### **STAR GAS PARTNERS, L.P. AND SUBSIDIARIES**

#### **NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

##### **1) Partnership Organization**

Star Gas Partners, L.P. ( Star Gas Partners, the Partnership, we, us, or our ) is a home heating oil and propane distributor and services provider with one reportable operating segment that principally provides services to residential and commercial customers to heat their homes and buildings. Star Gas Partners is a master limited partnership, which at March 31, 2013, had outstanding 59.7 million common units (NYSE: SGU ), representing the 99.46% limited partner interest in Star Gas Partners, and 0.3 million general partner units, representing the 0.54% general partner interest in Star Gas Partners.

The Partnership is organized as follows:

The general partner of the Partnership is Kestrel Heat, LLC, a Delaware limited liability company ( Kestrel Heat or the General Partner ). The Board of Directors of Kestrel Heat is appointed by its sole member, Kestrel Energy Partners, LLC, a Delaware limited liability company ( Kestrel ).

The Partnership's operations are conducted through Petro Holdings, Inc. and its subsidiaries ( Petro ). Petro is a Minnesota corporation that is an indirect wholly-owned subsidiary of the Partnership. Petro is subject to Federal and state corporation income taxes. Petro is a Northeast and Mid-Atlantic region retail distributor of home heating oil and propane that at March 31, 2013, served approximately 412,000 full-service residential and commercial home heating oil and propane customers. Petro also sold home heating oil, gasoline and diesel fuel to approximately 54,600 customers on a delivery only basis. In addition, Petro installed, maintained, and repaired heating and air conditioning equipment for its customers, and provided ancillary home services, including home security and plumbing, to approximately 11,600 customers.

Star Gas Finance Company is a 100% owned subsidiary of the Partnership. Star Gas Finance Company serves as the co-issuer, jointly and severally with the Partnership, of its \$125 million (excluding discount) 8.875% Senior Notes outstanding at March 31, 2013, that are due 2017. The Partnership is dependent on distributions, including inter-company interest payments from its subsidiaries, to service the Partnership's debt obligations. The distributions from the Partnership's subsidiaries are not guaranteed and are subject to certain loan restrictions. Star Gas Finance Company has nominal assets and conducts no business operations. (See Note 8 Long-Term Debt and Bank Facility Borrowings)

##### **2) Summary of Significant Accounting Policies**

###### ***Basis of Presentation***

The Consolidated Financial Statements include the accounts of Star Gas Partners, L.P. and its subsidiaries. All material inter-company items and transactions have been eliminated in consolidation.

The financial information included herein is unaudited; however, such information reflects all adjustments (consisting solely of normal recurring adjustments), which are, in the opinion of management, necessary for the fair statement of financial condition and results for the interim periods. Due to the seasonal nature of the Partnership's business, the results of operations and cash flows for the six month period ended March 31, 2013 and March 31, 2012 are not necessarily indicative of the results to be expected for the full year.

These interim financial statements of the Partnership have been prepared in accordance with U.S. Generally Accepted Accounting Principles ( GAAP ) for interim financial information and Rule 10-01 of Regulation S-X of the U.S. Securities and Exchange Commission and should be read in conjunction with the financial statements included in the Partnership's Annual Report on Form 10-K for the year ended September 30, 2012.

###### ***Comprehensive Income (Loss)***

## Edgar Filing: STAR GAS PARTNERS LP - Form 10-Q

Comprehensive income (loss) is comprised of net income (loss) and other comprehensive income (loss). Other comprehensive income (loss) consists of the unrealized gain (loss) amortization on the Partnership's pension plan obligation for its two frozen defined benefit pension plans, and the corresponding tax effect.

**Table of Contents****Recent Accounting Pronouncements**

In December 2011, the Financial Accounting Standards Board ( FASB ) issued ASU No. 2011-11, Disclosures about Offsetting Assets and Liabilities. This standard requires an entity to disclose information about offsetting and related arrangements to enable users of financial statements to understand the effect of those arrangements on its financial position. The amendments require added disclosures about financial instruments and derivative instruments that are either (1) offset in accordance with other GAAP or (2) subject to an enforceable master netting arrangement or similar agreement, regardless of whether they are offset on the balance sheet. This new guidance is effective for annual reporting periods beginning in the first quarter of fiscal year 2014. The adoption of ASU No. 2011-11 will not impact our results of operations or the amount of assets and liabilities reported. We are currently evaluating the impact on our disclosures.

**3) Common Unit Repurchase and Retirement**

In July 2012, the Board of Directors authorized the repurchase of up to 3.0 million of the Partnership's common units ( Plan III ). The authorized common unit repurchases may be made from time-to-time in the open market, in privately negotiated transactions or in such other manner deemed appropriate by management. There is no guarantee of the exact number of units that will be purchased under the program and the Partnership may discontinue purchases at any time. The program does not have a time limit. The Partnership's repurchase activities take into account SEC safe harbor rules and guidance for issuer repurchases. All of the common units purchased in the repurchase program will be retired.

The Partnership must maintain Availability (as defined in the revolving credit facility agreement) of \$61.3 million, 17.5% of the maximum facility size on a historical pro forma and forward-looking basis, and a fixed charge coverage ratio of not less than 1.15 in order to repurchase common units.

(in thousands, except per unit amounts)

Period	Total Number of Units Purchased as Part of a Publicly Announced Plan or Program	Average Price Paid per Unit (a)	Maximum Number of Units that May Yet Be Purchased Under the Program
<b>Plan III - Number of units authorized</b>			<b>3,000</b>
Plan III - Fiscal year 2012 total	22	\$ 4.26	2,978
Plan III - October 2012	39	\$ 4.28	2,939
Plan III - November 2012	645	\$ 4.20	2,294
Plan III - December 2012	331	\$ 4.13	1,963
Plan III - First quarter fiscal year 2013 total	1,015	\$ 4.18	
Plan III - January 2013	91	\$ 4.25	1,872
Plan III - February 2013		\$	1,872
Plan III - March 2013	219	\$ 4.40	1,653
Plan III - Second quarter fiscal year 2013 total	310	\$ 4.36	
Plan III - Six months fiscal year 2013 total	1,325	\$ 4.22	

(a) Amounts include repurchase costs.

## **Table of Contents**

### **4) Derivatives and Hedging Disclosures and Fair Value Measurements**

The Partnership uses derivative instruments such as futures, options and swap agreements in order to mitigate exposure to market risk associated with the purchase of home heating oil for price-protected customers, physical inventory on hand, inventory in transit and priced purchase commitments.

To hedge a substantial majority of the purchase price associated with heating oil gallons anticipated to be sold to its price-protected customers as of March 31, 2013, the Partnership held 0.7 million gallons of physical inventory and held 5.0 million gallons of swap contracts to buy heating oil, 0.9 million gallons of call options, 3.7 million gallons of put options and 45.4 million net gallons of synthetic calls. To hedge the inter-month differentials for its price-protected customers, its physical inventory on hand and inventory in transit, the Partnership, as of March 31, 2013, had 48.5 million gallons of future contracts to buy heating oil, 54.3 million gallons of future contracts to sell heating oil and 3.0 million gallons of swap contracts to sell heating oil. To hedge a majority of its internal fuel usage for fiscal 2013, the Partnership as of March 31, 2013, had 0.5 million gallons of swap contracts to buy gasoline and 0.3 million gallons of swap contracts to buy diesel.

To hedge a substantial majority of the purchase price associated with heating oil gallons anticipated to be sold to its price-protected customers as of March 31, 2012, the Partnership held 0.4 million gallons of physical inventory and held 5.2 million gallons of swap contracts to buy heating oil, 0.8 million gallons of call options, 3.6 million gallons of put options and 42.3 million net gallons of synthetic calls. To hedge the inter-month differentials for its price-protected customers, its physical inventory on hand and inventory in transit, the Partnership, as of March 31, 2012, had 34.5 million gallons of future contracts to buy heating oil, 37.5 million gallons of future contracts to sell heating oil and 3.9 million gallons of swap contracts to sell heating oil. To hedge a majority of its internal fuel usage for fiscal 2012, the Partnership as of March 31, 2012, had 0.8 million gallons of swap contracts to buy gasoline and 0.4 million gallons of swap contracts to buy diesel.

The Partnership's derivative instruments are with the following counterparties: JPMorgan Chase Bank, N.A., Cargill, Inc., Wells Fargo Bank, N.A., Societe Generale, Key Bank, N.A., Bank of Montreal, Regions Financial Corporation and Bank of America, N.A. The Partnership assesses counterparty credit risk and maintains master netting arrangements with counterparties to help manage the risks, and record derivative positions on a net basis. The Partnership considers counterparty credit risk to be low. At March 31, 2013, the aggregate cash posted as collateral in the normal course of business at counterparties was \$0.6 million. Positions with counterparties who are also parties to our revolving credit facility are collateralized under that facility. As of March 31, 2013, \$7.0 million of hedge positions were secured under the credit facility.

FASB ASC 815-10-05 Derivatives and Hedging, established accounting and reporting standards requiring that derivative instruments be recorded at fair value and included in the consolidated balance sheet as assets or liabilities, along with qualitative disclosures regarding the derivative activity. To the extent derivative instruments designated as cash flow hedges are effective and the standard's documentation requirements have been met, changes in fair value are recognized in other comprehensive income until the underlying hedged item is recognized in earnings. The Partnership has elected not to designate its derivative instruments as hedging instruments under this standard and the change in fair value of the derivative instruments is recognized in our statement of operations in the line item (Increase) decrease in the fair value of derivative instruments. Depending on the risk being hedged, realized gains and losses are recorded in cost of product, cost of installations and service, or delivery and branch expenses.

FASB ASC 820-10 Fair Value Measurements and Disclosures, established a three-tier fair value hierarchy, which classified the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices for identical instruments in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. The Partnership's Level 1 derivative assets and liabilities represent the fair value of commodity contracts used in its hedging activities that are identical and traded in active markets. The Partnership's Level 2 derivative assets and liabilities represent the fair value of commodity contracts used in its hedging activities that are valued using either directly or indirectly observable inputs, whose nature, risk and class are similar. No significant transfers of assets or liabilities have been made into and out of the Level 1 or Level 2 tiers. All derivative instruments were non-trading positions and were either a Level 1 or Level 2 instrument. The fair market value of our Level 1 and Level 2 derivative assets and liabilities are calculated by our counter-parties and are independently validated by the Partnership. The Partnership's calculations are, for Level 1 derivative assets and liabilities, based on the published New York Mercantile Exchange ( NYMEX ) market prices for the commodity contracts open at the end of the period. For Level 2 derivative assets and liabilities the calculations performed by the Partnership are based on a combination of the NYMEX published market prices and other inputs, including such factors as present value, volatility and duration.

The Partnership had no assets or liabilities that are measured at fair value on a nonrecurring basis subsequent to their initial recognition. The Partnership's financial assets and liabilities measured at fair value on a recurring basis are listed on the following table.

**Table of Contents****5) Inventories**

The Partnership's product inventories are stated at the lower of cost or market computed on the weighted average cost method. All other inventories, representing parts and equipment are stated at the lower of cost or market using the FIFO method. The components of inventory were as follows (in thousands):

	March 31, 2013	September 30, 2012
Product	\$ 24,123	\$ 30,786
Parts and equipment	17,593	16,679
<b>Total inventory</b>	<b>\$ 41,716</b>	<b>\$ 47,465</b>

**6) Property and Equipment**

Property and equipment are stated at cost. Depreciation is computed over the estimated useful lives of the depreciable assets using the straight-line method (in thousands):

	March 31, 2013	September 30, 2012
Property and equipment	\$ 166,904	\$ 167,060
Less: accumulated depreciation	116,296	114,452
<b>Property and equipment, net</b>	<b>\$ 50,608</b>	<b>\$ 52,608</b>

**7) Other Intangible Assets*****Intangibles, net***

The gross carrying amount and accumulated amortization of intangible assets subject to amortization are as follows (in thousands):

	March 31, 2013			September 30, 2012		
	Gross Carrying Amount	Accum. Amortization	Net	Gross Carrying Amount	Accum. Amortization	Net
Customer lists and other intangibles	\$ 286,783	\$ 216,627	\$ 70,156	\$ 286,783	\$ 212,071	\$ 74,712

Amortization expense for intangible assets was \$4.6 million for the six months ended March 31, 2013, compared to \$3.5 million for the six months ended March 31, 2012. Total estimated annual amortization expense related to intangible assets subject to amortization, for the fiscal year ending September 30, 2013, and the four succeeding fiscal years ending September 30, is as follows (in thousands):

	Estimated Annual Book Amortization Expense
2013	\$ 9,111

Edgar Filing: STAR GAS PARTNERS LP - Form 10-Q

2014	\$	9,035
2015	\$	8,900
2016	\$	8,729
2017	\$	8,209

**Table of Contents****8) Long-Term Debt and Bank Facility Borrowings**

The Partnership's debt is as follows (in thousands):

	March 31, 2013		September 30, 2012	
	Carrying Amount	Fair Value (a)	Carrying Amount	Fair Value (a)
8.875% Senior Notes (b)	\$ 124,408	\$ 128,125	\$ 124,357	\$ 126,563
Revolving Credit Facility Borrowings (c)	61,048	61,048		
<b>Total debt</b>	<b>\$ 185,456</b>	<b>\$ 189,173</b>	<b>\$ 124,357</b>	<b>\$ 126,563</b>
<b>Total long-term portion of debt</b>	<b>\$ 124,408</b>	<b>\$ 128,125</b>	<b>\$ 124,357</b>	<b>\$ 126,563</b>

- (a) The Partnership's fair value estimates of long-term debt are made at a specific point in time based on Level 2 inputs. Due to the relatively short maturity of the revolving credit facility, the carrying amount approximates fair value.
- (b) The 8.875% Senior Notes were originally issued in November 2010 in a private placement offering pursuant to Rule 144A and Regulation S under the Securities Act of 1933, and in February 2011, were exchanged for substantially identical public notes registered with the Securities and Exchange Commission. These public notes mature in December 2017 and accrue interest at an annual rate of 8.875% requiring semi-annual interest payments on June 1 and December 1 of each year. The discount on these notes was \$0.6 million at March 31, 2013. Under the terms of the indenture, these notes permit restricted payments after passing certain financial tests. The Partnership can incur debt up to \$100 million for acquisitions and can also pay restricted payments of \$22.0 million without passing certain financial tests.
- (c) In June 2011, the Partnership entered into an amended and restated asset based revolving credit facility agreement with a bank syndication comprised of fifteen banks. The amended and restated revolving credit facility expires in June 2016. In November 2011, the Partnership exercised the provision under this agreement to expand the facility by an additional \$50 million. Under this agreement, the Partnership may borrow up to \$250 million (\$350 million during the heating season from December to April each year) for working capital purposes (subject to certain borrowing base limitations and coverage ratios) and may issue up to \$100 million in letters of credit. The Partnership can increase the facility size by \$100 million without the consent of the bank group. The bank group is not obligated to fund the \$100 million increase. If the bank group elects not to fund the increase, the Partnership can add additional lenders to the group, with the consent of the agent (as appointed in the revolving credit facility agreement), which shall not be unreasonably withheld.

Obligations under the revolving credit facility are guaranteed by the Partnership and its subsidiaries and are secured by liens on substantially all of the Partnership's assets including accounts receivable, inventory, general intangibles, real property, fixtures and equipment.

The interest rate is LIBOR plus (i) 1.75% (if Availability, as defined in the revolving credit facility agreement is greater than or equal to \$150 million), or (ii) 2.00% (if Availability is greater than \$75 million but less than \$150 million), or (iii) 2.25% (if Availability is less than or equal to \$75 million). The Commitment Fee on the unused portion of the facility is 0.375% per annum. This amended and restated revolving credit facility imposes certain restrictions, including restrictions on the Partnership's ability to incur additional indebtedness, to pay distributions to unitholders, to pay inter-company dividends or distributions, make investments, grant liens, sell assets, make acquisitions and engage in certain other activities.

The Partnership is obligated to meet certain financial covenants under the amended and restated revolving credit facility, including the requirement to maintain at all times either Availability (borrowing base less amounts borrowed and letters of credit issued) of \$43.8 million, 12.5% of the maximum facility size, or a fixed charge coverage ratio (as defined in the revolving credit facility agreement) of not less than 1.1, which is calculated based upon Adjusted EBITDA for the trailing twelve months. In order to make acquisitions, the Partnership must maintain Availability of \$40 million on a historical pro forma and forward-looking basis. In addition, the Partnership must maintain Availability of \$61.3 million, 17.5% of the maximum facility size on a historical pro forma and forward-looking basis, and a fixed charge coverage ratio of not less than 1.15 in order to pay any distributions to unitholders or repurchase common units.

The amended and restated revolving credit facility prohibits certain activities including investments, acquisitions, asset sales, inter-company dividends or distributions (including those needed to pay interest or principal on the 8.875% senior notes), except to the Partnership or a wholly owned subsidiary of the Partnership, if the relevant covenant described above has not been met. The occurrence of an event of default or an

## Edgar Filing: STAR GAS PARTNERS LP - Form 10-Q

acceleration under the amended and restated revolving credit facility would result in the Partnership's inability to obtain further borrowings under that facility, which could adversely affect its results of operations. Such a default may also restrict the ability of the Partnership to obtain funds from its subsidiaries in order to pay interest or pay down debt. An acceleration under the amended and restated revolving credit facility would result in a default under the Partnership's other funded debt.

## Table of Contents

At March 31, 2013, \$61.0 million was outstanding under the revolving credit facility and \$45.0 million of letters of credit were issued. At September 30, 2012, no amount was outstanding under the revolving credit facility and \$42.8 million of letters of credit were issued.

At March 31, 2013, availability was \$137.0 million and the Partnership was in compliance with the fixed charge coverage ratio. At September 30, 2012, availability was \$179.2 million and the Partnership was in compliance with the fixed charge coverage ratio.

In July 2011, the Partnership's shelf registration became effective, providing for the sale of up to \$250 million in one or more offerings of common units representing limited partnership interests, partnership securities and debt securities; which may be secured or unsecured senior debt securities or secured or unsecured subordinated debt securities. As of March 31, 2013, no offerings under this shelf registration have occurred.

## 9) Employee Benefit Plan

(in thousands)	Three Months Ended March 31,		Six Months Ended March 31,	
	2013	2012	2013	2012
<b>Components of net periodic benefit cost:</b>				
Service cost	\$	\$	\$	\$
Interest cost	620	714	1,240	1,428
Expected return on plan assets	(948)	(941)	(1,896)	(1,882)
Net amortization	664	688	1,328	1,376
Net periodic benefit cost	\$ 336	\$ 461	\$ 672	\$ 922

For the six months ended March 31, 2013, the Partnership contributed \$1.5 million and expects to make an additional \$2.0 million contribution in fiscal 2013 to fund its pension obligation.

## 10) Income Taxes

As most of the Partnership's income is derived from its corporate subsidiaries, these financial statements reflect significant Federal and State income taxes. For corporate subsidiaries of the Partnership, a consolidated Federal income tax return is filed. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amount of assets and liabilities and their respective tax bases and operating loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. A valuation allowance is recognized if, based on the weight of available evidence including historical tax losses, it is more likely than not that some or all of deferred tax assets will not be realized.

The Partnership is a master limited partnership and is not subject to tax at the entity level for Federal and State income tax purposes. Rather, income and losses of the Partnership are allocated directly to the individual partners (the Partnership's corporate subsidiaries are subject to tax at the entity level for federal and state income tax purposes). While the Partnership will generate non-qualifying Master Limited Partnership revenue through its corporate subsidiaries, distributions from the corporate subsidiaries to the Partnership are generally included in the determination of qualified Master Limited Partnership income. All or a portion of the distributions received by the Partnership from the corporate subsidiaries could be a dividend or capital gain to the partners.

The accompanying financial statements are reported on a fiscal year, however, the Partnership and its Corporate subsidiaries file Federal and State income tax returns on a calendar year.

## Table of Contents

The current and deferred income tax expenses for the three and six months ended March 31, 2013, and 2012 are as follows (in thousands):

(in thousands)	Three Months Ended March 31,		Six Months Ended March 31,	
	2013	2012	2013	2012
Income before income taxes	\$ 70,796	\$ 69,873	\$ 85,465	\$ 75,456
Current tax expense	\$ 21,330	\$ 7,615	\$ 25,383	\$ 9,113
Deferred tax expense	7,787	21,776	8,651	22,930
Total tax expense	\$ 29,117	\$ 29,391	\$ 34,034	\$ 32,043

As of the calendar tax year ended December 31, 2012, Star Acquisitions, a wholly-owned subsidiary of the Partnership, had an estimated Federal net operating loss carry forward ( NOLs ) of approximately \$10.6 million. The Federal NOLs, which will expire between 2018 and 2024, are generally available to offset any future taxable income but are also subject to annual limitations of between \$1.0 million and \$2.2 million.

FASB ASC 740-10-05-6 Income Taxes: Uncertain Tax Position, provides financial statement accounting guidance for uncertainty in income taxes and tax positions taken or expected to be taken in a tax return. At March 31, 2013, we had unrecognized income tax benefits totaling \$0.7 million. These unrecognized tax benefits are primarily the result of State tax uncertainties. If recognized, these tax benefits would be recorded as a benefit to the effective tax rate.

We believe that the total liability for unrecognized tax benefits will not materially change during the next 12 months ending March 31, 2014. Our continuing practice is to recognize interest related to income tax matters as a component of income tax expense. We file U.S. Federal income tax returns and various state and local returns. A number of years may elapse before an uncertain tax position is audited and finally resolved. For our Federal income tax returns we have four tax years subject to examination. In our major state tax jurisdictions of New York, Connecticut, Pennsylvania and New Jersey, we have four, four, four and five tax years, respectively, that are subject to examination. While it is often difficult to predict the final outcome or the timing of resolution of any particular uncertain tax position, based on our assessment of many factors including past experience and interpretation of tax law, we believe that our provision for income taxes reflect the most probable outcome. This assessment relies on estimates and assumptions and may involve a series of complex judgments about future events.

## 11) Supplemental Disclosure of Cash Flow Information

(in thousands)	Six Months Ended March 31,	
	2013	2012
<u>Cash paid during the period for:</u>		
Income taxes, net	\$ 4,901	\$ 781
Interest	\$ 7,193	\$ 7,028
<u>Non-cash financing activities:</u>		
Increase in interest expense amortization of debt discount on 8.875% Senior Note	\$ 50	\$ 46

## 12) Commitments and Contingencies

The Partnership's operations are subject to the operating hazards and risks normally incidental to handling, storing and transporting and otherwise providing for use by consumers of combustible liquids such as home heating oil and propane. As a result, at any given time, the Partnership is generally a defendant in various legal proceedings and litigation arising in the ordinary course of business. The Partnership maintains insurance policies in amounts and with coverages and deductibles we believe are reasonable and prudent. However, the Partnership cannot assure that this insurance will be adequate to protect it from all material expenses related to potential future claims for personal and property damage or that these levels of insurance will be available in the future at economical prices. The Partnership does not carry business interruption insurance. In the opinion of management the Partnership is not a party to any litigation, which individually or in the aggregate could reasonably be expected to have a material adverse effect on the Partnership's results of operations, financial position or liquidity.

**Table of Contents****13) Earnings (Loss) Per Limited Partner Unit**

Income per limited partner unit is computed in accordance with FASB ASC 260-10-05 Earnings Per Share, Master Limited Partnerships (EITF 03-06), by dividing the limited partners' interest in net income by the weighted average number of limited partner units outstanding. The pro forma nature of the allocation required by this standard provides that in any accounting period where the Partnership's aggregate net income exceeds its aggregate distribution for such period, the Partnership is required to present net income per limited partner unit as if all of the earnings for the periods were distributed, regardless of whether those earnings would actually be distributed during a particular period from an economic or practical perspective. This allocation does not impact the Partnership's overall net income or other financial results. However, for periods in which the Partnership's aggregate net income exceeds its aggregate distributions for such period, it will have the impact of reducing the earnings per limited partner unit, as the calculation according to this standard results in a theoretical increased allocation of undistributed earnings to the general partner. In accounting periods where aggregate net income does not exceed aggregate distributions for such period, this standard does not have any impact on the Partnership's net income per limited partner unit calculation. A separate and independent calculation for each quarter and year-to-date period is performed, in which the Partnership's contractual participation rights are taken into account.

The following presents the net income allocation and per unit data using this method for the periods presented:

<b>Basic and Diluted Earnings Per Limited Partner:</b> (in thousands, except per unit data)	<b>Three Months Ended March 31,</b>		<b>Six Months Ended March 31,</b>	
	<b>2013</b>	<b>2012</b>	<b>2013</b>	<b>2012</b>
Net income	\$ 41,679	\$ 40,482	\$ 51,431	\$ 43,413
Less General Partners' interest in net income	225	213	278	228
Net income available to limited partners	41,454	40,269	51,153	43,185
Less dilutive impact of theoretical distribution of earnings under FASB ASC 260-10-45-60	6,993	6,656	7,991	6,339
Limited Partner's interest in net income under FASB ASC 260-10-45-60	\$ 34,461	\$ 33,613	\$ 43,162	\$ 36,846
<b>Per unit data:</b>				
Basic and diluted net income available to limited partners	\$ 0.69	\$ 0.66	\$ 0.85	\$ 0.69
Less dilutive impact of theoretical distribution of earnings under FASB ASC 260-10-45-60	0.11	0.11	0.13	0.10
Limited Partner's interest in net income under FASB ASC 260-10-45-60	\$ 0.58	\$ 0.55	\$ 0.72	\$ 0.59
Weighted average number of Limited Partner units outstanding	59,837	61,474	60,192	62,839

**14) Subsequent Events***Quarterly Distribution Declared*

In April 2013, we declared a quarterly distribution of \$0.0825 per unit, or \$0.33 per unit on an annualized basis, on all common units with respect to the second quarter of fiscal 2013, payable on May 6, 2013, to holders of record on April 26, 2013. In accordance with our Partnership Agreement, the amount of distributions in excess of the minimum quarterly distribution of \$0.0675, are distributed 90% to the holders of common units and 10% to the holders of the General Partner units (until certain distribution levels are met), subject to the management incentive compensation plan. As a result, \$4.9 million will be paid to the common unit holders, \$0.07 million to the General Partner (including \$0.05 million of incentive distribution as provided in our Partnership Agreement) and \$0.05 million to management pursuant to the management incentive compensation plan which provides for certain members of management to receive incentive distributions that would otherwise be payable to the General Partner.

*Acquisition*

## Edgar Filing: STAR GAS PARTNERS LP - Form 10-Q

In April 2013, the Partnership purchased for cash the customer lists and assets of a home heating oil dealership for approximately \$0.6 million, including net working capital credits of \$0.1 million.

### *Unit Repurchase*

In April 2013, the Partnership repurchased 161,000 common units under its Plan III common unit repurchase program.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**

**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**Statement Regarding Forward-Looking Disclosure**

This Quarterly Report on Form 10-Q includes forward-looking statements which represent our expectations or beliefs concerning future events that involve risks and uncertainties, including those associated with the effect of weather conditions on our financial performance, the price and supply of the products that we sell, the consumption patterns of our customers, our ability to obtain satisfactory gross profit margins, our ability to obtain new customers and retain existing customers, our ability to make strategic acquisitions, the impact of litigation, our ability to contract for our current and future supply needs, natural gas conversions, future union relations and the outcome of current and future union negotiations, the impact of current and future governmental regulations, including environmental, health, and safety regulations, the ability to attract and retain employees, customer credit worthiness, counterparty credit worthiness, marketing plans, general economic conditions and new technology. All statements other than statements of historical facts included in this Report including, without limitation, the statements under Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere herein, are forward-looking statements. Without limiting the foregoing, the words believe, anticipate, plan, expect, seek, estimate, and similar expressions are intended to identify forward-looking statements. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct and actual results may differ materially from those projected as a result of certain risks and uncertainties. These risks and uncertainties include, but are not limited to, those set forth under the heading Risk Factors and Business Strategy in our Annual Report on Form 10-K (the Form 10-K) for the fiscal year ended September 30, 2012, and under the heading Risk Factors in this Quarterly Report on Form 10-Q. Important factors that could cause actual results to differ materially from our expectations ( Cautionary Statements ) are disclosed in the Annual Report on Form 10-K and in this Quarterly Report on Form 10-Q. All subsequent written and oral forward-looking statements attributable to the Partnership or persons acting on its behalf are expressly qualified in their entirety by the Cautionary Statements. Unless otherwise required by law, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise after the date of this Report.

**Overview**

The following is a discussion of our historical financial condition and results of our operations and should be read in conjunction with the description of our business and the historical financial and operating data and notes thereto included elsewhere in this Report.

**Seasonality**

The following matters should be considered in analyzing our financial results. Our fiscal year ends on September 30. All references to quarters and years respectively in this document are to the fiscal quarters and years unless otherwise noted. The seasonal nature of our business has resulted, on average during the last five years, in the sale of approximately 30% of our volume of home heating oil and propane in the first fiscal quarter and 50% of our volume in the second fiscal quarter, the peak heating season. We generally realize net income in both of these quarters and net losses during the quarters ending June and September. In addition, sales volume typically fluctuates from year to year in response to variations in weather, wholesale energy prices and other factors.

**Table of Contents****Degree Day**

A degree day is an industry measurement of temperature designed to evaluate energy demand and consumption. Degree days are based on how far the average daily temperature departs from 65°F. Each degree of temperature above 65°F is counted as one cooling degree day, and each degree of temperature below 65°F is counted as one heating degree day. Degree days are accumulated each day over the course of a year and can be compared to a monthly or a long-term (multi-year) average to see if a month or a year was warmer or cooler than usual. Degree days are officially observed by the National Weather Service.

Every ten years, the National Oceanic and Atmospheric Administration ( NOAA ) computes and publishes average meteorological quantities, including the average temperature for the last 30 years by geographical location, and the corresponding degree days. The latest and most widely used data covers the years from 1981 to 2010. Our calculations of normal weather is based on these published 30 year averages for heating degree days, weighted by volume for the locations where we have existing operations.

**Home Heating Oil Price Volatility**

In recent years, the wholesale price of home heating oil has been extremely volatile, resulting in increased consumer price sensitivity to heating costs and increased gross customer losses. As a commodity, the price of home heating oil is generally impacted by many factors, including economic and geopolitical forces. The price of home heating oil is closely linked to the price refiners pay for crude oil, which is the principal cost component of home heating oil. The volatility in the wholesale cost of home heating oil, as measured by the New York Mercantile Exchange ( NYMEX ) price per gallon for the fiscal years ending September 30, 2009, through 2013, on a quarterly basis, is illustrated in the following chart:

Quarter Ended	Fiscal 2013		Fiscal 2012		Fiscal 2011		Fiscal 2010		Fiscal 2009	
	Low	High	Low	High	Low	High	Low	High	Low	High
December 31	\$ 2.90	\$ 3.26	\$ 2.72	\$ 3.17	\$ 2.19	\$ 2.54	\$ 1.78	\$ 2.12	\$ 1.20	\$ 2.85
March 31	2.86	3.24	2.99	3.32	2.49	3.09	1.89	2.20	1.13	1.63
June 30			2.53	3.25	2.75	3.32	1.87	2.35	1.31	1.86
September 30			2.68	3.24	2.77	3.13	1.92	2.24	1.50	1.96

**Impact on Liquidity of Wholesale Product Cost Volatility**

Our liquidity is adversely impacted in times of increasing wholesale product costs, as we must use more cash to fund our hedging requirements and a portion of the increased levels of accounts receivable and inventory. Our liquidity is also adversely impacted at times by sudden and sharp decreases in wholesale product costs due to the increased margin requirements for futures contracts and collateral requirements for options and swaps that we use to manage market risks.

**Impact of Warm Weather on Operating Results; Weather Hedge Contract Fiscal Year 2012**

Weather conditions have a significant impact on the demand for home heating oil and propane because customers depend on these products principally for heating purposes. Actual weather conditions can vary substantially from year to year, significantly affecting our financial performance. To partially mitigate the adverse effect of warm weather on our cash flows, we have used weather hedging contracts for a number of years. For fiscal 2012, we entered into a weather hedge contract under which we were entitled to receive a payment of \$35,000 per heating degree-day shortfall, when the total number of heating degree-days in the period covered less than 92.5% of the ten year average (the Payment Threshold ). The hedge covered the period from November 1, 2011 through March 31, 2012, taken as a whole. Due to weather conditions that year, it resulted in a maximum payout of \$12.5 million, the benefit of which was recorded in the three months ended March 31, 2012, as a reduction in delivery and branch expenses and which was collected in April 2012.

## **Table of Contents**

### **Weather Hedge Contract Fiscal Years 2013, 2014 and 2015**

In July 2012, the Partnership entered into a weather hedge contract for the fiscal years 2013, 2014 and 2015, with Swiss Re Financial Products Corporation, under which we are entitled to receive a payment of \$35,000 per heating degree-day shortfall if the total number of heating degree-days in the period covered is less than 92.5% of the ten year average (the Payment Threshold). The hedge covers the period from November 1 through March 31, taken as a whole, for each respective fiscal year and has a maximum payout of \$12.5 million for each fiscal year. The Partnership did not record any benefit under its weather hedge contract during the six months ended March 31, 2013.

### **Per Gallon Gross Profit Margins**

We believe home heating oil and propane margins should be evaluated on a cents per gallon basis, before the effects of increases or decreases in the fair value of derivative instruments (as we believe that realized per gallon margins should not include the impact of non-cash changes in the market value of hedges before the settlement of the underlying transaction).

A significant portion of our home heating oil volume is sold to individual customers under an arrangement pre-establishing a ceiling sales price or fixed price for home heating oil over a fixed period of time, which is generally twelve months (price-protected customers). When these price-protected customers agree to purchase home heating oil from us for the next heating season, we purchase option contracts, swaps and futures contracts for a substantial majority of the heating oil that we expect to sell to these customers. The amount of home heating oil volume that we hedge per price-protected customer is based upon the estimated fuel consumption per average customer per month. In the event that the actual usage exceeds the amount of the hedged volume on a monthly basis, we may be required to obtain additional volume at unfavorable costs. In addition, should actual usage in any month be less than the hedged volume, our hedging losses could be greater, thus reducing expected margins.

### **Derivatives**

FASB ASC 815-10-05 Derivatives and Hedging requires that derivative instruments be recorded at fair value and included in the consolidated balance sheet as assets or liabilities. To the extent derivative instruments designated as cash flow hedges are effective, as defined under this guidance, changes in fair value are recognized in other comprehensive income until the forecasted hedged item is recognized in earnings. We have elected not to designate our derivative instruments as hedging instruments under this guidance, and as a result, the changes in fair value of the derivative instruments are recognized in our statement of operations. Therefore, we experience volatility in earnings as outstanding derivative instruments are marked to market and non-cash gains and losses are recorded prior to the sale of the commodity to the customer. The volatility in any given period related to unrealized non-cash gains or losses on derivative instruments can be significant to our overall results. However, we ultimately expect those gains and losses to be offset by the cost of product when purchased.

### **New York State Ultra Low Sulfur Fuel Oil Regulation**

On July 1, 2012, new regulations went into effect in New York State (an important area of operations for us) that require the use of ultra low sulfur home heating oil (which is essentially ultra low sulfur diesel fuel with a dye additive). From July 1, 2012 through March 31, 2013, the additional cost of ultra low sulfur home heating oil versus high sulfur home heating oil in New York ranged from between \$0.035 and \$0.230 cents per gallon. The NYMEX continued to trade only the high sulfur home heating oil hedge contract through March 31, 2013. Effective as of April 1, 2013, the NYMEX contract specifications are the same as the New York mandate.

**Table of Contents**

This means there was a nine month period, from July 2012 through March 2013, when the Partnership needed to purchase and sell ultra low sulfur home heating oil for its New York State customers while this contract was not directly available to hedge on the NYMEX. The Partnership hedged the purchases of ultra low sulfur home heating oil from July 1, 2012 to March 31, 2013, with a NYMEX high sulfur home heating oil contract. Furthermore, due to the change in the specifications of the NYMEX home heating oil contract in April 2013, the Partnership now has a similar mis-match from April 2013 going forward in its ability to hedge high sulfur home heating oil requirements for purchases and sales in states other than New York. The Partnership intends to hedge its purchases of high sulfur home heating oil after April 1, 2013, with the new NYMEX low sulfur home heating oil contracts because at present there are no high sulfur home heating oil hedge contracts available to it on the NYMEX or other markets.

However, because of differences in the price and availability of ultra low sulfur home heating oil and high sulfur home heating oil we believe that the change in the NYMEX hedge contracts has increased the complexity, costs and risks inherent in hedging the Partnership's physical inventory and in its sales to its price-protected customers for purchases and sales in states other than New York, which may impact home heating oil per gallon gross profit margins for these customers.

**Income Taxes***Net Operating Loss Carry Forwards*

As of December 31, 2012, we estimate that our Federal Net Operating Loss carryforwards ( NOLs ) were \$10.6 million, subject to annual limitations of between \$1.0 million and \$2.2 million on the amount of such losses that can be used.

*Book Versus Tax Deductions*

The amount of cash flow that we generate in any given year depends upon a variety of factors including the amount of cash income taxes that our corporate subsidiaries are required to pay. The amount of depreciation and amortization that we deduct for book (i.e., financial reporting) purposes will differ from the amount that our subsidiaries can deduct for tax purposes. The table below compares the estimated depreciation and amortization for book purposes to the amount that our subsidiaries expect to deduct for tax purposes based on currently owned assets. Our subsidiaries file their tax returns based on a calendar year. The amounts below are based on our September 30 fiscal year.

*Estimated Depreciation and Amortization Expense*

<b>(in thousands)</b>		
<b>Fiscal Year</b>	<b>Book</b>	<b>Tax</b>
2013	\$ 18,910	\$ 32,961
2014	17,413	27,991
2015	15,903	24,138
2016	13,849	18,447
2017	11,780	11,323

*Non-Deductible Partnership Expenses*

The Partnership incurs certain expenses at the Partnership level that are not deductible for Federal or state income tax purposes by our corporate subsidiaries. As a result, our effective tax rate could differ from the statutory rate that would be applicable if such expenses were deductible.

## **Table of Contents**

### **Storm Sandy**

On October 29, 2012, storm Sandy made landfall in our service area, resulting in widespread power outages for a number of our customers. In addition, certain third-party terminals where we purchase and store liquid product were closed for a short period of time due to damage sustained from the storm or by the loss of power. During the period subsequent to storm Sandy, our operations and systems functioned without any meaningful disruptions.

Deliveries of home heating oil and propane were less than expected for certain of our customers who were without power for several weeks subsequent to storm Sandy. However, since our operations were able to provide uninterrupted service to current and new customers, our sales of diesel fuel for the weeks after the storm increased, as did our service and installation sales, along with the related costs to provide these services.

### **EBITDA and Adjusted EBITDA (non-GAAP financial measures)**

EBITDA (Earnings from continuing operations before net interest expense, income taxes, depreciation and amortization) and Adjusted EBITDA (Earnings from continuing operations before net interest expense, income taxes, depreciation and amortization, (increase) decrease in the fair value of derivatives, gain or loss on debt redemption, goodwill impairment, and other non-cash and non-operating charges) are non-GAAP financial measures that are used as supplemental financial measures by management and external users of our financial statements, such as investors, commercial banks and research analysts, to assess:

- our compliance with certain financial covenants included in our debt agreements;
- our financial performance without regard to financing methods, capital structure, income taxes or historical cost basis;
- our ability to generate cash sufficient to pay interest on our indebtedness and to make distributions to our partners;
- our operating performance and return on invested capital compared to those of other companies in the retail distribution of refined petroleum products, without regard to financing methods and capital structure; and
- the viability of acquisitions and capital expenditure projects and the overall rates of return of alternative investment opportunities.

The method of calculating Adjusted EBITDA may not be consistent with that of other companies and each of EBITDA and Adjusted EBITDA has its limitations as an analytical tool, should not be considered in isolation and should be viewed in conjunction with measurements that are computed in accordance with GAAP. Some of the limitations of EBITDA and Adjusted EBITDA are:

- EBITDA and Adjusted EBITDA do not reflect our cash used for capital expenditures;
- Although depreciation and amortization are non-cash charges, the assets being depreciated or amortized often will have to be replaced and EBITDA and Adjusted EBITDA do not reflect the cash requirements for such replacements;
- EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, our working capital requirements;
- EBITDA and Adjusted EBITDA do not reflect the cash necessary to make payments of interest or principal on our indebtedness; and
- EBITDA and Adjusted EBITDA do not reflect the cash required to pay taxes.

**Table of Contents****Customer Attrition**

We measure net customer attrition on an ongoing basis for our full service residential and commercial home heating oil and propane customers. Net customer attrition is the difference between gross customer losses and customers added through marketing efforts. Customers added through acquisitions are not included in the calculation of gross customer gains. However, additional customers that are obtained through marketing efforts or lost at newly acquired businesses are included in these calculations. Customer attrition percentage calculations include customers added through acquisitions in the denominators of the calculations on a weighted average basis. Gross customer losses are the result of a number of factors, including price competition, move-outs, credit losses and conversion to natural gas. When a customer moves out of an existing home, we count the move out as a loss and, if we are successful in signing up the new homeowner, the move in is treated as a gain.

**Gross customer gains and gross customer losses**

	2013			Fiscal Year Ended 2012			2011		
	Gross Customer		Net Attrition	Gross Customer		Net Attrition	Gross Customer		Net Attrition
	Gains	Losses		Gains	Losses		Gains	Losses	
<b>First Quarter</b>	26,100	24,400	1,700	25,700	26,600	(900)	21,900	24,100	(2,200)
<b>Second Quarter</b>	13,900	19,300	(5,400)	11,500	19,700	(8,200)	11,800	17,200	(5,400)
<b>Third Quarter</b>				7,000	13,700	(6,700)	6,000	11,400	(5,400)
<b>Fourth Quarter</b>				13,000	18,200	(5,200)	15,300	17,100	(1,800)
<b>Total</b>	40,000	43,700	(3,700)	57,200	78,200	(21,000)	55,000	69,800	(14,800)

**Net customer gain (attrition) as a percentage of the home heating oil and propane customer base**

	2013			Fiscal Year Ended 2012			2011		
	Gross Customer		Net Attrition	Gross Customer		Net Attrition	Gross Customer		Net Attrition
	Gains	Losses		Gains	Losses		Gains	Losses	
<b>First Quarter</b>	6.3%	5.9%	0.4%	6.2%	6.4%	(0.2%)	5.3%	5.8%	(0.5%)
<b>Second Quarter</b>	3.3%	4.6%	(1.3%)	2.7%	4.7%	(2.0%)	2.8%	4.1%	(1.3%)
<b>Third Quarter</b>				1.5%	3.1%	(1.6%)	1.5%	2.8%	(1.3%)
<b>Fourth Quarter</b>				3.0%	4.1%	(1.1%)	3.6%	4.0%	(0.4%)
<b>Total</b>	9.6%	10.5%	(0.9%)	13.4%	18.3%	(4.9%)	13.2%	16.7%	(3.5%)

During the first half of fiscal 2013, the Partnership lost 3,700 accounts (net), or 0.9%, of our home heating oil and propane consumer base, compared to the first half of fiscal 2012 in which the Partnership lost 9,100 accounts (net), or 2.2% of our home heating oil and propane customer base. The improvement of 5,400 accounts was due to an increase in gross customer gains of 2,800 and lower gross customer losses of 2,600. The increase in gains can be attributed to an increase in referrals as well as marketing and advertising related activity. The decrease in losses were mainly due to fewer credit cancellations and losses to price competition.

As a result of storm Sandy, certain customers who suffered storm damage have ceased taking deliveries from the Partnership as they are contemplating replacing or repairing their home heating oil systems. At present, these customers have not been counted as losses, but it is possible that these customers may decide to switch home heating oil suppliers or convert to natural gas in the future.

## **Table of Contents**

During the first half of fiscal 2013, we lost 1.2% of our home heating oil accounts to natural gas versus losses of 1.1% for the first half of fiscal 2012, and 0.7% for the first half of fiscal 2011. Conversions to natural gas are increasing and we believe this may continue as natural gas has become significantly less expensive than home heating oil on an equivalent BTU basis. In addition, the states of New York, Connecticut and Pennsylvania are seeking to encourage homeowners to expand the use of natural gas as a heating fuel through legislation and regulatory efforts.

## **Consolidated Results of Operations**

The following is a discussion of the consolidated results of operations of the Partnership and its subsidiaries, and should be read in conjunction with the historical Financial and Operating Data and Notes thereto included elsewhere in this Quarterly Report.

## Table of Contents

### Three Months Ended March 31, 2013

### Compared to the Three Months Ended March 31, 2012

#### Volume

For the three months ended March 31, 2013, retail volume of home heating oil and propane increased by 33.9 million gallons, or 26.0%, to 164.4 million gallons, compared to 130.5 million gallons for the three months ended March 31, 2012. For those locations where the Partnership had existing operations during both periods, which we sometimes refer to as the base business (i.e., excluding acquisitions), temperatures (measured on a heating degree day basis) for the three months ended March 31, 2013, were 25.6% colder than the three months ended March 31, 2012, but 1.8% warmer than normal, as reported by the National Oceanic and Atmospheric Administration (NOAA). For the twelve months ended March 31, 2013, net customer attrition for the base business was 3.6%. Due to various reasons including the significant increase in the price per gallon of home heating oil and propane over the last several years, we believe that our customers are adopting conservation measures to use less product. The impact of conservation, along with any period-to-period differences in delivery scheduling, the timing of accounts added or lost during the fiscal years, equipment efficiency and other volume variances not otherwise described, are included in the chart below under the heading Other. An analysis of the change in the retail volume of home heating oil and propane, which is based on management's estimates, sampling and other mathematical calculations and certain assumptions, is as follows:

(in millions of gallons)	Heating Oil and Propane
Volume - Three months ended March 31, 2012	130.5
Acquisitions	7.9
Impact of colder temperatures	31.8
Net customer attrition	(5.2)
Other	(0.6)
Change	33.9
Volume - Three months ended March 31, 2013	164.4

The following chart sets forth the percentage by volume of total home heating oil sold to residential variable-price customers, residential price-protected customers and commercial/industrial/other customers for the three months ended March 31, 2013, compared to the three months ended March 31, 2012:

Customers	Three Months Ended	
	March 31, 2013	March 31, 2012
Residential Variable	42.1%	42.9%
Residential Price-Protected	44.1%	44.5%
Commercial/Industrial/Other	13.8%	12.6%
Total	100.0%	100.0%

Volume of other petroleum products increased by 3.3 million gallons, or 25.8%, to 16.1 million gallons for the three months ended March 31, 2013, compared to 12.8 million gallons for the three months ended March 31, 2012, largely due to higher wholesale home heating oil volume sold (which we report under the category of other petroleum products to distinguish it from our retail sales).

## **Table of Contents**

### **Product Sales**

For the three months ended March 31, 2013, product sales increased \$148.7 million, or 25.5%, to \$732.9 million, compared to \$584.2 million for the three months ended March 31, 2012, due to an increase in total volume of 26.0%.

### **Installation and Service Sales**

For the three months ended March 31, 2013, installation and service sales increased \$6.8 million, or 15.0%, to \$52.2 million, compared to \$45.4 million for the three months ended March 31, 2012, due to additional revenue from acquisitions of \$2.3 million and an increase in the base business of \$4.5 million largely attributable to storm Sandy-related service and installation billings as well as growth in our other service offerings.

### **Cost of Product**

For the three months ended March 31, 2013, cost of product increased \$112.6 million, or 24.5%, to \$571.8 million, compared to \$459.2 million for the three months ended March 31, 2012, due to an increase in total volume of 26.0%.

### **Gross Profit    Product**

The table below calculates the Partnership's per gallon margins and reconciles product gross profit for home heating oil and propane and other petroleum products. We believe the change in home heating oil and propane margins should be evaluated before the effects of increases or decreases in the fair value of derivative instruments, as we believe that realized per gallon margins should not include the impact of non-cash changes in the market value of hedges before the settlement of the underlying transaction. On that basis, home heating oil and propane margins for the three months ended March 31, 2013, increased by \$0.0211 per gallon, or 2.3%, to \$0.9542 per gallon, from \$0.9331 per gallon during the three months ended March 31, 2012. Product sales and cost of product include home heating oil, propane, other petroleum products and liquidated damages billings.

**Table of Contents**

	Three Months Ended March 31, 2013		Three Months Ended March 31, 2012	
	Amount (in millions)	Per Gallon	Amount (in millions)	Per Gallon
<b>Home Heating Oil and Propane</b>				
Volume	164.4		130.5	
Sales	\$ 676.4	\$ 4.1145	\$ 539.4	\$ 4.1331
Cost	\$ 519.6	\$ 3.1603	\$ 417.6	\$ 3.2000
Gross Profit	\$ 156.9	\$ 0.9542	\$ 121.8	\$ 0.9331
<b>Other Petroleum Products</b>				
Volume	16.1		12.8	
Sales	\$ 56.5	\$ 3.5025	\$ 44.8	\$ 3.4945
Cost	\$ 52.2	\$ 3.2369	\$ 41.6	\$ 3.2444
Gross Profit	\$ 4.3	\$ 0.2656	\$ 3.2	\$ 0.2502
<b>Total Product</b>				
Sales	\$ 732.9		\$ 584.2	
Cost	\$ 571.8		\$ 459.2	
Gross Profit	\$ 161.2		\$ 125.0	

For the three months ended March 31, 2013, total product gross profit increased by \$36.2 million to \$161.2 million, compared to \$125.0 million for the three months ended March 31, 2012, due to an increase in home heating oil and propane volume (\$31.6 million), the impact of higher home heating oil and propane margins (\$3.5 million) and the additional gross profit from other petroleum products (\$1.1 million).

**Cost of Installations and Service**

For the three months ended March 31, 2013, cost of installation and service increased by \$6.9 million, or 15.7%, to \$51.3 million, compared to \$44.4 million for the three months ended March 31, 2012, due to a \$1.9 million increase related to acquisitions and \$5.0 million tied to our base business largely due to additional work from Sandy and the additional service costs associated with 25.6% colder temperatures.

Installation costs for the three months ended March 31, 2013, increased by \$3.0 million, or 23.2%, to \$15.7 million, compared to \$12.7 million in installation costs for the three months ended March 31, 2012. Installation costs as a percentage of installation sales for the three months ended March 31, 2013, and the three months ended March 31, 2012, were 85.4% and 88.5%, respectively. Service expenses increased to \$35.6 million for the three months ended March 31, 2013, or 105.4%, of service sales, versus \$31.6 million, or 102.1% of service sales, for the three months ended March 31, 2012. We achieved a combined profit from service and installation of \$0.9 million for the three months ended March 31, 2013, compared to a combined profit of \$1.0 million for the three months ended March 31, 2012. Management views the service and installation department on a combined basis because many overhead functions and direct expenses such as service technician time cannot be separated or precisely allocated to either service or installation billings.

**(Increase) Decrease in the Fair Value of Derivative Instruments**

During the three months ended March 31, 2013, the change in the fair value of derivative instruments resulted in a \$3.4 million credit due to the expiration of certain hedged positions (a \$5.1 million credit) and a decrease in the market value for unexpired hedges (a \$1.7 million charge).

## **Table of Contents**

During the three months ended March 31, 2012, the change in the fair value of derivative instruments resulted in a \$17.0 million credit due to the expiration of certain hedged positions (a \$13.0 million credit) and an increase in market value for unexpired hedges (a \$4.0 million credit).

### **Delivery and Branch Expenses**

For the three months ended March 31, 2013, delivery and branch expense increased \$21.6 million, or 35.0%, to \$83.3 million, compared to \$61.7 million for the three months ended March 31, 2012, due to higher delivery and branch expenses of \$4.2 million from the additional volume sold in the base business, the additional expense from acquisitions of \$3.5 million, and the absence of a weather hedge benefit of \$12.5 million, which had been recorded during the three months ended March 31, 2012. During the three months ended March 31, 2012, the Partnership recorded a benefit of \$12.5 million under its weather hedge contract which reduced delivery and branch expenses with no similar benefit recorded in the three months ended March 31, 2013.

On a cents per gallon basis (excluding the impact of the weather hedge contract recorded during the three months ended March 31, 2012), delivery and branch expenses for the three months ended March 31, 2013, decreased by \$0.0519, or 9.8%, to \$0.4774, compared to \$0.5293 for the three months ended March 31, 2012 as certain fixed operating expenses are being spread over a larger volume base in the three months ended March 31, 2013, versus the three months ended March 31, 2012.

### **Depreciation and Amortization**

For the three months ended March 31, 2013, depreciation and amortization expenses increased by \$0.5 million, or 12.9%, to \$4.3 million, compared to \$3.8 million for the three months ended March 31, 2012.

Depreciation expense was unchanged as an increase of \$0.3 million from fiscal 2012 acquisitions was offset by a decrease of \$0.3 million related to fleet and equipment assets which became fully depreciated. Amortization expense increased by \$0.5 million due to fiscal 2012 customer lists acquired with ten year lives and trade names acquired with twenty year lives.

### **General and Administrative Expenses**

For the three months ended March 31, 2013, general and administrative expenses increased \$0.2 million, to \$4.8 million, from \$4.6 million for the three months ended March 31, 2012, as lower legal and professional, acquisition and other expenses of \$0.7 million were more than offset by an increase in profit sharing expense of \$0.9 million.

The Partnership accrues approximately 6% of Adjusted EBITDA as defined in the profit sharing plan for distribution to its employees, and this amount is payable when the Partnership achieves Adjusted EBITDA of at least 70% of the amount budgeted. The dollar amount of the profit sharing pool is subject to increases and decreases in line with increases and decreases in Adjusted EBITDA.

### **Interest Expense**

For the three months ended March 31, 2013, interest expense increased \$0.2 million, or 5.1%, to \$4.0 million compared to \$3.8 million for the three months ended March 31, 2012, largely due to an increase in average working capital borrowings of \$13.8 million.

## **Table of Contents**

### **Interest Income**

For the three months ended March 31, 2013, interest income increased \$1.0 million to \$2.2 million, compared to \$1.2 million for the three months ended March 31, 2012, due to higher finance charges.

### **Amortization of Debt Issuance Costs**

For the three months ended March 31, 2013, amortization of debt issuance costs was unchanged at \$0.4 million compared to the three months ended March 31, 2012.

### **Income Tax Expense**

For the three months ended March 31, 2013, income tax expense decreased by \$0.3 million to \$29.1 million from \$29.4 million for the three months ended March 31, 2012, as the impact of an increase in income before income taxes of \$0.9 million was more than offset by a decline in the Partnership's effective income tax rate from 42.1% for the three months ended March 31, 2012, to 41.2% for the three months ended March 31, 2013. This rate decrease was primarily due to the non-recurrence of a state audit expense accrued in the three months ended March 31, 2012.

### **Net Income**

For the three months ended March 31, 2013, net income increased \$1.2 million to \$41.7 million, from \$40.5 million for the three months ended March 31, 2012, due to an increase in pretax income of \$0.9 million and a decline in income tax expense of \$0.3 million.

**Table of Contents****Adjusted EBITDA**

For the three months ended March 31, 2013, Adjusted EBITDA increased by \$14.2 million, or 23.8%, to \$73.9 million as the impact of 25.6% colder temperatures, higher home heating oil and propane per gallon margins, and acquisitions more than offset the volume decline in the business base attributable to net customer attrition and other factors. In addition, Adjusted EBITDA for the three months ended March 31, 2012, reflects a \$12.5 million benefit that the Partnership recorded under its weather hedge contract due to the abnormally warm weather in that period with no similar benefit recorded in the three months ended March 31, 2013.

EBITDA and Adjusted EBITDA should not be considered as an alternative to net income (as an indicator of operating performance) or as an alternative to cash flow (as a measure of liquidity or ability to service debt obligations), but provides additional information for evaluating our ability to make the Minimum Quarterly Distribution.

EBITDA and Adjusted EBITDA are calculated as follows:

(in thousands)	Three Months Ended March 31,	
	2013	2012
Net income	\$ 41,679	\$ 40,482
Plus:		
Income tax expense	29,117	29,391
Amortization of debt issuance cost	418	385
Interest expense, net	1,840	2,621
Depreciation and amortization	4,321	3,829
EBITDA (a)	77,375	76,708
(Increase) / decrease in the fair value of derivative instruments	(3,447)	(16,981)
Adjusted EBITDA (a)	73,928	59,727
<b><u>Add / (subtract)</u></b>		
Income tax expense	(29,117)	(29,391)
Interest expense, net	(1,840)	(2,621)
Provision for losses on accounts receivable	4,440	4,799
Increase in accounts receivables	(102,170)	(32,043)
Decrease in inventories	41,432	54,998
Decrease in customer credit balances	(39,786)	(30,986)
Change in deferred taxes	7,787	21,776
Increase in weather hedge contract receivable		(12,500)
Change in other operating assets and liabilities	24,539	5,246
Net cash provided by (used in) operating activities	\$ (20,787)	\$ 39,005
Net cash used in investing activities	\$ (1,261)	\$ (1,646)
Net cash provided by (used in) financing activities	\$ 18,300	\$ (26,226)

(a)

## Edgar Filing: STAR GAS PARTNERS LP - Form 10-Q

EBITDA (Earnings from continuing operations before net interest expense, income taxes, depreciation and amortization) and Adjusted EBITDA (Earnings from continuing operations before net interest expense, income taxes, depreciation and amortization, (increase) decrease in the fair value of derivatives, gain or loss on debt redemption, goodwill impairment, and other non-cash and non-operating charges) are non-GAAP financial measures that are used as supplemental financial measures by management and external users of our financial statements, such as investors, commercial banks and research analysts, to assess:

our compliance with certain financial covenants included in our debt agreements;

**Table of Contents**

our financial performance without regard to financing methods, capital structure, income taxes or historical cost basis;  
our ability to generate cash sufficient to pay interest on our indebtedness and to make distributions to our partners;  
our operating performance and return on invested capital compared to those of other companies in the retail distribution of refined petroleum products, without regard to financing methods and capital structure; and  
the viability of acquisitions and capital expenditure projects and the overall rates of return of alternative investment opportunities.

The method of calculating Adjusted EBITDA may not be consistent with that of other companies and each of EBITDA and Adjusted EBITDA has its limitations as an analytical tool, should not be considered in isolation and should be viewed in conjunction with measurements that are computed in accordance with GAAP. Some of the limitations of EBITDA and Adjusted EBITDA are:

EBITDA and Adjusted EBITDA do not reflect our cash used for capital expenditures.

Although depreciation and amortization are non-cash charges, the assets being depreciated or amortized often will have to be replaced and EBITDA and Adjusted EBITDA do not reflect the cash requirements for such replacements;

EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, our working capital requirements;

EBITDA and Adjusted EBITDA do not reflect the cash necessary to make payments of interest or principal on our indebtedness; and

EBITDA and Adjusted EBITDA do not reflect the cash required to pay taxes.

**Table of Contents****Six Months Ended March 31, 2013****Compared to the Six Months Ended March 31, 2012****Volume**

For the six months ended March 31, 2013, retail volume of home heating oil and propane increased by 39.9 million gallons, or 18.0%, to 261.5 million gallons, compared to 221.6 million gallons for the six months ended March 31, 2012. For those locations where the Partnership had existing operations during both periods, which we sometimes refer to as the base business (i.e., excluding acquisitions), temperatures (measured on a heating degree day basis) for the six months ended March 31, 2013, were 21.6% colder than the six months ended March 31, 2012, but 4.1% warmer than normal, as reported by the National Oceanic and Atmospheric Administration (NOAA). For the twelve months ended March 31, 2013, net customer attrition for the base business was 3.6%. Due to various reasons including the significant increase in the price per gallon of home heating oil and propane over the last several years, we believe that our customers are adopting conservation measures to use less product. The impact of conservation, along with any period-to-period differences in delivery scheduling, the timing of accounts added or lost during the fiscal years, equipment efficiency and other volume variances not otherwise described, are included in the chart below under the heading Other. On October 29, 2012, storm Sandy made landfall in our service area, resulting in widespread power outages that affected a number of our customers. Deliveries of home heating oil and propane were less than expected for certain of our customers who were without power several weeks subsequent to storm Sandy. The home heating oil and propane volume loss due to storm Sandy is also in the chart below under the heading Other. An analysis of the change in the retail volume of home heating oil and propane, which is based on management's estimates, sampling and other mathematical calculations and certain assumptions, is as follows:

(in millions of gallons)	Heating Oil and Propane
Volume - Six months ended March 31, 2012	221.6
Acquisitions	13.1
Impact of colder temperatures	45.5
Net customer attrition	(8.8)
Other	(9.9)(a)
Change	39.9
Volume - Six months ended March 31, 2013	261.5

(a) The majority of this change was reflected in the Partnership's volume reconciliation for the first quarter of fiscal 2013 compared to the first quarter of fiscal 2012.

The following chart sets forth the percentage by volume of total home heating oil sold to residential variable-price customers, residential price-protected customers and commercial/industrial/other customers for the six months ended March 31, 2013, compared to the six months ended March 31, 2012:

Customers	Six Months Ended March 31, 2013	March 31, 2012
Residential Variable	42.1%	42.9%
Residential Price-Protected	43.9%	44.2%
Commercial/Industrial/Other	14.0%	12.9%
Total	100.0%	100.0%

## **Table of Contents**

Volume of other petroleum products increased by 5.8 million gallons, or 21.3%, to 32.9 million gallons for the six months ended March 31, 2013, compared to 27.1 million gallons for the six months ended March 31, 2012, largely due to an increase in motor fuel demand as a result of storm Sandy (including to power generators) and higher home heating oil wholesale sales.

### **Product Sales**

For the six months ended March 31, 2013, product sales increased \$196.5 million, or 19.8%, to \$1.2 billion, compared to \$1.0 billion for the six months ended March 31, 2012, primarily due to an increase in total volume of 18.4%.

### **Installation and Service Sales**

For the six months ended March 31, 2013, installation and service sales increased \$14.0 million, or 14.0%, to \$114.2 million, compared to \$100.2 million for the six months ended March 31, 2012, due to additional revenue from acquisitions of \$5.2 million and an increase in the base business of \$8.8 million largely attributable to storm Sandy-related service and installation billings.

### **Cost of Product**

For the six months ended March 31, 2013, cost of product increased \$152.5 million, or 19.7%, to \$928.4 million, compared to \$775.9 million for the six months ended March 31, 2012, largely due to an increase in total volume of 18.4%.

### **Gross Profit Product**

The table below calculates the Partnership's per gallon margins and reconciles product gross profit for home heating oil and propane and other petroleum products. We believe the change in home heating oil and propane margins should be evaluated before the effects of increases or decreases in the fair value of derivative instruments, as we believe that realized per gallon margins should not include the impact of non-cash changes in the market value of hedges before the settlement of the underlying transaction. On that basis, home heating oil and propane margins for the six months ended March 31, 2013, increased by \$0.0131 per gallon, or 1.4%, to \$0.9533 per gallon, from \$0.9402 per gallon during the six months ended March 31, 2012. Product sales and cost of product include home heating oil, propane, other petroleum products and liquidated damages billings.

**Table of Contents**

	Six Months Ended			
	March 31, 2013		March 31, 2012	
	Amount (in millions)	Per Gallon	Amount (in millions)	Per Gallon
<b>Home Heating Oil and Propane</b>				
Volume	261.5		221.6	
Sales	\$ 1,071.0	\$ 4.0955	\$ 898.6	\$ 4.0547
Cost	\$ 821.7	\$ 3.1422	\$ 690.2	\$ 3.1145
Gross Profit	\$ 249.3	\$ 0.9533	\$ 208.4	\$ 0.9402
<b>Other Petroleum Products</b>				
Volume	32.9		27.1	
Sales	\$ 116.4	\$ 3.5368	\$ 92.3	\$ 3.4033
Cost	\$ 106.7	\$ 3.2415	\$ 85.7	\$ 3.1591
Gross Profit	\$ 9.7	\$ 0.2953	\$ 6.6	\$ 0.2442
<b>Total Product</b>				
Sales	\$ 1,187.4		\$ 990.9	
Cost	\$ 928.4		\$ 775.9	
Gross Profit	\$ 259.0		\$ 215.0	

For the six months ended March 31, 2013, total product gross profit increased by \$44.0 million to \$259.0 million, compared to \$215.0 million for the six months ended March 31, 2012, due to an increase in home heating oil and propane volume (\$37.5 million), the impact of higher home heating oil and propane margins (\$3.4 million) and the additional gross profit from other petroleum products (\$3.1 million).

**Cost of Installations and Service**

For the six months ended March 31, 2013, cost of installation and service increased by \$11.8 million, or 12.2%, to \$108.5 million, compared to \$96.7 million for the six months ended March 31, 2012, due to a \$4.2 million increase related to acquisitions and \$7.6 million tied to our base business largely due to Sandy and the additional service costs associated with 21.6% colder temperatures.

Installation costs for the six months ended March 31, 2013, increased by \$7.4 million, or 23.7%, to \$38.4 million, compared to \$31.0 million in installation costs for the six months ended March 31, 2012. Installation costs as a percentage of installation sales for the six months ended March 31, 2013, and the six months ended March 31, 2012, were 84.1% and 85.1%, respectively. Service expenses increased to \$70.2 million for the six months ended March 31, 2013, or 102.3%, of service sales, versus \$65.7 million, or 103.1% of service sales, for the six months ended March 31, 2012. We achieved a combined profit from service and installation of \$5.7 million for the six months ended March 31, 2013, compared to a combined profit of \$3.5 million for the six months ended March 31, 2012. This improvement of \$2.2 million was due to acquisitions and service and installation work from storm Sandy. Management views the service and installation department on a combined basis because many overhead functions and direct expenses such as service technician time cannot be separated or precisely allocated to either service or installation billings.

## **Table of Contents**

### **(Increase) Decrease in the Fair Value of Derivative Instruments**

During the six months ended March 31, 2013, the change in the fair value of derivative instruments resulted in a \$4.5 million charge due to the expiration of certain hedged positions (a \$0.6 million charge) and a decrease in the market value for unexpired hedges (a \$3.9 million charge).

During the six months ended March 31, 2012, the change in the fair value of derivative instruments resulted in a \$9.9 million credit due to the expiration of certain hedged positions (a \$5.5 million credit) and an increase in market value for unexpired (a \$4.4 million credit).

### **Delivery and Branch Expenses**

For the six months ended March 31, 2013, delivery and branch expense increased \$22.2 million, or 17.2%, to \$151.7 million, compared to \$129.5 million for the six months ended March 31, 2012, due to higher delivery and branch expenses of \$4.8 million from the additional volume sold in the base business, the additional expense from acquisitions of \$6.7 million and the absence of a weather hedge benefit of \$12.5 million. During the six months ended March 31, 2012, the Partnership recorded a benefit of \$12.5 million under its warm weather hedge which reduced delivery and branch expenses with no similar benefit recorded in the six months ended March 31, 2013.

On a cents per gallon basis (excluding the credit recorded under the Partnership's weather hedge contract recorded during the six months ended March 31, 2012), delivery and branch expenses for the six months ended March 31, 2013, decreased \$0.0519, or 8.9%, to \$0.5325, compared to \$0.5844 for the six months ended March 31, 2012, as certain fixed operating expenses are being spread over a larger volume base in the six months ended March 31, 2013, versus the six months ended March 31, 2012.

### **Depreciation and Amortization**

For the six months ended March 31, 2013, depreciation and amortization expenses increased by \$1.2 million, or 16.4%, to \$8.7 million, compared to \$7.5 million for the six months ended March 31, 2012.

Depreciation expense was higher by \$0.1 million due to an increase of \$0.5 million from fiscal 2012 acquisitions which was partially offset by a decrease of \$0.4 million related to fleet and equipment assets which became fully depreciated in fiscal 2012 and fiscal 2013. Amortization expense increased by \$1.1 million, due to fiscal 2012 customer lists acquired with seven and ten year lives and trade names acquired with twenty year lives.

### **General and Administrative Expenses**

For the six months ended March 31, 2013, general and administrative expenses decreased \$0.7 million, or 6.7%, to \$9.2 million, from \$9.9 million for the six months ended March 31, 2012, as lower legal and professional, acquisition and other expenses of \$1.8 million were offset by an increase in profit sharing expense of \$1.1 million.

The Partnership accrues approximately 6% of Adjusted EBITDA as defined in the profit sharing plan for distribution to its employees, and this amount is payable when the Partnership achieves Adjusted EBITDA of at least 70% of the amount budgeted. The dollar amount of the profit sharing pool is subject to increases and decreases in line with increases and decreases in Adjusted EBITDA.

## **Table of Contents**

### **Interest Expense**

For the six months ended March 31, 2013, interest expense increased \$0.2 million, or 2.3%, to \$7.5 million compared to the \$7.3 million for the six months ended March 31, 2012 due to an increase in average working capital borrowings of \$5.4 million.

### **Interest Income**

For the six months ended March 31, 2013, interest income increased \$1.4 million to \$3.3 million, compared to \$1.9 million for the six months ended March 31, 2012, due to higher finance charge income.

### **Amortization of Debt Issuance Costs**

For the six months ended March 31, 2013, amortization of debt issuance costs increased by \$0.3 million to \$0.9 million, compared to \$0.6 million for the six months ended March 31, 2012, due considerably to the commencement of amortization of the April 2012 revolving credit facility agreement amendment fees.

### **Income Tax Expense**

For the six months ended March 31, 2013, income tax expense increased by \$2.0 million to \$34.0 million from \$32.0 million for the six months ended March 31, 2012, as the impact of an increase in pretax income of \$10.0 million was reduced by the impact of a decline in the effective income tax rate. The Partnership's effective tax rate was 39.8% for the six months ended March 31, 2013, versus 42.5% for the six months ended March 31, 2012. The change in the income tax rate was primarily due to the recording in the first fiscal quarter of 2013 of a \$1.0 million deferred tax benefit related to an increase in prospective tax deductions.

### **Net Income**

For the six months ended March 31, 2013, net income increased \$8.0 million to \$51.4 million, from \$43.4 million for the six months ended March 31, 2012, as the increase in pretax income of \$10.0 million was greater than the increase in income tax expense of \$2.0 million.

### **Adjusted EBITDA**

For the six months ended March 31, 2013, Adjusted EBITDA increased by \$24.7 million, or 31.2%, to \$103.7 million as the impact of 21.6% colder temperatures, slightly higher home heating oil and propane per gallon margins, acquisitions, and the favorable impact of storm Sandy on motor fuel sales and service and installation revenue more than offset the volume decline in the base business attributable to net customer attrition and other factors. In addition, Adjusted EBITDA for the six months ended March 31, 2012, reflects a \$12.5 million benefit that the Partnership recorded under its weather hedge contract due to the abnormally warm weather in that period with no similar benefit recorded during the six months ended March 31, 2013.

EBITDA and Adjusted EBITDA should not be considered as an alternative to net income (as an indicator of operating performance) or as an alternative to cash flow (as a measure of liquidity or ability to service debt obligations), but provides additional information for evaluating our ability to make the Minimum Quarterly Distribution.

**Table of Contents**

EBITDA and Adjusted EBITDA are calculated as follows:

(in thousands)	Six Months Ended March 31,	
	2013	2012
Net income	\$ 51,431	\$ 43,413
Plus:		
Income tax expense	34,034	32,043
Amortization of debt issuance cost	910	659
Interest expense, net	4,169	5,345
Depreciation and amortization	8,679	7,458
EBITDA (a)	99,223	88,918
(Increase) / decrease in the fair value of derivative instruments	4,518	(9,863)
Adjusted EBITDA (a)	103,741	79,055
<b>Add / (subtract)</b>		
Income tax expense	(34,034)	(32,043)
Interest expense, net	(4,169)	(5,345)
Provision for losses on accounts receivable	6,203	6,249
Increase in accounts receivables	(208,565)	(111,154)
Decrease in inventories	5,749	36,115
Decrease in customer credit balances	(62,389)	(36,302)
Change in deferred taxes	8,651	22,930
Increase in weather hedge contract receivable		(12,500)
Change in other operating assets and liabilities	43,444	17,235
Net cash used in operating activities	\$ (141,369)	\$ (35,760)
Net cash used in investing activities	\$ (2,093)	\$ (28,544)
Net cash provided by financing activities	\$ 45,939	\$ 2,568

- (a) EBITDA (Earnings from continuing operations before net interest expense, income taxes, depreciation and amortization) and Adjusted EBITDA (Earnings from continuing operations before net interest expense, income taxes, depreciation and amortization, (increase) decrease in the fair value of derivatives, gain or loss on debt redemption, goodwill impairment, and other non-cash and non-operating charges) are non-GAAP financial measures that are used as supplemental financial measures by management and external users of our financial statements, such as investors, commercial banks and research analysts, to assess:

our compliance with certain financial covenants included in our debt agreements;  
 our financial performance without regard to financing methods, capital structure, income taxes or historical cost basis;  
 our ability to generate cash sufficient to pay interest on our indebtedness and to make distributions to our partners;  
 our operating performance and return on invested capital compared to those of other companies in the retail distribution of refined petroleum products, without regard to financing methods and capital structure; and  
 the viability of acquisitions and capital expenditure projects and the overall rates of return of alternative investment opportunities.

## Edgar Filing: STAR GAS PARTNERS LP - Form 10-Q

The method of calculating Adjusted EBITDA may not be consistent with that of other companies and each of EBITDA and Adjusted EBITDA has its limitations as an analytical tool, should not be considered in isolation and should be viewed in conjunction with measurements that are computed in accordance with GAAP. Some of the limitations of EBITDA and Adjusted EBITDA are:

EBITDA and Adjusted EBITDA do not reflect our cash used for capital expenditures.

## **Table of Contents**

Although depreciation and amortization are non-cash charges, the assets being depreciated or amortized often will have to be replaced and EBITDA and Adjusted EBITDA do not reflect the cash requirements for such replacements;  
EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, our working capital requirements;  
EBITDA and Adjusted EBITDA do not reflect the cash necessary to make payments of interest or principal on our indebtedness; and  
EBITDA and Adjusted EBITDA do not reflect the cash required to pay taxes.

## **DISCUSSION OF CASH FLOWS**

We use the indirect method to prepare our Consolidated Statements of Cash Flows. Under this method, we reconcile net income to cash flows provided by operating activities by adjusting net income for those items that impact net income but do not result in actual cash receipts or payment during the period.

### **Operating Activities**

Due to the seasonal nature of our business, cash is generally used in operations during the winter (our first and second fiscal quarters) as we require additional working capital to support the high volume of sales during this period, and cash is generally provided by operating activities during the spring and summer (our third and fourth quarters) when customer payments exceed the cost of deliveries.

For the six months ended March 31, 2013, cash used in operating activities was \$141.4 million or \$105.6 million greater than cash used in operating activities for the six months ended March 31, 2012 of \$35.8 million. While cash generated from operations increased by \$9.5 million largely due to the impact of colder weather, cash used to finance accounts receivable, including customers on our budget payment plans, increased by \$123.5 million. Accounts receivable at March 31, 2013, was approximately double that of March 31, 2012, due largely to the 21.6% increase in colder temperatures. As of March 31, 2013, days sales outstanding were 34.5 days compared to 31.0 days as of March 31, 2012, and 35.6 days as of March 31, 2011. At the beginning of fiscal 2012, the Partnership had purchased approximately 11.5 million gallons more liquid product for the upcoming heating season than at the beginning of fiscal 2013. As a result, cash used in operations for the purchase of inventory was \$30.4 million greater in the six months ended March 31, 2013, than in the six months ended March 31, 2012. The timing of certain accruals and payments, including income taxes, insurance and amounts due under the Partnership's profit sharing plan, provided \$26.2 million of cash for the six months ended March 31, 2013, compared to the six months ended March 31, 2012. In addition, during the six months ended March 31, 2012, the Partnership recorded a \$12.5 million receivable under its weather hedge contract which reduced cash from operating activities.

### **Investing Activities**

Our capital expenditures for the six months ended March 31, 2013, totaled \$2.1 million, as we invested in computer hardware and software (\$0.4 million), refurbished certain physical plants (\$0.3 million), expanded our propane operations (\$1.0 million) and made additions to our fleet and other equipment (\$0.4 million).

Our capital expenditures for the six months ended March 31, 2012, totaled \$2.7 million, as we invested in computer hardware and software (\$0.4 million), refurbished certain physical plants (\$0.6 million), expanded our propane operations (\$0.8 million) and made additions to our fleet and other equipment (\$0.9 million). We also completed four acquisitions for \$26.2 million and allocated \$16.4 million of the gross purchase price to intangible assets (including \$6.2 million to goodwill), \$6.3 million to fixed assets, and \$3.5 million to working capital.

## **Table of Contents**

### **Financing Activities**

During the six months ended March 31, 2013, we borrowed \$111.5 million under our credit facility and subsequently repaid \$50.5 million. We also paid distributions of \$9.5 million to our common unit holders, \$0.11 million to our General Partner (including \$0.07 million of incentive distributions as provided in our Partnership Agreement) and repurchased 1.3 million units for \$5.6 million in connection with our unit repurchase plan.

During the six months ended March 31, 2012, we borrowed \$86.3 million under our revolving credit facility and repaid \$53.8 million. We also paid distributions of \$10.0 million to our common unit holders, \$0.11 million to our General Partner (including \$0.07 million of incentive distributions as provided in our Partnership Agreement) and repurchased 3.9 million units for \$19.6 million in connection with our unit repurchase plan.

## **FINANCING AND SOURCES OF LIQUIDITY**

### **Liquidity and Capital Resources**

Our primary uses of liquidity are to provide funds for our working capital, capital expenditures, distributions on our units, acquisitions and unit repurchases. Our ability to provide funds for such uses depends on our future performance, which will be subject to prevailing economic, financial, business and weather conditions, the ability to pass on the full impact of high product costs to customers, the effects of high net customer attrition, conservation and other factors. Capital requirements, at least in the near term, are expected to be provided by cash flows from operating activities, cash on hand as of March 31, 2013, (\$10.6 million) or a combination thereof. To the extent future capital requirements exceed cash on hand plus cash flows from operating activities, we anticipate that working capital will be financed by our revolving credit facility, as discussed below, and repaid from subsequent seasonal reductions in inventory and accounts receivable. If we require additional capital and the markets are receptive, we may seek to offer and sell debt or equity securities in public or private offerings, including under our \$250 million shelf registration statement.

Our asset-based revolving credit facility, which expires in June 2016, provides us with the ability to borrow up to \$250 million (\$350 million during the heating season from November through April of each year) for working capital purposes (subject to certain borrowing base limitations and coverage ratios), including the issuance of up to \$100 million in letters of credit. We can increase the facility size by \$100 million without the consent of the bank group. However, the bank group is not obligated to fund the \$100 million increase. If the bank group elects not to fund the increase, we can add additional lenders to the group with the consent of the Agent which shall not be unreasonably withheld. Obligations under the revolving credit facility are guaranteed by us and our subsidiaries and secured by liens on substantially all of our assets, including accounts receivable, inventory, general intangibles, real property, fixtures and equipment. As of March 31, 2013, there were \$61.0 million borrowings under our revolving credit facility and \$45.0 million in letters of credit outstanding, of which \$44.7 million are for current and future insurance reserves and bonds and \$0.3 million are for seasonal inventory purchases and other working capital purposes.

Under the terms of the revolving credit facility, we must maintain at all times either Availability (borrowing base less amounts borrowed and letters of credit issued) of 12.5% of the maximum facility size or a fixed charge coverage ratio of not less than 1.1, which is calculated based upon Adjusted EBITDA for the trailing twelve month period. As of March 31, 2013, Availability, as defined in the revolving credit facility agreement, was \$137.0 million, which exceeded the minimum required, and the fixed charge coverage ratio for the twelve months ended March 31, 2013, was in excess of 1.1.

Maintenance capital expenditures for the remainder of 2013 are estimated to be approximately \$3.5 to \$4.5 million, excluding the capital requirements for leased fleet. In addition, we plan to invest an estimated \$0.6 million in our propane operations. We anticipate paying distributions during the remainder of 2013 at the current quarterly level of \$0.0825 per unit (subject to the Board's quarterly determination of the amount of

## **Table of Contents**

Available Cash), for an aggregate of approximately \$9.8 million to common unit holders, \$0.14 million to our General Partner (including \$0.1 million of incentive distribution as provided in our Partnership Agreement) and \$0.1 million to management pursuant to the management incentive compensation plan, which provides for certain members of management to receive incentive distributions that would otherwise be payable to the General Partner. For the balance of fiscal 2013, the Partnership's scheduled interest payments on its Senior Notes, which are due in November 2017, amount to \$5.5 million. Based upon certain actuarial assumptions, we estimate that the Partnership will make cash contributions to its frozen defined benefit pension obligations totaling approximately \$2.0 million for the remainder of fiscal 2013. We continue to seek attractive acquisition opportunities within the Availability constraints of our revolving credit facility and funding resources.

On July 19, 2012, the Board of Directors authorized the repurchase of up to 3.0 million of the Partnership's common units, which we refer to as Plan III. Through the date of this Report the Partnership repurchased 1.5 million units at a cost of \$6.4 million and intends to continue to repurchase units under this Plan.

### **Partnership Distribution Provisions**

In April 2013, we declared a quarterly distribution of \$0.0825 per unit, or \$0.33 per unit on an annualized basis, on all common units with respect to the second quarter of fiscal 2013, payable on May 6, 2013, to holders of record on April 26, 2013. In accordance with our Partnership Agreement, the amount of distributions in excess of the minimum quarterly distribution of \$0.0675, are distributed 90% to the holders of common units and 10% to the holders of the General Partner units (until certain distribution levels are met), subject to the management incentive compensation plan. As a result, \$4.9 million will be paid to the common unit holders, \$0.07 million to the General Partner (including \$0.05 million of incentive distribution as provided in our Partnership Agreement) and \$0.05 million to management pursuant to the management incentive compensation plan which provides for certain members of management to receive incentive distributions that would otherwise be payable to the General Partner.

### **Contractual Obligations and Off-Balance Sheet Arrangements**

There has been no material change to Contractual Obligations and Off-Balance Sheet Arrangements since our September 30, 2012, Form 10-K disclosure and therefore, the table has not been included in this Form 10-Q.

### **Recent Accounting Pronouncements**

The following new accounting standard is currently being evaluated by the Partnership, and is more fully described in Note 2. Summary of Significant Accounting Policies Recent Accounting Pronouncements, of the consolidated financial statements:

ASU No. 2011-11, Disclosures about Offsetting Assets and Liabilities.

#### **Item 3.**

### **Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to interest rate risk primarily through our bank credit facilities. We utilize these borrowings to meet our working capital needs.

At March 31, 2013, we had outstanding borrowings totaling \$185.5 million, of which approximately \$61.0 million is subject to variable interest rates under our revolving credit facility. In the event that interest rates associated with this facility were to increase 100 basis points, the after tax impact on future cash flows would be a decrease of \$0.4 million.

We also use derivative financial instruments to manage our exposure to market risk related to changes in

## **Table of Contents**

the current and future market price of home heating oil. The value of market sensitive derivative instruments is subject to change as a result of movements in market prices. Sensitivity analysis is a technique used to evaluate the impact of hypothetical market value changes. Based on a hypothetical ten percent increase in the cost of product at March 31, 2013, the fair market value of these outstanding derivatives would increase by \$9.6 million to a value of \$7.5 million; and conversely a hypothetical ten percent decrease in the cost of product would decrease the fair market value of these outstanding derivatives by \$4.9 million to a negative value of \$(7.0) million.

### **Item 4.**

#### **Controls and Procedures**

##### **a) Evaluation of disclosure controls and procedures.**

The General Partner's principal executive officer and its principal financial officer evaluated the effectiveness of the Partnership's disclosure controls and procedures (as that term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended) as of March 31, 2013. Based on that evaluation, such principal executive officer and principal financial officer concluded that the Partnership's disclosure controls and procedures were effective as of March 31, 2013, at the reasonable level of assurance. For purposes of Rule 13a-15(e), the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Act (15 U.S.C. 78a et seq.) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

##### **b) Change in Internal Control over Financial Reporting.**

No change in the Partnership's internal control over financial reporting occurred during the Partnership's most recent fiscal quarter that has materially affected or is reasonably likely to materially affect the Partnership's internal control over financial reporting.

c) The General Partner and the Partnership believe that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a Partnership have been detected. Therefore, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Our disclosure controls and procedures are designed to provide such reasonable assurances of achieving our desired control objectives, and the principal executive officer and principal financial officer of our general partner have concluded, as of March 31, 2013, that our disclosure controls and procedures were effective in achieving that level of reasonable assurance.

## **PART II OTHER INFORMATION**

### **Item 1**

#### **Legal Proceedings**

In the opinion of management, we are not a party to any litigation, which individually or in the aggregate could reasonably be expected to have a material adverse effect on our results of operations, financial position or liquidity.

## **Table of Contents**

### **Item 1A**

#### **Risk Factors**

In addition to the other information set forth in this Report, investors should carefully review and consider the information regarding certain factors which could materially affect our business, results of operations, financial condition and cash flows set forth below and in Part I Item 1A. Risk Factors in our Fiscal 2012 Form 10-K. We may disclose changes to such factors or disclose additional factors from time to time in our future filings with the SEC.

### **Item 2**

#### **Unregistered Sales of Equity Securities and Use of Proceeds**

See Note 3. to the Consolidated Financial Statements for information concerning the Partnership's repurchase of common units in the six months ended March 31, 2013.
