiaries acquired Deutsche Börse-shares or concluded agreements as a result of which the transfer of ownership in Deutsche Börse shares may be demanded.

Table of Contents

6.10 Possible parallel acquisitions

The Bidder reserves the right, to the extent legally permissible, to directly or indirectly acquire additional Deutsche Börse shares outside the exchange offer on or off the stock exchange. To the extent that such acquisitions take place, this will be published without undue delay in accordance with applicable legal provisions, including without limitation in accordance with Section 23 para. 2 German Takeover Act in conjunction with Section 14 para. 3 sentence 1 German Takeover Act, on the internet at <http://www.global-exchange-operator.com>, in the electronic Federal Gazette and by way of an English press release via an electronically operated information distribution system in the United States stating the number and consideration paid or agreed to be paid for the Deutsche Börse shares so acquired or agreed to acquire.

6.11 Irrevocable undertakings

Under the business combination agreement, the Bidder and Deutsche Börse agreed that as promptly as practicable after the commencement of the exchange offer, and in any event no later than ten banking days following the recommendation pursuant to Section 27 German Takeover Act of the exchange offer by either of the Deutsche Börse boards, it shall tender into the exchange offer all of the Deutsche Börse treasury shares (see section 7.2) in accordance with the terms of this exchange offer document. Otherwise, the Bidder has currently not concluded agreements with third parties under which those third parties are obliged to accept the exchange offer in respect of the Deutsche Börse shares held by them (irrevocable undertakings).

If the Bidder should enter into irrevocable undertakings in the future, the Bidder reserves the right to exclude the right of withdrawal in each case.

7 Description of Deutsche Börse

7.1 Overview

Deutsche Börse is a German stock corporation (*Aktiengesellschaft*) with its statutory seat in Frankfurt am Main, Germany. It is registered with the commercial register of the Local Court Frankfurt am Main under HRB 32232. Deutsche Börse is headquartered in Eschborn near Frankfurt am Main.

The business objectives of Deutsche Börse are a) the operation of exchanges, including but not limited to stock exchanges, subject to applicable laws and regulations; b) services for the design, development and implementation of electronic data processing in areas including but not limited to stock exchange transactions, the securities business of financial institutions and the settlement thereof and, furthermore, the collection, processing and sale of financial information; c) the provision of support services to undertakings engaged in the stock exchange and securities business which shall include, but not be limited to, the provision of central services to such undertakings in relation to all activities thereof.

Deutsche Börse may acquire, dispose of, develop, lease, rent out or employ for third parties any hardware and software and all facilities related thereto. Deutsche Börse may transact any business, take any action and perform any other acts, which appear to be directly or indirectly necessary, suitable or useful to achieve the corporate objectives. Deutsche Börse may acquire and dispose of real estate, establish branches within and outside Germany and participate in, establish or acquire any undertakings of the same or a similar kind or, by way of exception, of a different kind. Furthermore, Deutsche Börse may enter into intra group agreements and joint ventures. Deutsche Börse shall be subject to confidentiality requirements as are customary in the banking industry.

Deutsche Börse has been established for an undefined period of time. The fiscal year of Deutsche Börse is the calendar year.

As of December 31, 2010, Deutsche Börse group employed 3,490 people in 19 locations in 15 countries. In 2010, Deutsche Börse group generated total revenues on a consolidated basis of 2,226.7 million (2009: 2,289.7 million; 2008: 2,758.6 million).

Table of Contents**7.2 Share capital**

The current share capital of Deutsche Börse is 195,000,000 and is divided into 195,000,000 registered shares with no-par value. There are no other classes of shares besides the ordinary shares.

Based on respective authorizations of the general shareholders' meeting, Deutsche Börse carried out share repurchases in the past. The last repurchases were executed in 2008. No shares were repurchased during 2009, 2010 and until the publication of this exchange offer document in 2011. Deutsche Börse currently holds 8,956,997 Deutsche Börse shares as a result of the past share buybacks (such shares referred to as **Deutsche Börse treasury shares**).

The Deutsche Börse shares are admitted to trading on the regulated market of the Frankfurt Stock Exchange and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard).

7.2.1 Authorized Capital I

The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions on or before May 23, 2011, by up to a total of 5,200,000, by issuing new registered no-par value shares against cash and/or contributions in kind (authorized capital I). The shareholders of Deutsche Börse must be granted subscription rights unless the Deutsche Börse management board, with the approval of the Deutsche Börse supervisory board, uses its authorization to exclude shareholder subscription rights. The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to exclude subscription rights if the share capital is increased against in-kind contributions in kind for the purpose of acquiring companies, parts of companies or interests in companies or other assets. The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is also authorized to exclude fractional amounts from subscription rights of shareholders of Deutsche Börse. The content of the rights attached to the shares and the terms and conditions relating to their issue, including the issue price, will be determined by the Deutsche Börse management board with the consent of the Deutsche Börse supervisory board.

7.2.2 Authorized Capital II

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions until May 26, 2015, by up to a total of 27,800,000, by issuing new registered no-par value shares against cash and/or contributions in kind (authorized capital II). The shareholders of Deutsche Börse must be granted subscription rights. However, the Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to exclude shareholder subscription rights in the case of a capital increase against cash contribution if the issue price of the new shares does not fall substantially below the quoted price of the shares and the shares issued under the exclusion of subscription rights in accordance with Section 186 (3) sentence 4 AktG may not exceed a total of 10% of the share capital of Deutsche Börse either when the authorization becomes effective by virtue of the amendment to the articles of incorporation being recorded in the commercial register or when the authorization is exercised. All shares issued or sold in accordance with Section 186 (3) sentence 4 AktG (directly or analogously) during the period of validity of the authorization until it is exercised, are included in the calculation of the 10% limit.

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is also authorized to exclude subscription rights of shareholders for a pro rata amount of the share capital of up to a total of 3,000,000 in order to issue the new shares to employees of Deutsche Börse or affiliated companies (within the meaning of Sections 15 *et seq.* AktG), excluding members of the Deutsche Börse management board and the management of affiliated companies. These shares may be issued either directly or indirectly following subscription by a credit institution and repurchase by Deutsche Börse.

Table of Contents

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is also authorized to exclude subscription rights of shareholders if the share capital is increased against contributions in kind for the purpose of acquiring companies, parts of companies or interests in companies or other assets.

The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is also authorized to exclude fractional amounts from subscription rights of shareholders.

The new shares may also be acquired by certain credit institutions or companies to be specified by the Deutsche Börse management board operating in accordance with section 53 (1) sentence 1 or section 53b (1) sentence 1 or (7) of the German Banking Act (*Gesetz über das Kreditwesen*) subject to the obligation that they offer such shares to shareholders of Deutsche Börse (indirect subscription right).

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, determines the additional terms and conditions relating to the issuance of the shares, including the issue price.

7.2.3 Authorized Capital III

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions until May 26, 2015, by up to a total of 19,500,000, by issuing new registered no-par value shares against cash contributions (authorized capital III). The shareholders of Deutsche Börse shall be granted subscription rights. However, the Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to exclude fractional amounts from subscription rights of shareholders.

The new shares may also be acquired by certain credit institutions or companies to be specified by the Deutsche Börse management board operating in accordance with Section 53 (1) sentence 1 or Section 53b (1) sentence 1 or (7) of the German Banking Act, subject to the obligation that they offer such shares to shareholders of Deutsche Börse (indirect subscription right).

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, determines the additional terms and conditions relating to the issuance of the shares, including the issue price.

7.2.4 Authorized Capital IV

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions until May 10, 2012, by up to a total of 6,000,000, by issuing new registered no-par value shares against cash and/or contributions in kind (authorized capital IV). The shareholders of Deutsche Börse shall be granted subscription rights unless the Deutsche Börse management board, with the approval of the Deutsche Börse supervisory board, uses its authorization to exclude shareholder subscription rights. The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to exclude fractional amounts from subscription rights of shareholders. The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to exclude subscription rights of shareholders in order to issue up to 900,000 new shares per fiscal year to members of the Deutsche Börse management board and employees of Deutsche Börse, as well as to members of the executive boards and management and employees of related companies (within the meaning of section 15 *et seq.* AktG). The content of the rights attached to the shares and the terms and conditions relating to their issuance, including the amount to be issued, will be determined by the Deutsche Börse management board with the consent of the Deutsche Börse supervisory board. Shares issued to members of the Deutsche Börse management board and employees of Deutsche Börse, as well as to members of the executive boards/management and employees of related companies within the meaning of Section 15 *et seq.* AktG, carry full dividend rights for the fiscal year in which they are issued.

Table of Contents**7.2.5 Conditional Capital I**

The share capital is conditionally increased by up to 6,000,000 through the issuance of up to 6,000,000 registered no-par value shares (conditional capital I). The conditional capital increase is intended solely to fulfill subscription rights granted on or before May 13, 2008 on the basis of the authorization by the General Shareholders Meeting on May 14, 2003, under item 7 of the agenda. The conditional capital increase will only be carried out to the extent that the holders of the subscription rights issued make use of their subscription rights and Deutsche Börse does not fulfill the subscription rights by transferring own shares or by making a cash payment. The new shares are entitled to receive dividends as of the beginning of the financial year in which they arise by exercise of subscription rights.

7.3 Outstanding stock options

Deutsche Börse has established several stock option plans. Based on some of these programs holders of stock options could potentially be entitled to obtain Deutsche Börse shares before or after the expiration of the offer acceptance period or the additional acceptance period. The following programs are in place:

- (i) Deutsche Börse has established a group share plan based on which employees of Deutsche Börse group, who are not members of the Deutsche Börse management board or senior executives, have the opportunity to purchase Deutsche Börse shares at discounted rates. At the time of publication of this exchange offer document a total of 73,432 options were exercisable, of which 23,920 were granted under tranche 2005 and 49,512 under tranche 2006. The options granted under tranche 2005 are exercisable until June 30, 2011, and the options granted under tranche 2006 are exercisable until June 30, 2012. Each individual option entitles the holder to subscribe for two Deutsche Börse shares unless Deutsche Börse exercises its right to settle in cash. In accordance with the terms and conditions of the group share plan, Deutsche Börse has generally decided to settle Deutsche Börse stock options in cash.
- (ii) Deutsche Börse has established a group share plan for the employees of International Securities Exchange Holdings Inc., an indirect subsidiary of Deutsche Börse group. As the stock options granted under tranche 2008 of the ISE group share plan were settled in the first quarter of 2011 (**ISE Group Share Plan**), there is only a remaining number of up to 72,983 options under tranche 2009 of this program. This tranche will become exercisable in February 2012 and entitle the holder to acquire one share per option. However, in accordance with the terms and conditions of the ISE group share plan, at Deutsche Börse's option, stock options granted under this program may be settled either in shares or in cash. Deutsche Börse currently intends to settle the stock options in cash.
- (iii) Deutsche Börse also introduced a stock bonus plan for members of the Deutsche Börse management board and senior executives of Deutsche Börse group as a long-term incentive component resulting in a total of 308,740 outstanding stock options from tranche 2009 (175,767) and tranche 2010 (132,973) at the time of publication of this exchange offer document. However, since the end of the vesting period for the stock options under tranche 2010 will be in February 2013 and therefore after completion of the exchange offer which triggers a change of control according to the terms and provisions of the stock bonus plan, settlement will be in cash only. No Deutsche Börse shares would be issued in this case. With regard to the number of stock options outstanding under tranche 2009, such stock options become mature in February 2012 and will entitle the holder to subscribe for one Deutsche Börse share per option. However, Deutsche Börse also intends in this case to settle these options in cash.
- (iv) The stock bonus plan mentioned in the preceding paragraph expired in 2009 and was replaced with a phantom stock option program for members of the Deutsche Börse management board and senior executives of Deutsche Börse group. The program was extended to members of the Deutsche Börse supervisory board for a certain period of time in the past. Stock options granted under the phantom stock option program, however, are settled in cash according to the terms and conditions of the

Table of Contents

program. No additional Deutsche Börse shares will therefore come into existence due to this phantom stock option program.

- (v) The following chart gives an overview regarding the number of options that were granted in the stock option plans previously mentioned and that are outstanding at the time of publication of this exchange offer document. Moreover, the chart describes the point in time and the number of Deutsche Börse shares that could come into existence based on these options:

	Number of issued options	Number of the shares which could come into existence	Exercise period
Group share plan DB			
Tranche 2005	23,920	47,840	Until June 30, 2011
Tranche 2006	49,512	99,024	Until June 30, 2012
Total (GSP DB)	73,432	146,864	
Group share plan ISE			
(Tranche 2009)	72,983	72,983	From February 2012
Stock bonus plan			
Tranche 2009	175,767	175,767	From February 2012
Tranche 2010	132,973	132,973	From February 2013
Total (SBP)	308,740	308,740	
Total	455,155	528,587	

As described, the exercise of the previously mentioned stock options will likely not result in a delivery of Deutsche Börse shares to the holders of Deutsche Börse share options, because Deutsche Börse, in each case, intends to make use of its right to settle in cash. However, in case Deutsche Börse would decide otherwise at the time of maturity of the stock options, as a consequence of a settlement in kind a maximum of 528,587 Deutsche Börse shares could come into existence in the future (the total number of all Deutsche Börse shares that may still come into existence as a result of the stock option programs described in this section the **total future Deutsche Börse option shares**). Of this number of total future Deutsche Börse option shares, only the options granted under tranche 2005 and tranche 2006 of the group share plan described in paragraph (ii) up to 146,864 new Deutsche Börse shares may come into existence as a result of the exercise of such stock options prior to the expiration of the additional offer acceptance period (the **additional Deutsche Börse shares**). Each holder of additional Deutsche Börse shares then would be entitled to accept the exchange offer once he or she holds additional Deutsche Börse shares prior to the expiration of the offer acceptance period or the additional offer acceptance period.

Table of Contents**7.4 Shareholders**

As of March 31, 2011, 4.59% of the current share capital of Deutsche Börse of 195,000,000 were held by Deutsche Börse as Deutsche Börse treasury shares. The remaining outstanding Deutsche Börse shares were predominantly held by institutional investors (approximately 95% of the remaining outstanding Deutsche Börse shares) and only approximately 5% of the remaining outstanding Deutsche Börse shares were held by private investors. The following table of Deutsche Börse's shareholders sets forth those shareholders who have notified the percentage of their voting rights in Deutsche Börse's share capital in accordance with Section 21 of the German Securities Trading Act:

Shareholder	Publication date ⁽¹⁾	Voting rights (directly held or attributed /total)	
		%	amount
BlackRock, Inc., New York, NY, USA	February 25, 2011	4.99	9,724,997

Sun Life Financial (U.S.) Holdings, Inc., Wellesley Hills, MA, USA	September 15, 2009	3.07	5,990,617
Sun Life Financial (U.S.) Investments LLC, Wellesley Hills, MA, USA	September 15, 2009	3.07	5,990,617
Sun Life of Canada (U.S.) Financial Services Holdings, Inc., Boston, MA, USA	September 15, 2009	3.07	5,990,617
Deutsche Börse, Frankfurt / Eschborn, Germany	September 30, 2008	3.05 ⁽²⁾	5,950,653 ⁽²⁾
Franklin Mutual Advisers, LLC, Short Hills, New Jersey, USA	June 30, 2009	3.01	5,871,225

Notes:

(1) According to Section 26 para. 1 German Securities Trading Act.

(2) Presently, 4.59% of the issued share capital or 8,956,997 Deutsche Börse shares.

More detailed information on the allocation of voting rights of the above mentioned shareholders is included in page A-211 of Annex 2.

7.5 Business activities and business development

As one of the largest exchange organizations worldwide, Deutsche Börse group offers its customers a broad range of products and services. These cover the entire value chain of financial market transactions, from trading and clearing of securities, including derivatives, through transaction settlement, custody and collateral management and providing of market information, to the development and operation of electronic trade and clearing systems.

Deutsche Börse group realigned its segment structure effective as of January 1, 2010. Its group's business activities are currently divided into four segments: Xetra, Eurex, Clearstream and Market Data & Analytics.

Xetra supports the trading and listing of cash market securities on the Frankfurt Stock Exchange as well as other European and international markets. Eurex, the derivatives market, provides for the trading of futures and options and Eurex Clearing house performs central counterparty clearing and risk

Table of Contents

management for derivatives, equities, repo, energy and fixed income transactions. Clearstream is responsible for the settlement, safekeeping and administration of securities. The Market Data & Analytics segment collects and distributes financial market data and indices. Deutsche Börse group's business has no significant seasonality.

Deutsche Börse itself operates the cash market of Frankfurt Stock Exchange. Through its equity investment in Scoach Holding S.A., with its corporate seat in Luxembourg, Luxembourg, Deutsche Börse also offers trading in structured products (e.g. certificates and warrants). Furthermore, Deutsche Börse owns a 75% plus one share holding in Tradegate Exchange GmbH, with its corporate seat in Berlin, Germany, which operates Tradegate Exchange, a Berlin-based stock exchange specially tailored to the requirements of private investors.

Through Eurex Zürich AG, with its corporate seat in Zürich, Switzerland, and its subsidiaries, Deutsche Börse group also operates derivatives markets in Europe (Eurex Deutschland and Eurex Zürich) and the United States (International Securities Exchange, ISE) and offers clearing services (Eurex Clearing AG with its corporate seat in Frankfurt am Main, Germany) as well a fixed-income securities trading (Eurex Bonds GmbH with its corporate seat in Frankfurt am Main, Germany) and a market place for repo transactions (Eurex Repo GmbH with its corporate seat in Frankfurt am Main, Germany).

Post-trade services such as banking, settlement and custody services are handled by subsidiaries of Clearstream Holding AG, with its corporate seat in Frankfurt am Main, Germany. These services include transaction settlement, administration and custody of services as well as global securities financing.

In addition, Deutsche Börse sells price and reference data as well as other information relevant for capital markets and develops indices through its subsidiary STOXX Ltd., with its corporate seat in Zürich, Switzerland.

Deutsche Börse and Clearstream Services S.A. with its corporate seat in Zürich, Switzerland, develop and operate Deutsche Börse group's technological infrastructure.

7.5.1 Xetra

Xetra is the electronic multi asset class trading system for the cash market of the Frankfurt Stock Exchange as well as other European exchanges. Deutsche Börse group's cash market provides one of the most comprehensive ranges of tradable securities from a single source. With over 11,000 shares from both German and international issuers, more than 24,000 fixed-income securities, around 800 index funds, approximately 3,000 actively managed retail funds, and more than 500,000 certificates and warrants, investors from all over Europe can buy and sell financial products in many important asset classes in a clearly regulated and transparent marketplace. Integrated clearing by the central counterparty of Eurex Clearing AG and settlement by Clearstream Banking AG, with its corporate seat in Frankfurt am Main, Germany, help to ensure that all trades are fulfilled.

7.5.2 Eurex

Eurex Frankfurt AG and Eurex Zürich AG operate the Eurex exchanges in Germany and in Switzerland. Furthermore, Eurex consists of Eurex Clearing AG, International Securities Exchange and a multi-lateral trading facilities (MTF) Eurex Bonds GmbH and Eurex Repo GmbH. BaFin and Deutsche Bundesbank have agreed to qualify Eurex Clearing AG as system critical (*systemrelevant*) institution which is subject to a more intensive supervision by the regulators BaFin and Deutsche Bundesbank. Institutions qualify as system critical if a threat to their existence (*Bestandsgefährdung*) could have material adverse consequential effects on other credit institutions or could destabilize the financial system due to such institution's size, the intensity of its interbank relationships and its close links with other countries. Eurex Zürich AG is a company jointly owned by Deutsche Börse and SIX Swiss Exchange with its corporate seat in Zürich, Switzerland with an economic interest of 85% and 15% respectively, and the holding company of Eurex Frankfurt AG. Eurex Zürich AG is the new majority shareholder of the European Energy Exchange AG (EEX) with its corporate seat in Leipzig, Germany. Eurex Frankfurt AG with its

Table of Contents

corporate seat in Frankfurt am Main, Germany, is the operator of the exchange Eurex Deutschland and, among others, the intermediary holding company of Eurex Clearing AG, U.S. Exchange Holdings Inc., with its corporate seat in Wilmington, Delaware, United States, Eurex Repo GmbH and Eurex Bonds GmbH.

Eurex is one of the world's leading derivatives marketplaces. The exchanges Eurex Deutschland and Eurex Zürich are operated on a single trading platform with a product suite comprising the world's most actively traded and liquid markets. Eurex offers some 1,600 derivatives products with more than 145,000 variations (Series). Eurex offers interest rate and equity index derivatives and as well as broad offerings in single equity products and non-financial asset classes, including commodities. Besides euro (EUR)-denominated products, Eurex also offers derivatives denominated in Swiss francs (CHF), U.S. dollars (USD) and pounds sterling (GBP). Owing to their joint trading platform, uniform exchange rules and a joint central counterparty (Eurex Clearing AG), Deutsche Börse believes that Eurex Exchanges are perceived by market participants as essentially a single marketplace. In 2010, Eurex served more than 410 member firms located in 28 countries worldwide.

Eurex Clearing AG is the clearinghouse within Deutsche Börse group. It offers fully automated and straight-through post trade services for derivatives, equities, repo, energy and fixed income transactions. In its role as a central counterparty, Eurex Clearing AG acts as a buyer to all sellers and as a seller to all buyers, thereby seeking to minimize counterparty risk and maximize operational efficiency. Eurex Clearing AG offers trade management functions, risk management and collateral and delivery management services with a focus to increase market safety and integrity. Eurex Clearing AG provides leading risk management services such as comprehensive pre-trade risk limits and it was the first leading central counterparty worldwide to offer risk management and margining data in real-time to its trading and clearing members.

Eurex Bonds GmbH operates a MTF and provides participants with an electronic platform for off-exchange, wholesale trading in European fixed-income securities. Also, the Eurex Bonds GmbH trading platform has been linked into Eurex futures market and Eurex Clearing AG with the result that a direct link between spot and futures markets is available that enables electronic basis trading of fixed-income securities via a central order book. The necessary liquidity in the fixed-income securities and basis trading markets is provided by market makers. In addition to Eurex Frankfurt AG, several financial institutions are shareholders of Eurex Bonds GmbH.

The repo business is operated by Eurex Repo GmbH. It offers an integrated marketplace for electronic trading, clearing, collateral management and settlement for secured funding and financing. It is one of the leading European marketplaces with more than 300 participants since 1999.

7.5.3 Clearstream

Clearstream Holding AG is the post-trade services arm of Deutsche Börse group except for clearing which is provided by Eurex Clearing AG. Clearstream Holding AG is a wholly owned subsidiary of Deutsche Börse and functions as a German financial holding, owning 100% of Clearstream International S.A., with its corporate seat in Luxembourg, Luxembourg. BaFin and Deutsche Bundesbank have agreed to qualify Clearstream Banking AG as system critical institution which is subject to a more intensive supervision by the regulators BaFin and Deutsche Bundesbank (with respect to the term "system critical" see section 7.5.2). Its core businesses include the settlement of market transactions and the custody of securities.

In terms of settlement services, Clearstream seeks to ensure that cash and securities are delivered in a timely manner between trading parties. With respect to the custody of securities, it is responsible for the management, safe-keeping and administration of securities deposited with it. In addition, the segment offers added-value services such as global securities financing and investment funds services. Customers profit from individual services, efficient processing and reduced transaction costs. The Clearstream segment is one of Europe's leading suppliers of this post-trading infrastructure for shares and fixed-

Table of Contents

income securities in national and international trading. It is among the largest providers of securities services worldwide.

The Clearstream segment is both an international central securities depository (**ICSD**) serving the international capital markets and a central securities depository (**CSD**) for German and Luxembourgian domestic securities. As an international central securities depository, the Clearstream segment handles the settlement and safekeeping of Eurobonds and other internationally traded fixed-income securities and equities across 50 markets. As a central securities depository, it provides the post-trade infrastructure for German and Luxembourgian securities. In the custody business, the average value of securities held in custody at Clearstream in 2010 was 10.9 trillion. In Clearstream's settlement business, the number of settlement transactions in 2010 was 116.4 million.

7.5.4 Market Data & Analytics

The products offered by this segment's business areas are aimed at three customer groups: Firstly, issuers, who mainly use indices of Market Data & Analytics as underlying values for financial products (futures, options, ETFs, structured products); secondly, front offices of investors, brokers, trading desks, algo traders, and investment advisors, who use real time price- and orderbook information or other market moving signals to make their buy- or sell-decisions and recommendations; and thirdly, such functions of securities trading houses, which require accurate instrument reference data for risk management activities and error-free settlement.

7.6 Deutsche Börse boards

The Deutsche Börse management board currently consists of the following six members:

Name	Current Position
Dr. Reto Francioni	Chief Executive Officer
Andreas Preuß	Deputy Chief Executive Officer, responsible for Derivatives & Market Data Division
Gregor Pottmeyer	Chief Financial Officer
Frank Gerstenschläger	Responsible for Xetra Division
Dr.-Ing. Michael Kuhn	Chief Information Officer
Jeffrey Tessler	Responsible for Clearstream Division

Regarding the position of Dr. Reto Francioni within the Holdco board of directors please see section 6.4.2. With respect to Messrs. Andreas Preuß, Gregor Pottmeyer, Frank Gerstenschläger and Jeffrey Tessler assuming positions in the global executive committee, see section 6.4.3.

The Deutsche Börse supervisory board is subject to co-determination under the German One Third Participation Act (*Drittelbeteiligungsgesetz*) and is composed of 12 shareholder representatives who are elected by the general shareholders' meeting of Deutsche Börse and 6 employee representatives who are elected by the employees of Deutsche Börse group. Currently the Deutsche Börse supervisory board consists of the following 18 members (employee representatives are marked with*): Dr. Manfred Gentz (Chairman), Gerhard Roggemann (Deputy Chairman), Herbert Bayer*, Richard Berliand, Birgit Bokel*, Dr. Joachim Faber, Hans-Peter Gabe*, Richard M. Hayden, Craig Heimark, Dr. Konrad Hummler, David Krell, Hermann-Josef Lamberti, Friedrich Merz, Thomas Neiß, Roland Prantl*, Dr. Erhard Schipporeit, Norfried Stumpf* and Johannes Witt*.

7.7 Employees

Deutsche Börse group operates worldwide and had as at December 31, 2010 a total of 3,490 employees (December 31, 2009: 3,600, December 31, 2008: 3,395) from 66 nations working in 19 locations across

Table of Contents

three continents. This decrease compared with the previous year is primarily a result of Deutsche Börse group's operating efficiency program. In the first quarter of 2010, the Deutsche Börse management board adopted measures to optimize processes and cost structures. These included streamlining the management structure and reallocating operating functions at Deutsche Börse group's various locations. To avoid redundancies resulting from the relocation of functions as far as possible, the management of Deutsche Börse group and the German works council agreed on a controlled voluntary leaver program. Thus, employees may, on their own initiative, reduce their working hours, retire early or terminate their contract in return for a severance payment. The controlled voluntary leaver program features additional cash incentives with respect to contracts of employees who expressed interest for the voluntary leaver program before December 31, 2010. It will initially remain in force until end of May 2011 with the option to extend. Additionally, the management of Deutsche Börse group and the German works council of Deutsche Börse group agreed on a reconciliation of interest agreement. This includes a so called job exchange to simplify internal transfers and steps towards adopting a social plan should this become necessary.

7.8 Persons acting jointly with Deutsche Börse

The entities listed in **Annex 1** of this exchange offer document are currently direct or indirect subsidiaries of Deutsche Börse and therefore constitute persons acting jointly with each other and with Deutsche Börse pursuant to Section 2 para. 5 sentence 2 German Takeover Act in conjunction with Section 2 para. 5 sentence 3 German Takeover Act.

Apart from these, there are no other persons acting jointly with Deutsche Börse pursuant to Section 2 para. 5 sentence 2 Germany Takeover Act.

8 Description of NYSE Euronext

8.1 Legal basis and overview

NYSE Euronext, a Delaware corporation, was organized on May 22, 2006 in anticipation of the combination of the businesses of NYSE Group, Inc., a Delaware corporation, and Euronext N.V., a company organized under the laws of the Netherlands. The combination of these businesses was consummated on April 4, 2007. NYSE Group, Inc. was formed in connection with the merger between New York Stock Exchange, Inc., a New York Type A not-for-profit corporation, and Archipelago Holdings, Inc., a Delaware corporation on March 7, 2006. Euronext was the first cross-border exchange group, created through the merger of the Paris, Amsterdam and Brussels stock exchanges in 2000.

NYSE Euronext's headquarters are located in 11 Wall Street, New York, United States and in 39 rue Cambon, Paris, France. Euronext N.V. has its corporate seat in Beursplein 5, 1012 JW Amsterdam, the Netherlands.

8.2 Share capital

NYSE Euronext is authorized to issue up to 800,000,000 NYSE Euronext shares (the **NYSE Euronext shares**). As of February 15, 2011, 276,216,610 of these NYSE Euronext shares were outstanding, including 15,009,076 shares held in treasury. Holders of NYSE Euronext shares are entitled to receive dividends if, in the form and to the extent declared by the NYSE Euronext board of directors out of funds legally available for payment, subject to the rights of holders, if any, of NYSE Euronext preferred stock.

Furthermore, NYSE Euronext is authorized to issue up to 400,000,000 shares of preferred stock, with a par value of \$0.01 per share. Currently, no shares of NYSE Euronext preferred stock are outstanding.

Subject to possible restrictions on voting rights, each outstanding NYSE Euronext share entitles its holder to one vote. Subject to the rights, if any, of the holders of any series of preferred stock outstanding and subject to applicable law, all voting rights are vested in the holders of NYSE Euronext shares.

Table of Contents

All of the outstanding NYSE Euronext shares of common stock are fully paid and non-assessable. Holders of NYSE Euronext shares of common stock are not granted subscription rights. NYSE Euronext shares may not be converted into shares of other classes of stock.

8.3 Options

Under the stock incentive plan, NYSE Euronext may grant stock options and other equity awards to employees. NYSE Euronext's approach to the incentive compensation awards includes awards of stock options and restricted stock units.

8.4 Shareholders

As of March 1, 2011, 69% of all outstanding NYSE Euronext shares were held by institutional investors. The remaining NYSE Euronext shares were held by private investors, including those NYSE Euronext shares held by members of the management of NYSE Euronext (please refer also to the section "Security Ownership of Certain NYSE Euronext Beneficial Owners and Management" in Annex 2). The largest beneficial owner of NYSE Euronext shares known to NYSE Euronext as of March 1, 2011 was T. Rowe Price Associates, Inc., Baltimore, Maryland, United States, which beneficially owned 7.3% of the NYSE Euronext shares.

8.5 Business

NYSE Euronext is a leading global operator of financial markets and provider of innovative trading strategies. NYSE Euronext offers a broad and growing range of products and services in cash equities, futures, options, swaps, exchange-traded products, bonds, carbon trading, clearing operations, market data and commercial technology solutions, all designed to meet the evolving needs of issuers, investors, financial institutions and market participants. None of NYSE Euronext's business is seasonal in nature. NYSE Euronext revised its reportable business segments effective in the first quarter of 2010. The new segments are Derivatives, Cash Trading and Listings, and Information Services and Technology Solutions.

8.5.1 NYSE Euronext's Derivatives segment is comprised of its derivatives trading and its clearing businesses and includes NYSE Liffe, NYSE Liffe Clearing, NYSE Liffe US, NYSE Amex Options, NYSE Arca Options, NYPC and related derivatives market data.

8.5.2 NYSE Euronext's Cash Trading and Listings segment consists of its cash trading and listings businesses and includes the New York Stock Exchange, Euronext, NYSE Amex, NYSE Arca, NYSE Alternext, NYSE Arca Europe and SmartPool, as well as BlueNext and Interbolsa, and related cash trading market data.

8.5.3 NYSE Euronext's Information Services and Technology Solutions segment refers to its commercial technology transactions, data and infrastructure businesses. NYSE Euronext operates a commercial technology business, NYSE Technologies, and also owns NYFIX, Inc., a leading provider of innovative solutions that optimize trading efficiency. NYSE Technologies provides comprehensive transaction, data and infrastructure services and managed solutions for buy-side, sell-side and exchange communities that require next-generation performance and expertise for mission-critical and value-added client services. NYSE Technologies' advanced integrated solutions power the trading operations of global financial institutions and exchanges, including non-NYSE Euronext markets in addition to all the exchanges in NYSE Euronext. NYSE Technologies operates five businesses: Global Market Data, which offers a broad range of global market information products covering multiple asset classes; Trading Solutions, which creates and implements high performance, end-to-end messaging software and real-time market data distribution and integration products; Exchange Solutions, which provides multi-asset exchange platform services, managed services and expert consultancy; Global Connectivity, offering one of the world's largest, most reliable financial transaction networks connecting firms and exchanges worldwide; and Transactions, which primarily comprises the former NYFIX, Inc. FIX business, and which incorporates the NYFIX Marketplace and the industry-leading FIX Software business.

Table of Contents**8.6** Boards of NYSE Euronext**8.6.1** Board of directors

The NYSE Euronext board of directors is composed of following members:

André Bergen, Ellyn L. Brown, Marshall N. Carter, Dominique Cerutti, Patricia M. Cloherty, Sir George Cox, Sylvain Hefes, Jan-Michiel Hessels, Duncan M. McFarland, James J. McNulty, Duncan L. Niederauer, Ricardo Salgado, Robert G. Scott, Jackson P. Tai, Rijnhard van Tets and Sir Brian Williamson.

8.6.2 Executive Officers

The table below sets forth information regarding NYSE Euronext's executive officers. All of NYSE Euronext's executive officers have been appointed by and have to follow the instructions of NYSE Euronext board of directors.

Name	Position
Duncan L. Niederauer	Chief Executive Officer and Director
Dominique Cerutti	President und Deputy Chief Executive Officer
Lawrence E. Leibowitz	Chief Operating Officer
Michael S. Geltzeiler	Group Executive Vice President and Chief Financial Officer
Roland Gaston-Bellegarde	Group Executive Vice President and Head of European Execution
Philippe Duranton	Group Executive Vice President and Global Head of Human Resources
Garry P. Jones	Group Executive Vice President and Head of Global Derivatives
John K. Halvey	Group Executive Vice President and General Counsel
Claudia O. Crowley	Chief Executive Officer of NYSE Regulation, Inc.

8.7 Employees

As of December 31, 2010, NYSE Euronext employed 2,968 full-time equivalent employees.

9 Background to the merger and the exchange offer**9.1** The business combination agreement

The NYSE Euronext board of directors and the Deutsche Börse boards continually review their respective companies' results of operations and competitive positions in the industries in which they operate, as well as their strategic alternatives. In connection with these reviews, each of NYSE Euronext and Deutsche Börse from time to time evaluate potential transactions that would be beneficial to achieving its strategic objectives. Against this background the discussions between Deutsche Börse and NYSE Euronext that had already taken place in 2008 were reinitiated in fall of 2010 and finally led to the conclusion of the agreement between NYSE Euronext, Deutsche Börse, Holdco and Pomme Merger Corporation on February 15, 2011. The agreement provides for a combination of the businesses of NYSE Euronext and Deutsche Börse under a new Dutch holding company Holdco and especially contains provisions regarding the transaction structure and corporate governance of Holdco after completion of the combination.

Prior to the entering into the business combination agreement, the necessary board resolutions of NYSE Euronext and Deutsche Börse were passed.

Table of Contents

On February 15, 2011, the NYSE Euronext board of directors determined that the business combination agreement and the transactions contemplated therein were fair to and in the best interests of the NYSE Euronext stockholders. In consequence, the NYSE Euronext Board of Directors approved the business combination agreement and the transactions contemplated thereby.

On February 14, 2011, the Deutsche Börse management board determined that the combination was in the best interest of the shareholders of Deutsche Börse, and approved the business combination agreement and the transactions contemplated thereby. On February 15, 2011, the Deutsche Börse supervisory board also determined that the combination was in the best interest of the shareholders of Deutsche Börse, and approved the combination.

On May 2, 2011, the original parties to the agreement agreed upon an amendment. Such amendment was preceded by respective resolutions of the management board of Deutsche Börse as well as the board of directors of NYSE Euronext.

9.2 Illustrative notes regarding the combination

Upon completion of the combination, NYSE Euronext and Deutsche Börse will become subsidiaries of Holdco.

9.2.1 The merger

The business of NYSE Euronext will be transferred by way of merging Pomme Merger Corporation with and into NYSE Euronext against the issuance of Holdco shares to the shareholders of NYSE Euronext. The merger will occur immediately after the completion of the exchange offer. In the merger, each NYSE Euronext share will be converted into the right to receive 0.47 Holdco shares.

The merger requires that (a) a majority of the NYSE Euronext shares outstanding at the record date and entitled to vote at the NYSE Euronext special meeting adopts the business combination agreement and approves the merger and (b) a majority of the shares represented and entitled to vote at the NYSE Euronext special meeting approves certain provisions of the Holdco articles of association that shall apply after the completion of the combination (such approvals collectively the **NYSE Euronext requisite vote**) (see page A-3 et seq. of Annex 2. It is currently envisaged that the day of the special meeting will be July 7, 2011. In any case, it will be held prior to the expiration of the offer acceptance period. In case of an extension of the offer acceptance period required by law (see section 5.3), the date of the special meeting may be postponed.

After the NYSE Euronext requisite vote has been passed, the completion of the merger will only be subject to the completion of the exchange offer and will therefore become effective immediately after the completion of the exchange offer.

9.2.2 The exchange offer

Deutsche Börse has currently issued 195 million Deutsche Börse shares. These include the approx. 9 million Deutsche Börse treasury shares. At the time of the merger, NYSE Euronext (disregarding approximately 13.6 million treasury shares that are held in treasury by NYSE Euronext and will not be exchanged in Holdco shares in connection with the merger, but including approximately 2.8 million NYSE Euronext shares that will presumably be issued in connection with Restricted Stock Units) will have issued a total of approx. 266 million NYSE Euronext shares. Thereof, 1.6 million NYSE Euronext shares are held by NYSE Arca Inc., an indirect 100% subsidiary of NYSE Euronext; the latter NYSE Euronext shares will be exchanged in Holdco shares in connection with the merger.

Taking into account the exchange ratio of the merger of 0.47 Holdco shares for each NYSE Euronext share and the exchange ratio of the exchange offer of one Holdco share for each Deutsche Börse share, the issued share capital of the Bidder after completion of the combination would comprise approximately 320 million Holdco shares, in case the exchange offer is accepted regarding 100% of the Deutsche Börse

Table of Contents

shares (irrespective of the class D shares). Disregarding the Holdco shares held within the Holdco group after completion of the combination, former shareholders of Deutsche Börse would in this case hold approx. 60% and former NYSE Euronext stockholders would hold approx. 40% of the Holdco shares issued after completion of the combination.

In case that only the minimum condition described in section 14.1(a) is reached and, therefore, only the lowest number of Deutsche Börse shares which have to be tendered in order for the exchange offer to be completed is reached, and approximately 266 million NYSE Euronext shares are still exchanged for Holdco shares in the merger, the issued share capital of the Bidder after completion of the combination would comprise a total of approximately 271.3 million Holdco shares (irrespective of the class D shares). Disregarding the Holdco shares held within the Holdco group after completion of the combination, former Deutsche Börse shareholders would in this case hold approximately 52.5% and former NYSE Euronext stockholders would hold approximately 47.5% of the Holdco shares issued after completion of the combination.

9.2.3 Overview of the combination

The content of the business combination agreement is shown in detail in the section **Business Combination Agreement** on pages A-120 et seq. of Annex 2.

Following exchange rates are material in the context of the combination:

Each Deutsche Börse share will be exchanged into one Holdco share;

Each NYSE Euronext share will be exchanged into 0.47 Holdco share.

Deutsche Börse and NYSE Euronext each reserve the right to consider measures to be adopted jointly in the course of their combination which are expedient to enhance the financial position of their respective shareholders. Deutsche Börse, NYSE Euronext and the Bidder hereby clarify that any such jointly adopted measures will not include a change of the numerical exchange ratio for the Deutsche Börse shareholders (1 HoldCo share against 1 Deutsche Börse share) or for the NYSE Euronext shareholders (0.47 HoldCo shares for each share of NYSE Euronext). Deutsche Börse, NYSE Euronext and the bidder have made no determination as to whether to adopt any such measures.

Table of Contents

The following charts provides an overview of the structure of the combination:

(i) The combination

(ii) After the combination

9.3 Strategy and goals

The board of directors of NYSE Euronext (the **NYSE Euronext board of directors**) and the Deutsche Börse management board when evaluating the strategic reasons for the combination, that were decisive for their decision to sign the business combination agreement, considered a number of factors, including the following material factors:

9.3.1 Strategic Considerations

Overall, the business combination would provide a number of significant strategic opportunities to the bidder and its subsidiaries as well as its shareholders. The combined group would be a leader in a diverse set of large and growing businesses as described in more detail in section 10.1. As a pacesetter across the spectrum of capital markets services, the combined company would offer clients global scale, product innovation, operational and capital efficiencies, and an enhanced range of technology and market information solutions. Furthermore, the combination would create substantial strategic growth opportunities in Asia and Latin America. The expected substantial incremental efficiency and future

Table of Contents

appreciations would offer further growth opportunities to the combined group and its shareholders. The agreed well-balanced corporate governance structure would ensure continuity of management of Deutsche Börse and NYSE Euronext and thereby would facilitate an effective and timely integration of the two companies' operations. Deutsche Börse and NYSE Euronext expect the strategic opportunities (which are described in more detail on pages A-79 et seq. of Annex 2), among other things, to be as follows:

the combined company would be a leader in a diverse set of large and growing businesses, including derivatives, listings, cash equities, post-trade settlement and asset servicing, market data business as well as technology servicing;

the combined company would have a portfolio of leading brands, including NYSE Euronext, New York Stock Exchange, Euronext, Deutsche Börse, Eurex, NYSE Liffe, Clearstream and Stoxx;

the combined company's complementary products would allow the combined company to provide customers with a global derivatives platform, that it would be an industry-leading provider of technology services and information content and the world's largest venue for capital raising as well as a global pioneer in international post-trade infrastructure and settlement with significant revenues being drawn from outside of North America and Europe in those business areas; and

the business combination will over time create substantial incremental efficiency and growth opportunities.

9.3.2 Synergies

The NYSE Euronext board of directors and the Deutsche Börse management board further believe that the business combination will create significant cost savings and revenue synergies. As to the cost savings, it is expected that the combination will generate savings of approximately 400 million (\$532 million). The savings will come throughout the new organization. Examples are the development of one common IT Trading and Clearing Infrastructure, establishment of a globalized IT operating organization, creation of a central European Market Operations hub for the Trading and Clearing of the Cash and Derivatives business in Europe, combination of business organizations in the United States as well as leveraging global sourcing opportunities and refining support functions in accordance with the new combined organization. Furthermore, it is intended to consolidate the networks, and data centers in the United States, the sales and product development in Europe and the United States and the global real estate portfolio and locations. The synergy values are based on an exchange rate of \$1.33 per euro. The cost savings are expected to be realized at an annual run rate that will reach 100% by the end of the third year following completion of the combination.

In addition, it is expected that the combination will lead to at least 100 million (\$133 million) of annual revenue synergies, with the full run-rate being achieved at the end of the third year after completion of the combination through cross-selling and distribution opportunities, increased turnover from liquidity pool consolidation and new products, a progressive introduction of Deutsche Börse group's clearing capabilities and expanded scope for technology services and market data offerings.

With respect to further information on the synergies reference is made to the tables on pages A-88 et seq. of Annex 2.

9.3.3 Participation in Future Appreciation

The NYSE Euronext board of directors and the Deutsche Börse management board also considered the fact that the consideration under the exchange offer to which the shareholders of Deutsche Börse are entitled will be Holdco shares and, therefore, will allow NYSE Euronext stockholders and shareholders of Deutsche Börse to participate in potential further appreciation of the combined company after the combination.

Table of Contents

9.3.4 Governance

Furthermore, the NYSE Euronext board of directors and the Deutsche Börse management board considered that the governance arrangements provided by the business combination agreement would enable continuity of management and an effective and timely integration of the two companies' operations and reflect the fact that the transaction was structured as a business combination rather than an acquisition of NYSE Euronext by Deutsche Börse or vice versa.

The NYSE Euronext board of directors and the Deutsche Börse management board also considered a variety of risks and other potentially negative factors concerning the business combination agreement. They, each, concluded that potentially negative factors associated with the business combination were outweighed by the potential benefits that they expected NYSE Euronext and NYSE Euronext stockholders as well as Deutsche Börse and the shareholders of Deutsche Börse to achieve as a result of the business combination. Accordingly, they determined that the business combination agreement and the transactions contemplated thereby are in the best interest of the respective corporation and its shareholders.

9.4 Forthcoming acquisition of control over Deutsche Börse by the Bidder

If, as a result of this exchange offer, the Bidder acquires control over Deutsche Börse within the meaning of Section 29 para. 1 German Takeover Act, the Bidder will not be obliged to make a mandatory offer to the shareholders of Deutsche Börse pursuant to Section 35 para. 3 German Takeover Act.

10 Intentions of the Bidder

10.1 Future business activities of the Bidder and Deutsche Börse

Through the combination, Holdco will become the holding company of Deutsche Börse and NYSE Euronext. However, Deutsche Börse, NYSE Euronext and their respective subsidiaries will continue to conduct their respective businesses. It is not envisaged that after completion of the exchange offer, Holdco engages in activities other than activities typically conducted by a management holding company. However, it can not be excluded, that the combined group will be restructured in the future and Holdco will assume certain central functions within the combined group. For the time being, Holdco will, following the completion of the combination, be financed by dividend distributions from its participations in Deutsche Börse and NYSE Euronext. The expected effects on the assets and obligations of the Bidder are set forth in section 16. The future business activities of the Bidder are insofar interdependent with the intended future business activities with respect to Deutsche Börse and the combined group existing after the completion of the combination.

The integration planning is currently under discussion between the parties of the business combination agreement, the material results thereof are described in this section 10.

The combination will create a global derivatives platform, bringing together complementary products of Deutsche Börse group, NYSE Euronext and the affiliated companies of NYSE Euronext. The derivatives businesses of Eurex and NYSE Liffe complement each other with respect to interest rate products, with Eurex specializing in the long end of the interest rate curve and NYSE Liffe in the short end and equity index products where Eurex has products across the European Union and NYSE Liffe has country-specific ones. The intended combination of both derivatives businesses is expected to create a group which is an industry leader with a competitive size and scale compared with other major exchanges. The Bidder believes that combining these complementary venues will deliver innovative product and capital efficiency opportunities to its clients.

The combined cash trading and listings businesses are expected to create an exchange group with leading liquidity pools for European and U.S. equities. The combination of NYSE Euronext and the Frankfurt Stock Exchange will deliver a pan-European regulated and transparent equities market, while preserving the national role of the five exchanges in Europe: Amsterdam, Brussels, Frankfurt, Lisbon and Paris. In

Table of Contents

addition, the Bidder believes that NYSE Euronext's listings franchise, already home to some of the world's leading global brands, will be further strengthened by the increased global profile of the new group, strengthening its status as one of the most attractive capital raising venues for companies from around the world.

Based upon Deutsche Börse's risk management and clearing expertise and its suite of leading securities financing, settlement and custody services the Bidder intends to accelerate growth based on the combined group's broader coverage of asset classes and regions. The Bidder intends to extend cash and derivatives clearing and particularly risk management services beyond the initial asset class coverage of the combined group in order to provide customers with significantly improved cost and capital efficiency opportunities. In addition, it is to be expected that Holdco will benefit from Clearstream's strong and growing presence in Asia.

Both Deutsche Börse and NYSE Euronext are providers of technology solutions that power the trading operations of all the Deutsche Börse and NYSE Euronext markets, as well as other exchanges around the world. In addition, through its NYSE Technologies subsidiary, NYSE Euronext provides comprehensive transaction, data and infrastructure services and managed solutions for buy-side, sell-side as well as exchange communities. The Bidder intends to capitalize on the combined technology and service expertise as well as expanded potential client base to deliver an ever wider range of innovative solutions that optimize trading efficiency for clients.

The combination will also bring together market data & analytics services and the index portfolio. The Bidder expects to establish itself as the leading vendor for low latency price information, value-adding indices and benchmarks and trading-related content and analytics. The Bidder intends to further strengthen this position, for example, by rolling out new products across the combined group based on the range of existing and newly developed indices.

The Bidder expects the combination to release additional product innovation potential and intends to combine complementary product lines to provide a global and extensive breadth of product offerings based on a strong portfolio of brands. The Bidder intends to utilize the additional innovation potential.

10.2 Use of assets and future obligations of Deutsche Börse

The Bidder expects to realize cost savings from the combination, principally from economies of scale in information technology, clearing operations, market operations and corporate center functions. In addition, the Bidder expects further product innovation and cross-selling opportunities between the global cash and derivatives businesses of Deutsche Börse group, NYSE Euronext and the affiliated companies of NYSE Euronext.

The combination is expected to generate annual cost savings of 400 million (or \$ 532 million), principally in information technology systems, clearing and market operations as well as in corporate administration and support functions of the company. In addition, annual revenue synergies of at least 100 million (or \$133 million) are expected through cross selling and distribution opportunities, increased turnover from liquidity pool consolidation and new products, a progressive introduction of Deutsche Börse's clearing capabilities and expanded scope for technology services and market data offerings (see also the information in section 9.3.2). The information regarding synergy values is based on an exchange rate of \$1.33 per euro. The Bidder may contemplate further actions in respect of the business activities of Deutsche Börse in order to achieve this.

There are no intentions to divest any of Deutsche Börse group's businesses or assets, nor any measures intended that would lead to a significant increase in Deutsche Börse group's liabilities beyond the normal course of business, except for any measures described in this section 10.

Table of Contents

10.3 Registered office of Deutsche Börse, location of material parts of the business of Deutsche Börse

The Bidder has no operating history. The markets and geographical presence of the combined group will be those of Deutsche Börse group, NYSE Euronext and the affiliated companies of NYSE Euronext. The geographical presence of Deutsche Börse group will therefore remain unchanged.

The combined group will have dual headquarters in Frankfurt and New York. The seat of Deutsche Börse will remain unchanged.

Pursuant to the business combination agreement, Holdco, after completion of the combination, will have the following five globally operating divisions (the global hub of a global division of Holdco means the location from where such global division is managed):

Global Cash Trading and Listings with a global hub in New York and key locations in (in alphabetical order) Amsterdam, Brussels, Frankfurt, Lisbon and Paris;

Global Derivatives with a global hub in Frankfurt and key locations in (in alphabetical order) Amsterdam, Chicago, London, New York and Zurich;

Global Settlement and Custody with a global hub in Frankfurt and with key locations in (in alphabetical order) Luxembourg, New York, Porto, Prague and Singapore. The office of the divisional head will be located in Luxembourg;

Technology Services/IT with a global hub in New York and with key locations in (in alphabetical order) Belfast, Frankfurt, London, Luxembourg, Paris and Prague. The office of the divisional head will be located in Paris; and

Market Data and Analytics with a global hub in Frankfurt and with key locations in (in alphabetical order) London, New York, Paris and Zurich.

As far as it is necessary to implement such structure, the bidder intends to relocate certain business sites of NYSE Euronext and Deutsche Börse group; however, the key locations of Deutsche Börse group will be maintained.

All national exchanges are operated in accordance with the applicable regulatory frameworks, the key business lines will remain in the present locations and the self-reliance of the national exchanges and brand names will be maintained.

10.4 Deutsche Börse management board and Deutsche Börse supervisory board

At the time of publication of this exchange offer document, there are no intentions of the Bidder on the future composition of the Deutsche Börse management board and the Deutsche Börse supervisory board.

10.5 Employees, terms and conditions of employment and employee representations of Deutsche Börse

The success of a combination of the activities of Deutsche Börse group, NYSE Euronext and the affiliated companies of NYSE Euronext depends to a large extent on the knowledge, experience, commitment and creativity of the employees of both groups. The Bidder will seek to promote the integration of employees of Deutsche Börse group, NYSE Euronext and the affiliated companies of NYSE Euronext. However, as a result of the combination and the envisaged creation of synergies there will be staff reductions, which shall be carried out fairly and adequately in an appropriate process. However, at this stage no considerations exist with respect to particular functions or locations affected within the combined group. The Bidder intends that the staff reductions will be carried out in a socially acceptable manner.

The business combination agreement provides that for the one-year period following completion of the combination, Holdco will provide to each individual who is employed as of the effective time of the combination by Deutsche Börse or its subsidiaries, and who remains employed by

Deutsche Börse or its

Table of Contents

subsidiaries, with the following (except in the case of employees whose employment is governed by a collective bargaining or similar agreement):

base salary in an amount no less than the base salary provided to the employee immediately prior to the combination;

an annual bonus opportunity that is no less favorable than the annual bonus opportunity provided to the employee immediately prior to the combination;

other compensation opportunities and employee benefits that are no less favorable in the aggregate than those provided to the employee immediately prior to the combination;

severance benefits in the event of employment termination in amounts and on terms and conditions no less favorable in the aggregate to such employee than he or she would have received under the severance plans, programs, policies and arrangements applicable as of the date of the business combination agreement; and

defined contribution retirement plan benefits no less favorable than those provided as of the date of the business combination agreement.

With respect to employees who remain employed after the completion of the combination, Holdco has agreed to (1) waive all pre-existing conditions, exclusions and waiting periods regarding participation and coverage requirements, (2) provide each employee and the employee's eligible dependents with credit for any co-payments and deductibles paid prior to the effective time under the applicable NYSE Euronext or Deutsche Börse plan in satisfying deductible or out-of-pocket requirements under the new Holdco plans for the year in which the combination occurs and (3) recognize service of employees with Deutsche Börse, including severance plans (including for purposes of eligibility to participate, vesting credit, and entitlement to benefits, but excluding for purposes of benefit accrual under final average pay defined benefit plans or to the extent a duplication of benefits would result), in each case to the same extent waived, credited, or recognized under the applicable Deutsche Börse plans prior to the completion of the combination.

Holdco to the extent legally permitted will undertake a review of Deutsche Börse and NYSE Euronext's benefits plans within the one-year period after the completion of the combination with the intent to develop new plans for employees that will not discriminate between NYSE Euronext employees, on one hand, and Deutsche Börse employees, on the other hand, and treat similarly situated employees of NYSE Euronext and Deutsche Börse on a substantially equivalent basis, taking into account factors such as the employees' duties, geographic location, tenure, qualifications and abilities.

Other changes in the employment terms and conditions as well as in the employment representations of Deutsche Börse are not intended.

10.6 Intended structural measures

The Bidder intends, as soon as possible after the completion of the exchange offer, to effectuate one or more corporate reorganization measures regarding Deutsche Börse. This will create the legal requirements to integrate Deutsche Börse as far as possible into the Holdco group formed by the combination. It is the intention of the restructuring to put the Bidder in the position, within the legal limits and irrespective of minority shareholders, who may still hold shares after completion of the exchange offer, to dominate Deutsche Börse as far as possible and/or, as the case may be, to eliminate such minority shareholding.

The intended restructuring measures include entering into a domination agreement (*Beherrschungsvertrag*) or a combination of a domination agreement and a profit and loss transfer agreement (*Gewinnabführungsvertrag*) pursuant to Sections 291 *et seq.* AktG with Deutsche Börse as the controlled company and, as part of such affiliation agreements, with Holdco ordinary shares being offered to the outside shareholders of Deutsche Börse as consideration (*Abfindung*) pursuant to Section 305 para.

Table of Contents

2 AktG. In addition, or alternatively, the Bidder intends the mandatory squeeze-out of the remaining minority shareholders of Deutsche Börse in return for payment of adequate compensation (**squeeze-out**) if, after completion of the exchange offer or any time thereafter, the Bidder holds, directly or indirectly, at least the required participation of 95% in the registered share capital of Deutsche Börse. Such squeeze-out may be carried out based on a resolution by the general shareholders meeting pursuant to Sections 327a *et seq.* AktG or a petition before a court seeking a court order on the transfer of the shares in accordance with Sections 39a *et seq.* German Takeover Act. The aforementioned restructuring measures are herein referred to as the **restructuring after completion** .

In the course of the restructuring after completion, Deutsche Börse shareholders who do not exchange their shares in the exchange offer, will receive, or will be offered, consideration in accordance with the applicable laws. Due to the statutory legal framework applicable to the restructuring after completion, which is described below in more detail in sections 10.6.1 to 10.6.3, such consideration may have a different amount or form than the consideration that those shareholders would have received had they exchanged their shares in the exchange offer.

Thereby, it is intended to structure the restructuring after completion in a way that the remaining holders of Deutsche Börse shares to the extent legally permissible each receive at a maximum the same number of Holdco shares per Deutsche Börse share(s) that they would have received in the exchange offer had they tendered their Deutsche Börse shares, and at a maximum a consideration having the same value (without taking into account possible different tax treatment or applicable withholding tax regulations), respectively. Due to the reasons described below in more detail, the amount or the form of the consideration may be different, in particular be less in value. Furthermore, in the event that the shares of Holdco lose value after the completion of the combination, there may be no obligation of the Bidder, in the course of the restructuring after completion, to grant to the Deutsche Börse shareholders who did not tender their shares in the exchange offer the higher consideration received by the Deutsche Börse shareholders who exchanged their shares in the exchange offer into ordinary shares of Holdco.

The Bidder reserves the right to amend the structure of the restructuring after completion, if appropriate. This includes, among others, the determination whether the domination agreement and/or the profit and loss transfer agreement with Deutsche Börse as the controlled company will be entered into by the Bidder itself or, instead of the Bidder, by a direct or indirect wholly owned subsidiary of the Bidder in the legal form of a German stock corporation or a German *societas europaea* (SE), as well as the right to contribute or otherwise transfer all or some of its Deutsche Börse shares to the latter or another wholly owned subsidiary.

In the context of the business combination agreement, the Deutsche Börse boards have agreed in principle to the conclusion of a domination agreement or a combination of a domination agreement and profit and loss transfer agreement with Deutsche Börse following the completion of the combination as described above. Furthermore, if the Bidder holds 95% or more of the issued share capital of Deutsche Börse after completion of the exchange offer or any time thereafter, the Deutsche Börse boards also agreed to the implementation of a squeeze-out.

10.6.1 Domination agreement or combination of domination agreement and profit and loss transfer agreement

Entering into a domination agreement or a combination of a domination agreement and profit and loss transfer agreement requires, among others, the consent of at least 75% of the share capital represented in the respective resolution at a general shareholders meeting of Deutsche Börse; the dominating entity is entitled to vote at such resolution also with respect to Deutsche Börse shares held by it. Such agreement would become effective upon registration in the commercial register of Deutsche Börse. Under a domination agreement, the controlled company submits itself to the direction of the controlling company. The controlling company would be authorized to issue binding orders to the Deutsche Börse management board. Under a profit and loss transfer agreement, the controlled company undertakes to transfer its entire profits to the controlling company. In both cases, the controlling company is obliged to make up for any

Table of Contents

annual net loss incurred by the controlled company during the term of the agreement (Section 302 AktG). A domination agreement and a profit and loss transfer agreement must provide for a recurrent annual cash payment as compensation for the minority shareholders (Section 304 AktG). Such compensation will represent a variable or fixed minimum dividend (*Garantiedividende*) in the case of a domination agreement and a variable or fixed annual compensation payment (*Ausgleichszahlung*) in the case of a profit and loss transfer agreement or a combination of a domination agreement and profit and loss transfer agreement. The variable minimum dividend or the variable annual compensation payment would be calculated on the basis of the actual dividends distributed by the Bidder in the future.

The amount of the recurrent cash payment is determined by the respective parties to the agreement in due consideration of the specifications as set out in Section 304 para. 2 AktG and reviewed by a court-appointed auditor. It could deviate from the average of the past dividends paid by Deutsche Börse and it could also be higher or lower. During the term of the agreement, the recurrent cash payment would be payable annually if, at that time, Deutsche Börse shares are still held by minority shareholders; in the case of a domination agreement which is not combined with a profit and loss transfer agreement, the recurrent cash payment is a minimum dividend which is only payable to the extent the actual dividend paid by Deutsche Börse to its minority shareholders falls short of the amount of such minimum dividend.

In addition, in case of entering into a domination agreement or a combination of a domination agreement and profit and loss transfer agreement the controlling company would be obliged to offer to all minority shareholders of Deutsche Börse to acquire all Deutsche Börse shares held by them in exchange for an adequate compensation (Section 305 AktG). Such an offer must have a duration of at least two months following the day of publication of the registration of the domination agreement and/or profit and loss transfer agreement in the commercial register of Deutsche Börse by the registry court. Such an offer would constitute a tender offer under U.S. law that would need to comply with certain rules under Regulation 14E under the Exchange Act, but such tender offer would not be subject to Section 14(d) of the Exchange Act or the rules or regulations of the SEC thereunder. In accordance with Section 305 para. 2 no. 1 AktG, the Bidder will compensate the shareholders of Deutsche Börse selling their Deutsche Börse shares under a domination agreement or a combination of a domination agreement and profit and loss transfer agreement entered into by Deutsche Börse by granting Holdco ordinary shares, except for fractional amounts which may be settled in cash.

Likewise, in case the domination agreement and/or the profit and loss transfer agreement is entered into between Deutsche Börse as the controlled company and a direct or indirect wholly owned subsidiary of the Bidder in the legal form of a German stock corporation or a German *societas europaea* (SE) as the controlling company instead of by the Bidder, in accordance with Section 305 para. 2 no. 2 AktG, the shareholders of Deutsche Börse selling their Deutsche Börse shares under such agreement shall be granted Holdco ordinary shares as compensation, again except for fractional amounts which may be settled in cash.

Pursuant to Section 305 para. 3 AktG, the exchange ratio for which Deutsche Börse shareholders would be offered to exchange their Deutsche Börse shares into Holdco ordinary shares under a domination agreement or a combination of a domination agreement and a profit transfer agreement is deemed adequate if it is equal to the exchange ratio that would apply in connection with a statutory merger of the two companies. For purposes of determining such exchange ratio, which has to be reviewed by a court-appointed auditor, an expert company valuation of each of Deutsche Börse and the Bidder would need to be performed for which the circumstances at the date of the resolution of Deutsche Börse's shareholders' meeting adopting the domination agreement or combination of a domination agreement and a profit transfer agreement will be decisive. While there are no compulsory statutory requirements for the method of such company valuation, a valuation on the basis of discounted future earnings (*Ertragswertverfahren*) in accordance with the Principles for the Preparation of Business Valuations under IDW Standard S 1 of the Institute of Public Auditors in Germany e.V. (*Institut der Wirtschaftsprüfer in Deutschland e.V.*) is generally accepted for such purpose. In addition, according to case law, the consideration to be offered under such agreement may generally not be less than the volume weighted average stock price of

Table of Contents

Deutsche Börse shares for the three months period prior to the announcement of such domination agreement or combination of a domination agreement and a profit and loss transfer agreement. The exchange ratio so determined may therefore deviate from the exchange ratio underlying the exchange offer. The adequacy of the amount of the recurrent cash payment pursuant to Section 304 AktG and the compensation pursuant to Section 305 AktG may, upon request by shareholders of Deutsche Börse, be reviewed in a judicial award procedure (*Spruchverfahren*).

10.6.2 Corporate squeeze-out

If, after completion of the exchange offer or any time thereafter, at least 95% of the registered share capital of Deutsche Börse belong (within the meaning of Section 327a AktG) to the Bidder or, as the case may be, a subsidiary of the Bidder, the general shareholders meeting of Deutsche Börse may upon request of the Bidder or its subsidiary pursuant to Sections 327a et seq. AktG, resolve upon the transfer of the Deutsche Börse shares of the other shareholders (minority shareholders) of Deutsche Börse to the Bidder or such subsidiary in return for payment of adequate cash compensation (*angemessene Barabfindung*) (the **corporate squeeze-out**). The resolution may be adopted by a simple majority of the votes cast; also the bidder and, as the case may be, the respective subsidiary of the bidder, are entitled to vote at this resolution with respect to Deutsche Börse shares held by them. The corporate squeeze-out would not constitute a tender offer under U.S. law, and therefore would not be subject to Section 14(d) or 14(e) of the Exchange Act or the rules or regulations of the SEC thereunder.

In case of a corporate squeeze-out, such compensation must be paid in cash and would therefore be different from the form of consideration offered in the exchange offer. The amount of the cash compensation which the remaining Deutsche Börse shareholders would receive in connection with a corporate squeeze-out would have to be determined on the basis of an expert company valuation of Deutsche Börse for which the circumstances at the date of the resolution of Deutsche Börse's shareholders meeting adopting the corporate squeeze-out would be decisive, and would be reviewed by a court-appointed auditor. Also for purposes of such business valuation a valuation based on the discounted future earnings (*Ertragswertverfahren*) in accordance with the Principles for the Preparation of Business Valuations under IDW Standard S 1 of the Institute of Public Auditors in Germany e.V. (*Institut der Wirtschaftsprüfer in Deutschland e.V.*) is generally accepted for such company valuation with the amount of the adequate compensation to be generally not less than the volume weighted average stock price of Deutsche Börse shares for the three months period prior to the announcement of the squeeze-out. Therefore, such consideration could deviate from the amount of the consideration offered in the exchange offer and may also be higher or lower. The adequacy of the amount of the cash compensation may upon request by former shareholders of Deutsche Börse, whose shares were transferred in the squeeze-out, be reviewed in a judicial award procedure (*Spruchverfahren*). Execution of the corporate squeeze-out would end the listing of the Deutsche Börse shares.

In the context of the corporate squeeze-out described above, the following should be noted:

The German legislator is currently preparing a new legislation called Third Amendment of the Act on Corporate Reorganisations (*Drittes Gesetz zur Änderung des Umwandlungsgesetzes*) which is expected to come into force still in 2011. The draft of such new legislation presented by the German federal government and dated October 1, 2010 (BT-Drucks 17/3122) provides, among other things, for the possibility to perform, under certain circumstances, a special form of a corporate squeeze-out upon request of a principal shareholder holding at least 90% of the share capital of a German stock corporation (instead of 95% as required under the standard form of a corporate squeeze-out).

The Bidder reserves the right to assess whether it (or alternatively, as the case may be, a subsidiary) will make use of such special form of a corporate squeeze-out in relation to Deutsche Börse following a completion of the exchange offer, if such new legislation is implemented and the prerequisites for such special form of a corporate squeeze-out are met after completion of the exchange offer or any time thereafter.

Table of Contents

10.6.3 Takeover squeeze-out

If, after completion of the exchange offer, at least 95% of the registered share capital of Deutsche Börse belong (within the meaning of Section 39a German Takeover Act) to the Bidder, the Bidder may petition in accordance with Section 39a German Takeover Act the relevant District Court (*Landgericht*) in Frankfurt am Main until three months from the expiration of the offer acceptance period that the remaining Deutsche Börse shares shall be transferred to the Bidder by way of a court order, provided that such application provides for an adequate compensation (*Abfindung*) (the **takeover squeeze-out**). Such petition may also be made prior to the completion of the exchange offer if, based on the number of Deutsche Börse shares for which the exchange offer has been accepted, at least 95% of the registered share capital of Deutsche Börse which is entitled to voting rights will belong (within the meaning of Section 39a German Takeover Act) to the Bidder upon the subsequent completion of the exchange offer. The takeover squeeze-out would not constitute a tender offer under U.S. law, and therefore would not be subject to Section 14(d) or 14(e) of the Exchange Act or the rules or regulations of the SEC thereunder.

The takeover squeeze-out provides the Bidder with an alternative to the corporate squeeze-out. As opposed to the corporate squeeze-out, pursuant to Section 39a para. 3 German Takeover Act, the compensation that the remaining Deutsche Börse shareholders would receive in connection with a takeover squeeze-out in exchange for their Deutsche Börse shares would be, at the election of each individual Deutsche Börse shareholder, either Holdco ordinary shares (because Holdco ordinary shares are offered as consideration under the exchange offer) or cash. The consideration offered to the shareholders of Deutsche Börse under the exchange offer will be deemed to constitute adequate compensation also for the purposes of the takeover squeeze-out if the exchange offer resulted in the acquisition of at least 90% of Deutsche Börse's share capital which was subject to the exchange offer.

The implementation of the takeover squeeze-out would also end the listing of the Deutsche Börse shares.

10.7 Use of assets and future obligations of the bidder, seat and location of material parts of the business of the bidder, the employees of the bidder and their representations, the members of the management bodies of the bidder and changes to employment terms and conditions of the bidder.

The intended changes regarding the board of directors and the global executive committee of the Bidder are described in section 6.4.2 and section 6.4.3. The intended restructuring measures are described in section 10.6. With respect to the impact of the completion of combination on the assets, financial and earnings positions of the bidder reference is made to the information contained in section 16.

Except for the aforementioned changes, the bidder does not intend changes with respect to seat and location of material parts of the business of the bidder, use of assets of the bidder, future obligations of the bidder, employees of the bidder and their representation, the members of the management bodies of the bidder and changes to employment terms and conditions of the bidder.

11 Explanation of determination of the offer consideration

Pursuant to Section 31 para. 1 sentence 1 German Takeover Act, the Bidder has to offer the shareholders of Deutsche Börse adequate consideration for their shares.

11.1 Admittance to trading on organized market and liquidity of Holdco offer shares

The Bidder will, prior to the time of delivery of the Holdco offer shares to the shareholders of Deutsche Börse under the exchange offer and to the shareholders of NYSE Euronext, in the context of the merger, apply for admission of its ordinary shares, including the Holdco offer shares, to trading on the regulated market segment (*regulierter Markt*) of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard), as well as on the regulated market of Euronext Paris (*marché réglementé de Euronext Paris*) and on the New York Stock Exchange.

According to the rules of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) the admission of the ordinary shares of the Bidder to trading on the regulated market segment of the Frankfurt Stock

Table of Contents

Exchange and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard) can principally take place only after issuance of such shares; the Bidder will submit a corresponding application for admission without undue delay following the issuance of the Holdco offer shares. In contrast, the admission of the ordinary shares of the Bidder to trading on the regulated market segment of Euronext Paris and on the New York Stock Exchange can take place before issuance of the shares that are supposed to be admitted with the proviso that the admission will become effective upon the subsequent official notice of the issuance of the shares. The Bidder will submit an application for admission both with Euronext Paris and the New York Stock Exchange prior to the completion of the exchange offer.

The Bidder will take all necessary actions on his side in order to ensure that the Holdco offer shares, which the accepting shareholders of Deutsche Börse will receive upon settlement of the exchange offer, will have been admitted to trading (listed) on a regulated market within the meaning of Section 2 para. 7 German Takeover Act at the time of delivery to the shareholders of Deutsche Börse having accepted the exchange offer. Therefore, the prerequisite pursuant to Section 31 para. 2 sentence 1 WpÜG with respect to the admittance to trading on organized market is met.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of the Holdco offer shares to the shareholders of Deutsche Börse having accepted the exchange offer.

The completion of the exchange offer is subject, among others, to the condition that the minimum acceptance threshold described in section 14.1(a) is reached or exceeded. After adoption of the NYSE Euronext requisite vote, the completion of the merger will only be subject to the completion of the exchange offer and will take place immediately after the completion of the exchange offer. In addition, the completion of the exchange offer is subject to the adoption of the NYSE Euronext requisite vote. Hence, it is expected that, upon completion of the exchange offer, the completion of the merger will occur and the NYSE Euronext shareholders will become Holdco shareholders.

Both Deutsche Börse and NYSE Euronext have a significant free float. For example, Deutsche Börse is member of the DAX-index which measures the development of the thirty companies on the German equities market with highest liquidity and the largest free float capitalisations. In view of the above statements, Holdco shares and especially the Holdco offer shares offered under this exchange offer will be liquid shares within the meaning of Section 31 para. 2 German Takeover Act.

11.2 Minimum consideration

Pursuant to the relevant provisions of the German Takeover Act Offer Regulation, the minimum consideration is the higher of the following prices:

- (i) Pursuant to Section 5 German Takeover Act Offer Regulation, the consideration must be at least equal to the weighted average domestic stock exchange price of Deutsche Börse shares during the last three months prior to the publication of the decision to make the exchange offer as of February 15, 2011 (the **3-month average price**).
- (ii) Pursuant to Section 4 German Takeover Act Offer Regulation (in conjunction with Section 31 para. 6 German Takeover Act), the consideration must be at least equal to the highest consideration paid or agreed to be paid by the Bidder, persons acting jointly with the Bidder or their subsidiaries for the acquisition of Deutsche Börse shares (or the entry into agreements which entitle them to acquire Deutsche Börse shares) within the last six months prior to the publication of this exchange offer document.

The 3-month average price as calculated by BaFin as of the record date February 14, 2011, and notified to the Bidder is 54.16 per Deutsche Börse share.

In the relevant period neither the Bidder, nor persons acting jointly with it, nor their subsidiaries acquired Deutsche Börse shares or entered into agreements which entitled them to acquire Deutsche Börse shares for consideration.

Table of Contents

Therefore, the minimum consideration payable pursuant to Sections 4 and 5 of the German Takeover Act Offer Regulations is 54.16 per Deutsche Börse share.

11.3 Non-existence of reference stock exchange price of Holdco / IDW S 1 2008 valuation of Holdco

Pursuant to Section 7 German Takeover Act Offer Regulation in connection with Sections 5 and 6 German Takeover Act Offer Regulation, the value of the consideration granted under an offer is generally to be determined by reference to the average stock exchange price of the offered shares during the last three months prior to the publication of the decision to make a takeover offer.

However, Holdco shares have not been listed or traded on a stock exchange in the past. Therefore, the minimum consideration in the exchange offer cannot be determined on the basis of stock exchange prices of Holdco's shares pursuant to Sections 5 para. 1, para. 2, 6 para. 1, para. 2 German Takeover Act Offer Regulation. Instead, in corresponding application of Section 5 para. 4 German Takeover Act Offer Regulation, such determination has to be made on the basis of a formal valuation of Holdco. Such a valuation has been prepared on the basis of a business plan of Holdco assuming that the combination will be completed as proposed, on a *as if* basis.

The Bidder has retained Warth & Klein Grant Thornton AG, Wirtschaftsprüfungsgesellschaft, Düsseldorf (**Warth & Klein**), to prepare a formal valuation of Holdco on a *as if* basis and to determine whether the value of one Holdco offer share offered under the exchange offer in exchange for one Deutsche Börse share is equal to or exceeds the relevant 3-month average price.

Warth & Klein has duly prepared a formal valuation of Holdco in accordance with the accepted professional Principles for the Preparation of Business Valuations under IDW Standard S 1, as amended in 2008, of the Institute of Public Auditors in Germany e.V. (*Institut der Wirtschaftsprüfer in Deutschland e. V.*) (**IDW S 1 2008**). On the basis of IDW S 1 2008, Warth & Klein has rendered its valuation in the capacity of a neutral expert. The valuation of Holdco therefore constitutes an objectified value.

Based on this valuation, Warth & Klein has confirmed that the value of one Holdco offer share offered under the exchange offer in exchange for one Deutsche Börse share exceeds the 3-month average price.

The intrinsic value was derived on the basis of discounted future earnings (*Ertragswertverfahren*) and is based on the earnings expectations of the managements of Deutsche Börse and NYSE Euronext. As explained above, the valuation solely served the purpose of complying with the minimum pricing rules of the German Takeover Act and to document such compliance. This assessment gives neither a prediction about the future share price of Holdco as of the listing of its shares for trading on the stock exchange or their delivery to the shareholders of Deutsche Börse who have accepted the exchange offer, nor about the development of the share price at any other time thereafter. Any share price development depends on many external circumstances, especially on the change of expectations about the future over time, which cannot be predicted at all by the valuation expert. Instead, it is in the nature of expectations regarding future developments that these are uncertain and based solely on currently available insights and assessments.

The valuation is not a recommendation for shareholders and their decision-making process in regard to the exchange offer. Warth & Klein does not assume any responsibility that the information, any assessments and any of the conclusions presented in this section 11.3 of this exchange offer document are sufficient or complete for the purposes of the reader, in particular regarding the decision to acquire or to sell shares of Deutsche Börse, NYSE Euronext or Holdco.

As background for its analysis, Warth & Klein in particular (1) reviewed business plans for Holdco for the years 2011-2013; (2) reviewed business plannings for NYSE Euronext and Deutsche Börse which take into account certain publicly available research analysts' financial forecasts endorsed by the respective management and extrapolations from such forecasts as directed by the respective management until 2015; (3) discussed with key members of Deutsche Börse's and NYSE Euronext's management the

Table of Contents

respective business plans; (4) reviewed and analyzed information relating to the historical and current operations of each Deutsche Börse and NYSE Euronext; (5) reviewed various documents related to the organization, corporate proceedings, assets and liabilities of Deutsche Börse and NYSE Euronext and (6) reviewed other publicly available economic, industry and company information.

11.3.1 Valuation fundamentals

The value of the equity capital of a commercial enterprise is derived from the future, uncertain cash flows which the provider of equity capital can anticipate. Such a value, therefore, can be calculated as the present value of future surpluses of revenues over expenses of the enterprise.

This requires a forecast of the expected surpluses of the enterprise. The basis for valuing the earnings, therefore, is normally the business planning which covers at least a period of three to five planned years, as well as an estimate of sustained earnings which can be considered to be achievable on a permanent basis for the period of time after the planned years. The basis for such a forecast of future earnings and expenditures consists of the adjusted results generated in the past. The forecasts can be checked with regard to plausibility by a comparison with the past, developments of other enterprises as well as the development in the industry, the market and the overall economy.

However, any forecast involves uncertainty. When determining a present value of forecast cash flows, it is, therefore, necessary to take into account that providers of equity capital normally prefer a certain, positive cash flow to an equally high, uncertain cash flow. This risk aversion can be reflected by increasing the risk free interest rate used to calculate the present value by a risk premium.

The principles about how such forward looking enterprise valuations are to be carried out are set forth in the IDW S 1 2008. In order to value Holdco, Warth & Klein conducted a discounted earnings valuation pursuant to IDW S 1 2008.

As an alternative to the applications of the discounted earnings method, it is also generally possible to conduct valuations using the discounted cash flow (**DCF**) method under IDW S 1 2008. The discounted earnings method and the DCF method are based on the calculation of the value of capital and, thus, on the same conceptual basis. When applying the same premises, especially with logical planning, consisting of planned income statements, planned balance sheets and planned cash flow statements, both methods come to the same result. Therefore, Warth & Klein has not provided a presentation of the discounted cash flow.

Since neither a liquidation of the enterprise is contemplated, nor is it apparent that the liquidation value could be relevant as a possible minimum value, Warth & Klein has not determined the liquidation value.

The valuation of the substance under procurement aspects leads to the so-called reconstruction value of the enterprise which is only a partial reconstruction value due to the general lack of intangible assets. This substance value has no independent informative value when determining the total value of an enterprise as a going concern. Therefore, Warth & Klein also did not determine a substance value.

It is common practice in mergers and acquisitions to determine indicative enterprise values or ranges of values by means of multipliers which are considered to be common in the industry. When carefully conducting such valuations, in the first place, an analysis of the past and also the expected earnings situation of the subject of the valuation are required. Secondly, the multipliers must be derived from an analysis of the valuations of comparable enterprises. Such multiplier valuations represent only simplified, generalized discounted earnings valuations. Therefore, a comprehensive, analytical valuation using the discounted earnings method, as in the present case, is preferable.

To the extent that stock exchange prices for shares in the enterprise are available, these prices must be referred to under IDW S 1 2008 when valuing an enterprise in order to assess the plausibility of the enterprise value determined under the above principles. The shares in Holdco themselves are not (yet) listed on a stock exchange, but both the shares in Deutsche Börse as well as the shares in NYSE Euronext are traded on stock exchanges. Therefore, a deemed market capitalization of Holdco can generally be

Table of Contents

derived from the stock exchange prices of Deutsche Börse and NYSE Euronext. It is for this reason that Warth & Klein verified the equity value of Holdco determined with the discounted earnings method on the basis of the market capitalization of NYSE Euronext and Deutsche Börse, taking into account the synergies and costs of implementation expected from the combination.

Peculiar difficulties during the valuation work did not arise.

11.3.2 Valuation approach

The valuation of Holdco, including the synergies, was determined by Warth & Klein on the basis of the planned earnings for Deutsche Börse and for NYSE Euronext using the discounted earnings method in accordance with IDW S 1 2008. The valuation of Holdco consists of the discounted earnings value plus special values for participations, specific assets held for sale and the corporate tax credit of Deutsche Börse. Due to the international nature of the entire combination, Warth & Klein has not included an explicit illustration of German personal income taxes typified tax circumstances of the shareholders have been taken into account indirectly; see, IDW S 1 2008, no. 30).

The basis for the valuation is a consolidated business plan of Holdco for the years 2011 through 2013, including the expected synergies and costs of implementation. This plan has been derived from the provided stand-alone business plans for NYSE Euronext and Deutsche Börse. Those stand-alone business-plans, which take into account certain publicly available research analysts financial forecasts endorsed, by the respective management and extrapolations from such forecasts as directed by the respective management until 2015. Warth & Klein has assumed that 100% of Deutsche Börse shares and NYSE Euronext shares will be exchanged for Holdco shares in accordance with the agreements reached in the business combination agreement. In the case of a lower acceptance quota by the shareholders of Deutsche Börse, Holdco would own less than 100% of Deutsche Börse and Holdco also would issue a lower number of Holdco shares. Because the value per share which is contributed to Holdco by a NYSE Euronext shareholder is lower than the value per share contributed by a Deutsche Börse shareholder (in the business combination agreement NYSE Euronext is valued with a premium, see pages A-80 et seq. of Annex 2) a lower value per share of Holdco would be the result. For this reason, Warth & Klein has also examined a scenario with a 75% acceptance quota which is the lowest possible quota under the offer conditions.

The consolidated business plan of Holdco represents generally the total of the stand-alone planning for Deutsche Börse, for NYSE Euronext and the synergies and costs of implementation expected from the combination including the costs of implementation. The synergies expected by the parties of the combination resulting from the business combination including the costs for implementation were first determined at an early stage based on first estimates. The valuation is based on synergies and costs for implementation, which have been identified and calculated in a second phase of the project of joint project teams.

With regard to the planning assumptions for the development of the operational business, the responsibility lies exclusively with both partners to the combination. Warth & Klein has only checked the plausibility of the operational planning in discussions with the respective management. Since the planning of the synergies is expected and communicated generally by both combination partners and, therefore, is understandable, although not confirmed by specific individual measures in the early phase of the combination, they have taken into account the low degree of specification by considering two scenarios with regard to the synergies. They have assumed that the synergies are achieved either at 75% or 100%. Independent of the possible realization of the synergies, Warth & Klein assumed that Holdco will be able to enforce (for example via a domination agreement) the measures which are necessary therefore.

Warth & Klein has independently determined the currency exchange rates used for converting the planned accounts into EUR as well as the long-term financial result and the long-term tax expense. They considered both the assumptions and planning as well as market data for this purpose. Also the determination of the long-term results (perpetuity) as an extrapolation of the figures of 2013 was conducted by Warth & Klein.

Table of Contents

The individual steps in the valuation, namely, the determination of the surpluses to be discounted, the determination of the discount rate, the capitalization itself and the determination of the special values, are explained below.

11.3.3 Basis of valuation/Validation of projections and synergies

The starting point for checking the plausibility is the analysis of the results in the past because they serve as an initial orientation for analyzing planned numbers. Holdco was only recently established, however, and is not yet itself active. In order to be able to check the plausibility of the consolidated business plan of Holdco consisting of the stand-alone plans for Deutsche Börse and NYSE Euronext plus the planned synergies (less costs of implementation) in light of the past, Warth & Klein has prepared as if income statements for the years 2008 through 2010 (neither according exclusively to International Financial Reporting Standards (**IFRS**) nor to generally accounting principles accepted in the United States (**US GAAP**). This covers the actual numbers for Deutsche Börse in accordance with the annual reports for the years 2008 through 2010 (according to IFRS). For purposes of simplification they converted the actual numbers for NYSE Euronext in the years 2008 through 2010 according to the annual reports (according to US GAAP) with the respective currency exchange rate for U.S. dollar to on December 31 of the respective year (see below).

The as if numbers for the years 2008 through 2010 shown in the following section only serve to check the plausibility of the planned accounts.

To the extent that the results shown in the consolidated financial statements were influenced by extraordinary business events (for example unique or exceptional other operating income and expenses) which have distorted the as if series of results for the past for Holdco and influence the comparison of the results of the planning period with the as if numbers for the years 2008 through 2010, the effects resulting from these special circumstances have been adjusted. These adjustments primarily relate to impairment depreciations, restructuring and transaction costs as well as to consulting fees. The impairment depreciations relate mostly to impairment of intangible assets of the ISE in 2009 and 2010 at the Deutsche Börse and goodwill amortization and impairment writedowns of intangible assets of the European Cash Reporting Unit in 2008 of NYSE Euronext.

The basis for the valuation is the consolidated business plan of Holdco described below for the years 2011 through 2013, including the synergies (less costs of implementation) expected from the combination. The consolidated business plan of Holdco represents generally the total of the stand-alone planning for Deutsche Börse, for NYSE Euronext and the synergies, including the costs of implementation. Technically, initially the planned accounts for NYSE Euronext provided to Warth & Klein in U.S. dollar were converted into based on the expected currency splits (U.S. dollar, Euro, Great Britain Pound) using the following forward exchange rates:

	31.12.2008	31.12.2009	31.12.2010	31.12.2011	31.12.2012	31.12.2013	Perpetuity
Exchange Rates	Historical	Historical	Historical	Forward	Forward	Forward	Forward
EUR / USD	1.3953	1.4331	1.3369	1.3304	1.3237	1.3204	1.5375
EUR / GBP				0.8461	0.8427	0.8379	0.8668

Source: Bloomberg; FED; Deutsche Bundesbank (German central bank); calculation Warth & Klein

In a second step, the planned accounts of Deutsche Börse and NYSE Euronext as well as the planned synergies for turnover and costs were added and the implementation costs subtracted. Holdco covers 100% of each of Deutsche Börse and NYSE Euronext.

Table of Contents

The earnings from participations contained in the planning of Deutsche Börse and NYSE Euronext were eliminated and applied as special values in the amount of the book values. Furthermore personal expenses resulting from the stock based compensation programs of NYSE Euronext have been adjusted by Warth & Klein.

	2008	2009	2010	2011	2012	2013	2014 et
	As if	As if	As if	Plan	Plan	Plan	seq.

- 1) The revenues can be divided mainly into the segments Cash Trading & Listings, Derivatives, IT/MD&A and Clearstream. Revenues from the segment Clearstream are generated solely by Deutsche Börse. With regard to the segments Cash Trading & Listings as well as Derivatives, the revenue shares of NYSE Euronext are disclosed net of section 31 fees, liquidity payments and routing and clearing fees as these costs show a direct reference to the corresponding gross revenues. The respective costs of sales or deductions do not exist at Deutsche Börse AG, so that the comparability and thus the predictive power is restricted to that extent.
- 2) The position other operating income shows primarily the net interest result on customer deposits of the banking business of Clearstream.

(i) Planned EBIT of Holdco

On the basis of the planned overall performance as well as the planned operating expenses and depreciation, an increase in the EBIT results in the planning period from 1,759.1 million in the fiscal year 2010 to 2,291.7 million in the planning year 2013, which corresponds to an compound annual growth rate of 9.2% annually. The planned growth of a total of 532.6 million is allocated in an amount of 490.0 million primarily to an increase in the EBIT from 2012 to 2013 (+ 27.2%). This development is influenced decisively by the planned synergies as well as the incurred costs for implementation (in the amount of approx. 700 million) under the combination of Deutsche Börse with NYSE Euronext. The companies expect to realize the revenue synergies rates of 25% at the end of 2012 and 50% at the end of 2013. The cost synergies are expected to be realized that to 30% at the end of 2012 and to 65% at the end of 2013. Warth & Klein has derived from this average values for the realization rates for the synergies in the respective planning year. Therefore the revenue synergies are planned to display 12.5 % of their effects in 2012 and 37.5 % in 2013 and the respective cost synergies are planned to display 15.0 % of their effect in 2012 and 47.5 % in 2013. The EBIT is influenced by the planned synergies as well as the costs for implementation incurred in 2012 on balance with about 328 million and on balance with about 73 million in 2013. When adjusted for these effects, rates of growth for EBIT at Holdco result in the amount of 15.6% between 2011 and 2012 as well as in the amount of 11.0% between 2012 and 2013. The rates of growth are primarily supported by the planned growth in sales.

(ii) Planning of the financial results and taxes

Table of Contents

Financial result

The planned accounts of Holdco contain a financial result which was determined on the basis of an integrated planning of the financial requirements. Warth & Klein based their valuation on this planning of financial requirements. Warth & Klein calculated anew the financial results for the detailed planning period on the basis of the balances sheet planning which Warth & Klein extrapolated and the enterprise specific interest rates. Warth & Klein assume a normalized interest level over the long-term and apply a rate for the cost of debt in the amount of the base interest rate plus a spread.

Determination of enterprise taxes

The planned accounts of Holdco take into account a weighted group tax rate, which has been derived on the basis of average consolidated tax rates for Deutsche Börse and NYSE Euronext. The corporate taxes were determined by Warth & Klein anew, taking into account this weighted group tax rate. The burden with withholding tax in an expected amount of 5% on half of the results of NYSE Euronext (assumption) was taken into account as a negative synergy.

(iii) Determination of the long-term results

The long-term operational results of Holdco for the fiscal years 2014 et seq. was derived by extrapolating the sales and expenses in the year 2013, taken into account a weighted growth of 1.68%. The planned accounts for NYSE Euronext in USD were converted by Warth & Klein into Euro based on the expected currency splits (U.S. dollar, Euro, Great Britain Pound) using the following long-term expected forward exchange rates: 1.54 EUR/USD; 0.87 EUR/GBP.

Furthermore, the synergies in sales and costs expected from the combination of the companies, which are anticipated to come into play 100% starting in the year 2015, were taken into account.

Warth & Klein has applied a long-term reinvestment rate in the amount of the average depreciation in the detailed planning period.

In order to take into account the fact that the growth in the balance sheet accompanying the long-term expected growth in the line items in the profit and loss statement as well as the surpluses must be financed, Warth & Klein has applied retained earnings in the amount of the rate of growth relating to the net assets (without taking into account goodwill) in the long-term result as of the end of the detailed planning phase. This retention of earnings required to finance the growth in future earnings reduces the amount which is available for distributions.

11.3.4 Determination of discount rate

The discounted earnings value is determined by discounting the future financial surpluses to the effective date of the valuation. The discount rate reflects the return on investment of an alternative investment for which the cash flow must be considered comparable with the cash flow generated by the shares in the enterprise being valued with regard to timing, risk and taxation.

The starting point for determining the discount rate is the return on investment of a risk free investment in the capital market (base interest rate). This base interest rate must be increased by a risk premium which is supposed to cover the uncertainty about the amount of the financial surpluses in an investment in shares in the enterprise being valued compared to an investment in a risk free interest bearing security. In order to determine effects of growth in the form of continuously growing financial surpluses after the end of the detailed planning phase, the discount rate is reduced by a growth factor (deduction for growth).

Warth & Klein has determined the discount rate in detail as follows:

(i) Base interest rate

The base interest rate represents a risk free alternative investment with equivalent timing to an investment in the enterprise being valued. In order to maintain the required equivalency between the variables used as

Table of Contents

numerators and denominators, care must be taken that the financial surpluses to be discounted to present value are denominated in the same currency as the securities used as the basis for determining the interest rate. Since the planning at Holdco was derived in part operationally in EUR or converted in EUR by means of forward exchange rates, the base interest rate was determined on the basis of government bonds in Germany. In light of its virtually safe nature, such bonds comply to the greatest extent possible with the requirement for having no risk in light of their virtually secure nature.

When valuing an enterprise with a perpetual life, the base interest rate would generally have to be the return on investment which could be achieved as of the effective date of the valuation from a bond issued by the government which also has no time limit (equivalents of term). Since such perpetual bonds do not exist or are not traded, however, the theoretical return on investment for bonds with a perpetual term can be approximated using the observed yield curve.

The German Federal Bank (*Deutsche Bundesbank*) publishes regular estimates about yield curves on the basis of the prices for German government securities having a remaining term of up to around 30 years which are listed on the exchange by applying the Svensson method. In order to determine the base interest rate, an average yield curve for the years 2010 et seq. over a period of up to 30 years was determined on the basis of the daily estimates of the German Federal Bank for the months November 2010 through January 2011 and an extrapolation of the average 30 year zero bond interest rate. The term specific interest rates for the yield curve gained in this manner were converted to a uniform base interest rate for all planned years before personal income taxes of around 3.5% as a present value equivalent.

(ii) Risk premium

The risk premium serves to compensate the risk taken by investing in shares of the enterprise being valued. It must be assumed that participants in the market are risk averse. This means that certain income will always be preferred compared to the same amount of expected values of uncertain income. This risk aversion can be taken into account by way of a deduction from the expected surpluses or by a risk premium on the discount rate. Both methods are interchangeable, but in practice risk aversion is almost exclusively taken into account by a premium on the interest rate.

In the context of objective valuations, capital market models such as the capital asset pricing model (CAPM) are especially appropriate for determining the risk premium because these capital market models indirectly derive risk premiums from observable prices in the capital market. The prices established in the capital market are the results of action by the investors. Prices for securities reflect also the risk preferences of the investors to the extent that the investors knowingly and freely decide to purchase or sell certain securities. This market valuation of the risks of shares by rational and risk averse investors is reflected in the theoretical CAPM. The CAPM, thus, supplies a verifiable, objective context for quantifying a reasonable risk premium.

The two parameters in the model required under CAPM for calculating the amount of the risk premium are the market risk premium and the beta factor.

The market risk premium is the average higher return on investment for investments in capital shares required by investors compared to returns from risk free securities. The market risk premium can be estimated using historical data from the capital markets. It is assumed when doing so that excess returns on investment for shares compared to risk free securities such as government bonds observable over the long term represent an estimated value for the risk premium which participants in the capital markets can be expected to demand in the future for investments in stocks. The stock market can be reflected using a broad stock index.

Based on corresponding empirical studies, the Special Committee for Enterprise Valuation considers it appropriate to apply a market risk premium before taxes of 5.0% in calculations based on the CAPM (see Online Report on the 95th meeting of the FAUB, November 29, 2007, p. 4).

Table of Contents

The amount of the beta factor reflects the degree of systematic risk in a share under the calculation pursuant to the CAPM which cannot be diversified by means of transactions in the capital market. The higher the beta factor, the higher the risk premium for investors demanded by participants in the capital market. The beta factor is calculated using the relationship between fluctuations in returns on investment for the specific shares and the fluctuations in returns on investment in the market.

Since the discount rate reflects the return on investment for an equivalent, alternative investment, it makes sense to determine the beta factor in general on the basis of the average beta factor for a group of comparable enterprises (peer group). For this purpose, Warth & Klein has compiled a group of comparable enterprises using exchange operators which are listed on the exchange.

Five determinations of the beta factor were performed for the group of peer group enterprises for the period 2005 through 2011 compared to a worldwide index (MSCI World All Country Index), which in each case cover a period of two years and are based on weekly returns on investment. So-called adjusted beta factors were determined using this analysis. The unlevered beta factors for the peer group, adjusted for the capital structure risk, have an average value of around 1.2, including the inherent beta factors for Deutsche Börse and NYSE Euronext.

Calculation beta factor - HoldCo

	beta factor (unlevered)
Peer Group	
Deutsche Börse AG	1.1
NYSE Euronext	1.3
ASX Ltd	1.4
Bursa Malaysia Bhd	1.0
CME Group Inc	1.0
Dubai Financial Market	1.1
Hong Kong Exchanges and Clearing Ltd	1.3
IntercontinentalExchange Inc	1.3
London Stock Exchange Group PLC	1.2
NASDAQ OMX Group Inc/The	1.3
Singapore Exchange Ltd	1.3
TMX Group Inc	1.2
Mean	1.2

The capital structure risk for Holdco was taken into account by means of a period-specific adjustment of the unlevered (debt free) beta factor in the amount of 1.2 by the effect of the leverage (varying level of debt) at Holdco (see table below discount rate). The applied risk premium results from multiplying the market risk premium with the periodic, varying beta factor reflecting the capital structure risk (levered beta factors).

(iii) Deduction for growth

The growth of the anticipated future results for the enterprise must also be taken into account when valuing the enterprise. The growth of the results of the enterprise for the individual periods is specifically reflected in the detailed planning phase for 2011 through 2013. The contribution to value from the corporate surplus cash flows which are incurred in time after the detailed planning phase starting in the year 2014 and the subsequent years is reflected for purposes of simplification in the valuation by means of the present value of a terminal value. The expected, long-term results which can be generated are initially applied in the terminal value under the discounted earnings formula. If it can be assumed that the enterprise being valued is capable of growing its results in a sustained manner during the time after the detailed planning phase, the corresponding growth in results can be taken into account mathematically by means of a deduction from the discount rate.

Table of Contents

Warth & Klein has applied long-term growth at 1.68%. Warth & Klein has determined this value on the basis of the following considerations:

The starting point for a long-term development of the results is the determination that, over the long-term, nominal planned values can be subject to real changes and changes resulting from inflation. With regard to the change resulting from inflation, implied expectations for inflation can be determined for some countries using the differences in returns on investment between nominal fixed interest and inflation protected government bonds. On this basis as well as on the basis of fundamental forecasts, a long-term expectation for inflation for the countries in which Holdco will be active results in a range of around 1.5% to around 2.0%.

It is also necessary to estimate whether it can be assumed that the inflation based increases in costs can be completely passed on and how real developments influence the growth of the results. Based on increasing competitive pressure for exchanges, as is also expressed in the current concentration process as well as the increasing presence of alternative trading platforms, and in light of the continuing globalization and networking of the capital markets, Warth & Klein does not believe that the results of Holdco can grow in a sustained manner beyond increases resulting from inflation.

On the basis of the above considerations, Warth & Klein determined the following discount rate for Holdco.

Discount rate	2011	2012	2013	2014 et
Holdco	Plan	Plan	Plan	seq. Plan
Risk free rate	3.50%	3.50%	3.50%	3.50%
Market risk premium	5.00%	5.00%	5.00%	5.00%
Beta unlevered	1.20	1.20	1.20	1.20
Leverage	12.05%	11.25%	10.21%	9.31%
Beta relevered	1.32	1.31	1.30	1.29
Risk premium	6.58%	6.54%	6.49%	6.45%
Sustainable growth rate				(1.68)%
Discount rate	10.08%	10.04%	9.99%	8.27%

11.3.5 Discounted earnings value

The discounted earnings value in the amount of around 20.5 billion resulting from the discounting as of the determinative effective date of the valuation of February 15, 2011 from the results of Holdco to be capitalized, including the expected synergies, is determined as follows. 100% achievement of the planned synergies (for example via a domination agreement) was assumed.

Discounted earnings value	2011	2012	2013	2014 et
Holdco	Plan	Plan	Plan	seq. Plan
	EUR mil.	EUR mil.	EUR mil.	EUR mil.
Net distribution	1,198.3	1,157.9	1,520.9	1,875.7
Discount rate	10.08%	10.04%	9.99%	8.27%
Present value factor	0.9084	0.8255	0.7505	9.0760
Present value per year	1,088.5	955.9	1,141.4	17,024.2
Discounted earnings value as of	01.01.2011	20,210.0		
Compounding factor		1.0119		
Discounted earnings value as of	02.15.2011	20,450.8		

11.3.6 Special values

Only those factors contributing to value have been fully reflected in the present value of the discounted earnings which can be accurately reflected in value on the basis of ongoing cash flows. Factors contributing to value which cannot be reflected in this matter at all or only very incompletely must be separately valued.

Edgar Filing: NYSE Euronext - Form 425

Warth & Klein took a separate value into account for the corporate income tax credit for Deutsche Börse pursuant to § 37 German Corporate Income Tax Act (*Körperschaftsteuergesetz*, **KStG**). For purposes

Table of Contents

of the valuation, Warth & Klein has increased the remaining credit as of December 31, 2010 as determined by the company by interest from January 1, 2011 until and including the effective date of the valuation and applied an amount of around 14.3 million.

Furthermore Warth & Klein took into account special values for the participations and specific assets held for sale of Deutsche Börse and NYSE Euronext respectively. Therefore the different book values as of December 31, 2010 have been increased by interest to the effective date of the valuation on February 15, 2011 (the U.S. dollar book values have been converted into first as of December 31, 2010). The special value for the participations and specific assets held for sale of Deutsche Börse and NYSE Euronext adds up to 636.1 million.

11.3.7 Range of equity value and value per Holdco offer share

Warth & Klein has determined an equity value in the amount of around 21.1 billion as of the effective date of the valuation on February 15, 2011.

As of February 15, 2011, there are outstanding stock options and restricted stock units under equity compensation plans at Deutsche Börse and NYSE Euronext. The future exercise of these options by the holders or the allocation of the restricted stock units to the beneficiaries represents an effect that reduces value. The expenses of Deutsche Börse in this respect are included in the planning of personal expenses. For the NYSE Euronext, this is the case only partly. For this reason, the personnel expenditures have been adjusted for expenses resulting from stock based compensation programs of NYSE Euronext.

The Holdco shares to be exchanged for treasury shares of Deutsche Börse in the exchange offer were not explicitly included in the calculation of the number of Holdco shares because, as a consequence of treasury shares of Deutsche Börse being tendered in the exchange offer, Holdco itself will indirectly hold treasury shares and an explicit inclusion would be value-neutral because it is irrelevant for the value per share whether the company's value including its own shares is divided by the number of all shares, or whether the value exclusive of treasury shares is divided by the number of outstanding shares only.

If one assumes that 100 % of all shares in Deutsche Börse and NYSE Euronext are exchanged for shares in Holdco in accordance with the agreements reached in the business combination agreement, this value is distributed to 308.8 million Holdco shares. Thereby it has been taken into account that the already existing 45,000 Holdco shares (class D shares) will be reimbursed at their nominal value. The value per Holdco share is accordingly 68.33.

Valuation Summary

Holdco		EUR mil.
Discounted earnings value	as of 02.15.2011	20,450.8
Special value for non-consolidated participation	as of 02.15.2011	636.1
Special value for corporate income tax credit § 37 KStG	as of 02.15.2011	14.3
Equity Value A	as of 02.15.2011	21,101.2
Total stocks - Holdco		308.8
Value of Holdco shares (in EUR)	as of 02.15.2011	68.33

As the planning of the synergies generally is expected and communicated by both partners to a co-operation, and as it is then again, however, also understandable that the synergies cannot be confirmed with specific individual measures in the early phase of the combination, Warth & Klein has taken the lower degree of specification into account by analyzing two scenarios with regard to the synergies. They have assumed that the synergies are achieved at a level of 75% or 100%, while the costs for implementation in each case are incurred at 100%. These scenarios lead to a range in the value for the Holdco shares of 65.48 to 68.33.

The lower bound of 65.48 for the value per share of Holdco leads to an equity value of 20.2 billion. To meet the minimum price requirements for the value of Holdco an amount of 16.7 billion would be sufficient. Thus the lower bound for the equity value of Holdco exceeds the required minimum value by an amount of about 3.5 billion.

Table of Contents

The assumption has been made for purposes of the valuation as of February 15, 2011 that the dividend planned for Deutsche Börse for 2010 in the amount of around 390.5 million which will likely be disbursed in May 2011 after a resolution by the general shareholders meeting is still contained in the value of Holdco. The dividends planned for Q1 and Q2 2011 by NYSE Euronext in the amount of around US dollar 156.8 million which are then distributed following the respective quarter, are contained in Holdco. If the value for each Holdco share is determined after disbursement of the planned dividends for Deutsche Börse and NYSE Euronext is calculated, this results in a slightly lower value per share in Holdco which, however, remains well above the 3-month average price.

In case not all Deutsche Börse shares are exchanged in Holdco offer shares, the value per Holdco share would be lower. For example, if 75% Deutsche Börse shares are changed in Holdco offer shares the value of the Holdco offer shares would range between an amount of 64.65 to 67.58, depending on the realization of the synergies of 75% or 100%.

Based on the lower bound of 64.65 for the value per share of Holdco the equity value of Holdco exceeds the required minimum value imposed by the minimum price requirements in this conservative scenario by an amount of about 2.8 billion.

11.3.8 Plausibility check of the equity value and value per share

In order to check the plausibility of the range of the equity value of Holdco derived using the discounted earnings method, Warth & Klein have analyzed the current market capitalization of NYSE Euronext and Deutsche Börse plus the present value of the expected synergies and costs of implementation. In order to reduce potentially distorting influences of the announcement of the transaction on the stock exchange prices for two companies, Warth & Klein has used three months average analysis of the market values in the period November 9, 2010 – February 8, 2011 as a basis.

The resulting value per Holdco offer share is above the 3-month average price, independent of the amount of the synergies assumed to be achieved (75% to 100%), including the cost for implementation.

11.3.9 Conclusion

Based on this valuation Warth & Klein has confirmed that the value of one Holdco offer share offered under the exchange offer in exchange for one Deutsche Börse share exceeds the 3-month average price.

11.4 Adequacy of valuation method and offer consideration

Due to the non-existence of a reference stock exchange price of Holdco the Bidder has made use of a formal valuation of Holdco as of February 15, 2011 pursuant to the IDW S 1 2008 as described under 11.3. IDW S 1 2008 as well as the valuation methodology used for the valuation constitute an adequate and generally accepted method for enterprise valuations. As described above, Warth&Klein has come to the conclusion that the value for the Holdco shares as of the effective date February 15, 2011, is

in a range of 65.48 to 68.33 in the case that the exchange offer is accepted for 100% of the Deutsche Börse shares; and

in the range of 64.65 to 67.58, in the case that the exchange offer is accepted for 75% of the Deutsche Börse shares only.

Based on the aforementioned valuation and especially the fact that the value of 1 Holdco offer share offered under the exchange offer exceeds the relevant 3-month average price of Deutsche Börse shares which is 54.16, the Bidder considers the offer consideration of 1 Holdco offer share per 1 Deutsche Börse share to be adequate within the meaning of Section 31 para. 1 sentence 1 German Takeover Act.

11.5 Non-applicability of section 33b German Takeover Act

Edgar Filing: NYSE Euronext - Form 425

The articles of association of Deutsche Börse do not provide for the application of Section 33b para. 2 German Takeover Act. Therefore, the Bidder is not obliged to pay any compensation pursuant to Section 33b para. 5 German Takeover Act.

Table of Contents**12 Acceptance and settlement of the exchange offer****12.1 Central settlement agent**

The Bidder has appointed Deutsche Bank AG, Frankfurt am Main (the **central settlement agent**) to act as agent for the central settlement as well as exchange escrow agent in connection with the exchange offer.

12.2 Acceptance of the exchange offer

Shareholders of Deutsche Börse who wish to accept the exchange offer should contact their Custodian Bank (as defined below) with any questions about the technical aspects of the acceptance of the exchange offer and its settlement (Abwicklung). The Custodian Banks will be informed separately about the procedures for the acceptance and settlement of the exchange offer.

The shareholders of Deutsche Börse may only accept the exchange offer by declaring acceptance of the exchange offer in writing (the **declaration of acceptance**) vis-à-vis the investment services enterprise maintaining the relevant shareholder's securities account (the **Custodian Bank**).

Until the Deutsche Börse shares in relation to which the exchange offer has been accepted within the offer acceptance period or within the additional offer acceptance period (the **tendered Deutsche Börse shares**) are transferred to the securities account of the central settlement agent with Clearstream, the Deutsche Börse shares specified in the declaration of acceptance will remain credited to the securities account of the accepting shareholders of Deutsche Börse, but will be re-booked to the different ISIN DE00A1KRND6 at Clearstream and in the securities account of the accepting shareholder of Deutsche Börse.

The declaration of acceptance will only become effective upon the tendered Deutsche Börse shares having been re-booked to the relevant ISIN in time. As a prerequisite, the declaration of acceptance must be delivered to the applicable Custodian Bank within the offer acceptance period. If a declaration of acceptance has been delivered to the Custodian Bank within the offer acceptance period, the re-booking of the Deutsche Börse shares will be considered to have been performed in time if the re-booking at Clearstream has occurred no later than 6 p.m. (Central European Daylight Savings Time) on the second banking day following expiration of the offer acceptance period. Such re-bookings are to be arranged for by the Custodian Bank after receipt of the declaration of acceptance without undue delay.

The subscription of the Holdco offer shares and the contribution of the Deutsche Börse shares for which the exchange offer has been accepted to Holdco will be carried out by the central settlement agent as exchange escrow agent on a trust basis for the shareholders in Deutsche Börse accepting the exchange offer.

12.3 Further declarations by shareholders of Deutsche Börse accepting the exchange offer

The following declarations are partly explained in more detail in sections 12.4 and 12.6.

By accepting the exchange offer pursuant to section 12.2 above, each shareholder of Deutsche Börse irrevocably declares at the same time that:

- (a) it accepts, on the terms and conditions set out in this exchange offer document, the offer of the Bidder to conclude an agreement for the exchange of the Deutsche Börse shares specified in the declaration of acceptance into the Holdco offer shares, it approves the transfer of title to the Holdco offer shares to the central settlement agent as exchange escrow agent and, with respect to the transfer of title to the Holdco offer shares from the central settlement agent as exchange escrow agent to the shareholders of Deutsche Börse, it declares its acceptance;
- (b) it instructs and authorizes its Custodian Bank to effect the re-booking for the Deutsche Börse shares specified in the declaration of acceptance to ISIN DE00A1KRND6 (tendered Deutsche Börse shares) at Clearstream without undue delay, but to leave all tendered Deutsche Börse shares in its securities account for the time being;

Table of Contents

- (c) it instructs and authorizes its Custodian Bank to instruct and authorize Clearstream to transmit to the Bidder via the central settlement agent on each trading day information with regard to the number of tendered Deutsche Börse shares for which re-bookings have been made to ISIN DE00A1KRND6 in the Custodian Bank's securities account with Clearstream;
- (d) it instructs and authorizes its Custodian Bank to deliver the Declarations of Acceptance as well as the declarations of withdrawal pursuant to section 17.2 (including the name and address) to the Bidder upon request;
- (e) it instructs and authorizes its Custodian Bank to instruct and authorize Clearstream to make the tendered Deutsche Börse shares available to the central settlement agent without undue delay after expiry of the additional offer acceptance period and satisfaction or waiver of all completion conditions set out in section 14.1 on the central settlement agent's securities account with Clearstream for the purpose of transferring title to the relevant tendered Deutsche Börse shares to the central settlement agent for the further purpose of contributing the tendered Deutsche Börse shares into the Bidder as a contribution in kind in exchange for the corresponding number of Holdco offer shares;
- (f) it instructs and authorizes its Custodian Bank and the central settlement agent, each having been released, as a matter of precaution, of the prohibition from contracting with itself as agent for a third party (*Selbstkontrahieren*) pursuant to Section 181 of the German Civil Code (*Bürgerliches Gesetzbuch*) and corresponding foreign provisions, to take all necessary or appropriate measures and to make and receive all necessary or appropriate declarations for the completion of the exchange offer on the terms and conditions set out in this exchange offer document;
- (g) it acknowledges that, during the period commencing on the date of delivery of the relevant tendered Deutsche Börse shares to the central settlement agent's securities account with Clearstream and ending on the date of receipt of the Holdco offer shares, it will no longer be able to dispose of the relevant tendered Deutsche Börse shares and will not yet be able to dispose of the Holdco offer shares, but will only hold a claim for delivery of such number of Holdco offer shares as determined according to the terms and conditions of this exchange offer document;
- (h) its relevant tendered Deutsche Börse shares will at the time of the transfer of title to the central settlement agent be solely owned by it and will be free and clear of any third party rights;
- (i) it transfers title to the tendered Deutsche Börse shares to the central settlement agent subject to the satisfaction and/or valid waiver of the completion conditions as set forth in section 14.1 at the time of the book-entry transfer of the tendered Deutsche Börse shares to the securities account of the central settlement agent with Clearstream for the purpose of contributing the tendered Deutsche Börse shares into the Bidder as a contribution in kind in exchange for the corresponding number of Holdco offer shares;
- (j) it acknowledges and confirms that it has complied with the procedures and restrictions set out in sections 1.2 and 1.5. Shareholders who do not make this declaration and do not give this guarantee will be treated as if they had not accepted the exchange offer.

The declarations, instructions, orders and authorizations referred to in paragraphs (a) to (j) of this section 12.3 are issued irrevocably in the interest of a smooth and expeditious completion of the exchange offer. They shall only lapse (i) in the case of a final non-satisfaction of a completion condition (see section 14.3), or (ii) in the event that the agreements which have come into existence as a result of the acceptance of the exchange offer are validly rescinded in accordance with section 17.

12.4 Legal consequences of acceptance

Upon acceptance of the exchange offer, an agreement for the exchange of the Deutsche Börse shares specified in the declaration of acceptance into the corresponding number of Holdco offer shares will come into existence between each accepting shareholder of Deutsche Börse and the Bidder on the terms and

Table of Contents

conditions set forth in this exchange offer document, whereas the clearing of the exchange will be conducted by the central settlement agent as exchange escrow agent. Transfer of title of the tendered Deutsche Börse shares to the central settlement agent as exchange escrow agent and issue and delivery of the Holdco offer shares shall only occur after satisfaction and/or valid waiver of the completion conditions as set forth in section 14.1.

By accepting the exchange offer, the accepting shareholder of Deutsche Börse and the Bidder each agree subject to the satisfaction and/or the waiver of all completion conditions to the transfer of title to the tendered Deutsche Börse shares to the central settlement agent. The central settlement agent as exchange escrow agent will then subscribe to the issue of the Holdco offer shares and, for the period of time between the issue of the Holdco offer shares and the delivery of the Holdco offer shares to the shareholders of Deutsche Börse accepting the exchange offer, hold such shares. The Holdco offer shares will, without undue delay, be issued and embodied in one or more global share certificates which will be deposited with the relevant central securities depository, for onward delivery through the custody banks system, in accordance with the regular settlement procedures for equity securities. The Holdco offer shares will then be delivered to the Custodian Bank for credit to the securities accounts of the accepting shareholders of Deutsche Börse in accordance with the terms and conditions set forth in this exchange offer document.

Following transfer of the applicable tendered Deutsche Börse shares and until delivery of the respective number of Holdco offer shares, the accepting shareholders of Deutsche Börse may no longer dispose of the tendered Deutsche Börse shares and may not yet dispose of their Holdco offer shares, but will only have a claim for delivery of the number of Holdco offer shares as determined pursuant to the terms and conditions of this exchange offer document.

The central settlement agent will acquire title to the tendered Deutsche Börse shares and to the Holdco offer shares which are granted as consideration in the course of the settlement of the exchange offer only in its capacity as central settlement agent.

Upon transfer of title to the tendered Deutsche Börse shares to the central settlement agent, all rights associated with these shares shall pass to the central settlement agent and shall be transferred onwards to the Bidder in the contribution of tendered Deutsche Börse shares. Upon delivery of the respective Holdco offer shares to the respective shareholders of Deutsche Börse they shall become the owner of the respective Holdco offer shares and the holder of all rights associated with these.

The completion (*Vollzug*) of the agreement for exchange of the Deutsche Börse shares into the corresponding number of Holdco offer shares will only take place after the completion conditions set out in section 14.1 have been satisfied or validly waived by the Bidder pursuant to Section 21 para. 1 no. 3 or no. 4 German Takeover Act. If one or more of the completion conditions set out in section 14.1 have not been satisfied by the final date specified for the respective completion condition to be satisfied and if the Bidder has not validly waived the relevant completion condition pursuant to Section 21 para. 1 no. 3 and/or no. 4 German Takeover Act, the exchange offer will lapse. In this case, the agreements which came into existence as a result of accepting the exchange offer will not be completed and will cease to exist (see section 14.3).

Furthermore, by accepting the exchange offer, the accepting shareholder of Deutsche Börse irrevocably makes the declarations, instructions, orders and authorizations set out in section 12.3.

12.5 Acceptance of the exchange offer during the additional offer acceptance period

Except as set forth in this section 12.5, sections 12.1 through 12.4 shall also apply to the acceptance of the exchange offer during the additional offer acceptance period. Shareholders of Deutsche Börse intending to accept the exchange offer during the additional offer acceptance period should contact their Custodian Bank with any queries they may have about the technical aspects of the exchange offer and its settlement. The re-booking of the Deutsche Börse shares in relation to which the exchange offer has been accepted within the additional offer acceptance period to ISIN DE00A1KRND6 (tendered Deutsche Börse shares)

Table of Contents

will be considered to have been performed in time if effected no later than 6 p.m. (Central European Daylight Savings Time) on the second banking day following expiration of the additional offer acceptance period.

12.6 Settlement of the exchange offer and receipt of offer consideration

Settlement of the exchange offer will take place through the issue and delivery to the central settlement agent and the onward transfer of the Holdco offer shares, in the manner as set out in section 12.4 as consideration for the tendered Deutsche Börse shares. Upon crediting of the Holdco offer shares to the applicable Custodian Bank's securities account with Clearstream, the Bidder will have fulfilled its obligation to deliver Holdco offer shares. It is the Custodian Bank's responsibility to credit the Holdco offer shares to the securities account of each accepting shareholder of Deutsche Börse. The crediting of the Holdco offer shares to the securities accounts of the Custodian Banks shall occur without undue delay but in no event later than seven banking days (i) following the publication of the results of the exchange offer pursuant to section 23 para. 1 sentence 1 no. 3 German Takeover Act or (ii) following the day the satisfaction and/or waiver of all completion conditions is published (see section 14.4), whichever date is later. A banking day in terms of this exchange offer document relates to a day on which the banks in Frankfurt am Main, Germany, as well as in New York, New York, United States are open for general business (see section 2.1).

If one or more of the completion conditions (see section 14.1) are still not satisfied, and have not been waived, by the end of the additional offer acceptance period, the settlement of the exchange offer and the crediting of the Holdco offer shares will therefore be delayed, irrespective of a potential extension of the offer acceptance period.

The Bidder expects that the settlement of the exchange offer for the tendered Deutsche Börse shares will occur prior to March 31, 2012.

In the event that all completion conditions are satisfied on March 31, 2012 only, the last possible date, the settlement of the exchange offer and the crediting of the Holdco offer shares would be delayed until April 13, 2012 at the latest.

Prior to the time of delivery of the Holdco offer shares to the shareholders of Deutsche Börse under the exchange offer, the bidder will apply for admission of its ordinary shares, including the Holdco offer shares, to trading on the regulated market segment (*regulierter Markt*) of the Frankfurt Stock Exchange and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard), as well as on the regulated market of Euronext Paris and on the New York Stock Exchange.

The Bidder expects that the Holdco offer shares which the accepting shareholders of Deutsche Börse will receive upon settlement of the exchange offer will have been admitted to trading (listed) at the time of delivery to the shareholders of Deutsche Börse having accepted the exchange offer.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of the Holdco offer shares to the shareholders of Deutsche Börse having accepted the exchange offer.

12.7 Costs

The acceptance of the exchange offer is free of costs and expenses for those shareholders of Deutsche Börse who hold their Deutsche Börse shares in collective safe custody with a Custodian Bank provided that the Custodian Bank in turn holds these Deutsche Börse shares in custody on a securities account at Clearstream. Costs incurred for the submission of the declaration of acceptance to the Custodian Bank will not be reimbursed.

Costs imposed by other Custodian Banks or foreign intermediate custodians, shall be borne by each accepting shareholder of Deutsche Börse.

Table of Contents

Furthermore, any taxes related to the transfer of the tendered Deutsche Börse shares in exchange for Holdco offer shares must be borne by the relevant shareholder of Deutsche Börse. The same applies to any stock exchange trading taxes or stamp duties or any other taxes or duties related to the acceptance of the exchange offer.

12.8 Stock exchange trading in tendered Deutsche Börse shares

The Bidder intends to apply for the tendered Deutsche Börse shares inclusion into stock market trading on the regulated market of the Frankfurt Stock Exchange under ISIN DE00A1KRND6 as of the second trading day of the Frankfurt Stock Exchange and simultaneously in its segment with additional admission duties (Prime Standard) following the commencement of the offer acceptance period. The trading of the tendered Deutsche Börse shares allows Deutsche Börse shareholders who have agreed to tender their shares to sell their shares on the Frankfurt Stock Exchange. The sale of a share that has been agreed to be tendered does not affect its status as such and will be exchanged in the exchange offer unless it is validly withdrawn in accordance with the terms of the offer or applicable law. It is intended that Deutsche Börse will mandate a Designated Sponsor in order to provide for sufficient liquidity of the stock exchange trading with tendered Deutsche Börse shares.

Trading in the tendered Deutsche Börse shares on the regulated market of the Frankfurt Stock Exchange and simultaneously in its segment with additional admission duties (Prime Standard) is expected to end no later than (i) after regular stock exchange trading hours on the last trading day of the Frankfurt Stock Exchange within the additional offer acceptance period or (ii) after regular stock exchange trading hours on the day the satisfaction of all completion conditions (insofar as they have not been waived) is published (see section 14.4), whichever is the later date. The date as of which trading ceases shall be published by the Bidder without undue delay via an electronically operated information dissemination system as described in Section 10 para. 3 sentence 1 no. 2 German Takeover Act or in the electronic Federal Gazette and by way of an English language press release via an electronically operated information distribution system in the United States. Any person acquiring tendered Deutsche Börse shares will assume all rights and obligations arising as a result of the acceptance of the exchange offer, including the irrevocable declarations, instructions, orders and authorizations set out in section 12.3.

Although Deutsche Börse will appoint a designated sponsor to offer binding bid and ask quotes for the tendered Deutsche Börse shares, there can be no assurance as to how liquid a market for the tendered Deutsche Börse shares will develop or be sustained. If an active market for tendered Deutsche Börse shares fails to develop or be sustained, the trading price and the liquidity of the tendered Deutsche Börse shares could be materially adversely affected.

Deutsche Börse shares not tendered will continue to be traded under ISIN DE0005810055.

12.9 Note to holders of American depositary receipts

The exchange offer is not addressed to holders of ADRs which have been issued in relation to Deutsche Börse shares. Each ADR evidences one American Depositary Share (**ADS**), which represents the beneficial interest in one tenth of a Deutsche Börse share deposited with Citibank, National Association, The Bank of New York Mellon Corporation or JPMorgan Chase Bank, National Association (each, a **depository**). The ADS are deposited with a depository pursuant to the deposit agreement between such Depository and the respective owners and holders of ADRs.

ADRs may not be tendered into the exchange offer. However, holders of ADRs who are not excluded Japanese shareholders and want to participate in the exchange offer may do so by following the normal ADR cancellation process in order to obtain the underlying Deutsche Börse shares, which may then be tendered into the exchange offer. The process may take several days, and ADR holders who are not excluded Japanese shareholders should take this additional time requirement into account when making their decision whether to participate in the exchange offer or not. Holders of ADRs should contact the applicable Depository in case they have questions in relation to the exchange of ADRs in Deutsche Börse shares.

Table of Contents

Costs and fees incurred in the course of the cancellation of ADRs will not be reimbursed. The same applies to fees and costs incurred for a re-deposition of Deutsche Börse shares in an ADR facility in the event the exchange offer should fail.

12.10 Lapse in case of non-satisfaction of completion conditions

The exchange offer will lapse and the agreements which have come into existence as a result of the acceptance of the exchange offer will not be completed and will cease to exist (conditions subsequent, *auflösende Bedingungen*) if one or more of the completion conditions (as defined in section 14.1) set forth in this exchange offer document have not been satisfied and, to the extent possible, its satisfaction has not been waived (see section 14.3).

In this case, the tendered Deutsche Börse shares will be re-booked (*Rückbuchung*) from the ISIN DE00A1KRND6 into the original ISIN DE0005810055 without undue delay.

Precautions will be taken to arrange for re-booking at the latest within five banking days after the publication pursuant to section 14.4 that not all completion conditions have been satisfied and have not been validly waived. After completion of such re-booking, the respective Deutsche Börse shares will be tradable again under the original ISIN DE0005810055.

The re-booking and re-transfer is free of costs and expenses for those shareholders of Deutsche Börse who hold Deutsche Börse shares in collective safe custody with a Custodian Bank provided that the Custodian Bank itself holds these shares in custody in a securities account at Clearstream.

Any foreign stock exchange trading taxes or stamp duties or other foreign taxes or expenses which may be incurred, as well as any costs imposed by intermediate custodians shall be borne by each accepting shareholder of Deutsche Börse. Any taxes related to the re-booking and re-transfer of Deutsche Börse shares must be borne by the relevant shareholder of Deutsche Börse as well.

13 Official approvals and proceedings

In the following, the regulatory approvals and proceedings required for the combination and the status of such proceedings are described. The Bidder endeavors to initiate and complete the proceedings and to file notices and documents and to handle information requests and other inquiries as quickly as possible and will take all necessary actions in order to ensure an expedite termination of each of the proceedings listed below.

13.1 Merger control clearance proceedings

The combination is subject to merger control clearance proceedings in the United States and the European Union, which also require clearance or the expiration of certain waiting periods in accordance with the applicable merger control laws, as described below:

13.1.1 U.S. Antitrust Clearance

Under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (the **HSR Act**), and the rules promulgated thereunder by the Federal Trade Commission (the **FTC**), the combination may not be completed until notification and report forms have been filed with the FTC and the Antitrust Division of the Department of Justice (the **DOJ**) and the applicable waiting periods have expired or been terminated.

NYSE Euronext and Deutsche Börse are each required to file a notification and report with both the DOJ and the FTC in respect of the combination. On March 8, 2011, Deutsche Börse and NYSE Euronext each filed such notification and report form under the HSR Act with the FTC and the DOJ. Although under the HSR Act filings must be made by each party with both the DOJ and FTC, transactions are typically reviewed by one of the two agencies in a single review that involves the relevant parties. The combination of Deutsche Börse and NYSE Euronext is being reviewed by the DOJ.

Table of Contents

On April 7, 2011, Deutsche Börse and NYSE Euronext each received a request for additional information and documentary material (**Second Request**). The effect of the Second Request is to extend the formal assessment period until thirty days after the parties have substantially complied with the Second Request, unless the waiting period is terminated earlier.

The parties have been cooperating and continue to be in close contact with the DOJ in its review of the combination to obtain HSR clearance as promptly as possible. The parties have been and are continuing to prepare and submit data and documents to the DOJ in order to assist the DOJ with its review of the combination. There has not yet been determined a date for completing the submission of these data and documents in replying to the Second Request.

Responding to the second request from the DOJ will take between three and eight months, including the related 30-day waiting period and potential further substantive discussions with the DOJ. The parties therefore do not presently expect the waiting period to expire or be terminated before the third quarter of 2011. Coordination between the European and the DOJ, including potentially regarding timing, further complicates any prediction of when the DOJ will conclude its investigation.

At the end of its review, if the DOJ still has substantive concerns about the combination, it must initiate injunctive proceedings in a United States federal district court to block the combination or resolve its concerns by entering into a consent agreement with the parties.

13.1.2 European Competition Authorities

The combination is subject to the merger and control clearance by the European Commission (the **Commission**) pursuant to the European Community Council Regulation (EC) No. 139/2004 as of January 20, 2004 on the control of concentrations between undertakings, as amended (the **EC Merger Regulation** or **FKVO**).

The merger control proceeding under the FKVO is structured in three stages: Pre-notification Contacts, Phase I and Phase II.

(i) Pre-notification contacts

Pre-notification contacts are particularly important for notifications with the Commission. In the course of pre-notification contacts, a draft of the notification (**Form CO**) is submitted to the case team of the Commission to ensure that the notification is considered complete by the Commission. After reviewing the draft Form CO, the case team can request additional data and information to be included in the notification. The Form CO describes the notifying parties' activities and the combination, and provides information on each of the affected markets (market definition, market shares, demand and supply structure, etc.).

(ii) Notification

Once the notification is considered complete by the case team of the Commission, the notifying parties can notify the combination formally which triggers the FKVO's timetable. Deutsche Börse and NYSE Euronext intend to file the formal notification in June 2011. It should be noted, however, that the notifying parties have only very limited influence on the duration of the pre-notification contacts with the Commission and that these contacts in many cases have lasted for several months. In consequence, the date for filing the notification might be delayed. This would inevitably cause respective delays of the formal time periods of the following procedure as outlined below.

(iii) Phase I

Following formal notification, the Commission has 25 working days to approve the combination or start a Phase II investigation. Assuming filing of the formal notification on June 17, 2011, Phase I would expire on July 25, 2011. Phase I is extended to 35 working days if the notifying parties propose remedies in order for the combination to be cleared in Phase I. Phase I would then expire on August 8, 2011.

Table of Contents
(iv) Phase II

In a Phase II investigation, the Commission has a further 90 working days which would expire on December 1, 2011. Phase II would be automatically extended by 15 working days if remedies are offered by the parties 55 working days or more after the start of the Phase II proceedings. Including these additional 15 working days, the deadline for a decision of the Commission would be December 22, 2011.

The Commission could extend Phase II by up to 20 further working days if the notifying parties give their consent. Phase II would then expire at the end of January 2012 (January 30, 2012). However, the Commission can also stop the clock running at any time if information is not provided by the notifying parties within the time period required by the EU Commission. The clock only starts running again once the Commission considers that all requested information has been provided.

Shortly after the publication of the intention to launch the exchange offer, the parties have submitted a first briefing paper to the Commission. Since then, the parties are in regular contact, most of the times several times a week, with the case team of the Commission. With waiver declaration dated March 14, 2011, the parties have authorized the Commission to discuss and exchange information and documents with the DOJ. On March 23, 2011, the parties have filed a statement in which they explain more closely why the transaction lies within the scope of the FKVO. On the following day, the Commission has confirmed its competence. On April 5, 2011, the parties have organized a whole-day meeting with the Commission in the bourse of Brussels. At this meeting, the parties have presented the transaction, the affected markets and their own assessment to the Commission. Furthermore, the parties have elucidated their idea of the timing of the proceedings (filing of the draft of the Form CO in April, answering of questions and providing of all data in May, formal filing of the notification no later than mid-June). Immediately after, the case team has confirmed that it is willing to support the parties with this timing. The parties have submitted the first part of the first draft of the notification on April 15, 2011 and the second part of the first draft of the notification on April 21, 2011. The draft consisted of separate chapters (*sections 1-5, cash listing, cash trading and post-trade services, derivatives trading and clearing, IT services as well as market data and indices*). A further meeting with the case team is planned to be held in the first week of May.

As already mentioned, the formal notification is intended to be submitted in mid-June 2011. The timing of the proceedings cannot be predicted exactly. The parties assume that the proceedings with the Commission will be terminated still in 2011. However, in exhaustion of all terms and prolongations of such terms, it cannot be excluded that the proceedings will only be terminated in the first quarter of 2012.

It is again pointed out that the dates mentioned before are estimates as the exact date of the formal proceedings is dependent on the date of the notification which might be delayed as a result of time-consuming pre-notification contacts. As the EU Commission and the DOJ generally coordinate their assessment and proceedings in complex cases, it cannot be excluded that both authorities will also coordinate their proceedings also in respect of the timing.

13.1.3 CFIUS Review

The combination is subject to review under the Exon-Florio Amendment to the Defense Production Act of 1950 (**Exon-Florio**) by the Committee on Foreign Investment in the United States (**CFIUS**). Under Exon-Florio, the President of the United States is authorized to prohibit or suspend acquisitions, mergers or takeovers by foreign persons of (legal) persons engaged in interstate commerce in the United States if the President determines, after investigation, that such foreign persons in exercising control of such acquired (legal) persons might take action that threatens to impair the national security of the United States and that other provisions of existing law do not provide adequate authority to protect national security.

The parties are already in contact with CFIUS. The notice is intended to be filed with CFIUS in May 2011. The parties assume that the proceedings will be terminated in the second quarter of 2011. However, it cannot be excluded that the proceedings will only be terminated at a later time.

Table of Contents**13.1.4 Waiting Periods**

As of the date of signing of this exchange offer document, the applicable waiting periods under the HSR Act, EC Merger Regulation and Exon-Florio have not expired or been terminated. The parties involved believe that the combination can be effected in compliance with all applicable antitrust laws and review provisions under Exon-Florio. However, there can be no assurance that the governmental reviewing authorities will terminate or permit any applicable waiting periods to expire, or approve or clear the combination at all or without restrictions or conditions. There also can be no assurance that a challenge to the completion of the combination on antitrust grounds will not be made or that, if such a challenge were made, the parties would prevail or would not be required to accept certain conditions, possibly including certain divestitures, in order to complete the combination.

13.2 Capital Market Regulatory Authorities

Because of reciprocations of the following regulatory proceedings, it is expected that the supervisory authorities also coordinate the timing of their proceedings. This applies to the coordination of European supervisory authorities with each other as well as to the coordination of their proceedings with the SEC. Therefore, disregarding the timing requirements in respect of notifications, filings and decisions for each of the proceedings, it cannot be predicted when the respective proceedings will be terminated. Also, it cannot be excluded with certainty that certain proceedings will only be terminated at the end of 2011 or in the first quarter of 2012. However, the Bidder will take all necessary actions in order to ensure an expedite termination of each of the proceedings listed below.

13.2.1 SEC Approvals

Deutsche Börse's subsidiary International Securities Exchange, LLC and NYSE Euronext's subsidiaries New York Stock Exchange, LLC, NYSE Arca, Inc. and NYSE Amex LLC are self-regulatory organizations (**SROs**) registered as national securities exchanges pursuant to Section 6 Exchange Act and, as such, they must comply with certain obligations under the Exchange Act. Pursuant to Section 19 under the Exchange Act and the related rules of the SEC, all changes in the rules of SROs must be submitted to the SEC for approval, and this can include certain proposed amendments to their and, in the case of International Securities Exchange, LLC and EDGA Exchange, Inc. and EDGX Exchange, Inc., their direct parent company's certificate of incorporation, bylaws or related documents or those of NYSE Euronext as well as any proposed modifications to listing rules. No proposed rule change can take effect unless approved by the SEC or otherwise permitted by Section 19.

Under Section 19 under the Exchange Act, the text of the proposed rule change, together with a concise general statement of the statutory basis, and the purpose of the change, must be submitted to the SEC, which then gives interested parties the opportunity to comment by publishing the proposal in the Federal Register. Comment letters typically are forwarded to the SRO for response. Within a period of 35 days of the publication of the proposed rule change (or a longer period of up to 90 days, if the SEC considers it appropriate), the SEC must either approve the proposal, or institute proceedings to determine whether the proposed rule change should be disapproved. Such proceedings should be concluded within 180 days of the date of the publication of the proposed rule change, although the SEC may extend the deadline by another 60 days if necessary. The SEC will approve a proposed rule change if it finds that the change is consistent with the requirements of the Exchange Act and the rules and regulations of the Exchange Act. SROs may consent to extensions of any of these periods and, as a practical matter, will generally do so while addressing any concerns raised by the SEC.

The Bidder has filed a draft of the intended rule change with the Markets and Trading department of the SEC pursuant to Rule 19b-4 of the Exchange Act on April 15, 2011, and expects to receive their comments shortly. After the realization of respective comments, the SEC will publish the draft of the intended rule change in the Federal Register for 21 days pursuant to Rule 19b-4 of the Exchange Act for public comments. The parties will review respective comments and possibly take them into account and then will submit the draft of the intended rule change with the SEC for final approval.

Table of Contents**13.2.2 European Regulators**

In connection with the combination, a number of European regulatory approvals must be solicited and a number of filings must be made in connection with the combination. To the extent any legal decision periods apply to such approval proceedings, such periods will be started only through the filing of complete documents as a rule. The assessment of whether the documents filed are complete is regularly at the discretion of the relevant authority granting the approval in this context. Against this background, it is currently impossible to predict the duration of the approval proceedings. The abovementioned approvals and notifications include, *inter alia*, the following (in alphabetical order by the German name of the country):

(i) Belgium

- (a) The Financial Services and Markets Authority of Belgium (*Autoriteit voor Financiële Diensten en Markten/Autorité des services et marchés financiers* **FSMA**) shall not have prohibited the intended change in ownership and control of Euronext Brussels S.A./N.V. as Belgian market operator (*marktonderneming/entreprise de marché*) within the thirty days period available to it pursuant to Article 19 of the Belgian Law of August 2, 2002 on the Supervision of the Financial Sector and on Financial Services (**Belgian Law of August 2, 2002**), or it shall have issued a corresponding declaration of non-objection in respect of such intended change of ownership and control of Euronext Brussels S.A./N.V. within this period;

Any natural or legal person intending to acquire securities of a Belgian market operator, which would thereby, directly or indirectly, give him, her or it at least 10% of that market operator's capital or voting rights, shall give prior notification of that intention to the FSMA according to Article 19 of the Belgian Law of August 2, 2002.

The FSMA may, within a period of thirty days after the receipt of the notification, object to the realization of the acquisition. Where the acquisition has taken place without notification to the FSMA or before the FSMA has given its opinion, FSMA may, unless the situation is legally regulated, suspend the exercise of the voting rights attaching to the securities.

If the acquisition has taken place even though the FSMA has prohibited it, the FSMA may suspend the exercise of the voting rights attaching to the securities and/or summon the transfer of the respective securities.

On April 13, 2011, Holdco submitted its application for a declaration on non-objection to the FSMA (with a copy to the Belgian Minister of Finance date April 14, 2011). As of the time of the publication of this offer document, the FSMA has not yet responded.

- (b) Euronext Brussels S.A./N.V. shall have received a confirmation by the Belgian Minister of Finance regarding the preservation of its status as regulated market and as licensed market operator, or, in the absence of such confirmation, shall not have received any notification to the contrary;

Euronext Brussels S.A./N.V. shall need to obtain confirmation of the Belgian Minister of Finance regarding preservation of its status as regulated market and licensed market operator pursuant to Articles 3, 17 and 18 of the Law of 2 August 2002 in order to continue to be able to act as regulated market and licensed market operator. The Belgian Minister of Finance, acting upon the recommendation of the FSMA, has recognised Euronext Brussels S.A./N.V. as market operator pursuant to Article 16 of the Law of August 2, 2002 and has recognised as Belgian regulated markets the market(s) which it organises pursuant to article 3 of the Law of 2 August 2002. Euronext Brussels S.A./N.V. is as a result thereof subject to certain ongoing legal requirements. The Belgian Minister of Finance may, upon advice of the FSMA, withdraw these licenses if such legal requirements are no longer satisfied on an ongoing basis. Although the Belgian Law of August 2, 2002 does not provide for a formal approval or non-objection procedure in this respect, in practice the FSMA at the request of Euronext Brussels S.A./N.V.

Table of Contents

verifies if the business combination allows for such ongoing legal requirements to be met and its letter of confirmation is then forwarded to the Minister of Finance. Hence, FSMA shall need to confirm that the conditions for maintaining the license of Euronext Brussels SA/NV as Belgian market operator and the license as Belgian regulated market for the markets which it organizes continue to be met notwithstanding the change in control. In the absence of any action by the Minister of Finance or the FSMA to the contrary, the status of Euronext Brussels S.A./N.V. as regulated market and as licensed operator is deemed to be preserved.

The notification by Euronext Brussels S.A./N.V. to the Belgian Minister of Finance asking for a confirmation regarding the preservation of its status as regulated market and as licensed market operator is expected to be made shortly. A meeting with the Belgian Minister of Finance was held on April 27, 2011, in order to discuss the proposed combination.

(ii) College of Regulators

The committee of the members of the competent regulatory authorities (the Belgian FSMA, the French Financial Markets Authority (*Autorité des Marchés Financiers*; **AMF**), the Netherlands Authority for the Financial Markets (Autoriteit Financiële Markten, **AFM**), the Portuguese Financial Supervisory Authority (Comissão do Mercado de Valores Mobiliários, **CMVM**) and the U.K. Financial Services Authority (**FSA**)) (together the **Euronext Regulators**) of the European jurisdictions in which NYSE Euronext operates (the **College of Euronext-Regulators**) has issued a declaration of non-objection relating to the combination pursuant to the Memorandum of Understanding dated June 24, 2010;

According to the Memorandum of Understanding entered into on June 24, 2010 (**MOU**) by the Euronext Regulators, the Euronext Regulators shall consult each other with respect to decisions by entities that operate or manage a regulated market, or persons with a controlling interest, which may affect the operation of these regulated markets. This includes, *inter alia*, alliances, mergers, major acquisitions, opening or closing of a regulated market, significant changes in respect of a regulated market, or any other significant decision taken either at the level of the markets or at the level of NYSE Euronext that may have a regulatory or material impact on one of the regulated markets (*e.g.* concerning the continued operation of any of the regulated markets).

Changes to ownership, corporate structure, corporate governance and other integration or restructuring steps, for example significant amendments to the organizational structure of the markets, are also covered by the MOU and require a declaration of non-objection of the Chairmen's Committee of the College of Euronext-Regulators as described in Section 5 of the MOU. No specific procedural requirements or time periods apply pursuant to the MOU or any relevant national laws.

The request for non-objection has not been filed yet. Several meetings have taken place in the ordinary course of the meetings pursuant to the MOU with the Steering Committee and one with the Chairmen's Committee of the College of Euronext-Regulators at which the combination was explained and discussed. In the course of these meetings, the College of Euronext-Regulators has indicated that it expects to reach a final decision on the application at its meeting to be held on December 12, 2011.

(iii) Germany

The direct and indirect acquisition of various companies regulated in Germany within the context of the combination requires that the respective competent supervisory authority has not prohibited the combination within the statutory period available to it or has issued a declaration of non-objection (*Nichtbeanstandungserklärung*):

(a) Exchange supervisory authorities

For the combination it is in particular required

- that the Hessian Exchange Supervisory Authority will not prohibit the intended (indirect) acquisition of a significant participation (*bedeutende Beteiligung*) in Deutsche Börse AG,

Table of Contents

Scoach Europa AG and Eurex Frankfurt AG within one month after receipt of a full notification of the intended acquisition or will issue a corresponding declaration of non-objection within such time period;

- that the Saxonian Exchange Supervisory Authority will not prohibit the intended acquisition of a significant indirect participation in European Energy Exchange and EEX Power Derivatives GmbH within one month after receipt of a full notification of the intended acquisition or will issue a corresponding declaration of non-objection within such time period; and
- that the Berlin Exchange Supervisory Authority will not prohibit the intended acquisition of a significant indirect participation in Tradegate Exchange GmbH within one month after receipt of a full notification of the intended acquisition or will issue a corresponding declaration of non-objection within such time period.

The intended acquisition of a significant (indirect) participation in Deutsche Börse AG, Scoach Europa AG, Eurex Frankfurt AG, European Energy Exchange AG, EEX Power Derivatives GmbH and Tradegate Exchange GmbH must not have been prohibited by the relevant competent exchange supervisory authority pursuant to Section 6 of the German Stock Exchange Act (*Börsengesetz* - *BörsG*). However, no explicit approval is required. The competent authorities for supervising the securities exchanges operated by Deutsche Börse group in Germany are the Hessian Exchange Supervisory Authority for FWB and Eurex Deutschland, the Saxonian Exchange Supervisory Authority for the European Energy Exchange and the Berlin Exchange Supervisory Authority for Tradegate Exchange.

Pursuant to Section 6 para. 2 of the German Stock Exchange Act, the competent exchange supervisory authority may prohibit the intended acquisition of significant (indirect) participation within one month following receipt of a full notification of an intended acquisition if there are facts justifying the assumption that any of the reasons justifying a prohibition pursuant to Section 6 para. 2 of the German Stock Exchange Act exists (e.g. any lack of reliability of the acquirer's managing director or any impairment of the reasonable further development of the exchange's operation).

On February 15, 2011, the Bidder informed the competent exchange supervisory authorities of the intention to acquire significant (indirect) participations in Deutsche Börse AG, Scoach Europa AG, Eurex Frankfurt AG, European Energy Exchange AG, EEX Power Derivatives GmbH and Tradegate Exchange GmbH. The relevant documents required for a full notification are currently being compiled in coordination with the relevant exchange supervisory authorities. In connection therewith, on March 4 and on March 22, 2011, respectively, discussions have taken place with the Hessian Exchange Supervisory Authority. Also, questions of the Hessian Exchange Supervisory Authority with regard to certain aspects of the combination are currently being answered. Since the one-month period indicated in Section 6 of the German Stock Exchange Act starts only if the relevant competent exchange supervisory authority has received a notification that is deemed to be complete by such authority, it may currently not be predicted if the period available to the competent exchange supervisory authority for any issuance of a prohibition will expire before the expiration of the offer period or if the competent exchange supervisory authorities will issue corresponding declarations of non-objection.

(b) BaFin

In addition, the intended acquisition of significant (indirect) participation in Clearstream Banking AG, Eurex Bonds GmbH, Eurex Clearing AG, Eurex Repo GmbH, and European Commodity Clearing AG must not have been prohibited by BaFin pursuant to Section 2c of the German Banking Act (*Kreditwesengesetz* - *KWG*). However, no explicit approval is required. Pursuant to Section 2c para. 1a of the German Banking Act, BaFin may prohibit an intended

Table of Contents

acquisition of a significant participation in the abovementioned companies within 60 working days after receipt of a full notification of such acquisition, if any of the reasons justifying a prohibition mentioned in Section 2c para. 1b of the German Banking Act exists (e.g. any lack of reliability of the acquirer's managing director).

The notification to the German Central Bank (*Deutsche Bundesbank*) that is also required pursuant to Section 2c of the German Banking Act implies no additional approval requirement. Instead, the notification to the German Central Bank rather serves the purpose to ensure that the latter is offered the opportunity to provide its comments in examination proceedings conducted by BaFin pursuant to Section 2c of the German Banking Act.

On February 15 and 17, 2011, the Bidder informed BaFin and the German Central Bank of its intention to acquire a significant (indirect) participation in Clearstream Banking AG, Eurex Bonds GmbH, Eurex Clearing AG, Eurex Repo GmbH, as well as European Commodity Clearing AG. The documents required for a full notification are currently being compiled in coordination with BaFin and the German Central Bank. In connection therewith, since February 15, 2011, several telephone conferences have been held with BaFin and the German Central Bank with regard to certain aspects of the documents that will have to be filed.

Since the period of 60 working days pursuant to Section 2c of the German Banking Act starts only if BaFin has received a notification that is deemed to be complete by BaFin, it may currently not be predicted if the period available to BaFin for any prohibition will expire prior to the expiration of the offer period or if BaFin will issue a corresponding declaration of non-objection.

(iv) France

- (a) Approval by the French Banking Regulatory Authority (*Autorité de Contrôle Prudentiel*, **ACP**) of the change of ownership and control of Euronext Paris S.A. in its capacity as credit institution;

Pursuant to the French Regulation 96-16 of the *Comité de la Réglementation Bancaire et Financière* (**CRBF**) approval is necessary for the change of ownership and control of Euronext Paris S.A. in its capacity as credit institution.

The notice of the change of ownership and control of Euronext Paris S.A. has to be submitted 90 days before the closing date. The ACP has 60 business days at most as of the written acknowledgement of receipt of the notice of the change of ownership and control of Euronext Paris S.A. within which to evaluate the transaction.

As of the date hereof, several preparatory meetings have been held with ACP in order to discuss the intended combination. Holdco and Euronext Paris S.A. will shortly submit their application for the requisite approval to ACP.

- (b) Approval by the French Minister of the Economy, upon advice of the French Financial Markets Authority AMF of the acquisition of indirect control of Euronext Paris S.A. and Bluenext S.A. in their capacity as market operators;

According to Article L.421-9-11 of the French Monetary and Financial Code (*Code Monétaire et Financier*), approval by the French Minister of the Economy, upon advice by the AMF, is required for a change of control of Euronext Paris S.A. and Bluenext S.A. in their capacity as market operators.

The French Minister of the Economy will verify the absence of reasons to fear that the contemplated change of control could compromise the management of the regulated financial market.

Table of Contents

If the AMF estimates that the foreseen change of control may affect the conditions based on which the financial market was recognized as a regulated market, it shall determine the measures to be taken and in particular whether or not to propose to the French Minister of the Economy the withdrawal of the regulated market status.

In the absence of any specific timing requirements, the French Minister of the Economy's approval should be obtained within the same timeframe as applies for the approval to be obtained from the ACP.

Several meetings have already been held with representatives of the AMF and the French Minister of the Economy to discuss the proposed combination. On April 13, 2011, the Bidder submitted an application for an approval by the Minister of the Economy to the AMF, complemented by a letter to the Minister of the Economy on April 20, 2011. The AMF will analyse the combination proposal and advise the French Minister of the Economy. The AMF and the French Minister of the Economy will examine whether the contemplated change of control will not compromise the management of the regulated financial market organized by Euronext Paris S.A. and Bluenext S.A.

(v) Luxembourg

In connection with the combination, the acquisition of a substantial (indirect) interest in Clearstream Banking S.A., Clearstream International S.A. and Clearstream Services S.A. must not have been prohibited by the Luxembourg Supervisory Authority for the Financial Sector (*Commission de Surveillance du Secteur Financier*, **CSSF**) within the statutory period available to it, or the CSSF must have issued a corresponding declaration of non-objection within such period. In addition, the acquisition of a substantial (indirect) interest in Risk Transfer Re S.A. must not have been prohibited by the Luxembourg Supervisory Authority for the Insurance Sector (*Commissariat aux Assurances*, **CAA**) within the statutory period available to it, or the CAA must have issued a corresponding declaration of non-objection within such period.

(a) CSSF

Pursuant to Section 6 of the Luxembourg Financial Sector Act (*Loi du 5 avril 1993 relative au secteur financier (telle que modifiée)*), the intended acquisition of a substantial (indirect) interest in Clearstream S.A. must not have been prohibited by CSSF. Upon receipt of the full notification of the intended acquisition, CSSF shall appraise the suitability of the acquirer (here: the Bidder) and the financial soundness of the proposed acquisition against criteria provided by law. The normal 60-business day maximum assessment period may be extended up to 92 business days in certain circumstances. CSSF may refuse the proposed acquisition only if any of the reasons justifying a prohibition provided for by law, such as any unreliability of the acquirer's managing directors, exists.

In addition, the acquisition of a substantial interest in Clearstream International S.A. and Clearstream Services S.A. must not have been prohibited by CSSF either. In such case, CSSF may refuse the proposed acquisition pursuant to Section 18 of the Luxembourg Financial Sector Act within three months after receipt of the notification if any of the legal reasons justifying a prohibition exists.

On February 15, 2011, the Bidder transmitted to CSSF a preliminary notification of the intended acquisition of a substantial (indirect) interest in Clearstream Banking S.A., Clearstream International S.A. and Clearstream Services S.A. The relevant documents to be submitted for a full notification are currently being compiled in coordination with the CSSF. In connection therewith, since February 15, 2011, several telephone conferences have been held with CSSF with respect to certain aspects of the documents to be submitted. Since the assessment period will not start before all required documents have been filed and it is up to

Table of Contents

CSSF to decide when such notification will be deemed to be complete, it is currently not possible to predict if the assessment period will expire prior to the end of the offer period or if CSSF will issue a corresponding declaration of non-objection within such period.

(b) CAA

According to Section 94-1 of the Luxembourg Insurance Act (*Loi modifiée du 6 décembre 1991 sur le secteur des assurances*), the intended acquisition of a substantial (indirect) interest in Risk Transfer Re S.A. must not have been prohibited by CAA. Upon receipt of the full notification, CAA shall appraise the suitability of the acquirer (here: the Bidder) and the financial soundness of the proposed acquisition against criteria provided by law. The normal 60-business day maximum assessment period may be extended up to 92 business days in certain circumstances. CAA may refuse the proposed acquisition only if any of the reasons justifying a prohibition provided for by law, such as any unreliability of the acquirer's managing directors, exists.

On February 15, 2011, the Bidder transmitted to CAA a preliminary notification of the intended acquisition of a substantial (indirect) interest in Risk Transfer Re S.A. The relevant documents to be submitted for a full notification are currently being compiled in coordination with the CAA. Since the assessment period will not start before all required documents have been filed and it is up to CAA to decide when such notification will be deemed to be complete, it is currently not possible to predict if the assessment period will expire prior to the end of the offer period or if CAA will issue a corresponding declaration of non-objection within such period.

(vi) The Netherlands

(a) Declaration of non-objection from the Dutch Minister of Finance (with the advice from the AFM) to Holdco allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V.;

According to Section 5:32d of the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) no party may, except after first obtaining a declaration of non-objection from the Dutch Minister of Finance, own, acquire or increase a qualifying holding or exercise any control attached to a qualifying participation in an entity that operates or manages a regulated market licensed pursuant to the Dutch Financial Supervision Act. For purposes of this provision, a qualifying participation shall mean a direct or indirect participation which represents 10 % or more of the capital or of the voting rights or which makes it possible to exercise a similar influence over the management of the relevant company.

The intended indirect acquisition by Holdco of the shares in Euronext Amsterdam N.V. and NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. requires such a declaration of non-objection from the Dutch Minister of Finance. Obtaining a declaration of non-objection could take up to 13 weeks (from the time the application is deemed complete). Section 5:32d of the Dutch Financial Supervision Act contains the grounds for refusal of such a declaration of non-objection.

In addition, the Policy of the Minister of Finance with respect to applications and issuance of declarations of non-objection for qualifying participations in an entity that operates or manages a regulated market (*Beleidslijn verklaringen van geen bezwaar gereglementeerde markten*) elaborates upon the procedure for obtaining such a declaration of non-objection and also contains certain elements that could be considered during an application process. The Policy referred to in the preceding sentence contains a separate paragraph Euronext which provides that the joint policy of the College of Euronext Regulators with respect to the shareholder structure included in the Memorandum of Understanding dated June 24, 2010 shall be developed and adhered to.

Table of Contents

On April 13, 2011, the Bidder submitted its application for the requisite declaration of non-objection to the Dutch Minister of Finance, with a copy to the AFM. Prior to that, two meetings have been held with the representatives of the Ministry of Finance and the AFM in order to discuss the proposed combination. As of the date hereof, the Minister of Finance has given a preliminary response requesting additional information for the purpose of reviewing the application.

- (b) Notification of the Combination and confirmation, reissuance, renewal or amendment of the existing declarations of non-objection issued to NYSE Euronext, NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. by the Dutch Minister of Finance (with advice from the AFM) or by the AFM on behalf of the Dutch Minister of Finance, as applicable, if so required by the Minister or the AFM, in each case allowing the relevant entity to acquire or hold, indirectly or directly, as the case may be, the shares in Euronext Amsterdam N.V.;

Under the existing declarations of non-objection issued to NYSE Euronext and NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Sections 5:32d or 3:95(1)(c) of the Dutch Financial Supervision Act, in each case allowing the relevant entity to, directly or indirectly, acquire or hold the shares of Euronext Amsterdam N.V., the proposed combination shall be notified to the Dutch Minister of Finance and the AFM and the Dutch Minister of Finance and the AFM have to confirm, reissue, renew or amend such declarations of non-objection, if so required by the Minister or the AFM. No specific waiting periods apply.

In the absence of any action by the Minister of Finance or the AFM to the contrary following notification, the existing declarations of non-objection shall remain in force.

The respective notification is intended to be made before long. As of the date hereof, two meetings have been held with representatives of the Ministry of Finance and the AFM in order to discuss the proposed combination.

- (c) Notification to and review and approval by the Dutch Minister of Finance and the AFM of the proposed combination and confirmation, renewal, reissuance or amendment of the existing exchange license granted to Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Sections 5:26 and 2:96 of the Dutch Financial Supervision Act, if so required by the Minister of Finance or the AFM;

The AFM will have to decide within six weeks, but this is a non-fatal term and can be extended.

In the absence of any action by the Minister of Finance or the AFM to the contrary following notification, the existing exchange license shall remain in force.

The respective notification will be made before long. As of the date hereof, two meetings have been held with representatives of the Ministry of Finance and the AFM in order to discuss the proposed combination.

- (d) Declaration of non-objection from the Dutch Central Bank (*De Nederlandsche Bank*, **DNB**) for Holdco allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. or notification by the DNB that such declaration of non-objection is not required.

According to Section 3:95(1)(c) of the Dutch Financial Supervision Act no party may, except after first obtaining a declaration of non-objection from DNB, own, acquire or increase a qualifying holding or exercise any control attached to a qualifying holding in an investment firm (beleggingsonderneming). As a matter of Dutch law, a regulated market operating a multilateral trading facility (**MTF**) qualifies and is regulated as an investment firm. For the

Table of Contents

purposes of Section 3:95(1)(c) of the Dutch Financial Supervision Act, a qualifying holding shall mean a direct or indirect participation which represents 10% or more of the capital or of the voting rights or which makes it possible to exercise a similar influence over the management of the relevant company.

Euronext Amsterdam operates two MTFs, and Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. are licensed to operate an MTF. The intended indirect acquisition by Holdco of the shares in Euronext Amsterdam N.V. and NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. requires a declaration of non-objection from DNB. Obtaining a declaration of non-objection could take up to 13 weeks (from the time the application is deemed complete). Section 3:100 of the Dutch Financial Supervision Act contains the grounds for refusal of such a declaration of non-objection.

The application for a declaration of non-objection is expected to be submitted shortly. Prior to the date hereof, a meeting has been held with representatives of the DNB to discuss the proposed Combination.

(vii) Portugal

(a) Explicit approval by the Portuguese Minister of Finance of the change of ownership and control of Euronext Lisbon Sociedade Gestora de Mercados Regulamentados, S.A. (**Euronext Lisbon**) upon favourable opinion by the CMVM; Pursuant to Decree-law n°375-C/2007 of October 31, 2007, every acquisition of more than 50% of the voting rights of Euronext Lisbon must be authorized by the Portuguese Minister of Finance, upon receiving an opinion from the CMVM. The authorization must be provided prior to the consummation of the change of ownership and control.

The Portuguese Minister of Finance shall render a decision within the two months following receipt of the request for authorization and the CMVM shall provide an opinion within one month following receipt of the request. However, if the Portuguese Minister of Finance or the CMVM request additional information said deadline periods shall commence on the day the required information is received.

Explicit approval is required and therefore, failure to obtain the requisite approval within the statutory waiting period shall constitute a refusal of the Portuguese Minister of Finance to approve the change of ownership and control of Euronext Lisbon.

On April 4 and 6, 2011, meetings were held with the CMVM in order to discuss the combination. On April 13, 2011, Holdco filed a letter of notice with the Portuguese Minister of Finance. Subsequently, Holdco has not received any letter requesting information. The timing of the further process is yet unknown.

(b) The CMVM shall be notified of the of change of ownership and control in Euronext Lisbon and has either not prohibited such change of control within the time period available to it or has issued a declaration of non-objection to such change of control, each pursuant to Decree-law n°357-C/2007 of October 31, 2007; Pursuant to Decree-law n° 357-C/2007 of October 31, 2007 (as amended by Decree-law n° 52/2010 of May 26, 2010, entities wishing to acquire a relevant shareholding (*i.e.*, a direct or indirect shareholding of more than 10% or otherwise implying the chance to exercise a significant influence in the relevant company's management) in Euronext Lisbon shall previously notify the intended acquisition to the CMVM and the CMVM shall have declared that it does not oppose to such shareholding. The relevant notifications need to be provided

Table of Contents

prior to the consummation of the change of ownership and control. The CMVM shall issue its decision within 30 business days (which period may be extended in the event that any additional information is requested).

However, if the CMVM has not prohibited the change of ownership and control within the statutory appraisal period, this shall be deemed a non-objection by the CMVM to the change of ownership and control of Euronext Lisbon and no explicit approval shall be required.

On April 4 and 6, 2011, meetings were held with the CMVM in order to discuss the combination. On April 13, 2011, Holdco filed a letter of notice with the CMVM. Subsequently, Holdco has not received any letter requesting information. The timing of the further process is yet unknown.

- (c) The CMVM shall be notified of the change of ownership and control in Interbolsa Sociedade Gestora de Sistemas de Liquidação e de Sistemas Centralizados de Valores Mobiliários S.A. (**Interbolsa**) and has either not prohibited such change of control within the time period available to it or has issued a declaration of non-objection to such change of control, each pursuant to Decree-law n°357-C/2007 of October 31, 2007;

Pursuant to Decree-law n° 357-C/2007 of October 31, 2007 (as amended by Decree-law n° 52/2010 of May 26, 2010, entities wishing to acquire a relevant shareholding (*i.e.*, a direct or indirect shareholding of more than 10% or otherwise implying the chance to exercise a significant influence in the relevant company's management) in Interbolsa shall previously notify the intended acquisition to the CMVM and the CMVM shall have declared that it does not oppose to such shareholding. The relevant notifications need to be provided prior to the consummation of the change of ownership and control. The CMVM shall issue its decision within 30 business days (which period may be extended in the event that any additional information is requested).

However, if the CMVM has not prohibited the change of ownership and control within the statutory appraisal period, this shall be deemed a non-objection by the CMVM to the change of ownership and control of Interbolsa and no explicit approval shall be required.

On April 4 and 6, 2011, meetings were held with the CMVM in order to discuss the combination. On April 13, 2011, Holdco filed a letter of notice with the CMVM. Subsequently, Holdco has not received any letter requesting information. The timing of the further process is yet unknown.

(viii) Spain

In connection with the combination, no regulatory approval proceedings are required in Spain. The change of control at Infobolsa S.A., Link-Up Capital Markets S.L. and Open Finance S.L. will only require a notification to the General Directorate of Commercial Policy and Foreign Investment. Such notification must be effected following completion of the exchange offer.

(ix) Switzerland

In connection with the combination, no regulatory approval proceedings are required in Switzerland. The change of control at Eurex Zürich AG and Scoach Schweiz AG will only require a notification to the Swiss Financial Market Supervisory Authority (**FINMA**). Such notification must be effected following completion of the exchange offer.

(x) United Kingdom

- (a) Approval by the FSA in respect of the change of ownership and control of LIFFE Administration and Management (a private unlimited company);

Table of Contents

Pursuant to Chapter 1A of Part XVIII of the Financial Services and Markets Act 2000, notification must be made to the FSA by any person intending to acquire control over LIFFE Administration and Management (the exchange itself is also under a duty to notify pursuant to Sections REC 2.4.1 and 2.4.4 of the Recognised Investment Exchange and Recognised Clearing House Sourcebook (**REC**) of the FSA Handbook). The FSA must decide within three months from the receipt of the application whether to approve or object to the change of control.

On April 13, 2011, Holdco has filed a respective notification with the FSA. The Exchange itself notified the FSA of Holdco's proposed acquisition on April 14, 2011. The FSA has not yet responded to the application.

- (b) Approval by the FSA in respect of the change of ownership and control of LIFFE Services Limited, Secfinex Limited, Smartpool Trading Limited and Fix City Limited;

Pursuant to Part XII of the Financial Services and Markets Act 2000 and Section SUP 11.3.4 R of the Regulatory Processes – Supervision Manual (**SUP**) of the FSA Handbook, any intended change of control in respect of LIFFE Services Limited, Secfinex Limited, Smartpool Trading Limited and Fix City Limited must be filed with the FSA. The firms themselves are also under a duty to notify pursuant to SUP 11.4.7 R. to the FSA. has 60 days to approve or object to the change of control.

On April 15, 2011, the Bidder has filed the respective notification with the FSA. The firms themselves jointly notified the FSA on April 14, 2011. The FSA has not yet responded to the application.

13.2.3 Other Countries

In addition, it is expected that a number of regulatory approvals in other countries will be solicited and a number of regulatory notifications will be made in connection with the combination. To the extent any legal decision periods apply to such approval proceedings, such periods will be started only through the filing of complete documents as a rule. The assessment of whether the documents filed are complete is regularly at the discretion of the relevant authority granting the approval in this context. Against this background, it is currently impossible to predict the duration of the approval proceedings. The abovementioned approvals and notifications include, inter alia, the following:

- (i) India

In connection with the combination, no regulatory approval proceedings are required in India. The change of control at Bombay Stock Exchange will only require a notification to the Foreign Investment Promotion Board (**FIPB**). Such notification must be effected following completion of the exchange offer.

- (ii) Singapore

In connection with the combination, no regulatory approval proceedings are required in Singapore. The change of control at Clearstream Banking S.A. and Eurex Frankfurt AG will only require a notification to the Monetary Authority. Such notification must be effected following completion of the exchange offer.

13.3 Registration Statement

13.3.1 Status of Proceedings

The Registration Statement is necessary with regard to the shares to be issued in the exchange offer and the merger. It is requisite, inter alia, for the issuance of shares in the exchange offer and the merger, that the Registration Statement has been declared effective by the SEC.

Table of Contents

A draft of the Registration Statement was confidentially filed with the SEC on March 15, 2011 on Form F-4 and a revised version of the Registration Statement was publicly filed with the SEC of April 7, 2011. On April 8, 2011, the Bidder has received first comments from the SEC. On April 25, 2011, the Bidder has submitted a revised version to the SEC. The Bidder expects that SEC will have further comments. As soon as the SEC is convinced that the Bidder has taken account of all its comments, it will declare the Registration Statement effective.

The Bidder currently expects that the proceedings will be terminated in May 2011. The exchange offer may begin prior to the termination of this proceedings as a so-called Early Commencement (see section 13.3.3).

13.3.2 Stop order

If, according to the opinion of the SEC, the registration statement which has been declared effective, contains untrue information or omits to state essential information, the SEC may, upon respective hearing of the Bidder, issue a so-called stop order in respect of the registration statement pursuant to Section 8(d) of the Securities Act which would inhibit the validity of the registration statement. In this case, the Bidder would not be authorized to issue the shares to be issued in the exchange offer and the merger. However, if the Bidder revises the registration statement according to the requirements of the stop order, the SEC will override the stop order if it takes the view that the reasons for the issuance of the stop order do not exist anymore. In practice, stop orders are relatively rare as the SEC expresses potential objections against the registration statement within its review process and therefore, the Bidder can take these into account beforehand.

13.3.3 Early Commencement

In the United States, the exchange offer may continue before the registration statement has been declared valid in a so-called early commencement .

In this case, it is generally sufficient pursuant to Rule 14(d)-4(b) of the U.S. Securities Act of 1933 if the Registration Statement has been declared effective prior to the consummation of the exchange offer. However, in the case at hand, the registration statement must have been declared effective at the latest 30 days prior to the extraordinary shareholder meeting of NYSE Euronext which decides about the merger as a result of interfering regulations within the law of the United States. Currently, this extraordinary shareholder meeting is intended to take place on July 7, 2011. In each case, it will take place prior to the expiration of the acceptance period. In the case of an extension of the acceptance period pursuant to statutory law (see section 5.3), the date may also be at a later time.

According to Rule 162(a) of the Securities Act, the shareholders must be granted withdrawal rights until the end of the acceptance period in the case of an early commencement. Furthermore, pursuant to Rule 14-4(d) of the Securities Act, it is necessary that (i) if a material change occurs in the information given to the shareholders, this changed is noticed to the shareholders, and (ii) at least five business days lie between this notice and the end of the acceptance period or the day on which existing withdrawal rights cease to exist. In case that the material change occurs in respect of price-relevant information, the extent of the consideration, costs related to the acceptance of the exchange offer or if an amendment to the prospectus as part of an amendment of the F-4 is sent to the shareholders, this time period will be extended to ten business days. If the former prospectus has been materially deficient, the requisite time period between the notice to the shareholders and the end of the acceptance period or the day on which existing withdrawal rights cease to exist is 20 business days.

The Bidder intends to file the English translation of this exchange offer document with the SEC by May 4, 2011 at the latest.

13.4 IRS Ruling

The consummation of the exchange offer is also subject to NYSE Euronext receiving one or more so-called private letter rulings of the U.S. Internal Revenue Service (IRS) to the effect that the exchange of NYSE

Table of Contents

Euronext shares for Holdco shares in the course of the merger by U.S. persons will be treated tax-neutral pursuant to U.S. income tax law. As approximately 40% of the Deutsche Börse shares are held by U.S. shareholders, it is furthermore a condition to the consummation of the exchange offer that Deutsche Börse has received a private letter ruling of the IRS to the effect that the exchange of Deutsche Börse shares for Holdco shares within the exchange offer will be treated tax-neutral pursuant to U.S. income tax law.

A private letter ruling is a written declaration provided by an IRS Associate Chief Counsel as competent division in the U.S. tax authority as answer to the written request of a tax payer, e.g. regarding the tax consequences of his behaviour or of business transactions he has made.

The first step of the proceedings of a private letter ruling is that the tax payer prepares a memorandum with respect to the technical aspects that are affected by the transaction and the private letter ruling that the tax payer intends to apply for. This is followed by a meeting with representatives of the IRS in order to discuss these aspects as well as the question whether the issuance of a private letter ruling is possible in the respective case. NYSE Euronext and Deutsche Börse have filed such a memorandum with the IRS on February 19, 2011. First discussions with the IRS were held in the week of February 21, 2011. If the IRS is willing to issue the requested private letter ruling, the tax payer has to file a formal written application. In the case at hand, a respective application was filed on April 12, 2011.

As soon as an application is received by the IRS, the IRS will contact the tax payer and his representatives, respectively, within 21 calendar days. However, this contact is generally limited to questions of the procedure. If the IRS deems the application not complete regarding the requisite information, it will inform the tax payer that the application will be rejected if the IRS will not receive the requested information within 21 calendar days from the request or a prolongation of the time period.

At the end of the proceedings, the IRS may, for purposes of expediting the procedure, request that the tax payer files a draft of the private letter ruling. Typically, such a draft is subject to a further coordination between the IRS and the tax payer before the private letter ruling is finally issued. In the light of this, in the case at hand, it is difficult to predict the exact time period that is required in order to receive a private letter ruling.

13.5 Permission to publish this exchange offer document

On May 2, 2011, BaFin permitted the publication of this exchange offer document by the Bidder.

14 Prerequisites for completion of the exchange offer

14.1 Completion conditions

This exchange offer and the agreements which come into existence as a result of accepting the exchange offer will only be completed if the following conditions (the **completion conditions**) are satisfied, see also section 13.3):

(a) Minimum Condition

The sum of the total number of Deutsche Börse shares in relation to which the exchange offer has been accepted and withdrawal has not been validly declared and the total number of Deutsche Börse shares that the Bidder already holds or has acquired, equals at least 75% of the sum of Deutsche Börse shares issued as of the end of the offer acceptance period and the number of total future Deutsche Börse option shares.

(b) Competition Approvals

- (i)** On or prior to March 31, 2012, the EU Commission has, or is deemed to have, cleared the combination pursuant to the EC Merger Regulation.

Edgar Filing: NYSE Euronext - Form 425

- (ii) On or prior to March 31, 2012, any waiting period including any extension thereof, applicable to the combination pursuant to the HSR Act shall have expired or been terminated with the consequence that the combination may be consummated.

Table of Contents

(c) Effectiveness of the registration statement

The registration statement regarding the Holdco shares to be issued to the Bidder in the context of the exchange offer and the merger

- (i) shall have been declared effective by the SEC prior to the end of the offer acceptance period and
- (ii) at the time of the expiration of the acceptance period shall not be subject of any stop order by the SEC pursuant to Section 8(d) of the Securities Act or any proceeding initiated by the SEC seeking such a stop order.

(d) NYSE Euronext requisite vote

Prior to the end of the offer acceptance period, the NYSE Euronext requisite vote shall have been obtained.

(e) Governmental and Judicial Proceedings

At the time of the expiration of the acceptance period, neither any governmental entity nor legislative body nor court in

- (i) the United States,
- (ii) Germany,
- (iii) the Netherlands,
- (iv) France,
- (v) the United Kingdom,
- (vi) Portugal,
- (vii) Belgium,
- (viii) Switzerland or

- (ix) Luxembourg,

shall have enacted any legislation, regulation, administrative act or injunction which is in force at the aforementioned time and would prohibit or make illegal the combination or the acquisition or ownership of the Deutsche Börse shares or of the NYSE Euronext shares by the Bidder.

Edgar Filing: NYSE Euronext - Form 425

(f) Other Approvals

On or prior to March 31, 2012, the following approvals have been obtained:

- (i) The SEC shall have approved the application under Rule 19b-4 of the Exchange Act submitted by NYSE Euronext and/or its subsidiaries and by Deutsche Börse and/or its subsidiaries with respect to the combination;
- (ii) the Dutch Minister of Finance shall have (upon recommendation of the AFM) issued a declaration of non-objection to the Bidder in connection with the combination pursuant to Section 5:32d of the Dutch Financial Supervision Act allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V.;
- (iii) the Dutch Minister of Finance (with advice from the AFM) or the AFM on behalf of the Dutch Minister of Finance, as applicable, shall have confirmed, reissued, renewed or amended, if so required by the Minister of Finance or the AFM, the existing declaration of non-objection issued to NYSE Euronext, NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Section 5:32d of the Dutch Financial Supervision Act, in each case allowing the relevant entity to acquire or hold,

Table of Contents

indirectly or directly, as the case may be, the shares of Euronext Amsterdam N.V., or the Dutch Minister of Finance and the AFM shall not have indicated that any such confirmation, reissuance, renewal or amendment is required;

- (iv) the Dutch Minister of Finance and the AFM shall have reviewed and approved the combination, and confirmed, reissued, renewed or amended, if so required by the Dutch Minister of Finance or the AFM, the existing exchange license granted to Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Sections 5:26 and 2:96 of the Dutch Financial Supervision Act, or the Dutch Minister of Finance and the AFM shall not have indicated that any such confirmation, reissuance, renewal or amendment is required;
- (v) the DNB shall have issued a declaration of non-objection to Holdco pursuant to Section 3:95(1)(c) of the Dutch Financial Supervision Act allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. in their capacity as licensed operators of multilateral trading facilities, or the DNB shall have indicated that such declaration of non-objection is not required;
- (vi) the College of Euronext Regulators shall have issued a declaration of non-objection to the combination facilities, pursuant to the memorandum of understanding as of June 24, 2010;
- (vii) the Hessian Exchange Supervisory Authority did not prohibit the intended indirect acquisition of a significant participation in Deutsche Börse, Scoach Europa AG and Eurex Frankfurt AG within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, (*Börsengesetz*) or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
- (viii) the Saxonian Exchange Supervisory Authority did not prohibit the intended indirect acquisition of a significant participation in European Energy Exchange AG and EEX Power Derivatives GmbH within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
- (ix) the Berlin Exchange Supervisory Authority did not prohibit the intended indirect acquisition of a significant participation in Tradegate Exchange GmbH within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
- (x) the BaFin did not prohibit the intended indirect acquisition of a significant participation in European Commodity Clearing AG, Eurex Clearing AG, Eurex Repo GmbH, Eurex Bonds GmbH and Clearstream Banking AG within the period available to it pursuant to Section 2c of the German Banking Act, or it issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
- (xi) the ACP shall have granted the approval required pursuant to French Regulation 96-16 of the CRBF relating to the change of ownership and control of Euronext Paris S.A. in its capacity as credit institution;
- (xii) the French Minister of the Economy shall have granted, upon advice of the AMF, the approval required pursuant to Article L. 421-9 II of the French Monetary and Financial Code relating to the change of ownership and control of Euronext Paris SA and BlueNext SA in their capacity as regulated market operators;

- (xiii) the FSA shall have granted its approval in respect of the change of ownership and control of LIFFE Administration and Management pursuant to Chapter 1A of Part XVIII of the Financial Services and Markets Act 2000;

Table of Contents

- (xiv) the FSA shall have granted its approval in respect of the change of ownership and control of LIFFE Services Limited, Secfinex Limited, Smartpool Trading Limited and Fix City Limited pursuant to Part XII of the Financial Services and Markets Act 2000 and Section SUP 11.3.4 R of the Regulatory Processes – Supervision Manual of the FSA Handbook;
- (xv) the FSMA shall not have prohibited the intended change of ownership and control of Euronext Brussels S.A./N.V. within the thirty days period available to it pursuant to Article 19 of the Belgian Law of August 2, 2002, or it shall have issued a corresponding declaration of non-objection in respect of such intended change of ownership and control of Euronext Brussels SA/NV within this period;
- (xvi) Euronext Brussels S.A./N.V. shall have received a confirmation by the Belgian Ministry of Finance regarding the preservation of its status as regulated market and as licensed market pursuant to Articles 3, 17 and 18 of the Belgian Law of August 2, 2002, or in the absence of such confirmation, Euronext Brussels S.A./N.V. shall not have received any notification by the Belgian Ministry of Finance to the contrary;
- (xvii) the Portuguese Minister of Finance shall have explicitly approved of the change of ownership and control of Euronext Lisbon S.A. upon a positive legal opinion of the CMVM pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;
- (xviii) the CMVM shall be notified of the change of ownership and control of Euronext Lisbon and has either not prohibited such change of control within the period available to it or has issued a declaration of non-objection to such change of control each pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;
- (xix) The CMVM shall be notified of the change of ownership and control of Interbolsa and has either not prohibited such change of control within the period available to it or has issued a declaration of non-objection to such change of control each pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;
- (xx) CFIUS shall have granted written notice that the review of the combination under Section 721 of the U.S. Defense Protection Act of 1950 has been concluded and CFIUS shall have determined that there are no unresolved national security concerns sufficient to warrant a recommendation that the U.S. President block the exchange offer and/or the merger under such Section 721 of the U.S. Defense Protection Act of 1950 and advised that action under such Section 721 has been concluded with respect to the combination.
- (xxi) the CSSF did not prohibit the intended indirect acquisition of Clearstream Banking S.A., Clearstream International S.A. and Clearstream Services S.A. within the statutory period available to it pursuant to Articles 6 (5), 6 (16), 18 (5) and 18 (17) of the Luxembourg Financial Sector Act of April 5, 1993, or it issued corresponding declarations of non-objection with regard to the acquisition within this period;
- (xxii) the CAA did not prohibit the intended indirect acquisition of Risk Transfer Re S.A. within the statutory period available to it pursuant to Articles 94 I (4) and 94 I (15) of the Luxembourg Insurance Act of December 6, 1991, or it issued a corresponding declaration of non-objection with regard to the acquisition within this period.

(g) No Material Adverse Market Change

During the time between the publication of the exchange offer document and the end of the offer acceptance period, there shall not have occurred a suspension of the currency trading or debt markets in

(i) Frankfurt am Main, Federal Republic of Germany, and London, Great Britain, or

(ii) the City of New York, New York, USA
for more than three consecutive trading days.

Table of Contents

(h) No offer material adverse effect relating to NYSE Euronext

During the time between the publication of the exchange offer document and the end of the offer acceptance period, there shall not have occurred an offer material adverse effect relating to NYSE Euronext (**the offer material adverse effect in relation to NYSE Euronext**).

An offer material adverse effect relating to NYSE Euronext is the occurrence of a circumstance or circumstances relating to NYSE Euronext, that, according to the assessment of an independent expert, has or have resulted in, or would reasonably be expected to result in, individually or in the aggregate, a decrease in the consolidated net revenues of NYSE Euronext of at least US\$ 300,000,000 in the 2011 financial year and/or 2012 financial year of NYSE Euronext, to the extent the decrease is recurrent. Consolidated net revenues of NYSE Euronext are the total revenues less transaction-based expenses pursuant to the consolidated financial statement 2010.

An offer material adverse effect relating to NYSE Euronext will only be deemed to have occurred if, on or before the day before the publication of the results of the exchange offer pursuant to Section 23 para. 1 sentence 1 no. 2 German Takeover Act, an independent expert from Deloitte & Touche GmbH Wirtschaftsprüfungsgesellschaft (the **independent expert**), using the due and careful consideration of a diligent professional, has delivered an opinion that an offer material adverse effect has occurred. Upon request of the Bidder the independent expert will undertake an evaluation of whether an offer material adverse effect relating to NYSE Euronext has occurred . The independent expert shall further carry out his evaluation without undue delay. The opinion of the independent expert is binding on and non-appealable by the Bidder and Deutsche Börse shareholders and will be published by the Bidder without undue delay in the electronic Federal Gazette (*elektronischer Bundesanzeiger*), the *Frankfurter Allgemeine Zeitung* and *The Wall Street Journal* (US edition) with reference to the exchange offer.

(i) No offer material adverse effect relating to Deutsche Börse

During the time between the publication of the exchange offer document and the end of the offer acceptance period, there shall not have occurred an offer material adverse effect relating to Deutsche Börse (**the offer material adverse effect relating to Deutsche Börse**).

An offer material adverse effect relating to Deutsche Börse is the occurrence of a circumstance or circumstances relating to Deutsche Börse, that, according to the assessment of the independent expert, has or have resulted in, or would reasonably be expected to result in, individually or in the aggregate, a decrease in the consolidated net revenues of Deutsche Börse, of at least US\$ 300,000,000 in the 2011 financial year and/or 2012 financial year of Deutsche Börse, to the extent the decrease is recurrent. Consolidated net revenues of Deutsche Börse are the total revenues less volume-related costs pursuant to the consolidated financial statement 2010.

An offer material adverse relating to Deutsche Börse effect will only be deemed to have occurred if, on or before the day before the publication of the results of the exchange offer pursuant to Section 23 para. 1 sentence 1 no. 2 German Takeover Act, the independent expert, using the due and careful consideration of a diligent professional, has delivered an opinion that an offer material adverse effect relating to Deutsche Börse has occurred. Upon request of the Bidder the independent expert will undertake an evaluation of whether an offer material adverse effect relating to Deutsche Börse has occurred. The independent expert shall further carry out his evaluation without undue delay. The opinion of the independent expert is binding on and non-appealable by the Bidder and Deutsche Börse shareholders and will be published by the Bidder without undue delay in the electronic Federal Gazette (*elektronischer Bundesanzeiger*), the *Frankfurter Allgemeine Zeitung* and *The Wall Street Journal* (US edition) with reference to the exchange offer.

Table of Contents

(j) IRS Ruling or Rulings vis-à-vis NYSE Euronext

On or prior to the end of the offer acceptance period, NYSE Euronext shall have received one or more private letter rulings from the U.S. Internal Revenue Service (IRS) substantially to the effect that

- (i) the merger will qualify as a reorganization within the meaning of Section 368(a) of the U.S. Internal Revenue Code and/or the merger and the exchange offer, taken together, will qualify as an exchange within the meaning of Section 351(a) of the U.S. Internal Revenue Code; and
- (ii) (A) the transfer of NYSE Euronext shares by U.S. persons for shares of the Bidder will qualify for an exception to Section 367(a)(1) of the U.S. Internal Revenue Code under U.S. Treasury Regulation Sections 1.367(a)-3(c)(1) and 1.367(a)-3(c)(9), and (B) any U.S. person transferring NYSE Euronext shares to the Bidder who is a 5% transferee shareholder of NYSE Euronext (within the meaning of U.S. Treasury Regulation Section 1.367(a)-3(c)(5)(ii)) will qualify for the exception to Section 367(a)(1) of the U.S. Internal Revenue Code only upon entering a five-year gain recognition agreement pursuant to U.S. Treasury Regulation Section 1.367(a)-8.

(k) IRS-Ruling vis-à-vis Deutsche Börse

On or prior to the end of the offer acceptance period, Deutsche Börse shall have received a private letter ruling from the IRS substantially to the effect that the exchange offer will qualify as a transaction described in Section 351 (a) of the U.S. Internal Revenue Code and/or the exchange offer and the merger, taken together, will qualify as transaction described in Section 351(a) of the U.S. Internal Revenue Code.

14.2 Waiver of completion conditions

With the exception of the completion condition under lit. (d) which cannot be waived, the Bidder reserves the right to waive in whole or in part one, several or all of the completion conditions up to one working day prior to the end of the offer acceptance period. Completion conditions which the Bidder has validly waived shall be deemed to have been satisfied for the purpose of this exchange offer. For the purposes of Section 21 para. 1 no. 3 and no. 4 German Takeover Act, the publication of the amendment of the exchange offer pursuant to Section 21 para. 2 German Takeover Act in conjunction with Section 14 para. 3 German Takeover Act shall be decisive. In the event of a waiver of completion conditions within the last two weeks prior to the end of the offer acceptance period specified in section 5.1, the offer acceptance period will be extended by two weeks pursuant to Section 21 para. 5 German Takeover Act (presumably until July 27, 2011).

A waiver of a completion condition after the end of the offer acceptance period is not possible.

14.3 Non-satisfaction of completion conditions

If one or more of the completion conditions set out in section 14.1 have not been fulfilled at the latest time possible or the timely fulfillment of one or more completion conditions has become impossible and if, prior to this date, the Bidder has not validly waived the relevant completion conditions pursuant to Section 21 para. 1 sentence 1 no. 4 German Takeover Act, the exchange offer will lapse. In this case, the agreements which came into existence as a result of accepting the exchange offer will not be completed and will cease to exist (condition subsequent). Deutsche Börse shares already tendered shall be re-transferred. Accordingly, the Custodian Banks will have to arrange for the tendered Deutsche Börse shares to be re-booked into ISIN DE0005810055 without undue delay, but in any event within five banking days after the publication of the lapse of the exchange offer. The unwinding (*Rückabwicklung*) is free of costs and expenses of Custodian Banks (please see, however, section 12.7 of the exchange offer document for details).

Table of Contents

14.4 Publications

If (a) a completion condition has been satisfied, (b) a completion condition has been waived, (c) all completion conditions have been satisfied, or (d) the exchange offer will not be completed, the Bidder will publish this fact without undue delay (i) on the internet at <http://www.global-exchange-operator.com> (in German as well as in English language) and (ii) in German language in the electronic Federal Gazette as well as (iii) in English language in the United States via an electronically operated information distribution system.

15 Financing of the exchange offer

15.1 Financing requirements

Currently, 195,000,000 Deutsche Börse shares have been issued. If the exchange offer were accepted by all shareholders of Deutsche Börse, the Bidder would have to deliver 195,000,000 Holdco offer shares in exchange for 195,000,000 Deutsche Börse shares to be acquired on the basis of the exchange ratio of 1 Holdco offer share for 1 Deutsche Börse share.

The Bidder will also have to deliver Holdco offer shares in exchange for any shares which Deutsche Börse may issue at any time after the publication of the exchange offer document until the end of the additional offer acceptance period (for example in case of shares issued in connection with the exercise of stock options).

Assuming that except for the additional Deutsche Börse shares, no further shares will be issued by Deutsche Börse until the end of the additional offer acceptance period, the sum of existing and additional Deutsche Börse shares would therefore result in a maximum of 195,146,864 Holdco offer shares required in the context of the exchange offer (the **maximum consideration amount**).

With respect to the merger, Holdco will in addition issue up to 125,020,000 Holdco shares (see section 6.3.2(i)). Together with the maximum consideration amount this sums up to a total of up to 320,166,864 Holdco shares.

In addition, costs to be paid by the Bidder for the preparation and execution of the exchange offer and the merger will amount to no more than 4 million (the **transaction costs**).

15.2 Financing measures

The Bidder has taken all necessary actions to ensure that the Holdco offer shares necessary for the complete satisfaction of the exchange offer will be available at the time the rights to the offer consideration will become mature. With respect to the capital measures carried out at the bidder, reference is made to section 6.3.2(i) above.

Through these measures the Bidder will be in the position to issue the necessary amount of Holdco offer shares to satisfy both the maximum consideration amount as well as the amount of Holdco shares necessary for the merger.

The Bidder will, prior to the time of delivery of the Holdco offer shares to the shareholders of Deutsche Börse under the exchange offer, apply for admission of its shares, including the Holdco offer shares, to trading on the regulated market segment of the Frankfurt Stock Exchange (*regulierter Markt*) and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard), as well as on the regulated market of Euronext Paris and on the New York Stock Exchange.

The Bidder expects that the Holdco offer shares which the accepting shareholders of Deutsche Börse will receive upon settlement of the exchange offer will have been admitted to trading (listed) at the time of delivery to the shareholders of Deutsche Börse having accepted the exchange offer.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of the Holdco offer shares to the shareholders of Deutsche Börse having accepted the exchange offer.

Table of Contents

In order to finance the transaction costs, Stichting was granted a loan in an amount of 4,000,000 by Deutsche Bank Luxembourg S.A. on March 11, 2011. The proceeds of such loan amount will be on-lent to the bidder by Stichting in accordance with an agreement dated April 29, 2011 by way of a shareholder loan.

16 Expected effects of the completion of the combination on the assets, financial and earnings positions of Holdco

16.1 Basis and assumptions

The financial information contained in sections 16.2 and 16.3 is in particular based on the following current position:

- (i) Holdco has not conducted any material activities other than those incident to its formation and the preparation of the exchange offer and has therefore not generated any revenues or achieved any earnings since its formation until publication of this exchange offer document. Hence, neither audited balance sheets nor profit and loss statements of Holdco are available. For the purposes of showing the effects of the combination on the individual financial statements of Holdco, apart from its audited opening balance sheet, unaudited financial information of Holdco is used;
- (ii) the consideration of the exchange offer consists of 1 Holdco offer share for 1 Deutsche Börse share;
- (iii) currently, there is a total of 195,000,000 Deutsche Börse shares issued; and
- (iv) every shareholder of NYSE Euronext shall receive 0.47 Holdco offer shares for every NYSE Euronext share in the context of the merger.

In addition, the financial information contained in these sections 16.2 and 16.3 is in particular based on the following assumptions:

- (i) The combination has been completed;
- (ii) the exchange offer is accepted by all shareholders of Deutsche Börse;
- (iii) the maximum number of NYSE Euronext shares to be exchanged in Holdco shares upon consummation of the merger is estimated to be approximately 266 million NYSE Euronext shares. This number includes approximately 261.2 million NYSE Euronext shares of common stock issued and outstanding as of February 10, 2011, plus approximately 2.8 million NYSE Euronext shares to be delivered upon vesting of restricted stock units at the time of the merger (but excluding approximately 1.6 million restricted stock units which will vest upon the merger but will be settled in cash rather than shares), plus approximately 1.6 million treasury shares of NYSE Euronext owned by an indirect subsidiary of NYSE Euronext, NYSE Arca Inc., in each case which will be exchanged for Holdco shares in the merger.
- (iv) during the offer acceptance period, in respect of the Deutsche Börse Group share plan 146,864 additional Deutsche Börse shares have been issued and the exchange offer has been accepted with regard to these additional Deutsche Börse shares;
- (v) each Holdco offer share as well as every Holdco share issued with regard to the merger has a nominal value of 1.00 each; and

(vi) the Bidder will incur transaction costs of 4 million which will be provided to Holdco by Stichting by way of a shareholder loan. With respect to the further financial information contained in Section 16.4.2 reference is made to the notes in Section 16.4.2.

Table of Contents**16.2 Expected effects on the balance sheet of Holdco**

The following information describes the expected effects of the completion of the combination on Holdco's opening balance sheet as of February 10, 2011, the day of its formation.

Except for the intended acquisition of Deutsche Börse shares under this exchange offer and NYSE Euronext shares under the merger as well as the loan of Stichting, no other effects on the assets, financial and earnings positions of Holdco, which have occurred since February 10, 2011 or may occur in the future were considered in this section 16.2.

The following table shows the audited opening balance sheet of Holdco as of February 10, 2011. The notes to the opening balance sheet displayed in Annex 2 of the exchange offer document as part of the financial information are an integral part of the balance sheet. Reference is made to such notes.

	EUR
ASSETS	
CURRENT ASSETS	
Cash at bank	
Deutsche Bank AG, Amsterdam, Current account	45,000
	45,000
SHAREHOLDER'S EQUITY AND LIABILITIES	
CAPITAL AND RESERVES	
Issued and paid-up share capital	45,000
Share premium	
Retained earnings	
	45,000

The only effect on assets of the balance sheet of Holdco resulting from the combination is an increase in non-current assets from 0.00 by 17,965 million to 17,965 million while for the assessment of the contributed shares the closing price of the stock of Deutsche Börse of April 29, 2011 at the Frankfurt Stock Exchange (Xetra) of 56.10 per share was adopted. In addition, the transaction costs of 4 million were capitalized as acquisition costs.

On the liabilities and shareholders' equity side, the implementation of the combination leads to an increase of the shareholders' equity from 0.045 million to about 17,961 million. The liabilities are expected to increase from 0.00 to 4 million as a result of the shareholder loan granted by Stichting to Holdco in the amount of 4 million. Since the transaction costs will be capitalized as incidental acquisition costs, they will not have an impact on the results of Holdco.

Table of Contents

The expected implications of the completion of the combination are set forth in following table.

	Holdco opening balance sheet as of February 10, 2011	Expected changes due to the completion of the combination * in Euro	Holdco, adjusted after completion of the combination
ASSETS			
Noncurrent Assets

Noncurrent Liabilities			
Current Liabilities			
		4,000,000	4,000,000
Total Liabilities	45,000	17,965,316,070	17,965,361,070

* Given the connection between the exchange offer and the merger, the expected changes after the completion of the combination have been summarized together.

¹⁾ In connection with the completion of the merger and the exchange offer, a total of approximately 320,166,864 new shares are expected to be issued pursuant to the assumptions set forth in section 16.1, and the 45,000 Class D shares of Holdco that were issued at the time of the incorporation will be cancelled.

²⁾ Taking into account the cancelled 45,000 Class D shares of Holdco.

If the loan made by Stichting to Holdco in the amount of 4 million by way of a shareholder loan reaches maturity due to the cancellation of Class D shares and therefore due to the cessation of the Stichting as a shareholder of Holdco, the shareholder loan will be replaced by third-party bank financing on customary terms.

16.3 Expected effects on the result position of Holdco

From the day of its incorporation until the date of publication of this exchange offer document, Holdco has not generated any income. The Bidder expects that the future results of Holdco will in particular derive from the earnings of Deutsche Börse and NYSE Euronext. The amount of such future income is uncertain. For the financial year 2010, NYSE Euronext generated an annual profit of 425 million and Deutsche Börse generated an annual profit of 395 million (as shown in the illustrative Holdco unaudited condensed consolidated income statements in section 16.4.1 below). The Bidder expects that the future results will be in the same range.

For the financial year 2010, NYSE Euronext and Deutsche Börse distributed dividends in the amount of \$313 million and 390.5 million respectively. Based on the expectation that the amounts will also be generated in future business years, it is also expected that the dividend policy of the two corporations remains unchanged after the completion of the combination (at least until effectiveness of a possible

Table of Contents

profit and loss transfer agreement, see section 10.6.1). Taking into account such assumptions and the further circumstance, that 100 % of the shares in Deutsche Börse are held by Holdco, the future income of Holdco would amount to 628 million per year (considering an exchange rate of \$ 1.32 = 1.00 regarding the dividend of NYSE Euronext).

The bidder expects for 2011 that the necessary costs for financing the interest costs will be around 40,000.

16.4 Further illustrative financial information

16.4.1 Illustrative Holdco unaudited condensed consolidated financial information

The following illustrative unaudited condensed consolidated financial information of Holdco are intended to illustrate the effect of the proposed combination of Deutsche Börse group and NYSE Euronext. Under the terms of the business combination agreement, the participation in Deutsche Börse's business will be brought under Holdco by way of the exchange offer, and the interest in NYSE Euronext's business will be brought under Holdco by way of the merger. The combination will be accounted for as an acquisition of NYSE Euronext by Deutsche Börse under IFRS No. 3 (revised), Business Combinations.

Presented below are the illustrative unaudited condensed consolidated balance sheet of Holdco as of December 31, 2010 and the illustrative unaudited condensed consolidated income statement of Holdco for the year ended December 31, 2010. The illustrative unaudited condensed consolidated income statements of Holdco for the year ended December 31, 2010 has been prepared as though the combination occurred as of January 1, 2010.

Additional assumptions underlying the adjustments for illustrative purposes in this section 16.4 are described in the accompanying notes under section 16.4.2. The illustrative unaudited condensed consolidated financial information of Holdco has been prepared based upon information derived from the following:

- (i) the audited consolidated financial statements of Deutsche Börse Group as of and for the financial year ended December 31, 2010, which have been prepared in accordance with IFRS as adopted by the International Accounting Standards Board (IASB) and included in the financial information in Annex 2; and
- (ii) the audited consolidated financial statements of NYSE Euronext as of and for the year ended December 31, 2010, which have been prepared in accordance with US GAAP and are included in pages F-10 et seq. of Annex 2. These consolidated financial statements have been adjusted to IFRS and translated into euros for purposes of presentation in the illustrative Holdco unaudited condensed consolidated financial information.

The estimated purchase price for the acquisition of NYSE Euronext is approximately 7,000 million based on the per share merger consideration of 0.47 Holdco shares for each NYSE Euronext share outstanding at the time of the completion of the combination, with each Holdco share deemed to have the same value as a Deutsche Börse share (corresponding to the closing share price of Deutsche Börse on the Frankfurt Stock Exchange on April 29, 2011). The actual purchase price will be determined at the completion date based on the Deutsche Börse share price and the U.S. dollar/euro exchange rate at that date and accordingly will vary from that used in the preparation of the Holdco illustrative financial information. A 5% increase or decrease in the Deutsche Börse share price from the price of 56.10 per share, which is the price used in preparing the illustrative financial information, would result in an increase or decrease, respectively, in the purchase price of approximately 350 million.

The combination will be accounted for by Holdco using the acquisition method pursuant to IFRS 3 (revised), Business Combinations, with Deutsche Börse as the successor and accounting acquirer. Under the acquisition method, assets and liabilities are recorded at their fair value on the date of purchase and the total purchase price is allocated to the tangible and intangible assets acquired and liabilities assumed. As of the date of the publication of this exchange offer document, the valuation studies necessary to

Table of Contents

finalize the fair values of the assets acquired and liabilities assumed and the related allocation of the purchase price have not been completed. Accordingly, Holdco has allocated the total estimated purchase price, calculated as described in the notes under section 16.4.2. A final determination of these fair values will reflect, among other things, Holdco's consideration of a final valuation based on the actual net tangible and intangible assets, such as customer relationships, developed and core technologies and trade names that exist as of the completion date of the combination. Any final adjustment will change the allocation of the purchase price, which will affect the fair value assigned to the assets and liabilities and could result in a material change to the illustrative unaudited condensed consolidated financial information of Holdco.

The unaudited adjustments for illustrative purposes give effect to events that are directly attributable to the combination and are factually supportable. The illustrative unaudited condensed consolidated financial information of Holdco is presented for information purposes and reflects estimates and assumptions made by the Bidder based on estimates and assumptions of NYSE Euronext's and Deutsche Börse's management that it considers reasonable. It serves the purposes to represent with regard to the described assumptions and the described initial situation what Holdco's actual results of operations or financial condition would have been had the combination occurred on the dates indicated. It is only indicative with regard to Holdco's future results of operations or financial condition. Holdco's illustrative unaudited condensed consolidated financial information does not reflect the effect of anticipated synergies and efficiencies associated with combining Deutsche Börse and NYSE Euronext.

Significant items primarily related to impairment and exit costs deemed significant by virtue of their size or incidence have been separately disclosed to enable a full understanding of the illustrative unaudited condensed consolidated financial performance of Holdco. For a discussion of such items, see Note 6 under section 16.4.2.

In connection with the combination, the plan to integrate the operations of Deutsche Börse and NYSE Euronext is still being developed. The bidder, Deutsche Börse and NYSE Euronext expect to incur approximately 600 million to 800 million (or 1.5 to 2.0 times the anticipated full run-rate cost savings) of pre-tax implementation and restructuring costs associated with combining the operations of Deutsche Börse and NYSE Euronext. In addition, the combined group may incur additional expenses in connection with change-in control provisions included in certain employment agreements or other contracts. However, based on current assumptions, the bidder cannot predict which contracts may be subject to such triggers and the bidder is unable to quantify the related charges, if any. Material non-recurring profits and losses that result directly from the combination have not been included in the unaudited pro forma condensed consolidated statement of income.

The illustrative unaudited condensed consolidated financial information of Holdco should be read in conjunction with the information contained in the sections "Selected Historical Financial Information of NYSE Euronext", "Selected Historical Financial Information of Deutsche Börse Group", "Management's Discussion and Analysis of Financial Condition and Results of Operations of NYSE Euronext" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of Deutsche Börse Group" of Annex 2 and the consolidated financial statements of Deutsche Börse and NYSE Euronext also contained in Annex 2.

* Includes the impact of adjustments to NYSE Euronext to conform to Holdco's accounting and evaluation policies. See note 2 under section 16.4.2.

The accompanying notes under section 16.4.2 are an integral part of the illustrative unaudited condensed consolidated balance sheet.

Table of Contents

16.4.2 Notes to the illustrative unaudited condensed financial information set out under section 16.4.1

(i) Note 1 Basis of presentation

The illustrative Holdco unaudited financial information presents the condensed consolidated financial statements giving effect to the combination of Deutsche Börse Group and NYSE Euronext under Holdco in a transaction to be accounted for as a purchase business combination, with Deutsche Börse Group treated as the legal and accounting acquirer and as if the combination was completed on January 1, 2010.

The Holdco unaudited pro forma condensed consolidated financial statements have been prepared on a basis consistent in all material respects with the accounting policies of Holdco in accordance with IFRS as issued by the IASB.

The NYSE Euronext pre-acquisition income statement and balance sheet used in the preparation of the illustrative unaudited financial information differ from the NYSE Euronext historical financial statements included on pages F-10 et seq. of Annex 2 of this document because the pre-acquisition income statement and balance sheet used in the preparation of the illustrative unaudited group financial information have been prepared on a basis consistent in all material respects with the accounting policies of Holdco in accordance with IFRS. The NYSE Euronext historical financial statements included on pages F-10 et seq. of Annex 2 of this document have been prepared in accordance with US GAAP.

The balance sheet of NYSE Euronext has been translated using an exchange rate of \$ 1.33 = 1.0 corresponding to the spot rate as of December 31, 2010. The income statement of NYSE Euronext has been translated using an average exchange rate of \$ 1.32 = 1.0 which represents the average exchange rate applied within Deutsche Börse Group in the financial year 2010. This average exchange rate was computed using the average of prevailing exchange rates as of each quarter end during fiscal year 2010.

The purchase price for NYSE Euronext has been allocated to the assets acquired and the liabilities assumed based on NYSE Euronext management's preliminary estimate of their respective fair values as of the date of combination. Definitive allocations will be performed when estimates are finalized. Accordingly, the purchase price allocation adjustments for illustrative purposes are preliminary, have been made solely for the purpose of providing illustrative unaudited condensed consolidated financial information and are subject to revision based on a final determination of fair value after the closing of the business combination.

The accompanying illustrative unaudited condensed consolidated financial information do not include any anticipated cost savings or other effects of the planned integration of the combined companies. The illustrative unaudited condensed consolidated financial information assume that all shareholders of Deutsche Börse tender all their shares to Holdco shares as part of the exchange offer. Accordingly, the amounts shown in Holdco's illustrative unaudited condensed consolidated income statement are not necessarily indicative of the results of operations that would have resulted if the combination had occurred on January 1, 2010 or that may result in the future.

The illustrative unaudited condensed consolidated financial information is presented for illustrative purposes only. Because of its nature, it addresses a hypothetical situation and it can only represent under the described assumptions and the described initial situation how the consolidated results of operations would have been reported had the combination been completed as of the dates described. It is only indicative of the future results, that may actually develop differently than expected. The adjustments for explanatory purposes are based on available information and specific assumptions that the management of Deutsche Börse and NYSE Euronext consider appropriate for the purposes of this exchange offer document.

(ii) Note 2 Presentation of NYSE Euronext financial information

For illustrative purposes, IFRS adjustments were made to the historical information of NYSE Euronext prepared under US GAAP to align with the IFRS accounting policies of Holdco. Such adjustments relate

Table of Contents

primarily to original listing fees and employee benefits. In addition, certain reclassifications have been made to conform the income statement and balance sheet to an IFRS presentation.

The following table illustrates the impact of these adjustments in arriving at NYSE Euronext's income statement for the year ended December 31, 2010, as presented in the Illustrative Holdco Unaudited Pro Forma Condensed Consolidated Income Statement (in millions of euros):

	NYSE Euronext Historical US GAAP {d}	IFRS Adjustment	NYSE Euronext Historical IFRS
Sales revenue	3,336	6{a}	3,342
Net interest income from banking business			
Other operating income	43		43
Total revenues	3,379	6	3,385
Volume related costs	(1,445)		(1,445)
Total revenues less volume-related costs	1,934	6	1,940
Staff costs	(462)	4{b}	(458)
Depreciation, amortization and impairment losses	(233)		(233)
Other operating expenses	(636)		(636)
Operating costs	(1,331)	4	(1,327)
Result from equity investments	(5)		(5)
Earnings before interest and tax (EBIT)	598	10	608
Financial income	2		2
Financial expense	(84)		(84)
Earnings before tax (EBT)	516	10	526
Income tax expense	(97)	(4){c}	(101)
Net profit for the year	419	6	425

{a} To recognize original listing fees and corporate actions revenue in accordance with IFRS. Under IFRS, this revenue is recognized upon listing of an applicant or upon subsequent capital raising or other corporate action. In accordance with US GAAP, NYSE Euronext recognized these revenues over an estimated service period of 5 to 10 years.

{b} To account for the NYSE Euronext defined benefit plans in accordance with IFRS. Upon consummation of the combination, Holdco will account for the NYSE Euronext defined benefit plans following the corridor method described in IAS 19.

{c} To adjust the income tax provision for the effect of the IFRS adjustments based upon a blended statutory tax rate of 35%.

{d} The historical US GAAP results of operations of NYSE Euronext have been translated from US dollars to Euros using the average exchange rate of 1.32 US\$=1.00 which was derived from the prevalent exchange rates as of the end of each quarter in the financial year 2010.

Table of Contents

The following table illustrates the impact of these adjustments in arriving at NYSE Euronext's balance sheet as of December 31, 2010, as presented in the Illustrative Holdco Unaudited Pro Forma Condensed Consolidated Balance Sheet (in millions of euros):

	NYSE Euronext Historical US GAAP {f}	IFRS Adjustment	NYSE Euronext Historical IFRS

Edgar Filing: NYSE Euronext - Form 425

- {a}** To reclass the net book value of purchased and internally developed software to intangible assets.

- {b}** To reverse historical deferred revenue balances of NYSE Euronext and related deferred tax assets because Holdco would not have assumed a legal performance obligation. Such balances correspond to original listing fees which had been deferred over the estimated service period of the listings under US GAAP.

Table of Contents

- {c} To reclass all deferred tax balances to non-current in accordance with the IFRS balance sheet presentation.
- {d} To account for the NYSE Euronext defined benefit plans in accordance with IFRS. Upon consummation of the combination, Holdco will account for the NYSE Euronext defined benefit plans following the corridor method described in IAS 19.
- {e} To record the net impact of the above adjustments to equity.
- {f} The historical US GAAP financial condition of NYSE Euronext has been translated from U.S. dollars to Euros using the spot rate as of December 31, 2010 (1.33US\$=1.00).

(iii) Note 3 Purchase Price of NYSE Euronext

For the purpose of preparing the accompanying illustrative unaudited condensed consolidated financial information, the following assumptions were made:

There were approximately 264.5 million shares of NYSE Euronext outstanding on a fully diluted basis, and

the Deutsche Börse per share price was 56.10 for measurement purposes, and

each share of NYSE Euronext will be converted to 0.47 Holdco shares.

Based on the above assumptions, the total approximate purchase consideration was computed as follows:

Deutsche Börse share price	56.10{a}
Times	264.5 million shares
Times	0.47
Combination consideration	7,000 million

- {a} Corresponding to the closing stock price of Deutsche Börse shares on April 29, 2011. A movement of 5% of Deutsche Börse's share price would have an impact of approximately 350 million, in either direction, on the purchase consideration.

The following is a summary of the preliminary allocation of the total approximate purchase price in the NYSE Euronext acquisition as reflected in the illustrative unaudited condensed consolidated balance sheet (in millions of euros):

Historical equity of NYSE Euronext	5,330
Elimination of NYSE Euronext's historical goodwill and intangible assets	(7,536)
Fair value of identifiable intangible assets:	
National securities exchange registrations	4,800
Customer relationships	930
Trade names	875
Software	140

Edgar Filing: NYSE Euronext - Form 425

Fair value adjustment of fixed assets	75
Fair value adjustment of long-term debt	(100)
Deferred tax impact of purchase accounting adjustments	(925)
Residual goodwill created from the combination	3,411

Total purchase price 7,000

The carrying value of all other assets and liabilities was deemed to approximate their estimated fair value. The impact of deferred taxes on the purchase accounting adjustments was calculated based on the statutory rate in effect in the jurisdiction of underlying assets.

Table of Contents

(iv) Note 4 Illustrative adjustments

[4.1] To adjust the book value of NYSE Euronext's intangible and tangible assets to their estimated fair value.

(in millions of euros)	Estimated fair value	Estimated remaining useful life (in years)	Estimated annual amortization expense
Intangible asset class:			
National securities exchange registrations	4,800	Indefinite	Not applicable
Customer relationships	930	20	49
Trade names	875	20 to Indefinite	2
Software	140	3 to 5	35
Property, plant and equipment	75	40	2
Total	6,820		88
Annual amortization expense based on historical book value			79
Incremental amortization expense from fair valuing NYSE Euronext in its entirety			9

The fair values of the intangible assets are based on NYSE Euronext management's preliminary estimates and definitive allocations will be performed when estimates are finalized. As part of these preliminary estimates, the national securities exchange registrations and customer-related intangibles were valued using the excess earnings income approach, and the trade names were valued using the relief-from-royalty method under the income approach.

The comparison of previously fair valued intangible assets of NYSE Euronext and the estimated fair values of intangible assets prepared for this illustrative financial information is as follows:

(in millions of euros)	Previously fair valued*	Newly fair valued	Total estimated fair value
National securities exchange registrations	3,731	1,069	4,800
Customer relationships	636	294	930
Trade names	140	735	875
Software		140	140
Total	4,507	2,238	6,745

* Includes primarily the estimated fair values assigned to intangible assets in the 2006 acquisition of Archipelago Holdings, Inc., the 2007 merger with Euronext N.V. and the 2008 acquisition of American Stock Exchange LLC.

[4.2] To adjust the long-term debt of NYSE Euronext to its estimated fair value, including the estimated annual amortization of the related adjustment to financial expense. The estimated future amortization is as follows (in millions of euros):

Year ending December 31,	
2011	27
2012	27
2013	21
2014	15
2015	10

Table of Contents

[4.3] To adjust the weighted average number of shares outstanding used to determine basic and diluted illustrative earnings per share based upon the exchange of each outstanding NYSE Euronext share for 0.47 of a share of Holdco common stock, as follows:

(in millions of euros, except per share data in euros)	Basic computation	Diluted computation	
Historical weighted average shares of Deutsche Börse	185.9	186.3	[a]
Historical weighted average shares of NYSE Euronext	260.8	264.5	
Times: exchange ratio	0.47	0.47	
	122.6	124.3	[b]
Illustrative combined weighted average shares	308.5	310.6	[a]+[b]
Net profit attributable to shareholders of Holdco	869	869	
Earnings per share pro forma combined	2.82	2.80	

[4.4] To adjust deferred tax liabilities based on the estimated fair value of tangible and intangible assets.

(v) Note 5 Shareholders' equity

As of December 31, 2010, the pro forma shareholders' equity of Holdco consisted of the following (in millions of euros):

Historical equity of Deutsche Börse	2,951
Estimated fair value of NYSE Euronext	7,000
Estimated acquisition costs	(100)
	9,851

(vi) Note 6 Impairment, merger and exit costs

Certain significant items are separately disclosed by virtue of their size or incidence to enable a full understanding of the illustrative unaudited condensed consolidated financial performance. In particular, for the year ended December 31, 2010, Deutsche Börse recorded an impairment charge in connection with intangible assets of International Securities Exchange (ISE) as well as an expense associated with organizational restructuring. For the same period, NYSE Euronext recorded merger expenses and exit costs as well as a gain on the sale of an equity investment in the National Stock Exchange of India (NSE). The following table illustrates the impact of these items on the illustrative unaudited condensed consolidated income statement for the year ended December 31, 2010 and provides a computation of the illustrative earnings per share excluding such impact:

(in millions of euros, except per share data in euros)	Deutsche Börse	NYSE Euronext	Adjustments for Illustrative Purposes	Holdco Combined
Net profit attributable to shareholders of parent company	418	439	12	869
Impairment charge on ISE intangible assets	224			224
Restructuring charge	80			80
Merger expenses and exit costs		49		49

Edgar Filing: NYSE Euronext - Form 425

Net gain from disposal of NSE		(30)		(30)
Adjusted net profit attributable to shareholders of parent company	722	458	12	1,192
Adjusted earnings per share (basic)	3.88			3.86
Adjusted earnings per share (diluted)	3.88			3.84
Basic weighted average shares outstanding	185.9			308.5
Diluted weighted average shares outstanding	186.3			310.6

Table of Contents**16.5 Comparative historical and illustrative per share data**

Set forth below are historical and illustrative amounts, per Deutsche Börse share and per NYSE Euronext share, of income from continuing operations, cash dividends and book value. The exchange ratio for the illustrative computations is one Holdco share for each Deutsche Börse share, and 0.47 Holdco share for each NYSE Euronext share.

The illustrative unaudited consolidated information below is for illustrative purposes only. The financial results may have been different had the companies always been combined. This information does not allow a reliable conclusion on the future results of Holdco or the historical results which would have been achieved had the companies always been combined.

In addition, the market price of NYSE Euronext shares or Deutsche Börse shares could change significantly and may not be indicative of the value of Holdco shares once they start trading. Because the exchange ratios will not be adjusted for changes in the market price of NYSE Euronext shares or Deutsche Börse shares, the value of the Holdco shares that NYSE Euronext shareholders will receive in the merger and that Deutsche Börse shareholders receive if they tender their shares in the exchange offer may vary significantly from the market value of the Holdco shares that they would have received if the combination were consummated on the date of the business combination agreement or on the date of this exchange offer document. Shareholder of Deutsche Börse are urged to obtain current market quotations for Deutsche Börse and NYSE Euronext shares before making their decision with respect to tendering their Deutsche Börse shares in the exchange offer.

The following tables provide information for Deutsche Börse shares, NYSE Euronext shares and, after giving effect to the combination as if it had occurred as of January 1, 2010 and assuming that all of the Deutsche Börse shares are exchanged in the exchange offer, Holdco shares, including book value per share, cash dividends per share and earnings per share.

	Year Ended December 31, 2010 (in euros)
Deutsche Börse Historical Per Share Data	
Basic earnings per share	2.25
Diluted earnings per share	2.24
Cash dividends declared per share	2.10
Book value per share at end of period	15.14
NYSE Euronext Historical Per Share Data⁽¹⁾	
Basic earnings per share	1.67
Diluted earnings per share	1.67
Cash dividends declared per share	0.91
Book value per share at end of period	20.42
NYSE Euronext Equivalent Illustrative Per Share Data⁽²⁾	
Basic earnings per share	1.33
Diluted earnings per share	1.32
Cash dividends declared per share	0.76
Book value per share at end of period	14.53
Holdco Illustrative Consolidated Per Share Data⁽³⁾	
Basic earnings per share	2.82
Diluted earnings per share	2.80
Cash dividends declared per share	1.62
Book value per share at end of period	30.91

(1) The income statement data of NYSE Euronext has been translated using an average exchange rate of \$1.32 to 1.0. This average exchange rate was computed using the average of prevailing exchange rates as of each

Table of Contents

- quarter end during the 2010 fiscal year. The NYSE Euronext balance sheet data has been translated using an exchange rate of \$1.33 to 1.0 corresponding to the spot rate as of December 31, 2010.
- (2) Determined using the related Holdco illustrative per share data multiplied by 0.47 (the proposed exchange ratio of a NYSE Euronext share for a Holdco share).
 - (3) Certain significant items related to impairment and exit costs deemed significant by virtue of their size or incidence have been separately disclosed to enable a full understanding of the illustrative unaudited condensed consolidated financial performance. For a discussion of such items, see Note 6 under section 16.4.2.

16.6 Further information

In order to be able to correctly interpret the financial information and the accompanying explanatory notes thereto given in this section 16 they should be read in conjunction with the additional financial information set out on pages F-1 et seq. of Annex 2 of this exchange offer document.

17 Right of withdrawal

17.1 Prerequisites

Shareholders of Deutsche Börse who have accepted the exchange offer have the following rights of withdrawal (*Rücktrittsrechte*):

- (i) In the event of an amendment of the exchange offer pursuant to Section 21 para. 1 German Takeover Act, shareholders of Deutsche Börse may, at any time until the expiration of the offer acceptance period, withdraw from the agreements concluded as a result of acceptance of the exchange offer if and to the extent that they have accepted the exchange offer prior to the publication of the amendment of the exchange offer (Section 21 para. 4 German Takeover Act).
- (ii) In the event of a competing offer by a third party for the Deutsche Börse shares pursuant to Section 22 para. 1 German Takeover Act, shareholders of Deutsche Börse may, at any time until the expiration of the offer acceptance period, withdraw from the agreements concluded as a result of acceptance of the exchange offer if and to the extent that they have accepted the exchange offer prior to the publication of the offer document for the competing offer (Section 22 para. 3 German Takeover Act).
- (iii) In addition and without limitation to the mandatory withdrawal rights (please see above (ii) and (iii)), the shareholders of Deutsche Börse may, at any time until the expiration of the offer acceptance period, withdraw from the agreements concluded as a result of the acceptance of the exchange offer. This also corresponds to the requirements of the laws of the United States in the event of a so called early commencement, see section 13.3.3.

17.2 Exercise of the right of withdrawal

The shareholders of Deutsche Börse may exercise their right of withdrawal pursuant to section 17.1 only by taking the following steps prior to expiration of the offer acceptance period:

- (i) declaring their withdrawal to their Custodian Bank in writing for a specified number of tendered Deutsche Börse shares, and
- (ii) instructing their Custodian Bank to arrange for a number of tendered Deutsche Börse shares held in their securities deposit account as is equivalent to the number of tendered Deutsche Börse shares in respect of which they have declared their withdrawal to be re-booked under the ISIN DE0005810055 at Clearstream.

Edgar Filing: NYSE Euronext - Form 425

The declaration of withdrawal has to be made until the expiration of the acceptance period (see with respect to the expiration of the acceptance period also sections 5.1 and 5.2). However, the declaration of withdrawal will only become effective if the tendered Deutsche Börse shares, for which the withdrawal has been declared, have been rebooked to the ISIN DE0005810055 no later than 6 p.m. (Central European

Table of Contents

Daylight Savings Time) on the second banking day following expiration of the offer acceptance period. Such re-bookings are to be arranged for by the Custodian Bank after receipt of the declaration of withdrawal without undue delay.

18 Information for shareholders of Deutsche Börse not accepting the exchange offer

Shareholders of Deutsche Börse who do not intend to accept the exchange offer should consider the following:

- (i) Deutsche Börse shares in respect of which this exchange offer is not accepted will continue to be traded. However, the present stock exchange price of Deutsche Börse shares is likely influenced by the fact that on February 15, 2011 the Bidder announced its intention to make this exchange offer. It is uncertain whether, following completion of the exchange offer, the stock exchange price of Deutsche Börse shares will remain at its present level or rise above it or fall below it.
- (ii) The completion of the exchange offer may result in a reduction of the free float of Deutsche Börse shares. A lower liquidity in the trading in Deutsche Börse shares could result in greater price fluctuations of Deutsche Börse shares than in the past. Moreover, membership in certain stock exchange indices in particular in the DAX or the EUROSTOXX50 might change as a result of a potentially lower free float.
- (iii) As agreed in the business combination agreement, Deutsche Börse is supposed to tender the Deutsche Börse treasury shares in the exchange offer. The Deutsche Börse treasury shares currently are not entitled to dividends as they are held in treasury. Once they are tendered to Holdco, they will again be entitled to dividends which will increase the number of Deutsche Börse shares entitled to dividends and thus may reduce the dividend distributed for each Deutsche Börse share.
- (iv) If the Bidder, after settlement of the exchange offer, holds 95% or more of Deutsche Börse shares, shareholders of Deutsche Börse who did not accept the exchange offer would still be entitled to accept the exchange offer within a period of three months from the end of the offer acceptance period (Section 39c in conjunction with Section 39a German Takeover Act). Such subsequent acceptance of the exchange offer within three months after expiration of the offer acceptance period is also possible before completion of the exchange offer, if the Bidder, based on the number of Deutsche Börse shares for which the exchange offer has already been validly accepted, will reach or exceed the threshold of 95% of Deutsche Börse shares in the course of the subsequent completion of the exchange offer (Section 39c in conjunction with Section 39a para. 4 sentence 2 German Takeover Act).
If the Bidder reaches or exceeds a shareholding of 95% in Deutsche Börse shares, the Bidder will be required to publish this fact on the internet at <http://www.global-exchange-operator.com> and in the electronic Federal Gazette pursuant to Section 23 para. 1 sentence 1 no. 4 German Takeover Act. If the Bidder does not comply with this obligation, the three-month period for the acceptance of this exchange offer pursuant to Section 39c German Takeover Act will only commence upon satisfaction of this publication obligation.
- (v) As described in detail under section 10.6.3, the Bidder is entitled to carry out a takeover squeeze-out if after completion of the exchange offer, at least 95% of the registered share capital of Deutsche Börse belong (within the meaning of Section 39a Takeover Act) to the Bidder. The consideration offered to the shareholders of Deutsche Börse under the exchange offer will be deemed to constitute adequate compensation for the purposes of the takeover squeeze-out if the exchange offer resulted in the acquisition of at least 90% of Deutsche Börse's share capital which was subject to the exchange offer. Adequate cash compensation must be offered alternatively to the shareholders of Deutsche Börse because shares have been offered as compensation under the exchange offer.
- (vi) As described in detail under section 10.6.1, after completion of the exchange offer, the Bidder intends to enter into a domination agreement or a combination of a domination agreement and a

Table of Contents

profit and loss transfer agreement, in each case pursuant to Sections 291 et seq. AktG with Deutsche Börse as the controlled company and the Bidder or a direct or indirect wholly owned subsidiary of the Bidder in the legal form of a German stock corporation or German *societas europaea* (SE) as controlling company (see section 10.6.1 for further information).

A domination and/or profit and loss transfer agreement must provide for a recurrent annual cash payment as compensation for the minority shareholders (Section 304 AktG). Such compensation will represent a variable (which may be calculated on the basis of the actual future dividends of Holdco) or fixed minimum dividend (*Garantiedividende*) in the case of a domination agreement and a variable or fixed annual compensation payment (*Ausgleichszahlung*) in the case of a profit and loss transfer agreement or a combined domination and profit and loss transfer agreement. In the case of a domination agreement which is not combined with a profit and loss transfer agreement, the recurring cash payment would be a minimum dividend which is only payable to the extent the actual dividend paid by Deutsche Börse to its minority shareholders falls short of the amount of such minimum dividend.

In addition, entering into a domination agreement or a combination of a domination agreement and profit and loss transfer agreement would oblige the respective controlling company to offer to acquire all outstanding Deutsche Börse shares held by minority shareholders of Deutsche Börse within a certain period of time in exchange for an adequate compensation (Section 305 AktG).

For a more detailed description on the recurrent cash payment and adequate compensation please see the description under section 10.6.1.

- (vii) As described in detail under section 10.6.2, if, after completion of the exchange offer or any time thereafter, at least 95% of the registered share capital of Deutsche Börse belongs (within the meaning of Section 327a AktG) to the Bidder or, as the case may be, a subsidiary of the Bidder, the Bidder or such subsidiary is entitled to carry out a corporate squeeze-out pursuant to Sections 327a et seq. AktG under which Deutsche Börse shares of the other shareholders (minority shareholders) of Deutsche Börse would be transferred to the Bidder or, as the case may be, to the respective subsidiary, in return for payment of an adequate cash compensation.

For a more detailed description of the corporate squeeze-out and the adequate cash compensation please see the description under section 10.6.2.

Please also refer to section 10.6.2 for a special form of a corporate squeeze-out which may be introduced by a new legislation which is currently under way and may allow, under certain circumstances, a corporate squeeze-out as described above also by a principal shareholder holding only 90% of the share capital and for the respective intentions of the Bidder.

19 Cash payments and valuable benefits for members of the Deutsche Börse management board or the Deutsche Börse supervisory board

Neither members of the Deutsche Börse management board nor members of the Deutsche Börse supervisory board were granted, or given the prospect of, cash payments or other valuable benefits in connection with this exchange offer. As agreed in the business combination agreement and described under section 6.4.2 and section 6.4.3, unless otherwise agreed by NYSE Euronext and Deutsche Börse, within one month after the expiration of the offer acceptance period the Holdco board of directors, to be composed of 17 members, will be established. In accordance with the business combination agreement. Dr. Reto Francioni, current chief executive officer of Deutsche Börse, as chairman of the Holdco group, Duncan L. Niederauer, current chief executive officer of NYSE Euronext, as CEO of the Holdco group, as well as 15 non-executive directors, nine of them designated by Deutsche Börse as members of the Holdco board of directors, and six of them designated by NYSE Euronext, will become member of the Holdco board of directors.

Table of Contents

The following four persons who are currently members of the Deutsche Börse management board are expected to be appointed as members of Holdco's global executive committee: Andreas Preuß as head of derivatives, Jeffrey Tessler as head of settlement & custody, Frank Gerstenschläger as head of market data & analytics and Gregor Pottmeyer as chief financial officer. Andreas Preuß will also take the role of deputy chief executive officer and president of Holdco group.

20 Advising bank and central settlement agent

Deutsche Bank AG is advising the Bidder in connection with the exchange offer and is coordinating the technical implementation and settlement of the exchange offer.

21 Information pursuant to Section 2 no. 2 German Takeover Act Offer Regulation in conjunction with Section 7 German Securities Prospectus Act and the Prospectus Regulation

Information pursuant to Section 2 no. 2 German Takeover Act Offer Regulation in conjunction with Section 7 German Securities Prospectus Act and the Prospectus Regulation is contained in Annex 2 of this exchange offer document. Attention is drawn in particular to the details in the following sections which the shareholders of Deutsche Börse should take into account when deciding whether to accept the exchange offer:

Risk Factors;

The Combination;

Business of Deutsche Börse group and certain information about Deutsche Börse;

Business of NYSE Euronext and companies affiliated with NYSE Euronext and certain information about NYSE Euronext; and

Description of the Holdco shares.

22 Taxes

The basis of taxation (*Grundlagen der Besteuerung*) is specified in section Certain material tax considerations on pages A-451 *et seq.* of Annex 2 of this exchange offer document. The Bidder however recommends the shareholders of Deutsche Börse to seek tax advice before accepting the exchange offer, taking into account their personal circumstances, with regard to the tax consequences of an acceptance of this exchange offer.

23 Publications

23.1 Exchange offer document

With respect to the publication of the exchange offer document please see section 1.4.

23.2 Results of the exchange offer

Edgar Filing: NYSE Euronext - Form 425

The level of declarations of acceptance received will be published weekly during the offer acceptance period pursuant to Section 23 para. 1 sentence 1 no. 1 German Takeover Act (i) on the internet at <http://www.global-exchange-operator.com> (in German as well as in English language) and (ii) in German language also in the electronic Federal Gazette and (iii) in English language via an electronically operated information distribution system in the United States. During the last week of the offer acceptance period those publications will take place daily.

The results of this exchange offer are expected to be published pursuant to Section 23 para. 1 sentence 1 no. 2 German Takeover Act within four banking days after expiration of the offer acceptance period and pursuant to Section 23 para. 1 sentence 1 no. 3 German Takeover Act within three banking days after expiration of the additional offer acceptance period.

Table of Contents

23.3 Other publications

Other declarations and announcements by the Bidder in connection with this exchange offer, in particular the publications pursuant to sections 6.10, 12.8 and 14.4 will be published on the internet at <http://www.global-exchange-operator.com> (in German as well as in English) and, to the extent necessary pursuant to the German Takeover Act, in German in the electronic Federal Gazette. The announcement described in sections 6.10, 12.8 and 14.4 will also be published in English in the United States via an electronically operated information distribution system.

24 Governing law and place of jurisdiction

This exchange offer and the agreements concluded with the Bidder as a result of the acceptance of this exchange offer shall be governed by German law; all corporate actions of the Bidder (including the amendment of its articles of association, the increase of its authorized share capital and the issue of ordinary shares in connection with the exchange offer (the Holdco offer shares) and the merger) will be governed by Dutch law. The exclusive place of jurisdiction for all legal disputes arising out of, or in connection with, this exchange offer (and any agreement which comes into existence as a result of acceptance of this exchange offer) shall, to the extent legally permissible, be Frankfurt am Main, Germany.

25 Declaration of assumption of responsibility

Alpha Beta Netherlands Holding N.V., having its registered seat in Amsterdam, the Netherlands, assumes responsibility for the contents of this exchange offer document in accordance with Section 11 para. 3 German Takeover Act and declares that, to the best of its knowledge, the information contained in this exchange offer document is correct and no material facts have been omitted.

Amsterdam, May 2, 2011

Table of Contents**SUMMARY**

This summary should be read as an introduction to this Annex 2 of the Offer Document. Any decision to invest in Holdco shares should be based on consideration of all the information contained in this Annex 2 of the Offer Document as a whole by you. In this document one ordinary share of Alpha Beta Netherlands Holding N.V. (herein referred to as Holdco) with a nominal value of 1.00 is referred to as Holdco share. You should carefully read this Annex 2 of the Offer Document in its entirety. The following summary is deemed to be an introduction only and does not claim to contain all detailed information that may be material to investors. Investors should therefore read the entire Annex 2 of the Offer Document carefully.

Under laws in effect in the states within the EEA civil liability is attached to those persons who have assumed liability for the summary including any translation thereof or who have prepared this summary, but only if the summary is misleading, inaccurate or inconsistent when read together with the other parts of this Annex 2 of the Offer Document. Where a claim relating to information contained in this document is brought before a court in a state within the EEA, the plaintiff investor may, under the national legislation of the state where the claim is brought, be required to bear the costs of translating this Annex 2 of the Offer Document before the legal proceedings are initiated.

The Companies***Holdco***

Alpha Beta Netherlands Holding N.V. (which is referred to in this document as Holdco) is a newly incorporated public limited liability company (*naamloze vennootschap*) formed under the laws of the Netherlands that will become the parent company of Deutsche Börse and NYSE Euronext upon the completion of the combination. To date, Holdco has not conducted any material activities other than those incident to its formation and the matters contemplated by the business combination agreement. Holdco's business address is Beursplein 5, 1012 JW Amsterdam, the Netherlands. Its telephone number is +31 (0) 20 550-4444. It is expected that, prior to the completion of the combination, the name of Holdco will be changed to a name to be agreed between NYSE Euronext and Deutsche Börse.

Deutsche Börse Group

Deutsche Börse was originally formed on August 1, 1990 under the name Frankfurter Wertpapierbörse AG. In December 1992, it changed its name to Deutsche Börse Aktiengesellschaft. In 1993, a system for electronically consolidating order routing, price determination and processing, was implemented across Germany, thereby giving full electronic support, for the first time, to floor trading on the Frankfurt Stock Exchange (*Frankfurter*

Wertpapierbörse). Its electronic trading platform Xetra was subsequently launched in November 1997. In June 1998, the derivatives exchange Eurex was established as a joint venture between Deutsche Börse and the Swiss Stock Exchange SWX by combining their derivatives exchanges, Deutsche Terminbörse and SOFFEX Swiss Options and Financial Forwards Exchange. Subsequently, in January 2000, Deutsche Börse Clearing AG and Cedel International S.A. merged to form Clearstream International S.A., a company incorporated under the laws of Luxembourg, which, together with its subsidiaries, handles Deutsche Börse Group's securities post-trade services except for clearing. In connection with the initial public offering of Deutsche Börse shares in February 2001, Deutsche Börse shares were admitted to trading on the Frankfurt Stock Exchange. Following its capital increase in June 2002, Deutsche Börse acquired all shares of Clearstream International S.A., which has since then been integrated into Deutsche Börse Group. Deutsche Börse shares were included in the DAX index as of December 2002. In March 2003, Deutsche Börse Group introduced the central counterparty for cash equities for share trading on Xetra and on the trading floor of the Frankfurt Stock Exchange. In 2007, Eurex completed the acquisition of the U.S. options exchange International Securities Exchange Holdings, Inc. (which is referred to in this document as ISE) creating the largest transatlantic

marketplace for derivatives. In order to strengthen its

position in the international index business Deutsche

Table of Contents

Börse increased its equity investment in index provider STOXX Ltd. from 33% to 50% in December 2009.

As one of the largest exchange organizations worldwide, Deutsche Börse Group offers its customers a broad portfolio of products and services. These cover the entire process chain of financial market transactions, including trading and clearing of securities, including derivatives, through transaction settlement, custody and collateral management of securities and providing market information, down to the development and operation of electronic systems.

Deutsche Börse Group's business activities are currently divided into four segments: Xetra, Eurex, Clearstream and Market Data & Analytics.

As of December 31, 2010, Deutsche Börse Group employed 3,490 people in 19 locations in 15 countries. As of March 31, 2011, Deutsche Börse Group employed 3,507 people. Since March 31, 2011, the total number of employees has not changed significantly. In 2010, based on financial statements prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (which is referred to in this document as IFRS), and IFRS as applied in the European Union, Deutsche Börse generated revenues on a consolidated basis of 2,226.7 million and earnings before interest and tax of 527.8 million.

The address of Deutsche Börse's principal office is Mergenthalerallee 61, 65760 Eschborn, Germany, and its telephone number is +49 (0) 69 2 11 0. Its website is www.deutsche-boerse.com. NYSE Euronext

NYSE Euronext, a Delaware corporation, was organized on May 22, 2006 in anticipation of the combination of the businesses of NYSE Group, Inc., a Delaware corporation, and Euronext N.V., a company organized under the laws of the Netherlands. The combination was consummated on April 4, 2007. NYSE Group, Inc. was formed in connection with the March 7, 2006 merger between New York Stock Exchange, Inc., a New York Type

A not-for-profit corporation, and Archipelago Holdings, Inc., a Delaware corporation. Euronext was the first cross-border exchange group, created with the 2000 merger of the Paris, Amsterdam and Brussels stock exchanges. The New York Stock Exchange traces its origins to the Buttonwood Agreement, signed in 1792 by a group of 24 traders gathered under a buttonwood tree in lower Manhattan. In 1817, the traders formed the New York Stock & Exchange Board, which in 1863 was renamed the New York Stock Exchange. The Amsterdam Stock Exchange, Euronext's oldest constituent and the world's first stock exchange, originated in 1602 in conjunction with a stock issuance by the Dutch East India Company.

NYSE Euronext is a leading global operator of financial markets and provider of innovative trading strategies. NYSE Euronext offers a broad and growing array of products and services in cash equities, futures, options, swaps, exchange-traded products, bonds, carbon trading, clearing operations, market data and commercial technology solutions, all designed to meet the evolving needs of issuers, investors, financial institutions and market participants. NYSE Euronext has three reportable business segments: Derivatives, Cash Trading & Listings, and Information Services and Technology Solutions.

As of December 31, 2010, NYSE Euronext employed 2,968 full-time equivalent employees. Since December 31, 2010 the total number of employees has not changed significantly. For the year ended December 31, 2010, based on financial statements prepared in accordance with U.S. generally accepted accounting principles (which is referred to in this document as U.S. GAAP), NYSE Euronext generated \$4,425 million in revenues and \$745 million in operating income from continuing operations.

NYSE Euronext's principal executive office is located at 11 Wall Street, New York, New York 10005. Its telephone number is +1 (212) 656-3000. Its European headquarters are located at 39 rue Cambon, 75039 Paris, France, and its telephone

number is +33 1 49 27 10 00. Its website is www.nyse.com. Information contained on NYSE Euronext's website does not constitute a part of this document. This website address is an inactive text

reference and is not intended to be an actual link to the website.

The Combination

Pursuant to the business combination agreement, Deutsche Börse and NYSE Euronext have agreed to combine their businesses under a new Dutch holding company. The effect of the combination will be that Deutsche Börse and NYSE Euronext will become subsidiaries of Holdco. NYSE Euronext will become a subsidiary of Holdco through a merger of a wholly owned subsidiary of Holdco with and into NYSE Euronext, and Deutsche Börse will become a subsidiary of Holdco through an exchange offer of Holdco shares for Deutsche Börse shares.

Following the exchange offer, and depending on the percentage of Deutsche Börse shares acquired by Holdco in the exchange offer, Deutsche Börse and Holdco intend to complete a post-completion reorganization. Holdco will enter into (1) either a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement (either directly or through a wholly owned subsidiary), pursuant to which the remaining shareholders of Deutsche Börse will have limited rights, including a limited ability to participate in the profits of Deutsche Börse Group and/or (2) a mandatory buy-out of the Deutsche Börse shares from any remaining holders thereof by way of a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act (*Aktiengesetz*) or by applying for a court order in accordance with Sections 39a *et seq.* of the German Takeover Act.

The Merger

The parties to the business combination agreement have agreed that, immediately after the time that Holdco accepts for exchange, and exchanges, the Deutsche Börse shares that are validly tendered and not withdrawn in the exchange offer, Pomme Merger Corporation, a wholly owned subsidiary of Holdco, will merge with and into NYSE Euronext, as a result of which NYSE Euronext will become a wholly owned subsidiary of Holdco.

In the merger, each outstanding NYSE Euronext share will be converted into the right to receive 0.47

of a fully paid and non-assessable Holdco share. Upon completion of the merger, the surviving corporation will be NYSE Euronext, which will be a wholly owned subsidiary of Holdco. This 0.47 exchange ratio for the merger is fixed and will not be adjusted to reflect stock price changes prior to the completion of the merger.

NYSE Euronext Special Meeting

To effect the merger, a special meeting of NYSE Euronext shareholders will be held at 11 Wall Street, New York, New York 10005, on July 7, 2011, starting at 8:00 a.m. New York City time. At this special meeting, NYSE Euronext shareholders will be asked to consider and to vote on:

a proposal to adopt the business combination agreement and approve the transactions contemplated by the business combination agreement; and

three proposals relating to the Holdco articles of association that will be in effect after completion of the combination; and

any proposal that may be made by the chairman of the NYSE Euronext board of directors to adjourn or postpone the special meeting in order to (1) solicit additional proxies with respect to the above-mentioned proposals and/or (2) hold the special meeting on a date that is on or about the date of the expiration of the offer acceptance period for the exchange offer, in the event that such date of expiration is extended.

The affirmative vote of the holders of a majority of the NYSE Euronext shares outstanding and entitled to vote at the NYSE Euronext special meeting as of the record date is required for the adoption of the business combination agreement and approval of the transactions contemplated by the business combination agreement. The affirmative vote of the holders of a majority of the NYSE Euronext shares represented and entitled to vote at the NYSE Euronext special meeting is required for the approval of the three proposals relating to the Holdco articles of association and any proposal to postpone or adjourn the NYSE Euronext special meeting.

Table of Contents

Exchange Offer

- Bidder:** Alpha Beta Netherlands Holding N.V., Beursplein 5, 1012 JW Amsterdam, The Netherlands (which is referred to in this document as Holdco).
- Target:** Deutsche Börse Aktiengesellschaft, 60485 Frankfurt am Main, Germany, with its business address at Mergenthalerallee 61, 65760 Eschborn.
- Subject matter of the exchange offer:** Acquisition of all registered no-par-value shares (*auf den Namen lautende Stückaktien*) of Deutsche Börse (ISIN DE0005810055) each representing a pro rata amount of 1.00 per share of the registered share capital (*Grundkapital*), in each case with all ancillary rights.
- Offer Consideration:** 195,146,864 ordinary share of Holdco with a nominal value of 1.00 and full dividend rights since formation of Holdco on February 10, 2011 in exchange for Deutsche Börse shares and in an exchange ratio of one Holdco share for one Deutsche Börse share
- Offer Conditions:** The exchange offer and the agreements which come into existence as a result of accepting the exchange offer are subject to the satisfaction of numerous completion conditions and will thus only be consummated if the following conditions are satisfied:
- (a) At the end of the offer acceptance period, the sum of (i) the number of Deutsche Börse shares that have been validly tendered and not withdrawn under the exchange offer and (ii) Deutsche Börse shares that Holdco already holds or has acquired equals at least 75% of the sum of Deutsche Börse shares issued as of the end of the offer acceptance period and the number of Deutsche Börse shares that Deutsche Börse may issue after publication of the exchange offer prospectus in accordance with the German Takeover Act pursuant to obligations in effect as of the time of such publication, such as outstanding options;
 - (b) On or prior to March 31, 2012, (i) any waiting period (and any extension thereof) applicable to the exchange offer and the merger under the Hart-Scott-Rodino Antitrust Improvement Act of 1976, as amended, must have expired or been terminated with the consequence that the exchange offer and the merger may be consummated, and (ii) the EU Commission must have, or must be deemed to have, cleared the exchange offer and the merger pursuant to the Council Regulation (EC) 139/2004 of the European Community;
 - (c) Effectiveness of the Registration Statement regarding the Holdco shares to be issued in the context of the exchange offer and the merger pursuant to the U.S. Securities Act of 1933 prior to the end of the offer acceptance period and no stop order by the SEC or any proceeding initiated by the SEC seeking such a stop order;

Table of Contents

- (d) Prior to the end of the offer acceptance period, the NYSE Euronext stockholders shall have granted the required consent to the merger at the NYSE Euronext special meeting; and
- (e) No law, regulation, administrative act or injunction of a governmental entity, court or legislative body in certain specified countries is in effect as of the expiration of the offer acceptance period, which would restrain or prohibit the combination or the acquisition or ownership of Deutsche Börse shares or NYSE Euronext shares by Holdco;
- (f) Receipt of other approvals (or, where applicable, absence of disapproval) of numerous specified public entities in certain specified countries (or, where applicable, continued absence of disapproval) on or prior to March 31, 2012;
- (g) No material adverse market change, i.e. suspension of the currency trading or debt markets for more than three consecutive trading days in Frankfurt am Main, London or New York during the time between the publication of the exchange offer document and the expiration of the offer acceptance period;
- (h) No material adverse effect on NYSE Euronext prior to the expiration of the offer acceptance period;
- (i) No material adverse effect on Deutsche Börse prior to the expiration of the offer acceptance period;
- (j) Receipt of one or more private letter rulings from the U.S. Internal Revenue Service by each of NYSE Euronext and Deutsche Börse on or prior to the date of the expiration of the offer acceptance period confirming that the exchange offer and the merger qualify as particular transactions under U.S. Internal Revenue Code.

Offer Acceptance Period: May 4, 2011 to midnight, at the end of July 13, 2011 (Central European Daylight Savings Time)

Subsequent Offering Period: Provided that the offer acceptance period is not automatically extended under certain conditions, the subsequent offering period is expected to begin on July 20, 2011 and to expire on August 2, 2011.

Withdrawal Until the end of the offer acceptance period, the shareholders of Deutsche Börse may, at any time, withdraw from the agreements concluded as a result of the acceptance of the exchange offer.

Settlement of the exchange offer: The delivery of the Holdco offer shares will occur in due course but in no event later than seven banking days (i) following the end of the additional offer acceptance period or (ii) following the day the satisfaction and/or waiver of all completion conditions is published

Edgar Filing: NYSE Euronext - Form 425

by Holdco, whichever is the later date. A banking day relates to a day on which the banks in Frankfurt am Main, Germany, as well as in New York, New York, United States are open for general business.

Table of Contents

Information on the Holdco Offer Shares: International Securities Identification Number (ISIN): NL0009766997

German Securities Code (*Wertpapierkennnummer*) (WKN): A1H81K

Common Code: 062269324

Ticker Symbol: AL4

Admission to and Commencement of Trading: Holdco (1) intends to list its shares on the New York Stock Exchange subject to the notice of issuance and (2) will apply prior to the time of delivery of the Holdco shares pursuant to the exchange offer and the merger, for admission of its shares to trading on the regulated market (*regulierter Markt*) of the Frankfurt Stock Exchange and simultaneously on the regulated market of NYSE Euronext Paris (*marché réglementé de NYSE Euronext à Paris*).

Holdco expects that the Holdco shares will have been admitted to trading and listed at the time of delivery to the shareholders of Deutsche Börse having accepted the exchange offer.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of the Holdco shares to the Deutsche Börse shareholders who have accepted the exchange offer.

Settlement Agent: Deutsche Bank AG as central settlement agent and exchange escrow agent in connection with the exchange offer

Reasons for the Exchange Offer and Use of Proceeds: The exchange offer forms part of the transaction that has been agreed by Deutsche Börse and NYSE Euronext to implement the combination, by which the businesses of Deutsche Börse Group and NYSE Euronext will be combined under Holdco as a holding company.

Holdco expects the total costs that it will incur in connection with the exchange offer to be paid by Holdco at approximately up to 4.0 million.

Holdco will not receive any proceeds from such exchange offer.

Table of Contents

Material Transaction Fees

Deutsche Börse and NYSE Euronext currently estimate that they will incur approximately 100 million of legal, banking and other professional fees and costs related to the combination, of which approximately 45 million will be payable regardless of whether the combination is completed.

Structure of the Combination

In the combination, Deutsche Börse Group's business will be brought under Holdco through the exchange offer, and NYSE Euronext's business will be brought under Holdco through the merger. As soon as possible after the completion of the exchange offer and the merger, Holdco intends to effectuate the post-completion reorganization. Holdco intends to

effectuate one or more corporate reorganization transactions, which may include entering (directly and/or through a wholly owned subsidiary) into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement. In the event that Holdco holds, directly or indirectly, 95% or more of the issued Deutsche Börse shares after the completion of the exchange offer or any time thereafter, Holdco may also effectuate the post-completion reorganization by commencing a mandatory buy-out of the Deutsche Börse shares from any remaining shareholders thereof.

If a new German legislation, which is currently being prepared, permits a mandatory buy-out at a lower ownership threshold, Holdco may perform a mandatory buy-out if, after completion of the exchange offer or any time thereafter, it meets this lower ownership threshold.

Table of Contents

The following diagram illustrates the structure of the combination and assumes that Holdco effects the post-completion reorganization by way of a domination agreement:

The Combination

After the Combination and the Post-Completion Reorganization

A-8

Table of Contents

Deutsche Börse's Reasons for the Combination

The Deutsche Börse management board and the Deutsche Börse supervisory board approved the business combination agreement and will recommend, subject to their duties under applicable law, that the Deutsche Börse shareholders tender their Deutsche Börse shares in the exchange offer. In reaching its decision to approve the combination, the Deutsche Börse management board consulted with its financial and legal advisors and considered a variety of factors, including the following factors:

that the combination presented significant strategic opportunities;

that the combination would be expected to create significant cost savings and revenue synergies;

that former Deutsche Börse shareholders and former NYSE Euronext shareholders would hold approximately 60% and 40%, respectively, of the outstanding Holdco shares, assuming that all Deutsche Börse shareholders tendered in the exchange offer;

the financial analyses presented to it by Deutsche Bank Securities, Inc. and J.P. Morgan Securities, LLC and the opinion of each that, as of February 15, 2011 and based upon and subject to the various factors, assumptions and limitations set forth in their respective opinions, the exchange ratio in the proposed exchange offer was fair, from a financial point of view, to holders of Deutsche Börse shares (other than Deutsche Börse);

that the consideration payable to Deutsche Börse shareholders in the exchange offer would be Holdco shares and, therefore, would allow Deutsche Börse shareholders to participate in potential further appreciation of the combined company after the combination;

that the governance arrangements provided by the business combination agreement would enable continuity of management and an effective and timely integration of the two companies' operations and reflected that the transaction was structured as a balanced business combination rather than an acquisition of either company;

its knowledge of Deutsche Börse Group's and NYSE Euronext's businesses, historical financial performance and condition, operations, properties, assets, regulatory issues, competitive positions, prospects and management; and

the risks and uncertainties associated with other potential strategic alternatives that might be available to Deutsche Börse.

NYSE Euronext's Reasons for the Combination

The NYSE Euronext board of directors approved the business combination agreement and have recommended that the NYSE Euronext shareholders vote FOR the adoption of the business combination agreement and the approval of the transactions contemplated by the business combination agreement. In reaching its decision to approve the combination and recommend to the NYSE Euronext shareholders that they adopt the business combination agreement, the NYSE Euronext board of directors consulted with NYSE Euronext management and its financial and legal advisors and considered a variety of factors, including the factors:

that the combination with Deutsche Börse would enable NYSE Euronext to accelerate the benefits of its existing strategy;

that the combination presented significant strategic opportunities;

that the consideration payable to NYSE Euronext shareholders in the merger would be Holdco shares and, therefore, would allow NYSE Euronext shareholders to participate in potential further appreciation of the combined company after the combination;

that the combination would be expected to create significant cost savings and revenue synergies;

Table of Contents

that the exchange ratio of 0.47 of a Holdco share for each NYSE Euronext share in the merger and one Holdco share for each Deutsche Börse share in the exchange offer implied as of the date of the announcement of the business combination agreement that a premium would be received by NYSE Euronext shareholders in the merger;

that former Deutsche Börse shareholders and former NYSE Euronext shareholders would hold approximately 60% and 40%, respectively, of the outstanding Holdco shares, assuming that all Deutsche Börse shareholders tendered in the exchange offer;

the financial analyses presented to the NYSE Euronext board of directors by Perella Weinberg and the opinion of Perella Weinberg that, as of February 15, 2011 and based upon and subject to the various assumptions made, procedures followed, matters considered and qualifications and limitations set forth therein, the exchange ratio in the merger of 0.47 is fair, from a financial point of view, to NYSE Euronext shareholders;

that the governance arrangements provided by the business combination agreement would enable continuity of management and an effective and timely integration of the two companies' operations and reflected that the transaction was structured as a business combination rather than an acquisition of either company;

its knowledge of NYSE Euronext's and Deutsche Börse Group's businesses, historical financial performance and condition, operations, properties, assets, regulatory issues, competitive positions, prospects and management; and

the risks and uncertainties associated with other potential strategic alternatives that might be available to NYSE Euronext.

Interests of Directors, Board Members, and Executive Officers in the Combination

Shareholders of Deutsche Börse and shareholders

of NYSE Euronext should be aware that some of the Deutsche Börse management board members, Deutsche Börse supervisory board members and directors and executive officers of NYSE Euronext may have interests in the combination that are different from, or in addition to, the interests of the Deutsche Börse shareholders and NYSE Euronext shareholders. These interests may include, but are not limited to, the continued employment of certain Deutsche Börse management board members and executive officers of NYSE Euronext, the continued positions of certain Deutsche Börse supervisory board members and certain directors of NYSE Euronext as directors of Holdco and the indemnification of former Deutsche Börse management and supervisory board members and directors and executive officers of NYSE Euronext by Holdco. These interests also include the treatment in the combination of restricted stock units, stock options and other rights held by these directors, board members and executive officers. As of March 14, 2011, members of the Deutsche Börse management board and the Deutsche Börse supervisory board owned 50,780 Deutsche Börse shares in the aggregate.

Shareholders of Deutsche Börse and shareholders of NYSE Euronext should be aware that, as of March 1, 2011, NYSE Euronext directors and executive officers and their affiliates owned and were entitled to vote approximately 0.3% of the outstanding NYSE Euronext shares entitled to vote at the NYSE Euronext special meeting.

Opinion of the Financial Advisor to the NYSE Euronext Board of Directors

Perella Weinberg Partners LP (which is referred to in this document as "Perella Weinberg") rendered its oral opinion, subsequently confirmed in writing, to the NYSE Euronext Board of Directors that, on February 15, 2011, and based upon and subject to the various assumptions made, procedures followed, matters considered and qualifications and limitations set forth in the opinion, the merger exchange ratio in the combination was fair, from a financial point of view, to holders of NYSE Euronext shares (other than Deutsche Börse or any affiliate of Deutsche Börse).

Table of Contents

The opinion does not address NYSE Euronext's underlying business decision to enter into the combination or the relative merits of the combination as compared with any other strategic alternative that may have been available to NYSE Euronext. The opinion does not constitute a recommendation to any holder of NYSE Euronext shares or Deutsche Börse shares as to how such holders should vote or otherwise act with respect to the combination or any other matter and does not in any manner address the prices at which NYSE Euronext shares, Holdco shares or Deutsche Börse shares will trade at any time. In addition, Perella Weinberg expressed no opinion as to the fairness of the combination to, or any consideration to, the holders of any other class of securities, creditors or other constituencies of NYSE Euronext. Perella Weinberg provided its opinion for the information and assistance of the NYSE Euronext board of directors in connection with, and for the purposes of its evaluation of, the combination.

Opinions of the Financial Advisors to Deutsche Börse

Opinion of Deutsche Bank Securities Inc. as Deutsche Börse's Financial Advisor

On February 15, 2011, Deutsche Bank Securities Inc. (which is referred to in this document as DBSI), delivered its opinion at a meeting of the Deutsche Börse supervisory board, at which all members of the Deutsche Börse management board were present, that as of the date of the opinion and based upon and subject to the various assumptions made, procedures followed, matters considered and limitations described in the opinion, the exchange ratio of one Holdco share for each Deutsche Börse share tendered by Deutsche Börse shareholders (which is referred to in this document as the Deutsche Börse exchange ratio) pursuant to the exchange offer was fair, from a financial point of view, to the holders of Deutsche Börse shares.

The DBSI opinion does not express an opinion or recommendation as to whether any holder of Deutsche Börse shares should tender any Deutsche Börse shares in connection with the exchange offer. The DBSI opinion also does not address the fairness

of the combination, or any consideration received in connection therewith, to the holders of any class of securities, creditors or other constituencies of Deutsche Börse or NYSE Euronext (other than the fairness, from a financial point of view of the Deutsche Börse exchange ratio to the holders of Deutsche Börse shares), nor does it address the fairness of the contemplated benefits of the combination. DBSI's opinion and its financial analyses set forth in this document were prepared for use by the management and supervisory boards of Deutsche Börse. They were not prepared for the use of any holders of NYSE Euronext shares and do not constitute a recommendation as to how any holder of NYSE Euronext shares should vote with respect to the merger, the other aspects of the combination or any other matter.

Opinion of J.P. Morgan as Deutsche Börse's Financial Advisor

J.P. Morgan Securities LLC., which is referred to as J.P. Morgan, delivered its opinion to the management board and the supervisory board of Deutsche Börse that, as of the date of the fairness opinion and based upon and subject to the various factors, assumptions and limitations set forth therein, the exchange ratio in the proposed exchange offer was fair, from a financial point of view, to the holders of Deutsche Börse shares (other than Deutsche Börse).

J.P. Morgan provided its opinion for the information and assistance of the management board and the supervisory board of Deutsche Börse in connection with their consideration of the proposed combination. The J.P. Morgan opinion is addressed to the management board and the supervisory board of Deutsche Börse and does not constitute a recommendation to any holder of Deutsche Börse shares as to whether such holder should tender its Deutsche Börse shares in the exchange offer or how such holder should vote with respect to the combination or any other matter if such vote is required. The opinion and advice provided by J.P. Morgan is not and should not be considered a value opinion as is customarily rendered by qualified auditors based on the requirements of German corporate law (e.g., in connection with a mandatory buy-out of Deutsche Börse shares or entering into a

Table of Contents

domination agreement and/or a profit and loss transfer agreement), nor has J.P. Morgan expressed any opinion as to the compensation which may be payable to holders of Deutsche Börse shares in connection with such a mandatory buy-out of their Deutsche Börse shares or in connection with entering into a domination agreement and/or a profit and loss transfer agreement. J.P. Morgan's opinion and its financial analyses set forth in this document were prepared for use by the management and supervisory boards of Deutsche Börse. They were not prepared for the use of any holders of NYSE Euronext shares and do not constitute a recommendation as to how any holder of NYSE Euronext shares should vote with respect to the merger, the other aspects of the combination or any other matter.

Conditions to Completion of the Combination

The completion of the combination is subject to the satisfaction of a number of conditions. Pursuant to the business combination agreement, NYSE Euronext's obligation to complete the merger is subject to the completion of the exchange offer and acquisition by Holdco of all of the Deutsche Börse shares validly tendered and not withdrawn in the exchange offer. In turn, the completion of the exchange offer is subject to the satisfaction (or waiver by Holdco with NYSE Euronext's and/or Deutsche Börse's approval, to the extent waiver is permitted under the business combination agreement, by the German Takeover Act and other applicable laws).

Appraisal Rights

Deutsche Börse

Under German law, Deutsche Börse shareholders will generally not be entitled to appraisal rights in connection with the exchange offer. However, if Holdco (directly and/or through a subsidiary) effects the post-completion reorganization by way of a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement and/or by way of a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act under German law, an appraisal proceeding (*Spruchverfahren*) is available under the German

Appraisal Proceedings Act (*Spruchverfahrensgesetz*), pursuant to which a court can be asked to determine the adequacy of consideration or compensation paid to the Deutsche Börse shareholders under the domination agreement or the combination of a domination agreement and a profit transfer agreement and in connection with the squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act, respectively.

Such appraisal proceeding will, however, not be available in connection with a squeeze-out transaction which is performed by Holdco by applying for a court order in accordance with Sections 39a *et seq.* of the German Takeover Act.

NYSE Euronext

Under the Delaware general corporation law, which governs the merger, as well as under the NYSE Euronext certificate of incorporation and bylaws, NYSE Euronext shareholders are not entitled to any appraisal rights in connection with the merger.

Directors and Management of Holdco Prior to the Combination

To date, Holdco has not conducted any material activities other than those incident to its formation and the matters contemplated by the business combination agreement. Holdco is currently managed by a management board with two managing directors, one designated by Deutsche Börse and one designated by NYSE Euronext. Decisions of the management board may only be made by both managing directors acting jointly.

Directors and Management of Holdco Following the Combination

Holdco Board of Directors

Following the combination, the Holdco board of directors will consist of 17 members, including Dr. Reto Francioni, the current chief executive officer of Deutsche Börse, who will serve as the chairman of the Holdco group and Duncan L. Niederauer, the current chief executive officer of NYSE Euronext, who will serve as the Holdco group chief executive officer. In addition, 15 non-executive directors, consisting of nine non-executive directors designated by Deutsche Börse and six non-executive directors designated by NYSE Euronext will serve on the Holdco board of directors.

A-12

Table of Contents

The directors will be appointed for a term (or several consecutive terms) that expires at the Holdco annual general meeting of shareholders occurring in 2015 (or in 2016 in the case of the Holdco group chairman and the Holdco group chief executive officer).

Holdco Group Chairman

The business combination agreement provides that Dr. Reto Francioni, the current chief executive officer of Deutsche Börse, will be the Holdco group chairman for an initial term (or several consecutive terms) expiring at the end of the annual general meeting of shareholders of Holdco occurring in 2016. During this term, the Holdco group chairman will have customary duties of a chairman, such as leading meetings of Holdco's board of directors and setting meeting agendas, as well as certain additional agreed responsibilities and authorities.

Until the sixth annual general meeting of shareholders after completion of the combination, the Holdco group chairman will have a primary office in Frankfurt and a secondary office in New York, and the Holdco group chief executive officer will have a primary office in New York and a secondary office in Frankfurt. Alternatively, the Holdco group chairman and the Holdco group chief executive officer may decide to switch their office locations in a reciprocal manner, with the Holdco group chairman having his or her primary office in New York if the Holdco group chief executive officer has his or her primary office in Frankfurt.

Holdco Group Chief Executive Officer

The business combination agreement provides that Duncan L. Niederauer, the current chief executive officer and a director of NYSE Euronext, will be the Holdco group chief executive officer for an initial term (or several consecutive terms) expiring at the end of the annual general meeting of shareholders occurring in 2016. During this term, the Holdco group chief executive officer will have the typical roles of a chief executive officer.

Board Committees

Upon completion of the combination, the Holdco board of directors will initially have the following six committees:

Audit, Finance and Risk Committee;

Nomination, Governance and Corporate Responsibility Committee;

Human Resources and Compensation Committee;

Strategy Committee;

Integration Committee; and

Technology Committee.

Each of the committees mentioned above will consist of three directors nominated for appointment upon designation by Deutsche Börse and two directors nominated for appointment upon designation by NYSE Euronext until the end of the annual general meeting of shareholders occurring in 2015.

Global Executive Committee of Holdco

The Global Executive Committee of the Holdco group will consist of four individuals who are currently executives of NYSE Euronext, including the chief executive officer of NYSE Euronext, and four individuals who are currently executives of Deutsche Börse. The Global Executive Committee will be responsible for the management of the day-to-day business of the Holdco group. The members of the Global

Edgar Filing: NYSE Euronext - Form 425

Executive Committee will strive to reach decisions on a unanimous basis, and the Holdco group chief executive officer will decide any matters which are not unanimous. Any appointment of members of the Global Executive Committee will be made by the Holdco group chief executive officer in close consultation with the Holdco group chairman and the Holdco board of directors.

Dual Headquarters

The Holdco articles of association to be effective upon completion of the combination will provide that the Holdco group will have dual headquarters in Frankfurt and New York.

A-13

Table of Contents

Third-Party Acquisition Proposals

Subject to certain exceptions, the business combination agreement generally restricts the ability of Deutsche Börse and NYSE Euronext to solicit or engage in discussions or negotiations with a third-party regarding a proposal to acquire a significant interest in either entity.

Under certain circumstances, the Deutsche Börse management board, the Deutsche Börse supervisory board and the NYSE Euronext board of directors may engage in discussions or negotiations in response to a bona fide unsolicited written acquisition proposal if they conclude that there is a reasonable likelihood that such proposal could constitute a superior proposal and due compliance with their respective fiduciary duties so requires. A superior proposal within the meaning of the business combination agreement means, with respect to either NYSE Euronext or Deutsche Börse, a bona fide written acquisition proposal obtained not in breach of the non-solicitation provisions of the business combination agreement for or in respect of 50% or more of the outstanding NYSE Euronext shares or Deutsche Börse shares (as applicable) or 50% or more of the assets of NYSE Euronext and its subsidiaries, on a consolidated basis, or Deutsche Börse and its subsidiaries, on a consolidated basis, as applicable, on terms that the NYSE Euronext board of directors or the Deutsche Börse boards, as applicable, under certain conditions concludes are more favorable to its shareholders than the transactions contemplated by the business combination agreement.

If, prior to the consummation of the exchange offer or NYSE Euronext shareholder approval, the Deutsche Börse management board, the Deutsche Börse supervisory board or the NYSE Euronext board of directors, respectively, in good faith conclude (following receipt of the advice of their financial advisors and outside legal counsel), taking into account, among other things, all legal, financial, regulatory, timing and other aspects of the acquisition proposal or offer, and taking into account any improved terms that either Deutsche Börse or NYSE Euronext may have offered, that the acquisition proposal constitutes a superior proposal, then, in the case of Deutsche Börse, the Deutsche Börse

management board and the Deutsche Börse supervisory board may change their recommendation that the Deutsche Börse shareholders tender their Deutsche Börse shares in the exchange offer, and, in the case of NYSE Euronext, the NYSE Euronext board of directors may change its recommendation that the NYSE Euronext shareholders vote in favor of the business combination agreement and the transactions contemplated by the business combination agreement.

Termination of the Business Combination Agreement

Deutsche Börse and NYSE Euronext may jointly agree to terminate the business combination agreement at any time. Either Deutsche Börse or NYSE Euronext may also terminate the business combination agreement in various circumstances, including, but not limited to, failure to receive the necessary NYSE Euronext shareholder approval, failure to obtain a necessary governmental approval, failure to achieve the minimum tender condition, failure to complete the combination by December 31, 2011 (subject to extension to March 31, 2012 by either party in certain circumstances) or upon the breach by the other party of certain of its obligations under the business combination agreement.

Termination Fees

Under the business combination agreement, NYSE Euronext will be required to pay Deutsche Börse a termination fee of 250 million if:

an alternative acquisition proposal is made for NYSE Euronext, the NYSE Euronext board of directors has changed its recommendation and either (1) NYSE Euronext or Deutsche Börse terminates the business combination agreement because the NYSE Euronext shareholders fail to adopt the business combination agreement or (2) Deutsche Börse terminates the business combination agreement because of the change in recommendation by the NYSE Euronext board; or

an alternative acquisition proposal is made for NYSE Euronext, the NYSE Euronext shareholders do not adopt the business

Table of Contents

combination agreement and, within 9 months of termination of the business combination agreement, NYSE Euronext engages in an alternative transaction with a third party involving 40% or more of NYSE Euronext's equity or assets. Deutsche Börse will be required to pay NYSE Euronext a termination fee of \$250 million if:

an alternative acquisition proposal is made for Deutsche Börse, either the Deutsche Börse supervisory board or management board has changed its recommendation and either (1) NYSE Euronext or Deutsche Börse terminates the business combination agreement because the minimum tender condition has not been satisfied prior to expiration of the offer acceptance period; or (2) NYSE Euronext terminates the business combination agreement because of a change in recommendation by the Deutsche Börse supervisory board or management board; or

an alternative acquisition proposal is made for Deutsche Börse, the minimum tender condition has not been satisfied prior to expiration of the offer acceptance period and, within 9 months of termination of the business combination agreement, Deutsche Börse engages in an alternative transaction with a third party involving 40% or more of Deutsche Börse's equity or assets.

Stock Exchange Listing

Deutsche Börse shares are listed on the Frankfurt Stock Exchange under the symbol DB1. NYSE Euronext shares, which are listed on the New York Stock Exchange and Euronext Paris under the symbol NYX, will be delisted from the New York Stock Exchange and Euronext Paris as soon as practicable after the completion of the combination, as permitted by applicable law.

Holdco intends to list its shares on the New York Stock Exchange subject to the notice of issuance, and will apply prior to the time of delivery of the Holdco shares pursuant to the exchange offer and the merger to admit its shares to trading on the regulated market (*regulierter Markt*) of the Frankfurt

Stock Exchange and the sub-segment thereof with additional post-admission obligations (Prime Standard) and the regulated market segment of Euronext Paris.

Certain Differences in Shareholder Rights Before and After the Combination

Until the completion of the combination (and in the case of Deutsche Börse shareholders that do not tender their Deutsche Börse shares in the exchange offer, until the completion of the post-completion reorganization), Delaware law and the NYSE Euronext certificate of incorporation and bylaws will continue to govern the rights of NYSE Euronext shareholders, and German law and the Deutsche Börse articles of incorporation will continue to govern the rights of Deutsche Börse shareholders. After completion of the combination (or, as applicable, the post-completion reorganization), Dutch law and the Holdco articles of association will govern the rights of Holdco shareholders.

Material differences in the rights of NYSE Euronext shareholders prior to the combination and the rights of Holdco shareholders after the combination, on the other hand, will include, among others, the following:

Amendments to Holdco's articles of association and certain extraordinary actions will require the approval of at least a two-thirds majority of the votes cast in a general meeting of shareholders in order to be effective.

The election of directors (other than those nominated by the Holdco board of directors) and the removal of directors will require a two-thirds majority of the votes cast, and such votes must represent more than one-half of Holdco's issued capital on the resolution proposed for such an action.

Each of the Holdco directors initially designated by NYSE Euronext and Deutsche Börse will be nominated by the Holdco board of directors for re-election pursuant to a binding nomination (within the meaning of Section 2:133 of the Dutch Civil Code) at each of the annual general meetings of shareholders in 2012, 2013 and 2014, except that the Holdco group

A-15

Table of Contents

chairman and the Holdco group chief executive officer will each also be nominated pursuant to a binding nomination for re-election to the Holdco board of directors at the annual general meeting of shareholders occurring in 2015. Under Dutch law and Holdco's articles of association, binding nominations may only be overridden by a shareholders resolution passed by a two-thirds majority of the votes cast, with such votes representing more than one-half of Holdco's issued capital. Alternatively, if Holdco determines that it is a foreign private issuer and is not otherwise required by applicable law, regulation or stock exchange listing standards to hold annual director elections, then the initial members of the Holdco board of directors will be appointed to serve on the board for a term that expires at the Holdco annual general shareholders meeting in 2015 (or in 2016 in the case of the Holdco group chairman and the Holdco group chief executive officer).

Summary of Risk Factors

Risks Relating to the Combination

Because the exchange ratios in the exchange offer and the merger are fixed, the market value of the Holdco shares received by Deutsche Börse shareholders in the exchange offer or the Holdco shares received by NYSE Euronext shareholders in the merger may be less than the market value of the Deutsche Börse shares or NYSE Euronext shares that such holder held prior to the completion of the combination.

Obtaining required regulatory approvals may prevent or delay completion of the combination or reduce the anticipated benefits of the combination or may require changes to the structure or terms of the combination or to the governance structure of Holdco.

The implementation of the post-closing reorganization may be delayed or the agreements necessary to such implementation may not take effect. As a result, the anticipated benefits from the combination may not be realized in full or at all.

Holdco may not be able to successfully integrate the businesses and operations of Deutsche Börse Group and/or NYSE Euronext in a timely fashion or at all. This could have material adverse effects on Deutsche Börse Group's and NYSE Euronext's operations and their relationships with market participants, employees, regulatory authorities and other bodies as well as on their businesses, cash flows, assets, financial condition and results of operations.

Holdco may fail to realize the anticipated cost savings, growth opportunities and synergies and other benefits anticipated from the combination, which could have a material adverse effect on Holdco's business, cash flows, assets, financial condition and results of operations.

Holdco, Deutsche Börse Group and NYSE Euronext will incur significant transaction and combination-related costs in connection with the combination, some of which are payable regardless of whether the combination is completed.

Upon completion of the combination certain change-of-control rights under material agreements may be triggered.

Uncertainties associated with the combination may cause a loss of management personnel and other key employees, which could materially adversely affect the business and results of operations of Holdco.

Failure to complete the combination could negatively affect the prices of the Deutsche Börse shares and the NYSE Euronext shares and the future businesses and financial results of Deutsche Börse Group and NYSE Euronext.

The rights and responsibilities of the shareholders of Holdco will be governed by Dutch law and Holdco's articles of

A-16

Table of Contents

association, which will differ in some respects from the rights and responsibilities of shareholders under German or Delaware law and the current organizational documents of Deutsche Börse and NYSE Euronext.

U.S. civil liabilities may not be enforceable.

Deutsche Börse shareholders and NYSE Euronext shareholders will have a reduced ownership and voting interest after the combination and will exercise less influence over management.

If Deutsche Börse shareholders do not tender their Deutsche Börse shares in the exchange offer, the consideration that Deutsche Börse shareholders may receive at a later point in time may substantially differ in form and/or value from the consideration that they would have received had they tendered their Deutsche Börse shares in the exchange offer, and they may also be subject to additional taxes.

Shareholders of Deutsche Börse not participating in the exchange offer will be diluted due to the obligation of Deutsche Börse to tender its treasury shares in the exchange offer.

Following the completion of the exchange offer, fewer Deutsche Börse shares will remain outstanding and, as a result, the free float of Deutsche Börse shares will be significantly lower than before the completion of the combination, which could materially adversely affect the liquidity and market value of those shares.

Risks Relating to the Businesses of Holdco, Deutsche Börse Group and NYSE Euronext

Insufficient systems capacity and systems failures could adversely affect Deutsche Börse Group's and NYSE Euronext's businesses.

Deutsche Börse Group and NYSE Euronext operate in a business environment that continues to experience significant and rapid technological change.

Service deficiency in Deutsche Börse Group's and NYSE Euronext's manual data processing could result in losses.

A failure to protect Deutsche Börse Group's and NYSE Euronext's intellectual property rights, or allegations that Deutsche Börse Group and/or NYSE Euronext have infringed intellectual property rights of others, could adversely affect Holdco's business.

Deutsche Börse Group and NYSE Euronext face significant competition and compete globally with a broad range of market participants for listings, trading, clearing and settlement volumes. Increasing competition could result in a decrease of their trading volumes and revenues.

Holdco's business may be adversely affected by intense price competition.

A change in the policy of the administrative bodies of the exchanges in Germany could reduce Deutsche Börse Group's revenue.

Edgar Filing: NYSE Euronext - Form 425

Adverse economic conditions could negatively affect Holdco's business and cash flows, financial condition and results of operations.

Broad market trends and other factors beyond the control of Deutsche Börse Group and NYSE Euronext could significantly reduce demand for their services.

Deutsche Börse Group and NYSE Euronext may be at greater risk from terrorism than other companies.

Deutsche Börse Group and NYSE Euronext are exposed to fluctuations in foreign exchange rates and interest rates.

Deutsche Börse Group and NYSE Euronext are exposed to liquidity risk and may lack sufficient liquidity to meet their daily payment obligations or may incur increased refinancing costs which could adversely affect Holdco's business and cash flows, financial and results of operation.

A-17

Table of Contents

Deutsche Börse Group's and NYSE Euronext's businesses may be adversely affected by risks associated with clearing and settlement activities.

Deutsche Börse Group's share of trading in Deutsche Börse Group listed securities and NYSE Euronext's share of trading in NYSE Euronext listed securities has declined and may continue to decline.

Deutsche Börse Group depends on its large customers.

If Deutsche Börse Group's or NYSE Euronext's goodwill or intangible assets become impaired, Deutsche Börse Group, NYSE Euronext and, after the combination, Holdco may be required to record a significant charge to earnings.

Deutsche Börse Group and NYSE Euronext are subject to significant litigation risks and other liabilities.

Deutsche Börse Group's and NYSE Euronext's networks and those of their third-party service providers may be vulnerable to security risks.

If the indices and other products of Deutsche Börse Group and NYSE Euronext contain undetected errors or fail to perform properly, this could have a material adverse effect on their business, financial condition or results of operation.

Deutsche Börse Group's and NYSE Euronext's reliance on third parties could adversely affect their businesses if these third parties cease to perform the functions that they currently perform.

Holdco will face risks when entering into or increasing its presence in markets where Deutsche Börse Group and NYSE Euronext do not currently compete or when entering into new business lines.

Damage to Holdco's, Deutsche Börse Group's and/or NYSE Euronext's reputation could materially adversely affect Holdco's business.

Deutsche Börse Group and NYSE Euronext may complete acquisitions and dispositions prior to completion of the combination that may affect their respective businesses and/or the value of the consideration to be received by Deutsche Börse shareholders and NYSE Euronext shareholders in the combination.

Future business combinations, acquisitions, partnerships and joint ventures may require significant resources and/or result in significant unanticipated costs or liabilities.

Risks Relating to Regulatory Environment and Legal Risks

Further uncertainties in connection with the resolution on and implementation of new regulations may reduce the level of activities of Deutsche Börse Group and/or NYSE Euronext.

Edgar Filing: NYSE Euronext - Form 425

Regulatory changes or court rulings may have an adverse impact on Deutsche Börse Group's and NYSE Euronext's ability to derive revenue from market data fees.

The legal and regulatory environment in the United States may make it difficult for NYSE Euronext's U.S. exchanges to compete with non-U.S. exchanges for the listings of non-U.S. companies and adversely affect its competitive position.

Deutsche Börse Group and NYSE Euronext operate in a highly regulated industry and may be subject to censures, fines and other legal proceedings if they fail to comply with their legal and regulatory obligations.

Holdco may face competitive disadvantages, or may lose or impede its business opportunities, if it does not receive necessary or timely regulatory approvals for new business initiatives.

The U.S. exchanges of NYSE Euronext and Deutsche Börse Group rely on the Financial Industry Regulatory Authority, Inc. (which is referred to in this document as "FINRA") to perform certain regulatory functions, and Holdco's business could be adversely affected if FINRA ceases to perform these functions.

Table of Contents

Deutsche Börse Group's obligations in connection with its regulatory functions may limit its funding resources.

Regulatory changes requiring exchange operators to allow additional central counterparties to clear trades on their exchanges may adversely affect Deutsche Börse Group's and NYSE Euronext's clearing operations.

Conflicts of interest between Deutsche Börse Group's and NYSE Euronext's for-profit status and their regulatory responsibilities may adversely affect their businesses.

Risks Relating to Tax Matters

There can be no assurances that holders of NYSE Euronext shares will not be required to recognize gain for U.S. federal income tax purposes upon the exchange of NYSE Euronext shares for Holdco shares in the merger.

Holdco, Deutsche Börse, NYSE Euronext and their respective subsidiaries are subject to tax audits and could incur significant tax liabilities as a result of such audits.

Holdco may be or become taxable in a jurisdiction other than the Netherlands and/or may be or become a dual resident company for tax purposes. This may increase the aggregate tax burden on Holdco and its shareholders. The combination of the businesses of Deutsche Börse Group and NYSE Euronext may result in an increase in the overall tax burden of the combined group.

Risks Relating to Holdco Shares

There has been no prior public market for Holdco shares, and the market price of Holdco shares may be volatile.

Following the completion of the combination, Holdco may cease to be a foreign private issuer, which could result in significant additional costs and expenses.

If Holdco continues to be a foreign private issuer, its shareholders may not receive the information about Holdco that its shareholders would typically receive from a publicly traded U.S. domestic company.

The level of any dividend paid in respect of Holdco shares is subject to a number of factors, including the financial condition and results of operations of Deutsche Börse Group and NYSE Euronext, as well as the distributions of operating earnings to Holdco by Deutsche Börse Group and NYSE Euronext and the freely distributable reserves of Holdco.

Shareholders of Holdco could be diluted in the future.

Selected Financial Information of Holdco

Holdco was formed on February 10, 2011; accordingly, the financial statements as of the date of this document only consist of the opening balance sheet and the notes thereto. As Holdco had no operations as of February 10, 2011, Holdco omitted the statement of comprehensive income, statement of cash flows and statement of changes in equity.

The opening balance sheet of Holdco included assets in the amount of \$45,000 as well as corresponding issued and paid-up share capital in the amount of \$45,000.

Selected Historical Financial Information of NYSE Euronext

The following selected consolidated financial data has been taken from the audited historical consolidated financial statements and related notes for the years ended December 31, 2006 through December 31, 2010, which have been prepared in accordance with U.S. GAAP. As a result of a change in NYSE Euronext's reportable business segments effective in the first quarter of 2010, historical financial data has been revised to conform to this change. The information set forth below is not necessarily indicative of NYSE Euronext's results of future operations.

NYSE Euronext shareholders' equity	6,796	6,871	6,556	9,384	1,669

Notes:

- (1) The results of operations of Euronext have been included since April 4, 2007.
- (2) Effective July 30, 2007, the member firm regulatory functions of NYSE Regulation, including related enforcement activities, risk assessment and the arbitration service, were transferred to FINRA. Regulatory revenues, a component of other revenues, decreased as a result of this transfer and in connection with pricing changes.
- (3) The operations of GL Trade, which were sold on October 1, 2008, are reflected as discontinued.
- (4) Represents liabilities due after one year, including accrued employee benefits, deferred revenue, and deferred income taxes.
- (5) Adjusted to reflect the March 7, 2006 merger between the New York Stock Exchange, Inc. and Archipelago Holdings, Inc., giving retroactive effect to the issuance of shares to former New York Stock Exchange, Inc. members.

Table of Contents**Selected Historical Financial Information of Deutsche Börse Group**

The following financial information has been taken from the audited consolidated financial statements of Deutsche Börse Group and related notes as at and for the years ended December 31, 2010, 2009, 2008, 2007 and 2006 and from the unaudited condensed consolidated financial statements and related notes as at and for the three-month period ended March 31, 2011, respectively, all of which have been prepared in accordance with IFRS. As a result of a change in Deutsche Börse Group's reportable business segments effective in the first quarter 2010, historical financial information has been revised to conform to this change. The information set forth below is not necessarily indicative of Deutsche Börse Group's future operations.

	Income Statement Data

Table of Contents**Comparative Per Share Market Information and Exchange Rates**

The following table sets forth the closing market price per share of Deutsche Börse shares and NYSE Euronext shares in euro or U.S. dollar, as the case may be, as reported on the Frankfurt Stock Exchange for Deutsche Börse shares or the New York Stock Exchange and Euronext Paris for NYSE Euronext shares. In each case, the prices are given:

as of February 8, 2011 (the last trading day prior to the date on which Deutsche Börse and NYSE Euronext publicly confirmed their engagement in advanced discussions regarding a potential business combination);

as of February 14, 2011 (the last trading day prior to the date of public announcement of the execution of the business combination agreement); and

as of April 29, 2011 (the latest practicable trading date prior to the date of this document).

You are urged to obtain current market quotations for Deutsche Börse shares and NYSE Euronext shares before making your decision with respect to the adoption of the business combination agreement and approval of the transactions contemplated by the business combination agreement. Deutsche Börse shares are listed on the Frankfurt Stock Exchange under the symbol `DB1`. NYSE Euronext shares are listed on the New York Stock Exchange and Euronext Paris under the symbol `NYX`.

The market price per share of Deutsche Börse shares and NYSE Euronext shares could change significantly and may not be indicative of the value of Holdco shares once they start trading. Because the exchange ratios will not be adjusted for changes in the market price of Deutsche Börse shares and NYSE Euronext shares, the value of Holdco shares that you will receive at the time of completion of the combination may vary significantly from the market value of the Holdco shares that you would have received if the combination were consummated on the date of the business combination agreement or on the date of this document.

Notes:

(1) The average of the rates on the last business day of each month during the applicable period.

(2) The average of the daily rates on each business day during the applicable period.

Source: Bloomberg.

The rates presented above may differ from the actual rates used in the preparation of Holdco's financial statements and other financial information appearing in this document. Holdco's inclusion of such rates is not meant to suggest that the U.S. dollar amounts actually represent euro amounts or that such amounts could have been converted to U.S. dollars at any particular rate, if at all.

Table of Contents**RISK FACTORS**

Before deciding to tender your shares in the exchange offer (if you are a Deutsche Börse shareholder) or vote in favor of the merger (if you are a NYSE Euronext shareholder), you should carefully review and consider the following risk factors and the other information contained in this document. The occurrence of one or more of the events or circumstances described in these risk factors alone or in combination with other events or circumstances may have a material adverse effect on Deutsche Börse Group's and NYSE Euronext's business and cash flows, financial condition and results of operations and, upon completion of the combination, on Holdco's business and cash flows, financial condition and results of operations. The risks discussed below may not prove to be exhaustive and are based on certain assumptions made by Holdco, Deutsche Börse Group and NYSE Euronext which later may prove to be incorrect or incomplete. The risks discussed below may not be the only risks to which Holdco or, upon completion of the combination, through its subsidiaries, Deutsche Börse and NYSE Euronext, is exposed. The order in which the risk factors are presented does not reflect the likelihood of their occurrence or the magnitude or significance of the individual risks. Additional risks and uncertainties of which Holdco, Deutsche Börse Group and NYSE Euronext are not currently aware or which Holdco, Deutsche Börse Group and NYSE Euronext do not consider significant at present could likewise have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations. The market price of the Holdco shares could fall if any of these risks were to materialize, in which case investors could lose all or part of their investment.

Risks Relating to the Combination

Because the exchange ratios in the exchange offer and the merger are fixed, the market value of the Holdco shares received by Deutsche Börse shareholders in the exchange offer or the Holdco shares received by NYSE Euronext shareholders in the merger may be less than the market value of the Deutsche Börse shares or NYSE Euronext shares that such holder held prior to the completion of the combination.

Deutsche Börse shareholders who tender their Deutsche Börse shares in the exchange offer will receive one Holdco share for each tendered Deutsche Börse share, and NYSE Euronext shareholders will receive 0.47 of a Holdco share for each of their NYSE Euronext shares in the merger. These exchange ratios are fixed and will not vary even if the market price of Deutsche Börse shares or NYSE Euronext shares varies. The market value of Deutsche Börse shares and NYSE Euronext shares at the time of the completion of the combination may vary significantly from their prices on the date of the business combination agreement, the date of publication of this document, the date on which Deutsche Börse shareholders tender their shares in the exchange offer or the date on which NYSE Euronext shareholders vote on the merger. Because the exchange ratios will not be adjusted to reflect any changes in the market price of the Deutsche Börse shares or NYSE Euronext shares, the value of the consideration paid to the Deutsche Börse shareholders who tender their shares in the exchange offer and to the NYSE Euronext shareholders in the merger may be higher or lower than the market value of their shares on earlier dates.

Changes in share price may result from a variety of factors that are beyond the control of Holdco, Deutsche Börse Group and NYSE Euronext, including their respective business prospects, market conditions, regulatory considerations, governmental actions, legal proceedings and other developments. Market assessments of the benefits of the combination and of the likelihood that the combination will be completed as well as general and industry specific market and economic conditions may also have an adverse effect on share prices.

In addition, it is possible that the combination may not be completed until a significant period of time has passed after the expiration of the offer acceptance period and the NYSE Euronext special meeting. As a result, the market values of the Deutsche Börse shares and NYSE Euronext shares may vary significantly from the date of the expiration of the offer acceptance period and/or NYSE Euronext special meeting to the date of the completion of the combination. In calendar year 2010, the price of Deutsche Börse shares ranged from 45.45 to 59.00, as reported on the Frankfurt Stock Exchange, and the price of NYSE Euronext shares ranged from \$22.30 to \$34.82, as reported on the New York Stock Exchange, and from 16.23 to 25.81, as reported on

Table of Contents

Euronext Paris. Investors are urged to obtain up-to-date prices for Deutsche Börse shares, which are listed on the Frankfurt Stock Exchange under the symbol DB1, and NYSE Euronext shares, which are listed on the New York Stock Exchange and Euronext Paris under the symbol NYX.

Obtaining required regulatory approvals may prevent or delay completion of the combination or reduce the anticipated benefits of the combination or may require changes to the structure or terms of the combination or to the governance structure of Holdco.

Completion of the combination is conditioned upon, among other things, the receipt of material governmental authorizations, consents, orders and approvals, including the approval of competition and antitrust authorities (e.g., the European Commission, the FTC and the DOJ) and securities and other financial regulatory authorities (e.g., BaFin, the SEC, the College of Euronext Regulators and certain European regulators, including the Hessian Exchange Supervisory Authority (*Hessisches Ministerium für Wirtschaft, Verkehr und Landesentwicklung*), the AMF, the Dutch Minister of Finance and the FSA. These regulatory conditions may not be satisfied until months after the expiration of the offer acceptance period for Deutsche Börse shares. Under German law, the only conditions to an exchange offer that can remain outstanding after the acceptance period of such offer are regulatory conditions, and, under German law, no offer conditions, including regulatory conditions, may be waived following the expiration of the acceptance period of an offer. The parties have agreed that, in the exchange offer, any regulatory conditions that remain outstanding after the offer acceptance period must be satisfied by no later than March 31, 2012. If any such regulatory condition is not satisfied by March 31, 2012, by operation of German law, the exchange offer will terminate, and the parties do not have the ability to waive such regulatory condition. It is therefore possible that the NYSE Euronext stockholders and Deutsche Börse shareholders would have to wait up until March 31, 2012 before it is determined that the exchange offer will be completed and the merger consummated (or otherwise terminated because a required regulatory approval has not been obtained). During this period, Deutsche Börse and NYSE Euronext may continue to divert management focus and resources from other strategic opportunities and from operational matters and incur additional costs and expenses related to the combination. In addition, Deutsche Börse shareholders who tender their Deutsche Börse shares will not be permitted to withdraw their tendered shares during this period, and will be able to trade their shares only in the as-tendered trading market on the Frankfurt Stock Exchange, which may be less liquid than the current trading market for Deutsche Börse shares.

In addition, in connection with granting these regulatory approvals, the respective governmental or other authorities may impose burdensome conditions on, or require significant divestitures or other changes relating to, the divisions, operations or assets of Deutsche Börse Group or NYSE Euronext. For example, BaFin, the SEC, the FTC, the DOJ and the European Commission and financial regulatory authorities may require changes to the structure of the combination, changes to the governance structure of Holdco and its subsidiaries or the Holdco articles of association including voting rights limitations and limitations on shareholding in Holdco, as a precondition to their approval of the combination. They may also seek to impose pricing controls that limit the amount that Holdco and its subsidiaries can charge for its products and services. These restrictions may limit the potential to participate in further market consolidation, undertake future acquisitions and could also negatively affect the results of operations and financial condition of Holdco and its subsidiaries. None of Holdco, Deutsche Börse or NYSE Euronext can predict what, if any, changes may be required. Certain changes may require NYSE Euronext to obtain the approval of its shareholders and, therefore, to re-solicit proxies, which may result in significant additional expenses and costs. More generally, these and other conditions, divestitures or other changes may prevent or delay completion of the combination or may reduce the anticipated benefits of the combination, which could also have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Table of Contents

The implementation of the post-closing reorganization may be delayed or the agreements necessary for the implementation may not take effect. As a result, the anticipated benefits from the combination may not be realized in full or at all.

Holdco intends as soon as practicable after completion of the exchange offer and the merger to effectuate one or more corporate reorganization transactions, which may include entering (directly or through a wholly owned subsidiary) into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement and/or a squeeze-out transaction. The effectiveness of these agreements and/or the squeeze-out transaction may be delayed for an uncertain time, including, for example, due to shareholder litigation or may not be achievable at all. Accordingly, Holdco may not be able to achieve the anticipated benefits of the combination in full or at all, or may take longer than expected to realize such benefits, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Holdco may not be able to successfully integrate the businesses and operations of Deutsche Börse Group and/or NYSE Euronext in a timely fashion or at all. This could have material adverse effects on Deutsche Börse Group's and NYSE Euronext's operations and their relationships with market participants, employees, regulatory authorities and other bodies as well as on their businesses, cash flows, assets, financial condition and results of operations.

Deutsche Börse and NYSE Euronext currently operate as independent companies, and will continue to do so until the completion of the combination. Following the combination, Holdco's management may face significant challenges in integrating the two companies' businesses, technologies, organizations, procedures, policies and operations, as well as in addressing differences in the business cultures of the two companies, and retaining key Deutsche Börse Group and NYSE Euronext personnel. The integration process may prove to be more complex and time consuming and require more substantial resources and effort than anticipated, which could have a material adverse effect on Deutsche Börse Group's and NYSE Euronext's ongoing businesses and relationships with market participants, employees, regulators and others and could also have a material adverse effect on the business and cash flows, financial condition and results of operations of Holdco. In addition, if the integration of Deutsche Börse Group and NYSE Euronext businesses is partially unsuccessful or Holdco does not achieve the expected benefits of the combination as fast or to the extent anticipated by financial analysts or investors, or Holdco's financial results are not consistent with the expectations of financial analysts or investors, the market price of Holdco shares may decline.

Holdco may fail to realize the anticipated cost savings, growth opportunities and synergies and other benefits anticipated from the combination.

The success of the combination will depend, in part, on Holdco's ability to realize anticipated cost savings, revenue synergies and growth opportunities from combining the businesses of Deutsche Börse Group and NYSE Euronext. Holdco expects to benefit from operational synergies resulting from the consolidation of capabilities and elimination of redundancies as well as greater efficiencies from increased scale, market integration and automation. Specifically, Deutsche Börse and NYSE Euronext expect that the combined company will achieve annualized cost savings of approximately 400 million (or \$532 million) within three years after the combination, principally from the consolidation of information technology, clearing and market operations as well as from the consolidation of corporate administration and support functions. The cost savings are expected to be realized at an annual run rate of 25% by the end of the first year, 50% by the end of the second year and 100% by the end of the third year following the completion of the combination.

Deutsche Börse and NYSE Euronext also expect that the combination will create at least 100 million (or \$133 million) in revenue synergies annually after the combination through cross-selling and distribution opportunities, increased turnover from liquidity pool consolidation and new products, a progressive introduction of Deutsche Börse Group's clearing capabilities and expanded scope for technology services and market data offerings.

Table of Contents

There is a risk, however, that the businesses of Deutsche Börse Group and NYSE Euronext may not be combined in a manner that permits these costs savings and revenue synergies to be realized in the time currently expected, or at all. For example, the completion of the combination may be delayed, challenged by parties opposing the completion of the combination or may not be possible at all, or necessary approvals might require certain commitments or undertakings regarding operations or employees. This may limit or delay the ability of Holdco's management to integrate the two companies' technologies, organizations, procedures, policies and operations. In addition, a variety of factors, including but not limited to wage inflation, currency fluctuations and difficulty integrating technology platforms, may adversely affect Holdco's anticipated cost savings and revenues. Also, the combined company must achieve its anticipated cost savings without adversely affecting its revenues. If Holdco is not able to successfully achieve these objectives, the anticipated benefits of the combination may not be realized fully, or at all, or may take longer to realize than expected, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Holdco, Deutsche Börse Group and NYSE Euronext will incur significant transaction and combination-related costs in connection with the combination, some of which are payable regardless of whether the combination is completed.

Holdco, Deutsche Börse and NYSE Euronext expect to incur a number of non-recurring costs in connection with the transaction, including implementation and restructuring costs associated with combining the operations of the two companies. Deutsche Börse and NYSE Euronext estimate that they will incur approximately 100 million of legal, banking and other professional fees and costs related to the combination, of which approximately 55 million will be contingent upon approval and consummation of the combination and approximately 45 million of which will be payable regardless of whether the combination is completed. In addition, Holdco, Deutsche Börse and NYSE Euronext expect to incur approximately 600 million to 800 million (or 1.5 to 2.0 times the anticipated full run-rate cost synergies) of pre-tax implementation and restructuring costs associated with combining the operations of Deutsche Börse and NYSE Euronext. Additional costs substantially in excess of currently anticipated costs may also be incurred in the integration of the businesses of Deutsche Börse Group and NYSE Euronext.

Although Holdco expects that the cost savings, as well as the realization of other efficiencies related to the integration of the businesses, will offset these transaction- and combination-related costs over time, this net benefit may not be achieved in the near term, or at all. In addition, the timeline in which cost savings should be reached is lengthy. Failure of Holdco to realize these efficiencies in a timely manner or at all could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Upon completion of the combination, certain change-of-control rights under material agreements may be triggered.

Deutsche Börse and NYSE Euronext are parties to agreements that contain change-of-control provisions that may be triggered upon completion of the combination. Upon the triggering of these change-of-control provisions, the counterparties to the agreement may be able to exercise certain rights that have a negative effect on Deutsche Börse, NYSE Euronext or, after the combination, Holdco and their respective subsidiaries. For example, there are change-of-control provisions contained in Deutsche Börse's cooperation agreement with SIX Group AG regarding Scoach Holding S.A. and the shareholders' agreement with SIX Swiss Exchange AG regarding Eurex. If the change-of-control provision in the agreement regarding Eurex were triggered as a result of the combination, and the shareholders' agreement was terminated as a result, Deutsche Börse would, following such termination, obtain all shares in Eurex Frankfurt AG and its subsidiaries (including the shares in ISE), and SIX Swiss Exchange would obtain all shares in Eurex Zürich AG. Deutsche Börse would be obliged to refund SIX Swiss Exchange its indirect 15% investment in ISE, with the amount of such refund determined by reference to, among other things, ISE's value on the date of termination. Moreover, the shares in European Energy Exchange AG (which is referred to in this document as "EEX") would be transferred from Eurex Zürich AG to Deutsche Börse, subject to the provisions of the consortium agreement between the shareholders of EEX. If the Scoach

Table of Contents

cooperation between SIX Swiss Exchange and Deutsche Börse were terminated, Deutsche Börse may be entitled to compensation not to exceed 10 million euros. It is not clear to Deutsche Börse whether any payments would be due following a valid termination based on a change of control. However, if such payments were required to be made, they would primarily affect Deutsche Börse's liquidity because Deutsche Börse would obtain all of the share capital and right to profits from Eurex Frankfurt AG and its subsidiaries, including ISE, and the 56.14% shareholding in EEX. There are also change-of-control provisions contained in NYSE Euronext's credit agreements and the indentures governing its outstanding notes, which could require NYSE Euronext to repurchase approximately \$2.1 billion worth of its outstanding bonds if it were to undergo a change of control as contemplated by those agreements and subsequently suffer a ratings downgrade below an investment grade rating. If a counterparty to these agreements were to exercise its rights as a result of these change-of-control or other provisions, Holdco could face detrimental consequences, depending on the particular change-of-control right, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Uncertainties associated with the combination may cause a loss of management personnel and other key employees, which could materially adversely affect the business and results of operations of Holdco.

Deutsche Börse Group and NYSE Euronext are dependent on the experience and industry knowledge of their respective management personnel and other key employees to operate their businesses and execute their business plans, particularly in the area of information technology. There is a shortage in the employment market for specialists in the information technology field, and Deutsche Börse Group and NYSE Euronext compete for employees with a large number of other enterprises in the information technology industry. Holdco's success following the combination will depend in part upon its ability to attract and retain management personnel and other key employees. Current and prospective employees of Deutsche Börse Group and NYSE Euronext may experience uncertainty about their roles within the combined company following the combination, which may adversely affect the ability of Holdco to attract or retain management personnel and other key employees. A loss of management personnel or other key employees could materially adversely affect Holdco's business and cash flows, financial condition and results of operations.

Failure to complete the combination could negatively affect the prices of the Deutsche Börse shares and the NYSE Euronext shares and the future businesses and financial results of Deutsche Börse Group and NYSE Euronext.

If the combination is not completed, the ongoing businesses of Deutsche Börse Group and/or NYSE Euronext may be adversely affected, and Deutsche Börse Group and NYSE Euronext will be subject to a number of risks, including the following:

being required to pay a termination fee of \$250 million under certain circumstances provided in the business combination agreement or having to pay certain costs relating to the combination, such as legal, accounting and other transactions fees; and

having had the focus of the management of Deutsche Börse Group and NYSE Euronext on the combination instead of on pursuing other business opportunities that could have been beneficial to the respective company.

If the combination is not completed, these risks may materialize and could have a material adverse effect on the business and cash flows, financial condition and results of operations of Deutsche Börse Group or NYSE Euronext.

Table of Contents

The rights and responsibilities of the shareholders of Holdco will be governed by Dutch law and Holdco's articles of association, which will differ in some respects from the rights and responsibilities of shareholders under German or Delaware law and the current organizational documents of Deutsche Börse and NYSE Euronext.

Following the completion of the combination, Holdco's corporate affairs will be governed by its articles of association and the laws governing companies incorporated in the Netherlands. The rights of Holdco's shareholders and the responsibilities of members of the Holdco board of directors under Dutch law will differ from the rights of shareholders and the responsibilities of a company's board of directors under German law or the laws of Delaware.

For example, Holdco's articles of association will also provide that each of the Holdco directors designated by NYSE Euronext and Deutsche Börse, respectively, prior to completion of the combination will be nominated by the Holdco board of directors for re-election pursuant to a binding nomination (within the meaning of Section 2:133 of the Dutch Civil Code) at each of the annual general meetings of shareholders in 2012, 2013 and 2014 (and, additionally, 2015 in the case of the Holdco group chairman and the Holdco group chief executive director). Under Dutch law, binding nominations may only be overridden by a shareholder resolution passed by a two-thirds majority of the votes cast, with such votes representing more than one-half of Holdco's issued capital. Alternatively, if Holdco determines that it is a foreign private issuer and is not otherwise required by applicable law, regulation or stock exchange listing standards to hold annual director elections, then the initial members of the Holdco board of directors will be appointed to serve on the board for a term that expires at the Holdco annual general shareholders meeting in 2015 (or in 2016 in the case of the Holdco group chairman and the Holdco group chief executive officer). By contrast, the current amended and restated bylaws of NYSE Euronext provide that directors of NYSE Euronext are elected by the vote of a majority of the votes cast at a meeting at which a quorum is present, except that a plurality voting standard applies in the case of a contested election. The provisions of Dutch corporate law and Holdco's articles of association have the effect of concentrating control over certain corporate decisions and transactions in the hands of the Holdco board of directors. As a result, holders of Holdco shares may have more difficulty in protecting their interests in the face of actions by members of the Holdco board of directors than if Holdco were incorporated in Germany or Delaware. Dutch law also requires that in the performance of its duties, the Holdco board of directors will need to consider the interests of Holdco, and its shareholders, employees and other stakeholders, and it is possible that some of these parties will have interests that differ from, or are in addition to, the interests of the shareholders of Holdco.

Another difference will be the ownership and voting limitations on Holdco shares. The Holdco articles of association will provide that no person, either alone or together with its related persons (as defined in the Holdco articles of association), may beneficially own Holdco shares entitling the holder(s) thereof to cast votes representing in the aggregate more than 40% (or 20% in certain cases, as specified in the Holdco articles of association) of all votes that may be cast on any matter. If a person exceeds the ownership limitation, it will be required to transfer the number of Holdco shares held in excess of this limitation, and the rights to vote, attend general meetings of Holdco and receive dividends or other distributions attached to shares held in excess of the ownership limitation will be suspended for so long as the limitation is exceeded.

In addition, the Holdco articles of association will provide that no person, either alone or together with its related persons (as defined in the Holdco articles of association), will be entitled to vote or cause the voting of Holdco shares beneficially owned by such person or its related persons in excess of twenty percent (20%) of all votes that may be cast on any matter, and no person, either alone or together with its related persons, may acquire the ability to vote in excess of 20% of all votes entitled to be cast on any matter by virtue of agreements entered into by it with other persons not to vote outstanding Holdco shares. If a person exceeds the voting limitation, Holdco will be required to disregard any votes purported to be cast in excess of this limitation. These limitations on ownership and voting will apply to each person unless, among other requirements, it has obtained a written confirmation from the Holdco board of directors that the board has resolved to expressly permit such ownership and voting and such resolution has been filed with, and approved by, the SEC and to the extent required, the

Table of Contents

relevant European regulators. These provisions of the Holdco articles of association could delay or deter a change of control of Holdco, which could adversely affect the price of Holdco shares.

These ownership and voting limitations are similar in certain respects to the limitations that currently apply to NYSE Euronext shares (although, among other differences, those limitations are set at 10% and 20%, respectively). Deutsche Börse AG shareholders are currently not subject to these ownership and voting limitations, although a concentration of ownership or voting power of Deutsche Börse AG shares could in some circumstances result in shares of its indirect subsidiary International Securities Exchange Holdings, Inc. being automatically transferred to a Delaware trust, and other restrictions on ownership and voting may apply under applicable laws.

It may be difficult for holders of Holdco shares who are not familiar with Dutch corporate law and market practice to exercise their shareholder rights due to foreign legal concepts, language and customs. In addition, shareholder meetings of Holdco will be held in the Netherlands, and it may therefore be expensive and otherwise burdensome to attend these meetings in person (for those shareholders who prefer to vote in person rather than sending a proxy), in particular for shareholders who reside outside of the Netherlands. These aspects could have a material adverse effect on the value of Holdco's shares and could materially impact the rights of Holdco shareholders.

U.S. civil liabilities may not be enforceable.

Holdco is organized under the laws of the Netherlands and substantial portions of its assets will be located outside of the United States. In addition, certain members of the Holdco board of directors, the Deutsche Börse supervisory board and the NYSE Euronext board of directors, and certain members of the Deutsche Börse management board and the respective officers of NYSE Euronext and Holdco, as well as certain experts named herein reside outside the United States. As a result, it may be difficult for investors to effect service of process within the United States upon Holdco, Deutsche Börse or such other persons residing outside the United States, or to enforce outside the United States judgments obtained against such persons in U.S. courts in any action, including actions predicated upon the civil liability provisions of the U.S. federal securities laws. In addition, it may be difficult for investors to enforce, in original actions brought in courts in jurisdictions located outside the United States, rights predicated upon the U.S. federal securities laws.

The United States and the Netherlands currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments (other than arbitral awards) in civil and commercial matters, and a final judgment for the payment of money rendered by any federal or state court in the United States which is enforceable in the United States, whether or not predicated solely upon U.S. federal securities laws, would not automatically be recognized or enforceable in the Netherlands. In order to obtain a judgment which is enforceable in the Netherlands, the party in whose favor a final and conclusive judgment of the U.S. court has been rendered will be required to file its claim with a court of competent jurisdiction in the Netherlands. Such party may submit to the Dutch court the final judgment rendered by the U.S. court. If and to the extent that the Dutch court finds that the jurisdiction of the U.S. court has been based on grounds which are internationally acceptable and that proper legal procedures have been observed, the Dutch court will, in principle, give binding effect to the judgment of the court of the United States without substantive re-examination or re-litigation on the merits of the subject matter thereof, unless such judgment contravenes principles of public policy of the Netherlands.

Based on the foregoing, there can be no assurance that U.S. investors will be able to enforce against Holdco or members of its board of directors, officers or certain experts named herein who are residents of the Netherlands or countries other than the United States any judgments obtained in U.S. courts in civil and commercial matters, including judgments under the U.S. federal securities laws.

In addition, there is doubt as to whether a Dutch court would accept jurisdiction and impose civil liability on Holdco, the members of its board of directors, its officers or certain experts named herein in an original action

Table of Contents

predicated solely upon the U.S. federal securities laws brought in a court of competent jurisdiction in the Netherlands against Holdco or such members, officers or experts, respectively.

Deutsche Börse shareholders and NYSE Euronext shareholders will have a reduced ownership and voting interest after the combination and will exercise less influence over management.

After the completion of the combination, the Deutsche Börse shareholders and NYSE Euronext shareholders will own a smaller percentage of Holdco than they currently own of Deutsche Börse and NYSE Euronext, respectively. Upon completion of the combination, and assuming that all of the issued Deutsche Börse shares are exchanged in the exchange offer, former Deutsche Börse shareholders and former NYSE Euronext shareholders will own approximately 60% and 40%, respectively, of the outstanding Holdco shares immediately after the combination. Consequently, Deutsche Börse shareholders, as a group, will have reduced ownership and voting power in the combined company compared to their ownership and voting power in Deutsche Börse, and NYSE Euronext shareholders, as a group, will have reduced ownership and voting power in the combined company compared to their ownership and voting power in NYSE Euronext. Furthermore, the business combination agreement and the relevant organizational documents of Holdco will provide for the composition of the Holdco board of directors and the Global Executive Committee, management and the allocation of management positions between Deutsche Börse and NYSE Euronext only for certain time periods (*i.e.*, four years after completion of the combination for the composition of the Global Executive Committee and management, until the annual general meeting of Holdco shareholders in 2015 for the composition of the Holdco board of directors and until the annual general meeting of Holdco shareholders in 2016 for the positions of the Holdco group chairman and the Holdco group chief executive officer). After those time periods, the respective positions may change.

If Deutsche Börse shareholders do not tender their Deutsche Börse shares in the exchange offer, the consideration that Deutsche Börse shareholders may receive at a later point in time may substantially differ in form and/or value from the consideration that they would have received had they tendered their Deutsche Börse shares in the exchange offer, and they may also be subject to additional taxes.

As soon as reasonably practicable after the completion of the exchange offer and the merger, Holdco intends to effectuate a post-completion reorganization of Deutsche Börse Group that is intended to result in Deutsche Börse becoming a wholly owned or otherwise controlled subsidiary of Holdco. The post-completion reorganization is intended to either eliminate any minority shareholder interest in Deutsche Börse remaining after the completion of the exchange offer or allow Holdco to control Deutsche Börse to the greatest extent legally permissible, regardless of the existence of any remaining minority shareholder interest. Regardless of any post-completion reorganization undertaken, following the completion of the exchange offer, the free float of any non-tendered Deutsche Börse shares that remain outstanding will likely be lower than the current free float in Deutsche Börse shares, thereby reducing the liquidity of the remaining Deutsche Börse shares. Reduced liquidity could make it more difficult for the remaining Deutsche Börse shareholders to sell their shares and could materially adversely affect the market value of those remaining shares.

Due to the statutory legal framework applicable to such post-completion reorganization, holders of Deutsche Börse shares who do not exchange their shares in the exchange offer may receive, or may be offered, a different (including a lower) amount or a different form of consideration than they would have received if they had exchanged their shares in the exchange offer. To the extent legally permissible, the parties intend to structure any post-completion reorganization with the goal that such holders of Deutsche Börse shares receive, at a maximum, the same number of Holdco shares per Deutsche Börse share(s) or consideration having the same value (without taking into account the different tax treatment or withholding requirements that may apply) that they would have received in the exchange offer if they had tendered their Deutsche Börse shares. However, Deutsche Börse shareholders should note that the amount or form of consideration to be offered may be different, and, in particular, lower. Furthermore, in the event that the shares of Holdco lose value after the completion of the combination, there may be no obligation of Holdco to pay to the Deutsche Börse shareholders who did not exchange their shares the higher implied value received by the Deutsche Börse shareholders who exchanged their shares in the offer.

Table of Contents

Holdco may effectuate the post-completion reorganization by entering (directly and/or through a wholly owned subsidiary) into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement, in each case pursuant to Sections 291 *et seq.* of the German Stock Corporation Act with Deutsche Börse as the controlled company, pursuant to which the remaining Deutsche Börse shareholders will have significantly limited rights, including, in the case of a profit and loss transfer agreement, a limited ability to participate in the profits of Deutsche Börse Group. Under a domination agreement or a combination of a domination and profit and loss transfer agreement, the respective controlling company would be obliged pursuant to Section 305 of the German Stock Corporation Act to offer the minority shareholders of Deutsche Börse adequate consideration to acquire their Deutsche Börse shares. In accordance with Section 305 para. 2 no. 1 or no. 2 of the German Stock Corporation Act, the consideration to be offered to the Deutsche Börse shareholders exchanging their Deutsche Börse shares under such agreement would consist of Holdco shares, except for fractional amounts that may be settled in cash, pursuant to Section 305 para. 3 of the German Stock Corporation Act.

In the event that Holdco holds, directly or indirectly, 95% or more of the outstanding Deutsche Börse shares after completion of the exchange offer or at any time thereafter, Holdco may also effectuate the post-completion reorganization by commencing a mandatory buy-out of the Deutsche Börse shares from any remaining shareholders by way of a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act or by applying for a court order in accordance with Section 39a *et seq.* of the German Securities Acquisition and Takeover Act (which is referred to in this document as the German Takeover Act), in each case for adequate consideration and in addition or alternatively to entering into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement.

In the event that in the future, under a new German legislation called Third Amendment of the Act on Corporate Reorganizations (*Drittes Gesetz zur Änderung des Umwandlungsgesetzes*) which is currently being prepared, a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act may be performed, under certain circumstances, by a shareholder holding a participation of at least 90% (instead of at least 95%) of the outstanding Deutsche Börse shares, Holdco may commence such a squeeze-out transaction if it holds, directly or indirectly, 90% or more of the outstanding Deutsche Börse shares after the completion of the offer or any time thereafter.

The consideration that the remaining minority Deutsche Börse shareholders would receive under a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act in exchange for their Deutsche Börse shares must be in cash and, therefore, would be different from the form of consideration offered in the exchange offer. In contrast, the consideration that the remaining Deutsche Börse shareholders would receive in connection with a squeeze-out transaction pursuant to Section 39a *et seq.* of the German Takeover Act in exchange for their Deutsche Börse shares would be, at the election of each individual Deutsche Börse shareholder, either Holdco shares or cash.

Shareholders of Deutsche Börse not participating in the exchange offer will be diluted due to the obligation of Deutsche Börse to tender its treasury shares in the exchange offer.

Deutsche Börse currently holds approximately 4.59% (8,956,997 shares) of its share capital in treasury shares. Deutsche Börse is prohibited from exercising any rights inherently connected with these treasury shares. In the business combination agreement, Deutsche Börse agreed to tender these treasury shares in the exchange offer. After the completion of the exchange offer, Holdco may in contrast to Deutsche Börse prior to completion of the exchange offer exercise those rights (*e.g.*, voting rights at shareholders meetings) inherently connected to those shares, thereby diluting the Deutsche Börse shareholders who do not tender their Deutsche Börse shares in the exchange offer.

Table of Contents

Following the completion of the exchange offer, fewer Deutsche Börse shares will remain outstanding and, as a result, the free float of Deutsche Börse shares will be significantly lower than before the completion of the combination, which could materially adversely affect the liquidity and market value of those shares.

Following the completion of the exchange offer, the free float of any non-tendered Deutsche Börse shares will be significantly lower than the current free float in Deutsche Börse shares, thereby reducing the liquidity of the remaining Deutsche Börse shares. Reduced liquidity could make it more difficult for the remaining Deutsche Börse shareholders to sell their shares and could materially adversely affect the market value of those remaining shares. A lower level of liquidity in the trading in Deutsche Börse shares could result in greater price fluctuations of Deutsche Börse shares than in the past. Moreover, memberships in certain stock exchange indices, in particular in the DAX or the EUROSTOXX50, could change as a result of a lower free float. In addition, in the event that Holdco holds, directly or indirectly, 75% or more of the outstanding Deutsche Börse shares after the completion of the exchange offer or any time thereafter, Holdco intends to enter (directly and/or through a wholly owned subsidiary) into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement with Deutsche Börse pursuant to which the remaining Deutsche Börse shareholders would have significantly limited rights, including, in the case of a profit and loss transfer agreement, a limited ability to participate in the profits of Deutsche Börse, which could also materially adversely affect the market value of the remaining Deutsche Börse shares.

Furthermore, the value of the Deutsche Börse shares implied by the exchange offer does not guarantee that the value of the Deutsche Börse shares not held by Holdco following the completion of the exchange offer will remain at that level or exceed that value in the future. The share price may vary materially in the future.

Risks Relating to the Businesses of Holdco, Deutsche Börse Group and NYSE Euronext

Insufficient systems capacity and systems failures could adversely affect Deutsche Börse Group's and NYSE Euronext's businesses.

Deutsche Börse Group's and NYSE Euronext's businesses depend on the performance and reliability of complex computer and communications systems, including upgrades. Heavy use of platforms and order routing systems during peak trading times or at times of unusual market volatility could cause Deutsche Börse Group's and NYSE Euronext's systems to operate slowly or even to fail for periods of time. Failure to maintain systems, ensure security or to ensure sufficient capacity may also result in a temporary disruption of their regulatory and reporting functions.

Deutsche Börse Group and NYSE Euronext have experienced systems failures in the past, and it is possible that they will experience systems failures in the future. Systems failures could be caused by, among other things, periods of insufficient capacity of network bandwidth, power or telecommunications failures, acts of God or war, terrorism, human error, natural disasters, fire, sabotage, hardware or software malfunctions or defects, computer viruses, intentional acts of vandalism and similar events over which they have little or no control. Deutsche Börse Group and NYSE Euronext also rely on third parties for systems support. Any interruption in these third-party services or deterioration in the performance of these services could also be disruptive to their businesses. In addition, Deutsche Börse Group's and NYSE Euronext's systems may be adversely affected by failures of other trading systems, as a result of which they may be required to suspend trading activity in particular financial instruments or, under certain circumstances, unwind trades.

In the event that any of their systems, or those of their third-party service providers, fail or operate slowly, it may cause any of the following to occur: unanticipated disruptions in service to exchange members and clients, slower response times or delays in trade executions, incomplete or inaccurate recording or processing of trades, financial losses and liabilities to clients and litigation or other claims against Deutsche Börse Group and NYSE Euronext.

If Deutsche Börse Group or NYSE Euronext cannot expand system capacity to handle increased demand, or if their systems otherwise fail to perform and they experience disruptions in service, slower response times or

Table of Contents

delays in introducing new products and services, then Deutsche Börse Group and NYSE Euronext could incur reputational damage, regulatory sanctions, litigation, loss of trading share, loss of trading volume and loss of revenues, any of which could also have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext operate in a business environment that continues to experience significant and rapid technological change.

Technology is a key component of Deutsche Börse Group's and NYSE Euronext's business strategy and is crucial to their success. Deutsche Börse Group and NYSE Euronext seek to offer market participants a comprehensive suite of best-in-class technology solutions in a centralized environment. However, Deutsche Börse Group and NYSE Euronext operate in a business environment that has undergone, and continues to experience, significant and rapid technological change. In recent years, electronic trading and customer demand for increased choice of execution methods has grown significantly. To remain competitive, Deutsche Börse Group and NYSE Euronext must continue to enhance and improve the responsiveness, functionality, capacity, accessibility and features of their trading platforms, software, systems and technologies. Their success will depend, in part, on their ability to develop and license leading technologies, enhance existing trading, clearing and settlement platforms and services and create new platforms and services. Furthermore, they need to respond to customer demands, technological advances and emerging industry standards and practices on a cost-effective and timely basis, and continue to attract and retain highly skilled technology staff to maintain and develop existing technology and to adapt to and manage emerging technologies.

The development and expansion of electronic trading, clearing, settlement, custody, collateral management and market data-related technologies entail significant technological, financial and business risks. These risks include Deutsche Börse Group and NYSE Euronext failing or being unable to provide reliable and cost-effective electronic services to their customers, timely developing the required functionality to support electronic trading in key products comparable to systems on other electronic markets, matching fees of their competitors that offer electronic-only trading facilities, attracting independent software vendors to write front-end software that will effectively access Deutsche Börse Group's and NYSE Euronext's electronic trading systems and automated order routing systems, responding to technological developments or service offerings by competitors and generating sufficient revenue to justify the substantial capital investment Deutsche Börse Group and NYSE Euronext have made and will continue to make enhancements to their electronic trading platforms, as well as their clearing and settlement systems.

The adoption of new technologies or market practices may require Deutsche Börse Group and NYSE Euronext to devote additional resources to improve and adapt their services. For example, the growth of algorithmic and so called "black box trading" requires Deutsche Börse Group and NYSE Euronext to increase systems and network capacity to ensure that increases in message traffic can be accommodated without an adverse effect on system performance. In addition, the growth of electronic trading requires Deutsche Börse Group and NYSE Euronext to develop their electronic trading systems to include additional products and markets, and enhance their functionality, performance, capacity, reliability and speed. Keeping pace with increasing requirements can be expensive, and Deutsche Börse Group and NYSE Euronext cannot be sure that they will succeed in making these improvements to their technology infrastructure in a timely manner or at all.

If Deutsche Börse Group and NYSE Euronext are unable to anticipate and respond to the demand for new services, products and technologies on a timely and cost-effective basis and to adapt to technological advancements and changing standards, they may be unable to compete effectively. Further, Deutsche Börse Group and NYSE Euronext rely on the ability of their customers to have the necessary front and back office functionality to support any new products and trading and clearing functionality of Deutsche Börse Group and NYSE Euronext. To the extent their customers are not prepared and/or lack the resources or infrastructure, the success of any new initiatives may be compromised. Moreover, Holdco may incur substantial development, sales and marketing expenses and expend significant management effort to add new products or services to Deutsche

Table of Contents

Börse Group's and NYSE Euronext's trading platforms. Even after incurring these costs, Deutsche Börse Group and NYSE Euronext ultimately may not realize any, or may realize only small amounts of, revenues for these new products or services. Consequently, if revenue does not increase in a timely fashion as a result of these expansion initiatives, the up-front costs associated with expansion may exceed revenue and reduce Holdco's income.

Any failure or delay in exploiting technology, or failure to exploit technology as effectively as competitors of Deutsche Börse Group and NYSE Euronext, could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Service deficiency in Deutsche Börse Group's and NYSE Euronext's manual data processing could result in losses.

Deutsche Börse Group and NYSE Euronext rely mostly on automated data processing. However, not all of the data processing is automated and manual data processing in relation to certain services rendered to its customers is required. Therefore, operator errors or omissions may occur that relate mainly to manual input of data (e.g., incorrect processing of customer instructions in the custody business). As a result, Deutsche Börse Group and NYSE Euronext remain exposed in certain business segments to the risk of inadequate handling of customer instructions. In addition, manual intervention in market and system management is necessary in certain cases. The manual intervention and data processing may lead to mistakes, which could have a material adverse effect on Deutsche Börse Group's, NYSE Euronext's and therefore on Holdco's business and cash flows, financial condition and results of operations.

A failure to protect Deutsche Börse Group's and NYSE Euronext's intellectual property rights, or allegations that Deutsche Börse Group and/or NYSE Euronext have infringed intellectual property rights of others, could adversely affect Holdco's business.

Deutsche Börse Group and NYSE Euronext own or license rights to a number of trademarks, service marks, trade names, copyrights and patents that they use in their businesses, including exclusive rights to use certain indices as the basis for equity index derivatives products traded on their futures markets. To protect their intellectual property rights, Deutsche Börse Group and NYSE Euronext rely on a combination of trademark laws, copyright laws, patent laws, trade secret protection, confidentiality agreements and other contractual arrangements with affiliates, customers, strategic investors and others. The protective steps taken may be inadequate to deter misappropriation of their intellectual property. Deutsche Börse Group and NYSE Euronext may be unable to detect the unauthorized use of, or take appropriate steps to enforce, their intellectual property rights. For example, in its market data & analytics business, Deutsche Börse Group makes its products available to customers on a periodic subscription basis. Although license agreements limit the right of customers to copy or publicly disclose data, customers could nevertheless make unauthorized copies or publicly disclose the information. As a result, the market data & analytics business could lose potential new subscribers due to the fact that the data is freely available. Furthermore, some of the products and processes of Deutsche Börse Group and NYSE Euronext may not be subject to intellectual property protection. Competitors of Deutsche Börse Group and NYSE Euronext may also independently develop and patent or otherwise protect products or processes that are the same or similar to the products or processes of Deutsche Börse Group and NYSE Euronext. Failure to protect intellectual property adequately could harm Deutsche Börse Group's and NYSE Euronext's reputation and affect their ability to compete effectively. Further, defending intellectual property rights may require significant financial and managerial resources, the expenditure of which could also have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Third parties may assert intellectual property rights claims against Deutsche Börse Group and/or NYSE Euronext, which may be costly to defend, could require the payment of damages and could limit Deutsche Börse Group's and/or NYSE Euronext's ability to use certain technologies, trademarks or other intellectual property. Some of Deutsche Börse Group's and NYSE Euronext's competitors currently own patents and have actively

Table of Contents

been filing patent applications in recent years, some of which may relate to their trading platforms and business processes. As a result, Deutsche Börse Group and NYSE Euronext may face allegations that they have infringed or otherwise violated the intellectual property rights of third parties. Any intellectual property rights claims, with or without merit, could be expensive to litigate or settle and could divert management resources and attention. Successful challenges against Deutsche Börse Group and/or NYSE Euronext could require them to modify or discontinue their use of technology or business processes where such use is found to infringe or violate the rights of others, or require Deutsche Börse Group and/or NYSE Euronext to purchase licenses from third parties, any of which could also have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext face significant competition and compete globally with a broad range of market participants for listings, trading, clearing and settlement volumes. Increasing competition could result in a decrease of their trading volumes and revenues.

The securities industry, including listings, trade execution, clearing and settlement of cash equities, bonds and derivatives, is highly competitive. Deutsche Börse Group and NYSE Euronext face significant competition for listings, trading, clearing and settlement of equities, fixed income securities, repos, exchange-traded funds, closed-end funds, structured products, futures, options and other derivatives. Holdco expects competition in the securities industry to increase further and that new competitors will enter the industry. For example, the central securities depository settlement services of Clearstream may face increased competition from the emerging central European settlement infrastructure TARGET2-Securities. Competitors and new entrants may be subject to less stringent regulatory oversight than Deutsche Börse Group and NYSE Euronext currently face. Increased competition from existing and new competitors could, for example, cause Deutsche Börse Group and NYSE Euronext to experience a decline in their market share of listings, trading, clearing and settlement activity. Such a decline could cause Deutsche Börse Group and NYSE Euronext to lose the associated transaction fees and, in particular for its U.S. business, a proportionate share of market data fees or other revenue sources.

Sustained trends toward the liberalization, technological innovation and globalization of world capital markets have resulted in greater mobility of capital, greater international participation in local markets and more competition among markets in different geographical areas. The financial infrastructure industry has undergone significant consolidation through mergers, acquisitions and major alliances globally in recent years. For example, in 2007, the International Securities Exchange Holdings, Inc. was acquired by Eurex, a derivatives exchange jointly owned by Deutsche Börse and SIX Swiss Exchange, NYSE Group Inc. and Euronext N.V. combined to form NYSE Euronext, the IntercontinentalExchange acquired the New York Board of Trade, Nasdaq merged with OMX, the Chicago Mercantile Holdings, Inc. and CBOT Holdings, Inc. completed their merger to form CME Group, Inc., and the London Stock Exchange and Borsa Italiana completed their merger. In 2008, CME Group merged with the New York Mercantile Exchange, the Vienna Stock Exchange acquired a majority stake in each of the Budapest, Ljubljana and Prague exchanges, and the following year, formed the CEE Stock Exchange Group, which is expected to implement a shared transaction platform among its exchanges. In February 2010, the London Stock Exchange acquired a majority stake in Turquoise. In late 2010, the Singapore Stock Exchange announced its offer to buy ASX Limited, and, in 2011, other significant transactions have been announced, including Lima Stock Exchange's combination with Bolsa de Valores de Colombia, London Stock Exchange Group's merger with TMX Group and BATS Global Markets' acquisition of Chi-X Europe. As a result of these combinations, and as a result of new entrants entering the industry, global competition among listing venues, trading markets and other execution venues as well as among clearing service providers has become more intense. The global derivatives industry has become increasingly competitive. Exchanges, intermediaries, and even end users are consolidating and over-the-counter and unregulated entities are constantly evolving. Additionally, in response to growing competition, many marketplaces in both Europe and the United States have demutualized to provide greater flexibility for future growth.

The current and prospective competitors of Deutsche Börse Group and NYSE Euronext include both traditional and non-traditional execution and listing venues, securities and securities option exchanges, futures

Table of Contents

exchanges, over-the-counter markets, clearing organizations, market data and information vendors, electronic communications networks, multilateral trading facilities, crossing systems and similar entities, consortia of large customers, consortia of clearing firms and electronic brokerage and dealing facilities, market makers, banks, index providers, financial services technology and other financial market participants. Some of these competitors are also among the largest customers of Deutsche Börse Group and NYSE Euronext. Deutsche Börse Group and NYSE Euronext face significant and growing competition from financial institutions that have the ability to divert trading and/or clearing volumes from Deutsche Börse Group's and NYSE Euronext's exchanges and clearing houses. For example, banks and brokers may also enter into bilateral trading arrangements and/or create Broker Crossing Networks by matching their respective order flows, or may internalize order flow by assuming the role of principal and acting as counterparty to orders originating from retail investors, in each case depriving Deutsche Börse Group and NYSE Euronext of potential trading volumes. Deutsche Börse Group and NYSE Euronext compete with other market participants in a variety of ways, including the cost, quality and speed of trade execution, liquidity, functionality, ease of use and performance of trading systems, the ranges of products and services offered to trading participants and listed companies, technological innovation and reputation. In particular, Deutsche Börse Group's and NYSE Euronext's competitors may exploit regulatory disparities between traditional, regulated exchanges and alternative markets that benefit from a reduced regulatory burden and lower-cost business model or consolidate and form alliances, which may create greater liquidity, lower costs, and better pricing than Deutsche Börse Group or NYSE Euronext can offer; and better leverage existing relationships with customers and alliance partners or better exploit brand names to market and sell their services.

The importance of technology to the financial infrastructure industry may continue to foster a growing competitive environment due to the global nature of the numerous competitors, ability for new upstarts to emerge and existing competitors to rapidly innovate. Deutsche Börse and NYSE Euronext further believe that they may also face competition from large computer software companies and media and technology companies. The number of businesses providing Internet-related financial services is rapidly growing. Other companies have entered into or are forming joint ventures or consortia to provide services similar to those provided by Deutsche Börse Group and NYSE Euronext. Other technology companies may become even stronger competitors through acquisitions.

Failure of Holdco to compete successfully could have a material adverse effect on its business, cash flows, financial condition and results of operations.

Holdco's business may be adversely affected by intense price competition.

The securities industry, including listings, trade execution, clearing and settlement of cash equities, bonds and derivatives, is characterized by intense price competition. In particular, the pricing model for listings, trade execution, clearing and settlement has changed in response to competitive market conditions. In recent years, some of Deutsche Börse Group's and NYSE Euronext's competitors have engaged in aggressive pricing strategies, including lowering the fees that they charge for taking liquidity and increasing liquidity (or rebates) they provide as an incentive for providers of liquidity in certain markets. It is likely that Deutsche Börse Group and NYSE Euronext will continue to experience significant pricing pressure and that some of their competitors will seek to increase their share of listings, trading or clearing by reducing their fees, by offering larger liquidity payments or by offering other forms of financial or other incentives.

For example, Holdco could lose a substantial percentage of its share of trading or listings if it is unable to price transactions in a competitive manner. Profit margins could also decline if Holdco reduces pricing in response, particularly in light of the substantially fixed cost nature of Deutsche Börse Group's and NYSE Euronext's respective trading and clearing businesses. Furthermore, other business segments of Deutsche Börse Group may also face intense price competition, such as from the emerging central European settlement infrastructure, TARGET2-Securities, with respect to Clearstream's central securities depository settlement services. In addition, a decrease in the market share in the listing and trading businesses as a result of price pressure could adversely impact other business segments, such as Deutsche Börse Group's market data &

Table of Contents

analytics business. Deutsche Börse Group also might be forced to lower its subscription fees for instruments listed on Xetra or Eurex due to competitors offering similar services at lower prices or for free. In addition, one or more competitors may engage in aggressive pricing strategies in the future and significantly decrease or completely eliminate their profit margin for a period of time in order to capture a greater share of listings, trading or clearing market share. Furthermore, many internalization strategies are driven by cost-saving or profit incentive, thus further increasing the desire for Deutsche Börse Group's and NYSE Euronext's customers to avoid incurring fees on its exchanges or clearing houses. Deutsche Börse Group's, NYSE Euronext's and also Holdco's results of operations and future profitability could be adversely affected as a result of these activities.

A change in the policy of the administrative bodies of the exchanges in Germany could reduce Deutsche Börse Group's revenue.

As an exchange operator in Germany, Deutsche Börse Group also generates income from statutory fees established by independent administrative bodies of the Frankfurt Stock Exchange and Eurex Deutschland. A change in the fee policy of the independent administrative bodies of the exchanges, or the discontinuation of certain types of fees previously charged, could reduce Deutsche Börse Group's revenues and could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Adverse economic conditions could negatively affect Holdco's business and cash flows, financial condition and results of operations.

General economic conditions affect the overall level of trading activity and new listings in securities markets, which directly impact Deutsche Börse Group's and NYSE Euronext's results of operations. A significant portion of Holdco's revenue will depend, either directly or indirectly, on transaction-based fees that, in turn, depend on Deutsche Börse Group's and NYSE Euronext's ability to attract and maintain order flow, both in absolute terms and relative to other market centers. Adverse economic conditions may result in a deterioration of the economic success of the companies listed on Holdco's exchanges and hence a decline in trading volume and demand for market data and a decrease of asset-based fees, which may adversely affect Holdco's revenues and future growth. Declines in volumes may impact Deutsche Börse Group's and NYSE Euronext's market share or pricing structures. Poor economic conditions may also negatively impact new listings by reducing the number or size of securities offerings. In the recent financial crisis, both Deutsche Börse Group and NYSE Euronext experienced reduced trading and clearing volumes and fewer listings, resulting in decreased revenues in those segments of their respective businesses.

Deutsche Börse Group and NYSE Euronext also generate revenues from listing fees, clearing and transaction fees. Poor economic conditions, industry-specific circumstances, capital and financial market trends and regulatory requirements may also negatively impact new listings by reducing the number or size of securities offerings. A lack of investor confidence in the financial markets could also have a negative effect on Deutsche Börse Group's and NYSE Euronext's financial performance. Recent global market and economic conditions have been difficult and volatile, in particular for financial services companies that are Deutsche Börse Group's and NYSE Euronext's most significant customers. These conditions have resulted in significantly increased volatility, outflows of customer funds and securities, losses resulting from declining asset values, defaults on securities and reduced liquidity. While volatile markets can generate increased transaction volume, prolonged recessionary conditions can adversely affect trading volumes and the demand for market data, and can lead to slower collections of accounts receivable as well as increased counterparty risk. Deutsche Börse Group has experienced a decline in subscriptions for its market data as a result of the consolidation of its customers and employee layoffs by many of its customers. In the event of a significant and sustained decline in trading and/or clearing volumes, including a reduction in the number of traders, reduced trading demand by customers of Deutsche Börse Group and NYSE Euronext or a decision by regulators or market participants to curtail speculative trading, Deutsche Börse Group and NYSE Euronext would lose revenue, and their inability to quickly reduce infrastructure and overhead expenses could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Table of Contents

During 2009 and 2010, companies in many different industries found it difficult to borrow money from banks and other lending sources, and also experienced difficulty raising funds in the capital markets. While access to credit markets has improved, the upheaval in the credit markets continues to impact the economy. While neither Deutsche Börse Group nor NYSE Euronext has experienced reductions in its borrowing capacity, lenders in general have taken actions that indicate their concerns regarding liquidity in the marketplace. These actions have included reduced advance rates for certain security types, more stringent requirements for collateral eligibility and higher interest rates. Should lenders continue to take additional similar actions, the cost of conducting Holdco's businesses may increase and Holdco's ability to implement its business initiatives could be limited. In addition, Holdco's ability to raise financing could be impaired if rating agencies, lenders or investors develop a negative perception of its long-term or short-term financial prospects, or of prospects for the industries in which it operates, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Broad market trends and other factors beyond the control of Deutsche Börse Group and NYSE Euronext could significantly reduce demand for their services.

Deutsche Börse Group's and NYSE Euronext's business, cash flows and results of operations are highly dependent upon the levels of activity on their exchanges and clearing houses, and in particular, upon the volume of financial instruments traded and/or cleared, the number and shares outstanding of listed issuers, the number of new listings, the number of traders in the market and similar factors. Deutsche Börse Group's and NYSE Euronext's business, cash flows and results of operations are also dependent upon the success of their commercial technology business, which, in turn, is directly dependent on the commercial well being of their customers. Deutsche Börse Group and NYSE Euronext have no direct control over these variables. Among other things, Deutsche Börse Group and NYSE Euronext depend more upon the relative attractiveness of the financial instruments traded on their exchanges, and the relative attractiveness of the exchanges as a venue on which to trade these financial instruments, as compared to other exchanges, and alternative trading venues as well as over-the-counter trading. These variables are in turn influenced by economic, political and market conditions in Europe, the United States, and elsewhere in the world that are beyond Deutsche Börse Group's or NYSE Euronext's direct control, including factors such as:

broad trends in business and finance, including industry-specific circumstances, capital market trends and the mergers and acquisitions environment;

terrorism, natural disasters and war;

concerns over inflation and the level of institutional or retail confidence;

changes in monetary policy and foreign currency exchange rates;

the availability of short-term and long-term funding and capital;

the availability of alternative investment opportunities;

changes in the level of trading activity;

changes and volatility in the prices of securities;

changes in tax policy;

Edgar Filing: NYSE Euronext - Form 425

changes in the level and volatility of interest rates and GDP growth;

legislative and regulatory changes;

changes in customer base;

legislative and regulatory changes, including the potential for regulatory arbitrage among regulated and unregulated markets if significant policy differences emerge among markets;

the perceived attractiveness, or lack of attractiveness, of the U.S. or European capital markets;

A-42

Table of Contents

the outbreak of contagious disease pandemics or other public health emergencies in the regions in which Deutsche Börse Group and NYSE Euronext operate which could decrease levels of economic and market activities; and

unforeseen market closures or other disruptions in trading, clearing, settlement, custody, collateral management and/or market data technology.

General economic conditions affect financial and securities markets in a number of ways, from determining availability of capital to influencing investor confidence. Adverse changes in the economy or the outlook for the financial and securities industry can have a negative impact on Deutsche Börse Group's and NYSE Euronext's revenues through declines in trading volumes, new listings, clearing and settlement volumes and demand for market data. Accordingly, generally adverse market conditions may have a disproportionate effect on Deutsche Börse Group's and NYSE Euronext's business. Furthermore, Deutsche Börse Group's and NYSE Euronext's infrastructure and overhead is based on assumptions on certain levels of market activity (e.g., trading volumes, the number of listed companies or demand for market data).

If levels of activity on Deutsche Börse Group's and NYSE Euronext's exchanges are adversely affected by any of the factors described above or other factors beyond their control, this could also have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext may be at greater risk from terrorism than other companies.

Given Deutsche Börse Group's and NYSE Euronext's prominence in the global securities industry and the concentration of many of their properties and personnel in European and U.S. financial centers, including lower Manhattan, Deutsche Börse and NYSE Euronext may be more likely than other companies to be a direct target of, or an indirect casualty of, attacks by terrorists or terrorist organizations, or other extremist organizations that employ threatening or harassing means to achieve their social or political objectives.

In the event of an attack or a threat of an attack, Deutsche Börse Group's and NYSE Euronext's security measures and contingency plans may be inadequate to prevent significant disruptions in their businesses, technology or access to the infrastructure necessary to maintain their businesses. For example, if part or all of Deutsche Börse Group's and NYSE Euronext's primary data center facilities become inoperable, the disaster recovery and business continuity planning practices may not be sufficient and Deutsche Börse Group and NYSE Euronext may experience a significant delay in resuming normal business operations. Damage to Deutsche Börse Group's or NYSE Euronext's facilities due to terrorist attacks may be significantly in excess of insurance coverage, and Deutsche Börse Group and NYSE Euronext may not be able to insure against some damage at a reasonable price or at all. The threat of terrorist attacks may also negatively affect Deutsche Börse Group's and NYSE Euronext's ability to attract and retain employees. In addition, terrorist attacks may cause instability or decreased trading in the securities markets, including trading on exchanges. Any of these events could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext are exposed to fluctuations in foreign exchange rates and interest rates.

Since Deutsche Börse Group and NYSE Euronext conduct operations in several different countries, including several European countries and the United States, a substantial portion of their assets, liabilities, revenues and expenses are denominated in euros, U.S. dollars, Swiss francs and pounds sterling. As a result, Holdco will be exposed to foreign exchange rate fluctuations. The multiple currency conversions that will take place as a result of transactions between subsidiaries of Holdco located in different jurisdictions will also expose Holdco and its subsidiaries to further exchange rate fluctuations. In addition, Deutsche Börse Group and NYSE Euronext are each exposed to interest rate fluctuations. Deutsche Börse Group is exposed to interest rate fluctuations, in particular in connection with cash investments or borrowings as well as through corporate

Table of Contents

transactions. Except for its fixed rate bonds, most of NYSE Euronext's financial assets and liabilities are based on floating rates. Holdco, Deutsche Börse Group and NYSE Euronext may use derivative financial instruments with the aim to reduce some of the negative impacts that could result from fluctuations in these rates. Holdco's, Deutsche Börse Group's and NYSE Euronext's assumptions and assessments with regard to the future development of these rates and the chosen level of risk avoidance or risk tolerance have a substantial impact on the success or failure of their hedging policies. The failure of Holdco's, Deutsche Börse Group's or NYSE Euronext's hedging policies could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext are exposed to liquidity risk and may lack sufficient liquidity to meet their daily payment obligations or may incur increased refinancing costs which could adversely affect Holdco's business and cash flows, financial condition and result of operations.

Deutsche Börse Group and NYSE Euronext and its subsidiaries will be exposed to liquidity risk, and may lack sufficient liquidity to meet their daily payment obligations or may incur increased refinancing costs in the event of liquidity shortages. Deutsche Börse Group and NYSE Euronext and its subsidiaries manage liquidity risk by matching the duration of investments and liabilities, restricting investments in potentially illiquid or volatile asset classes, repledging securities received with central banks and maintaining sufficient financing facilities to overcome unexpected demands for liquidity. Credit lines are also available to Deutsche Börse Group and NYSE Euronext or their subsidiaries to provide additional liquidity should it be needed. In addition Deutsche Börse Group and NYSE Euronext have commercial paper programs in place for flexible, short term financing. Nevertheless, Deutsche Börse Group and NYSE Euronext cannot guarantee that current liquidity levels and contingency credit lines are adequate in the event of liquidity shortages. The lack of sufficient liquidity to close out open positions could have a material adverse effect on Deutsche Börse Group's and NYSE Euronext's business and cash flows, financial condition and results of operations. Following the completion of the combination, the assets and results of operations of Holdco as the holding company of Deutsche Börse and NYSE Euronext will largely depend on the development of Deutsche Börse's and NYSE Euronext's businesses and cash flows, financial condition and results of operations. Thus, a possible liquidity shortage of Deutsche Börse, NYSE Euronext or their subsidiaries may affect Holdco's business and cash flows, financial condition and results of operations as well.

Deutsche Börse Group's and NYSE Euronext's businesses may be adversely affected by risks associated with clearing and settlement activities.

The customers of the Deutsche Börse subsidiaries that operate its clearing and settlement businesses, Eurex Clearing and Clearstream, may default on their contractual, borrowing or guarantee obligations and not be able to fulfill their obligations or settle outstanding liabilities. Eurex Clearing AG is the clearinghouse within Deutsche Börse Group. It offers fully automated and straight-through post-trade services for derivatives, equities, repo, energy and fixed income transactions. In its role as a central counterparty, Eurex Clearing AG is exposed to counterparty, credit and market risk because it acts as a buyer to all sellers and as a seller to all buyers, thereby seeking to minimize counterparty risk and to maximize operational efficiency. Eurex Clearing AG maintains policies and procedures to help ensure that its clearing members can satisfy their obligations and uses several lines of defense to cover counterparty risks, including guarantee funds (clearing funds) and requesting daily and, where necessary, intraday deposit of collateral by clearing members in the form of cash or securities in line with the parties' respective positions and margin requirements. In the event of a clearing member's default, the collateral deposited may be inadequate to cover all remaining obligations after closing out all open positions.

Clearstream lends only on a short-term basis, for the purposes of increasing the efficiency of the settlement for securities transactions and largely to collateralized parties with a good credit rating. These credit lines may be revoked at any time. Furthermore, Clearstream is also exposed to credit risk in its securities lending activities. Although lending transactions are collateralized, Clearstream customers may default and the collateral held may not be sufficient to avoid incurring a credit loss, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Table of Contents

NYSE Euronext's UK regulated derivatives subsidiary, the London Market of NYSE Liffe, took full responsibility for clearing activities in NYSE Euronext's UK derivatives market on July 30, 2009. As a result, NYSE Liffe became the central counterparty for contracts entered into by its clearing members on the London Market of NYSE Liffe market and outsources certain services to LCH.Clearnet Limited, which is referred to in this document as LCH.Clearnet. NYSE Liffe has credit exposure to those clearing members. NYSE Liffe's clearing members may encounter economic difficulties as a result of the market turmoil and tightening credit markets, which could result in bankruptcy and failure. NYSE Liffe offsets its credit exposure through arrangements with LCH.Clearnet in which LCH.Clearnet provides clearing guarantee backing and related risk functions to NYSE Liffe, and under which LCH.Clearnet is responsible for any defaulting member positions and for applying its resources to the resolution of such a default. In addition, NYSE Liffe maintains policies and procedures to help ensure that its clearing members can satisfy their obligations, including by requiring members to meet minimum capital and net worth requirements and to deposit collateral for their trading activity. Nevertheless, NYSE Euronext cannot be sure that in extreme circumstances, LCH.Clearnet might not itself suffer difficulties, in which case these measures might not prove sufficient to protect NYSE Liffe from a default, or might fail to ensure that NYSE Liffe is not adversely affected in the event of a significant default.

NYSE Euronext has also entered into a joint venture with the Depository Trust & Clearing Corporation (which is referred to in this document as DTCC) to establish the New York Portfolio Clearing (which is referred to in this document as NYPC), which is expected to be operational during the first half of 2011. NYPC will initially clear fixed income futures listed on NYSE Liffe US, with the ability to add other exchanges and derivatives clearing organizations in the future. NYSE Euronext has agreed to commit a \$50 million financial guarantee to the NYPC default fund and will face clearing risks similar to those it would expect to face with respect to NYSE Liffe Clearing. NYSE Euronext may also in the future expand its clearing operations to other markets and financial products, which would increase its exposure to these types of risks.

In the event that any of the above counterparties to Deutsche Börse Group or NYSE Euronext default on their obligations, such default could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operation.

Deutsche Börse Group's share of trading in Deutsche Börse Group listed securities and NYSE Euronext's share of trading in NYSE Euronext listed securities has declined and may continue to decline.

As a result of increasing competition, including from nontraditional trading venues and other competitors that are also among Deutsche Börse Group's and NYSE Euronext's largest customers, Deutsche Börse Group's share of the European Electronic Order Book Equity Trading declined from approximately 13.49% in 2009 to 12.25% in 2010. NYSE Euronext's share of trading on a matched basis in NYSE-listed securities has declined from approximately 38% in 2009 to 36% in 2010. NYSE Euronext's share of Euronext-listed securities remained relatively stable in 2010. Multilateral trading facilities (which are referred to in this document as MTFs) offer trading in the securities listed on the Frankfurt Stock Exchange, Euronext and other European regulated markets and compete directly with Deutsche Börse Group as well as with NYSE Euronext for market share. If Deutsche Börse Group's and NYSE Euronext's trading share continues to decrease relative to its competitors, they may be less attractive to market participants as a source of liquidity. This could further accelerate their loss of trading volume. Similarly, a lower trading share of Deutsche Börse Group and NYSE Euronext listed securities may cause issuers to question the value of a Deutsche Börse Group listing and a NYSE Euronext listing, which could adversely impact Deutsche Börse Group's and NYSE Euronext's listing business.

In addition, in the United States, the allocation of market data revenues among competing market centers is tied to trading share. A decline in NYSE's trading share lowers its percentage of the U.S. national market system tape pool revenues from the consolidated tape association and unlisted trading privileges. Declines in NYSE Euronext's trading share could adversely affect the growth, viability and importance of some of its market data products.

Table of Contents

If growth in Deutsche Börse Group's and NYSE Euronext's overall trading volumes of Deutsche Börse Group-listed and NYSE Euronext-listed securities does not offset any significant decline in their trading share, or if a decline in their trading share in Deutsche Börse Group-listed and NYSE-listed securities makes their venues appear less liquid, then this could have a material adverse effect on Holdco's business, financial condition and results of operations.

If Deutsche Börse Group's or NYSE Euronext's goodwill or intangible assets become impaired, Deutsche Börse Group, NYSE Euronext and, after the combination, Holdco may be required to record a significant charge to earnings.

Under IFRS and U.S. GAAP, Deutsche Börse Group and NYSE Euronext, respectively, review their amortizable intangible assets for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. Goodwill and indefinite-lived intangible assets are tested for impairment at least annually, and are also tested when factors arise that may be considered a change in circumstances indicating that the carrying value of the goodwill or intangible assets may not be recoverable, such as a decline in stock price and market capitalization, reduced future cash flow estimates, and slower growth rates. Deutsche Börse Group or NYSE Euronext may be required to record a significant charge in their financial statements during the period in which any impairment of its goodwill or intangible assets is determined. For example, Deutsche Börse had to write off 415.6 million in 2009 and another 453.3 million in 2010 solely due to the acquisition of ISE in 2007. In addition, any goodwill arising from the combination accounted on the Holdco level may be subject to impairment, and Holdco may be required to record a significant charge in its financial statements. If additional impairment charges are incurred, this could have a material adverse effect on Holdco's business, financial condition and results of operations.

Deutsche Börse Group depends on its large customers.

A considerable portion of Deutsche Börse Group's revenues are derived from business conducted with institutional clients and large financial institutions. In 2010, the largest trading participant in Xetra accounted for 7% (2009: 8%, 2008: 7%), and the 10 largest trading participants in Xetra accounted for 48% (2009: 50%, 2008: 52%) in each case, of the total trading volumes. On the Eurex side of Deutsche Börse Group's business (excluding ISE), the largest customer accounted for 6% (2009: 5%, 2008: 4%) and the 10 largest customers accounted for 32% (2009: 32%, 2008: 32%), in each case, of the overall trading volumes for 2010. Clearstream's largest customer accounted for 6% (2009: 6%, 2008: 7%) and the 10 largest customers accounted for 39% of Clearstream's sales revenues in 2010 (2009: 36%, 2008: 46%). Loss of all or a substantial portion of trading volumes of any of Deutsche Börse Group's large customers for whatever reason could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext are subject to significant litigation risks and other liabilities.

Many aspects of Deutsche Börse Group's and NYSE Euronext's business involve litigation risks. These risks include potential liability from disputes over terms of a securities trade or from claims that a system or operational failure or delay caused monetary losses to a customer, as well as potential liability from claims that Deutsche Börse Group or NYSE Euronext facilitated an unauthorized transaction or provided materially false or misleading statements in connection with a transaction. NYSE Euronext is involved and may continue to be involved in allegations of misuse of the intellectual property of others, as well as other commercial disputes. Dissatisfied customers frequently make claims against their service providers regarding quality of trade execution, improperly cleared or settled trades, mismanagement or even fraud. Although aspects of Deutsche Börse Group's and NYSE Euronext's business are protected by regulatory immunity, Holdco could nevertheless be exposed to substantial liability under German law, U.S. federal and state laws and court decisions, rules and regulations promulgated by BaFin, the SEC, U.S. Commodity Futures Trading Commission (which is referred to in this document as the "CFTC") or European and other regulators, and laws and court decisions in the countries where Deutsche Börse Group and NYSE Euronext operate. Holdco could incur significant expenses defending

Table of Contents

claims, even those without merit. In addition, an adverse resolution of any lawsuit or claim against Holdco or its subsidiaries may require them to pay substantial damages or impose restrictions on how they conduct business. Furthermore, Holdco, Deutsche Börse Group and NYSE Euronext may face claims in connection with the combination. Potential claims may include any kind of alleged violations of contractual obligations to which Holdco, Deutsche Börse Group or NYSE Euronext may be bound by conducting the combination, alleged breaches of fiduciary duties vis-à-vis shareholders and other reasons.

For example, following the announcement of the business combination agreement on February 15, 2011, various lawsuits were filed by purported NYSE Euronext shareholders in at least two U.S. state courts and one federal court in which the plaintiffs are claiming breach of fiduciary duty against the individual defendants, and claiming aiding and abetting that alleged breach against one or more of the entity defendants. In general, the lawsuits critique the terms of the proposed transaction and seek, among other things, an injunction against its completion. Certain members of Deutsche Börse Group are involved in various legal proceedings, including an action seeking damages and the restraint of certain securities held in an account of Clearstream Banking S.A. alleged to be beneficially owned by an Iranian government entity in connection with an enforcement action against the government of Iran by representatives of victims of a bombing in Beirut in the 1980s. In addition, Clearstream Banking S.A. is subject to an action seeking damages for alleged improper payments in violation of a judgment obtained by creditors of the Republic of Argentina and an action has been filed against Clearstream Banking S.A., seeking damages for alleged improper payments made to former investors in the Madoff Ponzi scheme. NYSE Euronext is also involved in various legal proceedings, including a dispute with the U.S. Internal Revenue Service regarding a proposed adjustment seeking to disallow certain deductions taken by the NYSE for compensation paid to its former chairman and chief executive officer in the tax years 2001, 2002 and 2003.

An adverse result with respect to any of these various proceedings could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group's and NYSE Euronext's networks and those of their third-party service providers may be vulnerable to security risks.

The secure transmission of confidential information over public and other networks is a critical element of Deutsche Börse Group's and NYSE Euronext's operations. Deutsche Börse Group's and NYSE Euronext's networks and those of their third-party service providers may be vulnerable to unauthorized access, computer viruses and other security problems. Persons who circumvent security measures could wrongfully access and use Deutsche Börse Group's and NYSE Euronext's information or their customers' information, or cause interruptions or malfunctions in their operations. Deutsche Börse and NYSE Euronext have frequently been the target of attempted information security attacks, and although none of these attempts has resulted in any material issues for either company, the security measures taken by Deutsche Börse and NYSE Euronext are costly and may ultimately prove inadequate. This could cause Deutsche Börse Group and NYSE Euronext to incur reputational damage, regulatory sanctions, litigation, loss of trading share, loss of trading volume and loss of revenues, any of which could also have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

If the indices and other products of Deutsche Börse Group and NYSE Euronext contain undetected errors or fail to perform properly, this could have a material adverse effect on their business, financial condition or results of operation.

The market data & analytics business of Deutsche Börse Group and the Information Services business of NYSE Euronext develop, calculate, market and distribute indices in a variety of asset classes. As a result, Deutsche Börse Group's and NYSE Euronext's indices underlie derivative financial instruments of investors, financial market product developers and issuers. Indices and other products developed or licensed by Deutsche Börse Group and NYSE Euronext may contain miscalculations or undetected errors. As a consequence market participants who use real time price and orderbook information or other market moving signals to make their buy

Table of Contents

or sell decisions and recommendations or require accurate instrument reference data for risk management activities and error-free settlement may base their decisions on miscalculated or erroneous information. Therefore, Deutsche Börse Group and NYSE Euronext may be exposed to damage claims brought forward against them based on such miscalculations or undetected errors and could result in harm to their reputation, contractual disputes, negative publicity, delays in or loss of market acceptance of their products, license terminations or renegotiations, or unexpected expenses and diversion of resources to remedy errors. This may have a material adverse effect on Holdco's, Deutsche Börse Group's and NYSE Euronext's business and cash flows, financial condition and results of operations.

Deutsche Börse Group's and NYSE Euronext's reliance on third parties could adversely affect their businesses if these third parties cease to perform the functions that they currently perform.

Deutsche Börse Group and NYSE Euronext rely on third party service providers that they do not control. Deutsche Börse Group relies on third-party service providers, including information technology hardware providers and certain data suppliers. In particular, the index and analytic products developed in the market data & analytics business and the business of STOXX Ltd. of Deutsche Börse Group are dependent upon updates and continuing access to historical and current data from third-party sources, such as exchanges and other data suppliers who calculate and provide a variety of indices. If any of the provided information has errors, is delayed or is unavailable, this could materially impair the ability of Deutsche Börse Group to effectively operate these businesses. In particular, the timing of calculations of real-time indices as reference prices for certain derivatives is critical, and any delay may cause Deutsche Börse Group to face liabilities from customers who rely on these indices as a reference point for their specific products.

NYSE Euronext relies on third parties for certain clearing and regulatory services. For example, it relies on LCH.Clearnet to provide a clearing guarantee and manage related risk functions in connection with clearing on some of its European cash and derivatives markets. NYSE Euronext also relies on the services of Euroclear for settling transactions on its European cash markets. FINRA performs the market surveillance and enforcement functions for Deutsche Börse Group's U.S. derivatives exchange, ISE. Although NYSE Regulation oversees FINRA's performance of regulatory services for NYSE Euronext's markets, and NYSE Regulation has retained staff associated with such responsibility as well as for rule development and interpretations, regulatory policy, oversight of listed issuers' compliance with applicable listing standards and real-time stockwatch reviews, NYSE Euronext is significantly reliant on FINRA to perform these regulatory functions. NYSE Euronext also depends on the Consolidated Tape Association to oversee the dissemination of real-time trade and quote information in NYSE- and NYSE Amex-listed securities. To the extent that any of these third parties experiences difficulties, materially changes its business relationship with Deutsche Börse Group or NYSE Euronext or is unable for any reason to perform its obligations, Deutsche Börse Group's or NYSE Euronext's business or reputation may be materially adversely affected.

Deutsche Börse Group and NYSE Euronext also rely on members of the trading community to maintain markets and add liquidity. Global market and economic conditions have been difficult and volatile in recent years, in particular for financial services companies, such as the members of the exchanges.

To the extent that any external service providers provide inadequate products, experience difficulties or losses, do not provide sufficiently experienced personnel, are unable to provide services to the required levels or otherwise fail to meet their obligations under their service arrangements with either Deutsche Börse Group or NYSE Euronext, a material adverse effect on Holdco's business and cash flows, financial condition and results of operations could occur.

Holdco will face risks when entering into or increasing its presence in markets where Deutsche Börse Group and NYSE Euronext do not currently compete or when entering into new business lines.

After the combination, Holdco may enter into or increase its presence in markets that already possess established competitors. Attracting customers in certain countries may also be subject to a number of risks, including currency exchange rate risk, difficulties in enforcing agreements or collecting receivables, longer

Table of Contents

payment cycles, compliance with the laws or regulations of these countries, and political and regulatory uncertainties. Holdco may also expand its presence or enter into newly developing arenas of competition where less regulated competitors exist and demand for such services is subject to uncertainty. As a result, demand and market acceptance for Holdco's products and services within these markets will be subject to a high degree of uncertainty and risk. Holdco may be unable to enter into or increase its presence in these markets and compete successfully, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Damage to Holdco's, Deutsche Börse Group's and/or NYSE Euronext's reputation could materially adversely affect Holdco's business.

One of Deutsche Börse Group's and NYSE Euronext's competitive strengths is their strong reputation and brand name. Their reputation could be harmed in many different ways, including by regulatory, governance or technology failures or the activities of members or listed companies whom they do not control. Damage to Deutsche Börse Group's and/or NYSE Euronext's reputation could cause some issuers not to list their securities on their exchanges, as well as reduce the trading volume on their exchanges, and/or reduce clearing and/or settlement volumes. Any of these events could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext may complete acquisitions and dispositions prior to completion of the combination that may affect their respective businesses and/or the value of the consideration to be received by Deutsche Börse shareholders and NYSE Euronext shareholders in the combination.

Prior to completion of the combination, the business combination agreement limits the ability of Deutsche Börse, NYSE Euronext and their respective subsidiaries to complete or enter into agreements that provide for acquisitions and divestitures in excess of \$100 million in the aggregate for dispositions and \$200 million in the aggregate for acquisitions. However, each party may engage in transactions up to these agreed upon limits and may seek the consent of the other party to engage in more substantial transactions. Although neither of the parties currently has an agreement in place which provides for such a transaction, each party continually evaluates strategic alternatives, including opportunities to expand through acquisitions or to focus the business through dispositions.

Any acquisition by Deutsche Börse or NYSE Euronext may result in the use of a significant portion of the party's available cash, an issuance of shares that would be dilutive to their respective shareholders, the incurrence of debt, and/or significant acquisition-related charges. In addition, any acquisition will involve significant risks, including the possible failure to successfully integrate and realize the expected benefits of the acquisition. Acquisitions may also result in the assumption of liabilities, including liabilities that are contingent, unknown or not fully known at the time of the acquisition, which could have a material adverse effect on the business of Deutsche Börse Group or NYSE Euronext.

As the value of consideration to be received by Deutsche Börse shareholders and NYSE Euronext shareholders is dependant upon the value of the combined company, changes to either company's business, financial position or results of operations prior to completion may adversely affect the value of the consideration to be received by their shareholders in the combination. If an acquisition or disposition ultimately proves to be detrimental to Deutsche Börse Group, NYSE Euronext or Holdco, their respective shares may be worth less than they otherwise would have been had such transaction not been undertaken or successfully completed. Acquisitions and dispositions also may divert the time and focus of Deutsche Börse Group's and/or NYSE Euronext's management from operating their respective businesses to negotiating and completing transactions and, in the case of acquisitions, integrating the acquired businesses.

Detrimental acquisitions or dispositions by Deutsche Börse or NYSE Euronext or the failure to successfully implement or agree upon any such transactions may affect their respective business and/or the value of the consideration to be received by Deutsche Börse shareholders and NYSE Euronext shareholders in the combination.

Table of Contents

Future business combinations, acquisitions, partnerships and joint ventures may require significant resources and/or result in significant unanticipated costs or liabilities.

Holdco may seek to grow its business by entering into business combination transactions, making acquisitions or entering into partnerships or joint ventures, which may be material. The market for acquisition targets and strategic alliances is highly competitive, particularly in light of increasing consolidation in the industry, which could adversely affect Holdco's ability to find acquisition targets or strategic partners consistent with its objectives.

In pursuing its strategy, consistent with industry practice, Holdco may routinely engage in discussions with industry participants regarding potential strategic transactions. Such transactions may be financed by the issuance of additional equity securities, including shares of Holdco, or the incurrence of indebtedness, or a combination thereof. The issuance of additional equity may be substantial and dilutive to existing Holdco shareholders. In addition, the announcement or completion of future transactions could have a material adverse effect on the price of the shares of Holdco. Holdco could face financial risks associated with incurring indebtedness, such as reducing its liquidity, curtailing its access to financing markets and requiring the service of such indebtedness.

In addition, business combination transactions, acquisitions, partnerships and joint ventures may require significant managerial attention, which may be diverted from Holdco's other operations. These capital, equity and managerial commitments may impair the operation of Holdco's businesses. Furthermore, any future business combination transactions or acquisitions could entail a number of additional risks, including increased regulation and exposure to unanticipated liabilities, all of which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Risks Relating to Regulatory Environment and Legal Risks

Further uncertainties in connection with the resolution on and implementation of new regulations may reduce the level of activities of Deutsche Börse Group and/or NYSE Euronext.

A significant piece of regulatory legislation was enacted in the United States, the Dodd-Frank Wall Street Reform and Consumer Protection Act (which is referred to in this document as the Dodd-Frank Act) on July 15, 2010. Few provisions of the Dodd-Frank Act became effective immediately upon signing and many of its provisions require the adoption of regulations by various U.S. federal agencies and departments. Furthermore, the legislation contains substantial ambiguities, many of which will not be resolved until regulations are adopted. As a result, it is difficult to predict all of the effects that the legislation will have on Deutsche Börse Group or NYSE Euronext, although they do expect it to impact their businesses in various and significant ways. For instance, NYPC, the joint venture futures clearing organization within NYSE Euronext that began its operations in the first half of 2011, could become subject to heightened prudential standards to be adopted by the CFTC, as well as to the U.S. Federal Reserve's back-up authority to regulate financial market utilities that are primarily regulated by the CFTC, if NYPC is designated as systemically important. In addition, other Deutsche Börse or NYSE Euronext subsidiaries that are not regulated in the U.S. today but have a U.S. presence could be required to register with regulatory authorities and be subject to extensive regulation. The Dodd-Frank Act authorizes the SEC and CFTC to adopt position limits on the trading of swap and security-based swap products that may trade today or in the future on the facilities of certain of Deutsche Börse's or NYSE Euronext's subsidiaries. Such position limits could cause market participants to change their trading behavior and could result in Deutsche Börse Group or NYSE Euronext experiencing a loss of transaction-based revenue and limit opportunities for future growth. The Dodd-Frank Act also provides regulators, such as the SEC, with enhanced examination and enforcement authorities, which could result in their regulated subsidiaries incurring increased costs to respond to examinations or other regulatory inquiries.

Table of Contents

Similar uncertainties arise in the context of the European regulatory framework for financial markets and Deutsche Börse Group's and NYSE Euronext's European listings, trading, market data, clearing and settlement businesses, which are largely affected by European regulations. The European Commission has proposed or is consulting on significant reforms, notably on the following subjects:

A legislative proposal on the revision of the Markets in Financial Instruments Directive (which is referred to in this document as MiFID) that governs most of Deutsche Börse Group's and NYSE Euronext's day-to-day activities as market operators is expected to be released by the European Commission during the course of 2011. In December 2010, the European Commission issued a Public Consultation on the MiFID review. Both Deutsche Börse Group and NYSE Euronext actively participated in the regulatory discussion and have submitted written responses to the European Commission's public consultation;

In September 2010, the European Commission released a legislative proposal for a regulation on OTC derivatives, central counterparties and trade repositories (formerly, the European Market Infrastructure Regulation, which is referred to in this document as EMIR). Deutsche Börse, NYSE Euronext and over two hundred other parties responded to the European Commission's public consultation with detailed written submissions. The adoption of the regulation is subject to the co-decision process by the European Parliament and the Council, with political agreement expected to be achieved in 2011. This would enable Regulation on Derivative Transactions, Central Counterparties and Trade Repositories to be implemented in 2012, in line with the G20 timetable. The original emphasis in EMIR was on mandating central counterparty (which is referred to in this document as a CCP) clearing for eligible OTC contracts. However, detailed discussion continues about the full scope of the regulation, regulatory standards for CCPs, and others, which may carry a risk of significant impact on current business models and of potentially burdensome and costly operational requirements being imposed on CCPs. In addition, work within the Bank for International Settlements is expected to lead to the current zero risk weighting of collateral lodged with CCPs being replaced by a more burdensome regime for a CCP's counterparties;

In September 2010, the European Commission published a legislative proposal for a regulation on short selling and certain aspects of credit default swaps to regulate short selling activity in the EU. The adoption of the short selling regulation is currently subject to the co-decision process with the European Parliament and the Council;

In November 2010, the European Commission published the second public consultation on a new legal framework for intermediated securities. The European Commission intends to produce legislative proposals on this issue (Securities Law Directive) before the summer of 2011;

The European Commission has carried out a public consultation in relation to the Market Abuse Directive, and is expected to release a legislative proposal for a revised Market Abuse Directive during the course of 2011; and

In January 2011, the European Commission launched a public consultation on the regulation of Central Securities Depositories (which are referred to in this document as CSDs) and the harmonization of settlement across Europe and is expected to issue a legislative proposal in the summer of 2011.

If and when the above legislative proposals are adopted, and/or if any other European legislation relevant to Deutsche Börse Group's or NYSE Euronext's business is adopted or amended, this could adversely impact the businesses of Deutsche Börse Group and NYSE Euronext in various and significant ways and could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

In addition, Deutsche Börse Group's and NYSE Euronext's European businesses are also subject to national legislation in Europe. Part of the legislation governing financial markets in the European countries where it operates is undergoing reform and new legislation is being enacted or proposed. For example, on July 26, 2010, the UK Government announced its plans for reforming the UK regulatory regime, to involve the abolition of the

Table of Contents

Financial Services Authority and its replacement with two separate regulators, one covering prudential risks and the other conduct of business matters. This would mean that, from the end of 2012, NYSE Euronext's London trading market of NYSE Liffe would be principally overseen by a new regulator, the Financial Conduct Authority, whereas NYSE Euronext's London-based clearing activities would be principally regulated by the Bank of England. All of these changes could affect its business in the future. In Belgium, as from March 2011 prudential competences of the Belgian Banking, Finance and Insurance Commission (*Commission bancaire, financière et des assurances*) (which is referred to in this document as the CBFA) should be transferred to the Belgian National Bank with possible impact on NYSE Euronext's clearing activities.

Finally, three new independent European agencies (the European Securities Markets Authority (which is referred to in this document as ESMA) in the field of financial markets, the European Banking Authority for the banking field and the European Insurance and Occupational Pensions Authority for insurances and occupational pensions companies) have been created to contribute to safeguarding the stability of the European Union's financial system by ensuring the integrity, transparency, efficiency and orderly functioning of securities markets, as well as enhancing investor protection. In particular, ESMA is intended to foster supervisory convergence both amongst securities regulators and across financial sectors by working closely with the other competent European Supervisory Authorities. The need for those agencies to become fully operational and the dialogue they will have to put in place with the national competent regulators could slow the process and the implementation of any new measures.

It is expected that market participants will change their behavior in response to these new regulations. Deutsche Börse Group and NYSE Euronext are highly dependent upon the levels and nature of activity on their exchanges and clearing houses, in particular the volume of financial instruments traded and cleared, the number of participants in the market, the relative attractiveness of the financial instruments traded on their exchanges and cleared in their clearing houses and similar factors. To the extent that the above regulatory changes cause market participants to reduce the levels or restrict the nature of activity on Deutsche Börse Group's and/or NYSE Euronext's exchanges, and/or clearing houses, the business and cash flows, financial condition and results of operations of Holdco may be adversely affected. Furthermore, their U.S. and international exchanges compete for listings in other jurisdictions. If the Dodd-Frank Act or any of the pending European legislation described above or any other legislation that might be adopted in the future adversely affects the legal and regulatory environment surrounding the markets that Deutsche Börse Group and/or NYSE Euronext operate, or the market perceptions thereof, it may make it difficult for their exchanges and/or clearing houses to compete with other competitors in different jurisdictions, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Regulatory changes or court rulings may have an adverse impact on Deutsche Börse Group's and NYSE Euronext's ability to derive revenue from market data fees.

Regulatory developments could reduce the amount of revenue that Deutsche Börse Group and NYSE Euronext obtain from market data fees. With respect to Deutsche Börse Group's and NYSE Euronext's U.S. exchanges, the ability to assess fees for market data products is contingent upon receiving approval from the SEC. There continue to be opposing industry viewpoints as to the extent that Deutsche Börse Group and NYSE Euronext should be able to charge for market data, and it is conceivable that the SEC could undertake an examination of exchange market data fees. If such an examination is conducted, and the results were to be detrimental to the ability of Deutsche Börse Group's and NYSE Euronext's U.S. exchanges to charge for market data, there could be a negative impact on their revenues. In November 2004, the SEC proposed corporate governance, transparency, oversight and ownership rules for registered national exchanges and other self-regulated organizations (which are referred to in this document as SROs) and issued a concept release examining the efficacy of self-regulation. The concept release also solicited public comment concerning the level of market data fees, following several years of claims from some competitors and data intermediaries that market data fees and revenues are excessive. Holdco cannot predict whether, or in what form, any regulatory changes will take effect or their impact on the business of its subsidiaries. A determination by the SEC, for example, to

Table of Contents

link market data fees to marginal costs, to take a more active role in the market data rate-setting process, or to reduce the current levels of market data fees could have a material adverse effect on Holdco's market data revenues.

European exchanges are currently authorized to sell trade information on a non-discriminatory basis at a reasonable cost. This regulatory position could be modified or interpreted by the European Commission or European court decisions as well as in Germany by the relevant exchange council (*Börsenrat*) in a manner that could have a material adverse effect on Holdco's European market data revenues.

The legal and regulatory environment in the United States may make it difficult for NYSE Euronext's U.S. exchanges to compete with non-U.S. exchanges for the listings of non-U.S. companies and adversely affect its competitive position.

NYSE Euronext's U.S. exchanges will continue to compete to obtain the listing of non-U.S. issuer securities (in addition to the listing of U.S. issuer securities). However, the legal and regulatory environment in the United States, as well as the perception of this environment, has made and may continue to make it more difficult for NYSE Euronext's U.S. exchanges to compete with non-U.S. securities exchanges for these listings and adversely affect its competitive position.

For example, the Sarbanes-Oxley Act of 2002 imposes a stringent set of corporate governance, reporting and other requirements on both U.S. and non-U.S. publicly listed companies which requires significant resources from issuers. NYSE Euronext believes this has had an adverse impact on the ability of NYSE Euronext's U.S. exchanges to attract and retain listings of non-U.S. issuers. In addition, the Dodd-Frank Act imposes new corporate governance requirements on U.S. listed companies, which may diminish the relative attractiveness of a listing on a U.S. exchange and adversely affect the ability of NYSE Euronext's U.S. exchanges to attract and retain listings. In recent years, both U.S. and non-U.S. companies are increasingly seeking to access the U.S. capital markets through private transactions that do not involve listing on a U.S. exchange, such as through Rule 144A transactions directed exclusively to mutual funds, hedge funds and other large institutional investors. Moreover, the rules facilitating a non-U.S. company's ability to delist its securities and exit the U.S. public company reporting system may make it more difficult for NYSE Euronext to retain listings of non-U.S. companies, and may diminish the perception of NYSE Euronext's U.S. exchanges as premier listing venues, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group and NYSE Euronext operate in a highly regulated industry and may be subject to censures, fines and other legal proceedings if they fail to comply with their legal and regulatory obligations.

Deutsche Börse Group and NYSE Euronext operate in a highly regulated industry and are subject to extensive regulation, including competition and antitrust laws. The securities industry, as well as the banking and financial services industry, are subject to extensive governmental regulation and could become subject to increased regulatory scrutiny. As a matter of public policy, these regulations are designed to safeguard the integrity of the securities and other financial markets and to protect the interests of investors in those markets. The SEC and the CFTC regulate Deutsche Börse Group's and NYSE Euronext's U.S. exchanges and clearing houses in their respective jurisdictions and have broad powers to audit, investigate and enforce compliance with their rules and regulations and impose sanctions for non-compliance. European regulators have similar powers with respect to Deutsche Börse Group's and NYSE Euronext's exchanges and clearing houses in their respective countries. Eurex Clearing AG and Clearstream Banking AG Frankfurt operate as credit institutions with banking licenses under German law and therefore are subject to the banking supervision of BaFin and are obliged to comply with certain legal requirements. The failure to comply with these requirements could result in significant sanctions. As the scope of Holdco's business expands, it may also become subject to oversight by other regulators. In addition, there has been and may continue to be an increased demand for more regulation and stricter oversight. This may lead to the passage of legislation and implementation of regulation which may

Table of Contents

impose excessive regulatory burdens. As a result, Holdco may sustain losses related to a failure to comply with new or existing laws or regulations. Holdco may also sustain losses if contracts must be renegotiated or if contract terms must be altered as a result of new laws, regulations, or court decisions. Additionally, Holdco may have greater responsibility for preventing illegal activities, such as fraud, money laundering, violations of competition regulations or breaches of banking secrecy and face increased financial exposure or penalties related to an increased responsibility as a result of new laws or regulations. Furthermore, non-compliance or inadequate compliance with new or existing laws, inadequate contract terms or court decisions not adequately observed in customary business practice as well as fraud could lead to losses. Holdco's ability to comply with applicable laws and rules will largely depend on its establishment and maintenance of appropriate systems and procedures, as well as its ability to attract and retain qualified personnel.

Both the European regulators and the U.S. regulators are vested with broad enforcement powers over exchanges and clearing houses in their respective jurisdictions, including powers to censure, fine, issue cease-and-desist orders, prohibit an exchange or clearing house from engaging in some of its operations or suspend or revoke an exchange's or a clearing house's recognition, license or registration. In the case of actual or alleged non-compliance with regulatory requirements, Deutsche Börse Group's and NYSE Euronext's exchanges or clearing houses could be subject to investigations and administrative or judicial proceedings that may result in substantial penalties, including revocation of an exchange's or a clearing house's recognition, license or registration. Any such investigation or proceeding, whether successful or unsuccessful, would result in substantial costs and diversions of resources, could negatively impact Holdco's reputation and could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations. Furthermore, action by any of Deutsche Börse Group's or NYSE Euronext's regulators requiring them to limit or otherwise change their operations, or prohibiting them from engaging in certain activities, could adversely affect their business and cash flows, financial condition and operating results. For instance, on September 30, 2010, the SEC and CFTC issued a joint report presenting their findings regarding the market events of May 6, 2010, commonly referred to as the "flash crash." Although NYSE Euronext does not anticipate that the joint report will lead to the adoption of significant regulatory changes that adversely affect its business, the risk of such changes is heightened as a result of the breadth of the review by the SEC and CFTC, the impact of the May 6th event on investors and the marketplace and the fact that certain aspects of its business were highlighted in the joint report. Furthermore, any regulatory changes in response to the "flash crash" and joint report may impact certain of NYSE Euronext's customers' business models and practices, in particular high frequency trading, which may in turn adversely affect Holdco's business and cash flows, financial condition and results of operations.

Holdco may face competitive disadvantages, or may lose or impede its business opportunities, if it does not receive necessary or timely regulatory approvals for new business initiatives.

Deutsche Börse Group and NYSE Euronext operate exchanges and/or clearing houses in Germany, the United States, France, Belgium, Portugal, the Netherlands, the United Kingdom and Switzerland. Regulators in each of these countries regulate exchanges and clearing houses through the adoption and enforcement of rules governing the trading activities, business conduct and financial responsibility of such exchanges and clearing houses and entities and individuals associated with them. All of Deutsche Börse Group's and NYSE Euronext's initiatives in these jurisdictions with regulatory implications must be approved by the relevant authorities in each of these countries. Changes to Holdco's articles of association and to the organizational documents or rules of Deutsche Börse Group's and NYSE Euronext's European exchanges and clearing houses, to the extent affecting the activities of these entities, may also require approvals. Holdco may from time to time seek to engage in new business activities, some of which may require changes to its exchanges' and clearing houses' organizational documents or rules.

Deutsche Börse Group, through ISE, currently operates one U.S. registered national securities exchange and NYSE Euronext currently operates three U.S. registered national securities exchanges and one designated contract market. Pursuant to U.S. laws and regulations, these exchanges are responsible for regulating their member organizations through the adoption and enforcement of rules governing the trading activities, business

Table of Contents

conduct and financial responsibility of their member organizations and the individuals associated with them. Changes to the rules of the U.S. registered securities exchanges are generally subject to the approval of the SEC, which publishes proposed rule changes for public comment. Changes to the organizational documents or rules of Deutsche Börse Group's or NYSE Euronext's U.S. exchanges, to the extent affecting the activities of these exchanges, must also be approved. Holdco may from time to time seek to engage in new business activities, some of which may require changes to its U.S. exchanges' organizational documents or rules.

Any delay or denial of a requested approval could cause Deutsche Börse Group and NYSE Euronext to lose business opportunities, slow their ability to integrate their different markets or slow or impede their ability to change their governance practices. Deutsche Börse Group's and NYSE Euronext's competitive position could be significantly weakened if their competitors are able to obtain regulatory approval for new functionalities faster, or with less cost or difficulty, or if approval is not required for Deutsche Börse Group's and NYSE Euronext's competitors but is required for Deutsche Börse Group and NYSE Euronext. For instance, NYSE Euronext may be adversely affected if it is unable to obtain SEC approval to make permanent its New Market Model pilot program, which includes the creation of designated market makers, or if Deutsche Börse is unable to obtain SEC approval for the planned Eurex-ISE trading and clearing link. Competitors that are not registered exchanges are subject to less stringent regulation. In addition, as Deutsche Börse Group and NYSE Euronext seek to expand their product base, they could become subject to the oversight of additional regulatory bodies. As a consequence, any delay or denial of requested approvals could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Similar risks could arise if the banking and financial services institutions operated by Holdco do not receive necessary or timely regulatory approvals for their new business initiatives.

The U.S. exchanges of NYSE Euronext and Deutsche Börse Group rely on the Financial Industry Regulatory Authority, Inc. (which is referred to in this document as "FINRA") to perform certain regulatory functions, and Holdco's business could be adversely affected if FINRA ceases to perform these functions.

FINRA performs certain regulatory functions for each of the U.S. exchanges of NYSE Euronext and Deutsche Börse Group. FINRA performs certain regulatory functions relating to member firm registration, short sale compliance surveillance, market surveillance investigation, examination, disciplinary and arbitration proceedings. In addition, FINRA performs certain regulatory functions relating to member firm registration, examination, investigations, disciplinary and arbitration proceedings pursuant to separate agreements with each of EDGA and EDGX. Since July 30, 2007, FINRA also has conducted financial, operational and sales practice oversight over the members of NYSE Euronext's U.S. securities exchanges. On June 14, 2010, NYSE Euronext and FINRA announced the completion of the previously announced agreement under which FINRA will assume responsibility for performing the market surveillance and enforcement functions previously conducted by NYSE Regulation. As of that date, FINRA assumed these regulatory functions for NYSE Euronext's U.S. equities and options markets, NYSE, NYSE Arca and NYSE Amex, and a substantial majority of the NYSE Regulation staff was transferred to FINRA. Although NYSE Regulation ultimately remains responsible for overseeing FINRA's performance of regulatory services for NYSE Euronext's markets, and NYSE Regulation has retained staff associated with such responsibility, as well as for rule development and interpretations, oversight of listed issuers' compliance with financial and corporate governance standards and real-time stockwatch reviews, following the completion of this agreement, NYSE Euronext is substantially more reliant on FINRA to perform these regulatory functions. NYSE Euronext is required to allocate significant resources to FINRA to perform these regulatory functions. Similarly ISE, EDGA, and EDGX ultimately remain responsible for overseeing FINRA's performance of regulatory services for each such exchange and for carrying out those self-regulatory functions that are not subject to an agreement with FINRA.

The obligation to fund these regulatory functions could limit Holdco's ability to reduce its expense structure, and could limit its ability to invest in or pursue other opportunities that may be beneficial to Holdco's shareholders. If FINRA experiences difficulties or materially changes its business relationship with the U.S.

Table of Contents

exchanges of NYSE Euronext or Deutsche Börse Group, or if FINRA or such exchanges are unable for any reason to perform their obligations, this could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Deutsche Börse Group's obligations in connection with its regulatory functions limit its funding resources.

Pursuant to Section 5 para. 1 of the German Stock Exchange Act (*Börsengesetz*), operators of German exchanges must provide certain funds to the exchanges operated by them. Therefore, Deutsche Börse, as operator of the Frankfurt Stock Exchange, is required to provide the Frankfurt Stock Exchange, at the request of its management, with staff and financial resources as well as the means necessary for the operation and further development of its business. This applies accordingly to Eurex Frankfurt AG as operator of Eurex Deutschland Exchange, European Energy Exchange AG and EEX Power Derivatives GmbH as operators of EEX and Tradegate Exchange GmbH as operator of Tradegate Exchange. The obligation to fund these regulatory functions could limit Deutsche Börse Group's and Holdco's funding resources, Holdco's ability to reduce its expense structure, and could limit its ability to invest in or pursue other opportunities that may be beneficial to Holdco's shareholders, which could in turn have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Regulatory changes requiring exchange operators to allow additional central counterparties to clear trades on their exchanges may adversely affect Deutsche Börse Group's and NYSE Euronext's clearing operations.

Deutsche Börse and NYSE Euronext both own affiliates that generate income as central counterparties to trades conducted on exchanges and over-the-counter markets. A central counterparty acts as an intermediary between trading parties, minimizing the default risk of a contracting party and clearing the transaction. As the European Commission begins to require more types of financial instruments to be cleared by central counterparties, it is possible that it will adopt regulations that require exchange operators to allow other central counterparties—including those that are not affiliates of the exchange operator—to clear trades on their exchanges. If such regulations are implemented, Deutsche Börse and NYSE Euronext could be required to allow central counterparties, in addition to their own affiliates, to clear trades conducted through Deutsche Börse's and NYSE Euronext's exchanges. Such regulations could reduce Deutsche Börse's and NYSE Euronext's revenues, which could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Conflicts of interest between Deutsche Börse Group's and NYSE Euronext's for-profit status and their regulatory responsibilities may adversely affect their businesses.

Deutsche Börse Group and NYSE Euronext are for-profit businesses with regulatory responsibilities. Pursuant to the German Stock Exchange Act, Deutsche Börse is obligated to take measures to recognize and to avoid conflicts of interest between its own commercial and economic interests as a for-profit business or such interests of its shareholders and the public interest in the proper operation of the Frankfurt Stock Exchange, as far as such conflicts could have a negative impact on the operation of the Frankfurt Stock Exchange or the trading participants. For example, Deutsche Börse is required by law to ensure that the Frankfurt Stock Exchange complies with its statutory mandate. If the ability to carry out this statutory supervisory function is adversely affected by a conflict of interest in violation of the German Stock Exchange Act, then this conflict of interest could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations. The U.S. exchanges of NYSE Euronext and Deutsche Börse Group also are for-profit businesses with regulatory responsibilities. In some circumstances, there may be a conflict of interest between the regulatory responsibilities of these exchanges and some of their respective member organizations and customers. While the U.S. exchanges have implemented structural protections to minimize these potential conflicts, such measures may not be successful. Any failure by one of the U.S. exchanges with self-regulatory responsibility under the Exchange Act to diligently and fairly regulate its member organizations or to otherwise fulfill its regulatory obligations could significantly harm NYSE Euronext and Deutsche Börse Group's reputation, prompt regulatory scrutiny and adversely affect business, financial condition and operating results.

Table of Contents

The listing of Holdco's shares on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris could also potentially create a conflict between the respective exchanges' regulatory responsibilities to ensure a proper listing and trading procedure, on the one hand, and the commercial and economic interests of Holdco, Deutsche Börse Group and NYSE Euronext, on the other hand. Any failure by one of the exchanges of Deutsche Börse Group or NYSE Euronext with legal or self-regulatory responsibility to diligently and fairly regulate its trading and issuers or to otherwise fulfill its regulatory obligations could significantly harm Holdco's, Deutsche Börse Group's and NYSE Euronext's reputation and prompt heightened regulatory scrutiny (which again may result in sanctions being imposed), and could have a material adverse effect on Holdco's business and cash flows, financial condition and results of operations.

Risks Relating to Tax Matters

There can be no assurances that holders of NYSE Euronext shares will not be required to recognize gain for U.S. federal income tax purposes upon the exchange of NYSE Euronext shares for Holdco shares in the merger.

Although it is intended that, for U.S. federal income tax purposes, (1) the merger will qualify as a reorganization within the meaning of Section 368(a) of Internal Revenue Code and/or the merger and the exchange offer, taken together will qualify as a transaction described in Section 351(a) of Internal Revenue Code, and (2) each transfer of NYSE Euronext shares to Holdco by a NYSE Euronext shareholder pursuant to the merger (other than a NYSE Euronext shareholder that is a five percent transferee stockholder of Holdco, as defined in Treasury Regulations promulgated under Section 367(a) of Internal Revenue Code) will not be subject to Section 367(a) of Internal Revenue Code, there can be no assurances that the merger and the transfer of NYSE Euronext shares to Holdco will so qualify. Because of the possibility that the first NYSE tax condition (as defined below) and/or the second NYSE tax condition (as defined below) may be waived without the receipt of a tax opinion or private letter ruling, because any tax opinion or private letter ruling received may not remain valid until the closing date of the merger or may contain conditions that may not be satisfied, and because the tax consequences under Section 367(a) of the Internal Revenue Code depend, among other things, on whether Holdco acquires 80 percent or more of the shares of Deutsche Börse in the exchange offer (which will not be known until the closing of the exchange offer), counsel to NYSE Euronext is unable to express an opinion regarding the U.S. federal income tax treatment of the merger as of the date of this proxy statement/prospectus.

It is a condition to NYSE Euronext's obligation to complete the merger that Holdco have completed the exchange offer. It is a waivable condition to Holdco's obligation to complete the exchange offer that NYSE Euronext receive, on or prior to the expiration of the offer acceptance period (which may occur several months prior to the completion of the exchange offer), one or more private letter rulings from the Internal Revenue Service substantially to the effect that (1) the merger will qualify as a reorganization within the meaning of Section 368(a) of Internal Revenue Code and/or the merger and the exchange offer, taken together, will qualify as an exchange within the meaning of Section 351(a) of Internal Revenue Code, which is referred to in this document as the first NYSE tax condition, and (2) each transfer of NYSE Euronext shares to Holdco by a U.S. holder of NYSE Euronext shares (other than a five percent transferee shareholder of Holdco, as defined in Treasury regulations promulgated under Section 367(a) of Internal Revenue Code) will qualify for an exception to Section 367(a)(1) of Internal Revenue Code under Treasury Regulation Sections 1.367(a)-3(c)(1) and 1.367(a)-3(c)(9), which is referred to in this document as the second NYSE tax condition, and together with the first NYSE tax condition, the NYSE tax conditions.

There can be no assurance that a private letter ruling will be received from the Internal Revenue Service prior to the expiration of the offer acceptance period, or that a private letter ruling will be received at all. Even if a private letter ruling is received, there can be no assurance that any representations or conditions contained in such private letter ruling will be satisfied.

Under the business combination agreement, NYSE Euronext is required to waive the first NYSE tax condition if NYSE Euronext receives a written opinion of counsel, in form and substance reasonably satisfactory

Table of Contents

to NYSE Euronext, dated no later than one business day prior to the time at which the acceptance period of the exchange offer expires (or such later date as permitted by the BaFin) (the later of such dates is referred to as the Waiver Limitation Date), to the effect that the merger will qualify as a reorganization within the meaning of Section 368(a) of Internal Revenue Code and/or the merger and the exchange offer, taken together, will qualify as a transaction described in Section 351(a) of Internal Revenue Code. In the event a private letter ruling with respect to the second NYSE tax condition is received from the Internal Revenue Service prior to the Waiver Limitation Date, NYSE Euronext expects that it will receive the opinion of counsel described in this paragraph and, therefore, that it will waive the first NYSE tax condition. In the event NYSE Euronext does not receive such private letter ruling prior to the Waiver Limitation Date, NYSE Euronext expects to waive the first NYSE tax condition without receipt of the opinion of counsel described in this paragraph.

Under the business combination agreement, NYSE Euronext is required to waive the second NYSE tax condition if NYSE Euronext receives an opinion of counsel, in form and substance reasonably satisfactory to NYSE Euronext, dated as of the Waiver Limitation Date, to the effect that each transfer of NYSE Euronext shares to Holdco by a U.S. holder (other than a holder that is a five percent transferee shareholder of Holdco, as defined in Treasury regulations promulgated under Section 367(a) of the Internal Revenue Code) will not be subject to Section 367(a)(1) of Internal Revenue Code. Unless the parties receive a private letter ruling with respect to the second NYSE tax condition, from the Internal Revenue Service the tax consequences under Section 367(a) of the Internal Revenue Code will depend, among other things, on whether Holdco acquires 80 percent or more of the shares of Deutsche Börse in the exchange offer. Because the results of the exchange offer will not be known until after the closing of the exchange offer (and after the Waiver Limitation Date), NYSE Euronext does not expect to receive the opinion of counsel described in this paragraph on or prior to the Waiver Limitation Date. Accordingly, in the event a private letter ruling with respect to the second NYSE tax condition is not received from the Internal Revenue Service prior to the Waiver Limitation Date, NYSE Euronext may waive the second NYSE tax condition without receipt of the opinion of counsel described in this paragraph. In the event of a waiver of the first NYSE tax condition and/or the second NYSE tax condition, NYSE Euronext does not intend to recirculate this document to resolicit NYSE Euronext shareholder approval.

Accordingly, there can be no assurance that the merger and the transfer of NYSE Euronext shares to Holdco will qualify for the intended U.S. federal income tax treatment described above. Holders of NYSE Euronext shares will be required to recognize gain for U.S. federal income tax purposes if the merger fails to qualify as a reorganization within the meaning of Section 368(a) of Internal Revenue Code and the merger and the exchange offer, taken together, fail to qualify as a transaction described in Section 351(a) of Internal Revenue Code. Moreover, even if the merger qualifies as a reorganization within the meaning of Section 368(a) of Internal Revenue Code and/or the merger and the exchange offer, taken together, qualify as a transaction described in Section 351(a) of Internal Revenue Code, U.S. holders of NYSE Euronext shares will be required to recognize gain for U.S. federal income tax purposes pursuant to Section 367(a) of Internal Revenue Code upon the transfers of NYSE Euronext shares to Holdco pursuant to the merger if the requirements of Section 367(a) of Internal Revenue Code and the Treasury Regulations promulgated thereunder are not satisfied.

Holdco, Deutsche Börse, NYSE Euronext and their respective subsidiaries are subject to tax audits and could incur significant tax liabilities as a result of such audits.

Holdco, Deutsche Börse, and NYSE Euronext and their respective subsidiaries are regularly subject to tax audits. As a result of current or future tax audits or any other reviews by taxing authorities having jurisdiction over Holdco, Deutsche Börse, NYSE Euronext or their respective subsidiaries, additional taxes could be assessed (*e.g.*, in connection with acquisitions, restructuring transactions or intercompany arrangements), which could lead to an increase in the aggregate tax burden of the Holdco group.

Table of Contents

Holdco may be or become taxable in a jurisdiction other than the Netherlands and/or may be or become a dual resident company for tax purposes. This may increase the aggregate tax burden on Holdco and its shareholders. The combination of the businesses of Deutsche Börse Group and NYSE Euronext may result in an increase in the overall tax burden of the combined group.

Because Holdco is incorporated under Dutch law it will be treated for Dutch corporate income tax purposes as a resident of the Netherlands. Based on the currently envisaged management structure of Holdco and current tax laws of the United States, Germany and the Netherlands, as well as applicable income tax treaties, and current interpretations thereof, Holdco expects to be tax resident solely in the Netherlands. Holdco has requested, but has not yet obtained, binding rulings from the tax authorities in the Netherlands and in Germany confirming this treatment. However, even if such rulings are granted, the applicable tax laws or interpretations thereof may change, the representations on which such rulings were based may be inaccurate, or the facts may change. As a consequence, Holdco may be or become a tax resident of a jurisdiction other than the Netherlands and/or may be or become a dual resident company for tax purposes. This may increase the aggregate tax burden on Holdco and its shareholders. In particular, this may result in the imposition of additional withholding taxes on Holdco's shareholders, which withholding taxes may not be creditable, deductible or otherwise refundable in a shareholder's country of tax residence.

Dividends and other intra-group payments made by Deutsche Börse, NYSE Euronext or their respective subsidiaries may be subject to withholding taxes imposed by the jurisdiction in which the entity making the payment is organized or tax resident. Unless such withholding taxes are fully credited against the income tax liability of the entity receiving the payment or fully refunded, dividends and other cross-border payments within the Holdco group may increase the aggregate tax burden imposed on the Holdco group. Although Holdco intends to arrange the ownership of its subsidiaries and future intercompany payments with a view to minimizing the incurrence of such withholding taxes, there can be no assurance that it will succeed.

Risks Relating to Holdco Shares

There has been no prior public market for Holdco shares, and the market price of Holdco shares may be volatile.

Holdco plans to list the Holdco shares on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris. However, an active public market for Holdco shares may not develop or be sustained after the completion of the combination. Holdco cannot predict the extent to which a trading market will develop or how liquid that market might become.

The market price of Holdco shares may be volatile. Broad general economic, political, market and industry factors may adversely affect the market price of Holdco shares, regardless of Holdco's actual operating performance. Factors that could cause fluctuations in the price of Holdco shares may include, among other things:

actual or anticipated variations in quarterly operating results and the results of competitors;

changes in financial estimates by Holdco or by any securities analysts that might cover Holdco shares;

conditions or trends in the industry, including regulatory changes or changes in the securities marketplace;

changes in the market valuations of exchanges and other trading facilities in general, or other companies operating in the securities industry;

announcements by Holdco or its competitors of significant acquisitions, strategic partnerships or divestitures;

announcements of investigations or regulatory scrutiny of Holdco's operations or lawsuits filed against it;

Table of Contents

additions or departures of key personnel; and

issues or sales of Holdco shares, including sales of shares by its directors and officers or its strategic investors.

Following the completion of the combination, Holdco may cease to be a foreign private issuer, which could result in significant additional costs and expenses.

Holdco is currently a foreign private issuer, as such term is defined in Rule 3b-4 under the Exchange Act. Following the combination, Holdco will lose its foreign private issuer status if more than 50% of the Holdco shares are held by U.S. persons and any of the following occurs: (1) a majority of its directors or executive officers are U.S. citizens or residents; (2) more than 50% of its assets are located in the United States; or (3) Holdco's business is administered principally in the United States. Given that the office of the Holdco chief executive officer will be based principally in the United States, it is possible that Holdco could lose its foreign private issuer status if more than 50% of the Holdco shares will be held by U.S. persons as of the relevant date of determination.

Under Rule 3b-4 under the Exchange Act, the determination of whether a company is a foreign private issuer is made annually on the last business day of an issuer's most recently completed second fiscal quarter. Accordingly, the first determination as to whether Holdco will continue to be a foreign private issuer after the completion of the combination will be made on June 30, 2012.

If Holdco were to lose its status as a foreign private issuer, then it would have to mandatorily comply with U.S. federal proxy requirements, and Holdco officers, directors and principal shareholders would become subject to the short-swing profit disclosure and recovery provisions of Section 16 of the Exchange Act. Holdco would also be required to file periodic reports and registration statements on U.S. domestic issuer forms with the SEC, which are more detailed and extensive than the forms available to a foreign private issuer. Finally, Holdco would have to comply with the NYSE listing requirements applicable to U.S. domestic issuers, including the requirement to hold annual meeting for the election of directors. As a result, the regulatory and compliance costs to Holdco under U.S. securities laws as a U.S. domestic issuer may be significantly higher. Holdco may also be required to modify certain of its policies to comply with governance practices associated with U.S. domestic issuers. Such conversion and modifications will involve additional costs.

In addition, pursuant to Sections 302 and 404 of the Sarbanes-Oxley Act of 2002, management of Holdco would also be required to certify to and report on, and Holdco's independent registered public accounting firm would be required to attest to, the effectiveness of Holdco's internal controls over financial reporting with respect to the operations of Holdco as of the end of such fiscal year. The rules governing the standards that must be met for management to assess Holdco's internal controls over financial reporting are complex, and require significant documentation, testing and possible remediation. The continuing effort to comply with regulatory requirements relating to internal controls would likely cause Holdco to incur increased expenses and diversion of management's time and other internal resources, in particular in respect of Deutsche Börse and its subsidiaries, which have not previously been subject to Rule 404 requirements. Holdco also may encounter problems or delays in completing the implementation of any changes necessary to make a favorable assessment of its internal controls over financial reporting. In addition, in connection with the attestation process by Holdco's independent registered public accounting firm, Holdco may encounter problems or delays in completing the implementation of any requested improvements or receiving a favorable attestation. If Holdco loses its foreign private issuer status and cannot favorably assess the effectiveness of its internal controls over financial reporting, or if Holdco's independent registered public accounting firm is unable to provide an unqualified attestation report on Holdco's assessment, this could have a material adverse effect on investor's confidence and the price of Holdco shares.

Table of Contents

If Holdco continues to be a foreign private issuer, its shareholders may not receive the information about Holdco that you would typically receive from a publicly traded U.S. domestic company.

Holdco is currently a foreign private issuer, as such term is defined in Rule 3b-4 under the Exchange Act. Following the completion of the combination, it is possible that Holdco will remain a foreign private issuer. As long as Holdco remains a foreign private issuer and does not elect to file with the SEC as a U.S. domestic issuer, investors may not receive the information that investors would typically receive from a publicly traded U.S. domestic company. In particular, a foreign private issuer does not have to comply with U.S. federal proxy requirements, and Holdco officers, directors and principal shareholders would not be subject to the short-swing profit disclosure and recovery provisions of Section 16 of the Exchange Act. In addition, Holdco would not be required to file quarterly periodic reports or registration statements on U.S. domestic issuer forms with the SEC, which are more detailed and extensive than the forms available to a foreign private issuer. Holdco also would not be obligated to comply with certain NYSE listing requirements applicable to U.S. domestic issuers, including the requirement to hold an annual meeting for the election of directors. As a result, the information that its shareholders have regarding Holdco may be less than its shareholders would receive from a publicly traded U.S. domestic company.

The level of any dividend paid in respect of Holdco shares is subject to a number of factors, including the financial condition and results of operations of Deutsche Börse Group and NYSE Euronext, as well as the distributions of operating earnings to Holdco by Deutsche Börse Group and NYSE Euronext and the freely distributable reserves of Holdco.

Although Holdco expects to pay dividends, the level of any dividend paid in respect of Holdco shares is within the discretion of the Holdco board of directors and is subject to a number of factors, including the business and financial conditions, earnings and cash flow of, and other factors affecting Holdco and its subsidiaries. As Holdco itself is not expected to perform any operating activities, its ability to pay a dividend and the level of any dividends in respect of the Holdco shares is subject to the extent to which Holdco receives funds, directly or indirectly, from its operating subsidiaries and divisions in a manner which creates funds from which dividends can be legally paid. Under Dutch law, Holdco may make distributions to its shareholders and other persons entitled to distributable profits only up to the amount of the part of Holdco's net assets which exceeds the nominal value of the share capital of Holdco and its reserves that must be maintained by law. In addition, each subsidiary's ability to pay dividends will depend on the law of the jurisdiction in which such subsidiary is organized.

Any delay in implementing the post-completion reorganization could adversely impact the payment of dividends from Deutsche Börse to Holdco. In the event that Holdco holds, directly or indirectly, 75% or more of the outstanding Deutsche Börse shares after the completion of exchange offer or any time thereafter, Holdco intends to enter (directly and/or through a wholly owned subsidiary) into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement in order to more fully integrate Deutsche Börse Group into the combined group. The effectiveness of these agreements may be delayed for an uncertain time, including, for example, due to shareholder litigation or may not be achievable at all. This would limit the ability of Holdco to request the payment of dividends from Deutsche Börse. Any failure to pay dividends in any financial year could have a material adverse effect on the price of Holdco shares.

Shareholders of Holdco could be diluted in the future.

Holders of Holdco shares generally will have a preemption right with respect to any issuance of Holdco shares or the granting of rights to subscribe for Holdco shares, unless such preemption right is restricted or excluded by the general meeting of shareholders or by the Holdco board of directors if so designated by the general meeting of shareholders. It is expected that prior to the completion of the combination, the Holdco board of directors will be designated by the general meeting of shareholders as the corporate body competent to restrict or exclude preemption rights, subject to the limited authority it has to issue Holdco shares and grant rights to subscribe for Holdco shares, up to the maximum unissued portion of the authorized share capital as it will exist at

Table of Contents

the time of the issue, for a period of five years from the date of such resolution. If preemption rights are restricted or excluded, the ownership interests of Holdco shareholders could be diluted upon the issuance of shares. Due to laws and regulations in jurisdictions outside the Netherlands, shareholders in those jurisdictions may not be able to exercise their preemption subscription rights unless Holdco takes action to register or otherwise qualify the rights offering under the laws of that jurisdiction. For example, in the United States, U.S. holders of Holdco shares may not be able to exercise preemption rights unless a registration statement under the Securities Act is declared effective with respect to the Holdco shares issuable upon exercise of such rights or an exemption from the U.S. registration requirements is available. If shareholders in such jurisdictions are unable to exercise their subscription rights, their ownership interest in Holdco would be diluted. Any future issuance of new Holdco shares or debt instruments convertible into Holdco shares where subscription rights of Holdco shareholders are not available or are excluded would result in the dilution of existing Holdco shareholders and reduce the earnings per Holdco share, which could have a material adverse effect on the price of Holdco shares.

As a result of this improved operating performance, NYSE Euronext reported net income attributable to NYSE Euronext of \$155 million, or \$0.59 per diluted share for the three months ended March 31, 2011, compared to net income attributable to NYSE Euronext of \$130 million, or \$0.50 per diluted share for three months ended March 31, 2010.

Outlook

Holdco does not expect to conduct any material activities other than the matters contemplated by the business combination agreement, including the exchange offer and the merger, as described in [The Business Combination Agreement](#) and [Business of Holdco and Certain Information about Holdco](#). Following the completion of the combination, Holdco expects to implement the post-completion reorganization steps described in [The Business Combination Agreement](#) [Post-Completion Reorganization](#).

Deutsche Börse Group and NYSE Euronext will, until the earlier of the completion of the combination and the termination of the business combination agreement, conduct their businesses in the ordinary and usual course consistent with past practice, subject to the limitations set forth in the business combination agreement. See [The Business Combination Agreement](#) [Conduct of the Business Pending the Business Combination](#).

Holdco aims to have all conditions to completion satisfied by December 31, 2011. However, Holdco cannot guarantee that the satisfaction of the conditions to completion will not be delayed to March 31, 2012, or that the conditions to completion will be satisfied at all.

Table of Contents

GENERAL INFORMATION

Responsibility for the Contents

Alpha Beta Netherlands Holding N.V. (herein referred to as Holdco), a public company incorporated under the laws of the Netherlands (*naamloze vennootschap*) and having its official seat (*statutaire zetel*) in Amsterdam assumes responsibility for the content of this document. Notwithstanding the declaration contained in Section 25 of the exchange offer document, Holdco declares that information contained in this document is to the best of its knowledge accurate and does not omit material circumstances, and that Holdco has taken all reasonable care to ensure that the information contained in this document is, to the best of Holdco's knowledge, true and correct and contains no omission which would affect its import.

Holdco will update this Offer Document to the extent permissible and required under the German Takeover Act, and will comply with its obligation under U.S. law according to the Exchange Act to inform security holders of any material change in the information published, sent or given to security holders. Holdco will also, as applicable, publish additional accompanying information regarding the exchange offer, which will be made available on Holdco's website at <http://www.global-exchange-operator.com>, and will file such information in English on the SEC's website at <http://www.sec.gov/edgar/searchedgar/companysearch.html>.

Purpose of this Document

This document refers to the offer of 195,146,864 registered Holdco shares, with a nominal value of 1.00 each, offered to the holders of Deutsche Börse shares as offer consideration under the exchange offer made by Holdco.

Deutsche Börse shareholders who have validly tendered and not withdrawn their shares in the exchange offer and NYSE Euronext shareholders whose NYSE Euronext shares are converted in the merger into the right to receive Holdco shares will receive shares in Holdco issued out of a capital increase pursuant to a shareholders' resolution passed by Holdco's extraordinary shareholders' meeting on May 2, 2011, the capital increase becoming effective upon completion of the combination (see Description of the Shares of Holdco Issuance of Holdco Shares for the Completion of the Exchange Offer and the Merger). Each of the Holdco shares will be entitled to full dividend rights since the incorporation of Holdco on February 10, 2011.

Holdco will apply immediately prior to the time of delivery of the Holdco shares to the shareholders of Deutsche Börse pursuant to the exchange offer and to the NYSE Euronext shareholders pursuant to the merger for admission of its shares to trading on the regulated market segment (*regulierter Markt*) of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) and simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard) as well as in the regulated market segment of Euronext Paris. In addition, Holdco intends to list its shares on the New York Stock Exchange.

Holdco expects that the Holdco shares which the accepting shareholders of Deutsche Börse will receive upon settlement of the exchange offer will have been admitted to trading (listed) at the time of delivery to the shareholders of Deutsche Börse having accepted the exchange offer.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of Holdco shares to the shareholders of Deutsche Börse having accepted the exchange offer.

Presentation of Financial Information

This document contains:

the audited balance sheet of Holdco as of February 10, 2011;

Table of Contents

the unaudited condensed consolidated financial statements of Deutsche Börse Group as at and for the three months period ended March 31, 2011;

the audited consolidated financial statements of Deutsche Börse Group as of December 31, 2010, 2009 and 2008 and for each of the years in the three-year period ended December 31, 2010, prepared on the basis of IFRS; and

the audited consolidated financial statements of NYSE Euronext as of December 31, 2010, 2009 and 2008 and for each of the years in the three-year period ended December 31, 2010 prepared in accordance with U.S. GAAP.

Unless indicated otherwise, financial data presented in this document has been taken from the audited consolidated financial statements of Deutsche Börse Group and NYSE Euronext included in this document.

Where information is identified as *unaudited* in this document, this means it has not been subject to an audit or inspection by an auditor (*prüferische Durchsicht*).

The financial information set forth in this document has been rounded for ease of presentation. Accordingly, in certain cases, the sum of the numbers in a column in a table may not conform to the total figure given for that column.

For additional information on the presentation of financial information in this document, see the financial statements of Holdco beginning on page FIN-2 of this document, the audited consolidated financial statements of Deutsche Börse Group beginning on page FIN-51 of this document and the audited consolidated financial statements of NYSE Euronext beginning on page FIN-9 of this document.

Forward-Looking Statements

This document contains forward-looking statements. A forward-looking statement is any statement that does not relate to historical facts and events. Forward-looking statements in this document include, in particular, statements containing information on future earnings capacity, plans and expectations of Holdco's business, its growth and profitability, and general economic and regulatory conditions and other factors to which it is or may be exposed. Statements made using terms such as *may*, *might*, *will*, *should*, *expect*, *plan*, *intends*, *anticipate*, *believe*, *assume*, *estimate*, *predict*, *potential is likely or continue*, and the negative of these terms and other comparable terminology indicate forward-looking statements. Forward-looking statements in this document are based on estimates and assessments made to the best of Holdco's present knowledge. These forward-looking statements are based on assumptions, uncertainties and other factors, the occurrence or non-occurrence of which could cause the actual results of Holdco, including its financial condition and/or profitability, to differ materially from or fail to meet the expectations expressed or implied in the forward-looking statements. Accordingly, investors are strongly advised to read the following sections of this document: *Summary*, *Risk Factors*, *Management's Discussion and Analysis of Financial Condition and Results of Operations of Deutsche Börse Group*, *Management's Discussion and Analysis of Financial Condition and Results of Operations of NYSE Euronext*, *Business of Holdco and Certain Information about Holdco*, *Business of Deutsche Börse Group and Certain Information about Deutsche Börse Group*, *Business of NYSE Euronext and Certain Information about NYSE Euronext* and *Recent Developments and Outlook*. These sections include more detailed descriptions of factors that might have an impact on the business of Holdco and the market in which it operates.

In light of the uncertainties and assumptions, it is also possible that the future events mentioned in this document might not occur. In addition, the forward-looking estimates and forecasts reproduced in this document from third-party reports could prove to be inaccurate.

Table of Contents

The forward-looking statements contained in this document speak only as of the date on which they are made. Holdco expressly disclaims any obligation or undertaking, except as required by law, to release publicly any updates or revisions to any forward-looking statement contained herein to reflect any change in Holdco's expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based or to conform any such statement to actual events or developments.

Sources of Industry and Market Data

Where information has been sourced from a third party, the source of such information has been identified.

Unless otherwise indicated, the information contained in this document on the market environment, market developments, growth rates, market trends and competition in the markets in which Deutsche Börse Group and NYSE Euronext operate is taken from publicly available sources, including, but not limited to, third-party sources, or reflects Holdco's, Deutsche Börse Group's and NYSE Euronext's estimates that are principally based on information from publicly available sources. Holdco confirms that the information included in this document that has been sourced from a third party has been accurately reproduced and that, as far as the Holdco is aware and was able to ascertain from such information, no facts have been omitted which would render the reproduced information inaccurate or misleading.

Exchange Rates

The following table shows for the period from January 1, 2005 through April 29, 2011, the low, high, average and period exchange rate U.S. dollars per euro.

Year	Exchange Rates			Period End
	Low	High (U.S. dollars per euro)	Average	
2005	1.1667	1.3476	1.2400 ⁽¹⁾	1.1842
2006	1.1860	1.3327	1.2661 ⁽¹⁾	1.3197
2007	1.2904	1.4862	1.3797 ⁽¹⁾	1.4603
2008	1.2446	1.6010	1.4695 ⁽¹⁾	1.3919
2009	1.2547	1.5100	1.3955 ⁽¹⁾	1.4332
2010	1.1959	1.4535	1.3216 ⁽¹⁾	1.3269
Month				
October 2010	1.3619	1.4159	1.3900 ⁽²⁾	1.3947
November 2010	1.2969	1.4282	1.3641 ⁽²⁾	1.2983
December 2010	1.2971	1.3499	1.3227 ⁽²⁾	1.3384
January 2011	1.2944	1.3715	1.3371 ⁽²⁾	1.3371
February 2011	1.3474	1.3794	1.3648 ⁽²⁾	1.3793
March 2011	1.3777	1.4226	1.4019 ⁽²⁾	1.4158
April 2011 (until April 29, 2011)	1.4221	1.4822	1.4473 ⁽²⁾	1.4807

Certain Defined Terms

In this document, unless the context otherwise requires:

articles of association when used in reference to Holdco means the article of association of Holdco as they will be in effect as of completion;

BaFin refers to the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*);

binding nomination for purposes of selection of directors to the Holdco board means a binding nomination in accordance with Section 2:133 of the Dutch Civil Code;

business combination agreement refers to the Business Combination Agreement, dated as of February 15, 2011, by and among NYSE Euronext, Deutsche Börse, Holdco and Pomme Merger Corporation;

combination refers to the merger and the exchange offer, together;

DBSI refers to Deutsche Bank Securities, Inc.;

Deutsche Börse refers to Deutsche Börse AG, a stock corporation (*Aktiengesellschaft*) organized under the laws of Germany;

Deutsche Börse Group refers to Deutsche Börse and its direct and indirect consolidated subsidiaries;

EEA refers to the European Economic Area;

EU refers to the European Union;

Edgar Filing: NYSE Euronext - Form 425

Exchange Act refers to the U.S. Securities Exchange Act of 1934;

or euro refers to the euro, the single currency established for members of the European Economic and Monetary Union since January 1, 1999;

exchange offer refers to the exchange offer to be made by Holdco for Deutsche Börse shares in accordance with the business combination agreement;

Holdco refers to Alpha Beta Netherlands Holding N.V., a public limited liability company (*naamloze vennootschap*) incorporated under the laws of the Netherlands;

Holdco group refers to Holdco and its subsidiaries after completion of the combination;

HSR Act refers to the Hart-Scott-Rodino Antitrust Improvements Act of 1976;

merger refers to the merger of Pomme Merger Corporation, a Delaware corporation, with and into NYSE Euronext in accordance with the business combination agreement;

Table of Contents

NYSE Euronext refers to NYSE Euronext, a Delaware corporation, and includes its direct and indirect subsidiaries;

SEC refers to the U.S. Securities and Exchange Commission;

Securities Act refers to the U.S. Securities Exchange Act of 1933; and

\$ or U.S. dollar refers to the legal currency of the United States of America.

Other defined terms used throughout this document are indicated in the text.

Documents Available for Inspection

Until the completion of the combination, or the earlier termination of the business combination agreement, the following documents, or copies thereof, may be inspected during regular business hours at Holdco's offices at Beursplein 5, 1012 JW Amsterdam, the Netherlands:

the Holdco articles of association;

the audited balance sheet (IFRS) of Holdco as of February 10, 2011;

the unaudited condensed consolidated financial statements of Deutsche Börse Group as at and for the three months period ended March 31, 2011;

the audited consolidated financial statements of Deutsche Börse Group as at December 31, 2010, 2009 and 2008, and for each of the years ended in the three-year period ended December 31, 2010, 2009 and 2008; and

the audited consolidated financial statements of NYSE Euronext as of December 31, 2010, 2009 and 2008, and for each of the years ended in the three-year period ended December 31, 2010, 2009 and 2008.

legal opinions of Linklaters LLP and Stibbe N.V., counsel to Holdco regarding the validity of the Holdco shares offered by this document;

legal opinion of Linklaters LLP, counsel to Holdco, regarding certain tax matters set forth in the exchange offer prospectus which forms a part of this document; and

The listed documents will also be available in electronic form for twelve months after publication of this document at Holdco's website www.global-exchange-operator.com. Information contained on Holdco's website does not constitute part of this document. This website address is an inactive text reference and is not intended to be an actual link to the website.

Table of Contents

THE EXCHANGE OFFER

In the business combination agreement, Deutsche Börse, NYSE Euronext and Holdco have agreed that Deutsche Börse will become a subsidiary of Holdco through an exchange offer and certain terms of which are summarized below.

Offered Shares under the Exchange Offer, Capital Increase

The maximum number of Holdco shares to be issued in the exchange offer is 195,146,864 Holdco shares, each with a nominal value of 1.00 and full dividend rights.

On May 2, 2011, Holdco's general meeting of shareholders resolved to amend Holdco's articles of association and to increase its authorized share capital from 225,000 to 1,000,000,000 consisting of 500,000,000 ordinary shares with a nominal value of 1.00 per share (referred to as Holdco shares in this document) and 500,000,000 preference shares with a nominal value of 1.00 per share.

By shareholders' resolution on May 2, 2011, Holdco's general meeting has further resolved to authorize the Holdco board of directors for a period of five years from the date such resolution has been adopted to issue, or grant rights to subscribe for, Holdco shares, or to exclude or restrict preemption rights in respect of Holdco shares issued pursuant to its authority to issue such shares. The authority for the Holdco board of directors to issue, or grant rights to subscribe for, ordinary shares is limited to:

such number of Holdco shares as is required to fulfill its obligations under the exchange offer, the merger and several other measures in connection with the combination; and

additional 100,000,000 Holdco shares.

The aforementioned resolution also entails the authority to issue preference shares.

On the basis of the above resolutions of the general meeting, Holdco is able to fulfill its obligations to deliver Holdco shares under the exchange offer and the merger without further resolutions or other action being required from Holdco's general meeting of shareholders.

For details of the procedure of a capital increase of a Dutch public limited liability company in general see section Description of the shares of Holdco Capital Increase of a Dutch Public Limited Liability Company . For details of the procedure of the capital increase of Holdco in particular see section Description of the shares of Holdco Issuance of Holdco Shares for the Completion of the Exchange Offer and the Merger .

The Holdco shares will be freely transferable and capable of being encumbered with a right of pledge or usufruct. The Holdco shares will have full dividend rights since the incorporation of Holdco on February 10, 2011.

The current sole shareholder of Holdco, Stichting Alpha Beta Netherlands, has agreed in the context of the above resolutions of the general meeting not to withdraw these resolutions without the consent of Holdco.

Exchange Ratio, Offer Period, and Settlement of the Exchange Offer

Under the terms of the exchange offer, Holdco will offer to acquire each issued Deutsche Börse share in exchange for one Holdco share. This one-to-one exchange ratio for the exchange offer is fixed and will not be adjusted to reflect changes in the share price of the Deutsche Börse shares or the NYSE Euronext shares prior to the date of the completion of the combination.

The offer acceptance period of the exchange offer begins upon publication of the exchange offer document on May 4, 2011. It expires at midnight, at the end of July 13, 2011 (Central European Summer Time). Within the

Table of Contents

offer acceptance period, all shareholders of Deutsche Börse may tender their Deutsche Börse shares. After expiration of the offer acceptance period, Holdco must publish the results of the exchange offer, i.e., the number and percentage of Deutsche Börse shares that have been tendered within the offer acceptance period including the number and percentage of voting rights linked with the tendered Deutsche Börse shares as well as the total number and percentage of Deutsche Börse shares held by Holdco or attributed to Holdco at the expiration of the offer acceptance period. In certain circumstances, the offer acceptance period will be extended automatically, among others if the terms of the exchange offer are changed or if conditions to the exchange offer are waived within the last two weeks of the offer acceptance period.

Deutsche Börse shareholders will have the right to withdraw their Deutsche Börse shares from the exchange offer during the acceptance period of the exchange offer. Following the expiration of the acceptance period of the offer, withdrawal rights will cease, and any Deutsche Börse shares that have been tendered into the offer cannot be withdrawn.

A subsequent offering period will commence only if the minimum tender condition (as defined below) is satisfied by the expiration of the initial offer acceptance period. In this case, the subsequent offering period is expected to commence on July 20, 2011 and to end at midnight, at the end of August 2, 2011 (Central European Summer Time). During the subsequent offering period, Deutsche Börse shareholders who have not tendered their shares during the initial offer acceptance period, may reconsider their initial decision not to tender and may eventually participate in the exchange offer at the same terms and conditions as applicable during the initial offer acceptance period. However, no withdrawal right will exit during this subsequent offer period.

The exchange offer can no longer be accepted following expiration of the subsequent offering period. After expiration of the subsequent offering period, Holdco again has to publish the results of the exchange offer.

Settlement of the exchange offer will take place through the issue and delivery to the central settlement agent and the onward transfer of the Holdco shares by book entry transfer as consideration for the tendered Deutsche Börse shares. Upon crediting of the Holdco shares to the applicable custodian bank's securities account with the relevant central depository agent, Holdco will have fulfilled its obligation to deliver Holdco shares. It is the custodian bank's responsibility to credit the Holdco shares to the securities account of each accepting shareholder of Deutsche Börse. The crediting of the Holdco shares to the securities accounts of the custodian banks shall occur in due course but in no event later than seven banking days (i) following the publication of the final results of the exchange offer after expiration of the subsequent offering period or (ii) following the day the satisfaction and/or waiver of all conditions to the exchange offer has been published, whichever date is later. A banking day relates to a day on which the banks in Frankfurt am Main, Germany, as well as in New York, New York, United States are open for general business.

Holdco expects that the settlement of the exchange offer for the tendered Deutsche Börse shares will occur prior to March 31, 2012. In the event that all completion conditions are satisfied on March 31, 2012 only, the last possible date, the settlement of the exchange offer and the crediting of the Holdco offer shares would be delayed until April 13, 2012.

Conditions to the Exchange Offer

The completion of the exchange offer is subject to the satisfaction (or waiver by Holdco in agreement with NYSE Euronext and/or Deutsche Börse, to the extent waiver is permitted under the provisions of the business combination agreement, by the German Takeover Act and by other applicable laws) of the conditions set forth in the business combination agreement.

Those conditions are described in *The Business Combination Agreement Conditions to Completing the Combination* and include the following:

- (a) At the end of the offer acceptance period, the sum of (i) the number of Deutsche Börse shares that have been validly tendered and not withdrawn and (ii) the Deutsche Börse shares that Holdco already holds

Table of Contents

or has acquired must equal at least 75% of the sum of (x) the Deutsche Börse shares issued as of the end of the offer acceptance period and (y) the number of Deutsche Börse shares that Deutsche Börse may issue after publication of the exchange offer prospectus in accordance with the German Takeover Act pursuant to obligations in effect as of the time of such publication, such as outstanding options;

- (b) on or prior to March 31, 2012, (i) any waiting period (and any extension thereof) applicable to the exchange offer and the merger under the Hart-Scott-Rodino Antitrust Improvement Act of 1976, as amended, must have expired or been terminated, with the consequence that the exchange offer and the merger may be consummated and (ii) the EU Commission must have, or must be deemed to have, cleared the exchange offer and the merger pursuant to the Council Regulation (EC) 139/2004 of the European Community;
- (c) prior to the end of the offer acceptance period, the registration statement for the offering of the Holdco shares to be issued in the exchange offer and the merger must have become effective under the U.S. Securities Act of 1933 and, as of the end of the offer acceptance period, shall not be subject to any stop order by the SEC or any proceeding initiated by the SEC seeking such a stop order;
- (d) prior to the end of the offer acceptance period, the NYSE Euronext shareholders must have approved the merger by a vote of holders of a majority of the outstanding NYSE Euronext shares entitled to vote thereon, and certain aspects of the articles of association of Holdco that will be in effect after the merger must have been approved by a vote of the holders of a majority of the outstanding NYSE Euronext shares present at the NYSE Euronext special meeting;
- (e) there must not be any law, regulation, administrative act or injunction in effect as of the end of the offer acceptance period of a governmental entity, court or legislative body in certain specified countries prohibiting or making illegal the consummation of the exchange offer or the merger or the acquisition or ownership of Deutsche Börse shares or NYSE Euronext shares by Holdco;
- (f) on or prior to March 31, 2012, approval (or, where applicable, absence of disapproval) of numerous specified public entities in specified countries must have been received (or, where applicable, continued absence of disapproval) (for further information see The Business Combination Agreement Conditions to Completing the Combination-lit f.);
- (g) during the time between the publication of the exchange offer document and the expiration of the offer acceptance period, no material adverse market change (i.e. suspension of the currency trading or debt markets for more than three consecutive trading days in Frankfurt am Main, London or New York) shall have occurred;
- (h) during the time between the publication of the exchange offer document and the expiration of the offer acceptance period, no offer material adverse effect (as defined in the business combination agreement) on NYSE Euronext shall have occurred;
- (i) during the time between the publication of the exchange offer document and the expiration of the offer acceptance period, no offer material adverse effect (as defined in the business combination agreement) on Deutsche Börse shall have occurred; and
- (j) prior to the expiration of the offer acceptance period, receipt of one or more private letter rulings from the U.S. Internal Revenue Service by each of NYSE Euronext and Deutsche Börse confirming that the exchange offer and/or the merger, taken together, qualify as specific transactions under U.S. Internal Revenue Code.

As described in The Business Combination Agreement Conditions to Completing the Combination, many of the conditions to the exchange offer must, by their terms, be satisfied or waived prior to the expiration of the offer acceptance period, including the minimum tender condition, the receipt of the NYSE Euronext stockholder vote, the effectiveness of the registration statement, the receipt of IRS rulings, the absence of a

Edgar Filing: NYSE Euronext - Form 425

material adverse market change, and the absence of an offer material adverse on Deutsche Börse and NYSE Euronext. The only conditions to the exchange offer that may remain outstanding after the expiration of the offer acceptance period are the conditions relating to competition approvals, and the receipt of the specified regulatory approvals for the combination. These are described under The Business Combination Agreement Conditions

A-70

Table of Contents

to Completing the Combination. See also Regulatory Approvals and Litigation Related to the Combination for a discussion of the status of the regulatory filings and approvals for the combination. The parties currently expect the EU merger control proceedings to be finalized before the end of the 2011, but it is possible these proceedings will continue into the first quarter of 2012. The parties expect that all other regulatory conditions remaining after the expiration of the acceptance period will be completed before the EU merger control proceedings.

Deutsche Börse's Agreement to Tender Treasury Shares

Deutsche Börse has agreed to tender all of the Deutsche Börse shares held in treasury by Deutsche Börse. As of March 31, 2011, 8,956,997 Deutsche Börse shares were held by Deutsche Börse as treasury shares.

Information on the Holdco shares offered to Deutsche Börse shareholders

The Holdco shares offered to the Deutsche Börse shareholders are ordinary registered shares of Holdco with a nominal value of 1.00 and full dividend rights since formation of Holdco on February 10, 2011.

The International Securities Identification Number, the German Securities Code, the Common Code and the Ticker Symbol of the Holdco shares will be as follows:

International Securities Identification Number (ISIN)	NL0009766997
German Securities Code (<i>Wertpapierkennnummer</i>) (WKN)	A1H8IK
Common Code	062269324
Ticker Symbol	AL4

Currency of the Exchange Offer

For purposes of the provisions of the EU Prospectus Regulation, the currency in which the exchange offer is conducted is euros. This means that all relevant calculations for the exchange offer under the German Takeover Act, including the value of Deutsche Börse shares for purposes of complying with the minimum pricing rules under the German Takeover Act, is expressed in euros. After commencement of trading, Holdco shares will be quoted on the New York Stock Exchange in U.S. dollars.

Admission to and Commencement of Trading

Holdco (1) intends to list its shares on the New York Stock Exchange subject to the notice of issuance and (2) will apply, prior to the time of delivery of the Holdco shares pursuant to the exchange offer and the merger, for admission of its shares to trading on the regulated market (*regulierter Markt*) of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) and in the sub-segment thereof, with additional post-admission obligations (Prime Standard), and on the regulated market of Euronext Paris (*marché réglementé de Euronext à Paris*).

Holdco expects that the Holdco shares that the accepting shareholders of Deutsche Börse will receive upon settlement of the exchange offer will have been admitted to trading and listed at the time of delivery to the shareholders of Deutsche Börse having accepted the exchange offer.

Commencement of trading on the Frankfurt Stock Exchange, Euronext Paris and the New York Stock Exchange is expected to occur immediately after delivery of the Holdco shares to the Deutsche Börse shareholders who have accepted the exchange offer.

Settlement Agent

Holdco has appointed Deutsche Bank AG, Taunusanlage 12, 60325 Frankfurt am Main, Germany to act as central settlement agent and exchange escrow agent in connection with the exchange offer.

Table of Contents

Interests of the Parties Participating in the Exchange Offer

Holdco has entered into the business combination agreement with Deutsche Börse, NYSE Euronext and Pomme Merger Corporation. Such other parties to the business combination agreement are persons acting jointly with Holdco pursuant to Section 2 para. 5 sentence 1 of the German Takeover Act and have an interest in the completion of the exchange offer.

Pursuant to Section 2 para. 5 sentence 1 of the German Takeover Act, in conjunction with Section 2 para. 5 sentence 3 the of German Takeover Act subsidiaries of Holdco are also presumed to be persons acting jointly with Holdco, while the provision does not cover subsidiaries of persons acting jointly with Holdco. At the time of publication of this document, Pomme Merger Corporation is the only subsidiary of Holdco. Pomme Merger Corporation as well as Stichting Alpha Beta Netherlands, the sole shareholder of Holdco, are therefore persons acting jointly with Holdco pursuant to Section 2 para. 5 sentence 1 of the German Takeover Act in conjunction with Section 2 para. 5 sentence 3 of the German Takeover Act.

Interests of Directors, Board Members, and Executive Officers of Deutsche Börse and NYSE Euronext in the Combination

Shareholders of Deutsche Börse and shareholders of NYSE Euronext should be aware that some of the Deutsche Börse management board members, Deutsche Börse supervisory board members and directors and executive officers of NYSE Euronext may have interests in the combination that are different from, or in addition to, the interests of the Deutsche Börse shareholders and NYSE Euronext shareholders. These interests may include, but are not limited to, the continued employment of certain Deutsche Börse management board members and executive officers of NYSE Euronext, the continued positions of certain Deutsche Börse supervisory board members and certain directors of NYSE Euronext as directors of Holdco and the indemnification of former Deutsche Börse management and supervisory board members and directors and executive officers of NYSE Euronext by Holdco. These interests also include the treatment in the combination of restricted stock units, stock options and other rights held by these directors, board members and executive officers. As of March 14, 2011, members of the Deutsche Börse management board and the Deutsche Börse supervisory board owned 50,780 Deutsche Börse shares in the aggregate.

Shareholders of Deutsche Börse and shareholders of NYSE Euronext should be aware that, as of March 1, 2011, NYSE Euronext directors and executive officers and their affiliates owned and were entitled to vote approximately 0.3% of the outstanding NYSE Euronext shares entitled to vote at the NYSE Euronext special meeting. In connection with the completion of the combination, certain executives of NYSE Euronext may be entitled to certain compensation subject to approval at the NYSE Euronext special meeting. See Business of NYSE Euronext Group and Certain Information about NYSE Euronext 2010 Compensation.

Reasons for the Exchange Offer and Use of Proceeds

The exchange offer forms part of the transaction that has been agreed by Deutsche Börse and NYSE Euronext to implement the combination, by which the businesses of Deutsche Börse Group and NYSE Euronext will be combined under Holdco as a holding company. The combination and the agreements of Deutsche Börse and NYSE Euronext are described in detail in the section entitled The Business Combination Agreement.

The Holdco shares that will be delivered to the shareholders of Deutsche Börse who have validly tendered their Deutsche Börse shares in the exchange offer will be issued against contribution in kind comprising such tendered Deutsche Börse shares, and Holdco will not receive any proceeds from such exchange offer.

Holdco expects the total costs that it will incur in connection with the exchange offer to be paid by Holdco at approximately up to 4.0 million.

Table of Contents

THE COMBINATION

Background of the Combination

The NYSE Euronext board of directors and the Deutsche Börse supervisory and management boards continually review their respective companies' results of operations and competitive positions in the industries in which they operate, as well as their strategic alternatives. In connection with these reviews, each of NYSE Euronext and Deutsche Börse from time to time evaluates potential transactions that would further its strategic objectives.

In the fall of 2008, NYSE Euronext chief executive officer Duncan L. Niederauer and Deutsche Börse chief executive officer Dr. Reto Francioni met and discussed a possible combination of their respective companies. Following that meeting, selected members of NYSE Euronext management and of Deutsche Börse management had periodic discussions regarding possible transaction structures, as well as social and governance aspects of a potential combination of the two companies. To facilitate these discussions, on September 22, 2008, NYSE Euronext and Deutsche Börse entered into a confidentiality agreement in connection with the exchange of information between the two companies and their advisors. Also during this time, NYSE Euronext consulted with Perella Weinberg, and its legal advisors, Wachtell, Lipton, Rosen & Katz, Milbank, Tweed, Hadley & McCloy LLP and Stibbe N.V., and Deutsche Börse consulted with financial advisor, Deutsche Bank AG and its legal advisor, Linklaters LLP. Preliminary discussions continued through the fall of 2008, including with respect to the potential governance arrangements of a post-transaction entity, but no agreement was reached. In early December 2008, the parties terminated discussions regarding a possible business combination following unauthorized news stories regarding the existence of such discussions regarding a combination between the two companies.

Over the course of the next two years, Mr. Niederauer and Dr. Francioni, as well as members of senior management of each company, met from time to time in the scope of their professional activities and discussed on several occasions the possibility of a combination between the two companies. These meetings, however, did not at those times lead to any serious discussions.

During the summer of 2010, Mr. Niederauer and Dr. Francioni continued to discuss the strategic challenges faced by the companies in light of the consolidation in the exchange industry. As a result of such discussions, they jointly agreed to resume discussions on a potential business combination between the two companies.

On August 2, 2010, senior management from each of NYSE Euronext and Deutsche Börse met in New York City at the request of Dr. Francioni to discuss the possibility of reinitiating consideration of a potential transaction. At that meeting, they discussed the concept of the transaction and the potential benefits to each party that could be obtained. Management of each party also agreed on a schedule for further consideration of a transaction and key next steps in the decision-making process.

On September 15, 2010, the NYSE Euronext board of directors met for a periodic review and discussion of corporate strategy. During that meeting, the NYSE Euronext board undertook a thorough strategic and financial review of organic growth opportunities underway at the company and being considered by the company, including new products and services, new asset classes and geographic expansion. The board examined the expected financial performance, including the financial position, of NYSE Euronext on a standalone basis taking into account these initiatives. In addition, the board considered potential partners for merger-and-acquisition transactions in the exchange industry and/or the broader financial intermediary industry, and discussed which of these transactions could be consummated and their relative merits. As part of that discussion, Mr. Niederauer reviewed his discussions with Dr. Francioni, and the NYSE Euronext board of directors authorized him to continue and to expand discussions with the objective of working to determine whether a potential business combination with Deutsche Börse was achievable. NYSE Euronext did not actively pursue any of the merger-and-acquisition alternatives discussed at the meeting that would be alternatives to the combination with Deutsche Börse, which it viewed as the most attractive strategic alternative if it could be completed on agreeable terms.

Table of Contents

Over the course of the next few months, selected members of senior management of each of NYSE Euronext and Deutsche Börse discussed potential alternatives for the terms and structure for the transaction.

On October 28, 2010 and again on December 16, 2010, the NYSE Euronext board of directors met and, as a part of those meetings, was updated by senior management as to the status of discussions with Deutsche Börse. In each instance, the NYSE Euronext board of directors instructed management to continue discussions regarding a potential transaction.

In the early part of January 2011, and particularly during meetings among Mr. Niederauer and Dr. Francioni, other NYSE Euronext and Deutsche Börse representatives and their respective financial advisors held in Zürich, Switzerland on January 13 and 14, 2011 for the purpose of negotiating a transaction, NYSE Euronext and Deutsche Börse management continued to discuss the terms of a potential business combination. During this period, the parties negotiated certain governance and other terms that were proposed to apply to the combined group of NYSE Euronext and Deutsche Börse Group businesses after completion of a business combination. Specifically, the parties contemplated that the transaction would involve (1) a combination of the two companies rather than the acquisition of one by the other, (2) the creation of a new holding company in the Netherlands that would become the holding company for NYSE Euronext and Deutsche Börse, (3) dual headquarters in New York and Frankfurt for the combined company, (4) Dr. Francioni, who would be based primarily in Frankfurt, serving as the chairman of the board of directors of the combined company, and Mr. Niederauer, who would be based primarily in New York, serving as the chief executive officer of the combined company, (5) the board of directors of the combined company would consist of the chairman and the chief executive officer of the combined company, along with nine individuals designated by Deutsche Börse and six individuals designated by NYSE Euronext, and (6) the membership of the executive committee of the combined company would be equally comprised of former Deutsche Börse and former NYSE Euronext executives and would be chaired by the chief executive officer of the combined company. The parties also reached a preliminary understanding on certain responsibilities and authorities of each of the chief executive officer and the chairman of the combined company that would apply in the event that a business combination was agreed.

During that same period, NYSE Euronext's and Deutsche Börse's respective management and financial advisors discussed the financial terms of a potential business combination, with negotiations focused principally on the relative percentage of ownership that the former shareholders of each entity would receive in the new Dutch holding company. At that time, the parties came to a general understanding that Deutsche Börse shareholders would receive approximately 60% of the outstanding shares of the holding company, and NYSE Euronext shareholders would receive approximately 40%, assuming that all of Deutsche Börse's issued shares participated in the exchange offer to be conducted in order to effectuate the business combination. However, no final decision was made regarding the exchange ratios that would apply to the business combination or the exact ownership percentages of NYSE Euronext and Deutsche Börse that were implied based on any such exchange ratios.

The parties came to a general understanding at such time that a premium of approximately 10% would be targeted for NYSE Euronext shareholders. At the time, on the basis of this premium, Deutsche Börse shareholders would receive approximately 60% of the outstanding shares of Holdco, and NYSE Euronext shareholders would receive approximately 40% of the outstanding shares of Holdco. When considering the appropriate premium for the NYSE Euronext shareholders, the parties took into account, among other things, the synergies that the parties expected to be realized as a result of the combination.

On January 17, 2011, a draft heads of terms encapsulating Deutsche Börse's understanding of the joint discussions of certain terms of the potential transaction and governance structure was exchanged that, over the course of the following week, NYSE Euronext management and its legal advisors reviewed.

On January 18, 2011, the management board of Deutsche Börse held a meeting in which it discussed the current status of negotiations with NYSE Euronext.

Table of Contents

On January 21, 2011, Mr. Niederauer and Dr. Francioni along with selected members of their respective senior management teams, financial and legal advisors met in New York City. During that meeting, the parties provided financial updates about each company. The parties also reviewed the draft heads of terms and sought to achieve further consensus on specific aspects of the governance arrangements that would apply to the combined company, including the length of the initial terms of the board of directors of the holding company and supermajority board vote requirements. Additionally at this meeting, the parties agreed on a schedule for the drafting and distribution of definitive agreements to memorialize the terms of the business combination and governance arrangements. The parties discussed preliminary plans for communicating the transaction, if ultimately agreed by the parties, to their shareholders, regulators and other important constituents.

On January 24, 2011, Dr. Francioni met with Dr. Manfred Gentz, the chairman of the Deutsche Börse supervisory board, and a few other members of the Deutsche Börse supervisory board to inform them about the status of the negotiations with NYSE Euronext.

On January 27, 2011, NYSE Euronext's legal counsel, Wachtell Lipton, sent an initial draft of the business combination agreement to Linklaters, legal counsel for Deutsche Börse, and Linklaters sent initial drafts of the articles of association of the holding company, rules for the board of directors of the holding company and rules for the global executive committee (which are collectively referred to as the Holdco governance documents) to Wachtell Lipton.

On January 28, 2011, NYSE Euronext and Deutsche Börse each provided the other with access to an electronic data room containing financial and legal due diligence materials. NYSE Euronext's and Deutsche Börse's respective management, financial and legal advisors subsequently began a review of such materials.

On February 1, 2011, Mr. Jan-Michiel Hessels, chairman of NYSE Euronext Board of directors, as well as Mr. Niederauer and several other members of the NYSE Euronext board of directors met with Dr. Francioni, Dr. Manfred Gentz, chairman of the Deutsche Börse supervisory board, and several other members of the Deutsche Börse supervisory board in Zurich, Switzerland. At the meeting, they reviewed the working plan and timing to reach a definitive agreement for the combination and identified the principal issues that management noted had to be resolved in order for an agreement to be executed.

Between January 31, 2011 through February 2, 2011, the management of each of NYSE Euronext and Deutsche Börse along with each of their respective financial and legal advisors met in Amsterdam, the Netherlands, to negotiate the business combination agreement and Holdco governance documents and to discuss high-level financial and legal due diligence, including potential synergies that could be realized in a business combination. During these meetings, the internal and external legal advisors to the parties negotiated various provisions in the draft business combination agreement and the draft Holdco governance documents. As part of these negotiations, the parties discussed the minimum tender condition for the exchange offer, the timing of the official announcement of the exchange offer for German law purposes, the size of the termination fee payable by each party and the circumstances in which such termination fee would be payable and the integration of Deutsche Börse into the new Holdco group post-completion of the transaction. During these meetings, the parties and their respective financial advisors also refined their financial analyses of the business combination and reviewed potential costs and synergies in connection with the transaction in order to facilitate their valuation of the combined entity.

On February 3, 2011, the NYSE Euronext board of directors held a meeting in Amsterdam to discuss, among other issues, the potential terms of a business combination with Deutsche Börse. At the meeting, Mr. Niederauer and other members of NYSE Euronext management presented the current state of negotiations and due diligence with Deutsche Börse and reviewed the strategic rationale for the business combination. Wachtell Lipton presented summaries of the current draft business combination agreement and the current draft Holdco governance documents, noting the items in such documents that had not yet been agreed. Wachtell Lipton also reviewed with the NYSE Euronext directors their fiduciary duties under Delaware law. Stibbe

Table of Contents

provided an overview of certain Dutch law aspects that were relevant to the transaction and also reviewed the legal regime under which the board of directors of the Dutch holding company would be operating. Perella Weinberg updated the board on the current status of the financial due diligence and the general financial analysis of the potential transaction and the ongoing negotiations regarding the exchange ratio, the valuation implied by different exchange ratios and the percentage of outstanding Holdco shares that would be held by the former NYSE Euronext shareholders using different exchange ratios. At the meeting, the NYSE Euronext board of directors authorized management to continue its negotiations with Deutsche Börse.

Later that day on February 3, 2011, Linklaters provided a revised draft of the business combination agreement to NYSE Euronext's legal advisors.

Based on input from the management of NYSE Euronext, on February 7, 2011, NYSE Euronext's legal advisors sent a revised draft of the business combination agreement to Deutsche Börse's legal advisors. In addition, Deutsche Börse's legal advisors sent revised drafts of the Holdco governance documents to NYSE Euronext's legal advisors.

On February 7, 2011, the Deutsche Börse management board held a meeting during which the terms of the business combination with NYSE Euronext were discussed in detail.

On February 8 and 9, 2011, representatives from NYSE Euronext and Deutsche Börse and their respective advisors met in New York City. In-depth discussions were held on the outstanding issues in the draft business combination agreement and the draft Holdco governance documents, including (1) the minimum tender condition for the exchange offer, (2) the ability to maintain the well-balanced corporate governance structure, as proposed in their current drafts of the business combination agreement and corporate documents, following completion of the combination, (3) the limitations on each party's obligations to change or divest its businesses or to amend the governance structure of Holdco in order to receive regulatory approval for the transactions, (4) the circumstances under which a termination fee would be payable by either party, (5) the decision-making authority of the Global Executive Committee of the Holdco group, (6) the duration of the initial term of the chairman and chief executive officer of the combined businesses, (7) the rights of Holdco directors who were initially designated by NYSE Euronext and Deutsche Börse to select replacement candidates in the event of vacancies on the board or board committees, and (8) the location and leaders of certain business divisions. In addition, management of Deutsche Börse and NYSE Euronext along with their respective financial and accounting advisors held meetings to continue analyzing potential synergies in the business combination, including opportunities for integration of technologies across the companies, and to discuss the investor presentation proposed to be distributed upon announcement of the business combination.

On February 9, 2011, a news story that had not been authorized by NYSE Euronext or Deutsche Börse was released in Germany that indicated the parties were negotiating a potential business combination and described certain terms of the potential transaction. In response to the unauthorized news stories, both NYSE Euronext and Deutsche Börse suspended trading in their respective shares while preparing a response. Later that same day, Deutsche Börse and NYSE Euronext issued a joint press release confirming the existence of advanced discussions regarding a potential business combination and detailing the current status of certain of the transaction terms that were contemplated by the parties. NYSE Euronext shares resumed trading following the issuance of that press release, and Deutsche Börse shares resumed trading the next morning.

On February 10, 2011, the NYSE Euronext board of directors met by video conference to receive a report from NYSE Euronext management and its advisors on the status of the negotiations with Deutsche Börse.

Over the next several days, the parties and their financial and legal advisors continued to negotiate the remaining open points and exchange drafts of the business combination agreement and Holdco governance documents, as well as continuing their respective due diligence review of the other party.

Table of Contents

On February 11, 2011, the Deutsche Börse management board held a meeting during which it reviewed the terms and the status of the proposed transaction, including the estimated synergies and preliminary due diligence results. During this meeting, the management board authorized Dr. Francioni and Mr. Pottmeyer to finalize the negotiations of the combination agreement.

On February 12, 2011, certain press reports that had not been authorized by the parties suggested that the parties had agreed on the name under which their combined businesses would operate after consummation of the business combination. In response to those reports, NYSE Euronext and Deutsche Börse each issued a press release to clarify that negotiations regarding the name for the combined group were ongoing and no decision regarding a name had been finalized.

On February 13, 2011, the NYSE Euronext board of directors met by video conference to receive a report from management on the status of negotiations with Deutsche Börse. At the meeting, Mr. Niederauer and other members of NYSE Euronext management updated the board on the developments over the last few days and offered an assessment of the remaining open issues and potential outcomes. Wachtell Lipton presented updated summaries of the draft business combination agreement and draft Holdco governance documents, and Perella Weinberg reviewed the financial terms of the business combination. The NYSE Euronext board also received an update from management on the key findings that NYSE Euronext's management and its legal, financial and accounting advisors had identified in their due diligence of Deutsche Börse, and discussed with management the potential benefits and risks involved in the combination transaction. The board continued to support the proposed business combination based on the range of potential alternatives that management and its advisors had presented.

On February 14, 2011, the Deutsche Börse management board held a meeting to consider the revised terms of the transaction. With the advice of its legal and financial advisors, the management board considered the outcome of the negotiations that had taken place with NYSE Euronext and its advisors, including an update on the terms and key considerations of the proposed transaction with NYSE Euronext as well as an update on the proposed combination agreement between Deutsche Börse and NYSE Euronext since the last management board meeting. After deliberation, the Deutsche Börse management board determined that the proposed combination was in the best interest of Deutsche Börse and its shareholders and the management board approved, subject to the approval of the Deutsche Börse supervisory board, the business combination agreement and the transactions contemplated thereby. Later on the same day, members of the supervisory board of Deutsche Börse were updated by Dr. Francioni and other members of the management board on the status of the business combination discussions with NYSE Euronext.

NYSE Euronext's legal advisors and Deutsche Börse's legal advisors continued to exchange drafts of the business combination agreement and the Holdco governance documents, with refinements based on the continuing negotiations between the parties. Representatives of NYSE Euronext and Deutsche Börse continued to discuss the exchange ratio and, after consultation with their respective financial advisors, tentatively agreed to proceed on the basis of an exchange ratio of 0.47 of a share of Holdco for each NYSE Euronext share and an exchange ratio of one share of Holdco for each Deutsche Börse share tendered in the exchange offer. The parties acknowledged that these exchange ratios would lead to the combined company being owned 40% by former NYSE Euronext shareholders and 60% by former Deutsche Börse shareholders, assuming all Deutsche Börse shares were exchanged in the exchange offer. During the day on February 14, 2011 and into the morning of February 15, 2011, representatives of the parties resolved the remaining open issues to the satisfaction of both parties, including agreeing on the minimum tender condition for the exchange offer, the circumstances in which the termination fee would be payable and the locations and leaders of certain of the combined company's principal divisions.

On February 15, 2011, the Deutsche Börse supervisory board met to consider the revised terms of the transaction. With the advice of its financial and legal advisors, the supervisory board considered the outcome of the negotiations that had taken place with NYSE Euronext and its advisors. Based on presentations given by the

Table of Contents

Deutsche Börse management board, its financial advisors, DBSI and J.P. Morgan, and legal counsel, Linklaters, the supervisory board received, among other things, a summary of the terms and key considerations of the proposed transaction with NYSE Euronext as well as a summary of the proposed combination. Representatives from DBSI and J.P. Morgan each provided financial analyses of the transaction and rendered their oral opinions, subsequently confirmed in writing, that, as of February 15, 2011, and based upon and subject to the various factors, assumptions and limitations set forth in their respective written opinions, the exchange ratio in the proposed exchange offer was fair, from a financial point of view, to the holders of Deutsche Börse shares (other than Deutsche Börse). After deliberation, the Deutsche Börse supervisory board determined that the business combination was in the best interest of Deutsche Börse and its shareholders, and the supervisory board approved the business combination of Deutsche Börse and NYSE Euronext.

Also on February 15, 2011, the NYSE Euronext board of directors held a meeting by video conference to review the terms of the proposed business combination transaction. At the meeting, NYSE Euronext management updated the board on discussions and negotiations between the parties since the prior meeting of the NYSE Euronext board of directors. Representatives from Wachtell Lipton described the updated terms of the draft business combination agreement and governance arrangements proposed to be entered into in connection with the combination. Representatives from Perella Weinberg provided final financial analyses of the transaction and the final proposed exchange ratio. Thereafter, Perella Weinberg provided its oral opinion, subsequently confirmed in writing, to the NYSE Euronext board of directors to the effect that, as of February 15, 2011, and based upon and subject to the various assumptions made, procedures followed, matters considered and qualifications and limitations set forth therein, the exchange ratio in the merger of 0.47 was fair, from a financial point of view, to the NYSE Euronext shareholders. After discussion and deliberation, the NYSE Euronext board of directors determined that the business combination agreement and the transactions contemplated by the combination agreement were fair and in the best interests of NYSE Euronext and its shareholders and authorized management to execute the business combination agreement on behalf of the company. In accordance with NYSE Euronext's certificate of incorporation, the NYSE Euronext board of directors also approved the acquisition of NYSE Euronext shares pursuant to the merger and the voting of such NYSE Euronext shares by Holdco after the merger without limitations on ownership or voting rights by Holdco following the merger.

Following the approval of the NYSE Euronext board of directors and the Deutsche Börse boards, the parties entered into the business combination agreement on February 15, 2011 on the terms approved by those boards and issued a press release and market notice announcing the transaction.

On April 1, 2011, NYSE Euronext received a letter from NASDAQ OMX Group, Inc. and IntercontinentalExchange, Inc. setting forth a non-binding proposal to acquire all of the outstanding shares of NYSE Euronext common stock, where NYSE Euronext stockholders would receive \$14.24 in cash, 0.4069 of a share of NASDAQ OMX common stock and 0.1436 of a share of IntercontinentalExchange common stock, for each share of NYSE Euronext common stock. The letter indicated that NASDAQ OMX Group and IntercontinentalExchange agreed between themselves that, in connection with the closing of such transaction, IntercontinentalExchange would acquire NYSE Euronext's European derivatives businesses, including Liffe, as well as Liffe US and NYPC, and NASDAQ OMX would retain NYSE Euronext's other businesses, including the NYSE Euronext stock exchanges in New York, London, Paris, Amsterdam, Brussels and Lisbon, the U.S. equity options business and the information services and technology solutions businesses. The letter further indicated that the proposal was based on publicly available information and was not an offer capable of acceptance, but rather a non-binding indication of interest to serve as a basis for moving toward a mutually agreed transaction. On April 1, 2011, NYSE Euronext issued a press release requesting its shareholders not to take any action with respect to the proposal and indicating that the NYSE Euronext board of directors would carefully review the proposal in consultation with its independent financial and legal advisors. The NYSE Euronext board of directors held a meeting by telephone call that same day to receive an initial briefing on receipt of the proposal, but no determination was made with respect to the proposal.

On April 8, 2011, Deutsche Börse sent a letter to Mr. Niederauer and Mr. Hessels stating that Deutsche Börse remains fully committed to the agreed business combination with NYSE Euronext and describing certain

Table of Contents

aspects of the proposal by NASDAQ OMX and IntercontinentalExchange that Deutsche Börse viewed as being less favorable to NYSE Euronext than the proposed combination with the Deutsche Börse.

On April 10, 2011, the NYSE Euronext board of directors met with NYSE Euronext management and the company's financial and legal advisors to discuss the proposal by NASDAQ OMX and IntercontinentalExchange. At that meeting, the NYSE Euronext board of directors discussed with management and advisors the terms of the proposal and analyzed various aspects of the proposal, including the transaction structure, consideration to be paid, the anticipated value of such consideration following the transaction, the financing required for the transaction, the required financial and legal due diligence that would need to be performed, and the competition approval process and the exchange regulatory approval process. The board also discussed the proposal in light of the company's corporate strategy. After discussing the proposal, the NYSE Euronext board of directors unanimously concluded that the proposal did not align with NYSE Euronext's strategic vision, involved unacceptable execution risk and was not in the best interests of NYSE Euronext and its shareholders.

On April 19, 2011, NYSE Euronext received a letter from NASDAQ OMX and IntercontinentalExchange that provided additional details of their proposal, including a draft merger agreement. That same day, NYSE Euronext issued a press release acknowledging its receipt of the proposed merger agreement and indicating that the NYSE Euronext board of directors would review it in due course, consistent with its fiduciary duties and its obligations under the business combination agreement.

On April 21, 2011, the NYSE Euronext board of directors met to review the additional information with NYSE Euronext's outside legal and financial advisors. At the meeting, NYSE Euronext board of directors unanimously rejected the proposal and reaffirmed the business combination agreement with Deutsche Börse. NYSE Euronext issued a press release that same day announcing the board's decision.

Deutsche Börse's Reasons for the Combination

On February 14, 2011, the Deutsche Börse management board approved the business combination agreement and the transactions contemplated thereby. On February 15, 2011, the Deutsche Börse supervisory board approved the combination of Deutsche Börse and NYSE Euronext under a newly founded Dutch holding company as contemplated by the business combination agreement and presented in the meeting.

In reaching its decision on February 14, 2011, the Deutsche Börse management board consulted with its financial and legal advisors and considered a variety of factors, including the material factors described below. In light of the number and wide variety of factors considered in connection with its evaluation of the transaction, the Deutsche Börse management board did not consider it practicable to, and did not attempt to, quantify or otherwise assign relative weights to the specific factors that it considered in reaching its determination. The Deutsche Börse management board viewed its position as being based on all of the information available and the factors presented to and considered by it. In addition, individual members of the Deutsche Börse management board may have given different weight to different factors. This explanation of the Deutsche Börse management board's reasons for the proposed combination and all other information presented in this section is forward-looking in nature and, therefore, should be read in light of the factors discussed under "Forward-Looking Statements."

The Deutsche Börse management board considered a number of factors pertaining to the strategic rationale for the combination as generally supporting its decision to enter into the combination agreement, including the following material factors:

Strategic Considerations. The Deutsche Börse management board believes that the combination will provide a number of significant strategic opportunities, including the following:

its expectation that the combined company would be a leader in a diverse set of large and growing businesses, including derivatives, listings, cash equities, post-trade settlement and asset servicing, market data and technology services;

Table of Contents

its view that the combined company would have a portfolio of leading brands, including Deutsche Börse, Eurex, NYSE Liffe, Clearstream, Stoxx, NYSE Euronext, New York Stock Exchange and Euronext;

its expectation that the combined company's complementary products would allow the combined company to provide customers with a global derivatives platform;

its expectation that the combined company would be an industry-leading provider of technology services and information content;

its expectation that the combined company would be the world's largest venue for capital raising;

its expectation that the combined company would be a global pioneer in international post-trade infrastructure and settlement with revenues drawn from outside of Europe in those business areas;

its expectation that the combination would over time create substantial incremental efficiency and growth opportunities; and

its expectation that in light of a potential consolidation in the exchange industry, the combination would be to the benefit of Frankfurt as a financial center;

Synergies. Based on the management board's discussions with NYSE Euronext management, the Deutsche Börse management board determined that the combination would create significant cost savings and revenue synergies, including approximately 300 million (\$400 million based on an exchange rate of \$1.33 to 1.00) of annual cost savings expected to be achievable on an annualized basis within three years after the completion of the transaction, as well as at least 100 million (\$133 million) of annual revenue synergies. See *The Business Combination - Certain Synergy Forecasts* for a revised estimate of expected cost savings of 400 million (\$532 million);

Implied Ownership. The Deutsche Börse management board considered that the exchange ratios implied that former Deutsche Börse shareholders and former NYSE Euronext shareholders would hold approximately 60% and 40%, respectively, of the outstanding Holdco shares, assuming that all Deutsche Börse shareholders tendered in the exchange offer, and considered this relative ownership percentage after reviewing the earnings, cash flow and balance sheet impact of the proposed combination, the historical financial performance of Deutsche Börse and NYSE Euronext, the historical trading price of Deutsche Börse shares and NYSE Euronext shares and the historical exchange rate between Euros and U.S. dollars. This implied ownership split of 60% and 40% is based on the exchange ratio of one Deutsche Börse share for one Holdco share in the exchange offer and the exchange ratio of one NYSE Euronext share for 0.47 of a Holdco share in the merger.

The exchange ratios were considered by Deutsche Börse in light of the relative valuations of Deutsche Börse and NYSE Euronext. Such valuations were based on certain publicly available financial and other information concerning NYSE Euronext and Deutsche Börse, projections based on certain publicly available research analysts' financial forecasts that were reviewed by the respective managements of Deutsche Börse and NYSE Euronext, extrapolations from such forecasts as directed by the respective managements of Deutsche Börse and NYSE Euronext and certain internal analyses and other information relating to NYSE Euronext and Deutsche Börse prepared by management of NYSE Euronext and Deutsche Börse, respectively. In addition, among other things, reported prices and trading activity for the Deutsche Börse shares and the NYSE Euronext shares have been reviewed, and, to the extent publicly available, certain financial and stock market information for NYSE Euronext and Deutsche Börse with similar information for certain other companies considered to be relevant whose securities are publicly traded have been compared. Such agreed exchange ratios would result in a premium of approximately 10% for the NYSE Euronext shareholders as of February 8, 2011, the date prior to public reports that discussions were being held between NYSE Euronext and Deutsche Börse regarding a possible business combination, on the basis of the closing price of the NYSE Euronext and Deutsche Börse shares.

Table of Contents

The Deutsche Börse management board came to the conclusion that the advantages for the Deutsche Börse shareholders resulting from the combination justify such premium for the following reasons:

Deutsche Börse believed that, without a premium of approximately 10% for the NYSE Euronext shareholders and the related 40% ownership of Holdco shares by the former NYSE Euronext shareholders, NYSE Euronext would not have entered into the business combination agreement. Deutsche Börse therefore concluded that such premium was a precondition in order for Deutsche Börse shareholders to receive the significant strategic opportunities that would be created by the combination, including the following:

The expectation that the combined company would be a leader in a diverse set of large and growing businesses, including derivatives, listings, cash equities, post-trade settlement and asset servicing, market data and technology servicing;

The view that the combined company would have a portfolio of leading brands, including Deutsche Börse, Eurex, NYSE Liffe, Clearstream, Stoxx, NYSE Euronext, New York Stock Exchange and Euronext;

The expectation that the combined company's complementary products would allow the combined company to provide customers with a global derivatives platform;

The expectation that the combined company would be an industry-leading provider of technology services and information content;

The expectation that the combined company would be the world's largest venue for capital raising;

The expectation that the combined company would be a global pioneer in international post-trade infrastructure and settlement with revenues drawn from outside of Europe in those business areas; and

The expectation that the combination will over time create substantial incremental efficiency and growth opportunities.

In addition thereto, it is the expectation of the Deutsche Börse management board that the future market value of Holdco is not limited to the sum of the current market capitalizations of Deutsche Börse and NYSE Euronext. Based on the discussions between Deutsche Börse and NYSE Euronext management, the Deutsche Börse management board determined that the combination will create significant cost savings and revenue synergies, including approximately 300 million (\$400 million) of annual cost savings expected to be achievable on an annualized basis within three years after the completion of the combination, as well as at least 100 million (\$133 million) of annual revenue synergies. See *The Business Combination Certain Synergy Forecasts* for a revised estimate of expected cost savings of 400 million (\$532 million). The Deutsche Börse management board expects that these synergies will lead to a higher enterprise value for Holdco and, as a result, lead to a higher market value for Holdco, which, in turn, will benefit the Deutsche Börse shareholders who tender their shares in the exchange offer. In the view of the Deutsche Börse management board, this benefit justifies the premium of approximately 10% to be afforded to the NYSE Euronext shareholders. This expectation is supported by the fairness opinions of Deutsche Bank and J.P. Morgan that the exchange ratios are fair from a financial point of view to the holders of Deutsche Börse shares (other than Deutsche Börse) (see below *Opinions of Financial Advisors to Deutsche Börse*).

Taking into consideration the aforementioned expectations and the advantages for the Deutsche Börse shareholders resulting therefrom, the Deutsche Börse management board came to the conclusion that the exchange ratio of one Holdco share for each Deutsche Börse share and the

Edgar Filing: NYSE Euronext - Form 425

exchange ratio of 0.47 of a Holdco share for each NYSE Euronext share (which represented a premium of approximately 10% for the benefit of the NYSE Euronext shareholders as of February 8, 2011, the date prior to public reports that discussions were being held between NYSE Euronext and Deutsche Börse regarding a

A-81

Table of Contents

possible business combination, on the basis of the closing price of the NYSE Euronext and Deutsche Börse shares) is in the best interests of the Deutsche Börse shareholders and in the best interests of Deutsche Börse.

Opinions of Financial Advisors. The Deutsche Börse management and supervisory board considered the financial analyses presented to it by DBSI and J.P. Morgan and the opinions of DBSI and J.P. Morgan that, as of February 15, 2011 and based upon and subject to the various factors, assumptions and limitations set forth in their respective opinions, the exchange ratio in the proposed exchange offer was fair, from a financial point of view, to holders of Deutsche Börse shares (other than Deutsche Börse);

Participation in Future Appreciation. The Deutsche Börse management board considered the fact that the consideration payable to Deutsche Börse shareholders in the exchange offer would be Holdco shares and, therefore, would allow Deutsche Börse shareholders to participate in potential further appreciation of the combined company after the combination;

Governance. The Deutsche Börse management board considered that the following governance arrangements provided by the business combination agreement would enable continuity of management and an effective and timely integration of the two companies' operations and reflect the fact that the transaction was structured as a balanced business combination rather than an acquisition of NYSE Euronext by Deutsche Börse or vice versa:

the agreement of the parties that the Holdco board of directors would consist of the following members after completion of the combination:

Deutsche Börse's chief executive officer, who would be appointed as the chairman of the Holdco group;

NYSE Euronext's chief executive officer, who would also be appointed as the chief executive officer of the Holdco group;

fifteen other individuals, with nine individuals (or 60%) to be designated by Deutsche Börse and six individuals (or 40%) to be designated by NYSE Euronext; and

the Global Executive Committee of the Holdco group would consist of an equal number of persons designated by Deutsche Börse and NYSE Euronext from their respective senior management teams;

Familiarity with Businesses. The Deutsche Börse management board considered its knowledge of Deutsche Börse Group's and NYSE Euronext's businesses, historical financial performance and condition, operations, properties, assets, regulatory issues, competitive positions, prospects and management, as well as its knowledge of the current and prospective environment in which Deutsche Börse Group and NYSE Euronext operate (including the anticipated consolidation in the industry and the competitive effects of this consolidation on Deutsche Börse Group); and

Alternatives. The directors of the Deutsche Börse management board considered the combination relative to the risks and uncertainties associated with other potential strategic alternatives that might be available to Deutsche Börse, in the context of rapid technological and regulatory changes being confronted by the financial services industry and the risks and challenges associated with these changes. The Deutsche Börse management board also took note of the fact that between the date that the parties issued the press release on February 9, 2011 confirming discussions and the date the parties entered into the business combination agreement, Deutsche Börse did not receive any incoming inquiries from any other potential strategic partners with respect to an alternative

strategic transaction.

The Deutsche Börse management board also considered a variety of risks and other potentially negative factors concerning the business combination agreement and the combination as a whole, including the following:

the risk that the potential benefits of the combination (including the amount of cost savings and revenue synergies) may not be fully or partially achieved, or may not be achieved within the expected timeframe;

A-82

Table of Contents

the risk that regulatory, governmental or competition authorities might seek to impose conditions on or otherwise prevent or delay the combination, or impose restrictions or requirements on the operation of the businesses of the Holdco group after completion of the combination;

the risks and costs to Deutsche Börse Group if the combination is not completed, including the potential diversion of management and employee attention from the daily business, potential employee attrition and the potential effect on business and customer relationships;

the risk of diverting management focus and resources from other strategic opportunities and from operational matters, and potential disruption associated with combining and integrating the companies;

the risk that certain members of Deutsche Börse senior management who have been selected to hold senior management positions in the combined company might not choose to remain with the combined company;

the potential challenges and difficulties relating to integrating the operations of Deutsche Börse Group and NYSE Euronext, including the cost to achieve synergies;

the restrictions on the conduct of Deutsche Börse Group's business prior to the completion of the combination, which restrictions require Deutsche Börse Group to conduct its business in the ordinary course and subject to specific limitations, which may delay or prevent Deutsche Börse Group from undertaking business opportunities that may arise pending completion of the combination;

the risk that an insufficient number of Deutsche Börse shareholders will tender their Deutsche Börse shares into the exchange offer or that the NYSE Euronext shareholders may fail to approve the merger;

the risk that the combination would be completed and up to 25% of the Deutsche Börse shares may not have been tendered in the exchange offer, and that Holdco may not be able to acquire such remaining Deutsche Börse shares on a timely basis or at all (and any such acquisition of such shares may require the payment of different or additional consideration than the consideration offered in the exchange offer);

the requirement that Deutsche Börse pay NYSE Euronext a termination fee if an alternative proposal to acquire Deutsche Börse is publicly announced or made known and the business combination agreement is thereafter terminated in certain circumstances (see The Business Combination Agreement – Termination);

the risk that because the exchange ratio to be paid to the Deutsche Börse shareholders is fixed, the value of the consideration to Deutsche Börse shareholders in the combination could fluctuate;

the likelihood of litigation challenging the combination, and the possibility that an adverse judgment for monetary damages could have a material adverse effect on the operations of the combined company after the combination or that an adverse judgment granting permanent injunctive relief could indefinitely enjoin completion of the combination;

the expenses associated with completing the combination;

Edgar Filing: NYSE Euronext - Form 425

the risk that, upon completion of the combination, the counterparties under certain material agreements of certain members of the Deutsche Börse Group (*e.g.*, under the cooperation agreement with SIX Group AG regarding Scoach Holding S.A. and the shareholders' agreement with SIX Swiss Exchange AG regarding Eurex) may be able to exercise certain change of control rights; and

various other risks associated with the combination and the businesses of Deutsche Börse Group, NYSE Euronext and the combined company described under Risk Factors.

In addition to considering the factors described above, Deutsche Börse management board considered that:

some members of the management and supervisory boards of Deutsche Börse have interests in the combination as individuals that are in addition to, and that may be different from, the interests of Deutsche Börse shareholders (see Proposal 1 The Combination Proposal Interests of Deutsche Börse Supervisory and Management Board Members); and

A-83

Table of Contents

additional regulatory requirements and regulatory authorities would be applicable to the combined company as a result of the transaction.

The Deutsche Börse management board concluded that the potentially negative factors associated with the combination were outweighed by the potential benefits that it expected Deutsche Börse and its shareholders to achieve as a result of the combination. Accordingly, the Deutsche Börse management and supervisory board approved the combination.

NYSE Euronext's Reasons for the Combination

On February 15, 2011, the NYSE Euronext board of directors determined that the business combination agreement and the transactions contemplated thereby were advisable, fair to and in the best interests of NYSE Euronext shareholders and approved and adopted the business combination agreement and the transactions contemplated thereby.

In reaching its decision on February 15, 2011, the NYSE Euronext board of directors consulted with NYSE Euronext management and its financial and legal advisors and considered a variety of factors, including the material factors described below. In light of the number and wide variety of factors considered in connection with its evaluation of the transaction, the NYSE Euronext board of directors did not consider it practicable to, and did not attempt to, quantify or otherwise assign relative weights to the specific factors that it considered in reaching its determination. The NYSE Euronext board of directors viewed its position as being based on all of the information available and the factors presented to and considered by it. In addition, individual directors may have given different weight to different factors. This explanation of NYSE Euronext's reasons for the proposed combination and all other information presented in this section is forward-looking in nature and, therefore, should be read in light of the factors discussed under *Forward-Looking Statements*.

The NYSE Euronext board of directors considered a number of factors pertaining to the strategic rationale for the combination as generally supporting its decision to enter into the combination agreement, including the following material factors:

Consistency with Existing Strategy. The NYSE Euronext board of directors considered that the combination with Deutsche Börse would enable NYSE Euronext to accelerate the benefits of its existing strategy to operate a global multi-asset class exchange providing a diversified range of services to the capital markets community at various stages of the trading value chain;

Strategic Considerations. The NYSE Euronext board of directors believes that the combination will provide a number of significant strategic opportunities, including the following:

its expectation that the combined company would be a leader with a diversified portfolio of large and growing businesses, including derivatives, listings, cash equities, post-trade settlement and asset servicing, market data and technology services;

its view that the combined company would have a portfolio of leading brands, including NYSE Euronext, New York Stock Exchange, Euronext, Deutsche Börse, Eurex, NYSE Liffe, Clearstream and Stoxx;

its expectation that the combined company's complementary interest rate and equity index products would allow the combined company to provide customers with the product innovation and capital efficiency capabilities of a global derivatives platform;

its expectation that the combined company would be an industry-leading provider of technology services throughout the trading value chain and information content;

its expectation that the combined company would be the world's largest venue for capital raising;

Edgar Filing: NYSE Euronext - Form 425

its expectation that the combined company would be a global pioneer in international post-trade infrastructure and settlement with significant revenues drawn from outside of North America and Europe in those business areas; and

A-84

Table of Contents

its expectation that the combination would over time create substantial incremental efficiency and growth opportunities;

Participation in Future Appreciation. The NYSE Euronext board of directors considered the fact that the merger consideration would be Holdco shares and, therefore, would allow NYSE Euronext shareholders to participate in potential further appreciation of the combined company after the merger;

Synergies. Based on the advice of NYSE Euronext management following such management's discussions with Deutsche Börse management and NYSE Euronext's accounting advisors, the NYSE Euronext board of directors determined that the combination would create significant cost savings and revenue synergies, including approximately 300 million (\$400 million, based on an exchange rate of \$1.33 to 1.00) of annual cost savings expected to be achievable on an annualized basis within three years after the completion of the transaction, as well as at least 100 million (\$133 million) of annual revenue synergies. See The Business Combination Certain Synergy Forecasts for a revised estimate of expected cost savings of 400 million (\$532 million);

Exchange Ratio. The NYSE Euronext board of directors considered that the exchange ratio of 0.47 of a Holdco share for each NYSE Euronext share in the merger and one Holdco share for each Deutsche Börse share in the exchange offer implied the following premiums as of February 8, 2011, the date prior to public reports that discussions were being held between NYSE Euronext and Deutsche Börse regarding a possible business combination, assuming that each Holdco share had a value equal to \$78.55, which was the closing price of one Deutsche Börse share on February 8, 2011 converted into U.S. dollars based on an exchange ratio of \$1.3551 to 1:

a 10.5% premium to the closing price of NYSE Euronext shares on February 8, 2011;

a 12.8% premium to the average of the closing prices of NYSE Euronext shares for the 10-day period ended on February 8, 2011;

a 14.0% premium to the average of the closing prices of NYSE Euronext shares for the one-month period ended on February 8, 2011; and

a 21.5% premium to the average of the closing prices of NYSE Euronext shares for the three-month period ended on February 8, 2011;

Implied Ownership. The NYSE Euronext board of directors considered that the exchange ratios implied that former NYSE Euronext shareholders and former Deutsche Börse shareholders would hold approximately 40% and 60%, respectively, of the outstanding Holdco shares, assuming that all Deutsche Börse shares are tendered in the exchange offer, and considered this relative ownership percentage after reviewing the earnings, cash flow and balance sheet impact of the proposed combination, the historical financial performance of NYSE Euronext and Deutsche Börse Group, the historical trading price of NYSE Euronext shares and Deutsche Börse shares and the historical exchange rate between euros and U.S. dollars;

Financial Advisor's Opinion. The NYSE Euronext board of directors considered the financial analyses presented to the NYSE Euronext board of directors by Perella Weinberg and the opinion of Perella Weinberg that, as of February 15, 2011 and based upon and subject to the various assumptions made, procedures followed, matters considered and qualifications and limitations set forth therein, the exchange ratio in the merger of 0.47 is fair, from a financial point of view, to NYSE Euronext shareholders;

Edgar Filing: NYSE Euronext - Form 425

Governance. The NYSE Euronext board of directors considered that the following governance arrangements provided by the business combination agreement would enable continuity of management and an effective and timely integration of the two companies' operations and reflect the fact that the transaction was structured as a balanced business combination rather than an acquisition of NYSE Euronext by Deutsche Börse or vice versa:

the agreement of the parties that the Holdco board of directors would consist of the following members after completion of the combination:

the chief executive officer of NYSE Euronext, who would also be appointed as the chief executive officer of the Holdco group;

A-85

Table of Contents

the chief executive officer of Deutsche Börse, who would also be appointed as the chairman of the Holdco group;

fifteen other individuals, with six individuals (or 40%) to be designated by NYSE Euronext and nine (or 60%) to be designated by Deutsche Börse; and

the Global Executive Committee of the Holdco group would consist of an equal number of persons designated by NYSE Euronext (including the chief executive officer of NYSE Euronext) and Deutsche Börse from their respective senior management teams;

Familiarity with Businesses. The NYSE Euronext board of directors considered its knowledge of NYSE Euronext's and Deutsche Börse Group's businesses, historical financial performance and condition, operations, properties, assets, regulatory issues, competitive positions, prospects and management, as well as its knowledge of the current and prospective environment in which NYSE Euronext and Deutsche Börse Group operate (including the anticipated consolidation in the industry and the competitive effects of this consolidation on NYSE Euronext); and

Alternatives. The NYSE Euronext board of directors considered the combination relative to the risks and uncertainties associated with other potential strategic alternatives that might be available to NYSE Euronext, in the context of rapid technological and regulatory changes being confronted by the financial services industry and the risks and challenges associated with these changes. The NYSE Euronext board of directors also took note of the fact that between the date that the parties issued the press release on February 9, 2011 confirming discussions and the date the parties entered into the business combination agreement, NYSE Euronext did not receive any incoming inquiries from any other potential strategic partners with respect to an alternative strategic transaction.

The NYSE Euronext board of directors also considered a variety of risks and other potentially negative factors concerning the combination, including the following:

the risk that the potential benefits of the combination (including the amount of cost savings and revenue synergies) may not be fully or partially achieved, or may not be achieved within the expected timeframe;

the risk that regulatory, governmental or competition authorities might seek to impose conditions on or otherwise prevent or delay the combination, or impose restrictions or requirements on the operation of the businesses of the Holdco group after completion of the combination;

the risks and costs to NYSE Euronext if the combination is not completed, including the potential diversion of management and employee attention, potential employee attrition and the potential effect on business and customer relationships;

the risk of diverting management focus and resources from other strategic opportunities and from operational matters, and potential disruption associated with combining and integrating the companies;

the risk that certain members of NYSE Euronext senior management who have been selected to hold senior management positions in the combined company might not choose to remain with the combined company;

the potential challenges and difficulties relating to integrating the operations of NYSE Euronext and Deutsche Börse Group, including the cost to achieve synergies;

Edgar Filing: NYSE Euronext - Form 425

the restrictions on the conduct of NYSE Euronext's business prior to the completion of the combination, which restrictions require NYSE Euronext to conduct its business in the ordinary course and subject to specific limitations, which may delay or prevent NYSE Euronext from undertaking business opportunities that may arise pending completion of the combination;

the risk that the NYSE Euronext shareholders may fail to adopt the business combination agreement and approve the transactions contemplated thereby, or that an insufficient number of Deutsche Börse shareholders will tender their Deutsche Börse shares into the exchange offer;

A-86

Table of Contents

the risk that the combination would be completed and up to 25% of the Deutsche Börse shares may not have tendered their shares in the exchange offer, and that Holdco may not be able to acquire such remaining Deutsche Börse shares on a timely basis or at all (and any such acquisition of such shares may require the payment of different or additional consideration than the considered offered in the exchange offer);

the requirement that NYSE Euronext submit the business combination agreement to its shareholders for approval, even if the NYSE Euronext board of directors withdraws or changes its recommendation in a manner adverse to Deutsche Börse or Holdco (including by changing to recommend that NYSE Euronext shareholders reject the combination and the business combination agreement), which could delay or prevent NYSE Euronext's ability to pursue alternative proposals if one were to become available in the interim;

the requirement that NYSE Euronext pay Deutsche Börse a termination fee if an alternative proposal to acquire NYSE Euronext is publicly announced or made known and the combination agreement is thereafter terminated in certain circumstances (see "The Business Combination Agreement - Termination");

the risk that because the exchange ratio to be paid to the NYSE Euronext shareholders is fixed, the value of the consideration to NYSE Euronext shareholders in the combination could fluctuate;

the risk that the U.S. holders of NYSE Euronext shares will be required to recognize gain for U.S. federal income tax purposes as a result of the merger if NYSE Euronext waives its tax conditions;

the likelihood of litigation challenging the merger, and the possibility that an adverse judgment for monetary damages could have a material adverse effect on the operations of the combined company after the combination or that an adverse judgment granting permanent injunctive relief could indefinitely enjoin completion of the combination;

the fees and expenses associated with completing the combination; and

various other risks associated with the combination and the businesses of NYSE Euronext, Deutsche Börse Group and the combined company described under "Risk Factors."

In addition to considering the factors described above, the NYSE Euronext board of directors considered that:

some officers and directors of NYSE Euronext have interests in the combination as individuals that are in addition to, and that may be different from, the interests of NYSE Euronext shareholders (see Proposal 1 "The Combination Proposal - Interests of NYSE Euronext Directors and Executive Officers in the Combination"); and

additional regulatory requirements and regulatory authorities would be applicable to the combined company as a result of the transaction.

Furthermore, in accordance with its obligations under the NYSE Euronext certificate of incorporation, the NYSE Euronext board of directors determined that the combination, and Holdco's exercise of voting rights over NYSE Euronext and ownership of equity interests in NYSE Euronext:

Edgar Filing: NYSE Euronext - Form 425

will not impair the ability of any U.S. regulated exchanges, NYSE Euronext or NYSE Group to discharge their respective responsibilities under the Exchange Act and the rules and regulations thereunder;

will not impair the ability of any European market subsidiaries of NYSE Euronext, NYSE Euronext or Euronext N.V. to discharge their respective responsibilities under the European exchange regulations;

is otherwise in the best interests of NYSE Euronext, its shareholders, its U.S. regulated exchanges and European market subsidiaries;
and

A-87

Table of Contents

will not impair the SEC's ability to enforce the Exchange Act or the European regulators' ability to enforce the European exchange regulations.

The NYSE Euronext board of directors concluded that the potentially negative factors associated with the combination were outweighed by the potential benefits that it expected NYSE Euronext and its shareholders to achieve as a result of the combination. Accordingly, the NYSE Euronext board of directors determined that the business combination agreement and the transactions contemplated thereby, including the merger, are advisable, fair to, and in the best interests of, NYSE Euronext and its shareholders.

Certain Synergy Forecasts

None of NYSE Euronext, Deutsche Börse or Holdco as a matter of course publicly discloses detailed forecasts or internal projections as to future revenues, earnings or financial condition. However, in the course of their discussions regarding the proposed combination, as discussed under

Proposal 1: The Combination Proposal Background of the Combination, NYSE Euronext and Deutsche Börse provided each other and their respective financial advisors with certain business and synergy forecasts that were made publicly available after the announcement of the signing of the business combination agreement. Set forth below is an overview of such business and synergy data and forecasts, as well as the revised estimates of cost savings that were subsequently publicly disclosed by the parties.

In preparing the synergy forecasts set forth below, management of NYSE Euronext and Deutsche Börse made the following material assumptions:

implementation and restructuring costs are estimated to be approximately 1.5 to 2.0 times the expected full run-rate cost synergies;

the exchange rate would be 1 = \$1.33; and

the combination would be completed by December 31, 2011.

Projected Cost Savings of NYSE Euronext and Deutsche Börse Group

In connection with their financial due diligence review, the parties estimated in February 2011 that the combination will generate cost savings of approximately 300 million/\$400 million, principally from information technology, clearing, and market operations, as well as from corporate administration and support functions. For example, both NYSE Euronext and Deutsche Börse Group operate EU cash markets, EU derivatives markets and U.S. equity options markets. By combining their respective operations, the parties expect that savings could be realized across all three businesses by combining duplicative functions such as management, sales and marketing, and product development and by bringing locations together. The parties also expect more limited savings in listing and market operations. The following table sets forth the areas in which the parties expected that these cost savings can be achieved and their anticipated sources for these cost savings. All synergy values are based on an exchange rate of \$1.33 per euro.

	Annual Cost Savings (millions)	% of Total Cost Savings	Comments
Technology	79/\$105	26	Single platform Integrated complementary derivatives franchises Combined U.S. options platforms
Clearing	67/\$90	22.5	Duplicative operations and planned operating expenses
Market Operations	98/\$130	32.5	EU cash markets EU derivatives market U.S. equity options

Edgar Filing: NYSE Euronext - Form 425

Corporate

56/\$75

19

Duplicative corporate and administrative overhead

A-88

Table of Contents

The parties expected these cost savings to be realized at an annual run rate that will reach 100% by the end of the third year following completion of the combination, as set forth in the following table:

	Run-Rate (%)	Cost Savings (millions)
Year 1	25	75/\$100
Year 2	50	150/\$200
Year 3	100	300/\$400

Revised Projected Cost Savings of NYSE Euronext and Deutsche Börse Group

Following the date of the business combination agreement, the parties continued to analyze the cost savings that they expected to achieve as a result of the combination, based on additional information developed in connection with commencement of their integration planning. Following such analysis, the parties revised their estimate of the projected cost savings. As revised, the parties estimate that the combination will generate cost savings of approximately 400 million/\$532 million, principally from information technology, clearing, and market operations, as well as from corporate administration and support functions. The following table sets forth the areas in which these cost savings are expected to be achieved and the anticipated sources for the cost savings including the levers for additional cost savings. All values are based on an exchange rate of \$1.33 per euro.

	Annual Cost Savings (millions)	% of Total Cost Savings	Levers for Cost Savings
Technology	130.0/\$172.9	32.5%	<ul style="list-style-type: none"> Single platform Integrated complementary derivatives franchises Combined U.S. option platforms Levers for additional cost savings: <ul style="list-style-type: none"> Common trading & clearing infrastructure Further consolidation of networks and U.S. data centers Globalized IT operating model around common trading & clearing infrastructure
Clearing	71.0/\$94.4	17.7%	<ul style="list-style-type: none"> Duplicative operations and planned operating expenses Levers for additional cost savings: <ul style="list-style-type: none"> Further refinement of planned operating expenses
Market Operations	113.0/\$150.3	28.3%	<ul style="list-style-type: none"> EU cash markets EU derivatives markets U.S. equity options

Levers for additional cost savings:

Implementation of centralized market operations hubs for derivatives & equities in Europe and in the U.S. and realization of operations-efficiencies in all locations through common trading & clearing infrastructure

Further consolidation of sales and product development in Europe and in the U.S.

A-89

Table of Contents

	Annual Cost Savings (millions)	% of Total Cost Savings	Levers for Cost Savings
Corporate	86.0/\$114.4	21.5%	Duplicative corporate and administrative overhead
			Levers for additional cost savings:
			Further refinement of corporate & administrative functions
			Streamlining of management structure across entire group
			Stronger leverage of increased buying power and global sourcing opportunities
			Consolidation of global real estate portfolio

The parties also revised their expectations as to when they expect these cost savings to be realized, although they continue to believe that full run rate will reach 100% by the end of the third year following completion of the combination, as set forth in the following table:

	Run-Rate	Cost Savings (millions)
End of Year 1	30%	120.0/\$159.6
End of Year 2	65%	260.0/\$345.8
End of Year 3	100%	400.0/\$532.0

Projected Revenue Synergies of NYSE Euronext and Deutsche Börse Group

In addition, the parties expect that the combination will lead to at least 100 million (\$133 million) of annual revenue synergies, with the full run-rate being achieved at the end of the third year after completion of the combination, through cross-selling and distribution opportunities, increased turnover from liquidity pool consolidation and new products, a progressive introduction of Deutsche Börse Group's clearing capabilities and expanded scope for technology services and market data offerings. The following table sets forth the areas in which these revenue synergies are expected to be realized and the anticipated sources for these revenue synergies. The parties expect that approximately 50% of the projected revenue synergies will be realized in the clearing business and approximately 50% in the other business areas indicated below:

	Comments
Derivatives and Cash Markets	Increase turnover from combining equity and derivatives liquidity pools
Technology and MD&A	Cross-distribution in European cash markets Expanded client set for hosted/managed technology and data services Extension of STOXX index franchise to U.S. market and globally
Clearing	Richer content for pre- and post-trade data and analytics products Clearing for European cash equities Clearing for European derivatives

The internal synergy forecasts were not prepared with a view toward public disclosure, nor were they prepared with a view toward compliance with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants for preparation and presentation of financial forecasts, or U.S. GAAP. In addition, the synergy forecasts were not prepared with the assistance of, or reviewed, compiled or examined by, independent accountants. This summary of the internal synergy forecasts is not being included in this document to influence your decision whether to exchange your Deutsche Börse shares in the exchange offer or vote your NYSE Euronext shares to adopt the

Edgar Filing: NYSE Euronext - Form 425

business combination agreement and approve the transactions contemplated by such agreement. Rather, they are included because these internal synergy forecasts were considered by Deutsche Börse's and NYSE Euronext's board(s) and their respective financial advisors for purposes of evaluating the combination.

A-90

Table of Contents

These internal synergy forecasts were based on numerous variables and assumptions that are inherently uncertain, many of which are beyond the control of NYSE Euronext's and Deutsche Börse Group's management and will be beyond the control of Holdco's management. Important factors that may affect actual results and cause the internal synergy forecasts to not be achieved include, but are not limited to, risks and uncertainties relating to the business of NYSE Euronext and Deutsche Börse (including their ability to achieve strategic goals, objectives and targets over applicable periods), industry performance, the regulatory environment, developments in commercial disputes or legal proceedings, general business and economic conditions and other factors described under General Information Forward-Looking Statements. The internal synergy forecasts also reflect assumptions as to certain business decisions that are subject to change. As a result, actual results may differ materially from those contained in these synergy financial forecasts. Accordingly, there can be no assurance that the projections will be realized.

The inclusion of the internal synergy forecasts in this document should not be regarded as an indication that any of Holdco, NYSE Euronext, Deutsche Börse or their respective affiliates, advisors or representatives considered the internal synergy forecasts to be predictive of actual future events, and the internal synergy forecasts should not be relied upon as such. None of Holdco, NYSE Euronext, Deutsche Börse or their respective affiliates, advisors, officers, directors, partners or representatives can give you any assurance that actual results will not differ from these internal synergy forecasts, and, except as otherwise required by law, none of them have any obligation to update or otherwise revise or reconcile these internal synergy forecasts to reflect circumstances existing after the date the internal synergy forecasts were generated or to reflect the occurrence of future events even in the event that any or all of the assumptions underlying the synergy forecasts are shown to be in error. NYSE Euronext and Deutsche Börse do not intend, except as otherwise required by law, to make publicly available any update or other revision to these internal synergy forecasts. NYSE Euronext, Deutsche Börse and their respective affiliates, advisors, officers, directors, partners or representatives have not made, and are not authorized to make in the future, any representation to any shareholder or other person regarding NYSE Euronext's and Deutsche Börse Group's ultimate performance compared to the information contained in these internal synergy forecasts or that estimated results will be achieved. NYSE Euronext and Deutsche Börse have made no representations, in the business combination agreement or otherwise, concerning these internal synergy forecasts.

See cautionary statements regarding forward-looking information under General Information Forward-Looking Statements.

Opinion of the Financial Advisor to the NYSE Euronext Board of Directors

The NYSE Euronext board of directors retained Perella Weinberg to act as its financial advisor in connection with the combination, pursuant to which (1) Holdco will conduct the exchange offer to acquire each issued Deutsche Börse share for one Holdco share, and (2) immediately following the purchase by Holdco of the Deutsche Börse shares tendered in the exchange offer, Pomme Merger Corporation, a wholly owned subsidiary of Holdco, will merge with and into NYSE Euronext, with NYSE Euronext surviving the merger as a wholly owned subsidiary of Holdco, and all of the issued and outstanding NYSE Euronext shares, other than any NYSE Euronext shares owned directly by NYSE Euronext or Pomme Merger Corporation and not held on behalf of third parties, will be converted into the right to receive 0.47 of a Holdco share. This exchange ratio is referred to in this document as the merger exchange ratio. On February 15, 2011, Perella Weinberg rendered its oral opinion, subsequently confirmed in writing, to the NYSE Euronext board of directors that, as of such date, and based upon and subject to the various assumptions made, procedures followed, matters considered and qualifications and limitations set forth in the opinion, the merger exchange ratio in the combination was fair, from a financial point of view, to holders of NYSE Euronext shares (other than Deutsche Börse or any affiliate of Deutsche Börse).

The full text of Perella Weinberg's written opinion, dated February 15, 2011, which sets forth, among other things, the assumptions made, procedures followed, matters considered and qualifications and limitations on the review undertaken by Perella Weinberg, is attached as Annex E to this document.

Table of Contents

Holders of NYSE Euronext shares are urged to read Perella Weinberg's opinion carefully and in its entirety. The opinion does not address NYSE Euronext's underlying business decision to enter into the combination or the relative merits of the combination as compared with any other strategic alternative that may have been available to NYSE Euronext. The opinion does not constitute a recommendation to any holder of NYSE Euronext shares or Deutsche Börse shares as to how such holders should vote or otherwise act with respect to the combination or any other matter and does not in any manner address the prices at which NYSE Euronext shares, Holdco shares or Deutsche Börse shares will trade at any time. In addition, Perella Weinberg expressed no opinion as to the fairness of the combination to, or any consideration to, the holders of any other class of securities, creditors or other constituencies of NYSE Euronext. Perella Weinberg provided its opinion for the information and assistance of the NYSE Euronext board of directors in connection with, and for the purposes of its evaluation of, the combination. This summary is qualified in its entirety by reference to the full text of the opinion. Perella Weinberg's business address is 767 Fifth Avenue, New York, NY 10153, United States of America. Perella Weinberg has given its consent to the use of its opinion letter dated February 15, 2011 to the Board of Directors of NYSE Euronext, in the form and content as included in this document, as this document stands, at the time of publication.

In giving such consent, Perella Weinberg does not admit that it comes within the category of persons whose consent is required under Section 7 of the US Securities Act of 1933, as amended, or the rules and regulations of the US Securities and Exchange Commission thereunder, nor does Perella Weinberg thereby admit that it is an expert with respect to any part of the Registration Statement on Form F-4 of Alpha Beta Netherlands Holding N.V. filed with the Securities and Exchange Commission, which includes the proxy statement/prospectus, within the meaning of the term "expert" as used in the Securities Act of 1933, as amended, or the rules and regulations of the Securities and Exchange Commission thereunder.

In arriving at its opinion, Perella Weinberg, among other things:

reviewed certain publicly available financial statements and other business and financial information with respect to NYSE Euronext and Deutsche Börse Group, including research analyst reports;

reviewed certain internal financial information, analyses, and other financial and operating data relating to the business of NYSE Euronext, in each case, prepared by management of NYSE Euronext;

reviewed certain internal financial information, analyses, and other financial and operating data relating to the business of Deutsche Börse Group, in each case, prepared by management of Deutsche Börse Group;

reviewed certain publicly available financial forecasts relating to NYSE Euronext;

reviewed certain publicly available financial forecasts relating to Deutsche Börse Group;

reviewed estimates of synergies anticipated from the combination, which are referred to collectively in this document as the anticipated synergies, prepared by management of NYSE Euronext;

discussed the past and current business, operations, financial condition and prospects of NYSE Euronext, including the anticipated synergies, with senior executives of NYSE Euronext and Deutsche Börse Group, and discussed the past and current business, operations, financial condition and prospects of Deutsche Börse Group with senior executives of NYSE Euronext and Deutsche Börse Group;

reviewed the relative financial contributions of NYSE Euronext and Deutsche Börse Group to the future financial performance of Holdco on a pro forma basis;

compared the financial performance of NYSE Euronext and Deutsche Börse Group with that of certain publicly-traded companies which it believed to be generally relevant;

compared the financial terms of the combination with the publicly available financial terms of certain transactions which it believed to be generally relevant;

A-92

Table of Contents

reviewed the historical trading prices and trading activity for NYSE Euronext shares and Deutsche Börse shares, and compared such price and trading activity of NYSE Euronext shares and Deutsche Börse shares with each other and with that of securities of certain publicly-traded companies which it believed to be generally relevant;

reviewed the business combination agreement; and

conducted such other financial studies, analyses and investigations, and considered such other factors, as it deemed appropriate. In arriving at its opinion, Perella Weinberg assumed and relied upon, without independent verification, the accuracy and completeness of the financial and other information supplied or otherwise made available to it (including information that was available from generally recognized public sources) for purposes of its opinion and further relied upon the assurances of the managements of NYSE Euronext and Deutsche Börse that, to their knowledge, information furnished by them for purposes of Perella Weinberg's analysis did not contain any material omissions or misstatements of material fact. Perella Weinberg assumed, with the consent of the NYSE Euronext board of directors, that there were no material undisclosed liabilities of NYSE Euronext and Deutsche Börse Group for which adequate reserves or other provisions had not been made and that the anticipated synergies and potential strategic implications and operational benefits (including the amount, timing and achievability thereof) anticipated by the management of NYSE Euronext to result from the combination would be realized in the amounts and at the times projected by the management of NYSE Euronext, and Perella Weinberg expressed no view as to the assumptions on which they are based.

Perella Weinberg relied upon, without independent verification, the assessment by the managements of NYSE Euronext and of Deutsche Börse of the timing and risks associated with the integration of NYSE Euronext and Deutsche Börse Group. At the direction of NYSE Euronext, Perella Weinberg relied upon the published estimates of third-party research analysts and, with NYSE Euronext management's direction and endorsement, extrapolations based thereon with respect to NYSE Euronext and extrapolations based thereon with respect to Deutsche Börse prepared by or on behalf of Deutsche Börse and provided to Perella Weinberg on behalf of Deutsche Börse. The published estimates were estimates of NYSE Euronext's and Deutsche Börse's financial results for 2011 and 2012, and the extrapolations, which were calculated by NYSE Euronext's and Deutsche Börse's financial advisors, were estimates of NYSE Euronext's and Deutsche Börse's financial results for 2013, 2014 and 2015. At the direction of NYSE Euronext, Perella Weinberg assumed that such estimates and extrapolations were a reasonable basis upon which to evaluate the future financial performance of NYSE Euronext and Deutsche Börse Group, and Perella Weinberg expressed no view as to the assumptions on which they were based.

In arriving at its opinion, Perella Weinberg did not make any independent valuation or appraisal of the assets or liabilities (including any contingent, derivative or off-balance-sheet assets and liabilities) of NYSE Euronext or Deutsche Börse Group, nor was it furnished with any such valuations or appraisals, nor did it assume any obligation to conduct, nor did it conduct, any physical inspection of the properties or facilities of NYSE Euronext or Deutsche Börse Group. In addition, Perella Weinberg did not evaluate the solvency of any party to the business combination agreement under any state, federal or foreign laws relating to bankruptcy, insolvency or similar matters.

Perella Weinberg assumed that the combination would be consummated in accordance with the terms set forth in the business combination agreement, without material modification, waiver or delay, including that each Deutsche Börse share would be exchanged for one Holdco share in the exchange offer. In addition, Perella Weinberg assumed that in connection with the receipt of all the necessary approvals of the proposed combination, no delays, limitations, conditions or restrictions would be imposed that could have an adverse effect on Holdco, NYSE Euronext, Deutsche Börse Group or the contemplated benefits expected to be derived in the proposed combination. Perella Weinberg's analysis further assumed that 100% of the issued Deutsche Börse shares would be acquired by Holdco in the exchange offer. Perella Weinberg relied as to all legal matters relevant to rendering its opinion upon the advice of its counsel.

Perella Weinberg's opinion addressed only the fairness from a financial point of view, as of the date thereof, of the merger exchange ratio to the holders of NYSE Euronext shares (other than Deutsche Börse or any affiliate

Table of Contents

of Deutsche Börse) pursuant to the business combination agreement. Perella Weinberg was not asked to, nor did it, offer any opinion as to any other term of the business combination agreement (or any related document or agreement) or the form of the combination or the likely timeframe in which the combination would be completed. In addition, Perella Weinberg expressed no opinion as to the fairness of the amount or nature of any compensation to be received by any officers, directors or employees of any parties to the business combination agreement, or any class of such persons, relative to the merger exchange ratio or otherwise. Perella Weinberg made no assumption as to whether the transaction would be taxable to NYSE Euronext shareholders, and did not express any opinion as to any tax or other consequences that may result from the transactions contemplated by the business combination agreement, nor did its opinion address any legal, tax, regulatory or accounting matters, as to which it understood NYSE Euronext had received such advice as it deemed necessary from qualified professionals. Perella Weinberg's opinion did not address the underlying business decision of NYSE Euronext to enter into the combination or the relative merits of the combination as compared with any other strategic alternative which may have been available to NYSE Euronext. Perella Weinberg was not authorized to solicit, and did not solicit, indications of interest in a transaction with NYSE Euronext from any party. Perella Weinberg's opinion noted that on February 9, 2011, NYSE Euronext and Deutsche Börse publicly confirmed that they were engaged in advanced discussions regarding a potential combination. Except as described above, the NYSE Euronext board of directors imposed no other limitations on the investigations made or procedures followed by Perella Weinberg in rendering its opinion.

Perella Weinberg's opinion was necessarily based on financial, economic, market and other conditions as in effect on, and the information made available to Perella Weinberg as of, the date of its opinion. It should be understood that subsequent developments may affect Perella Weinberg's opinion and the assumptions used in preparing it, and Perella Weinberg does not have any obligation to update, revise, or reaffirm its opinion. The issuance of Perella Weinberg's opinion was approved by a fairness committee of Perella Weinberg.

Summary of Material Financial Analyses

The following is a summary of the material financial analyses performed by Perella Weinberg and reviewed by the NYSE Euronext board of directors in connection with Perella Weinberg's opinion relating to the combination and does not purport to be a complete description of the financial analyses performed by Perella Weinberg. The order of analyses described below does not represent the relative importance or weight given to those analyses by Perella Weinberg. Some of the summaries of the financial analyses include information presented in tabular format.

In order to fully understand Perella Weinberg's financial analyses, the tables must be read together with the text of each summary. The tables alone do not constitute a complete description of the financial analyses. Considering the data below without considering the full narrative description of the financial analyses, including the methodologies and assumptions underlying the analyses, could create a misleading or incomplete view of Perella Weinberg's financial analyses.

Analysis of Implied Premia

Perella Weinberg took the product of (1) the merger exchange ratio and (2) the per share closing price of Deutsche Börse shares on February 8, 2011 (the last trading day prior to the day on which NYSE Euronext and Deutsche Börse publicly confirmed that they were engaged in advanced discussions regarding a potential combination (which date is referred to in this summary of Perella Weinberg's material financial analyses as the reference date)), which per share closing price was \$57.45 or \$78.55, assuming a U.S. dollar-to-euro exchange rate of 1.367, and compared the \$36.92 implied value per share of NYSE Euronext shares to the following:

the closing market price per share of NYSE Euronext shares on the reference date;

the average closing market price per share of NYSE Euronext shares for each of the ten-day, one-month and three-month periods ended on the reference date; and

the closing market price per share of NYSE Euronext shares one month prior to the reference date.

Table of Contents

The results of these calculations are summarized in the following table:

	Price of NYSE Euronext Share (for period ended on reference date) (in U.S. dollars)	Implied Premium (%)
Closing price on reference date	33.41	10.5
Ten-day average	32.71	12.8
One-month average	32.39	14.0
One-month prior	30.98	19.2
Three-month average	30.40	21.5

Relative Ownership Over Time

Perella Weinberg compared the approximate 40% ownership interest in Holdco that shareholders of NYSE Euronext will receive under the terms of the business combination agreement (which percentage assumes that all Deutsche Börse shares are tendered in the exchange offer) to the NYSE Euronext shareholders' implied ownership in Holdco over several periods. Perella Weinberg considered the market price per share of NYSE Euronext shares and Deutsche Börse shares on the reference date as well as the average closing market price per share of NYSE Euronext shares and Deutsche Börse shares for each of the last twelve-month, or LTM, two-year and three-year periods ended on the reference date. In preparing this comparison, Perella Weinberg calculated the implied ownership by dividing the individual market capitalizations of NYSE Euronext and Deutsche Börse by the combined market capitalization of the companies to determine the relative contribution of each to Holdco's market capitalization. Deutsche Börse's shares were converted to U.S. dollars on a daily basis using daily U.S.-dollar-to-euro exchange rates. The results of these calculations are summarized in the following table:

	Implied Ownership in Holdco (based on price of NYSE Euronext shares and Deutsche Börse shares) (%)	
	NYSE Euronext	Deutsche Börse
Closing price on reference date	38	62
LTM average	38	62
Two-year average	35	65
Three-year average	36	64

Exchange Ratio Over Time

Perella Weinberg also analyzed the exchange ratio of NYSE Euronext shares to Deutsche Börse shares on the reference date and for each of the ten-day, one-month, LTM and three-year periods ended on the reference date. In undertaking this analysis Perella Weinberg divided NYSE Euronext's daily share price by Deutsche Börse's share price in U.S. dollars for the corresponding day to calculate the implied exchange ratio for that day. Perella Weinberg compared the merger exchange ratio with the implied exchange ratio on the reference date and the average daily implied exchange ratios for each period ending on the reference date. To convert Deutsche Börse's share price into U.S. dollars, Perella Weinberg multiplied Deutsche Börse's share price on each day by the same day's U.S.-dollar-to-euro exchange rate. The results of these calculations are summarized in the following table:

	Exchange Ratio
Closing price on reference date	0.425
Ten-day average	0.422
One-month average	0.428
LTM average	0.430

Edgar Filing: NYSE Euronext - Form 425

Three-year average	0.391
Actual merger exchange ratio	0.470

Table of Contents

Historical Stock Trading

Perella Weinberg reviewed the historical trading prices for NYSE Euronext shares for the ten-day, one-month, LTM and three-year periods ending on the reference date. Perella Weinberg also reviewed the historical trading prices for Deutsche Börse shares during the same periods, and examined the performance of NYSE Euronext and Deutsche Börse relative to the CBOE Exchange Index, the S&P 500 Index and the DAX Exchange.

Perella Weinberg noted that, over the ten days prior to the reference date, the closing market price for NYSE Euronext shares rose by 3% and the closing market price for Deutsche Börse shares rose by 1%, whereas the CBOE Exchange Index was up by 3%, the S&P 500 Index was up by 2% and the DAX Exchange was up by 3% for the same period. Perella Weinberg also noted that, for this period, the average price per share of NYSE Euronext shares was \$32.71 and the average price per share of Deutsche Börse was 56.65. Looking at the one-month period ended on the reference date, Perella Weinberg noted that the closing market price for NYSE Euronext shares rose by 8% and the closing market price for Deutsche Börse shares rose by 10%, whereas the CBOE Exchange Index was up by 4%, the S&P 500 Index was up by 4% and the DAX Exchange was up by 7% for the same period. Perella Weinberg also noted that, for this period, the average closing price per share of NYSE Euronext shares was \$32.39 and the average closing price per Deutsche Börse share was 56.10.

Perella Weinberg also noted that, over the LTM period prior to the reference date, the closing market price per share for NYSE Euronext shares rose by 41% and the closing market price per share for Deutsche Börse shares rose by 23%, whereas the CBOE Exchange Index was up by 26%, the S&P 500 Index was up by 24% and the DAX Exchange was up by 33% for the same period. Perella Weinberg also noted that, for this period, the average closing price per share of NYSE Euronext shares was \$29.42 and the average closing price per share of Deutsche Börse was 52.00. Perella Weinberg further noted that in the three-year period ending on the reference date, the closing market price per share for NYSE Euronext shares was down by 52% and the closing market price per share for Deutsche Börse shares was down by 51%, whereas the CBOE Exchange Index fell by 28%, the S&P 500 fell by 1% and the DAX Exchange fell by 9%. Perella Weinberg also noted that, for this period, the average closing price per share of NYSE Euronext shares was \$33.11 and the average closing price per Deutsche Börse share was 59.48.

Equity Research Analyst Price Target Statistics

Perella Weinberg reviewed and analyzed the most recent publicly available research analyst price targets for NYSE Euronext shares prepared and published by 16 selected equity research analysts prior to the reference date. Perella Weinberg noted that the range of recent equity analyst price targets for NYSE Euronext shares prior to the reference date was \$30.00 to \$46.00 per share, with a median price target of \$37.00 per share.

Perella Weinberg also reviewed and analyzed the most recent publicly available research analyst price targets for Deutsche Börse shares prepared and published by eight selected equity research analysts prior to the reference date. Perella Weinberg noted that the range of recent equity analyst price targets for Deutsche Börse shares prior to the reference date was 47.00 to 73.00 per share, with a median price target of 64.50 per share.

The public market trading price targets published by equity research analysts do not necessarily reflect current market trading prices for NYSE Euronext shares and Deutsche Börse shares. Further, these estimates are subject to uncertainties, including the future financial performance of NYSE Euronext and Deutsche Börse Group and future financial market conditions, and the public market trading price targets published by equity research analysts typically represent price targets to be achieved over a six-to twelve month period.

Selected Publicly Traded Companies Analysis

Perella Weinberg reviewed and compared certain financial information for NYSE Euronext and Deutsche Börse Group to corresponding financial information, ratios and public market multiples for certain publicly held companies in the exchange operator industry. Although none of the following companies is identical to NYSE

Table of Contents

Euronext or to Deutsche Börse, Perella Weinberg selected these companies because they had publicly traded equity securities and were deemed to be similar to NYSE Euronext and Deutsche Börse in one or more respects including being operators of exchanges.

The Nasdaq OMX Group

London Stock Exchange plc

IntercontinentalExchange Inc.

Chicago Board Options Exchange

Chicago Mercantile Exchange

TMX Group Inc.

Bolsas y Mercados Españoles

For each of the selected companies, Perella Weinberg calculated and compared financial information and various financial market multiples and ratios based on company filings for historical information and consensus forecasts prepared by the Institutional Brokers Estimate System for forecasted information. For NYSE Euronext and Deutsche Börse, Perella Weinberg made calculations based on company filings and information provided by the respective managements of each company for historical information and third-party research estimates from Institutional Brokers Estimate System for forecasted information.

With respect to NYSE Euronext, Deutsche Börse and each of the selected companies, Perella Weinberg reviewed enterprise value as of the reference date as a multiple of estimated earnings before interest, taxes, depreciation and amortization, or EBITDA, share price to estimated earnings per share, or EPS, for fiscal year 2010 and fiscal year 2011, long term EPS growth rates and estimated EBITDA margins for fiscal year 2011. The results of these analyses are summarized in the following table:

	2010E EV /EBITDA Multiple		2011E EV /EBITDA Multiple	
Range of selected exchange operators	6.9x	11.5x	7.2x	10.1x
NYSE Euronext		9.5x		8.0x
Deutsche Börse		10.4x		8.7x

	2010E Share Price / Earnings Multiple		2011E Share Price / Earnings Multiple	
Range of selected exchange operators	12.3x	24.7x	12.2x	18.9x
NYSE Euronext		16.4x		13.6x
Deutsche Börse		16.8x		12.7x

	Long-Term EPS Growth Rate (%)	2011E EBITDA Margin (%)
--	-------------------------------------	-------------------------------

Edgar Filing: NYSE Euronext - Form 425

Range of selected exchange operators	5 16*	49 71
NYSE Euronext	11	49
Deutsche Börse	11	59

* Excluding Bolsas y Mercados Españoles due to negative long-term EPS growth rate.

Although the selected companies were used for comparison purposes, no business of any selected company was either identical or directly comparable to either NYSE Euronext's or Deutsche Börse Group's business. Accordingly, Perella Weinberg's comparison of selected companies to NYSE Euronext and Deutsche Börse and analysis of the results of such comparisons was not purely mathematical, but instead necessarily involved complex considerations and judgments concerning differences in financial and operating characteristics and other factors that could affect the relative values of the selected companies, NYSE Euronext and Deutsche Börse.

A-97

Table of Contents*Discounted Cash Flow Analysis*

Perella Weinberg conducted discounted cash flow analyses for NYSE Euronext and Deutsche Börse to determine the implied pro forma ownership percentages of the equity of the combined company for the shareholders of NYSE Euronext and Deutsche Börse. With respect to NYSE Euronext, estimates of unlevered free cash flows used for this analysis utilized the financial forecasts of selected equity analysts' models as well as NYSE Euronext guidance. Perella Weinberg calculated the net present value as of March 31, 2011 of the estimated unlevered free cash flows that each entity could generate between fiscal years 2011 and 2015. Perella Weinberg also calculated a range of terminal values assuming terminal year multiples of LTM EBITDA ranging from 8.0x to 9.0x and discount rates ranging from 8.0% to 12.0% based on estimates of the weighted average cost of capital of NYSE Euronext. The discounted cash flow analysis did not consider estimated cost savings resulting from the combination. With respect to Deutsche Börse, estimates of unlevered free cash flows used for this analysis utilized financial forecasts prepared by Deutsche Börse based upon equity analyst models. Perella Weinberg also calculated a range of terminal values assuming terminal year multiples of LTM EBITDA ranging from 8.0x to 9.0x and discount rates ranging from 8.0% to 12.0% based on estimates of the weighted average cost of capital of Deutsche Börse.

Perella Weinberg analyzed the implied contribution at each of the low, mid and top of the range equity valuations implied by the discounted cash flow analyses for NYSE Euronext and Deutsche Börse. Under this analysis, NYSE Euronext's implied shareholder ownership in the combined company ranged from 39.5% to 39.8%. Deutsche Börse's implied shareholder ownership in the combined company ranged from 60.2% to 60.5%.

Selected Transactions Analysis

Perella Weinberg analyzed implied stock price premia from 17 selected precedent merger-of-equal transactions since 2000 with deal values greater than \$5 billion, 100% stock consideration and target pro forma ownership between 40% and 45%. The selected transactions analyzed were the following:

Transaction Announcement	Merger Party whose Shareholders Were to Receive a Minority of the Pro Forma Ownership	Merger Party whose Shareholders Were to Receive a Majority of the Pro Forma Ownership	Minority Merger Party	
			Median 1-day prior premium (%)	Median 1-month prior premium (%)
2/8/11	TMX Group Inc.	London Stock Exchange Group plc	6.0	14.8
5/3/10	Continental Airlines, Inc.	UAL Corporation	1.5	1.8
3/22/09	Petro-Canada Ltd.	Suncor Energy Inc.	33.4	32.7
8/26/06	Sanpaolo IMI SpA	Banca Intesa SpA	(2.0)	17.4
4/2/06	Lucent Technologies Inc.	Alcatel SA	(1.1)	7.4
2/27/06	Gaz de France	Suez	(2.9)	11.4
1/23/04	Union Planters Corporation	Regions Financial Corporation	(2.5)	(10.1)
1/14/04	Bank One Corporation	JP Morgan Chase & Co.	15.1	14.1
9/28/03	John Hancock Financial Services, Inc.	Manulife Financial Corporation	4.2	14.7
4/22/02	Lattice Group plc	National Grid Group plc	6.5	7.8
11/18/01	Conoco, Inc.	Phillips Petroleum Company	(0.3)	(8.4)
3/19/01	Billiton Plc	BHP Ltd.	21.7	16.8
10/15/00	Texaco Inc.	Chevron Corporation	17.7	24.3
3/7/00	Network Solutions, Inc.	VeriSign, Inc.	47.5	118.9
2/21/00	Norwich Union plc	CGU plc	(12.5)	(10.9)
1/17/00	SmithKline Beecham plc	Glaxo Wellcome plc	(2.3)	0.7
1/10/00	Time Warner, Inc.	America Online, Inc.	70.8	77.4

For these selected precedent transactions, the median premium based on stock price one-day prior was 4.2%. For the same selected transactions, the median premium based on stock price one-month prior was 14.1%.

Table of Contents

Although the selected transactions were used for comparison purposes, none of the selected transactions nor the companies involved in them was either identical or directly comparable to the combination of NYSE Euronext or Deutsche Börse.

Relative Contribution Analysis

Perella Weinberg reviewed the relative contribution of NYSE Euronext and Deutsche Börse to the historical and forecasted net revenue, EBITDA and net income of the combined company for the calendar years ending December 31, 2010 and December 31, 2011. Perella Weinberg also reviewed the relative contribution of NYSE Euronext and Deutsche Börse to the combined market capitalization. The calendar year 2011 forecasted net revenue, EBITDA and net income for NYSE Euronext and Deutsche Börse and the forecasted 2010 net revenue, EBITDA and net income of Deutsche Börse were based on third party equity analyst estimates based on U.S. GAAP in the case of NYSE Euronext and IFRS in the case of Deutsche Börse. Perella Weinberg used the February 8, 2011 U.S.-dollar-to-euro conversion rate of 1.367 in calculating the relative contribution analysis and adjusted Deutsche Börse's estimated earnings to exclude certain one-time items. The relative contribution analysis did not give effect to the impact of any synergies as a result of the proposed combination.

The adjusted relative contribution percentages resulting from net revenue, EBITDA, net income and market capitalization were used to determine the implied pro forma ownership percentages of the equity of the combined company for the shareholders of NYSE Euronext and Deutsche Börse. The relative contribution levels for net revenue and EBITDA were adjusted to reflect the market capitalization based contribution of NYSE Euronext and Deutsche Börse, respectively. The results of these analyses are summarized in the following table:

	Implied Shareholder Ownership (%)	
	NYSE Euronext	Deutsche Börse
Net Revenue		
2010*	44	56
2011E	44	56
EBITDA		
2010*	39	61
2011E	41	59
Net Income		
2010*	36	64
2011E	39	61
Market Capitalization	38	62

* NYSE Euronext net revenue, EBITDA and net income for 2010 is actual, and Deutsche Börse net revenue, EBITDA and net income for 2010 is estimated.

Table of Contents*Value Creation Analysis*

Perella Weinberg analyzed the pro forma impact of the combination on the individual market capitalization of NYSE Euronext based on an illustrative range of price to estimated earnings per share multiples for fiscal year 2011 of 12.0x – 14.0x and assuming run rate synergies of approximately \$400 million per annum (taxed at a 26% tax rate) and excluding implementation costs. The illustrative range of price to estimated earnings per share multiples for fiscal year 2011 was based, in part, on the weighted average of the Institutional Brokers Estimate System median estimates, which was 13.0x. In this analysis, Perella Weinberg calculated the implied market capitalization of the combined companies, taking into account the anticipated synergies. The following table illustrates the pro forma increase in the market capitalization of NYSE Euronext, based on its ownership percentage of Holdco and compared to their current individual market capitalization at three illustrative P/E multiples:

	% Increase vs. Current Market Capitalization		
Illustrative 2011E P/E	12.0x	13.0x	14.0x
NYSE Euronext	12%	22%	31%

Miscellaneous

The preparation of a fairness opinion is a complex process and is not necessarily susceptible to partial analysis or summary description. Selecting portions of the analyses or of the summary set forth herein, without considering the analyses or the summary as a whole, could create an incomplete view of the processes underlying Perella Weinberg's opinion. In arriving at its fairness determination, Perella Weinberg considered the results of all of its analyses and did not attribute any particular weight to any factor or analysis. Rather, Perella Weinberg made its determination as to fairness on the basis of its experience and professional judgment after considering the results of all of its analyses. No company or transaction used in the analyses described herein as a comparison is directly comparable to NYSE Euronext, Deutsche Börse or the combination.

Perella Weinberg prepared the analyses described herein for purposes of providing its opinion to the NYSE Euronext board of directors as to the fairness, from a financial point of view, as of the date of such opinion, of merger exchange ratio to the holders of NYSE Euronext shares (other than Deutsche Börse or any affiliate of Deutsche Börse) pursuant to the business combination agreement. These analyses do not purport to be appraisals or necessarily reflect the prices at which businesses or securities actually may be sold. Perella Weinberg's analyses were based in part upon third party research analyst estimates, which are not necessarily indicative of actual future results, which may be significantly more or less favorable than suggested by Perella Weinberg's analyses. Because these analyses are inherently subject to uncertainty, being based upon numerous factors or events beyond the control of the parties to the business combination agreement or their respective advisors, none of NYSE Euronext, Deutsche Börse, Perella Weinberg or any other person assumes responsibility if future results are materially different from those forecasted by third parties.

As described above, the opinion of Perella Weinberg to the NYSE Euronext board of directors was one of many factors taken into consideration by the NYSE Euronext board of directors in making its determination to approve the combination. Perella Weinberg was not asked to, and did not, recommend the specific exchange ratios provided for in the combination (including the merger exchange ratio), which consideration was determined through negotiations between NYSE Euronext and Deutsche Börse.

The NYSE Euronext board of directors selected Perella Weinberg based on Perella Weinberg's qualifications, expertise and reputation and its knowledge of the industries in which NYSE Euronext conducts its business. Perella Weinberg, as part of its investment banking business, is continually engaged in performing financial analyses with respect to businesses and their securities in connection with mergers and acquisitions, leveraged buyouts and other transactions as well as for corporate and other purposes.

Table of Contents

Pursuant to the terms of the engagement letter between Perella Weinberg and NYSE Euronext, NYSE Euronext agreed to pay to Perella Weinberg \$5 million upon the public announcement of the execution of a binding agreement for the combination plus an additional \$22.5 million upon the completion of the combination. In addition, NYSE Euronext agreed to reimburse Perella Weinberg for its reasonable expenses, including attorneys' fees and disbursements and to indemnify Perella Weinberg and related persons against various liabilities, including certain liabilities under the federal securities laws.

In the ordinary course of its business activities, Perella Weinberg or its affiliates may at any time hold long or short positions, and may trade or otherwise effect transactions, for their own account or the accounts of customers or clients, in debt or equity or other securities (or related derivative securities) or financial instruments (including bank loans or other obligations) of NYSE Euronext or Deutsche Börse or any of their respective affiliates. During the two year period prior to the date of Perella Weinberg's opinion, no material relationship existed between Perella Weinberg and its affiliates and NYSE Euronext or Deutsche Börse or any of their respective affiliates pursuant to which compensation was received by Perella Weinberg or its affiliates; however, Perella Weinberg and its affiliates may in the future provide investment banking and other financial services to NYSE Euronext, Deutsche Börse or Holdco and their respective affiliates for which Perella Weinberg and its affiliates would expect to receive compensation.

Opinions of the Financial Advisors to Deutsche Börse

Opinion of Deutsche Bank, Financial Advisor to Deutsche Börse

Deutsche Börse has retained Deutsche Bank AG, DBSI and their affiliates (which are collectively referred to in this document as "Deutsche Bank") as its financial advisor to advise the Deutsche Börse management and supervisory boards in connection with the business combination agreement.

On February 15, 2011, at a meeting of the Deutsche Börse supervisory board held to evaluate the proposed business combination agreement, at which all members of the management board were present, DBSI delivered to the Deutsche Börse management board and supervisory board its oral opinion, which opinion was confirmed by delivery of a written opinion dated February 15, 2011, to the effect that, as of that date and based on and subject to various assumptions made, procedures followed, matters considered and limitations described in the opinion, the exchange ratio of one Holdco share for each Deutsche Börse share tendered by Deutsche Börse shareholders pursuant to the exchange offer contemplated by the business combination agreement was fair, from a financial point of view, to the holders of Deutsche Börse shares.

The DBSI opinion, the full text of which describes the assumptions made, procedures followed, matters considered and limitations on the review undertaken, is included in this document as Annex F. The summary of the DBSI opinion described below is qualified in its entirety by reference to the full text of the opinion.

Opinion of DBSI

Pursuant to an engagement letter dated November 3, 2005, as amended February 10, 2011 and as amended and restated February 11, 2011, Deutsche Bank acted as Deutsche Börse's financial advisor in connection with the business combination agreement. At the meeting on February 15, 2011 of the Deutsche Börse supervisory board, at which all members of the management board were present, DBSI rendered its oral opinion, and subsequently confirmed in writing, that, as of that date and based on and subject to various assumptions made, procedures followed, matters considered and limitations described in the opinion, the Deutsche Börse exchange ratio pursuant to the business combination agreement was fair, from a financial point of view, to the holders of Deutsche Börse shares.

The full text of the written opinion of DBSI, dated February 15, 2011, which sets forth the assumptions made, procedures followed, matters considered and limitations on the review undertaken by DBSI in rendering its opinion, is included as Annex F to this document. Holders of Deutsche Börse shares are encouraged to read the opinion carefully in its entirety. The DBSI opinion does not express an opinion

Table of Contents

or recommendation as to whether any holder of Deutsche Börse shares should tender any Deutsche Börse shares in connection with the exchange offer. The DBSI opinion also does not address the fairness of the combination, or any consideration received in connection therewith, to the holders of any class of securities, creditors or other constituencies of Deutsche Börse or NYSE Euronext (other than the fairness, from a financial point of view, of the Deutsche Börse exchange ratio to the holders of Deutsche Börse shares), nor does it address the fairness of the contemplated benefits of the combination. DBSI's opinion and its financial analyses set forth in this document were prepared for use by the Deutsche Börse management board and the Deutsche Börse supervisory board. They were not prepared for the use of any holders of NYSE Euronext shares and do not constitute a recommendation as to how any holder of NYSE Euronext shares should vote with respect to the merger, the other aspects of the combination or any other matter. The summary of the DBSI opinion set forth in this exchange offer is qualified in its entirety by reference to the full text of the opinion included as Annex F. DBSI's business address is 60 Wall Street, New York, NY 10005, United States of America. DBSI has given its consent to the use of its opinion letter dated February 15, 2011 to the supervisory board and management board of Deutsche Börse, in the form and content as included in this document.

In connection with its role as Deutsche Börse's financial advisor, and in arriving at its opinion, DBSI, among other things:

reviewed certain publicly available financial and other information concerning Deutsche Börse Group and NYSE Euronext;

reviewed projections based on certain publicly available research analysts' financial forecasts endorsed by the respective managements of Deutsche Börse and NYSE Euronext and extrapolations calculated by Deutsche Börse's and NYSE Euronext's financial advisors from such forecasts as directed and endorsed by the respective managements of Deutsche Börse and NYSE Euronext (which are referred to in this summary of DBSI's opinion as "broker projections");

reviewed certain internal analyses and other information relating to Deutsche Börse Group and NYSE Euronext prepared by management of Deutsche Börse and NYSE Euronext, respectively;

held discussions with certain senior officers and other representatives and advisors of Deutsche Börse and NYSE Euronext regarding the businesses and prospects of Deutsche Börse Group and NYSE Euronext, respectively, and of Holdco, Deutsche Börse Group and NYSE Euronext after giving effect to the combination, including certain cost savings, revenue effects, operating synergies, financial synergies and other strategic benefits jointly projected by the managements of Deutsche Börse and NYSE Euronext to result from the combination;

reviewed the reported prices and trading activity for the Deutsche Börse shares and the NYSE Euronext shares;

to the extent publicly available, compared certain financial and stock market information for Deutsche Börse and NYSE Euronext with similar information for certain other companies DBSI considered relevant whose securities are publicly traded;

to the extent publicly available, reviewed the terms and governance arrangements of certain recent business combinations which DBSI deemed relevant;

reviewed a draft dated February 13, 2011 of the business combination agreement; and

performed such other studies and analyses and considered such other factors as DBSI deemed appropriate.

In preparing its opinion, DBSI did not review any financial forecasts or projections prepared by management of Deutsche Börse or NYSE Euronext and, with Deutsche Börse's permission, relied on the broker projections.

A-102

Table of Contents

DBSI did not assume responsibility for independent verification of, and did not independently verify, any information, whether publicly available or furnished to it, concerning Holdco, Deutsche Börse Group or NYSE Euronext, including, without limitation, any financial information considered in connection with the rendering of its opinion. Accordingly, for purposes of its opinion, DBSI, with Deutsche Börse's permission, assumed and relied upon the accuracy and completeness of all such information. DBSI did not conduct a physical inspection of any of the properties or assets, and did not prepare or obtain any independent evaluation or appraisal of any of the assets or liabilities (including any contingent, derivative or off-balance-sheet assets and liabilities), of Holdco, Deutsche Börse Group, NYSE Euronext or any of their respective subsidiaries, nor did DBSI evaluate the solvency or fair value of Holdco, Deutsche Börse or NYSE Euronext under any applicable law relating to bankruptcy, insolvency or similar matters. With respect to the broker projections, and the analyses and forecasts of the amount and timing of the synergies as well as potential incremental expenses arising out of the combination, and the pro forma combined Holdco financial and operating information, in each case made available to DBSI or used in its analyses, DBSI assumed with Deutsche Börse's permission that they had been reasonably prepared and reflect the best currently available estimates and judgments of the management of Deutsche Börse and NYSE Euronext as to the matters covered thereby and with respect to the broker projections and other information relating to NYSE Euronext, DBSI relied on such broker projections and other information at the direction of Deutsche Börse. In rendering its opinion, DBSI expressed no view as to the reasonableness of such forecasts and projections, including, without limitation, the synergies, or the assumptions on which they were based.

For purposes of rendering its opinion, DBSI assumed with Deutsche Börse's permission that, in all respects material to its analysis, the representations and warranties of Holdco, Deutsche Börse and NYSE Euronext contained in the business combination agreement were true and correct. Additionally, DBSI assumed, with Deutsche Börse's permission that, in all respects material to its analysis, the combination will be consummated in accordance with the terms of the business combination agreement, without any material waiver, modification or amendment of any term, condition or agreement and that Holdco, Deutsche Börse, NYSE Euronext and Pomme Merger Corporation will each perform all of the covenants and agreements to be performed by it under the business combination agreement and that the announcement and consummation of the combination will not result in the loss by either Deutsche Börse or NYSE Euronext of any of their material relationships with their respective clients, customers or suppliers. In addition, DBSI assumed that all of the Deutsche Börse shares will be acquired by Holdco pursuant to the exchange offer or otherwise on a timely basis at the Deutsche Börse exchange ratio without any adverse costs or other adverse impact on Holdco or the Holdco shares, including any adverse impact on the timing or amount of the synergies to be realized by Holdco, Deutsche Börse or NYSE Euronext as a result of the combination. DBSI also assumed that all material governmental, regulatory or other approvals and consents required in connection with the completion of the combination will be obtained and that in connection with obtaining any necessary governmental, regulatory, contractual or other approvals and consents, no material restrictions will be imposed. In addition, Deutsche Börse informed DBSI, and accordingly for purposes of rendering its opinion, DBSI assumed, that the combination will be tax free to Holdco, Deutsche Börse, NYSE Euronext, the holders of Deutsche Börse shares and the holders of NYSE Euronext shares. DBSI is not a legal, regulatory, tax or accounting expert and relied on the assessments made by Deutsche Börse and its advisors with respect to such issues. Representatives of Deutsche Börse informed DBSI, and DBSI further assumed, that the final terms of the business combination agreement would not differ materially from the terms set forth in the draft business combination agreement dated February 13, 2011 which was reviewed by DBSI.

The DBSI opinion was approved and authorized for issuance by a fairness opinion review committee, was addressed to, and for the use and benefit of, the Deutsche Börse management and supervisory boards and is not a recommendation to the holders of the Deutsche Börse shares to tender any Deutsche Börse shares in connection with the exchange offer. The opinion was limited to the fairness, from a financial point of view, of the Deutsche Börse exchange ratio to the holders of the Deutsche Börse shares, was subject to the assumptions, limitations, qualifications and other conditions contained therein and was necessarily based on the economic, market and other conditions, and information made available to DBSI, as of the date of DBSI's written opinion. Deutsche Börse did not ask DBSI to, and its opinion did not, address the fairness of the combination, or any consideration

Table of Contents

received in connection therewith, to the holders of any class of securities, creditors or other constituencies of Deutsche Börse or NYSE Euronext (other than the fairness, from a financial point of view, of the Deutsche Börse exchange ratio to the holders of Deutsche Börse shares), nor did it address the fairness of the contemplated benefits of the combination. DBSI disclaimed any undertaking or obligation to advise any person of any change in any fact or matter affecting its opinion of which DBSI became aware after the date of DBSI's written opinion. DBSI expressed no opinion as to the merits of the underlying decision by Deutsche Börse to engage in the combination. DBSI did not express any view or opinion as to the fairness, financial or otherwise, of the amount or nature of any compensation payable to or to be received by any of the officers, directors, or employees of any parties to the combination, or any class of such persons, relative to the Deutsche Börse exchange ratio. DBSI's opinion did not in any manner address the prices at which Holdco shares or other Holdco securities or the Deutsche Börse shares or other Deutsche Börse securities will trade following the announcement or completion of the combination.

During the two years preceding the date of DBSI's written opinion, Deutsche Bank, from time to time, provided investment banking, commercial banking (including extension of credit) and other financial services to Deutsche Börse and NYSE Euronext and their respective affiliates for which it received compensation, including (1) Deutsche Bank served as the financial advisor to Deutsche Börse in connection with its agreement with SIX Group to increase its holding in STOXX Ltd to a controlling stake, (2) Deutsche Bank served as a lead arranger and bookrunner in connection with the extension of the \$1.0 billion credit facility of Deutsche Börse and Clearstream Banking S.A., an affiliate of Deutsche Börse, and (3) Deutsche Bank served as a participant in connection with the \$3.0 billion credit facility of Clearstream Banking S.A. Deutsche Bank may also provide investment and commercial banking services to Holdco, Deutsche Börse and NYSE Euronext in the future, for which Deutsche Bank would expect to receive compensation. In the ordinary course of business, members of Deutsche Bank may actively trade in the securities and other instruments and obligations of Holdco, Deutsche Börse and NYSE Euronext for their own accounts and for the accounts of their customers. Accordingly, Deutsche Bank may at any time hold a long or short position in such securities, instruments and obligations.

The Deutsche Börse management and supervisory boards engaged Deutsche Bank as a financial advisor because it is an internationally recognized investment banking firm that has substantial experience in transactions similar to the combination. Pursuant to its engagement letter with Deutsche Börse, Deutsche Bank will be paid a fee for its services as financial advisor to Deutsche Börse in connection with the combination in the amount of approximately 14 million contingent upon completion of the combination. In the event that the combination is not completed, Deutsche Bank will be paid a retainer of 200,000 per month for services rendered since January 2011 for a maximum of 12 months. Deutsche Börse also agreed to reimburse Deutsche Bank for its expenses, and to indemnify Deutsche Bank and its affiliates against certain liabilities, in connection with its engagement.

Summary of Material Financial Analyses

The following is a summary of the material financial analyses contained in the presentation that was made by DBSI at the meeting of the Deutsche Börse supervisory board on February 15, 2011, at which all members of the management board were present, and that were used by DBSI in connection with rendering its opinion described above. The following summary, however, does not purport to be a complete description of the financial analyses performed by DBSI, nor does the order of analyses described represent relative importance or weight given to those analyses by DBSI. Some of the summaries of the financial analyses include information presented in tabular format. The tables must be read together with the full text of each summary and are alone not a complete description of DBSI's financial analyses. Except as otherwise noted, the following quantitative information, to the extent that it is based on market data, is based on market data as it existed on or before February 8, 2011 (the last trading day prior to the day on which Deutsche Börse and NYSE Euronext publicly confirmed that they were engaged in advanced discussions regarding a potential business combination (which date is referred to in this summary of DBSI's material financial analyses as the reference date)), and is not necessarily indicative of current market conditions.

Table of Contents*Analysis of Premia.*

Based on an exchange ratio of 0.4700 Holdco shares to be issued in exchange for one NYSE Euronext share (which is referred to in this document as the NYSE Euronext exchange ratio), Deutsche Bank calculated the premium to be paid in the combination compared to (1) the ratios implied by dividing the closing price per share of NYSE Euronext by the closing price per share of Deutsche Börse (converted from euros to U.S. dollars at the prevailing exchange rate on each respective date) on each of February 11, 2011 (the last trading day before the analysis was finalized in the form presented to the Deutsche Börse management and supervisory boards) and the reference date, (2) the ratios obtained by averaging the ratios implied by dividing the closing price per share of NYSE Euronext by the closing price per share of Deutsche Börse (converted from euros to U.S. dollars at the prevailing exchange rate on each respective date) for each trading day during the one-month period and three-month periods ending as of the reference date and (3) the highest of the ratios obtained by dividing the closing price per share of NYSE Euronext by the closing price per share of Deutsche Börse (converted from euros to U.S. dollars at the prevailing exchange rate on each respective date) for each trading day during the 52 weeks prior to the reference date.

This analysis indicated the following:

Date / Period	Premium (Discount) Implied by NYSE Euronext Exchange Ratio (%)
February 11, 2011	2
Reference date	11
1-month average prior to the reference date	10
3-month average prior to the reference date	8
52-week high prior to the reference date	(1)

Historical Share Price Analysis. DBSI reviewed and analyzed the recent share price performance of NYSE Euronext s shares (denominated in both U.S. dollars and euros converted at the daily euro-to-U.S. dollar exchange rates over the periods analyzed (which is referred to in this summary of the DBSI opinion as rolling FX)), as well as the recent share price performance of Deutsche Börse s shares. The following table sets forth the historical share price performance of Deutsche Börse and NYSE Euronext:

	Deutsche Börse	NYSE Euronext	NYSE Euronext
Reference date:	57.45	\$ 33.41	24.42
1-month	8%	8%	2%
3-month	14%	10%	12%
6-month	6%	8%	5%
1-year	25%	48%	49%
2-year	40%	54%	47%
3-year	(50%)	(52%)	(49%)
February 11, 2011:	61.62	\$ 38.31	28.27
Performance from the reference date to February 11, 2011:	7%	15%	16%

Table of Contents

DBSI then reviewed and analyzed the average multiples of the price per share to next twelve months estimated earnings per share (which is referred to in this summary of the DBSI opinion as NTM P/E) over historical time periods. DBSI's analysis revealed the following:

Period ending on the Reference Date	Average NTM P/E	
	Deutsche Börse	NYSE Euronext
1-month	13.3x	14.4x
3-month	12.4x	13.4x
6-month	12.3x	13.2x
1-year	12.8x	12.8x
2-year	12.7x	12.5x
3-year	12.8x	13.0x

DBSI also calculated and reviewed the historical exchange ratios implied by dividing the daily closing prices of NYSE Euronext shares by the corresponding prices of Deutsche Börse shares over certain periods prior to the reference date, using both a fixed euro to U.S. dollar exchange rate of 0.73, as of the reference date, and rolling FX. The results of this analysis are as follows:

Date / Period Ending on the Reference Date	Fixed Euro/U.S. Dollar of	Rolling FX
	0.73	
Reference date	0.4251	0.4251
1-month	0.4223	0.4280
3-month	0.4265	0.4363
6-month	0.4271	0.4373
1-year	0.4139	0.4297
2-year	0.3828	0.3851
3-year	0.4004	0.3920

Trading Range Analysis. DBSI reviewed the 52-week range of Deutsche Börse's shares and NYSE Euronext's shares measured as of the reference date. DBSI found that the price per share of Deutsche Börse's shares over that period ranged from 46 to 59. DBSI found that the price per share of NYSE Euronext's shares over that period ranged from \$24 and \$34 (or 17 and 25, based on a euro to U.S. dollar exchange rate of 0.73 as of the reference date). Based on the foregoing and the Deutsche Börse exchange ratio, DBSI calculated an implied exchange ratio range of 0.2953 to 0.5431 shares of Holdco to be issued in exchange for one NYSE Euronext share. DBSI noted that the NYSE Euronext exchange ratio of 0.4700 fell within that range.

Selected Publicly Traded Companies Analysis. DBSI reviewed and compared the price per share divided by estimated EPS for calendar year 2011 (which is referred to in this summary of the DBSI opinion as 2011E P/E) and the total enterprise value divided by estimated earnings before interest, taxes, depreciation and amortization expenses (which is referred to in this summary of the DBSI opinion as EBITDA) for calendar year 2011 (which is referred to in this summary of the DBSI opinion as 2011E TEV/EBITDA) multiples for Deutsche Börse and NYSE Euronext as of the reference date to the corresponding multiples for the following publicly traded companies that operate cash, derivatives or emerging markets exchanges:

Cash Exchanges

TMX Group Inc.

London Stock Exchange Group plc

The Nasdaq Stock Market, Inc.

Derivatives Exchanges

Intercontinental Exchange, Inc.

A-106

Table of Contents

CME Group Inc.

Chicago Board Options Exchange, Inc.

Emerging Markets Exchanges

Hong Kong Exchanges and Clearing Ltd.

Bursa Malaysia Berhad

Singapore Exchange Ltd.

Bolsa de Valores, Mercadorias & Futuros de São Paulo (BM&F)

Although none of the selected companies is directly comparable to Deutsche Börse or NYSE Euronext, the companies included were chosen because they are publicly traded companies with operations that for purposes of analysis may be considered similar to certain operations of Deutsche Börse Group and NYSE Euronext.

DBSI found that the selected companies operating cash exchanges, derivative exchanges and emerging markets exchanges had median implied 2011E P/E multiples of 12.4x, 18.1x and 26.0x, and median implied 2011E TEV/EBITDA multiples of 8.6x, 9.5x and 15.9x, respectively.

DBSI also reviewed and analyzed 2011E P/E and 2011E TEV/EBITDA for Deutsche Börse and NYSE Euronext based on 2011 EPS and EBITDA derived from the broker projections. DBSI found that the 2011E P/E for Deutsche Börse was 13.4x and the 2011E P/E for NYSE Euronext was 13.0x as of the reference date. Furthermore, DBSI found that the 2011E TEV/EBITDA for Deutsche Börse was 8.9x and the 2011E TEV/EBITDA for NYSE Euronext was 8.3x as of the reference date.

From this analysis DBSI selected a 2011E P/E valuation multiple range for Deutsche Börse of 12.0x – 14.0x and a 2011E P/E range for NYSE Euronext of 12.0x – 14.0x which implied a value per Deutsche Börse share range of \$51 – \$60 and a value per NYSE Euronext share range of \$31 – \$36 (or \$23 – \$26, based on a euro to U.S. dollar conversion rate of 0.73 as of the reference date). DBSI calculated an implied exchange ratio range of 0.3775 to 0.5138. DBSI noted that the NYSE Euronext exchange ratio falls within that range.

In addition, DBSI selected a 2011E TEV/EBITDA valuation multiple range for Deutsche Börse of 8.0x – 10.0x and a 2011E TEV/EBITDA range for NYSE Euronext of 8.0x – 10.0x which implied a value per Deutsche Börse share range of \$51 – \$65 and a value per NYSE Euronext share range of \$32 – \$42 (or \$23 – \$30, based on a euro to U.S. dollar exchange rate of 0.73 as of the reference date). From those price per share ranges and using the Deutsche Börse exchange ratio, DBSI calculated an implied exchange ratio range of 0.3568 to 0.5993 for each NYSE Euronext share. DBSI noted that the NYSE Euronext exchange ratio falls within that range.

Discounted Cash Flow Analysis. DBSI performed a discounted cash flow analysis to determine a range of implied present values per Deutsche Börse share based on projected unlevered free cash flows for Deutsche Börse on a stand-alone basis for the years ending December 31, 2011 through 2015, using the broker projections, including a financial estimate for the period from 2011 to 2015, which was derived from various equity analyst estimates, and input from the Deutsche Börse management and was prepared on behalf of Deutsche Börse and provided by or on behalf of Deutsche Börse to DBSI. The analysis was based on a range of discount rates from 9.5% to 10.5% and a range of terminal year perpetuity growth rates from 2% to 3%. DBSI selected the discount rates used in this analysis (and those used in the analysis under Synergies Analysis and Pro Forma Value Accretion/Dilution Analysis described below) on the basis of its professional judgment of the reasonable estimated weighted average cost of capital of Deutsche Börse and NYSE Euronext's businesses derived based on certain financial metrics, including betas, for Deutsche Börse, NYSE Euronext and selected companies (which companies are set forth under Selected Publicly Traded Companies Analysis). This analysis resulted in a range of implied present values of approximately \$63 to \$81 per Deutsche Börse share.

Table of Contents

DBSI also performed a discounted cash flow analysis to determine a range of implied present values per NYSE Euronext share based on projected unlevered free cash flows for NYSE Euronext on a stand-alone basis for the years ending December 31, 2011 through 2015, using the broker projections, including a financial estimate for the period of 2011 to 2012, which was derived from a specific equity analyst estimate and was prepared on behalf of NYSE Euronext, plus a three-year extension of such estimate for the period from 2013 to 2015 extrapolated on behalf of NYSE Euronext, which five-year extended estimate was reviewed and endorsed by the managements of NYSE Euronext and Deutsche Börse and provided to DBSI by or on behalf of Deutsche Börse. The analysis was based on a range of discount rates from 10% to 11% and a range of terminal year perpetuity growth rates from 2.5% to 3.5%. This analysis resulted in a range of implied present values of approximately \$34 to \$45 per NYSE Euronext share (or 25 to 33 based on a euro to U.S. dollar conversion rate of 0.73 as of the reference date).

Based on the discounted cash flow analysis described above and the Deutsche Börse exchange ratio, DBSI calculated the range of implied exchange ratios of 0.3088 Holdco shares per NYSE Euronext shares to 0.5242 Holdco shares per NYSE Euronext share. DBSI noted that the NYSE Euronext exchange ratio falls within that range.

Contribution Analysis. DBSI analyzed and compared Deutsche Börse and NYSE Euronext shareholders' respective expected percentage ownership of the combined company to Deutsche Börse's and NYSE Euronext's respective contributions to the combined company based upon EBITDA and net income for each company on a stand-alone basis for the years from 2009 through 2012 derived from publicly available information and the broker projections, as well as the book value of equity as of December 31, 2010, market capitalization and enterprise value of each company as of the reference date. This analysis indicated that the contribution of NYSE Euronext to the combined company using each of the metrics referred to above ranged from 35% to 40%, except for book value of equity which was 63%. DBSI noted that the implied equity ownership of NYSE Euronext shareholders in the combined company based on the exchange ratio of 0.47 Holdco shares to be issued in the combination for each NYSE Euronext share represented 40%.

DBSI noted that a contribution analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

Synergies Analysis. DBSI performed a discounted cash flow analysis to determine a range of present values of the synergies, including implementation and restructuring costs. The synergies were jointly provided by Deutsche Börse management and NYSE Euronext management. The analysis was based on a range of discount rates from 9.75% to 10.75% and perpetuity growth rates from 1.5% to 2.5%. This analysis resulted in a range of present values of the potential net synergies to be realized from the combination of approximately 2.3 billion to 3.0 billion. DBSI noted that, at the Deutsche Börse exchange ratio and NYSE Euronext exchange ratio, the value of these synergies will be shared between the holders of Deutsche Börse shares and NYSE Euronext shares in the ratio of 60:40.

DBSI noted that a synergies analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

Pro Forma Earnings Accretion/Dilution. DBSI analyzed the potential pro forma impact of the combination on Deutsche Börse's estimated EPS for fiscal years 2012 through 2015 both on an IFRS basis, referred to below as "IFRS EPS", and on an IFRS basis adjusted for the after-tax effect of estimated acquired intangibles amortization, referred to below as "Cash EPS", in each case assuming one of the following scenarios: (1) including phased-in synergies and implementation and restructuring costs, which were jointly provided by Deutsche Börse management and NYSE Euronext management, (2) including phased-in synergies and excluding implementation and restructuring costs and (3) including full run-rate synergies and excluding implementation and restructuring costs. In this analysis, earnings estimates for Deutsche Börse and NYSE Euronext were based on broker projections. The synergies estimates were jointly provided by Deutsche Börse management and NYSE

Table of Contents

Euronext management. This analysis, using the assumptions set forth in clause (1) above, indicated that the combination would be accretive to holders of Deutsche Börse shares beginning in fiscal year 2014 on both an IFRS EPS and on a Cash EPS basis. Under the scenarios set forth in clauses (2) and (3) above, this analysis indicated that the combination would be accretive to holders of Deutsche Börse shares in fiscal years 2012, 2013, 2014 and 2015 on both an IFRS EPS and on a Cash EPS basis.

DBSI noted that a pro forma analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

Pro Forma Value Accretion/Dilution Analysis. DBSI analyzed certain pro forma effects on the equity value per Deutsche Börse share expected to result from the combination, including (1) the expected synergies that may be achieved by the combined company and (2) the expected cost of achieving such synergies. The analysis was based on both the Deutsche Börse exchange ratio and the NYSE Euronext exchange ratio, on broker projections and on estimates jointly provided by Deutsche Börse management and NYSE Euronext management for synergies.

DBSI performed the value accretion/dilution analysis utilizing both a discounted cash flow analysis and a trading multiples-based valuation in order to illustrate value accretion or dilution to Deutsche Börse shareholders based on Deutsche Börse's share of the pro forma value of the combined company as compared to the standalone value of Deutsche Börse.

Discounted cash flow-based intrinsic value analysis. Based on mid-point assumptions of a 2.5% perpetuity growth rate and a 10% discount rate for Deutsche Börse, a 3.0% perpetuity growth rate and a 10.5% discount rate for NYSE Euronext and a 2.0% perpetuity growth rate and 10.25% discount rate for synergies, DBSI used a discounted cash flows analysis to calculate a pro forma equity value of the combined company of 23.4 billion implying total value accretion of 0.8 billion (which equals an accretion of 4 or 6% per Deutsche Börse share) in the combination relative to Deutsche Börse's discounted cash flow value in the absence of the combination.

Trading multiples based value analysis. Based on estimated 2015 run-rate synergies provided by management valued at a blended 2011E P/E multiple of 13.3x and discounted at a 10.25% discount rate, DBSI calculated a pro forma equity value of 19.5 billion and total value accretion of 1.0 billion (which equals an accretion of 5 or 9% per Deutsche Börse share) in the combination relative to Deutsche Börse's standalone equity value.

DBSI noted that a pro forma analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

General

The preparation of a fairness opinion is a complex process and is not necessarily susceptible to partial analysis or summary description. Selecting portions of the analyses or of the summary set forth above, without considering the analyses as a whole, could create an incomplete view of the processes underlying DBSI's opinion. In arriving at its fairness determination, DBSI considered the results of all of its analyses and did not attribute any particular weight to any factor or analysis considered by it. Rather, DBSI made its determination as to fairness on the basis of experience and professional judgment after considering the results of all of its analyses. No other company or combination used in the above analyses as a comparison is directly comparable to Deutsche Börse or NYSE Euronext.

DBSI prepared these analyses for purposes of providing its opinion to the Deutsche Börse management and supervisory boards as to the fairness to holders of Deutsche Börse shares from a financial point of view of the Deutsche Börse exchange ratio. These analyses do not purport to be appraisals nor do they necessarily reflect the prices at which businesses or securities actually may be sold. Analyses based upon forecasts of future results, including the broker projections and estimates of the synergies, are not necessarily indicative of actual future

Table of Contents

results, which may be significantly more or less favorable than suggested by these analyses. Because these analyses are inherently subject to uncertainty, being based upon numerous factors or events beyond the control of the parties or their respective advisors, none of Deutsche Börse, NYSE Euronext, DBSI or any other person assumes responsibility if future results are materially different from those forecast.

The Deutsche Börse exchange ratio and NYSE Euronext exchange ratio were determined through arm's-length negotiations between Deutsche Börse and NYSE Euronext and were approved by the Deutsche Börse management and supervisory boards. Deutsche Bank provided advice to Deutsche Börse during these negotiations. Deutsche Bank did not, however, recommend any specific exchange ratio to Deutsche Börse or its management and supervisory boards or that any specific exchange ratio constituted the only appropriate exchange ratio for the exchange offer.

As described above, the opinion of DBSI to the Deutsche Börse management and supervisory boards was one of a number of factors taken into consideration by the Deutsche Börse management and supervisory boards in making their determination to approve the business combination agreement and the transactions contemplated thereby. The foregoing summary does not purport to be a complete description of the analyses performed by DBSI in connection with its fairness opinions and is qualified in its entirety by reference to the written opinion of DBSI included as Annex F.

Opinion of J.P. Morgan Securities LLC, Financial Advisor to Deutsche Börse

Deutsche Börse retained J.P. Morgan as its financial advisor for the purpose of advising Deutsche Börse in connection with the combination and to discuss whether the exchange ratio in the exchange offer was fair, from a financial point of view, to the holders of Deutsche Börse shares (other than Deutsche Börse). At the meeting of the supervisory board of Deutsche Börse on February 15, 2011, at which all members of the management board were present, J.P. Morgan rendered its oral opinion, subsequently confirmed in writing on the same day, to the management board and the supervisory board of Deutsche Börse that, as of such date and based upon and subject to the various factors, assumptions and limitations set forth in its written opinion, the exchange ratio of one Holdco share for each Deutsche Börse share in the exchange offer, which is referred to herein as the exchange ratio, was fair, from a financial point of view, to the holders of Deutsche Börse shares (other than Deutsche Börse). No limitations were imposed by Deutsche Börse's management board or supervisory board upon J.P. Morgan with respect to the investigations made or procedures followed by it in rendering its opinion.

The full text of the written opinion of J.P. Morgan, dated February 15, 2011, which sets forth, among other things, the assumptions made, procedures followed, matters considered and limitations on the review undertaken in rendering its opinion, is attached as Annex G. The summary of J.P. Morgan's opinion set forth in this document is qualified in its entirety by reference to the full text of the opinion. Holders of Deutsche Börse shares are urged to read J.P. Morgan's opinion carefully and in its entirety. J.P. Morgan's opinion is directed to the management board and the supervisory board of Deutsche Börse, addresses only the fairness, from a financial point of view, of the exchange ratio to the holders of Deutsche Börse shares (other than Deutsche Börse) pursuant to the business combination agreement as of the date of the opinion, and does not address any other aspect of the combination and the other transactions contemplated by the business combination agreement, which are collectively referred to herein as the transaction. The issuance of the J.P. Morgan opinion was approved by a fairness opinion committee of J.P. Morgan. J.P. Morgan provided its advisory services and opinion for the information and assistance of the management board and the supervisory board of Deutsche Börse in connection with their consideration of the proposed combination. The opinion of J.P. Morgan does not constitute a recommendation to any holder of Deutsche Börse shares as to whether such holder should tender its Deutsche Börse shares in the exchange offer or how such holder should vote with respect to the transaction or any other matter if such vote is required. In addition, J.P. Morgan's opinion does not in any manner address the prices at which Deutsche Börse shares, NYSE Euronext shares or Holdco shares will trade following the date of the opinion. The opinion and advice provided by J.P. Morgan is not and should not be considered a value opinion as is customarily

Table of Contents

rendered by qualified auditors based on the requirements of German corporate law (*e.g.*, in connection with a mandatory buy-out of Deutsche Börse shares or entering into a domination agreement and/or a profit and loss transfer agreement), nor has J.P. Morgan expressed any opinion as to the compensation which may be payable to holders of Deutsche Börse shares in connection with such a mandatory buy-out of their Deutsche Börse shares or in connection with entering into a domination agreement and/or a profit and loss transfer agreement. J.P. Morgan's opinion and its financial analyses set forth in this document were prepared for use by the Deutsche Börse management board and the Deutsche Börse supervisory board. They were not prepared for the use of any holders of NYSE Euronext shares and do not constitute a recommendation as to how any holder of NYSE Euronext shares should vote with respect to the merger, the other aspects of the transaction or any other matter. J.P. Morgan's business address is 383 Madison Avenue, New York, NY 10179, United States of America. J.P. Morgan has given its consent to the use of its opinion letter dated February 15, 2011 to the management board and supervisory board of Deutsche Börse, in the form and content as included in this document.

In arriving at its opinion, J.P. Morgan, among other things:

reviewed a draft dated February 14, 2011, of the business combination agreement;

reviewed certain publicly available business and financial information concerning Deutsche Börse Group and NYSE Euronext and the industries in which they operate;

compared the financial and operating performance of Deutsche Börse Group and NYSE Euronext with publicly available information concerning certain other companies J.P. Morgan deemed relevant and reviewed the current and historical market prices of the Deutsche Börse shares and the NYSE Euronext shares and certain publicly traded securities of such other companies;

at the direction of the management of Deutsche Börse, reviewed certain financial analyses and forecasts relating to Deutsche Börse Group's and NYSE Euronext's respective businesses provided to J.P. Morgan by or on behalf of the management of Deutsche Börse, which were prepared at the direction of the managements of Deutsche Börse and NYSE Euronext and which were derived from certain publicly available research analyst estimates and guidance, and extrapolated therefrom by Deutsche Börse's and NYSE Euronext's financial advisors, as directed and endorsed by such managements;

at the direction of the management of Deutsche Börse, reviewed the estimated amount and timing of the cost savings and the related expense and revenue and other synergies expected to result from the transaction, which are referred to in this document as the synergies; and

performed such other financial studies and analyses and considered such other information as J.P. Morgan deemed appropriate for the purposes of its opinion.

J.P. Morgan also held discussions with certain members of the management of Deutsche Börse and NYSE Euronext with respect to certain aspects of the transaction, and the past and current business operations of Deutsche Börse Group and NYSE Euronext, the financial condition and future prospects and operations of Deutsche Börse Group and NYSE Euronext, the effects of the transaction on the financial condition and future prospects of Deutsche Börse Group and NYSE Euronext, and certain other matters J.P. Morgan believed necessary or appropriate to its inquiry.

In giving its opinion, J.P. Morgan relied upon and assumed the accuracy and completeness of all information that was publicly available or was furnished to or discussed with J.P. Morgan by Deutsche Börse and NYSE Euronext or otherwise reviewed by or for J.P. Morgan, and J.P. Morgan did not independently verify (nor did J.P. Morgan assume responsibility or liability for independently verifying) any such information or its accuracy or completeness. J.P. Morgan did not conduct and was not provided with any valuation or appraisal of any assets or liabilities, nor did J.P. Morgan evaluate the solvency of Deutsche Börse or NYSE Euronext under any state, federal or foreign laws relating to bankruptcy, insolvency or similar matters. In connection with its analysis, J.P. Morgan was directed by the management of Deutsche Börse to utilize the financial analyses and

A-111

Table of Contents

forecasts relating to Deutsche Börse Group's and NYSE Euronext's respective businesses derived and extrapolated from certain publicly available research analyst estimates and guidance as referred to above, and J.P. Morgan did not receive any internal management forecasts from either Deutsche Börse or NYSE Euronext other than with respect to the synergies. Also in connection with its analysis, J.P. Morgan was directed by the management of Deutsche Börse to utilize the synergies provided to J.P. Morgan by the management of Deutsche Börse. In relying on such financial analyses and forecasts, including the synergies, J.P. Morgan was advised by the management of Deutsche Börse and J.P. Morgan has assumed, at the direction of Deutsche Börse, that they reflect the best currently available estimates as to the expected future results of operations and financial condition of Deutsche Börse Group and NYSE Euronext to which such analyses or forecasts relate and are a reasonable basis on which to evaluate the expected future results of operations and financial condition of Deutsche Börse Group and NYSE Euronext to which such forecasts and estimates relate. J.P. Morgan expresses no view as to such analyses or forecasts (including the synergies) or the assumptions on which they were based, and J.P. Morgan has assumed, with the approval of Deutsche Börse, that the synergies will be achieved at the times and in the amounts projected in all respects material to J.P. Morgan's analysis.

J.P. Morgan also assumed in all respects material to its analysis that (1) all of Deutsche Börse shares will be acquired by Holdco pursuant to the exchange offer or otherwise on a timely basis at the exchange ratio and that the post-closing reorganization (as such term is defined in the business combination agreement) will be successfully completed on a timely basis without any adverse cost or other adverse impact on Holdco or the holders of Holdco shares, including any adverse impact on the timing or amount of the synergies to be realized by Holdco and/or its subsidiaries as a result of the transaction, (2) the transaction will be consummated as described in the business combination agreement and without any waiver of any of the conditions thereof, and (3) the definitive business combination agreement will not differ in any material respects from the draft thereof furnished to J.P. Morgan. J.P. Morgan also assumed that the transaction will qualify as a tax-free reorganization to Deutsche Börse and the holders of Deutsche Börse shares for United States federal and German tax purposes, in each case, as contemplated by the business combination agreement. J.P. Morgan also assumed that the representations and warranties made by Deutsche Börse, NYSE Euronext, Holdco and Pomme Merger Corporation in the business combination agreement and the related agreements are and will be true and correct in all respects material to J.P. Morgan's analysis. J.P. Morgan is not a legal, regulatory or tax expert and has relied on the assessments made by Deutsche Börse and its advisors with respect to such issues. J.P. Morgan further assumed that all material governmental, regulatory or other consents and approvals necessary for the consummation of the transaction will be obtained without any adverse effect on Deutsche Börse Group, NYSE Euronext or Holdco or on the contemplated benefits of the transaction.

J.P. Morgan's opinion is necessarily based on economic, market and other conditions as in effect on, and the information made available to J.P. Morgan as of, the date of such opinion. Subsequent developments may affect J.P. Morgan's opinion and J.P. Morgan does not have any obligation to update, revise or reaffirm such opinion. J.P. Morgan's opinion is limited to the fairness, from a financial point of view, to the holders of Deutsche Börse shares (other than Deutsche Börse) of the exchange ratio in the exchange offer and J.P. Morgan expresses no opinion as to the fairness of the transaction (including the exchange offer or the merger) for any person or entity, or of any consideration to be received by, the holders of any other class of securities, creditors or other constituencies of Deutsche Börse or the holders of any class of securities, creditors or other constituencies of NYSE Euronext, or as to the underlying decision by Deutsche Börse to engage in the transaction. Furthermore, J.P. Morgan has expressed no opinion with respect to the amount or nature of any compensation to any officers, directors or employees of any party to the transaction, or any class of such persons relative to the exchange ratio applicable to the holders of Deutsche Börse shares in the exchange offer or with respect to the fairness of any such compensation. J.P. Morgan has expressed no opinion as to the price at which Deutsche Börse shares, the NYSE Euronext shares or the Holdco shares will trade at any future time.

J.P. Morgan's opinion notes that it was not authorized to and did not solicit any expressions of interest from any other parties with respect to any other merger, sale or other business combination involving any part of Deutsche Börse Group.

Table of Contents

The terms of the business combination agreement, including the exchange ratio, were determined through arm's length negotiations between Deutsche Börse and NYSE Euronext, and the decision to enter into the business combination agreement was solely that of the management board and supervisory board of Deutsche Börse and the board of directors of NYSE Euronext. J.P. Morgan's opinion and financial analyses were among the many factors considered by Deutsche Börse in its evaluation of the transaction and should not be viewed as determinative of the views of the Deutsche Börse management board, supervisory board or management with respect to the transaction or the exchange ratio.

In accordance with customary investment banking practice, J.P. Morgan employed generally accepted valuation methods in reaching its opinion. The following is a summary of the material financial analyses undertaken by J.P. Morgan in connection with rendering its opinion and delivered to the management board and supervisory board of Deutsche Börse on February 14, 2011 and February 15, 2011, respectively, at which all members of the management board were present. Some of the summaries of the financial analyses include information presented in tabular format. The tables are not intended to stand alone, and in order to more fully understand the financial analyses used by J.P. Morgan, the tables must be read together with the full text of each summary. Considering the data set forth below without considering the full narrative description of the financial analyses, including the methodologies and assumptions underlying the analyses, could create a misleading or incomplete view of J.P. Morgan's analyses.

Estimates

In performing its analysis of Deutsche Börse, J.P. Morgan relied upon a financial estimate for the period from 2011 to 2015, which was derived from various equity analyst estimates, and input from the Deutsche Börse management and was prepared on behalf of Deutsche Börse and provided by or on behalf of Deutsche Börse to J.P. Morgan, plus a five-year extension of such estimate for the period from 2016 to 2020 extrapolated as directed by Deutsche Börse by assuming a steady-state environment based on steady-state operating assumptions, which ten-year extended estimate was reviewed and endorsed by the management of Deutsche Börse. Such estimate, as extrapolated, is referred to in this document as the Deutsche Börse case. In performing its analysis of NYSE Euronext, J.P. Morgan relied upon (1) a financial estimate for the period of 2011 to 2012, which was derived from a specific equity analyst estimate and was prepared on behalf of NYSE Euronext, plus a three-year extension of such estimate for the period from 2013 to 2015 extrapolated on behalf of NYSE Euronext, which five-year extended estimate was reviewed and endorsed by the managements of NYSE Euronext and Deutsche Börse and provided to J.P. Morgan by or on behalf of Deutsche Börse and (2) a further five-year extension of such extended estimate for the period from 2016 to 2020 extrapolated as directed by Deutsche Börse by assuming a steady-state environment based on steady-state operating assumptions, which was reviewed and endorsed by the management of Deutsche Börse. Such estimate, as extrapolated, is referred to in this document as the NYSE Euronext case.

The estimates furnished to J.P. Morgan for Deutsche Börse and NYSE Euronext or extrapolated therefrom were prepared in connection with the proposed transaction and were derived and extrapolated from certain publicly available research analyst estimates and guidance. J.P. Morgan was advised by Deutsche Börse and J.P. Morgan has assumed at Deutsche Börse's direction that such estimates reflect the best currently available estimates as to the expected future results of operations and financial condition of Deutsche Börse Group and NYSE Euronext to which such analyses or forecasts relate and are a reasonable basis on which to evaluate the expected future results of operations and financial condition of Deutsche Börse Group and NYSE Euronext to which such forecasts and estimates relate. J.P. Morgan did not receive any internal management forecasts from either Deutsche Börse or NYSE Euronext other than with respect to the synergies. Neither Deutsche Börse nor NYSE Euronext publicly discloses management estimates of the type provided to J.P. Morgan in connection with J.P. Morgan's analysis of the transaction, and the estimates provided to J.P. Morgan or extrapolated therefrom were not prepared with a view toward public disclosure. These estimates were based on numerous variables and assumptions that are inherently uncertain and may be beyond the control of management, including, without limitation, factors related to general economic and competitive conditions and prevailing interest rates. Accordingly, actual results could vary significantly from those set forth in such estimates.

Table of Contents

Selected Publicly Traded Companies

Using publicly available information, J.P. Morgan compared selected financial and operating data of Deutsche Börse Group and NYSE Euronext with publicly available information of selected publicly traded companies engaged in businesses which J.P. Morgan deemed to be analogous to Deutsche Börse and NYSE Euronext. The companies selected by J.P. Morgan are set forth below.

Derivative Exchanges

CBOE Holdings, Inc.

CME Group Inc.

IntercontinentalExchange, Inc.

National Exchanges

BM&FBovespa S.A.

Bolsas y Mercados Españoles SA

London Stock Exchange Group plc

TMX Group Inc.

Other Exchanges

The Nasdaq OMX Group, Inc.

Parties to the Transaction

Deutsche Börse

NYSE Euronext

These companies were selected, among other reasons, because they are exchanges located in relevant geographies with significant operations in one or more of the following categories: derivatives, cash trading and listings, settlement and custody, and market data and technology services. For each such company, J.P. Morgan calculated and compared various financial multiples and ratios based on publicly available financial data, information it obtained from filings with the SEC, FactSet, research analyst reports and I/B/E/S estimates, each as of February 8, 2011 (the last

Edgar Filing: NYSE Euronext - Form 425

full trading day prior to disclosure that Deutsche Börse and NYSE Euronext were discussing a potential transaction).

J.P. Morgan reviewed, among other information, each of these companies' firm value (calculated as the market value of the particular company's common equity plus total debt, plus non-controlling interest, less cash and cash equivalents) compared to 2011 and 2012 estimated earnings before interest, taxes, depreciation and amortization, or EBITDA. In addition, J.P. Morgan reviewed each of these companies' closing market price as of February 8, 2011, as compared to 2011 and 2012 estimated earnings per share for the particular company.

A-114

Table of Contents

The median multiples for the firm value to EBITDA ratio and price to earnings per share ratio relating to the trading comparables are set forth below.

Measure	Trading comparables multiples	
	2011 estimated	Median 2012 estimated
Derivative exchanges		
Firm value to EBITDA ratio	9.5x	8.6x
Price to earnings per share ratio	18.1x	15.6x
National exchanges		
Firm value to EBITDA ratio	8.5x	8.0x
Price to earnings per share ratio	12.9x	11.7x
Other exchanges		
Firm value to EBITDA ratio	8.5x	7.9x
Price to earnings per share ratio	10.5x	9.4x
Deutsche Börse		
Firm value to EBITDA ratio	9.1x	8.2x
Price to earnings per share ratio	13.4x	11.8x
NYSE Euronext		
Firm value to EBITDA ratio	8.3x	7.4x
Price to earnings per share ratio	13.0x	11.3x

Based on its analysis, J.P. Morgan selected a reference range of 8.5x to 9.5x 2011 estimated EBITDA, 7.5x to 8.5x 2012 estimated EBITDA, 13.0x to 15.5x 2011 estimated earnings per share and 11.5x to 14.0x 2012 estimated earnings per share for each of NYSE Euronext and Deutsche Börse. J.P. Morgan applied these reference ranges to NYSE Euronext and Deutsche Börse and calculated the following implied equity values per share for each using estimated EBITDA and estimated earnings per share for calendar years 2011 and 2012, as set forth in the Deutsche Börse case and NYSE Euronext case, respectively:

	Implied equity value per share			
	Firm value to EBITDA ratio		Price to earnings per share ratio	
	2011 estimated	2012 estimated	2011 estimated	2012 estimated
NYSE Euronext (in U.S. dollars)				
High	39.00	39.50	40.00	41.50
Low	34.25	34.00	33.50	34.00
Deutsche Börse (in euros)				
High	61.50	60.75	66.25	68.25
Low	54.25	52.75	55.50	56.00

J.P. Morgan then calculated (1) the ratio of the lowest implied equity value per share for NYSE Euronext converted from U.S. dollars into euros at the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011 to the highest implied equity value per share for Deutsche Börse, and (2) the ratio of the highest implied equity value per share for NYSE Euronext converted from U.S. dollars into euros at the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011 to the lowest implied equity value per share for Deutsche Börse to derive an implied exchange ratio range as shown below, as compared to the exchange ratio in the proposed merger of 0.4700x.

Table of Contents

	Implied exchange ratio	
	2011	2012
	estimated	estimated
Firm value to EBITDA ratio		
Highest NYSE Euronext equity value per share to lowest Deutsche Börse equity value per share	0.525x	0.545x
Lowest NYSE Euronext equity value per share to highest Deutsche Börse equity value per share	0.405x	0.410x
Price to earnings per share ratio		
Highest NYSE Euronext equity value per share to lowest Deutsche Börse equity value per share	0.525x	0.545x
Lowest NYSE Euronext equity value per share to highest Deutsche Börse equity value per share	0.370x	0.365x

Relative Discounted Cash Flow Analysis

J.P. Morgan conducted a discounted cash flow analysis for the purpose of determining an implied fully diluted equity value per share for both Deutsche Börse shares and NYSE Euronext shares. A discounted cash flow analysis is a method of evaluating an asset using estimates of the future unlevered free cash flows generated by this asset and taking into consideration the time value of money with respect to those future cash flows by calculating their present value. The unlevered free cash flows refers to a calculation of the future cash flows of an asset without including in such calculation any debt servicing costs. Present value refers to the current value of one or more future cash payments from the asset, which is referred to as that asset's cash flows, and is obtained by discounting those cash flows back to the present using a discount rate that takes into account macro-economic assumptions and estimates of risk, the opportunity cost of capital, capitalized returns and other appropriate factors. Terminal value refers to the capitalized value of all cash flows from an asset for periods beyond the final forecast period.

J.P. Morgan calculated the present value of the unlevered free cash flows that Deutsche Börse and NYSE Euronext are expected to generate during calendar years 2011 through 2020. At the direction of the management of Deutsche Börse, J.P. Morgan used the Deutsche Börse case and the NYSE Euronext case. J.P. Morgan also calculated a range of terminal values for Deutsche Börse and NYSE Euronext at the end of the ten-year period ending 2020 by applying a perpetual growth rate ranging from 2.00% to 3.00% to the unlevered free cash flow of Deutsche Börse and NYSE Euronext during the final year of the ten-year period. The unlevered free cash flows and the range of terminal values were discounted to present values using a range of discount rates from 10.0% to 11.0%, which were chosen by J.P. Morgan based upon an analysis of the weighted average cost of capital of both Deutsche Börse and NYSE Euronext. The present value of the unlevered free cash flows and the range of terminal asset values were then adjusted for Deutsche Börse and NYSE Euronext's 2010 fiscal year-end net debt and non-controlling interests to obtain implied fully diluted equity values. The discounted cash flow analysis indicated the following ranges of implied equity values per share of Deutsche Börse shares and NYSE Euronext shares on a standalone basis (i.e., without synergies):

	Implied equity value per share	
	Deutsche	NYSE
	Börse	Euronext
	(in	(in U.S. dollars)
	euros)	(in U.S. dollars)
High	75.75	46.50
Low	60.50	36.50

J.P. Morgan then calculated (1) the ratio of the lowest implied equity value per share for NYSE Euronext converted from U.S. dollars into euros at the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011 to the highest implied equity value per share for Deutsche Börse and (2) the ratio of the highest implied equity value per share for NYSE Euronext converted from U.S. dollars into euros at the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011 and the lowest implied equity value per share for Deutsche Börse, to derive an implied exchange ratio range as shown below, as compared to the exchange ratio in the proposed merger of 0.4700x.

Table of Contents

	Implied exchange ratio
Highest NYSE Euronext equity value per share to lowest Deutsche Börse equity value per share	0.560x
Lowest NYSE Euronext equity value per share to highest Deutsche Börse equity value per share	0.350x

Historical Exchange Ratio Analysis

J.P. Morgan reviewed the per share daily closing market price of Deutsche Börse shares in euros and NYSE Euronext shares in U.S. dollars over the previous year, and calculated the implied historical exchange ratios during this period. J.P. Morgan applied the following two different methodologies to convert the daily U.S. dollar closing price per share of NYSE Euronext shares into euros: (1) the then applicable U.S. dollar to euro exchange rate as of the close of the U.S. market on each different trading day of the period and (2) the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011. For each methodology, J.P. Morgan then divided the euro daily closing prices per share of NYSE Euronext shares by those of Deutsche Börse shares and calculated the average of those implied historical exchange ratios for the current, thirty-day, three-month, six-month and one-year periods ending February 8, 2011. The analysis resulted in the following average implied exchange ratios for the periods indicated (rounded to the nearest ten-thousandths):

	Exchange ratio	
	Daily spot U.S. dollar/euro exchange rate	Spot U.S. dollar/euro exchange rate on 2/8/2011
Current (2/8/2011)	0.4254x	0.4254x
30-day	0.4265x	0.4218x
3-month	0.4362x	0.4257x
6-month	0.4369x	0.4284x
1-year	0.4336x	0.4168x

J.P. Morgan noted that a historical stock trading analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

Contribution Analysis

J.P. Morgan analyzed the contribution of each of Deutsche Börse and NYSE Euronext to the pro forma combined company with respect to market capitalization as of February 8, 2011, estimated net revenue, estimated EBITDA and estimated net income, for calendar years 2011 and 2012. These analyses yielded the following pro forma diluted equity value contributions and implied exchange ratios.

	Percentage implied ownership (%)		Implied exchange ratio
	Deutsche Börse shareholders	NYSE Euronext shareholders	
Market capitalization	62	38	0.4254x
Net revenue			
2011 estimated	57	43	0.5335x
2012 estimated	56	44	0.5442x
EBITDA			
2011 estimated	60	40	0.4616x
2012 estimated	60	40	0.4721x
Net income			
2011 estimated	61	39	0.4407x
2012 estimated	61	39	0.4407x

Table of Contents

For purposes of the contribution analysis, J.P. Morgan assumed that the contributions with respect to net revenue and EBITDA reflected each company's contribution to the combined company's pro forma firm value. Equity value contributions were derived by adjusting firm value contributions for outstanding net debt and non-controlling interests. J.P. Morgan also assumed that contributions with respect to market capitalization and net income reflected each company's contribution to the combined company's pro forma equity value.

J.P. Morgan noted that a contribution analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

Illustrative Value Creation Analysis

J.P. Morgan conducted an illustrative value creation analysis that compared the publicly traded equity value of Deutsche Börse shares as of February 8, 2011 to the implied equity value per share of Deutsche Börse shares pro forma for the transaction. The pro forma implied equity value per Deutsche Börse share was equal to Deutsche Börse's pro forma ownership (based on a 0.4700x exchange ratio) of: (1) (a) the public market equity value of Deutsche Börse, plus (b) the public market equity value of NYSE Euronext converted from U.S. dollars into euros at the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011, plus, (c) the value of expected synergies, which was calculated by applying a blended 2012 price to earnings per share multiple to the 300 million annual cost savings run-rate synergies and the 100 million annual revenue run-rate synergies projected by the managements of Deutsche Börse and NYSE Euronext on an after-tax basis, divided by (2) the pro forma diluted number of shares outstanding.

J.P. Morgan also prepared an illustrative value creation analysis that compared the implied equity value per share of Deutsche Börse shares derived from the midpoint of the discounted cash flow analysis on a standalone basis using the Deutsche Börse case to an implied equity value per Deutsche Börse share of Deutsche Börse shares pro forma for the transaction. The pro forma implied equity value per Deutsche Börse share was equal to Deutsche Börse's pro forma ownership (based on a 0.4700x exchange ratio) of: (1) (a) the midpoint of Deutsche Börse's standalone discounted cash flow implied equity value based on the Deutsche Börse case, plus (b) the midpoint of NYSE Euronext's standalone discounted cash flow implied equity value based on the NYSE Euronext case converted from U.S. dollars into euros at the spot U.S. dollar to euro exchange rate as of the close of the U.S. market on February 8, 2011, plus, (c) the present value of the synergies (net of the cost to achieve such synergies) as projected by the managements of Deutsche Börse and NYSE Euronext, discounted using a 10.5% discount rate, divided by (2) the pro forma diluted number of shares outstanding.

These illustrative value creation analyses yielded the following amount of pro forma implied equity value creation for Deutsche Börse.

Assumes 0.4700x exchange ratio		Deutsche Börse
Methodology		Pro Forma Implied Value Creation (in billions of euros)
Publicly traded equity value		1.7
Midpoint of DCF implied equity value		1.9

J.P. Morgan noted that an illustrative value creation analysis is not a valuation methodology and that such analysis was presented merely for informational purposes.

The foregoing summary of certain material financial analyses does not purport to be a complete description of the analyses or data presented by J.P. Morgan. The preparation of a fairness opinion is a complex process and is not necessarily susceptible to partial analysis or summary description. J.P. Morgan believes that the foregoing summary and its analyses must be considered as a whole and that selecting portions of the foregoing summary and these analyses or focusing on information in tabular format, in each case, without considering all of its analyses as a whole, could create an incomplete view of the processes underlying the analyses and its opinion. As

Table of Contents

a result, the ranges of valuations resulting from any particular analysis or combination of analyses described above were merely utilized to create points of reference for analytical purposes and should not be taken to be the view of J.P. Morgan with respect to the actual value of Deutsche Börse or NYSE Euronext. In arriving at its fairness determination, J.P. Morgan did not attribute any particular weight to any analyses or factors considered by it and did not form an opinion as to whether any individual analysis or factor (positive or negative), considered in isolation, supported or failed to support its opinion. Rather, J.P. Morgan considered the totality of the factors and analyses performed in determining its opinion. Analyses based upon forecasts of future results are inherently uncertain, as they are subject to numerous factors or events beyond the control of the parties and their advisors. Accordingly, forecasts and analyses used or made by J.P. Morgan are not necessarily indicative of actual future results, which may be significantly more or less favorable than suggested by those analyses. Moreover, J.P. Morgan's analyses are not and do not purport to be appraisals or otherwise reflective of the prices at which businesses actually could be bought or sold. None of the selected companies reviewed as described in the above summary is identical to Deutsche Börse or NYSE Euronext. However, the companies selected were chosen because they are publicly traded companies with operations and businesses that, for purposes of J.P. Morgan's analysis, may be considered similar to those of Deutsche Börse. The analyses necessarily involve complex considerations and judgments concerning, with respect to the selected companies, differences in financial and operational characteristics of the companies involved and other factors that could affect the companies.

As a part of its investment banking business, J.P. Morgan and its affiliates are continually engaged in the valuation of businesses and their securities in connection with mergers and acquisitions, investments for passive and control purposes, negotiated underwritings, secondary distributions of listed and unlisted securities, private placements, and valuations for estate, corporate and other purposes. J.P. Morgan was selected on the basis of such experience and its familiarity with Deutsche Börse to advise Deutsche Börse in connection with the exchange offer and to deliver a fairness opinion to the management board and the supervisory board of Deutsche Börse addressing only the fairness from a financial point of view of the exchange ratio to the holders of Deutsche Börse shares (other than Deutsche Börse) pursuant to the business combination agreement as of the date of such opinion.

For services rendered in connection with the transaction (including the delivery of its opinion), Deutsche Börse has agreed to pay J.P. Morgan \$10 million, a substantial portion of which will become payable only if the proposed exchange offer and merger are consummated. In addition, Deutsche Börse has agreed to reimburse J.P. Morgan for certain expenses incurred in connection with its services, including the fees and disbursements of counsel, and will indemnify J.P. Morgan against certain liabilities, including liabilities arising under the federal securities laws.

During the two years preceding the date of its opinion, J.P. Morgan and its affiliates have had commercial or investment banking relationships with Deutsche Börse and NYSE Euronext, for which J.P. Morgan and such affiliates have received customary compensation. J.P. Morgan's commercial banking affiliate is a lender under outstanding credit facilities of Deutsche Börse and an agent bank and a lender under outstanding credit facilities of NYSE Euronext and also provides certain treasury and cash management services to Deutsche Börse and NYSE Euronext, in each case for which it receives customary compensation or other financial benefits. In addition, J.P. Morgan and/or its affiliates are members of, and conduct securities trading through, the exchanges of certain of Deutsche Börse's and NYSE Euronext's affiliates, and may also hold equity positions in certain of these exchanges in connection with their respective membership in such exchanges. In the ordinary course of its business, J.P. Morgan and its affiliates may actively trade the debt and equity securities of Deutsche Börse or NYSE Euronext for the account of J.P. Morgan or for the accounts of customers and, accordingly, J.P. Morgan may at any time hold long or short positions in such securities.

Table of Contents

THE BUSINESS COMBINATION AGREEMENT

This section of the document describes the material terms of the business combination agreement, which was executed on February 15, 2011 and amended on May 2, 2011. The following summary must be read in conjunction with the business combination agreement, a copy of which is attached as Annex A to this document and is incorporated herein by reference. Holdco, Deutsche Börse and NYSE Euronext urge you to read the full text of the business combination agreement.

Structure of the Combination

NYSE Euronext and Deutsche Börse have agreed to combine their businesses under a new Dutch holding company, referred to as Holdco in this document. The effect of the combination will be that NYSE Euronext and Deutsche Börse will become subsidiaries of Holdco. NYSE Euronext will become a subsidiary of Holdco through a merger of a wholly owned subsidiary of Holdco, Pomme Merger Corporation, with and into NYSE Euronext, and Deutsche Börse will become a subsidiary of Holdco through an exchange offer of Holdco shares for Deutsche Börse shares. The parties to the business combination agreement are Holdco, Pomme Merger Corporation, Deutsche Börse and NYSE Euronext.

Deutsche Börse and NYSE Euronext each reserve the right to consider measures to be adopted jointly in the course of their combination which are expedient to enhance the financial position of their respective shareholders. Deutsche Börse, NYSE Euronext and Holdco hereby clarify that any such jointly adopted measures will not include a change of the numerical exchange ratio for the Deutsche Börse shareholders (1 Holdco share for each Deutsche Börse share) or for the NYSE Euronext shareholders (0.47 Holdco shares for each share of NYSE Euronext). Deutsche Börse, NYSE Euronext and Holdco have made no determination as to whether to adopt any such measures.

Following the exchange offer, and depending on the amount of Deutsche Börse shares that are acquired by Holdco in the exchange offer, Deutsche Börse and Holdco intend to complete a post-completion reorganization. In the post-completion reorganization, Deutsche Börse will enter into (1) either a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement, as a result of which Deutsche Börse shareholders who did not tender their shares in the exchange offer may elect to either (x) be entitled to a variable or fixed guaranteed minimum dividend (in case of a domination agreement) or a variable or fixed annual cash compensation (in the case of a profit and loss transfer agreement or a combination thereof with a domination agreement), it being understood that in the case of a variable compensation, it will be calculated on the basis of actual future Holdco dividends, or (y) exchange their Deutsche Börse shares for Holdco shares or (2) a mandatory buy-out of the Deutsche Börse shares from any remaining holders thereof by way of a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act or by applying for a court order in accordance with Sections 39a *et seq.* of the German Takeover Act, as a result of which Deutsche Börse shareholders who did not tender their shares in the exchange offer will be required to sell their Deutsche Börse shares to Holdco.

The Exchange Offer

Consideration Offered to Deutsche Börse Shareholders

The business combination agreement contemplates that Deutsche Börse will become a subsidiary of Holdco through an exchange offer. Under the terms of the exchange offer, Holdco will offer to acquire each Deutsche Börse share in exchange for one Holdco share. This one-to-one exchange ratio for the exchange offer is fixed and will not be adjusted to reflect changes in the trading prices of Deutsche Börse shares or NYSE Euronext shares prior to the date of the completion of the combination.

Unless NYSE Euronext and Deutsche Börse otherwise agree, and subject to applicable law, the exchange offer will not include any offer to acquire any outstanding option to purchase Deutsche Börse shares but, in

Table of Contents

accordance with the German Takeover Act, will include an offer to purchase any Deutsche Börse share that is purchased by or issued to the holder as a result of the exercise of any such option prior to the expiration of the offer acceptance period.

In the business combination agreement, Deutsche Börse has agreed to tender in the exchange offer all of its Deutsche Börse shares held in treasury (which currently represent approximately 4.59% of the issued Deutsche Börse shares) and any Deutsche Börse shares acquired after the date of the business combination agreement, and not to withdraw the tender of such shares unless the exchange offer is terminated or expires or unless either Deutsche Börse's management or supervisory boards change their recommendation for the exchange offer or NYSE Euronext's board of directors changes its recommendation for the merger.

Commencement of the Exchange Offer

Following approval by BaFin (or the expiration of the review period required under the German Takeover Act without the exchange offer having been prohibited by BaFin) of the terms of the exchange offer and the exchange offer prospectus filed by Holdco, Holdco will commence the exchange offer by publishing this document in accordance with Section 14 para. 2 of the German Takeover Act. In connection with the exchange offer, Holdco will also send this document to U.S. holders of Deutsche Börse shares.

Acceptance Period of the Exchange Offer; Extension of the Exchange Offer

The exchange offer will have an offer acceptance period that expires on the date that is ten weeks after the commencement of the exchange offer. Under the business combination agreement, Holdco will be permitted to extend the offer acceptance period if an extension is permitted by applicable law and both NYSE Euronext and Deutsche Börse agree to such extension.

Subsequent Offering Period

Following the expiration of the offer acceptance period, and the satisfaction or waiver by Holdco of the conditions to its obligations to consummate the exchange offer (except for conditions relating to competition and regulatory approvals, absence of governmental proceedings, effectiveness of Holdco's registration statement under the Securities Act, authorization for listing of Holdco's shares on specified exchanges and certain tax rulings), a subsequent offering period is applicable on the exchange offer in accordance with the German Takeover Act. During the subsequent offering period of two weeks, Holdco will offer to acquire all of the remaining Deutsche Börse shares pursuant to the same terms and conditions as within the initial offer acceptance period.

The Merger

Consideration Offered to NYSE Euronext Shareholders

The parties to the business combination agreement have agreed that, immediately after the time that Holdco accepts for exchange, and exchanges for Holdco shares, the Deutsche Börse shares that are validly tendered and not withdrawn in the exchange offer, Pomme Merger Corporation will merge with and into NYSE Euronext.

In the merger, each outstanding NYSE Euronext share will be converted into the right to receive 0.47 of a fully paid and non-assessable Holdco share. Upon completion of the merger, the surviving corporation will be NYSE Euronext, which will be a wholly owned subsidiary of Holdco. This 0.47 exchange ratio for the merger is fixed and will not be adjusted to reflect stock price changes prior to the completion of the merger.

At the effective time of the merger, each outstanding option to purchase NYSE Euronext shares granted under the employee or director stock plans of NYSE Euronext, whether or not vested, will be converted into an option to acquire shares of Holdco on substantially the same terms and conditions as were applicable to it prior to

Table of Contents

such conversion, except that (1) each converted stock option will be exercisable for the number of Holdco shares equal to the number of NYSE Euronext shares that it was exercisable for prior to conversion multiplied by 0.47, and (2) the per-share exercise price for the Holdco share option will be equal to the per-share exercise price that was applicable prior to its conversion divided by 0.47.

In addition, at the effective time of the merger, each restricted stock unit or deferred stock unit measured in NYSE Euronext shares, whether vested or unvested, that was outstanding immediately prior to the effective time of the merger will be converted into a restricted stock unit or deferred stock unit denominated in Holdco shares on substantially the same terms and conditions as were applicable to it prior to such conversion, except that the number of Holdco shares subject to each Holdco share-based award will be equal to the number of NYSE Euronext shares that the stock unit was exercisable for prior to conversion, multiplied by 0.47. Restricted stock units granted under NYSE Euronext's Omnibus Incentive Plan or 2006 Stock Incentive Plan that are outstanding immediately prior to the effective time of the merger will, to the extent unvested, vest as of the effective time of the merger and be settled in Holdco shares at the effective time of the merger. However, with respect to any such restricted stock units that constitute deferred compensation within the meaning of Section 409A of the Internal Revenue Code, such units will still vest upon the effective time of the merger, but the settlement of such units will occur on the date that settlement would otherwise occur under the applicable award agreement, and with respect to any such restricted stock units that are intended to constitute tax-qualified awards pursuant to Article 80 quaterdecies of the French tax code, NYSE Euronext shall have the right to determine whether such distribution shall occur as of completion of the combination or on the date that it would otherwise occur under the applicable award agreement.

Procedures for Converting NYSE Euronext Shares into Merger Consideration***Conversion and Exchange of Shares***

Holdco will appoint a U.S. bank or trust company, or other independent financial institution in the United States that is reasonably satisfactory to NYSE Euronext and Deutsche Börse, to act as escrow agent and exchange agent for the merger and to deliver the merger consideration to the shareholders of NYSE Euronext. This agent is referred to in this document as the escrow agent. In order to facilitate the issuance and distribution of the Holdco shares to NYSE Euronext shareholders in connection with the merger, the escrow agent will, at least one day prior to the completion of the merger, be registered as Holdco's fiduciary and as the record holder of all of the issued and outstanding shares of Pomme Merger Corporation.

As a result of the merger, each NYSE Euronext share that is owned directly by NYSE Euronext or Pomme Merger Corporation, and not held on behalf of third parties, will be cancelled without consideration. Immediately following the effective time of the merger, NYSE Euronext, as the surviving corporation in the merger, will issue to the escrow agent, solely for the account and benefit of the former shareholders of NYSE Euronext, a number of its shares equal to the total number of NYSE Euronext shares outstanding immediately prior to the merger. As soon as possible after the effective time of the merger:

the escrow agent, acting as exchange agent and solely for the account of the former shareholders of NYSE Euronext, will contribute all of the issued and outstanding NYSE Euronext shares that were issued to the escrow agent in the merger to Holdco as a contribution in kind in accordance with Section 2:94b of the Dutch Civil Code (*Burgerlijk Wetboek*); and

in consideration for the contribution of NYSE Euronext shares by the escrow agent, Holdco will issue to the escrow agent, solely for the account and benefit of the former shareholders of NYSE Euronext, the maximum number of Holdco shares to be issued by it in the merger.

NYSE Euronext Letter of Transmittal

As soon as practicable after the effective time of the merger, the escrow agent will send a letter of transmittal to former holders of record of NYSE Euronext shares. Any such letter of transmittal will be accompanied by instructions on how to authorize the transfer and cancellation of NYSE Euronext shares held in

Table of Contents

book-entry form. When a NYSE Euronext shareholder delivers a properly executed letter of transmittal, if required, and any other required documents to the escrow agent, the holder of shares held in book-entry form will be entitled to receive, and the escrow agent will be required to deliver to the holder (1) the number of Holdco shares in respect of the aggregate merger consideration that the holder is entitled to receive as a result of the merger (after taking into account all of the NYSE Euronext shares held immediately prior to the merger by the holder) and (2) any cash in lieu of fractional shares and in respect of dividends or other distributions to which the holder is entitled.

No interest will be paid or accrued on any amount payable upon cancellation of book-entry interests representing NYSE Euronext shares. The Holdco shares issued and paid in accordance with the business combination agreement upon conversion of the NYSE Euronext shares (including any cash paid in lieu of fractional shares) will be deemed to have been issued and paid in full satisfaction of all rights pertaining to NYSE Euronext shares. In the event of a transfer of ownership of any NYSE Euronext shares that is not registered in the transfer records of NYSE Euronext, the proper number of Holdco shares may be transferred by the escrow agent to such transferee if written instructions authorizing the transfer of the book-entry interests representing NYSE Euronext shares are presented to the escrow agent, in any case, accompanied by all documents required to evidence and effect such transfer and to evidence that any applicable stock transfer taxes have been paid.

If any Holdco shares are to be delivered to a person other than the holder in whose name any book-entry interests are registered, it will be a condition of such exchange that the person requesting the delivery pays any transfer or other similar taxes required by reason of the transfer of Holdco shares to a person other than the registered holder of any book-entry interest representing NYSE Euronext shares, or will establish to the satisfaction of Holdco or the escrow agent that the tax has been paid or is not applicable.

No Fractional Shares

No person will receive fractional shares of Holdco in the merger. Any person who would otherwise have been entitled to receive a fraction of a Holdco share in the merger will receive from the escrow agent, in lieu thereof, cash (without interest) in an amount representing the holder's proportionate interest in the net proceeds from the sale by the escrow agent on behalf of all such holders of Holdco shares that they would otherwise be entitled to receive. The sale of such Holdco shares by the escrow agent will be made within 10 business days or such shorter period as may be required by applicable law after the effective time of the merger.

Dividends and Distributions on Holdco Shares

Any dividend or other distribution declared after the completion of the combination with respect to Holdco shares for which NYSE Euronext shares were exchanged as a result of the merger will not be paid (but will nevertheless accrue) until those NYSE Euronext shares are properly surrendered for exchange. No dividends or other distributions in respect of Holdco shares will be paid to any holder of book-entry interests representing NYSE Euronext shares until the instructions for transfer and cancellation in the business combination agreement and the NYSE Euronext transmittal letter, and such other documents as may reasonably be required by the escrow agent, have been delivered to the escrow agent.

Withholding

The parties to the business combination agreement have agreed purely as a precaution that Holdco and the escrow agent will be entitled to deduct and withhold from the consideration payable to any tendering Deutsche Börse shareholder and former NYSE Euronext shareholder the amounts that they are required to deduct and withhold under the Internal Revenue Code or any provision of any state, local or non-U.S. tax law. Any amounts so deducted and withheld will be treated for all purposes of the business combination agreement as having been paid to the shareholders from whom they were withheld.

Table of Contents**Post-Completion Reorganization**

In order to achieve legal and operational integration of Holdco group with Deutsche Börse Group to the greatest extent permitted by applicable laws, Holdco intends that, as soon as practicable after completion of the exchange offer and the merger, it will effectuate one or more corporate reorganization transactions, which may include entering (directly and/or through a wholly owned subsidiary) into a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement, in each case pursuant to Sections 291 *et seq.* of the German Stock Corporation Act with Deutsche Börse as the controlled company and with Holdco shares offered to the outside Deutsche Börse shareholders as consideration pursuant to Section 305 para. 2 of the German Stock Corporation Act. Alternatively or in addition, if Holdco holds, directly or indirectly, 95% or more of the issued Deutsche Börse shares, Holdco may commence a mandatory buy-out of the Deutsche Börse shares from any remaining holders thereof by way of a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act or by applying for a court order in accordance with Sections 39a *et seq.* of the German Takeover Act.

Due to the statutory legal framework applicable to such post-completion reorganization, holders of Deutsche Börse shares who do not exchange their shares in the exchange offer may receive, or may be offered, a different (including a lower) amount or a different form of consideration than they would have received if they had exchanged their shares in the exchange offer. To the extent legally permissible, the parties intend to structure any post-completion reorganization with the goal that such holders of Deutsche Börse shares receive, at a maximum, the same number of Holdco shares per Deutsche Börse share(s) or consideration having the same value (without taking into account the different tax treatment or withholding requirements that may apply) that they would have received in the exchange offer if they had tendered their Deutsche Börse shares. However, Deutsche Börse shareholders should note that, the amount or form of consideration to be offered may be different, and, in particular, lower. Furthermore, in the event that the shares of Holdco lose value after the completion of the combination, there may be no obligation of Holdco to pay to the Deutsche Börse shareholders who did not exchange their shares the higher implied value received by the Deutsche Börse shareholders who exchanged their shares in the offer.

Under a domination agreement or a combination of a domination and profit and loss transfer agreement, the respective controlling company would be obliged pursuant to Section 305 German Stock Corporation Act to offer the minority shareholders of Deutsche Börse adequate consideration to acquire their Deutsche Börse shares. In accordance with Section 305 para. 2 no. 1 or no. 2 of the German Stock Corporation Act, the consideration to be offered to the Deutsche Börse shareholders selling their Deutsche Börse shares under such agreement would consist of Holdco shares, except for fractional amounts that may be settled in cash.

The consideration that the remaining minority Deutsche Börse shareholders would receive under a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act in exchange for their Deutsche Börse shares must be in cash and, therefore, would be different from the form of consideration offered in the exchange offer. In contrast, the consideration that the remaining Deutsche Börse shareholders would receive in connection with a squeeze-out transaction pursuant to Section 39a *et seq.* of the German Takeover Act in exchange for their Deutsche Börse shares would be, at the election of each individual Deutsche Börse shareholder, either Holdco shares or cash.

As regards the determination of the amount of adequate consideration that Deutsche Börse shareholders would receive, or be offered, in connection with the post-completion reorganization, the following applies:

Pursuant to Section 305 para. 3 of the German Stock Corporation Act, the exchange ratio for which Deutsche Börse shareholders would be offered to exchange their Deutsche Börse shares into Holdco shares under a domination agreement or combination of a domination agreement and a profit transfer agreement is deemed adequate if it is equal to the exchange ratio that would apply in connection with a statutory merger of the two companies (*Verschmelzung*). For purposes of determining such exchange ratio, which has to be reviewed by a court-appointed auditor, an expert company valuation of each of Deutsche Börse and Holdco would need to be

Table of Contents

performed for which the circumstances at the date of the resolution of Deutsche Börse's shareholders' meeting adopting the domination agreement or combination of a domination agreement and a profit transfer agreement will be decisive. While there are no strict statutory requirements for the method of such company valuation, a valuation on the basis of discounted future earnings (*Ertragswertverfahren*) in accordance with the Principles for the Preparation of Business Valuations under IDW Standard S 1 of the Institute of Public Auditors in Germany e.V. (*Institut der Wirtschaftsprüfer in Deutschland e.V.*) is generally accepted for such purpose. In addition, according to case law, the consideration to be offered under such agreement may generally not be less than the volume weighted three-month-average stock price of Deutsche Börse shares for the three month period prior to the announcement of such domination agreement or combination of a domination agreement and a profit and loss transfer agreement. The exchange ratio so determined may therefore deviate from the exchange ratio underlying the exchange offer.

Similarly, the adequate cash consideration that the remaining Deutsche Börse shareholders would receive for their Deutsche Börse shares in connection with a squeeze-out transaction pursuant to Section 327a *et seq.* of the German Stock Corporation Act would have to be determined on the basis of an expert company valuation of Deutsche Börse for which the circumstances at the date of the resolution of Deutsche Börse's shareholders' meeting adopting such squeeze-out would be decisive, and would be reviewed by a court-appointed auditor. Again, a valuation based on the basis of discounted future earnings (*Ertragswertverfahren*) in accordance with the Principles for the Preparation of Business Valuations under IDW Standard S 1 of the Institute of Public Auditors in Germany e.V. (*Institut der Wirtschaftsprüfer in Deutschland e.V.*) is generally accepted for such company valuation with the amount of the adequate consideration generally being not less than the volume weighted three-month-average stock price of Deutsche Börse shares for the three month period prior to the announcement of the squeeze-out. Therefore, the amount of such cash compensation may also be different from the amount of consideration offered in the exchange offer.

Finally, in the case of a squeeze-out transaction that is effected by applying for a court order in accordance with Section 39a *et seq.* of the German Takeover Act, the consideration offered to Deutsche Börse shareholders under the exchange offer will be deemed to constitute adequate consideration also for purposes of such squeeze-out if the exchange offer resulted in the acquisition of at least 90% of Deutsche Börse's share capital which was subject to the exchange offer.

Holdco has the right to change the structure of the post-completion reorganization, including the right to determine whether a domination agreement or a combination of a domination agreement and a profit and loss transfer agreement will be entered into with Deutsche Börse as the controlled company by a direct or indirect wholly owned subsidiary of Holdco in the legal form of a German stock corporation or a German *societas europaea* (SE) instead of by Holdco. Holdco may also decide to contribute or otherwise transfer all or some of its Deutsche Börse shares to such or another wholly owned subsidiary. The change of the structure of the post-completion reorganization will be effectuated in accordance with applicable law and, if the domination agreement is entered into with Deutsche Börse as controlled company by a direct or indirect wholly owned subsidiary of Holdco in the legal form of a German stock corporation or a German *societas europaea* (SE) instead of by Holdco, an additional domination agreement will be entered into with such German stock corporation or German *societas europaea* (SE) as controlled company by Holdco.

Conditions to Completing the Combination

Conditions to Completing the Exchange Offer

The business combination agreement provides that Holdco will not be required to accept for payment or pay for, and may delay the acceptance for payment of or the payment for, any validly tendered Deutsche Börse shares unless each of the following conditions has been satisfied (or waived as set forth below).

Mutual Conditions. Conditions that may be waived by Holdco only following approval by both NYSE Euronext and Deutsche Börse, acting together (except for the condition in paragraph (d) below, which may not be

Table of Contents

waived, and for the condition in paragraph (g) below, which may be waived by Holdco following approval by either NYSE Euronext or Deutsche Börse), in each case, if and to the extent that such waiver is permitted by the German Takeover Act:

- (a) *Minimum Condition.* At the expiration of the offer acceptance period, the sum of (i) the number of Deutsche Börse shares validly tendered in the exchange offer and not withdrawn prior to such time and (ii) the number of Deutsche Börse shares, if any, held by Holdco as of such expiration time must be equal to or greater than 75% of the sum of the number of Deutsche Börse shares issued and outstanding as of such time and the number of Deutsche Börse shares that Deutsche Börse may issue after the publication of the exchange offer prospectus in accordance with the German Takeover Act pursuant to obligations in effect as of the time of such publication, such as outstanding options (which condition is referred to in this document as the *minimum tender condition*).
- (b) *Competition Approvals.* On or prior to March 31, 2012, (i) any waiting period (and any extension thereof) applicable to the exchange offer and the merger under the Hart-Scott-Rodino Antitrust Improvement Act of 1976, as amended, must have expired or been terminated with the consequence that the exchange offer and the merger may be consummated, and (ii) the EU Commission must have, or must be deemed to have, cleared the exchange offer and the merger pursuant to the Council Regulation (EC) 139/2004 of the European Community.
- (c) *Registration Statement.* (i) The registration statement must have become effective under the Securities Act prior to the expiration of the offer acceptance period; and (ii) as of the expiration of the offer acceptance period the registration statement must not be the subject of any stop order issued by the SEC pursuant to Section 8(d) of the Securities Act or any proceeding initiated by the SEC seeking such a stop order.
- (d) *NYSE Euronext Requisite Vote.* Prior to the expiration of the offer acceptance period, the business combination agreement and the merger must have been approved by a vote of holders of a majority of the outstanding NYSE Euronext shares entitled to vote thereon, and certain aspects of the articles of association of Holdco that will be in effect after the merger must have been approved by a vote of the holders of a majority of the outstanding NYSE Euronext shares present at the NYSE Euronext special meeting.
- (e) *No Injunction or Illegality.* There must not be any law, regulation, administrative act or injunction in effect as of the expiration of the offer acceptance period issued by any governmental entity in the United States, Germany, the Netherlands, France, the United Kingdom, Portugal, Belgium, Switzerland or Luxembourg that prohibits or makes illegal the consummation of the exchange offer or the merger or the acquisition or ownership of the Deutsche Börse shares or the NYSE Euronext shares by Holdco.
- (f) *Other Approvals.* On or prior to March 31, 2012, the following approvals must have been obtained:
 - (i) The SEC must have approved the applications under Rule 19b-4 of the Exchange Act submitted by NYSE Euronext and/or its applicable subsidiaries and by Deutsche Börse and/or its applicable subsidiaries in connection with the transactions contemplated by the exchange offer and the merger;
 - (ii) the Dutch Minister of Finance (with the advice of the AFM) must have issued a declaration of non-objection to Holdco pursuant to Section 5:32d of the Dutch Financial Supervision Act allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V.;
 - (iii) the Dutch Minister of Finance (with the advice of the AFM) or the AFM on behalf of the Dutch Minister of Finance, as applicable, must have confirmed, reissued, renewed or amended, if so required by the Minister of Finance or the AFM, the existing declarations of non-objection issued to NYSE Euronext, NYSE Euronext (International) B.V., NYSE Euronext

Edgar Filing: NYSE Euronext - Form 425

(Holding) N.V. and Euronext N.V. pursuant to Sections 5:32d of the Dutch Financial Supervision Act, in each case allowing the relevant entity to acquire or hold, indirectly or directly, as the case may be, the shares

Table of Contents

- of Euronext Amsterdam N.V., or the Dutch Minister of Finance and the AFM shall not have indicated that any such confirmation, reissuance, renewal, or amendment is required;
- (iv) the Dutch Minister of Finance and the AFM must have reviewed and approved the exchange offer and the merger and confirmed, reissued, renewed or amended, if so required by the Minister of Finance or the AFM, the existing exchange license granted to Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. pursuant to Sections 5:26 and 2:96 of the Dutch Financial Supervision Act, or the Dutch Minister of Finance and the AFM shall not have indicated that any such confirmation, reissuance, renewal, or amendment is required;
 - (v) the Dutch Central Bank (*De Nederlandsche Bank*) shall have issued a declaration of non-objection to Holdco pursuant to Section 3:95(1)(c) of the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V. as well as NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. in their capacity as licensed operators of a multilateral trading facility, or the Dutch Central Bank shall have indicated that such declaration of non-objection is not required;
 - (vi) the College of Euronext Regulators must have issued a declaration of non-objection to the exchange offer and the merger as required pursuant to the Memorandum of Understanding dated June 24, 2010;
 - (vii) the Exchange Supervisory authority of the State of Hesse must not have prohibited the intended indirect acquisition of a significant participation in Deutsche Börse, Scoach Europa AG and Eurex Frankfurt AG within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it must have issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
 - (viii) the Saxonian Exchange Supervisory Authority must not have prohibited the intended indirect acquisition of a significant participation in European Energy Exchange AG and EEX Power Derivatives GmbH within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it must have issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
 - (ix) the Berlin Exchange Supervisory Authority not have prohibited the intended indirect acquisition of a significant participation in Tradegate Exchange GmbH within the period available to it pursuant to Section 6 paras. 1, 2 of the German Stock Exchange Act, or it must have issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
 - (x) the BaFin must not have prohibited the intended indirect acquisition of a significant participation in European Commodity Clearing AG, Eurex Clearing AG, Eurex Repo GmbH, Eurex Bonds GmbH and Clearstream Banking AG within the period available to it pursuant to Section 2c of the German Banking Act, or it must have issued a corresponding declaration of non-objection with regard to the specifically intended acquisition within this period;
 - (xi) the French Banking Regulatory Authority must have granted the approval required pursuant to French Regulation 96-16 of the Comité de la Réglementation Bancaire et Financière relating to the change of ownership and control of Euronext Paris S.A. in its capacity as a credit institution;
 - (xii) the French Minister of the Economy must have granted, upon the advice of the AMF, the approval required pursuant to Article L. 421-9 II of the French Monetary and Financial Code relating to the change of ownership and control of Euronext Paris S.A. and BlueNext S.A. in their capacity as market operators;

- (xiii) the FSA must have granted its approval in respect of the change of ownership and control of LIFFE Administration and Management Limited pursuant to Chapter 1A of Part XVIII of the U.K. Financial Services and Markets Act 2000;

A-127

Table of Contents

- (xiv) the FSA must have granted its approval in respect of the change of ownership and control of LIFFE Services Limited, Secfinex Limited, Smartpool Trading Limited and Fix City Limited pursuant to Part XII of the Financial Services and Markets Act 2000 and Section SUP 11.3.4 R of the Regulatory Processes – Supervision Manual of the FSA Handbook;
- (xv) the Belgian Financial Services and Markets Authority (*Autoriteit voor Financiële Diensten en Markten/Autorité des services et marchés financiers – FSMA*) shall not have prohibited the intended change of ownership and control of Euronext Brussels SA/NV within the 30-day period available to it pursuant to Article 19 of the Belgian Law of August 2, 2002 on the Supervision of the Financial Sector and on Financial Services (Belgian Law of August 2, 2002), or it shall have issued a corresponding declaration of non-objection in respect of such intended change of ownership and control of Euronext Brussels SA/NV within this period;
- (xvi) Euronext Brussels SA/NV shall have received a confirmation by the Belgian Ministry of Finance regarding the preservation of its status as regulated market and as licensed market operator pursuant to Articles 3, 17 and 18 of the Belgian Law of August 2, 2002, or in the absence of such confirmation, Euronext Brussels SA/NV shall not have received any written notification from the Belgian Ministry of Finance to the contrary;
- (xvii) the Portuguese Minister of Finance must have explicitly approved of the change of ownership and control of Euronext Lisbon Sociedade Gestora de Mercados Regulamentados, S.A. (which is referred to in this document as Euronext Lisbon) upon a positive legal opinion of the Portuguese Securities Market Commission (*Comissão do Mercado de Valores Mobiliários – CMVM*) pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;
- (xviii) the CMVM must be notified of the change of ownership and control of Euronext Lisbon and has either not prohibited such change of control within the period available to it or has issued a declaration of non-objection to such change of control each pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;
- (xix) the CMVM must be notified of the change of ownership and control of Interbolsa SA and has either not prohibited such change of control within the period available to it or has issued a declaration of non-objection to such change of control each pursuant to Decree-law n° 357-C/2007 of October 31, 2007, as amended;
- (xx) the Committee on Foreign Investment in the United States must have granted written notice that the review under Section 721 of the U.S. Defense Protection Act of 1950 of the exchange offer and the merger has been concluded and must have determined that there are no unresolved national security concerns sufficient to warrant a recommendation that the U.S. President block the exchange offer and/or the merger under such Section 721 of the U.S. Defense Protection Act of 1950 and advised that action under such Section 721 has been concluded with respect to the exchange offer and the merger;
- (xxi) the Luxembourg Supervisory Authority for the Financial Sector (*Commission de Surveillance du Secteur Financier*) must not have prohibited the intended indirect acquisition of a Clearstream Banking S.A., Clearstream International S.A. and Clearstream Services S.A. within the statutory period available to it pursuant to Articles 6 (5), 6 (16), 18 (5) and 18 (17) of the Luxembourg Financial Sector Act of April 5, 1993, or it must have issued corresponding declarations of non-objection with regard to the acquisition within this period; and
- (xxii) Luxembourg Supervisory Authority for the Insurance Sector (*Commissariat aux Assurances*) must not have prohibited the intended indirect acquisition of Risk Transfer Re S.A. within the statutory period available to it pursuant to Articles 94 1 (4) and 94 1 (15) of the Luxembourg Insurance Act of December 6, 1991, or it must have issued a corresponding declaration of non-objection with regard to the acquisition within this period.

Table of Contents

- (g) *Material Adverse Market Change.* During the time between the publication of the exchange offer prospectus in accordance with Section 14 para. 2 of the German Takeover Act and the expiration of the offer acceptance period, there must not have occurred a suspension of the currency trading or debt markets in (a) Frankfurt am Main, Federal Republic of Germany and London, England, or (b) New York, New York, U.S.A. for more than three consecutive trading days.

Conditions Waivable by NYSE Euronext. Conditions that may be waived by Holdco following approval by NYSE Euronext, in each case, if and to the extent that such waiver is permitted by the German Takeover Act:

- (a) *No Offer Material Adverse Effect on Deutsche Börse.* During the time between the publication of the exchange offer prospectus in accordance with Section 14 para. 2 of the German Takeover Act and the expiration of the offer acceptance period, there must not have been an offer material adverse effect on Deutsche Börse.
- (b) *IRS Ruling or Rulings.* On or prior to the expiration of the offer acceptance period, NYSE Euronext must have received one or more private letter rulings from the IRS substantially to the effect that (i) the merger will qualify as a reorganization within the meaning of Section 368(a) of the Internal Revenue Code and/or the merger and the exchange offer, taken together, will qualify as an exchange within the meaning of Section 351(a) of the Internal Revenue Code, and (ii) (A) the transfer of NYSE Euronext shares by U.S. persons for shares of Holdco will qualify for an exception to Section 367(a)(1) of the Internal Revenue Code under Treasury Regulation Sections 1.367(a)-3(c)(1) and 1.367(a)-3(c)(9), and (B) any U.S. person transferring NYSE Euronext shares who is a 5% transferee shareholder (within the meaning of Treasury Regulation Section 1.367(a)-3(c)(5)(ii)) will qualify for the exception to Section 367(a)(1) of the Internal Revenue Code only upon entering a five-year gain recognition agreement pursuant to Treasury Regulation Section 1.367(a)-8.

Conditions Waivable by Deutsche Börse. Conditions that may be waived by Holdco following approval by Deutsche Börse, if and to the extent that such waiver is permitted by the German Takeover Act:

- (a) *No Offer Material Adverse Effect on NYSE Euronext.* During the time between the publication of the exchange offer prospectus in accordance with Section 14 para. 2 of the German Takeover Act and the expiration of the offer acceptance period, there must not have been an offer material adverse effect on NYSE Euronext.
- (b) *IRS Ruling or Rulings.* On or prior to the expiration of the offer acceptance period, Deutsche Börse must have received a private letter ruling from the IRS substantially to the effect that the exchange offer will qualify as a transaction described in Section 351 of the Internal Revenue Code and/or the exchange offer and the merger, taken together, will qualify as transaction described in Section 351(a) of the Internal Revenue Code.

An offer material adverse effect on NYSE Euronext or Deutsche Börse, as applicable, means any circumstance or circumstances relating to NYSE Euronext or Deutsche Börse, respectively, that, according to the assessment of an independent expert, has or have resulted in, or would reasonably be expected to result in, individually or in the aggregate, a decrease in the consolidated net revenues of NYSE Euronext or Deutsche Börse, respectively, of at least \$300,000,000 in the 2011 financial year and/or 2012 financial year of NYSE Euronext or Deutsche Börse, respectively, to the extent the decrease is recurrent. For purposes of the meaning of offer material adverse effect, the consolidated net revenues of NYSE Euronext means the total revenues, less transaction-based expenses of NYSE Euronext and its consolidated subsidiaries, and the consolidated net revenues of Deutsche Börse means the total revenues, less volume-related costs of Deutsche Börse and its consolidated subsidiaries. An offer material adverse effect will only be deemed to have occurred if, on or before the day before the publication of the results of the exchange offer pursuant to Section 23 para. 1 sentence 1 no. 2 of the German Takeover Law, an independent expert from Deloitte & Touche GmbH Wirtschaftsprüfungsgesellschaft, using the due and careful consideration of a diligent professional has delivered an opinion that an offer material adverse effect has occurred. Either NYSE Euronext or Deutsche Börse may request that such independent expert undertake an evaluation of whether an offer material adverse effect has

Table of Contents

occurred with respect to the other party. Such independent expert must further render his opinion without undue delay and Holdco must publish the result of the opinion of the independent expert without undue delay in the electronic German Federal Gazette (*elektronischer Bundesanzeiger*), *Frankfurter Allgemeine Zeitung* and the *Wall Street Journal* with reference to the exchange offer. The opinion of such independent expert will be binding upon and non-appealable.

Conditions to Completing the Merger

Under the business combination agreement, NYSE Euronext's obligation to complete the merger is subject to the completion of the exchange offer and acquisition by Holdco of all of the Deutsche Börse shares validly tendered and not withdrawn in the exchange offer.

Reasonable Best Efforts to Obtain Required Approvals

Holdco, NYSE Euronext or Deutsche Börse have agreed to cooperate with each other and use their reasonable best efforts to take all actions necessary, proper or advisable on their part under the business combination agreement and applicable laws to consummate and make effective the exchange offer, the merger and the other transactions contemplated by the business combination agreement (including the Holdco articles of association or alternative changes to the structure of the combination as may be required to consummate and make effective the exchange offer and the merger) as soon as practicable, including actions to obtain any necessary or advisable consents from third parties and/or governmental authorities or self-regulatory organizations. However, the business combination agreement does not require Holdco, NYSE Euronext or Deutsche Börse to:

agree to sell or hold separate, or take any other action with respect to, any assets, businesses or interest in any assets or businesses of Holdco, NYSE Euronext or Deutsche Börse or any of their respective subsidiaries or affiliates if such action would, individually or in the aggregate, reasonably be expected to result in a substantial detriment to Holdco, NYSE Euronext or Deutsche Börse; or

agree to any changes or restrictions in the market or regulatory structure of Holdco, NYSE Euronext, Deutsche Börse or any of their respective subsidiaries or affiliates or in any of their respective operations of any such assets or businesses, if such changes or restrictions would, individually or in the aggregate, reasonably be expected to result in a substantial detriment to Holdco, NYSE Euronext or Deutsche Börse.

For purposes of the business combination agreement, the term "substantial detriment" means, with respect to any person, a material adverse effect on:

the business, continuing results of operations or financial condition of such person and its subsidiaries, taken as a whole; or

the authority or ability of the regulated securities exchanges of Holdco, NYSE Euronext, Deutsche Börse and their respective subsidiaries, taken as a whole, to operate consistently with past practice or as reasonably expected to be operated after the completion of the combination, including with respect to operating the markets that they currently operate and the amounts and types of products listed, traded or otherwise made available in such markets.

The business combination agreement further provides that a "substantial detriment" will be deemed to exist with respect to any action requiring Holdco, NYSE Euronext or Deutsche Börse, before or after the completion of the combination, to (1) sell, hold separate or otherwise dispose of assets, businesses or subsidiaries or (2) take or refrain from taking any actions that, in each of cases (1) and (2), would reasonably be expected, individually or in the aggregate, to materially impair the value of the combined businesses of NYSE Euronext and Deutsche Börse after the completion of the combination (taking into account the parties' contemplated plans for combining such businesses after the completion of the combination and any value that is reasonably expected to be realized in connection with such combination or integration) such that either of the parties would not reasonably have decided to enter into the transaction in light of the anticipated economics of the transaction.

Table of Contents

Third-Party Acquisition Proposals

Non-Solicitation

The business combination agreement contains detailed provisions outlining the circumstances in which NYSE Euronext and Deutsche Börse may respond to acquisition proposals received from third parties. Under these provisions, each of NYSE Euronext and Deutsche Börse has agreed not to:

initiate, solicit, knowingly encourage (including by way of furnishing information), facilitate or induce any inquiries or the making, submission or announcement of any proposal or offer that constitutes, or could reasonably be expected to result in, an acquisition proposal (as described below);

have any discussion with or provide any confidential information to any person or entity relating to an acquisition proposal, engage in any negotiations concerning an acquisition proposal, or knowingly facilitate any effort or attempt to make or implement an acquisition proposal;

approve or recommend, or propose publicly to approve or recommend, any acquisition proposal; or

approve or recommend, or propose to approve or recommend, or execute or enter into, any letter of intent, agreement in principle, merger agreement, acquisition agreement, option agreement or other similar agreement related to any acquisition proposal or propose publicly or agree to do any of the foregoing.

However, if NYSE Euronext receives an unsolicited bona fide written acquisition proposal prior to adoption of the business combination agreement and approval of the transactions contemplated by the business combination agreement by the NYSE Euronext shareholders or Deutsche Börse receives a bona fide written acquisition proposal prior to the expiration of the offer acceptance period, the party receiving the proposal may engage in discussions or negotiations with, or provide information to, the person or entity making the acquisition proposal if and only to the extent that NYSE Euronext board of directors (in the case of a proposal for NYSE Euronext), or the Deutsche Börse supervisory board and the Deutsche Börse management board (in the case of a proposal for Deutsche Börse), conclude in good faith, after consultation with outside counsel and financial advisors, that:

there is a reasonable likelihood that the acquisition proposal could lead to a superior proposal (as described below);

the failure to take such action would be inconsistent with its or their fiduciary duties under applicable law;

prior to providing any information to any person or entity in connection with the acquisition proposal, the NYSE Euronext board of directors or the Deutsche Börse boards, as applicable, receives from the person making the acquisition proposal an executed confidentiality agreement with confidentiality terms that are no less restrictive, in the aggregate, than those contained in the confidentiality agreement between NYSE Euronext and Deutsche Börse; and

the party receiving the acquisition proposal is not then in material breach of its obligations under the no solicitation provisions of the business combination agreement.

The business combination agreement permits NYSE Euronext and its board of directors to comply with Rule 14d-9 and Rule 14e-2 under the Exchange Act, and it permits Deutsche Börse and its supervisory and management boards to comply with the German Takeover Act, in each case with regard to an acquisition proposal that such party may receive.

Changes in Recommendation

The NYSE Euronext board of directors is entitled to withdraw, modify or qualify its recommendation for the merger, and the Deutsche Börse supervisory and management boards are entitled to withdraw, modify or qualify their recommendation that Deutsche Börse shareholders accept the exchange offer and tender their shares in the exchange offer, if:

the change in recommendation is made in response to an unsolicited bona fide written acquisition proposal from a third party, and such board or boards conclude in good faith, after consultation with

A-131

Table of Contents

outside counsel and financial advisors, that the acquisition proposal constitutes a superior proposal. However, during the five business day period prior to making the change in recommendation, such party will be required to negotiate in good faith with the other party with respect to any modifications to the terms of the combination that are proposed by the other party, and it will be required to consider any such modifications agreed by the other party in determining whether the third party's acquisition proposal still constitutes a superior proposal; and

the change in recommendation is not made in response to an unsolicited bona fide written acquisition proposal from a third party, and such board or boards determine in good faith that the failure to make such change in recommendation would be inconsistent with its or their fiduciary duties under applicable law.

Definition of Acquisition Proposal

For purposes of the business combination agreement, the term "acquisition proposal" means, with respect to either NYSE Euronext or Deutsche Börse, any proposal or offer with respect to, or any indication of interest in:

any direct or indirect acquisition or purchase of NYSE Euronext or Deutsche Börse, as applicable, or any of its subsidiaries that constitutes 15% or more of the consolidated gross revenue or gross assets of NYSE Euronext or Deutsche Börse, as applicable, and its subsidiaries, taken as a whole;

any direct or indirect acquisition or purchase of 15% or more of any class of equity securities or voting power or 15% or more of the consolidated gross assets of NYSE Euronext or Deutsche Börse, as applicable;

any direct or indirect acquisition or purchase of 15% or more of any class of equity securities or voting power of any of its subsidiaries that constitutes 15% or more of the consolidated gross revenue or gross assets of NYSE Euronext or Deutsche Börse, as applicable, and its subsidiaries, taken as a whole;

any tender offer that, if consummated, would result in any person or entity beneficially owning 15% or more of any class of equity securities or voting power of NYSE Euronext or Deutsche Börse, as applicable; or

any merger, reorganization, share exchange, consolidation, business combination, recapitalization, liquidation, dissolution or similar transaction involving NYSE Euronext or Deutsche Börse, as applicable, or any of its subsidiaries that constitutes 15% or more of the consolidated gross revenue or gross assets of NYSE Euronext or Deutsche Börse, as applicable, and its subsidiaries, taken as a whole, but with the exception of intra-group reorganizations.

Definition of Superior Proposal

For purposes of the business combination agreement, the term "superior proposal" means, with respect to either NYSE Euronext or Deutsche Börse, a bona fide written acquisition proposal obtained not in breach of the "non-solicitation" provisions of the business combination agreement for or in respect of:

50% or more of the outstanding NYSE Euronext shares or Deutsche Börse shares (as applicable); or

50% or more of the assets of NYSE Euronext and its subsidiaries, on a consolidated basis, or Deutsche Börse and its subsidiaries, on a consolidated basis, as applicable;

on terms that the NYSE Euronext board of directors or the Deutsche Börse boards, as applicable, in good faith concludes, following receipt of the advice of its financial advisors and outside legal counsel, are more favorable to its shareholders than the transactions contemplated by the

Edgar Filing: NYSE Euronext - Form 425

business combination agreement, after taking into account, among other things, all legal, financial, regulatory, timing and other aspects of the acquisition proposal and the business combination agreement, and any improved terms that the other party has offered which are deemed relevant by the NYSE Euronext board of directors (in the case of an acquisition proposal for NYSE Euronext) or the Deutsche Börse boards (in the case of an acquisition proposal for Deutsche Börse), including conditions to and expected timing and risks of consummation and the ability of the party making such proposal to obtain financing for such acquisition proposal.

A-132

Table of Contents

Miscellaneous

NYSE Euronext and Deutsche Börse have also agreed in the business combination agreement that:

they will provide the other party with written notice of the material terms and conditions of any acquisition proposal, or of any request for nonpublic information or inquiry that it reasonably believes could lead to an acquisition proposal, and the identity of the person or entity making such acquisition proposal, request or inquiry, within two business days after receiving the acquisition proposal, request or inquiry;

they will provide the other party, as promptly as practicable, with oral and written notice of the information that is reasonably necessary to keep it informed in all material respects of the status and details of the acquisition proposal, request or inquiry;

they will notify each other in writing at least five business days prior to making a change in recommendation;

if a third party who has previously made an acquisition proposal that NYSE Euronext or Deutsche Börse has determined is a superior proposal subsequently modifies or amends in an adverse manner any material term of such superior proposal such that the acquisition proposal is no longer a superior proposal, then such party's prior determination that the proposal is a superior proposal will be null and void and such party will be required to comply with the no solicitation provisions of the business combination agreement in respect of such modified acquisition proposal (except that the required period for negotiations between NYSE Euronext and Deutsche Börse will be three business days rather than five business days); and

except as ordered by a court or shareholder action, each party will, and will cause its and its subsidiaries' senior officers, directors and representatives to, immediately cease and cause to be terminated any activities, discussions or negotiations existing as of the date of the business combination agreement with any persons or entities with respect to any acquisition proposal.

NYSE Euronext Special Meeting; Recommendations by NYSE Euronext and Deutsche Börse Boards

NYSE Euronext Special Meeting

NYSE Euronext has agreed to take, in accordance with applicable law and its organizational documents, all action necessary to convene a meeting of its shareholders on a date selected by it, but in no event to be later than the day prior to the date of the scheduled expiration of the offer acceptance period, which date will be after the registration statement of which this document forms on past is declared effective. However, NYSE Euronext may adjourn or postpone the NYSE Euronext special meeting for up to two weeks in the event that the acceptance period for the exchange offer is extended by two weeks so that the NYSE Euronext meeting will be held no later than the day prior to the expiration of the offer acceptance period.

Recommendation of the NYSE Euronext Board of Directors

The NYSE Euronext board of directors has agreed to recommend and solicit the approval and adoption of the business combination agreement and the merger. In the event that prior to the NYSE Euronext special meeting (including any adjournment) the NYSE Euronext board of directors determines either to make no recommendation for the merger, or to withdraw, modify or qualify its recommendation in a manner that is adverse to Deutsche Börse or Holdco (which change may only be made in accordance with the terms of the business combination agreement), then Deutsche Börse will have the right to terminate the business combination agreement.

Any change in recommendation by the NYSE Euronext board of directors will not limit or modify the obligation of NYSE Euronext to present the business combination agreement for adoption at the NYSE Euronext's special meeting prior to the date of the scheduled expiration of the offer acceptance period and, if the business combination agreement is not otherwise terminated by either NYSE Euronext or Deutsche Börse in

Table of Contents

accordance with the terms of such agreement, then such agreement will be submitted to the NYSE Euronext shareholders at the NYSE Euronext special meeting for the purpose of voting on adopting such agreement.

Recommendation of the Deutsche Börse Management Board and the Deutsche Börse Supervisory Board

The Deutsche Börse management board and supervisory board have each determined that, subject to its duties under applicable law, it will recommend, in its statement on the exchange offer under Section 27 of the German Takeover Act, that Deutsche Börse shareholders accept the exchange offer and tender their shares in the exchange offer. In the event that prior to the expiration of the offer acceptance period either of the Deutsche Börse boards fails to make such recommendation, or after such recommendation, withdraws, modifies or qualifies such recommendation in a manner that is adverse to Holdco or NYSE Euronext (which change may only be made in accordance with the terms of the business combination agreement), then NYSE Euronext will have the right to terminate the business combination agreement.

Any change in recommendation by the Deutsche Börse boards will not limit or modify the obligation of Deutsche Börse's representative to the Holdco board of directors to consent to Holdco's commencement, continuation and completion of the exchange offer in accordance with the terms of the business combination agreement and, if such agreement is not otherwise terminated by either NYSE Euronext or Deutsche Börse in accordance with the terms of such agreement, Holdco will be obligated to commence, continue and complete the exchange offer in accordance with the terms of the business combination agreement (and Deutsche Börse agrees to consent to any such actions by Holdco).

Termination

Termination Rights

NYSE Euronext and Deutsche Börse may terminate the business combination agreement at any time prior to the completion of the merger by mutual consent of NYSE Euronext and Deutsche Börse. In addition, either NYSE Euronext or Deutsche Börse may terminate the agreement at any time prior to the completion of the merger if:

the completion of the merger has not occurred by December 31, 2011, provided that NYSE Euronext and Deutsche Börse each have the right to extend such date to March 31, 2012 (this date, as it may be extended, is referred to as the termination date) if the only conditions to completion that have not been satisfied (other than those that they have mutually agreed to waive) are certain conditions relating to competition and regulatory approvals, absence of governmental proceedings, effectiveness of Holdco's registration statement under the Securities Act or authorization for listing of Holdco shares on specified exchanges (but this right to extend such termination date or terminate the business combination agreement may not be exercised by a party whose failure to perform any material covenant or obligation under the business combination agreement (or similar failure by any of the party's subsidiaries) has been the cause of, or resulted in, the failure of a completion condition to be satisfied on or before such termination date);

the shareholders of NYSE Euronext do not adopt the business combination agreement and the merger and the specified amendments to Holdco's articles of association at the NYSE Euronext special meeting;

the minimum tender condition of 75% is not satisfied or waived prior to expiration of the offer acceptance period;

any governmental entity or self-regulatory organization denies any regulatory approval that is required to be obtained in connection with the combination, and this denial becomes final, binding and non-appealable, or if any governmental entity or self-regulatory organization issues a final and non-appealable order permanently restraining, enjoining or otherwise prohibiting the exchange offer or the merger (but the party seeking to exercise this termination right must have used its reasonable best efforts to prevent the denial and/or the entry of such order);

Table of Contents

the other party's board has changed its recommendation for the combination; or

the other party's representations and warranties fail to be accurate in all material respects except, in the case of certain representations and warranties, where such failure would not reasonably be expected to have a material adverse effect on such party, or has failed to perform in any material respect any of its covenants, and in each case such failure is not curable or, if curable, is not cured prior to the earlier of (1) the business day prior to the termination date of the business combination agreement or (2) 60 days after the date that written notice of the failure is given.

The business combination agreement does not provide either NYSE Euronext or Deutsche Börse with a right to terminate the agreement for a superior acquisition proposal. Instead, NYSE Euronext must present the business combination agreement for adoption at the NYSE Euronext special meeting prior to the date of the scheduled expiration to the offer acceptance period and Deutsche Börse is required to allow the exchange offer to proceed, even if such party's board changes its recommendation for the combination, unless the business combination agreement is terminated on other grounds.

Termination Fees

The business combination agreement requires NYSE Euronext to pay Deutsche Börse a termination fee of \$250 million if:

(1) an acquisition proposal for NYSE Euronext by a third party (or a bona fide intention to make a proposal with respect to an acquisition proposal) has been publicly announced or otherwise communicated to NYSE Euronext's management or board of directors prior to the NYSE Euronext special meeting and (2) the business combination agreement is terminated either:

by Deutsche Börse because the NYSE Euronext board of directors has changed its recommendation for the combination, or

by Deutsche Börse or NYSE Euronext because the NYSE Euronext shareholders have not approved the merger (and, at the time of termination of the business combination agreement, Deutsche Börse would have been entitled to terminate the business combination agreement because the NYSE Euronext board of directors changed its recommendation for the combination); or

(1) an acquisition proposal for NYSE Euronext by a third party has been publicly announced or made publicly known, (2) the business combination agreement is terminated by NYSE Euronext or Deutsche Börse because the NYSE Euronext shareholders have not approved the merger and (3) within nine months following such termination, NYSE Euronext or any of its subsidiaries executes an acquisition agreement with respect to, or consummates, approves or recommends to the NYSE Euronext shareholders to accept, an acquisition proposal for NYSE Euronext by a third party involving 40% or more of the equity or assets or NYSE Euronext (or any of its subsidiaries that constitutes 40% or more of the consolidated gross revenue or assets of NYSE Euronext and its subsidiaries taken as a whole).

The business combination agreement requires Deutsche Börse to pay NYSE Euronext a termination fee of \$250 million if:

(1) an acquisition proposal for Deutsche Börse by a third party (or a bona fide intention to make a proposal with respect to an acquisition proposal) has been publicly announced or otherwise communicated to Deutsche Börse's management or supervisory board prior to the expiration of the offer acceptance period and (2) the business combination agreement is terminated either:

by NYSE Euronext because either of the Deutsche Börse boards has changed its recommendation for the combination, or

Edgar Filing: NYSE Euronext - Form 425

by NYSE Euronext or Deutsche Börse because the minimum tender condition has not been satisfied or waived prior to expiration of the offer acceptance period (and, at the time of

A-135

Table of Contents

termination of the business combination agreement, NYSE Euronext was entitled to terminate the business combination agreement because either the Deutsche Börse management or supervisory board changed its recommendation for the combination); or

(1) an acquisition proposal for Deutsche Börse by a third party has been publicly announced or made publicly known, (2) the business combination agreement is terminated by either party because the minimum tender condition has not been satisfied or waived prior to expiration of the offer acceptance period and (3) within nine months following such termination, Deutsche Börse or any of its subsidiaries executes an acquisition agreement with respect to, or consummates, approves or recommends to the Deutsche Börse shareholders to accept, an acquisition proposal for Deutsche Börse by a third party involving 40% or more of the equity or assets of Deutsche Börse (or any of its subsidiaries that constitutes 40% or more of the consolidated gross revenue or assets of Deutsche Börse and its subsidiaries taken as a whole).

Conduct of the Business Pending the Business Combination

Under the terms of the business combination agreement, NYSE Euronext and Deutsche Börse have agreed that, until the earlier of the completion of the combination and the termination of the business combination agreement, they and their respective subsidiaries will conduct their businesses in the ordinary and usual course consistent with past practice. In addition, each of NYSE Euronext and Deutsche Börse has agreed that during such period it and its respective subsidiaries will refrain from taking actions without the prior written consent of the other party (subject to exceptions specified in the business combination agreement) relating to:

issuances, sales, pledges, dispositions of or encumbrances over capital stock, or securities convertible into or exchangeable or exercisable for, options, warrants, calls, commitments or rights of any kind to acquire, capital stock of it or its subsidiaries, or any bonds, debentures, notes or other obligations the holders of which have the right to vote (or convertible into or exercisable for securities having the right to vote) with its shareholders on any matter or other property or assets, other than NYSE Euronext shares or Deutsche Börse shares issuable pursuant to stock-based awards outstanding on or awarded prior to the date of the business combination agreement under the NYSE Euronext or Deutsche Börse equity plans;

amendments to its certificate of incorporation, articles of association or bylaws as applicable;

split, combination or reclassification of its outstanding shares;

declaration, setting aside or payment of any type of dividend in respect of any capital stock, other than the quarterly dividends payable by NYSE Euronext or the annual dividend payable by Deutsche Börse (in each case in an amount per share not to exceed its most recent quarterly or annual per share dividend, and with the timing of such dividend to be consistent with past practice), or dividends payable by its direct or indirect wholly owned subsidiaries to another of its direct or indirect wholly owned subsidiaries;

repurchases, redemptions or other acquisitions, or permitting any of its subsidiaries to purchase or otherwise acquire any interests or shares of its capital stock or securities convertible or exchangeable or exercisable for any shares of its capital stock;

incurrence of indebtedness;

capital expenditures;

establishment, termination or modification of employee benefit plans;

Edgar Filing: NYSE Euronext - Form 425

increases to salary, wage, bonus and other compensation of employees or fringe benefits of directors, officers and employees;

disposition of material portions of its assets (including capital stock of subsidiaries);

material acquisition, whether by way of merger, consolidation, purchase or otherwise;

A-136

Table of Contents

material claims or litigation;

material contracts, and non-compete or similar contracts;

tax matters;

changes to its financial accounting principles, policies or practices; and

contracts between itself or its subsidiary, on the one hand, and any of its affiliates, employees, officers or directors, on the other hand.

Indemnification and Insurance of Directors and Officers

The parties have agreed that, after the completion of the combination, Holdco will indemnify, hold harmless and provide advancement of expenses to all past and present directors, officers and employees of NYSE Euronext, Deutsche Börse and their respective subsidiaries, for acts or omissions occurring at or prior to the completion of the combination, to the same extent as these individuals had rights to indemnification and advancement of expenses as of the date of the business combination agreement and to the fullest extent permitted by law. The parties have also agreed that the Holdco articles of association will include provisions regarding elimination of liability of directors, indemnification of officers, directors and employees and advancement of expenses which are, in the aggregate, no less advantageous to the intended beneficiaries than the corresponding provisions in the current organizational documents of each of NYSE Euronext and Deutsche Börse.

In addition, for a period of six years following the completion of the combination, Holdco will maintain in effect the current directors and officers and fiduciary liability insurance policies maintained by each of NYSE Euronext and Deutsche Börse with respect to claims arising from facts or events occurring at or prior to the completion of the combination (or a substitute policy or policies with the same coverage and with terms no less advantageous in the aggregate), subject to the limitation that Holdco will not be required to spend in any one year more than 250% of the annual premiums currently paid by NYSE Euronext or Deutsche Börse, respectively, for this insurance. Instead, Holdco may, at its option, purchase a six-year tail prepaid policy on the same terms and conditions, but provided that the amount paid for such policy does not exceed six times the amount equal to 250% of the annual premiums currently paid by NYSE Euronext or Deutsche Börse, respectively.

Employee Matters

The business combination agreement provides that for the one-year period following completion of the combination, Holdco will provide to each individual who is employed as of the effective time of the merger by NYSE Euronext, Deutsche Börse or their subsidiaries, and who remains employed by NYSE Euronext, Deutsche Börse or their subsidiaries, with the following (except in the case of employees whose employment is governed by a collective bargaining or similar agreement):

base salary in an amount no less than the base salary provided to the employee immediately prior to the combination;

an annual bonus opportunity that is no less favorable than the annual bonus opportunity provided to the employee immediately prior to the combination;

other compensation opportunities and employee benefits that are no less favorable in the aggregate than those provided to the employee immediately prior to the combination;

severance benefits in the event of employment termination in amounts and on terms and conditions no less favorable in the aggregate to such employee than he or she would have received under the severance plans, programs, policies and arrangements applicable as

Edgar Filing: NYSE Euronext - Form 425

of the date of the business combination agreement; and

defined contribution retirement plan benefits no less favorable than those provided as of the date of the business combination agreement.

A-137

Table of Contents

With respect to new Holdco plans for employees who remained employed after the completion of the combination, Holdco has agreed to (1) waive all pre-existing conditions, exclusions and waiting periods regarding participation and coverage requirements, (2) provide each employee and the employee's eligible dependents with credit for any co-payments and deductibles paid prior to the effective time under the applicable NYSE Euronext or Deutsche Börse plan in satisfying deductible or out-of-pocket requirements under the new Holdco plans for the year in which the combination occurs and (3) recognize service of employees with NYSE Euronext and Deutsche Börse for all purposes under new Holdco plans, including severance plans (including for purposes of eligibility to participate, vesting credit, and entitlement to benefits, but excluding for purposes of benefit accrual under final average pay defined benefit plans or to the extent a duplication of benefits would result), in each case to the same extent waived, credited, or recognized under the applicable NYSE Euronext and Deutsche Börse plans prior to the completion of the combination.

Holdco will undertake a review of NYSE Euronext and Deutsche Börse benefits plans within the one-year period after the completion of the combination with the intent to develop new plans for employees that will not discriminate between NYSE Euronext employees, on one hand, and Deutsche Börse employees, on the other hand, and treat similarly situated employees of NYSE Euronext and Deutsche Börse on a substantially equivalent basis, taking into account factors such as the employees' duties, geographic location, tenure, qualifications and abilities.

Governance and Management of the Holdco Group***Organizational and Corporate Governance of the Holdco Group***

The business combination agreement provides that, subject to any required approvals of governmental entities, the sole shareholder of Holdco or the Holdco board of directors prior to the completion of the combination will adopt (1) the Holdco articles of association that are attached as Annex B to this document, (2) the Rules for the Board of Directors of Holdco that are attached as Annex C to this document and (3) the Rules for the Global Executive Committee of the Holdco group that are attached as Annex D to this document. See *Business of Holdco and Certain Information about Holdco*, *Description of the Shares of Holdco* and *Comparison of Shareholder Rights Before and After the Combination* for information about the terms of these Annexes.

If, in connection with obtaining approval required for the completion of the combination, any governmental entity requires an amendment or modification to these documents or the governance structure of the Holdco group as provided in the business combination agreement, then Holdco, NYSE Euronext and Deutsche Börse have agreed to amend or modify such documents or governance structure in a way that comes as close as possible to the balance of the corporate governance structure contemplated by the business combination agreement, including the balance of powers and responsibilities between the Holdco group chairman and the Holdco group chief executive officer. However, neither NYSE Euronext nor Deutsche Börse will be required to agree to any amendment or modification if it would significantly change the balance of the corporate governance structure contemplated by the business combination agreement originally agreed by the parties.

In connection with the applications submitted by the registered exchange subsidiaries of Deutsche Börse Group and NYSE Euronext under Rule 19b-4 under the Exchange Act, Holdco will adopt certain requirements relating to the ownership and voting of its shares. See *Description of the Shares of Holdco* *Ownership and Voting Limits in the Holdco Articles of Association*.

Holdco Board of Directors

Upon completion of the combination, the Holdco board of directors will consist of 17 directors, including the Holdco group chairman and the Holdco group chief executive officer. The Holdco group chairman and nine directors will be nominated for appointment upon designation by Deutsche Börse (which is referred to in this description of the governance and management of the Holdco group as a *Deutsche Börse director*), and the

Table of Contents

Holdco group chief executive officer and the six other directors will be nominated for appointment upon designation by NYSE Euronext (which is referred to in this description of the governance and management of the Holdco group as a NYSE Euronext director). Dr. Reto Francioni will be designated as the initial Holdco group chairman of Holdco. Duncan L. Niederauer will be designated as the initial Holdco group chief executive officer of Holdco.

The Holdco articles of association provide that each of the directors will be appointed at the annual general meeting of shareholders for a term that will expire at the end of the next annual general meeting of shareholders. Each of the directors will be nominated by the Holdco board of directors for re-election to the Holdco board of directors pursuant to a binding nomination (in terms of Section 2:133 of the Dutch Civil Code) at each of the annual general meetings of shareholders occurring in 2012, 2013 and 2014, except that the Holdco group chairman and the Holdco group chief executive officer will each also be nominated by the board of directors pursuant to a binding nomination for re-election to the board of directors at the annual general meeting of shareholders occurring in 2015.

In the event that the Holdco board of directors determines that (1) Holdco will qualify as a foreign private issuer as defined in Rule 3b-4(c) promulgated under the Exchange Act (such status is referred to in this document as FPI status) and will maintain FPI status on an ongoing basis through the end of the annual general meeting of shareholders occurring in 2016 and (2) the directors may be appointed by the general meeting of shareholders for a term that expires in 2015 (or in 2016 in the case of the Holdco group chairman and the Holdco group chief executive officer) and directors are not otherwise required by applicable law, regulation or stock exchange listing standards to be elected at each annual general meeting of shareholders, then the directors referred to above will be appointed by the general meeting of shareholders for a term ending at the end of the annual general meeting of shareholders occurring in 2015, except that the Holdco group chairman and the Holdco group chief executive officer will each initially be appointed for a term ending at the end of the annual general meeting of shareholders occurring in 2016.

Prior to the annual general meeting of shareholders occurring in 2015 (or 2016 in the case of the Holdco group chairman and group chief executive officer), in the event of a vacancy in a board seat previously occupied by a Deutsche Börse director or NYSE Euronext director, the remaining Deutsche Börse directors or NYSE Euronext directors, respectively, will recommend a replacement candidate to Holdco's Nominations, Governance and Corporate Responsibility Committee. Such recommendation to the Nominations, Governance and Corporate Responsibility Committee is binding if the vacant seat is that of the Holdco group chairman or the Holdco group chief executive officer.

After the annual general meeting of shareholders occurring in 2015, the number of directors will be decreased and the board of directors will consist of 12 members (without distinguishing the directors by group status) constituted as follows: one director, being the Holdco group chairman, one executive director, being the Holdco group chief executive officer; and ten non-executive directors.

Board Voting and Meetings

Decisions by the Holdco board of directors are generally taken by a simple majority of the votes cast where a quorum (i.e., majority of board members) is present. However, the business combination agreement provides that the following matters require approval by more than 66% of the whole board of directors:

appointment and removal of a director as the Holdco group chairman or Holdco group chief executive officer;

proposals to amend Holdco's articles of association;

transformational M&A deals, which are defined to include transactions that, in view of their size and significance, very materially change the business of the Holdco group, either in size or direction or geographic presence, as well as certain transactions which require a shareholder vote under Dutch law;

Table of Contents

major structural changes, which consist of changes or enhancements to the responsibilities or authority of the Holdco group chairman or the Holdco group chief executive officer, as well as amendments to specified provisions of Holdco's articles of association;

changes to the Rules for the Board of Directors of Holdco prior to the annual general meeting of shareholders occurring in 2016; and

changes to the duties and composition of Holdco's board committees prior to the annual general meeting of shareholders occurring in 2015.

Holdco's board of directors will meet at least four times per year at alternating locations, subject to the following principles:

either (1) twice a year in Frankfurt and once a year in New York, or (2) twice a year in New York and once a year in Frankfurt, with clauses (1) and (2) alternating each year;

at least once a year at the corporate seat of Holdco or elsewhere in the Netherlands; and

additional meetings at other places determined by Holdco's board of directors.

Additional board meetings beyond these minimum requirements may be convened at the request of either the Holdco group chairman or the Holdco group chief executive officer.

Board Committees

Upon completion of the combination, the Holdco board of directors will initially have the following six committees:

Audit, Finance and Risk Committee;

Nomination, Governance and Corporate Responsibility Committee;

Human Resources and Compensation Committee;

Strategy Committee;

Integration Committee; and

Technology Committee.

Each of the committees mentioned above will consist of three Deutsche Börse directors and two NYSE Euronext directors until the date of Holdco's annual general meeting of shareholders occurring in 2015. Until such meeting, in the event of a vacancy on a board committee in a seat previously occupied by a Deutsche Börse director or a NYSE Euronext director, the remaining Deutsche Börse directors or NYSE Euronext directors, respectively, will recommend a replacement to the Nominations, Governance and Corporate Responsibility Committee, and only candidates recommended by such group of remaining directors will have the same class status for purposes of satisfying the requirement that board committees consist of three Deutsche Börse directors and two NYSE Euronext directors.

Edgar Filing: NYSE Euronext - Form 425

Until the annual general meeting of shareholders occurring in 2016, the Nomination, Governance and Corporate Responsibility Committee and the Strategy Committee will be chaired by the Holdco group chairman. The Integration Committee will be chaired by the Holdco group chief executive officer. Until the annual general meeting of shareholders occurring in 2015, the Audit, Finance and Risk Committee and the Human Resources and Compensation Committee will be chaired by a NYSE Euronext director, whereas the Technology Committee will be chaired by a Deutsche Börse director.

A-140

Table of Contents

Shareholder Voting Requirements

Shareholders' resolutions are generally adopted by a simple majority of the votes cast, without a quorum requirement. Matters which require a shareholder vote under Holdco's articles of association and/or Dutch law include:

the election of members of Holdco's board of directors (including to fill vacancies on the board);

the adoption of Holdco's annual accounts;

the release from liability of the directors of Holdco in connection with the adoption of Holdco's annual accounts; and

significant changes to the identity or character of Holdco or its business, including transfers of all or nearly all of the business to a third party, entering into long-term co-operations that have major significance, and acquiring or disposing of participating interests in at least one-third of Holdco's assets.

In addition, matters that require approval by two-thirds of the votes cast by shareholders include in particular the following:

rejection of a binding nomination (in terms of Section 2:133 of the Dutch Civil Code) by Holdco's board of directors for the election of a director candidate, with the two-thirds majority representing at least 50% of Holdco's issued share capital;

the removal and suspension of directors, with the two-thirds majority representing at least 50% of Holdco's issued share capital; and

amendments to Holdco's articles of association, but without a quorum requirement, provided that such a resolution can only be adopted at the proposal of the Holdco board of directors.

Holdco Group Chairman

During the initial term of the Holdco group chairman that expires at the end of the annual general meeting of shareholders occurring in 2016, the Holdco group chairman will have customary duties of a chairman, such as leading meetings of Holdco's board of directors and setting meeting agendas, as well as certain additional agreed responsibilities and authorities that include:

initiating and developing the overall strategy of the Holdco group;

global relationship management and representation, and global political and regulatory representation of the Holdco group;

chairing the Nomination, Governance and Corporate Responsibility Committee and the Strategy Committee and serving as a member of the Human Resources and Compensation Committee and the Integration Committee; and

consultation rights in relation to appointments and removals of members of the Global Executive Committee.

Edgar Filing: NYSE Euronext - Form 425

In the event that Dr. Reto Francioni ceases to be the Holdco group chairman before the end of his initial term, the remaining Deutsche Börse directors will nominate a replacement, and their nomination will be binding (in terms of Section 2:133 of the Dutch Civil Code) on the Nomination, Governance and Corporate Responsibility Committee and on the Holdco board of directors. The replacement Holdco group chairman will continue to have the same roles and authorities until the end of the initial Holdco group chairman term that expires at the end of the annual general meeting of shareholders occurring in 2016.

Until the first annual general meeting of shareholders occurring after a period of six years after completion of the combination, the Holdco group chairman will have a primary office in Frankfurt and a secondary office in New York, and the Holdco group chief executive officer will have a primary office in New York and a secondary

A-141

Table of Contents

office in Frankfurt. Alternatively, the Holdco group chairman and the Holdco group chief executive officer may decide to switch their office locations in a reciprocal manner, with the Holdco group chairman having his primary office in New York if the Holdco group chief executive officer has his primary office in Frankfurt.

Holdco Group Chief Executive Officer

During the Holdco group chief executive officer's initial term, which expires at the end of the annual general meeting of shareholders occurring in 2016, the Holdco group chief executive officer will have the typical roles of a chief executive officer, including:

management and performance of the Holdco group (including annual budget and business plan);

initiating and developing business strategy for the global divisions and regions;

developing integration policy and parameters to shape the Holdco group, including systems, staffing and location for consideration of the integration committee and responsibility for execution of integration;

serving as a member of the Strategy Committee and chairing the Integration Committee; and

chairing the Global Executive Committee and having the right of selection, appointment and removal of Global Executive Committee members (subject to a requirement that the Holdco group chief executive officer must consult closely with the Holdco group chairman and the Holdco board of directors on proposed appointments/removals).

In the event that Duncan L. Niederauer ceases to be the Holdco group chief executive officer before the end of his initial term, the remaining NYSE Euronext directors will nominate a replacement, and their nomination will be binding (in terms of Section 2:133 of the Dutch Civil Code) on the Nomination, Governance and Corporate Responsibility Committee and on Holdco's board of directors. The replacement will continue to have the same roles and authorities until the end of the initial Holdco group chief executive officer term that expires at the end of the annual general meeting of shareholders occurring in 2016.

Legal Structure of the Holdco Group

Holdco will be a holding company incorporated in the Netherlands. In order to comply with regulatory requirements and to ensure close proximity to customers, there will continue to be a separate operational subsidiary legal entity in each of the different countries where NYSE Euronext and Deutsche Börse and their respective subsidiaries operate securities exchanges (e.g., the United States, Germany, Belgium, France, the Netherlands, the United Kingdom and Portugal). NYSE Euronext and Deutsche Börse will review the organizational structure of the Holdco group with a view to organizing it in such a way that, in the medium term, all European businesses and assets of the Holdco group are held directly or indirectly by a European legal entity and all U.S. businesses and assets are held directly or indirectly by a U.S. legal entity (though still to be indirectly owned by Holdco, which is organized in the Netherlands), taking into account and subject to tax, regulatory and operational considerations. NYSE Euronext and Deutsche Börse intend to appoint two regional coordinators for the European and the U.S. businesses of the Holdco group, with a view to regional coordination in relation to regulatory matters.

Global Executive Committee of the Holdco Group

The Global Executive Committee of the Holdco group will consist of four individuals who are currently executives of NYSE Euronext, including the chief executive officer of NYSE Euronext, and four individuals who are currently executives of Deutsche Börse. The Global Executive Committee will be responsible for the management of the day-to-day business of the Holdco group.

The Rules for the Global Executive Committee that will be adopted by the Holdco board of directors in connection with the completion of the combination specify the membership composition of that committee, its tasks and responsibilities and certain procedural matters. These rules will expire four years after the completion

A-142

Table of Contents

of the combination and can only be amended with the approval of the Holdco group chief executive officer and the Holdco board of directors. The members of the Global Executive Committee will strive to reach decisions on a unanimous basis, and the Holdco group chief executive officer will in principle decide any matters which are not unanimous. Any member of the Global Executive Committee whose responsibility is affected by such decision of the Holdco group chief executive officer has the right to bring such matter to the attention of the Holdco board of directors for further discussion or decision as the Holdco board of directors may deem necessary.

See Business of Holdco and Certain Information about Holdco for information about the committee members.

Business and Operational Structure of the Holdco Group

Dual Headquarters

The Holdco articles of association to be effective upon completion of the combination will provide that the Holdco group will have dual headquarters in Frankfurt and New York.

Trading Platforms

The business combination agreement provides that, after completion of the combination, NYSE Euronext and Deutsche Börse will decide, in accordance with any regulatory requirements, to harmonize the trading platforms of NYSE Euronext and Deutsche Börse. Subject to further review by the parties, the parties intend to migrate to:

two platforms, one for the combined cash business and one for the combined derivatives business of the Holdco group. In the case of a migration to two platforms, it is the intention of NYSE Euronext and Deutsche Börse that, subject to further review of the parties, one of those platforms will be a platform currently used by NYSE Euronext, while the other will be a platform currently used by Deutsche Börse; and/or

one single platform for both cash and derivatives businesses of the Holdco group in the medium term.

However, any such migration must be consistent with the primary goals of maximizing synergies and creating an efficient market place for customers.

Divisional Structure

The business combination agreement also provides that, after completion of the combination, the Holdco group will have the following five global divisions (the location from where such global division is managed is referred to as the global hub of such division):

Global Cash Trading and Listings with a global hub in New York and key locations in (in alphabetical order) Amsterdam, Brussels, Frankfurt, Lisbon and Paris;

Global Derivatives with a global hub in Frankfurt and key locations in (in alphabetical order) Amsterdam, Chicago, London, New York and Zürich;

Global Settlement and Custody with a global hub in Frankfurt and key locations in (in alphabetical order) Luxembourg, New York, Porto, Prague and Singapore. The office of the divisional head will be located in Luxembourg;

Edgar Filing: NYSE Euronext - Form 425

Technology Services/IT with a global hub in New York and key locations in (in alphabetical order) Belfast, Frankfurt, London, Luxembourg, Paris and Prague. The office of the divisional head will be located in Paris; and

Market Data & Analytics with a global hub in Frankfurt and key locations in (in alphabetical order) London, New York, Paris and Zürich.

A-143

Table of Contents

While the business combination agreement sets forth the global divisions of Holdco after completion of the combination, the parties have not yet determined the Holdco group's segment structure for financial reporting purposes.

European Equities Businesses

The Holdco group expects to run the European equities businesses of the Holdco group in the five markets (Amsterdam, Brussels, Frankfurt, Lisbon and Paris) on the same trading technology platform. This business will be led by the current Head of the European Cash Markets of NYSE Euronext, and the deputy of this business will be a person designated by Deutsche Börse. As has been the case, all five stock exchanges will remain independently operated as listing venues/market undertakings, but will share the same technology platform. Subsequent leaders of this business will run the European equities business from the domicile of the cash market which they operate.

Inclusion of Holdco Shares in Indices; Credit Rating for Holdco

NYSE Euronext and Deutsche Börse have agreed that, prior to completion of the combination, they will use their reasonable best efforts to (1) seek the continued inclusion of Holdco's shares in the DAX30, EuroStoxx50 and S&P 500 indices and (2) cause Holdco to receive an AA rating from the rating agencies of S&P or Fitch or an equivalent rating at one or several other rating agencies.

Amendment and Waiver

NYSE Euronext and Deutsche Börse may amend the business combination agreement at any time either before or after the adoption of the business combination agreement and approval of the transactions contemplated thereby by the NYSE Euronext shareholders and the publication of the offer document. However, (1) after such adoption and approval, no amendment may be made which requires further approval by the NYSE Euronext shareholders under applicable law or the rules of any relevant stock exchange unless such further approval is obtained and/ or (2) after the publication of the offer document, no amendment may be made which requires an amendment of the offer document unless such further amendment to the offer document is made.

In the event that NYSE Euronext, Deutsche Börse and Holdco authorize an amendment to the business combination agreement that does not require further approval by the NYSE Euronext shareholders or an amendment of the offer document, NYSE Euronext, Deutsche Börse and Holdco, as applicable, will inform such shareholders of the amendment by press release and other public communication. In the event that NYSE Euronext, Deutsche Börse and Holdco authorize an amendment to the business combination agreement that requires further approval by the NYSE Euronext shareholders, another proxy statement/prospectus would be delivered to such shareholders and proxies would be re-solicited for approval of such amendment.

The parties may, to the extent legally allowed and permitted under the terms of the business combination agreement, waive compliance with or satisfaction of any of the conditions contained in the business combination agreement.

Fees and Expenses

Whether or not the exchange offer and the merger are consummated, all out-of-pocket expenses (including fees and expenses of counsel, accountants, investment bankers, experts and consultants) incurred by or on behalf of the parties in connection with the business combination agreement and the transactions contemplated by such agreement will be paid by the party incurring the expense, except as otherwise provided in the business combination agreement and except for expenses incurred in connection with the following, which will be shared equally by NYSE Euronext and Deutsche Börse, unless prohibited by applicable law:

the registration and filing fees, and the printing and mailing costs, of the proxy statement/prospectus, the registration statement, the documents for the exchange offer, the prospectus for the admission of

Table of Contents

Holdco shares to trading on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris and the tombstone advertisement for the exchange offer;

any required filing fees with any governmental entity or self-regulatory organization in connection with the transactions contemplated by the business combination agreement; and

in case of termination of the business combination agreement, any expenses incurred by Holdco and/or its affiliates.

Representations and Warranties

The business combination agreement contains customary and substantially reciprocal representations and warranties by NYSE Euronext and Deutsche Börse relating to the following:

organization, good standing and qualification;

capitalization;

authorization of the business combination agreement and absence of conflicts;

governmental approvals and consents required for the completion of the combination;

financial statements and reports filed with governmental entities;

absence of any material adverse effect since December 31, 2009;

compliance with applicable laws and contracts;

permits and licenses necessary for the conduct of business;

legal proceedings;

employee benefits;

tax matters;

labor matters;

material contracts; and

intellectual property.

In addition, the business combination agreement contains representations and warranties by Holdco and Pomme Merger Corporation relating to the following:

organization, good standing and qualification;

capitalization; and

authorization of the business combination agreement and absence of conflicts.

Many of the representations and warranties contained in the business combination agreement are qualified by a material adverse effect standard (that is, they will not be deemed to be untrue or incorrect unless their failure to be true or correct, individually or in the aggregate, would have a material adverse effect). Certain of the representations and warranties are also qualified by a general materiality standard or by a knowledge standard. A material adverse effect on NYSE Euronext and Deutsche Börse, as applicable, means for purposes of the business combination agreement a material adverse effect on the business, results of operations or financial condition of NYSE Euronext and its subsidiaries, taken as a whole, or Deutsche Börse and its subsidiaries, taken as a whole, as applicable, except that none of the following will be considered in determining whether a material adverse effect has occurred:

any change or development in economic, business or securities markets conditions generally (including any such change or development resulting from acts of war or terrorism) to the extent that such change

Table of Contents

or development does not affect NYSE Euronext and its subsidiaries, taken as a whole, or Deutsche Börse and its subsidiaries, taken as a whole, respectively, in a materially disproportionate manner relative to the other securities exchanges or trading markets;

any change or development to the extent resulting from the execution or announcement of the business combination agreement or the transactions contemplated thereby; or

any change or development to the extent resulting from any action or omission by NYSE Euronext and its subsidiaries, taken as a whole, or Deutsche Börse and its subsidiaries, taken as a whole, respectively, that is required by the business combination agreement.

The business combination agreement and this summary of its terms have been included with this document to provide you with information regarding the terms of the business combination agreement. Factual disclosures about Holdco, NYSE Euronext, Deutsche Börse or their subsidiaries contained in this document or in public filings with the SEC or BaFin may supplement, update or modify the factual disclosures about them that are contained in the business combination agreement. In reviewing the representations and warranties contained in the business combination agreement and described in this summary it is important to bear in mind that the parties negotiated the representations and warranties with the principal purpose of establishing the circumstances in which a party to the business combination agreement may have the right to terminate the combination if the representations and warranties of the other party prove to be untrue due to a change in circumstance or otherwise, and allocating risk between the parties, rather than establishing matters as facts. The representations and warranties may also be subject to a contractual standard of materiality different from those generally applicable to shareholders, and they will expire at the completion of the exchange offer and the merger.

Table of Contents

REGULATORY APPROVALS AND LITIGATION RELATED TO THE COMBINATION

Under applicable German law, the BaFin is responsible for approving the terms and conditions of the exchange offer in Germany.

Competition and Antitrust

U.S. Antitrust Clearance

Under the HSR Act, and the rules promulgated thereunder by the FTC, the combination may not be completed until notification and report forms have been filed with the FTC and the DOJ and the applicable waiting periods have expired. On March 8, 2011, Deutsche Börse and NYSE Euronext each filed a notification and report form under the HSR Act with the FTC and the DOJ.

On April 7, 2011, Deutsche Börse and NYSE Euronext each received a request for additional information and documentary material, or a second request. The effect of the second request is to extend the HSR waiting period until 30 days after the parties have substantially complied with the second request, unless the waiting period is terminated earlier by the DOJ.

The parties have been cooperating and continue to be in close contact with the DOJ in an effort to obtain HSR clearance as promptly as possible. Responding to the second request from the DOJ will take between three and eight months, including the related 30-day waiting period and potential further substantive discussions with the DOJ. The parties therefore do not presently expect the waiting period to expire or be terminated before the third quarter of 2011. Coordination between the European commission and the DOJ, including potentially regarding timing, further complicates any prediction of when the DOJ will conclude its investigation.

At the end of its review, if the DOJ still has substantive concerns about the combination, it must initiate injunctive proceedings in a United States federal district court to block the combination or resolve its concerns by entering into a consent agreement with the parties.

European Competition Authorities

Under the European Community Council Regulation (EC) No. 139/2004 (which is referred to in this document as the "EC Merger Regulation"), the European Commission has 25 working days following receipt of a complete notification form to issue a decision declaring the combination to be compatible with the EC Common Market or to open an in-depth investigation. If the Commission initiates an in-depth investigation, it must issue a final decision as to whether or not the combination is compatible with the Common Market no later than 90 working days after the initiation of the in-depth investigation (although this period may be extended in certain circumstances). Deutsche Börse and NYSE Euronext expect to submit the notification (Form CO) during the first half of 2011.

CFIUS Review

The combination is subject to review under the Exon-Florio Amendment to the Defense Production Act of 1950 (which is referred to in this document as "Exon-Florio") by the Committee on Foreign Investment in the United States (which is referred to in this document as "CFIUS"). Under Exon-Florio, the President of the United States is authorized to prohibit or suspend acquisitions, mergers or takeovers by foreign persons of persons engaged in interstate commerce in the United States if the President determines, after investigation, that such foreign persons in exercising control of such acquired persons might take action that threatens to impair the national security of the United States and that other provisions of existing law do not provide adequate authority to protect national security. The parties are in contact with CFIUS. The notice is intended to be filed with CFIUS in May 2011.

Table of Contents***Waiting Periods***

As of the date of this document, the applicable waiting periods under the HSR Act, EC Merger Regulation and Exon-Florio have not expired or been terminated. The parties believe that the combination can be effected in compliance with all applicable antitrust laws. However, there can be no assurance that the governmental reviewing authorities will terminate or permit any applicable waiting periods to expire, or approve or clear the combination at all or without restrictions or conditions. There also can be no assurance that a challenge to the completion of the combination on antitrust grounds will not be made or that, if such a challenge were made, the parties would prevail or would not be required to accept certain conditions, possibly including certain divestitures, in order to complete the combination.

Capital Market Regulatory Authorities

Under the business combination agreement, Holdco's obligation to accept and exchange Deutsche Börse shares tendered in the exchange offer, which in turn is a condition to completion of the merger, is subject to receipt or the making of all other consents, approvals and actions of, filings with and notices to any governmental entity required for Holdco, Deutsche Börse, NYSE Euronext or any of their subsidiaries to complete the combination, the issuance of Holdco shares in the exchange offer and the merger and the other transactions contemplated by the business combination agreement (including any necessary amendments to existing exchange licenses and recognitions), except for where the failure of which to be received, made or taken would not reasonably be expected to have a substantial detriment to Holdco, Deutsche Börse, NYSE Euronext and their respective subsidiaries. Under the business combination agreement, a substantial detriment is defined as, a material adverse effect on the business, continuing results of operations or financial condition, taken as a whole or the authority or the ability of the regulated securities exchanges of Holdco, Deutsche Börse, NYSE Euronext and their respective subsidiaries, taken as a whole, to operate consistently with past practice or as reasonably expected to be operated after completion of the combination. See The Business Combination Agreement Conditions to Completing the Combination.

SEC Approvals

Deutsche Börse's subsidiary, International Securities Exchange, LLC, as well as EDGA Exchange, Inc. and EDGX Exchange, Inc., in which Deutsche Börse indirectly holds a 34.1% interest, and NYSE Euronext's subsidiaries, New York Stock Exchange, LLC, NYSE Arca, Inc. and NYSE Amex LLC, are self-regulatory organizations registered as national securities exchanges pursuant to Section 6 of the Exchange Act, and, as such, they must comply with certain obligations under the Exchange Act. Pursuant to Section 19 of the Exchange Act and the related rules of the SEC, all changes in the rules of SROs must be submitted to the SEC for approval, and this can include certain proposed amendments to their and, in the case of International Securities Exchange, LLC and EDGX Exchange, Inc., and EDGA Exchange, Inc. their direct parent company's certificate of incorporation, bylaws or related documents or those of NYSE Euronext as well as any proposed modifications to listing rules. No proposed rule change can take effect unless approved by the SEC or otherwise permitted by Section 19 of the Exchange Act.

Under Section 19 of the Exchange Act, the text of the proposed rule change, together with a concise general statement of the statutory basis, and the purpose of the change, must be submitted to the SEC, which then gives interested parties the opportunity to comment by publishing the proposal in the Federal Register. Comment letters typically are forwarded to the SRO for response. Within a period of 35 days of the publication of the proposed rule change (or a longer period of up to 90 days, if the SEC considers it appropriate), the SEC must either approve the proposal, or institute proceedings to determine whether the proposed rule change should be disapproved. Such proceedings should be concluded within 180 days of the date of the publication of the proposed rule change, although the SEC may extend the deadline by another 60 days if necessary. The SEC will approve a proposed rule change if it finds that the change is consistent with the requirements of the Exchange Act and the rules and regulations of the Exchange Act. SROs may consent to extensions of any of these periods and, as a practical matter, will generally do so while addressing any concerns raised by the SEC staff.

Table of Contents

European Regulators

It is currently expected that a number of European regulatory approvals will be solicited and a number of filings will be made in connection with the combination, including (in alphabetical order by country name):

Belgium

Declaration of non-objection from the FSMA in respect of, or the FSMA shall not have taken any action to prohibit, the change of ownership and control of Euronext Brussels S.A./N.V.;

Confirmation by the Belgian Ministry of Finance for Euronext Brussels S.A./N.V. regarding the preservation of its status as regulated market and as licensed market operator, or, in the absence of such confirmation, no notification from the Ministry of Finance to the contrary;

College of Euronext Regulators

Declaration of non-objection to the exchange offer, the merger and the other transactions contemplated by the business combination agreement by the College of Euronext Regulators, pursuant to the Memorandum of Understanding dated June 24, 2010;

France

Approval by the *Autorité de Contrôle Prudentiel* (which is referred to in this document as *ACP*) of the change of ownership and control of Euronext Paris S.A. in its capacity as credit institution;

Approval by the French Minister of Economy, upon the advice of *Autorité des marchés financiers* (which is referred to in this document as *AMF*), of the change of ownership and control of Euronext Paris S.A. and Bluenext S.A. in their capacity as market operators;

Germany

Notification of the combination to the Stock Exchange Council of the Frankfurt Stock Exchange;

No objection from BaFin and notification with the German Central Bank (*Deutsche Bundesbank*) and Association of German Banks of acquisitions of European Commodity Clearing AG, Eurex Clearing AG, Eurex Repo GmbH, Eurex Bonds GmbH and Clearstream Banking AG;

No objection from the Hessian Exchange Supervisory Authority regarding Holdco's acquisition of Deutsche Börse, Scoach Europa AG and Eurex Frankfurt AG;

No objection from the Saxonian Exchange Supervisory Authority regarding Holdco's acquisition of European Energy Exchange AG and EEX Power Derivatives GmbH;

Edgar Filing: NYSE Euronext - Form 425

No objection from the Berlin Exchange Supervisory Authority regarding Holdco's acquisition of Tradegate Exchange GmbH;
Luxembourg

No objection from the Luxembourg Supervisory Authority for the Financial Sector (*Commission de surveillance du secteur financier*) regarding the acquisition of shares of Clearstream International S.A., Clearstream Services S.A., Clearstream Banking S.A.;

Non-objection from the Luxembourg Supervisory Authority for the Insurance Sector (*Commissariat aux assurances*) regarding the acquisition of shares of Risk Transfer Re S.A.;
The Netherlands

Declaration of non-objection to Holdco by the Dutch Minister of Finance (with the advice of the AFM) allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V.;

A-149

Table of Contents

Notification of the proposed combination to and confirmation, reissuance, renewal or amendment by the Dutch Minister of Finance (with the advice of the AFM) or the AFM on behalf of the Dutch Minister of Finance, if so required by the Minister or the AFM, of the existing declarations of no objection issued to NYSE Euronext, NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V., pursuant to Section 5:32d of the Dutch Financial Supervision Act, in each case allowing the relevant entity to, directly or indirectly, acquire or hold the shares in Euronext Amsterdam N.V.;

Notification to and review and approval by the Dutch Minister of Finance and the AFM of the proposed combination pursuant to, and confirmation, reissuance, renewal or amendment, if so required by the Minister or the AFM, of the existing exchange license granted to Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V., pursuant to Sections 5:26 and 2:96 of the Dutch Financial Supervision Act;

Declaration of non-objection to Holdco by the Dutch Central Bank (*De Nederlandsche Bank*, which is referred to in this document as DNB) to Holdco pursuant to section 3:95(1)(c) of the Dutch Financial Supervision Act allowing Holdco to indirectly acquire the shares in Euronext Amsterdam N.V., NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V., in their capacity as licensed operators of a multilateral trading facility;

Portugal

Explicit approval by the Portuguese Minister of Finance of the change of ownership and control of Euronext Lisbon upon a positive legal opinion of the CMVM;

Notification with the CMVM regarding the change of ownership and control in Euronext Lisbon and lapse of the statutory period without a decision being taken or declaration of non-objection by the CMVM of the change of ownership and control of Euronext Lisbon;

Notification with the CMVM regarding the change of ownership and control in Interbolsa and lapse of the statutory period without a decision being taken or declaration of non-objection by the CMVM of the change of ownership and control of Interbolsa;

Spain

Notification to the Spain Registry of Foreign Investments of the General Directorate of Commercial Policy and Foreign Investments regarding the change in control of Infobolsa, Link-Up Capital Markets and Open Finance S.L.;

Switzerland

Notification to the Swiss Financial Market Supervisory Authority (*Eidgenössische Finanzmarktaufsicht*) of the change of control in relation to Eurex Zürich AG and Scoach Schweiz;

United Kingdom

Approval of the FSA in respect of the change of ownership and control of Liffe Services Limited, Secfinex Limited, Smartpool Trading Limited and Fix City Limited; and

Approval of the FSA in respect of the change of ownership and control of LIFFE Administration and Management.

Table of Contents

Other Countries

In addition, it is currently expected that a number of regulatory approvals in other countries will be solicited and a number of filings will be made in connection with the combination, including (in alphabetical order by country name):

India

Notice of change of control in relation to Deutsche Börse to India Foreign Investment Promotion Board;

Singapore

Notification to the Monetary Authority of Singapore regarding the change of control of Clearstream Banking;

United States

Approval of FINRA under NASD Rule 1017 for a change in control in Archipelago Trading Services LLC and Archipelago Securities, Inc;

Approval of CFTC for change of control of NYSE Liffe U.S., LLC and NYSE Liffe.

Stock Exchange Listings

The Holdco shares to be issued in the exchange offer and the merger and such other Holdco shares to be reserved for issuance in connection therewith must be authorized for listing on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris, upon official notice of issuance.

In connection with the listing of shares on the Frankfurt Stock Exchange and Euronext Paris, Holdco intends to prepare a listing prospectus, which will be submitted for approval to the AFM and after approval, passported into France and Germany. In addition to the approval of the listing prospectus by the AFM, the listing is subject to (1) admission of the Holdco shares for trading on the Frankfurt Stock Exchange and (2) approval by the AMF for admission of Holdco shares for listing on Euronext Paris.

Holdco intends to file an original listing application in connection with the listing of the Holdco shares on the New York Stock Exchange.

Commitment to Obtain Approvals

Deutsche Börse and NYSE Euronext have agreed to use reasonable best efforts to obtain as promptly as reasonably practicable all consents and approvals of any governmental entity or any other person required in connection with the combination, subject to limitations as set forth in the business combination agreement (see *The Business Combination Agreement – Reasonable Best Efforts to Obtain Required Approvals*).

General

While Deutsche Börse and NYSE Euronext believe that they will receive the requisite regulatory approvals for the combination, there can be no assurances regarding the timing of the approvals, their ability to obtain the approvals on satisfactory terms or the absence of litigation challenging these approvals. There can likewise be no assurance that U.S. federal, state or non-U.S. regulatory authorities will not attempt to challenge the combination on antitrust grounds or for other reasons, or, if a challenge is made, as to the results of the challenge. Deutsche Börse's and NYSE Euronext's obligation to complete the combination is conditioned upon the receipt of certain approvals from the SEC, U.S. federal and state governmental authorities, the European Commission, other European regulators and other governmental authorities. See *The Business Combination Agreement – Conditions to Completing the Combination*.

Table of Contents

Litigation Concerning the Combination

Following the announcement of the combination on February 15, 2011, several complaints were filed in the Delaware Court of Chancery (which is referred to in this document as the Delaware Court); the Supreme Court of the State of New York, County of New York (which is referred to in this document as the New York Court); and the U.S. District Court for the Southern District of New York (which is referred to in this document as the SDNY), challenging the proposed combination. Four of the actions were filed in the Delaware Court and have been consolidated as *In re NYSE Euronext Shareholders Litigation*, Consol. C.A. No. 6220-VCS. Five actions were filed in the New York Court and are being coordinated under a single master file, NYSE Euronext Shareholders Litigation Master File, Index No. 773,000/11. One action, *Jones v. Niederauer, et al.*, C.N. 11-CV-01502, is pending in the SDNY. Following the filing of the registration statement on April 7, 2011, a consolidated amended complaint was filed in the Delaware Court and an amended master complaint was filed in the New York Court.

All of the complaints raise substantially the same claims. All are purported class actions filed on behalf of all NYSE Euronext public shareholders and variously name as defendants NYSE Euronext, its directors, Deutsche Börse, Pomme Merger Corporation and Holdco (certain defendants are not named in all of the actions). The complaints generally allege that the individual defendants breached their fiduciary duties in connection with their consideration and approval of the proposed combination and that the entity defendants aided and abetted those breaches. The amended complaints further allege that the registration statement filed on April 7, 2011 contains material misstatements and omissions. The complaints seek, among other relief, injunctive relief against the consummation of the combination, unspecified monetary damages and plaintiffs costs and attorney s fees.

The outcome of these lawsuits is uncertain and cannot be predicted with any certainty. An adverse judgment for monetary damages could have a material adverse effect on the operations of Holdco following completion of the combination. A preliminary injunction could delay or jeopardize the completion of the combination, and an adverse judgment granting permanent injunctive relief could indefinitely enjoin completion of the combination. The defendants believe that the claims asserted against them in these lawsuits are without merit, and intend to defend themselves vigorously against the claims. Except for the proceedings cited in this section, there are no governmental, legal or arbitration proceedings (including any such proceedings pending or threatened, of which Holdco is aware), since February 10, 2011, the date of Holdco s incorporation, which may have or have had in the recent past material effects on Holdco s financial position or profitability.

Table of Contents**CAPITALIZATION**

The following table sets forth Holdco's cash and cash equivalents, capitalization and indebtedness as at formation on February 10, 2011. The figures below have been calculated in accordance with IFRS. For further information, see the offer document.

Capitalization	As of February 10, 2011 (in thousands of euros)
Total current debt	0
Guaranteed	0
Secured	0
Unguaranteed/unsecured	0
Total non-current debt (excluding current portion of long-term debt)	0
Guaranteed	0
Secured	0
Unguaranteed/unsecured	0
Shareholders' equity	45

Current bank debt	0
Current portion of non-current debt	0
Other current financial debt	0
Current financial debt	0
Net current financial indebtedness	0
Non-current bank loans	0
Bonds issued	0
Other non-current loans	0
Non-current financial indebtedness	0
Net financial indebtedness	0

As of formation on February 10, 2011, Holdco had no contingent liabilities and no direct liabilities.

Working Capital Statement

In Holdco's opinion, Holdco has sufficient working capital to meet its present requirements and the present requirements of its subsidiaries for the next 12 months from the date of the publication of this document.

Table of Contents

Financing of Holdco

Currently, Holdco does not conduct any business, and the current managing directors receive no compensation for their activities. The costs incurred by Holdco until completion of the combination are transaction costs.

Holdco's equity amounts to 45,000. In addition, Stichting, the sole shareholder of Holdco, granted Holdco a shareholder loan in the amount of 4 million for the sole purpose of financing transaction costs to be incurred in connection with the combination. If the shareholder loan becomes due in case Stichting ceases to be the shareholder of Holdco in connection with the settlement of the exchange offer, the loan shall be replaced by bank financing at fair market conditions.

Through the combination, Holdco will become the holding company of Deutsche Börse and NYSE Euronext. Deutsche Börse, NYSE Euronext and their respective subsidiaries will continue to conduct their respective businesses. Holdco's activities will be limited to managing the group.

Currently, there are no agreements in place regarding Holdco's future financing after the combination or regarding the takeover of central administrative functions (such as cash pooling) for Deutsche Börse Group as well as NYSE Euronext's affiliated companies, based on which Holdco would be financed. It is anticipated that Holdco will be financed by distributions from Deutsche Börse and NYSE Euronext.

However, it is possible that the combined group will be restructured in the future and, as a consequence, Holdco will undertake certain central administrative functions for the group and will be financed on that basis.

Table of Contents**DILUTION**

Dilution refers to two distinct aspects: dilution in participation, and dilution in value.

Dilution in participation refers to the effect the issuance of new Holdco shares has on the individual percentage of shareholding of the existing Holdco shareholders who do not proportionately subscribe to the newly issued Holdco shares.

Dilution in value refers to the effect the issuance of new Holdco shares at a certain issue price has on the value of the shareholders' equity of Holdco per share at a certain point in time.

For the below calculation it is assumed that (1) 195,000,000 Deutsche Börse shares are issued as of the date of commencement of the exchange offer (including 8,956,997 treasury shares held by Deutsche Börse), (2) 146,864 additional Deutsche Börse shares will be issued during the offer period under Deutsche Börse's Group Share Plan, (3) all 195,146,864 Deutsche Börse shares will be validly tendered and not withdrawn in the exchange offer, (4) 266,000,000 NYSE Euronext shares will be outstanding immediately prior to the effective time of the merger and (5) both the exchange offer and the merger are settled whereby Deutsche Börse and NYSE Euronext become fully owned subsidiaries of Holdco. In that case, a total of 320,166,864 Holdco shares will be issued to former shareholders of Deutsche Börse and NYSE Euronext, comprising (A) 195,146,864 Holdco shares to former Deutsche Börse shareholders (including 8,956,997 Holdco shares to Deutsche Börse in respect of its treasury shares) and (B) 125,020,000 Holdco shares to former NYSE Euronext shareholders taking into account an exchange ratio in the merger of 0.47 of a Holdco Share to be received for each NYSE Euronext share.

Prior to the combination, 45,000 D shares of Holdco were issued and outstanding and Holdco's consolidated net book value of equity amounted to 45,000.00 pursuant to the opening accounts of Holdco. Thus, the proportionate net equity per share amounted to 1.00.

The following presents to net book value and net tangible book value per share of Deutsche Börse and NYSE Euronext prior to the combination and the net book value and net tangible book value per share of Holdco and the equivalent for NYSE Euronext post combination:

(in millions of euros except share and per share data)	As of December 31, 2010		Prior to the combination		Post combination		Computational Note
	Deutsche Börse	NYSE Euronext	Deutsche Börse	NYSE Euronext	Holdco combined	NYSE Euronext equivalent(2)	
Shareholders' equity ⁽¹⁾	2,951.4	5,330.0	2,951.4	5,330.0	9,851.0	n/a	[a]

n/a = not applicable

(1) Figures have been derived from the notes of the historical financial statements of Holdco.

(2) Determined using an exchange ratio of 0.47.

(3) Number of shares including the shares issued during the exchange offer or until the effectiveness of the merger.

Table of Contents

Based on the assumptions above, upon completion of the combination, Holdco will have issued and outstanding 320,166,864 Holdco shares, and Holdco's consolidated net book value of equity as set forth under the offer document would amount to \$9,851 million. Thus, the proportionate net equity per Holdco share will amount to \$30.77.

This amount equals an increase of the proportionate net book value of equity

per Holdco share in the amount of \$29.77, corresponding to an increase of 2,977%; and

compared to the proportionate net book value of equity of Deutsche Börse shares prior to the combination in the amount of \$15.63, corresponding to an increase of 103.31%; and

compared to the proportionate net book value of equity of NYSE Euronext shares prior to the combination in the amount of \$10.35, corresponding to an increase of 50.67%.

The participation quota of the current shareholder of Holdco will be diluted from 100% to 0% through the cancellation or repurchase of all currently issued D shares in course of completion of the combination.

Table of Contents

BUSINESS OF HOLDCO AND CERTAIN INFORMATION ABOUT HOLDCO

Overview

According to the terms of the business combination agreement, Deutsche Börse and NYSE Euronext will combine and group their businesses under a new Dutch holding company, referred to as Holdco in this document. Holdco is currently named Alpha Beta Netherlands Holding N.V., but it is expected that, prior to the completion of the combination, Holdco will be renamed to a name to be agreed between the parties. Upon the completion of the combination, Holdco will become the parent company of Deutsche Börse and NYSE Euronext and will be listed on exchanges in New York, Frankfurt and Paris. The combined group will have its dual headquarters in Frankfurt and New York. Holdco's Frankfurt headquarters will be the current principal office of Deutsche Börse located at Mergenthalerallee 61, 65760 Eschborn, Germany, and its telephone number will be +49 (0) 692110, which is the current telephone number of Deutsche Börse Group. Holdco's New York headquarters will be the current headquarters of NYSE Euronext located at 11 Wall Street, New York, New York 10005, United States, and its telephone number will be +1 (212) 656-3000, which is the current telephone number of NYSE Euronext.

The following is a diagram of Holdco and certain of its subsidiaries and associated companies including all U.S. regulated entities immediately after completion of the combination (all subsidiaries majority owned, i.e. between 50% and 100%, unless otherwise noted):

Notes

- (1) On March 31, 2011, Eurex Zürich AG announced that its shareholding in EEX would increase from 35.23% to 56.14%. The transaction was closed on April 12, 2011.

Table of Contents

Information About Holdco Following the Combination

The information provided below pertains to Holdco following the completion of the combination. Following the combination, Holdco will serve as the holding company for Deutsche Börse and NYSE Euronext, and, therefore, the information contained under Business of Deutsche Börse Group and Certain Information about Deutsche Börse Group and Business of NYSE Euronext and Certain Information about NYSE Euronext, should also be considered in understanding the business and operations of Holdco.

The following information should be read in conjunction with Holdco's articles of association as will be in effect following completion of the combination, and with relevant provisions of Dutch law. The form of Holdco's articles of association that will be in effect following completion of the combination will be available, in Dutch with an unofficial English and German translation thereof, at Holdco's registered office in Amsterdam during regular business hours. Holdco's current articles of association and the form of Holdco's articles of association as will be in effect following completion of the combination will also be available in Dutch with an unofficial English and German translation thereof on Holdco's website at www.global-exchange-operator.com. Holdco's current articles of association are also available at the Dutch Trade Register of the Chamber of Commerce. A copy of the draft of Holdco's articles of association that will be in effect following completion of the combination is also attached as Annex B to this document. It is possible, however, that changes to this form of the articles of association may be required following discussions with the SEC or other regulators.

For information about Holdco prior to the combination, see Information About Holdco Before the Combination.

Competitive Strengths and Strategy of the Holdco Group

The combination is expected by Holdco to create a group that will be both a world leader in derivatives and risk management and the premier global venue for capital raising. As a true pacesetter across the spectrum of capital markets services, the combined group will offer clients global scale, product innovation, operational and capital efficiencies, and an enhanced range of technology and market information solutions. Holdco expects that as a result of the combination it will be well positioned to compete in an increasingly global capital market with a strong and diversified portfolio of businesses across asset classes, throughout the trading value chain and around the world.

Strategy of the Combined Group

World Leader in Derivatives

The combination is expected by Holdco to create a global derivatives platform, bringing together complementary products of Deutsche Börse Group and NYSE Euronext. The derivatives businesses of Eurex and NYSE Liffe complement each other with respect to interest rate products, with Eurex specializing in the long end of the interest rate curve and NYSE Liffe the short end and equity index products where Eurex has products across the European Union and NYSE Liffe has country-specific ones. The combination of both derivatives businesses is expected by Holdco to create a global industry leader with the size and the scale to compete with other major exchanges. Holdco believes that combining these complementary venues will deliver innovative product and capital efficiency opportunities to its clients and create a more compelling value proposition for established European benchmark products globally.

Leading Global Venue for Capital Raising

The combined cash trading and listings businesses of Deutsche Börse Group and NYSE Euronext Group are expected by Holdco to create an exchange group with leading liquidity pools for European and U.S. equities. Holdco believes that the combination of NYSE Euronext and the Frankfurt Stock Exchange will deliver a pan-European regulated and transparent equities market, while preserving the strong national roles of the five exchanges in Europe: Amsterdam, Brussels, Frankfurt, Lisbon and Paris. In addition, Holdco believes that NYSE

Table of Contents

Euronext's listings franchise, already home to some of the world's leading global brands, will be further strengthened by the increased global profile of the new group, enhancing its status as one of the most attractive capital raising venues for companies from around the world.

Global Pioneer in International Risk Management and Post-Trade Services

Based upon Deutsche Börse Group's clearing and risk management expertise and its strong suite of world-class securities financing, settlement and custody services, Holdco intends to accelerate growth based on the combined group's broader coverage of asset classes and regions. Holdco plans to extend cash and derivatives clearing and particularly risk management services beyond the initial asset class coverage of the combined group in order to provide customers with significantly improved cost and capital efficiency opportunities. In addition, it is expected by Holdco that Holdco will benefit from Clearstream's strong and growing presence in Asia.

Compelling Provider of Technology Services

Both Deutsche Börse Group and NYSE Euronext are compelling providers of first-class technology solutions that power the trading operations of all the Deutsche Börse and NYSE Euronext markets, as well as other exchanges around the world. In addition, they provide comprehensive transaction, data and infrastructure services and managed solutions for buy-side, sell-side an exchange communities that require next-generation performance and expertise for mission-critical and value-added client services. Holdco intends to capitalize on its combined technology and service expertise as well as expanded potential client base to deliver an ever wider range of innovative solutions that optimize trading efficiency for clients.

Vendor of Choice for Information Content & Analytics

Holdco believes that the combination will also bring together high growth market data and analytics services and a strong index portfolio. Holdco expects to establish itself as the vendor of choice for low latency price information, value-adding indices and benchmarks and unique trading-related content and analytics. Holdco plans to further strengthen this position by, for example, rolling out new products across the combined group based on the well-established range of existing and newly developed indices.

Further Product Innovation Opportunities

Holdco expects the combination to release additional product innovation potential and intends to combine complementary product lines to provide a global and extensive breadth of product offerings based on a strong portfolio of brands. Holdco intends to utilize the additional innovation potential and believes that the business combination will provide further innovation opportunities for its customer base in terms of products and services, trading strategies and risk management, thus contributing to the efficiency and soundness of global capital markets.

Significant Cost and Revenue Synergies

Holdco expects to realize significant cost synergies from the combination, principally from economies of scale in information technology, clearing operations, market operations and corporate center functions. In addition, Holdco expects cross-selling opportunities between the global cash and derivatives businesses of Deutsche Börse Group and NYSE Euronext. Holdco intends for clients to benefit from significant savings available through common IT infrastructure, simplified clearing processes, capital efficiencies and the formation of a more liquid, pan-European, pan-euro regulated market.

Competitive Strengths

Global Presence in Major Financial Centers

Upon successful combination of Deutsche Börse Group and NYSE Euronext, Holdco anticipates that it will have a truly global franchise and will be present in many of the world's financial centers including New York,

Table of Contents

London, Frankfurt, Paris, Luxembourg and Singapore. The combined group will offer its customers access to many of the world's most important capital markets such as the United States and Europe. This global presence reflects the required breadth to service clients in an increasingly global economy and also facilitates the provision of world-class services to global and local customers worldwide.

Leadership in Major Asset Classes and Services

Holdco believes that the combination of the successful markets of Deutsche Börse Group and NYSE Euronext will establish Holdco as a global leader in major asset classes such as global financial derivatives (including U.S. options) and cash equities. It will also bring together high-growth market data and analytics, index and technology services businesses and will create a broad portfolio of multi-asset class pre- and post-trade data, an internationally recognized set of indices and a fast-growing technology services and trading infrastructure provider. These positions are linked to a strong portfolio of brands across the entire value chain, including Deutsche Börse, NYSE Euronext, NYSE, Eurex, NYSE Liffe, Clearstream and STOXX and will help to ensure that Holdco has a diversified and balanced business portfolio.

World-Class IT Infrastructure

The combination of Deutsche Börse Group and NYSE Euronext brings together two industry leaders, each possessing world-class technology with a strong track record of integrating and realizing cost efficiencies. Holdco expects to have access to a technology base consisting of major data centers in the United States, the United Kingdom and Continental Europe, a far reaching network infrastructure and successful trading, clearing, settlement and custody systems such as Eurex, Liffe Connect, SFTI, OptimISE, the Universal Trading Platform and Xetra.

Benchmark Regulatory Model

The combined group expects to serve as a benchmark regulatory model, facilitating transparency and harmonization of capital markets globally, while continuing to operate all national exchanges under local regulatory frameworks and respective brand names.

Markets and Geographical Presence of the Combined Group

Holdco has no operating history. The markets and geographical presence of the combined group will be those of Deutsche Börse Group and NYSE Euronext. For further information on the markets and geographical presence of Deutsche Börse Group and NYSE Euronext, see [Industry and Competition Market Overview](#), [Business of Deutsche Börse Group](#) and [Certain Information about Deutsche Börse Group](#) and [Business of NYSE Euronext](#) and [Certain Information about NYSE Euronext](#).

Information Technology of the Combined Group

Holdco expects to generate through the combination significant cost savings and revenue synergies from combining the information technology of Deutsche Börse Group and NYSE Euronext. Holdco plans to have, among other things, a single trading platform for cash equities, an integrated complementary derivatives franchise and combined U.S. platforms. See [The Combination Certain Synergy Forecasts](#).

For further information on the information technology of Deutsche Börse Group and NYSE Euronext see [Business of Deutsche Börse Group](#) and [Certain Information about Deutsche Börse Group Information Technology and Data Centers](#) and [Business of NYSE Euronext](#) and [Certain Information About NYSE Euronext NYSE Euronext's Global Technology Group](#).

Table of Contents

Board of Directors

Composition

Unless otherwise agreed by NYSE Euronext and Deutsche Börse, the Holdco board of directors will, within one month after the expiration of the offer acceptance period, consist of 17 members, including Dr. Reto Francioni, the current chief executive officer of Deutsche Börse, Duncan L. Niederauer, the current chief executive officer of NYSE Euronext and 15 non-executive directors, consisting of nine non-executive directors nominated for appointment upon designation by Deutsche Börse (which are referred to as Deutsche Börse directors in this section Information About Holdco Following the Combination) and six non-executive directors nominated for appointment upon designation by NYSE Euronext (which are referred to as NYSE Euronext directors in this section Information About Holdco Following the Combination).

The articles of association of Holdco to be in effect as of completion of the combination provide that directors are appointed by the general meeting of shareholders by resolution adopted by a two-thirds majority of the votes cast representing more than one-half of Holdco's issued share capital, or by a majority of the votes cast if the appointment is made on a nomination by Holdco's board of directors. Holdco's articles of association further provide that the board of directors has the power to submit a binding nomination (pursuant to Section 2:133 of the Dutch Civil Code) for the appointment of directors to the general meeting of shareholders (also in the case of vacancies to be filled), in which case the persons nominated by the board of directors are appointed unless the nomination is overruled by a two-thirds majority of the votes cast representing more than one-half of Holdco's issued share capital.

The Holdco articles of association provide that each of the directors will be appointed at the annual general meeting of shareholders for a term that will expire at the end of the next annual general meeting of shareholders. Each of the Holdco directors will be nominated by the board of directors for re-election to the board of directors pursuant to a binding nomination at each of the annual general meetings of shareholders occurring in 2012, 2013 and 2014. In addition, the Holdco group chairman and the Holdco group chief executive officer will each also be nominated by the board of directors pursuant to a binding nomination for re-election to the board of directors at the annual general meetings of shareholders occurring in 2015.

In the event that the Holdco board of directors determines that (1) Holdco will qualify as a foreign private issuer as defined in Rule 3b-4(c) promulgated under the Exchange Act (such status is referred to in this document as FPI status) and will maintain FPI status on an ongoing basis through the end of the annual general meeting of shareholders occurring in 2016 and (2) the directors may be appointed by the general meeting of shareholders for a term that expires in 2015 (or in 2016 in the case of the Holdco group chairman and the Holdco group chief executive officer) and directors are not otherwise required by applicable law, regulation or stock exchange listing standards to be elected at each annual general meeting of shareholders, then the Holdco directors will be appointed by the general meeting of shareholders for a term ending at the end of the annual general meeting of shareholders occurring in 2015, except that the Holdco group chairman and the Holdco group chief executive officer will each initially be appointed for a term ending at the end of the annual general meeting of shareholders occurring in 2016.

Table of Contents

Biographical information as of the date of the publication of this document about Dr. Reto Francioni and Mr. Duncan L. Niederauer is set forth in the following table.

Name	Age	Present Principal Occupation or Employment, Employment History and Other Directorships
Dr. Reto Francioni	55	<p>Dr. Francioni will serve as the Holdco group chairman and a director of Holdco. Dr. Francioni was appointed chief executive officer of Deutsche Börse, effective November 1, 2005. Dr. Francioni also currently serves as the chairman of the board of directors of Clearstream International S.A. and as the chairman of the supervisory board of Clearstream Holding AG. In addition, Dr. Francioni serves as the deputy chairman of the supervisory board of Eurex Clearing AG, Eurex Frankfurt AG and as the deputy chairman of Eurex Zürich AG's board of directors. Dr. Francioni is a member of the board of trustees for the Center for Financial Studies and Goethe Business School. Dr. Francioni also serves as a member of the International Advisory Board for Instituto de Empresa and as a member of the Strategic Advisory Group for VHV Insurance.</p>
Duncan L. Niederauer	51	<p>Mr. Niederauer will serve as the Holdco group chief executive officer and a director of Holdco. Mr. Niederauer was appointed chief executive officer and director of NYSE Euronext, effective December 1, 2007, after joining NYSE Euronext in 2007 as a member of the management committee. Mr. Niederauer also serves on the boards of NYSE Group and Euronext N.V. Mr. Niederauer was previously a partner at The Goldman Sachs Group, Inc. (United States) where he held many positions, among them, co-head of the Equities Division execution services franchise and the managing director responsible for Goldman Sachs Execution & Clearing, L.P. (formerly known as Spear, Leeds & Kellogg L.P.). Mr. Niederauer joined The Goldman Sachs Group, Inc. in 1985. From 2002 until 2004, Mr. Niederauer also served on the board of managers of Archipelago Holdings, LLC (United States). Mr. Niederauer also serves on the board of trustees for Colgate University.</p>

Powers and Function

The business and affairs of Holdco will, subject to the restrictions imposed by Holdco's articles of association, be managed by the Holdco board of directors. The Holdco board of directors may perform all acts necessary or useful for achieving Holdco's corporate purpose, subject to applicable law and Holdco's articles of association. Certain important decisions of the Holdco board of directors must be submitted to the general meeting of shareholders for approval.

Table of Contents

The Holdco board of directors as a whole is authorized to represent Holdco, as is the Holdco group chief executive officer acting individually. In the event of a conflict of interest between Holdco and one of the members of the Holdco board of directors, the Holdco board of directors or the Holdco group chief executive officer, as the case may be, will nonetheless be authorized to represent Holdco, unless the general meeting of shareholders has designated one or more persons to represent Holdco in such case. In the event of such a conflict of interest, the general meeting of shareholders will at all times be authorized to appoint another representative. Pursuant to the Rules for the Board of Directors adopted pursuant to Holdco's articles of association, a member of the Holdco board of directors who has a conflict of interest with Holdco may not participate in the discussions and decision-making process regarding the subject or transaction to which such conflict of interest relates. See Conflicts of Interest below.

Meetings and Decision-Making

The Holdco board of directors will meet as often as it deems necessary, or at the request of the Holdco group chairman or the Holdco group chief executive officer. In a meeting of the Holdco board of directors, each director will have the right to cast one vote. Resolutions of the Holdco board of directors on the following subjects will, among other things, require a majority of more than 66% of the total number of seats on the Holdco board of directors:

appointment and removal of the Holdco group chairman and of the Holdco group chief executive officer in accordance with articles 15.1 and 16.1 of Holdco's articles of association;

proposals for changes to Holdco's articles of association;

transformational M&A deals, which are defined as those which (1) require approval by the general meeting of shareholders pursuant to Section 2:107a of the Dutch Civil Code; or (2) in view of their size and significance very materially change the business of Holdco, either in size or direction or geographic presence;

major structural changes, which are defined as (1) any amendments to articles 2.3, 14.1, 15.5 or 17.7 of Holdco's articles of association; (2) changes or enhancements to the responsibilities and authorities of the Holdco group chairman; or (3) changes or enhancements to the responsibilities and authorities of the Holdco group chief executive officer until the end of the annual general meeting of shareholders held in 2016;

amendments to the Rules for the Board of Directors of Holdco until the end of the annual general meeting of shareholders held in 2016; and

changes to the duties and the composition of the board committees until the end of the annual general meeting of shareholders occurring in 2015.

All other resolutions of the Holdco board of directors will be adopted with a simple majority of the votes cast.

Pursuant to the Dutch Civil Code and Holdco's articles of association, resolutions of the Holdco board of directors concerning an important change in Holdco's identity or character or Holdco's business will be subject to the approval of the general meeting of shareholders. Such resolutions include: (1) the transfer of Holdco's business or nearly all of Holdco's business to a third party; (2) the entry into or termination of a long-term co-operation by Holdco or any of Holdco's subsidiaries with another legal entity or as a fully liable partner in a limited or general partnership if such co-operation or termination is of major significance to Holdco; and (3) the acquisition or disposal by Holdco or by any of Holdco's subsidiaries of a participation in the capital of another company, the value of which equals at least one-third of the sum of Holdco's assets as reflected on the consolidated balance sheet included in Holdco's most recently adopted consolidated annual accounts.

Liability

Edgar Filing: NYSE Euronext - Form 425

Pursuant to Dutch law, members of Holdco's board of directors may be liable to Holdco for damages in the event of improper or negligent performance of their duties. They may also be liable for damages to third parties

A-163

Table of Contents

in the event of bankruptcy or default on tax and social security payments as a consequence of improper performance of duties or tort. In certain circumstances, members of Holdco's board of directors may also incur criminal liabilities. The members of Holdco's board of directors and certain executive officers will be insured at Holdco's expense against damages resulting from their conduct when acting in the capacities as such directors, members or officers, which insurance may also provide any such person with funds to meet expenditures incurred or to be incurred in defending any proceedings against him or her and to take any action to enable such expenses not to be incurred. Also, Holdco provides the current and former members of the Holdco board of directors with protection through indemnification under Holdco's articles of association, to the fullest extent permitted by law, against risks of claims and actions against them arising out of their exercise of their duties, or any other duties performed at Holdco's request.

Suspension or Dismissal

The general meeting of shareholders will at all times have the power to suspend or dismiss a member of the Holdco board of directors by a resolution adopted by a two-thirds majority of the votes cast, representing more than half of Holdco's issued capital. To the extent permitted under Dutch law, a director may also be suspended by the Holdco board of directors. A suspension may be extended several times but the total term of the suspension may not exceed three months, and the suspension will expire at the end of this period if no resolution has been adopted either to lift the suspension or to dismiss the relevant director.

Committees

Upon completion of the combination, the Holdco board of directors will initially have the following six committees:

Audit, Finance and Risk Committee;

Nomination, Governance and Corporate Responsibility Committee;

Human Resources and Compensation Committee;

Strategy Committee;

Integration Committee; and

Technology Committee.

According to the Holdco articles of association, the Holdco board of directors will appoint the members of each committee and determine the tasks of each committee. Each of the committees mentioned above will consist of three Deutsche Börse directors and two NYSE Euronext directors (with any vacancies after completion to be filled by the remaining Deutsche Börse directors or NYSE Euronext directors, as applicable) until the end of the annual general meeting of shareholders occurring in 2015.

Audit, Finance and Risk Committee

The Audit, Finance and Risk Committee will be chaired by a non-executive NYSE Euronext director. All members of the Audit, Finance and Risk Committee will be financially literate. The committee will also contain at least one member who will be considered an audit committee financial expert as defined by the SEC and a financial expert within the meaning of the Dutch Corporate Governance Code. The responsibilities of the Audit, Finance and Risk Committee of Holdco will be determined by the Holdco board of directors.

Nomination, Governance and Corporate Responsibility Committee

Edgar Filing: NYSE Euronext - Form 425

The Nomination, Governance and Corporate Responsibility Committee will be chaired by the Holdco group chairman. However, if it cannot be ensured that FPI status is available and can be maintained after the completion of the combination to permit the Holdco group chairman to chair the committee, then the corporate

A-164

Table of Contents

governance structure of Holdco will be amended in accordance with applicable law so that a non-executive Deutsche Börse director will be nominated by the Holdco group chairman to become the chair of the committee. In such case, the Holdco group chairman will have a permanent right of attendance at the meetings of the committee without having the right to vote. The responsibilities of the Nomination, Governance and Corporate Responsibility Committee of Holdco will be determined by the Holdco board of directors.

Human Resources and Compensation Committee

The Human Resources and Compensation Committee will be chaired by a non-executive NYSE Euronext director. The Holdco group chairman will be a member of the committee. However, if it cannot be ensured that FPI status is available and can be maintained after the completion of the combination to permit the Holdco group chairman to be a member of the committee, then the corporate governance structure of Holdco will be amended in accordance with applicable law so that a non-executive director nominated for appointment upon designation by Deutsche Börse will be nominated by the Holdco group chairman to become a member of the committee. In such case, the Holdco group chairman will have a permanent right of attendance at the meetings of the committee without having the right to vote. The responsibilities of the Human Resources and Compensation Committee of Holdco will be determined by the Holdco board of directors.

Strategy Committee

The Strategy Committee will be chaired by the Holdco group chairman, and the Holdco group chief executive officer will be a member of the committee. The responsibilities of the Strategy Committee of Holdco will include submitting proposals to the Holdco board of directors regarding principal Holdco group and long-term strategy (including transformational mergers and acquisitions) and the strategic business plan.

Integration Committee

The Integration Committee will be chaired by the Holdco group chief executive officer, and the Holdco group chairman will be a member of the committee. The responsibilities of the Integration Committee of Holdco will include:

considering the integration policy and parameters developed by the Holdco group chief executive officer; and

submitting proposals to the board of directors as deemed necessary.

Technology Committee

The Technology Committee will be chaired by a Deutsche Börse director. The responsibilities of the Technology Committee of Holdco will be determined by the Holdco board of directors.

Management

It is expected that immediately following completion of the combination, the Holdco group chief executive officer will appoint the members of the Global Executive Committee of the Holdco group. The members of the Global Executive Committee will operate on the basis of powers attributed to them by the Holdco group chief executive officer. The composition of the Global Executive Committee, its tasks and responsibilities and the way of decision making will be as set out in the Rules for the Global Executive Committee, which are adopted by the Holdco group chief executive officer with the approval of the Holdco board of directors. Amendments to the Rules for the Global Executive Committee will require the approval of both the Holdco group chief executive officer and the Holdco board of directors and can therefore not be made by the Holdco group chief executive officer acting unilaterally. The members of the Global Executive Committee will execute the managerial responsibilities of the Holdco group's day-to-day business. Any appointment of members of the Global

Table of Contents

Executive Committee will be made by the Holdco group chief executive officer in close consultation with the Holdco group chairman and the Holdco board of directors. The Global Executive Committee will consist of eight members, including the Holdco group chief executive officer and seven other members. The only member of the Global Executive Committee who will serve as a director of Holdco will be Duncan L. Niederauer, the Holdco group chief executive officer. Other than the members of the Holdco board of directors and the Global Executive Committee, the Holdco group has no other senior managers who are relevant to establishing that Holdco has the appropriate expertise and experience for the management of Holdco's business within the meaning of EU Regulation No. 809/2004 Annex 1 No. 14. Based on the role attributed to it in the Rules for the Global Executive Committee, the Global Executive Committee will have, in particular, the following competencies and responsibilities:

management of the day-to-day business of the Holdco group and preparation of proposals for approval by the Holdco board of directors; and

reporting to the Holdco board of directors on a regular basis and supporting the Holdco board of directors in its decision-making, in particular with respect to the business plan and annual budget of the Holdco group, changes in legal structure and organization, business group and corporate center strategy and compensation and benefits principles.

Although the Global Executive Committee has the responsibilities set forth above, ultimate executive authority will rest with the Holdco group chief executive officer, including the powers set forth under the heading Governance and Management of the Holdco Group Holdco Group Chief Executive Officer.

The following table sets forth information as to those who are expected to be the members of the Global Executive Committee of the Holdco group upon completion of the combination.

Name	Title
Duncan L. Niederauer	Holdco Group Chief Executive Officer
Andreas Preuss	Head of Global Derivatives, President and Deputy Group Chief Executive Officer
Gregor Pottmeyer	Group Chief Financial Officer
Lawrence E. Leibowitz	Head of Global Cash Trading and Listings and Chief Operating Officer
Jeffrey Tessler	Head of Global Settlement and Custody
Dominique Cerutti	Head of Technology Services/IT and President
Frank Gerstenschläger	Head of Market Data and Analytics
John K. Halvey	Group General Counsel/Head of Legal

A-166

Table of Contents

The ages of each of the non-director members of the Global Executive Committee of Holdco as of the date of the publication of this document, as well as certain other biographical information about them, are set forth in the following table.

Name	Age	Present Principal Occupation or Employment, Employment History and Other Directorships
Andreas Preuss	54	Mr. Preuss will serve as Head of Global Derivatives, President and Deputy Group Chief Executive Officer of Holdco. Mr. Preuss has served as deputy chief executive officer of Deutsche Börse since 2008. Since 2006, Mr. Preuss has been a member of the management board responsible for the derivatives and market data division and the chief executive officer of Eurex Clearing AG, Eurex Frankfurt AG and Eurex Zürich AG. He has been a member of the management board of Eurex Services GmbH since 2007 and a member of the management board of Eurex Deutschland since 2006. From 2002 to 2006, Mr. Preuss served as the chief operating officer and member of the board and partner of the Mako Group in London. Mr. Preuss is a member of the board of directors of International Options Market Association, U.S. Futures Exchange, L.L.C. and World Federation of Exchanges. He serves as vice chairman of the board of directors of International Securities Exchange, L.L.C. and International Securities Exchange Holdings, Inc. and as the vice chairman of the supervisory board of Clearstream Holding AG. Mr. Preuss is also a member of the board of directors and shareholder director of Bombay Stock Exchange Limited.
Gregor Pottmeyer	48	Mr. Pottmeyer will serve as Group Chief Financial Officer of Holdco. Mr. Pottmeyer has been a member of the management board and chief financial officer of Deutsche Börse since 2009. From 2004 to 2009, Mr. Pottmeyer was a board member of Mercedes Benz Bank AG and was responsible for finance and risk management. From 2002 to 2005, Mr. Pottmeyer served as board member of DaimlerChrysler Bank AG and was responsible for finance and risk management. Mr. Pottmeyer serves as a member of the supervisory board of Clearstream Holding AG, Eurex Clearing AG, Eurex Frankfurt AG and Eurex Zürich AG. Mr. Pottmeyer is also a member of the board of directors of Clearstream International S.A.
Lawrence E. Leibowitz	50	Mr. Leibowitz will serve as the Head of Global Cash Tradings and Listings and Chief Operating Officer of Holdco. Mr. Leibowitz was appointed chief operating officer of NYSE Euronext in the first quarter of 2010. In this capacity, he is responsible for operations management, global cash execution and global listings. He previously served as group executive vice president and head of U.S. Execution and Global Technology from 2007 until 2009. He joined NYSE Euronext in 2007, having

A-167

Name	Age	Present Principal Occupation or Employment, Employment History and Other Directorships
Jeffrey Tessler	56	<p>served as managing director and chief operating officer, Americas Equities, at UBS Investment Bank. Prior to joining UBS in 2004, Mr. Leibowitz held the position of executive vice president, co-head of Schwab Capital Markets. He currently serves on the board of National Stock Exchange of India and has also served on many industry boards and committees, among them the Market Structure Committee of the former Securities Industry Association (now SIFMA).</p> <p>Mr. Tessler will serve as Head of Global Settlement and Custody of Holdco. In 2008, Mr. Tessler was appointed chief executive officer of Clearstream Holding AG. Since 2004, Mr. Tessler has served as a member of the management board of Deutsche Börse. In 2004, Mr. Tessler was appointed chief executive officer and president and chairman of the group executive management of Clearstream International S.A. Mr. Tessler was also appointed chief executive officer and chairman of the group executive management of Clearstream Banking S.A. in 2004. Mr. Tessler serves as chairman of the supervisory board of Clearstream Banking AG, deputy chairman of the board of directors of Clearstream International S.A., chairman of the board of directors of Clearstream Services S.A. and chairman of the Edmond Israel Foundation. Mr. Tessler also serves as a member of the board of directors of Clearstream Banking S.A. and SWIFT.</p>
Dominique Cerutti	50	<p>Mr. Cerutti will serve as Head of Technology Services/IT and President of Holdco. Mr. Cerutti was appointed president and deputy chief executive officer of NYSE Euronext in the first quarter of 2010. He joined NYSE Euronext on December 15, 2009 and was approved as deputy chief executive officer and head of global technology on December 31, 2009. Mr. Cerutti most recently served as general manager of IBM Southwest Europe. In this role, he led all of IBM's business operations, had full profit and loss responsibility and ensured risk management, compliance and business controls across IBM's business units in southern and western Europe. Mr. Cerutti was a member of IBM Chairman and CEO Sam Palmisano's Senior Leadership Team. Previously, he was general manager of IBM's Global Services in Europe, Middle East & Africa, based in Paris. In 1999, he was appointed executive assistant at IBM's New York headquarters to former IBM Chairman and CEO Louis V. Gerstner. Before joining IBM in 1986, Mr. Cerutti spent two years with Bouygues, a French civil engineering company, in Saudi Arabia.</p>

Name	Age	Present Principal Occupation or Employment, Employment History and Other Directorships
Frank Gerstenschläger	50	Mr. Gerstenschläger will serve as Head of Market Data and Analytics of Holdco. Mr. Gerstenschläger joined Deutsche Börse in 1995 and is a member of the management board responsible for the Xetra Division. Mr. Gerstenschläger is also the chairman of the management board of FWB Frankfurter Wertpapierbörse (the Frankfurt Stock Exchange). From 2003 to 2007, Mr. Gerstenschläger was the managing director responsible for technology services for Deutsche Börse. From 2002 to 2005, Mr. Gerstenschläger served as the chairman of the supervisory board of Silverstroke and was the chief executive officer of Entory AG. Mr. Gerstenschläger is currently a member of the supervisory board of Clearstream Banking AG. He is also a member of the board of directors of Scoach Holding S.A. and FESE Federation of European Securities Exchanges and a member of the executive board and the board of trustees of Frankfurt Main Finance E.V.
John K. Halvey	50	Mr. Halvey will serve as Group General Counsel/Head of Legal of Holdco. Mr. Halvey has served as group executive vice president and general counsel of NYSE Euronext since 2008. Mr. Halvey also serves on the supervisory board of Euronext N.V. Prior to joining NYSE Euronext in 2008, Mr. Halvey was a corporate partner with the international law firm of Milbank, Tweed, Hadley & McCloy, LLP from 1994 to 1999 and from 2001 to 2008. From 1999 to 2001, Mr. Halvey was executive vice president of Safeguard Scientifics, Inc. Mr. Halvey has practiced in all areas of corporate, technology and intellectual property law, with particular emphasis on information technology and business process related transactions and private equity transactions involving technology companies.

Conflicts of Interest

Pursuant to the provisions of the Dutch Corporate Governance Code and Holdco's Rules for the Board of Directors, directors will not participate in the discussions or the decision-making process on a subject or transaction in relation to which he or she has a conflict of interest with Holdco (which can be a direct or indirect personal interest that conflicts with the interests of Holdco). A director will in any event be deemed to have a conflict of interest with Holdco if: (1) he or she has a material personal financial interest in an entity that Holdco or a Holdco subsidiary intends to enter into a transaction with; (2) he or she is a family member of a member of the management of an entity that Holdco or a Holdco subsidiary intends to enter into a transaction with; (3) he or she holds a management or supervisory position in an entity that Holdco or a Holdco subsidiary intends to enter into a transaction with; or (4) the Holdco board of directors has ruled in its sole discretion that a conflict of interest exists. All transactions in which there are conflicts of interest with members of the Holdco board of directors must be concluded on terms that are at least customary in the sector concerned, and resolutions to enter into such transactions must be approved by Holdco's board of directors.

Each director is required to immediately report any potential conflict of interest concerning such director to the Holdco group chairman and must provide the Holdco group chairman with all information relevant to the

Table of Contents

conflict of interest. Unless the Holdco board of directors determines that a conflict of interest exists, the Holdco group chairman will determine whether a reported potential conflict of interest qualifies as a conflict of interest under the relevant provisions of Holdco's Rules for the Board of Directors. In the event that the Holdco group chairman has a potential conflict of interest, he or she is required to immediately report such potential conflict to the chairman of the Audit, Finance and Risk Committee and provide him or her with all information relevant to the conflict of interest. The Holdco board of directors will determine whether a reported (potential) conflict of interest in respect of the Holdco group chairman qualifies as a conflict of interest under the relevant provisions of Holdco's Rules for the Board of Directors.

In the event of a conflict of interest between Holdco and one of the members of the Holdco board of directors, the Holdco board of directors or the Holdco group chief executive officer, as the case may be, will nonetheless be authorized to represent Holdco, unless the general meeting of shareholders has designated one or more persons to represent Holdco in such case.

Holdco, Deutsche Börse and/or NYSE Euronext are considering the individuals (as far as their names are already known and mentioned herein) they expect to designate to become members of the Holdco board of directors, as well as the individuals who are expected to become the members of the Global Executive Committee. Based on such considerations Holdco has determined that:

All of the non-executive directors on Holdco's board of directors are expected to be independent within the meaning of the Dutch Corporate Governance Code (as far as their names are already known and mentioned herein).

There are no conflicts of interest or potential conflicts of interest of the potential members of the Holdco board of directors or members of the Global Executive Committee regarding their duties towards Holdco, and their private interests or other duties other than any conflicts of interest or potential conflicts of interest as described in Proposal 1: The Combination Proposal Interests of NYSE Euronext Directors and Executive Officers in the Combination, Proposal 1: The Combination Proposal Interests of Deutsche Börse Supervisory and Management Board Members in the Combination, Business of Deutsche Börse Group and Certain Information about Deutsche Börse Group Supervisory Board and Management Board and Business of NYSE Euronext and Certain Information about NYSE Euronext Compensation Discussion and Analysis.

There are no service agreements between Holdco or the entities that are expected to become subsidiaries of Holdco as a result of the combination, on the one hand, and any of the potential Holdco board members who have been interviewed, on the other hand, that provide for concessions in the event of the termination of the service agreement, and none of the entities that are expected to become subsidiaries of Holdco as a result of the combination have granted any loans to such individuals or have drawn on any loans from such individuals.

None of the potential Holdco board members or members of the Global Executive Committee have, during the last five years, been convicted of any fraudulent crime or have for at least the previous five years been party to any bankruptcies, receiverships or liquidations of a commercial company or partnership in which they acted as a member of the Board of Directors or the Management Committee.

None of the aforementioned persons was the subject of official public incrimination or sanctions by statutory or regulatory authorities (including designated professional bodies) or was disqualified by a court from acting as a member of an administrative, management or supervisory body of an issuer or from acting in the management or conduct of affairs of any issuer during at least the previous five years.

No family relationships exist among the potential Holdco board members or members of the Global Executive Committee.

Table of Contents***Compensation of Directors and Executive Officers***

Holdco has not yet paid any compensation to its directors, executive officers or other managers. The form and amount of the compensation to be paid to each of Holdco's directors, executive officers and other managers will be determined by the Holdco board of directors in line with the remuneration policy to be adopted by Holdco's general meeting of shareholders as soon as practicable prior to or following the completion of the combination. For historical compensation information about executive officers and directors of Deutsche Börse and NYSE Euronext, see Business of Deutsche Börse Group and Certain Information about Deutsche Börse Group Supervisory Board and Management Board and Business of NYSE Euronext and Certain Information about NYSE Euronext Compensation Discussion and Analysis.

Principal Shareholders

The following table sets forth information, as of the date of the publication of this document, regarding the beneficial ownership of Holdco shares, after giving effect to the combination and the post-completion reorganization, of:

each person that will be a beneficial owner of more than 5% of Holdco shares;

each member of the Holdco board of directors;

each member of the Global Executive Committee of the Holdco group; and

all members of the Holdco board of directors and members of the Global Executive Committee of the Holdco group, taken together. Beneficial ownership is determined under the rules of the SEC and generally includes voting or investment power over securities. Except in cases where community property laws apply or as indicated in the footnotes to this table, Holdco believes that each shareholder identified in the table possesses sole voting and investment power over all Holdco shares shown as beneficially owned by that shareholder. Percentage of beneficial ownership is based on the approximately 318.0 million Holdco shares that would be outstanding immediately following the combination assuming all Deutsche Börse shares are exchanged in the exchange offer and, in the case of individuals who are expected to become directors and members of the Global Executive Committee of the Holdco group, on their ownership of Deutsche Börse shares and NYSE Euronext shares as of March 1, 2011.

A-171

Table of Contents

Corporate Purpose

Following completion of the combination, Holdco's purpose pursuant to article 3 of its articles of association will be:

to incorporate, to participate in any way whatsoever in, to manage, to supervise businesses and companies, including without limitation businesses and companies of which the objects are to set up, develop, hold and operate, directly or indirectly, one or more exchanges or markets or other facilities with regard to the listing of, the trade in, the clearing and settlement of transactions in, and the custody of, securities and derivatives;

to finance and/or acquire businesses and companies;

to borrow, to lend and to raise funds, including through the issue of bonds, debt instruments or other securities or evidence of indebtedness as well as to enter into agreements in connection with aforementioned activities;

to render advice and services to businesses and companies with which Holdco forms a group and to third parties;

to grant guarantees, to bind Holdco and to pledge its assets for obligations of businesses and companies with which it forms a group and on behalf of third parties;

perform any and all activities of an industrial, financial or commercial nature;
and to do all that is connected therewith or may be conducive thereto, all to be interpreted in the broadest sense.

Corporate Governance

Dutch Corporate Governance Code

On December 10, 2008, the Dutch Corporate Governance Committee promulgated the amended Dutch Corporate Governance Code. The Dutch Corporate Governance Code contains principles and best practice provisions for management boards or supervisory boards (or, as the case may be, one-tier board of directors), shareholders and general meetings of shareholders, financial reporting, auditors, disclosures and compliance and enforcement standards for Dutch listed companies. The Dutch Corporate Governance Code will apply to Holdco as from the start of the financial year, which coincides with the calendar year, in which its shares are admitted to trading on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris or any other government-recognized stock exchange.

Dutch companies listed on a government-recognized stock exchange, including the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris, are required to disclose in their annual reports whether or not they apply the provisions of the Dutch Corporate Governance Code that are addressed to their management board or supervisory board (or, as the case may be, their one-tier board of directors) and, if they do not apply, to explain the reasons why. The Dutch Corporate Governance Code provides that if a company's general meeting of shareholders explicitly approves the corporate governance structure and policy and endorses the explanation for any deviation from the best practice provisions, such company will be deemed to have applied the Dutch Corporate Governance Code.

As of the completion of the combination, Holdco will apply all of the relevant provisions of the Dutch Corporate Governance Code with the following deviations which, together with the reasons for those deviations, are set forth below. Although these deviations will be disclosed in Holdco's annual reports, they have not yet been explicitly approved at the annual general meeting of shareholders.

In deviation from best practice provision II.1.1 and III.3.5 of the Dutch Corporate Governance Code, provided Holdco qualifies as a foreign private issuer as defined in Rule 3b-4(c) promulgated under the U.S. Securities Exchange Act, the Holdco group chief executive officer and Holdco group chairman may be appointed

A-172

Table of Contents

for a term ending at the end of the annual general meeting in 2016, deviating from the principle that management board members and supervisory board members may be appointed for a maximum term of four years.

Pursuant to best practice provision IV.1.1 of the Dutch Corporate Governance Code, a general meeting of shareholders should be empowered to overrule binding nominations of candidates for appointment to the board of directors and to dismiss members of the board of directors by an absolute majority of the votes cast, although the company may require that such a majority represents a minimum number of outstanding shares, which number may not exceed one-third of the issued capital. If an absolute majority of the votes cast is in favor of the proposal but this majority does not represent the minimum number of shares required, a second meeting may be convened at which the resolution may be passed by an absolute majority of the votes cast, without any minimum requirement. Holdco's articles of association as will be in effect following completion of the combination state that the general meeting of shareholders may overrule a binding nomination (pursuant Section 2:133 of the Dutch Civil Code) and may suspend or dismiss a member of the Holdco board of directors, in each case by a resolution adopted by a two-thirds majority of the votes cast representing more than half of Holdco's issued capital. If the votes in favor do not represent at least half of Holdco's issued capital, there will not be a second meeting for consideration of the resolution. Although this is a deviation from best practice provision IV.1.1 of the Dutch Corporate Governance Code, Holdco takes the view that these provisions will enhance the continuity of Holdco's management and policies.

Dividend Policy

Following completion of the combination, Holdco's articles of association will provide for a preferred dividend to be paid on each outstanding preference share (if any) out of the profits earned in a financial year. After this dividend is paid, the Holdco board of directors will, in its sole discretion, determine which part of the profits remaining will be reserved. The allocation of profits remaining on Holdco shares will be determined by the general meeting of shareholders provided that no further distributions will be made on the preference shares. Holdco currently has no intention to issue preference shares.

Other Aspects of Holdco's Articles of Association

For a description of other aspects of Holdco's articles of association that will be in effect as of completion of the combination, see Description of the Shares of Holdco.

Information About Holdco Before the Combination

The information provided below pertains to Holdco prior to the completion of the combination. To date, Holdco has not conducted any material activities other than those incident to its formation and the matters contemplated by the business combination agreement, such as the formation of Pomme Merger Corporation (a wholly owned subsidiary of Holdco), the making of certain required securities law filings and the preparation of this document. The management of Holdco has not resolved to make any future investments other than in relation to the business combination.

It is expected that prior to the completion of the combination, Holdco's general meeting of shareholders will resolve to completely revise Holdco's current articles of association. The amendment of Holdco's current articles of association will take effect through the execution of a notarial deed of amendment immediately prior to the completion of the combination.

The following information about Holdco or Holdco's current articles of association should be read in conjunction with relevant provisions of Dutch law.

Incorporation, Name, Seat, Fiscal Year

Holdco was incorporated as a public limited liability company (*naamloze vennootschap*) under the laws of the Netherlands on February 10, 2011, by Herengracht Financial Services B.V. with an issued share capital of

Table of Contents

45,000 fully paid up in cash. Holdco is registered with the Dutch Trade Register of the Chamber of Commerce under the registration number 52019756 under the legal name Alpha Beta Netherlands Holding N.V. Holdco currently does not use a commercial name different from its legal name.

See Description of the Shares of Holdco for more information regarding Holdco's share capital.

Holdco has been formed for an unlimited duration.

Holdco's official seat (*statutaire zetel*) is in Amsterdam, the Netherlands and its business address is Beursplein 5, 1012 JW Amsterdam, the Netherlands (tel. +31 (0) 20 550-4444).

As a public limited liability company incorporated in the Netherlands, Holdco is subject to the laws of the Netherlands.

Holdco's fiscal year is the calendar year.

Employees

As of the date of the publication of this document, Holdco has no employees.

Sole Shareholder

Stichting Alpha Beta Netherlands, a foundation incorporated and existing under the laws of the Netherlands, is currently the sole shareholder of Holdco.

Directors and Management

Holdco is currently managed by a management board with two managing directors, one designated by Deutsche Börse and one by NYSE Euronext. Decisions of the management board prior to the completion of the combination may only be made by both managing directors acting jointly.

The following individuals are currently the sole managing directors of Holdco:

Name	Age	Present Principal Occupation or Employment, Employment History and Other Directorships
Marcus P. Thompson	47	Mr. Thompson joined Deutsche Börse in 2000 and is currently Managing Director, responsible for financial accounting and controlling. He is a member of the management boards of Clearstream Holding AG, Clearstream Banking S.A., Finnovation S.A. and Risk Transfer Re S.A., and the supervisory board of Clearstream Banking AG. From April 2003 to December 2009, he was a board member of Deutsche Börse Finance S.A. and from March 2010 until March 2011, a member of the Supervisory Board of Deutsche Börse Systems AG. From April 2007 until September 2009, he acted as liquidator of Deutsche Börse IT Holding. He is a member of the Institute of Chartered Accountants in England and Wales.

Table of Contents

Name	Age	Present Principal Occupation or Employment, Employment History and Other Directorships
Stéphane Biehler	43	Stéphane Biehler has been NYSE Euronext's chief accounting officer and corporate controller since December 2007. In this capacity, he is responsible for all accounting, tax, and internal controls over financial reporting, as well as global consolidation and external reporting functions. Mr. Biehler previously served as corporate controller of NYSE Group since March 2006. Mr. Biehler joined Archipelago as corporate controller in March 2004.

Messrs. Biehler and Thompson will resign upon appointment of the members of the Holdco board of directors.

The managing directors of Holdco can be reached at Holdco's business address: Beursplein 5, 1012 JW Amsterdam, The Netherlands (phone number: +31(0) 20550-4444).

Certain Information on the Members of the Management Board

During the previous five years, no member of the management board has been convicted of any fraudulent offenses. In addition, no member of either board has been publicly incriminated or sanctioned by statutory or regulatory authorities (including professional associations) or, acting in the capacity of a member of a management or supervisory entity or as founder of an issuer, been associated with any bankruptcies and/or insolvencies, receiverships or liquidations, except that Mr. Thompson acted as the liquidator of Deutsche Börse IT Holding GmbH and was a board member of Deutsche Börse Finance S.A. prior to its orderly liquidation. No member of the management board has ever been deemed by a court to be unfit for membership in a management or supervisory entity of a company or to be unfit to exercise management duties for or manage the business of an issuer during the previous five years.

No family relationships exist among the members of the management board.

There are no service contracts between members of the management board and Holdco or any of its subsidiaries providing for benefits upon termination of employment.

Non-existence of Other Senior Management

Other than the members of the management board, Holdco has no other senior manager who is relevant to establishing that Holdco has the appropriate expertise and experience for the management of its business in the meaning of EU Regulation No. 809/2004 Annex I No. 14.

Conflicts of Interest

There are, to Holdco's knowledge, no conflicts of interest or potential conflicts of interest between the duties of members of the management board to Holdco and their private interests or other duties. No member of the management board has entered into any service contract with Holdco, Deutsche Börse or NYSE Euronext providing for special benefits upon termination of employment.

Committee

Holdco has not yet established an audit committee or a remuneration committee.

Table of Contents

Corporate Governance

The Dutch Corporate Governance Code will apply to Holdco as from the start of the financial year, which concurs with the calendar year, in which its shares are admitted to trading on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris or any other government-recognized stock exchange, see [Information on Holdco after the combination](#) [Corporate Governance](#) .

Articles of Association of Holdco Before the Combination

Corporate Purpose

Pursuant to article 3 of Holdco's current articles of association, Holdco's purpose is:

to incorporate, to participate in any way whatsoever in, to manage, to supervise businesses and companies;

to finance businesses and companies;

to borrow, to lend and to raise funds, including the issue of bonds, debt instruments or other securities or evidence of indebtedness as well as to enter into agreements in connection with aforementioned activities;

to render advice and services to businesses and companies with which Holdco forms a group and to third parties;

to grant guarantees, to bind Holdco and to pledge its assets for obligations of businesses and companies with which it forms a group and on behalf of third parties;

to acquire, alienate, encumber, manage and exploit registered property and items of property in general;

to trade in currencies, securities and items of property in general;

to exploit and trade in patents, trademarks, licenses, knowhow, copyrights, database rights and other intellectual property rights;

perform any and all activities of an industrial, financial or commercial nature;
and to do all that is connected therewith or may be conducive thereto, all to be interpreted in the broadest sense.

Transfer of Shares

Holdco's current articles of association provide that unless all shareholders have granted permission for the intended transfer in writing, a transfer of any Holdco shares can only be effected after the Holdco shares have been offered for sale to the other Holdco shareholders. The price for which the offered shares can be purchased by the interested parties will be set by the offeror and the interested parties in joint consultation or by one or more experts designated by them.

Amendment of the Articles of Association

Edgar Filing: NYSE Euronext - Form 425

Holdco's current articles of association may be amended by a resolution adopted by the general meeting of shareholders.

General Meetings of Shareholders

The annual general meeting of shareholders will be held within six months after the end of the financial year. Notice of annual general meetings of shareholders will be given by the management board of Holdco. Shareholders alone or jointly representing in the aggregate at least one-tenth of Holdco's issued capital may request the management board to convene a general meeting of shareholders, stating specifically the business to be discussed.

A-176

Table of Contents

Right of Preemption

Upon issuance of new Holdco shares, each holder of Holdco shares will have a right of preemption in proportion to the aggregate nominal value of such shareholder's Holdco shares. Prior to each single issuance of shares, the rights of preemption may be limited or excluded by a resolution adopted at an annual general meeting of shareholders provided that the power to limit or exclude preemption rights may be delegated to the management board. U.S. holders of Holdco shares should be aware that their ability to exercise preemption rights may be limited unless a registration statement under the Securities Act has been filed to register the offering of preemptive rights with the SEC.

Dividends and Distributions

Prior to completion of the combination, out of the profits earned in a financial year, primarily and insofar as possible, an amount of one eurocent (0.01) is paid on each D Share. The allocation of any profits remaining after such distributions on the D shares will be determined by Holdco's general meeting of shareholders, provided that no further distributions of profits will be made on D Shares. It is contemplated that on or about the same date of the issuance of Holdco shares as described in Description of the Shares of Holdco Authorized and Issued Share Capital After Completion of the Combination, after the issue of such shares, the D Shares will be cancelled or repurchased and subsequently cancelled by Holdco. Distributions on shares may only be made after adoption of the annual accounts if permissible under the laws of the Netherlands given the contents of the annual accounts and only up to an amount that does not exceed the part of Holdco's equity that exceeds the aggregate of the issued capital and the reserves, which must be maintained pursuant to the laws of the Netherlands. The general meeting may resolve to make interim distributions and/or to make distributions at the expense of any reserve of Holdco provided that the applicable statutory requirements are met.

Dividend History

Holdco has been recently incorporated and has paid no dividends.

Information about Holdco's Material Subsidiaries

At the date of the publication of this document, Holdco does not hold any equity interest in any other legal entity, except for Pomme Merger Corporation. For information regarding any equity interests held after the completion of the combination, see The Business Combination Agreement Structure of the Combination.

Auditor of Holdco's Financial Statements

In connection with the completion of the combination, Holdco expects to appoint a member firm of either KPMG AG Wirtschaftsprüfungsgesellschaft, Klingelhöferstraße 18, 10785 Berlin, Germany, being the auditor of Deutsche Börse, or PricewaterhouseCoopers LLP, 300 Madison Avenue, New York, New York 10017, United States of America, being the auditor of NYSE Euronext, as the statutory auditor of Holdco's annual financial statements for the fiscal year 2011 and of Holdco's annual consolidated financial statements for the fiscal year 2011.

Table of Contents**SELECTED FINANCIAL INFORMATION OF HOLDCO**

Holdco was formed on February 10, 2011. Accordingly, the financial statements as of the date of the publication of this document only consist of the audited opening balance sheet and corresponding notes. As Holdco had no operations as of February 10, 2011, Holdco omitted the statement of comprehensive income, statement of cash flows and statement of changes in equity thereto.

The following table shows the audited opening balance sheet of Holdco as of February 10, 2011:

	EUR

INDUSTRY AND COMPETITION

Market Overview

Deutsche Börse Group and NYSE Euronext operate cash trading markets for equity and fixed income securities as well as derivatives markets across Europe and the United States and provide listing and other related services, including market data and information as well as technology services. In addition, the companies offer post-trade services, namely clearing as well as settlement and custody services.

Listing and Trading

Securities exchanges provide primary and secondary listing services to companies that are seeking to have their securities admitted to trading. Listing is a necessary pre-condition to the trading of equities on an exchange. By listing its securities, an issuing company gains access to the capital markets.

On the cash trading venues operated by Deutsche Börse Group and NYSE Euronext, equities, fixed income securities, as well as exchange-traded funds, exchange-traded commodities, exchange-traded notes, actively managed funds and certificates, convertibles and warrants, whose values depend on a variety of underlying assets, are traded.

On the derivatives trading venues operated by Deutsche Börse Group and NYSE Euronext, a wide range of financial instruments, including options and futures, whose value depends on an underlying asset such as an individual equity or fixed income security, index, commodity or currency, are traded.

Post-trade Services

Clearing as well as settlement and custody are post-trade services that are used to implement and complete transactions. Securities clearing, which takes place between trade matching and settlement, includes netting, enrichment of trades with information required for settlement (*e.g.*, settlement account information) as well as the validation of the existence of sufficient money and securities. Securities clearing also includes the services of a central counterparty which acts as counterparty to both buyers and sellers and manages the counterparty risks resulting in margin requirements for clearing members to cover their net risk exposure. Settlement involves the effective transfer of securities and cash between the counterparties to the trade. The same processes generally apply to derivatives, except that derivatives are generally cash settled. Custody services cover the secure and reliable asset safekeeping of certified securities on behalf of the owners, the handling of payments and notifications to the owner of the securities including, handling of corporate actions and dividend re-investments. The custodian holds in its custody accounts cash and equity and fixed income securities and all the other securities listed above under Listing and Trading.

Related Services

In addition, operators of trading platforms provide related services, such as information services and technology services.

Market data and information services focus on producing, collecting, refining, marketing and distributing to capital market stakeholders financial data, including order book information, price data, trading volumes and statistics and analyses as well as the development, calculation and dissemination of indices.

Finally, Deutsche Börse Group and NYSE Euronext have developed technology solutions which they offer to, for example, other securities exchanges or market participants. These services relate to the development, implementation and operation of technology solutions for financial markets participants, such as, for example, electronic trading or market data platforms and related software.

Table of Contents

Market and Trends

The past decade has seen extraordinary changes in the competitive and commercial environment in which Deutsche Börse Group and NYSE Euronext operate. Globalization of trading, the introduction of an array of new trading platforms and clearing houses, the financial crisis and significant regulatory initiatives have transformed the competitive landscape. Issuers, investors, and intermediaries have become increasingly insistent that exchange operators provide open, efficient, and competitive global marketplaces that allow for the trading of multiple products from around the world. This globalization has enabled financial centers to emerge not only in traditional places such as Europe and the U.S., but also more recently in Asia.

Equities trading has historically been fragmented along national lines. Recent years have seen growing demands from large customers who are rapidly globalizing their own business models. These customers seek global markets, where they can trade across continents, time zones and instruments, and increasingly view the fragmented nature of major cash equity markets as anachronistic.

As to the trading of derivatives, the universe of derivatives instruments has been steadily broadened through innovation by market participants and operators. That universe today consists of numerous substitute and complementary products. Collectively, these instruments have developed into a main pillar of the international financial system and the economy as a whole. They can be used to hedge risks and therefore contribute to economic growth. The derivatives market has a global character, mainly populated by professional wholesale traders such as banks and investment firms. These players trade across geographies and time zones, giving rise to a market globally worth a three digit trillion Euro figure by notional value outstanding, of which an estimated 80% to 90% exists over-the-counter (which is referred to in this document as OTC) or off-exchange.

As demonstrated especially during the market turbulence of the recent economic crisis, on-exchange infrastructures have proven to be safe, stable, and resilient, with transparency in price discovery, neutrality, and effective risk management. The further convergence of OTC and on-exchange trading is widely anticipated in light of the regulatory pressure for the clearing of OTC-traded derivatives.

Competition

The competitive environment has undergone, and continues to undergo, transformational changes triggered by market participants, investors, infrastructure operators, and regulators, as well as intensifying competition. These changes have transformed the businesses of Deutsche Börse Group and NYSE Euronext. These developments include:

Technological developments, including the introduction of new information and communication technologies that have made financial markets more efficient, more accessible and easier to establish. Traders around the globe can and do easily access the world's financial markets, and are better able to come together to form new trading platforms. The past decade has seen the emergence of new professional traders, who account for an increasingly large proportion of trading. By using advanced computer algorithms, these traders rapidly shift liquidity from market-to-market on a global basis as they seek to exploit opportunities resulting in a more efficient global marketplace.

The enactment of Regulation ATS and Regulation NMS in the United States, combined with the sophisticated development of trading and routing technology have dramatically lowered the barriers to entry into the U.S. cash trading business, resulting in the fragmentation of trading and the development of significant competition, which is expected to intensify in the future. Current and prospective competitors include regulated markets, electronic communication networks, dark pools and other alternative trading systems, market makers and other execution venues. NYSE Euronext and Deutsche Börse also face growing competition from large brokers and customers that may assume the role of principal and act as counterparty to orders originating from retail customers, or by matching their respective order flows through bilateral trading arrangements.

Table of Contents

The entry into force of the MiFID which has changed the competitive landscape for trading of equities in Europe. It has facilitated the emergence of a large number of multilateral trading facilities, including Chi-X, BATS, Turquoise and Equiduct, which compete intensely with, and have taken significant liquidity from, regulated equities exchanges. These new trading platforms, have been supported by a number of new European clearing service providers, including European Multilateral Clearing Facility N.V. (which is referred to in this document as EMCF) and EuroCCP. OTC trading that is conducted internally by banks and other users further adds to the fragmentation of trading volume. Part of that OTC volume is conducted on Broker Crossing Networks (which are referred to in this document as BCNs) which operate with less transparency and far fewer regulatory requirements.

Regulatory developments, beginning first with the so-called Code of Conduct, have gained momentum following the financial crisis, and in particular, the EU Commission's proposed EMIR envisages mandatory clearing of certain derivatives trades currently executed OTC. EMIR is widely expected to lead to further convergence and competition between exchange-traded and OTC-traded derivatives. In anticipation of this trend, IntercontinentalExchange launched a European clearing house in 2008 (where it began to clear credit default swaps in July 2009) and in 2010, the London Stock Exchange announced its intention to offer derivatives trading by June 2011 and the Chicago Mercantile Exchange has announced its plans for a new clearinghouse and exchange. In 2011, BATS announced its acquisition of Chi-X and that it too was planning to offer derivatives trading in Europe.

Deutsche Börse Group and NYSE Euronext are increasingly facing globally active market operators from Asia and emerging markets, such as the Hong Kong Exchanges and Clearing Limited, the imminent combination of Singapore Stock Exchange and Australian Stock Exchange, and the Brazilian BM&F Bovespa. Certain of these exchanges have already surpassed Deutsche Börse Group and NYSE Euronext in terms of their valuation as enterprises. Finally, in addition to its announcement to move into the derivatives markets by June 2011, the London Stock Exchange Group announced its merger with the Canadian TMX Group, underlining the trend towards globalization of both markets and market operators. In the derivatives market, alternative trading venues that will compete with established exchanges for order flow are expected to emerge as new market entrants, especially in single equity derivatives (for example, Chi-X or TOM).

In derivatives, the formation of the CME Group in 2007 brought together the derivatives exchanges of the Chicago Board of Trade and the Chicago Mercantile Exchange to create the world's leading derivatives exchange. CME Group is a formidable competitor that already remotely delivers its services to European customers over electronic networks and is in the process of expanding its physical presence into Europe through a subsidiary company, CME Clearing Europe, which received regulatory approval in the UK in December 2010.

OTC trading nevertheless continues to account for approximately 80% to 90% of world-wide notional value of derivatives outstanding. More and more, large global users (in particular the world's leading banks and hedge funds) exert their influence over market structures by trading off-exchange building trading platforms, such as broker crossing networks that bypass traditional exchanges entirely or internalizing order flow from retail clients.

Several new European clearing providers such as EMCF and EuroCCP now provide post-trade clearing services especially to multilateral trading facilities. In addition, certain post-trade business is expected to shift from traditional service providers, in particular the national central securities depositories to the emerging central European settlement infrastructure TARGET2 Securities, at the same time fuelling competition between the national central securities depositories for the remaining services.

Among U.S. equity options exchanges, the barriers to entry have been reduced substantially in the past decade with advances in trading technology and the development of standardized equity options traded across all exchanges. As a result, the launch of several new exchanges, including BOX, the Nasdaq Options Market and BATS, has fractured and eroded the market shares of established exchanges like CBOE and NYSE Amex.

Table of Contents

Combined with a dramatic increase in the volume of equity options traded, these developments have resulted in intense competition that has driven down execution fees and spurred further technological development. This competition has been evident in substantial shifts in market share that have accompanied changes in the fee structure and functionality of each exchange. The new entrants have been particularly aggressive in seeking to gain a foothold against the incumbents. As a result, users now have access to more liquid equity options markets with lower execution fees and tighter quoted prices.

Finally, there continues to be strong regulatory and prudential pressure for greater market transparency, and concern over alternative trading platforms that operate with less transparency and fewer regulatory requirements at a time of increasing globalization and interconnectedness of the world's capital markets.

Table of Contents**BUSINESS OF DEUTSCHE BÖRSE GROUP****AND CERTAIN INFORMATION ABOUT DEUTSCHE BÖRSE GROUP****Overview**

Deutsche Börse has its principal office in Eschborn, near Frankfurt am Main, Germany. As at December 31, 2010, Deutsche Börse Group employed 3,490 people in 19 locations in 15 countries. As of March 31, 2011, Deutsche Börse Group employed 3,507 people. In 2010, Deutsche Börse Group generated total revenues on a consolidated basis of 2,226.7 million (2009: 2,289.7 million; 2008: 2,758.6 million).

As one of the largest exchange organizations worldwide, Deutsche Börse Group offers its customers a broad range of products and services. These cover the entire value chain of financial market transactions, from trading and clearing of securities, including derivatives, through transaction settlement, custody and collateral management and providing of market information, to the development and operation of electronic trade and clearing systems.

Deutsche Börse Group realigned its segment structure effective January 1, 2010. Deutsche Börse Group's business activities are currently divided into four segments: Xetra, Eurex, Clearstream and Market Data & Analytics:

Reporting Segment

Reporting Segment	Business Areas
Xetra	Cash market using the Xetra electronic trading system and floor trading Central counterparty for equities (Eurex Clearing) Admission of securities to listing
Eurex	Electronic derivatives market trading platform Eurex Electronic equity options trading platform ISE Over-the-counter (OTC) trading platforms Eurex Bonds and Eurex Repo Central counterparty for bonds, derivatives and repo transactions (Eurex Clearing)
Clearstream	Custody, administration and settlement services for domestic and foreign securities Global securities financing services Investment funds services
Market Data & Analytics	Sale of price information and information distribution Index development and sales

History and Development

Deutsche Börse's origins date back to 1585 – the hour of birth of Frankfurt's exchange – when an assembly of Frankfurt's merchants initiated uniform exchange rates for the first time. Their aim was to create transparency, to the same extent as today. In 1605, a new name for the merchants' assembly appeared in the records for the first time, *Burs*, meaning *exchange*. In 1808, deputies of the Frankfurt merchants' assembly formed the Frankfurt Chamber of Commerce. After 223 years as a private institution, operated by a number of merchants, the stock exchange was taken over by the Chamber of Commerce, thus making the stock exchange a public-sector institution. In 1969, the digital age was launched at Frankfurter Wertpapierbörse. Since that time, Traders have been able to process securities transactions electronically by BÖGA, a computer

Edgar Filing: NYSE Euronext - Form 425

system for processing stock exchange transactions. One year later, exchange member firms were able to communicate with the exchange computer system via telex.

A-183

Table of Contents

On August 1, 1990, Frankfurter Wertpapierbörse AG (the Frankfurt Stock Exchange) was registered in the commercial register. Frankfurter Wertpapierbörse AG took on responsibility for the operation of the Frankfurt Stock Exchange from the Frankfurt Chamber of Commerce and Industry (IHK). In December 1992, it changed its name to Deutsche Börse Aktiengesellschaft. In 1991, the Frankfurt Stock Exchange rolled out IBIS, an integrated exchange trading and information system for the cash market. IBIS was a hit-and-take market, on which orders were not automatically executed against each other; instead, the traders selected orders available in the system. In 1993, BOSS-CUBE, a system for electronically consolidating order routing, price determination and processing, was implemented across Germany, thereby giving floor trading full electronic support for the first time on the Frankfurt Stock Exchange. Its electronic trading platform for the cash market Xetra was subsequently launched in November 1997 and replaced the IBIS system. In the following year, in June 1998, the derivatives market Eurex was established as a joint venture between Deutsche Börse and the Swiss Stock Exchange SWX by combining their derivative exchanges DTB Deutsche Terminbörse and SOFFEX Swiss Options and Financial Futures Exchange. Subsequently, in January 2000, Deutsche Börse Clearing AG and Cedel International S.A. merged to form Clearstream International S.A., a company incorporated under the laws of Luxembourg, which together with its subsidiaries, provide securities post-trade services except for clearing. These services include transaction settlement, administration and custody of securities, banking services in support of settlement operations, securities financing and collateral management and investment fund services. Deutsche Börse initially held a 50% stake in the joint venture.

In connection with its IPO in February 2001, shares of Deutsche Börse were admitted to trading on the Frankfurt Stock Exchange. Following its capital increase in June 2002, Deutsche Börse acquired all shares of Clearstream International S.A., which since then integrated into Deutsche Börse Group. Deutsche Börse shares were included in the DAX index as of December 2002. In March 2003, Deutsche Börse Group introduced the central counterparty for cash equities for share trading on Xetra and on the trading floor of the Frankfurt Stock Exchange. The CCP provides counterparty risk management mitigation and enables for the netting of transactions and therefore increases settlement efficiency in cash equity trading. In 2007, Deutsche Börse was included in the EURO STOXX 50® Index, Europe's leading benchmark index. In the same year, Eurex completed the acquisition of the U.S. options exchange International Securities Exchange Holdings, Inc. (ISE), creating the largest transatlantic marketplace for derivatives. In order to strengthen its position in the international index business, Deutsche Börse raised its equity investment in index provider STOXX Ltd. from 33% to 50% in 2009. Further acquisitions and co-operations in Europe and other regions of the world were made and entered into, respectively, in order to complement the services the Deutsche Börse Group offers to its customers.

On March 31, 2011 Eurex Zürich AG announced that its shareholding in EEX will increase from 35.23% to 56.14%. Now that the transaction has been approved by the relevant supervisory bodies, including the EEX supervisory board, all of the conditions for the immediate execution of the transaction have been fulfilled. The transaction was closed on April 12, 2011.

Geographical Presence

After completing the construction of the new Deutsche Börse principal office in Eschborn, Germany, the majority of employees from the Frankfurt area relocated from Frankfurt-Hausen to the new office building in the second half of 2010.

During the past few years, measures have been taken to set up and develop operations in Prague. International teams work there on the Group's IT services and it is the home of one of Clearstream's operations centers.

Since late 2008, Deutsche Börse Group has had an office in Beijing. Eurex also opened representative offices in Hong Kong, Tokyo and Singapore in 2009. In the same year, Clearstream established a new subsidiary in Singapore, making it Clearstream's fifth operations center after Eschborn, Luxembourg, London and Prague. Since January 18, 2011, the Singapore office holds the status of a branch as Eurex Frankfurt Aktiengesellschaft Singapore Branch.

Table of Contents

As at December 31, 2010, Deutsche Börse Group employed people at 19 locations around the world primarily in Germany, Luxembourg, the United Kingdom, the Czech Republic and the United States. In Europe, Deutsche Börse Group is located at Berlin, Frankfurt/Eschborn, London, Luxembourg, Madrid, Moscow, Paris, Prague and Zürich. In Asia and North America, Deutsche Börse Group maintains 10 offices in Beijing, Chicago, Dubai, Hong Kong, New York, Ottawa, Shanghai, Singapore, Tokyo and Washington D.C.

Business Segments

Deutsche Börse Group's business activities are composed of the following segments: Xetra, Eurex, Clearstream and Market Data & Analytics. Deutsche Börse Group realigned its segment structure effective January 1, 2010 by integrating the former Information Technology and Corporate Services segments into the remaining segments.

Xetra supports the trading and listing of cash market securities on the Frankfurt Stock Exchange as well as other European and international markets. Eurex, the derivatives market, provides for the trading of futures and options and the Eurex Clearing house performs central counterparty clearing and risk management for derivatives, equities, repo, energy and fixed income transactions. Clearstream is responsible for the settlement, safekeeping and administration of securities. The Market Data & Analytics segment collects and distributes financial market data and indices. Deutsche Börse Group's business has no significant seasonality.

Deutsche Börse itself operates the cash market of Frankfurt Stock Exchange. Through its equity investment in Scoach Holding S.A., Deutsche Börse also offers trading in structured products (*e.g.*, certificates and warrants). Furthermore, Deutsche Börse owns a 75% plus one share holding in Tradegate Exchange GmbH, which operates Tradegate Exchange, a Berlin-based stock exchange specially tailored to the requirements of private investors.

Through Eurex Zürich AG and its subsidiaries, Deutsche Börse Group also operates derivatives markets in Europe (Eurex Deutschland and Eurex Zürich) and the United States (International Securities Exchange, ISE) and offers clearing services (Eurex Clearing AG) as well as fixed-income securities trading (Eurex Bonds GmbH) and a market place for repo transactions (Eurex Repo GmbH).

Post-trade services such as banking, settlement and custody services are handled by subsidiaries of Clearstream Holding AG. These services include transaction settlement, administration and custody of securities as well as global securities financing.

Table of Contents

In addition, Deutsche Börse Group sells price and reference data as well as other information relevant for capital markets and develops indices through its subsidiary STOXX Ltd.

Deutsche Börse and Clearstream Services S.A. develop and operate Deutsche Börse Group's technological infrastructure.

Xetra

Xetra is the electronic multi asset class trading system for the cash market of the Frankfurt Stock Exchange as well as other European exchanges. Deutsche Börse Group's cash market provides one of the most comprehensive ranges of tradable securities from a single source. With over 11,000 securities from both German and international issuers, more than 24,000 fixed-income securities, around 800 index funds, approximately 3,000 actively managed retail funds, and more than 500,000 certificates and warrants, investors from all over Europe can buy and sell financial products in many important asset classes in a clearly regulated and transparent marketplace. Integrated clearing by the central counterparty of Eurex Clearing AG and settlement by Clearstream Banking AG, Frankfurt, help to ensure that all stock exchange transactions are fulfilled.

In 2010, the Xetra segment contributed 262.3 million to the Deutsche Börse Group revenues, representing 12% thereof compared to 292.1 million in 2009, representing 14% of the Deutsche Börse Group revenues. In 2008 the Xetra segment contributed 448.7 million, representing 19% of the Deutsche Börse Group revenues. In 2010 261.9 million of these revenues have been generated in Europe (2009: 290.7 million; 2008: 448.2 million), 0.1 million in the Americas (2009: 0.3 million; 2008: 0.1 Million) and 0.3 million in the Asia-Pacific region (2009: 1.1 million; 2008: 0.4 million).

Deutsche Börse Group continues to expand its range of securities that are available via the Xetra system. In this way, it hopes to offer investors a trading venue with a very high liquidity for an increasing number of tradable securities.

Xetra is a fully electronic trading system for the cash market that automatically matches buy and sell orders and seeks to execute trades at the best possible conditions. Xetra operates independently of a trader's location and offers electronic access to the order book that contains buy and sell orders. Approximately 4,500 traders of 250 trading members firms from 19 countries are connected to Xetra.

Xetra is also a flexible trading system with various hybrid market models combining quote and order driven trading. Trading on Xetra includes both continuous trading for liquid securities and specialist trading for a broad multi asset class product universe.

During continuous trading the Xetra system immediately fixes the price based on the posted orders in accordance with the highest trading volume principle (*Meistausführungsprinzip*): orders with the highest buy or lowest sell limit are executed first. If limits are the same, they are executed by time priority. An open order book is central to continuous trading on Xetra, with market participants having unrestricted access to the order book. For each new order, the system immediately checks whether it can be executed against existing orders, applying the principle of price-time priority. The electronic open order book of the Xetra system allows for greater trading volume and increased market liquidity.

In the specialist model, specialists on the trading floor provide liquidity through matching quotes in a continuous auction model. Scoach Europa, the European exchange for structured products was migrated in April 2008 onto the Xetra specialist model, followed by mutual fund trading at the end of 2008. The remaining floor trading for equities and fixed-income securities on the legacy Xontro system is scheduled to migrate onto the Xetra specialist system on May 23, 2011.

The trading floor of the Frankfurt Stock Exchange will continue to operate as the central location for all specialists and as the focus point for all media activities with more than 60 TV broadcasts daily.

Table of Contents

Xetra not only serves as an electronic trading platform for the Frankfurt Stock Exchange, but the CEESEG (Central and Eastern European Stock Exchange Group) has been using Xetra since 1999 for the Vienna Stock Exchange, 2009 trading for the Central European Gas Hub (CEGH) was launched and in 2010 Ljubljana Stock Exchange switched to Xetra. The CEESEG-partner exchanges in Prague and Budapest are planning to switch to Xetra as their trading system as well. Furthermore, the Irish Stock Exchange and the Bulgarian Stock Exchange have been using Xetra since 2000 and 2008, respectively. The Shanghai Stock Exchange is using Xetra as a basis of its New Generation Trading System which was launched at the end of 2009. This concept of in-sourcing system services or selling software licenses allows the fixed costs for systems operation to be spread among a higher number of users. Furthermore, it offers cross-selling potential. Partner exchanges have opted for further Deutsche Börse Group systems after their migration to Xetra, e.g. Irish Stock Exchange using CCP and market data services. The Vienna Stock Exchange has gained new members from the Frankfurt Stock Exchange member base and vice versa. A standardized technical infrastructure provides Xetra participants with access to further products and markets which should enable them to reduce the costs of extending and operating their systems.

Eurex

Eurex Frankfurt AG and Eurex Zürich AG operate the Eurex exchanges in Germany and Switzerland. In addition, Eurex consists of Eurex Clearing AG, the International Securities Exchange, the MTFs (Multi Trading Facility), Eurex Bonds GmbH and Eurex Repo GmbH, among others. BaFin and Deutsche Bundesbank have agreed to qualify Eurex Clearing AG as system critical (*systemrelevant*) institution which is subject to a more intensive supervision by the regulators BaFin and Deutsche Bundesbank. Institutions qualify as system critical (*systemrelevant*) if a threat to their existence (*Bestandsgefährdung*) could have material adverse consequential effects on other credit institutions or could destabilize the financial system due to such institution's size, the intensity of its interbank relationships and its close links with other countries.

Corporate Structure

Eurex Zürich AG is a company in which Deutsche Börse and SIX Swiss Exchange each hold 50%. The economic interest of Deutsche Börse and SIX Swiss Exchange amounts to 85% and 15%, respectively. Eurex Zürich AG is the holding company of, among others, Eurex Frankfurt AG. Eurex Zürich AG will become the new majority shareholder of the European Energy Exchange AG (EEX) with its corporate seat in Leipzig, Germany. Eurex Frankfurt AG is the operator of the exchange Eurex Deutschland and the intermediary holding company of, among others, Eurex Clearing AG, U.S. Exchange Holdings Inc., Eurex Repo GmbH and Eurex Bonds GmbH.

With effect as of December 19, 2007, Eurex Zürich AG (indirectly) acquired 100% of International Securities Exchange Holdings, Inc. (ISE).

On February 23, 2011, Eurex Zürich AG and the European Energy Exchange (EEX) announced that Eurex Zürich AG will become the new majority shareholder in the EEX. On March 31, 2011 Eurex Zürich AG announced that its shareholding in EEX will increase from 35.23% to 56.14%. Now that the transaction has been approved by the relevant supervisory bodies, including the EEX supervisory board, all of the conditions for the immediate execution of the transaction have been fulfilled. The transaction was closed on April 12, 2011.

European Commodity Clearing AG (ECC) is a clearinghouse that provides a range of services for exchange and over-the-counter transactions in energy and related products.

Business Overview

In 2010 the Eurex segment contributed 858.7 million to the Deutsche Börse Group revenues, representing 41% thereof compared to 838.4 million in 2009, representing 41% of the Deutsche Börse Group revenues. In 2008, the Eurex segment contributed 1,035.3 million, representing 42% of the Deutsche Börse Group revenues.

Table of Contents

In 2010 688.8 million of these revenues have been generated in Europe (2009: 617.6 million; 2008: 779.0 million), 169.4 million in the Americas (2009: 220.6 million; 2008: 256.1 million) and 0.5 million in the Asia-Pacific region (2009: 0.2 million; 2008: 0.2 million).

In 2010, 606.5 million, representing 71% of the Eurex segment's sales revenues, (2009: 550.6 million representing 66%; 2008: 719.7 million representing 71%) came from trading and/or clearing of European equity index, interest and equity futures and options. As Eurex's pricing schedule for European products includes an all-inclusive price for trading and clearing by product type, it is not possible to split Eurex revenues between trading and clearing services. In the United States, revenues from U.S. options amounting to 112.3 million, representing 13% of the Eurex segment's sales revenues (2009: 153.7 million representing 18%; 2008: 176.6 million representing 17%), relate solely to trading.

Eurex Exchanges

The Eurex exchange business is carried out by Eurex Zürich AG, Eurex Frankfurt AG via their respective exchanges Eurex Zürich and Eurex Deutschland and International Securities Exchange Holdings Inc.

Eurex is one of the world's leading derivatives marketplaces. The exchanges Eurex Deutschland and Eurex Zürich are operated on a single trading platform with a product suite comprising the world's most actively traded and liquid markets. Eurex offers some 1,600 derivatives products with more than 145,000 variations (Series). Eurex offers interest rate and equity index derivatives and as well as broad offerings in single equity products and non-financial asset classes, including commodities. Besides euro (EUR)-denominated products, Eurex also offers derivatives denominated in Swiss francs (CHF), U.S. dollars (USD) and pounds sterling (GBP). Owing to their joint electronic trading platform, uniform exchange rules and a joint central counterparty (Eurex Clearing AG), Deutsche Börse believes that Eurex Exchanges are perceived by market participants as essentially a single marketplace. In 2010, Eurex served more than 410 member firms located in 28 countries worldwide.

The ISE operates a U.S. options exchange and offers options trading on over 2,000 underlying equity, ETF, index and FX products. Launched in 2000 as the first fully electronic U.S. options exchange, ISE developed a regulated marketplace for advanced screen-based trading.

ISE sought to transform the options industry by creating efficient markets through innovative market structure and technology. Regulated by the SEC and a member-owner of The Options Clearing Corporation, ISE seeks to provide investors with a transparent marketplace for price and liquidity discovery on centrally cleared options products. ISE continues to expand its marketplace through the ongoing development of enhanced trading functionality, new products, and market data services. As a complement to its options business, ISE has expanded its reach into multiple asset classes through strategic investments in financial marketplaces that it believes foster technology innovation and market efficiency. Through minority investments, ISE participates in the securities lending and equities markets. ISE operates as an independent subsidiary under its own management team and brand. ISE also licenses its proprietary Longitude technology for trading in event-driven derivatives markets.

Together, Eurex and ISE form a global liquidity network with daily trading volumes exceeding 10 million contracts across a growing range of asset classes.

Eurex Clearing

Eurex Clearing AG is the clearinghouse within Deutsche Börse Group. It offers fully automated and straight-through post trade services for derivatives, equities, repo, energy and fixed income transactions. In its role as a central counterparty, Eurex Clearing AG acts as a buyer to all sellers and as a seller to all buyers, thereby seeking to minimize counterparty risk and maximize operational efficiency. Eurex Clearing AG offers trade management functions, risk management and collateral and delivery management services with a focus to increase market safety and integrity. Eurex Clearing AG provides leading risk management services such as

Table of Contents

comprehensive pre-trade risk limits and it was the first leading central counterparty worldwide to offer risk management and margining data in real-time to its trading and clearing members.

Eurex Clearing AG is a wholly owned subsidiary of Eurex Frankfurt AG and acts as the central counterparty for the Eurex Exchanges (except for International Securities Exchange), Eurex Bonds GmbH, Eurex Repo GmbH, the Frankfurt Stock Exchange and the Irish Stock Exchange. Eurex Clearing AG also acts as the central counterparty for transactions of the European Energy Exchange (EEX) that are conducted under a separate clearing link agreement with the European Commodity Clearing AG (ECC). ECC is a clearinghouse that provides a range of services for exchange and over-the-counter transactions in energy and related products. As central counterparty, ECC takes a position between the buyer and seller, thereby collateralizing the transactions and assuming for each party the risk of default by the other party. In July 2009, Eurex Clearing AG launched a clearing service for OTC traded credit default swaps (Eurex Credit Clear).

Eurex Clearing AG provides clearing in EUR, CHF, USD and GBP and serves more than 120 clearing member firms located in twelve European countries and manages a collateral pool of approximately 45 billion on average in 2010. In 2010, Eurex Clearing AG processed more than 1.9 billion (2009: 1.8 billion; 2008: 2.3 billion) transactions.

Eurex Clearing AG is a stock company incorporated in Germany and licensed as a credit institution under supervision of BaFin pursuant to the Banking Act (*Gesetz über das Kreditwesen*). The Financial Services Authority has granted Eurex Clearing AG status as a Recognized Overseas Clearing House in the United Kingdom. Eurex Clearing AG was granted Multilateral Clearing Organization status by the CFTC on July 31, 1999 and has signed an exemption letter with the SEC that allows to offer clearing of certain credit default swaps in the U.S.

On January 1, 2005, Deutsche Börse issued a letter of comfort in favor of Eurex Clearing AG. In this letter of comfort, Deutsche Börse commits itself to provide upon first request 85% of the financial means, which Eurex Clearing AG requires to perform its duties as a central counterparty for certain kinds of trades as defined in the letter of comfort cleared through its clearing system. The letter of comfort does not cover any claims of The Clearing Corporation Inc., Chicago, IL, United States. Deutsche Börse's obligations in connection with this letter of comfort are limited to a maximum amount of 595,000,000.00.

SIX Swiss Exchange has entered into a corresponding letter of comfort with largely identical terms, but accounting for its economic interest of 15%.

Eurex Bonds

The fixed-income securities business is carried out by Eurex Bonds GmbH. It was founded in October 2000 as a joint initiative of Eurex Frankfurt AG and leading financial institutions. The organization is operated as a joint venture with the purpose of establishing and operating an electronic platform for fixed-income securities and basis trading in debt issues.

Eurex Bonds GmbH operates an MTF and provides participants with an electronic platform for off-exchange, wholesale trading in European fixed-income securities. Also, the Eurex Bonds trading platform has been linked into Eurex futures market and Eurex Clearing AG with the result that a direct link between spot and futures markets is available that enables electronic basis trading of fixed-income securities via a central order book. The necessary liquidity in the fixed-income securities and basis trading markets is provided by market makers. In addition to Eurex Frankfurt AG, several financial institutions are shareholders of Eurex Bonds GmbH.

Eurex Repo

The repo business is operated by Eurex Repo GmbH. It offers an integrated marketplace for electronic trading, clearing, collateral management and settlement for secured funding and financing. It is one of the leading European marketplaces with more than 300 participants since 1999. In 2010, the average outstanding repo volumes reached 221.7 billion.

Table of Contents

Eurex Repo provides the following five markets: GC Pooling, Swiss Franc Repo, OTC Spot, Euro Repo and SecLend.

GC Pooling was jointly developed by Eurex Repo, Eurex Clearing and Clearstream Banking with the objective to deliver all the benefits of electronic trading, through a well-regarded clearinghouse acting as a central counterparty in combination with a real-time collateral management system to the secured money market. GC Pooling has the advantage of allowing the re-use of received collateral for refinancing within the framework of the Deutsche Bundesbank / European Central Bank open market operations. GC Pooling has become a benchmark during the recent financial crisis for efficient secured funding based on a resilient market infrastructure.

The repo market in Swiss francs was launched for Swiss and foreign participants to carry out their funding and collateral management operations directly on the interbank market as well as at the almost daily auctions of the Swiss National Bank (SNB) using the Eurex Repo market infrastructure. In addition, it provides the OTC Spot Market for auctions of new issues of bonds and money market debt register claims from the Swiss Government as well as trading of Swiss National Bank commercial papers.

Furthermore, Eurex Repo operates markets for securities financing. In the Euro Repo Market participants can trade specific securities (special repo) whereas securities lending transactions are being traded in the SecLend Market.

Clearstream

Clearstream Holding AG is the post-trade services arm of Deutsche Börse Group except for clearing which is provided by Eurex Clearing AG. Clearstream Holding AG is a wholly owned subsidiary of Deutsche Börse and functions as a German financial holding, owning 100% of Clearstream International S.A. BaFin and Deutsche Bundesbank have agreed to qualify Clearstream Banking AG as system critical (*systemrelevant*) institution which is subject to a more intensive supervision by the regulators BaFin and Deutsche Bundesbank. Institutions qualify as system critical (*systemrelevant*) if a threat to their existence (*Bestandsgefährdung*) could have material adverse consequential effects on other credit institutions or could destabilize the financial system due to such institution's size, the intensity of its interbank relationships and its close links with other countries. Its core businesses include the settlement of market transactions and the custody of securities.

In 2010, the Clearstream segment contributed 760.7 million to the Deutsche Börse Group revenues, representing 36% thereof compared to 742.7 million in 2009, representing 36% of the Deutsche Börse Group revenues and 790.5 million in 2008 representing 32% of the Deutsche Börse Group revenues. In 2010, 673.1 million of these revenues have been generated in Europe (2009: 664.1 million; 2008: 737.8 million), 18.9 million in the Americas (2009: 17.4 million; 2008: 11.0 million) and 68.7 million in the Asia-Pacific region (2009: 61.2 million; 2008: 41.7 million).

In terms of settlement services, the Clearstream segment seeks to ensure that cash and securities are delivered in a timely manner between trading parties. With respect to the custody of securities, it is responsible for the management, safe-keeping and administration of securities deposited with it. In addition, the segment offers added-value services such as global securities financing and investment funds services. Customers profit from individual services, efficient processing and reduced transaction costs. The Clearstream segment is one of Europe's leading suppliers of this post-trading infrastructure for shares and fixed-income securities in national and international trading. It is among the largest providers of securities services worldwide.

The Clearstream segment operates as both an international central securities depository (ICSD) serving the international capital markets and a central securities depository (CSD) for German and Luxembourgian domestic securities. As an ICSD, it handles the settlement and safekeeping of Eurobonds and other internationally traded fixed-income securities and equities across 50 markets. As a CSD, it provides the post-trade infrastructure for

Table of Contents

German and Luxembourgian securities. In the custody business, the average value of securities held in custody at the Clearstream segment in 2010 was 10.9 trillion. In the Clearstream segment's settlement business, the number of settlement transactions in 2010 was 116.4 million.

Apart from Clearstream's core business of settlement and custody services, which accounted for 75% of its sales revenue in 2010, Clearstream is constantly working to improve the efficiency of the settlement process. In addition to enhancing the interoperability of electronic communications and counterparty platforms, it also develops new products. See Information Technology and Data Centers. Efficient settlement of securities transactions between counterparties at Clearstream Banking, Luxembourg, and Belgium-based ICSD Euroclear Bank takes place via an electronic communications platform (the Bridge). In November 2009, Clearstream extended its real-time settlement cycle from 21:00 on settlement day minus one to 18:00 on settlement day CET, enabling better interoperability with local Asia-Pacific markets and improved access and responsiveness within European markets and enabling same day security settlement deadlines in Deutsche Börse Group's Asia-Pacific markets. With the implementation of a suite of client-centric, harmonized, global value added services, Clearstream will be able to deliver a significantly higher level of asset servicing on all securities settled in LuxCSD and the domestic and international markets.

Clearstream constantly improves its service offerings in the area of global securities financing through the continuous development of CmaX (Collateral management exchange), a tri-party collateral management system designed to handle larger volumes in less time in the growing repurchase agreement market. The CmaX system offered the first collateral reuse functionality for tri-party repurchase agreements. This new functionality permits collateral recipients to reallocate collateral as a guarantee from one tri-party counterpart to another tri-party exposure as collateral provider, thereby making more collateral available to more customers in the tri-party repurchase agreement market. The collateral management services underwent a radical facelift in the last quarter of 2010 when Clearstream upgraded the current equities solution to a fully fledged, customized service on par with the fixed income offering.

By extending the scope of the value proposition beyond individual services such as triparty repo and securities lending, GSF is pursuing the expansion of Deutsche Börse Group's Global Liquidity & Risk Management Hub. The modular service concept of the Liquidity Hub allows clients to move collateral seamlessly between different financing tools and across entities, to access liquidity across currencies, asset classes and time zones to ensure a continuous access to a consolidated source of collateral.

In 2007, Clearstream expanded its services to the investment fund market through its Central Facility for Funds (CFF). This post trade service for investment funds provides DVP (delivery versus payment) settlement services and reduces operational settlement risk by automating and synchronizing the exchange of cash and fund units between transfer agents and funds distributors. CFF provides a central hub available to transfer agents for funds domiciled in Luxembourg, Ireland and more than 10 other jurisdictions as well as to fund product distributors in Europe, Asia and South America. Four years after its launch in March 2007, CFF represents approximately 50% of all funds assets as well as 45% of all settlement instructions in Clearstream and offers access to more than 52,000 fund classes.

Market Data & Analytics

In 2010, the Market Data & Analytics segment contributed 224.6 million to the 2010 Deutsche Börse Group revenues, representing 11% thereof, compared to 188.5 million in 2009, representing 9% of the 2009 Deutsche Börse Group revenues and 180.6 million in 2008, representing 7% of the 2008 Deutsche Börse Group revenues. In 2010, 157.4 million of the revenues contributed by the Market Data & Analytics segment were generated in Europe (2009: 123.5 million; 2008: 124.0 million), 64.5 million in the Americas (2009: 63.9 million; 2008: 55.9 million) and 2.8 million in the Asia-Pacific region (2009: 1.0 million; 2008: 0.7 million).

Table of Contents

The products offered by the segment's business areas are aimed at three customer groups: Firstly, issuers, who mainly use indices of Market Data & Analytics as underlying values for financial products (*e.g.*, futures, options, ETFs, structured products); secondly, front offices of investors, brokers, trading desks, algo traders, and investment advisors, who use real time price- and orderbook information or other market moving signals to make their buy- or sell-decisions and recommendations; and thirdly, middle and back offices of securities trading houses, which require accurate instrument reference data for risk management activities and error-free settlement.

Issuer Data & Analytics

In its area Issuer Data, Market Data & Analytics develops, calculates, markets and distributes more than 6,000 indices in a variety of asset classes. Strategic index development is focused on clear and concise index rules, transparency and tradability. As a result, Deutsche Börse Group indices in particular meet the needs of investors, financial market product developers and issuers, as they are attractive underlyings for derivative financial instruments.

In the German equity market, Deutsche Börse Group tracks the DAX, MDAX, SDAX and TecDAX selection indices. In addition, the group offers selected global indices under the brand DAXglobal, such as the DAXglobal BRIC, as well as strategy indices named DAXplus (*e.g.*, Covered Call, DAXplus Protective Put). Furthermore, Deutsche Börse Group produces a broad variety of fixed income and commodity indices.

In order to expand its international index business, Deutsche Börse and its Swiss partner SIX Group acquired the remaining third of the shares in STOXX Ltd. from Dow Jones in December 2009 making them the sole owners of the renowned index provider. The STOXX indices such as the EURO STOXX 50 are some of the best-known indicators for the development of the European securities market.

After the crisis in 2009 the index business market improved significantly: non-current assets in ETFs on Deutsche Börse Group and STOXX indices increased by 17% to 60,9 billion. Worldwide, approximately 600,000 structured products on STOXX indices were issued. On the exchange traded derivatives market EURO STOXX 50 and DAX were among the top 5 most popular underlyings. Also development and build-out of a comprehensive global index family was initiated. In 2010, Issuer Data & Analytics calculated 897 new indices.

Front Office Data & Analytics

Capital market information is channeled from a large number of sources proprietary to Deutsche Börse Group as well as third parties. The information is collated into data packages and thus tailored exactly to information requirements of different capital market participants.

Traditionally, Front Office Data & Analytics tracks the trading data of Deutsche Börse Group and its partners' market platforms and sells real-time data on bids, asks, prices, indices, volumes and analytics to clients in the form of data packages. The information products are distributed with minimum latency via proprietary, real-time data feeds. These feeds provide information on approximately 470,000 instruments, with individual data packages providing information on equities, derivatives, warrants, fixed-income securities, indices and exchange-traded funds (ETFs). This data can be subscribed directly or via more than 400 vendors approximately 150 countries.

To increase global reach and attractiveness Deutsche Börse Group has started to offer an increasing amount of platform-independent real-time data. With the acquisition of Market News International, Inc., a U.S.-based financial news agency and Need to Know News, LLC. in 2009, Deutsche Börse Group has obtained direct access to reports from authorities and supranational organizations such as the World Bank and the International Monetary Fund. In 2010, Market Data & Analytics focused on expanding its algorithmic trading offerings from these and other new sources. AlphaFlash, one of the fastest data streams for machine-readable publications relevant for trading, was launched in April 2010. It feeds data such as unemployment figures, key interest rate

Table of Contents

changes and consumer price indices in lowest latency directly into algorithmic trading applications via Deutsche Börse Group's high speed network. To render this service possible on a global basis, Deutsche Börse Group significantly expanded connection facilities in Europe and Asia.

Back Office Data & Analytics

Back Office Data & Analytics is the reference data business of Deutsche Börse Group. It consolidates and distributes cleansed price and reference data to the middle and back offices of financial institutions. Included in the reference data packages are individual analyses based on historical data, securities master data, corporate actions and services related to the reporting requirements issued by the BaFin. In 2010 Back Office Data & Analytics refocused its reference data activities on instrument data. The area's counterparty reference data business, which was consolidated in Avox Ltd., was sold to DTCC. The remaining business benefited from an expansion of PROPRIS, a subscription service to securities reference data directly sourced from Clearstream and launched in 2009. In addition, the year-on-year increase in trading activity boosted demand for the TRICE service, which Deutsche Börse Group uses to support securities firms in meeting their statutory reporting requirements.

Information Technology and Data Centers

With effect from January 1, 2010, Deutsche Börse Group's former segment Information Technology has been integrated into the four current business segments. As a consequence the external sales revenues and the costs of IT are distributed to these four segments. Approximately one third of Deutsche Börse Group's employees work in the IT departments.

Deutsche Börse Group's IT is broadly comprised of certain segments of Clearstream Services S.A. and certain segments of Clearstream Banking Frankfurt AG and Deutsche Börse. The relevant IT segment of Clearstream Services S.A. based in Luxembourg, and Clearstream Banking Frankfurt AG, based in Frankfurt, provide expertise in settlement and custody applications. Clearstream Services S.A. is responsible for the operations of the Luxembourg data center in settlement and custody. Following the merger of Deutsche Börse Systems AG into Deutsche Börse, which became effective on March 31, 2011, Deutsche Börse operates the trading and clearing systems and the German data centers. Through both Deutsche Börse Group aims to continue to make significant technical advances with the information technology that is key to Deutsche Börse Group's business.

In 2010, from its locations in Frankfurt, Eschborn, Luxembourg, Prague, Chicago and New York, Deutsche Börse Group's IT division operated 27 trading venues and exchanges worldwide as well as a global network to settle orders linked to 49 markets.

Deutsche Börse Group's IT also offers so called proximity services, where clients are placing their trading technology in a data center in close proximity to the exchange infrastructure. At the end of 2010, approximately 130 customers used these services.

Deutsche Börse and Equinix, a provider of global data center services, announced in 2010 the completion of a data center services contract, which will both increase data center capacity and shorten execution time for algorithmic traders located in Frankfurt. From 2011 on, the data center will serve as Deutsche Börse Group's main data center for the Frankfurt area, where electronic trading platforms will be deployed and will serve as the central collocation site for customers of Eurex and Xetra.

The increasing use of real-time modeling and computer-based automated trading (algorithmic trading) continues to drive the demand for detailed order book information and ever faster order and trade processing. Over the recent years, Deutsche Börse Group has been therefore increasingly focused on upgrading the performance and capacity of its trading systems.

Table of Contents

For example, the new Enhanced Broadcast Solution interface, offers Eurex and Xetra participants a link with advanced functional and technical features to receive market data even faster. The Enhanced Transaction Solution provides high-speed access to some of the most important trading functions and focuses on the administration of orders and quotations. In 2010, the fastest processing time for Eurex orders entered by market participants with an adequate connection was just below 0,7 millisecond from input by the participant to the exchange and back to the participant.

During the course of 2010, the migration of the existing Unix-based IT systems to Linux was started, which increased system performance and enhanced flexibility, while also reducing operating and maintenance costs. Also the uniform technical platform for Deutsche Börse Group trading systems was brought to production readiness. This system combines selected open source software components with third-party programs and software that has been developed in-house. Starting in the second quarter of 2011, ISE is expected to be the first exchange to move its U.S. equity options trading to the new platform.

Deutsche Börse Group's IT also improved and accelerated its post-trade infrastructure. In 2010, Eurex Release 13 provided members with more flexible clearing solutions, new risk management functionalities and comprehensive enhancements in the trading layer. By launching a new-generation processing environment, Clearstream has been enabled to deliver real-time, event-driven settlement. The agreed turnaround time for end-to-end settlement processing was reduced to below five minutes for 99.5% of instructions, thus helping to ensure more efficient interoperability between the different market participants.

Deutsche Börse Group's central strategic projects are based on IT infrastructure that reflects and drives forward the strategy. For example this is how the number of securities and types of instruments that can be used in the liquidity hub as collateral was increased and the range of securities lending services was expanded. The cross-border interoperability of the Frankfurt-based Central Securities Depository (CSD) with other partners was improved to expand Clearstream's cross-border services. Additional functionalities strengthen the Central Facility for Funds (CFF), Clearstream's solutions concept for standardized and hence efficient settlement of investment funds.

Risk Management

Risk management is an integral component of management and control within Deutsche Börse Group. Deutsche Börse Group seeks to safeguard its continued existence and enables it to achieve its corporate goals by utilizing effective and efficient risk management. To this end, Deutsche Börse Group has established a group-wide risk management system, which defines the roles, processes and responsibilities applicable to all staff and organizational entities within Deutsche Börse Group.

Deutsche Börse Group's risk management system is designed to ensure that all management committees within Deutsche Börse Group are able to control the risk profile of the entire Deutsche Börse Group or of single legal entities, as well as significant individual risks, in a timely manner. The aim is to identify developments that could threaten Deutsche Börse Group's interests and to take appropriate countermeasures promptly.

Deutsche Börse Group's risk strategy is based on its business strategy and sets limits specifying the maximum risk permitted for operational risks, financial risks, business risks and overall risk of Deutsche Börse Group. This is done by laying down requirements for risk management, risk control and risk limitation. Deutsche Börse Group seeks to ensure that appropriate measures are taken to avoid, reduce and transfer, or intentionally accept, risk.

The risk strategy is designed to enable risks to be controlled in a timely and adequate manner. Information needed for risk management is captured and assessed on the basis of structured, consistent procedures. The results of the assessment are collated in a reporting system, which is used to systematically analyze and control the risks. Risk reports are prepared on both a regular and an ad-hoc basis, and cover existing as well as potential risks.

Table of Contents

Deutsche Börse Group uses a standardized approach value at risk (VaR) for measuring and reporting all risks across the Group, including those entities that are not subject to regulation by supervisory authorities. VaR is designed to be a comprehensive way of presenting and controlling the general risk profile that also makes it easier to prioritize risk management measures. It quantifies existing and potential risks and lays down, for the confidence level specified, the maximum cumulative loss Deutsche Börse Group could face if certain loss events materialized over a specific time horizon. In addition to calculating VaR, Deutsche Börse Group performs regular stress test calculations for all material risks.

As of 2009, Deutsche Börse Group has calculated economic capital as its main risk management tool. This is used in addition to other performance indicators to determine the capital needed for business operations so that even extreme and unexpected losses can be covered. Economic capital is calculated using a VaR method for a period of one year and a confidence level of 99.98%. Deutsche Börse Group uses the shareholders' equity recognized under IFRS as the risk cover amount for its economic capital, adjusted by an amount to reflect the risk that intangible assets cannot be liquidated at their carrying amounts in a stress situation. Clearstream Holding Group and Eurex Clearing AG use their regulatory capital as the risk cover amount for their economic capital.

Deutsche Börse Group also calculates economic capital at the level of individual risks compares it against a limit that represents a percentage of the risk cover amount defined for each individual risk and reports the result to the Deutsche Börse management board each month. This procedure is designed to ensure that the risk limits laid down by the Deutsche Börse management board in its risk strategy are monitored and complied with on a sustainable basis.

Organization and Methodology

The Deutsche Börse management board is responsible for group-wide risk management. The business areas identify risks and report these to Group Risk Management (GRM), a central function with group-wide responsibilities. The business areas also perform risk control, inform their respective management of developments in performance indicators from a risk perspective and seek to continuously improve the quality of the risk management processes.

GRM works to ensure that the comprehensive risk management system described above is applied and that it complies with the same standards in all companies belonging to Deutsche Börse Group. GRM assesses all new and existing risks and reports on a monthly and, if necessary, on an ad hoc basis to the Deutsche Börse management board. In addition, GRM regularly reports to the Finance and Audit Committee of Deutsche Börse's supervisory board. The full Deutsche Börse supervisory board is informed in writing of the content of these reports.

Independent audits by the Internal Auditing function are designed to ensure that the risk control and risk management functions are adequately organized and that they perform their duties.

The organizational structure described above and the procedures and responsibilities associated with it are designed to enable Deutsche Börse Group to ensure that risk awareness throughout the entire Deutsche Börse Group is well developed and that an active risk culture is in place in practice.

Table of Contents

Intellectual Property

Deutsche Börse Group has numerous word marks, device marks and word/device marks legally protected in Germany, Europe and other territories of the world. The brand names of indices (*e.g.*, DAX, MDAX, TecDAX) developed and computed by Deutsche Börse Group are trademark protected, as are brand names such as Xetra, Eurex and Clearstream. Software developed by Deutsche Börse Group is copyright protected. Moreover, Deutsche Börse Group collects and compiles information and data partly in copyright protected format or protected as electronic databases.

Deutsche Börse Group also seeks protection for its innovations by using patents, as it deems appropriate.

In addition Deutsche Börse Group has numerous validly registered domain names, the most important of which include deutsche-boerse.com, boerse-frankfurt.de, dax-indices.com, clearstream.com and stoxx.com.

Deutsche Börse Group is a licensee under a number of license agreements. Important license agreements, not including off-the-shelf software, include agreements with Bloomberg, Standard & Poor's, Thomson Reuters, Telekurs and Interactive Data Corporation.

Issuers of instruments linking Deutsche Börse Group's indices as an underlying reference must sign a royalty-bearing licensing agreement with Deutsche Börse or one of its subsidiaries.

Customers

Deutsche Börse Group's customers include banks, brokers, trading firms, investment advisors, fund managers, asset managers, algo traders, data vendors and other market participants.

Sales and Marketing

Deutsche Börse Group's marketing and sales activities are de-centrally organized. Each business segment plans its marketing and sales activities on its own. Marketing activities include promotion of new products and new product-functionalities. Deutsche Börse Group's sales activities are mainly focused on client relationship management.

Employees

Deutsche Börse Group operates worldwide and had as at December 31, 2010 a total of 3,490 employees (December 31, 2009: 3,600, December 31, 2008: 3,395) from 66 nations working in 19 locations across three continents. As of March 31, 2011 Deutsche Börse Group employed 3,507 people. This decrease compared with the previous year is primarily a result of Deutsche Börse Group's operating efficiency program. In the first quarter of 2010, the management board of Deutsche Börse adopted measures to optimize processes and cost structures. These included streamlining Deutsche Börse Group's management structure and reallocating operating functions at Deutsche Börse Group's various locations. To avoid compulsory redundancies resulting from the relocation of functions as far as possible, the management of Deutsche Börse Group and the German works council agreed on a controlled Voluntary Leaver Program. Employees may, on their own initiative, reduce their working hours, retire early or voluntarily terminate their contract in return for a severance payment. The controlled Voluntary Leaver Program featured additional cash incentives for contracts signed by employees volunteering under the program before December 31, 2010. It will initially remain in force until the end of May 2011 with the option to extend. Additionally, the management of Deutsche Börse Group and the German works council agreed on a reconciliation of interest agreement. This includes a job exchange to simplify internal transfers and steps toward adopting a social plan should this become necessary.

Since March 31, 2011, the total number of employees has not changed significantly.

Table of Contents**Employees by Segment**

	2010 ⁽¹⁾	December 31,		2008
		2009		
Xetra	504	(161)	165	177
Eurex	911	(351)	395	355
Clearstream	1,701	(973)	1,009	964
Market Data & Analytics	374	(283)	272	160
Information Technology ⁽²⁾		(1,243)	1,266	1,258
Corporate Services ⁽²⁾		(479)	493	481
Total Deutsche Börse Group	3,490	(3,490)	3,600	3,395

Notes:

- (1) Figures in brackets show employees per segment as they would have been reported prior to the integration of the Information Technology and Corporate Services segments into the remaining four segments.
- (2) Effective as of January 1, 2010 this segment has been integrated into the other four segments. Deutsche Börse Group had an average of 3,539 salaried employees in 2010 (2009: 3,549; 2008: 3,339) and an average of 3,300 full-time equivalent (FTE) employees (2009: 3,333; 2008: 3,115). As of December 31, 2010, the proportion of women among permanent employees was 37%; 15% of senior executives were female.

Of the average number of employees during the year, nine (2009: nine; 2008: ten) were classified as Managing Directors (excluding management board members of Deutsche Börse), 422 (2009: 437; 2008: 411) as senior executives and 3,108 (2009: 3,103; 2008: 2,918) as employees.

297 employees left Deutsche Börse Group in the course of 2010. The staff turnover rate was 8.4% and therewith exceeded the previous year's level (2009: 6.4%; 2008: 9.0%).

Employees per Country/Region

As at December 31, 2010, Deutsche Börse Group employed people at 19 locations worldwide. The following table shows a breakdown into countries and regions:

	Dec. 31, 2010	%	Dec. 31, 2009	%	Dec. 31, 2008	%
Germany	1,577	45.2	1,632	45.3	1,623	47.8

Table of Contents

The average age of Deutsche Börse Group's employees at the end of 2010 was 40.2 years. The employee age structure as at December 31, 2010 was as follows:

Deutsche Börse Group employees' age structure

The average length of service at the end of the year 2010 was 10.2 years. The following table illustrates the length of service of Deutsche Börse Group's employees as at December 31, 2010:

	2010	(%)	2009	(%)
Less than five years	1,114	31.9	1,222	34.0
Five to 15 years	1,724	49.4	1,754	48.7
More than 15 years	652	18.7	624	17.3
Total Deutsche Börse Group	3,490		3,600	

As at December 31, 2010, the percentage of graduates among Deutsche Börse Group's employees was 59.9% (2009: 58.6%; 2008: 57.4%). This figure is calculated on the basis of the number of employees holding a degree from a university, university of applied sciences, or professional academy as well as employees who have completed comparable studies abroad. In total, Deutsche Börse Group invested an average of 1.8 days per employee in staff training.

Phantom Stock Option Plan, Stock Bonus Plan and Group Share Plan

For information regarding the Phantom Stock Option Plan, Stock Bonus Plan and Group Share Plan of Deutsche Börse see note 45 to the financial report for the years 2008, 2009 and 2010 of Deutsche Börse AG included in this document.

Real Property Owned, Leased or Subleased

Deutsche Börse Group's entities have not been the legal owner of any real property since 2008 and accordingly no real property is recognized in the Deutsche Börse Group's balance sheet since that time. All Deutsche Börse Group office buildings are leased and the contracts are classified as operating lease contracts.

Minimum lease payment from operating leases' buildings

	2010	December 31, 2009	2008
	(in millions of euros)		
Up to one year	58.8	54.8	52.5

Investments*Acquisitions and other transactions*

In the year ended December 31, 2010, Deutsche Börse Group made acquisitions and other transactions in the amount of 12.3 million (2009: 93.9 million, 2008: 131.6 million). In order to expand its business activities Deutsche Börse Group in particular acquired the following subsidiaries or shares in the following companies:

On March 31, 2011 Eurex Zürich AG announced that its shareholding in EEX will increase from 35.23% to 56.14%. Now that the transaction has been approved by the relevant supervisory bodies, including the EEX supervisory board, all of the conditions for the immediate execution of the transaction have been fulfilled. The transaction was closed on April 12, 2011. The purchase price amounts to about 65 million.

In 2008 and 2009, Eurex Zürich AG had gradually increased its interest in EEX from 23.22% to 35.23% for the payment of a total purchase price of 31.9 million;

In 2010, Deutsche Börse Group spent approximately 4.8 million on the acquisition of (direct and indirect) participations in Tradegate Exchange GmbH, Berlin Germany and ID s SAS, Paris, France;

Deutsche Börse s share in STOXX Ltd. was increased from 33.33% to 50.1% on December 29, 2009. For the acquisition of the 16.77% stake, a purchase price of 86.6 million was agreed (including transaction-related costs of 1.7 million, the waiver of the dividend rights for the year 2009 and an earnout component);

On January 26, 2009, Deutsche Börse acquired Market News International Inc. for a purchase price of \$10.8 million (including transaction-related costs);

On November 30, 2009, Market News International Inc. acquired Need to Know News, LLC. The purchase price included a cash component of \$2.3 million (including transaction-related costs) and an earnout component representing 20% of sales revenue of Need to Know News, LLC which is successively payable until 2012; and

Edgar Filing: NYSE Euronext - Form 425

In the fourth quarter of 2008, International Securities Exchange Holdings Inc. acquired a 31.54% interest in Direct Edge Holdings, LLC. The purchase price of \$125.2 million included a cash component and the contribution of shares of ISE Stock Exchange, LLC. Other transactions include the formation of subsidiaries.

A-199

Table of Contents*Capital Expenditures*

The following tables detail Deutsche Börse Group's capital expenditures per segment and per region for the financial years ended December 31, 2010, 2009 and 2008:

	2010	Per segment 2009	2008
	(in millions of euros)		
Xetra	14.4	11.9	21.3
Eurex	69.7	52.0	38.5
Clearstream	43.5	31.2	27.3
Market Data & Analytics	6.8	3.2	7.4
Total	134.4	98.3⁽¹⁾	94.5

Notes:

(1) Excluding investments in intangible assets relating to the acquisition of STOXX Ltd.

	2010	Per region 2009	2008
	(in millions of euros)		
Eurozone	103.0	86.1	89.4
Other Europe	0.1	5.3	0.1
Americas	31.1	5.4	5.0
Asia/Pacific	0.2	1.5	0
Total	134.4	98.3⁽¹⁾	94.5

Notes:

(1) Excluding investments in intangible assets relating to the acquisition of STOXX Ltd.

For the year ended December 31, 2010, Deutsche Börse Group had capital expenditures in the amount of 134.4 million primarily relating to software (56.7 million), IT infrastructure (53.5 million) and building improvement, fixtures and furnishing (24.2 million).

For the year ended December 31, 2009, Deutsche Börse Group had capital expenditures in the amount of 98.3 million, mainly relating to software (60.9 million), IT infrastructure (20.9 million) and building improvement, fixtures and furnishing (16.5 million). Based on the sale and purchase agreement concluded in connection with the acquisition of STOXX Ltd., STOXX Ltd. invested another 74.0 million in intangible assets on December 29, 2009.

For the year ended December 31, 2008, Deutsche Börse Group had capital expenditures in the amount of 94.5 million relating to software (40.1 million), IT infrastructure (31.3 million) and building improvement fixtures and furnishing (23.1 million).

Software Investments

Over the last three financial years the key software investments of Deutsche Börse Group included:

Creation of a common technological trading infrastructure;

Creation of clearing solutions for OTC derivatives business to reduce systemic risks and increase integrity of financial markets;

Supporting the growing usage of collateralized lending and borrowing of cash and securities; and

Further improvement, in terms of speed, capacity and reliability as well as enhancement, *e.g.*, new functionalities, new markets, new products, the core software releases for the systems of Xetra, Eurex and Clearstream.

A-200

Table of Contents

Capital expenditures in IT infrastructure (network, central processing units (CPUs), storage, other hardware and software components) increased significantly in 2010 due to the installment of the new ISE data center.

Building Improvements, Fixtures and Furnishing

The amounts invested for building improvements, fixtures and furnishing mainly related to the relocation of Deutsche Börse's principal office from Frankfurt Hausen to Eschborn and the interim building in the years 2008 to 2010.

Investments Currently in Progress

About 25% to 30% of the investments budget of Deutsche Börse Group for 2011 are already committed mainly to the following projects in Europe and Americas:

Roll out of new Eurex trading infrastructure at ISE and subsequent replacement of current trading systems with new IT-architecture;

Clearstream: Positioning of Clearstream as a value added service hub and access point to TARGET2-Securities; and

Clearstream: Implement collateral management service for Brazilian market together with CETIP.

Deutsche Börse Group expects to primarily finance these investments through its cash-flows. None of these investments could be finalized in the current financial year.

Planned Investments

Under its investment program for 2011 Deutsche Börse Group intends to invest approximately 40% of its investment budget in IT infrastructure, approximately 10% of its investment budget in building improvements and approximately 50% in software releases. In particular, the following key investment projects in Europe are planned:

Eurex: Implementation of portfolio based risk methodology to increase efficiency of collateral, further expand risk and stress testing capabilities and introduce netting between existing and OTC products;

Eurex: Implementation of client asset protection to allow for flexible segregation of customer assets in the clearing house;

Eurex: Roll-out of new OTC clearing services for swaps and securities lending transactions; and

Eurex/Clearstream: Further expansion of liquidity and risk management hub (Global Securities Financing, GC Pooling).

Deutsche Börse Group expects to primarily finance these investments through its cash flows.

Material Contracts

STOXX Shareholders Agreement

Deutsche Börse and SIX Group AG (SIX) are parties to a shareholders agreement dated November 12, 2009, relating to STOXX. Upon termination of this agreement the terminating party has the obligation to offer its participation to the other party (*Andienungspflicht*). Certain corporate transactions of STOXX give SIX the right to sell its shareholding to Deutsche Börse. Both shareholders have agreed to non-compete

Edgar Filing: NYSE Euronext - Form 425

obligations relating to the index business, which do not apply to their business, the business of their group companies (*Gruppenunternehmen*), each as of the date of the agreement, and the business of non-controlled holdings. Under the agreement, STOXX is required to market and sell the existing Deutsche Börse and SIX indices, while the calculation and maintenance of indices is conducted by Indexium AG, an operating company owned by Deutsche Börse and SIX.

A-201

Table of Contents***Cooperation Agreement Scoach***

On October 25, 2006, Deutsche Börse and SIX Group AG (former name: SWX Group) agreed in a cooperation agreement to combine their business operations in the area of structured products in a European exchange organization under a joint name and trademark (Scoach). This cooperation agreement was assumed by SIX Swiss Exchange AG in place of SIX Group AG on March 24, 2009. The cooperation agreement provides for a right of termination for both parties with a notice period of six months to the end of the month, which has the effect of ending the cooperation if a change of control occurs at Deutsche Börse or SIX Swiss Exchange AG. The right of termination expires if it is not exercised within three months of the date of the change of control.

If either party terminates the cooperation agreement, Deutsche Börse has the right and the obligation to acquire all shares in Scoach Holding S.A. (including the indirect participation in Scoach Europe AG, a wholly owned subsidiary of Scoach Holding S.A.), and SIX Swiss Exchange AG has the right and the obligation to acquire all shares in Scoach Schweiz AG. Only if the net financial liabilities (*Nettofinanzverbindlichkeiten*) and non-core assets (*nicht-betriebsnotwendige Aktiven*) of Scoach Holding S.A. (including Scoach Europa AG), on the one hand, and Scoach Schweiz AG, on the other hand, are not of equal value, a compensation must be paid in connection with any such transfer by the party acquiring the more valuable company. In all other cases these share transfers are to be made without any compensation payments to either party.

If the Scoach cooperation between SIX Swiss Exchange and Deutsche Börse were terminated, Deutsche Börse may be entitled to compensation not to exceed 10 million euros.

Shareholders Agreement Eurex

Deutsche Börse and SIX Swiss Exchange AG each hold 50% of the voting rights in the Eurex Zürich AG. On August 31, 1998, Deutsche Börse and SIX Swiss Exchange AG (former name: SWX Swiss Exchange AG) entered into a shareholders agreement, according to which, irrespective of their participation, Deutsche Börse bears 85% of the profit and costs of Eurex Zürich AG. This shareholders agreement, which relates to the parties cooperation regarding Eurex Zürich AG and its subsidiaries, provides for an extraordinary right of termination for a period of 60 days following a change of control, which is deemed to have occurred if a third party exchange organization obtains a controlling influence over the other party, whether by means of takeover or merger. Following termination of the shareholder s agreement, Deutsche Börse would obtain all shares in Eurex Frankfurt AG and its subsidiaries, while SIX would obtain all shares in Eurex Zürich AG. European Energy Exchange AG (EEX) would be transferred to Deutsche Börse, subject to the provisions of the consortium agreement between the shareholders of EEX.

If the change-of-control provision in the agreement regarding Eurex were triggered as a result of the combination, and the shareholders agreement was terminated as a result, Deutsche Börse would, following such termination, obtain all shares in Eurex Frankfurt AG and its subsidiaries (including the shares in ISE), and SIX Swiss Exchange would obtain all shares in Eurex Zürich AG. Deutsche Börse would be obliged to refund SIX Swiss Exchange its indirect 15% investment in ISE, with the amount of such refund determined by reference to, among other things, ISE s value on the date of termination. Moreover, the shares in EEX would be transferred from Eurex Zürich AG to Deutsche Börse, subject to the provisions of the consortium agreement between the shareholders of EEX. It is not clear to Deutsche Börse whether any payments would be due following a valid termination based on a change of control. However, if such payments were required to be made, they would primarily affect Deutsche Börse s liquidity because Deutsche Börse would obtain all of the share capital and right to profits from Eurex Frankfurt AG and its subsidiaries, including ISE, and the 56.14% shareholding in EEX.

Facility Agreement Clearstream Banking S.A. and Deutsche Börse

On May 6, 2008, supplemented on April 9, 2009, March 30, 2010 and March 29, 2011, Deutsche Börse and its subsidiary Clearstream Banking S.A. entered into a multicurrency revolving facility agreement with a

Table of Contents

consortium of banks for a working capital credit line with total borrowing availability of up to \$1.0 billion. In the event of a change of control, the lead manager of the consortium must terminate the agreement within a period of 30 days and declare all amounts due to the lenders immediately repayable, if required to do so by a majority of the consortium banks, who together have provided two-thirds of the amount of the facility granted at the date of the change of control. In the terms of this facility agreement, a person or group of persons have control if they coordinate their actions and/or if they have the opportunity to govern the business of Deutsche Börse or to determine the composition of the majority of the Deutsche Börse management board. The consortium banks have waived the change of control provision in connection with the combination.

Bonds Issued by Deutsche Börse

Under the terms of the 2008/2013 fixed-rate bonds in a principal amount of 650.0 million issued by Deutsche Börse, a put right applies in the event of a change of control. In the event investors exercise their put right, the bonds will become immediately repayable at par plus any accrued interest. A change of control is deemed to have occurred if one person, several persons acting together, or third parties acting on their behalf has or have acquired more than 50% of the shares of Deutsche Börse or the number of shares required to exercise more than 50% of the voting rights at the annual general meetings of Deutsche Börse. In addition, the relevant terms require that the change of control must have adversely affected the rating given to one of the preferential, unsecured debt instruments of Deutsche Börse by Moody's Investors Services, Inc., Standard & Poor's or Fitch Ratings Limited, provided such reduction results in a senior unsecured rating below Baa3 by Moody's or BBB- by Standard & Poor's or Fitch.

Under the terms of the subordinated fixed-rate and floating-rate bonds in a principal amount of 550.0 million issued by Deutsche Börse in 2008, a call right applies in the event of a change of control. If the issuer exercises its call right, the bonds will become immediately repayable at par plus any accrued interest. A change of control is deemed to have occurred if one person, several persons acting together, or third parties acting on their behalf has or have acquired more than 50% of the shares of Deutsche Börse or the number of shares required to exercise more than 50% of the voting rights at the annual general meetings of Deutsche Börse. In addition, the relevant terms require that the change of control must have adversely affected the rating given to one of the preferential, unsecured debt instruments of Deutsche Börse by Moody's Investors Services, Inc., Standard & Poor's or Fitch Ratings Limited, provided such reduction results in a senior unsecured rating below Baa3 by Moody's or BBB- by Standard & Poor's or Fitch. If a change of control is deemed to have occurred and the issuer does not exercise its call right, the interest rate payable on such bonds will increase by an additional 5.00% per annum.

If a change of control occurs, there is also a right to require repayment of various bonds issued by Deutsche Börse in 2008 under a U.S. private placement. The change of control must also adversely affect the rating given to one of the preferential unsecured debt instruments of Deutsche Börse by Moody's Investors Services, Inc., Standard & Poor's or Fitch Ratings Limited. The provisions contained in the applicable terms correspond to the conditions specified for the 2008/2013 fixed-rate bonds. The bonds issued under the private placement are as follows: \$170.0 million due on June 12, 2015, \$220.0 million due on June 12, 2018 and \$70.0 million due on June 12, 2020. The combination is not expected to trigger change-of-control provisions applicable to the bonds issued by Deutsche Börse because Deutsche Börse does not expect the combination to adversely affect the credit ratings given to the unsecured debt instruments of Deutsche Börse.

Legal Proceedings

Deutsche Börse Group companies are currently party to a number of legal proceedings within the normal course of their business. The following is a summary of significant legal matters as of the date of this document. Except for the proceedings cited in this section, there are no governmental, legal or arbitration proceedings (including any such proceedings pending or threatened, of which Deutsche Börse is aware), nor have there been during the previous 12 months, which may have or have had in the recent past material effects on Deutsche Börse's financial position or profitability.

Table of Contents***Peterson v. Clearstream Banking, S.A., Citibank et al.***

Following a class action against the Islamic Republic of Iran (Iran), plaintiffs obtained a default judgment against Iran in September 2007 in US courts. In June 2008, plaintiffs commenced enforcement proceedings to satisfy this judgment by restraining certain client positions held in Clearstream Banking S.A.'s securities omnibus account with its US depository bank. Clearstream Banking S.A. defended against the restraints and filed a motion to vacate the restraints on various grounds. This motion remains pending before the United States District Court for the Southern District of New York. In October 2010, plaintiffs commenced a lawsuit which seeks to have the restrained positions turned over to plaintiffs. A plaintiff's amended complaint was received by Clearstream Banking S.A. in Luxembourg on 7 January 2011. The amended complaint includes a cause of action directly against Clearstream Banking S.A. alleging \$250 million in connection with purportedly fraudulent conveyances related to the restrained positions. Should the case proceed to turnover, Clearstream Banking S.A. intends to defend itself vigorously to the fullest extent.

In June 2008, the plaintiffs commenced enforcement proceedings to satisfy this judgment by restraining certain client positions held in Clearstream Banking S.A.'s securities omnibus account with its US depository bank alleged to be beneficially owned by an Iranian government entity. Clearstream initiated the closure of certain Iranian customers' accounts in November 2007 and all other relevant accounts are currently blocked in Clearstream in accordance with the EU and U.S. Iran sanction regulations.

On March 17, 2011, the German Financial Reporting Enforcement Panel notified Deutsche Börse that it intends to review the consolidated financial statements as well as the consolidated management report as of December 31, 2009 of Deutsche Börse pursuant to Section 342b para. 2 sentence 3 no. 2 German Commercial Code regarding the presentation of the litigation *Peterson v. Clearstream Banking, S.A., Citibank et al.* in those statements. From the perspective of Deutsche Börse there was no sufficient reason to show the legal proceeding, which was explained in the 2010 management report, in the 2009 management report.

Heiser v. Clearstream Banking, S.A.

In addition to existing enforcement proceedings in the Peterson case, another turnover proceeding was filed with United States District Court for the Southern District of New York, in March 2011. For satisfaction of another judgment the plaintiffs are seeking turnover of the above mentioned client positions held in Clearstream Banking S.A.'s securities omnibus account with its US depository bank. Clearstream Banking S.A. intends to defend against this claim consistent with its custodial obligations, if the case proceeds to turnover.

Creditors of the Republic of Argentina v. Clearstream Banking Luxembourg S.A. et al.

Three related claims were filed with the District Court of Luxembourg in 2009 against Clearstream Banking Luxembourg S.A. in connection with three separate judgments made against the Republic of Argentina in favor of individuals who sought payment on securities issued by Argentina. The plaintiffs allege that Clearstream Banking Luxembourg S.A., among other defendants, made improper payments in an aggregate amount of approximately 40 million in violation of the judgments. Submissions and replies to submissions have been made.

Fairfield Sentry Ltd. and Fairfield Sigma Limited v. Clearstream Banking S.A., Luxembourg et al.

Fairfield Sentry Ltd. and Fairfield Sigma Limited, acting by and through their liquidators, filed a claim in the United States District Court for the Southern District of New York against Clearstream Banking S.A. and investors in the two investment funds seeking damages in an amount of approximately \$13.5 million. The complaint alleges that Clearstream Banking S.A. made improper payments between January 2007 and November 2008 to former investors in the Madoff Ponzi scheme. The claim was received by Clearstream Banking S.A. on February 3, 2011.

Table of Contents

By letters received at the end of February and March 2011 Clearstream Banking S.A. was informed of another complaint by the same plaintiffs, naming, among others, Clearstream Banking S.A. as defendant. Purpose and reasoning of the complaints are similar to the above, but targeted at an extended payment period. Clearstream Banking S.A.'s additional exposure under this new complaint is approximately \$11.5 million.

Clearstream Banking S.A. intends to defend itself against these claims.

Legal Proceedings in connection with the Business Combination Agreement

Following the announcement of the business combination agreement, various lawsuits were filed by purported NYSE Euronext shareholders in at least two state courts in the United States. The plaintiffs are seeking to litigate on behalf of a proposed class of all NYSE Euronext shareholders. The named defendants include the members of the NYSE Euronext board of directors, certain officers, as well as NYSE Euronext, Deutsche Börse and related corporate entities. Each lawsuit asserts a claim for breach of fiduciary duty against the individual defendants, and a claim for aiding and abetting that alleged breach against one or more of the entity defendants. In general, the lawsuits critique the terms of the proposed transaction and seek, among other things, an injunction against its completion. Deutsche Börse is reviewing the complaints and intends to contest them. See *Recent Developments and Outlook* for more information regarding litigation concerning the combination.

In addition to the matters described above, the Deutsche Börse Group companies are from time to time involved in various legal and regulatory proceedings that arise in the ordinary course of their business. Deutsche Börse does not believe, based on currently available information, that the results of any of these proceedings will have a material adverse effect on its operating results or financial condition.

Insurance

As a risk mitigation measure, Deutsche Börse has entered into a group-wide insurance portfolio. Various insurance contracts with reputable insurer carriers are contracted, which include among others: comprehensive crime and depository indemnity insurance, premises and transport insurance, property insurance, terror coverage insurance, general and environmental liability insurance, employment practices liability insurances, workers compensation, employers liability and also special risk policies regarding legal expenses, business interruption, terrorism, unauthorized trading, mergers and acquisitions. Additionally specific employee benefit insurance policies are subscribed such as life, accident and assistance policies.

A directors' and officers' liability insurance policy (D&O) is in force to cover members of Deutsche Börse's management board and supervisory board. It also captures all of their other mandates within the Group entities. This D&O has a sub-limit for outside directorship liability (ODL) exposures. In accordance with their standard terms and with market practice a number of insurance policies are entered into on a yearly basis and thus expire at the end of each December or March. This includes for example the D&O liability insurance policy, the CCDI (crime and depository indemnity insurance policy) and the P&T (premises and transport insurance policy). The renewal process is authorized either through a CFO and/or an executive committee board approval.

Deutsche Börse's insurance portfolio aims to reduce Deutsche Börse's worldwide risks and comprises master and/or primary underlying policies in line with non-admitted regulations as applicable in the different countries Deutsche Börse is operating. Deutsche Börse believes that its exposures are appropriately covered with regard to the nature of its business activities as well as the related risks in the context of the available insurance offerings. However, it is impossible to exclude the possibility that Deutsche Börse will incur damages that are not covered by insurance policies or that exceed the coverage limits of these insurance policies. Moreover, there can be no guarantee that it will be possible for Deutsche Börse to obtain adequate insurance coverage in the future.

Table of Contents

Certain Relationships and Related-Party Transactions

Related parties as defined by IAS 24 are the members of the executive bodies of Deutsche Börse, those companies classified as its associates and other investors, and companies that are controlled or significantly influenced by members of its executive bodies.

The remuneration of the individual members of the executive and supervisory boards of Deutsche Börse is presented in the sections Remuneration of Deutsche Börse Supervisory Board and Remuneration of the Deutsche Börse Management Board.

Deutsche Börse Management Board

In 2010, the fixed and variable remuneration of the members of the Deutsche Börse management board, including noncash benefits, amounted to a total of 15.2 million (2009: 9.4 million; 2008: 13.0 million).

In 2010, no expenses for non-recurring termination benefits for management board members of Deutsche Börse were recognized in the consolidated income statement (2009: 5.8 million; 2008: nil).

The actuarial present value of the pension obligations to management board members of Deutsche Börse was 26.2 million at December 31, 2010 (December 31, 2009: 19.3 million; December 31, 2008: 15.6 million). Expenses of 2.5 million (2009: 1.4 million; 2008: 3.5 million) were recognized as additions to pension provisions.

Former Members of the Deutsche Börse Management Board or their Surviving Dependents

The remuneration paid to former members of the Deutsche Börse management board or their surviving dependents amounted to 1.3 million in 2010 (2009: 1.3 million; 2008: 1.2 million). The actuarial present value of the pension obligations was 32.6 million at December 31, 2010 (2009: 28.7 million; 2008: 27.2 million).

Deutsche Börse Supervisory Board

The aggregate remuneration paid to members of the Deutsche Börse supervisory board in 2010 was 1.8 million (2009: 1.9 million; 2008: 2.3 million). No expenses were incurred in 2010 for the phantom stock options granted under the phantom stock option plan until 2004 (2009: nil; 2008: total expenses of 0.2 million). In 2008, all options that had not been previously exercised were exercised, and in 2009 and 2010 no rights were outstanding under the phantom stock option plan.

In connection with the combination with NYSE Euronext, Deutsche Börse entered into agreements with Deutsche Bank in Frankfurt am Main, Mayer Brown LLP in Washington, D.C. as well as J.P. Morgan Securities Inc. in New York, New York regarding the provision of advisory services. Since the start of the 2008 financial year, three members of the Deutsche Börse supervisory board held key positions within these companies while also being members of the Deutsche Börse supervisory board. In the first quarter of 2011, Deutsche Börse Group paid Deutsche Bank AG 0.2 million in the aggregate for the provision of advisory services.

Table of Contents**Breakdown of other Transactions with Related Parties**

The following table shows the other material transactions with companies classified as related parties for the fiscal years 2010, 2009 and 2008. From the fiscal year on December 31, 2010 through March 31, 2011, there have been no other transactions with related parties other than those set forth in the table. Through March 31, 2011, there have been no significant changes in the sum of the outstanding balances.

Table of Contents*Notes:*

- (1) Since Scoach Holding S.A. and its subsidiaries were deconsolidated as of December 31, 2009, they have been accounted for as an associate. As a result, no figures are reported for 2009 or 2008 in the amount of the transactions column and for 2008 in the outstanding balances column.
- (2) The largest amount outstanding during 2008 to 2010 amounted to 8.1 million; the loan's interest is determined based on one-month Euribor.
- (3) Indexium AG was founded as of December 29, 2009.
- (4) The largest amount outstanding during 2008 to 2010 amounted to CHF 1.2 million; the loans bear interest of 4.5%.
- (5) STOXX Ltd. was fully consolidated as of December 29, 2009, accordingly no outstanding balances are disclosed for 2009 and 2010 and no amount of the transactions is given for 2010.
- (6) U.S. Futures Exchange LLC was liquidated as of December 31, 2010.
- (7) Recognized allowances for outstanding receivables (2009: 5.7 million; 2008: 2.2 million).
- (8) The largest amount outstanding during 2008 to 2010 amounted to 518 million; the loan bears interest of ECB deposit facility rate minus 0.10% or 0.15%, respectively.
- (9) Since STOXX Ltd. has been fully consolidated since December 29, 2009, services to and from SIX Group AG are reported for the periods 2010 and 2009.
- (10) The largest amount outstanding during 2008 to 2010 (without accrued interest) amounted to 14.9 million; the loan bears interest of 3.25%.
- (11) Due to the deconsolidation of Scoach Schweiz AG and Scoach Europa AG end of 2009, only figures recognized in profit or loss are reported for both companies for 2009 and no information is provided for 2010.

Share Capital and Shareholder Structure

Deutsche Börse is registered as a German stock corporation (*Aktiengesellschaft*) in the commercial register of the Local Court (*Amtsgericht*) of Frankfurt am Main under the commercial register number HRB 32232 with its registered seat in Frankfurt am Main and business address in Mergenthalerallee 61, 65760 Eschborn, Germany (+49 (0) 692110).

Share Capital

The current share capital of Deutsche Börse is 195,000,000.00 and is divided into 195,000,000 registered shares with no par value. There are no other classes of shares besides the ordinary shares. There are no non-voting shares.

Deutsche Börse repurchased 6,240,778 shares in the amount of 380.5 million during 2008. The share buyback was authorized by the Annual General Meeting. No shares were repurchased during 2009, 2010 and until the publication of this exchange offer document in 2011. At the time of publication of the exchange offer document, Deutsche Börse still holds 8,956,997 Deutsche Börse shares as a result of the past share buybacks.

The Deutsche Börse shares are admitted to trading on the regulated market of the Frankfurt Stock Exchange and, simultaneously, in the sub-segment thereof with additional post-admission obligations (Prime Standard).

Authorized Capital I

The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions on or before May 23, 2011, by up to a total of 5,200,000.00, by issuing new registered no-par value shares against cash and/or in-kind contributions (Authorized Capital I). The shareholders of Deutsche Börse shall be granted subscription rights unless the Deutsche Börse management board, with the approval of the Deutsche Börse supervisory board, uses its authorization to exclude shareholder subscription rights. The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to exclude subscription rights if the share capital is increased against in-kind contributions for the purpose of acquiring companies, parts of companies or interests in companies or other assets. The Deutsche Börse management board, with the consent of the Deutsche Börse

Table of Contents

supervisory board, is also authorized to exclude fractional amounts from subscription rights of shareholders of Deutsche Börse. The content of the rights attached to the shares and the terms and conditions relating to their issue, including the issue price, will be determined by the Deutsche Börse management board with the consent of the Deutsche Börse supervisory board.

Authorized Capital II

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions until May 26, 2015, by up to a total of 27,800,000.00, by issuing new registered no-par value shares against cash and/or in-kind contributions (Authorized Capital II). The shareholders of Deutsche Börse shall be granted subscription rights.

However, the Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to exclude shareholder subscription rights in the case of a capital increase against cash contribution if the issue price of the new shares does not fall substantially below the quoted price of the shares and the shares issued under the exclusion of subscription rights in accordance with section 186(3) sentence 4 of the German Stock Corporation Act may not exceed a total of 10% of the share capital of Deutsche Börse either when the authorization becomes effective by virtue of the amendment to the Articles of Incorporation being recorded in the commercial register or when the authorization is exercised. All shares issued or sold in accordance with section 186(3) sentence 4 of the German Stock Corporation Act (directly or analogously) during the period of validity of the authorization until it is exercised, are included in the calculation of the 10% limit.

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is also authorized to exclude subscription rights of shareholders for a pro rata amount of the share capital of up to a total of 3,000,000.00 in order to issue the new shares to employees of Deutsche Börse or affiliated companies (within the meaning of sections 15 et seq. of the German Stock Corporation Act), excluding members of the Deutsche Börse management board and the management of affiliated companies. These shares may be issued either directly or indirectly following subscription by a credit institution and repurchase by Deutsche Börse.

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is also authorized to exclude subscription rights of shareholders if the share capital is increased against in-kind contributions for the purpose of acquiring companies, parts of companies or interests in companies or other assets.

The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is also authorized to exclude fractional amounts from subscription rights of shareholders.

The new shares may also be acquired by certain credit institutions or companies to be specified by the Deutsche Börse management board operating in accordance with section 53 (1) sentence 1 or section 53b (1) sentence 1 or (7) of the German Banking Act subject to the obligation that they offer such shares to shareholders of Deutsche Börse (indirect subscription right).

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, shall determine the additional terms and conditions relating to the issuance of the shares, including the issue price.

Authorized Capital III

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions until May 26, 2015, by up to a total of 19,500,000.00, by issuing new registered no-par value shares against cash contributions (Authorized Capital III). The shareholders of Deutsche Börse shall be granted subscription rights. However, the Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to exclude fractional amounts from subscription rights of shareholders.

Table of Contents

The new shares may also be acquired by certain credit institutions or companies to be specified by the Deutsche Börse management board operating in accordance with section 53 (1) sentence 1 or section 53b (1) sentence 1 or (7) of the German Banking Act, subject to the obligation that they offer such shares to shareholders of Deutsche Börse (indirect subscription right).

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, shall determine the additional terms and conditions relating to the issuance of the shares, including the issue price.

Authorized Capital IV

The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to increase the share capital on one or more occasions until May 10, 2012, by up to a total of 6,000,000.00, by issuing new registered no-par value shares against cash and/or in-kind contributions (Authorized Capital IV). The shareholders of Deutsche Börse shall be granted subscription rights unless the Deutsche Börse management board, with the approval of the Deutsche Börse supervisory board, uses its authorization to exclude shareholder subscription rights. The Deutsche Börse management board, with the consent of the Deutsche Börse supervisory board, is authorized to exclude fractional amounts from subscription rights of shareholders. The Deutsche Börse management board, subject to the consent of the Deutsche Börse supervisory board, is authorized to exclude subscription rights of shareholders in order to issue up to 900,000 new shares per financial year to members of the Deutsche Börse management board and employees of Deutsche Börse, as well as to members of the Executive Boards and management and employees of related companies (within the meaning of section 15 et seq. of the German Stock Corporation Act). The content of the rights attached to the shares and the terms and conditions relating to their issuance, including the amount to be issued, will be determined by the Deutsche Börse management board with the consent of the Deutsche Börse supervisory board. Shares issued to members of the Deutsche Börse management board and employees of Deutsche Börse, as well as to members of the Executive Boards/management and employees of related companies within the meaning of section 15 et seq. of the German Stock Corporation Act, carry full dividend rights for the fiscal year in which they are issued.

Conditional Capital I

The share capital is conditionally increased by up to 6,000,000.00 through the issuance of up to 6,000,000 registered no-par value shares (Conditional Capital I). The conditional capital increase is intended solely to fulfill subscription rights granted on or before May 13, 2008 on the basis of the authorization by the General Shareholders Meeting on May 14, 2003, under item 7 of the agenda. The conditional capital increase will only be carried out to the extent that the holders of the subscription rights issued make use of their subscription rights and Deutsche Börse does not fulfill the subscription rights by transferring own shares or by making a cash payment. The new shares are entitled to receive dividends as of the beginning of the financial year in which they arise by exercise of subscription rights.

Shareholder Structure

Deutsche Börse has issued 195,000,000 shares. Of these shares 8,956,997 are held in treasury by Deutsche Börse AG, resulting in 186,043,003 shares currently outstanding. As of March 31, 2011, institutional investors held approximately 95% of all outstanding Deutsche Börse shares. The remaining shares were held by private investors.

Table of Contents

The following table of Deutsche Börse's principal shareholders sets forth those shareholders who have notified the percentage of their voting rights in Deutsche Börse's share capital in accordance with Section 21 of the German Securities Trading Act:

Shareholder	Publication date ⁽¹⁾	directly held ⁽²⁾		Voting rights attributed		total

Supervisory Board and Management Board

Deutsche Börse has a two-tier governance structure with a supervisory board composed of non-executive members and a management board composed of Deutsche Börse's senior executive officers.

Deutsche Börse Supervisory Board

Deutsche Börse's supervisory board appoints, supervises and advises the management board and is directly involved in key decisions affecting Deutsche Börse. Members of Deutsche Börse's supervisory board are appointed for a period of three years; however, when electing members to the supervisory board, Deutsche Börse's annual general meeting may determine a shorter term of office. Deutsche Börse's supervisory board currently has 18 members consisting of 12 shareholder representatives and six employee representatives.

Table of Contents

The following table sets forth the names of the members of Deutsche Börse's supervisory board and certain of their board positions, present principal occupation or employment and other directorships as at December 31, 2010.

Name	Board Position	Other Functions

(*) Employee representative.

Table of Contents

The business address of each of the members of Deutsche Börse's supervisory board is Mergenthalerallee 67, 65760 Eschborn, Germany.

Audit and Finance Committee

The members of the Audit and Finance Committee of Deutsche Börse are:

Name	Function
Dr. Erhard Schipporeit	Chairman
Friedrich Merz	Member
Thomas Neißé	Member
Johannes Witt	Member

The Audit and Finance Committee of Deutsche Börse held nine meetings in 2010 and two meetings until March 4, 2011. The Audit and Finance Committee discussed the annual financial statements and the audit report in a meeting with the auditors. It also reviews the quarterly reports. It obtains the necessary statement of independence from the auditors, issues the audit engagement letter to the auditors and specifies the areas of emphasis of the audit, as well as determining the audit fee. The auditors supported the committee in all material questions relating to accounting and the regular monitoring activities.

On December 10, 2010, the Deutsche Börse management board and supervisory board each submitted a declaration of conformity with the German Corporate Governance Code in accordance with Section 161 of the German Stock Corporation Act.

Deutsche Börse Management Board

The Deutsche Börse management board is solely responsible for managing Deutsche Börse and the Chief Executive Officer coordinates the activities of the management board members. As the management body, it executes the business of Deutsche Börse in accordance with the law, the articles of association, the bylaws for the management board and the supervisory board, the schedule of responsibilities and the relevant service contracts.

The management board's bylaws stipulate which issues must be addressed by the full management board and which majorities are required for the adoption of management board resolutions. The schedule of responsibilities sets out the segments for which the individual management board members are responsible.

As at January 1, 2011, the Deutsche Börse's management board has six members. The following table sets forth the names of these members and their current position as at December 31, 2010.

Name	Age	Current Position
Dr. Reto Francioni	55	Chief Executive Officer
Andreas Preuss	54	Deputy Chief Executive Officer and Member, responsible for Derivatives & Market Data Division
Gregor Pottmeyer	48	Chief Financial Officer
Frank Gerstenschläger	50	Member, responsible for Cash Division
Dr.-Ing. Michael Kuhn	57	Chief Information Officer
Jeffrey Tessler	56	Member, responsible for Clearstream Division

Dr. Reto Francioni. For further information regarding current principal occupation or employment, employment history and other directorships, see Business of Holdco and Certain Information about Holdco Information about Holdco following the Combination Board of Directors.

Table of Contents

Gregor Pottmeyer. For further information regarding current principal occupation or employment, see Business of Holdco and Certain Information about Holdco Information about Holdco following the Combination Management.

Frank Gerstenschläger. For further information regarding current principal occupation or employment, see Business of Holdco and Certain Information about Holdco Information about Holdco following the Combination Management.

Dr.-Ing. Michael Kuhn. Dr.-Ing. Kuhn has served as a member of the Deutsche Börse management board and has been responsible for the Information Technology division as Chief Information Officer since 1999. From 1996 to March 31, 2011, Dr.-Ing. Kuhn has served as a member, since 1998 as chairman, of the management board of Deutsche Börse Systems AG. From 1994 to 1998, Dr.-Ing. Kuhn served as Senior Vice President, responsible for the Information Systems/Derivatives Market, at Deutsche Börse. Moreover, Dr.-Ing. Kuhn is a member of the boards of directors of Clearstream Services S.A., Deutsche Börse Systems, Inc., and International Securities Exchange, LLC. He also serves as a member of the supervisory boards of Eurex Clearing AG, Eurex Frankfurt AG and Eurex Zürich AG.

Andreas Preuss. For further information regarding current principal occupation or employment see Business of Holdco and Certain Information about Holdco Information about Holdco following the Combination Management.

Jeffrey Tessler. For further information regarding current principal occupation or employment see Business of Holdco and Certain Information about Holdco Information about Holdco following the Combination Management.

The business address of each of the members of Deutsche Börse's management board is Mergenthalerallee 61, 65760 Eschborn, Germany.

Remuneration of the Deutsche Börse Supervisory Board

Supervisory board members of Deutsche Börse receive a ratable fixed remuneration for their services. The annual fixed remuneration for membership in 2010 was 96 thousand for the Chairman, 72 thousand for the Deputy Chairman and 48 thousand for each other member. In addition, membership of the supervisory board's committees (Personnel Committee, Strategy Committee, Audit and Finance Committee, Technology Committee, Clearing and Settlement Committee and Nomination Committee) is remunerated. The additional remuneration is 30 thousand per annum for the Chairman of each Committee and 40 thousand per annum for the Chairman of the Audit and Finance Committee. A remuneration of 20 thousand per annum is paid to each other member of each Committee.

Members of the supervisory board also receive annual variable remuneration on the basis of two different, clearly defined targets relating to Deutsche Börse Group's performance.

Target 1: In the year in which remuneration is paid, the consolidated return on equity after taxes of Deutsche Börse Group must exceed by at least five percentage points the average of the monthly average current yields to maturity of domestic bearer bonds and public-sector bonds with a remaining maturity of more than nine to ten years as calculated by the Deutsche Bundesbank.

Target 2: Consolidated earnings per share for the previous two years must exceed consolidated earnings per share for the previous year in each case by 8% or more. For each target met, each member of the supervisory board receives annual variable remuneration in the amount of 16 thousand.

Table of Contents

The following remuneration of Deutsche Börse's supervisory board was determined for each member for the year ended December 31, 2010 (individualized disclosure):

	Non-performance-related remuneration			Performance-related remuneration		
	2010	2009	2008	2010	2009	2008
	(in thousands of euros)

Notes:

(*) Employee representative.

(1) Appointed to the Deutsche Börse supervisory board on May 20, 2009.

(2) Appointed to the Deutsche Börse supervisory board on January 21, 2009.

(3) Left the Supervisory Board on May 20, 2009.

(4) Left the Supervisory Board on December 8, 2008.

The aggregate remuneration paid to members of Deutsche Börse's supervisory board in 2010 was 1.8 million (2009: 1.9 million; 2008: 2.3 million). No expenses were incurred in 2010 for the phantom stock granted under the phantom stock plan until 2004 (2009: nil; 2008: total expenses of 0.2 million).

Remuneration of the Deutsche Börse Management Board

In 2009/2010, the Deutsche Börse supervisory board examined the remuneration system of the management board in order to comply with the legal and regulatory requirements and to align the interests of shareholders and of Deutsche Börse, through both internal specialists and external consultants. Subsequently, on March 23, 2010, the supervisory board adopted the revised and enhanced remuneration system for the management board to apply retroactively as from January 1, 2010.

Edgar Filing: NYSE Euronext - Form 425

The total target remuneration for members of Deutsche Börse's management board comprises a fixed and a variable component. The variable component consists of two elements – a cash bonus and a stock bonus. The target values for the fixed and variable components are set by the supervisory board for each individual member of the management board and monitored regularly to ensure that they are appropriate.

A-217

Table of Contents*Fixed Basic Remuneration*

The basic remuneration accounts for approximately 30% of the total target remuneration for one year. The members of the management board receive their basic remuneration in twelve monthly installments.

Variable Remuneration – Cash Bonus

Once a year, the members of the management board receive a performance-related cash bonus based on both Deutsche Börse's goals and individual targets. The target can be achieved in the range of 0% to a maximum of 200%. A key parameter for establishing the cash bonus is Deutsche Börse's success as defined by annual net profit over the past three years. Every year, the supervisory board sets a target net income. This determines the full value of the calculable part of the cash bonus and is derived as a control variable from the budget target or an adequate return on equity (RoE). Every year, the supervisory board sets an upper and a lower limit for the net profit for the year that is potentially achievable together with the 100% goal.

The cash bonus is divided into two parts: two-thirds of the variable cash component are based on the achievement of a specified net income target for the Deutsche Börse Group and a corresponding return on equity, taking into account not only the net income for the current financial year, but also for the two preceding years. The degree to which the targets have been achieved is determined for each of the three financial years, achievement of 0 percent to a maximum of 200 percent is possible. The average level of target achievement is then used to calculate two-thirds of the variable cash component for the current financial year. The remaining one-third is based on the degree to which individual goals from the previous year have been met. These goals are based on agreed targets for each individual management board member of Deutsche Börse.

Variable Remuneration – Stock Bonus

Members of the Deutsche Börse management board also receive a stock bonus. Until 2009 a stock bonus plan was in place. Starting in 2010, the stock bonus plan has been replaced by a phantom stock bonus plan settled in cash. Deutsche Börse's supervisory board has established a 100% target value for the variable share component for each member of Deutsche Börse's management board in euros at the start of each financial year. The number of Deutsche Börse phantom shares payable to each member of the management board is calculated based on this target value. To do this calculation, the euro amount is divided by the average share price (Xetra closing price) in the two calendar months preceding the date on which the target value is determined. The Deutsche Börse phantom shares are subject to a performance vesting period of three years, consisting of the year in which the phantom shares are granted and two subsequent years. The entitlement to a variable share bonus only arises at the end of the vesting period, and any such bonus is settled in cash. The share bonus is variable in two ways. First, the number of phantom shares granted is dependent on the performance of Deutsche Börse's total shareholder return (which is referred to in this document as "TSR") compared to the TSR of the STOXX Europe 600 Financials index. If the average performance of Deutsche Börse's TSR in this period moves parallel to the average TSR of the benchmark index, the number of phantom shares granted remains unchanged. If the TSR of Deutsche Börse falls to 50% or less of the index's TSR, no Deutsche Börse phantom shares are granted. If the TSR of Deutsche Börse shares increases to be at least twice as much as the index's TSR, the number of Deutsche Börse phantom shares granted is doubled. Second, the number of Deutsche Börse phantom shares granted, as calculated at the end of the vesting period, is multiplied by the applicable share price, which is the average Xetra closing price of Deutsche Börse shares in the preceding two full calendar months. This calculation yields the value of the variable share component. Deutsche Börse's supervisory board has set the maximum variable share component at 250% of the original target value.

Table of Contents

The following remuneration was determined for each member of the management board for the years 2008 to 2010. The figures relating to long-term incentive components in 2010 relate to shares from the Stock Bonus Plan (which is referred to in this document as the SBP).

		Non- performance- related remuneration	Other remuneration ⁽¹⁾	Performance- related remuneration	Long-term incentive components ⁽²⁾		Total remuneration (in thousands of euros)

	2009	3,483.8	162.0	4,036.7	37,401	1,739.1	9,421.6
	2008	3,711.5	301.8	6,200.0	73,758	2,810.0	13,023.3

Notes:

- (1) Other remuneration comprises salary components such as taxable contributions towards private pensions, taxable lump-sum telephone allowances/living expenses, and company car arrangements.
- (2) The calculation of the number of shares of phantom stock and the value at the grant date for 2009 is based on the closing auction price of Deutsche Börse shares in electronic trading on the Frankfurt Stock Exchange on the date the bonus is calculated. The number of shares of phantom stock and their value at the grant date for 2008 were recalculated for each management board member of Deutsche Börse on the basis of the individual grant dates. The different grant dates resulted from the involvement of the supervisory boards of Eurex Frankfurt AG, Eurex Clearing AG, Eurex Zürich AG and Clearstream International S.A. as well as Deutsche Börse Systems AG and the resolutions adopted by them. The number of shares of phantom stock at the 2010 grant date is calculated by dividing the target for the stock bonus by the average share price (Xetra closing price) of Deutsche Börse shares in the calendar months January and February 2010 (€ 51.01). The number of phantom shares for 2010 is indicative and may change as a result of the performance comparison based on total shareholder return in 2011 and 2012. They will be paid out in 2013.
- (3) For 2010 corresponds to the 100% target value for the 2010 phantom stock bonus. The variable stock component under the 2010-2012 performance assessment will be paid out in 2013.
- (4) Left the Management Board on April 30, 2009.
- (5) Appointed to the Deutsche Börse management board on October 1, 2009.

A-219

Table of Contents

The following tables provide information concerning stock bonus awards held by members of the management board for the year ended December 31, 2010.

Number of 2010 Phantom Shares (New)

	Number of 2010 phantom shares on the grant date ⁽¹⁾	Adjustments of number of 2010 phantom shares ⁽¹⁾⁽²⁾	Number of 2010 phantom shares as at 31 December 2010 ⁽²⁾
Dr. Reto Francioni	16,448	(672)	15,776
Andreas Preuss	13,645	(558)	13,087
Frank Gerstenschläger	8,411	(344)	8,067
Dr.-Ing. Michael Kuhn	10,704	(437)	10,267
Gregor Pottmeyer ⁽³⁾	9,097	(372)	8,725
Jeffrey Tessler	10,783	(441)	10,342
Total	69,088	(2,824)	66,264

Notes:

- (1) From 2010, the variable share component is based on the new remuneration system and has a term of three years until 2012.
- (2) The adjustment and number of phantom shares on the grant date are based on the result of the 2010 performance comparison (total shareholder return comparison with peer group) and are indicative for 2010. The number may change as a result of the performance comparison based on total shareholder return in 2011 and 2012.
- (3) Appointed to Deutsche Börse's management board on October 1, 2009.

Number of Shares of Phantom Stock of the SBP Tranches 2007, 2008 and 2009 (Old)⁽¹⁾

	Balance as at 31 December 2009	Adjustments of number of shares of 2009 phantom stock in 2010 ⁽²⁾	Settled in stock bonus plan shares ⁽³⁾	Total
Dr. Reto Francioni	40,092	0	8,298	31,794
Andreas Preuss	32,372	(1,178)	7,907	23,287
Frank Gerstenschläger	17,398	0	2,683	14,715
Dr.-Ing. Michael Kuhn	27,129	(813)	6,082	20,234
Gregor Pottmeyer ⁽⁴⁾	0	0	0	0
Jeffrey Tessler	27,841	(595)	6,117	21,129
Total	144,832	(2,586)	31,087	111,159

Notes:

- (1) From 2010, the variable share component is based on the new remuneration system.
- (2) Due to different grant dates of the responsible supervisory bodies.

- (3) Settlement of the 2007 tranche, pay out in February 2010.
- (4) Appointed to Deutsche Börse's management board on October 1, 2009.

Retirement Benefits

The members of Deutsche Börse's management board are entitled to pension benefits after reaching the age of 60 or 63 and following the termination of their service agreement. In accordance with the articles of association of Deutsche Börse, membership of the management board generally ends when a member turns 60. This age limit may be exceeded in individual cases, if in Deutsche Börse's interest.

A-220

Table of Contents*Retirement Benefit System Defined Benefit*

After reaching the retirement age of 60 or 63, members of Deutsche Börse's management board, to whom the defined benefit system is applicable, receive a specified percentage (replacement rate) of their individual pensionable income as a pension. A management board member only has a claim under this benefit system once he or she has served on Deutsche Börse's management board for at least three years and has been reappointed at least once. Pensionable income is determined and regularly reviewed by Deutsche Börse's supervisory board. The replacement rate is initially 30%. It rises by five percentage points with each reappointment, up to a maximum of 50%. As a rule, the benefit is granted in the form of a monthly pension. The benefit may also be paid out in the form of a one-off capital payment or in five installments, provided that Deutsche Börse's supervisory board has adopted a resolution to this effect and at the request of the management board member.

Retirement Benefit System Defined Contribution

For management board members to whom the defined contribution benefit system applies, Deutsche Börse makes a contribution in the form of a capital component for each calendar year they serve on Deutsche Börse's management board.

Pension Expense

The actuarial present value of the pension obligations to management board members of Deutsche Börse as at December 31, 2010 was 26.2 million in the year 2010 (2009: 19.3 million; 2008: 15.6 million). With respect to the pension provisions of Deutsche Börse Group reference is made to note 25 of the audited consolidated financial statements of Deutsche Börse Group as per December 31, 2010, 2009, and 2008 which are included in the financial pages as well as for each of the three financial years in the period ending on December 31, 2010.

	Replacement rate		Present value/ Defined benefit obligation		Pension expense		Pensionable income
	As at 31 December 2010 (%)	2009 (%)	As at 31 December 2010	2009	2010	2009	2010
	(in thousands of euros)						
Defined benefit system							
Dr. Reto Francioni	35.0	35.0	8,188.90	7,233.60	204.9	0	1,000.0
Andrea Preuss	40.0	40.0	3,296.00	1,772.00	752.7	455	600.0

Jeffrey Tessler	35.0	35.0	4,415.50	3,591.00	14.2	146.9	577.8
Total			25,793.8	19,322.0	2,198.4	1,430.4	3,177.8
Defined contribution system							
Gregor Pottmeyer ⁽¹⁾	48.0 ⁽²⁾		385.5		346.8		500.0

Notes:

- (1) The pension agreement with Mr. Pottmeyer was entered into as part of the restructuring of Deutsche Börse's management board remuneration in 2010.
- (2) The annual pension contribution amounts to 48% of the basis for assessment in the defined contribution system.

Table of Contents

The pension expense comprises the current service cost and the past service cost. The following amounts were added to provisions and recognized as pension expense in the year indicated in the table below:

	2010	Pension expense 2009	2008
	(in thousand of euros)		
Dr. Reto Francioni	204.9		1,213.6
Andreas Preuss	752.7	455.0	386.8
Thomas Eichelmann ⁽¹⁾			186.3
Frank Gerstenschläger	652.5	661.1	461.8
Dr.-Ing. Michael Kuhn	574.1	167.4	141.3
Gregor Pottmeyer ⁽²⁾	346.8		
Jeffrey Tessler	14.2	146.9	1,148.9
Total	2,545.2	1,430.4	3,538.7

Notes:

- (1) Left the Management Board on April 30, 2009.
(2) Appointed to the management board on October 1, 2009.

Further Benefits

The members of the Deutsche Börse management board also receive the following benefits:

Disability pension;

Invalidity pension;

Basis for assessment of retirement benefits;

Provision for surviving dependents;

Transition payment when retiring from active service; and

Allowances for private pension schemes, telephone allowances, entitlement to use a company car.

Severance and Change-of-Control Arrangements*Severance Payments*

In the event of early termination of a management board member's service contract without good reason, any payments made to this management board member may not exceed the remuneration for the residual term of the contract of service and, additionally, the value of two total annual remuneration payments (severance cap). The payment is calculated based on the total remuneration in the past financial year and, where

Edgar Filing: NYSE Euronext - Form 425

appropriate, the expected total remuneration for the current financial year. Deutsche Börse's supervisory board may exceed the upper limit in exceptional justified cases.

Change of Control

If a management board member is asked to step down within six months of a change of control, he or she is entitled to a severance payment equal to two total annual remuneration payments or the value of the residual term of his or her contract of service, where this is less than two years. 150% of this severance payment may be awarded. If a management board member resigns within six months of the change of control because his or her position as a member of Deutsche Börse's management board is significantly negatively impacted as a result of the change of control, the supervisory board may decide at its discretion whether to grant a severance payment of the above-mentioned amount. This provision applies to all new contracts and reappointments of members of Deutsche Börse's management board since July 1, 2009.

A-222

Table of Contents

For management board members whose contracts were entered into before July 1, 2009 the former regulation continues to apply but in any event for no longer than the date of their next reappointment according to which they are entitled to a severance payment both in the case of being asked to step down and of resigning within six months of a change of control. This consists of compensation for the residual term of the contract as well as an additional severance payment of up to twice the annual benefits, whereby the sum of the compensation and severance payment may not exceed five times the annual benefits.

Directors and Officers Indemnification

Deutsche Börse has taken out a D&O (directors and officers liability insurance) policy for its management board members. This policy includes a deductible of 10% of the damages arising from the insured event, with the maximum deductible per year set by the supervisory board at 1.5 times the fixed annual remuneration of the relevant management board member.

Beneficial Ownership of Management

The following table sets forth information concerning ownership by the members of Deutsche Börse supervisory board and management board shares as of December 31, 2010. The amounts and percentages of shares beneficially owned are reported on the basis of SEC regulations governing the determination of beneficial ownership of securities. Under such regulations, a person is deemed to be a beneficial owner of a security if that person has or shares voting power, which includes the power to vote or to direct the voting of such security, or investment power, which includes the power to dispose of or to direct the disposition of such security. A person is also deemed to be a beneficial owner of any securities of which that person has a right to acquire beneficial ownership within 60 days. Under these rules, more than one person may be deemed to be a beneficial owner of such securities as to which such person has voting or investment power.

Table of Contents

In accordance with section 15a of the German Securities Trading Act (*Wertpapierhandelsgesetz*), the members of the supervisory board and the management board are obliged to disclose the purchase or sale of Deutsche Börse shares and derivatives. Any transactions reported to Deutsche Börse in accordance with this requirement were duly published and can be found on the Deutsche Börse Group's Internet website at www.deutsche-boerse.com > Investor Relations > News > Directors Dealings.

At no time did the ownership of shares of Deutsche Börse or financial instruments on these shares by individual members of the supervisory board or the management board directly or indirectly exceed 1% of the shares issued by Deutsche Börse. At no time did the total shareholdings of all supervisory board or management board members of Deutsche Börse exceed 1% of the shares issued by Deutsche Börse.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF DEUTSCHE BÖRSE GROUP****Overview**

This discussion and analysis of the financial condition and results of operations should be read in conjunction with the respective consolidated financial statements and other financial information included elsewhere in this document. This discussion contains forward-looking statements. Actual results may differ from such forward-looking statements. See Risk Factors and General Information Forward-Looking Statements. Certain prior period amounts presented in the discussion and analysis have been reclassified to conform to the current presentation.

Deutsche Börse, headquartered in Frankfurt/Main, Germany, is the parent company within Deutsche Börse Group. As at December 31, 2010, Deutsche Börse Group employed 3,490 people in 19 locations in 15 countries. As one of the largest exchange organizations worldwide, Deutsche Börse Group offers its customers a broad portfolio of products and services.

Deutsche Börse Group realigned its segment structure effective January 1, 2010. Deutsche Börse Group's business activities were divided into four segments: Xetra, Eurex, Clearstream and Market Data & Analytics. The external sales revenue and the costs of the former Information Technology segment and the Corporate Services segment were allocated across these four segments. The new structure improved the allocation of sales revenue and costs to the segments and made it easier to compare Deutsche Börse Group with its competitors. Since 2010, the structure has served as a basis for the internal management of Deutsche Börse Group and for financial reporting. The figures for 2008 and 2009 have been adjusted to the new segment structure to ensure comparability with the 2010 financial statements.

Reporting Segment

Reporting Segment	Business Areas
Xetra	Cash market using the Xetra electronic trading system and floor trading Central counterparty for equities (Eurex Clearing)
Eurex	Admission of securities to listing Electronic derivatives market trading platform Eurex Electronic equity options trading platform ISE Over-the-counter (OTC) trading platforms Eurex Bonds and Eurex Repo Central counterparty for bonds, derivatives and repo transactions (Eurex Clearing)
Clearstream	Custody, administration and settlement services for domestic and foreign securities Global securities financing services Investment funds services
Market Data & Analytics	Sale of price information and information distribution Index development and sales

Key Factors Affecting Results of Operations and Financial Condition**External Factors**

Edgar Filing: NYSE Euronext - Form 425

The business environment in which Deutsche Börse Group operates directly affects its results of operations. Its results have been affected by many factors, including the level of trading activity in its markets, which during any period is significantly influenced by general market conditions, competition, market share and the pace of

A-228

Table of Contents

industry consolidation. In recent years, the business environment has been characterized by increasing competition among global venues for trading, clearing and settlement volumes and listings, the globalization of exchanges, customers and competitors, market participants' demand for speed, capacity and reliability, which requires continuing investment in technology, and increasing competition for market data revenues.

In particular, the results of operations and financial position of Deutsche Börse Group are influenced by, among others, the following external factors.

Economic conditions and structural changes in financial markets

The performance and volatility of the financial markets, structural changes in the financial markets such as the increasing use of derivatives by investment funds, as well as general economic conditions affect the overall trading activity in the markets operated by Deutsche Börse Group, which in turn affects Deutsche Börse Group's potential sales revenues.

Regulatory environment and competition

Changes in the regulatory environment and competition of other trading and clearing platforms can affect trading volumes and market share, put pressure on pricing and require continuing investment in technology. For example, pricing models need to be adjusted to reflect new trends in the financial industry, such as algorithmic trading. To enable high frequency trading for sophisticated investors, execution times of trades have to be competitive with other trading platforms. The availability of IT systems and prevention of IT processing errors are key quality issues demanded by customers.

While it is not possible to predict reliably the future trends in trading volumes, which tend to be volatile in the short-term depending largely on market sentiment, Deutsche Börse expects that average unit prices will continue to trend moderately downwards from year to year as a result of competition and innovation, and volume discounts and fee caps in its pricing schedules.

Innovation in products and systems

Deutsche Börse Group's ability to innovate by introducing new products and services and the mitigation of project risks related to the successful launch of new products, processes or systems directly affect the competitive position of Deutsche Börse Group. In order to benefit from economies of scale, Deutsche Börse Group aims to attract higher trading volumes to the existing platforms. One mechanism used by Deutsche Börse Group to achieve this is to enter into cooperation with other stock exchanges, which use Deutsche Börse Group's platforms to execute their trading. Another option is the introduction of new financial instruments into on-exchange trading.

While Deutsche Börse Group cannot influence the development of the financial markets, it is able to exert an influence on innovation in products and systems in part or in full and thus limit its exposure to factors outside its control.

Factors Affecting Comparability of Financial Statements

The presentation of historic results of operations of Deutsche Börse Group was influenced by the following accounting changes:

Deutsche Börse Group changed the presentation of two cost line items in its 2010 consolidated financial statements compared to the 2009 consolidated financial statements. As from January 1, 2010, own expenses capitalized are no longer reported separately as part of total revenue in the consolidated results of operations. Since then, expenses incurred in connection with internal development activities comprise only non-capitalized amounts. In addition, volume-related costs are disclosed as a separate line item and not included in the operating costs subtotal in the 2010 consolidated financial statements.

Table of Contents

Additionally, segment reporting was changed as of January 1, 2010 as described above. The internal reporting structure was changed to four market segments in 2010: the external costs of the segments Information Technology and Corporate Services were allocated to the remaining segments on the basis of the relevant usage volume (*e.g.*, hours billed) or through allocation keys (*e.g.*, building costs on the basis of used space) as primary costs without mark-up. As a result, there are no more cost recharges between the two former segments and the four remaining segments (internal sales in the Information Technology segment of 393.1 million and 409.5 million and internal other operating income in the Corporate Services segment of 215.6 million and 224.6 million in 2008 and 2009, respectively).

The 2008 comparison figures affected by these changes have been adjusted by preparing comparable financial statement information separately and 2009 comparison figures affected by these changes have been adjusted in the 2010 consolidated financial statements and therefore differ from those presented in the 2008 and 2009 consolidated financial statements. The adjustment of the segment structure had two main impacts on the 2008 and 2009 adjusted numbers. First, the former cost recharge including margins, only shown in other operating expense as one sum, was replaced by the allocation of primary costs (without margins). Information Technology and Corporate Services costs were allocated to the market segments in their respective cost lines: for example, IT staff costs were partly shown in Xetra as staff costs in the 2010 consolidated financial statements. Consequently the cost line items staff costs and depreciation and amortization increased, whereas the cost position other operating expenses decreased. Second, external sales of 95.7 million in 2008 and 97.4 million in 2009 and related costs of external IT business have been allocated from the Information Technology segment to the four remaining segments, and external other operating income of 15.1 million in 2008 and 81.5 million, thereof 66.7 million financial loss liability insurance, in 2009 have been allocated from the Corporate Services segment to the four remaining segments.

Effective as at December 29, 2009, Deutsche Börse Group fully consolidated STOXX Ltd., which was previously recognized as an associate. Revenues and costs of the operations of STOXX Ltd. are therefore included completely in 2010 for the first time.

Scoach Holding S.A., which had previously been fully consolidated in the consolidated financial statements of Deutsche Börse Group, was deconsolidated effective as at December 31, 2009 because Deutsche Börse Group no longer controlled this company. Since then, Scoach Holding S.A. has been recognized as a joint venture as defined by IAS 31 and accounted for using the equity method.

Acquisitions and Other Transactions

Deutsche Börse Group made acquisitions and other transactions in the amount of 12.3 million in 2010, 93.9 million in 2009 and 131.6 million in 2008. In order to expand its business activities, Deutsche Börse in particular acquired the following subsidiaries or shares in the following companies:

On March 31, 2011 Eurex Zürich AG announced that its shareholding in EEX will increase from 35.23% to 56.14%. Now that the transaction has been approved by the relevant supervisory bodies, including the EEX supervisory board, all of the conditions for the immediate execution of the transaction have been fulfilled. The transaction was closed on April 12, 2011. The purchase price amounted to about 65 million.

In 2008 and 2009, Eurex Zürich AG incrementally increased its interest in EEX from 23.22% to 35.23% for a total purchase price of 31.9 million.

Deutsche Börse increased its share in STOXX Ltd. from 33.33% to 50.1% on December 29, 2009 for a purchase price of 86.6 million (including transaction-related costs of 1.7 million, the waiver of the dividend rights for the year 2009 and an earnout component).

On January 26, 2009, Deutsche Börse acquired Market News International Inc. (which is referred to in this document as MNI) for a purchase price of \$10.8 million including transaction-related costs.

Table of Contents

On November 20, 2009, MNI acquired Need to Know News, LLC. The purchase price included a cash component of \$2.3 million including transaction-related costs and an earnout component representing 20% of sales revenue of Need to Know News, LLC, which will successively be payable until 2012.

In the fourth quarter of 2008, International Securities Exchange Holdings Inc. acquired a 31.54% interest in Direct Edge Holdings, LLC. The purchase price of \$125.2 million included a cash component and the contribution of shares of ISE Stock Exchange, LLC. Other transactions include the formation of subsidiaries.

Sources of Revenue

Sources of revenue differ for the four segments of Deutsche Börse Group.

Xetra

The performance of the Xetra cash market segment is largely determined by the trading behavior of institutional investors and proprietary trading by professional market participants. The primary source of revenue is trading income generated by Deutsche Börse Group's various platforms (Xetra, floor trading and, until 2009, Scoach). Other sources of revenue in the Xetra segment include fees generated by Eurex Clearing AG acting as the central counterparty (which is referred to in this document as CCP) for equities, income from cooperation agreements and listing fees. Income from cooperation agreements relates mainly to operating systems for the Irish Stock Exchange, Scoach, since 2010, the Vienna Stock Exchange and, since mid 2008, the Bulgarian Stock Exchange. Listing fees are generated predominantly from company listings and admissions to trading.

Eurex

The performance of the Eurex derivatives segment also depends primarily on the trading activities of institutional investors and proprietary trading by professional market participants. Segment revenue is generated primarily from transaction fees, which in the Eurex system are comprised of a combined fee for trading and clearing contracts. The main revenue drivers are equity index derivatives, followed by the interest rate derivatives and U.S. options offered by ISE, as well as equity derivatives. The Eurex trading and clearing fees represent the contractually agreed 85% of transaction fees invoiced by Eurex Clearing AG. The remaining 15% are transferred to SIX Swiss Exchange AG and are not included in Deutsche Börse Group's consolidated financial statements.

Clearstream

The performance of the Clearstream segment is mainly dependent on custody fees, transaction fees, global securities financing and net interest income from the banking business. Custody revenue is mainly driven by the value of international and domestic securities deposited, which is the key factor determining deposit fees. The settlement business depends largely on the number of international and domestic settlement transactions processed by Clearstream, both via stock exchanges and over-the-counter markets. The Global Securities Financing business includes tri-party repo, securities lending and collateral management.

Market Data & Analytics

The Market Data & Analytics segment produces, enhances, markets and distributes financial information relevant to capital market participants worldwide. End-users either subscribe to information packages or acquire certain usage rights via licensing. The segment generates much of its sales revenue through long-term arrangements with customers and is largely independent of trading volumes and volatility in the capital markets. The largest share of the segment's revenue is derived from the distribution of real-time order book and price data. These revenues are driven by the number of subscribers and the subscription price of the various data packages.

Table of Contents

The second biggest revenue contributor is the index business, which is driven by the number of licensees, the number of issues on indices, and the assets under management being tied to indices. The remaining 10% to 20% of revenues are a function of the number of users and trading volumes.

Components of Costs

Total costs of Deutsche Börse Group were subdivided into fee and commission expense from banking business, staff costs, depreciation, amortization and impairment loss as well as other operating expenses for 2008 and 2009. In 2010, two major changes were introduced, and 2008 and 2009 have been adjusted accordingly:

First, own expenses capitalized have no longer been reported separately as income in the consolidated income statement since January 1, 2010. Expenses incurred in connection with internal development activities comprise only the non-capitalized amounts since then.

Second, in order to further increase the transparency of expenses, costs have been split into volume-related costs and operating costs. Volume-related costs are comprised of fee and commission expenses from banking business and other volume-related costs previously booked in other operating expenses.

As a result of these changes, the cost categories include volume related costs, staff costs, depreciation, amortization and impairment loss as well as other operating expenses.

Results of Operations

The following table shows the consolidated results of operations of Deutsche Börse Group for the financial years ended December 31, 2010, 2009 and 2008.

Consolidated Results of Operations (IFRS)	2010	2009	2008
	(in millions of euros)		
Sales revenue	2,106.3	2,061.7	2,455.1
Net interest income from banking business	59.4	97.4	236.8
Other operating income	61.0	130.6	66.7
Total revenue	2,226.7	2,289.7	2,758.6
Volume-related cost	(210.9)	(250.3)	(270.1)
Total revenue less volume-related costs	2,015.8	2,039.4	2,488.5
Staff costs	(502.0)	(394.3)	(409.8)
Depreciation, amortization and impairment charges	(583.5)	(569.1)	(137.1)
Other operating expenses	(414.7)	(433.4)	(439.0)
Operating costs	(1,500.2)	(1,396.8)	(985.9)
Result from equity investments	12.2	(4.8)	5.8
Earnings before interest and tax (EBIT)	527.8	637.8	1,508.4
Financial income	24.0	51.0	237.6
Financial expenses	(132.2)	(130.7)	(277.1)
Earnings before tax (EBT)	419.6	558.1	1,468.9
Income tax expense	(24.5)	(86.9)	(418.6)
Net profit for the year	395.1	471.2	1,050.3
thereof shareholders of parent company (net income)	417.8	496.1	1,033.3
thereof non-controlling interests	(22.7)	(24.9)	17.0

Sales Revenue

Deutsche Börse Group's sales revenue increased slightly from 2,061.7 million in 2009 by 2% to 2,106.3 million in 2010. As the economic environment improved significantly in 2010 compared with 2009, demand

A-232

Table of Contents

for Deutsche Börse Group's products and services also increased. Sales revenue in 2009 included 46.3 million related to Scoach trading fees, which were no longer consolidated in 2010, and did not yet include sales revenues to non-Deutsche Börse Group customers of 25.1 million generated by STOXX Ltd. in 2009. Adjusted for these two effects, sales revenue increased from 2,040.5 million in 2009 by 3% to 2,106.3 million in 2010.

Sales revenue decreased from 2,455.1 million in 2008 by 16% to 2,061.7 million in 2009 due to the uncertainty on the market in 2009 because of the global financial and economic crisis, and declining trading activity in the cash and derivatives markets. By contrast, post-trade services recorded relatively stable volumes.

A detailed analysis of the development of the results of operations by segment is included in the section "Analysis of results of operation per segment" below.

Total revenue

In addition to sales revenue, total revenue includes net interest income from banking business and other operating income.

The expiration of interest rate hedges in 2009 as well as longer-term investments reaching maturity in 2009 resulted in a further decrease from 97.4 million in 2009 by 39% to 59.4 million in 2010 in net interest income from banking business. However, during the course of 2010, net interest income from banking business increased, from 11.0 million in the first quarter of 2010 to 16.9 million in the fourth quarter, driven by a slight increase in interest rates during 2010 and by an increase in overnight customer cash deposits.

Net interest income from banking business decreased considerably from 236.8 million in 2008 by 59% to 97.4 million in 2009 as a result of historically low short-term interest rates in 2009.

The decrease in other operating income from 130.6 million in 2009 by 53% to 61.0 million in 2010 was primarily due to a one-time benefit of 66.7 million resulting from the cancellation of a financial loss liability insurance policy with capital accumulation in the fourth quarter of 2009. Other operating income increased from 66.7 million in 2008 by 96% to 130.6 million in 2009 primarily due to the benefit of 66.7 million referred to above.

Total costs

Total costs of Deutsche Börse Group include volume-related costs, staff costs, depreciation, amortization and impairment charges and other operating expenses in all financial years. Deutsche Börse Group's cost management had a positive impact on total costs in 2010. Around 82% of Deutsche Börse Group's total costs were fixed costs excluding special effects in 2010. In contrast, as the figures in 2009 indicate, a decline in business volumes had a direct impact on the profitability of Deutsche Börse Group. Approximately 18% of Deutsche Börse Group's total costs resulted from volume-related costs in 2010. One of the main factors affecting total costs was staff cost.

Total costs increased from 1,647.1 in 2009 by 4% to 1,711.1 in 2010. Adjusted for ISE impairment charges of 415.6 million in 2009 and 453.3 million in 2010, as well as the release of provisions for efficiency programs of 13.7 million in 2009 and costs for efficiency programs 110.7 million in 2010, total costs decreased from 1,245.2 million in 2009 by 8% to 1,147.1 million in 2010.

The International Securities Exchange LLC (which is referred to in this document as "ISE"), which is included in the Eurex segment, is a U.S. options exchange. Significant other intangible assets (exchange license, member and customer relationships, trade name) are capitalized in Deutsche Börse Group's financial statements, see note 14 to the financial report for the years 2008, 2009 and 2010 of Deutsche Börse AG (which is referred to in this document as "three-year consolidated financial statements") included elsewhere in this document. The impairment tests of these intangible assets are based on key assumptions regarding expected volumes and

Table of Contents

transaction prices on the U.S. options market over a five-year period. The repeated impairment losses on these intangible assets of ISE in 2009 and 2010 were due to the stagnation in the U.S. market for stock options in these two years, the ongoing high level of competition with the entry of new competitors in 2010 and pending approval for new functionalities as at December 31, 2010.

Efficiency programs to reduce discretionary fixed costs have been started by Deutsche Börse Group. In September 2007, Deutsche Börse Group introduced an extensive efficiency program for 2008 and 2009 to generate cost savings of 100 million annually effective from 2010 onwards. An additional one-time program to reduce costs by 70 million was implemented in 2009. In February 2010, Deutsche Börse Group's management decided to streamline the management structure and implement further initiatives to generate annual savings of approximately 150 million per year from 2013 onwards. As part of these efficiency programs, Deutsche Börse Group plans to relocate certain additional functions from Frankfurt and Luxemburg to Prague, where approximately 250 employees were located by the end of 2010.

The increase in staff costs from 394.3 million in 2009 by 27% to 502.0 million in 2010 was due to the costs of efficiency programs amounting to 101.5 million in 2010 and reductions in provisions for efficiency programs of 16.2 million in 2009. Adjusted for costs related to the efficiency programs, staff costs declined from 410.5 million in 2009 by 2% to 400.5 million in 2010. This moderate decrease was, among other factors, the result of higher severance payments in 2009 and the lower average number of employees in 2010. Most of the former employees left Deutsche Börse Group in the fourth quarter of 2010, therefore the full extent of the cost reductions will only be reflected in subsequent years. The decrease was partly offset by the wages and salaries for the employees of STOXX Ltd. Staff costs per employee (based on the number of employees at the respective year end) adjusted for costs of efficiency programs, increased from 114 thousand in 2009 by 1% to 115 thousand in 2010.

Depreciation, amortization and impairment losses increased from 569.1 million in 2009 by 3% to 583.5 million in 2010. Adjusted for ISE impairment charges of 415.6 million in 2009 and 453.1 million in 2010, as well as software impairment charges of 20.0 million in 2009 (of which 0.2 million related to ISE software) and 8.6 million in 2010, total costs for depreciation, amortization and impairment losses decreased from 133.5 million in 2009 by 9% to 121.8 million in 2010.

Other operating expenses decreased from 433.4 million in 2009 by 4% to 414.7 million in 2010. Adjusted for the costs for efficiency programs of 2.5 million in 2009 and 9.2 million in 2010, other operating costs decreased from 430.9 million in 2009 by 6% to 405.5 million in 2010.

Total costs increased from 1,256.0 million in 2008 by 31% to 1,647.1 million in 2009. Adjusted for ISE impairment charges in the amount of 415.6 million in 2009, total costs decreased from 1,256.0 million in 2008 by 2% to 1,231.5 million in 2009.

Staff costs decreased from 409.8 million in 2008 by 4% to 394.3 million in 2009. The decline was attributable to lower bonus payment expenses and savings generated by the restructuring and efficiency program. The overall decrease was partly offset by the wages and salaries of the employees of MNI, which were included in the costs of staff for the first time in 2009 and the severance payment of the company's former CFO. Based on the number of employees at year end, staff costs per employee, adjusted for costs of efficiency programs, decreased from 121 thousand in 2008 by 6% to 114 thousand in 2009.

Depreciation, amortization and impairment losses increased from 137.1 million in 2008 by 315% to 569.1 million in 2009, mainly due to the ISE impairment charge of 415.6 million in 2009, as well as software impairments amounting to 20.0 million in 2009.

Other operating expenses decreased from 439.0 million in 2008 by 1% to 433.4 million in 2009.

Table of Contents**Result From Equity Investments**

The result from equity investments increased from a loss of (4.8) million in 2009 to a profit of 12.2 million in 2010. In 2010 this profit was generated primarily by Scoach Holding S.A., Direct Edge Holdings, LLC and European Energy Exchange AG. The positive contribution of these companies was offset to a small extent by impairment losses on minor equity investments, such as the interest ISE holds in Ballista Securities LLC.

The result from equity investments amounted to a profit of 5.8 million in 2008 and a loss of (4.8) million in 2009. The profit of 5.8 million in 2008 was mainly due to the increase posted at equity for STOXX Ltd. in the amount of 12.9 million mainly based on the net income of STOXX Ltd. for 2008. The loss recorded in 2009 was mainly due to an impairment charge of 27.0 million recognized for ISE's investment in Direct Edge Holdings, LLC, a U.S.-based company operating a trading platform.

EBIT

Earnings before interest and tax (which is referred to in this document as EBIT) decreased from 637.8 million in 2009 to 527.8 million in 2010. Adjusted for the ISE impairment charges and the costs of the efficiency programs, Deutsche Börse Group generated an EBIT of 1,091.0 million in 2010, which corresponded to an increase of 5% on the previous year 2009, when Deutsche Börse Group generated an EBIT of 1,039.7 million, which was due to the cost decrease of 98.1 million, partly offset by lower other operating income.

EBIT decreased from 1,508.4 million in 2008 to 637.8 million in 2009. Adjusted for ISE impairment charges of 415.6 million in 2009, as well as releases of provisions for efficiency programs of 13.7 million in 2009 and 3.0 million in 2008, EBIT decreased from 1,505.4 million by 31% to 1,039.7 million, which was mainly due to the total revenue decrease of 468.9 million.

Financial Result

The financial result (calculated as the net amount of financial income and financial expense) decreased from (79.7) million in 2009 by 36% to (108.2) million in 2010 mainly due to anticipated interest expenses on tax payments in connection with tax audits not yet finalized in the amount of 22.5 million in 2010, costs related to the repurchase of a hybrid bond and lower interest income from Eurex member cash due to lower interest rates in 2010.

The financial result decreased from (39.5) million in 2008 by 102% to (79.7) million in 2009, which can be attributed to a positive impact from currency valuation in the amount of 15.2 million, lower costs for ISE financing due to the termination of the short-term financing in the first quarter of 2008 and higher interest income from Eurex member cash as well as group money management due to higher cash volumes and interest rates in 2008.

Income Tax Expense

The decrease of income tax expenses from 2009 to 2010 and from 2008 to 2009 was mainly due to a decrease in EBIT.

Table of Contents

The following table shows income tax expense detail for the financial years ended December 31, 2010, 2009 and 2008.

Income tax expense (IFRS)	2010	2009	2008
	(in millions of euros)		
Current income taxes:			
of the current year	(249.3)	(288.2)	(450.3)
from previous years	18.9	(18.6)	2.2
Deferred tax income on temporary differences	205.9	219.9	29.5
Income tax expense	(24.5)	(86.9)	(418.6)

The following table shows the reconciliation between the expected and the reported income tax expense for the financial years ended December 31, 2010, 2009 and 2008.

Reconciliation between the expected and the reported tax expense

(IFRS)	2010	2009	2008
	(in millions of euros)		
Expected income taxes derived from earnings before tax	(117.4)	(161.8)	(470.0)
Change of not recognized losses carried forward	(14.7)	14.2	2.8
Tax increase due to other non-tax-deductible expenses	(5.3)	(3.9)	(6.0)
Effects resulting from different tax rates	22.7	23.3	20.2
Tax decrease due to dividends and income from the disposal of equity investments	42.1	49.8	30.1

Table of Contents*Sales revenue*

The following table shows the sales revenue of the Xetra segment for the financial years ended December 31, 2010, 2009 and 2008.

Xetra segment sales revenue (IFRS)	2010	2009	2008
	(in millions of euros)		
Xetra trading fees	102.5	93.0	175.4
Clearing and settlement	45.2	47.8	97.4
Floor trading fees	23.4	21.4	32.2
Connectivity	20.5	17.9	13.8
Scoach trading fees	0	46.3	55.7
Other sales revenue	30.7	24.6	24.9
Allocated IT revenues	40.0	41.1	49.3
Segment sales revenue	262.3	292.1	448.7

Sales revenue decreased from 292.1 million in 2009 by 10% to 262.3 million in 2010. The sales revenue included allocated IT revenues of 41.1 million in 2009 and 40.0 million in 2010. Excluding Scoach trading fees of 46.3 million included in 2009 to reflect the subsequent deconsolidation of the Scoach subgroup by the end of 2009, the adjusted revenue from the Xetra segment increased by 7% from 2009 to 2010 on a comparable basis. The increase in 2010 was mainly due to the increase in aggregate trading volumes on Xetra and floor trading by 16%, which exceeded the effect of price reductions made in 2009 and 2010.

The trading volume on the Xetra trading platform increased from 1,060.6 billion in 2009 by 17% to 1,236.9 billion in 2010 based on an increase in transactions from 167.3 million in 2009 by 13% to 189.4 million in 2010 and an increase in average transaction value from 12.7 thousand in 2009 to 13.1 thousand in 2010.

Xetra segment sales revenue decreased from 448.7 million in 2008 by 35% to 292.1 million in 2009 due to the financial crisis and the corresponding ongoing uncertainty in the international financial markets leading to a considerable slowdown in trading activity. The trading volume decreased from 2,149.0 billion in 2008 by 51% to 1,060.6 billion in 2009 based on a decrease in transactions from 226.0 million in 2008 by 26% to 167.3 million in 2009 and a decrease in average transaction value from 19.0 thousand in 2008 to 12.7 thousand in 2009.

The following table shows the development of trading volume for the financial years ended December 31, 2010, 2009 and 2008.

Trading volume	2010	Change	2009	Change	2008
	(in billions of euros)	(%)	(in billions of euros)	(%)	(in billions of euros)
Xetra	1,236.9	17	1,060.6	(51)	2,149.0
Floor ⁽¹⁾	61.4	2	60.0	(25)	80.1
Tradegate	17.8	n/a			
Scoach	n/a	n/a	43.0	(34)	64.9

(1) Excluding certificates and warrants, which are shown in the row for Scoach for 2009 and 2008.

Total costs of segment

Total costs (including volume-related cost) declined from 187.6 million in 2009 by 8% to 173.2 million in 2010, due to a significant reduction in volume-related cost and in other operating expenses, caused by the deconsolidation of Scoach subgroup. Staff costs increased from 58.5 million in 2009 by 35% to 79.1 million in 2010 mainly due to costs for efficiency programs of 21.0 million in 2010. Adjusted for the cost of efficiency programs in 2010, staff costs per employee remained almost constant with 116 thousand in 2009 and 115 thousand in 2010.

Table of Contents

Total costs declined from 198.5 million in 2008 by 5% to 187.6 million in 2009 mainly due to a decrease in other operating expenses from 96.7 million in 2008 by 11% to 86.3 million in 2009, due to lower CCP-related charges in 2009 and higher costs in 2008 due to financial crisis. Staff costs per employee decreased from 136 thousand in 2008 by 15% to 116 thousand in 2009.

EBIT

EBIT decreased from 140.3 million in 2009 by 25% to 105.1 million in 2010 despite the reduction of cost, which could not compensate the sharp decrease in sales revenue and the reduction in other operating income from 39.3 million in 2009 to 7.8 million in 2010. The decrease from 2009 to 2010 was mainly due to the cancellation of a financial loss liability insurance policy with capital accumulation in 2009.

Xetra segment's EBIT decreased from 253.2 million in 2008 by 45% to 140.3 million in 2009 because the significant decrease in sales revenue was not compensated by a similar decrease in total costs.

Eurex Segment

The following table shows the results of operations of the Eurex segment for the financial years ended December 31, 2010, 2009 and 2008.

Results of Operations Eurex Segment	2010	2009	2008
(IFRS)	(in millions of euros)		
Total sales revenue	858.7	838.4	1,035.3
Other operating income	32.5	51.3	53.4
Total revenue	891.2	889.7	1,088.7
Volume-related cost	(14.3)	(36.1)	(47.3)
Total revenue less volume-related costs	876.9	853.6	1,041.4
Staff costs	(161.1)	(135.1)	(130.7)
Depreciation, amortization and impairment charges	(520.6)	(502.4)	(69.6)
Other operating expenses	(205.1)	(195.9)	(196.5)
Operating costs	(886.8)	(833.4)	(396.8)
Result from equity investments	5.3	(11.1)	(2.2)
Earnings before interest and tax (EBIT)	(4.6)	9.1	642.4
Net financial result	(100.6)	(78.5)	(48.7)
Earnings before tax (EBT)	(105.2)	(69.4)	593.7
Investment in intangible assets and property, plant and equipment	69.7	52.0	38.5
Employees (as at December 31)	911	927	911
EBIT margin (in %)	(0.5)	1.1	62.0

A-238

Table of Contents*Sales revenue*

The following table shows the external sales revenue of the Eurex segment for the financial years ended December 31, 2010, 2009 and 2008.

Eurex segment sales revenue (IFRS)	2010	2009	2008
	(in millions of euros)		
Equity index derivatives	378.9	358.9	450.0
Interest rate derivatives	182.0	149.9	211.1
U.S. options (ISE)	112.9	153.7	176.6
Equity derivatives	45.6	41.8	58.6
Other sales revenue	110.2	99.7	113.8
Allocated IT revenues	29.1	34.4	25.2
Segment sales revenue	858.7	838.4	1,035.3

Sales revenue increased from 838.4 million in 2009 by 2% to 858.7 million in 2010 with significant increases in revenue from equity index derivatives of 6% and interest derivatives of 21%, while revenues from U.S. options (ISE) decreased by 27%. Sales revenue included allocated IT revenue of 34.4 million in 2009 and of 29.1 million in 2010. The sales revenue of interest rate derivatives increased based on an increase in trading volume of 465.7 million contracts in 2009 by 23% to 574.8 million contracts in 2010. The increase in index products is the result of a shift from equity index options (lower average price) to equity index futures (higher average price) as well as a strong rise in index dividend products (by 77% compared to 2009).

Sales revenue decreased from 1,035.3 million in 2008 by 19% to 838.4 million in 2009 as a result of declining revenue in all categories of derivatives trading. In particular, the sales revenue of equity index derivatives and interest rate derivatives decreased based on an decrease in trading volume of equity index derivatives from 1,026.8 million contracts in 2008 by 22% to 800.1 million contracts in 2009 and of interest rate derivatives from 658.3 million contracts in 2008 by 29% to 465.7 million contracts in 2009.

The following table shows the contract volumes in the derivatives market in 2008, 2009 and 2010.

Trading volume	2010	Change	2009	Change	2008
	(in million contracts)	(%)	(in million contracts)	(%)	(in million contracts)
Equity index derivatives ⁽¹⁾	808.9	1	800.1	(22)	1,026.8
Equity derivatives ⁽¹⁾	511.8	21	421.3	(12)	479.5
Interest rate derivatives	574.8	23	465.7	(29)	658.3
U.S. options	745.2	(22)	960.2	(5)	1,007.7
Total⁽²⁾	2,642.1	(0)	2,647.4	(17)	3,172.7

(1) The dividend derivatives were allocated to the equity index derivatives and the equity derivatives.

(2) The total shown does not equal the sum of the individual figures as it includes other traded derivatives such as volatility, ETF, agricultural, precious metals, dividend and emission derivatives.

Total costs of segment

Total costs increased from 869.5 million in 2009 by 4% to 901.1 million in 2010. Adjusted for non-cash ISE impairment charges of 415.6 million in 2009 and of 453.1 million in 2010 and costs for efficiency programs of (0.6) million in 2009 and of 32.9 million in 2010, costs decreased from 454.5 million in 2009 by 9% to 415.1 million in 2010. Staff costs increased from 135.1 million in 2009 by 19% to 161.1 million in 2010 mainly due to costs for efficiency programs of 30.3 million in 2010. Adjusted for the cost of efficiency programs in 2010, staff costs per employee decreased from 146 thousand in 2009 by 2% to 143 thousand in 2010.

Table of Contents

For a detailed description of the ISE impairment charges included in the line item depreciation, amortization and impairment charges in 2010 and 2009, please refer to the section *Results of operations* above.

Total costs increased from 444.1 million by 96% to 869.5 million in 2009 due to the impairment charges recognized for ISE in the amount of 415.6 million in 2009. Adjusted for the non-cash ISE impairment charge, costs amounted to 453.9 million in 2009, an increase of 2% compared to 2008. Staff costs increased from 130.7 million in 2008 by 3% to 135.1 million in 2009 mainly due to an increase in the number of staff. Staff costs per employee increased from 143 thousand in 2008 by 2% to 146 thousand in 2009.

EBIT

EBIT decreased from 9.1 million in 2009 to (4.6) million in 2010 because the increase in sales revenue was exceeded by the increase in total costs. An improvement in the result from equity investments from (11.1) million in 2009 to 5.3 million in 2010 was offset by a decline in other operating income from 51.3 million in 2009 to 32.5 million in 2010 mainly due to the one-time benefit resulting from the cancellation of a financial loss liability insurance policy with capital accumulation in 2009.

The Eurex segment EBIT decreased from 642.4 million in 2008 to 9.1 million in 2009 as a result of revenue decline and impairment charges. Adjusted for the ISE impairment charge, the Eurex segment had an EBIT of 424.7 million in 2009.

Clearstream Segment

The following table shows the results of operations of the Clearstream segment for the financial years ended December 31, 2010, 2009 and 2008.

Results of Operations Clearstream Segment	2010	2009	2008
(IFRS)	(in millions of euros)		
External sales revenue	760.7	742.7	790.5
Internal sales revenue	7.1	8.9	8.8

Table of Contents*Sales revenue*

The following table shows the external sales revenue of the Clearstream segment for the financial years ended December 31, 2010, 2009 and 2008.

Clearstream segment sales revenue (IFRS)	2010	2009	2008
	(in millions of euros)		
Custody fees	451.8	441.1	459.1
Transaction fees	118.4	114.2	140.2
Global Securities Financing	68.1	68.6	83.5
Other sales revenue	102.2	96.9	86.5
Allocated IT revenues	20.2	21.9	21.2
Segment sales revenue	760.7	742.7	790.5

External sales revenue increased from 742.7 million in 2009 by 2% to 760.7 million in 2010 due to a 2% increase in custody fees and a 4% increase in transaction fees while income from Global Securities Financing decreased by 1%. Sales revenue included allocated IT revenue of 21.9 million in 2009 and 20.2 million in 2010. In the custody business, the average value of assets under custody increased from 10.3 trillion in 2009 by 5% to 10.9 trillion in 2010 due to slightly more favorable market conditions. The number of settlement transactions processed by Clearstream increased from 102.0 million in 2009 by 14% to 116.4 million in 2010 due to the increased trading activity of market participants. In the Global Securities Financing business, average outstandings increased from 483.6 billion in 2009 by 8% to 521.6 billion in 2010. Despite the rise in overall volumes, sales revenue in the Global Securities Financing business decreased by 1%, mainly because of a decline of the market prices for securities as collateral.

External sales revenue decreased from 790.5 million in 2008 by 6% to 742.7 million in 2009 due to reduced income from custody fees, transaction fees and from Global Securities Financing. In the custody business, the average value of assets under custody decreased from 10.6 trillion in 2008 by 3% to 10.3 trillion in 2009, which resulted in a decrease in custody fees from 459.1 million in 2008 by 4% to 441.1 million in 2009. The number of settlement transactions processed by Clearstream decreased from 114.3 million in 2008 by 11% to 102.0 million in 2009, mainly due to the domestic market. Revenues from Global Securities Financing went down by 18% due to lower volumes and a decrease in margins as a result of difficult market conditions and a more stringent risk management approach towards collateral quality for securities lending.

Internal sales revenue relates to CCP transactions and did not change significantly from 2008 to 2010.

Table of Contents

The following table shows key indicators of the Clearstream segment in 2008, 2009 and 2010.

	2010 (in billions of euros)	Change (%)	2009 (in billions of euros)	Change (%)	2008 (in billions of euros)
Custody					
Value of securities deposited (average value during the year)	10,897	5	10,346	(3)	10,637

Volume outstanding (monthly average)	521.6	8	483.6	21	398.8
Average daily cash balances	(in millions of euros)	(%)	(in millions of euros)	(%)	(in millions of euros)
Total	6,933	9	6,369	12	5,677
euros	2,264	4	2,186	(5)	2,300
U.S. dollars	3,288	16	2,833	45	1,952
other currencies	1,381	2	1,350	(5)	1,425

Net interest income from banking business

The net interest income from banking business decreased from 97.4 million in 2009 by 39% to 59.4 million in 2010 due to the low level of short-term interest rates in 2010 and also due to the expiration of interest rate hedges as well as longer-term investments reaching maturity in 2009.

The net interest income from banking business declined significantly from 236.8 million in 2008 by 59% to 97.4 million in 2009 due to historically low interest rates.

Total costs of segment

Total costs increased from 511.1 million in 2009 by 6% to 540.1 million in 2010 due to a significant increase in staff cost from 166.1 million in 2009 by 28% to 213.0 million in 2010, which was caused by costs of efficiency programs in the amount of 42.8 million in 2010 mainly in staff costs and a cost reduction of 14.7 million in 2009 related to the reversal of a staff-related provision. Adjusted for the cost of efficiency programs in 2010 and the release of a provision in 2009, staff costs per employee decreased from 103 thousand in 2009 by 3% to 100 thousand in 2010.

Clearstream reduced total cost from 540.8 million in 2008 by 5% to 511.1 million in 2009 mainly due to lower sales-related cost and staff costs, but also to lower depreciation in total and the one-time effect of reversing restructuring provisions relating to the relocation of business areas to Prague. Staff costs decreased from 189.3 million in 2008 by 12% to 166.1 million in 2009. Adjusted for cost efficiency programs, staff costs per employee decreased from 106 thousand in 2008 by 3% to 103 thousand in 2009.

EBIT

EBIT decreased from 367.9 million in 2009 by 19% to 299.3 million in 2010 because the increase in sales revenue was more than offset by the decline in net interest income from banking business and the increase in total costs mainly due to the costs of the efficiency program.

EBIT decreased from 505.2 million in 2008 by 27% to 367.9 million in 2009 since Clearstream could not offset the declines in sales revenue and net interest income with its reduction in total costs.

Table of Contents**Market Data & Analytics Segment**

The following table shows the results of operations of the Market Data & Analytics segment for the financial years ended December 31, 2010, 2009 and 2008.

Results of Operations Market Data & Analytics	2010	2009	2008
(IFRS)	(in millions of euros)		
External sales revenue	224.6	188.5	180.6
Internal sales revenue	31.1	9.9	11.5
Total sales revenue	255.7	198.4	192.1

Investment in intangible assets and property, plant and equipment	6.8	3.2	7.4
Employees (as at December 31)	374	413	267
EBIT margin (in %)	57.0	63.9	59.6

Sales Revenue

The following table shows the external sales revenue of the Market Data & Analytics segment for the financial years ended December 31, 2010, 2009 and 2008.

Market Data & Analytics

Segment sales revenue (IFRS)	2010	2009	2008
	(in millions of euros)		
Sales of price information	142.9	141.1	139.5
STOXX	30.9	0	n/a
Other sales revenue	50.8	47.4	41.1
Segment sales revenue	224.6	188.5	180.6

External sales revenues increased from 188.5 million in 2009 by 19% to 224.6 million in 2010. Growth in 2010 was mainly driven by M&A activity. In November 2009, Deutsche Börse and SIX Group AG announced that they were increasing their respective shares in STOXX Ltd. to become sole operator of the Swiss index provider. The transaction closed on December 29, 2009 and was reflected in segment revenues for the

Edgar Filing: NYSE Euronext - Form 425

first time in financial year 2010 with 30.9 million. The remaining growth was created in the product areas issuer products, front office products and back office products.

2010 also showed a significant increase in internal revenues from 9.9 million in 2009 by 214% to 31.1 million in 2010. These revenues mainly resulted from STOXX Ltd.'s contractual relationship with Eurex as it has licensed its indices as reference data for futures and options.

A-243

Table of Contents

External sales revenue increased from 180.6 million in 2008 by 4% to 188.5 million in 2009. Decreases in revenues from Infobolsa, as well as the issuing activity and the assets under management in DAX ETFs were almost compensated by higher data subscription revenues. The single biggest driver of growth in 2009 was the acquisition of Market News International, which contributed 10.0 million in sales revenues in 2009.

Total costs of segment

Total costs increased significantly from 105.1 million in 2009 by 36% to 142.7 million in 2010 due to the first time consolidation of STOXX Ltd. in 2010 as well as costs for efficiency programs. Staff costs increased from 34.6 million in 2009 by 41% to 48.8 million in 2010 also due to the additional staff costs related to STOXX Ltd. and costs for efficiency programs of 7.4 million in 2010. Adjusted for the cost of efficiency programs in 2010, staff costs per employee increased from 84 thousand in 2009 by 32% to 111 thousand in 2010.

Total costs increased from 100.6 million in 2008 by 4% to 105.1 million in 2009 exclusively due to higher staff costs arising from the consolidation of MNI. Staff costs increased from 29.9 million in 2008 by 16% to 34.6 million in 2009. Staff costs per employee decreased from 112 thousand in 2008 by 25% to 84 thousand in 2009.

EBIT

EBIT increased from 120.5 million in 2009 by 6% to 128.0 million in 2010 due to the higher external sales revenue and an increase in segment internal revenue from 9.9 million in 2009 to 31.1 million in 2010 based on the consolidation of STOXX Ltd.

EBIT increased from 107.6 million in 2008 by 12% to 120.5 million in 2009 following an increase in other operating income from 3.2 million in 2008 by 13.8 million to 17.0 million in 2009 due to the allocation of the income generated with the cancellation of the financial loss liability insurance policy in the amount of 13.0 million. Otherwise the increase in external sales revenue was offset by the higher staff costs and a decrease in segment internal revenue from 11.5 million in 2008 to 9.9 million in 2009.

Table of Contents**Cash Flow**

The following table shows the consolidated cashflow statement of Deutsche Börse Group for the financial years ended December 31, 2010, 2009 and 2008.

Consolidated Cashflow Statements (IFRS)	2010	2009 (in millions of euros)	2008
Net profit for the year	395.1	471.2	1,050.3
Depreciation, amortization and impairment losses	583.5	569.1	137.1

- (6) Excluding cash deposits by market participants.
- (7) Interest and dividend payments are allocated to cash flows from operating activities.

Comparison 2009 to 2010*Cash flows from operating activities*

The operating cash flow increased from 801.5 million in 2009 by 142.4 million to 943.9 million in 2010. A decrease in net profit from 471.2 million in 2009 by 76.1 million to 395.1 million in 2010 was compensated by a cash inflow of 50.4 million in 2010 compared to a cash outflow of 42.6 million in 2009 on account of the decrease in receivables and other assets, and a cash inflow of 152.7 million in 2010 compared to a cash outflow of 2.3 million in 2009 due to an increase in current liabilities. Depreciation, amortization and impairment losses of 583.5 million in 2010 were only slightly higher than the amount of 569.1 million recorded in 2009.

Cash flows from investing activities

Net cash outflows from investing activities amounted to 1,082.7 million in 2009 and 520.1 million in 2010.

Cash outflows from the banking business of Clearstream Banking S.A. decreased from 1,113.9 million in 2009 to 771.0 million in 2010 due to a reduction of purchases of noncurrent financial instruments.

Cash outflows which were used to acquire intangible assets and property, plant and equipment (capital expenditure) decreased from 172.3 million in 2009 to 133.9 million in 2010. The decline from 2009 to 2010 was mainly attributable to investments in intangible assets of STOXX Ltd. in connection with the acquisition by Deutsche Börse of additional shares amounting to around 74.0 million in the Swiss index provider on December 29, 2009.

Cash outflows of 12.4 million in 2010 resulted from a net increase in current receivables, securities and liabilities with an original term greater than three months within the banking business of Clearstream Banking S.A., compared to cash inflows of 165.6 million in 2009.

Cash inflows of 393.5 million in 2010 were due mainly to the sale and maturity of noncurrent financial instruments related to the banking business within Clearstream Banking S.A., compared to cash inflows of only 88.7 million in 2009.

Cash flows from financing activities

Net cash outflows from financing activities amounted to 454.9 million in 2009 and 587.9 million in 2010.

Cash outflows of 390.2 million in 2009 and of 390.5 million in 2010 were due to dividends paid in the respective financial years.

Cash outflows of 811.2 million in 2009 compared to cash outflows of 103.7 million in 2010 were used for the repayment of short-term financing, primarily under Deutsche Börse's commercial paper program in the respective years. Cash outflows in 2009 due to repayments were partially offset by the issuance of commercial paper in the amount of 711.4 million in 2009.

Compared to cash outflows of only 3.9 million in 2009, cash outflows of 97.2 million in 2010 for repayments of long-term financing were used mainly for the repurchase of a total of 89.0 million (nominal amount) of the hybrid bond issued in 2008.

Table of Contents***Comparison 2008 to 2009******Cash flows from operating activities***

The operating cash flow decreased from 1,278.9 million in 2008 by 477.4 million to 801.5 million in 2009. The main cause was the decrease in net profit for the year from 1,050.3 million in 2008 by 579.1 million to 471.2 million in 2009, which was partially offset by the non-cash effect of increased depreciation, amortization and impairment losses of 569.1 million in 2009 compared to 137.1 million in 2008 and the deferred tax income of 219.9 million in 2009 compared to 29.5 million in 2008. Furthermore, noncurrent provisions increased by 19.3 million in 2009 compared to a decrease of 47.5 million in 2008. Working capital decreased by 165.3 million in 2008 mainly due to a decrease in receivables and other assets. In 2009 working capital increased by 44.6 million.

The items depreciation, amortization and impairment losses and deferred tax income were significantly impacted by the impairment charge recognized for intangible assets relating to ISE and the resulting deferred tax credit in 2009 and 2010.

Cash flows from investing activities

Net cash outflows from investing activities amounted to 939.6 million in 2008 and 1,082.7 million in 2009.

Cash outflows from banking business of Clearstream Banking S.A. increased from 344.0 million in 2008 to 1,113.9 million in 2009 due to an increase of purchases of noncurrent financial instruments in 2009.

Cash outflows which were used to acquire intangible assets and property, plant and equipment (capital expenditure) increased from 94.5 million in 2008 to 172.3 million in 2009. The increase in 2009 was mainly attributable to investments in intangible assets of STOXX Ltd. in connection with the acquisition of additional shares in the Swiss index provider by Deutsche Börse on December 29, 2009. Cash outflows of 51.0 million in 2009 were attributable to the acquisition of MNI and Need to Know News, LLC and additional shares in STOXX Ltd., compared to none in 2008.

Cash outflows for investments in associates significantly decreased from 122.3 million in 2008 to 1.4 million in 2009. The cash outflows 2008 were mainly used to acquire further shares in European Energy Exchange AG and in connection with the merger of ISE Stock Exchange, LLC and Direct Edge Holdings, LLC.

Cash inflows of 165.6 million in 2009 resulted from a net decrease in current receivables, securities and liabilities with an original term greater than three months within the banking business of Clearstream Banking S.A. while there was a significant increase of this line item with cash outflows of 391.2 million in 2008.

Cash inflows of 88.7 million in 2009 compared to cash inflows of 19.9 million in 2008. The 2009 and the 2008 cash inflows were mainly due to the sale or maturity of noncurrent financial instruments related to the banking business of Clearstream Banking S.A.

Cash flows from financing activities

Net cash outflows from financing activities amounted to 943.0 million in 2008 and to 454.9 million in 2009.

Cash outflows of 403.0 million in 2008 and of 390.2 million in 2009 resulted from dividends paid in the respective financial years. In addition, Deutsche Börse purchased treasury shares for a total of 380.5 million in 2008 and none in 2009.

The repayment of short-term financing of 1,941.7 million in 2008 was due to the repayment of commercial paper amounting to 600.0 million and the repayment of the short-term financing for the acquisition of ISE in the amount of 1,341.7 million. In 2008, cash outflows for repayments of short-term borrowings were partially offset

Table of Contents

by the issuance of long-term financing in the amount of 1,481.6 million to fund the ISE acquisition by issuing a euro-denominated senior bond in the nominal amount of 650.0 million, a euro-denominated hybrid bond in the nominal amount of 550.0 million and U.S. dollar bonds issued in private placements in the aggregate nominal amount of \$ 460.0 million. In 2009, cash outflows of 811.2 million were due to the repayment of commercial paper.

Cash inflows of 794.4 million in 2008 and 715.1 million in 2009 were mainly caused by the issuance of commercial paper.

Compared to no cash effect in 2008 cash inflows of 20.4 million in 2009 resulted from non-controlling interests in connection with a payment to the reserves of STOXX Ltd.

Cash and cash equivalents

Cash and cash equivalents changed from 448.2 million as at December 31, 2008 to (285.4) million as at December 31, 2009 and to (445.5) million as at December 31, 2010 due to the changes in cash flows from operating, investing and financing activities described in 2009 and 2010 above.

Cash and cash equivalents as used in the cash flow statement can be reconciled to the balance sheets items:

Reconciliation to cash and cash equivalents (IFRS)	2010	2009	2008
	(in millions of euros)		
Cash and bank balances	6,982.9	5,305.3	10,847.5
Less bank loans and overdrafts	(20.1)	0	0
	6,962.8	5,305.3	10,847.5
Current receivables from banking business	7,585.3	7,192.4	8,428.0
less loans to banks and customers with an original maturity of more than 3 months	(537.1)	(272.4)	(202.1)
less available-for-sale debt instruments	(570.3)	(448.1)	(331.9)
less available-for-sale fixed-income securities money market instruments with an original maturity of more than 3 months	0	(82.0)	(147.2)
less derivative assets	0	(18.5)	(9.1)
Current liabilities from banking business	(7,822.0)	(7,221.0)	(7,916.3)
less derivative assets	0	0.4	0
Current liabilities from cash deposits by market participants	(6,064.2)	(4,741.5)	(10,220.7)
	(7,408.3)	(5,590.7)	(10,399.3)
Cash and cash equivalents	(445.5)	(285.4)	448.2

Cash and cash equivalents include cash and bank balances, except for amounts related to the investment of restricted funds deposited by market participants. Receivables and liabilities from banking business with an original maturity of more than three months are included in cash flows from investing activities, while items with an original maturity of three months or less are contained in cash and cash equivalents.

The effect of exchange rate differences on cash and cash equivalents held in a foreign currency was reported separately in the cash flow statement in order to reconcile cash and cash equivalents at the beginning and the end of the period. The effect of exchange rate differences on cash and cash equivalents amounted to 11.7 million in 2008, 2.5 million in 2009 and 4.0 million in 2010.

Cash and bank balances included restricted bank balances amounting to 10,364.7 million as at December 2008, 4,745.6 million as at December 31, 2009 and 6,185.8 million as at December 31, 2010. The restricted bank balances were mainly related to cash deposits by market participants and to a smaller amount to minimum reserve requirements.

Table of Contents**Total Assets**

The following table shows the total assets of the consolidated balance sheet of Deutsche Börse Group as at December 31, 2010, 2009 and 2008.

Consolidated Balance Sheet (IFRS)	2010	Change	2009	Change	2008
	(in millions of euros)	(%)	(in millions of euros)	(%)	(in millions of euros)
Assets					
Software	50.2	(41)	84.5	(16)	101.1

Comparison 2009 to 2010

The overall changes in total assets of Deutsche Börse Group were mainly related to two effects recorded in current assets, which have a similar impact on Deutsche Börse Group's current liabilities.

The financial instruments of Eurex Clearing AG recorded in current assets as of each respective balance sheet date relate to a corresponding liability in the same amount posted in current liabilities. The decrease from 143,178.4 million as at December 31, 2009 to 128,823.7 million as at December 31, 2010 was connected with its function CCP for cash and derivatives markets.

Table of Contents

The restricted bank balances recorded in current assets as of each respective balance sheet date correlate with the cash deposits by market participants posted in current liabilities. The increase from 4,745.6 million as at December 31, 2009 to 6,185.8 million as at December 31, 2010 was a consequence of the recovery of financial markets resulting in higher volumes.

Other changes in current assets resulted primarily from the following factors:

The increase in receivables and securities from banking business from 7,192.4 million as at December 31, 2009 to 7,585.3 million as at December 31, 2010 was due to higher trading volumes as a consequence of the recovery of the financial market.

The decrease in other current assets from 167.1 million as at December 31, 2009 to 141.4 million as at December 31, 2010 due to the payment in 2010 of the receivable recorded at the end of 2009, was partly offset by an increase in other receivables from CCP transactions.

Other cash and bank balances increased from 559.7 million as at December 31, 2009 to 797.1 million as at December 31, 2010.

Deutsche Börse Group's total noncurrent assets decreased from 5,251.0 million as at December 31, 2009 to 5,069.5 million as at December 31, 2010 largely due to a decrease in other intangible assets from 1,333.7 million as at December 31, 2009 to 914.9 million as at December 31, 2010 following the impairment of ISE's exchange license by 111.2 million and member relationships of ISE by 318.4 million. This decrease was partly offset by an increase in goodwill recorded for ISE from 880.1 million as at December 31, 2009 to 950.8 million as at December 31, 2010 due to exchange rate movements and an additional increase in receivables and securities from the banking business from 1,468.2 million as at December 31, 2009 to 1,555.6 million as at December 31, 2010.

Comparison 2008 to 2009

The overall changes in total assets of Deutsche Börse Group were mainly related to two effects recorded in current assets, which have a similar impact on Deutsche Börse Group's current liabilities.

The financial instruments of Eurex Clearing AG recorded in current assets as of each respective balance sheet date relate to a corresponding liability in the same amount posted in current liabilities. The increase from 121,684.3 million as at December 31, 2008 to 143,178.4 million as at December 31, 2009 was connected with its function as CCP for cash and derivatives markets.

The restricted bank balances recorded in current assets as of each respective balance sheet date correlate with the cash deposits by market participants posted in current liabilities. The decrease from 10,364.7 million as at December 31, 2008 to 4,745.6 million as at December 31, 2009 resulted from lower collateral provided to Eurex Clearing AG by market participants following the easing of collateral requirements after the financial crisis.

Other changes in current assets resulted primarily from the following factors:

A decline in receivables and securities from banking business from 8,428.0 million as at December 31, 2008 to 7,192.4 million as at December 31, 2009 was due to lower trading volumes because of the financial crisis.

An increase in other current assets from 60.5 million as at December 31, 2008 to 167.1 million as at December 31, 2009 was mainly due to an additional receivable recorded at the end of 2009 related to the termination of Deutsche Börse Group's financial loss liability insurance policy.

Edgar Filing: NYSE Euronext - Form 425

Other cash and bank balances increased from 482.8 million as at December 31, 2008 to 559.7 million as at December 31, 2009.

Deutsche Börse Group's total noncurrent assets increased from 4,544.9 million as at December 31, 2008 to 5,251.0 million as at December 31, 2009 mainly due to an increase in receivables and securities from the banking business from 756.3 million as at December 31, 2008 to 1,468.2 million as at December 31, 2009.

Total current liabilities	143,569.8	(8)	155,928.2	11	140,686.6
Total liabilities	145,440.2	(8)	158,021.7	11	142,900.3
Total equity and liabilities	148,850.5	(8)	161,360.5	11	145,878.6

Comparison 2009 to 2010

Total equity increased from 3,338.8 million as at December 31, 2009 to 3,410.3 million as at December 31, 2010. The accumulated profit increased from 1,886.8 million as at December 31, 2009 to 1,971.0 million as at December 31, 2010 due to the net income 2010 of 417.8 million exceeding the dividends paid in 2010 of 390.5 million and the positive effects of exchange rate differences and other adjustments in the amount of 89.1 million in 2010 and the negative effects of deferred taxes of (32.2) million.

Total liabilities changed from 158,021.7 million as at December 31, 2009 to 145,440.2 million as at December 31, 2010 mainly due to two effects in current liabilities which corresponded to the two main effects described for total assets.

A decrease in the financial instruments of Eurex Clearing AG from 143,178.4 million as at December 31, 2009 to 128,823.7 million as at December 31, 2010 was connected with its function as CCP for cash and derivatives markets.

The increase in cash deposits by market participants from 4,741.5 million as at December 31, 2009 to 6,064.2 million as at December 31, 2010 was caused by higher collateral provided to Eurex Clearing AG by members due to higher trading volumes as a consequence of recovering financial markets.

Table of Contents

The other main changes in current liabilities occurred in the following items:

An increase in tax provisions from 316.8 million as at December 31, 2009 to 345.0 million as at December 31, 2010 was based on anticipated tax payments for VAT.

An increase in liabilities from banking business of Clearstream from 7,221.0 million as at December 31, 2009 to 7,822.0 million as at December 31, 2010 resulted from higher trading volumes as a consequence of the recovery of the financial market.

The decrease in other current liabilities from 284.9 million as at December 31, 2009 to 245.9 million as at December 31, 2010 was due to a repayment of all outstanding commercial paper in 2010.

Noncurrent liabilities declined from 2,093.5 million as at December 31, 2009 to 1,870.4 million as at December 31, 2010 mainly as a result of the decrease in deferred tax liabilities from 442.0 million as at December 31, 2009 to 297.7 million as at December 31, 2010 which was recorded as part of the recognition of the impairment charges for ISE in 2010.

Comparison 2008 to 2009

Total equity increased from 2,978.3 million as at December 31, 2008 to 3,338.8 million as at December 31, 2009. The accumulated profit increased from 1,779.4 million as at December 31, 2008 to 1,886.8 million as at December 31, 2009 mainly due to the net income 2009 of 496.1 million exceeding the dividends paid in 2009 of 390.2 million. An increase in non-controlling interests from 324.0 million as at December 31, 2008 to 472.6 million as at December 31, 2009 was primarily due to the equity interest attributable to the non-controlling shareholder of STOXX Ltd., which was fully consolidated in the financial statements of Deutsche Börse Group. An increase in the revaluation surplus from 29.3 million as at December 31, 2008 to 125.2 million as at December 31, 2009 was mainly caused by the higher interest of Deutsche Börse in STOXX Ltd.

Total liabilities changed from 142,900.3 million as at December 31, 2008 to 158,021.7 million as at December 31, 2009 mainly due to two effects in current liabilities which corresponded to the two main effects described for total assets.

An increase in the financial instruments of Eurex Clearing AG from 121,684.3 million as at December 31, 2008 to 143,178.4 million as at December 31, 2009 was connected with its function as CCP for cash and derivatives markets.

The decrease in cash deposits by market participants from 10,220.7 million as at December 31, 2008 to 4,741.5 million as at December 31, 2009 resulted from lower collateral provided to Eurex Clearing AG by members following the easing of collateral requirements after the financial crisis.

The other main changes in current liabilities occurred in the following items:

An increase in tax provisions from 239.3 million as at December 31, 2008 to 316.8 million as at December 31, 2009 was based on anticipated tax payments for income earned in prior years.

A decrease in liabilities from banking business of Clearstream from 7,916.3 million as at December 31, 2008 to 7,221.0 million as at December 31, 2009, due to lower trading volumes as a consequence of the financial crisis.

A decrease in other current liabilities from 412.1 million as at December 31, 2008 to 284.9 million as at December 31, 2009 was due to the reduced issuance of commercial paper.

Edgar Filing: NYSE Euronext - Form 425

Noncurrent liabilities declined from 2,213.7 million as at December 31, 2008 to 2,093.5 million as at December 31, 2009 mainly as a result of the decrease in deferred tax liabilities from 600.6 million as at December 31, 2008 to 442.0 million as at December 31, 2009 which was recorded as part of the recognition of the impairment charges for ISE in 2009.

A-252

Table of Contents**Dividends and Share Buy-backs**

Deutsche Börse Group paid a dividend of 403.0 million in 2008, 390.2 million in 2009 and 390.5 million in 2010 for the previous financial year. Of 38.7 million shares repurchased between 2005 and 2008, Deutsche Börse cancelled a total of 28.6 million shares. A further 1.0 million shares were acquired by employees under the terms of the Deutsche Börse Group share plan. As at December 31, 2010, the remaining approximately 9.1 million shares were held by Deutsche Börse as treasury shares.

For 2010, Deutsche Börse has proposed to the annual general meeting that a dividend of 2.10 per share be paid for the last financial year compared to 2.10 for 2008 and 2009. Based on this proposal, the distribution ratio, adjusted for the cost of efficiency programs and the ISE impairment charges in 2010 and adjusted for the ISE impairment charge in 2009, would be 54% of net income in 2010, after 56% (similarly adjusted) in 2009 and 38% in 2008. For 185.9 million shares outstanding at March 31, 2011 carrying dividend rights, this would result in a total distribution of 390.7 million for 2010, after 390.5 million for 2009 and 390.2 million for 2008.

The number of shares eligible to receive a dividend may change until the Annual General Meeting to be held on May 12, 2011. In this case, the proposed dividend of 2.10 per share will be held constant and the proposed total distribution to be approved at the Annual General Meeting will be adjusted accordingly.

Debt Instruments of Deutsche Börse

Type	Issue volume	ISIN	Term	Maturity	Coupon p.a.	Listing
Fixed-rate bearer bond	650 million	XS0353963225	five years	April 2013	5.00%	Luxembourg/ Frankfurt
Series A bond	\$170 million	Private placement	seven years	June 2015	5.52%	Unlisted
Series B bond	\$220 million	Private placement	ten years	June 2018	5.86%	Unlisted
Series C bond	\$70 million	Private placement	12 years	June 2020	5.96%	Unlisted
Hybrid bond	550 million	XS0369549570	30 years ⁽¹⁾	June 2038	7.50% ⁽²⁾	Luxembourg/ Frankfurt

(1) Early termination right after five and ten years and in each year thereafter.

(2) Until June 2013: fixed-rate 7.50% per annum; from June 2013 to June 2018: fixed-rate mid swap plus 285 basis points; from June 2018: variable interest rate (euro interbank offered rate for twelve-month euro deposits (EURIBOR), plus an annual margin of 3.85%).

In April 2008, Deutsche Börse Group issued a senior benchmark bond in the amount of 500 million for the purpose of long-term financing of the ISE acquisition. This bond was increased by 150 million in June 2008 to the total amount of 650 million outstanding as of December 31, 2010. A further \$460 million was issued in June 2008 (split into Series A of \$170 million, Series B of \$220 million, Series C of \$70 million) as part of a private placement in the United States. Also in June 2008, Deutsche Börse issued hybrid bonds in the amount of 550 million, 93 million of which had been repaid by December 31, 2010.

Quantitative and Qualitative Disclosure of Financial Risk

For a general description of Deutsche Börse Group's risk management, please refer to the section Business of Deutsche Börse Group and certain information about Deutsche Börse Group Risk Management.

Financial risks arise at Deutsche Börse Group mainly in the form of credit risk. To a small extent Deutsche Börse Group is exposed to market price risk. Financial risks are quantified using the economic capital concept.

Credit Risks

Credit risks arise in Deutsche Börse Group from collateralized and uncollateralized cash investments, loans for setting securities transactions and other receivables and derivatives.

Table of Contents

For a detailed overview of Deutsche Börse Group's financial instruments carrying amounts and collateral as at December 31, of each financial year, please refer to the table "Classification Financial Instruments" in Note 42 of the notes to the three-year consolidated financial statements included in the F-Pages of this document.

Cash investments

Deutsche Börse Group is exposed to credit risk in connection with the investment of cash funds. Deutsche Börse Group mitigates such risks by investing short-term funds to the extent possible on a collateralized basis (*e.g.*, via reverse repurchase agreements).

According to the treasury policy, only bonds with a minimum rating of AA issued by governments, supranational institutions and banks are eligible as collateral. In the course of the financial crisis, eligibility criteria have been tightened to allow only government-issued or government-backed securities.

The fair value of securities received under reverse repurchase agreements was 13,078.2 million as at December 31, 2008, 7,708.2 million as at December 31, 2009 and 7,180.4 million as at December 31, 2010. The Clearstream subgroup is allowed to repledge securities received to central banks.

The fair value of securities received under reverse repurchase agreements repledged to central banks amounted to 2,937.0 million as at December 31, 2008, 2,914.6 million as at December 31, 2009 and 1,337.6 million as at December 31, 2010. The contract terms are based on recognized bilateral master agreements.

Uncollateralized cash investments are permitted only for counterparties with sound creditworthiness within the framework of defined counterparty credit limits or in the form of investments in money market funds as well as U.S. treasuries and municipal bonds with maturities of less than two years. The Clearstream subgroup assesses counterparty credit risk on the basis of an internal rating system. The remaining Deutsche Börse Group companies use external ratings available to them. Within the framework of previously defined counterparty credit limits, Deutsche Börse Group companies that do not have bank status can also invest cash with counterparties that are not externally rated, but instead are members of a deposit protection scheme. The corresponding counterparty limits are always well below the liability limits of the relevant protection scheme.

Part of the available-for-sale fixed-income securities and floating rate notes held by Clearstream are pledged to central banks to collateralize the settlement facility obtained. The fair value of pledged securities was 754.1 million as at December 31, 2008, 1,748.7 million as at December 31, 2009 and 2,879.6 million as at December 31, 2010.

Loans for settling securities transactions

Clearstream grants customers technical overdraft facilities to maximize settlement efficiency. These settlement facilities are subject to internal credit review procedures. They are revocable at the option of the Clearstream subgroup and are largely collateralized. Technical overdraft facilities amounted to 83.6 billion as at December 31, 2008, 93.7 billion as at December 31, 2009 and 101.2 billion as at December 31, 2010. Of this amount, 3.0 billion as at December 31, 2008, 2.8 billion as at December 31, 2009 and 3.0 billion as at December 31, 2010 were unsecured, whereby a large proportion relates to credit lines granted to central banks and other state-guaranteed institutions. Actual outstandings at the end of each business day generally represent a small fraction of the facilities and amounted to 722.3 million as at December 31, 2008, 405.7 million as at December 31, 2009 and 248.6 million as at December 31, 2010.

Clearstream also guarantees the risk resulting from the Automated Securities Fails Financing program it offers to its customers. However, this only applies when the risk is collateralized. In the absence of collateral, this risk is covered by third parties. Guarantees given under this program amounted to 538.4 million as at December 31, 2008, 750.7 million as at December 31, 2009 and 642.3 million as at December 31, 2010.

Table of Contents

Under the ASLplus securities lending program, Clearstream Banking S.A. had securities borrowings from various counterparties totaling 6,179.1 million as at December 31, 2008, 17,595.5 million as at December 31, 2009 and 20,510.2 million as at December 31, 2010. These securities were fully lent to other counterparties. Collateral received by Clearstream Banking S.A. in connection with these loans amounted to 6,908.7 million as at December 31, 2008, 18,452.6 million as at December 31, 2009 and 21,279.6 million as at December 31, 2010.

Financial instruments of Eurex Clearing AG (central counterparty)

To safeguard Eurex Clearing AG against the risk of default by a clearing member, the clearing conditions require the clearing members to deposit margins in the form of cash or securities on a daily basis or an intraday basis in the amount stipulated by Eurex Clearing AG. Additional security mechanisms of Eurex Clearing AG are described in detail in Note 42 Financial Risk Management of the notes to the three-year consolidated financial statements included in this document.

The aggregate margin calls (after haircuts) based on the executed transactions was 54,054.5 million as at December 31, 2008, 36,240.1 million as at December 31, 2009 and 33,013.0 million as at December 31, 2010. Collateral in the amount of 64,794.4 million as at December 31, 2008, 47,987.7 million as at December 31, 2009 and 42,325.5 million as at December 31, 2010 was deposited.

Composition of Eurex Clearing AG's collateral	Collateral value as at December 31,			Fair value as at December 31,		
	2010	2009	2008	2010	2009	2008
	(in millions of euros)					
Cash collateral (cash deposits)	6,060.1	4,737.0	10,216.2	6,060.1	4,737.0	10,216.2
Securities and book-entry securities collateral	36,265.4	43,250.7	54,578.2	40,988.9	48,702.8	62,974.5
Total	42,325.5	47,987.7	64,794.4	47,049.0	53,439.8	73,190.7

There were also third-party bank guarantees for clearing members of Eurex Clearing AG amounting to 182.4 million and CHF15.3 million as at December 31, 2008, 122.5 million and CHF15.3 million as at December 31, 2009 and to 79.0 million and CHF15.3 million as at December 31, 2010.

Credit risk concentrations

Deutsche Börse Group's business model and the resulting business relationships with a large part of the financial sector mean that, as a rule, credit risk is concentrated on the financial sector. Potential concentrations of credit risk on individual counterparties are avoided by application of counterparty credit limits.

The regulatory requirements, such as those arising under the German ordinance governing large exposures and loans of 1.5 million or more (*Großkredit- und Millionenkreditverordnung*) in Germany and the corresponding rules in Luxembourg arising under the revised CSSF circular 06/273, are complied with. The German and Luxembourgish rules are based on the EU directives 2006/48/EC and 2006/49/EC (commonly known as CRD). The large exposures rules as laid down by the CRD have been revised by three directives in 2009 (commonly known as CRD II) and have been effective since December 31, 2010. The new rules are more prudent and have taken away in principle the preferred treatment of banks compared to other corporations and have tightened the rules on collateral (*e.g.*, introduced the same haircut rules as for solvency purposes). Deutsche Börse Group carries out VaR calculations in order to detect credit concentration risks. In 2010, no significant credit concentrations were assessed.

Market price risk

Market risk may arise in the form of interest rate or currency risk in the operating business when recognizing net revenues denominated in foreign currency, in connection with cash investments or borrowing as a result of fluctuations in interest rates and foreign exchange rates.

Table of Contents***Foreign currency risks***

Deutsche Börse Group avoids outstanding currency positions wherever possible. Customer deposits in foreign currencies are covered by items in the same currency. Revenue in foreign currencies is partly matched by costs in foreign currencies. Any residual currency risks in Deutsche Börse Group were largely hedged using forward foreign exchange transactions in 2010. This entailed selling planned currency positions at a price fixed in advance for delivery on the date of the expected cash inflows. Regular reviews ensure the effectiveness of these hedges.

As part of the annual planning, the treasury policy of Deutsche Börse Group is implemented in such a way that any net earnings exposure from currencies must be hedged through foreign exchange transactions, if the exposure exceeds 10% of consolidated EBIT. Foreign exchange exposures below 10% of consolidated EBIT may also be hedged.

During the year, actual foreign exchange exposure is monitored against the latest EBIT forecast. In case of an overstepping of the 10% threshold, the exceeding amount must be hedged.

In addition, the policy stipulates that intraperiod open foreign exchange positions are closed when they exceed 15.0 million. This policy was complied with as in the previous year; as at December 31, 2010, there were no significant net foreign exchange positions.

Currency risks in Deutsche Börse Group arise mainly from the operating results and balance sheet of ISE, which are denominated in U.S. dollars, plus that part of Clearstream's sales revenue and interest income less expenses which is directly or indirectly generated in U.S. dollars. ISE accounted for 19% in 2010, 25% in 2009 and 24% in 2008 of the Eurex segment's sales revenue. In addition, the Clearstream segment generated sales revenue and interest income directly or indirectly in U.S. dollars of 9% in 2010, of 9% in 2009 and 12% in 2008.

Eurex receives interest on intraday margin calls paid in U.S. dollars. These exposures are partially offset by operating costs incurred in U.S. dollars.

Acquisitions where payment of the purchase price results in currency risk are generally hedged.

Deutsche Börse Group has partially hedged its investment in ISE against foreign currency risks by issuing fixed-income U.S. dollar debt securities. The investment in ISE (hedged item) constitutes a net investment in a foreign operation. The U.S. dollar securities designated as hedging instruments for the net investment hedge were issued in a nominal amount of \$460.0 million.

Interest rate risks

Interest rate risks arise further from debt financing of acquisitions. The acquisition of ISE was financed through senior and hybrid debt. Senior debt was issued in euros and U.S. dollars with tenures of five to twelve years and fixed coupons for the life of the instruments. The hybrid debt issue has a fixed coupon for the first five years to be refixed in case the instrument is not called.

Other risks

Equity price risks arise to a limited extent from contractual trust arrangements. In addition, there are equity price risks arising from strategic equity investments in other exchange operators.

Liquidity risk

Liquidity risk may arise from potential difficulties in renewing maturing financing, such as commercial paper and bilateral and syndicated credit facilities. In addition, required financing for unexpected events may cause liquidity risk. Most of Deutsche Börse Group's cash investments are short-term to ensure availability of liquidity, should the need arise.

Table of Contents

The Deutsche Börse Group's liquidity risk is mainly concentrated in its financial institutions, Clearstream and Eurex Clearing.

Clearstream

Liquidity risk arises from potential difficulties to meet current and future cash flows and collateral needs in support of the settlement activities of Clearstream's customers. Liquidity risk is managed by matching the duration of investments and liabilities, restricting investments in potentially illiquid or volatile asset classes, authorizing the Clearstream subgroup to repledge securities received with central banks and maintaining sufficient financing facilities to overcome unexpected demands for liquidity.

Clearstream's current liabilities, including customer deposits, which are due on demand, are adequately covered by loans to banks and customers, which may be invested up to a maximum of six months, and by other debt instruments and fixed-income securities. The fixed-income securities are able to be pledged to central banks should the short-term need for additional liquidity arise.

	Amount as at December 31,		
	2010	2009	2008
	(in millions of euros)		
Current liabilities from banking business:			
Customer deposits	7,390.6	6,096.9	6,896.5
Money market borrowing	185.3	910.6	712.8
Other	246.1	213.5	307.0
	7,822.0	7,221.0	7,916.3
Receivables & securities from banking business:			
Loans to banks & customers	6,998.3	6,436.1	7,859.1
Money market instruments	0	272.0	147.2
Debt instruments	570.3	448.1	331.9
Other	16.7	36.2	89.8
Total current receivables and securities from banking business	7,585.3	7,192.4	8,428.0
Fixed-income securities	1,380.6	1,268.2	556.3
Other	175.0	200.0	200.0
Total noncurrent receivables and securities from banking business	1,555.6	1,468.2	756.3
Restricted bank balances of Clearstream	121.6	4.1	144.0

As at December 31, 2010, part of Clearstream's assets have been pledged to central banks as collateral for the settlement facility obtained. As at December 31, 2010, the fair value of pledged securities was 2,879.6 million.

Clearstream Banking SA, Luxembourg is required to maintain at the Banque Centrale du Luxembourg (Luxembourg Central Bank, BCL) a cash balance based on liabilities other than amounts due to credit institutions subject to minimum reserve requirements. Therefore, balances with the BCL are reported as restricted. During 2010, on average, the minimum reserve requirement amounted to 93.5 million.

Similarly Clearstream Banking AG, Frankfurt, is also required to maintain at the Bundesbank a cash balance, and the corresponding balances are reported as restricted. During 2010, on average, the minimum reserve requirement amounted to 2.1 million.

As Clearstream's investment policy only allows investment in fixed-income securities with a credit rating of AA- or higher, it is expected that all such securities could be liquidated within a short time period without significant loss.

Table of Contents

Remaining maturity of loans to banks and customers was as follows:

	Amount as at December 31,		
	2010	2009	2008
	(in millions of euros)		
- sight:	4,030.4	3,486.1	4,885.2
- not more than 3 months:	2,967.9	2,950.0	2,973.9

In addition to internal liquidity risk management tools, liquidity risk is monitored by the Luxembourg regulators via the liquidity ratio (monthly report) and the daily liquidity report (daily).

In Germany, for Clearstream Banking AG, liquidity risk is monitored on a monthly basis by the regulators via the liquidity ratio .

Internal liquidity management rules are generally more stringent than regulatory requirements. As a result, compliance with the treasury policy warrants at any time compliance with regulatory rules.

Forthcoming Basel III regulations, and particularly the liquidity coverage ratio and the net stable funding ratio are currently being analyzed to determine their impact on the current treasury activities.

Eurex Clearing

Eurex Clearing AG aims to match the durations of received customer cash margins and investments. Its Treasury Policy governs that at least 60% of average cash margins over the preceding 20 business days must be invested with a tenor of one business day. Not more than 40% of average cash margins may be invested for up to one week, of which 10% may be invested with tenors of up to one month.

	Amount as at December 31,		
	2010	2009	2008
	(in millions of euros)		
Cash deposits by market participants	6,064.2	4,741.5	10,220.7
Restricted bank balances of Eurex Clearing	6,064.2	4,741.5	10,220.7
- due on sight	5,116.1	2,747.1	10,220.7
- due within one month	948.1	1,994.4	0

None of Eurex Clearing's cash balances are pledged. Eurex Clearing's investments are highly liquid, spread across a number of counterparties with a minimum credit rating of A- and are collateralized as far as possible by government debt with a minimum credit rating of AA-.

Unrestricted cash and bank balances

In order to meet its regular liquidity requirements, Deutsche Börse Group currently aims to maintain unrestricted cash and bank balances of at least 250 million at all times. Balances are largely invested secured with counterparties with a minimum credit rating of A-, backed with government debt with a minimum credit rating of AA-.

	Amount as at December 31,		
	2010	2009	2008
	(in millions of euros)		
Unrestricted cash and bank balances	797.1	559.7	482.8

Table of Contents**Contractually Agreed Credit Lines and Other Financing Facilities**

In addition to the liquid assets available on its balance sheet, Deutsche Börse Group has access to additional liquidity through the following contractually agreed credit lines and commercial paper facilities.

Contractually agreed credit lines	Purpose of credit line		Currency	Amount as at December 31,		
				2010	2009	2008
Company				(in millions of euros)		
Deutsche Börse	working capital ⁽¹⁾	-interday		605.0	605.0	405.0
Eurex Clearing AG	settlement	-interday		670.0	370.0	370.0
	settlement	-interday		700.0	700.0	700.0
	settlement	-interday	CHF	200.0	200.0	200.0
Clearstream Banking S.A.	working capital ⁽¹⁾	-interday	\$	1,000.0	1,000.0	1,000.0

Notes:

(1) 400.0 million of Deutsche Börse's working capital credit line is a sub credit line of Clearstream Banking S.A.'s \$1.0 billion working capital credit line.

Clearstream Banking S.A. has a bank guarantee (letter of credit) in favor of Euroclear Bank S.A./N.V. issued by an international consortium to secure daily deliveries of securities between Euroclear and Clearstream. This guarantee amounted to \$3.0 billion as at December 31, 2010 (2009: \$3.0 billion, 2008: \$5.6 billion). Euroclear Bank S.A./N.V. has also issued a corresponding guarantee in favor of Clearstream Banking S.A. Furthermore, Eurex Clearing AG holds a credit facility of \$2.1 billion granted by Euroclear Bank S.A./N.V. in order to increase the settlement efficiency.

A commercial paper program offers Deutsche Börse an opportunity for flexible, short-term financing, involving a total facility of 2.5 billion in various currencies. As at December 31, 2010, there was no outstanding commercial paper compared to 100.0 million as at December 31, 2009 and 202.0 million at December 31, 2008.

Clearstream Banking S.A. also has a commercial paper program with a program limit of 1.0 billion, which is used to provide additional short-term liquidity. As at December 31, 2010, commercial paper with a nominal value of 202.4 million had been issued compared to 180.0 million and 35.0 million as at December 31, 2009 and 2008, respectively.

Credit Ratings

As in the previous year, Standard & Poor's assessed Deutsche Börse's long-term credit rating at AA as at December 31, 2010. Deutsche Börse's commercial paper program was awarded by Standard & Poor's the short-term rating of A-1+ in 2010.

The long-term credit ratings by Fitch and Standard & Poor's for Clearstream Banking S.A. also remained unchanged in 2010 at AA. Clearstream Banking S.A.'s commercial paper program was rated F1+ by Fitch and A-1+ by Standard & Poor's in 2009 and 2010.

The Standard & Poor's ratings have been conducted by Standard & Poor's Credit Market Services France SAS, 40 rue de Courcelles, 75008 Paris, France, which has applied for registration as rating agency pursuant to EU Regulation 1060/2006, but has not yet received a confirmation about its registration.

The Fitch ratings have been conducted by Fitch Rating Ltd, 30 North Colonnade, London, E14 5GN, England, which has applied for registration as rating agency pursuant to EU Regulation 1060/2006, but has not yet received a confirmation about its registration.

Table of Contents**Critical Accounting Policies and Estimates**

For a detailed overview of Deutsche Börse Group's accounting policies please refer to Note 3 of the notes to the three-year consolidated financial statements included in this document.

Key Sources of Estimation Uncertainty and Management Judgments

The application of accounting policies, presentation of assets and liabilities and recognition of income and expenses requires the executive board to make certain judgments and estimates. Adjustments in this context are taken into account in the period the change was made as well as in subsequent periods, where necessary.

Note 14 of the notes to the three-year consolidated financial statements included in this document contains information on the assumptions applied in performing annual impairment tests on goodwill and intangible assets with an indefinite useful life. In each case, the respective business plans serve as the basis for determining any impairment. These plans contain projections of the future financial performance of the cash-generating units or groups of cash-generating units. If their actual financial performance fails to meet these expectations, corresponding adjustments may be necessary.

Accounting for provisions for pensions and similar obligations requires the application of certain actuarial assumptions (*e.g.*, discount rate, staff turnover rate) so as to estimate their carrying amounts. Note 25 of the notes to the three-year consolidated financial statements included in this document shows the present value of the obligations at each balance sheet date. These assumptions may fluctuate considerably, for example because of changes in the macroeconomic environment, and may thus materially affect provisions already recognized. However, this effect is mitigated by application of the corridor method.

Deutsche Börse or its group companies are subject to litigation. Such litigation may lead to orders to pay against the entities of Deutsche Börse Group. If it is more likely than not that an outflow of resources will occur, a provision will be recognized based on an estimate of the most probable amount necessary to settle the obligation. Management judgment includes the determination whether there is a possible obligation from past events, the evaluation of the probability that an outflow will occur and the estimation of the potential amount. As the outcome of litigation is usually uncertain, the judgment is reviewed continuously.

Note 45 of the notes to the three-year consolidated financial statements included in this document contains disclosures on the valuation model used for the stock options. Where the estimates of the valuation parameters originally applied differ from the actual values available when the options are exercised, adjustments are necessary; such adjustments are recognized in the consolidated income statement for the period if they relate to cash-settled share-based payment transactions.

In addition, the probable utilization applied when establishing provisions for expected losses from rental agreements is estimated, see note 27 of the notes to the three-year consolidated financial statements included in this document. In the creation of personnel-related restructuring provisions, certain assumptions were made with regard to, for example, fluctuation rate, discount rate and salary trends. Should the actual values deviate from these assumptions, adjustments may be necessary.

Revenue Recognition

Trading, clearing and settlement fees are recognized on the trade day and billed on a monthly basis. Custody revenue and revenue for systems development and systems operation are generally recognized ratably and billed on a monthly basis. Sales of price information are billed on a monthly basis. Fees charged to trading participants in connection with International Securities Exchange, LLC's expenses for supervision by the U.S. Securities and Exchange Commission are recognized at the settlement date.

International Securities Exchange, LLC earns market data revenue from the sale of trade and quote information on options through the Options Price Reporting Authority, LLC (OPRA, the regulatory authority)

Table of Contents

responsible for distributing market data revenues among the U.S. options exchanges). Pursuant to SEC regulations, U.S. exchanges are required to report trade and quote information to OPRA. International Securities Exchange, LLC earns a portion of the income of the U.S. option exchange association based on its share of eligible trades for option securities. Revenue is recorded as transactions occur on a trade date basis and is collected quarterly.

As a rule, sales allowances are deducted from sales revenue. They are recognized as an expense under volume-related costs to the extent that they exceed the associated sales revenue. The item also comprises expenses that depend on the number of certain trade or settlement transactions, the custody volume, or the Global Securities Financing volume, or that result from revenue sharing agreements.

Impairment Testing

In accordance with IAS 36, noncurrent non-financial assets are tested for impairment. At least at each balance sheet date, Deutsche Börse Group assesses whether there is any indication that an asset may be impaired. In this case, the carrying amount is compared with the recoverable amount (the higher of value in use and fair value less costs to sell) to determine the amount of any potential impairment. The value in use is estimated on the basis of the discounted estimated future cash flows from continuing use of the asset and from its ultimate disposal, before taxes. For this purpose, discount rates are estimated based on the prevailing pre-tax weighted average cost of capital. If no recoverable amount can be determined for an asset, it is allocated to a cash-generating unit, for which the recoverable amount is calculated.

Irrespective of any indications of impairment, intangible assets with indefinite useful lives and intangible assets not yet available for use must be tested for impairment annually. If the estimated recoverable amount is lower than the carrying amount, an impairment loss is recognized, and the net book value of the asset is reduced to its estimated recoverable amount.

Goodwill is allocated to identifiable groups of assets (cash-generating units) or groups of cash-generating units that create synergies from the respective acquisition. This corresponds to the lowest level at which Deutsche Börse Group monitors goodwill. An impairment loss is recognized if the carrying amount of the cash-generating unit to which goodwill is allocated (including the carrying amount of this goodwill) is higher than the recoverable amount of this group of assets. The impairment loss is first allocated to the goodwill, then to the other assets in proportion to their carrying amounts.

A review is conducted at every balance sheet date to see whether there is any indication that an impairment loss recognized on noncurrent assets (excluding goodwill) in the previous period no longer applies. If this is the case, the carrying amount of the asset is increased and the difference is recognized in profit or loss. The maximum amount of this reversal is limited to the carrying amount that would have resulted if no impairment loss had been recognized in previous periods. In accordance with IAS 36, impairment losses on goodwill are not reversed.

The assumptions applied in performing annual impairment tests on goodwill and intangible assets with an indefinite useful life require judgment. In each case, the respective business plans serve as the basis for determining any impairment. These plans contain projections of the future financial performance of the cash-generating units or groups of cash-generating units. If their actual financial performance fails to meet these expectations, corresponding adjustments may be necessary.

Income Taxes

Deferred tax assets and liabilities are computed using the balance sheet approach in accordance with IAS 12. The deferred tax calculation is based on temporary differences between the carrying amounts in the tax accounts and the carrying amounts in the IFRS financial statements that lead to a future tax liability or benefit when assets are used or sold or liabilities are settled. Deferred taxes are only recognised on differences resulting from the recognition of goodwill, if the goodwill in question was acquired externally.

Table of Contents

The deferred tax assets or liabilities are measured using the tax rates that are currently expected to apply when the temporary differences reverse, based on tax rates that have been enacted or substantively enacted by the reporting date. Deferred tax assets are recognized for the carry forward of unused tax losses only to the extent that it is probable that future taxable profit will be available. Deferred tax assets and deferred tax liabilities are offset where a legally enforceable right to set off current tax assets against current tax liabilities exists and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority.

Impairment of Financial Assets

Financial assets that are not measured at fair value through profit or loss are reviewed at each balance sheet date to establish whether there is any indication of impairment.

The criteria that Deutsche Börse Group uses to determine that there is objective evidence of an impairment loss include:

- (a) significant financial difficulty of the debtor;
- (b) a breach of contract;
- (c) concessions by other creditors to the debtor, which they would not consider if the debtor did not have financial difficulties, irrespective of the reasons;
- (d) it becomes probable that the debtor will enter bankruptcy or other financial reorganization;
- (e) the disappearance of an active market for that financial asset because of financial difficulties;
- (f) observable data indicating that there is a measurable decrease in the estimated future cash flows e.g. national or regional conditions correlate with defaults; and
- (g) downgrading of the debtor by rating agencies.

The amount of an impairment loss for a financial asset measured at amortized cost is the difference between the carrying amount and the present value of the estimated future cash flows, discounted at the original effective interest rate. A subsequent reversal is recognized at a maximum at the carrying amount that would have resulted if no impairment loss had been recognized.

The amount of an impairment loss for a financial asset (non-listed equity instrument) measured at cost is the difference between the carrying amount and the present value of the estimated future cash flows, discounted at a current market interest rate. Subsequent reversal is not permitted.

In the case of available-for-sale financial assets, the impairment loss is calculated as the difference between cost and fair value. Any reduction in fair value already recognized in equity is reclassified to profit or loss upon determination of the impairment loss. A subsequent reversal may only be recognized for debt instruments if the reason for the original impairment loss no longer applies.

Summary disclosures about contractual obligations

The table below summarizes Deutsche Börse Group's debt, future minimum lease obligations on its operating leases and other commitments as of December 31, 2010 (in millions of euros):

Edgar Filing: NYSE Euronext - Form 425

(in millions of euros)	2011	2012	2013	2014	2015	2016 and beyond.	Total
Financial obligations	84.6	22.7	12.0	7.8	7.3	8.7	143.1
Minimum lease obligations on its operating leases	75.4	63.8	46.7	42.8	40.8	223.7	493.2
Obligations regarding interest	87.5	107.9	87.2	20.3	16.6	38.2	357.7
Payment obligations for debt	3.7	3.7	1,110.7	0.0	130.0	215.0	1,463.2
Sum	251.2	198.1	1,256.6	70.9	194.8	485.6	2,457.3

A-262

Table of Contents

Deutsche Börse completed an investment protection agreement with SIX Group AG. If SIX Group AG reduces its indirect share in the profit of Eurex companies, the agreement obligates Deutsche Börse to make a compensatory payment to SIX Group AG for the reduction of the indirect share in International Securities Exchange Holdings, Inc.

In connection with the cooperation agreement between SIX Swiss Exchange AG and Deutsche Börse with regard to both parties' participation in Scoach Holding S.A., Deutsche Börse has the right and the obligation, at the end of the cooperation after expiration of the term or termination of the agreement, to retain the holding company as sole shareholder. This obligation results in a contingent liability for Deutsche Börse to SIX Swiss Exchange AG to acquire the shares SIX Swiss Exchange AG holds in the holding company without fair value being measured. In addition, Deutsche Börse has to make a compensation payment if the net financial liabilities and assets surplus to business requirements of Scoach Schweiz AG, which was allocated to SIX Group, and of Scoach Europa AG, which was allocated to Deutsche Börse Group, are not of equal value.

Eurex Zürich AG and Landesbank Baden-Württemberg (which is referred to in this document as LBBW) entered into an agreement on December 23, 2010 for the acquisition by Eurex Zürich AG of the shares held to date by LBBW in EEX. The shares are to be transferred to Eurex Zürich AG at a price of 7.15 per share plus a premium of 0.60, if this results in a majority shareholding by Eurex Zürich AG. If Eurex Zürich AG were to acquire all the shares of LBBW, the maximum purchase price of the shares would be 71.3 million. However, according to the pre-emptive rights specified in the consortium agreement, LBBW is obliged to offer its shares to other shareholders of EEX on a pro-rata basis. On February 23, 2011, Deutsche Börse Group announced that Eurex Zürich AG will become the new majority shareholder in EEX. On March 31, 2011 Eurex Zürich AG announced that its shareholding in EEX will increase from 35.23% to 56.14%. Now that the transaction has been approved by the relevant supervisory bodies, including the EEX supervisory board, all of the conditions for the immediate execution of the transaction have been fulfilled. The transaction was closed on April 12, 2011.

Finance Leases

In 2008 and 2009 finance leases related to IT hardware components that were used operationally in Deutsche Börse Group and were not subleased. Deutsche Börse did not make use of any finance leases in 2010.

The following table shows minimum lease payments from finance leases as at December 31, 2010, 2009 and 2008.

Minimum lease payments

(IFRS)	December 31,		
	2010	2009	2008
	(in millions of euros)		
Up to one year	0	0.6	0.2
One to five years	0	0	0.6
Total	0	0.6	0.8
Discount	0	(0.1)	(0.1)
Present value of minimum lease payments	0	0.5	0.7

No contingent rent is provided for under the terms of the leases. The corresponding agreements do not contain any escalation clauses.

Operating Leases (as lessee)

In addition to finance leases, Deutsche Börse Group has also entered into leases that must be classified as operating leases on the basis of their economic substance; this means that the leased asset is allocated to the lessor. These leases relate mainly to buildings, IT hardware and software. Deutsche Börse Group uses operating

Table of Contents

leases primarily for the new office building in Eschborn, which Deutsche Börse Group moved into in the second half of 2010, and for the buildings used by Clearstream International S.A. and Clearstream International S.A.'s affiliates in Luxembourg.

The following table shows minimum lease payments from operating leases as at December 31, 2010, 2009 and 2008.

Minimum lease payments from operating leases

(IFRS)	December 31,		
	2010	2009	2008
	(in millions of euros)		
Up to 1 year	75.4	72.1	73.3
1 to 5 years	194.1	190.7	146.6
More than 5 years	223.7	207.9	118.6
Total	493.2	470.7	338.5

In 2010 71.1 million in minimum lease payments was recognized as an expense, compared to 79.3 million in 2009 and 72.2 million in 2008.

Operating leases for buildings, some of which are sublet, have terms between one and 15 years. They usually terminate automatically when the lease expires. Deutsche Börse Group has options to extend some leases.

Rental income expected from sublease contracts

(IFRS)	December 31,		
	2010	2009	2008
	(in millions of euros)		
Up to 1 year	2.1	2.9	4.9
1 to 5 years	0.6	0.9	2.8
Total	2.7	3.8	7.7

Off-balance Sheet Arrangements

Under the Automated Securities Fails Financing program, Clearstream customers are able to borrow securities in order to fulfill their delivery commitments, thereby avoiding settlement failures and increasing settlement efficiency. Clearstream acts as a guarantor in such transactions to the extent that they are collateralized. In addition, Clearstream Banking S.A. manages an active lending program, known as ASLplus, by which Clearstream borrows securities from various counterparties in order to lend them to other counterparties. This enables the lenders to reduce their custody fees and to earn collateral lending fees, while borrowers gain increased trading opportunities. The ASLplus transactions are matched and fully collateralized. IAS 39 foresees that securities lending transactions should not be recognized in the balance sheet. Consequently, ASLplus outstanding balances are not recognized on-balance sheet. However, in accordance with IFRS 7, they are disclosed in the notes to Deutsche Börse Group's financial statements.

Clearstream earned 68.1 million in 2010 (2009: 68.6 million; 2008: 83.5 million) from its Global Securities Financing business, which includes collateral lending fees from the Automated Securities Fails and ASLplus programs. Neither Clearstream nor the Deutsche Börse Group use these programs for liquidity, capital or risk support purposes.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no changes in accountants or disagreements with accountants on accounting and financial disclosure during the last two financial years.

Table of Contents
Results of operations, financial position and net assets as of 1st Quarter 2011

The following discussion and analysis of the results of operations, financial position and net assets of Deutsche Börse should be read in conjunction with the unaudited condensed consolidated interim financial statement of Deutsche Börse for the quarter ending on March 31, 2011, which has been prepared in accordance with IFRS and is included in this document. The information contained in this section has been taken from the unaudited condensed consolidated interim financial statement of Deutsche Börse for this quarter ending on March 31, 2011 and is therefore unaudited.

Results of operations

In principle, the drivers of Deutsche Börse's business activities developed positively in the first quarter of 2011. In addition, the natural disaster in Japan and political unrest in Northern Africa and the Middle East led to a higher volatility of the markets and caused market participants to hedge against risks by restructuring their portfolios on short notice. As a result, sales revenue grew in the Xetra and Eurex trading segments in the first quarter of 2011. Business development in the other segments was also positive. The steady growth of post-trade services in the Clearstream segment continued the trend of the previous year, and the Market Data & Analytics segment further increased its sales of data products in the market data and information business. Overall, Deutsche Börse Group's sales revenue rose by 8 percent year-on-year to 558.6 million (Q1/2010: 519.2 million). Net interest income from banking business generated in the Clearstream segment recovered significantly, growing by 46 percent to 16.1 million (Q1/2010: 11.0 million). Although interest rates were still low in the first quarter of 2011, customer cash balances were significantly higher than in the prior-year quarter.

Total costs amounted to 271.3 million in the first quarter, a year-on-year decline of 9 percent (Q1/2010: 298.8 million). While volume-related costs increased slightly to 56.7 million (Q1/2010: 54.0 million), operating costs fell by 12 percent to 214.6 million (Q1/2010: 244.8 million). The decline in the operating costs that the Group can control was primarily driven by three factors, which are also reflected in the costs of the individual operating segments:

The efficiency measures launched in 2010 were successful more rapidly than originally planned and thus contributed favourably to staff costs and non-personnel costs in the first quarter of 2011.

Depreciation and amortisation expenses decreased compared with the prior-year quarter partly due to impairment losses relating to intangible assets in 2010.

Non-recurring costs in the first quarter of 2011 fell to 13.6 million (Q1/2010: 27.8 million). They are composed of costs for efficiency programmes of 3.4 million (Q1/2010: 27.8 million) and expenses for the planned merger with NYSE Euronext amounting to 10.2 million (Q1/2010: nil).

The result from equity investments increased significantly year-on-year to 4.6 million (Q1/2010: 1.7 million). It is generated primarily by Scoach Holding S.A., Direct Edge Holdings, LLC and European Energy Exchange AG.

Driven by higher sales revenue combined with lower costs, EBIT rose significantly by 29 percent to 316.3 million (Q1/2010: 245.6 million).

The Group's financial result for the first quarter of 2011 was 19.8 million (Q1/2010: 22.9 million) and reflects in particular the interest expense from financing the acquisition of International Securities Exchange (ISE).

Following the completion of the relocation of the Group headquarters to Eschborn, the effective Group tax rate fell again, to 26.0 percent in the first quarter of 2011 (Q1/2010: 27.0 percent).

Net income for the first quarter of 2011 rose by 36 percent to 212.8 million (Q1/2010: 156.9 million). Basic earnings per share, based on a weighted average of 186.0 million shares outstanding, rose to 1.14 in the first quarter of 2011 (Q1/2010: 0.84 for 185.9 million shares outstanding).

Table of Contents*Operating efficiency programme*

To prepare timely for structural change in financial markets and for changing customer requirements as well as in response to the uncertain market environment, Deutsche Börse AG's Executive Board adopted measures in the first quarter of 2010 to optimise operational processes and cost structures. To this end, Deutsche Börse resolved to reassign operating functions across the Group's locations, further harmonise the IT infrastructure, trim down its management structure, and to intensify the focus on its core activities.

This programme significantly enhances Deutsche Börse Group's cost efficiency. As the ongoing efficiency measures can be implemented faster than planned, the annual savings of around 150 million originally targeted for 2013 will already be achieved starting in 2012. For 2011, Deutsche Börse Group now expects a savings volume of around 115 million, rather than the cost efficiency gains of 85 million planned initially.

As rigorous cost discipline was maintained in the first quarter of 2011 and the implementation of the efficiency measures has accelerated, Deutsche Börse has reduced its guidance for operating costs in 2011 by around 35 million to 890 million, before the costs of efficiency programmes described above and the costs of the proposed merger with NYSE Euronext.

Xetra segment

In the quarter under review, Xetra's sales revenue rose by 12 percent year-on-year to 73.0 million (Q1/2010: 65 million)

Trading activity increased significantly in January and February. On several days in March, it even reached new highs as market participants restructured their portfolios in a secure, transparent market in light of the sharp rise in volatility. Accordingly, the trading volumes by institutional and private investors on Xetra® and in floor trading increased year-on-year. The number of electronic transactions in Xetra trading was up by 36 percent in the first quarter of 2011 to 59.5 million (Q1/2010: 43.8 million). The trading volume also showed a double-digit increase in the first quarter, rising by 21 percent to 361.3 billion (Q1/2010: 299.1 billion). By contrast, the average value of a Xetra transaction declined slightly to 12.1 thousand in the first quarter (Q1/2010: 13.7 thousand).

The following table shows key indicators of the Xetra Segment for Q1 2011 and 2010 (IFRS unaudited).

	Q1/2011 bn	Q1/2010 bn	Change %
Trading volume (order book turnover, single-counted) (IFRS, unaudited)			
Xetra	361.3	299.1	21
Floor ⁽¹⁾	17.4	16.4	6
Tradegate	8.1	3.7	119
Transactions	million	million	%
Xetra	59.5	43.8	36

(1) Excluding certificates and warrants.

Besides institutional investors, who primarily use Xetra, trading activity also increased again among private investors compared with the prior-year quarter. The floor-traded volume at the Frankfurt Stock Exchange grew by 6 percent in the first quarter of 2011 to 17.4 billion (Q1/2010: 16.4 billion). There was an even sharper increase in trading volumes at Tradegate Exchange, the Berlin-based trading venue for private investors operated by a company in which Deutsche Börse has held a majority interest since the beginning of January 2010. In the first quarter of 2011, Tradegate Exchange generated a trading volume of 8.1 billion. This represents an increase of 119 percent and is due primarily to success in connecting new intermediaries for private investors. However, in terms of order book turnover, the leading German platform for private investors is still the trading floor of the Frankfurt Stock Exchange, which is to be retained even after its switch to Xetra (see below). Deutsche Börse aims to further expand its cash market business in other European countries by leveraging the strength of its international distribution network in order to attract new participants and connect them via the existing data lines.

Table of Contents

As a result of higher sales revenue and lower costs, also on a segment level, EBIT increased significantly by 47 percent to 38.4 million (Q1/2010: 26.2 million).

Breakdown of sales revenue in the Xetra segment (IFRS, unaudited)	Q1/2011		Q1/2010	
	(in million of euro)	% of total	(in million of euro)	% of total
Xetra electronic trading system	29.7	41%	25.7	40%

Other	18.7	26%	17.4	27%
	73.0	100%	65.0	101%

Eurex segment

In the quarter under review, Eurex sales revenue rose by 8 percent year-on-year to 230.0 million (Q1/2010: 213.8 million)

In the first quarter of 2011, the Eurex segment increased the volume of contracts for its European products year-on-year. Trading volumes for European futures and options were up by a total of 8 percent on the previous year at 489.8 million contracts (Q1/2010: 452.8 million). Trading volumes on the International Securities Exchange (ISE) were slightly down on the prior-year quarter at 197.6 million (Q1/2010: 199.2 million). Overall, 687.4 million contracts were traded on Deutsche Börse Group's derivatives exchanges, a year-on-year increase of 5 percent (Q1/2010: 652.0 million).

European index derivatives were the highest-volume product group by revenue. The noticeable growth in Eurex transactions is due, among other things, to the increased use of exchange-traded and centrally cleared derivatives in the current market environment, which was characterised by heightened volatility in the first quarter. They recorded a 7 percent rise to 214.8 million contracts (Q1/2010: 200.0 million). The highest-volume products in this segment were derivatives on the EURO STOXX 50 with 174.4 million contracts traded (Q1/2010: 159.4 million).

The volume of contracts generated by European equity derivatives held steady year-on-year at 107.4 million (Q1/2010: 105.9 million). Trading in single-stock futures rose by 15 percent to 22.9 million contracts (Q1/2010: 20.0 million), while trading in equity options declined to 84.5 million contracts (Q1/2010: 85.8 million).

Among the recently introduced asset classes, dividend derivatives continue to enjoy growth: 1.5 million traded contracts in the first quarter of 2011 mean a year-on-year increase of 25 percent (Q1/2010: 1.2 million). The sales revenue generated by dividend derivatives is recognised partly as index derivatives sales revenue and partly as equity derivatives sales revenue.

Due to changes in trading participants' expectations with regard to inflation and interest rate levels, European interest rate derivatives grew by 14 percent to 165.6 million contracts (Q1/2010: 145.6 million). In particular, derivatives on two-year interest rates, such as Euro-Schatz futures and options, benefited from more volatile trading in fixed-income products.

Due to competition with several other trading platforms, ISE trading volume in US options declined year-on-year. In the first quarter of 2011, the number of contracts amounted to 197.6 million (Q1/2010: 199.2 million).

Despite the slight decrease in trading volumes, sales revenue in US options rose in the first quarter 2011. This increase is mainly due to a new pricing model. Its maker-taker component includes payments for providers

Table of Contents

of liquidity which are not to be netted against sales revenue but are reported separately as volume-related costs. On an overall basis, effects of higher sales revenue and higher costs do not have any impact on the consolidated income statement. In the medium term, ISE trading volumes could be positively impacted by the fact that ISE gained approval from the SEC on 24 February 2011 for institutional crossing orders. ISE had been forced to discontinue this type of order in the second half of 2009 on the SEC's instructions. ISE will now step up efforts to win back the crossing business that has migrated to floor-based exchanges in the interim.

Contract volumes in the derivatives markets (IFRS unaudited)	Q1/2011 million contracts	Q1/2010 million contracts	Change %
European equity index derivatives ⁽¹⁾	216.0	201.0	7
European equity derivatives ⁽¹⁾	107.7	106.1	2
European interest rate derivatives	165.6	145.6	14
Total European derivatives (Eurex)⁽²⁾	489.8	452.8	8
US options (ISE)	197.6	199.2	(1)
Total Eurex and ISE	687.4	652.0	5

(1) Dividend derivatives have been allocated to the equity index and equity derivatives.

(2) The total shown does not equal the sum of the individual figures as it includes other traded derivatives such as ETF, volatility, agricultural, precious metals and emission derivatives.

Breakdown of sales revenue in the Eurex segment	Q1/2011		Q1/2010	
	(in million of euro)	% of total	(in million of euro)	% of total
(IFRS, unaudited)				
European index derivatives	98.4	43%	94.7	44%
European interest rate derivatives	50.9	22%	46.4	22%
European equity derivatives	10.9	5%	10.9	5%

Other	36.4	16%	33.1	15%
	230.0	100%	213.8	99%

The sharp increase in EBIT by 18 percent to 139.7 million is attributable to lower operating costs and a simultaneous increase in sales revenue (Q1/2010: 118.8 million).

On 1 February 2011, Eurex introduced a new pricing model. The principal goal is to further increase the attractiveness of the Eurex marketplace by offering incentives for market quality and volume contribution as well as fee reductions in a number of key products. On aggregate, Eurex participants will benefit from approximately 20 million in lower fees annually based on 2010 volume figures. Due to the expected growth in trading activity as a result of the new pricing model, Eurex estimates a largely neutral effect on sales revenue.

Clearstream segment

In the quarter under review, Clearstream's sales revenue rose in almost all business areas, partly due to the more favourable market conditions and partly due to the market success of new services. Sales revenue grew by 5 percent year-on-year to 198.1 million (Q1/2010: 187.9 million).

In the custody business, the average value of assets under custody in the first quarter 2011 increased by 6 percent year-on-year to 11.3 trillion (Q1/2010: 10.7 trillion). The value of both international securities and domestic securities under custody rose. Due to continuing organic growth in its international bond business and gains in market share, Clearstream increased the average value of assets under custody by 5 percent to 5.9 trillion (Q1/2010: 5.7 trillion). The average value of domestic securities deposited rose by 8 percent to 5.4 trillion (Q1/2010: 5.0 trillion). This custody volume is mainly determined by the market value of shares,

A-268

Table of Contents

funds and structured products traded on the German cash market, which grew in the period under review. As a result of these positive developments, sales revenue in the custody business in 2011 was up 2 percent to 111.9 million (Q1/2010: 109.7 million). The difference to the growth of business figures is due to the product mix and customer consolidation.

In the first quarter of 2011, the number of settlement transactions processed by Clearstream saw a double-digit increase by 22 percent to 34.1 million (Q1/2010: 27.9 million). This growth in the volume of settlement transactions is due to trading activity of market participants, which has picked up in the first quarter of 2011. International transactions grew by 14 percent to 10.4 million (Q1/2010: 9.1 million). Of these transactions, 71 percent were OTC transactions and 29 percent were stock exchange transactions. The number of settled transactions in the stock-exchange business, however, grew faster (plus 31 percent year-on-year) than in the OTC business (plus 10 percent year-on-year). In the domestic German market, settlement transactions increased by 26 percent to 23.7 million (Q1/2010: 18.8 million). Here, the distribution of stock-exchange and OTC business is the other way around: 68 percent were stock-exchange transactions and 32 percent OTC transactions. But as in the international business, stock-exchange transactions grew stronger (plus 31 percent) than OTC transactions (plus 14 percent) in the period under review, primarily as a result of the once again higher trading activity of German retail investors. Sales revenue in the settlement business increased by 12 percent to 32.9 million (Q1/2010: 29.4 million) in the first quarter of 2011. The difference to business growth is basically due to the lower share of transactions settled on higher-priced external links as well as to higher rebates conceded to customers.

The success of Investment Funds Services also contributed to the growth in the custody and settlement business. In the year under review, Clearstream processed 1.5 million transactions, a 25 percent increase over the previous year (Q1/2010: 1.2 million). The assets held under custody in Investment Funds Services reached an all-time high of 219.2 billion in Q1/2011, a 30 percent increase year-on-year (Q1/2010: 168.4 billion).

In the Global Securities Financing (GSF) business, the average outstandings also showed growth. In the past quarter, monthly average outstandings amounted to 543.0 billion (Q1/2010: 490.8 billion), an increase of 11 percent compared with the average outstandings of the previous year. This rise reflects the growing importance of secured financing, the continued migration of collateral towards central international liquidity pools as well as a general improvement in overall market conditions from the second half of 2010 on. Collateral management services significantly contributed to sales revenue and the increase in outstandings. The GC Pooling service, for example, offered in cooperation with Eurex, continued to grow outstandings by 17 percent, reaching a daily average of 93.4 billion for Q1/2011 (Q1/2010: 79.7 billion). As a result of these improved market conditions, sales revenue in the GSF business increased by 20 percent to 18.0 million in the period under review (Q1/2010: 15.0 million), mainly because of substantial volume growth in the securities lending products with higher margins (especially ASL) as well as in the collateral services (mainly TCMS).

Average customer cash deposits rose year-on-year by 38 percent to 8.1 billion (Q1/2010: 5.9 billion). As a result of significantly higher average daily cash balances, net interest income from Clearstream's banking business increased by 46 percent to 16.1 million (Q1/2010: 11.0 million).

In addition, Clearstream slightly increased its other sales revenue to 35.3 million (Q1/2010: 33.8 million). Lower IT revenue was compensated by higher connectivity revenue and a one-off fee for the development of the link to CETIP, Brazil's leading central depository. Thanks to this link, CETIP's clients have access to Clearstream's collateral management services in their own time zone.

Table of Contents

The following table shows key indicators of the Clearstream segment for Q1 2011 and 2010 (IFRS, unaudited).

	Q1/2011	Q1/2010	Change
Custody	bn	bn	%
Value of securities deposited (average value)	11,333	10,680	6
international	5,949	5,684	5
domestic	5,384	4,996	8
Settlement	million	million	%
Securities transactions	34.1	27.9	22
international	10.4	9.1	14
domestic	23.7	18.8	26
Global Securities Financing	bn	bn	%
Outstanding volume (average value)	543.0	490.8	11
Average daily cash balances	million	million	%
Total	8,111	5,865	38
euros	2,245	2,000	12
US dollars	4,177	2,691	55
other currencies	1,689	1,174	44

The significant rise in EBIT by 43 percent to 100.6 million (Q1/2010: 70.6 million) is mainly attributable to lower costs and at the same time higher sales revenue and higher net interest income.

Breakdown of sales revenue in the Clearstream segment	Q1/2011		Q1/2010	
	(in million of euro)	% of total	(in million of euro)	% of total
(IFRS, unaudited)				
Custody	111.9	56%	109.7	58%
Settlement	32.9	17%	29.4	16%
Global Securities Financing	18.0	9%	15.0	8%
Other	35.3	18%	33.8	18%
	198.1	100%	187.9	100%

Market Data & Analytics segment

In the quarter under review Market Data & Analytics sales revenue rose by 10 percent year-on-year to 57.5 million (Q1/2010: 52.5 million)

Like the Xetra and Eurex trading segments, the Market Data & Analytics segment also performed well in the first quarter of 2011. This was due in particular to the success of the index business as well as to new data products.

As in the other segments, higher sales revenue and at the same time lower costs result in a significant rise in EBIT by 25 percent to 37.6 million (Q1/2010: 30.0 million).

Financial position**Cash flow**

Deutsche Börse Group generated cash flow from operating activities of 68.3 million in the first quarter of 2011 (Q1/2010: 300.7 million). The decrease results primarily from a payment of income taxes at Clearstream fully provisioned in previous years and thus with no impact on the consolidated income statement. Furthermore, the termination of a financial loss liability insurance policy in the fourth quarter of 2009 had a positive effect on cash flows in the first quarter of 2010. In detail, the changes in operating cash flow were due to the following factors:

The increase in net profit by 56.8 million to 219.4 million

A-270

Table of Contents

A cash outflow of 75.4 million (Q1/2010: cash inflow of 3.6 million) due to the increase in receivables and other assets, primarily in connection with the increase in trade receivables due to higher sales revenue. The cash inflow in the prior year was mainly attributable to the settlement of the financial loss liability insurance policy described above.

A cash outflow of 104.9 million (Q1/2010: cash inflow of 111.4 million) due to a decrease in current liabilities. The decrease was mainly due to a decline in tax provisions and a decline in other current provisions, primarily due to restructuring measures. The cash inflow in the previous year was mainly due to the rise in tax provisions, other current provisions and trade payables.

Cash inflows from investing activities amounted to 1,018.2 million (Q1/2010: cash inflow of 81.7 million), primarily due to the net decrease in financial assets, current receivables and securities from banking business as well as the net increase in liabilities from banking business that originally had maturities of more than three months. This development is due to the decision to convert long-term into short-term investments in order to profit from the expected increase in interest rates.

Cash inflows from financing activities amounted to 0 million in the first quarter of 2011 (Q1/2010: cash outflow of 100.1 million) mainly because Deutsche Börse AG did not redeem any commercial paper, in contrast to the previous year.

Cash and cash equivalents as at 31 March 2011 amounted to 630.9 million (Q1/2010: 2.0 million), mainly due to the cash inflows from investing activities described above. Due to the decrease in operating cash flow, free cash flow, i.e. cash flows from operating activities less payments to acquire intangible assets and property, plant and equipment, was below the previous year's level at 48.4 million (Q1/2010: 262.7 million).

Capital management

Deutsche Börse Group's capital management policy remains unchanged: the Group aims to achieve a dividend distribution ratio of 40 to 60 percent of consolidated net income for the year and executes share buy-backs in order to distribute funds not required for the Group's operating business and its further development to its shareholders. The policy takes into account capital requirements, which are derived from the Group's capital and liquidity needs from legal, regulatory, credit rating and economic capital perspectives. To ensure the continued success of the Clearstream segment, which is active in securities custody and settlement, the Company aims to retain Clearstream Banking S.A.'s strong AA credit rating. Deutsche Börse AG also needs to maintain a strong credit profile for the benefit of the activities at its subsidiary Eurex Clearing AG.

Customers expect their service providers to maintain conservative interest coverage and debt/equity ratios and thus maintain strong credit ratings. Deutsche Börse Group is pursuing its objective of achieving an interest coverage ratio (ratio of EBITDA to interest expenses from financing activities) of at least 16 at Group level. Deutsche Börse Group achieved this target with an interest coverage ratio of 19.4 in the first quarter of 2011. The interest coverage ratio is based on a relevant interest expense of 17.4 million and EBITDA of 336.8 million.

For financial year 2010, Deutsche Börse AG will propose to the Annual General Meeting that a dividend of 2.10 per share should be paid, unchanged from the level of the previous year. Based on this proposal, the distribution ratio, adjusted for the ISE impairment charge recognised in the fourth quarter of 2010, is 54 percent of net income (2009: 56 percent). Given 186.0 million shares outstanding carrying dividend rights as at 31 March 2011, this would result in a total distribution of 390.7 million (2010: 390.5 million).

Net assets

Deutsche Börse Group's noncurrent assets amounted to 4,758.4 million as at 31 March 2011 (31 March 2010: 5,599.3 million). They consisted primarily of intangible assets and financial assets. Intangible assets included

Table of Contents

goodwill of 2,005.9 million (31 March 2010: 2,051.9 million) and other intangible assets of 883.4 million (31 March 2010: 1,388.0 million). The ISE impairment charge recognised in the fourth quarter of 2010 reduced intangible assets. Noncurrent receivables and securities from banking business of 1,325.7 million (31 March 2010: 1,674.1 million) represented the largest part of financial assets, which amounted to 1,577.7 million as at the balance sheet date (31 March 2010: 1,925.1 million). This decrease also significantly impacted the change in noncurrent assets in total compared with 31 March 2010.

Noncurrent assets were offset by equity in the amount of 3,594.0 million (31 March 2010: 3,567.8 million) and noncurrent liabilities in the amount of 1,819.2 million (31 March 2010: 2,167.0 million). Noncurrent liabilities mainly related to interest-bearing liabilities from the long-term financing of ISE of 1,431.8 million (31 March 2010: 1,538.9 million) and deferred taxes of 262.1 million (31 March 2010: 498.9 million).

Changes in current liabilities were the result of, among other things, the rise in cash deposits of market participants which reached 4,855.3 million (31 March 2010: 3,882.5 million) due to higher collateral that clearing members had to provide to Eurex Clearing AG following an increase in business activities in the first quarter of 2011. As in the previous year, no commercial paper was outstanding as at the end of the first quarter of 2011.

Overall, Deutsche Börse Group invested 19.9 million in intangible assets and property, plant and equipment in the first quarter of 2011, and thus less than in the previous year (Q1/2010: 38.0 million). The investments applied in particular to the Eurex and Clearstream segments.

**BUSINESS OF NYSE EURONEXT GROUP AND
CERTAIN INFORMATION ABOUT NYSE EURONEXT**

History

NYSE Euronext, a Delaware corporation, was organized on May 22, 2006 in anticipation of the combination of the businesses of NYSE Group, Inc., a Delaware corporation, and Euronext N.V., a company organized under the laws of the Netherlands. NYSE Euronext's principal executive office is located in 11 Wall Street, New York, New York 10005. Its telephone number is +1(212) 656-3000. The combination of these businesses was consummated on April 4, 2007. NYSE Group, Inc. was formed in connection with the March 7, 2006 merger between New York Stock Exchange, Inc., a New York Type A not-for-profit corporation, and Archipelago Holdings, Inc., a Delaware corporation. Euronext was the first cross-border exchange group, created with the 2000 merger of the Paris, Amsterdam and Brussels stock exchanges. The New York Stock Exchange traces its origins to the Buttonwood Agreement, signed in 1792 by a group of 24 traders gathered under a buttonwood tree in lower Manhattan. In 1817, the traders formed the New York Stock & Exchange Board, which in 1863 was renamed the New York Stock Exchange. The Amsterdam Stock Exchange, Euronext's oldest constituent and the world's first stock exchange, originated in 1602 in conjunction with a stock issuance by the Dutch East India Company.

Unless otherwise specified or the context otherwise requires:

NYSE refers to (1) prior to the completion of the merger between the New York Stock Exchange, Inc. and Archipelago Holdings, Inc., which occurred March 7, 2006, New York Stock Exchange, Inc., a New York Type A not-for-profit corporation, and (2) after completion of the merger, New York Stock Exchange LLC, a New York limited liability company, and, where the context requires, its subsidiaries, NYSE Market, Inc., a Delaware corporation, and NYSE Regulation, Inc., a New York not-for-profit corporation. New York Stock Exchange LLC is registered with the SEC under the Exchange Act as a national securities exchange;

NYSE Arca refers collectively to NYSE Arca, L.L.C., a Delaware limited liability company, NYSE Arca, Inc., a Delaware corporation, and NYSE Arca Equities, Inc., a Delaware corporation. NYSE Arca, Inc. is registered with the SEC under the Exchange Act as a national securities exchange;

NYSE Amex refers to NYSE Amex LLC, a Delaware limited liability company (formerly known as the American Stock Exchange LLC). NYSE Amex LLC is registered with the SEC under the Exchange Act as a national securities exchange;

Euronext refers to NYSE Euronext's market operations in Europe, including the European-based exchanges that comprise Euronext, N.V. the Paris, Amsterdam, Brussels, London and Lisbon securities exchanges and, where the context requires, the derivatives markets in London, Paris, Amsterdam, Brussels and Lisbon; and

NYSE Liffe refers to NYSE Euronext's derivatives markets in London, Paris, Amsterdam, Brussels and Lisbon.

Overview

NYSE Euronext is a leading global operator of financial markets and provider of innovative trading strategies. NYSE Euronext offers a broad and growing array of products and services in cash equities, futures, options, swaps, exchange-traded products, bonds, carbon trading, clearing operations, market data and commercial technology solutions, all designed to meet the evolving needs of issuers, investors, financial institutions and market participants. None of NYSE Euronext's business is seasonal in nature. NYSE Euronext revised its reportable business segments effective in the first quarter of 2010. The new segments are Derivatives, Cash Trading and Listings, and Information Services and Technology Solutions. Historical financial results have been revised to reflect this change.

Table of Contents

During 2010, NYSE Euronext continued to diversify its business model, focusing on new initiatives and growth areas to deliver value through all business cycles.

In NYSE Euronext's Cash Trading and Listings segment, NYSE Euronext stabilized its market share in the European cash markets and announced and began implementing its new European clearing strategy in 2010. In the U.S., NYSE Euronext's market share decreased slightly in 2010. Demand for NYSE Euronext's listing venues continued to be strong in terms of transfers, new listings and secondary offerings. In 2010, 14 companies with an aggregate market capitalization of \$41 billion transferred to the NYSE from other exchanges, and, additionally, three companies with an aggregate market capitalization of \$463 million transferred to the NYSE Amex from other exchanges. A total of 120 issuers listed their securities on NYSE Euronext markets in 2010, raising total proceeds of \$44 billion. This included the \$16 billion IPO of General Motors, the largest U.S. IPO in history, and the offerings of 22 Chinese companies that raised an aggregate of \$2.7 billion. In addition, NYSE Euronext was the leader for proceeds raised through global secondary offerings in 2010, with a total of 473 offerings raising aggregate proceeds of \$193 billion, including the largest secondary offering, Petrobras, which raised \$70 billion.

In NYSE Euronext's Derivatives segment, its key initiatives in 2010 related to focusing on capturing market growth in the U.S. options market and the growth of its clearing operations, which NYSE Euronext expects will become an increasingly important part of its business. In May 2010, NYSE Euronext announced that it will commence clearing its European securities and derivatives business through two new, purpose-built clearing houses based in London and Paris from mid-2012, subject to regulatory approval. These new clearing houses are part of NYSE Euronext's strategy to offer clearing services in the UK and the Eurozone and to move away from all outsourced contractual arrangements with LCH.Clearnet Group Ltd in London and Paris to a situation in which NYSE Euronext has direct control over all aspects of the clearing operations and developments of its cash and derivatives businesses in Europe. See Derivatives NYSE Liffe Clearing. In addition, New York Portfolio Clearing, its joint venture with DTCC began operations on February 8, 2011. See Derivatives New York Portfolio Clearing.

NYSE Euronext's Information Services and Technology Services segment exhibited growth in 2010, benefiting from the addition of NYFIX, Inc. (which is referred to in this document as NYFIX), an expanding customer base, improved software sales and the launch of colocation services which allows third parties on-site leasing of trading hardware and software in Mahwah, New Jersey and Basildon, England. In 2010, NYSE Euronext launched two new data centers in Basildon and Mahwah. The matching engines, the information technology that matches buy and sell orders, for NYSE Euronext's markets in Europe are now consolidated in the Basildon facility, and NYSE Euronext expects to complete the migration of its U.S. exchanges to the Mahwah facility during the first half of 2011. The NYSE is already fully migrated to the Mahwah facility.

During 2010, NYSE Euronext completed the migration of the NYSE Arca equities and options markets and the NYSE Amex Options market to its Universal Trading Platform. In addition, NYSE Euronext commenced the migration to its Universal Trading Platform of NYSE Liffe, which NYSE Euronext expects to complete in the second quarter of 2011. NYSE Euronext also expects to complete the migration of the NYSE to its Universal Trading Platform during 2011.

With respect to partnerships with other exchanges, NYSE Technologies, Inc. (which is referred to in this document as NYSE Technologies) achieved many milestones in 2010. In September 2010, NYSE Euronext delivered the Universal Trading Platform to the Qatar Exchange's cash equities exchange, marking the first launch of NYSE Euronext's cash trading application suite outside its core markets. NYSE Euronext is currently working on the Qatar Exchange's derivatives exchange. In addition, in September 2010, the Tokyo Stock Exchange Inc. (which is referred to in this document as the TSE) selected NYSE Technologies to build and support its new futures trading platform. NYSE Euronext expects the TSE to begin migrating futures products to this platform in the second half of 2011. During 2010, NYSE Euronext also announced the establishment of a strategic, long-term cooperation agreement with the Warsaw Stock Exchange covering the development of future business initiatives and the migration of that exchange's cash and derivatives markets to NYSE Euronext's Universal Trading Platform. Also in 2010, the Philippine Stock Exchange successfully migrated to NYSE Technologies' trading platform.

Table of Contents*Derivatives*

NYSE Euronext's Derivatives segment is comprised of its derivatives trading and its clearing businesses and includes NYSE Liffe, NYSE Liffe Clearing, NYSE Liffe US, NYSE Amex Options, NYSE Arca Options, NYPC and related derivatives market data.

NYSE Liffe NYSE Liffe is the international derivatives business of NYSE Euronext comprising the derivatives markets operated by Liffe Administration and Management, Euronext Amsterdam, Euronext Brussels, Euronext Lisbon and Euronext Paris. NYSE Liffe offers customers the advantages of one of the most technologically-advanced derivatives trading platforms and one of the widest choices of products of any derivatives market. Through a single electronic trading platform, NYSE Liffe offers customers access to a wide range of interest-rate, equity, index, commodity and currency derivative products. NYSE Liffe also offers its customers the pioneering Bclear and Cscreen services, which bridge the listed and OTC markets providing a simple and cost-effective way to register and process wholesale derivatives trades through NYSE Liffe to clearing at NYSE Liffe Clearing.

NYSE Liffe Clearing Following the launch of NYSE Liffe Clearing, NYSE Liffe assumed full responsibility for clearing activities for the London market of NYSE Liffe. In this regard, NYSE Liffe's London market operates as a self-clearing Recognized Investment Exchange and outsources certain clearing guarantee arrangements and related risk functions to LCH.Clearnet Limited (which is referred to in this document as LCH.Clearnet), a UK recognized clearing house. On May 12, 2010, NYSE Euronext announced that, subject to regulatory approval, it will commence clearing its European securities and derivatives business through two new, purpose-built, clearing houses based in London and Paris in 2012. LCH.Clearnet in London and LCH.Clearnet SA in Paris have been informed that NYSE Euronext's current contractual arrangements for clearing with them will terminate accordingly at that time. However, NYSE Liffe's London market has only indicated its intention to serve a termination notice on its contract with LCH.Clearnet and has not served a formal termination notice. No termination fees or penalties will be payable. As of December 31, 2010, NYSE Euronext retained a 9.1% stake in LCH.Clearnet Group Limited's outstanding share capital and the right to appoint one director to its board of directors.

NYSE Liffe US NYSE Liffe US LLC (which is referred to in this document as NYSE Liffe US), NYSE Euronext's U.S. futures exchange, makes available for trading full- and mini-sized gold and silver futures, options on full-sized gold and silver futures and futures on MSCI Indices. In 2011, NYSE Liffe US plans to launch a full suite of fixed income futures which is expected to clear at NYPC. In July 2010, NYSE Liffe US announced that it will coordinate with its global customer base to transition the trading and open interest of all existing MSCI-linked stock index futures in the U.S. to its platform no later than June 17, 2011, and that it intends to introduce additional contracts based on MSCI indices. A significant minority equity stake in NYSE Liffe US is held by six external investors: Citadel Securities, DRW Investments, Getco, Goldman Sachs, Morgan Stanley and UBS. Under this ownership structure, NYSE Euronext remains the largest shareholder in the entity and consolidates its financial reporting. NYSE Euronext manages the day-to-day operations of NYSE Liffe US, which operates under the supervision of a separate board of directors.

NYSE Amex Options In 2010, NYSE Euronext announced the sale of a significant equity interest in NYSE Amex Options, one of its two U.S. options exchanges, to seven external investors, BofA Merrill Lynch, Barclays Capital, Citadel Securities, Citi, Goldman Sachs, TD AMERITRADE and UBS. Under the framework, NYSE Euronext remains the largest shareholder in the entity and manages the day-to-day operations of NYSE Amex options, which operates under the supervision of a separate board of directors and a dedicated chief executive officer. NYSE Euronext consolidates this entity for financial reporting purposes. NYSE Euronext expects to complete the sale following receipt of regulatory approvals.

NYSE Arca Options NYSE Arca Options, one of NYSE Euronext's two U.S. options exchanges, offers immediate, cost-effective electronic order execution in nearly 2,000 options issues.

Table of Contents

New York Portfolio Clearing NYSE Euronext's joint venture with DTCC, became operational in the first quarter of 2011. New York Portfolio Clearing will initially clear fixed income derivatives traded on NYSE Liffe US and will have the ability to provide clearing services for other exchanges and Derivatives Clearing Organizations in the future. New York Portfolio Clearing uses NYSE Euronext's clearing technology, TRS/CPS, to process and manage cleared positions and post-trade position transfers. DTCC's Fixed Income Clearing Corporation provides capabilities in risk management, settlement, banking and reference data systems. As of December 31, 2010, NYSE Euronext had a minority ownership interest in, and board representation on, DTCC. NYSE Euronext's investment in New York Portfolio Clearing is treated as an equity method investment.

Products and Services***Trading Platform and Market Structure***

NYSE Liffe's full service electronic trading platform features an open system architecture which allows users to access NYSE Euronext's system. Traders commonly access NYSE Euronext's system via one of the many front-end trading applications that have been developed by independent software vendors, and this has enabled its distribution to grow continuously with widespread adoption around the world. These applications are personalized trading screens that link the user to the market, which allows users to integrate front/back office trading, settlement, risk management and order routing systems. NYSE Liffe's trading platform has been designed to handle significant order flows and transaction volumes. Orders can be matched on a price/time and/or pro rata basis, configurable by contract, with transacted prices and volumes and the aggregate size of all bids and offers at each price level updated on a real-time basis. Users are continually notified of all active orders in the central order book, making market depth easy to monitor. NYSE Liffe expects to complete the migration of its technology to the Universal Trading Platform during the second quarter of 2011. See Information Services and Technology Solutions NYSE Euronext's Global Technology Group.

Products Traded

A wide variety of products are traded on NYSE Liffe. NYSE Liffe's core product line is its portfolio of short-term interest rate (which is referred to in this document as a STIR) contracts with its principal STIR contracts based on implied forward rates denominated in euro and sterling. Trading volumes in NYSE Liffe's flagship product in this area, the Euribor Contract, grew as the euro has increasingly established itself as a global reserve currency. Overall, NYSE Liffe offers a number of derivatives products, including interest rate contracts on a number of currencies, equity futures and options on leading global stocks traded either through LIFFE CONNECT® or Bclear (including a wide range of underlyings not listed on NYSE Euronext), index products covering national and international indices and a wide range of soft and agricultural commodity derivatives.

Options

NYSE Arca and NYSE Amex operate marketplaces for trading options on exchange-listed securities. The underlying securities are listed on the New York Stock Exchange, NYSE Arca, NYSE Amex and Nasdaq. These option market centers include trading facilities, technology and systems for trading options as well as regulatory, surveillance and compliance services. NYSE Arca's options business uses a technology platform and market structure designed to enhance the speed and quality of trade execution for its customers and to attract additional sources of liquidity. Its market structure allows market makers to access its markets remotely and integrates floor-based participants and remote market makers. NYSE Amex's options business uses a hybrid model combining both auction-based and electronic trading capabilities that is designed to provide a stable, liquid and less volatile market, as well as provide the opportunity for price and/or size improvement. NYSE Amex Options and NYSE Arca Options are also equity holders of and have representation on the board of directors of The Options Clearing Corporation.

Table of Contents

Trading Members

NYSE Liffe's trading members are dealers and brokers. Trading members can also become liquidity providers. Liquidity providers are able to place several series of bulk quotes in one order, allowing them to send buy and sell orders for many contract months using only one message.

Competition

NYSE Liffe competes with a number of international derivatives exchanges, including the CME Group Inc. and with OTC trading. Several other entities have announced their intention to enter the derivatives space in the U.S. as well as in Europe.

NYSE Liffe US, NYSE Arca and NYSE Amex face considerable competition in derivatives trading. Their principal U.S. competitors are the CME Group Inc., Chicago Board Options Exchange, Nasdaq OMX, the International Securities Exchange, BATS and the Boston Options Exchange.

NYSE Liffe US also experiences substantial competition in its futures business. Its primary competitors include the incumbent exchange groups, IntercontinentalExchange and the CME Group Inc., which acquired the New York Mercantile Exchange in 2008, as well as start-ups such as ELX Futures, L.P., backed by a consortium of banks and other market participants.

Cash Trading and Listings

NYSE Euronext's Cash Trading and Listings segment consists of its cash trading and listings businesses and includes the New York Stock Exchange, Euronext, NYSE Amex, NYSE Arca, NYSE Alternext, NYSE Arca Europe and SmartPool, as well as BlueNext and Interbolsa, and related cash trading market data.

NYSE NYSE is registered as a national securities exchange under the Exchange Act. In addition to common stock, preferred stock and warrants, the NYSE lists debt and corporate structured products, such as capital securities, mandatory convertibles and repackaged securities (not including ETPs, as defined below), and continues to attract listings of new types of structured products.

Euronext Euronext is the first integrated cross-border exchange, combining the stock exchanges of Amsterdam, Brussels, Lisbon and Paris into a single market and now with a London market as well. Issuers who meet European Union regulatory standards are qualified for listing on the regulated markets operated by Euronext. Euronext's exchanges list a wide variety of securities, including domestic and international equity securities, convertible bonds, warrants, exchange traded funds and debt securities, including corporate and government bonds. All of Euronext's markets are operated by subsidiaries of Euronext, N.V., each of which holds a national license as an exchange operator.

NYSE Amex NYSE Amex, formerly the American Stock Exchange, became part of the NYSE Euronext in 2008 and is NYSE Euronext's U.S. listing venue for emerging growth companies. NYSE Amex enhances NYSE Euronext's scale in U.S. options and provides a listing venue for a broader class of companies than are qualified for listing on NYSE. In 2010, NYSE Amex began trading certain Nasdaq-listed securities. NYSE Amex is registered as a national securities exchange under the Exchange Act.

NYSE Arca NYSE Arca is a fully electronic exchange in the United States for equities, exchange traded products (which are referred to in this document as ETPs), which include exchange traded funds (which are referred to in this document as ETFs), exchange traded notes, exchange traded vehicles, certificates and options. NYSE Arca is registered as a national securities exchange under the Exchange Act.

NYSE Alternext NYSE Alternext operates NYSE Euronext's European markets for emerging growth companies. NYSE Alternext-listed companies are required to satisfy less stringent listing

Table of Contents

standards than companies listing on Euronext. Companies listing on NYSE Alternext have greater flexibility in their choice of accounting standards and are subject to less extensive ongoing post-listing reporting requirements than companies listing on Euronext.

NYSE Arca Europe NYSE Arca Europe is a pan-European MTF, operated by Euronext Amsterdam. NYSE Arca Europe offers a fully electronic, low latency trading platform for blue chip stocks from eleven European countries.

SmartPool SmartPool is a European dark pool dedicated to the execution of institutional order flow that launched its trading services in February 2009. This MTF, created in partnership with NYSE Euronext and three European investment banks (BNP Paribas, HSBC and J.P. Morgan), is operated by NYSE Euronext and has its own dedicated management team in London.

BlueNext/NYSE Blue In February 2011, NYSE Euronext contributed its ownership in BlueNext in return for a majority interest in NYSE Blue, a new global company focusing on environmental and sustainable energy markets.

Products and Services

Order Execution

NYSE Euronext provides multiple marketplaces for investors, broker-dealers and other market participants to meet directly to buy and sell cash equities, fixed income securities, ETPs and a broad range of derivative products. One of the primary functions of NYSE Euronext's markets is to ensure that orders to purchase and sell securities are executed in a reliable, orderly, liquid and efficient manner. Order execution occurs through a variety of means, and NYSE Euronext seeks to continue to develop additional and more efficient mechanisms of trade. To maintain its leadership position, NYSE Euronext intends to continue to develop its market model in response to emerging trends in the trading environment and technological advancements.

Cash Trading

In the United States, NYSE Euronext offers cash trading in equity securities, fixed income securities and ETPs on the NYSE, NYSE Arca and NYSE Amex. NYSE Euronext is able to offer its customers the option of using either auction trading with a floor-based component or electronic trading. In Europe, Euronext's cash trading business consists of trading in equity securities and other cash instruments including funds, bonds, warrants, trackers and structured funds.

Trading Platform and Market Structure NYSE and NYSE Amex

The NYSE and NYSE Amex markets combine both auction-based and electronic trading capabilities. These markets are intended to emulate, in a primarily automatic execution environment, the features of the traditional auction market that have provided stable, liquid and less volatile markets, as well as provide the opportunity for price and/or size improvement. The markets build on NYSE Euronext's core attributes of liquidity, pricing efficiency, low trading costs and tight spreads by broadening customers' ability to trade quickly and anonymously. NYSE Euronext believes that the interaction of its automatic and auction markets also maintains opportunities for price improvement, while providing all investors, regardless of their size, with the best price when buying or selling shares.

Designated market makers (on the trading floor are charged with maintaining fair, orderly and continuous two-way trading markets by bringing buyers and sellers together and, in the relative absence of orders to buy or sell their assigned stock, adding liquidity by buying and selling the assigned stock for their own accounts. Supplemental liquidity providers are a class of high-volume members financially incentivized to add liquidity on the NYSE upon fulfilling quoting requirements. Floor brokers act as agents on the trading floor to handle customer orders. Designated market makers and brokers use judgment to improve prices and enhance order

Table of Contents

competition, while interacting with the market electronically as well as manually. NYSE Euronext believes that their judgment is particularly valuable in less liquid stocks and during the opening and closing of trading, as well as during times of uncertainty, for example, when a corporate announcement or an outside event could lead to market instability and price volatility. This market model, which NYSE Euronext refers to as its New Market Model, is a pilot program created in 2008.

During 2010, NYSE Euronext continued to migrate its U.S. exchanges to a single Universal Trading Platform. See Information Services and Technology Solutions NYSE Euronext's Global Technology Group.

Trading Platform and Market Structure Euronext

Cash trading on Euronext's markets takes place via the Universal Trading Platform following the successful migration of these markets from the Nouveau Système de Cotation. Cash trading on Euronext is governed both by a single harmonized rulebook for trading on each of Euronext's markets and by the various non-harmonized Euronext Rulebooks containing local exchange-specific rules. Euronext's trading rules provide for an order-driven market using an open electronic central order book for each traded security, various order types and automatic order matching and a guarantee of full anonymity both for orders and trades. At the option of the listed company, trading of less-liquid listed securities on the European markets can be supported by a liquidity provider who is either an existing member of Euronext and/or a corporate broker. The liquidity provider is dedicated to supporting the trading in less-liquid small and mid-sized companies to foster regular trading and minimize price volatility.

Trading Platform and Market Structure NYSE Arca

NYSE Arca operates an open, all-electronic stock exchange for trading all U.S.-listed securities (in addition to options, as discussed below). NYSE Arca also provides additional listing services for ETPs. NYSE Arca's trading platform provides customers with fast electronic execution and open, direct and anonymous market access. NYSE Arca operates the lead market maker program whereby an LMM functions as the exclusive dedicated liquidity provider in NYSE Arca primary listings. Selected by the issuer, the lead market maker must meet minimum performance requirements determined by NYSE Arca, which include percentage of time at the national best bid and offer, average displayed size and average quoted spread, and supports the NYSE Arca opening and closing auctions.

This trading system offers a variety of execution-related services and trading rules predicated on price-time priority, which requires execution of orders at the best available price and, if orders are posted at the same price, based on the time the order is entered in the trading system. The open limit order book displays orders simultaneously to both the buyer and the seller, and buyers and sellers have the option of submitting orders on an anonymous basis. Trades are executed in the manner designated by the party entering the order, often at a price equal to or better than the highest bid or lowest offer quote reported to the consolidated quotation systems.

Trade Reporting Facility

NYSE Euronext operates a trade reporting facility with FINRA to serve its customers reporting off-exchange trades in all listed national market system stocks. NYSE Euronext's trade reporting facility enhances the range of trading products and services it provides to its customers by offering a reliable and competitively priced venue to report internally executed transactions.

NYSE Bonds

NYSE Bonds, NYSE Euronext's bond trading platform, incorporates the design of the NYSE Arca electronic trading system and provides investors with the ability to readily obtain transparent pricing and trading information. The platform trades bonds of all NYSE and NYSE Amex-listed companies and their subsidiaries

Table of Contents

without the issuer having to separately list each bond issued. NYSE Bonds maintains and displays priced bond orders and matches those orders on a strict price and time-priority basis. It also reports real-time bids and offers with size and trades to its network of market data vendors.

Trading Members

Trading members in NYSE Euronext's U.S. cash markets include entities registered as broker-dealers with the SEC that have obtained trading permits or licenses in accordance with the rules of the NYSE, NYSE Arca or NYSE Amex. Trading members are subject to the rules of the relevant exchange. The majority of Euronext's European cash trading members are brokers and dealers based in Euronext's marketplaces, but also include members in other parts of Europe, most notably Germany.

Clearing and Settlement Europe

Clearing and settlement of trades executed on Euronext are currently handled by LCH.Clearnet S.A. (for central counterparty clearing), Euroclear Group (for settlement of cash equities except for Lisbon trades) and Interbolsa (for settlement of Lisbon cash and derivatives equities). In May 2010, NYSE Euronext announced that, subject to regulatory approval, it will commence clearing its European securities and derivatives business through two new, purpose-built clearing houses based in London and Paris from mid-2012. Interbolsa is one of NYSE Euronext's wholly owned subsidiaries. LCH.Clearnet S.A. and Euroclear are independent entities that provide services to Euronext pursuant to contractual agreement. NYSE Euronext has a minority ownership interest in, and board representation on, LCH.Clearnet Group Limited and Euroclear. Clearing for trades executed on NYSE Arca Europe takes place on EuroCCP, a London-based subsidiary of DTCC. SmartPool trades on NYSE Euronext listed stocks are cleared by LCH.Clearnet S.A., and trades on non-NYSE Euronext listed stocks are cleared by EuroCCP.

Listings United States

Through NYSE Euronext's listing venues NYSE, NYSE Arca and NYSE Amex, NYSE Euronext has developed a market information analytics platform, complimentary to all listed companies, that is a combination of technology-enabled market intelligence insight and a team of highly skilled market professionals. This platform, called the NYSE Market Access Center, was created to provide issuers with better market insight and information across all exchanges and trading venues. This includes services that were either (a) developed by the NYSE using proprietary data and/or intellectual property or (b) built by a third party expressly for NYSE-listed companies. Within this platform all issuers have access to daily trading summaries, a trading alert system highlighting user-defined trading or market events, social and professional networking within the NYSE community, a messaging and communication platform with a NYSE client service team, a website with proprietary trading information and market data, a series of institutional ownership reports, weekly economic updates and regularly scheduled executive educational programming. All issuers listed on the New York Stock Exchange have access to the NYSE Market Access Center on the same basis. In addition to the NYSE Market Access Center, the NYSE offers tools to certain currently listed issuers on a tiered basis.

The NYSE has also developed eGovDirect.com, an interactive, web-based tool that helps listed companies meet their NYSE governance and compliance requirements efficiently and economically. In September 2010, NYSE Euronext announced the acquisition of Corporate Board Member, the publisher of *Corporate Board Member* magazine and a leading provider of interactive education and thought leadership for directors and executive officers of publicly traded companies. This acquisition advances NYSE Euronext's goal of expanding its board education capabilities to public companies around the world that are striving to improve their governance and effectiveness. Additionally, in connection with listings, NYSE Euronext on occasion commits to provide co-branded marketing programs, advertising, investor education and other services to issuers. NYSE Euronext expects to continue to invest in products and services for the benefit of its listed companies.

Table of Contents

In 2008, NYSE Euronext adopted new initial listing standards on the NYSE. These standards were designed to capture a larger percentage of qualified issuers and attract more emerging growth companies as a competitive alternative to Nasdaq OMX, particularly with respect to technology companies. Growth companies will be able to leverage many of the unique and innovative benefits that are provided to NYSE-listed companies, including an affiliation with one of the world's leading brands, a dedicated liquidity provider, exceptional market quality and a wide range of value-added products and services.

Listings Europe

Through NYSE Euronext's listing venues, Euronext and NYSE Alternext, NYSE Euronext has developed a broad range of services to meet the needs of Euronext-listed companies. In July 2010, NYSE Euronext launched a new London-based securities market, NYSE Euronext London, aimed at attracting international issuers looking to list in London. Each Euronext issuer receives personalized support through a team of dedicated account managers. NYSE Euronext also offers listed companies ExpertLine, a continuous push and pull communication and information platform. Located directly in the trading room and managed by a multidisciplinary team of experts, ExpertLine provides listed companies with real-time responses to topics relating to listing and stock trading. Companies listed on Euronext also benefit from secure online tools, such as Mylisting.euronext.com, a web-based technology that provides real-time information and data on listed stocks and offers issuer-customized alerts and a range of other services. NYSE Euronext offers training workshops and information sessions to better inform and educate issuers on new regulations and related legal matters, as well as practical guidance on investor relations and communication matters. In connection with NYSE Euronext's 2009 sale of Hugin Group B.V. to Thomson Reuters, NYSE Euronext agreed to expand its strategic partnership with Thomson Reuters toward offering value-added services to issuers.

Through close cooperation with the regulators of the financial markets in each of the EU member states where Euronext operates, Euronext has adopted a harmonized rulebook that sets out a unified set of listing standards with which issuers must comply, regardless of which of Euronext's markets (Amsterdam, Brussels, Lisbon or Paris) is chosen as the entry point. These harmonized listing standards and the local applicable rules from Euronext Rulebook II set forth the criteria required for the listing of securities on Euronext's exchanges, as well as ongoing requirements. NYSE Euronext seeks to attract emerging growth companies through NYSE Alternext, which has less stringent listing standards and ongoing reporting requirements than Euronext.

Indices and Index Services

NYSE Euronext owns and operates benchmark and strategy indices that measure different segments of NYSE Euronext and global markets. From time to time, NYSE Euronext creates new proprietary indices when added value for market participants is identified or to provide measurement tools for all types of investment categories regardless of listing venue. NYSE Euronext has licensed many of its indices to asset managers for use in ETFs that are listed on its exchanges. NYSE Euronext also offers third-party index calculation services for ETFs and other structured products, which NYSE Euronext believes is important to the development of such products on its exchanges, as it allows it to leverage its technology and understanding of traded products to better serve investors. All of NYSE Euronext's index services are designed to offer its clients more tools and services to support the listing and trading of their products.

Liquidity Aggregation

NYSE Euronext is committed to improving execution quality and providing greater access to liquidity for its customers. NYSE Euronext operates NYSE MatchPoint, an electronic equity trading facility that matches aggregated orders at pre-determined fixed times with prices that are derived from primary markets. NYSE MatchPoint's portfolio-crossing technology expands NYSE Euronext's ability to match baskets of stocks at pre-determined points in time during the after-hours market and eventually at any point during the day.

Table of Contents

NYSE Euronext also operates the New York Block Exchange through a joint venture with BIDS Holdings, L.P., a consortium of 12 leading U.S. broker-dealers. The New York Block Exchange is designed to improve execution quality and access to liquidity in block trading in the United States. The New York Block Exchange is open to all NYSE members and accessible through BIDS Trading, a registered alternative trading system. The New York Block Exchange operates as a facility of the NYSE and is intended to respond to customer needs by creating a highly liquid, anonymous marketplace for block trading, and bring block-size orders back into contact with active traders, algorithms and retail order flow.

European MTFs

To respond to increasing competition from electronic communications networks following the European Commission's adoption of the MiFID, NYSE Euronext has launched new European MTFs. NYSE Euronext and its joint venture partners operate SmartPool, a dark MTF for trading pan-European stocks, which currently trades stocks from European markets, including NYSE Euronext's national markets. In addition, NYSE Euronext operates NYSE Arca Europe, an MTF for trading the most active pan-European stocks that are not already traded on NYSE Euronext's four national markets. Also in July 2010, NYSE Euronext announced that it was creating the first pan-European Multilateral Trading Platform for Euro-denominated corporate bonds.

Alliances and Other Exchanges

With some of the most recognized brand names in the global exchange industry and among the world's largest securities marketplaces, NYSE Euronext is well positioned to continue to play a leadership role in the ongoing consolidation of the industry through acquisitions and strategic alliances. For example, NYSE Euronext entered into a strategic partnership with the State of Qatar to establish the Qatar Exchange, the successor to the Doha Securities Market. The Qatar Exchange will continue to provide a market for cash equities, and the aim of management is also to create a new derivatives market. In addition, the Qatar Exchange will adopt NYSE Euronext's latest trading and network technologies, and it will provide certain management services to the Qatar Exchange at negotiated rates. NYSE Euronext is also currently working with certain exchanges, particularly in Asia and Eastern Europe, on market development, information sharing and technology. NYSE Euronext also hosts the Luxembourg Exchange on its platform.

In July 2010, NYSE Euronext and the Warsaw Stock Exchange announced the establishment of a strategic partnership and cooperation agreement covering the development of future mutually beneficial business initiatives and the migration of Warsaw Stock Exchange markets to NYSE Technologies' Universal Trading Platform.

Competition

In the United States, NYSE Euronext faces significant competition with respect to cash trading, and this competition is expected to intensify in the future. NYSE Euronext's current and prospective competitors include regulated markets, electronic communication networks, dark pools and other alternative trading systems, market makers and other execution venues. NYSE Euronext also faces growing competition from large brokers and customers that may assume the role of principal and act as counterparty to orders originating from retail customers, or by matching their respective order flows through bilateral trading arrangements. NYSE Euronext competes with such market participants in a variety of ways, including the cost, quality and speed of trade execution, liquidity, the functionality, ease of use and performance of trading systems, the range of products and services offered to trading participants and listed companies, technological innovation and reputation.

NYSE Euronext also faces intense price competition. NYSE Euronext's competitors have and may continue to seek to increase their share of trading by reducing their transaction fees, by offering larger liquidity payments or by offering other forms of financial incentives. As a result, NYSE Euronext could lose a substantial percentage of its share of trading if NYSE Euronext is unable to price transactions in a competitive manner, or its profit margins could decline if it reduces or otherwise alters its transaction pricing.

Table of Contents

In Europe, NYSE Euronext faces significant and growing competition from trading services provided by a wide array of alternative off-exchange trading venues. NYSE Euronext also faces competition from large brokers and customers, who have the ability to divert trading volumes from NYSE Euronext in one of two ways. First, large banks may assume the role of principal and act as counterparty to orders originating from retail investors, thus internalizing order flow that would otherwise be traded on an exchange. Second, banks and brokers may enter into bilateral or even multilateral trading arrangements by matching their respective order flows, thus bypassing NYSE Euronext's markets. Furthermore, NYSE Euronext competes with an array of automated multi-lateral trading platforms, such as BATS, Turquoise and Chi-X. The competitive pressure from these alternative venues is likely to remain very strong in the future.

In the United States, NYSE Euronext's principal competitor for listings is Nasdaq OMX. The U.S. capital markets face competition for foreign issuer listings from a number of stock exchanges outside the United States, for example, London Stock Exchange Group plc and exchanges in Tokyo, Hong Kong, Toronto, Singapore and Australia. As other liquidity venues seek exchange status, NYSE Euronext may face more competition for listings. The legal and regulatory environment in the United States may make it difficult for NYSE Euronext to compete with non-U.S. securities exchanges for the secondary listings of non-U.S. companies and primary listings of U.S. companies.

In Europe, NYSE Euronext does not currently face significant competition in providing primary listing services to issuers based in Euronext's continental markets because most issuing companies seek to list their shares only once on their respective domestic exchange. Accordingly, Belgian, Dutch, French and Portuguese companies typically obtain a primary listing on the relevant regulated national exchange operated by Euronext, and are admitted to trading either on Euronext, or, in the case of certain small- to medium-sized companies, NYSE Alternext. With the exception of ETPs, there are no competing regulated exchanges offering primary corporate listing services in Euronext's home territories. Therefore, no material competition exists in respect of those issuers located in Euronext's home markets that seek a primary listing. Competition does exist, however, with MEDIP, a regulated market operated in Portugal by MTS Portugal, which provides a platform for the wholesale trading between specialists of Portuguese government bonds.

NYSE Euronext also competes with other exchanges worldwide to provide secondary listing services to issuers located outside of NYSE Euronext's European home territories and primary listing services to those issuers that do not have access to a well-developed domestic exchange.

NYSE Euronext's NYSE Blue joint venture competes with a number of international derivatives exchanges in the trading of CQemission allowances, including the European Climate Exchange (running on ICE systems) and the CME Group Inc. In addition, Nasdaq OMX, which already holds a European operator, Nord Pool, announced in 2009 that it intends to expand into energy and carbon derivatives.

Information Services and Technology Solutions

NYSE Euronext's Information Services and Technology Solutions segment refers to its commercial technology transactions, data and infrastructure businesses. NYSE Euronext operates a commercial technology business, NYSE Technologies, and also owns NYFIX, Inc., a leading provider of innovative solutions that optimize trading efficiency. NYSE Technologies provides comprehensive transaction, data and infrastructure services and managed solutions for buy-side, sell-side and exchange communities that require next-generation performance and expertise for mission-critical and value-added client services. NYSE Technologies' advanced integrated solutions power the trading operations of global financial institutions and exchanges, including non-NYSE Euronext markets in addition to all the exchanges in NYSE Euronext. NYSE Technologies operates five businesses: Global Market Data, which offers a broad array of global market information products covering multiple asset classes; Trading Solutions, which creates and implements high performance, end-to-end messaging software and real-time market data distribution and integration products; Exchange Solutions, which provides multi-asset exchange platform services, managed services and expert consultancy; Global Connectivity, offering

Table of Contents

one of the world's largest, most reliable financial transaction networks connecting firms and exchanges worldwide; and Transactions, which primarily comprises the former NYFIX, Inc. FIX business, and which incorporates the NYFIX Marketplace and the industry-leading FIX Software business.

Products and Services

Global Market Data

The broad distribution of accurate and reliable real-time market data is essential to the proper functioning of any securities market because it enables market professionals and investors to make informed trading decisions. The quality of NYSE Euronext's market data, its world-class collection and distribution facilities, and the ability of traders to act on the data NYSE Euronext provides, attract order flow to its exchanges and reinforce its brand. NYSE Euronext's primary market data services include the provision of real-time information relating to price, transaction or order data on all of the instruments traded on the cash and derivatives markets of NYSE Euronext's exchanges. In the United States, market data revenues from core data and non-core data (as discussed below) products are allocated between NYSE Euronext's Cash Trading and Listings and Information Services and Technology Solutions segments, respectively. In Europe, market data revenues from the distribution of real-time market data are allocated among NYSE Euronext's three segments.

In the United States, NYSE Euronext provides two types of market data products and services: core data products, or those governed by National Market System plans, and non-core, or proprietary, data products.

Core Data Products. The SEC requires securities markets to join together in consolidating their bids, offers and last sale prices for each security and to provide this information to the public on an integrated basis. NYSE Euronext works with other markets to make its U.S. market data available, on a consolidated basis, on what is often referred to as the consolidated tape. The data resulting from the consolidated tape is also referred to as core data. This intermarket cooperative effort provides the investing public with the reported transaction prices and the best bid and offer for each security, regardless of the market from which a quote is reported or on which market a trade takes place.

Last sale prices and quotes in NYSE-listed, NYSE Amex-listed and NYSE Arca-listed securities are disseminated through Tape A and Tape B, which constitute the majority of NYSE Euronext's market data revenues. NYSE Euronext also receives a share of the revenues from Tape C, which represents data related to trading of certain securities (including ETPs) that are listed on Nasdaq. Over the past two decades, NYSE Euronext has expanded its market data business by accessing new customers, in particular nonprofessional subscribers and cable television audiences.

Non-Core Data Products. NYSE Euronext makes certain market data available independently of other markets, which is known as non-core, or proprietary, data. NYSE Euronext packages this type of market data as trading products (such as NYSE OpenBook, through which the NYSE makes available all limit orders) and analytic products (such as TAQ Data, NYSE Broker Volume and a variety of other databases that are made available other than in real-time and that are generally used by analytic traders, researchers and academics). These products are proprietary to NYSE Euronext, and NYSE Euronext does not share the revenues that they generate with other markets.

NYSE Real-Time Reference Prices is a data product that enables Internet and media organizations to buy real-time, last sale prices from the NYSE and provide it broadly and free of charge to the public. Google Finance and CNBC were the first organizations to make the product available to the public. NYSE Arca last sale prices are made available through this product. NYSE Arca also makes certain market data available independent of other markets. Through ArcaVision, NYSE Arca provides listed companies, traders and investors with a tailored and customizable means to view detailed market data on particular stocks and market trends. Another data product, ArcaBook, displays the limit order book of securities traded on NYSE Arca in real time.

The pricing for U.S. market data products must be approved by the SEC on the basis of whether prices are fair, reasonable and non-discriminatory.

Table of Contents

Unlike in the United States, European market data is not consolidated. In Europe, NYSE Euronext distributes and sells both real-time and proprietary market information to data vendors (such as Thomson Reuters and Bloomberg), as well as to financial institutions and individual investors.

Real-Time Market Data. NYSE Euronext's main data services offering involves the distribution of real-time market data. This data includes price, transaction and order book data on all of the instruments traded on the European cash and derivatives markets of NYSE Euronext, as well as information about NYSE Euronext's indices. The data is marketed in different information products, and can be packaged according to the type of instrument (shares, derivatives or indices), the depth of the information (depth of the order book, number of lines of bid and ask prices), and the type of customer (professional or private). The data is disseminated primarily via data vendors, but also directly to financial institutions and other service providers in the financial sector.

In November 2010, NYSE Euronext announced that it will launch a consolidated tape for European equity markets beginning in the third quarter of 2011. The tape will be available both as a real-time consolidated data feed and as a 15-minute delayed Tape of Record, which will be free of charge to all investors and will be made broadly available via the Internet and market data vendors. The consolidated tape will contain complete coverage of post-trade equities data from all European regulated exchanges, MTFs, and OTC markets. In July 2010, NYSE Euronext announced a strategic partnership with Markit BOAT, the largest trade reporting venue in Europe, to deliver a consolidated OTC tape that includes trades reported to Markit BOAT and NYSE Euronext's OTC trade reporting platform which together account for nearly all OTC trading activity in Europe.

Other Information Products. In addition to real-time market data, NYSE Euronext also provides historical and analytical data services as well as reference and corporate action data services.

Through NextHistory, NYSE Euronext offers professionals in the financial industry access to historical data for all of its European markets via the Internet or DVD. Through its Index File Service, NYSE Euronext also provides traders, analysts, investors and others who rely on up-to-date index information with daily information on the exact composition and weighting of its indices and precise details of changes in index levels and constituent share prices.

NYSE Euronext's market snapshots service in Europe provides full market overviews including, but not limited to, quotes, prices and volumes relating to the full array of financial instruments traded on NYSE Euronext markets at fixed times every trading day. Through NYSE Euronext's Masterfiles service, it offers comprehensive information on the characteristics of all warrants and certificates for listed securities on NYSE Euronext markets. Another service delivers information concerning corporate actions to the market.

NYSE Euronext's TradeCheck service is designed to help buy-side and sell-side firms to demonstrate best execution to their customers and regulators. The product is web-based and allows users to perform post-trade (T+1) verifications via three services: execution quality analysis, transaction quality analysis and order book replay. TradeCheck encompasses all the main markets of the European Economic Area that are covered by the Market in Financial Instruments Directive.

Finally, NYSE Euronext publishes a number of daily official price lists, such as the Cote Officielle in Paris, the Daily Bulletin in Lisbon and the Amsterdam Daily Official List.

Trading Solutions

NYSE Technologies' Trading Solutions business provides software solutions for the trading operations of hundreds of exchanges and global financial institutions. NYSE Technologies' Market Data Platform provides real-time market data distribution and integration comprising high-performance messaging middleware and sub-millisecond connectivity to global markets with numerous high-speed direct exchange and aggregated vendor feed handlers.

Table of Contents

Exchange Solutions

NYSE Technologies Exchange Solutions business provides international exchange clients with platforms to support dynamic, growing markets at the best price points possible, while ensuring market integrity and access to a truly global network.

Global Connectivity

NYSE Technologies operates the Secure Financial Transaction Infrastructure (which is referred to in this document as the SFTI), a rapidly expanding physical network infrastructure that connects NYSE Euronext's markets and other major market centers with numerous market participants in the United States and Europe. SFTI connects all NMS market centers in the United States and is expanding to link major and emerging markets around the globe. Through this single network, trading firms and investors can connect to real-time information and trading, while financial markets can provide customers with access to their data and execution services regardless of their trading platform or interfaces. Customers gain access to SFTI market centers via direct circuit to a SFTI access point or through a third-party service bureau or extranet provider.

Transactions

NYSE Technologies Transaction Services business offers a wide range of products and services that help to facilitate trading. Community-driven services, FIX Order Routing and Liquidity Discovery are delivered to the NYSE Technologies Marketplace community, consisting of buy- and sell-side trading firms, over fully managed message channels. In addition, Transaction Services provides fully managed services, including a Hosted Transactions Hub solution (managed connectivity) and Risk and Market Access Gateways.

Competition

The market for NYSE Euronext's commercial trading and information technology services solutions is intensely competitive and characterized by rapidly changing technology, evolving industry standards and frequent new product and service installations. NYSE Euronext expects competition for these services to increase both from existing competitors and new market entrants. NYSE Euronext competes primarily on the basis of performance of services, return on investment in terms of cost savings and new revenue opportunities for its customers, scalability, ease of implementation and use of service, customer support and price. In addition, potential customers may decide to purchase or develop their own trading and other technology solutions rather than rely on an externally managed services provider like NYSE Euronext.

NYSE Euronext's Global Technology Group

NYSE Euronext is integrating its technologies globally to establish a single Universal Trading Platform, a multi-market, multi-geography and multi-regulation exchange platform for all NYSE Euronext markets (cash and derivatives in both the U.S. and Europe). This global technology initiative involves several upgrades to NYSE Euronext's current architecture, using technologies acquired through strategic initiatives and acquisitions. This initiative involves the simplification and convergence of NYSE Euronext's systems into a single global electronic trading platform system, with equities and derivatives-specific versions, as well as the implementation of a common customer gateway and market data system to enable market participants globally to access NYSE Euronext's markets, products and services via a common architecture. Notwithstanding migration to common trading platforms and linkages, the individual exchanges remain separate and access to the exchanges must be made through a member of the exchange. NYSE Euronext began this initiative in 2007 and have completed the migration of its European cash market to the Universal Trading Platform. NYSE Euronext is currently finalizing the migration of all its remaining markets to the Universal Trading Platform. NYSE Euronext began the final phase of the rollout of the program to all of its markets in 2009 and in 2010 it completed the migration of the NYSE Arca equities and options markets and the NYSE Amex Options market. During 2011, NYSE Euronext will complete the migration for NYSE Liffe and NYSE.

Table of Contents*Data Centers*

To enhance the capacity and reliability of its systems, in the second half of 2010, NYSE Euronext launched two new data centers in Basildon, England, and Mahwah, New Jersey (U.S.). All of the matching engines for its markets in Europe are now consolidated in the Basildon facility, and NYSE Euronext expects to complete the migration of its U.S. securities exchanges to the Mahwah facility during the first half of 2011.

NYSE Euronext seeks to ensure the integrity of its data network through a variety of methods, including access restrictions and firewalls. NYSE Euronext monitors traffic and components of its data network, and uses an application to detect network intrusions and monitor external traffic. Customer circuits and routers are monitored around the clock and anomalies in customer circuits are reported to its staff and carrier support personnel for resolution.

Properties

NYSE Euronext's headquarters are located in New York City, at 11 Wall Street, and in Paris, at 39 rue Cambon. Euronext's registered office is located at Beursplein 5, 1012 JW Amsterdam, the Netherlands. In total, NYSE Euronext maintains approximately 2.6 million square feet in offices throughout the United States, Europe and Asia. NYSE Euronext's principal offices, used by all of its segments, consist of the properties described below.

Location	Owned/Leased	Lease Expiration	Approximate Size
11 Wall Street New York, New York	Owned	N/A	370,000 sq. ft.
20 Broad Street New York, New York	Leased	2016	293,100 sq. ft. ⁽¹⁾
Mahwah, New Jersey 5 Beursplein Amsterdam, The Netherlands	Leased	2029	395,900 sq. ft.
39 Rue Cambon Paris, France	Owned	N/A	130,500 sq. ft. ⁽²⁾
1 Cousin Lane London, United Kingdom	Leased	2015	145,500 sq. ft.
1 Place de la Bourse/Beursplein Brussels, Belgium	Leased	2022	91,000 sq. ft.

Adelaide Exchange Belfast, Ireland	Leased	2015	13,000 sq. ft.
Basildon, United Kingdom	Leased	2019	57,250 sq. ft.
	Owned	N/A	315,000 sq. ft.

(1) Does not include approximately 89,000 sq. ft. leased to third parties.

(2) Does not include approximately 25,000 sq. ft. leased to third parties.

NYSE Euronext believes the facilities it owns or occupies are adequate for the purposes for which they are currently used and are well-maintained.

There are no material encumbrances on property owned by NYSE Euronext.

Intellectual Property

NYSE Euronext owns the rights to a large number of trademarks, service marks, domain names and trade names in the United States, Europe and in other parts of the world. NYSE Euronext has registered many of its most important trademarks in the United States and other countries. NYSE Euronext holds the rights to a number of patents and has made a number of patent applications. However, NYSE Euronext does not engage in any

Table of Contents

material licensing of these patents, nor are these patents, individually or in the aggregate, material to its business. NYSE Euronext also owns the copyright to a variety of material. Those copyrights, some of which are registered, include printed and online publications, websites, advertisements, educational material, graphic presentations and other literature, both textual and electronic. NYSE Euronext attempts to protect its intellectual property rights by relying on trademarks, copyright, database rights, trade secrets, restrictions on disclosure and other methods.

Employees

As of December 31, 2010, NYSE Euronext employed 2,968 full-time equivalent employees (FTE s). The following provides a breakdown by region and reportable segment of NYSE Euronext FTE s:

	US ⁽¹⁾	Europe	Segment total
Derivatives	164	470	634
Cash Trading & Listings	975	452	1,427
Information Services and Technology Solutions	467	290	757
Corporate	85	65	150
Total NYSE Euronext	1,691	1,277	2,968

(1) Includes 48 employees located in Asia.

Overall, NYSE Euronext considers its relations with its employees, as well as its relations with any related collective bargaining units or workers councils, to be good.

Since December 31, 2010, the total number of employees has not changed significantly.

Stock Based Compensation

For information regarding the stock based compensation under the Stock Incentive Plan of NYSE Euronext see note 10 to the audited consolidated financial statements of NYSE Euronext as of December 31, 2010, 2009 and 2008 and for each of the years in the three-year period ended December 31, 2010 included in this document.

Legal Proceedings

The following is a summary of significant legal matters as of the date of the publication of this document. Except for the proceedings cited in this section, there are no governmental, legal or arbitration proceedings (including any such proceedings pending or threatened, of which NYSE Euronext is aware), nor have there been any during the previous 12 months which may have or have had in the recent past material effects on NYSE Euronext's financial position or profitability.

IRS Notice

In November 2009, the Internal Revenue Service issued a notice of proposed adjustment seeking to disallow approximately \$161 million in deductions taken by the NYSE for compensation paid to its former Chairman and Chief Executive Officer in the tax years 2001, 2002 and 2003. In February 2010, the NYSE filed a protest of the proposed disallowance and is awaiting a conference with the Internal Revenue Service Appeals Office.

Shareholder Lawsuits

Following the announcement of the business combination agreement, various lawsuits were filed by purported NYSE Euronext shareholders in at least two state courts. The plaintiffs are seeking to litigate on behalf of a proposed class of all NYSE Euronext shareholders. The named defendants include the members of NYSE Euronext board of directors, certain officers, as well as NYSE Euronext, Deutsche Börse and related corporate entities. Each lawsuit asserts a claim for breach of fiduciary duty against the individual defendants, and a claim

A-288

Table of Contents

for aiding and abetting that alleged breach against one or more of the entity defendants. In general, the lawsuits critique the terms of the proposed transaction and seek, among other things, an injunction against its completion. NYSE Euronext is reviewing the complaints and intends to contest them.

In addition to the matters described above, certain affiliates of NYSE Euronext are from time to time involved in various legal and regulatory proceedings that arise in the ordinary course of business. NYSE Euronext does not believe, based on currently available information, that the results of any of these various proceedings will have a material adverse effect on its operating results or financial condition.

Material Contracts

Debt Agreements

In 2007, NYSE Euronext entered into a U.S. dollar and euro-denominated global commercial paper program of \$3.0 billion in order to refinance the acquisition of the Euronext shares. As of December 31, 2010 and 2009, NYSE Euronext had \$0.3 billion and \$0.6 billion of debt outstanding at an average interest rate of 0.8% and 0.4% under this commercial paper program, respectively. The effective interest rate of commercial paper issuances does not materially differ from short term interest rates (Libor U.S. for commercial paper issued in U.S. dollar and Euribor for commercial paper issued in euro). The fluctuation of these rates due to market conditions may therefore impact the interest expense incurred by NYSE Euronext.

The commercial paper program is backed by a \$2.0 billion 5-year syndicated revolving bank facility maturing on April 4, 2012. This bank facility is also available for general corporate purposes and was not drawn as of December 31, 2010. On September 15, 2008, the amount of commitments readily available to NYSE Euronext under the \$2.0 billion April 2012 facility decreased from \$2.0 billion to \$1,833 million as a result of the bankruptcy filing of Lehman Brothers Holdings Inc., which had provided a \$167 million commitment under this facility.

In 2006, prior to the combination with NYSE Group, Euronext entered into a \$300 million (\$401 million at December 31, 2010) revolving credit facility available for general corporate purposes, which matures on August 4, 2011. On a combined basis, as of December 31, 2010, NYSE Euronext had three committed bank credit facilities totaling \$2.2 billion, with no amount outstanding under any of these facilities. The commercial paper program and the credit facilities include terms and conditions customary for agreements of this type, which may restrict NYSE Euronext's ability to engage in additional transactions or incur additional indebtedness.

In 2008, NYSE Euronext issued \$750 million of 4.8% fixed rate bonds due in June 2013 and \$750 million of 5.375% fixed rate bonds due in June 2015 in order to, among other things, refinance outstanding commercial paper and lengthen the maturity profile of its debt. In 2009, NYSE Euronext increased the \$750 million 5.375% notes due in June 2015 to \$1 billion as a result of an incremental offering of \$250 million. The terms of the bonds do not contain any financial covenants. The bonds may be redeemed by NYSE Euronext or the bond holders under certain customary circumstances, including a change in control accompanied by a downgrade of the bonds below an investment grade rating. The terms of the bonds also provide for customary events of default and a negative pledge covenant.

Shareholders Agreement relating to Qatar Securities Market

On June 24, 2008, NYSE Euronext entered into a shareholders agreement with Qatar Investment Authority, a Qatar governmental authority. The agreement represents a strategic partnership between NYSE Euronext and the State of Qatar to develop the Doha Securities Market as an internationally integrated financial market in the global exchange sector. Pursuant to the terms of this agreement, NYSE Euronext acquired a 25% ownership interest in the Doha Securities Market for \$250 million in cash. The State of Qatar retained the remaining 75% ownership of the Doha Securities Market through Qatar governmental authority. Under the terms of the shareholders agreement, NYSE Euronext is responsible for providing management services and technology.

Table of Contents***Master Agreement Between ATOS Origin S.A. and NYSE Euronext***

On July 11, 2008, NYSE Euronext and ATOS Origin, S.A. (Atos Origin) entered into a Master Agreement (the Master Agreement), pursuant to which NYSE Euronext acquired the 50% stake in AtosEuronext Market Solutions (AEMS) owned by Atos Origin, as a result of which AEMS became a wholly-owned subsidiary of NYSE Euronext. Upon completion of the transactions contemplated by the Master Agreement, NYSE Euronext owned the NSC cash trading and LIFFE CONNECT[®] derivatives trading platform technology and all of the management and development services surrounding these platforms, as well as AEMS 's third-party exchange technology business and TRS/CRP. Atos Origin acquired the third-party clearing and settlement and capital markets businesses from AEMS (the Carve Out).

Euronext France, a wholly-owned subsidiary of NYSE Euronext, acquired (a) all of the shares of AEMS held by Atos Origins and its affiliates and (b) certain of AEMS 's cash and cash equivalents which was approximately 130 million (\$205 million) for approximately 282 million (\$445 million), subject to adjustment. The price adjustment reflected retention payments made by NYSE Euronext to AEMS employees in connection with the transaction, any dividends paid by AEMS to Atos Origin and its affiliates in 2008 prior to the closing of the transaction, and cash amounts relating to certain businesses and equity securities transferred out of AEMS in connection with the Carve Out.

The parties agreed to customary representations and warranties, covenants and indemnification obligations in the Master Agreement.

Clearing Relationship Agreement

On October 30, 2008, LIFFE Administration and Management (which is referred to in this section as LIFFE) entered into a clearing relationship agreement with LCH.Clearnet Limited, a UK Recognised Clearing House.

The agreement provides for LIFFE to become central counterparty and to earn clearing revenues in respect of contracts entered into by clearing members on the LIFFE market and for LCH.Clearnet Limited to provide certain clearing services to LIFFE.

In consideration for the receipt of clearing services from LCH.Clearnet Limited under this agreement, LIFFE agreed to pay LCH.Clearnet Limited a base annual fee of 29,500,000 plus certain amounts to reflect inflation and an increase in the volume of trades on the LIFFE market over time. In addition, LIFFE agreed to provide LCH.Clearnet Limited with certain dependent services to enable it to perform its obligations under the agreement. The primary obligation of LCH.Clearnet Limited under the agreement is to accept the novation from LIFFE of the defaulting contracts of a LIFFE clearing member and to manage such member 's positions under its default rules. Further, LCH.Clearnet Limited sets minimum margin requirements for members; collect margins on LIFFE 's behalf; and make and receive payments through its established PPS payment infrastructure. LCH.Clearnet Limited also collects member fees on behalf of LIFFE and manages the collateral which support the positions of members on the LIFFE market. The agreement provides for the agreement of binding service levels prior to commencement and contains customary warranties, covenants and indemnification obligations.

LCH.Clearnet Limited was appointed as the exclusive provider of the services covered by the agreement wherever LIFFE acts as central counterparty to its members. LIFFE is otherwise free to appoint a third party to provide central counterparty and other clearing services to its members, provided that LCH.Clearnet Limited benefits from certain preferred supplier arrangements. LCH.Clearnet Limited 's provision of services to LIFFE is on a non-exclusive basis. LCH.Clearnet Limited is bound to clear new products for LIFFE that meet certain criteria.

LIFFE or LCH.Clearnet Limited may terminate the agreement on one year 's notice, subject to certain early termination penalties. In order to minimize the disruption to LIFFE markets upon the termination of the agreement, whether for cause or otherwise, the agreement includes an exit migration mechanism.

Table of Contents

LCH.Clearnet Amended and Restated Clearing Agreement

Euronext Amsterdam, Euronext Brussels, Euronext Lisbon and Euronext Paris are parties to an amended and restated clearing agreement with LCH.Clearnet S.A. and LCH.Clearnet Group Ltd., pursuant to which such Euronext exchanges designate LCH.Clearnet S.A. as their central counterparty clearing house to provide clearing services for transactions executed on those exchanges. The agreement was entered into in October 2003 and has a 30-month initial term and a 30-month termination notice provision.

NYSE Euronext on Corporate Responsibility

NYSE Euronext believes in being good corporate citizens by integrating workplace, community, market and environmental concerns into its business operations and interactions with stakeholders. In doing so, NYSE Euronext seeks to create long-term benefits for its business relationships, shareholders, customers, employees, constituents, NYSE Euronext's communities and the environment. NYSE Euronext's commitment to corporate responsibility is embedded in its corporate guidelines, serves as a framework to ethical decision making and practices and is inherently apparent in its strategic business initiatives.

NYSE Euronext believes that fulfilling its commitment to corporate responsibility demands high ethical standards and a corporate culture that values honesty, integrity and transparency in all that NYSE Euronext does. To contribute to its communities, NYSE Euronext financially supports and motivates its workers to become volunteers in their own communities in the United States and Europe and encourages its employees' philanthropic activities through matching gift programs. As a company, NYSE Euronext is committed to financial literacy and investor education, and NYSE Euronext has a number of initiatives in these areas designed to help raise awareness and effect change. NYSE Euronext also has been focused on measuring and improving its environmental impact. NYSE Euronext is in the process of developing a global corporate environmental policy to guide and unify these efforts. NYSE Euronext also provides the markets with solutions that help to address environmental concerns with investments such as NYSE Blue, which is a market-based carbon-trading solution to curbing emissions. NYSE Euronext also is committed to corporate responsibility more broadly, and hold a seat on the Corporate Responsibility Officers Association's Board of Governors.

In addition to these efforts, NYSE Euronext partners with its listed companies and non-profit organizations to raise awareness of a variety of topics, holding highly visible bell-ringing ceremonies and other events. NYSE Euronext also serves as a public forum for the exchange of new ideas and opportunities on issues such as environmental sustainability and corporate responsibility.

NYSE Euronext partners with its listed companies at all levels of advocacy on important public policy matters that impact investors and public companies. NYSE Euronext will continue to participate in the debate and dialogue on the global economic recovery, working to ensure that all market participants are properly heard and represented and that the new emerging landscape provides for the integrity and confidence inherent to an effective economic framework and to properly functioning capital markets.

Table of Contents**Officers and Directors**

Set forth below is information regarding NYSE Euronext's executive officers and directors. The only NYSE Euronext executive officers who also serve on NYSE Euronext's board of directors are Duncan L. Niederauer, Chief Executive Officer, and Dominique Cerutti, President and Deputy Chief Executive Officer. All of NYSE Euronext's executive officers have been appointed by and serve at the pleasure of NYSE Euronext board of directors.

Name	Age	Title
Duncan L. Niederauer	51	Chief Executive Officer and Director
Dominique Cerutti	50	President, Deputy Chief Executive Officer and Director
Lawrence E. Leibowitz	50	Chief Operating Officer
Michael S. Geltzeiler	52	Group Executive Vice President and Chief Financial Officer
Roland Gaston-Bellegarde	49	Group Executive Vice President and Head of European Execution
Philippe Duranton	50	Group Executive Vice President and Global Head of Human Resources
Garry P. Jones	52	Group Executive Vice President and Head of Global Derivatives
John K. Halvey	50	Group Executive Vice President and General Counsel
Claudia O. Crowley	53	Chief Executive Officer of NYSE Regulation, Inc.
Jan-Michiel Hessels	68	Chairman of the Board of Directors
Marshall N. Carter	70	Director
André Bergen	60	Director
Ellyn L. Brown	61	Director
Patricia M. Cloherty	68	Director
Sir George Cox	70	Director
Sylvain Hefes	58	Director
Duncan M. McFarland	67	Director
James J. McNulty	60	Director
Ricardo Salgado	66	Director
Robert G. Scott	65	Director
Jackson P. Tai	60	Director
Rijnhard van Tets	63	Director
Sir Brian Williamson	66	Director

Executive Officers

Duncan L. Niederauer. Mr. Niederauer was appointed chief executive officer and director of NYSE Euronext, effective December 1, 2007, after joining NYSE Euronext in 2007 as a member of the management committee. Mr. Niederauer also serves on the board of NYSE Group.

Mr. Niederauer was previously a partner at The Goldman Sachs Group, Inc. (United States) where he held many positions, among them, co-head of the Equities Division execution services franchise and the managing director responsible for Goldman Sachs Execution & Clearing, L.P. (formerly known as Spear, Leeds & Kellogg L.P.). Mr. Niederauer joined The Goldman Sachs Group, Inc. in 1985. Mr. Niederauer also serves on the board of trustees for Colgate University.

Dominique Cerutti. Mr. Cerutti was appointed president and deputy chief executive officer in the first quarter of 2010, and has served as a director since April 28, 2011. He joined NYSE Euronext on December 15, 2009 and was approved as deputy chief executive officer and head of Global Technology on December 31, 2009.

Table of Contents

Mr. Cerutti most recently served as General Manager of IBM Southwest Europe. In this role, he led all of IBM's business operations, had full profit and loss responsibility and ensured risk management, compliance and business controls across IBM's business units in southern and western Europe. Mr. Cerutti was a member of IBM Chairman and CEO Sam Palmisano's Senior Leadership Team. Previously, he was general manager of IBM's Global Services in Europe, Middle East & Africa, based in Paris. In 1999, he was appointed executive assistant at IBM's New York headquarters to former IBM Chairman and CEO Louis V. Gerstner.

Lawrence E. Leibowitz. Mr. Leibowitz was appointed chief operating officer in the first quarter of 2010. In this capacity, he is responsible for operations management, global cash execution and global listings. He previously served as group executive vice president and head of U.S. Execution and Global Technology from 2007 until 2009. He joined NYSE Euronext in 2007, having served as managing director and chief operating officer, Americas Equities, at UBS Investment Bank. Prior to joining UBS in 2004, Mr. Leibowitz held the position of executive vice president, co-head of Schwab Capital Markets, the trading and execution arm of Schwab. He has served on many industry boards and committees, among them the Market Structure Committee of the former Securities Industry Association (now SIFMA).

Michael S. Geltzeiler. Mr. Geltzeiler has served as group executive vice president and chief financial officer since 2008. Most recently, he served as president, School and Educational Services for The Reader's Digest Association, a global media and direct marketing company. He was the organization's CFO and senior vice president from 2001 to 2007. In 2005, Mr. Geltzeiler's responsibilities were expanded to also include oversight for global operations and information technology. While at ACNielsen Corporation, a global information and media company, from 1995 to 2001, Mr. Geltzeiler served as CFO, SVP and controller, and CFO for ACNielsen Europe, Middle East and Africa. He held a variety of positions in corporate finance in America and abroad while at The Dun & Bradstreet Corporation, a leading provider of commercial information and insight on businesses worldwide, from 1980 to 1995. Mr. Geltzeiler currently serves on the boards of the Museum of American Finance, Lerner College of Business and Economics Advisory Board, the Madison Square Boys and Girls Club, the NYSE Foundation and the Euronext Supervisory Board, as well as an officer of the Fallen Heroes Fund.

Roland Gaston-Bellegarde. Mr. Gaston-Bellegarde is group executive vice president and head of European Execution. He is responsible for European listing activities as well as trading, which includes managing market operations for the four Euronext markets and handling product development and user relations on the buy-side and sell-side. Mr. Gaston-Bellegarde previously served as head of Cash Trading beginning in 2000 and has been leading the process to integrate the NSC trading platform across the Euronext markets. As such, he has defined and developed the global Euronext market model for securities trading. From 1998 to 2000, Mr. Gaston-Bellegarde served as head of Cash & Derivatives Markets - ParisBourse. From 1995 to 1998, he served as head of Cash Markets - ParisBourse.

Philippe Duranton. Mr. Duranton has served as group executive vice president and global head of Human Resources since March 2008. Prior to joining NYSE Euronext, Mr. Duranton had been senior vice president of human resources for Cognos Inc., a world leader in business intelligence and performance management solutions, from 2007 until 2008. From 2003 to 2006, he was executive vice president for GEMPLUS, a digital security provider. Prior to these positions, Mr. Duranton served in senior human resources positions at Vivendi Universal TV and Film Group and Thales, a leader in defense, aerospace, security and transportation.

Garry P. Jones. Mr. Jones has served as group executive vice president and head of Global Derivatives since May 2009. From 2007 to April 2009, Mr. Jones was executive director of Business Development and Strategy for NYSE Liffe, with responsibility for marketing, sales, product development and business strategy. Mr. Jones joined NYSE Liffe from ICAP plc, where he was CEO of ICAP Electronic Broking (Europe) and, prior to this, was CEO and President of BrokerTec Europe Ltd, the bank consortium-owned global fixed income electronic trading platform. Mr. Jones worked for almost 20 years in a variety of senior management roles in trading, sales and research for investment banks in both the United States and Europe, focusing on the bond and derivatives markets, working for Bankers Trust, Merrill Lynch, Daiwa Securities and Banque Paribas.

Table of Contents

John K. Halvey. Mr. Halvey has served as group executive vice president and general counsel of NYSE Euronext since 2008. Mr. Halvey also serves on the supervisory board of Euronext N.V. Prior to joining NYSE Euronext in 2008, Mr. Halvey was a corporate partner with the international law firm of Milbank, Tweed, Hadley & McCloy, LLP from 1994 to 1999 and from 2001 to 2008. From 1999 to 2001, Mr. Halvey was executive vice president of Safeguard Scientifics, Inc., a private equity and venture capital firm. Mr. Halvey has practiced in all areas of corporate, technology and intellectual property law, with particular emphasis on information technology and business process related transactions and private equity transactions involving technology companies.

Claudia O. Crowley. Ms. Crowley was appointed chief executive officer of NYSE Regulation in July 2010. She is also the chief regulatory officer of the NYSE, NYSE Arca and NYSE Amex. Ms. Crowley joined NYSE Regulation in October 2008 as senior vice president of NYSE Regulation and chief regulatory officer of NYSE Amex. She also became chief of staff of NYSE Regulation in January 2009. Prior to joining NYSE Regulation, Ms. Crowley was senior vice president and chief regulatory officer at the American Stock Exchange (now NYSE Amex). She joined the American Stock Exchange in 1983 as an enforcement attorney and later served on the legal staff. Ms. Crowley reports solely to the NYSE Regulation board of directors. Ms. Crowley performs certain policy-making functions with respect to NYSE Euronext. She has informed and assisted NYSE Euronext's management in developing regulatory policies and assisted management in the development and structuring of its U.S. market structure initiatives. Ms. Crowley does not report to the NYSE Euronext board of directors or any of its executive officers.

Directors

Jan-Michiel Hessels. Mr. Hessels is the chairman of the NYSE Euronext Board of Directors. He served as chairman of the supervisory board of Euronext since its creation in September 2000 until the merger of Euronext and NYSE Group. Before that, he was a member of the supervisory board of the Amsterdam Exchange since its creation in 1997. He was the chief executive officer of Royal Vendex KBB from 1990 to 2000 and served on the supervisory boards of Royal Vopak N.V. (the Netherlands) from 1999 to 2005, Laurus N.V. (the Netherlands) from 1998 to 2004, B&N.com Inc. from 1999 to 2003 and Schiphol Group N.V. (the Netherlands) from 1993 to May 2006. Mr. Hessels was a member of the supervisory board of Fortis N.V. (the Netherlands/Belgium) from 2001 to 2007 and was deputy chairman of the supervisory board from 2007 to February 2009. Mr. Hessels was chairman of SC Johnson Europlant N.V. (the Netherlands) from October 2004 to December 2009 and chairman of Royal Philips Electronics N.V. (the Netherlands) from 2008 to 2011. He serves on the boards of Euronext Amsterdam N.V. (a subsidiary of Euronext) and Heineken N.V. (the Netherlands). In addition, he chairs the board of the Netherlands Committee for Economic Policy Analysis.

Mr. Hessels' significant experience as a leader of NYSE Euronext and its predecessor organizations makes him qualified to understand NYSE Euronext's business, competitors and opportunities. In addition, Mr. Hessels' diverse professional experience as a chairman and director of a number of international public corporations, managerial experience as a chief executive officer, considerable international business experience and accomplishments in the fields of finance and economics allow him to bring a strategic point of view to the Board. These are the qualities that led the Nominating and Governance Committee to the conclusion that Mr. Hessels should serve as a director of NYSE Euronext.

Marshall N. Carter. Mr. Carter is the deputy chairman of the NYSE Euronext Board of Directors. Mr. Carter served on the board of NYSE Group from November 2003 and as chairman of that board from April 2005 until the merger of NYSE Group and Euronext. Mr. Carter has also served as a director of NYSE Liffe U.S. since November 2008. Mr. Carter is the former chairman and chief executive officer of the State Street Bank and Trust Company, and of its holding company, State Street Corporation (United States), a position in which he served from 1992 until his retirement in 2001. He joined State Street in July 1991, as president and chief operating officer, and became chief executive officer in 1992 and chairman in 1993. Mr. Carter formerly served as a director of Honeywell International, Inc. (United States) from 1997 to 2005 and was the chairman of the Board of

Table of Contents

Trustees of the Boston Medical Center from 2001 to 2009. He also served in Vietnam as a Marine Corps infantry officer. Mr. Carter was most recently a lecturer in leadership and management at the Sloan School of Management at Massachusetts Institute of Technology and Harvard's Kennedy School of Government, where, from 2001 to 2005, he was a fellow at the Center for Public Leadership and the Center for Business and Government.

The specific experience, qualifications, attributes and skills that the Nominating and Governance Committee considered in concluding that Mr. Carter should serve as a director of NYSE Euronext include his extensive experience as the chief executive of a major banking and financial services organization, chairman and director of a number of major organizations, distinguished contribution to academia in the fields of business and government and significant experience as a leader of NYSE Euronext and its predecessor organizations. These qualities demonstrate Mr. Carter's experience and analytic skills that allow him to understand the complexities of NYSE Euronext's business and bring a unique direction to the Board's strategic discussions.

André Bergen. Mr. Bergen has served as a director of NYSE Euronext since April 2010. Mr. Bergen served as chief executive officer of KBC Bank from 2003 to 2006 and as chief executive officer of KBC Group from 2006 until his retirement in 2009. Prior to his position with KBC Bank, Mr. Bergen was chief financial and administrative officer of Agfa-Gevaert Group. During his career, Mr. Bergen has taught at different universities in Belgium and abroad. Mr. Bergen also held various positions at Generale Bank from 1982 to 1999. Mr. Bergen holds non-executive board positions with the King Baudouin Foundation and the Flemish Fund for Scientific Research.

Mr. Bergen is also a member of the boards of Cofinimmo S.A. (Belgium), Ahlers N.V. (Belgium), NIBC Bank (the Netherlands), Zuhair Fayeز Partners (Saudi Arabia), a director of Sapient Investment Managers (Cyprus) and is a former member of the board of the Flemish Employers Association.

Mr. Bergen's significant experience as the chief executive of a major banking and financial services organization in addition to his managerial experience and other leadership roles at major corporations, distinguished contributions to academia and dedication to public service are the specific experiences, qualifications, attributes and skills that the Nominating and Governance Committee considered in concluding that Mr. Bergen should serve as a director of NYSE Euronext. These qualities enable him to understand NYSE Euronext's operations and strategic objectives and enhance the Board's strategic decision-making function.

Ellyn L. Brown. Ms. Brown has served as a director of NYSE Euronext and its predecessors since April 2005. She is also a director of NYSE Regulation and serves on the Board of Governors of FINRA. Ms. Brown practiced corporate and securities law from 1980 until her retirement in 2010, most recently as principal of Brown & Associates, and has taught securities law at Villanova University and the University of Maryland. She is a trustee of the Financial Accounting Foundation (parent of the Financial Accounting Standards Board and Government Accounting Standards Board) and a director of Walter Investment Management Corporation, a publicly-traded REIT (a U.S.-based Real Estate Investment Trust). Ms. Brown served as Maryland's Securities Commissioner from 1987 to 1992, and later was a member of the boards of the National Association of Securities Dealers Regulation and the Certified Financial Planner Board of Standards. Ms. Brown also has served on the boards of a number of not-for-profit entities, including the Baltimore Symphony Orchestra Association.

The Nominating and Governance Committee considered Ms. Brown's considerable experience in the field of securities regulation, including as a member of several professional standards boards and regulatory bodies and as a securities and corporate lawyer, her distinguished contribution to academia in the field of law and her dedication to public service, in concluding that she should serve as a director of NYSE Euronext. Such experience and qualifications allow her to understand the regulatory functions of the exchanges that NYSE Euronext operates and demonstrate her commitment to its industry.

Patricia M. Cloherty. Ms. Cloherty has served as a director of NYSE Euronext since April 2009. She is chairman and chief executive officer of Delta Private Equity Partners, LLC, manager of the U.S. Russia

Table of Contents

Investment Fund and Delta Russia Fund, L.P., two venture capital funds. She is the former co-chairman, president and general partner of Apax Partners, Inc. (formerly Patricof & Co. Ventures, Inc.), a multi-billion-dollar private equity company that she joined in 1970 and from which she withdrew in 2000. From 1977 to 1978, she served as deputy administrator, U.S. Small Business Administration. Ms. Cloherty holds various directorships, among them PrimeStar (Russia), Vesch! (Russia), VideoNext Network Solutions, Inc. (U.S. and Ukraine) and DeltaLeasing (Russia) and is a former director of American Chamber of Commerce (Russia). She is a former trustee of Columbia University, a trustee for life of International House and a trustee emeritus of Columbia University's Teachers College. She is a member of The Rockefeller University Council and the Council on Foreign Relations. She is also a member of the Advisory Boards of two business schools in Russia, in Skolkovo and Saint Petersburg. Ms. Cloherty was appointed to the board of the U.S. Russia Investment Fund in 1995 by President Clinton, served as chairman of the board from 1998 until 2004 and has been chief executive officer of its management company since 2003.

Ms. Cloherty's expansive experience in private equity, venture capital, capital formation and international business, including managerial experience as a chief executive officer, leadership roles as a director of a number of international and foreign companies, including several in the technology industry, distinguished contributions to academia and dedication to public service and foreign relations were qualifications and traits that the Nominating and Governance Committee considered when concluding that she should serve on the Board of Directors. These diverse experiences and qualifications demonstrate Ms. Cloherty's ability to understand the international environment in which NYSE Euronext operates and contribute to the Board's strategic decision-making function.

Sir George Cox. Sir George has served as a director of NYSE Euronext and its predecessors since April 2002. Prior to that, he was a senior independent director of London International Financial Futures & Options Exchange (United Kingdom) (LIFFE) from 1999 until the acquisition of LIFFE by Euronext in 2002. He was director general of the Institute of Directors, an organization representing individual company directors in the United Kingdom, from 1999 to 2004, and director of Enterprise Insight (United Kingdom) from 2000 to 2005. Sir George also served as chairman of the Design Council, the United Kingdom's national strategic body for design, served as a senior independent director of Bradford & Bingley (United Kingdom) and served as a trustee of VSO. He is a non-executive director of Shorts Ltd (United Kingdom), the president of the Royal College of Speech and Language Therapists, the chairman of Merlin (Medical Emergency Relief International) USA, a council member and Pro Chancellor of Warwick University, chair of the Warwick Business School Board and the president of the Institution of Engineering Designs.

Sir George's significant experience as a leader of NYSE Euronext and its predecessor organizations, particularly in its derivatives business, of which he had been a leader since the 1990s, allows him to understand NYSE Euronext's various business segments, its technology, its markets and its strategic objectives. In addition, Sir George's diverse background as a chairman and director of a number of major organizations, his distinguished contributions to academia and his dedication to public service provide a perspective that enhances the Board's strategic discussions. The Nominating and Governance Committee considered these attributes and skills in reaching its conclusion that Sir George should serve as a director of NYSE Euronext.

Sylvain Hefes. Mr. Hefes has served as a director of NYSE Euronext since April 2007. He joined NM Rothschild & Sons Ltd. (United Kingdom) in 2005 where he serves as senior advisor. Prior to this time, Mr. Hefes was head of European Wealth Management at The Goldman Sachs Group, Inc. (United States), where he became a partner in 1992 and served as head of the firm's Paris office and eventually all of the firm's private banking business in Europe. Mr. Hefes currently serves as chairman of the executive board of Paris Orléans (France), and as a director of Rothschild Continuation Holdings AG (Switzerland).

The Nominating and Governance Committee considered Mr. Hefes' senior leadership roles at major banking and financial services organizations throughout Europe in concluding that he is able to understand the position of NYSE Euronext and its various business segments relative to its competitors, particularly on an

Table of Contents

international scale. It is this international perspective, in addition to Mr. Hefes' diverse professional and managerial experience as a senior partner, chairman and director of a number of major organizations that led the Nominating and Governance Committee to conclude that Mr. Hefes would contribute to the Board's strategic vision and therefore should serve as a director of NYSE Euronext.

Duncan M. McFarland. Mr. McFarland has served as a director of NYSE Euronext and its predecessors since June 2006. He retired in June 2004 as the chairman and chief executive officer of Wellington Management Company (United States), one of the largest global, independent investment managers, after a career of nearly 40 years. He currently serves on the boards of two public companies, The Asia Pacific Fund, Inc. (United States) and Gannett Co., Inc. (United States). Mr. McFarland formerly served as a trustee of the Financial Accounting Foundation (parent of the Financial Accounting Standards Board) and the Clancil Foundation. Mr. McFarland also currently serves as a trustee of the Bromley Charitable Trust and RARE, Inc., a global environmental organization. He is also a director of New Profit, Inc., a non-government organization that primarily serves inner-city constituencies.

Mr. McFarland's extensive experience as the chairman and chief executive of a global financial services organization, as a trustee of a financial accounting standards body and as a director of major public companies, including service as the chairman of the executive compensation committee of Gannett, coupled with Mr. McFarland's dedication to public service were particular experiences, qualifications and traits that the Nominating and Governance Committee considered in concluding that Mr. McFarland is qualified to understand NYSE Euronext's results of operations and financial condition, as well as those of its significant business segments, and to add significantly to the Board's decision-making processes.

James J. McNulty. Mr. McNulty has served as a director of NYSE Euronext and its predecessors since December 2005. Mr. McNulty is also the chairman of the board of directors of NYSE Liffe U.S. He served as a director of Archipelago Holdings LLC (United States) from August 2004 to March 2006. Mr. McNulty retired from the Chicago Mercantile Exchange where he served as president and chief executive officer from February 2000 to December 2003 and of Chicago Mercantile Exchange Holdings Inc. from August 2001 to December 2003. He also served as a director on both entities' boards during that period. Prior to joining the Chicago Mercantile Exchange, he served as managing director and co-head of the Corporate Analysis and Structuring Team in the Corporate Finance Division at Warburg Dillon Read, an investment banking firm now known as UBS Warburg. Mr. McNulty served as the senior independent director of ICAP plc until his retirement in September 2010. He currently serves on the advisory board of Marvin & Palmer Associates.

Mr. McNulty's significant experience as a leader of NYSE Euronext and its predecessor organizations as well as his leadership roles with other organizations that operate exchanges, his managerial experience as a chief executive officer and a director and his extensive experience as an investment banker with a global financial services firm led the Nominating and Governance Committee to conclude that he would be able to add unique insight into the position of NYSE Euronext relative to its peers and to guide NYSE Euronext to achieve its operational, financial and strategic goals. The committee therefore concluded that Mr. McNulty should serve as a member of the Board of Directors.

Ricardo Salgado. Mr. Salgado has served as a director of NYSE Euronext and its predecessors since April 2002. Previously, Mr. Salgado served as chairman of the board of BVLP Sociedade de Gestora de Mercados Regulamentados, S.A. (Portugal) from 2000 until the merger with Euronext in 2002. Currently, he also serves as a member of the executive board of the Espirito Santo Group (Portugal), the vice-chairman and president of the executive committee of Banco Espirito Santo (Portugal) and chairman of the board of directors of Espirito Santo Financial Group S.A. (Luxembourg).

Mr. Salgado's extensive experience as a chairman and member of the executive board of an international banking and financial services organization, in addition to his experience in the European securities exchange industry, including significant experience as a leader of NYSE Euronext and its predecessor organizations, led

Table of Contents

the Nominating and Governance Committee to conclude that Mr. Salgado would contribute a thorough understanding of NYSE Euronext's financial and economic climate, particularly on an international level, to the Board of Directors and therefore should serve as a director of NYSE Euronext.

Robert G. Scott. Mr. Scott has served as a director of NYSE Euronext since February 2010. Mr. Scott was president, chief operating officer and a director of Morgan Stanley until December 2003 and continues as an advisory director of the company. Mr. Scott was named chief financial officer of Morgan Stanley Dean Witter at the time of the merger between Morgan Stanley and Dean Witter and became president and chief operating officer in 2001. Mr. Scott joined Morgan Stanley in 1970 and became a managing director in 1979. Prior to the merger, Mr. Scott held a number of positions with worldwide responsibility, including director of investment banking from 1994 to 1996, director of corporate finance from 1992 to 1994 and director of capital market services from 1985 to 1992. Mr. Scott is a trustee of Williams College and a member of the advisory council of the Stanford University Graduate School of Business. Mr. Scott is currently a director of Genpact, a publicly traded business process outsourcing company located in India and a member of the board of trustees of New York Presbyterian Hospital. Mr. Scott is a trustee of the Naples Children and Educational Foundation. Mr. Scott is a former executive vice president of the Greater New York Council of the Boy Scouts of America (1992 to 2004) and was a director of Archipelago Holdings, Inc. He is a former trustee of the Japan Society, former chairman of the American Museum of Fly Fishing and a former trustee and chairman (1984 to 2004) of The Seeing Eye, Inc.

The Nominating and Governance Committee believes that Mr. Scott's diverse professional experience as a president, chief operating officer and chief financial officer of a global financial services firm, his leadership roles as a director of one of NYSE Euronext's predecessor organizations and as a director of a major international public company, his distinguished contributions to academia and his dedication to public service demonstrate his ability to understand NYSE Euronext's business and add a perspective that will enhance the Board's strategic discussions. It is for these reasons that the committee concluded that Mr. Scott should serve on the Board of Directors.

Jackson P. Tai. Mr. Tai has served as a director of NYSE Euronext since April 2010. Mr. Tai served as chief executive officer and vice chairman of DBS Group Holdings Ltd. and DBS Bank Ltd. from June 2002 to December 2007. He joined DBS as chief financial officer in July 1999 and was appointed president and chief operating officer in 2001. Prior to his eight years of service with DBS in Singapore, he served 25 years with J.P. Morgan & Co. as a managing director in the Investment Banking Division, holding management positions in New York, Tokyo and San Francisco.

As of March 2011, Mr. Tai is a director of The Bank of China Ltd. He has been a director of MasterCard Incorporated since September 2008, and a director of CapitaLand Ltd. since November 2000. He has been a non-executive director of privately-held Brookstone Inc. and its subsidiary, Brookstone Company Inc., since August 2008 and their chairman since February 2009. Mr. Tai is a trustee of Rensselaer Polytechnic Institute, a member of the Harvard Business School Asia Pacific Advisory Board, a governor of the San Francisco Symphony and a trustee of the Asian Art Museum. Previously, Mr. Tai was a member of the supervisory board of ING Groep NV from April 2008 to January 2011. Mr. Tai was also member of the Bloomberg Asia Pacific Advisory Board from 2006 to 2010, non-executive vice chairman of The Islamic Bank of Asia, Limited from 2006 to 2008, and a non-executive director of Singapore Telecommunications Ltd. from 2000 to 2006.

Mr. Tai's global experience as the chief executive of a major banking and financial services organization, senior leader of a global investment bank, director of major international public companies, coupled with his deep knowledge of the business, banking and financial services climates in Asia and his dedication to academia are the specific experiences, qualifications, attributes and skills that the Nominating and Governance Committee considered in concluding that Mr. Tai should serve as a director of NYSE Euronext. These qualities will enable him to understand NYSE Euronext's operations and strategic objectives, particularly on an international level.

Table of Contents

Rijnhard van Tets. Mr. van Tets has served as a director of NYSE Euronext and its predecessors since May 2003 and serves as the chairman of Euronext. Mr. van Tets is a managing director at Laaken Asset Management N.V. and previously served as an advisor to the managing board of ABN AMRO Bank N.V. (the Netherlands) until May 2007 and as chairman of the board of Wegener, N.V. until 2007. Mr. van Tets was vice-chairman of the Amsterdam Stock Exchange Association from 1988 to 1989 and a director of Euroclear from 1994 to 1999. Mr. van Tets served as a member of the supervisory board of Reliant Energy N.V. (the Netherlands) from 2000 to 2003 and as a member of the board of Stichting Holland Casino (the Netherlands) from 2000 to 2004. He is the chairman of the supervisory board of Arcadis (the Netherlands) and also a member of the supervisory boards of I.F.F. Holding B.V. (the Netherlands) and Petrofac Ltd. (United Kingdom), chairman of the board of Equity Trust Holdings S.A.R.L. (Luxembourg), chairman of the supervisory board of Euronext Amsterdam N.V. (a subsidiary of Euronext), chairman of the investment committee of Verenigd Bezit (the Netherlands) and chairman of the board of Stichting Administratiekantoor Buhrmann N.V. (the Netherlands).

The Nominating and Governance Committee has considered Mr. van Tets' substantial experience as a leader of NYSE Euronext and its predecessor organizations, as well as his extensive experience in international business as a managing director and partner of an asset management company and chairman and director of a number of global companies. This diversity of professional experiences and significant knowledge of NYSE Euronext's worldwide business led the committee to conclude that Mr. van Tets would add a valuable perspective to Board discussions and should therefore serve on the Board of Directors.

Sir Brian Williamson. Sir Brian has served as a director of NYSE Euronext and its predecessors since April 2002. Sir Brian is also a director of NYSE Liffe U.S. Previously, he was chairman of LIFFE, from 1985 to 1988 and from 1998 to 2003 (after the acquisition of LIFFE by Euronext), member of court of the Bank of Ireland from 1990 to 1999, director of the Financial Services Authority (United Kingdom) from 1986 to 1998, member and chairman of the International Advisory Board of Nasdaq (U.S.) from 1995 to 1998, and governor-at-large of the National Association of Securities Dealers (United States) from 1995 to 1998. He was also chairman of Gerrard Group plc (United Kingdom) from 1989 to 1998, director of Templeton Emerging Markets Investment Trust plc (United Kingdom) from 2002 to 2003, director of Resolution plc (United Kingdom) from 2004 to 2008, director of Climate Exchange plc (United Kingdom) from 2007 to 2010, and chairman of Electra Private Equity plc (United Kingdom) from 2000 to 2010. Currently, Sir Brian is a director of MT Fund Management Ltd (United Kingdom), director of HSBC Holdings plc (United Kingdom), director of Politeia (United Kingdom), director of Live-Ex Limited (United Kingdom) and a trustee of the Winston Churchill Memorial Trust.

Sir Brian's exceptional experience in NYSE Euronext's industry and with its business, particularly his notable experience as a leader of NYSE Euronext and its predecessor organizations in Europe and with the financial services industry regulatory bodies in the United Kingdom and the United States, together with his extensive experience as a chairman and director of asset managers, investment companies and other public companies as well as his dedication to public service led the Nominating and Governance Committee to conclude that Sir Brian would add deep knowledge and understanding of NYSE Euronext's business and strategic objectives as well as the regulatory environment in which its exchange businesses operate to the NYSE Euronext Board and therefore should serve as a director of NYSE Euronext.

The business address of each of the members of NYSE Euronext's officers and directors is 11 Wall Street, New York, New York 10005, United States.

Compensation of Directors

Non-management directors of NYSE Euronext are compensated under its director compensation program, which is reviewed annually by the Nominating and Governance Committee and approved by the Board. The chairman, the deputy chairman and each of the other non-management members of the Board receives an annual fee of \$450,000, \$250,000 and \$150,000, respectively. These fees are paid 50% in cash and 50% in restricted stock units (which are referred to in this document as RSUs) granted under the NYSE Euronext Omnibus

Table of Contents

Incentive Plan, which are vested immediately upon grant. The cash portion generally is paid quarterly in arrears, and the RSUs generally are granted on the annual meeting date. The shares underlying the RSUs are delivered on a director's retirement, resignation or other termination (other than for cause), unless the director timely elects to receive the shares in five annual installments following such termination. Prior to the delivery of the shares, directors receive dividend equivalents on the RSUs in respect of any cash dividends that NYSE Euronext's shareholders receive.

The chairman of the Audit Committee receives an additional annual fee of \$25,000. The chairman of each of the Nominating and Governance Committee, the Technology Committee and the Human Resources and Compensation Committee, and each member of the Audit Committee, receives an additional annual fee of \$10,000. The chairman and deputy chairman of the Board, however, are not eligible for any such additional fees. All such additional annual fees are paid entirely in cash on the same quarterly schedule in arrears as the cash portion of the Board fee.

NYSE Euronext's non-management directors are reimbursed for their out-of-pocket travel expenses. In certain cases, as described below, NYSE Euronext's non-management directors who also serve as directors on the boards of NYSE Euronext's subsidiaries receive additional compensation for such service. NYSE Euronext generally provides NYSE Euronext's non-U.S. based directors with reimbursement for tax advice and preparation services primarily related to additional tax obligations resulting from their compensation as directors.

The following table contains compensation information about the fees and other compensation paid to the members of the NYSE Euronext Board of Directors in the fiscal year ended December 31, 2010.

Name	Fees Earned or Paid			Total
	in Cash	Stock Awards ⁽¹⁾	All Other Compensation ⁽²⁾	
	(in U.S. dollars)

Notes:

- (1) This column represents the aggregate grant date fair value of RSUs granted to the directors in 2010, computed in accordance with FASB ASC Topic 718. For further information on how NYSE Euronext accounts for stock-based compensation, please see Notes 2 and 10 to the consolidated financial statements included in this document.
- (2) This column includes dividend equivalents paid to directors on their RSUs as follows: Mr. Bergen (\$2,148), Ms. Brown (\$10,184), Mr. Carter (\$18,503), Ms. Cloherty (\$7,042), Sir George (\$9,347), Mr. Hefes (\$9,347), Mr. Hessels (\$28,040), Mr. Hoënn (\$1,800), Dr. Jackson (\$2,009), Mr. McFarland

Table of Contents

- (\$10,184), Mr. McNulty (\$25,028), Baron Peterbroeck (\$1,800), Dr. Rivlin (\$2,009), Mr. Salgado (\$9,347), Mr. Scott (\$2,793), Mr. Tai (\$2,148), Mr. Théodore (\$2,865), Mr. van Tets (\$9,347) and Sir Brian (\$9,347).
- (3) Mr. Scott joined the NYSE Euronext Board of Directors on February 4, 2010, and Messrs. Bergen and Tai joined the NYSE Euronext Board of Directors on April 29, 2010. Their compensation for 2010 was pro-rated accordingly.
 - (4) Fees Earned or Paid in Cash includes a fee of \$50,000 paid to Ms. Brown for her service on the board of directors of NYSE Regulation.
 - (5) Fees Earned or Paid in Cash includes a fee of \$15,000 paid to Mr. Carter for his service on the board of directors of NYSE Liffe U.S.
 - (6) Fees Earned or Paid in Cash includes a fee of \$9,975 paid to Mr. Hessels for his service on the supervisory board of Euronext Amsterdam N.V. This payment reflects the U.S. dollar equivalent of the amount paid in euros, based on \$1.33 per euro which was the average exchange rate for 2010.
 - (7) Fees Earned or Paid in Cash includes \$2,500 paid to Mr. Hoënn for his service as chairman of the Audit Committee. Fees Earned or Paid in Cash also includes \$38,570 paid to Mr. Hoënn for his service as vice chair of the Euronext supervisory board and chairman of the Euronext audit committee and includes payment for services in 2010 as a member of the Comité d'Orientation of Euronext Paris S.A. These payments reflect the U.S. dollar equivalent of the amounts paid in euros, based on \$1.33 per euro, which was the average exchange rate for 2010. Mr. Hoënn did not stand for re-election at the 2010 annual meeting, and his compensation for his service on the Board was pro-rated accordingly.
 - (8) Fees Earned or Paid in Cash for Dr. Jackson includes \$75,000 for her service as member and chairman of the NYSE Regulation board of directors. Dr. Jackson did not stand for re-election at the 2010 annual meeting, and her compensation for her service on the Board was pro-rated accordingly.
 - (9) Mr. McNulty joined the Human Resources and Compensation Committee as its chairman on April 29, 2010 and compensation for his service as chairman was pro-rated accordingly. Fees Earned or Paid in Cash for Mr. McNulty includes \$50,000 for his service as chairman of NYSE Liffe U.S. In addition, in 2010, NYSE Euronext paid \$483,169 in fees and expenses incurred by Mr. McNulty's legal advisers relating to the tax consequences of the premature delivery of shares prior to the applicable payment date, as described in NYSE Euronext's proxy statement for NYSE Euronext's 2010 annual meeting under *Section 16(a) Beneficial Ownership Reporting Compliance*.
 - (10) Baron Peterbroeck did not stand for re-election at the 2010 annual meeting, and his compensation for 2010 was pro-rated accordingly.
 - (11) Fees Earned or Paid in Cash for Ms. Rivlin includes \$2,500 for her service as chairman of the Nominating and Governance Committee. Ms. Rivlin did not stand for re-election at the 2010 annual meeting, and her compensation for 2010 was pro-rated accordingly.
 - (12) Mr. Théodore did not stand for re-election at the 2011 annual meeting.
 - (13) Fees Earned or Paid in Cash includes \$39,900 for Mr. van Tets' service as chairman of the Euronext supervisory board, \$5,320 for his service as a member of the Euronext audit committee and \$9,975 for his service as chairman of the supervisory board of Euronext Amsterdam N.V. These payments reflect the U.S. dollar equivalent of the amounts paid in euros, based on \$1.33 per euro which was the average exchange rate for 2010. All Other Compensation consists of the amounts described in footnote 2, \$10,487 as payment of VAT for payments in the Netherlands and \$1,000 paid in connection with tax advice and preparation services.
 - (14) Sir Brian stepped down as the chairman of the Human Resources and Compensation Committee on April 29, 2010, and the compensation for his service as chairman of the committee was pro-rated accordingly. All Other Compensation for Sir Brian includes the amounts described in footnote 2, \$2,327 as payment of VAT and \$1,000 paid in connection with tax advice and preparation services.

Table of Contents

The following table sets forth the number of outstanding RSUs held by each of NYSE Euronext's non-employee directors as of December 31, 2010. These RSUs are fully vested, but the shares underlying the RSUs have not yet been delivered.

Name	Number of RSUs Outstanding
André Bergen	2,387
Ellyn L. Brown	9,083
Marshall N. Carter	16,414
Patricia M. Cloherty	6,465
Sir George Cox	8,386
Sylvain Hefes	8,386
Jan-Michiel Hessels	25,157
Dominique Hoënn ⁽¹⁾	0
Shirley Ann Jackson ⁽¹⁾	0
Duncan M. McFarland	9,083
James J. McNulty ⁽³⁾	21,453
Baron Jean Peterbroeck ⁽¹⁾	0
Alice M. Rivlin ⁽¹⁾	0
Ricardo Salgado	8,386
Robert G. Scott	2,916
Jackson P. Tai	2,387
Jean-François Théodore ⁽²⁾	2,984
Rijnhard van Tets	8,386
Sir Brian Williamson	8,386

Notes:

- (1) Mr. Hoënn, Dr. Jackson, Baron Peterbroeck and Ms. Rivlin did not stand for re-election at the 2010 annual meeting.
- (2) Mr. Théodore did not stand for re-election at the 2011 annual meeting.
- (3) Includes 12,370 RSUs granted to Mr. McNulty for his service as a member of the Archipelago Holdings, Inc. board of directors prior to the Archipelago Holdings, Inc./ New York Stock Exchange, Inc. combination in 2006.

Compensation Discussion and Analysis

This Compensation Discussion and Analysis, or CD&A, describes the principles, policies and practices that informed NYSE Euronext's executive compensation program for 2010 and explains the application of these principles, policies and practices to six of NYSE Euronext's executive officers: NYSE Euronext's chief executive officer, NYSE Euronext's president and deputy chief executive officer, NYSE Euronext's chief financial officer and NYSE Euronext's three other most highly compensated executives. These six executives are named in the 2010 Summary Compensation Table that follows this CD&A, and NYSE Euronext refers to them as NYSE Euronext's named executives.

NYSE Euronext is complex and unique and has a global reach and these attributes influence its approach to executive compensation. NYSE Euronext's 2010 executive compensation program was designed to reward its named executives for their significant contributions to its success, including the achievement of the key initiatives described below. In 2010, NYSE Euronext continued to diversify its business model, focusing on new initiatives and growth areas to deliver value through all business cycles and further expand its business as a world-class technology solutions provider. NYSE Euronext embarked on several key initiatives to support its three segments of Derivatives, Cash Trading and Listing, and Information Services and Technology Solutions. In NYSE Euronext's Derivatives segment, its key initiatives in 2010 related to focusing on capturing market growth in the U.S. options market and the growth of its clearing operations, which NYSE Euronext expects will become an increasingly important part of its business. NYSE Euronext announced two new European clearing houses which are expected to be completed in 2012, subject to regulatory approval. In NYSE Euronext's Cash Trading and Listing segment, NYSE Euronext stabilized its market share in the U.S. and European cash markets and

Table of Contents

announced and began implementing its new European clearing strategy. NYSE Euronext also continued to develop its listing services and advocacy, including through acquisitions, increasing NYSE Euronext's share of the initial public offering market. NYSE Euronext's Information Services and Technology segment exhibited growth, and in 2010 NYSE Euronext launched two new world class data centers. During 2010, NYSE Euronext also strengthened its globally integrated and scalable universal trading platform and its unrivaled global connectivity network through the migration of several of its markets to the universal trading platform, which provides seamless, high-performance trading across asset classes and global geographies, and the establishment of strategic, long-term partnerships with other exchanges.

NYSE Euronext faces increasing competition from a variety of sources, as the methods by which capital markets can be formed and operated continue to expand, and as the services that these markets require proliferate. In particular, recent trends towards the liberalization and globalization of world capital markets have resulted in greater mobility of capital, greater international participation in local markets and more competition among markets in different geographical areas. As a result, global competition among listing venues, trading markets and other execution venues has become more intense. NYSE Euronext requires a dynamic, globally integrated, technologically skilled and entrepreneurial management team to accomplish its goals and remain competitive within its industry.

Executive Summary

Relationship between compensation and company performance

NYSE Euronext's compensation program for its named executives is designed to link the executives' compensation as closely as possible with NYSE Euronext's performance and thereby to align the executives' interests with those of its shareholders. NYSE Euronext attempted to achieve this in 2010 through the following core elements of its compensation program:

As described more fully below, NYSE Euronext adopted EBITDA, which it believes to be the best indicator of financial performance as it allows NYSE Euronext to focus on core operating profitability, as the financial measure to determine the size of the annual bonus pool that is used to fund the bonuses paid globally to its employees, including to its named executives;

NYSE Euronext continued to tie compensation to company and individual performance in 2010 through the use of variable compensation components; and

NYSE Euronext continued to award a significant portion of compensation in equity, which holds executives accountable for annual and longer-term company performance.

Despite the challenging market conditions in which NYSE Euronext continues to operate, its management team delivered the following results in 2010:

Reported year-over-year increases in net revenue (1%), operating income (4%), EBITDA (4.4%), total shareholder return (22.5%) and diluted earnings per share (2.5%) despite the negative impact of currency fluctuations and the challenging trading-volume environment in the second-half of 2010;

Continued to focus on new business initiatives to drive future growth;

Reduced fixed costs by \$113 million year-over-year after excluding the impact of foreign currency fluctuations, acquisitions and divestitures and new initiatives;

Significantly reduced capital expenditures from \$497 million in 2009 to \$305 million in 2010;

Edgar Filing: NYSE Euronext - Form 425

Reduced leverage ratio (total debt to EBITDA) year-over-year from 2.6 to 2.2;

Optimized the current business portfolio by divesting stakes in non-core companies and selling stakes in NYSE Liffe U.S., NYSE Euronext's U.S. futures platform;

Lowered NYSE Euronext's effective tax rate from 27.5% to 26.5%; and

A-303

Table of Contents

Achieved a stable outlook from S&P and Moody's.

Compensation actions taken in 2010

The following significant compensation actions taken in 2010 reward NYSE Euronext's named executives for their contributions to NYSE Euronext's financial performance in 2010 and the achievement of the key initiatives discussed above. These compensation actions were consistent with NYSE Euronext's compensation philosophy of tying its named executives' compensation to its performance:

Froze base salaries for all named executives for the third year in a row;

Implemented an annual performance bonus pool funded based on a specified percentage of EBITDA, thereby strengthening the link between NYSE Euronext's performance and the amounts of the annual bonus payments;

Subjected the annual bonus payments to a threshold and maximum payout. The threshold ensures that no payments are made if the minimum performance level is not achieved, and the maximum payout ensures that participants are not incentivized to take unnecessary or excessive risks;

Delivered half of NYSE Euronext's executives' annual performance bonuses, and their entire equity grants under the long-term incentive program (which is referred to in this document as the LTIP), in time-vesting RSU awards, thereby both tying a significant portion of compensation to NYSE Euronext's long-term performance and enhancing retention; and

Amended NYSE Euronext's equity-based compensation plans to authorize participants to receive dividend equivalents on certain stock-based awards, including RSUs, making the interests of its named executives and other plan participants consistent with those of its shareholders.

Objectives and Design of the Compensation Program

Guiding Principles

NYSE Euronext has designed its management compensation program to reflect the following guiding principles:

Build long-term value for shareholders by attracting, retaining and incentivizing talented executives with competitive compensation packages;

Maintain a strong ownership culture and align executive compensation with shareholder interests through direct participation in long-term stock performance;

Deliver compensation pursuant to a consistent global philosophy that emphasizes shared goals linked to company, business unit and individual performance, while remaining responsive to local market conditions;

Encourage and reward robust company and business unit performance with an annual bonus program that incorporates a strong pay for performance relationship, in particular, through the use of financial performance metrics (for 2010, EBITDA) to determine the size of the annual bonus pool used to fund annual bonus payments and through the consideration of qualitative and quantitative performance outcomes in determining individual bonus amounts;

Reward corporate, operating unit and individual factors that support NYSE Euronext's culture, such as individual excellence, integrity, innovation, customer focus, teamwork and emphasis on diversity; and

Promote transparency and accountability through the use of straightforward compensation components.

Elements of Executive Compensation

To implement NYSE Euronext's guiding principles, its executive compensation program for 2010 comprised three basic elements:

Base salary to attract and retain highly talented, dedicated and results-oriented executives;

A-304

Table of Contents

Annual performance bonus, the grant and ultimate value of which is strongly linked to company and individual performance and short- and long-term value for shareholders. The size of the bonus, which was granted in February 2011, was tied to NYSE Euronext's performance in 2010 utilizing EBITDA as NYSE Euronext's key financial measure to determine bonus pool funding and to the executive's performance through the application of discretion in consideration of the individual's contributions to the business. A significant portion of the bonus is paid in equity, which further ties the bonus to longer-term performance. This design fosters NYSE Euronext's pay-for-performance compensation philosophy, ensures focus on both short-term and long-term success of NYSE Euronext and strongly aligns the interests of its senior management team with those of its shareholders; and

Annual grants, made in February 2010, of long-term equity awards in the form of RSUs that cliff vest on the third anniversary of the grant date, to foster an ownership culture and to provide executives with a direct investment in the long-term success and growth of NYSE Euronext.

Each of these elements is discussed in detail below.

Compensation Process and Market Comparisons

Compensation Decision Process

Independence Considerations in Compensation Process

NYSE Euronext believes that the independence of each member of the NYSE Euronext Human Resources and Compensation Committee (which is referred to in this section as the HR&CC) is instrumental to the committee's ability to carry out its responsibilities, including determining the amount and structure of compensation paid to the named executives and administering NYSE Euronext's equity-based compensation plans. The independence of the HR&CC also reinforces the values of accountability and transparency in the compensation process.

To maintain the independence of NYSE Euronext's not-for-profit subsidiary, NYSE Regulation, the compensation of its executives is determined solely by its board of directors, and the executives of NYSE Regulation do not participate in certain of NYSE Euronext's general compensation programs, including its equity-based compensation plans. The HR&CC advises and assists the NYSE Regulation board at its request concerning executive compensation policies and procedures, and NYSE Euronext believes that the compensation philosophies of the HR&CC and the NYSE Regulation board are consistent. None of NYSE Euronext's current named executives is an executive of NYSE Regulation.

Role of CEO and Management in Determining Compensation

Executive compensation decisions are made within the HR&CC's discretion; however, to make these decisions the committee seeks input from management and guidance from its independent compensation consultant. None of NYSE Euronext's executives has any direct role in determining the amount of his or her compensation. NYSE Euronext's chief executive officer recommends compensation packages for NYSE Euronext's named executives, other than himself. His assessment of each executive is based on the executive's achievement of business or functional results (as appropriate) as well as the management team's collective achievement of strategic priorities. For a further discussion of each named executive's contribution, see *Annual Performance Bonus - Individual Bonus Amounts*.

Independence of Compensation Consultant and Role in Determining Compensation

The HR&CC has retained Towers Watson (formerly known as Watson Wyatt), an independent compensation consultant, to provide the committee with guidance and services relating to executive pay. Towers Watson provides various analyses, as directed by the committee, as well as recommendations regarding executive compensation philosophy and design, including the selection of the companies that comprise the peer groups that the HR&CC uses for market compensation data.

Table of Contents

Risk Assessment

Towers Watson conducted an assessment of the features of NYSE Euronext's executive and employee compensation programs to determine whether any material risks to NYSE Euronext could result from the design of any of these specific features. This review was undertaken independently under the purview of the HR&CC, although Towers Watson worked with members of management to gather compensation plans and review processes.

The HR&CC considered the findings of the assessment and concluded that NYSE Euronext's compensation programs are designed and administered with the appropriate balance of risk and reward in relation to its overall business and risk management strategy and do not create risks that are reasonably likely to have a material adverse effect on NYSE Euronext. In reaching this conclusion, the HR&CC considered the following attributes of the programs:

The balance between short- and long-term incentives and between fixed and variable compensation;

The consideration of the executive officers' collective accomplishments, each executive's individual achievements and, where applicable, the financial health of the executive's business unit, reduces both business and compensation risk by focusing NYSE Euronext's executives' attention on long-term growth strategies that ensure the health of NYSE Euronext's operations (for additional information on these factors see *Annual Performance Bonus – Individual Bonus Amounts*);

The HR&CC's assessment of the executives' performance takes into account these performance outcomes while appropriately applying discretion, thereby ensuring that the determination of compensation is based on objective financial performance criteria; and

Incentive compensation that is paid over an extended period and with a large component paid in full value equity awards with vesting conditions, the ultimate value of which is realized through long-term appreciation of shareholder value.

Peer Groups

Peer groups are used to provide the HR&CC with insights into the markets within which NYSE Euronext competes for executive talent. Results from studies of the peer groups guide, but do not dictate, the committee's decisions regarding pay level and design architecture. The committee believes that its approach of not targeting a specified pay percentile but rather allowing the relative level and design of the programs to inform pay decisions is appropriate given the global nature and diverse skills and experience of NYSE Euronext's management team.

Due to the evolving nature of NYSE Euronext, the HR&CC has examined two peer groups. To reflect NYSE Euronext's historical foundation as a traditional exchange business, the HR&CC constructed an exchange industry peer group consisting of exchange companies (which is referred to in this section as the Exchange Peer Group). NYSE Euronext is also entrepreneurial and innovative and committed to emerging as a world-class technology solutions provider, so the HR&CC also constructed a global peer group consisting of companies that similarly leverage technology and/or serve the financial services industry on a global basis (the Global Peer Group). The companies comprising each peer group are set forth below.

Annually, with the assistance of Towers Watson, the HR&CC reviews these peer groups and ensures their continued applicability. As a result of this review, in 2009, the HR&CC made significant changes to both peer groups. In 2010, there were no changes to the composition of either peer group. Additionally, with the assistance of Towers Watson, the HR&CC has developed an investment bank and private equity comparator group, which is referenced by the HR&CC from time to time when assessing specific attributes of NYSE Euronext's compensation program or for compensation design purposes.

Table of Contents

The Exchange Peer Group consists of publicly traded global marketplaces that are direct competitors of NYSE Euronext. The 2010 composition of the Exchange Peer Group is as follows:

ASX Limited	IntercontinentalExchange, Inc.
CME Group Inc.	London Stock Exchange Group plc
Deutsche Börse	Singapore Exchange Limited
Hong Kong Exchanges and Clearing Limited	The Nasdaq OMX Group, Inc.
ICAP plc	TMX Group Inc.
Interactive Brokers Group, Inc.	

The Global Peer Group consists of a blend of U.S. and non-U.S. domiciled companies that have a global reach in addition to having characteristics such as brand name recognition, regulatory compliance obligations and a technology-dependent business component. The 2010 composition of the Global Peer Group is as follows:

Accenture	ING Groep N.V.
AEGON N.V.	Oracle Corporation
Automatic Data Processing, Inc.	Prudential Financial, Inc.
Barclays PLC	SAP AG
BlackRock, Inc.	Société Générale Group
BNP Paribas	State Street Corporation
Fiserv, Inc.	The Progressive Corporation
Genworth Financial, Inc.	Visa Inc.

Pay Mix

NYSE Euronext believes that the mix of cash and equity awards should provide an appropriate balance between fixed and variable, cash and equity and short- and long-term pay elements. This practice holds executives accountable for annual and longer-term performance and mitigates risk taking by removing focus from short-term performance. Accordingly, while it does not target specified percentages, the HR&CC seeks to allocate a greater portion of compensation to variable and equity-based pay than it allocates to cash, particularly salary.

The HR&CC commissioned Towers Watson to conduct an analysis comparing the 2009 pay mix of NYSE Euronext's named executives against that of the Exchange Peer Group and the Global Peer Group. As summarized in the charts below, the analysis compared NYSE Euronext's named executives' 2009 base salaries, 2009 bonuses (paid in 2010) and February 2010 LTIP grants with the base salaries, cash bonuses and equity-based awards of the peers' named executives as disclosed in the peers' proxy statements filed in 2010. The first chart compares the pay mix of NYSE Euronext's chief executive officer with that of the chief executive officers of the peer groups, and the second chart compares the aggregate pay mix of NYSE Euronext's other named executives with that of the peers' other named executives. The analysis demonstrates that the relationship between the fixed and variable components of NYSE Euronext's compensation is generally consistent with that of its peers. In addition, NYSE Euronext's named executives received more of their compensation in the form of long-term equity-based compensation than did the peers' named executives. The HR&CC believes that compensating the named executives in this manner is a leading industry practice.

Table of Contents*Notes:*

- (1) For the CEO role, the analysis excludes Aegon N.V., BNP Paribas, ING Groep N.V. and Société Générale Group from the Global Peer Group and excludes Deutsche Börse, Hong Kong Exchanges and Clearing Limited and Interactive Brokers Group, Inc. from the Exchange Peer Group, as these companies did not grant short- or long-term incentive awards.
- (2) For the Other NEOs, named executives from the following companies (but not necessarily all named executives from each company) were excluded from the analysis, as these companies did not grant short- or long-term incentive awards: Aegon N.V., Barclays PLC, BNP Paribas, ING Groep N.V. and Société Générale Group from the Global Peer Group and Deutsche Börse, Hong Kong Exchanges and Clearing Limited and Interactive Brokers Group, Inc. from the Global Peer Group.

Elements of Compensation*Overview*

The principal elements of NYSE Euronext's compensation program are base salary, annual performance bonus (cash and equity components), equity grants in the form of RSUs under NYSE Euronext's LTIP, employee benefits, termination benefits and change in control protection.

Base Salary

NYSE Euronext establishes base salaries at levels that NYSE Euronext believes are commensurate with each named executive's title, position and experience, recognizing that each named executive is managing a component of a complex global company. The salary level for each title was developed taking into account historic salary practices, appropriate differentiation among titles, the desire to achieve a global compensation program with compensation processes that are consistent across geographic locations, and general views of competitive practice. For NYSE Euronext's chief executive officer, salary was set at \$1,000,000, and for its president and deputy chief executive officer, salary was set at \$675,000. Salaries for group executive vice presidents were set at \$750,000 or \$500,000. In each case, salaries are denominated in U.S. dollars or euros based on the executive's location, and the rates are designed to be roughly equivalent in light of prevailing exchange rates.

NYSE Euronext did not increase the salary level for any named executive in 2010 from 2009. The following table summarizes the annual salary levels for 2008, 2009 and 2010.

Annual Salary

Name	Year	Salary⁽¹⁾
Duncan L. Niederauer Chief Executive Officer	2010	\$ 1,000,000
	2009	1,000,000
	2008	1,000,000
Dominique Cerutti President and Deputy Chief Executive Officer	2010	675,000 ⁽²⁾
	2009	675,000 ⁽²⁾
Michael S. Geltzeiler Group Executive Vice President and Chief Financial Officer	2010	\$ 750,000
	2009	750,000
	2008	750,000
Lawrence E. Leibowitz Chief Operating Officer	2010	\$ 750,000
	2009	750,000
	2008	750,000
John K. Halvey Group Executive Vice President and General Counsel	2010	\$ 750,000
	2009	750,000
	2008	750,000
Roland Gaston-Bellegarde Group Executive Vice President and Head of European Execution	2010	500,004 ⁽²⁾
	2009	500,004 ⁽²⁾
	2008	500,004 ⁽²⁾

Table of Contents
Notes:

- (1) Amounts represent annual base salary rates and differ from certain of the salary amounts in the 2010 Summary Compensation Table, which vary depending on the named executive's length of service in a given year.
- (2) Amounts for Messrs. Cerutti and Gaston-Bellegarde are denominated in local currency. Between 2008 and 2010, there have been material fluctuations in exchange rates. For this reason, NYSE Euronext feels that presentation in euros better reflects these named executives' overall compensation. Expressed in U.S. dollars, Mr. Cerutti's annual base salary rate was \$897,750 and \$938,250 in 2010 and 2009, respectively, and Mr. Gaston-Bellegarde's annual base salary rate was \$665,005, \$695,006 and \$735,006 in 2010, 2009 and 2008, respectively. For 2010, 2009 and 2008, the applicable exchange rates were \$1.33, \$1.39 and \$1.47 per euro, respectively.

Annual Performance Bonus

The second principal element of NYSE Euronext's compensation system is an annual performance bonus program under which the named executives are eligible to earn annual bonuses paid half in cash and half in equity awards in the form of time-vesting RSUs. Both the cash and equity portions of the annual bonus incentivize the participants to attain short-term individual, business unit and company performance outcomes. The equity portion has the additional purpose of aligning the participants' incentives with the interests of NYSE Euronext's shareholders over a longer period.

The annual bonus pool, in the amount determined for each year, is used to fund the participants' bonuses for that year. The amount of the pool historically has been determined by the HR&CC after considering management's recommendation, in light of NYSE Euronext's performance and the economic climate. Due to a desire for a stronger link between NYSE Euronext's performance and the funding of the annual bonus pool, NYSE Euronext adopted a single financial measure, EBITDA, as described below, to determine bonus pool funding for 2010.

2010 Bonus Pool

The shift to using EBITDA as the metric for determining the amount of the annual bonus pool for 2010 strengthens the link between NYSE Euronext's performance and the funding of the pool by enhancing the objectivity of the compensation process and eliminating any undesired effects of financing, capital structure, tax strategies and depreciation and amortization policies on the amount of the pool and by focusing on NYSE Euronext's core operating profitability.

In 2010, NYSE Euronext calculated the EBITDA performance measure by adding certain charges and expenses, to the extent deducted from its revenues in determining its operating income, to the amount of its operating income, in each case as reported in its audited financial statements. These charges and expenses may include:

depreciation and amortization;

impairment charges on goodwill, other intangible assets, property and equipment, and other long-lived assets;

expenses incurred in connection with exiting activities (including costs of severance and termination benefits, costs to consolidate or relocate plant and office facilities, and other restructuring charges incurred in connection with the elimination or reduction of product lines);

expenses incurred in connection with business combinations, the creation of joint ventures or divestitures, including direct costs (e.g., banking, legal and accounting fees) and out-of-pocket or incremental costs directly associated with such activities;

Table of Contents

litigation settlements;

gains and losses that result from the adoption of new accounting principles; and

extraordinary, non-recurring or unusual gains and losses.

In February 2010, the HR&CC determined that for 2010 the amount of the global bonus pool, which funds the annual bonuses paid to all NYSE Euronext's eligible employees, should be calculated based on a specified percentage of EBITDA, as adjusted to reflect the outsourcing of certain regulatory functions to FINRA, which resulted in fewer participants in the pool. The amount of the global bonus pool was subject to an EBITDA threshold of \$836 million, such that no participant would have been eligible for any bonus for 2010 had EBITDA been less than such amount. If EBITDA had been at least \$836 million and less than \$1.015 billion, the amount of the global bonus pool would have equaled 10% of EBITDA. If EBITDA had been at least \$1.015 billion and less than \$1.373 billion, which was the case, the amount of the global bonus pool would have equaled 11% of EBITDA. If EBITDA had been at least \$1.373 billion, the amount of the bonus pool would have equaled 12% of EBITDA. No additional bonus pool funding would have resulted had EBITDA exceeded \$1.552 billion, which effectively capped the amount of the global bonus pool at \$186 million (i.e., 12% of \$1.552 billion). EBITDA for 2010 was \$1.114 billion which resulted in a pre-adjusted funding amount of \$122.5 million. This amount was adjusted, as described above, to arrive at the actual 2010 bonus pool of \$116.0 million, a portion of which was distributed to eligible employees in time-vesting RSUs (ranging from 0% to 50% based on the eligible employee's total compensation) and the remainder of which was distributed in cash. As described in more detail below, the amount of each named executive's 2010 bonus was determined by the HR&CC on a discretionary basis with input from Mr. Niederauer (except with respect to his own bonus) after considering the executive's contributions as indicated by the collective and individual accomplishments of the named executives.

Individual Bonus Amounts

Although the bonus pool is funded based on the formula described above, the distribution of that pool to individuals is discretionary. The following is a summary of the business-related outcomes that were considered when making individual bonus determinations for each named executive for 2010, including a discussion of the collective and individual accomplishments of the named executives. These amounts, along with the amounts of the named executives' bonuses for 2009 and 2008, as applicable, are set forth in the Annual Performance Bonus table at the end of this section.

A-310

Table of Contents

Mr. Niederauer. The Board of Directors concurred with the HR&CC's recommendation to award Mr. Niederauer an annual performance bonus based on the HR&CC's consideration of the following outcomes:

the general financial health of NYSE Euronext, including the year-over-year increase of 4.4% in EBITDA (the bonus funding mechanism), 22.5% in total shareholder return and 2.5% in earnings per share;

the collective and individual 2010 accomplishments of the members of the management committee (as discussed below);

Mr. Niederauer's relationship with the Board and the other members of the management team, including his ability to attract, retain and motivate talented executives; and

the overall leadership and strategic vision that Mr. Niederauer displayed throughout the year both within NYSE Euronext and to the market.

Other Named Executives. Mr. Niederauer recommended to the HR&CC, and the HR&CC approved, 2010 bonuses for the named executives other than himself. Although no formula was used to determine each executive's bonus, the HR&CC considered, and the amounts of these bonuses were influenced by, outcomes in 2010 categorized as:

the management committee members' collective accomplishments;

each executive's individual achievements, as determined through the use of qualitative performance guidelines; and

for each of Messrs. Cerutti, Leibowitz and Gaston-Bellegarde, as business unit heads, the general financial health of his business unit.

The following is a summary of the management committee's collective accomplishments that the HR&CC considered holistically in assessing team performance:

the general financial health of NYSE Euronext, based on the results discussed above for Mr. Niederauer's bonus;

fostering NYSE Euronext's culture of innovation, including through communications and recognizing and rewarding innovations; and

improving management leadership and client and employee relations.

The following is a summary of the executives' individual accomplishments that the HR&CC considered, together with this team performance, in assessing Mr. Niederauer's recommendation regarding each executive's bonus amount:

Mr. Cerutti. NYSE Technologies and Internal Technology delivered the following results:

Edgar Filing: NYSE Euronext - Form 425

managed the continued universal trading platform and data center migrations on time and under budget and remained on track with the global project plan;

grew business sector revenues;

validated and initiated NYSE Euronext's community strategy to capitalize on its technology assets, services and products; and

built momentum for outsourcing of trading infrastructures by NYSE Euronext's clients. Additionally, Mr. Cerutti maintained relationships with critical European policymakers.

Mr. Leibowitz. Global Listings, European Cash and United States Cash delivered the following results:

stabilized the core equities franchises in the U.S. and Europe in terms of market share and pricing;

A-311

Table of Contents

continued strong momentum in listings, including successfully building the IPO pipeline and winning transfers of prominent issuers from key competitor listing venues;

developed relations with important executives to complement NYSE Euronext's community strategy, foster its brand and build depth in client relationships; and

oversaw the outsourcing of certain regulatory functions to FINRA to help mitigate market fragmentation.

In addition, Mr. Leibowitz helped guide NYSE Euronext's market structure reform philosophy and shepherded significant U.S. regulatory and government relationships related to technology and market structure.

Mr. Geltzeiler. Global Finance delivered the following results:

launched new business segment reporting structure, and successfully communicated the change to shareholders and analysts;

improved the overall financial health of the organization by managing fixed expenses below the bottom end of the cost guidance, reduced NYSE Euronext's effective tax rate, reduced debt, solidified NYSE Euronext's credit ratings at A or above, and reduced finance management costs; and

in concert with others, implemented an investment review process and managed the execution of new business initiatives.

Mr. Halvey. Legal and Government Affairs delivered the following results:

implemented key policies and manuals, including a global IP policy and the trademark and copyright manual, and established the IP Rights Committee and policies regarding IP ownership and trademark maintenance;

managed complex global and local regulatory and government relationships; and

advised management and the Board on significant transactions, new business initiatives and ongoing critical client, issuer and other relationships.

Mr. Gaston-Bellegarde. Initiatives for European Cash, including for example:

successfully defended market share in regulated markets;

delivered the London Gateway regulatory framework and infrastructure;

participated in the creation of the new European clearing strategy, with a clearinghouse to open in Paris in 2012 for European cash equities; and

Edgar Filing: NYSE Euronext - Form 425

partnered with others to define important regulatory and market reform positions with respect to MiFID II.

A-312

Table of Contents

The following table summarizes the annual performance bonuses awarded to NYSE Euronext's named executives for 2010, 2009 and 2008, as applicable. Due to SEC reporting rules, the portion reported in the Equity Component column appears in the Summary Compensation Table for the year following the year for which it was earned.

Annual Performance Bonus

Name	Year	Cash Component	Equity Component ⁽¹⁾	Total
Duncan L. Niederauer Chief Executive Officer	2010	\$ 2,375,000	\$ 2,375,000	\$ 4,750,000
	2009	2,125,000	2,125,000	4,250,000
	2008	2,000,000	2,000,000	4,000,000
Dominique Cerutti ⁽²⁾ President and Deputy Chief Executive Officer	2010	639,098	639,098	1,278,196
	2009	25,000	25,000	50,000
Michael S. Geltzeiler Group Executive Vice President and Chief Financial Officer	2010	\$ 550,000	\$ 550,000	\$ 1,100,000
	2009	450,000	450,000	900,000
	2008	375,000	375,000	750,000
Lawrence E. Leibowitz Chief Operating Officer	2010	\$ 1,000,000	\$ 1,000,000	\$ 2,000,000
	2009	925,000	925,000	1,850,000
	2008	875,000	875,000	1,750,000
John K. Halvey Group Executive Vice President and General Counsel	2010	\$ 1,000,000	\$ 1,000,000	\$ 2,000,000
	2009	925,000	925,000	1,850,000
	2008	875,000	875,000	1,750,000
Roland Gaston-Bellegarde ⁽²⁾ Group Executive Vice President and Head of European Execution	2010	270,677	270,677	541,354
	2009	300,000	300,000	600,000
	2008	350,000	350,000	700,000

Notes:

- (1) Amounts reflect the aggregate grant date fair values of these awards. For further information on how NYSE Euronext accounts for stock-based compensation, please see Notes 2 and 10 to the consolidated financial statements included in this document.
- (2) Amounts for Messrs. Cerutti and Gaston-Bellegarde are denominated in the local currency, the euro. Expressed in U.S. dollars, Mr. Cerutti received \$1,700,000 and \$69,500 for 2010 and 2009, respectively, and Mr. Gaston-Bellegarde received \$720,000, \$834,000 and \$1,029,000 for 2010, 2009 and 2008, respectively. For 2010, 2009 and 2008, the applicable exchange rates were \$1.33, \$1.39 and \$1.47 per euro, respectively.

Form of 2010 Annual Bonus

Each year, the HR&CC evaluates the form of the annual performance bonuses awarded to the named executives and other participants in the bonus program, including how the awards will be allocated between cash and equity. Both the cash and equity portions of the bonuses are awarded in February of the year following the year for which the bonuses are earned.

For 2010, as for 2009, NYSE Euronext awarded half of each named executive's annual performance bonus in cash and the other half in time-vesting RSUs granted under NYSE Euronext's Omnibus Incentive Plan. NYSE Euronext believes that this mix of cash and equity awards appropriately balances the short- and long-term performance objectives of the named executives. The grant of RSUs is consistent with NYSE Euronext's goals of aligning the long-term interests of senior executives and stockholders and fostering executive retention, whereas the cash portion appropriately recognizes the executives' current achievements.

Table of Contents

The RSUs for 2010 will vest, and the common stock covered by the RSUs will be distributed, in equal installments on the first, second and third anniversaries of the grant date (subject to accelerated vesting on attaining retirement eligibility status and accelerated vesting and distribution on specified terminations of employment or a change in control). This ratable vesting and distribution schedule is consistent with NYSE Euronext's prior practice and also distinguishes the equity portion of the annual bonus from the RSUs granted under NYSE Euronext's LTIP, which are scheduled to fully vest and be distributed on the third anniversary of the grant date (see Elements of Compensation Long-Term Incentive Program below).

The HR&CC granted the RSUs earned for 2010 under the annual bonus program effective February 8, 2011 in a specified U.S. dollar amount. Consistent with historical practice, after NYSE Euronext's February HR&CC meeting, NYSE Euronext released its 2010 fourth quarter and year-end preliminary earnings results before the opening of trading on February 8, 2011, and the numbers of NYSE Euronext shares underlying the RSUs were calculated based on the closing price of the stock on February 7, 2011 (\$33.76).

The delivery of the annual bonus through cash and equity ensures that NYSE Euronext's named executives' focus is properly balanced between the short- and long-term, and is an industry leading practice. Based on studies that NYSE Euronext has reviewed, NYSE Euronext believes that a higher portion of its annual bonus is delivered in equity when compared to its peer groups. The table below reports the results of a competitive analysis conducted for the HR&CC by Towers Watson. It uses information gathered from 2010 proxy statements for NYSE Euronext's two peer groups (see Compensation Process and Market Comparisons Peer Groups) to assess the degree to which NYSE Euronext's peers defer executives' annual bonuses in this manner. As reported, only three of the 27 peers across the two peer groups (one of 16 in the Global Peer Group and two of 11 in the Exchange Peer Group) pay part of the bonus in equity. Further, only one of these three other companies reporting such a practice pays as much of the annual bonus in equity.

Peers Who Use Equity as a Component of Bonus

Peer Group	Number of Companies	Chief Executive Officer* (%)		Other Named Executives* (%)	
		Cash	Equity	Cash	Equity
Global Peer Group⁽¹⁾					
BlackRock, Inc.	1	53	47	63	37
All other Global Peer Group companies	15	100	0	100	0
Total Global Peer Group	16				
Exchange Peer Group⁽²⁾					
ICAP Plc	1	50	50	50	50
Deutsche Börse	1	67	33	67	33
All other Exchange Peer Group companies	9	100	0	100	0
Total Exchange Peer Group	11				
NYSE Euronext		50	50	50	50

Notes:

* Based on 2009 total direct compensation as disclosed in 2010 proxy statements.

- (1) There are 16 peer companies in NYSE Euronext's Global Peer Group. Only one (BlackRock, Inc.) delivered equity as part of its named executives' bonus compensation. The remaining 15 companies delivered 100% of the bonus in cash.
- (2) There are 11 peer companies in NYSE Euronext's Exchange Peer Group. Two (ICAP Plc and Deutsche Börse) delivered equity as a component of bonus. The remaining nine companies delivered 100% of the bonus in cash.

Table of Contents
Long-Term Incentive Program*Introduction*

NYSE Euronext's third primary compensation component is the LTIP. The program currently consists of annual grants of equity awards under NYSE Euronext's Omnibus Incentive Plan that nurture an ownership culture and enable NYSE Euronext's executives to hold a stake in NYSE Euronext and participate in its long-term success. As these grants are intended to enhance NYSE Euronext's ability to retain its executives, to recognize talent and to reward executives for future firm-wide performance, NYSE Euronext considers them to be prospective grants. This contrasts with the equity component of the annual performance bonus award, which reflects performance during the most recently completed fiscal year.

Long-Term Incentive Grants Made in 2010

On February 10, 2010, each named executive and other participant in the LTIP received an RSU award under the program as part of the executive's compensation for 2010. The initial value of each award was determined based on the executive's level and scope of responsibility; the HR&CC also reviewed and considered the results of the annual survey of the peers' compensation which, as described above, guide but do not dictate compensation decisions. Award levels for grants made in February 2010 were set at \$1,500,000 for Mr. Niederauer, \$1,750,000 for Mr. Cerutti (per his employment contract), \$1,250,000 for Mr. Leibowitz, \$1,000,000 for Mr. Halvey, \$1,000,000 for Mr. Geitzeiler, and \$700,000 for Mr. Gaston-Bellegarde. The amounts of these grants generally were lower than the amounts of the 2009 grants, which allowed for additional 2010 LTIP awards to NYSE Euronext's other employees. Amounts are denominated in U.S. dollars for consistency. These U.S. dollar amounts were converted into the number of NYSE Euronext shares covered by the awards based on the closing price of a share on February 9, 2010 (\$23.65).

For 2010, as for 2009, the HR&CC determined that it was appropriate to award service-vesting RSUs under the LTIP that vest on the third anniversary of the date of grant. Because the grant date value of each year's award varies, and because the ultimate value of the award is tied to NYSE Euronext's share price, the HR&CC believes that the time-vesting feature best balances the retention and performance aspects of these awards.

Long-Term Incentive Grants Made in 2011

On February 8, 2011, each named executive and other participant in the LTIP received an RSU award under the program as part of the executive's compensation for 2011. The initial value of each award was determined based on the same performance and accomplishments described above for the executive's 2010 bonus as well as consideration of each executive's potential for future contributions and local market considerations. These awards contained the same vesting terms as described above for the RSUs awarded under the program in 2010. The number of NYSE Euronext shares covered by each of the awards was calculated based on the closing price of a share on February 7, 2011 (\$33.76). As described above for the 2010 bonus RSUs, these RSUs were granted following NYSE Euronext's release of 2010 fourth quarter and year-end preliminary earnings results.

Summary of Compensation Awarded to NYSE Euronext's Named Executives

The following table summarizes the compensation awarded to NYSE Euronext's named executives for 2010, and where applicable, 2009 and 2008. This table includes for each year (1) the base salary payable for that year, (2) the annual bonus that was earned for each year (paid partly in cash and partly in RSUs, in each case in February following the year for which the annual bonus was earned) and (3) the LTIP award that was granted in February of that year. The values in this table differ from those shown in the Summary Compensation Table below because, under the SEC disclosure rules, in the Summary Compensation Table the values of the RSUs granted as part of the annual bonus are reported in the year of grant rather than the year for which the RSUs were earned. For example, the 2010 bonus awards in this table include the RSUs granted in February 2011 as part of each executive's annual bonus award made in respect of 2010 performance, whereas the Summary Compensation Table includes for 2010 the RSUs granted in 2010 as part of the annual bonus awards made in respect of 2009 performance.

Table of Contents

NYSE Euronext is providing this alternative table because NYSE Euronext believes that it more accurately reflects the compensation decisions taken by the HR&CC for these years.

Name and Principal Position	Attributable Year	Annual Base Salary ⁽¹⁾	Bonus Awards ⁽²⁾	LTIP Award ⁽³⁾	Total ⁽⁴⁾
Duncan L. Niederauer Chief Executive Officer	2010	\$ 1,000,000	\$ 4,750,000	\$ 1,500,000	\$ 7,250,000
	2009	1,000,000	4,250,000	2,000,000	7,250,000
	2008	1,000,000	4,000,000	4,000,000	9,000,000
Dominique Cerutti ⁽⁵⁾⁽⁶⁾ President and Deputy Chief Executive Officer	2010	675,000	1,278,196	\$ 1,750,000	3,268,985
	2009	675,000	50,000	0	725,000
Michael S. Geltzeiler Group Executive Vice President and Chief Financial Officer	2010	\$ 750,000	\$ 1,100,000	\$ 1,000,000	\$ 2,850,000
	2009	750,000	900,000	1,250,000	2,900,000
	2008	750,000	750,000	2,500,000	4,000,000
Lawrence E. Leibowitz Chief Operating Officer	2010	\$ 750,000	\$ 2,000,000	\$ 1,250,000	\$ 4,000,000
	2009	750,000	1,850,000	1,500,000	4,100,000
	2008	750,000	1,750,000	2,800,000	5,300,000
John K. Halvey Group Executive Vice President and General Counsel	2010	\$ 750,000	\$ 2,000,000	\$ 1,000,000	\$ 3,750,000
	2009	750,000	1,850,000	1,250,000	3,850,000
	2008	750,000	1,750,000	2,500,000	5,000,000
Roland Gaston-Bellegarde ⁽⁵⁾ Group Executive Vice President and Head of European Execution	2010	500,004	541,354	\$ 700,000	1,567,674
	2009	500,004	600,000	1,250,000	1,999,285
	2008	500,004	700,000	2,400,000	2,832,657

Notes:

- (1) Amounts represent annual base salary rates and in certain cases differ from the corresponding amounts in the Summary Compensation Table, which vary depending on the named executive's length of service in a given year.
- (2) Amounts include the cash and equity components of the annual performance bonus.
- (3) LTIP awards are granted in U.S. dollars and converted into a number of NYSE Euronext shares based on the closing price of a share on the day prior to the grant date.
- (4) Amounts for Messrs. Cerutti and Gaston-Bellegarde include the value of the LTIP award in euros.
- (5) Amounts for Messrs. Cerutti and Gaston-Bellegarde are denominated in the local currency, the euro. Between 2008 and 2010, there were material fluctuations in exchange rates. For this reason, NYSE Euronext feels that presentation in the local currency better reflects overall compensation.
- (6) Actual salary paid in 2009 was pro-rated, as Mr. Cerutti was hired in December 2009.

Other Compensation Elements*Employee Benefits*

NYSE Euronext maintains the following employee benefit and perquisite programs for its named executives.

Welfare Benefits. NYSE Euronext has broad-based health, dental, vision, life and disability benefit programs. NYSE Euronext does not provide any welfare benefits exclusively to executives.

Retirement Benefits. For named executives based in the United States, Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey, NYSE Euronext provides retirement benefits through a tax-qualified 401(k) retirement savings plan and a non-qualified arrangement, the Supplemental Executive Savings Plan (which is referred to in this section as the "SESP"), for contributions above 401(k) limits imposed under the Internal Revenue Code.

A-316

Table of Contents

Prior to January 1, 2010, NYSE Euronext provided employer matching of executives' contributions to the SESP on a dollar-for-dollar basis up to 6% of base salary in excess of \$245,000 (for 2009). Effective January 1, 2010, however, NYSE Euronext eliminated this employer match, which resulted in a significant reduction in the executives' total compensation.

Perquisites. Consistent with industry and local practice and to facilitate efficient conduct of business and promote the safety of NYSE Euronext's named executives, NYSE Euronext provides them with certain perquisites. These perquisites are in a form and amount that are typical in NYSE Euronext's industry and the principal countries in which it operates. The HR&CC reviews these perquisites on a regular basis.

NYSE Euronext provides Mr. Niederauer with a company car and trained security driver and each of Messrs. Cerutti and Gaston-Bellegarde with a company car. This convenience is provided primarily for business purposes and commuting. With limited exceptions, the named executives do not reimburse NYSE Euronext for the cost of their personal use of these services. NYSE Euronext provides Messrs. Leibowitz, Geltzeiler and Halvey with paid parking facilities. Although NYSE Euronext provides these benefits to enhance the security and efficiency of its key executives, SEC rules require that costs of personal use be disclosed as compensation to the executives.

Termination and Change in Control Arrangements

NYSE Euronext has entered into employment agreements with Messrs. Niederauer, Leibowitz, Geltzeiler, Halvey and Cerutti that provide termination benefits and change in control protection. In addition, under the terms of each of the RSU award agreements of Messrs. Niederauer, Cerutti, Leibowitz, Geltzeiler and Halvey, the awards fully vest, and the shares underlying the awards are distributed, on a change in control or on termination of his employment due to his death or disability, by NYSE Euronext without cause or by the executive for good reason or in a qualifying retirement at or after a specified age. The awards held by Mr. Gaston-Bellegarde generally vest and are distributed under the same circumstances as the awards described above, with the exception of his 2009 LTIP RSUs which vest and are distributed on a pro-rated basis on termination of his employment due to his death or disability or by NYSE Euronext without cause or due to a reduction in force. See 2010 Compensation Potential Payments on Termination and Change in Control below.

NYSE Euronext believes that termination benefits are appropriate to attract and retain executive talent, to avoid costly and potentially protracted separation negotiations and to protect its named executives' investment in NYSE Euronext. In addition, such benefits are customary in the jurisdictions in which NYSE Euronext does business and in which its named executives reside. NYSE Euronext's change in control protection is intended to provide management stability and reduce any reluctance on the part of the named executives to pursue and negotiate potential transactions that may enhance stockholder value, despite the uncertainty of whether the culmination of such transactions may result in the executives' employment being terminated or their positions being substantially reduced.

Clawbacks

NYSE Euronext would seek to recover, under the relevant provisions of the Sarbanes-Oxley Act, previously awarded bonuses or equity-based compensation or profits in the event of a restatement of financial or other performance results. NYSE Euronext will establish a policy to provide for the forfeiture or recovery of performance-based compensation in the event of such a restatement (*i.e.*, a clawback), as the rules mandated by the Dodd-Frank Act are defined.

Other Factors Affecting 2010 Compensation

Deductibility

Section 162(m) of the Internal Revenue Code generally limits the federal income tax deduction for compensation paid to each of the chief executive officer and the three other most highly compensated executive

Table of Contents

officers (other than the chief financial officer) of a publicly held corporation to \$1 million per fiscal year, with exceptions for certain performance-based compensation. Although NYSE Euronext considers deductibility under Section 162(m) when structuring its compensation arrangements for its named executives, depending upon the relevant circumstances at the time, the HR&CC may determine to award compensation that may not be deductible. In making this determination, the HR&CC balances the purposes and needs of NYSE Euronext's executive compensation program against potential tax cost.

In accordance with the terms of the NYSE Euronext Omnibus Incentive Plan, the HR&CC established performance goals for 2010 in a manner intended to ensure that the compensation paid to NYSE Euronext's named executives would not be subject to deductibility limits under Section 162(m). At its February 2010 meeting, the HR&CC determined that for 2010 Mr. Niederauer and Mr. Cerutti each was eligible for a maximum annual performance bonus of 1% of EBITDA (as previously defined); and that the other named executives subject to the limits were each eligible for a maximum annual performance bonus equal to 0.6% of EBITDA. The amounts of the annual performance bonuses paid to NYSE Euronext's named executives for 2010 were below these maximum amounts.

Note Regarding Equity Grant Calculations

The equity portions of the named executives' 2010 annual performance awards were granted at the HR&CC's February 2011 meeting. Because these awards were granted in 2011, they do not appear in the 2010 Summary Compensation Table that follows this CD&A. The equity portion of the 2010 annual performance awards will first appear in the 2011 line of next year's Summary Compensation Table.

Subsequent Events

Stock Ownership Guidelines

At its meeting in February 2011, the HR&CC adopted a Stock Ownership Guideline that requires NYSE Euronext's chief executive officer to maintain ownership of NYSE Euronext shares in an amount that is at least equal to three times his base salary. This policy is effective immediately. Mr. Niederauer currently exceeds this standard.

Entry into a Business Combination Agreement

On February 15, 2011, NYSE Euronext announced that it entered into a business combination agreement with Deutsche Börse. Following the closing of the transactions contemplated by the agreement, the former Deutsche Börse shareholders would own approximately 60% of the combined group and the former NYSE Euronext shareholders would own approximately 40% of the combined group on a fully diluted basis and assuming that all Deutsche Börse shares are tendered in the contemplated exchange offer.

As described above under "Termination and Change in Control Arrangements" and below under "2010 Compensation Potential Payments on Termination and Change in Control," the RSU awards held by NYSE Euronext's named executives (other than the 2009 LTIP RSU award held by Mr. Gaston-Bellegarde) provide for full vesting on a change in control, and the closing of the contemplated transactions would constitute a change in control for purposes of these awards. The business combination agreement generally provides for the full vesting on the closing of the contemplated transactions of all outstanding RSU awards that would not fully vest on a change in control under their terms, including Mr. Gaston-Bellegarde's 2009 LTIP award.

Conclusion

As described in this CD&A, NYSE Euronext's compensation philosophy and the policies and practices that support it are designed to retain its talented management team and incentivize them to create shareholder value. To achieve these objectives, compensation is directly linked to the achievement of corporate operational and

Table of Contents

strategic performance outcomes and the value of NYSE Euronext's stock, and is balanced between performance- and service-based awards. The HR&CC believes that the executive compensation actions that it took in 2010 support NYSE Euronext's compensation philosophy, implemented NYSE Euronext's compensation policies effectively, were competitive within the overall market for talent, and were appropriate considering NYSE Euronext's performance.

2010 Compensation

The following tables contain information about the compensation that NYSE Euronext provided to its chief executive officer, president and deputy chief executive officer, chief financial officer and three other most highly compensated executive officers in 2010.

2010 Summary Compensation Table

Name and Principal Position	Year ⁽¹⁾	Salary ⁽²⁾	Bonus	Stock Awards ⁽³⁾ (in U.S. dollars)	All Other Compensation ⁽⁴⁾	Total
Duncan L. Niederauer Chief Executive Officer	2010	1,000,000	2,375,000	3,625,001	58,039	7,058,040
	2009	1,000,000	2,125,000	3,999,980	148,943	7,273,923
	2008	1,000,000	2,000,000	5,999,935	175,792	9,175,727
Dominique Cerutti ⁽⁵⁾ President and Deputy Chief Executive Officer	2010	897,750	850,000	1,785,007	54,926	3,587,683
	2009	46,911	34,750	570,303	2,760	654,724
Michael S. Geltzeiler Group Executive Vice President and Chief Financial Officer	2010	750,000	550,000	1,449,982	38,018	2,788,000
	2009	750,000	450,000	1,624,994	53,450	2,878,444
	2008	389,423	375,000	2,499,978	14,060	3,278,461
Lawrence E. Leibowitz Chief Operating Officer	2010	750,000	1,000,000	2,174,996	34,317	3,959,313
	2009	750,000	925,000	2,375,009	87,265	4,137,274
John K. Halvey Group Executive Vice President and General Counsel	2010	750,000	1,000,000	1,924,992	35,654	3,710,646
	2009	750,000	925,000	2,124,997	62,780	3,862,777
	2008	605,769	875,000	4,507,907	72,161	6,060,837

	2009	695,006	417,000	1,707,036	196,450	3,015,492

Notes:

- (1) Mr. Cerutti joined NYSE Euronext on December 15, 2009 and was approved as deputy chief executive officer and head of Global Technology on December 31, 2009. Messrs. Geltzeiler and Halvey joined NYSE Euronext on June 16, 2008 and March 3, 2008, respectively.
- (2) For partial years of employment, this column represents the pro rata amount of salary earned for the year.
- (3) This column represents the aggregate grant date fair value, computed in accordance with FASB ASC Topic 718, of RSUs granted by NYSE Euronext in 2008, 2009 and 2010. The actual value realized by each named executive for stock awards is a function of the value of stock underlying such awards on the date such stock is delivered. For further information on how NYSE Euronext accounts for stock-based compensation, please see Notes 2 and 10 to the consolidated financial statements included in NYSE Euronext's 2010 Annual Report on Form 10-K. NYSE Euronext granted RSUs as part of the 2010 annual incentive bonus awarded to each named executive. However, because these grants were not made until after the end of 2010, they are not reflected in this column in accordance with SEC rules. These RSU grants are described in the Annual Performance Bonus section of the Compensation Discussion and Analysis that precedes this table.

Table of Contents

- (4) This column includes the incremental cost of perquisites, NYSE Euronext contributions to defined contribution retirement plans (including matching contributions and retirement accumulation contributions under NYSE Group's 401(k) savings plans), company contributions to a profit sharing plan and life insurance premiums paid by NYSE Euronext. The 2010 All Other Compensation table that follows provides additional detail regarding the amounts in this column.
- (5) For Messrs. Cerutti and Gaston-Bellegarde, this table represents the U.S. dollar equivalent of amounts earned in euros. For 2010, 2009 and 2008, the applicable exchange rates were \$1.33, \$1.39 and \$1.47 per euro, respectively.

Detail Regarding Perquisites, Benefits and All Other Compensation

The following table details the incremental cost of perquisites received by each of the named executives, as well as the other elements of compensation listed in the All Other Compensation column of the 2010 Summary Compensation Table, for 2010. The incremental cost of personal use of automobiles and drivers represents the portion of the full cost to NYSE Euronext that reflects personal use. Although NYSE Euronext provides these benefits to enhance the security and efficiency of Mr. Niederauer, SEC rules require that costs of commuting and other uses not directly and integrally related to its business be disclosed as compensation to the executive.

2010 All Other Compensation

Name	Perquisites	Retirement	Life	Other	Total
		Plan	Insurance		
		Contributions	(in U.S. dollars)		
Duncan L. Niederauer	28,511 ⁽²⁾	26,528 ⁽³⁾	3,000		58,039
Dominique Cerutti ⁽¹⁾			6,320	48,606 ⁽⁴⁾	54,926
Michael S. Geltzeiler		26,528 ⁽³⁾	2,250	9,240 ⁽⁵⁾	38,018
Lawrence E. Leibowitz		26,667 ⁽³⁾	2,250	5,400 ⁽⁵⁾	34,317
John K. Halvey		26,528 ⁽³⁾	2,250	6,876 ⁽⁵⁾	35,654
Roland Gaston-Bellegarde ⁽¹⁾			6,284	218,716 ⁽⁶⁾	225,000

Notes:

- (1) For Messrs. Cerutti and Gaston-Bellegarde, the amounts in this table represent the U.S. dollar equivalent of amounts earned in euros, based on \$1.33 per euro which was the average exchange rate for 2010.
- (2) Represents pro-rated personal use of 8.5% of a company-provided car and driver.
- (3) Represents company contributions to the executive's account under NYSE Euronext's 401(k) plan.
- (4) Represents private medical coverage premiums and contributions to a personal defined contribution scheme in lieu of pension benefits.
- (5) Represents cost of parking facilities.
- (6) Represents private medical coverage premiums, company contributions to a personal defined contribution scheme in lieu of pension benefits and overtime earned.

Notes:

(1) None of the awards granted in 2010 was subject to any performance-based condition.

Named Executives Employment Agreements and Equity Awards

NYSE Euronext has entered into employment agreements with Messrs. Niederauer, Leibowitz, Geltzeiler, Halvey and Cerutti that provide for the payment of base salaries, annual performance bonuses, long-term incentive awards and perquisites to the executives. The agreements also contain restrictions against competing and soliciting NYSE Euronext's employees and customers that apply during the executives' employment and for one year after termination of their employment.

Base Salary

The employment agreements with Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey provide that their salaries are to be determined by the HR&CC and can be no less than \$1,000,000, \$750,000, \$750,000 and \$750,000, respectively. Mr. Cerutti's employment agreement provides for an initial base salary of \$675,000.

Annual Performance Bonus Awards

Under the terms of their employment agreements, Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey are eligible for annual bonuses at the discretion of the HR&CC, paid in any combination of cash and equity. On termination of the executive's employment by NYSE Euronext without cause, by the executive for good reason or due to the executive's death or disability (for the definitions of such terms, see Potential Payments on Termination and Change in Control below), the executive would be entitled to an annual bonus for the year of such termination in an amount based on the HR&CC's determination of the achievement of the applicable performance metrics for such year, pro-rated to reflect the portion of such year that the executive was employed and paid at the time annual bonuses are paid by NYSE Euronext.

Table of Contents

Mr. Cerutti is eligible for an annual bonus at the discretion of the HR&CC, paid half in cash and half in RSUs. The annual maximum amount of Mr. Cerutti's annual bonus will be determined each year by NYSE Euronext.

Effective February 10, 2010, the HR&CC granted RSU awards to each of the named executives under the NYSE Euronext Omnibus Incentive Plan as part of the 2009 annual performance bonus. Although these awards correspond to the 2009 annual performance bonus, they appear in the above table because they were granted in 2010 (once the financial results for 2009 and annual performance awards had been determined). The RSUs are scheduled to vest, and the underlying shares are scheduled to be delivered, in substantially equal installments on each February 10 of 2011, 2012 and 2013. See "Compensation Discussion and Analysis" for a discussion of these award amounts.

Awards of RSUs granted as part of the 2010 annual performance bonus were granted in 2011 (once the financial results for 2010 and annual performance awards had been determined) and therefore will appear in the Grants of Plan-Based Awards table for 2011.

Long Term Incentive Awards

Effective February 10, 2010, the HR&CC granted an additional annual award of RSUs pursuant to the LTIP to each of the named executives, in the amounts set forth in the table above. The RSUs were issued under and are governed by the NYSE Euronext Omnibus Incentive Plan. The RSUs are scheduled to vest, and the underlying shares are scheduled to be delivered, in their entirety on February 10, 2013.

Perquisites

Messrs. Niederauer and Cerutti's employment agreements provide for their use of a car and driver to be provided by NYSE Euronext, provided that Mr. Cerutti's use of a driver, if any, is to be for business purposes only. Mr. Cerutti is currently provided with the use of a car but does not have a driver. Pursuant to their employment agreements, NYSE Euronext provides Messrs. Leibowitz, Geltzeiler and Halvey with paid parking facilities.

Termination of Employment

The employment agreements of Messrs. Niederauer, Leibowitz, Geltzeiler, Halvey and Cerutti provide for severance payments and acceleration of equity award vesting on specified terminations of employment. In addition, the RSU awards held by NYSE Euronext's named executives provide for accelerated vesting of the RSUs on a change in control (other than the 2009 LTIP award held by Mr. Gaston-Bellegarde). See "Potential Payments on Termination and Change in Control" below.

Outstanding Equity Awards at December 31, 2010

Name	Stock Awards

Table of Contents*Notes:*

- (1) Represents 9,386 RSUs (\$281,392) granted to Mr. Niederauer as an annual bonus for 2007, 58,918 RSUs (\$1,766,362) granted under the LTIP in 2008 at two times the annual target level, 61,415 RSUs (\$1,841,222) granted as an annual bonus for 2008, 92,123 RSUs (\$2,761,848) granted under the LTIP in 2009, 89,852 RSUs (\$2,693,763) granted as an annual bonus for 2009 and 63,425 RSUs (\$1,901,482) granted under the LTIP in 2010. The annual bonus RSUs vest ratably over a period of three years from the date of grant. The LTIP RSUs vest fully three years from the date of grant.
- (2) Represents 14,708 RSUs (\$440,946) granted to Mr. Cerutti as a sign-on equity award in 2009, 1,480 RSUs (\$44,370) granted as an annual bonus for 2009 and 73,996 RSUs (\$2,218,400) granted under the LTIP in 2010. The sign-on and annual bonus RSUs vest ratably over a period of three years from the date of grant. The LTIP RSUs vest fully three years from the date of grant.
- (3) Represents 44,547 RSUs (\$1,335,519) granted to Mr. Geltzeiler under the LTIP pursuant to his employment agreement, 11,515 RSUs (\$345,220) granted as an annual bonus for 2008, 57,577 RSUs (\$1,726,158) granted under the LTIP in 2009, 19,027 RSUs (\$570,429) granted as an annual bonus for 2009 and 42,283 RSUs (\$1,267,644) granted under the LTIP in 2010. The annual bonus RSUs vest ratably over a period of three years from the date of grant. The LTIP RSUs vest fully three years from the date of grant.
- (4) Represents 5,279 RSUs (\$158,264) granted to Mr. Leibowitz as an annual bonus for 2007, 41,243 RSUs (\$1,236,465) granted under the LTIP in 2008 at two times the annual target level, 26,869 RSUs (\$805,533) granted as an annual bonus for 2008, 69,093 RSUs (\$2,071,408) granted under the LTIP in 2009, 39,112 RSUs (\$1,172,578) granted as an annual bonus for 2009 and 52,854 RSUs (\$1,584,563) granted under the LTIP in 2010. The annual bonus RSUs vest ratably over a period of three years from the date of grant. The LTIP RSUs vest fully three years from the date of grant.
- (5) Represents 10,192 RSUs (\$305,556) granted to Mr. Halvey as a sign-on equity award in 2008, 36,824 RSUs (\$1,103,984) granted under the LTIP in 2008 at two times the annual target level, 26,869 RSUs (\$805,533) granted as an annual bonus for 2008, 57,577 RSUs (\$1,726,158) granted under the LTIP in 2009, 39,112 RSUs (\$1,172,578) granted as an annual bonus for 2009 and 42,283 RSUs (\$1,267,644) granted under the LTIP in 2010. The sign-on and annual bonus RSUs vest ratably over a period of three years from the date of grant. The LTIP RSUs vest fully three years from the date of grant.
- (6) Represents 2,295 RSUs (\$68,804) granted to Mr. Gaston-Bellegarde as an annual bonus for 2007, 35,351 RSUs (\$1,059,823) granted under the LTIP in 2008 at two times the annual target level, 14,035 RSUs (\$420,769) granted as an annual bonus for 2008, 57,577 RSUs (\$1,726,158) granted under the LTIP in 2009, 17,759 RSUs (\$532,415) granted as an annual bonus for 2009 and 29,598 RSUs (\$887,348) granted under the LTIP in 2010. The annual bonus RSUs vest ratably over a period of three years from the date of grant. The LTIP RSUs vest fully three years from the date of grant.
- (7) For the purposes of this table, NYSE Euronext has determined the market value of RSUs based on \$29.98 per share, the closing price of NYSE Euronext shares on December 31, 2010.

Stock Vested During 2010

John K. Halvey	30,300	25,250	18,098		191,747
Roland Gaston-Bellegarde					

Notes:

- (1) Represents salary deferred under the SESP. All of these amounts appeared in the Summary Compensation Table as Salary in the year in which they were earned.
- (2) These earnings consist primarily of market gains and losses as well as dividends paid on equity investments. These earnings did not appear as compensation in the Summary Compensation Table.

NYSE Euronext maintains the SESP to provide deferred compensation opportunities to U.S. employees who earn compensation over the limit set by the Internal Revenue Code for NYSE Euronext's U.S. tax qualified plans. Generally, U.S. employees with the title officer and U.S. non-officers whose salaries and cash bonuses for the prior year exceed the IRS limit on pensionable earnings for that prior year (\$245,000 for 2010) may participate. A participant's account is credited with earnings until distribution based on a measurement alternative selected by the participant from among generally available, publicly traded funds offered by several providers. Participants are not limited in terms of how often they may move their investments between funds, but they cannot change the contribution amount during the year. Participants may elect to receive their account balances in a lump sum distribution or in annual installments following termination of employment.

Edgar Filing: NYSE Euronext - Form 425

Participants employed prior to 2006 were immediately vested in employer matching contributions to their accounts under the SESP and any earnings or losses thereon. Participants hired on or after January 1, 2006 vest in the matching contributions and any earnings or losses thereon 20% per year for the first five years of recognized service. Effective January 1, 2010, NYSE Euronext eliminated the matching contributions under the SESP.

A-324

Table of Contents

Potential Payments on Termination and Change in Control

The following narrative and table summarize and quantify the payments and benefits that each of NYSE Euronext's named executives would have received had his employment terminated or had a change in control of NYSE Euronext occurred, in each case on December 31, 2010 under the specified circumstances described below.

Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey

Employment agreements. In 2008, NYSE Euronext entered into employment agreements with Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey that provide for the following payments and benefits on termination of the executive's employment by NYSE Euronext without cause or by the executive for good reason (as such terms are defined below):

an annual bonus for the year of such termination in an amount based on the HR&CC's determination of the achievement of the applicable performance metrics for such year, pro-rated to reflect the portion of such year that the executive was employed and paid at the time annual bonuses are paid by NYSE Euronext;

a severance payment in an amount equal to:

200% of the executive's base salary plus target bonus, if such termination occurs:

during the first three years after the effective date of the employment agreement; or

in connection with or anticipation of, or within two years after, a change in control (as defined below); or

100% of the executive's base salary plus target bonus, if such termination occurs:

more than three years after the effective date of the agreement; and

not in connection with or anticipation of, or within two years after, a change in control;

any equity compensation awards granted with respect to an annual bonus will fully vest, and any shares underlying any such awards will be distributed;

any equity compensation awards granted under the LTIP that are subject to:

time-based vesting conditions will vest, and any shares underlying such awards will be distributed, as if the executive had remained employed through the next scheduled vesting date; and

Edgar Filing: NYSE Euronext - Form 425

performance vesting conditions will vest, and any shares underlying such awards will be distributed, in an amount based on the HR&CC's determination of the achievement of the applicable performance metrics for the applicable performance period, which vesting and distribution will be pro-rated to reflect the portion of such period that the executive was employed and which will occur at the time applicable to awards held by active executives generally;

continued health and life insurance benefits at the active employee cost for the following period (except that such benefits will be secondary or supplemental to any such benefits that are provided during such period by any subsequent employer):

two years, if such termination occurs:

during the first three years after the effective date of the employment agreement; or

in connection with or anticipation of, or within two years after, a change in control; or

one year, if such termination occurs:

more than three years after the effective date of the employment agreement; and

not in connection with or anticipation of, or within two years after, a change in control.

A-325

Table of Contents

These payments and benefits are conditioned on the executives executing a release of claims against NYSE Euronext and its affiliates. Each of the employment agreements provides that, on termination of the executive's employment due to his death or disability (as defined below), he is entitled to a pro-rated annual bonus and accelerated vesting and distribution with respect to his equity compensation awards on the same terms as on termination of his employment by NYSE Euronext without cause or by him for good reason, as described above.

Cause generally means the executive's:

conviction of, or plea of *nolo contendere* to, a felony involving moral turpitude;

willful misconduct or gross neglect, in either case resulting in material harm to NYSE Euronext;

willful continued failure to carry out reasonable and lawful directions of the Board or, in Mr. Geltzeiler's case, the chief executive officer;

fraud, embezzlement, theft or dishonesty of a material nature against NYSE Euronext or willful violation of a company policy or procedure, in each case resulting in material harm to NYSE Euronext; or

willful material breach of the restrictions against competition and solicitation contained in the employment agreement that is not cured by the executive within 30 days after the Board provides written notice.

Good reason generally means the occurrence of any of the following events or actions that remains uncured by NYSE Euronext for 30 days after the executive's written notice:

a material reduction in the executive's base salary or target bonus;

a relocation of the executive's principal office to more than 50 miles from New York, New York;

a material reduction in the executive's titles, authority, duties or responsibilities;

a change in reporting so that the executive no longer reports to the Board, in the case of Mr. Niederauer, or to the chief executive officer, in the cases of Messrs. Leibowitz, Geltzeiler and Halvey;

the failure by NYSE Euronext to obtain an assumption of its obligations under the employment agreement by any successor to NYSE Euronext within 15 days after a merger, consolidation, sale or similar transaction;

a material breach by NYSE Euronext of the employment agreement;

in the case of Mr. Niederauer, the failure to nominate him as a director in the first election following his removal from the Board; or

Edgar Filing: NYSE Euronext - Form 425

in the case of Mr. Halvey, his no longer being the sole and top legal officer of NYSE Euronext and its affiliates.

Change in control generally means:

a change in the majority control of NYSE Euronext;

a change in the majority control of the Board;

the consummation of one of several specified business combinations, such as a reorganization, merger, share exchange or sale of all or substantially all of the assets of NYSE Euronext, if NYSE Euronext's stockholders before the combination do not hold the majority of the shares of the resulting company and the members of the Board do not hold the majority of seats on the board of the resulting company; or

the approval of a liquidation or dissolution of NYSE Euronext by its stockholders.

A-326

Table of Contents

Disability generally means that the executive has been unable, for 120 or more days out of 180 consecutive days, to perform his duties as a result of physical or mental injury, illness, injury or incapacity.

RSU award agreements. Under the terms of each of the RSU award agreements of Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey, the awards fully vest, and the shares underlying the awards are distributed, on a change in control or on termination of his employment due to his death or disability, by NYSE Euronext without cause or by the executive for good reason or in a qualifying retirement at or after a specified age. As of December 31, 2010, none of the executives qualified for retirement, and, therefore, had any of the executives resigned his employment without good reason on that date, he would have forfeited his RSUs.

Mr. Cerutti

Employment agreement. In September 2009, NYSE Euronext entered into an employment agreement with Mr. Cerutti that provides for the following payments and benefits on termination of his employment by NYSE Euronext for any reason other than gross or willful misconduct or an agreed-upon termination:

a severance payment in an amount equal to:

150% of his base salary plus maximum annual bonus, if such termination occurs:

during the first three years after the effective date of the agreement; or

in connection with or anticipation of, or within two years after, a change in control; or

50% of his base salary plus maximum annual bonus, if such termination occurs:

more than three years after the effective date of the agreement; and

not in connection with or anticipation of, or within two years after, a change in control;

any equity compensation awards granted as part of his annual bonus or the special 2009 bonus paid to Mr. Cerutti in order to compensate him for the loss of the bonus he would have received from his previous employer, prior to such termination will fully vest; and

any RSUs granted under the LTIP will vest, and any shares underlying such RSUs will be distributed, in the same manner as described above for Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey.

The agreement provides that, on Mr. Cerutti's resignation, his special 2009 bonus and annual bonus RSUs vest under the following circumstances:

if he complies with the restrictions against competition and solicitation contained in his employment agreement through the first anniversary of such resignation, such RSUs will vest on such anniversary; and

Edgar Filing: NYSE Euronext - Form 425

if NYSE Euronext releases him from such restrictions against competition and solicitation, such RSUs will vest on the dates specified in the applicable award agreements.

The agreement also provides that, subject to Mr. Cerutti's compliance with such restrictions against competition and solicitation, he will receive an amount equal to 50% of the sum of his base salary and maximum annual bonus, paid in 12 equal monthly installments during the restricted period.

RSU award agreements. Under the terms of Mr. Cerutti's special 2009 bonus RSU award agreement, the RSUs fully vest, and the shares underlying the awards are distributed, on a change in control or on termination of his employment due to his death or disability, by NYSE Euronext without cause or due to a reduction in force, or by him for any reason in a qualifying retirement at or after a specified age (as such terms are defined in NYSE Euronext's Omnibus Incentive Plan). Under the terms of Mr. Cerutti's annual bonus and LTIP RSU award agreements, the RSUs fully vest and are distributed under the same circumstances as are described above for the

A-327

Table of Contents

RSU award agreements of Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey (*i.e.*, on a change in control or on termination of his employment due to his death or disability, by NYSE Euronext without cause or by him for good reason or in a qualifying retirement at or after a specified age). Although Mr. Cerutti did not qualify for retirement as of December 31, 2010, had he resigned his employment without good reason on that date, his RSUs would have vested under the terms of his employment agreement, as described above.

Mr. Gaston-Bellegarde

The terms of Mr. Gaston-Bellegarde's employment are governed by the French Labor Code and the collective labor agreement within the U.E.S. ParisBourse dated January 26, 2000. Mr. Gaston-Bellegarde's RSU award agreements provide for accelerated vesting and distribution of the RSUs under the following circumstances:

2008 and 2009 awards. The bonus RSUs that Mr. Gaston-Bellegarde was granted in 2008 and 2009 fully vest and are distributed on a change in control or on termination of his employment due to his death or disability, by NYSE Euronext without cause or due to a reduction in force or by him in a qualifying retirement at or after a specified age (as such terms are defined in NYSE Euronext's Omnibus Incentive Plan). The LTIP RSUs that Mr. Gaston-Bellegarde was granted in 2008 and 2009 vest and are distributed on a pro-rated basis on termination of his employment due to his death or disability or by NYSE Euronext without cause or due to a reduction in force, and the LTIP RSUs granted in 2008 fully vest and are distributed on a change in control.

2010 awards. The bonus and LTIP RSUs that Mr. Gaston-Bellegarde was granted in 2010 fully vest and are distributed under the same circumstances as are described above for the RSU award agreements of Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey (*i.e.*, on a change in control or on termination of his employment due to his death or disability, by NYSE Euronext without cause or by him for good reason or in a qualifying retirement at or after a specified age). Mr. Gaston-Bellegarde did not qualify for retirement as of December 31, 2010 and, therefore, had he resigned his employment without good reason on that date, he would have forfeited his 2010 awards.

Termination for Cause by NYSE Euronext or Engagement in Detrimental Activities

Under the terms of each named executive's award agreements, the RSUs are subject to forfeiture on termination of the executive's employment by NYSE Euronext for cause.

The RSUs granted before 2009 to NYSE Euronext's named executives (other than Mr. Cerutti, who commenced his employment in 2009) were granted under the NYSE Euronext 2006 Stock Incentive Plan. These RSUs are subject to forfeiture on the executive's engagement in any of several specified detrimental activities, including disclosure of confidential facts, disparagement of NYSE Euronext or its affiliates or any activity that would constitute grounds for termination of the executive's employment by NYSE Euronext for cause.

Golden Parachute Excise Tax Gross-Up

Each of the employment agreements with Messrs. Niederauer, Leibowitz, Geltzeiler and Halvey provides that the executive will be entitled to a gross-up of any golden parachute excise tax imposed under Internal Revenue Code Section 4999 on any payments or benefits that he receives in connection with a change in control (as defined for purposes of Internal Revenue Code Section 280G). However, if the amount of these payments and benefits does not exceed 110% of the executive's safe harbor amount (generally, three times his average total annual compensation for the five calendar years prior to the change in control), then these payments and benefits will be reduced to an amount that is \$5,000 less than the amount that would subject the executive to the excise tax.

Notes:

Edgar Filing: NYSE Euronext - Form 425

- (1) The values for the accelerated vesting of the named executives' RSU awards are calculated based on the \$29.98 closing price of a NYSE Euronext share on December 31, 2010.

A-329

Table of Contents

- (2) Assumes that the executive would not have become re-employed with another employer, thereby making him eligible for health care and/or life insurance benefits under such other employer's benefit plans.
- (3) Represents compensation provided under Mr. Cerutti's employment agreement in consideration of non-compete and non-solicit obligations for a period of one year following termination of his employment.
- (4) Mr. Gaston-Bellegarde is not contractually entitled to a payment in respect of his annual bonus for the year in which his employment terminates. Nevertheless, for purposes of this table, NYSE Euronext has assumed that, had Mr. Gaston-Bellegarde's employment terminated due to his death or disability, or had NYSE Euronext terminated his employment without cause, in each case on December 31, 2010, consistent with historical practice, NYSE Euronext would have provided Mr. Gaston-Bellegarde with the full amount of his annual bonus for 2010.
- (5) Mr. Gaston-Bellegarde's 2009 LTIP RSU award agreement does not provide for accelerated vesting upon a change in control. Nevertheless, for purposes of this table, NYSE Euronext has assumed that, had a change in control occurred on December 31, 2010, the HR&CC would have exercised its discretion under the Omnibus Incentive Plan to accelerate the vesting of his award.

Nonqualified Deferred Compensation Distributions

In addition to the amounts shown in the table above, following termination of their employment, Messrs. Niederauer, Cerutti, Geltzeiler and Halvey are entitled to receive distribution of their amounts deferred under the SESP, NYSE Euronext's U.S. nonqualified deferred compensation plan. These amounts as of December 31, 2010 are set forth above in the "Aggregate Balance at 12/31/10" column of the 2010 Nonqualified Deferred Compensation table.

HR&CC Interlocks and Insider Participation

In 2010, NYSE Euronext's HR&CC consisted of Duncan M. McFarland, James J. McNulty, Ricardo Salgado and Sir Brian Williamson. No member of NYSE Euronext's HR&CC is a current or former officer or employee of NYSE Euronext or any of its subsidiaries, with the exception of Sir Brian Williamson, who resigned as executive chairman of LIFFE, the predecessor of NYSE Liffe, in April 2003. There are no compensation committee interlocks (*i.e.*, situations where an executive officer of NYSE Euronext serves on the board or compensation committee of another company and an executive officer of such company serves on NYSE Euronext's board or HR&CC).

Certain Relationships and Related Transactions

NYSE Euronext's Code of Ethics and Business Conduct, which applies to all of its employees and directors, its subsidiaries and certain persons performing services for NYSE Euronext, prohibits all conflicts of interest, unless they have been approved by NYSE Euronext's Board of Directors (or an authorized committee of NYSE Euronext's Board). NYSE Euronext's Board has delegated to NYSE Euronext's Nominating and Governance Committee the review of potential conflicts of interest, as well as the review and approval of related-party transactions involving more than \$120,000. In March 2008, upon the recommendation of the Nominating and Governance Committee, NYSE Euronext's Board adopted a formal, written related-party transactions approval policy. Under this policy, transactions between NYSE Euronext and any executive officer, director or holder of more than 5% of NYSE Euronext's shares, or any immediate family member of such person, must be approved or ratified by NYSE Euronext's Nominating and Governance Committee or NYSE Euronext's Board in accordance with the terms of the policy. In determining whether to approve or ratify a transaction with related persons, the Nominating and Governance Committee or NYSE Euronext's Board may consider, among other things: (1) whether the terms of the transaction are fair to NYSE Euronext and would apply on the same basis if the other party to the transaction did not involve a related person; (2) whether there are compelling business reasons for NYSE Euronext to enter into the transaction; (3) whether the transaction would impair the independence of an otherwise independent director; and (4) whether the transaction presents an improper conflict of interest, taking into account the size of the transaction, the overall financial position of the related person, the direct or indirect nature of his or her interest in the transaction and the ongoing nature of any proposed relationship and any other factors NYSE Euronext's Nominating and Governance Committee deems relevant.

Table of Contents

Director Independence

NYSE Euronext shares are listed on the New York Stock Exchange as well as Euronext Paris. As a company listed on the New York Stock Exchange, NYSE Euronext's Board of Directors must comply with the NYSE corporate governance requirements, including the director independence standards. Those standards require that a majority of NYSE Euronext's Board of Directors be comprised of directors who have no direct or indirect material relationship with NYSE Euronext. In April 2007, NYSE Euronext adopted the Independence Policy of the NYSE Euronext board of directors (which is referred to in this section as the Independence Policy), which was recently amended in December 2009. The Independence Policy sets forth the independence requirements that apply to the members of NYSE Euronext's board of directors, which include, and in several respects go beyond, the NYSE standards.

Under NYSE Euronext's Independence Policy, a director is independent only if NYSE Euronext's Board of Directors determines that such director does not have any material relationships with NYSE Euronext and its subsidiaries. In making independence determinations, NYSE Euronext's board must consider the special responsibilities of a director in light of the fact that NYSE Euronext controls entities that are U.S. self-regulatory organizations subject to the supervision of the SEC, as well as entities that are European securities exchanges subject to the supervision various local and national regulators.

Security Ownership of Certain NYSE Euronext Beneficial Owners and Management

The following tables set forth information, as of March 1, 2011, regarding the beneficial ownership of NYSE Euronext shares by:

each person who is known by NYSE Euronext to own beneficially 5% or more of NYSE Euronext's outstanding shares;

each of NYSE Euronext's directors and director nominees;

each of NYSE Euronext's named executive officers; and

NYSE Euronext's directors and executive officers as a group.

A-331

Table of Contents

Unless otherwise indicated, the business address of NYSE Euronext's directors and named executive officers is 11 Wall Street, New York, New York 10005. Beneficial ownership is determined under the rules of the SEC and generally includes voting or investment power over securities. The table includes shares underlying vested RSUs held by NYSE Euronext's directors and RSUs held by NYSE Euronext's named executives that are scheduled to vest within 60 days. Except in cases where community property laws apply or as indicated in the footnotes to this table, NYSE Euronext believes that each stockholder identified in the table possesses sole voting and investment power over all shares of NYSE Euronext's shares shown as beneficially owned by that stockholder. Unless otherwise indicated, no shares have been pledged as security.

Table of Contents**SELECTED HISTORICAL FINANCIAL INFORMATION OF NYSE EURONEXT**

The following selected consolidated financial data has been taken from the historical consolidated financial statements and related notes for the years ended December 31, 2006 through December 31, 2010, which have been prepared in accordance with U.S. GAAP. As a result of a change in NYSE Euronext's reportable business segments effective in the first quarter of 2010, historical financial data has been revised to conform to this change. The information presented here is only a summary, and it should be read together with NYSE Euronext's consolidated financial statements included in this document. The information set forth below is not necessarily indicative of NYSE Euronext's results of future operations and should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations of the NYSE Euronext.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF NYSE EURONEXT**

The following discussion of NYSE Euronext's financial condition and results of operations should be read in conjunction with the consolidated financial statements and related notes included in this document. This discussion contains forward-looking statements. Actual results may differ from such forward-looking statements. See Risk Factors and Forward-Looking Statements. Certain prior period amounts presented in the discussion and analysis have been reclassified to conform to the current presentation.

Overview

NYSE Euronext was formed from the combination of the businesses of NYSE Group and Euronext, which was consummated on April 4, 2007. Following consummation of the combination, NYSE Euronext became the parent company of NYSE Group and Euronext and each of their respective subsidiaries. Under the purchase method of accounting, NYSE Group was treated as the accounting and legal acquirer in the combination with Euronext. On October 1, 2008, NYSE Euronext completed its acquisition of The Amex Membership Corporation, including its subsidiary the American Stock Exchange, which is now known as NYSE Amex.

NYSE Euronext revised its reportable business segments effective in the first quarter of 2010. The new segments are Derivatives, Cash Trading and Listings, and Information Services and Technology Solutions. Historical financial results have been revised to reflect this change. NYSE Euronext revised its segments to reflect changes in management's resource allocation and performance assessment in making decisions. These changes reflect NYSE Euronext's current operating focus. NYSE Euronext evaluates the performance of its operating segments based on operating income. NYSE Euronext has aggregated all of its corporate costs, including costs to operate as a public company, within Corporate/Eliminations.

The following is a description of NYSE Euronext's reportable segments:

Derivatives consist of the following in NYSE Euronext's global businesses:

providing access to trade execution in derivatives products, options and futures;

providing certain clearing services for derivative products; and

selling and distributing market data and related information.

Cash Trading and Listings consist of the following in NYSE Euronext's global businesses:

providing access to trade execution in cash trading and settlement of transactions in certain European and U.S. markets;

obtaining new listings and servicing existing listings;

selling and distributing market data and related information; and

providing regulatory services.

Information Services and Technology Solutions consist of the following in NYSE Euronext's global businesses:

Edgar Filing: NYSE Euronext - Form 425

operating sell-side and buy-side connectivity networks for its markets and for other major market centers and market participants in the United States, Europe and Asia;

providing trading and information technology software and solutions;

selling and distributing market data and related information to data subscribers for proprietary data products; and

providing multi-asset managed services and expert consultancy to exchanges and liquidity centers.

For a discussion of these segments, see Note 6 to the consolidated financial statements of NYSE Euronext.

A-335

Table of Contents**Factors Affecting NYSE Euronext's Results**

The business environment in which NYSE Euronext operates directly affects its results of operations. Its results have been and will continue to be affected by many factors, including the level of trading activity in its markets, which during any period is significantly influenced by general market conditions, competition, market share and the pace of industry consolidation, broad trends in the brokerage and finance industry, price levels and price volatility, the number and financial health of companies listed on the NYSE Euronext's cash markets, changing technology in the financial services industry, and legislative as well as regulatory changes and requirements, including competition law, among other factors. In particular, in recent years, the business environment has been characterized by increasing competition among global markets for listing and trading volumes, the globalization of exchanges, customers and competitors, market participants' demand for speed, capacity and reliability, which requires continuing investment in technology, and increasing competition for market data revenues. For example, the growth of its trading and market data revenues could be adversely impacted if the NYSE Euronext is unsuccessful in attracting additional volumes. Historically NYSE Euronext has seen its market share, trading revenues and share of market data revenues decline through the entrance of new players, increased competition, and more recently an increase in internalization and trading on alternative trading systems. While NYSE Euronext's market share has been relatively stable in the past year, market share dynamics are constantly changing and no assurance can be provided that further declines will not occur in the future. The maintenance and growth of its revenues could also be impacted if the NYSE Euronext faces increased pressure on pricing.

While access to credit markets has improved in recent months, the upheaval in the credit markets that commenced in 2008 continued to impact the economy during 2009 and the first half of 2010. Equity market indices have experienced volatility and the market may remain volatile throughout 2011. Economic uncertainty in the European Union and the political upheaval in certain North African countries could spread to other countries and may continue to negatively affect global financial markets. While markets may improve, these factors have adversely affected NYSE Euronext's revenues and operating income and may negatively impact future growth.

As a result of recent events, there has been, and it is likely that there will continue to be, significant change in the regulatory environment in which the NYSE Euronext operates. In particular, on July 21, 2010, President Obama signed the Dodd-Frank Act. Although many of its provisions require the adoption of rules to implement, and it contains substantial ambiguities, many of which will not be resolved until regulations are adopted, such reforms could adversely affect NYSE Euronext's business or result in increased costs and the expenditure of significant resources. In addition, there are significant structural changes underway within the European regulatory framework. See Risk Factors Further uncertainties in connection with the resolution on and implementation of new regulations may reduce the level of activities on Deutsche Börse Group and NYSE Euronext.

While the NYSE Euronext has not experienced reductions in its borrowing capacity, lenders in general have taken actions that indicate their concerns regarding liquidity in the marketplace. These actions have included reduced advance rates for certain security types, more stringent requirements for collateral eligibility and higher interest rates. Should lenders continue to take additional similar actions, the cost of conducting the NYSE Euronext's business may increase and its ability to implement its business initiatives could be limited.

NYSE Euronext expects that all of these factors will continue to impact its businesses. Any potential growth in the global cash markets in the upcoming months will likely be tempered by investor uncertainty resulting from volatility in the cost of energy and commodities, unemployment concerns, contagion concerns in relation to the sovereign debt issues faced by some members of the Eurozone, as well as the general state of the world economy. The NYSE Euronext continues to focus on its strategy to broaden and diversify its revenue streams, as well as its company-wide expense reduction initiatives in order to mitigate these uncertainties.

Table of Contents**Recent Acquisitions and Other Transactions*****NYSE BlueTM***

On September 7, 2010 NYSE Euronext announced plans to create NYSE BlueTM (which is referred to in this section as NYSE Blue), a joint venture focusing on environmental and sustainable energy markets. NYSE Blue includes NYSE Euronext's existing investment in BlueNext, the spot market in carbon credits, and APX, Inc. (which is referred to in this section as APX), a provider of regulatory infrastructure and services for the environmental and sustainable energy markets. NYSE Euronext is majority owner of NYSE Blue. Shareholders of APX, which include Goldman Sachs, Mission Point Capital Partners, and ONSET Ventures, received a minority equity interest in NYSE Blue in return for their shares in APX. The NYSE Blue joint venture formation closed on February 18, 2011.

National Stock Exchange of India

On May 3, 2010, NYSE Euronext completed the sale of its 5% equity interest in the National Stock Exchange of India for gross proceeds of \$175 million. A \$56 million gain was included in Other income in its consolidated statement of operations for year ended December 31, 2010 as a result of this transaction.

NYFIX, Inc.

On November 30, 2009, NYSE Euronext acquired NYFIX, Inc. which is a leading provider of innovative solutions that optimize trading efficiency. The total value of this acquisition was approximately \$144 million. Infix's FIX business and FIX Software business were added to the Information Services and Technology Solutions segment. The NYFIX Transaction Services U.S. electronic agency execution business, comprised of its direct market access and algorithmic products, and the Millennium Alternative Trading System was sold to BNY ConvergeX subsequent to the NYFIX acquisition.

NYSE Liffe US

During the fourth quarter of 2009, NYSE Euronext sold a significant equity interest in NYSE Liffe US to Citadel Securities, Getco, Goldman Sachs, Morgan Stanley and UBS. NYSE Euronext consolidates the results of NYSE Liffe US and manages the day-to-day operations of the entity, which operate under the supervision of a separate board of directors. On March 9, 2010, NYSE Euronext sold an additional 6% of NYSE Liffe US equity interest to DRW Ventures LLC.

Qatar

On June 19, 2009, NYSE Euronext entered into a strategic partnership with the State of Qatar to establish the Qatar Exchange, the successor to the Doha Securities Market. Under the terms of the partnership, the Qatar Exchange will adopt the latest NYSE Euronext trading and network technologies for both the existing cash equities market and the new derivatives market. NYSE Euronext will provide certain management services to the Qatar Exchange at negotiated rates.

NYSE Euronext agreed to contribute \$200 million in cash to acquire a 20% ownership interest in the Qatar Exchange, \$40 million of which was paid upon closing on June 19, 2009 and generally, the remaining \$160 million is to be paid annually in four equal installments. NYSE Euronext's investment in the Qatar Exchange is treated as an equity method investment. The \$115 million present value of this liability is included in Related party payable in the consolidated statement of financial condition as of December 31, 2010.

New York Portfolio Clearing

On June 18, 2009, NYSE Euronext and DTCC entered into an arrangement to pursue a joint venture, an innovative derivatives clearinghouse that will deliver single-pot margin efficiency between fixed income securities and interest rate futures. New York Portfolio Clearing was granted registration as a U.S. Derivatives

Table of Contents

Clearing Organization pursuant to the Commodity Exchange Act by the Commodity Futures Trading Commission on January 31, 2011. NYPC became operational in the first quarter of 2011. NYSE Euronext initially plans to contribute \$15 million in working capital and commit a \$50 million financial guarantee as an additional contribution to the NYPC default fund. NYPC initially will clear interest rate products traded on NYSE Liffe US, with the ability to add other exchanges and Derivatives Clearing Organizations in the future. NYPC uses the NYSE Euronext's clearing technology. DTCC's Fixed Income Clearing Corporation provides capabilities in risk management, settlement, banking and reference data systems.

NYSE Liffe Clearing

In May 2009, NYSE Liffe received regulatory approval to take responsibility for clearing activities in its London market through the creation of NYSE Liffe Clearing. NYSE Liffe Clearing launched operations in July 2009 and became the central counterparty, and thereby earning clearing revenues, in respect of contracts entered into by clearing members on NYSE Liffe's London market.

Impairment of Goodwill, Intangible Assets and Other Assets

Testing Methodology and Valuation Considerations

Goodwill represents the excess of purchase price and related costs over the value assigned to the net tangible and identifiable assets of a business acquired. In accordance with the Intangibles—Goodwill and Other Topic of the Financial Accounting Standards Board (which is referred to in this section as "FASB") Accounting Standards Codification (which is referred to in this section as the "Codification"), NYSE Euronext tests goodwill of its reporting units (which is generally one level below its three reportable segments) and intangible assets deemed to have indefinite lives for impairment at least annually and more frequently if events or circumstances, such as adverse changes in the business climate, indicate that there may be justification for conducting an interim test. NYSE Euronext performs its annual impairment test of goodwill and indefinite-lived intangible assets during the fourth quarter.

The impairment test of goodwill is performed in two steps. The first step compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, the second step must be performed. The second step compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. An impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

In determining the fair value of its reporting units in step one of the goodwill impairment test, NYSE Euronext computes the present value of discounted cash flows and terminal value projected for the reporting unit. The rate used to discount cash flows represents the weighted average cost of capital that NYSE Euronext believes is reflective of the relevant risk associated with the projected cash flows.

To validate the reasonableness of the reporting unit fair values, NYSE Euronext reconciles the aggregate fair values of the reporting units determined in step one of the goodwill impairment test to the market capitalization of NYSE Euronext to derive the implied control premium. In performing this reconciliation, NYSE Euronext may, depending on the volatility of its stock price, use either the stock price on the valuation date or the average stock price over a range of dates around the valuation date, generally 30 days. NYSE Euronext compares the implied control premium to premiums paid in observable recent transactions of comparable companies to determine if the fair value of the reporting units estimated in step one of the goodwill impairment test is reasonable.

In accordance with Subtopic 10 in the Property, Plant, and Equipment Topic of the Codification, impairment exists when the carrying amount of an amortizable intangible asset exceeds its fair value. The carrying amount of an amortizable intangible asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected

Table of Contents

to result from it. An intangible asset subject to amortization will be tested for recoverability whenever events or changes in circumstances, such as a significant or adverse change in the business climate that could affect the value of the intangible asset, indicate that its carrying amount may not be recoverable. An impairment loss is recorded to the extent the carrying amount of the intangible asset exceeds its fair value.

The process of evaluating the potential impairment of goodwill and other intangible assets is subjective and requires significant judgment on matters such as, but not limited to, the reporting unit at which goodwill should be measured for impairment, future operating performance and cash flows, cost of capital, terminal values, control premiums, remaining economic lives of assets, and the allocation of shared assets and liabilities to determine the carrying values for each of NYSE Euronext's reporting units. NYSE Euronext uses its internal forecasts to estimate future cash flows and actual future results may differ from those estimates.

In addition, in order to determine whether a decline in the value of certain securities and other investments is other-than-temporary, NYSE Euronext evaluates, among other factors, the length of time and the extent to which the market value has been less than cost. In particular, NYSE Euronext considers the impact of duration and severity on the period of time expected for recovery to occur. If it determines that the decline in value is other-than-temporary, it writes down the carrying value of the related asset to its estimated fair value.

In 2008, NYSE Euronext recorded a \$1,590 million impairment charge primarily in connection with the write-down of goodwill allocated to its European Cash Trading and Listings reporting unit (\$1,003 million) and the national securities exchange registration of its European Cash Trading and Listings reporting unit (\$522 million) to their estimated fair value. This charge reflected adverse economic and equity market conditions which caused a material decline in industry market multiples, and lower estimated future cash flows of its European reporting unit within its Cash Trading and Listings business segment as a result of increased competition which has caused a decline in its market share of cash trading in Europe as well as pricing pressures following the November 2007 introduction of the Market in Financial Instruments Directive. NYSE Euronext did not record an impairment charge in 2010 and 2009.

Sources of Revenues***Transaction and Clearing Fees***

The NYSE Euronext's transaction and clearing fees consist of fees collected from its cash trading, derivatives trading and clearing fees.

Cash trading. Revenues for cash trading consist of transaction charges for executing trades on the NYSE Euronext's cash markets, as well as transaction charges related to orders on its U.S. cash markets which are routed to other market centers for execution. Additionally, the NYSE Euronext's U.S. cash markets pay fees to the SEC pursuant to Section 31 of the Exchange Act. These Section 31 fees are designed to recover the costs to the government of supervision and regulation of securities markets and securities professionals. Activity assessment fees are collected from member organizations executing trades on the NYSE Euronext's U.S. cash markets, and are recognized when these amounts are invoiced. Fees received are included in cash at the time of receipt and, as required by law, the amount due to the SEC is remitted semiannually and recorded as an accrued liability until paid. The activity assessment fees are designed so that they are equal to the Section 31 fees. As a result, activity assessment fees and Section 31 fees do not have an impact on the NYSE Euronext's net income.

Derivatives trading and clearing. Revenue from derivatives trading and clearing consists of per-contract fees for executing trades of derivatives contracts and clearing charges on NYSE Liffe and NYSE Liffe US and executing options contracts traded on NYSE Arca and NYSE Amex. In some cases, these fees are subject to caps.

Revenues for per-contract fees are driven by the number of trades executed and fees charged per contract. The principal types of derivative contracts traded and cleared are equity and index products and short-term interest rate products. Trading in equity products is primarily driven by price volatility in equity markets and

Table of Contents

indices and trading in short-term interest rate products is primarily driven by volatility resulting from uncertainty over the direction of short-term interest rates. The level of trading and clearing activity for all products is also influenced by market conditions and other factors. See Factors Affecting NYSE Euronext's Results.

Market Data

The NYSE Euronext generates revenues from the dissemination of its market data in the U.S. and Europe to a variety of users. In the U.S., it collects market data fees principally for consortium-based data products and, to a lesser extent, for NYSE proprietary data products. Consortium-based data fees are dictated as part of the securities industry plans and charged to vendors based on their redistribution of data. Consortium-based data revenues from the dissemination of market data (net of administrative costs) are distributed to participating markets on the basis of a formula set by the SEC under Regulation NMS. Last sale prices and quotes in NYSE listed, NYSE Amex listed, and NYSE Arca listed securities are disseminated through Tape A and Tape B, which constitutes the majority of the NYSE Euronext's U.S. revenues from consortium-based market data revenues. NYSE Euronext also receives a share of the revenues from Tape C, which represents data related to trading of certain securities that are listed on Nasdaq. These revenues are influenced by demand for the data by professional and nonprofessional subscribers. In addition, the NYSE Euronext receives fees for the display of data on television and for vendor access. The NYSE Euronext's proprietary products make market data available to subscribers covering activity that takes place solely on its U.S. markets, independent of activity on other markets. Its proprietary data products also include the sale of depth of book information, historical price information and corporate action information.

The NYSE Euronext offers NYSE Realtime Reference Prices, which allows Internet and media organizations to buy real-time, last-sale market data from NYSE and provide it broadly and free of charge to the public. CNBC, Google Finance and nyse.com display NYSE Realtime stock prices on their respective websites.

In Europe, the NYSE Euronext charges a variety of users, primarily the end users, for the use of Euronext's real-time market data services. It also collect annual license fees from vendors for the right to distribute Euronext market data to third parties and a service fee from vendors for direct connection to market data. A substantial majority of European market data revenues is derived from monthly end-user fees. The NYSE Euronext also derives revenues from selling historical and reference data about securities, and by publishing the daily official lists for the Euronext markets. The principal drivers of market data revenues are the number of end-users and the prices for data packages.

Listings

There are two types of fees applicable to companies listed on the NYSE Euronext's U.S. and European securities exchanges—listing fees and annual fees. Listing fees consist of two components: original listing fees and fees related to other corporate-related actions. Original listing fees, subject to a minimum and maximum amount, are based on the number of shares that the company initially lists. Original listing fees, however, are generally not applicable to companies that transfer to one of its U.S. securities exchanges from another market, except for companies transferring to NYSE Amex from the over-the-counter market. Other corporate action related fees are paid by listed companies in connection with corporate actions involving the issuance of new shares to be listed, such as stock splits, rights issues, sales of additional securities, as well as mergers and acquisitions, which are subject to a minimum and maximum fee.

In the U.S., annual fees are charged based on the number of outstanding shares of the listed U.S. company at the end of the prior year. Non-U.S. companies pay fees based on the number of listed securities issued or held in the United States. Annual fees are recognized on a pro rata basis over the calendar year.

Original fees are recognized as income on a straight-line basis over estimated service periods of 10 years for the NYSE and the Euronext cash equities markets and five years for NYSE Arca and NYSE Amex. Unamortized balances are recorded as deferred revenue on the consolidated statements of financial condition.

Table of Contents

Listing fees for the NYSE Euronext's European markets comprise admission fees paid by issuers to list securities on the cash market, annual fees paid by companies whose financial instruments are listed on the cash market, and corporate activity and other fees, consisting primarily of fees charged by Euronext Paris and Euronext Lisbon for centralizing shares in IPOs and tender offers. Revenues from annual listing fees relate to the number of shares outstanding and the market capitalization of the listed company.

In general, Euronext Paris, Euronext Amsterdam, Euronext Brussels and Euronext Lisbon have adopted a common set of listing fees. Under the harmonized fee book, domestic issuers (i.e., those from France, the Netherlands, Belgium and Portugal) pay admission fees to list their securities based on the market capitalization of the respective issuer. Subsequent listings of securities receive a 50% discount on admission fees. Non-domestic companies listing in connection with raising capital are charged admission and annual fees on a similar basis, although they are charged lower maximum admission fees and annual fees. Euronext Paris and Euronext Lisbon also charge centralization fees for collecting and allocating retail investor orders in IPOs and tender offers.

The revenue the NYSE Euronext derives from listing fees is primarily dependent on the number and size of new company listings as well as the level of other corporate-related activity of existing listed issuers. The number and size of new company listings and other corporate-related activity in any period depend primarily on factors outside of the NYSE Euronext's control, including general economic conditions in Europe and the United States (in particular, stock market conditions) and the success of competing stock exchanges in attracting and retaining listed companies.

Technology Services

Revenues are generated primarily from connectivity services related to the SFTI and FIX networks, software licenses and maintenance fees and strategic consulting services. Colocation revenue is recognized monthly over the life of the contract. The NYSE Euronext also generates revenues from software license contracts and maintenance agreements. It provides software which allows customers to receive comprehensive market-agnostic connectivity, transaction and data management solutions. Software license revenues are recognized at the time of client acceptance and maintenance agreement revenues are recognized monthly over the life of the maintenance term subsequent to acceptance. Expert consulting services are offered for customization or installation of the software and for general advisory services. Consulting revenue is generally billed in arrears on a time and materials basis, although customers sometimes prepay for blocks of consulting services in bulk. Customer specific software license revenue is recognized at the time of client acceptance. The NYSE Euronext records revenues from subscription agreements on a pro rata basis over the life of the subscription agreements. The unrealized portions of invoiced subscription fees, maintenance fees and prepaid consulting fees are recorded as deferred revenue on the consolidated statement of financial condition.

Other Revenues

Other revenues include trading license fees, fees for facilities and other services provided to designated market makers, brokers and clerks physically located on the floors of the NYSE Euronext's U.S. markets that enable them to engage in the purchase and sale of securities on the trading floor, the results of NYSE Euronext's BlueNext business and fees for clearance and settlement activities in its European markets, as well as regulatory revenues. Regulatory fees are charged to member organizations of its U.S. securities exchanges.

Components of Expenses

Section 31 Fees

See Sources of Revenues Transaction and Clearing Fees above.

Table of Contents

Liquidity Payments, Routing and Clearing

The NYSE Euronext offers its customers a variety of liquidity payment structures, tailored to specific market, product and customer characteristics in order to attract order flow, enhance liquidity and promote use of its markets. The NYSE Euronext charges a per share or per contract execution fee to the market participant who takes the liquidity on certain of its trading platforms and, in turn, the NYSE Euronext pays, on certain of its markets, a portion of this per share or per contract execution fee to the market participant who provides the liquidity.

The NYSE Euronext also incurs routing charges in the U.S. when the NYSE Euronext does not have the best bid or offer in the market for a security that a customer is trying to buy or sell on one of its U.S. securities exchanges. In that case, the NYSE Euronext routes the customer's order to the external market center that displays the best bid or offer. The external market center charges the NYSE Euronext a fee per share (denominated in tenths of a cent per share) for routing to its system. The NYSE Euronext includes costs incurred due to erroneous trade execution within routing and clearing. Furthermore, NYSE Arca incurs clearance, brokerage and related transaction expenses, which primarily include costs incurred in self-clearing activities, and service fees paid per trade to exchanges for trade execution.

Impairment Charges

Impairment charges include non-cash charges recorded in connection with the write-down of certain goodwill, indefinite-lived intangible assets and other investments to their estimated fair value.

Other Operating Expenses

Other operating expenses include compensation, depreciation and amortization, systems and communications, professional services, selling, general and administrative, and merger expenses and exit costs.

Compensation

Compensation expense includes employee salaries, incentive compensation (including stock-based compensation) and related benefits expense, including pension, medical, post-retirement medical and supplemental executive retirement plan charges. Part-time help, primarily related to security personnel at the NYSE, is also recorded as part of compensation.

Depreciation and Amortization

Depreciation and amortization expenses consist of costs from depreciating fixed assets (including computer hardware and capitalized software) and amortizing intangible assets over their estimated useful lives.

Systems and Communications

Systems and communications expense includes costs for development and maintenance of trading, regulatory and administrative systems; investments in system capacity, reliability and security; and cost of network connectivity between the NYSE Euronext's customers and data centers, as well as connectivity to various other market centers. Systems and communications expense also includes fees paid to third-party providers of networks and information technology resources, including fees for consulting, research and development services, software rental costs and licenses, hardware rental and related fees paid to third-party maintenance providers.

Professional Services

Professional services expense includes consulting charges related to various technological and operational initiatives, including fees paid to LCH.Clearnet in connection with certain clearing guarantee arrangements and FINRA in connection with the transfer of certain member firm regulatory functions, as well as legal and audit fees.

Table of Contents***Selling, General and Administrative***

Selling, general and administrative expenses include (1) occupancy costs; (2) marketing costs consisting of advertising, printing and promotion expenses; (3) insurance premiums, travel and entertainment expenses, co-branding, investor education and advertising expenses with NYSE listed companies; (4) general and administrative expenses; and (5) regulatory fine income levied by NYSE Regulation. Regulatory fine income must be used for regulatory purposes. Subsequent to the July 30, 2007 asset purchase agreement with FINRA, the amount of regulatory fine income has been relatively immaterial.

Merger Expenses and Exit Costs

Merger expenses and exit costs consist of severance costs and related curtailment losses, contract termination costs, depreciation charges triggered by the acceleration of certain fixed asset useful lives, as well as legal and other expenses directly attributable to business combinations and cost reduction initiatives.

Results of Operations***Year Ended December 31, 2010 Versus Year Ended December 31, 2009***

For the year ended December 31, 2009, the results of operations of NYSE Euronext included the results of operations of NYFIX since its acquisition date on November 30, 2009.

The following table sets forth NYSE Euronext's consolidated statements of operations for the years ended December 31, 2010 and 2009, as well as the percentage increase or decrease for each item for the year ended December 31, 2010, as compared to such item for the year ended December 31, 2009.

Highlights

For the year ended December 31, 2010, NYSE Euronext reported total revenues, less transaction-based expenses, operating income and net income attributable to NYSE Euronext of \$2,511 million, \$745 million and \$577 million, respectively. This compares to total revenues, less transaction-based expenses, operating income and net income attributable to NYSE Euronext of \$2,478 million, \$286 million and \$219 million, respectively, for the year ended December 31, 2009.

The \$33 million increase in total revenues, less transaction-based expenses, \$459 million increase in operating income and \$358 million increase in net income attributable to NYSE Euronext for the period reflect the following principal factors:

Increased total revenues, less transaction-based expenses

Total revenues, less transaction-based expenses increased primarily due to increased volumes in the NYSE Euronext's derivatives business and growth in information services and technology solutions offset by decreased volumes in certain U.S. cash trading venues and price changes in its European cash trading venues. See further detailed discussion within each segment analysis.

Increased operating income

The period-over-period increase in operating income of \$459 million was primarily due to reduced other operating expenses of \$426 million mainly associated with a one-time NYSE Liffe Clearing payment of \$355 million in 2009 and increased total revenues, less transaction-based expenses. Excluding net impact of merger and acquisition activity (\$54 million), the impact of foreign currency (\$19 million), new business initiatives (\$35 million) and data center integration costs (\$45 million), NYSE Euronext's other operating expenses decreased \$113 million or 7% as compared to the year ended December 31, 2009.

Increased net income (loss) attributable to NYSE Euronext

As compared to the year ended December 31, 2009, the period-over-period increase in net income attributable to NYSE Euronext of \$358 million was mainly due to increased operating income and a \$56 million one-time gain on the sale of its 5% equity interest in the National Stock Exchange of India, partially offset by a higher effective tax rate.

Table of Contents**Segment Results**

NYSE Euronext revised its reportable business segments effective in the first quarter of 2010. The new segments are Derivatives, Cash Trading and Listings, and Information Services and Technology Solutions. Historical financial results have been revised to reflect this change. For discussion of these segments, see Note 6 to the consolidated financial statements and Overview above.

	2010	2009	% of Total Revenues

NM = Not meaningful.

For the year ended December 31, 2010, Derivatives operating income (loss) increased \$479 million to \$439 million. The increase was primarily due to (1) an increase in total revenues, less transaction-based expenses reflecting an increase in NYSE Euronext's European average daily volume of 14.8% as compared to the same period a year ago; (2) the inclusion of the full year results of NYSE Liffe Clearing in 2010; (3) an increase in the NYSE Euronext's U.S. options market share; (4) reduced merger expenses and exit costs which included a one-time NYSE Liffe Clearing payment of \$355 million in 2009; and (5) a \$9 million decrease of other operating expenses reflecting the results of operating efficiencies, partially offset by the unfavorable impact of foreign currency translation (approximately \$10 million).

Other operating expenses	809	867	(7)	28	26
Operating income	376	415	(9)	13	12

For the year ended December 31, 2010, Cash Trading and Listings operating income decreased \$39 million to \$376 million. This was primarily due to a \$145 million decrease in total revenues, less transaction-based expenses. The NYSE Euronext's U.S. venues average daily volume experienced a 20.9% decline while improving revenue capture. The NYSE Euronext's European venues had an increase in average daily volume of 6.8% and deteriorated, yet stabilized by year-end, revenue capture. The decline in its total revenues, less transaction-based expenses was partially offset by reduced levels of merger expenses and exit costs as well as a \$58 million decrease of other operating expenses as part of its cost containment initiatives.

Information Services and Technology Solutions

	Year Ended December 31, (in millions of U.S. dollars)				
	2010	2009	Increase (Decrease) (%)	% of Revenues	
	2010	2009	(%)	2010	2009

Merger expenses and exit costs	17	27	(37)	4	7
Other operating expenses	355	309	15	80	85
Operating income	72	27	167	16	8

For the year ended December 31, 2010, Information Services and Technology Solutions operating income increased \$45 million to \$72 million. The increase was primarily due to the growth of the NYSE Euronext's software business and the inclusion of the full year results of NYFIX in 2010, a business acquired on November 30, 2009.

A-346

Table of Contents*Corporate/Eliminations*

	Year Ended December 31, (in millions of U.S. dollars)		Increase (Decrease)
	2010	2009	(%)
Other revenues		6	(100)
Total revenues		6	(100)
Merger expenses and exit costs		3	(100)
Other operating expenses	142	119	19
Operating loss	(142)	(116)	22

Corporate and eliminations include unallocated costs primarily related to corporate governance, public company expenses, duplicate costs associated with migrating the NYSE Euronext's data centers and costs associated with its pension, Supplemental Executive Retirement Plan and postretirement benefit plans as well as intercompany eliminations of revenues and expenses. The increase in other operating expenses is mainly due to increased data center migration costs.

*Non-Operating Income and Expenses**Interest Expense*

Interest expense is primarily attributable to the interest expense on the debt incurred in connection with \$750 million of fixed rate bonds due in June 2013 and 1,000 million of fixed rate bonds due in June 2015. (See Liquidity and Capital Resources). The reduction in interest expense is primarily driven by lower outstanding debt balances.

Interest and Investment Income

The decrease in NYSE Euronext's average cash and investment balances, reduction of interest rates and foreign currency rates were the primary drivers of the \$8 million decrease in investment income.

Income (Loss) From Associates

For the year ended December 31, 2010, the decrease in income (loss) from associates is primarily due to the impact of the investment in NYPC which is in development stage.

Other Income

For the year ended December 31, 2010, other income increased \$27 million to \$55 million as compared to the same period a year ago. The increase is primarily due to a \$56 million gain on the sale of NYSE Euronext's equity investment in the National Stock Exchange of India, partially offset by foreign exchange gains and losses and dividends on certain investments, which may vary period over period.

Noncontrolling Interest

For the years ended December 31, 2010 and 2009, NYSE Euronext recorded noncontrolling interest loss of \$19 million and \$7 million, respectively. The increase of \$12 million in noncontrolling interest loss year-over-year primarily reflects the reduced profitability of BlueNext and the operating losses of NYSE Liffe U.S., which is in development stage.

Income Taxes

Edgar Filing: NYSE Euronext - Form 425

For the year ended December 31, 2010 and 2009, NYSE Euronext provided for income taxes at an estimated tax rate of 19% and benefited from income taxes at an estimated tax rate of 3%, respectively. For the year ended December 31, 2010, NYSE Euronext's overall effective tax rate was lower than the statutory rate primarily due

A-347

Table of Contents

to lower tax rates on its foreign operations, the expiration of the statutes of limitations in various jurisdictions and a discrete deferred tax benefit related to an enacted reduction in the corporate tax rate in both the United Kingdom and the Netherlands.

Year Ended December 31, 2009 Versus Year Ended December 31, 2008

For the year ended December 31, 2009, the results of operations of NYSE Euronext included the results of operations of NYFIX since its acquisition date on November 30, 2009. For the year ended December 31, 2008, the results of operations of NYSE Euronext included the results of operations of Wombat, AEMS and NYSE Amex since their respective dates of acquisition (March 7, 2008, August 5, 2008 and October 1, 2008, respectively).

The following table sets forth NYSE Euronext's consolidated statements of operations for the years ended December 31, 2009 and 2008, as well as the percentage increase or decrease for each item for the year ended December 31, 2009, as compared to such item for the year ended December 31, 2008.

Highlights

For the year ended December 31, 2009, NYSE Euronext reported total revenues, less transaction-based expenses, operating income from continuing operations and net income attributable to NYSE Euronext of \$2,478 million, \$286 million and \$219 million, respectively. This compares to total revenues, less transaction-based expenses, operating loss from continuing operations and net loss attributable to NYSE Euronext of \$2,881 million, \$(588) million and \$(738) million, respectively, for the year ended December 31, 2008.

The \$403 million decrease in total revenues, less transaction-based expenses, \$874 million increase in operating income from continuing operations and \$957 million increase in net income attributable to NYSE Euronext for the period reflect the following principal factors:

Decreased total revenues, less transaction-based expenses

Total revenues, less transaction-based expenses decreased primarily due to a decrease in NYSE Euronext's net revenue capture per trade based on pricing changes and volume, higher liquidity payments, routing and clearing as well as the unfavorable effect of foreign currency translation (approximately \$123 million). See further detailed discussion within each segment analysis.

Increased operating income (loss)

The period-over-period increase in operating income of \$874 million was primarily due to the \$1,590 million impairment charge recognized in 2008 in connection with the write-down of goodwill and other intangible assets in Cash Trading and Listings to their estimated fair value. In 2009, no impairment charges were recorded. NYSE Euronext's 2009 results also benefited from reduced operating expenses as a result of cost containment initiatives (approximately \$195 million), offset by (1) increased merger expenses and exit costs primarily as a result of the NYSE Liffe Clearing payment (approximately \$355 million); (2) a decrease in NYSE Euronext's net revenue capture per trade based on pricing changes and volumes (approximately \$403 million); and (3) inclusion of expenses related to acquisitions, data centers and other initiatives (approximately \$193 million).

Increased net income (loss) attributable to NYSE Euronext

As compared to the year ended December 31, 2009, the period-over-period increase in net income attributable to NYSE Euronext of \$957 million was mainly due to increased operating income from continuing operations and the reduction of its effective tax rate primarily due to higher earnings generated from its foreign operations, where its applicable tax rate is lower than the statutory rate, as well as the recognition of previously unrecognized tax benefits.

NM = Not meaningful.

For the year ended December 31, 2009, Derivatives operating income decreased \$378 million to an operating loss of \$40 million. The decrease was primarily due to a one-time NYSE Liffe Clearing payment of \$355 million in 2009, the unfavorable effect of foreign currency translation (approximately \$40 million) and lower revenue capture per contract (approximately \$23 million), partially offset by the inclusion of results of NYSE Amex for the full year and results of NYSE Liffe Clearing subsequent to its July 2009 launch (approximately \$28 million).

Other operating expenses	867	926	(6)	26	27
Operating income (loss)	415	(780)	153	12	(23)

For the year ended December 31, 2009, Cash Trading and Listings operating income increased \$1,195 million to \$415 million. This was primarily due to the \$1,590 million impairment charge recognized in 2008 in connection with the write-down of goodwill and other intangible assets to their estimated fair value. In 2009, no

A-350

Table of Contents

impairment charges were recorded. Excluding the impairment charges, operating income declined by \$395 million due to lower revenue capture per trade resulting from price decreases coupled with a 12% decline in trading volume on the NYSE Euronext's European platforms and the unfavorable impact of foreign currency transaction.

Information Services and Technology Solutions

	Year Ended December 31, (in millions of U.S. dollars)			% of Revenues	
	2009	2008	Increase (Decrease) (%)	2009	2008
Market data	140	119	18	39	45
Technology services	223	147	52	61	55
Total revenues	363	266	36	100	100
Merger expenses and exit costs	27	53	(49)	7	20
Other operating expenses	309	235	31	85	88
Operating income (loss)	27	(22)	(223)	8	(8)

For the year ended December 31, 2009, Information Services and Technology Solutions operating income (loss) increased \$49 million to \$27 million. The increase was primarily due to improved results of NYSE Euronext's connectivity and software businesses and the inclusion of the results of NYFIX following the November 30, 2009 acquisition of that business.

Corporate/Eliminations

	Year Ended December 31, (in millions of U.S. dollars)		
	2009	2008	Increase (Decrease) (%)
Other revenues	6	7	(14)
Total revenues	6	7	(14)
Merger expenses and exit costs	3	17	(82)
Other operating expenses	119	114	4
Operating loss	(116)	(124)	(6)

Corporate and eliminations include unallocated costs primarily related to corporate governance, public company expenses, duplicate costs associated with migrating NYSE Euronext's data centers and costs associated with its pension, supplemental executive retirement plan and postretirement benefit plans as well as intercompany eliminations of revenues and expenses. The year-over-year increase in other operating expenses of \$5 million is mainly due to increased data center migration costs offset by a \$10 million benefit curtailment gain reflected in 2009.

*Non-Operating Income and Expenses**Interest Expense*

Edgar Filing: NYSE Euronext - Form 425

Interest expense is primarily attributable to the debt incurred to fund the cash portion of the consideration paid to Euronext shareholders in April 2007 as well as interest expense on the debt incurred in connection with \$750 million of fixed rate bonds due in June 2013 and 1,000 million of fixed rate bonds due in June 2015. See Liquidity and Capital Resources.

A-351

Table of Contents

Interest and Investment Income

The decrease in the average balance of cash and investments balances, reduction of interest rates and foreign currency rates were the primary drivers of the \$40 million decrease in interest and investment income.

Income from Associates

For the year ended December 31, 2009, NYSE Euronext recorded income from associates of \$2 million which primarily reflected NYSE Euronext pro rata share in earnings of its equity method investment in Qatar.

Other Income

For the year ended December 31, 2009, NYSE Euronext recorded other income of \$28 million, a decrease of \$13 million compared to the same period a year ago. Other income consists primarily of foreign exchange gains (net of losses) and dividends on certain investments, which may vary period over period, as well as gain or loss on sale of equity investment and businesses.

Noncontrolling Interest

For the year ended December 31, 2009, NYSE Euronext recorded a noncontrolling interest loss of \$7 million as compared to income of (\$5) million for the year ended December 31, 2008. The noncontrolling interest loss recorded in 2009 included the sharing of losses with its partners in the NYSE Liffe US venture.

Income Taxes

For the year ended December 31, 2009, NYSE Euronext benefited from income taxes at an estimated tax rate of 3%, a decrease compared to its tax provision of 15% for the year ended December 31, 2008. The decrease is primarily due to higher earnings generated from its foreign operations, where the applicable tax rate is lower than the statutory rate, and the recognition of previously unrecognized tax benefits.

Liquidity and Capital Resources

NYSE Euronext's financial policy seeks to finance the growth of its business, remunerate shareholders and ensure financial flexibility, while maintaining strong creditworthiness and liquidity. NYSE Euronext's primary sources of liquidity are cash flows from operating activities, current assets and existing bank facilities. NYSE Euronext's principal liquidity requirements are for working capital, capital expenditures and general corporate use.

Cash Flows

For the year ended December 31, 2010, net cash provided by operating activities was \$587 million, representing net income of \$558 million, depreciation and amortization of \$307 million, partially offset by a negative change in working capital of \$119 million. Capital expenditures for the year ended December 31, 2010 were \$305 million.

Under the terms of the operating agreement of the NYSE, no regulatory fees, fines or penalties collected by NYSE Regulation may be distributed to NYSE Euronext or any entity other than NYSE Regulation. As a result, the use of regulatory fees, fines and penalties collected by NYSE Regulation may be considered restricted. As of December 31, 2010, NYSE Euronext did not have significant restricted cash balances.

As of December 31, 2010, approximately \$250 million of cash and cash equivalents was held by NYSE Euronext's foreign subsidiaries. If these funds were repatriated to the U.S., NYSE Euronext would be required to accrue and pay U.S. taxes except for the amount of cash, if any, that would be treated as a return of capital for U.S. tax purposes.

Table of Contents**Net Financial Indebtedness**

As of December 31, 2010, NYSE Euronext had approximately \$2.4 billion in debt outstanding and \$0.4 billion of cash, cash equivalents and financial investments, resulting in \$2.1 billion in net indebtedness. NYSE Euronext defines net indebtedness as outstanding debt less cash, cash equivalents and financial investments.

Net indebtedness was as follows (in millions of U.S. dollars):

	December 31,	
	2010	2009
Cash and cash equivalents	327	423
Financial investments	52	67
Cash, cash equivalents and financial investments	379	490
Short term debt	366	616
Long term debt	2,074	2,166
Total debt	2,440	2,782
Net indebtedness	2,061	2,292

Cash, cash equivalents and financial investments are managed as a global treasury portfolio of non-speculative financial instruments that are readily convertible into cash, such as overnight deposits, term deposits, money market funds, mutual funds for treasury investments, short duration fixed income investments and other money market instruments, thus ensuring high liquidity of financial assets.

As of December 31, 2010, NYSE Euronext's main debt instruments were as follows (in millions):

	Principal Amount	Maturity
Commercial paper issued under the global commercial paper program in U.S. dollars	\$330	From January 7, 2011 until January 24, 2011
4.8% bond in U.S. dollars	\$750	June 30, 2013
5.375% bond in Euro	1,000(\$1,337)	June 30, 2015

In 2007, NYSE Euronext entered into a U.S. dollar and euro-denominated global commercial paper program of \$3.0 billion in order to refinance the acquisition of the Euronext shares. As of December 31, 2010, NYSE Euronext had \$0.3 billion of debt outstanding at an average interest rate of 0.8% under this commercial paper program. The effective interest rate of commercial paper issuances does not materially differ from short term interest rates (Libor U.S. for commercial paper issued in U.S. dollar and Euribor for commercial paper issued in euro). The fluctuation of these rates due to market conditions may therefore impact the interest expense incurred by NYSE Euronext.

The commercial paper program is backed by a \$2.0 billion 5-year syndicated revolving bank facility maturing on April 4, 2012. This bank facility is also available for general corporate purposes and was not drawn as of December 31, 2010. On September 15, 2008, the amount of commitments readily available to NYSE Euronext under the \$2.0 billion April 2012 facility decreased from \$2.0 billion to \$1,833 million as a result of the bankruptcy filing of Lehman Brothers Holdings Inc., which had provided a \$167 million commitment under this facility.

In 2006, prior to the combination with NYSE Group, Euronext entered into a \$300 million (\$401 million at December 31, 2010) revolving credit facility available for general corporate purposes, which matures on August 4, 2011. On a combined basis, as of December 31, 2010, NYSE Euronext had three committed bank credit facilities totaling \$2.2 billion, with no amount outstanding under any of these facilities. The commercial paper program and the credit facilities include terms and conditions customary for agreements of this type, which may restrict NYSE Euronext's ability to engage in additional transactions or incur additional indebtedness.

Table of Contents

In 2008, NYSE Euronext issued \$750 million of 4.8% fixed rate bonds due in June 2013 and 750 million of 5.375% fixed rate bonds due in June 2015 in order to, among other things, refinance outstanding commercial paper and lengthen the maturity profile of its debt. In 2009, NYSE Euronext increased the 750 million 5.375% notes due in June 2015 to 1 billion as a result of an incremental offering of 250 million. The terms of the bonds do not contain any financial covenants. The bonds may be redeemed by NYSE Euronext or the bond holders under certain customary circumstances, including a change in control accompanied by a downgrade of the bonds below an investment grade rating. The terms of the bonds also provide for customary events of default and a negative pledge covenant.

As of December 31, 2010, NYSE Euronext was in compliance with all of its debt instruments in all material respects.

Clearing Business

Under the arrangements with LCH.Clearnet regarding the clearing of NYSE Liffe derivatives contracts (also known as NYSE Liffe Clearing), LCH.Clearnet provides clearing guarantee backing and related risk functions to NYSE Liffe, under which LCH.Clearnet is responsible for any defaulting member positions and for applying its resources to the resolution of such a default. As a result, margin deposits that clearing members are required to maintain in the form of cash or securities are settled between clearing members and LCH.Clearnet, and these margin deposits are not recognized in the consolidated balance sheet of NYSE Euronext and do not constitute a liquidity source or liquidity obligation for NYSE Euronext.

Liquidity Risk

NYSE Euronext continually reviews its liquidity and debt positions, and subject to market conditions and credit and strategic considerations, may from time to time determine to vary the maturity profile of its debt and diversify its sources of financing. NYSE Euronext anticipates being able to support short-term liquidity and operating needs primarily through existing cash balances and financing arrangements, along with future cash flows from operations. If existing financing arrangements are insufficient to meet anticipated needs or to refinance existing debt, NYSE Euronext may seek additional financing in either the debt or equity markets. NYSE Euronext may also seek equity or debt financing in connection with future acquisitions or other strategic transactions. While NYSE Euronext believes that it generally has access to debt markets, including bank facilities and publicly and privately issued long and short term debt, it may not be able to obtain additional financing on acceptable terms or at all.

Because new issues of commercial paper generally fund the retirement of outstanding issues, NYSE Euronext is also exposed to the rollover risk of not being able to refinance outstanding commercial paper. In order to mitigate the rollover risk, NYSE Euronext maintains backstop bank facilities for an aggregate amount exceeding at any time the amount issued under its commercial paper program. In the event that NYSE Euronext is unable to issue new commercial paper, it may draw on these backstop facilities.

Share Repurchase Program

The board of directors has authorized the repurchase of up to \$1.0 billion of NYSE Euronext shares in 2008. Pursuant to this authorization, NYSE Euronext may repurchase stock from time to time at the discretion of management in the open market or privately negotiated transactions or otherwise, subject to applicable U.S. and European laws, regulations and approvals, strategic considerations, market conditions and other factors. In 2008, NYSE Euronext repurchased 13.4 million shares at an average price of \$26.04 per share under this authorization. No shares were repurchased during 2009 and 2010. Under SEC rules, NYSE Euronext is not able to repurchase shares during certain restricted time periods.

Table of Contents**Summary Disclosures About Contractual Obligations**

The table below summarizes NYSE Euronext's debt, future minimum lease obligations on its operating leases and other commitments as of December 31, 2010 (in millions of U.S. dollars):

	Total	Payments Due by Year ⁽¹⁾					Thereafter
		2011	2012	2013	2014	2015	
Debt (principal and accrued interest obligations)	2,440	366		749		1,325	
Debt (future interest obligations)	413	71	108	90	72	72	
Operating lease obligations	422	70	63	54	49	42	144
Other commitments ⁽²⁾	117	41	41	35			
	3,392	548	212	928	121	1,439	144

Notes:

- (1) As of December 31, 2010, obligations under capital leases were not significant. NYSE Euronext also has obligations related to post-retirement benefits, and deferred compensation (\$513 million) as well as unrecognized tax positions (\$75 million). The date of payment under these obligations cannot be determined. See Notes 8 Pension and Other Benefit Programs, 10 Stock Based Compensation, and 16 Income Taxes to the consolidated financial statements included elsewhere in this document.
- (2) Primarily reflects the outstanding commitment for NYSE Euronext's investment in the Qatar Exchange.

Changes in Financial Condition

As of December 31, 2010, NYSE Euronext had approximately \$2.4 billion in debt outstanding and \$0.4 billion of cash, cash equivalents and financial investments, resulting in \$2.1 billion in net indebtedness. See Liquidity and Capital Resources.

Accounts receivable decreased to \$526 million as of December 31, 2010 from \$660 million as of December 31, 2009 primarily in connection with the timing of collections. Accounts payable and provisions decreased to \$772 million as of December 31, 2010 from \$1,162 million as of December 31, 2009.

Goodwill and other intangible assets amounted to \$4,050 million and \$5,837 million, respectively, as of December 31, 2010 as compared to \$4,210 million and \$6,184 million, respectively, as of December 31, 2009. The \$160 million decrease in goodwill was primarily related to foreign currency translation as a result of the period-over-period weakening of both the euro and the pound sterling versus the US dollar. The \$347 million decrease in other intangible assets period-over-period was chiefly associated with foreign currency translation (\$289 million) and the amortization of intangible assets with finite useful lives (\$58 million).

Other assets decreased \$139 million from \$802 million as of December 31, 2009 to \$663 million as of December 31, 2010 primarily in connection with the sale of a 5% equity interest in the National Stock Exchange of India for gross proceeds of \$175 million.

Total equity decreased \$91 million from \$6,935 million as of December 31, 2009 to \$6,844 million as of December 31, 2010. This decrease was primarily due to (i) the payment of dividends (\$313 million), (ii) the impact of foreign currency as a result of the period-over-period weakening of both the euro and the pound sterling versus the US dollar (\$368 million), partially offset by (iii) the net income for the year (\$558 million).

Critical Accounting Policies and Estimates

The following provides information about NYSE Euronext's critical accounting policies and estimates. Critical accounting policies reflect significant judgments and uncertainties, and potentially produce materially different results, assumptions and conditions.

Table of Contents

Revenue Recognition

There are two types of fees applicable to companies listed on the NYSE Euronext's exchanges—listing fees and annual fees. Listing fees consist of two components: original listing fees and fees related to other corporate actions. Original listing fees, subject to a minimum and maximum amount, are based on the number of shares that the company initially lists. Original listing fees, however, are not applicable to companies when they list on the NYSE or NYSE Arca in the context of a transfer from another market. Other corporate action related fees are paid by listed companies in connection with corporate actions involving the issuance of new shares. Annual fees are recognized on a pro rata basis over the calendar year. Original listing fees are recognized on a straight-line basis over their estimated service periods of 10 years for NYSE and Euronext, and five years for NYSE Arca and NYSE Amex. Unamortized balances are recorded as deferred revenue on the consolidated statements of financial condition.

In addition, NYSE Euronext, through NYSE Technologies' Trading Solutions business, licenses software and provides software services which are accounted for in accordance with Subtopic 605 in the Software Topic of the FASB Accounting Standards Codifications.

Goodwill and Other Intangible Assets

NYSE Euronext reviews the carrying value of goodwill for impairment at least annually based upon estimated fair value of NYSE Euronext's reporting units. Should the review indicate that goodwill is impaired, NYSE Euronext's goodwill would be reduced by the difference between the carrying value of goodwill and its fair value.

NYSE Euronext reviews the useful life of its indefinite-lived intangible assets to determine whether events or circumstances continue to support the indefinite useful life categorization. In addition, the carrying value of NYSE Euronext's indefinite-lived intangible assets is reviewed by NYSE Euronext at least annually for impairment based upon the estimated fair value of the asset.

For purposes of performing the impairment test, fair values are determined using a discounted cash flow methodology. This requires significant judgments including estimation of future cash flows, which, among other factors, is dependent on internal forecasts, estimation of the long-term rate of growth for businesses, and determination of weighted average cost of capital. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill and other intangible impairment for each reporting unit.

Income Taxes

NYSE Euronext records income taxes using the asset and liability method, under which current and deferred tax liabilities and assets are recorded in accordance with enacted tax laws and rates. Under this method, the amounts of deferred tax liabilities and assets at the end of each period are determined using the tax rate expected to be in effect when the taxes are actually paid or recovered. Future tax benefits are recognized to the extent that realization of such benefits is more likely than not.

Deferred income taxes are provided for the estimated income tax effect of temporary differences between financial and tax bases in assets and liabilities. Deferred tax assets are also provided for certain tax carryforwards. A valuation allowance to reduce deferred tax assets is established when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

NYSE Euronext is subject to numerous domestic and foreign jurisdictions primarily based on its operations in these jurisdictions. Significant judgment is required in assessing the future tax consequences of events that have been recognized in NYSE Euronext's financial statements or tax returns. Fluctuations in the actual outcome of these future tax consequences could have material impact on NYSE Euronext's financial position or results of operations.

Table of Contents***Pension and Other Post-Retirement Employee Benefits***

Pension and Other Post-Employment Benefits (OPEB) costs and liabilities are dependent on assumptions used in calculating such amounts. These assumptions include discount rates, health care cost trend rates, benefits earned, interest cost, expected return on assets, mortality rates and other factors. In accordance with the U.S. generally accepted accounting principles, actual results that differ from the assumptions are accumulated and amortized over the future periods and, therefore, generally affect recognized expense and the recorded obligation in future periods. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect NYSE Euronext's pension and other post-retirement obligations and future expense.

Hedging Activities

NYSE Euronext uses derivative instruments to limit exposure to changes in foreign currency exchange rates and interest rates. NYSE Euronext accounts for derivatives pursuant to Derivatives and Hedging Topic of the Codification. The Derivatives and Hedging Topic establishes accounting and reporting standards for derivative instruments and requires that all derivatives be recorded at fair value on the statement of financial condition. Changes in the fair value of derivative financial instruments are either recognized in other comprehensive income or net income depending on whether the derivative is being used to hedge changes in cash flows or changes in fair value.

Recently Issued Accounting Guidance

The FASB issued Accounting Standards Update (which is referred in this document as the ASU) 2009-13, Multiple-Deliverable Revenue Arrangements, which supersedes certain provisions in Subtopic 25 in the Revenue Recognition Topic of the Codification. ASU 2009-13 requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. It also eliminates the use of the residual method of allocation which was allowed under previous guidance and requires the use of the relative-selling-price method in all circumstances in which an entity recognizes revenue for an arrangement with multiple deliverable subject to the Subtopic 25 in the Revenue Recognition Topic. ASU 2009-13 also requires both ongoing disclosures regarding an entity's multiple-element revenue arrangements as well as certain transitional disclosures during periods after adoption. This new guidance is effective for fiscal years beginning on or after June 15, 2010. NYSE Euronext does not believe that this will have a significant impact on its financial statements.

The FASB issued ASU 2009-14, Certain Revenue Arrangements That Include Software Elements, which amends certain provisions in Subtopic 605 in the Software Topic of the Codification. The amendments in ASU 2009-14 change revenue recognition for tangible products containing software elements and non-software elements as follows: (1) the tangible element of the product is always outside the scope of Subtopic 605 in the Software Topic; (2) the software elements of tangible products are outside of the scope of Subtopic 605 in the Software Topic when the software elements and non-software elements function together to deliver the product's essential functionality and (3) undelivered elements in the arrangement related to the non-software components also are excluded from the software revenue recognition guidance. ASU 2009-14 applies to transactions which contain both software and non-software elements. For these transactions, companies will have to go through a two-step process for the software elements. First, a company has to allocate the total consideration to separate units of account for the non-software elements and software elements as a group, using relative selling-price method. Second, the amount allocated to the software elements as a group will then be accounted for in accordance with the requirements in Subtopic 605 in the Software Topic of the Codification. This may require the use of Residual Method of allocation if VSOE (vendor specific objective evidence) or TPE (third party evidence) does not exist for the undelivered elements. This new guidance is effective for fiscal years beginning on or after June 15, 2010, and it is also applicable to existing arrangements that are materially modified after the effective date. NYSE Euronext does not believe that this will have a significant impact on its financial statements.

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk****General**

As a result of its operating and financing activities, NYSE Euronext is exposed to market risks such as interest rate risk, currency risk and credit risk. NYSE Euronext has implemented policies and procedures to measure, manage, monitor and report risk exposures, which are regularly reviewed by the appropriate management and supervisory bodies. NYSE Euronext's central treasury is charged with identifying risk exposures and monitoring and managing such risks on a daily basis. To the extent allowed by local regulation and necessary, NYSE Euronext's subsidiaries centralize their cash investments, report their risks and hedge their exposures with the central treasury. NYSE Euronext performs sensitivity analysis to determine the effects that market risk exposures may have.

NYSE Euronext uses derivative instruments solely to hedge financial risks related to its financial positions or risks that are otherwise incurred in the normal course of its commercial activities. It does not use derivative instruments for speculative purposes.

Interest Rate Risk

Except for fixed rate bonds, most of NYSE Euronext's financial assets and liabilities are based on floating rates, on fixed rates with an outstanding maturity or reset date falling in less than one year or on fixed rates that have been swapped to floating rates via fixed-to-floating rate swaps. The following table summarizes NYSE Euronext's exposure to interest rate risk as of December 31, 2010 (millions of U.S. dollars):

	Financial Assets	Financial Liabilities	Net Exposure	Impact ⁽²⁾ of a 100 bps Adverse Shift in Interest Rates ⁽³⁾
Floating rate⁽¹⁾ positions in				
U.S. Dollar	96		96	(1.0)
Euro	44	366	(322)	(3.2)
Sterling	196		196	(2.0)
Fixed rate positions in				
U.S. Dollar		749	(749)	(33.8)
Euro		1,325	(1,325)	(56.6)
Sterling				

Notes:

- (1) Includes floating rate, fixed rate with an outstanding maturity or reset date falling in less than one year and fixed rate swapped to floating rate.
- (2) Impact on profit and loss for floating rate positions (cash flow risk) and on equity until realization in profit and loss for fixed rate positions (price risk).
- (3) 100 basis points parallel shift of yield curve.

NYSE Euronext is exposed to price risk on its outstanding fixed rate positions. At December 31, 2010, fixed rate positions in U.S. dollar and in euro with an outstanding maturity or reset date falling in more than one year amounted to \$749 million and \$1,325 million, respectively. A hypothetical shift of 1% in the U.S. dollar or in the euro interest rate curves would in the aggregate impact the fair value of these positions by \$33.8 million and \$56.6 million, respectively.

NYSE Euronext is exposed to cash flow risk on its floating rate positions. Because NYSE Euronext is a net lender in U.S. dollar and sterling, when interest rates in U.S. dollar or sterling decrease, NYSE Euronext's net interest and investment income decreases. Based on December 31, 2010 positions, a hypothetical 1% decrease in U.S. dollar or sterling rates would negatively impact annual income by \$1.0 million and \$2.0 million,

Table of Contents

respectively. Because NYSE Euronext is a net borrower in euro, when interest rates in euro increase, NYSE Euronext net interest and investment income decreases. Based on December 31, 2010 positions, a hypothetical 1% increase in euro rates would negatively impact annual income by \$3.2 million.

Currency Risk

As an international group, the NYSE Euronext is subject to currency translation risk. A significant part of the NYSE Euronext's assets, liabilities, revenues and expenses is recorded in euro and sterling. Assets, liabilities, revenues and expenses of foreign subsidiaries are generally denominated in the local functional currency of such subsidiaries.

The NYSE Euronext's exposure to foreign denominated earnings for the year ended December 31, 2010 is presented by primary foreign currency in the following table (in millions, except average rates):

	Year Ended December 31, 2010	
	Euro	Sterling
Average rate in the period	1.3269	1.5457
Average rate in the same period one year before	1.3945	1.5659
Foreign denominated percentage of		
Revenues	16%	15%
Operating expenses	10%	14%
Operating income	49%	20%
Impact of the currency fluctuations ⁽¹⁾ on		
Revenues	(36.3)	(5.9)
Operating expenses	(15.9)	(5.8)
Operating income	(20.4)	(0.1)

Note:

(1) Represents the impact of currency fluctuation for the year ended December 31, 2010 compared to the same period in the prior year. The NYSE Euronext's exposure to net investment in foreign currencies is presented by primary foreign currencies in the table below (in millions):

	December 31, 2010	
	Position in Euros	Position in Sterling
Assets	3,901	2,775
of which goodwill	1,042	1,073
Liabilities	2,227	415
of which borrowings	1,262	
Net currency position before hedging activities	1,674	2,360
Impact of hedging activities	228	82
Net currency position	1,902	2,442
Impact on consolidated equity of a 10% decrease in foreign currency exchange rates	\$ (254)	\$ (380)

At December 31, 2010, NYSE Euronext was exposed to net exposures in euro and sterling of 1.9 billion (\$2.5 billion) and £2.4 billion (\$3.8 billion), respectively. NYSE Euronext's borrowings in euro of 1.3 billion (\$1.7 billion) constitute a partial hedge of NYSE Euronext's net investments in foreign entities. As of December 31, 2010, NYSE Euronext also had a 228 million (\$300 million) Euro/U.S. dollar and

Edgar Filing: NYSE Euronext - Form 425

£82 million (\$125 million) sterling/U.S. dollar foreign exchange swaps outstanding. These swaps matured during January 2011. As of December 31, 2010, the fair value of these swaps was a \$6 million net asset.

A-359

Table of Contents

Based on December 31, 2010 net currency positions, a hypothetical 10% decrease of the euro against the U.S. dollar would negatively impact NYSE Euronext's equity by \$254 million and a hypothetical 10% decrease of the sterling against the U.S. dollar would negatively impact NYSE Euronext's equity by \$380 million. For the year ended December 31, 2010, currency exchange rate differences had a negative impact of \$365 million on NYSE Euronext's consolidated equity.

Credit Risk

The NYSE Euronext is exposed to credit risk in the event of a counterparty default, primarily in connection with arrangements involving cash and cash equivalent balances and short-term financial investments. As of December 31, 2010, such balances and investments amounted to \$327 million and \$52 million, respectively. NYSE Euronext limits its exposure to credit risk by rigorously selecting the counterparties with which it makes investments and executes agreements. Credit risk is monitored by using exposure limits depending on ratings assigned by rating agencies as well as the nature and maturity of transactions. The NYSE Euronext's investment objective is to invest in securities that preserve principal while maximizing yields, without significantly increasing risk. The NYSE Euronext seeks to substantially mitigate credit risk associated with investments by ensuring that these financial assets are placed with governments, well-capitalized financial institutions and other creditworthy counterparties.

An ongoing review is performed to evaluate changes in the status of counterparties. In addition to the intrinsic creditworthiness of counterparties, the NYSE Euronext's policies require diversification of counterparties (banks, financial institutions, bond issuers and funds) so as to avoid a concentration of risk. Derivatives are negotiated with highly rated banks.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no changes in or disagreements with accountants on accounting and financial disclosure during the last two fiscal years.

Controls and Procedures

As of the end of December 31, 2010, NYSE Euronext's management carried out an evaluation, under the supervision and with the participation of its principal executive officer and principal financial officer, of the effectiveness of the design and operation of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based on this evaluation, NYSE Euronext's Chief Executive Officer and Chief Financial Officer concluded that NYSE Euronext's disclosure controls and procedures were effective as of December 31, 2010. During 2010, no changes were made in NYSE Euronext's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting and the Report of Independent Registered Public Accounting Firm are set forth in Index to the Audited Consolidated Financial Statements of NYSE Euronext.

Related-Party Transactions

AEMS

On August 5, 2008, NYSE Euronext acquired the remaining interest in AEMS previously owned by Atos Origin. Prior to the acquisition, NYSE Euronext owned 50% of AEMS and had entered into mutual service agreements. The service agreements were terminated and results of operations and financial condition of AEMS have been included in our consolidated financial statements since August 5, 2008.

Table of Contents***LCH.Clearnet***

Through July 30, 2009, NYSE Euronext used the services of LCH.Clearnet Group Limited for clearing transactions executed on its European cash and derivatives markets.

On October 31, 2008, NYSE Euronext announced that NYSE Liffe's London Market (for the purposes of this section, NYSE Liffe) entered into binding agreements with LCH.Clearnet Ltd. (LCH.Clearnet) to terminate its clearing arrangements and to establish new arrangements known as NYSE Liffe Clearing, whereby NYSE Liffe assumed full responsibility for clearing activities for the U.K. derivatives market. To achieve this, NYSE Liffe became a self-clearing Recognised Investment Exchange and outsourced the existing clearing guarantee arrangements and related risk functions to LCH.Clearnet.

In connection with this arrangement, NYSE Euronext agreed to make a one-time 260 million (\$355 million) payment to compensate LCH.Clearnet for economic losses arising as a result of the early termination of its current clearing arrangements with LCH.Clearnet. This payment was tax deductible.

On May 27, 2009, NYSE Liffe received regulatory approval from the Financial Services Authority (FSA) to launch NYSE Liffe Clearing. Following such approval, NYSE Euronext recorded a \$355 million expense which is included in merger expenses and exit costs in our consolidated statement of operations for the year ended December 31, 2009.

On July 30, 2009, NYSE Liffe Clearing launched operations and NYSE Euronext made the \$355 million payment to LCH.Clearnet.

On May 12, 2010, NYSE Euronext announced that, subject to regulatory approval, it will commence clearing its European securities and derivatives business through two new, purpose-built, clearing houses based in London and Paris in late 2012. LCH.Clearnet Ltd in London and LCH.Clearnet SA in Paris have been informed that NYSE Euronext's current contractual arrangements for clearing with them will terminate accordingly at that time. However, NYSE Liffe's London Market has only indicated its intention to serve a termination notice on its contract with LCH.Clearnet Ltd and has not served a formal termination notice. No termination fees or penalties will be payable.

Qatar

On June 19, 2009, NYSE Euronext entered into a strategic partnership with the State of Qatar to establish the Qatar Exchange, the successor to the Doha Securities Market. Under the terms of the partnership, the Qatar Exchange will adopt the latest NYSE Euronext trading and network technologies for both the existing cash equities market and the new derivatives market. NYSE Euronext will provide certain management services to the Qatar Exchange at negotiated rates.

NYSE Euronext agreed to contribute \$200 million in cash to acquire a 20% ownership interest in the Qatar Exchange, \$40 million of which was paid upon closing on June 19, 2009 and generally, the remaining \$160 million is to be paid annually in four equal installments. NYSE Euronext's investment in the Qatar Exchange is treated as an equity method investment. The \$115 million present value of this liability is included in Related party payable in the consolidated statements of financial condition as of December 31, 2010.

The following table presents revenues (expenses) derived from or incurred with these related parties (in millions of U.S. dollars):

	Year Ended December 31,		
	2010	2009	2008
AEMS			(91)
LCH.Clearnet	(44)	(364)	4
Qatar	26	9	

Table of Contents

BlueNext

BlueNext is the European carbon exchange business launched by NYSE Euronext in 2008. BlueNext is established in France and is 60% owned by NYSE Euronext and 40% owned by Caisse des Dépôts et Consignation (CDC). NYSE Euronext consolidates the results of operations and the financial condition of BlueNext. In the regular course of business, through June 2009, BlueNext paid recoverable Value Added Tax (VAT) to certain customers on a daily basis and recovered such VAT from the French Tax Authorities on a one-month lag. CDC provided BlueNext with an overdraft to fund the VAT receivable. Under this arrangement, BlueNext had \$249 million overdraft balances outstanding with CDC as of December 31, 2008, reflected as Related party payable on our consolidated statement of financial condition. Effective in July 2009, the carbon traded on the BlueNext exchange was VAT exempt.

Table of Contents

REGULATORY AND LEGAL ENVIRONMENT

Deutsche Börse Group and NYSE Euronext operate in a highly regulated industry which is currently undergoing a reform of the legal framework that underpins its regulation. While the current reform agenda for the financial services industry is largely a consequence of the global financial crisis, elements of it were under consideration as part of an ongoing examination by various legal and regulatory authorities. The focus of regulatory reform has been on issues such as capital requirements, liquidity risk management, monitoring and managing systemic risks and measures to create more efficient and more effective supervision. Initiatives to mitigate potential systemic risks stemming from the derivatives market, including the requirement to clear OTC derivatives through central counterparties are also under consideration.

Deutsche Börse Group and NYSE Euronext are stock exchange organizations and transaction service providers that focus on capital market infrastructure through the planning, development and operation of electronic data processing systems. The broad portfolio of products and services provided by Deutsche Börse Group and NYSE Euronext together cover the entire value chain of financial market transactions, including trading and clearing of equities and derivatives, transaction settlement, custody and management of securities, the provision of market information and the development and operation of electronic systems. Aspects of Deutsche Börse Group and NYSE Euronext's businesses are subject to various national and supranational regulatory schemes which are summarized below.

Europe

Deutsche Börse and its subsidiaries in particular operate exchanges in Germany. In addition, Deutsche Börse Group conducts banking and financial services activities in Germany and Luxembourg. NYSE Euronext operates exchanges in five European countries. Each of the European exchanges and/or its respective operator holds an exchange license granted by the relevant national exchange regulatory authority and operates under its respective supervision. Each market operator is also subject to national laws and regulations in its jurisdiction in addition to the requirements imposed by the national exchange authority and, in some cases, the central bank and/or the finance ministry on the regulated market in the relevant European country. Regulation of Euronext and its constituent markets is conducted in a coordinated basis by the respective national regulatory authorities pursuant to memoranda of understanding relating to the cash and derivatives markets and their respective holders and operators.

The regulatory framework in which Deutsche Börse Group and NYSE Euronext operate is substantially influenced and partly governed by European directives and regulations in the financial services area. In November 2007, one of the key directives in the Financial Services Action Plan, became effective. The MiFID was adopted by the EU in 2004 to create a single market for financial services by harmonizing the member states' rules on securities, banking, insurance, mortgages, pensions and all other financial transactions.

The progressive implementation by European member states of the Financial Services Action Plan directives has enabled and increased the degree of harmonization of the regulatory regime for financial services, offering, listing, trading and market abuse. In addition, the implementation of the MiFID by the European member states has resulted in a reinforcement of the regulators' authority and control over market operators' governance, shareholders and organization.

Regulation of Deutsche Börse Group

In order to ensure the proper conduct of exchange trading as well as the correct pricing process and to protect investors and gain confidence in the market mechanisms, exchanges in Germany are subject to market surveillance exercised by several institutions, including the exchange supervisory authorities, the trading surveillance offices and the BaFin, which all closely cooperate with one another in this sector.

Table of Contents

Although it does not directly supervise stock exchanges, in accordance with the German Securities Trading Act, BaFin plays a pivotal role in the orderly trading of securities by investigating cases of suspected insider trading, market manipulation and potential violations of publication requirements at the federal level, which enhances confidence of market participants in the functionality of capital markets.

Trading

Exchanges and Supporting Organizations for Stock Exchanges

In Germany, the regulatory framework for stock exchanges and supporting organizations for stock exchanges is defined through legislation which includes the German Stock Exchange Act, each exchange's own Exchange Rules (*Börsenordnung*), the German Banking Act (*Kreditwesengesetz*), the German Securities Trading Act, the German Securities Deposit Act (*Depotgesetz*), the German Securities Prospectus Act (*Wertpapierprospektgesetz*) and further rules and regulations issued on the basis of these laws.

Stock exchanges, such as the Frankfurt Stock Exchange, are structured as self-governing public law institutions with partial legal capacity. They are operated by supporting organizations such as Deutsche Börse and Scoach Europa AG which provide, at the request of the stock exchange's board of management, staff, financial resources and the premises necessary for the operation and further development of their business. To a large extent, the relationship between supporting organizations and stock exchanges is not subject to statutory regulation, however the Frankfurt Stock Exchange Rules require that the supporting organization will, at the request of the general management or of the exchange council (*Börsenrat*), provide the necessary staff and, all other required resources, including financial resources and premises.

Once a license is granted to operate as supporting organization for a stock exchange by the applicable exchange supervisory authority (*Börsenaufsichtsbehörde*) of the state where the exchange is to be operated, supporting organizations are under a duty to operate and are prohibited from making any independent decisions concerning the continuation or cessation of the exchange business.

The German Stock Exchange Act is the principal legal basis for the operation of stock exchanges organized as public law institutions. It sets forth the material rules concerning licensing requirements and further prerequisites for the formation of a stock exchange, its organization, the stock exchange authorities that must be established, such as the trading surveillance office (*Handelsüberwachungsstelle*), as well as their rights and duties.

The rules regulating trading on a specific stock exchange are set up by a self-regulating organization, the exchange council, which plays a pivotal role in the organization of a stock exchange. Thus, the management board of a stock exchange requires the approval of the exchange council for all decisions regarding questions of fundamental significance. Among other things, the exchange council is responsible for the appointment, dismissal and supervision of the management board. The exchange council also issues the exchange rules, fee regulations and conditions for transactions on the exchange. To ensure the exchange council's independence from the supporting organization for a stock exchange, the members of the exchange council are elected by the different parties involved in trading on a stock exchange, including banks, issuers of securities listed on the relevant exchange and investors. An exchange council must be installed for every German stock exchange.

The German Stock Exchange Act also contains provisions relating to the admission of market participants and traded products and the supervision undertaken by the relevant exchange supervisory authority at the state level. Securities to be traded on a regulated market require admission for official trading to the regulated market.

Each exchange is required to maintain a trading surveillance office which acts as an independent supervisory body to monitor the markets. Trading surveillance offices are supervised by and subject to instructions from the exchange supervisory authorities. As bodies of public law institutions with partial legal

Table of Contents

capacity, the trading surveillance offices exercise public authority. They monitor price fixing and the proper conduct of floor and electronic trading. In the event of irregularities, the trading surveillance office is required to notify the exchange supervisory authorities and the management board of the exchange and, in cases which involve its competencies, the BaFin.

The supporting organization earns part of its revenues from public fees charged for the admission of securities. Although these fees are charged by the stock exchanges instead of the supporting organizations themselves, the supporting organization of each exchange is directly entitled to such charges, which must be based on the fee schedules (*Gebührenordnung*) adopted by the exchange in accordance with the German Stock Exchange Act and approved by the competent exchange supervisory authority.

Deutsche Börse and its subsidiaries may, like other enterprises, generally engage in commercial activities and offer services at market prices. However, Deutsche Börse Group is not permitted to abuse its public position or to derive economic advantage from the unlawful intermingling of public and private interests. With respect to private fees, the general rules on pricing, particularly under competition and antitrust law, must be observed. If Deutsche Börse Group should determine prices unilaterally, this must be done on a fair and equitable basis in order to be valid. In addition to other charges, exchange supporting organizations earn private fees for the use of the Xetra system and its data information services.

Multilateral Trading Facilities and Securities Trading Banks (Wertpapierhandelsbanken)

Trading-related services are provided by Deutsche Börse Group and NYSE Euronext through financial institutions and securities trading banks, which operate Multilateral Trading Facilities (which are referred to in this document as MTFs). MTFs are platforms for electronic trading in securities. The concept of MTFs was introduced by the MiFID. Participants in such trading must be subject to a financial market supervisory authority in their country of domicile. For private investors, trading at MTFs is not possible at present; instead, market participants at MTFs must meet specific requirements comparable to those applicable to market participants at stock exchanges.

As operators of multilateral trading facilities within the meaning of the MiFID, MTFs are subject to legal supervision and market surveillance by relevant state regulators. In order to permit the regulating authorities to exercise their functions in the context of supervising securities trading, banks are subject to comprehensive reporting requirements regarding securities and derivatives transactions. In addition, the MiFID imposes conduct rules which apply to all banks and other investment services providers, including proprietary traders.

Because they are providers of investment services to financial institutions and securities trading banks or otherwise perform investment activities, operators of MTFs are supervised by BaFin and the German Central Bank (*Deutsche Bundesbank*) with regard to their compliance of the rules and regulations applicable to financial service institutions as stipulated in the German Banking Act, as well as the rules imposed upon investment firms as stipulated in the German Securities Trading Act. Whereas the German Banking Act imposes specific rules regarding rules on capital adequacy and licensing requirements, qualification as an investment firm within the meaning of the German Securities Trading Act results in an obligation to comply with the security trading and investor protection regime as implemented in the German Securities Trading Act by the MiFID.

*Clearing***Central Counterparties**

Eurex Clearing AG is the clearing house within Deutsche Börse Group. It offers fully automated and straight-through post trade services for equities, derivatives, repo, energy and fixed income transactions. In its role as a central counterparty, Eurex Clearing AG acts as a buyer to all sellers and as a seller to all buyers, thereby seeking to minimize counterparty risk and to maximize operational efficiency. Eurex Clearing AG offers

Table of Contents

trade management functions, risk management services and collateral and delivery management tools with a focus to increase market safety and integrity. Eurex Clearing AG provides leading risk management services such as comprehensive pre-trade risk limits and it was the first leading central counterparty worldwide to offer risk management and margining data in real-time to its trading and clearing members.

Eurex Clearing AG is a wholly owned subsidiary of Eurex Frankfurt AG and acts as the central counterparty for the Eurex Exchanges, Eurex Bonds GmbH, Eurex Repo GmbH, the Frankfurt Stock Exchange and the Irish Stock Exchange. Eurex Clearing AG also acts as the central counterparty for transactions of the European Energy Exchange (EEX) that are conducted under a separate clearing link agreement with the European Commodity Clearing AG (which is referred to in this document as ECC).

ECC is a clearinghouse that provides a range of services for exchange and over-the-counter transactions in energy and related products. As central counterparty, ECC takes a position between the buyer and seller, thereby collateralizing the transaction and assuming for each party the risk of default by the other party.

Under German law, Eurex Clearing AG and ECC are subject to banking law supervision because they are licensed as central counterparties within the meaning of the German Banking Act. In addition, Eurex Clearing AG is also licensed to provide multiple investment services and is therefore deemed to be an investment firm within the meaning of the German Takeover Act. Based on these qualifications, Eurex Clearing AG and ECC are supervised by BaFin and the German Central Bank (*Deutsche Bundesbank*), which monitor their compliance with the applicable provisions mentioned above. The Financial Services Authority has granted Eurex Clearing status as a Recognized Overseas Clearing House in the United Kingdom. Eurex Clearing AG was granted Multilateral Clearing Organization status by the CFTC on July 31, 2009 and has signed an exemption letter with the SEC that allows to offer clearing of certain credit default swaps in the United States. In addition, ECC qualifies as a designated payment system according to Article 10 of the Settlement Finality Directive 98/26/EC.

Settlement/Custody

Central Securities Depositories

Deutsche Börse Group's settlement division is operated by Clearstream Banking S.A. and Clearstream Banking AG, both wholly owned subsidiaries of Clearstream International S.A.

The core business of Clearstream Banking S.A. and Clearstream Banking AG includes the settlement of market transactions and the custody of securities. In terms of settlement services, these entities ensure that cash and securities are delivered in a timely manner between trading parties. With respect to the custody of securities, Clearstream Banking S.A. and Clearstream Banking AG are responsible for the management, safekeeping and administration of deposited securities.

Both Clearstream Banking S.A. and Clearstream International S.A. are subject to the supervision of Commission de Surveillance du Secteur Financier (which is referred to in this document as CSSF) in Luxembourg. Additionally, since both entities are subsidiaries of Clearstream Holding AG, they fall under the consolidated supervision of the BaFin on the group-level.

On the other hand, although Clearstream Banking AG is part of the consolidated group of Clearstream International S.A., it is currently not subject to supervision by CSSF. Instead, Clearstream Banking AG qualifies as a collective security deposit bank (*Wertpapiersammelbank*) and, to that extent, is subject to supervision by BaFin under the German Banking Act and the German Securities Deposit Act.

The German Securities Deposit Act regulates the safe custody and administration of securities for third parties by a depository bank, which requires a specific license to provide such services. In particular, the German Securities Deposit Act (1) focuses on the protection of depositors; and (2) provides a specific system to transfer

Table of Contents

legal title of securities by a buying agent (*Einkaufskommission*). Additionally, the German Securities Deposit Act stipulates specific rules for different types of custodial relationships such as collective custody or segregation and also regulates the pledging of securities. To protect depositors of securities, the German Securities Deposit Act provides for a special auditing requirement that must be observed by banks engaged in the security deposit business (*Depotprüfung*). In case of insolvency of a custodian, a right of segregation under the German Insolvency Code is granted to the depositors of securities.

Regulation of NYSE Euronext

The MiFID, the Market Abuse Directive, ESMA standards and the Euronext Rulebooks all provide minimum requirements for monitoring of trading and enforcement of rules by Euronext as the operator of regulated markets and MTFs. Euronext has set up a framework to organize market monitoring by which it:

monitors trading in order to identify breaches of the rules, disorderly trading conditions or conduct that may involve market abuse;

reports to the relevant national regulator of breaches of rules or of legal obligations relating to market integrity; and

monitors compliance with and enforces the Euronext Rulebooks.

Market surveillance and monitoring are implemented through a two-step process consisting of real time market surveillance and post-trade (i.e., next day) analysis of executed trades. In addition, Euronext ensures member compliance with its rules by conducting on site investigations and inspections.

Real time monitoring of the markets is performed by cash market operations and, for derivatives markets, by NYSE Liffe Market Services. Cash market operations and NYSE Liffe Market Services are the day-to-day first lines of contact for all market participants (members, issuers and regulators) in respect of operational issues. They monitor day-to-day activity and can take immediate action to maintain fair and orderly markets. This monitoring triggers preventative and immediate action when the functioning of the orderly market is threatened and market rules are not complied with.

Post-trade monitoring is undertaken by the Market Integrity Department in respect of the cash and continental derivatives markets and by the Audit, Investigation and Membership Unit in respect of the London derivatives market. As part of their T+1 activities, both departments have developed a set of monitoring tools that are used to detect and deter particular types of abusive behavior, such as insider trading and front running, which left unchecked could undermine investors' confidence in the integrity of the Euronext markets. In addition, both departments undertake audits of member firms in order to ensure that members are both complying with the rules and have appropriate controls and procedures in place over specific areas of their business, such as pre- and post-trade risk management and back office functions.

Cash market operations and NYSE Liffe Market Services monitors compliance with all rules relating to trading activity on a real time basis. In this manner, suspected cases of market abuse are reported to the competent regulator (who is responsible for enforcing the Market Abuse Directive provisions in accordance with national laws and regulations) and possible infringements of Euronext rules are reported to the Market Integrity Department of Euronext.

The Market Integrity Department is also responsible for the conduct of on-site member inspections and investigations, and handles infringements of Euronext rules through enforcement action.

Listing and Financial Disclosure

The national regulators of the Euronext exchanges are parties to a Memorandum of Understanding dated June 24, 2010 (which is referred to in this document as MOU) that provides a framework to coordinate their

Table of Contents

supervision of Euronext and of the markets operated by Euronext's subsidiaries. These regulatory authorities have identified certain areas of common interest and have adopted a coordinated approach to the exercise of their respective national rules, regulations and supervisory practices regarding listing requirements, prospectus disclosure requirements, ongoing obligations of listed companies, takeover bid rules and disclosure of large shareholdings. The rules regarding public offerings of financial instruments and prospectuses as well as ongoing (ad hoc and periodic) disclosure requirements for listed companies are set forth by the Prospectus Directive and Transparency Directive which must be implemented in Euronext countries by each legislative body and regulator. Companies seeking to list and trade their securities on a Euronext market must prepare a listing prospectus in accordance with the requirements of the Prospectus Directive and Prospectus Regulation, comply with the harmonized listing requirements of Rulebook I and the additional local listing requirements of Rulebook II and, following admission, with the ongoing disclosure requirements set forth by the competent authority of their home member state.

Companies may apply for admission to listing in one or more jurisdictions in which a Euronext market is located. Since the introduction of the Single Order Book, the liquidity of the multi-listed companies in Amsterdam, Brussels, London and Paris is concentrated as each such company is given a single security code regardless of where it is listed. However, a single point of entry for issuers allows investors from other Euronext countries to have access to the order book for trading purposes. The settlement processes may still differ among the various Euronext markets but are being integrated and harmonized within the Euroclear group settlement systems, with the exception of the Portuguese market for which settlement activities will continue to be performed by Interbolsa.

Group-Wide Supervision and Regulation

Within the framework of the aforementioned MOU, Euronext's regulators agreed to develop and implement a coordinated approach with respect to the supervision of the Euronext markets. Representatives of Euronext's regulatory authorities meet in working groups on a regular basis in order to coordinate their actions in areas of common interest and agree upon measures to promote harmonization of their respective national regulations.

At the time that Euronext was formed in 2000, Euronext N.V. received from the Dutch authorities a joint exchange license together with Euronext Amsterdam N.V. to operate regulated markets, which means that it is also subject to the regulation and supervision of the Dutch Minister of Finance and the AFM. Powers of the Dutch Minister of Finance and the AFM include veto or approval rights over (1) the direct or indirect acquisition of more than 10% of the shares in a market operator; (2) the appointment of the policy makers of the market operators; (3) any mergers, cross-shareholdings and joint ventures; and (4) any actions that may affect the proper operation of the Dutch exchanges.

National Regulation

Euronext's European market operators hold licenses for operating the following EU regulated markets:

Euronext Amsterdam operates two regulated markets:

one stock market (Euronext Amsterdam) and one derivatives market (Euronext Amsterdam Derivatives Market, i.e., the Amsterdam market of NYSE Liffe);

Euronext Brussels operates two regulated markets:

one stock market (Euronext Brussels) and one derivatives market (Euronext Brussels Derivatives Market, i.e., the Brussels market of NYSE Liffe);

Euronext Lisbon operates two regulated markets:

Edgar Filing: NYSE Euronext - Form 425

one stock market (Euronext Lisbon) and one derivatives market (Euronext Lisbon Futures and Options Market, i.e., the Lisbon market of NYSE Liffe);

A-368

Table of Contents

Euronext Paris operates three regulated markets:

one stock market (Euronext Paris) and two derivatives markets (MONEP and MATIF, i.e., the Paris markets of NYSE Liffe); and

Liffe Administration and Management operates two regulated markets, a derivatives market (the London International Financial Futures and Options Exchange, i.e., the London market of NYSE Liffe) and a cash market, NYSE Euronext London.

Each market operator also operates a number of markets that do not fall within the EU definition of regulated markets. Each market operator is subject to national laws and regulations pursuant to its market operator status.

Euronext Amsterdam

Operation of a regulated market in the Netherlands is subject to prior license by the Dutch Minister of Finance who may, at any time, amend or revoke the license if necessary to ensure the proper functioning of the markets or the protection of investors. The license may also be revoked for non-compliance with applicable rules. AFM, together with the Dutch Central Bank (*De Nederlandsche Bank*), where applicable, acts as the regulatory authority for Dutch licensed members of Euronext Amsterdam, supervises the primary and secondary markets, ensures compliance with market rules and monitors clearing and settlement operations. The Dutch Minister of Finance also issues declarations of no objection in connection with the acquisition of significant shareholdings in an operator of a regulated market or MTF in the Netherlands. The Dutch Minister of Finance has delegated its powers to grant such declarations of no-objection to the AFM except in cases where the acquisition of the significant shareholding involves a fundamental change to the shareholding structure of the operator of a regulated market in the Netherlands.

Euronext Brussels

Euronext Brussels is governed by the Belgian Act of August 2, 2002 and is recognized as a market undertaking according to Section 16 of the Belgian Act of August 2, 2002. The Belgian Act of August 2, 2002 transferred to the CBFA some of the responsibility previously executed by the Brussels exchange (*e.g.*, disciplinary powers against members and issuers, control of sensitive information, supervision of markets and investigative powers). Euronext Brussels is responsible for matters such as the organization of the markets and the admission, suspension and exclusion of members and has been appointed by law as a competent authority within the meaning of the Prospectus Directive.

Euronext Lisbon

Euronext Lisbon is governed by the Portuguese Decree of Law no. 357-C/2007, which, along with the Portuguese Securities Code and regulations of the Comissão do Mercado de Valores Mobiliários (which is referred to in this document as the CMVM), govern the regime for regulated and non-regulated markets, market operators and all companies with related activities in Portugal. The creation of regulated market companies requires the prior authorization in the form of a decree from the Portuguese Minister of Finance, following consultation with the CMVM. The CMVM is an independent public authority that monitors markets and market participants, public offerings and collective investment undertakings.

Euronext Paris

Euronext Paris is governed by the French Monetary and Financial Code. Under the French Monetary and Financial Code, the French Minister of the Economy has the authority to confer or revoke regulated market status upon recommendation of the Autorité des Marchés Financiers (which is referred to in this document as the AMF) and following an opinion from the ACP. Market status is granted if the market meets specific conditions for proper operation.

Table of Contents

In addition to its status as a market operator, Euronext Paris is approved as a specialized financial institution and is therefore governed by French banking legislation and regulations (notably the French Banking Act as amended and codified in the French Monetary and Financial Code), which means that it is subject to supervision by the ACP. As the relevant indirect parent company of Euronext Paris for purposes of banking regulations, Euronext is also subject to certain reporting and statutory requirements of the Commission Bancaire. As such, it must comply with certain ratios and requirements including minimum equity requirements and solvency ratios.

Liffe Administration and Management

LIFFE Administration and Management (the London market of NYSE Liffe) administers the markets for financial and commodity derivatives in London and also administers and operates NYSE Euronext London, both of which are overseen by the UK Financial Services Authority (which is referred to in this document as "FSA"). In the United Kingdom, financial services legislation comes under the jurisdiction of Her Majesty's Treasury, while responsibility for overseeing the conduct of regulated activity rests with the FSA. LIFFE Administration and Management is designated as a self-clearing recognized investment exchange pursuant to the UK Financial Services and Markets Act 2000.

Other U.K. Regulated Companies

LIFFE Services Ltd. is regulated by the FSA as a service company.

Secfinex Ltd is a majority owned subsidiary of NYSE Euronext. Its principal activity is the operation of an electronic trading facility for securities borrowing and lending. It is regulated by the FSA as an authorized person.

United States

Securities Exchange Regulation

Following completion of the combination, the following securities exchange subsidiaries of Holdco will continue to be registered with and regulated by the U.S. Securities and Exchange Commission: International Securities Exchange, LLC (which is referred to in this document as "ISE"), NYSE, NYSE Arca and NYSE Amex. In addition, through ISE, Holdco will hold minority interests in the following SEC-registered securities exchanges: EDGA Exchange, Inc. (which is referred to in this document as "EDGA") and EDGX Exchange, Inc. (which is referred to in this document as "EDGX").

U.S. federal securities laws have established a two-tiered system for the regulation of securities markets and market participants. The first tier consists of the SEC, which has primary responsibility for enforcing federal securities laws and regulations and is subject to Congressional oversight. The second tier consists of the regulatory responsibilities of self-regulatory organizations over their members. SROs are non-governmental entities that are regulated by the SEC.

Securities industry SROs are an essential component of the regulatory scheme of the Exchange Act for providing fair and orderly markets and protecting investors. There are two types of SROs: securities exchanges and securities associations, both of which must be registered with the SEC under the Securities Exchange Act. To be a registered SRO, the SRO must be able to carry out, and comply with, the purposes of the Exchange Act and the rules and regulations thereunder, and must be able to enforce compliance by its members and individuals associated with its members with the Exchange Act, the rules and regulations thereunder, and the SRO's own rules. In order to become an SRO member, an entity must register with the SEC as a broker-dealer and apply to the SRO for admission, and by such process submit itself to federal and SRO regulation and become obligated to perform various compliance and reporting functions.

Table of Contents

Each securities exchange, in turn, is charged with oversight of the financial and operational status and sales practice conduct of its members and its employees, trading activities on the exchange, and if applicable, enforcing compliance with listing standards. As permitted by SEC rule, each of the six U.S. securities exchanges owned by Deutsche Börse and NYSE Euronext has entered into agreements with FINRA (formerly known as National Association of Securities Dealers, Inc., or NASD) to perform certain of these regulatory functions. FINRA, which does not own or operate any exchanges, is the only securities association registered in the U.S. Financial, operational and sales practice oversight over members common to FINRA and one or more of the six securities exchanges is conducted under agreements with FINRA. Each of the six securities exchanges also has entered into other agreements for the performance of certain regulatory functions.

ISE

ISE has entered into an agreement with FINRA and with the Designated Options Examining Authorities (which is referred to in this document as an examining SRO) under an options designation plan. ISE's rules require that all electronic access members be members of at least one of the examining SROs. Under these agreements, the examining SROs examine firms that are joint members of ISE and the particular examining SRO for compliance with certain provisions of the Exchange Act, certain of the rules and regulations adopted thereunder, certain examining SRO rules, and certain ISE rules.

For those responsibilities that fall outside the scope of this agreement, ISE has contracted separately with FINRA on a payment for services basis. Under this agreement, FINRA performs certain regulatory functions as an agent on behalf of ISE, although ISE retains decision-making authority and certain enforcement and trading surveillance functions. Notwithstanding ISE's contract with FINRA to perform these functions, ISE retains ultimate regulatory responsibility under the Exchange Act.

The ISE Delaware Trust

In connection with obtaining regulatory approval for the combination in 2007 of ISE Holdings, Inc. (ISE Holdings) and Eurex Frankfurt AG, ISE Holdings implemented a special arrangement consisting of a standby structure involving a Delaware trust (which is referred to in this document as the ISE Delaware trust). The ISE Delaware trust serves two general purposes: (1) to hold the capital stock of ISE Holdings in the event that a person obtains beneficial ownership or voting interest in ISE Holdings in excess of the prescribed ownership or voting limits (when a person or group directly or indirectly beneficially owns more than 40%, or 20% in the case of an ISE Exchange, Inc. member, of the outstanding shares of ISE Holdings, or acquires voting control over more than 20% of the outstanding shares of ISE Holdings) and, (2) to take certain actions to mitigate the effects of any material compliance event that creates any state of facts, development, event, circumstance, condition, occurrence or effect that results in the failure of Eurex Frankfurt AG, Eurex Zürich AG, Deutsche Börse AG, SWX Swiss Exchange (now SIX Swiss Exchange), SWX Group (now SIX Group), Verein SWX Swiss Exchange (now SIX Swiss Exchange), or any affiliate of U.S. Exchange Holdings, Inc. that, at any time, controls ISE Exchange, LLC (ISE Exchange), directly or indirectly (which are referred to in this section as affected affiliates) to adhere to their respective commitments under the resolutions adopted in connection with the combination in any material respect. The resolutions, adopted by the affected affiliates in connection with such affected affiliates' ownership or voting interest in ISE Exchange, include certain provisions that are designed to maintain the independence of ISE Holding's self-regulatory functions, enable ISE Holdings to operate in a manner that complies with U.S. federal securities laws, and facilitate the ability of ISE Holdings and the SEC to fulfill their regulatory oversight obligations.

If a material compliance event occurs with respect to an affected affiliate and continues to be in effect, then the ISE Delaware trust would exercise its call option over a majority of the voting shares of ISE Holdings, in accordance with certain requirements set out in the ISE Delaware trust agreement. The shares of ISE Holdings that are transferred to the ISE Delaware trust would be transferred back to ISE Holdings in the event that (1) no material compliance event is continuing, or (2) notwithstanding the continuation of a material compliance event,

Table of Contents

the trustees of the ISE Delaware trust determine that the retention of the shares by the ISE Delaware trust could not reasonably be expected to address any continuing material compliance event (and any such determination would not be effective unless it is filed and approved by the SEC).

EDGA and EDGX

EDGA and EDGX each have entered into an agreement with FINRA and an agreement with ISE, which holds a minority interest in both EDGA and EDGX, under which FINRA and ISE perform certain regulatory functions on behalf of EDGA and EDGX. Under the agreement with FINRA, FINRA performs certain regulatory functions relating to member firm registration, examination, investigations, disciplinary and arbitration proceedings. Under the agreements with ISE, ISE performs certain surveillance and regulatory services, including reviewing trading activity for obvious errors and certain potentially violative conduct by EDGA and EDGX members and providing legal reviews and advice upon EDGA or EDGX's request. Notwithstanding these agreements, EDGA and EDGX retain ultimate regulatory responsibility under the Exchange Act.

NYSE, NYSE Amex and NYSE Arca

Since July 30, 2007, FINRA has conducted financial, operational and sales practice oversight over the members of NYSE Euronext's U.S. securities exchanges. In addition, as of June 14, 2010, FINRA assumed certain additional regulatory functions for these exchanges pursuant to an agreement. As a result, FINRA performs the market surveillance and enforcement functions for NYSE Euronext's U.S. securities exchanges, although NYSE Euronext's U.S. securities exchanges retain ultimate regulatory responsibility for the regulatory functions performed by FINRA under such agreement. NYSE Regulation, Inc., an indirect not-for-profit subsidiary of NYSE Euronext, oversees FINRA's performance of these services, enforces listed company compliance with applicable standards, and oversees regulatory policy determinations, rule interpretation and regulation related rule development. NYSE Regulation, employing approximately 50 people as of December 31, 2010, consists of the following functional groups:

Listed Company Compliance;

Regulatory Policy and Management;

StockWatch; and

Regulation Administration.

Listed Company Compliance

NYSE Euronext's U.S. securities exchanges require their listed companies to meet their respective original listing criteria at listing, and to thereafter maintain compliance with their respective continued listing standards. Listed Company Compliance monitors and enforces compliance with these standards.

Regulatory Policy and Management

Regulatory Policy and Management has primary responsibility for overseeing the regulation related rule development and interpretation functions for NYSE Euronext's U.S. securities exchanges and overseeing FINRA's performance of its contractual obligations to NYSE Euronext's U.S. securities exchanges.

StockWatch

StockWatch conducts limited real-time monitoring of trading activity on the facilities of NYSE Euronext's U.S. securities exchanges. NYSE Euronext refers suspicious activity to FINRA for further investigation.

Edgar Filing: NYSE Euronext - Form 425

In addition, NYSE Euronext's U.S. securities exchanges that maintain options trading markets have entered into a joint agreement with the other U.S. options exchanges for conducting options insider trading surveillances.

A-372

Table of Contents

NYSE Euronext's U.S. securities exchanges continue to have regulatory responsibility for these functions, which are monitored by NYSE Regulation. NYSE Euronext's U.S. securities exchanges have also entered into several agreements with FINRA and other U.S. securities exchanges pursuant to which NYSE Euronext's U.S. securities exchanges are relieved of regulatory responsibility with respect to enforcement of common rules relating to common members.

Structure, Organization and Governance of NYSE Regulation

NYSE Euronext has an agreement with NYSE Regulation to provide it adequate funding to allow it to perform or oversee, as applicable, the regulatory functions of NYSE Euronext's U.S. securities exchanges. NYSE Regulation can levy fines on members, on behalf of NYSE Euronext's U.S. securities exchanges, as part of disciplinary action. Income from fines is used only to fund non-compensation expenses of NYSE Regulation. The use of fine income by NYSE Regulation is subject to specific review and approval by the NYSE Regulation board of directors. No regulatory fees, fines or penalties collected by NYSE Regulation may be distributed to any entity other than NYSE Regulation.

NYSE Regulation incorporates several structural and governance features designed to ensure its independence, given NYSE Euronext's status as a for-profit and listed company. NYSE Regulation is a separately incorporated, not-for-profit entity. Each director of NYSE Regulation (other than its chief executive officer) must be independent under the independence policy of the NYSE Euronext board of directors, and a majority of the members of the NYSE Regulation board of directors and its compensation committee and nominating and governance committee must be persons who are not directors of NYSE Euronext.

To reduce the conflicts that can arise from self listing, NYSE Regulation is responsible for all listing compliance decisions with respect to NYSE Euronext's listing on the NYSE. In addition, NYSE Regulation prepares for its board of directors quarterly reports summarizing its monitoring of NYSE Euronext's compliance with NYSE listing standards, and its monitoring of the trading of NYSE Euronext shares. A copy of these reports must be forwarded to the SEC. In addition, NYSE rules require an annual review by an independent accounting firm to ensure that NYSE Euronext is in compliance with the listing requirements, and a copy of this report must be forwarded to the SEC.

NYSE Regulation has adopted structural and governance standards in compliance with applicable U.S. federal securities laws, and in particular, Section 6 of the Exchange Act with respect to fair representation of members.

Commodities Exchange Regulation

NYSE Euronext's U.S. futures exchange, NYSE Liffe US, is subject to extensive regulation by the CFTC under the Commodity Exchange Act (which is referred to in this document as the "CEA"). The CEA generally requires that futures trading conducted in the United States be conducted on a commodity exchange designated as a contract market by the CFTC, subject to limited exceptions. It also establishes that non-financial criteria for an exchange be designated to list futures and options contracts. Designation as a contract market for the trading of specified futures contracts is non-exclusive. This means that the CFTC may designate additional exchanges as contract markets for trading in the same or similar contracts. As a DCM, NYSE Liffe US is an SRO that has instituted detailed rules and procedures to comply with the "core principles" applicable to it under the CEA. NYSE Liffe US also has surveillance and compliance operations and procedures performed in part by the National Futures Association, as NYSE Liffe US's compliance service provider, to monitor and enforce compliance with its rules. Holdco expects that NYSE Liffe US will be periodically reviewed by the CFTC with respect to the fulfillment of NYSE Liffe US's self-regulatory programs in these areas.

Table of Contents***Sarbanes-Oxley Act of 2002***

The Sarbanes-Oxley Act of 2002 imposes a stringent set of corporate governance, reporting and other requirements on both U.S. and non-U.S. publicly listed companies. Significant resources are necessary for issuers to come into and remain in compliance with the requirements of the Sarbanes-Oxley Act, which has had an impact on the ability of NYSE Euronext's, and may continue to have an impact on the ability of NYSE Euronext's and Holdco's U.S. exchanges, to attract and retain listings. Non-U.S. issuers may choose to list with non-U.S. securities exchanges exclusively without a secondary listing in the United States because they perceive the U.S. regulatory requirements and the U.S. litigation environment as too cumbersome and costly, and the number of U.S. companies that have chosen to do so has increased in recent years. At the same time, both U.S. and non-U.S. companies are increasingly seeking to access the U.S. capital markets through private transactions that do not involve listing on a U.S. exchange, such as through Rule 144A transactions directed exclusively to mutual funds, hedge funds and other large institutional investors. The SEC and the Public Company Accounting Oversight Board have taken steps to address some of these concerns through initiatives that include revisions to the rules relating to internal control over financial reporting established under Section 404 of the Sarbanes-Oxley Act, rules that facilitate the delisting and deregistration of securities issued by some non-U.S. companies and rules that exempt some non-U.S. companies from U.S. GAAP reconciliation requirements. It is unclear whether U.S. or non-U.S. companies will exhibit greater interest in accessing the U.S. public markets as a result of these changes. Moreover, the rules facilitating a non-U.S. company's ability to delist its securities and exit the U.S. public company reporting system may make it more difficult for Holdco to retain listings of non-U.S. companies and may diminish the perception of Holdco's U.S. exchanges as premier listing venues, which could adversely affect Holdco's business, financial condition and results of operations.

Dodd-Frank Wall Street Reform and Consumer Protection Act

More recently, another significant piece of regulatory legislation was enacted, the Dodd-Frank Wall Street Reform and Consumer Protection Act (which is referred to in this document as the "Dodd-Frank Act"), which could make it difficult for Holdco's U.S. exchanges to compete with non-U.S. exchanges for the secondary listings of non-U.S. companies and adversely affect its competitive position. Few provisions of the Dodd-Frank Act became effective immediately upon signing and many of its provisions require the adoption of regulations by various U.S. federal agencies and departments. Furthermore, the legislation contains substantial ambiguities, many of which will not be resolved until regulations are adopted. As a result, it is difficult to predict all of the effects that the legislation will have on Deutsche Börse Group and NYSE Euronext, although it is expected to impact their businesses in various ways. For instance, NYPC, NYSE Euronext's joint venture derivatives clearing organization, could become subject to heightened prudential standards to be adopted by the FTC as well as to the Federal Reserve's back-up authority to regulate financial market utilities that are primarily regulated by the SEC/CFTC, if NYPC is designated as systemically important. In addition, other Deutsche Börse and NYSE Euronext subsidiaries that are currently regulated in their home jurisdictions abroad could be required to register with U.S. regulatory authorities and be subject to overlapping regulation. The Dodd-Frank Act requires the SEC and CFTC to adopt position limits on the trading of certain futures, swap and security-based swap products that may trade today or in the future on the exchanges owned by Deutsche Börse and/or NYSE Euronext. Such position limits could cause market participants to change their trading behavior and could result in Deutsche Börse Group and NYSE Euronext experiencing a loss of transaction-based revenue. The Dodd-Frank Act creates alternative trading venues for certain derivatives which could potentially result in the migration of certain contracts away from existing futures exchanges and onto these newly established execution facilities. The Dodd-Frank Act also provides regulators, such as the SEC, with enhanced examination and enforcement authorities, which could result in Deutsche Börse Group's and NYSE Euronext's regulated subsidiaries incurring increased costs to respond to examinations or other regulatory inquiries.

Financial Reform

Uncertainties arise in the context of financial reform and the cash and derivatives businesses in Europe, where the European Commission's public consultation on a Regulation on OTC derivatives central counterparties

Table of Contents

and trade repositories (formerly, the European Market Infrastructure Regulation concluded on July 9, 2010.) Deutsche Börse, NYSE Euronext and over two hundred other parties responded with detailed written submissions. The European Commission's aim is to achieve political agreement (by the Member States and the European Parliament) by the end of 2011. This would enable EMIR to be implemented in 2012, in line with the G20 timetable. The current emphasis in EMIR is on mandating Central Counterparty (which is referred to in this document as "CCP") clearing for eligible OTC Contracts. However, detailed discussion continues about regulatory standards for CCPs in general and there are risks of potentially burdensome and costly operational requirements being imposed on CCPs. In addition threats exist to the current zero risk weighting of collateral lodged with CCPs. The European legislative process has not yet been completed and may, depending on its outcome, impact Deutsche Börse Group's and NYSE Euronext's European businesses. There are also changes planned for the domestic regimes in Europe. On July 26, 2010, the UK Government announced its plans for reforming the UK regulatory regime, to involve the abolition of the FSA and its replacement with two separate regulators, one covering prudential risks and the other conduct of business matters. This would mean that, from 2013, Holdco's London trading market of NYSE Liffe would be overseen by a new regulator, the Financial Conduct Authority, whereas Holdco's London-based clearing activities would be regulated by the Prudential Regulation Authority, a new subsidiary of the Bank of England. All of these changes could affect Holdco's business in the future.

Supervision of Holdco and its Subsidiaries at the Group Level

Regarding group-wide supervision of Holdco, it has not yet been decided which regulator or regulators will exercise supervision. However, there will be no change in the regulatory landscape at the level of Holdco's subsidiaries due to the combination as such as the seat of residence of these entities will remain unchanged. Thus, for instance Deutsche Börse and its regulated subsidiaries in Germany will remain to be regulated by the relevant German supervisory authorities, and NYSE Euronext and its U.S. subsidiaries, as well as the U.S. entities of Deutsche Börse Group, will remain to be regulated by the SEC.

The Delaware Trust and the Dutch Foundation

In connection with obtaining regulatory approval of the combination in 2007 of NYSE Group, Inc. and Euronext N.V., NYSE Euronext implemented certain special arrangements consisting of two standby structures, one involving a Dutch foundation (*stichting*) and one involving a Delaware trust. The Dutch foundation is empowered to take certain actions to mitigate the effects of any material adverse change in U.S. law that has an extraterritorial impact on non-U.S. issuers listed on Euronext markets, non-U.S. financial services firms that are members of Euronext markets or holders of exchange licenses with respect to the Euronext markets. The Delaware trust is empowered to take certain actions to mitigate the effects of any material adverse change in European law that has an extraterritorial impact on the non-European issuers listed on NYSE Group securities exchanges, non-European financial services firms that are members of any NYSE Group securities market or holders of exchange licenses with respect to the NYSE Group securities exchanges.

If a material adverse change in law occurs with respect to a Euronext market or a NYSE Group securities exchange (which is referred to in this section as an "affected subsidiary") and continues after certain cure periods, the board of trustees of the Delaware trust (in the case where the affected subsidiary is a NYSE Group securities exchange) or the board of directors of the Dutch foundation (in the case where the affected subsidiary operates a Euronext market), as applicable, may exercise certain remedies which may include, subject to certain conditions and requirements (including cure periods), (1) the delivery of confidential or public and non-binding or binding advice to Euronext N.V. or NYSE Group, as applicable, and NYSE Euronext with respect to the affected subsidiary; (2) the assumption of certain limited management responsibilities of NYSE Group or its subsidiaries or Euronext or its subsidiaries, as applicable, with respect to the affected subsidiary; (3) the exercise of a call option on priority shares or preference shares which hold special approval or initiative rights on certain matters with respect to NYSE Group, Euronext, or any of their subsidiaries; and (4) the exercise of a call option on a majority of the ordinary or common shares of NYSE Group, Euronext N.V. or any of their respective affected subsidiaries.

Table of Contents

However, such remedies may be imposed only if and to the extent that such remedy (1) mitigates the effects of any change in law so that such change ceases to be a material adverse change of law and (2) is the least intrusive remedy available. In addition, prior to the exercise of a call option, the board of directors of the Dutch foundation or the board of trustees of the Delaware trust, as applicable, must first determine that no other remedy can mitigate the effect of the material adverse change of law and must satisfy certain other requirements. If and when any of the conditions of a material adverse change of law cease, any and all remedies will be immediately unwound.

DESCRIPTION OF THE SHARES OF HOLDCO

The following is a description of the material terms of the shares of Holdco. You should also refer to the form of Holdco's articles of association, and the applicable provisions of Dutch law. The form of Holdco's articles of association and Holdco's Rules for the Board of Directors that will be in effect as of the completion of the combination subject to further changes for obtaining the required regulatory approvals are attached as Annex B and C, respectively, to this document. It is possible, however, that these forms will change in connection with obtaining the required regulatory approvals for the combination.

Capital Increase of a Dutch Public Limited Liability Company

Under Dutch law, the authorized share capital (*maatschappelijk kapitaal*) is the maximum amount of capital for which shares in a Dutch public limited liability company (*naamloze vennootschap*) can be validly issued. A Dutch public limited liability company may therefore only issue shares up to the aggregate amount of its authorized share capital as stipulated in its articles of association. Conceptually authorized share capital under Dutch law differs from the share capital (Grundkapital) of a German public limited liability company (*Aktiengesellschaft*), which consists of the issued shares. Furthermore, the authorized share capital of a Dutch public limited liability company is not to be mistaken for the term authorized capital (*Genehmigtes Kapital*) for a German public limited liability company and does not entail an authorization for the management board to issue new shares.

The authority to issue new shares in a Dutch public limited liability company is vested in the general meeting of shareholders. However, Dutch law provides that the general meeting of shareholders may delegate the authority to issue new shares to the management board.

Dutch law provides that at all times at least 20% of the authorized share capital must be issued (*geplaatst*) and that shares must be paid up (*worden volgestort*) immediately upon issuance.

Any increase of a Dutch public limited liability company's issued share capital (*geplaatst kapitaal*) exceeding its authorized share capital, requires a prior increase of the authorized share capital by way of an amendment of the articles of association to be adopted by the general meeting of shareholders. Such amendment of the articles of association is effected by the subsequent execution of a notarial deed of amendment before a Dutch civil law notary. Typically, the general meeting of shareholders will in its resolution authorize a Dutch civil law notary, a deputy or notarial assistant of the Dutch civil law notary to execute such deed of amendment.

If shares are to be issued by a Dutch public limited liability company resulting in the issued share capital to exceed the authorized share capital, the following legal actions may be taken:

First, the general meeting of shareholders shall adopt a resolution to amend the articles of association to increase the authorized share capital.

Furthermore, the general meeting of shareholders shall resolve to issue new shares subject to the condition precedent of the amendment of the articles of association becoming effective, or will delegate the authority to issue new shares to the management board. The latter option may be useful if at the time of the resolution of the general meeting of shareholders, the exact number of shares to be issued is yet to be determined, which in the case at hand is, among others, dependent on the number of Deutsche Börse shares that have been tendered in the exchange offer. In this case, the issuance of new shares will be decided by the management board, and such resolution is again subject to the condition precedent of the amendment of the articles of association increasing the authorized share capital becoming effective.

Pursuant to the resolution of the general meeting of the shareholders or the management board, as the case may be, to issue new shares, the company and the respective subscriber of the new shares will execute a deed of issuance of shares, which will also be subject to the condition precedent of the amendment of the articles of association increasing the authorized capital becoming effective.

Table of Contents

As a final step, the deed of amendment of the articles of association of the company regarding the increase of the authorized share capital will be executed, thus giving effect to amendment of the articles of association, the resolution of the general meeting of shareholders, or the management board resolution, as the case may be, to issue new shares as well as the deed of issuance and thereby the issuance of the new shares.

As described below in section Issuance of Holdco Shares for the Completion of the Exchange Offer and the Merger, the Holdco shares which are required as consideration for the exchange offer respectively in the context of the merger will be issued in accordance with this procedure. Because of the legal requirement that at least 20% of the authorized share capital must be issued and paid up immediately, and taking into account the number of Holdco shares to be issued, the increase of the authorized share capital required for the issuance of shares will have to become effective only immediately before the issuance of the shares itself.

Current Authorized and Issued Share Capital

As of the date of its incorporation on February 10, 2011, Holdco's authorized share capital amounted to 225,000, consisting of 180,000 ordinary shares with a nominal value of 1.00 per share and 45,000 D shares with a nominal value of 1.00 per share (referred to as D Shares hereinafter). Ordinary shares and D Shares can only be issued in registered form. As of the date of this document, Holdco's issued share capital amounts to 45,000, consisting of 45,000 D shares with a nominal value of 1.00 per share. All of Holdco's issued shares are fully paid up.

Issuance of Holdco Shares for the Completion of the Exchange Offer and the Merger

On May 2, 2011, Holdco's general meeting of shareholders resolved to amend Holdco's articles of association and to increase its authorized share capital from 225,000 to 1,000,000,000 consisting of 500,000,000 ordinary shares with a nominal value of 1.00 per share (referred to as Holdco shares in this document) and 500,000,000 preference shares with a nominal value of 1.00 per share. In the resolution to increase the authorized share capital each (deputy) civil law notary or notarial assistant of Linklaters LLP in Amsterdam was authorized, each as sole signatory, to execute the amendment of the articles of association. The notarial deed of amendment is to be executed upon request of Holdco as soon as the conditions for the completion of the exchange offer are fulfilled.

By shareholders' resolution on May 2, 2011, Holdco's general meeting has further resolved to authorize the Holdco board of directors for a period of five years from the date such resolution has been adopted to issue, or grant rights to subscribe for, Holdco shares, and to exclude or restrict preemption rights in respect of Holdco shares issued pursuant to its authority to issue such shares. The authority for the Holdco board of directors to issue, or grant rights to subscribe for, Holdco shares is limited to the aggregate of:

such number of Holdco shares as is required to fulfill its obligations under the exchange offer, the merger and several other measures in connection with the combination; and

an additional 100,000,000 Holdco shares.

The aforementioned resolution also entails the authority to issue preference shares as described in detail below in section Preference Shares.

The current sole shareholder of Holdco, the Stichting Alpha Beta Netherlands, has agreed in the context of the above resolutions of the general meeting not to withdraw these resolutions without consent of Holdco.

On the basis of the above resolutions of the general meeting Holdco is enabled to fulfill its obligations to deliver Holdco shares, including the Holdco offer shares, under the exchange offer and the merger without further resolutions or other action being required from Holdco's general meeting of shareholders.

Table of Contents

The issuance of these Holdco shares in accordance with the actions set forth in section Capital Increase of a Dutch Public Limited Liability Company above will be effected as follows:

After satisfaction of all prerequisites for the completion of the exchange offer, the Holdco board of directors will, pursuant to its delegated authority to issue shares, resolve to issue such number of Holdco shares as is required to fulfill the obligation to deliver Holdco shares under the exchange offer and the merger. This resolution will be subject to the condition precedent that Holdco's authorized share capital is increased by way of the amendment of its articles of association becoming effective.

Holdco will then in combination with the subscribers, i.e. Deutsche Bank AG as central settlement agent and exchange escrow agent for the Deutsche Börse shareholders accepting the exchange offer and the escrow agent (to be named) for the NYSE Euronext shareholders in connection with the merger, enter into one or more deeds of issuance regarding the issuance of the respective Holdco shares which will also be subject to the condition precedent that Holdco's authorized share capital is increased by way of the amendment of its articles of association becoming effective.

Finally, Holdco will, in accordance with the requirements of the resolution of the general meeting to increase the authorized share capital, instruct the civil law notary, his deputy or notarial assistant of Linklaters LLP in Amsterdam to execute the notarial deed of amendment of the Holdco articles of association, thereby giving effect to the amendment of the articles of association regarding the increase of the authorized capital and, at the same time, to the board resolution to issue the Holdco shares as well as the deed or deeds of issuance of Holdco shares.

Ordinary shares and preference shares can only be issued in registered form. The ordinary shares will be embodied in one or more global share certificates, deposited with the relevant securities depository. A securities depository is not determined yet. Possibly, there will be two securities depositories for purposes of the settlement of Holdco shares. Thus, it is possible that there will be one central securities depository in respect of the global share certificate for the Holdco shares to be admitted to trading on the Frankfurt Stock Exchange and Euronext in Paris and another central securities depository in respect of the Holdco shares admitted to trading on the New York Stock Exchange. No share certificates will be issued in respect of preference shares.

The Holdco offer shares as well as the Holdco shares required for the merger will be issued for onward delivery through the custody banks system, in accordance with their regular settlement procedures for equity securities, to the Custodian Banks and any other intermediary custodian for credit to securities accounts of the shareholders of Deutsche Börse who validly tendered and did not effectively withdraw their Deutsche Börse shares in the exchange offer and the securities accounts of the NYSE Euronext stockholders. These newly issued Holdco shares are issued against contribution in kind consisting of tendered Deutsche Börse shares and NYSE Euronext shares.

The Holdco shares, including the Holdco offer shares, will be freely transferable and capable of being encumbered with a right of pledge or usufruct. The Holdco offer shares will have full dividend rights since the incorporation of Holdco on February 10, 2011.

Preference Shares

Pursuant to the resolution by the general meeting of Holdco's shareholders which was adopted on May 2, 2011, the Holdco board of directors is also designated as the competent corporate body to issue preference shares. The authority for the Holdco board of directors to issue, or grant rights to subscribe for, preference shares is in the aggregate limited to such number as shall not exceed the lower of (1) the maximum number of unissued preference shares forming part of the authorized share capital of Holdco and (2) a number of preference shares with an aggregate nominal amount equal to the aggregate nominal amount of the outstanding Holdco shares at the time of the relevant issue of preference shares. At the date of this document, the Holdco board has not made use of such power and currently does not intend to make use of it.

Table of Contents

Preference shares may in the future and in specific circumstances only be issued by Holdco to an independent entity, which will most likely be a Dutch foundation (*stichting*). The preference shares may be issued only with the objective of safeguarding the interests of Holdco, its businesses and the interests of shareholders and other stakeholders involved, from acquisitions of Holdco shares which could jeopardize Holdco's independence, continuity or (corporate) identity, including in particular an unsolicited attempt to achieve a change of control over or management of Holdco. An issue of preference shares, or the ability of Holdco to issue preference shares in the future, may have the effect of preventing, discouraging or delaying an unsolicited attempt to achieve a change of control or management and may enhance the ability of the Holdco board of directors to review and consider any proposals or actions of a bidder and/or any alternative courses of action. Holdco's articles of association will provide that within 24 months following the day of issuance of preference shares, a general meeting of shareholders shall be held to consider the repurchase or cancellation of the Holdco preference shares. If the general meeting of shareholders does not resolve to repurchase or cancel the preference shares, then each 12 months after the last general meeting of shareholders at which such resolution was on the agenda, a general meeting of shareholders shall be held to consider the repurchase or cancellation of the preference shares, until no preference shares remain outstanding.

D Shares

It is contemplated that on or about the same date as the issue of Holdco shares as described above, immediately after the issuance of such shares, the D shares will be cancelled or repurchased and subsequently cancelled by Holdco.

Unlike the Holdco shares, the D shares can be cancelled against repayment of their nominal value. The D shares have only limited dividend rights.

Except as described above, there have been no changes in Holdco's share capital since Holdco's incorporation on February 10, 2011.

Issued Share Capital after Completion of the Combination

Holdco expects that, immediately following the completion of the combination, there will be approximately 320.2 million ordinary shares issued, assuming that all of the outstanding Deutsche Börse shares are exchanged in the exchange offer.

Holdco further expects that, immediately following the completion of the combination, there will be no preference shares outstanding.

Transfer of Holdco Shares and the Preference Shares

The Holdco shares and preference shares will be freely transferable and capable of being encumbered with a right of pledge or usufruct. A transfer of non-listed ordinary shares or preference shares will require a written instrument and, if Holdco is not a party thereto followed either by Holdco's written acknowledgement of such transfer or service of (a true copy of) the relevant transfer instrument in accordance with Dutch law. Shares listed on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris and any other stock exchange where Holdco shares or depository receipts of Holdco shares are listed, will be transferred in accordance with the applicable laws.

Shareholders Register

Following the completion of the combination, a register of shareholders will be maintained by or on behalf of Holdco, which will be regularly updated. The register may, in whole or in part, be kept in more than one copy and at more than one address. Part of the register of shareholders may be kept outside of the Netherlands in order

Table of Contents

to comply with applicable foreign statutory provisions or rules of the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris and any other stock exchange where Holdco shares or depositary receipts of Holdco shares are listed.

Issuance of Shares

Holdco's articles of association provide that Holdco may issue shares, or grant rights to subscribe for shares, pursuant to a resolution of Holdco's general meeting of shareholders. Holdco's articles of association further provide that Holdco's general meeting of shareholders may delegate the authority to issue shares, or grant rights to subscribe for shares, to another corporate body. Pursuant to Holdco's articles of association and Dutch law, the period of delegation may not exceed five years, but may be renewed by a resolution of Holdco's general meeting of shareholders for periods of up to five years. If not otherwise stated in the resolution approving the delegation, the delegation of the authority to issue shares, or to grant rights to subscribe for shares, is irrevocable. The resolution delegating the authority to issue shares, or to grant rights to subscribe for shares, must specify the number of shares which may be issued as well as the class of shares.

Shares may in principle not be issued at less than their nominal value. No resolution is required for an issue of shares pursuant to the exercise of a previously granted right to subscribe for such shares.

Preemption Rights

Dutch law and Holdco's articles of association generally give Holdco's shareholders preemption rights to subscribe on a pro rata basis for any issue of new ordinary shares or, upon a grant of rights, to subscribe for ordinary shares. Exceptions to these preemption rights include (1) the issue of ordinary shares issued against non-cash contributions, (2) the issue of ordinary shares to Holdco's employees or the employees of a group company as defined in Section 2:24b of the Dutch Civil Code, (3) the issue of shares to persons exercising a previously granted right to subscribe for shares and (4) the issue of preference shares. Holders of preference shares will have no right of preemption on ordinary shares or preference shares.

A shareholder has the legal right to exercise preemption rights for at least two weeks after the date of the announcement of the issue or grant. Holdco will announce any issuance of shares with rights of preemption and the period of time within which such rights of preemption may be exercised in the Dutch Government Gazette (*Staatscourant*) and in a nationally distributed newspaper, unless the announcement is made to all holders of shares in writing to the address provided by each of them, and furthermore in such other manner as may be required to comply with the rules of the New York Stock Exchange, the Frankfurt Stock Exchange, Euronext Paris and any other stock exchange where Holdco shares or depositary receipts of Holdco shares are listed. However, Holdco's general meeting of shareholders, or the Holdco board of directors if so designated by Holdco's general meeting of shareholders, may exclude or restrict preemption rights. A resolution by Holdco's general meeting of shareholders to delegate to the Holdco board of directors the authority to exclude or restrict preemption rights requires a majority of at least two-thirds of the valid votes cast at the general meeting of shareholders if less than half of the Holdco's issued share capital is present or represented. A majority is sufficient if more than half of the Holdco's issued share capital is present or represented. If not otherwise stated in the resolution to delegate, the delegation is irrevocable. A resolution by Holdco's general meeting of shareholders to delegate the authority to exclude or restrict preemption rights can only be adopted upon a proposal from its board of directors, must be for a fixed period not exceeding five years and is only possible if the Holdco board of directors is also authorized to issue shares. If Holdco's general meeting of shareholders has not delegated this authority to the Holdco board of directors, Holdco's general meeting of shareholders is the corporate body authorized to restrict or exclude preemption rights.

Reduction of Share Capital

The general meeting of shareholders may resolve to cancel shares or to otherwise decrease Holdco's share capital subject to and in accordance with Dutch law, provided that pursuant to Holdco's articles of association as

Table of Contents

will be in effect following completion of the combination, a resolution to reduce Holdco's issued capital can only be adopted at the proposal of the Holdco board of directors, and provided that a resolution to cancel shares can relate only to shares held in treasury or preference shares (regardless of whether they are held in treasury). Any reduction of Holdco's share capital by way of a decrease of the nominal value of shares without repayment of capital must be made pro rata to all shares of the same class. Such pro rata requirement may be waived if all shareholders of that class so agree.

A resolution in respect of a capital reduction requires a majority of at least two-thirds of the votes cast, if less than half the issued capital is present or represented at the relevant general meeting of shareholders. If there are different classes of shares in issue, a resolution to reduce Holdco's share capital requires a prior or simultaneous resolution of approval by holders of at least two-thirds of shares of each class whose rights are prejudiced. The resolution in respect of capital reduction will be filed with the Trade Register of the Chamber of Commerce in Amsterdam and the same will be announced in a daily newspaper with national circulation in the Netherlands. Within two months after such announcement, any creditor may, by filing a petition with the competent court, object to the resolution, stating the security requested by such creditor for claims against Holdco. Unless the court decides otherwise, Holdco must provide security for, or otherwise guarantee, the satisfaction of such claims, failing which the objection will be upheld. This will not apply if the payment of the creditor's claims is sufficiently secured or if Holdco's financial condition provides sufficient security that the claims will be satisfied, nor is security required if Holdco reduces its share capital on account of losses incurred, to an amount which is not less than the value of Holdco's equity capital. A resolution in respect of a capital reduction will not take effect as long as any objection may be instituted during the aforementioned two-month period. If an objection is instituted in a timely fashion, the resolution will take effect only upon the withdrawal of the objection or upon a court order setting aside the objection. If Holdco reduces its share capital on account of losses incurred to an amount which is not less than the value of Holdco's equity capital, the resolution will have immediate effect (unless the resolution provides otherwise).

Acquisition of Own Shares

Holdco may acquire its own shares subject to and in accordance with the limits prescribed by Dutch law provided that (1) the nominal value of the shares Holdco and Holdco's subsidiaries hold at any time, in ownership or pursuant to a right of pledge, will not exceed 50% of Holdco's issued share capital and (2) Holdco's distributable reserves are at least equal to the purchase price. Subject to such threshold, Holdco may acquire fully paid shares at any time for no consideration (*om niet*). An acquisition of Holdco shares for value can only be effected if the general meeting of shareholders has so authorized the Holdco board of directors, which authorization will remain valid for a maximum period of 18 months and must specify the number of shares which may be acquired, the manner in which they may be acquired and the limits within which the price must be set. Authorization is generally not required for the acquisition of shares in order to transfer them to Holdco's employees or the employees of a group company. The actual acquisition may only be effected by a resolution of the Holdco board of directors.

Neither Holdco nor Holdco's subsidiaries may vote shares held by Holdco and/or Holdco's subsidiaries or in respect of which Holdco and/or Holdco's subsidiaries are a pledgee or usufructuary. Such shares may also not be counted for quorum purposes.

It is expected that prior to the completion of the combination, Holdco's general meeting of shareholders will authorize the Holdco board of directors to acquire fully paid-up ordinary shares and preference shares in Holdco's own capital, which authorization will be valid for a period of eighteen months from the date of the resolutions under the following conditions:

the acquisition price of ordinary shares will be between an amount equal to the nominal value of the ordinary shares and an amount equal to 110% of the average market price of these shares on the stock markets of the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris (the

Table of Contents

market price being the average of the closing price on each of the 30 consecutive days of trading preceding the three days prior to the date of repurchase);

the acquisition price of preference shares will be the nominal value of such preference shares; and

the number of shares that may be acquired is limited by the maximum number of shares that Holdco is allowed to repurchase and hold at any moment in accordance with current or future legislation and Holdco's articles of association.

General Meeting of Shareholders and Voting Rights

Holdco's annual general meeting of shareholders must be held within six months after the end of each fiscal year. An extraordinary general meeting of shareholders may be held as often as is deemed necessary by the Holdco board of directors or chief executive officer.

Shareholders representing alone or in aggregate at least one-tenth of Holdco's issued share capital may request that a general meeting of shareholders be convened, and any such request must set out in detail the matters to be considered.

The notice convening any general meeting of shareholders must include an agenda indicating the items for discussion, as well as any proposals for the agenda. Following the completion of the combination, shareholders holding at least 1% of Holdco's issued share capital or shares representing a value of at least 50,000,000 may submit proposals for the agenda. Provided Holdco receives such proposals no later than the 60th day before the date of the general meeting of shareholders, and provided that no significant interest opposes such request, Holdco will have the proposals included in the notice for the meeting.

General meetings of shareholders will be held in the Netherlands in Amsterdam, at Schiphol Airport (municipality of Haarlemmermeer, the Netherlands), other territories of the municipality of Haarlemmermeer, the Netherlands or in any other municipality in the Netherlands. Each share confers the right to cast one vote on the holder of the same. Except where Holdco's articles of association or Dutch law prescribe otherwise, all resolutions are passed by a simple majority of the votes cast, without a quorum being required. The rights to vote attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See Description of the Shares of Holdco Ownership and Voting Limits in Holdco Articles of Association.

Except for certain resolutions as described in this document, there is no attendance quorum at a general meeting of shareholders. Pursuant to Holdco's articles of association, holders of registered shares wishing to attend any general meeting of shareholders (and to vote thereat) are required to express their intention to do so to Holdco in writing no later than the time and place mentioned in the notice. The rights to attend general meetings of Holdco shareholders attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See Description of the Shares of Holdco Ownership and Voting Limits in Holdco Articles of Association.

Following execution of the first deed of amendment, general meetings of shareholders can be convened by the Holdco board of directors by a notice, specifying the subjects to be discussed, the place and the time of the meeting and admission and participation procedure, issued at least 42 days before the meeting. All convocations, announcements, notifications and communications to shareholders must be made in accordance with the relevant provisions of Dutch law. Holdco's articles of association stipulate that a general meeting of shareholders shall be convened by electronic means of communication which are directly and permanently accessible until the meeting (for example, by placing it on its website) and furthermore in such other manner as may be required to comply with any applicable rules of the New York Stock Exchange, the Frankfurt Stock Exchange and any other stock exchange where Holdco shares or depositary receipts of shares are listed. The convocation and other notices may also occur by means of sending an electronically transmitted legible and reproducible message to the address of those shareholders which consented to this method of notice. As a prerequisite to attending the general meeting

Table of Contents

of shareholders and, to the extent applicable, casting of votes, the shareholders will be obliged to inform the Holdco board of directors in writing within the time frame mentioned in the convening notice and such notice must be received by the Holdco board of directors on the day mentioned in the convening notice. The Holdco board of directors will set a record date on the 28th day prior to the date of the general meeting of shareholders.

Natural and legal persons will be entered in the German or U.S. share register as shareholders with voting rights, so long as the holder submits to Holdco an application for registration containing the holder's name, nationality or registered office and address and an explicit declaration that the holder has acquired the registered shares in its own name and for its own account.

Trustees and nominees will be entered as shareholders with voting rights upon application and provided that they have executed an agreement with Holdco in which the restrictions on entry in the share register and the trustee or nominee's duty to report to Holdco regarding persons who hold shares through the trustee or nominee are defined. No one trustee or nominee may be entered as a shareholder with voting rights in respect of more than 5% of the shares issued. Shares held through a trustee or nominee that exceed the limit or for which no agreement exists will be registered without voting rights. The 5% limit on voting rights does not apply to securities clearing organizations such as the DTCC. As such, any shares held through DTCC will be afforded full voting rights.

Dividends

General

Under Dutch law distributions on shares may only be made up to an amount equal to the part of the company's equity that exceeds the aggregate of the issued capital and the reserves, which must be maintained pursuant to the laws of the Netherlands.

Any final distribution of profits may only be made after the adoption of Holdco's own (*i.e.* non-consolidated) annual accounts of the preceding year, which will be used as the basis for determining if the distribution of profits is legally permitted.

A Dutch public limited liability company is allowed to pay interim dividends on its shares only if its articles of association so permit and only if the requirement set out above is met as evidenced by an interim statement of assets and liabilities relating to the condition of such assets and liabilities on a date no earlier than the first day of the third month preceding the month in which the resolution to distribute interim dividend is made public.

Pursuant to Holdco's current articles of association and its articles of association following completion of the combination, a claim of a shareholder for payment of a distribution on shares will be barred after five years have elapsed from the date such payment became due. Any funds not distributed due to a claim for such distribution being barred will be added to Holdco's Reserves, without a resolution being agreed.

The rights to receive dividends and other distributions attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See Description of the Shares of Holdco Ownership and Voting Limits in Holdco Articles of Association.

Dividend Restrictions and Payment Mechanics

According to Holdco's articles of association to be in effect following completion of the combination, a preferred dividend is to be paid on each outstanding preference share (if any) out of the profits earned in a financial year. If in a financial year, no profit is made or the profits are insufficient to allow the distribution, the deficit will be paid at the expense of the profits earned in the following financial years or, if possible, at the expense of any freely distributable reserve of Holdco. After this dividend is paid, the Holdco board of directors will, in its sole discretion, determine which part of the profits remaining will be reserved. The allocation of

Table of Contents

profits remaining on the Holdco shares will be determined by the general meeting of the shareholders provided that no further distributions will be made on the preference shares.

Holdco will pay any dividends or other cash distributions through customary procedures of the clearing systems.

As of the date of the publication of this document, no paying and depository agent has been determined.

Amendment of Articles of Association, Dissolution and Liquidation

Resolutions of Holdco's general meeting of shareholders to amend its articles of association, or to dissolve, to transform, to merge or to demerge Holdco may only be taken at the proposal of the Holdco board of directors and provided that any such resolution may be taken with a majority of more than two-thirds of the votes validly cast at a meeting for which no quorum requirements apply.

For so long as Holdco controls, directly or indirectly, any U.S. regulated subsidiary (as defined below – see Description of the Shares of Holdco Ownership and Voting Limits in Holdco Articles of Association), before any amendment to any provision of the Holdco articles of association may become effective, it must be submitted to the board of directors of each U.S. regulated subsidiary. If any or all of such boards of directors determine that such amendment must be filed with, or filed with and approved by, the SEC before it may be effective under Section 19 of the Exchange Act, then such amendment will not be effective until filed with, or filed with and approved by, the SEC, as applicable.

For so long as Holdco controls, directly or indirectly, any European market subsidiary (as defined below – see Description of the Shares of Holdco Ownership and Voting Limits in Holdco Articles of Association), before any amendment to any provision of the Holdco articles of association may become effective, it must be submitted to the board of directors of each European market subsidiary. If any or all of such boards of directors determine that such amendment must be filed with, or filed with and approved by, a European regulator before it may be effective under European exchange regulations, then such amendment will not be effective until filed with, or filed with and approved by the relevant European regulators.

After Holdco's dissolution, the liquidation will be conducted by the Holdco group chief executive officer and during such liquidation the provisions of Holdco's articles of association will remain in full force and effect to the greatest extent possible. Any surplus of the liquidation remaining after settlement of all debts and liabilities will be first be paid to the holders of preference shares; any surplus remaining thereafter will be paid to the holders of Holdco shares on a pro rata basis.

Ownership and Voting Limits in Holdco Articles of Association

NYSE Euronext and Deutsche Börse own several regulated entities located in the United States and in various jurisdictions in Europe, and, as a result, they and certain of their subsidiaries are subject to limitations and requirements relating to the ownership and voting of their capital stock. In connection with the completion of the business combination, Holdco will become subject to certain of these limitations and requirements. The description below is based on the current understanding of Holdco, NYSE Euronext and Deutsche Börse regarding the limitations and requirements that will apply to Holdco, including the limitations and requirements that will appear in the Holdco articles of association in effect after the combination. It is possible, however, that there may be changes in connection with obtaining the required regulatory approvals for the combination.

The Holdco articles of association will, effective as of the completion of the exchange offer and the merger, incorporate certain limitations on concentration of ownership and voting power of Holdco shares. Specifically, under the articles of association:

Table of Contents

no person, either alone or together with its related persons, may beneficially own Holdco shares entitling the holder(s) thereof to cast votes representing in the aggregate more than 40% of all votes that may be cast on any matter. However, a 20% ownership limitation would apply, instead of a 40% ownership limitation, to any person who is a member of New York Stock Exchange LLC (as defined in the rules of New York Stock Exchange LLC), a member of NYSE Amex LLC (as defined in defined in Sections 3(a)(3)(A)(i), 3(a)(3)(A)(ii), 3(a)(3)(A)(iii) and 3(a)(3)(A)(iv) of the Exchange Act), an ETP holder of NYSE Arca Equities, Inc. (as defined in the NYSE Arca Equities rules of NYSE Arca, Inc.) an OTP holder or OTP firm of NYSE Arca, Inc. (each as defined in the rules of NYSE Arca, Inc.), a member of International Securities Exchange, LLC (as such term is defined in Section 3(a)(3)(A) of the Exchange Act), or a member of EDGA Exchange, Inc. or EDGX Exchange, Inc. (as such terms are defined in the rules of those entities, respectively). Any person that is a related person of any such member, ETP holder, OTP holder or OTP firm shall also be deemed to be member, ETP holder, OTP holder or OTP firm, as applicable, for purposes of the Holdco articles of association; and

no person, either alone or together with its related persons (as defined below), will be entitled to vote or cause the voting of Holdco shares beneficially owned by such person or its related persons, in person or by proxy or through any voting agreement or other arrangement, to the extent such shares entitle the holder(s) thereof to cast more than twenty percent (20%) of all votes that may be cast on any matter, and no person, either alone or together with its related persons, may acquire the ability to vote more than 20% of the total number of votes entitled to be cast on any matter by virtue of agreements entered into by it with other persons not to vote outstanding Holdco shares.

Related persons will be defined for purposes of the Holdco articles of association to mean:

any affiliate of such person (as such term is defined in Rule 12b-2 under the Exchange Act);

any other person(s) with which such first person has any agreement, arrangement or understanding (whether or not in writing) to act together for the purpose of acquiring, voting, holding or disposing of Holdco shares;

in the case of a person that is a company, corporation or similar entity, any executive officer (as defined under Rule 3b-7 under the Exchange Act) or director of such person and, in the case of a person that is a partnership or a limited liability company, any general partner, managing member or manager of such person, as applicable;

in the case of a person that is a member organization (as defined in the rules of New York Stock Exchange LLC, as such rules may be in effect from time to time), any member of New York Stock Exchange LLC that is associated with such person (as determined using the definition of person associated with a member as defined under Section 3(a)(21) of the Exchange Act);

in the case of a person that is an OTP firm, any OTP holder that is associated with such person (as determined using the definition of person associated with a member as defined under Section 3(a)(21) of the Exchange Act);

in the case of a person that is a natural person, any relative or spouse of such natural person, or any relative of such spouse who has the same home as such natural person or who is a director or officer of Holdco or any of its parents or subsidiaries;

in the case of a person that is an executive officer (as defined under Rule 3b-7 under the Exchange Act), or a director of a company, corporation or similar entity, such company, corporation or entity, as applicable;

in the case of a person that is a general partner, managing member or manager of a partnership or limited liability company, such partnership or limited liability company, as applicable;

Edgar Filing: NYSE Euronext - Form 425

in the case of a person that is a member of New York Stock Exchange LLC, the member organization (as defined in the rules of New York Stock Exchange LLC) with which such person is

A-386

Table of Contents

associated (as determined using the definition of person associated with a member as defined under Section 3(a)(21) of the Exchange Act);

in the case of a person that is an OTP holder, the OTP firm with which such person is associated (as determined using the definition of person associated with a member as defined under Section 3(a)(21) of the Exchange Act);

in the case of any person that is a member of International Securities Exchange, LLC, any broker or dealer with which such person is associated;

in the case of any person that is a member of EDGA Exchange, Inc., the person associated with a Member or associated person of a Member (as defined in the rules of EDGA Exchange, Inc.); and

in the case of any person that is a member of EDGX Exchange, Inc., the person associated with a Member or associated person of a Member (as defined in the rules of EDGX Exchange, Inc.).

The Holdco articles of association will provide that, in the event that any person(s) exceeds the ownership limitation, such person(s) will be required to offer for sale and transfer that number of Holdco shares necessary so that such person, together with its related persons, shall beneficially own a number of Holdco Shares that is in the aggregate amount no more than the ownership limitation amount. In addition, the rights to vote, attend general meetings of Holdco shareholders and receive dividends or other distributions attached to shares held in excess of the 40% ownership limitation (or 20% ownership limitation, if applicable) will be suspended for so long as the ownership limitation is exceeded. If such person(s) fails to comply with the transfer obligation within two weeks, then the Holdco articles of association will provide that Holdco will be irrevocably authorized to take actions on behalf of such person(s) in order to cause it to comply with such obligations.

In addition, the Holdco articles of association will provide if any person who is obligated to offer for sale and to transfer Holdco shares pursuant to the ownership limitation requests within two weeks after having become so obligated, that the value of the relevant Holdco shares be determined by an independent expert, such person will be obligated to sell the relevant Holdco shares on any stock exchange where Holdco shares are listed, and the value of such shares shall be determined by an independent expert to be appointed by such person and Holdco jointly. If such person and Holdco fail to reach agreement within five (5) business days after the request of such person to appoint an independent expert, either party may institute proceedings requesting the cantonal sector of the Court (*sector kanton van de rechtbank*) in Amsterdam to appoint an independent expert. For the purposes of this provision, it will be sufficient if the independent expert determines that the value of the transferred Holdco shares is equal to the price received for such Holdco shares by such person on any stock exchange where Holdco shares are listed. The expenses incurred in connection with the appointment and/or remuneration of the independent expert will be for the account of the person obligated to offer for sale and to transfer Holdco shares.

The Holdco articles of association will provide that in the event that any person(s) exceeds the voting limitation, Holdco will be required to disregard any votes purported to be cast in excess of the voting limitation amount. The voting limitations do not apply to a solicitation of a revocable proxy from a Holdco shareholder by or on behalf of Holdco or by any officer or director of Holdco acting on behalf of Holdco, or to a solicitation of a revocable proxy from a Holdco shareholder by any other Holdco shareholder in accordance with Regulation 14A under the Exchange Act. This exception, however, does not apply to certain solicitations by a shareholder pursuant to Rule 14a-2(b)(2) under the Exchange Act, which permits a solicitation made otherwise than on behalf of Holdco where the total number of persons solicited is not more than ten. In the event that a quorum is required pursuant to the laws of the Netherlands or the Holdco articles of association, Holdco shares held in excess of the voting limitation will not be counted as present at a general meeting of shareholders, and will not be counted as outstanding for purposes of determining whether there is a quorum, unless and only to the extent that the voting limitation has ceased to apply in accordance with the relevant provisions of the Holdco articles of association.

Table of Contents

The ownership and voting limitations will apply to each person unless and until it has complied in full with each of the following obligations:

such person has delivered to the Holdco board of directors a notice in writing, not less than forty-five (45) days (or such shorter period as the Holdco board of directors may expressly consent to) prior to the acquisition or voting of the Holdco shares, as applicable, of such person's intention, either alone or together with its related persons, to acquire, or to vote or cause the voting in person or by proxy or through any voting agreement or other arrangement, of Holdco shares in excess of the ownership or voting limitation, as applicable; and

such person has obtained a written confirmation from the Holdco board of directors that (i) the Holdco board of directors has resolved to expressly permit such ownership or voting, (ii) such resolution has been filed with, and approved by, the SEC under Section 19(b) of the Exchange Act, and has become effective thereunder and (iii) such resolution has been filed with, and to the extent required, approved by, each European regulator (as defined below) having appropriate jurisdiction and authority.

Subject to its fiduciary obligations under applicable law, the Holdco board of directors shall not adopt any resolution to permit ownership or voting of Holdco shares in excess of the ownership limitation or the voting limitation unless the Holdco board of directors shall have determined that:

the ownership of such shares, and the exercise of such voting rights or the entering into of such agreement, plan or other arrangement, as applicable, will not impair:

- o the ability of any U.S. regulated subsidiary (as defined below), Holdco, NYSE Group, Inc. (if and to the extent that NYSE Group, Inc. continues to exist as a separate entity) or International Securities Exchange Holdings, Inc. (if and to the extent that International Securities Exchange Holdings, Inc. continues to exist as a separate entity) to discharge their respective responsibilities under the Exchange Act and the rules and regulations thereunder;
- o the ability of any European market subsidiary (as defined below), Holdco or Euronext N.V. (if and to the extent that Euronext N.V. continues to exist as a separate entity) to discharge their respective responsibilities under European exchange regulations;
- o the SEC's ability to enforce the Exchange Act; or
- o the ability of the European regulators to enforce European exchange regulations;

the ownership of such shares, and the exercise of such voting rights or the entering into of such agreement, plan or other arrangement, as applicable, is otherwise in the best interests of Holdco, its shareholders, the U.S. regulated subsidiaries and the European Market Subsidiaries;

neither the person obtaining the waiver nor any of its related persons is subject to any statutory disqualification (as defined in Section 3(a)(39) of the Exchange Act);

neither the person obtaining the waiver nor any of its related persons has been determined by a European regulator to be in violation of laws or regulations adopted in accordance with the European Directive on Markets in Financial Instruments applicable to any European market subsidiary requiring such person to act fairly, honestly and professionally;

Edgar Filing: NYSE Euronext - Form 425

for so long as Holdco directly or indirectly controls NYSE Arca, Inc. or NYSE Arca Equities, Inc. or any facility of NYSE Arca, Inc., neither such person nor any of its related persons is an ETP holder of NYSE Arca Equities, Inc. or an OTP holder or OTP firm of NYSE Arca, Inc.;

for so long as Holdco directly or indirectly controls New York Stock Exchange LLC or NYSE Market, Inc., neither such person nor any of its related persons is a member or member organization of New York Stock Exchange LLC;

for so long as Holdco directly or indirectly controls NYSE Amex LLC, neither such person nor any of its related persons is a member of NYSE Amex LLC;

A-388

Table of Contents

for so long as Holdco directly or indirectly controls International Securities Exchange, LLC, neither such person nor any of its related persons is a member of International Securities Exchange, LLC;

for so long as Holdco directly or indirectly controls EDGA Exchange, Inc., neither such person nor any of its related persons is an member of EDGA Exchange, Inc.; and

for so long as Holdco directly or indirectly controls EDGX Exchange, Inc., neither such person nor any of its related persons is a Member of EDGX Exchange, Inc.

The Holdco articles of association will provide that, in making such determinations, the Holdco board of directors may impose such conditions and restrictions on such person and its related persons owning any Holdco shares entitling the holder(s) thereof to cast votes on any matter as the Holdco board of directors may in its sole discretion deem necessary, appropriate or desirable in furtherance of the objectives of the Exchange Act, European exchange regulations and the governance of Holdco.

These provisions of the Holdco articles of association could delay or deter a change of control of Holdco, which could adversely affect the price of Holdco shares.

The Holdco articles of association will also provide that the Holdco board of directors has the right to require any person and its related persons that the Holdco board of directors reasonably believes to be subject to the voting or ownership restrictions summarized above, and any shareholder (including related persons) that at any time beneficially owns 5% or more of Holdco's outstanding shares, which ownership has not been reported to Holdco to provide to Holdco, upon the Holdco board of director's request, complete information as to all Holdco shares that such shareholder and its related persons beneficially own, as well as any other factual matter relating to the applicability of the ownership and voting limitations as may be reasonably requested.

European regulator will be defined for purposes of the Holdco articles of association to mean any of the Euronext College of Regulators, the Dutch Minister of Finance, the French Minister of the Economy, the French Financial Market Authority (*Autorité des Marchés Financiers*), the Netherlands Authority for the Financial Markets (*Autoriteit Financiële Markten*), the Belgian Banking, Finance, and Insurance Commission (*Commission Bancaire, Financière, et des Assurances*), the French Committee of Credit Establishments and Investment Undertakings (*Comité des Etablissements de Crédit et des Entreprises d'Investissement CECEI*), the Portuguese Securities Market Commission (*Comissão do Mercado de Valores Mobiliários CMVM*), the U.K. Financial Services Authority (*FSA*), or any other governmental securities regulator in any European country where Holdco or any European market subsidiary (as defined below) operates a European regulated market (as defined below), in each case only to the extent that it has authority and jurisdiction in the particular context.

European market subsidiary will be defined for purposes of the Holdco articles of association to mean any market operator (as defined by the European Directive on Markets in Financial Instruments 2004/39 EC) that is (1) owned by Euronext N.V. or Deutsche Börse AG as of the completion of the Combination and continues to be owned directly or indirectly by Holdco or (2) acquired by Euronext N.V. or Deutsche Börse AG after such completion; provided that the jurisdiction in which such European market subsidiary operates is represented in the Euronext College of Regulators and, in the case of clause (2), the acquisition of such entity shall have been approved by the Holdco board of directors.

European regulated market will be defined for purposes of the Holdco articles of association to mean each regulated market (as defined by the European Directive on Markets in Financial Instruments 2004/39 EC) in Europe that (1) is owned and operated by Euronext N.V. or Deutsche Börse AG and was owned and operated by Euronext N.V. or Deutsche Börse AG as of the completion of the Combination or (2) is formed or acquired by Euronext N.V. or Deutsche Börse AG after such completion time; provided that the jurisdiction in which such European regulated market operates is represented in the Euronext College of Regulators and, in the case of clause (2), the formation or acquisition of such European regulated market shall have been approved by the Holdco board of directors.

Table of Contents

U.S. regulated subsidiary will be defined for purposes of the Holdco articles of association to mean New York Stock Exchange LLC, NYSE Market, Inc., NYSE Regulation, Inc., NYSE Arca, L.L.C., NYSE Arca, Inc., NYSE Arca Equities, Inc., NYSE AMEX LLC, International Securities Exchange, LLC, EDGA Exchange, Inc. and EDGX Exchange, Inc., and such other subsidiaries of Holdco which are designated by the Holdco board of directors as a U.S. regulated subsidiary for purposes of the Holdco articles of association.

Ownership and Voting Limits under Dutch Regulatory Requirements

Section 5:32d of the Dutch Financial Supervision Act requires a declaration of no objection of the Dutch Minister of Finance for any holding, acquisition or increase of a direct or indirect interest of 10% or more of the outstanding capital or voting rights (which is referred to in this document as a *qualifying interest*) in an operator or holder of a regulated market in the Netherlands which has been granted a license to operate such market pursuant to Section 5:27 of the Dutch Financial Supervision Act. The Dutch Minister of Finance has delegated its powers to grant a declaration of no objection under Section 5:32d of the Dutch Financial Supervision Act to the AFM except in cases where the acquisition of the qualifying interest involves a fundamental change to the shareholding structure of the relevant licensed operator or holder of a regulated market in the Netherlands. Holdco, NYSE Euronext, NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V. and Euronext N.V. directly or indirectly control Euronext Amsterdam N.V., which is the licensed holder and operator of a regulated market in the Netherlands, and have obtained a declaration of no objection under Section 5:32d referred to above. Therefore, upon completion of the combination, any acquisition or holding increase of a direct or indirect interest in Holdco which results in an indirect qualifying interest in Euronext Amsterdam N.V., (and Euronext N.V., NYSE Euronext (Holding) N.V. and NYSE Euronext (International) B.V. or any of them to the extent they are regarded by the Dutch Minister of Finance, and are licensed, as holder and/or operator of a regulated market in the Netherlands jointly with Euronext Amsterdam N.V.) will trigger the requirement to obtain a declaration of no objection of the AFM or, in case of a fundamental change in the shareholding structure, the Dutch Minister of Finance. Such declaration should be granted unless such holding, the acquisition or increase (1) could or would lead to a formal or actual control structure that is lacking in transparency and would therefore constitute an impediment to the adequate supervision of the compliance by the market operator with the rules applicable to the of a regulated market; (2) could or would lead to an influence on the regulated market operator that is contrary to the interests which the Dutch Financial Supervision Act seeks to protect; or (3) could jeopardize the healthy and prudent operation of the regulated market concerned.

Regulatory Provisions in the Holdco Articles of Association

Compliance and Cooperation Obligations

Holdco will comply with the U.S. federal securities laws and the rules and regulations thereunder and cooperate with the SEC and the U.S. regulated subsidiaries pursuant to and to the extent of their respective regulatory authority, and take reasonable steps necessary to cause its agents to cooperate with the SEC and, where applicable, the U.S. regulated subsidiaries pursuant to their regulatory authority.

Holdco will comply with European exchange regulations and the rules and regulations thereunder and cooperate with the European regulators pursuant to and to the extent of their respective regulatory authority, and take reasonable steps necessary to cause its agents to cooperate with the European regulators pursuant to their regulatory authority.

Submission to Jurisdiction and Regulatory Oversight

Holdco and its directors, and to the extent they are involved in the activities of the U.S. regulated subsidiaries, Holdco's officers, and those of its employees whose principal place of business and residence is outside of the United States, will be deemed to irrevocably submit to the jurisdiction of the U.S. federal courts and the SEC for the purposes of any suit, action or proceeding pursuant to the U.S.

Table of Contents

federal securities laws and the rules or regulations thereunder that is commenced or initiated by the SEC arising out of, or relating to, the activities of the U.S. regulated subsidiaries.

Holdco and its directors, and to the extent they are involved in the activities of the European market subsidiaries, Holdco's officers and employees, will be deemed to irrevocably submit to the jurisdiction of the European regulators and to courts in the capital city of the country of each such regulator for the purposes of any suit, action or proceeding pursuant to European exchange regulations that is commenced or initiated by the European regulators arising out of, or relating to, the activities of the European market subsidiaries.

For so long as Holdco directly or indirectly controls any U.S. regulated subsidiary, the directors, officers and employees of Holdco will be deemed to be directors, officers and employees of such U.S. regulated subsidiary for purposes of, and subject to oversight pursuant to, the Exchange Act.

For so long as Holdco directly or indirectly controls any European market subsidiary, the directors, officers and employees of Holdco will be deemed to be directors, officers and employees of such European market subsidiary for purposes of, and subject to oversight pursuant to, European exchange regulations.

Books and Records of Holdco

Holdco's books and records will at all times be made available for inspection and copying by (i) the SEC, (ii) each of the European regulators, (iii) any U.S. regulated subsidiary, to the extent that such books and records are related to the activities of such U.S. regulated subsidiary or any other U.S. regulated subsidiary over which such U.S. regulated subsidiary has regulatory authority or oversight, and (iv) any European market subsidiary, to the extent that such books and records are related to the activities of such European market subsidiary or any European regulated market over which such European market subsidiary has regulatory authority or oversight.

For so long as Holdco directly or indirectly controls any U.S. regulated subsidiary, the books and records of Holdco will be deemed to be books and records of such U.S. regulated subsidiary for purposes of, and subject to oversight pursuant to, the Exchange Act.

For so long as Holdco directly or indirectly controls any European market subsidiary, the books and records of Holdco will be deemed to be books and records of such European market subsidiary for purposes of, and subject to oversight pursuant to, European exchange regulations.

Holdco's books and records related to U.S. regulated subsidiaries shall be maintained within the United States, and Holdco's books and records related to European market subsidiaries shall be maintained within the home jurisdiction of one or more European market subsidiaries. If and to the extent that any of Holdco's books and records may relate to both European market subsidiaries and U.S. regulated subsidiaries, Holdco will be entitled to maintain such books and records either in the home jurisdiction of one or more European market subsidiaries or in the United States.

Cooperation and Compliance Obligations

In discharging his or her responsibilities as a member of the Holdco board of directors or as an officer or employee of Holdco, each such director, officer or employee will (i) comply with the U.S. federal securities laws and the rules and regulations thereunder, (ii) comply with European exchange regulations and the rules and regulations promulgated thereunder, (iii) cooperate with the SEC, (iv) cooperate with the European regulators, (v) cooperate with the U.S. regulated subsidiaries pursuant to and to the extent of its regulatory authority and (vi) cooperate with the European market subsidiaries pursuant to, and to the extent of, their regulatory authority. However, these provisions of the Holdco articles of association will not create any duty owed by any director, officer or

Edgar Filing: NYSE Euronext - Form 425

employee of Holdco to any person to consider, or afford any particular weight to, any of the foregoing matters or to limit his or her consideration to such matters.

A-391

Table of Contents

Confidential Information

All confidential information that comes into the possession of Holdco pertaining to:

- o the self-regulatory function of any U.S. regulated subsidiary, in each case to the extent that such entity continues to be controlled, directly or indirectly, by Holdco (including but not limited to disciplinary matters, trading data, trading practices and audit information) contained in the books and records of such U.S. regulated subsidiary, or
- o the self-regulatory function of any European market subsidiary under European exchange regulations as operator of a European regulated market (including but not limited to disciplinary matters, trading data, trading practices and audit information) contained in the books and records of such European market subsidiary,

will, in each case, (i) not be made available to any person, other than to those officers, directors, employees and agents of Holdco that have a reasonable need to know the contents thereof, (ii) be retained in confidence by Holdco and the officers, directors, employees and agents of Holdco, and (ii) not be used for any commercial purposes.

However, these provisions of the Holdco articles of association will not limit or impede:

- o the rights of the SEC or any U.S. regulated subsidiary to have access to and examine such U.S. regulated subsidiary's confidential information pursuant to the U.S. federal securities laws and the rules and regulations thereunder;
- o the rights of the European regulators or any European market subsidiary to have access to and examine such European market subsidiary's confidential information pursuant to European exchange regulations; or
- o the ability of any officers, directors, employees or agents of Holdco to disclose (i) the U.S. regulated subsidiary's confidential information to the SEC or the relevant U.S. regulated subsidiary or (ii) the European market subsidiary's confidential information to the European regulators or the relevant European market subsidiary.

Due Regard to Preservation of Independence of Self-Regulatory Functions

To the extent Holdco is involved in the activities of, and for so long as Holdco directly or indirectly controls, any U.S. regulated subsidiary, Holdco and its directors, officers and employees will give due regard to the preservation of the independence of the self-regulatory function of such U.S. regulated subsidiary and to its obligations to investors and the general public, and will not take any actions that would interfere with the effectuation of any decisions by the board of directors or managers of such U.S. regulated subsidiary relating to its regulatory responsibilities (including enforcement and disciplinary matters) or that would interfere with the ability of such U.S. regulated subsidiary to carry out its responsibilities under the Exchange Act.

To the extent Holdco is involved in the activities of, and for so long as Holdco directly or indirectly controls, any European market subsidiary, Holdco and its directors, officers and employees will give due regard to the preservation of the independence of the self-regulatory function of such European market subsidiary and to its obligations to investors and the general public, and will not take any actions that would interfere with the effectuation of any decisions by the board of directors or managers of such European market subsidiary relating to its regulatory responsibilities (including enforcement and disciplinary matters) or that would interfere with the ability of such European market subsidiary to carry out its responsibilities under European exchange regulations.

Table of Contents

Director Considerations and Qualification Requirements

Each member of the Holdco board of directors must, in discharging his or her responsibilities as a board member, take into consideration the effect that Holdco's actions would have on the ability of:

- o any European market subsidiary to carry out its responsibilities under European exchange regulations as operators of European regulated markets;
- o the U.S. regulated subsidiaries to carry out their responsibilities under the Exchange Act;
- o the U.S. regulated subsidiaries, NYSE Group (if and to the extent that NYSE Group, Inc. continues to exist as a separate entity), International Securities Exchange Holdings, Inc. (if and to the extent that International Securities Exchange Holdings, Inc. continues to exist as a separate entity) and Holdco (i) to engage in conduct that fosters and does not interfere with the ability of the U.S. regulated subsidiaries, NYSE Group, Inc. (if and to the extent that NYSE Group, Inc. continues to exist as a separate entity), International Securities Exchange Holdings, Inc. (if and to the extent that International Securities Exchange Holdings, Inc. continues to exist as a separate entity) and Holdco to prevent fraudulent and manipulative acts and practices in the securities markets; (ii) to promote just and equitable principles of trade in the securities markets; (iii) to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, (iv) to remove impediments to and perfect the mechanisms of a free and open market in securities and a U.S. national securities market system, and (v) in general, to protect investors and the public interest.

However, these provisions of the Holdco articles of association will not create any duty owed by any director, officer or employee of Holdco to any person to consider, or afford any particular weight to, any of the foregoing matters or to limit his or her consideration to such matters.

No person that is subject to any statutory disqualification (as defined in Section 3(a)(39) of the Exchange Act), or has been determined by a European regulator to be in violation of laws or regulations adopted in accordance with the European Directive on Markets in Financial Instruments applicable to any European market subsidiary requiring such person to act fairly, honestly and professionally, will be qualified to serve on the Holdco board of directors.

Supplemental Agreements of Holdco Directors, Officers and Employees

Holdco will take reasonable steps necessary to cause its officers, directors and employees, prior to accepting a position as an officer, director or employee, as applicable, of Holdco to agree and consent in writing to the applicability to them of these provisions of the Holdco articles of association with respect to their activities related to any U.S. regulated subsidiary or European market subsidiary.

Amendments to the Holdco Articles of Association

For so long as Holdco controls, directly or indirectly, any U.S. regulated subsidiary, before any amendment to any provision of the Holdco articles of association may become effective, it must be submitted to the board of directors of each U.S. regulated subsidiary. If any or all of such boards of directors determine that such amendment must be filed with, or filed with and approved by, the SEC before the it may be effective under Section 19 of the Exchange Act and the rules promulgated thereunder, then such amendment shall not be effective until filed with, or filed with and approved by, the SEC, as applicable.

Edgar Filing: NYSE Euronext - Form 425

For so long as Holdco controls, directly or indirectly, any European market subsidiary (as defined below see Description of the Shares of Holdco Ownership and Voting Limits in Holdco Articles of Association), before any amendment to any provision of the Holdco articles of association may become effective, it must be submitted to the board of directors of each European market subsidiary. If

A-393

Table of Contents

any or all of such boards of directors determine that such amendment must be filed with, or filed with and approved by, a European regulator before it may be effective under European exchange regulations, then such amendment will not be effective until filed with, or filed with and approved by the relevant European regulators.

The Holdco articles of association will provide that no shareholder, employee, former employee, beneficiary, customer, creditor, community, regulatory authority nor any member thereof will have any rights against Holdco or any director, officer or employee of Holdco under these provisions of the Holdco articles of association relating to submission to jurisdiction and regulatory oversight, books and records of Holdco, cooperation and compliance obligations, confidential information, due regard to preservation of independence of self-regulatory functions, director considerations or supplemental agreements of Holdco's directors, officers and employees. Holdco will sign an irrevocable agreement and consent for the benefit of certain of the U.S. registered subsidiaries and/or the SEC, or other beneficiaries to be determined by the SEC in connection with its approval of the combination, that it will, in connection with its involvement in the activities of the U.S. regulated subsidiaries, comply with certain provisions in the Holdco articles of association including provisions relating to submission to compliance and cooperation obligations of Holdco; submission by Holdco to jurisdiction and regulatory oversight; books, records, premises, officers, directors and employees of Holdco; confidential information; due regard to preservation of independence of self-regulatory functions; and supplemental agreements and consents of Holdco's directors, officers and employees.

Disclosure of Information by Holdco upon Listing

As a Dutch company whose shares will be listed on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris, Holdco will be subject to certain disclosure obligations under German, U.S., French and Dutch law.

Dutch Financial Reporting Supervision Act and Dutch Financial Supervision Act

The Dutch Financial Reporting Supervision Act (which is referred to in this document as the FRSA) entered into force on December 31, 2006. The FRSA replaced the statutory provisions governing legal proceedings on annual accounts and financial reports. The FRSA applies to fiscal years from January 1, 2006. Pursuant to the FRSA, the AFM supervises the application of financial reporting standards by, amongst others, companies whose statutory seat is in the Netherlands and whose securities are admitted to trading on a regulated market or comparable foreign stock exchange in a non EEA state.

Under the FRSA, the AFM is authorized: (1) request an explanation from listed companies to which the FRSA applies regarding their application of financial reporting standards if, based on publicly known facts or circumstances, it has reason to doubt that their financial reporting meets the applicable standards; and (2) recommend to such companies the publication of further explanations in respect of their financial reporting. If a listed company to which the FRSA applies does not comply with such a request or recommendation, the AFM may request that the enterprise chamber of the Amsterdam Court of Appeal (*Ondernemingskamer van het Gerechtshof Amsterdam*) orders the company to: (1) prepare its financial reports in accordance with the enterprise chamber's instructions; and (2) provide an explanation of the way it has applied financial reporting standards to its financial reports.

Under the Dutch Financial Supervision Act, Holdco is required to make its annual accounts and its half-yearly financial statements generally available to the public within four months and two months, respectively, of the end of a period to which the financial information relates. In addition, Holdco must make generally available an interim management statement during each half-year period. An interim management statement must be made in the period between 10 weeks after the beginning and six weeks before the end of the relevant half-year period. The annual accounts, half-yearly financial statements and interim financial statements must be filed with the AFM simultaneously with their publication.

Table of Contents***Periodic Reporting under U.S. Securities Law***

Under the Exchange Act, for so long as Holdco continues to qualify as a foreign private issuer, Holdco will be required to publicly file with the SEC annual reports on Form 20-F within four months of the end of the fiscal year covered by the report. As a foreign private issuer, Holdco would also be required to publicly file with the SEC on Form 6-K material information that it makes or is required to make public pursuant to Dutch law, files or is required to file with any stock exchange on which Holdco shares trade and which was made public by that exchange, or is otherwise distributed or required to be distributed to Holdco shareholders.

If Holdco no longer qualifies as a foreign private issuer, Holdco would be required to publicly file with the SEC an annual report on Form 10-K within 90, 75 or 60 days of the end of the fiscal year covered by the report, with the time period determined based on Holdco's aggregate worldwide market value, the period of time for which it has been subject to SEC reporting requirements and certain other factors. In addition, Holdco would be required to publicly file with the SEC quarterly reports on Form 10-Q within 45 or 40 days (depending on the same factors) of the end of the applicable fiscal quarter. Holdco would also be required to publicly file with the SEC current reports on Form 8-K typically within four business days after the occurrence of specified significant events, and under Regulation FD, Holdco would be required to simultaneously or promptly make public disclosure of any material nonpublic information shared with securities market professionals or Holdco shareholders who are reasonably likely to trade on the basis of the information.

Additional French Disclosure Requirements

In addition to the above-mentioned financial reporting obligations, as Holdco shares will be listed on Euronext Paris, Holdco will be subject to the provisions of (1) Articles 223-1A to 223-10-1 of the General Regulations of the French Financial Markets Authority (the **AMF**) relating to ongoing disclosure obligations (including obligation to publish, as soon as possible, any information concerning new developments that may have a significant impact on the Holdco share price) and (2) Articles 212-1 to 212-42 of the General Regulations relating to information to be provided prior to a public offering in France.

Once Holdco shares are admitted to trading on Euronext Paris, Holdco will also be subject to the following requirements in accordance with the General Regulations and certain organizational and operational principles of the regulated market of NYSE Euronext in Paris, including:

the requirement to (1) translate certain regulated information (as defined by the General Regulations) published in France into French or in English, (2) provide the name and contact details of the person responsible for its information in France, (3) provide the AMF with any changes to its Articles of association, for publication on its web site, (4) provide the AMF with any additional information they may request pursuant to the General Regulations and (5) publish a press release upon convening a general shareholders' meeting, including the date, time and place of the meeting as well as details on where shareholders can obtain further information on the meeting;

the requirement to inform the public of (1) any resolutions approved by the general shareholders' meeting authorizing a share repurchase program, (2) the implementation of any share repurchase program (as well as publish periodic statements of purchases or sales of shares carried out pursuant to this program) and (3) the implementation of a liquidity contract (*contrat de liquidité*) relating to its shares (as well as publish half-year implementation statements); and

to ensure that information provided in France is identical to, and provided at the same time as, information provided in other countries, particularly in the United States and Germany.

Applicable Stock Exchange Rules upon Listing***Rules of the Frankfurt Stock Exchange***

As Holdco shares will be listed on the regulated market of the Frankfurt Stock Exchange and on the sub-segment of the regulated market with additional obligations arising from admission (Prime Standard),

Table of Contents

Holdco is required to prepare and publish audited consolidated annual financial statements within four months from the end of its fiscal year, and to prepare on the same basis and publish quarterly consolidated financial statements for each of the first three quarters of Holdco's fiscal year, including the half year financial statements, within two months from the end of each relevant quarter.

Rules of the New York Stock Exchange

For so long as its shares are listed on the New York Stock Exchange, Holdco will be required to meet certain requirements relating to ongoing shareholder communication and disclosure, including a requirement to make any annual report filed with the SEC available on or through Holdco's website and to comply with the immediate release policy of the New York Stock Exchange with respect to earnings and dividend announcements, business combination transactions, stock splits, major management changes and any substantive items of an unusual or non-recurrent nature. Issuers listing shares on the New York Stock Exchange must also meet certain corporate governance standards, such as those relating to annual meetings, board independence, the formation and composition of nominating/corporate governance, compensation and audit committees and shareholder approval of certain transactions. However, for so long as Holdco qualifies as a foreign private issuer, Holdco may follow Dutch practice in lieu of certain of these corporate governance standards, but will be required to disclose the ways in which its corporate governance standards differ from those followed by U.S. domestic issuers under the New York Stock Exchange listing standards.

Insider Trading and Market Manipulation

U.S., German, Dutch and French laws contain specific rules intended to prevent insider trading and market manipulation.

Pursuant to the applicable rules on insider trading and market manipulation, Holdco has adopted a policy on insider trading and communications for transactions in its securities.

United States

The insider trading doctrine under United States securities laws generally prohibits any person from:

trading in a security while in possession of material, non-public information regarding the issuer of the security;

tipping such information to others;

recommending the purchase or sale of securities while in possession of such information;

assisting someone who is engaged in any of the above activities.

The laws cover not only those who trade, but also those who tip material, non-public information or recommend transactions in securities while in possession of such information. A security includes not just equity securities, but any security (*e.g.*, derivatives). Thus, members of a board of directors, officers and other employees may not purchase or sell Holdco shares or other securities when he or she has personal knowledge of material, non-public information about the company's business, prospects or financial condition, nor may they tip any other person by disclosing non-public information about Holdco.

Germany

The applicable insider trading rules (Section 14 of the German Securities Trading Act) in particular prohibit the use of inside information to acquire or dispose of securities for one's own account or for the account or on behalf of a third party; to disclose or make available inside information to a third party without the authority to do so or to recommend, on the basis of inside information, that a third party acquire or dispose of insider

Table of Contents

securities, or to otherwise induce a third party to do so. The prohibition of market manipulation in particular forbids the making of false or misleading statements regarding circumstances which are significant for the valuation of the Holdco shares, and failure to disclose such circumstances, provided that such statements, or such failure to disclose, is likely to have an effect on the stock exchange or other market price of the Holdco shares. Failure to comply with these requirements could lead to the imposition of fines or imprisonment.

The Netherlands

The Dutch Financial Supervision Act provides for specific rules intended to prevent market abuse, such as the prohibitions on insider trading, divulging inside information and tipping, and market manipulation. Holdco will be subject to the Dutch insider trading prohibition (in particular, if it trades in its own shares or in financial instruments the value of which is (co)determined by the value of the shares), the Dutch prohibition on divulging insider information and tipping and the Dutch prohibition on market manipulation. The Dutch prohibition on market manipulation may mean that certain restrictions apply to the ability of Holdco to buy-back its shares. In certain circumstances, the Holdco's investors can also be subject to the Dutch market abuse rules.

Pursuant to the rules on market abuse, Holdco will adopt in connection with its listing on the Frankfurt Stock Exchange, the New York Stock Exchange and Euronext Paris an internal insider trading regulation policy, which will be available on Holdco's website. This regulation provides for, among other things, rules on the possession of and transactions by members of the board of directors and employees in the shares or in financial instruments the value of which is (co)determined by the value of the Holdco shares.

France

In France, failure to comply with the rules relating to insider trading and/or market manipulation is subject to civil, administrative and criminal sanctions.

The French insider trading rules prohibit the use of inside information to acquire or dispose of securities for one's own account or for the account or on behalf of a third party and the disclosure or provision of inside information to a third party without the authority to do so. In addition these rules prohibit advising a third party to acquire or dispose of securities on the basis of inside information, or to otherwise induce a third party to do so.

Inside information can be defined as any information of a precise nature that has not been made public relating directly or indirectly to one or more issuers of financial instruments or to one or more financial instruments, and which, if it were made public, would be likely to have a significant effect on the price of the relevant financial instruments.

French law prohibits price manipulation and dissemination of false information. In particular, it prohibits transactions or orders to trade that (1) give or are likely to give false or misleading indications as to the exchange offer, demand or price of financial instruments or (2) set the price of financial instruments at an abnormal or artificial level, unless it is proven that the reasons for these transactions or orders are legitimate and that they complied with accepted market practices. It also prohibits transactions or orders to trade that employ processes that give a fictitious image of the market or any other form of deception.

It is also forbidden to disclose or knowingly disseminate information that give or may give false, imprecise or misleading indications as to financial instruments.

Obligations of Shareholders to Make a Public Offer

Pursuant to Chapter 5.5 of the Dutch Financial Supervision Act, any person who acquires, alone or acting in concert with others, directly or indirectly, at least 30% of voting rights in a Dutch public limited liability company (*naamloze vennootschap*) with a registered office in the Netherlands of which shares (or depositary

Table of Contents

receipts of shares) are admitted to trading on a regulated market, is obliged to make a public offer for all of such company's shares (and depositary receipts of shares). The Dutch Financial Supervision Act defines persons acting in concert as persons cooperating pursuant to an agreement with the objective to acquire at least 30% of the voting rights, or, if in cooperation with the target company, to frustrate the successful outcome of an announced public offer.

Although Holdco shares will be listed in Germany, Holdco does not qualify as a target company (*Zielgesellschaft*) under the German Takeover Act because it is not incorporated in Germany. There is no obligation, therefore, under German law to launch a public offer upon reaching certain share capital or voting right thresholds in Holdco. Whether or not a public offer has to be made is a question of Dutch law. If a shareholder, pursuant to Dutch law, is obliged to make a public offer, some provisions of the German Takeover Act may apply to such offer if certain conditions are met (Section 1 para 3 of the German Takeover Act) (see below **Applicable Takeover Rules**).

Applicable Takeover Rules

As Holdco is organized under the laws of the Netherlands, it is subject to Dutch law. However, as the Holdco shares are not admitted to trading on a regulated market in the Netherlands, but will be admitted to trading on the regulated markets of the Frankfurt Stock Exchange and Euronext Paris, the Dutch public offer rules contained in the Dutch Financial Supervision Act and the related Decree on public offers (*Besluit openbare biedingen Wft*) will only apply in relation to matters relating to information to be provided to trade unions and employees and company law matters, including the convening of a shareholders meeting in the event of a public offer. As it is intended to have Holdco shares admitted to trading on the Frankfurt Stock Exchange and the Euronext Paris, Holdco may elect BaFin as competent authority for the supervision of a public offer. In this case, the German takeover rules as set forth in the German Takeover Act will apply in respect of the consideration, the content of offer document and procedural matters for any public offer. Alternatively, Holdco may elect the AMF as competent authority for the supervision of a public offer. In this case, French takeover rules under the general regulations of the AMF will apply in respect of the consideration, the content of the offer document and procedural matters. Holdco must on the first day of trading of its shares notify BaFin, the Frankfurt Stock Exchange, the AMF and Euronext of its choice.

Neither Dutch law nor Holdco's articles of association specifically prevent business combinations with interested shareholders. Under Dutch law, various protective measures are as such possible and admissible, including the issuance of preference shares with voting rights within the boundaries set by Dutch case law and Dutch law, in particular the Dutch Corporate Governance Code.

Because Holdco's shares will be registered with the SEC under the Exchange Act, any offer for the Holdco shares will need to comply with the U.S. tender offer rules set out in Sections 14(d) and 14(e) of the Exchange Act and Regulations 14D and 14E thereunder (collectively, the U.S. tender offer rules). The principal U.S. tender offer rules relate to, among other things: (1) the initial offer period remaining open for acceptances for a period of at least 20 U.S. business days following commencement; (2) the extension of withdrawal rights to Holdco's shareholders until the transaction is wholly-unconditional; (3) application of the all-holder and best-price rules (which together require that all of Holdco's shareholder receive the same/highest price offered for Holdco shares); (4) prompt payment of consideration (i.e., 3-day settlement); and (5) restrictions on a bidder's ability to acquire Holdco shares outside of the exchange offer.

Dutch Squeeze-Out Proceedings

Pursuant to article 2:92a of the Dutch Civil Code, a shareholder, alone or together with its group companies, holding at least 95% of Holdco's issued share capital may institute proceedings against Holdco's other shareholders (*gezamenlijke minderheidsaandeelhouders*) for the transfer of their shares to the claimant. The proceedings are held before the enterprise chamber of the Amsterdam Court of Appeal (*Ondernemingskamer van het Gerechtshof te Amsterdam*) and must be instituted by means of a writ of summons served upon the minority

Table of Contents

shareholders in accordance with the provisions of the Dutch Code of Civil Procedure (*Wetboek van Burgerlijke Rechtsvordering*). The enterprise chamber may only grant the claim for a squeeze-out in relation to all minority shareholders and will determine the price to be paid for the shares, if necessary after appointment of one or three experts who will give an opinion to the enterprise chamber on the value to be paid for the shares of the minority shareholders. Once the order to transfer of the enterprise chamber becomes final, the person acquiring the shares will give written notice of the date and place of payment and the price to the holders of the shares to be acquired whose addresses are known to such person. Unless the addresses of all of them are known to such person, such person will also publish the same in a daily newspaper with a national circulation. A person or company that holds less than 95% of the shares in Holdco's issued share capital, but that in practice controls Holdco's general meeting of shareholders, could attempt to obtain full ownership of the business of Holdco through a legal merger of Holdco with another company controlled by such person or company, by subscribing to additional shares in Holdco (for example, in exchange for a contribution of part of its own business), through another form of reorganization aimed at raising its interest to 95% or through other means.

Pursuant to Section 2:359c of the Dutch Civil Code, the offeror that has made a public offer is also entitled to start a squeeze-out procedure if it holds at least 95% of the issued share capital and represents at least 95% of the voting rights. If a mandatory public offer has been made, the price in the public offer, in principle, also has to be accepted by minority shareholders in a squeeze-out. The price offered in the public offer will in principle be deemed a reasonable price for squeeze-out purposes if the offer was a mandatory offer or if at least 90% of the shares were received by way of a voluntary offer. The enterprise chamber may, nevertheless, appoint one or three experts who will give an opinion to the enterprise chamber on the value to be paid for the shares of the minority shareholders. The claim of a squeeze-out needs to be filed with the enterprise chamber within three months after the end of the period for tendering shares in the public offer. Conversely, in such a case, pursuant to Section 2:359d of the Dutch Civil Code each minority shareholder has the right to require the holder of at least 95% of the outstanding shares and voting rights to purchase its shares. The minority shareholders must file such claim with the enterprise chamber within three months after the end of the acceptance period of the public offer.

Obligations of Shareholders and Other Persons to Disclose Holdings

Shareholder Disclosure and Reporting Obligations under Dutch Law

Pursuant to the Dutch Financial Supervision Act and the Decree regarding disclosure of holdings in issuing institutions (*Besluit melding zeggenschap en kapitaalbelang in uitgevende instellingen Wfi*), any person who, directly or indirectly, acquires or disposes of an actual or potential interest in the capital and/or the voting rights of Holdco, must give written notice of such acquisition or disposal if, as a result of such acquisition or disposal, the percentage of capital interest and/or voting rights held by such person meets, exceeds or falls below one of the following thresholds: 5%, 10%, 15%, 20%, 25%, 30%, 40%, 50%, 60%, 75% and 95% of issued share capital of Holdco. Notification must be given to the AFM without delay after becoming aware or after such person should have been aware that the percentage of actual or potential capital interest and/or voting rights held meets, exceeds or falls below one of the thresholds.

For the purpose of calculating the percentage of capital interest or voting rights, the following interests must, *inter alia*, be taken into account: (1) shares and voting rights directly held (or acquired or disposed of) by any person; (2) shares and voting rights held (or acquired or disposed of) by such person's controlled entity or by a third party for such person's account or by a third party with whom such person has concluded an oral or written voting agreement; (3) voting rights acquired pursuant to an agreement providing for a temporary transfer of voting rights against a payment; and (4) shares which such person (directly or indirectly) or third party referred to above, may acquire pursuant to any option or other right to acquire shares. Special attribution rules apply to shares and voting rights which are part of the property of a partnership or other community of property. A holder of a pledge or right of usufruct (*vruchtgebruik*) in respect of shares can also be subject to the reporting obligations, if such person has, or can acquire, the right to vote the shares. The acquisition of (conditional) voting rights by a pledgee or beneficial owner may also trigger the reporting obligations as if the pledgee or beneficial

Table of Contents

owner were the legal holder of the shares. Furthermore, each member of the Holdco board of directors must immediately give written notice to the AFM of any change in his or her holding of shares and voting rights in Holdco.

Pursuant to the Dutch Financial Supervision Act, Holdco is required to inform the AFM immediately if Holdco's issued share capital or voting rights change by 1% or more since Holdco's previous notification. Other changes to Holdco's capital or voting rights need to be notified within eight days after the end of the quarter in which the change occurred. The AFM will publish such notification in a public register. If a person's capital interest or voting rights meets or passes the above-mentioned thresholds as a result of a change in Holdco's issued share capital or voting rights, such person is required to make such notification by the fourth trading day after the AFM has published Holdco's notification as described above. The AFM keeps a public register of all notifications made pursuant to these disclosure obligations and publishes all notifications received by it, which is available through its website (www.afm.nl). Non-compliance with these disclosure obligations is an economic offence and may lead to criminal prosecution. The AFM may impose administrative penalties or a cease-and-desist order under penalty for non-compliance, and the publication thereof. In addition, a civil court can impose measures against any person who fails to notify or incorrectly notifies the AFM of matters required to be correctly notified.

A claim requiring that such measures be imposed may be instituted by Holdco and/or one or more shareholders who alone or together with others represent(s) at least 5% of Holdco's issued share capital.

The measures that the civil court may impose include:

an order requiring the person violating the disclosure obligations under the Dutch Financial Supervision Act to make appropriate disclosure;

suspension of voting rights in respect of such person's shares for a period of up to three years as determined by the court;

voiding a resolution adopted by a general meeting of shareholders, if the court determines that the resolution would not have been adopted but for the exercise of the voting rights of the person who is obliged to notify, or suspension of a resolution until the court makes a decision about such voiding; and

an order to the person violating the disclosure obligations under the Dutch Financial Supervision Act to refrain, during a period of up to five years as determined by the court, from acquiring the shares and/or voting rights in the shares.

Shareholder Disclosure and Reporting Obligations under U.S. Law

Holders of Holdco shares are subject to certain U.S. reporting requirements under the Exchange Act for shareholders owning more than 5% of any class of equity securities registered pursuant to Section 12 of the Exchange Act. Among the reporting requirements are disclosure obligations intended to keep investors aware of significant accumulations of shares that may lead to a change of control of an issuer.

If Holdco were to fail to qualify as a foreign private issuer, Section 16(a) of the Exchange Act requires Holdco's directors and executive officers, and persons who own more than 10% of a registered class of Holdco's equity securities, to file reports of ownership of, and transactions in, Holdco's equity securities with the SEC. Such directors, executive officers and 10% stockholders are also required to furnish Holdco with copies of all Section 16 reports they file.

Reporting of Directors' Dealings Under German Law

All persons carrying managerial responsibilities (who are referred to in this paragraph as "executives") in Holdco and other persons related to such persons (who are referred to in this paragraph as "relatives") must pursuant to Section 15a of the German Securities Trading Act notify Holdco and the German Federal Financial Supervisory Authority in writing of their own dealings in Holdco shares or related financial instruments within

Table of Contents

five working days of the transaction. Holdco is then required to publish such notification and submit a copy of such publication to the German Federal Financial Supervisory Authority without undue delay. Furthermore, Holdco will transmit such information to its company register without undue delay, however not before its publication. Executives within the meaning of Section 15a of the German Securities Trading Act include: (1) members of any management, administrative or supervisory body of Holdco; and (2) any other individuals who have regular access to insider information and are authorized to take substantial entrepreneurial decisions not subject to the approval of the Holdco board of directors. Relatives are spouses, registered life partners (*eingetragene Lebenspartner*), dependent children and other relatives who have been living in the executive's household for at least one year. Legal entities (*juristische Personen*) for which an executive or a relative performs executive tasks are also covered by these rules. These provisions further apply to partnerships and legal entities which are directly or indirectly controlled by, have been established for the benefit of, or whose economic interests are closely linked to, an executive or a relative. Dealings below an aggregate volume of 5,000 per calendar year (calculated as the total volume of all transactions conducted by the executive and his or her relatives) are exempted from the disclosure obligation.

Reporting of Directors Dealings Pursuant to Dutch Law

Pursuant to the Dutch Financial Supervision Act, members of the Holdco board of directors and any other persons who have managerial responsibilities within Holdco and in that capacity are authorized to make decisions affecting the future developments and business prospects of Holdco or who may have regular access to inside information relating, directly or indirectly, to Holdco (which are referred to in this document as Insiders), must notify the AFM of all transactions conducted or carried out for his/her own account relating to Holdco shares or financial instruments, the value of which is determined by the value of the Holdco shares.

In addition, persons designated by the Decree on Market Abuse pursuant to the Dutch Financial Supervision Act (*Besluit Marktmisbruik*) (which is referred to in this document as Dutch Market Abuse Decree) who are closely associated with the members of the Holdco board of directors or any other Insiders must notify the AFM of any transactions conducted for their own account relating to Holdco shares or financial instruments, the value of which is determined by the value of the Holdco shares. The Market Abuse Decree designates the following categories of persons: (1) the spouse or any partner considered by national law as equivalent to a spouse; (2) dependent children; (3) other relatives who have shared the same household for at least one year at the relevant transaction date; and (4) any legal person, trust or partnership, among other things, whose managerial responsibilities are discharged by the relevant member of the board of directors or other Insider, or by a person referred to under (1), (2) or (3) above.

The AFM must be notified of transactions effected in either Holdco shares or financial instruments, the value of which is determined by the value of the Holdco shares, within five days following the transaction date. Notifications may be postponed until the date the value of the transactions carried out on that person's own account, together with the transactions carried out by the persons associated with that person, reach or exceed the amount of 5,000 in the calendar year in question.

The AFM keeps a public register of all notifications made pursuant to the Dutch Financial Supervision Act. Non-compliance with these reporting obligations under the Dutch Financial Supervision Act could lead to criminal penalties, administrative fines and cease-and-desist orders (and the publication thereof), imprisonment or other sanctions.

Table of Contents**COMPARISON OF SHAREHOLDER RIGHTS BEFORE AND AFTER THE COMBINATION**

This section describes the material differences between the rights of holders of Deutsche Börse shares and holders of NYSE Euronext shares before completion of the combination, and the rights of holders of the Holdco shares after the combination. The differences between the rights of these respective shareholders result from the differences among German, Delaware and Dutch law and the respective governing documents of Deutsche Börse, NYSE Euronext and Holdco.

This section does not include a complete description of all differences among the rights of these respective shareholders, nor does it include a complete description of their specific rights. Furthermore, the identification of some of the differences of these rights as material is not intended to indicate that other differences that may be equally important do not exist. All Deutsche Börse shareholders and NYSE Euronext shareholders are urged to carefully read the relevant provisions of the German Stock Corporation Act, the Delaware General Corporation Law, the Dutch Civil Code, the Dutch Financial Supervision Act, the Deutsche Börse articles of incorporation, the NYSE Euronext certificate of incorporation and bylaws and the forms of the Holdco articles of association and Rules for the Board of Directors that will be in effect upon completion of the combination (which forms are included as Annex B and C, respectively, to this document). References in this section to Holdco's articles of association are references to the articles of association as will be in effect following completion of the combination. It is possible that the forms of the Holdco articles of association and Rules for the Board of Directors will change in connection with obtaining the required regulatory approvals for the combination.

In considering the terms of the Holdco articles of association and Rules for the Board of Directors, Deutsche Börse and NYSE Euronext considered the unique role to be played by Holdco and its subsidiaries as operators of regulated markets in the United States and Europe and, in the case of NYSE Euronext, as the parent company of U.S. self-regulatory organizations and the independence and public interest criteria embodied in its director selection criteria, as well as pronouncements from the SEC and the European regulators.

Copies of the Deutsche Börse articles of incorporation and the NYSE Euronext certificate of incorporation and bylaws are available to Deutsche Börse shareholders and NYSE Euronext shareholders upon request. See [Where You Can Find More Information](#).

Table of Contents**Deutsche Börse Shareholders**

Authorized Capital: Subject to the supervisory board's approval, the Deutsche Börse management board may increase Deutsche Börse's share capital, exercising the authorization granted by the articles of association.

NYSE Euronext Shareholders**Holdco Shareholders**

Holdco expects there to be no preference shares outstanding.

On this basis, up to 39,000,000 new registered no-par value shares may be issued in exchange for cash or payment in kind (Authorized Capital I, II and IV). The management board may, with consent of the supervisory board, exclude subscription rights of shareholders in connection with any such issuance.

Additionally, 19,500,000 new registered no-par value shares may be issued in exchange for cash, while in connection with any such issuance and subject to the consent of the supervisory board, only fractional amounts of shareholder subscription rights may be excluded (Authorized Capital III).

Conditional Capital: Deutsche Börse's share capital has also been increased conditionally by up to 6,000,000 new registered no-par value shares to issue such shares in connection with certain subscription rights granted in the past (Conditional Capital I).

Dividends/Distributions

Dividends may only be paid out of the corporation's distributable profits as determined by resolution of the shareholders at the general meeting of shareholders for the preceding fiscal year. Under its capital management program, Deutsche Börse distributes to its shareholders funds not required for its operating business and further development. The program takes into account capital requirements, which are derived from the capital and legal needs from legal, regulatory, credit rating and economic perspectives.

Holders of NYSE Euronext shares are entitled to receive dividends when, as and if declared by the NYSE Euronext board of directors out of funds legally available for payment, subject to the rights of holders, if any, of NYSE Euronext preferred stock. Holders of NYSE Euronext shares are entitled to share pro rata in the assets of NYSE Euronext upon dissolution after provision has been made for all claims against, and obligations of, NYSE Euronext.

According to Holdco's articles of association, a preferred dividend is to be paid on each preference share outstanding (if any) out of the profits earned in a financial year. If in a financial year no profit is made or the profits are insufficient to allow the distribution on the preference share (if any), the deficit will be paid at the expense of the profits earned in the following financial years or, if possible at the expense of any freely distributable reserve of Holdco. After this dividend is paid,

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

the board of directors will, in its sole discretion, determine which part of the profits remaining will be reserved. The allocation of profits remaining will be determined by the general meeting of shareholders, provided that no further distributions will be made on the preference shares.

The Holdco board of directors may resolve to make interim dividend distributions to the extent permitted under the applicable provisions of the Dutch Civil Code as evidenced by an interim statement of assets and liabilities. The general meeting of shareholders may also resolve to make distributions at the expense of any reserve of Holdco, provided that such resolution can only be adopted at the proposal of the Holdco board of directors.

Distributions on shares may only be made up to the amount of Holdco's equity that exceeds the aggregate of the issued capital and the reserves, which must be maintained pursuant to the laws of the Netherlands. A claim of a shareholder for payment of a distribution will be barred after five years have elapsed from the date such payment became due.

The rights to receive dividends and other distributions attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See Comparison of Shareholder Rights Before and After the Combination Limitations on Ownership.

Deutsche Börse Shareholders

Under German law, an annual meeting of shareholders is held to exonerate (*entlasten*) Deutsche Börse's management board and supervisory board. The annual shareholders meeting also resolves upon the use of the corporation's balance sheet profits and is competent to elect the members of the supervisory board to be elected by the shareholders upon expiration of their office. The meeting is convened by the management board.

**NYSE Euronext Shareholders
Annual Meeting of Shareholders**

Under the Delaware General Corporation Law, an annual meeting of shareholders must be held for the election of directors on a date and at a time designated by or in the manner provided in the corporation's bylaws. Any other proper business may be transacted at the annual meeting.

Under the NYSE Euronext bylaws, annual meetings of shareholders

are held for the election of directors at any date, time and place as may be designated by the NYSE Euronext board of directors from time to time.

Under the NYSE Euronext bylaws, notice of the place, day and hour of the meeting and the general nature of the business to be considered must be provided to each shareholder not less than 10 days and not more than 60 days before the meeting date.

Special Meeting of Shareholders

Holdco Shareholders

The annual general meeting of shareholders will be held within six months after the end of the financial year. The agenda for the annual meeting will contain the following business:

discussion of the annual report;

discussion and adoption of the annual accounts;

release from liability of the executive director for his or her management during the financial year concerned and of the non-executive directors for their supervision thereon;

appointments for any vacancies on the board of directors; and

allocation of profits.

The agenda will also contain other business presented for discussion by the Holdco board of directors or by shareholders and/or any other business to be voted on by shareholders.

The rights to attend general meetings of Holdco shareholders attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See Comparison of Shareholder Rights Before and After the Combination Limitations on Ownership.

Edgar Filing: NYSE Euronext - Form 425

Unless other persons are authorized by law to do so, shareholders' meetings are convened by the Deutsche Börse management board or the Deutsche Börse supervisory board. To the extent that no shorter period is admissible by law, the convocation of the shareholders

Special meetings of shareholders may be called at any time by, and only by, the chairman of the board of directors, the deputy chairman of the board of directors, the chief executive officer, the deputy chief executive officer or by resolution of a majority of the NYSE Euronext board of directors.

General meetings of shareholders will be held as often as the Holdco board of directors or the Holdco group chief executive officer deems necessary. Shareholders representing in the aggregate at least one-tenth of Holdco's issued capital may also request the

A-405

Table of Contents**Deutsche Börse Shareholders**

meeting must be published in the electronic Federal Gazette (*Bundesanzeiger*) no less than 30 days prior to the conclusion of the date by which shareholders are required to register to attend the meeting (no less than six days prior to the shareholders' meeting). The date on which the convocation was published is not included in this 30-day period. This does not exclude any other forms of convocation permitted by law.

A shareholders' meeting may also be called if shareholders, whose holding in the aggregate equals or exceeds 5% of the share capital, demand such meeting in writing, stating the purpose of and reasons for such meeting.

The right to participate in and vote at the shareholders' meeting is extended to all shareholders having registered in due time whose shares are registered in the share ledger. Each no-par value share entitles the holder to cast one vote at a shareholders' meeting.

Unless mandatory rules of the German Stock Corporation Act provide to the contrary, resolutions of the shareholders' meeting will be adopted with a simple majority of the votes cast. Voting rights may be exercised by proxy.

NYSE Euronext Shareholders

Each outstanding NYSE Euronext share entitles its holder to one vote. NYSE Euronext shares held by NYSE Euronext are counted as treasury shares and are therefore not treated as outstanding.

Subject to the rights, if any, of the holders of any series of preferred stock outstanding and subject to applicable law, all voting rights are vested in the holders of NYSE Euronext shares. There are no cumulative voting rights.

There are certain limitations on voting if a person (either alone or

Holdco Shareholders

Holdco board of directors to convene a general meeting of shareholders, stating specifically the business to be discussed.

Within three months of it becoming apparent to the Holdco board of directors that the equity of Holdco has decreased to an amount equal to or lower than one-half of the paid-up part of the capital, a general meeting will be held to discuss any requisite measures. Meetings of holders of preference shares are held as frequently as a resolution is required by the meeting in question and as frequently as is deemed desirable by the Holdco board of directors, or by one or more holder(s) of preference shares.

The rights to attend general meetings of Holdco shareholders attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See "Comparison of Shareholder Rights Before and After the Combination Limitations on Ownership."

Each ordinary share and each preference share confers the right to cast one vote. To the extent that the laws of the Netherlands or Holdco's articles of association do not provide otherwise, all resolutions of the general meeting of shareholders will be adopted by a simple majority of the votes cast, without a quorum being required. All voting will take place orally. The chairman is, however, entitled to decide that votes be cast by a secret ballot. Any vote on a person at a general meeting of shareholders can only be made if the name of that person has been

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

together with their related persons) owns above a certain percentage of the outstanding equity of NYSE Euronext. See Comparison of Shareholder Rights Before and After the Combination Limitations on Voting Concentration.

placed on the agenda for that meeting at the time the notice for that meeting is given. If it concerns the holding of a vote on persons, anyone present at the meeting with voting rights may demand a vote by a secret ballot. Votes by secret ballot will be cast by means of secret, unsigned ballot papers. The Holdco board of directors may decide that each person entitled to vote is authorized to vote by electronic means of communication, either in person or by proxy. In such case, it will be required that the person entitled to vote can be identified through the electronic means of communication and can have knowledge of the discussions at the meeting directly. The Holdco board of directors may attach conditions to the use of the electronic means of communication, which conditions will be announced when convening the meeting and will be published on Holdco's website.

Holders of a majority of the voting power of the outstanding shares of stock entitled to vote on a matter at a shareholder meeting constitutes a quorum. Unless otherwise provided for in the certificate of incorporation or bylaws of NYSE Euronext, resolutions of the shareholders' meeting will be adopted with a simple majority of the votes cast in favor or against a matter.

Under Dutch law or the Holdco articles of association, as the case may be, a majority of two-thirds of the votes cast at the relevant meeting to be in favor is required for, among other things, the following types of corporate actions:

- restricting or excluding preemption rights (but only in the event less than half of the issued share capital is represented at the meeting);

- appointment (with certain exceptions, see Nomination and Appointment of Directors), suspension and removal of directors;

- amendment of the articles of association;

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

dissolution, and

a legal merger or demerger.

In addition, under the articles of association certain types of corporate action, including the actions referred to above, can only be taken upon the initiative of the Holdco board of directors, and in some cases the qualified majority must also represent more than half of Holdco's issued share capital. Shares held in excess of the voting limitation will not be counted as outstanding for purposes of determining whether such requirement has been satisfied.

The rights to vote attached to Holdco shares held by a shareholder in excess of certain ownership limitations will be suspended. See [Comparison of Shareholder Rights Before and After the Combination Limitations on Ownership](#).

Quorums

Neither the German Stock Corporation Act nor Deutsche Börse's articles of incorporation have any minimum quorum requirement applicable to shareholders meetings.

Holders of a majority of the voting power of the outstanding shares of stock entitled to vote on a matter at a shareholder meeting constitutes a quorum.

Under Dutch law and Holdco's articles of association, there are generally no quorum requirements for shareholder meetings. However, for some of the resolutions that require a majority of two-thirds of the votes cast at the relevant meeting of shareholders, such majority must represent more than one-half of Holdco's issued share capital. To the extent that the laws of the Netherlands or Holdco's articles of association do not provide otherwise, all resolutions of the general meeting of shareholders will be adopted by a simple majority of the votes cast, without a quorum being required. In addition, pursuant to Holdco's articles of association certain resolutions of the general meeting of shareholders

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

can only be adopted on a proposal of Holdco's board of directors.

In the event that a quorum is required pursuant to the laws of the Netherlands or the Holdco articles of association, Holdco shares held in excess of the voting limitation will not be counted as present at a general meeting of shareholders, and will not be counted as outstanding for purposes of determining whether there is a quorum, unless and only to the extent that the voting limitation has ceased to apply in accordance with the relevant provisions of the Holdco articles of association.

Approval of Extraordinary Transactions

According to German law, certain resolutions of fundamental importance require a majority of at least 75% of the votes cast.

Any merger, consolidation or sale of substantially all of the assets of a corporation must be approved by a resolution adopted by a majority of the directors and approved by a vote of a majority of the outstanding shares entitled to vote thereon, except that the following extraordinary transactions require approval of two-thirds of the directors then in office (instead of a majority of the directors then in office):

Resolutions of the Holdco board of directors entailing a significant change in the identity or character of Holdco or its business are subject to the approval of the general meeting of shareholders, including in any case:

Such resolutions include:

capital increases, including the exclusion of the shareholders' subscription rights;

the transfer of all or nearly all of the business of Holdco to a third party;

measures according to the German Act on Corporate Transformations;

the direct or indirect acquisition, sale or disposition by NYSE Euronext or any of its subsidiaries of assets or equity securities where the consideration received in respect of such assets or equity securities has a fair market value, measured as of the date of the execution of the definitive agreement providing for such acquisition, sale or disposition (or, if no definitive agreement is executed for such

entering into or termination of long-term co-operations of Holdco or a subsidiary with any other legal entity or company or as fully liable partner in a limited partnership or general partnership, if this co-operation or termination is of major significance for Holdco; and

entering into a domination and/or profit and loss transfer agreement;

acquiring or disposing of participating interests in the capital of a company of at least one-third of the sum of the assets of Holdco as shown on its balance sheet plus

approval of management measures to which the supervisory board denied its approval;

dissolution of Deutsche Börse; and

subsidiaries with any entity with an aggregate equity market capitalization (or, if such entity's equity securities are not traded on a national securities exchange, with a fair market value of assets), measured as of the date of the execution of the definitive agreement providing for such merger or consolidation (or, if no definitive agreement is executed for such merger or consolidation, the date of the consummation of such merger or consolidation), in excess of 30% of the aggregate equity market capitalization of NYSE Euronext as of such date; or

any direct or indirect acquisition by NYSE Euronext or any of its subsidiaries of assets or equity securities of an entity whose principal place of business is outside of the United States and Europe, or any merger or consolidation of NYSE Euronext or any of its subsidiaries with an entity whose principal place of business is outside of the United States and Europe, pursuant to which NYSE Euronext has agreed that one or more directors of the NYSE Euronext board of directors is a person who is neither a U.S. domiciliary nor a European domiciliary as of the most recent election of directors.

A resolution to effect a legal merger may only be adopted on the basis of a merger proposal prepared by the management boards of the merging legal entities. Within Holdco, the resolution to effect a merger will be adopted by the general meeting of shareholders by a resolution passed with at least a two-thirds majority of the votes cast, without a quorum being required, provided that such resolution can only be adopted at the proposal of the Holdco board of directors. However, in the cases referred to in Section 2:331 of the Dutch Civil Code, the resolution to effect a merger may, unless the articles of association provide otherwise, be adopted by the Holdco board of directors.

Holdco may be a party to a legal demerger. The term "demerger" includes both split-ups and spin-offs. A resolution to effect a demerger may only be adopted on the basis of a demerger proposal to be prepared by the management boards of the parties to the demerger. Within Holdco, the resolution to effect a demerger will be adopted by the general meeting of shareholders by a resolution passed with at least a two-thirds majority of the votes cast, without a quorum being required, provided that such resolution can only be adopted at the proposal of the board. However, in the cases referred to in Section 2:334ff of the Dutch Civil Code, the resolution to effect a demerger may, unless the articles of association provide otherwise, be adopted by the Holdco board of directors.

shares on such stock exchange where Holdco shares are listed.

In addition, the NYSE Euronext board of directors may not waive the ownership limitation for:

The ownership limitation will apply to each person unless it has (i) delivered a notice meeting certain requirements to the Holdco board of directors, and (ii) obtained a written confirmation from the Holdco board of directors that the board has resolved to expressly permit such ownership, such resolution has been filed with, and approved by, the SEC and to the extent required, the relevant European regulators.

any person who is subject to any statutory disqualification under the Exchange Act (a U.S. disqualified person); or

The Holdco board of directors may permit the ownership in excess of the ownership limitation under certain conditions with the approval of the SEC. Additionally, any such waiver of the ownership limitation must be approved by European regulators having appropriate jurisdiction and authority.

any person who has been determined by a European regulator to be in violation of the laws or regulations adopted in accordance with the European MiFID applicable to any European market subsidiary requiring such person to act fairly, honestly and professionally (a European disqualified person).

In considering whether to permit ownership in excess of the ownership limitation, the Holdco board of directors must determine, among other things, that the ownership of such shares:

will not impair the ability of Holdco or the U.S. regulated subsidiaries of Holdco to discharge their respective responsibilities under the Exchange Act and the rules thereunder;

will not impair the ability of Holdco or the European market subsidiaries of Holdco to discharge their respective responsibilities under European exchange regulations;

will not impair the SEC's ability to enforce the Exchange Act;

will not impair the European regulators
ability to enforce European exchange
regulations; and

A-412

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

is otherwise in the best interests of Holdco, its shareholders, its U.S. regulated subsidiaries and its European market subsidiaries.

In addition, the Holdco board of directors may not permit ownership in excess of the ownership limitation for any person who is a U.S. disqualified person or a European disqualified person.

In addition, Section 5:32d of the Dutch Financial Supervision Act requires a declaration of no objection of the Dutch Minister of Finance for any holding, acquisition or increase of a direct or indirect interest of more than 10% of the outstanding capital or voting rights (a qualifying interest) in an operator or holder of a regulated market in the Netherlands which has been granted a license to operate such market pursuant to Section 5:27 of the Dutch Financial Supervision Act. The Dutch Minister of Finance has delegated its powers to grant a declaration of no objection under Section 5:32d of the Dutch Financial Supervision Act to the AFM except in cases where the acquisition of the qualifying interest involves a fundamental change to the shareholding structure of the relevant licensed operator or holder of a regulated market in the Netherlands. Holdco, NYSE Euronext (International) B.V., NYSE Euronext (Holding) N.V., Euronext N.V. and NYSE Euronext (Holding) N.V. directly or indirectly control Euronext Amsterdam N.V., which is the licensed holder and operator of a regulated market in the Netherlands, and have obtained a declaration of no objection under Section 5:32d referred to above. Therefore any holding, acquisition or increase of a direct interest in

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

Holdco which results in an indirect qualifying interest in Euronext Amsterdam N.V., (and Euronext N.V., NYSE Euronext (Holding) N.V. or NYSE Euronext (International) B.V. or any of them to the extent they are regarded by the Dutch Minister of Finance, and are licensed, as holder and/or operator of a regulated market in the Netherlands jointly with Euronext Amsterdam N.V.) will trigger the requirement to obtain a declaration of no objection of the Dutch Minister of Finance in the event of a fundamental change in the shareholding structure or otherwise the AFM on behalf of the Dutch Minister of Finance. Such declaration should be granted unless such holding, acquisition or increase (1) could or would lead to a formal or actual control structure that is lacking in transparency and would therefore constitute an impediment to the adequate supervision of the compliance by the market operator with the rules applicable to the regulated market; (2) could or would lead to an influence on the regulated market operator that is contrary to the interests which the Dutch Financial Supervision Act seeks to protect; or (3) could jeopardize the healthy and prudent operation of the regulated market concerned. Similar requirements apply with respect to Euronext Amsterdam N.V. as licensed operator of Alternext, a multilateral trading platform.

Limitations on Voting Concentration

In connection with Deutsche Börse's acquisition of an interest in ISE, Deutsche Börse's supervisory and management boards adopted resolutions relating to certain limitations on concentration of ownership of Deutsche Börse shares.

The NYSE Euronext certificate of incorporation provides that no person, either alone or with its related persons, may possess the right to vote or cause the voting of shares representing more than 10% of the then outstanding votes

The Holdco articles of association will provide that no person, either alone or together with its related persons (as defined in the Holdco articles of association), will be entitled to vote or cause the voting of Holdco shares beneficially

Table of Contents

Deutsche Börse Shareholders

The resolutions provide that for so long as Deutsche Börse directly or indirectly controls ISE, if any person, either alone or together with its related persons, directly or indirectly owns of record or beneficially, as determined under Sections 21 and 22 of the German Securities Trading Act, 20%, 25%, 30%, 50% or 75% or more of the then-outstanding Deutsche Börse shares entitled to vote on any matter, Deutsche Börse will, as soon as practicable, give written notice of such ownership to the board of directors of ISE and to ISE Trust, a statutory trust formed under the laws of the State of Delaware.

The certificate of ISE's parent company, International Securities Exchange Holdings, Inc. (ISE Holdings) provides that, if a person or group that has not been approved by the SEC directly or indirectly acquires voting control over more than 20% of the outstanding shares of ISE Holdings, then an amount of Holdings' shares sufficient to reduce such person(s) voting control over outstanding shares of ISE Holdings to 20% or below would be automatically transferred to ISE Trust.

Under German law, there are no statutory limitations relating to voting concentration that are applicable to Deutsche Börse.

NYSE Euronext Shareholders

entitled to be cast on any matter, and no person, either alone or with its related persons, may acquire the ability to vote more than 10% of the then outstanding votes entitled to be cast on any matter by virtue of agreements entered into by other persons not to vote shares of NYSE Euronext capital stock.

The voting limitations do not apply to a solicitation of a revocable proxy by or on behalf of NYSE Euronext or by any officer or director of NYSE Euronext acting on behalf of NYSE Euronext or to a solicitation of a revocable proxy by a NYSE Euronext shareholder in accordance with Regulation 14A of the Exchange Act. This exception, however, does not apply to certain solicitations by a shareholder pursuant to Rule 14a-2(b)(2) of the Exchange Act, which permits a solicitation made otherwise on behalf of NYSE Euronext where the total number of persons solicited is not more than ten.

The NYSE Euronext board of directors may waive the limitations on voting concentration under certain conditions with the approval of the SEC.

Additionally, any waiver of the voting limitation must also be approved by European regulators having appropriate jurisdiction and authority.

In considering whether to grant a waiver of the voting limitations, the NYSE Euronext board of directors must determine, among other things, that the exercise of such voting rights:

will not impair the ability of NYSE Euronext or the U.S.

Holdco Shareholders

owned by such person or its related persons in excess of twenty percent (20%) of all votes that may be cast on any matter, and no person, either alone or together with its related persons, may acquire the ability to vote in excess of 20% of all votes entitled to be cast on any matter by virtue of agreements entered into by it with other persons not to vote outstanding Holdco shares.

If a person exceeds the voting limitation, Holdco will be required to disregard any votes purported to be cast in excess of the voting limitation amount.

The voting limitation will apply to each person unless it has (i) delivered a notice meeting certain requirements to the Holdco board of directors, and (ii) obtained a written confirmation from the Holdco board of directors that the board has resolved to expressly permit such voting, such resolution has been filed with, and approved by, the SEC and to the extent required, the relevant European regulators.

The voting limitations do not apply to a solicitation of a revocable proxy from a Holdco shareholder by or on behalf of Holdco or by any officer or director of Holdco acting on behalf of Holdco, or to a solicitation of a revocable proxy from a Holdco shareholder by any other Holdco shareholder in accordance with Regulation 14A under the Exchange Act. This exception, however, does not apply to certain solicitations by a shareholder pursuant to Rule 14a-2(b)(2) under the Exchange Act, which permits a solicitation made otherwise than

Deutsche Börse Shareholders	NYSE Euronext Shareholders Transfer Restrictions	Holdco Shareholders
Deutsche Börse has not imposed any transfer restrictions on its shares. However, a shareholder may only make use of its voting rights upon the registration of such shareholder in the share ledger.	There are no transfer restrictions on NYSE Euronext shares.	Holdco has not imposed any transfer restrictions on its shares.
		The ordinary shares and preference shares will be freely transferable and capable of being encumbered with a right of pledge or usufruct. A transfer of non-listed ordinary shares or preference shares will require a written instrument and, if Holdco is not a party thereto followed either by Holdco's written acknowledgement of such transfer or service of (a true copy of) the relevant transfer instrument in accordance with Dutch law. Shares listed on the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris and any other stock exchange where Holdco shares or depository receipts of Holdco shares are listed, will be transferred in accordance with the applicable laws.
	Shareholder Proposals	
One or more shareholders holding shares representing an aggregate of at least 5% of the issued share capital of Deutsche Börse are entitled to request a general shareholders' meeting be called. Shareholders holding ordinary shares representing an aggregate of at least 5% of the issued share capital or holding shares in an aggregate nominal amount of at least 500,000 are entitled to require that a matter be placed on the agenda of the general shareholders' meeting for resolution. The requests must be made in writing stating the purpose and the reasons for the request and must be addressed to the Deutsche Börse management board. A proper request will be published together with the notice of the shareholders' meeting and the agenda in the electronic version of the German Federal Gazette (<i>elektronischer</i>	The proposal of business to be considered by the shareholders may be made by any shareholder of NYSE Euronext by giving notice to the Secretary of NYSE Euronext within a certain period. Such business must also be a proper matter for shareholder action.	The notice convening any general meeting of shareholders must include or be accompanied by an agenda indicating the items for discussion and shall mention where such agenda can be obtained, which shall, in any event, be at the offices of Holdco in the Netherlands, as well as any proposals for the agenda. Items for which a written request has been filed to discuss at the general meeting of shareholders will be included in the notice or announced in the same manner, provided that
		Holdco received the substantiated request or a proposal for a resolution no later than the 60th day before the date of the meeting; and
		the shareholder or shareholders making the

Table of Contents**Deutsche Börse Shareholders**

Bundesanzeiger), or, if a request was made after the publication of the notice and agenda, will be published without undue delay.

Additionally, each shareholder may submit, at or prior to the shareholders' meeting, counter proposals to the proposals submitted by the Deutsche Börse management board and the Deutsche Börse supervisory board. Under certain circumstances, such counter proposals must be published in the electronic German Federal Gazette prior to such shareholders' meeting.

Deutsche Börse has a two-tier board system consisting of the management board and the supervisory board. The Deutsche Börse management board leads Deutsche Börse and manages its business. It currently consists of six members. Members of the management board are appointed by the supervisory board. The statutory maximum term for members of the management board is five years. Deutsche Börse management board members may be reappointed.

The Deutsche Börse supervisory board supervises and advises the management board in the management of Deutsche Börse. The Deutsche Börse management board must obtain the Deutsche Börse supervisory board's prior approval for certain transactions of particular importance as determined by the supervisory board. There are currently 18 members of the Deutsche Börse supervisory board, which consists of 12 shareholder representatives and six employee representatives. No more than two former members of the Deutsche Börse management board may be

NYSE Euronext Shareholders**Governance**

The number of NYSE Euronext directors is 16 and may be changed and fixed from time to time by the NYSE Euronext board of directors pursuant to a resolution adopted by not less than two-thirds of the directors then in office.

In any election of directors, the nominees who will be elected to the board of directors are the nominees who receive the highest number of votes such that, immediately after the election:

U.S. domiciliaries as of such election will constitute at least half of, and no more than the smallest number of directors that will constitute a majority of, the directors on the board of directors; and

European domiciliaries as of such election will constitute the remainder of the directors.

Each director holds office until his or her successor is elected and qualified or until his or her earlier resignation or removal.

Holdco Shareholders

request represent at least one-hundredth part of Holdco's issued share capital or, according to the applicable official price list of the New York Stock Exchange, the Frankfurt Stock Exchange, Euronext Paris or any other stock exchange where shares or depositary receipts of shares are listed, a value of at least 50,000,000, or such other part of Holdco's issued capital as may be required in this respect by the laws of the Netherlands from time to time.

Until the end of the annual general meeting of shareholders occurring in 2015 (which is referred to in this document as the "initial board term"), the Holdco board of directors will consist of 17 directors constituted as follows: one executive director nominated for appointment upon designation by NYSE Euronext, being the Holdco group chief executive officer; one director nominated for appointment upon designation by Deutsche Börse, being the Holdco group chairman; and 15 non-executive directors, consisting of six non-executive directors nominated for appointment upon designation by NYSE Euronext and nine non-executive directors nominated for appointment upon designation by Deutsche Börse.

Immediately following the expiry of the initial board term, the number of directors will be decreased and the Holdco board of directors will consist of 12 members (without distinguishing the directors by class) constituted

Table of Contents

Deutsche Börse Shareholders	NYSE Euronext Shareholders	Holdco Shareholders
members of the Deutsche Börse supervisory board.	Under the NYSE Euronext bylaws, either (1) the chairman of the board of directors must be a U.S. domiciliary and the chief executive officer must be a European domiciliary, in each case, as of the most recent election of directors, or (2) the chairman of the board of directors must be a European domiciliary and the chief executive officer must be a U.S. domiciliary, in each case, as of the most recent election of directors.	as follows: one executive director, being the Holdco group chief executive officer; one director, being the Holdco group chairman; and ten non-executive directors.
	The foregoing governance provisions may only be changed by a vote of not less than (1) two-thirds of the directors then in office or (2) 80% of the votes entitled to be cast by the holders of the then outstanding shares of capital stock of NYSE Euronext entitled to vote generally in the election of directors.	
	Nomination and Appointment of Directors	
The Deutsche Börse supervisory board is responsible for the appointment of the members to the Deutsche Börse management board and the revocation of such appointment. The Deutsche Börse supervisory board appoints one member of the management board as chairman.	Directors are elected by the shareholders at each annual meeting of shareholders. Directors are elected by a plurality of the votes of the shares present in person or represented by proxy at the meeting and entitled to vote on the election of directors.	Unless the Holdco board of directors determines that Holdco qualifies as a foreign private issuer as described in Business of Holdco and Certain Information about Holdco Board of Directors Composition, each of the directors will be appointed by the general meeting of shareholders for a term that will expire at the end of the next annual general meeting of shareholders or until his or her successor is elected or, if earlier, upon such director's resignation, removal or death.
The Deutsche Börse supervisory board members are elected for a term of office ending at the closing of the general shareholders' meeting which votes on the approval for the second fiscal year after the commencement of the term of office, not including such fiscal year in which the term of office has commenced. The general shareholders meeting may set a shorter term of office for one or several shareholder representatives.	U.S. domiciliaries as of such election must constitute at least half of, and no more than the smallest number of directors that will constitute a majority of, the directors on the board of directors; and European domiciliaries as of such election will constitute the remainder of the directors.	Directors are appointed by the general meeting of shareholders by a vote in favor of at least two-thirds majority of the votes cast, representing more than one-half of Holdco's issued share capital or, in the case of any person

NYSE Euronext Shareholders

Holdco Shareholders

The nomination of a director for election may be made by any shareholder of NYSE Euronext by giving notice to the Secretary of NYSE Euronext within a certain period. Any notice given to the Secretary of NYSE Euronext purporting to nominate one or more directors must include the documentation necessary to determine whether the nominee is a U.S. domiciliary or a European domiciliary as set forth in the bylaws of NYSE Euronext.

nominated by the Holdco board of directors for appointment as a director, by the vote in favor of at least a majority of the votes cast.

The Holdco board of directors may also submit a binding nomination in accordance with Section 2:133 of the Dutch Civil Code to nominate persons for appointment as directors at the general meeting of shareholders and, in the event of any such binding nomination, the general meeting will appoint directors solely from such binding nominations. However, the general meeting may, by a resolution passed with at least a two-thirds majority of the votes cast, representing more than one-half of Holdco's issued capital, resolve that the candidates proposed pursuant to any binding nomination will not be appointed as directors, in which case the Holdco board of directors has the right to submit a new binding nomination with respect to any board seats which are to be filled for the appointment of director(s) at a further general meeting of shareholders.

Any vacancy on the board of directors may be filled only by a majority vote of the remaining directors then in office. Vacancies created by the death, retirement, resignation, disqualification or removal from office of a U.S. domiciliary or a European domiciliary must be filled by a U.S. domiciliary or a European domiciliary, respectively.

Vacancies created by an increase in the number of directors between annual meetings will be filled such that following the filling of such vacancy:

U.S. domiciliaries as of their most recent election or appointment will constitute at least half of, and no more than the smallest number of directors that will constitute a majority of, the directors on the board of directors; and

European domiciliaries as of their most recent election or appointment will constitute the remainder of the directors.

may be effectuated, then the amendment or repeal will not be effectuated until filed with, or filed with and approved by, the relevant European regulator.

For purposes of these provisions, a European market subsidiary means a market operator, as defined by the European MiFID.

Amendments to Bylaws or Other Governing Documents

Each corporate body of Deutsche Börse can pass resolutions regarding bylaws governing its actions including responsibilities or rules of procedure.

The NYSE Euronext board of directors is expressly empowered to adopt, amend or repeal the NYSE Euronext bylaws.

Until the annual general meeting of shareholders occurring in 2016, the Rules for the Board of Directors may be amended and supplemented by the Holdco board of directors from time to time by a resolution adopted by more than 66% of the total number of directors that would be in office if none of the Holdco board of directors seats would be vacant and all directors would be able to perform their duties. Thereafter, the Rules for the Board of Directors may be amended and supplemented in accordance with their terms. In case a change of the Rules for the Board of Directors at the same time would constitute a change of the articles of association, or would conflict with the articles of association, the change to the Rules for the Board of Directors will become effective only upon the effectiveness of a change of the Holdco articles of association.

However, rules of procedure for the management board can only be passed by the supervisory board.

The shareholders may adopt additional bylaws and amend, modify or repeal any bylaw whether or not adopted by them, by a majority of votes cast at a meeting by shareholders entitled to vote.

Resolutions of the Deutsche Börse supervisory board as to its bylaws can be passed with a simple majority of votes cast.

For so long as NYSE Euronext controls, directly or indirectly, any U.S. regulated subsidiary, before any amendment or repeal of any provision of the certificate of incorporation is effective, it must be submitted to the boards of directors of the NYSE, NYSE Market, NYSE Regulation, NYSE Arca, Inc. and NYSE Arca Equities. If any of these boards of directors determines that the amendment or repeal must be filed with, or filed with and approved by, the SEC under Section 19 of the Exchange Act, then the amendment or repeal will not be effectuated until filed with, or filed with and approved by, as applicable, the SEC.

The bylaws of the shareholders meeting may be amended by resolutions passed by 75% of the votes cast, and may include, for example, procedures regarding security checks, limitation of speaking time and procedures for taking ballots.

Table of Contents

Deutsche Börse Shareholders

NYSE Euronext Shareholders

Holdco Shareholders

Amendments to certain NYSE Euronext bylaws require an affirmative vote of not less than (1) two-thirds of the directors then in office or (2) 80% of the votes entitled to be cast by the holders of the then outstanding shares of capital stock of NYSE Euronext entitled to vote generally in the election of directors. These include bylaws relating to:

board size;

board composition;

certain qualifications for directors and for the chairman of the board and the chief executive officer;

the requirements for filling vacancies on the board of directors;

the notice required for special meetings of the board of directors;

the ability of directors to attend meetings telephonically;

the composition of the nominating and governance committee;

the definition of Europe ;

the requirement that not less than two-thirds of the board approve certain extraordinary transactions (see Comparison of

Edgar Filing: NYSE Euronext - Form 425

Shareholder Rights Before and After the
Combination Approval of Extraordinary
Transactions); and

the director and shareholder approval
thresholds necessary to amend the bylaws.

at any time, NYSE Euronext no longer holds a direct or indirect controlling interest in Euronext or in one or more subsidiaries of Euronext that, taken together, represent a substantial portion of Euronext's business;

then the following provisions will be revoked:

the NYSE Euronext bylaw provisions noted above that were subject to suspension;

the references in the NYSE Euronext certificate of incorporation and NYSE Euronext bylaws to European regulators, European exchange regulations, European market subsidiaries, European regulated markets, Europe and European disqualified persons;

the provisions in the NYSE Euronext certificate of incorporation and bylaws requiring that amendments to the NYSE Euronext certificate of incorporation or bylaws be submitted to the European market subsidiaries and, if applicable, filed with and approved by a European regulator; and

the provisions in the NYSE Euronext bylaws requiring approval of not less than (1) two-thirds or more of the NYSE Euronext directors or (2) 80% of the votes entitled to be cast by the holders of the then outstanding shares of capital stock of NYSE Euronext entitled to vote generally in the election of directors to amend certain bylaw provisions.

Table of Contents**Deutsche Börse Shareholders**

An appraisal proceeding (*Spruchverfahren*) is available to Deutsche Börse shareholders under the German Appraisal Proceedings Law (*Spruchverfahrensgesetz*). Under this law, a court can be asked to determine the adequacy of the consideration or compensation paid to minority shareholders in certain corporate transactions including (1) the consolidation or merger of companies according to the provisions of the German Transformation Act; (2) the conclusion of a domination or profit and loss transfer agreement between a controlling shareholder and its dependent company; (3) the squeeze-out of minority shareholders pursuant to Sections 327a *et seq.* of the German Stock Corporation Act by a shareholder holding at least 95% of the share capital of a corporation; and (4) according to the German Federal Court of Justice, the delisting of Deutsche Börse from the German stock exchange. In each of these circumstances, the shareholder seeking the adequacy determination must comply with the procedural requirements specified in the applicable statutory provision.

NYSE Euronext Shareholders

In addition, any officer or director of NYSE Euronext who is a European domiciliary will resign or be removed from his or her office.

Appraisal or Dissenters Rights

Under the Delaware General Corporation Law, a shareholder of a Delaware corporation generally has the right to dissent from a merger or consolidation in which the corporation is participating or a sale of all or substantially all of the assets of the corporation, subject to specified procedural requirements. The Delaware General Corporation Law does not confer appraisal rights, however, if the corporation's stock is either:

listed on a national securities exchange;

or

held of record by more than 2,000 holders; and further provided that no appraisal rights will be available for any shares of stock of the constituent corporation surviving a merger if the merger did not require for its approval the vote of the shareholders of the surviving corporation.

Even if a corporation's stock meets these requirements (as NYSE Euronext's currently does), the Delaware General Corporation Law still provides appraisal rights if shareholders of the corporation are required to accept for their

stock in any merger, consolidation or similar transaction anything other than:

shares of stock of the corporation surviving or resulting from such merger or consolidation, or depository receipts in respect thereof;

Holdco Shareholders

Dutch law recognizes the concept of appraisal or dissenters' rights in certain circumstances. These rights include:

the right for minority shareholders to object to the squeeze-out price proposed to the court by the holders of 95% or more of the issued capital of Holdco in squeeze-out proceedings pursuant to Section 2:92a Dutch Civil Code;

the right for dissenting shareholders of the acquired company in a cross-border merger with a company incorporated in another European Union or European Economic Area member state to be indemnified pursuant to Section 2:333h Dutch Civil Code; and

the right for minority shareholders to object to the squeeze-out price proposed to the court by the holders of 95% or more of the issued capital and voting rights of Holdco in squeeze-out proceedings pursuant to Section 2:359c Dutch Civil Code following a public takeover offer.

Table of Contents

Holdco Shareholders

shares of stock of any other corporation, or depository receipts in respect thereof, which shares of stock (or depository receipts in respect thereof) or depository receipts at the effective date of the merger or consolidation will be either listed on a national securities exchange or held of record by more than 2,000 holders;

cash in lieu of fractional shares or fractional depository receipts described in the foregoing; or

any combination of the foregoing.

Preemption Rights

Under the German Stock Corporation Act, an existing shareholder in a stock corporation has a preferential right to subscribe for issues of new shares in proportion to the number of shares such shareholder holds in the corporation's existing share capital (preemption rights or subscription rights; *Bezugsrechte*). The German Stock Corporation Act allows companies to exclude this preferential subscription right in limited circumstances and only if so provided in the same shareholder resolution that authorizes the accompanying capital increase or share issuance. At least 75% of the share capital represented at the meeting must vote to authorize the exclusion of subscription rights. Prior to approval by the shareholders, exclusion of subscription rights requires the Deutsche Börse management board to report on the reasons for the exclusion to the shareholders in writing. With regard to the authorized capital, the Deutsche Börse management board may increase the share capital

Under the Delaware General Corporation Law, shareholders have no preemption rights to subscribe to additional issues of stock or to any security convertible into such stock unless, and except to the extent that, such rights are expressly provided for in the certificate of incorporation.

The NYSE Euronext certificate of incorporation does not provide for preemption rights.

Dutch law and Holdco's articles of association generally give Holdco's shareholders preemption rights to subscribe on a pro rata basis for any issue of new shares or, upon a grant of rights, to subscribe for shares. Exceptions to these preemption rights include (1) the issue of shares against a non-cash contribution; (2) the issue of shares and the grant of rights to subscribe for shares to Holdco's employees or employees of its group companies; (3) the issue of shares to persons exercising a previously-granted right to subscribe for shares; and (4) the issue of preference shares. Holders of preference shares have no right of preemption on ordinary shares or preference shares.

A shareholder has the legal right to exercise preemption rights for at least two weeks after the date of the announcement of the issue or grant by way of an announcement in the Dutch governmental gazette (*Staatscourant*) (or by way of

Table of Contents

Deutsche Börse Shareholders

without offering subscription rights with the approval of the Deutsche Börse supervisory board.

NYSE Euronext Shareholders

Holdco Shareholders

written notice in the event of registered shares). Holdco will announce any issuance of shares with rights of preemption and the period of time within which such rights of preemption may be exercised in the Dutch Government Gazette (*Staatscourant*) and in a nationally distributed newspaper, unless the announcement is made to all holders of shares in writing to the address provided by each of them, and furthermore in such other manner as may be required to comply with the rules of the New York Stock Exchange, the Frankfurt Stock Exchange, Euronext Paris and any other stock exchange where Holdco shares or depositary receipts of Holdco shares are listed. However, Holdco's general meeting of shareholders, or Holdco's board of directors if so authorized by the general meeting of shareholders for a period not exceeding five years, may restrict or exclude preemption rights. A resolution by the general meeting of shareholders to delegate to Holdco's board of directors the authority to exclude or restrict preemption rights requires a supermajority of at least two-thirds of the valid votes cast at the general meeting of shareholders if less than half of Holdco's issued share capital are present or represented. A simple majority is sufficient if more than half of Holdco's issued share capital are present or represented. If not otherwise stated in the resolution to delegate, the delegation is irrevocable. A resolution by the general meeting of shareholders to delegate the authority to exclude or restrict preemption rights must be for a fixed period not exceeding

Table of Contents**Deutsche Börse Shareholders****NYSE Euronext Shareholders****Holdco Shareholders**

five years and is only possible if the relevant corporate body is also designated as the corporate body authorized to issue shares. If the general meeting of shareholders has not delegated this authority to another corporate body, the general meeting of shareholders is authorized to restrict or exclude preemption rights.

It is expected that prior to the completion of the combination, the Holdco board of directors will be designated by Holdco's general meeting of shareholders as the corporate body competent to exclude or restrict preemption rights for ordinary shares, subject to the limited authority it has to issue ordinary shares and grant rights to acquire ordinary shares, for a period of five years from the date of the resolutions.

U.S. holders of Holdco shares should be aware that their ability to exercise preemption rights may be limited unless a registration statement under the Securities Act has been filed to register the offering of preemptive rights with the SEC.

Acquisition of Treasury Shares and Reduction of Share Capital

Deutsche Börse may acquire its own shares on the basis of an authorization by the general meeting of shareholders which sets forth the lowest and the highest price for the shares, so long as it acquires no more than 10% of its issued shares. Such authorization can be granted for a period of up to five years. The purpose of the acquisition by Deutsche Börse of its own shares may not be trading in its own shares. Deutsche Börse may purchase its own shares for certain defined purposes (*e.g.*, if the acquisition is necessary to avoid severe and

Under the Delaware General Corporation Law, a corporation may redeem or repurchase its own shares, except that a corporation cannot generally make such a purchase or redemption if it would cause impairment of its capital.

Holdco may acquire its own shares subject to and in accordance with the limits prescribed by Dutch law, provided that (1) the nominal value of the shares Holdco and its subsidiaries hold at any time, in ownership or pursuant to a right of pledge, must not exceed 50% of Holdco's issued share capital and (2) its distributable reserves are at least equal to the purchase price. Subject to such threshold, Holdco may acquire its own fully paid shares at any time for no consideration (*om niet*). An acquisition of its shares for value

immediate damage to Deutsche Börse, if the shares are to be offered for purchase to persons who are or were in an employment relationship with Deutsche Börse or an affiliate or if the acquisition is made to compensate shareholders in connection with corporate transactions).

NYSE Euronext Shareholders

Holdco Shareholders

can only be effected if the general meeting of shareholders has so authorized the Holdco board of directors, which authorization will remain valid for a maximum period of 18 months and must specify the number of shares which may be acquired, the manner in which they may be acquired and the limits within which the price must be set. Authorization is generally not required for the acquisition of shares in order to transfer them to Holdco's employees. The actual acquisition may only be effected by a resolution of the Holdco board of directors. It is expected that prior to the completion of the combination, Holdco's general meeting of shareholders will authorize the Holdco board of directors to acquire fully paid-up ordinary shares and preference shares in Holdco's own capital, which authorization will be valid for a period of eighteen months from the date of the resolutions under the following conditions:

the acquisition price of ordinary shares will be between an amount equal to the nominal value of the ordinary shares and an amount equal to 110% of the average market price of these shares on the stock markets of the New York Stock Exchange, the Frankfurt Stock Exchange and Euronext Paris (the market price being the average of the closing price on each of the 30 consecutive days of trading preceding the three days prior to the date of repurchase);

the acquisition price of preference shares will be the nominal value of such preference shares; and

the number of shares that may be acquired is limited by the maximum number of shares that Holdco is allowed to repurchase and hold at any

moment in accordance with current or future legislation and Holdco's articles of association.

The general meeting of shareholders may resolve to cancel shares or to otherwise decrease Holdco's share capital subject to and in accordance with Dutch law, provided that pursuant to Holdco's articles of association a resolution to reduce Holdco's issued capital can only be adopted at the proposal of the Holdco board of directors, and provided further that a resolution to cancel shares can relate only to shares held as treasury or preference shares, regardless of whether they are held in treasury. Any reduction of Holdco's share capital by way of a decrease of the nominal value of shares without repayment of capital must be made pro rata to all shares of the same class. Such pro rata requirement may be waived if all shareholders of that class consent thereto. A resolution in respect of a capital reduction requires a majority of at least two-thirds of the votes cast, if less than half the issued capital is present or represented at the relevant general meeting of shareholders. If there are different classes of shares in issue, a resolution to reduce Holdco's share capital requires a prior or simultaneous resolution of approval by holders of at least two-thirds of shares of each class whose rights are prejudiced.

Each shareholder who was present at the general meeting of the shareholders and has objected to individual resolutions or all of the resolutions in the minutes may, within one month after adoption of the resolutions by the shareholders meeting, take action against Deutsche Börse to contest such resolutions (*Anfechtungsklage*).

However, German law does not provide for class actions and does not generally permit shareholder derivative suits, even in the case of a breach of duty by the members of the Deutsche Börse management board or the Deutsche Börse supervisory board. Company claims for compensatory damages against members of the Deutsche Börse management board or the Deutsche Börse supervisory board may, as a rule, only be asserted by Deutsche Börse itself, in which case Deutsche Börse is represented by the Deutsche Börse supervisory board when claims are made against members of the Deutsche Börse management board and by the Deutsche Börse management board when claims are made against members of the Deutsche Börse supervisory board.

According to a ruling by the German Federal Court of Justice (*Bundesgerichtshof*), the supervisory board is obligated to assert claims for compensatory damages against the Deutsche Börse management board that are likely to be successful, unless important company interests would conflict with such an assertion of claims and such grounds outweigh, or are at least comparable to, the grounds in favor of asserting claims. In the event that the relevant entity with powers of representation decides

Under the Delaware General Corporation Law, a shareholder may bring a derivative action on behalf of the corporation to enforce the rights of the corporation. An individual also may commence a class action suit on behalf of himself and other similarly situated shareholders where the requirements for maintaining a class action under Delaware law have been met. A person may institute and maintain such a suit only if such person was a shareholder at the time of the transaction that is the subject of the suit. Additionally, under Delaware case law, the plaintiff generally must be a shareholder not only at the time of the transaction that is the subject of the suit, but also throughout the duration of the derivative suit. Delaware law also requires that the derivative plaintiff make a demand on the directors of the corporation to assert the corporate claim before the suit may be prosecuted by the derivative plaintiff, unless such demand would be futile.

Under Dutch law, a decision of a body of Holdco (e.g. the board of directors) may be subject to nullification in the event that the decision: (i) was contrary to any statutory provision; and/or (ii) was contrary to the standards of reasonableness and fairness that have to be observed vis-à-vis each other by those persons and bodies that, according to any statutory provision and/or the articles of association, are involved with Holdco; and/or (iii) was contrary to any provision contained in the articles of association of Holdco that determines the formal requirements of the decision making process; and/or (iv) was contrary to any board or committee rules of Holdco. Such nullification can only be requested in proceedings before the Dutch court by a party that has a reasonable interest in the due performance of the relevant obligation that has not been performed.
