PROSPECTUS SUMMARY

This summary highlights selected information contained elsewhere in this prospectus or in documents incorporated by reference in this prospectus. This summary does not contain all of the information that you should consider before investing in our common stock. You should read carefully the entire prospectus, including Risk Factors and the other information contained or incorporated by reference in this prospectus before making an investment decision.

Our Business

We are a diversified global supplier of drilling and production related products and services. Our strategic focus includes oilfield specialty chemicals and logistics, down-hole drilling tools and down-hole production tools used in the energy and mining industries. We have three strategic business segments: Chemicals and Logistics, Drilling Products and Artificial Lift. Each segment offers competitive products and services derived from patented technological advances that are reactive to industry demands in both domestic and international markets.

Chemicals and Logistics

The chemicals business provides oil and natural gas field specialty chemicals for use in drilling, cementing, stimulation and production activities designed to maximize recovery within both new and mature fields. Our specialty chemicals possess enhanced performance characteristics and are manufactured to withstand a broad range of down-hole pressures, temperatures and other well-specific conditions and are compliant with customer specifications. We have two operational laboratories: (i) a technical services laboratory and (ii) a research and development laboratory. Each focuses on design improvements, development and viability testing of new chemical formulations, as well as continued enhancement of existing products. Our CESI branded micro-emulsions are patented both domestically and internationally and are proven strategically cost effective alternatives within both oil and natural gas markets. Micro-emulsions are environmentally friendly stable mixtures of oil, water and surface active agents that form complex nano-fluids which organize molecules into nanostructures. The combined advantage of solvents, surface active agents and drilling structures result in increased well treatment results compared to the independent use of solvents and surface active agents. Our CESI micro-emulsions are composed of renewable, plant derived, cleaning ingredients and oils that are certified as biodegradable. Certain micro-emulsions have been approved for use in the North Sea which has some of the most stringent oil field environmental standards in the world. Our micro-emulsions have benefited both operational and financial results in low permeability sand and shale reservoirs.

Our logistics business designs, operates and manages automated bulk material handling and loading facilities. The bulk facilities handle oilfield products, including sand and other materials for well-fracturing operations, dry cement and additives for oil and natural gas well cementing, and supply materials used in oilfield operations.

Drilling Products

We are a leading provider of down-hole drilling tools for use in oilfield, mining, water-well and industrial drilling activities. We also manufacture, sell, rent and inspect specialized equipment used in drilling, completion, production and workover activities. Through internal growth initiatives, operational best practices and acquisitions, we have realized increased rental tool activity and broadened our geographic scope of operations. Established tool rental operations are strategically located throughout the United States and in an increasing number of international markets. Rental tools include stabilizers, drill collars, reamers, wipers, jars, shock subs, wireless survey, measurement while drilling tools and mud-motors. Equipment sold primarily includes mining equipment, centralizers and drill bits. We remain focused on product marketing in the Southeast, Northeast, Mid-Continent and Rocky Mountain regions of the United States, as well as on international sales expansion using third party agents and employees.

Table of Contents

Artificial Lift

We provide pumping system components, electric submersible pumps, gas separators, production valves and complementary services. Our Artificial Lift products satisfy the requirements of coal bed methane and traditional oil and natural gas production and assist natural gas, oil and other fluids movement from the producing horizon to the surface. Artificial Lift products employ proprietary technologies instrumental to improved well performance. Our patented Petrovalve products optimize pumping efficiency in horizontal completions as well as heavy oil wells and wells with high liquid to gas ratios. Petrovalve products placed horizontally increase flow per stroke, and eliminate gas locking of traditional ball and seat valves that require more maintenance. The patented gas separation technology is particularly effective in coal bed methane production, efficiently separating gas and water down-hole as well as ensuring solution gas is not lost in water production. Gas separated down-hole contributes to a reduction in the environmental impact of escaped gas at the surface. The majority of our Artificial Lift products are manufactured in China, assembled domestically and distributed globally.

Our principal executive offices are located at 2930 W. Sam Houston Pkwy. N., Houston, Texas 77043, and our telephone number is (713) 849-9911. Our website address is <http://www.flotekind.com>. Additional Risks Associated With an Investment in Our Common Stock

Substantial sales of our common stock could adversely affect our stock price.

Such sales could cause the market price of our common stock to decline.

By causing a large number of shares of common stock to be sold in the public market, the selling stockholders named herein and other holders of our common stock could cause the market price of our common stock to decline. We cannot predict whether future sales of our common stock, or the availability of our common stock for sale, will adversely affect the market price for our common stock or our ability to raise capital by offering equity securities.

The issuance of the shares of common stock was exempt from the registration requirements of the Securities Act under Section 4(2) of the Securities Act, which did not involve a public offering. In connection with our entry into the Amended and Restated Credit Agreement, we entered into two separate registration rights agreements with the selling stockholders, pursuant to which we agreed to file the registration statement of which this prospectus forms a part with the SEC in accordance with the requirements of the Securities Act in order to register the offers and sales by the selling stockholders of the shares of common stock offered hereby. Under the registration rights agreements, we have agreed to indemnify each selling stockholder against certain liabilities, including liabilities under the Securities Act.

The following table sets forth information regarding the selling stockholders and the number of shares of common stock each selling stockholder is offering. The information included in the table as to the selling stockholders has been furnished to us by or on behalf of the selling stockholders for inclusion in this prospectus. The selling stockholders identified below may have sold, transferred, or otherwise disposed of some or all of their securities since the date as of which the information in the following table is presented in transactions exempt from or not subject to the registration requirements of the Securities Act and of which we are not aware. The term selling stockholder includes donees, pledgees, transferees, or other successors-in-interest selling securities received from the named selling stockholders as a gift, pledge, stockholder distribution or other non-sale related transfer after the date of this prospectus. Under the rules of the SEC, beneficial ownership includes shares over which the indicated beneficial owner exercises voting or investment power. The information regarding shares beneficially owned after the offering assumes the sale of all shares offered by the selling stockholders. The percentage ownership data is based on 45,237,378 shares of our common stock issued and outstanding as of April 27, 2011.
