RUBICON TECHNOLOGY, INC.

(Exact Name of Registrant as Specified in Its Charter)

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

36-4419301
(I.R.S. Employer
Identification No.)

900 East Green Street

Bensenville, Illinois
(Address of Principal Executive Offices)

60106
(Zip Code)

Registrant's Telephone Number, Including Area Code: (847) 295-7000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 6, 2013 the Registrant had 22,658,679 shares of common stock, par value \$0.001 per share, outstanding.

Rubicon Technology, Inc.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2013

1. BASIS OF PRESENTATION

Interim financial data

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete consolidated financial statements and should be read in conjunction with Rubicon Technology, Inc. s (the Company) annual report filed on Form 10-K for the fiscal year ended December 31, 2012. In the opinion of management, all adjustments (consisting only of adjustments of a normal and recurring nature) considered necessary for a fair presentation of the results of operations have been included. Consolidated operating results for the three and nine month periods ended September 30, 2013 are not necessarily indicative of results that may be expected for the year ending December 31, 2013.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Rubicon Worldwide LLC and Rubicon Sapphire Technology (Malaysia) SDN BHD. All intercompany transactions and balances have been eliminated in consolidation.

Foreign currency translation and transactions

Rubicon Worldwide LLC s assets and liabilities are translated into U.S. dollars at exchange rates existing at the respective balance sheet dates and capital accounts at historical exchange rates. The results of operations are translated into U.S. dollars at the average exchange rates during the respective period. Translation adjustments resulting from fluctuations in exchange rates for Rubicon Worldwide LLC are recorded as a separate component of accumulated other comprehensive income (loss) within stockholders equity.

The Company has determined that the functional currency of Rubicon Sapphire Technology (Malaysia) SDN BHD is the U.S. dollar. Rubicon Sapphire Technology (Malaysia) SDN BHD s assets and liabilities are translated into U.S. dollars using the remeasurement method. Non-monetary assets are translated at historical exchange rates and monetary assets are translated at exchange rates existing at the respective balance sheet dates. Translation adjustments for Rubicon Sapphire Technology (Malaysia) SDN BHD are included in determining net income (loss) for the period. The results of operations are translated into U.S. dollars at the average exchange rates during the respective period. The Company records these gains and losses in other income (expense).

Foreign currency transaction gains and losses are generated from the effects of exchange rate changes on transactions denominated in a currency other than the functional currency of the Company, which is the U.S. dollar. Gains and losses on foreign currency transactions are generally required to be recognized in the determination of net income (loss) for the period. The Company records these gains and losses in other income (expense).

Investments

The Company invests available cash primarily in investment grade commercial paper, corporate notes, FDIC guaranteed certificates of deposits, common stock, and government securities. Investments classified as available-for-sale securities are carried at fair market value with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Investments in trading securities are reported at fair value, with both realized and unrealized gains and losses recorded in other income (expense), in the Consolidated Statement of Operations. Investments in which the Company has the ability and intent, if necessary, to liquidate in order to support its current operations, are classified as short-term.

The Company reviews its available-for-sale securities investments at the end of each quarter for other-than-temporary declines in fair value based on the specific identification method. The Company considers various factors in determining whether an impairment is other-than-temporary, including the severity and duration of the impairment, changes in underlying credit ratings, forecasted recovery, its ability

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value and the probability that the scheduled cash payments will continue to be made. When the Company concludes that an other-than-temporary impairment has resulted, the difference between the fair value and carrying value is written off and recorded as a charge on the Consolidated Statement of Operations. As of September 30, 2013, no impairment was recorded.

Table of Contents**Accounts receivable**

The majority of the Company's accounts receivable is due from manufacturers serving the LED and Silicon-on-Sapphire (SoS) industries. Credit is extended based on an evaluation of the customer's financial condition. Accounts receivable are due based on contract terms and at stated amounts due from customers, net of an allowance for doubtful accounts.

Accounts outstanding longer than the contractual payment terms are considered past due. The Company determines its allowance by considering a number of factors, including the length of time past due, the customer's current ability to pay and the condition of the general economy and industry as a whole. The Company writes off accounts receivable when they are deemed uncollectible, and payments subsequently received on such receivables are recorded as a reduction to bad debt expense. The following table shows the activity of the allowance for doubtful accounts:

	September 30, 2013	December 31, 2012
	(in thousands)	
Beginning balance	\$ 286	\$ 378
Charges to costs and expenses	23	(54)
Accounts charged off, less recoveries	(120)	(38)
Ending balance	\$ 189	\$ 286

Inventories

Inventories are valued at the lower of cost or market. Cost is determined using the first-in, first-out method, and includes materials, labor and overhead. The Company reduces the carrying value of its inventories for differences between the cost and the estimated net realizable value, taking into account usage, expected demand, technological obsolescence and other information. The Company had accepted sales orders for smaller diameter core products at prices lower than cost. Based on these sales prices, the Company recorded for the nine months ended September 30, 2013, a lower of cost or market adjustment which reduced inventory and increased cost of goods sold by \$421,000. For the twelve months ended December 31, 2012, the Company recorded a lower of cost or market adjustment which reduced inventory and increased cost of goods sold by \$1.5 million.

Inventories are composed of the following:

	September 30, 2013	December 31, 2012
	(in thousands)	
Raw materials	\$ 19,108	\$ 21,267
Work in progress	17,188	20,787
Finished goods	2,704	5,300
	\$ 39,000	\$ 47,354

The Company establishes inventory reserves when conditions exist that suggest inventory may be in excess of anticipated demand or is obsolete based on customer specifications. The Company evaluates the ability to realize the value of its inventory based on a combination of factors, including forecasted sales, estimated current and future market value and changes in customers' product specifications. For the three and nine months ended September 30, 2013, the Company determined it had inventory that was excess or obsolete and recorded an adjustment which reduced inventory and increased costs of goods sold by \$11,000 and \$266,000, respectively. For the twelve months ended December 31, 2012, the Company recorded an adjustment which reduced inventory and increased costs of goods sold by \$719,000. The Company's method of estimating excess and obsolete inventory has remained consistent for all periods presented.

Property and equipment

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Property and equipment consisted of the following:

	September 30, 2013	December 31, 2012
	(in thousands)	
Land and land improvements	\$ 4,133	\$ 4,133

Information systems	1,070	1,070

Table of Contents

	September 30, 2013	December 31, 2012
	(in thousands)	
Construction in progress	19,819	17,712
Total cost	171,250	165,393
Accumulated depreciation and amortization	(54,134)	(45,543)
Property and equipment, net	\$ 117,116	\$ 119,850

Revenue recognition

Revenues recognized include product sales and billings for costs and fees for government contracts.

Product Sales

The Company recognizes revenue from product sales when earned. Revenue is recognized when, and if, evidence of an arrangement is obtained and the other criteria to support revenue recognition are met, including:

Persuasive evidence of an arrangement exists. The Company requires evidence of a purchase order with the customer specifying the terms and specifications of the product to be delivered, typically in the form of a signed quotation or purchase order from the customer.

Title has passed and the product has been delivered. Title passage and product delivery generally occur when the product is delivered to a common carrier.

The price is fixed or determinable. All terms are fixed in the signed quotation or purchase order received from the customer. The purchase orders do not contain rights of cancellation, return, exchange or refund.

Collection of the resulting receivable is reasonably assured. The Company's standard arrangement with customers includes payment terms. Customers are subject to a credit review process that evaluates each customer's financial position and its ability to pay. Collectability is determined by considering the length of time the customer has been in business and history of collections. If it is determined that collection is not probable, no product is shipped and no revenue is recognized unless cash is received in advance.

Government Contracts

The Company recognizes research and development revenue in the period during which the related costs are incurred over the contractually defined period. In July 2012, the Company signed a contract with the Air Force Research Laboratory to produce large-area sapphire windows on a cost plus fixed fee basis. The Company records research and development revenue on a gross basis as costs are incurred plus a portion of the fixed fee. For the three and nine months ended September 30, 2013, \$882,000 and \$1,091,000 of revenue was recorded, respectively. For the three and nine months ended September 30, 2012, \$422,000 of revenue was recorded. The contract will continue for three years and the total value of the contract is \$4.7 million of which \$2.3 million has been recorded through September 30, 2013.

The Company does not provide maintenance or other services and it does not have sales that involve multiple elements or deliverables.

Net income per common share

Basic net income per common share is computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted net income per common share is computed by dividing net income by the weighted-average number of diluted common shares outstanding during the period. Diluted shares outstanding are calculated by adding to the weighted-average shares any outstanding stock options and warrants based on the treasury stock method.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Diluted net loss per share is the same as basic net loss per share for the nine months ended September 30, 2013 and 2012 because the effects of potentially dilutive securities are anti-dilutive.

At September 30, 2013 and 2012, the Company had the following anti-dilutive securities outstanding which were excluded from the calculation of diluted net loss per share:

	September 30, 2013	September 30, 2012
Warrants	170,518	169,042
Stock options	316,730	356,965
	487,248	526,007

Table of Contents**Accumulated comprehensive income (loss)**

Comprehensive income (loss) is defined as the change in equity of a business enterprise from transactions and other events from non-owner sources. Comprehensive income (loss) includes net earnings (loss) and other non-owner changes in equity that bypass the statement of operations and are reported in a separate component of equity. For the nine months ended September 30, 2013 and for the twelve months ended December 31, 2012, other comprehensive income (loss) includes the unrealized gain (loss) on investments and foreign currency translation adjustments.

The following table summarizes the components of comprehensive income (loss):

	September 30, 2013	December 31, 2012
	(in thousands)	
Unrealized gain (loss) on investments, net of taxes	\$ (235)	\$ 457
Unrealized loss on currency translation	(11)	(10)
Ending Balance	\$ (246)	\$ 447

Recent accounting pronouncement

In July 2013, the FASB issued Accounting Standards Update No. 2013-11 (ASU 2013-11), *Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*. ASU No. 2013-11 clarifies that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. This ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of ASU 2013-11 is not expected to have a material impact on the Company's consolidated financial statements.

3. SEGMENT INFORMATION

The Company evaluates operations as one reportable segment, as it only reports profit and loss information on an aggregate basis to its chief operating decision maker.

Revenue is attributed by geographic region based on ship-to location of the Company's customers. The following table summarizes revenue by geographic region:

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012

Other	29	35
Total Assets	\$ 217,373	\$ 248,096

4. INVESTMENTS

The Company invests available cash primarily in investment grade commercial paper, corporate notes, FDIC guaranteed certificates of deposits, common stock, and government securities. The Company's short-term investments balance of \$14.9 million as of September 30, 2013, is comprised of corporate notes and bonds of \$5.1 million, commercial paper of \$1.0 million, FDIC guaranteed certificates of deposit of \$7.1 million and common stock of \$1.7 million. The Company's investments are classified as available-for-sale securities and are carried at fair market value with unrealized gains and losses recorded in accumulated other comprehensive income (loss).

The following table presents the amortized cost and gross unrealized gains and losses on all securities at September 30, 2013:

	Amortized Cost	Gross	Gross	Fair Value
		Unrealized Gains	Unrealized Losses	
	(in thousands)

Table of Contents

The Company values its investments at fair value, defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard below describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company's fixed income available-for-sale securities consist of high quality, investment grade commercial paper, corporate notes, FDIC guaranteed certificates of deposits, common stock, and government securities. The Company values these securities based on pricing from pricing vendors, who may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value. The valuation techniques used to measure the fair value of the Company's financial instruments having Level 2 inputs were derived from non-binding market consensus prices that are corroborated by observable market data, quoted market prices for similar instruments, or pricing models, such as discounted cash flow techniques.

The following table summarizes the Company's financial assets measured at fair value on a recurring basis as of September 30, 2013:

	Level 1	Level 2	Level 3	Total
	(in thousands)			
Cash Equivalents:				
Money market funds	\$ 16,988	\$	\$	\$ 16,988

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Corporate notes/bonds		4,602		4,602
Commercial paper		6,997		6,997
Total	\$ 14,450	\$ 21,555	\$	\$ 36,005

In addition to the debt securities noted above, the Company had approximately \$4.6 million and \$7.9 million of time deposits included in cash and cash equivalents as of September 30, 2013 and December 31, 2012, respectively.

5. RELATED PARTY TRANSACTIONS

In November 2008, the Company purchased 1,345,444 shares of Peregrine Series D-1 Preferred shares for a total of \$2.0 million, which represented less than 1% of Peregrine's shares outstanding. The terms and stock price of the purchase were the same as for the other investors who participated. Peregrine is a customer of the Company. On August 8, 2012, Peregrine completed its initial public offering, which resulted in a conversion of the preferred shares to common stock at a ratio of 7.34:1, or 183,303 shares of common

Table of Contents

stock. There was a lock out period until February, 2013 during which the Company could not sell these shares. For the three and nine months ended September 30, 2013 the Company recorded an unrealized loss on investments of \$356,000 and \$1.2 million, respectively. For the three and nine months ended September 30, 2013, revenue from Peregrine was \$1.8 million and \$10.5 million, respectively. As of September 30, 2013 and December 31, 2012, accounts receivable from Peregrine were \$250,000 and \$1.7 million, respectively. The pricing terms and conditions of the sales to Peregrine are similar to those available to the Company's other non-related customers.

6. SIGNIFICANT CUSTOMERS

For the three months ended September 30, 2013, the Company had three customers individually that accounted for approximately 23%, 17% and 10% of revenue, respectively, and for the three months ended September 30, 2012, the Company had two customers individually that accounted for approximately 44% and 35% of revenue, respectively. For the nine months ended September 30, 2013, the Company had two customers individually that accounted for approximately 35% and 13% of revenue, respectively, and for the nine months ended September 30, 2012, the Company had two customers individually that accounted for approximately 44% and 20% of revenue, respectively.

Customers individually representing more than 10% of trade receivables accounted for approximately 74% and 93% of accounts receivable as of September 30, 2013 and December 31, 2012, respectively. The Company grants credit to customers based on an evaluation of their financial condition. Losses from credit sales are provided for in the financial statements.

7. STOCKHOLDERS EQUITY

Common Stock

As of September 30, 2013, the Company had reserved 1,924,381 shares of common stock for issuance upon the exercise of outstanding common stock options. Also, 2,334,782 shares of the Company's common stock were reserved for future grants of stock options (or other similar equity instruments) under the Company's 2007 Stock Incentive Plan (the 2007 Plan) as of September 30, 2013. In addition, 267,826 shares of the Company's common stock were reserved for future exercise of outstanding warrants as of September 30, 2013.

Warrants

For the nine months ended September 30, 2013, no common stock warrants were exercised. At September 30, 2013 and December 31, 2012, there were 267,826 common stock warrants outstanding.

Treasury Stock

On August 4, 2011, the Company authorized a stock repurchase program to purchase up to \$25.0 million of its common stock over a period of two years. The stock repurchase program authorized the Company to repurchase its shares of common stock in the open market at times and prices considered appropriate by the Company depending upon prevailing market conditions and other corporate considerations. The treasury shares are accounted for using the cost method whereby the entire cost of the acquired stock is recorded as treasury stock. During the nine months ended, the Company did not repurchase any shares and the plan expired.

8. STOCK INCENTIVE PLANS

The Company sponsored a stock option plan, the 2001 Plan, which allowed for the granting of incentive and nonqualified stock options for the purchase of common stock. The maximum number of shares that may be awarded or sold under the 2001 Plan was 1,449,667 shares. Each option entitles the holder to purchase one share of common stock at the specified option exercise price. The exercise price of each incentive stock option granted must not be less than the fair market value on the grant date. At the discretion of management and with the approval of the Board of Directors, the Company granted options under the 2001 Plan. Management and the Board of Directors determined vesting periods and expiration dates at the time of the grant. On August 2, 2011, the plan expired.

In August 2007, the Company adopted the 2007 Plan, which allows for the grant of incentive stock options, non-statutory stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards and bonus shares. The Board of Directors has appointed a committee to administer the plan. The plan committee determines the type of award to be granted, the fair market value, the number of shares covered by the award, and the time when the award vests and may be exercised.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

The Company uses the Black-Scholes option pricing model to value stock options issued after January 1, 2006. The Company uses historical stock prices of companies that it considers as a peer group as the basis for its volatility assumptions. The assumed risk-free rates were based on U.S. Treasury rates in effect at the time of grant with a term consistent with the expected option lives. The expected term is based upon the vesting term of the Company's options, a review of a peer group of companies, and expected exercise behavior. The forfeiture rate is based on past history of forfeited options. The expense is being allocated using the straight-line method. For the three and nine months ended September 30, 2013, the Company recorded \$348,000 and \$1.0 million, respectively, of stock compensation expense. For the three and nine months ended September 30, 2012, the Company recorded \$455,000 and \$1.4 million, respectively, of stock compensation expense. As of

Table of Contents

September 30, 2013, the Company has \$1.9 million of total unrecognized compensation cost related to non-vested awards granted under the Company's stock-based plans that it expects to recognize over a weighted-average period of 2.04 years. The Company accounts for options issued prior to January 1, 2006 under the intrinsic value method.

The following table summarizes the activity of the stock incentive and equity plans as of September 30, 2013 and changes during the nine months then ended:

	Shares available for grant	Number of options outstanding	Weighted-average option exercise price	Number of restricted stock and board shares issued
At December 31, 2012	2,200,604	2,117,110	\$ 13.32	59,932
Granted	(109,472)	82,815	7.79	26,657
Exercised		(27,931)	5.02	
Cancelled/forfeited	243,650	(247,613)	18.40	
At September 30, 2013	2,334,782	1,924,381	\$ 12.50	86,589

The Company's aggregate intrinsic value is calculated as the difference between the exercise price of the underlying stock options and the fair value of the Company's common stock. Based on the fair market value of the common stock at September 30, 2013 and 2012, there was no intrinsic value for options outstanding. The weighted average fair value per share of options granted for the nine months ended September 30, 2013 was \$7.79 and the fair value of each option grant was estimated at the date of grant using the Black-Scholes option pricing model using an expected term of 5.3 years, risk-free interest rates of 0.76%-1.39%, expected volatility of 52% and no dividend yield. The Company used an expected forfeiture rate of 19.18%.

For the three and nine months ended September 30, 2013, the Company recorded \$134,000 and \$215,000, respectively, of stock compensation expense related to restricted stock. For the three and nine months ended September 30, 2012, the Company recorded \$41,000 and \$122,000, respectively, of stock compensation expense related to restricted stock.

A summary of the Company's non-vested options during the nine month period ended September 30, 2013 is presented below:

	Options	Weighted-average exercise price
Non-vested at January 1, 2013	821,002	\$ 15.24
Granted	82,815	7.79
Vested	(249,787)	10.69
Forfeited	(205,500)	18.70
Non-vested at September 30, 2013	448,530	\$ 14.82

An analysis of restricted stock issued is as follows:

Non-vested restricted stock as of December 31, 2012	4,336
Granted	26,657
Vested	(17,665)

9. COMMITMENTS AND CONTINGENCIES

Purchase Commitments

The Company has entered into agreements to purchase equipment and components to construct furnaces and to enhance the Company's polishing platform and equipment to produce patterned polished sapphire substrates. These agreements will result in the Company purchasing equipment or components for a total cost of approximately \$2.4 million with deliveries occurring through the remainder of 2013.

Table of Contents

Litigation

From time to time, the Company experiences routine litigation in the normal course of its business. The management of the Company does not believe any pending litigation will have a material adverse effect on the financial condition or results of operations of the Company.

10. INCOME TAXES

The Company is subject to income taxes in the U.S. and Malaysia. On a quarterly basis, the Company assesses the recoverability of deferred tax assets and the need for a valuation allowance. Such evaluations involve the application of significant judgment and multiple factors, both positive and negative, are considered. For the period ended September 30, 2013, a valuation allowance has not been included in the 2013 forecasted effective tax rate. Based on future results, if the Company were to conclude that the deferred tax assets are not more likely than not recoverable, a valuation allowance would be recorded to reduce the deferred tax assets reported value to the amount that is more likely than not recoverable. There would be a significant impact on the forecasted effective tax rate for the year as a whole and the quarterly effective tax rate in the quarter that the valuation allowance is established. The tax provision for the three and nine months ended September 30, 2013 is based on an estimated effective tax rate which requires the Company to make its best estimate of annual pretax income. For the three and nine months ended September 30, 2013, the Company recorded a tax benefit of \$4.0 million and \$11.3 million, respectively, for an effective tax rate of 40.1% and 42.8%, respectively. The Company recorded for the three and nine months ended September 30, 2012 a tax benefit of \$1.1 million and \$6.1 million, respectively. The 2012 tax benefit relates to 2012 and several previous tax years including \$424,000 in income tax benefits related to recording unrecognized state tax credits from previous tax years. For the three and nine months ended September 30, 2013, the difference between the Company's effective tax rate and the U.S. federal 35% statutory rate was primarily related to profits recorded in the Company's Malaysia operation for which the Company has a tax holiday, state tax benefit and a provision to tax return adjustment.

11. CREDIT FACILITY

On January 2, 2013, the Company entered into a three-year term agreement with a bank to provide the Company with a senior secured credit facility of \$25.0 million. The agreement provides for the Company to borrow up to 80% of eligible accounts receivable and up to 35% of domestically held raw material and finished goods inventory. Advances against inventory are limited to 40% of the aggregate outstanding on the revolving line of credit and \$10.0 million in aggregate. The Company has the option to borrow at an interest rate of LIBOR plus 2.75% or the Wall Street Journal prime rate plus 0.50%. If the Company maintains liquidity of \$20.0 million or greater with the lending institution, then the borrowing interest rate options are LIBOR plus 2.25% or the Wall Street Journal prime rate. There is an unused revolving line facility fee of 0.375% per annum. The facility is secured by a first priority interest in substantially all of the Company's personal property, excluding intellectual property. The Company is required to maintain an adjusted quick ratio of 1.40 to 1.00, maintain operating and other deposit accounts with the bank or bank's affiliates of 25% of the Company's total worldwide cash, securities and investments, and the Company can pay dividends or repurchase capital stock only with the bank's consent during the three year term. For the nine months ended September 30, 2013, the Company did not draw on this facility. For the three and nine months ended September 30, 2013, the Company recorded \$24,000 and \$71,000, respectively of interest expense charged on the unused portion of the facility.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

All statements, other than statements of historical facts, included in this Quarterly Report on Form 10-Q regarding our estimates, expectations, beliefs, intentions, projections or strategies for the future, results of operations, financial position, net sales, projected costs, prospects and plans and objectives of management for future operations may be forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. We have based these forward-looking statements on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives and financial needs. These forward looking statements can be identified by the use of terms and phrases such as believe, plan, intend, anticipate, target, estimate, expect, and the like, and/or future-tense or conditional constructions such as will, may, could, or the negative thereof). Items contemplating or making assumptions about actual or potential future sales, market size and trends or operating results also constitute forward-looking statements.

Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. Before investing in our common stock, investors should be aware that the occurrence of the risks, uncertainties and events described in the section entitled Risk Factors in our Annual Report on Form 10-K and elsewhere in this Quarterly Report could have a material adverse effect on our business, results of operations and financial condition.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, forward-looking statements are inherently subject to known and unknown business, economic and other risks and uncertainties that may cause actual results to be materially different from those discussed in these forward-looking statements. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report. We assume no obligation to update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this Quarterly Report, other than as may be required by applicable law or regulation. If one or more of these risks or uncertainties materialize, or if the underlying assumptions prove incorrect, our actual results may vary materially from those expected or projected.

You should read this Quarterly Report, the documents that we reference in this Quarterly Report and have filed with the SEC as exhibits and our Annual Report on Form 10-K for the year ended December 31, 2012 with the understanding that our actual future results, levels of activity, performance and events and circumstances may be materially different from what we expect.

Unless otherwise indicated, the terms Rubicon, the Company, we, us, and our refer to Rubicon Technology, Inc.

OVERVIEW

We are a vertically integrated advanced electronic materials provider specializing in monocrystalline sapphire for applications in light-emitting diodes (LEDs), optical systems and specialty electronic devices. The emergence of sapphire in commercial volumes at competitive prices has enabled the development of new technologies such as high brightness (HB) white, blue and green LEDs and highly-integrated RFICs. Recently, sapphire has been adopted for use in several new applications in mobile devices specifically for the camera lens covers, dual flashes and home buttons on certain newer model smart phones. The reason sapphire was adopted for use on the home button on certain smart phones is because of the scratch resistance of sapphire, which is important to ensure the effectiveness of the fingerprint recognition security built into the device. We believe that the use of biometrics could become more prevalent in the future, which could become a strong growth driver for sapphire. We apply our proprietary crystal growth technology to produce high-quality sapphire products efficiently to supply our end-markets, and we work closely with our customers to meet their quality and delivery needs.

We are a vertically-integrated manufacturer of high-quality sapphire substrates and optical windows that are used in a variety of high-growth, high-volume end-market applications. Our largest product lines include two to six-inch sapphire cores and wafers for use in LED applications and windows and lenses, especially for mobile devices, and six-inch sapphire wafers that are used for Silicon-on-Sapphire (SoS) RFICs. However, the manufacturer of the majority of SoS chips will be introducing new products that will be produced on a substrate other than sapphire which will likely significantly reduce the amount of sapphire demand from that market beginning in early 2014. For the LED market, we sell two-inch to four-inch material primarily in core form and six and eight-inch material primarily in polished wafer form. Additionally, we sell products for aerospace, sensor and other applications. Eight-inch wafers are sold primarily for research and development efforts at this time. We have also extended our technology, which gives us the ability to produce cores and wafers of up to twelve inches in diameter to support production of chips for next-generation LED and other electronic applications. In addition, we have developed the ability to produce large diameter circular and rectangular sapphire windows for use in various optical window applications. We have recently introduced a new product offering, patterned sapphire substrates or PSS . LED chip manufacturers etch a pattern onto the surface of the sapphire wafer in the early stages of their production process in order to improve light output. We are leveraging our capability in producing larger diameter sapphire wafers to offer pre-patterned, larger diameter (four-inch and six-inch) wafers to the LED market.

Table of Contents

Our revenue consists of sales of sapphire materials sold in core and polished wafer forms in two, three, four, six and eight-inch diameters as well as optical materials sold as blanks or polished windows. Products are made to varying specifications, such as crystal planar orientations and thicknesses. We recognize research and development revenue in the period during which the related costs and fees are incurred.

Historically, a significant portion of our revenue has been derived from sales to relatively few customers. For the three months ended September 30, 2013, we had three customers that in aggregate accounted for approximately 50% of our revenue and for the three months ended September 30, 2012, we had two customers that in aggregate accounted for approximately 79% of our revenue. For the nine months ended September 30, 2013, we had two customers that in aggregate accounted for approximately 48% of our revenue and for the nine months ended September 30, 2012, we had two customers that in aggregate accounted for approximately 64% of our revenue. Other than as discussed above, none of our customers accounted for more than 10% of our revenue for such periods. Although we are continuing to diversify and expand our customer base, we expect our revenue to continue to be concentrated among a small number of customers. We expect that our significant customers may change from period to period.

We recognize revenue upon shipment to our customers and from our government contract as costs and fees are incurred. We derive a significant portion of our revenue from customers outside of the U.S. In most periods, the majority of our sales are to the Asian market and we expect that region to continue to be a major source of revenue for us. All of our revenue is denominated in U.S. dollars.

We manufacture and ship our products from our facilities in the Chicago metropolitan area and from our facility in Penang, Malaysia. We have an aggregate of approximately 237,000 square feet of manufacturing and office space in Batavia, Franklin Park and Bensenville, Illinois and a 65,000 square foot facility in Penang, Malaysia, where we process sapphire grown by us in our Illinois facilities into finished cores and wafers. Our Malaysia facility currently finishes the majority of our core processing and can produce production volumes of polished wafers. In March 2012, we acquired additional land in Batavia, Illinois to expand our crystal growth capacity. We have not yet determined when we will begin construction on this facility.

Our cost of goods sold consists primarily of manufacturing materials, labor, manufacturing-related overhead such as utilities, depreciation and rent, provisions for excess and obsolete inventory reserves, freight and warranties. We manufacture our products at our Illinois and Malaysia manufacturing facilities based on customer orders. We purchase materials and supplies to support such current and expected future demand. We are subject to variations in the cost of raw materials and consumables from period to period because we do not have long-term fixed-price agreements with most of our suppliers.

Our operating expenses are comprised of sales and marketing, research and development (R&D), and general and administrative (G&A) expenses. G&A expenses consist primarily of salaries and associated costs for employees in finance, human resources, information technology and administrative activities, charges for accounting, legal, and insurance fees, and stock-based compensation. The majority of our stock-based compensation relates to administrative personnel and is accounted for as a G&A expense.

Other income (expense) consists of interest income, interest expense and realized gains and losses on investments and currency translation.

We account for income taxes under the asset and liability method whereby the expected future tax consequences of temporary differences between the book value and the tax basis of assets and liabilities are recognized as deferred tax assets and liabilities, using enacted tax rates in effect for the year in which the differences are expected to be recognized. The Illinois State Legislature has suspended the use of NOLs for taxable years ending after December 31, 2010 and before December 31, 2011, and has limited the net operating loss deduction to \$100,000 for the years ending December 31, 2012 through December 31, 2013. Our effective tax rate could fluctuate significantly on a quarterly basis and could be adversely affected to the extent earnings are lower than anticipated. Our effective tax rate could also fluctuate due to changes in the valuation of our deferred tax assets or liabilities, or by changes in tax laws, regulations, or accounting principles, as well as certain discrete items.

We anticipate our capital expenditures will be between \$10.0 million to \$12.0 million for the full year 2013. These expenditures will be primarily focused on investments in equipment to produce patterned sapphire substrates and to enhance our polishing platform. Our capital expenditures in the nine months ended September 30, 2013 were \$7.3 million.

Table of Contents**RESULTS OF CONSOLIDATED OPERATIONS THREE MONTHS ENDED SEPTEMBER 30, 2013 AND 2012**

The following table sets forth our consolidated statements of operations for the periods indicated:

	Three months ended September 30,	
	2013	2012
	(in millions)	
Revenue	\$ 11.1	\$ 19.9
Cost of goods sold	17.4	17.5
Gross (loss) profit	(6.3)	2.4
Operating expenses:		
General and administrative	2.2	2.5
Sales and marketing	0.4	0.4
Research and development	0.6	0.6
Net loss on disposal of assets	0.1	
Total operating expenses	3.3	3.5
Loss from operations	(9.6)	(1.1)
Other (expense) income	(0.2)	0.3
Loss before income taxes	(9.8)	(0.8)
Income tax benefit	4.0	1.1
Net (loss) income	\$ (5.8)	\$ 0.3

The following table sets forth our consolidated statements of operations as a percentage of revenue for the periods indicated:

	Three months ended September 30,	
	2013	2012
	(percentage of total)	
Revenue	100%	100%
Cost of goods sold	157	88
Gross (loss) profit	(57)	12
Operating expenses:		
General and administrative	20	13
Sales and marketing	3	2
Research and development	5	3
Net loss on disposal of assets	1	
Total operating expenses	29	18
Loss from operations	(86)	(6)
Other (expense) income	(2)	2

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Loss before income taxes	(88)	(4)
Income tax benefit	36	6
Net (loss) income	(52)%	2%

Revenue. Revenue was \$11.1 million and \$19.9 million for the three months ended September 30, 2013 and 2012, respectively, a decrease of \$8.8 million. We experienced lower revenue from sales of our polished wafers by \$14.5 million, which was the result of \$6.8 million lower sales of polished wafers sold to the SoS market as well as \$7.7 million decrease in polished wafers sold to the LED market. Of the \$14.5 million reduction in revenue, \$528,000 was attributable to lower prices and \$14.0 million was attributed to lower volume. We also had lower revenue of \$518,000 from optical products due to a slight decrease in the sales of sapphire for sensor and instrumentation applications. Revenue from the sale of sapphire cores, which are sold in the LED market, for the three months ended September 30, 2013 increased by \$5.8 million, of which \$6.6 million was attributed to an increase in volume partially offset by lower pricing of \$849,000. Demand for our core products has been increasing throughout 2013 with stronger demand from the LED general lighting market and the adoption of sapphire in newer applications like the lens cover, dual flash and home button on certain smart phones. As a result, pricing has been increasing for our core products. We expect pricing for sapphire cores to continue to increase as excess sapphire capacity in the market continues to be absorbed by growing demand from the LED and other markets. However, we believe six-inch polished wafer prices may decline further in the near-term. We have continued to experience limited demand for LED polished wafers but expect increased adoption of six-inch wafers in the LED market. The manufacturer of the majority of SoS chips will be introducing new products that will be produced on a substrate other than sapphire starting early next year, therefore, the amount of sapphire wafers sold into that market will be significantly reduced beginning in early 2014. We operate in an extremely volatile market, so the amount of price or volume change is difficult to predict.

Table of Contents

Gross (loss) profit. Gross loss was \$6.3 million for the three months ended September 30, 2013 compared to a gross profit of \$2.4 million for the three months ended September 30, 2012, a decrease of \$8.7 million. For the three months ended September 30, 2013, due to the lower demand, we were not operating at capacity and recorded as an expense \$3.9 million of costs associated with the under-utilization of equipment and staff. The decrease in gross margin is also attributable to pricing for our core products at below cost and lower sales volumes of our higher margin wafer products. While pricing for core products has been increasing this year, average prices for those products for the three months ended September 30, 2013 were lower than the three months ended September 30, 2012.

General and administrative expenses. G&A expenses were \$2.2 million and \$2.5 million for the three months ended September 30, 2013 and 2012, respectively, a decrease of \$393,000. The decrease was primarily due to \$305,000 from lower bad debt expense, partially attributable to a lower general reserve on a lower overall receivables balance, and partially due to having specific reserves for certain key customers recorded in 2012 not incurred in 2013. We also had lower bonus, stock compensation and travel expense of \$54,000 and lower consulting fees of \$26,000.

Sales and marketing expenses. Sales and marketing expenses were \$370,000 and \$417,000 for the three months ended September 30, 2013 and 2012, respectively, a decrease of \$47,000. The decrease in sales and marketing expenses is primarily attributable to a decrease in employee compensation costs, including salary and employee stock options expense of \$92,000 partially offset by an increase in costs for marketing services and exhibitions of \$34,000.

Research and development expenses. R&D expenses were \$641,000 and \$639,000 for the three months ended September 30, 2013 and 2012, respectively, an increase of \$2,000. We experienced lower employee compensation costs, including salary of stock options expense of \$67,000 and a decrease in spending on travel of \$25,000 offset by an increase in spending on R&D projects of \$93,000.

Other income (expense). Other expense was \$219,000 and other income was \$297,000 for the three months ended September 30, 2013 and 2012, respectively, an increase in other expense of \$516,000. The increase was primarily due to an increase in the realized loss on foreign currency translation of \$485,000 and an increase in interest expense of \$24,000.

Income tax benefits. Income tax benefits were \$4.0 million and \$1.1 million for the three months ended September 30, 2013 and 2012, respectively, an increase of \$2.9 million. For the three months ended September 30, 2013, the difference between the our effective tax rate and the U.S. federal statutory rate of 35% was primarily related to profits recorded in the our Malaysia operation for which we have a tax holiday, state tax benefit, a provision to tax return adjustment and the accrual for an uncertain tax position. The tax provision is based on an estimated annual effective rate which requires us to make our best estimate of annual pretax income. Based on our review of these factors for the three months ended September 30, 2013, we did not include a valuation allowance in the 2013 forecasted effective tax rate. If based on future results and reviews of these factors we were to conclude that the deferred tax assets are not more likely than not recoverable and a valuation allowance is necessary, there would be a significant impact on the forecasted effective tax rate for the year as a whole and the quarterly effective tax rate in the quarter that it is established. To the extent this pretax income varies from estimates made at the end of the most recent interim period, the actual tax provision recognized in 2013 could be different than the forecasted amount used to estimate the tax provision for the three months ended September 30, 2013.

RESULTS OF CONSOLIDATED OPERATIONS NINE MONTHS ENDED SEPTEMBER 30, 2013 AND 2012

The following table sets forth our consolidated statements of operations for the periods indicated:

	Nine months ended September 30, 2013 2012 (in millions)	
Revenue	\$ 30.0	\$ 47.2
Cost of goods sold	46.1	48.1
Gross loss	(16.1)	(0.9)
Operating expenses:		
General and administrative	6.6	6.9
Sales and marketing	1.1	1.4
Research and development	1.5	1.7

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Net loss on disposal of assets	0.6	
Total operating expenses	9.8	10.0
Loss from operations	(25.9)	(10.9)
Other (expense) income	(0.5)	0.4
Loss before income taxes	(26.4)	(10.5)
Income tax benefit	11.3	6.1
Net loss	\$ (15.1)	\$ (4.4)

Table of Contents

The following table sets forth our consolidated statements of operations as a percentage of revenue for the periods indicated:

	Nine months ended September 30,	
	2013	2012
	(percentage of total)	
Revenue	100%	100%
Cost of goods sold	154	102
Gross loss	(54)	(2)
Operating expenses:		
General and administrative	22	15
Sales and marketing	4	3
Research and development	5	3
Net loss on disposal of assets	1	
Total operating expenses	32	21
Loss from operations	(86)	(23)
Other (expense) income	(2)	1
Loss before income taxes	(88)	(22)
Income tax benefit	38	13
Net loss	(50)%	(9)%

Revenue. Revenue was \$30.0 million and \$47.2 million for the nine months ended September 30, 2013 and 2012, respectively, a decrease of \$17.2 million. We experienced lower revenue from sales of our polished wafers by \$21.3 million, which was the result of \$10.2 million lower sales of polished wafers sold to the SoS market as well as \$11.1 million decrease in polished wafers sold to the LED market. Of the \$21.3 million reduction in revenue, \$1.0 was attributable to lower prices and \$20.3 million was attributed to lower volume. Revenue from the sale of sapphire cores for the nine months ended September 30, 2013 increased by \$4.7 million, of which \$7.9 million was attributed to an increase in volume partially offset by decreased pricing of \$3.2 million. Demand for our core products has been increasing throughout 2013 with stronger demand from the LED general lighting market and the adoption of sapphire in newer applications like the lens cover, dual flash and home button on certain smart phones. As a result, pricing has been increasing for our core products. We also had lower revenue of \$1.2 million from optical products due to a slight decrease in the sales of sapphire for sensor and instrumentation applications, partially offset by an increase in revenue from R&D of \$644,000. We expect pricing for sapphire cores to continue to increase as excess sapphire capacity in the market is absorbed by growing demand from the LED and other markets. However, we believe six-inch polished wafer prices may decline further in the near-term. We have continued to experience limited demand for LED polished wafers, but expect increased adoption of six-inch wafers in the LED market. The manufacturer of the majority of SoS chips will be introducing new products that will be produced on a substrate other than sapphire starting early next year, therefore, the amount of sapphire wafers sold into that market will be significantly reduced beginning in early 2014. We operate in an extremely volatile market, so the amount of price or volume change is difficult to predict.

Gross loss. Gross loss was \$16.1 million and \$952,000 for the nine months ended September 30, 2013 and 2012, respectively, an increase of \$15.2 million. For the nine months ended September 30, 2013, due to the lower demand, we were not operating at capacity and recorded as an expense \$9.9 million of costs associated with the under-utilization of equipment and staff. The decrease in gross margin is also attributable to lower pricing for our core products and lower sales volumes of our higher margin wafer products. While pricing for core products has been increasing this year, average prices for those products for the nine months ended September 30, 2013 were lower than the nine months ended September 30, 2012.

General and administrative expenses. G&A expenses were \$6.6 million and \$6.9 million for the nine months ended September 30, 2013 and 2012, respectively, a decrease of \$338,000. We experienced a decrease in employee compensation costs of \$381,000, including salary and stock based compensation expense, \$143,000 in lower consulting expense and \$79,000 in lower travel expenses. The decreases were partially offset by an increase in professional fees of \$217,000 and an increase in financing fees of \$65,000.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Sales and marketing expenses. Sales and marketing expenses were \$1.1 million and \$1.4 million for the nine months ended September 30, 2013 and 2012, respectively, a decrease of \$213,000. The decrease in sales and marketing expenses is attributable to decreased employee compensation costs, including salary and employee stock options expense of \$147,000, and lower marketing services, exhibitions and travel expense of \$71,000.

Table of Contents

Research and development expenses. R&D expenses were \$1.5 million and \$1.7 million for the nine months ended September 30, 2013 and 2012, respectively, a decrease of \$194,000. The decrease is primarily attributable to a decrease in employee compensation costs of \$165,000 and a decrease in spending on various projects of \$28,000.

Other income (expense). Other expense was \$546,000 for the nine months ended September 30, 2013 compared to other income of \$384,000 for the nine months ended September 30, 2012, an increase in other expense of \$930,000. The increase was primarily due to an increase in the realized loss on foreign currency translation of \$822,000 and an increase in interest expense of \$71,000.

Income tax benefits. Income tax benefits were \$11.3 million and \$6.1 million for the nine months ended September 30, 2013 and 2012, respectively, an increase of \$5.2 million. The difference between our effective tax rate and the U.S. federal statutory rate of 35% was primarily related to profits recorded in the our Malaysia operation for which we have a tax holiday, state tax benefit, and a provision to tax return adjustment. The tax provision is based on an estimated annual effective rate which requires us to make our best estimate of annual pretax income. Based on our review of these factors for the nine months ended September 30, 2013, we did not include a valuation allowance in the 2013 forecasted effective tax rate. If based on future results and reviews of these factors we were to conclude that the deferred tax assets are not more likely than not recoverable and a valuation allowance is necessary, there would be a significant impact on the forecasted effective tax rate for the year as a whole and the quarterly effective tax rate in the quarter that it is established. To the extent this pretax income varies from estimates made at the end of the most recent interim period, the actual tax provision recognized in 2013 could be different than the forecasted amount used to estimate the tax provision for the three months ended September 30, 2013.

LIQUIDITY AND CAPITAL RESOURCES

We have historically funded our operations using a combination of issuances of common stock and cash generated from our operations.

As of September 30, 2013, we had cash and short term investments totaling \$36.5 million, including cash of \$4.6 million held in deposits at major banks, \$17.0 million invested in money market funds and \$14.9 million invested in commercial paper, corporate notes and bonds, FDIC guaranteed certificates of deposits and common stock.

Cash flows from operating activities

The following table represents the major components of our cash flows from operating activities for the nine months ended September 30, 2013 and 2012:

	Nine months ended September 30, 2013 2012 (in millions)	
Net loss	\$ (15.1)	\$ (4.4)
Non-cash items:		
Depreciation and amortization	9.3	8.9
Stock based compensation and other, net	1.8	1.5
Deferred taxes	(11.3)	(5.6)
Total non-cash items:	(0.2)	4.8
Working capital:		
Accounts receivable	8.2	20.2
Inventories	7.8	(22.7)
Prepaid expenses and other assets	5.1	3.7
Accounts payable	(4.0)	(5.2)
Other accruals	(1.7)	(0.6)
Total working capital items:	15.4	(4.6)

Net cash provided by (used in) operating activities

\$ 0.1

\$ (4.2)

Table of Contents

Cash provided by operating activities was \$107,000 for the nine months ended September 30, 2013. During such period, we generated a net loss of \$15.1 million, including non-cash items of \$161,000, and net working capital change of \$15.4 million. The net working capital change was comprised of a decrease in accounts receivable of \$8.2 million due to collections from customers and an increase in prepay customers, a decrease in inventory of \$7.8 million primarily due to a decrease in sapphire boule inventory, a decrease in accounts payable of \$4.0 million due to timing of payments and a decrease in prepaid expenses and other assets of \$5.1 million due to a decrease in the purchase of furnace construction and replacement parts and items used in the polishing of wafers.

Cash used in operating activities was \$4.2 million for the nine months ended September 30, 2012. During such period, we generated a net loss of \$4.4 million, incurred non-cash expenses of \$4.8 million, and net working capital change of (\$4.6) million. The net working capital change was comprised of a decrease in accounts receivable of \$20.2 million due to collections from several customers and an overall decrease in accounts receivables balance on lower revenues, an increase in inventory of \$22.7 million primarily due to an increase in our stock of raw materials and sapphire boules, a decrease in accounts payable of \$5.2 million due to timing of payments and a decrease in prepaid expenses and other assets of \$3.7 million due to a decrease in the purchase of furnace construction and replacement parts and items used in the polishing of wafers.

Cash flows from investing activities

The following table represents the major components of our cash flows from investing activities for the nine months ended September 30, 2013 and 2012:

	Nine months ended September 30, 2013 2012 (in millions)	
Purchases of property and equipment:		
Machinery & equipment for crystal growth	\$ (1.0)	\$ (4.3)
Land and building improvements		(2.7)
Increase capacity in other areas	(6.3)	(2.4)
Proceeds from disposal of assets	0.1	
Total purchases of property and equipment, net of proceeds from disposal of assets:	(7.2)	(9.4)
Proceeds from sales of investments, net of purchases	8.3	17.1
Net cash provided by investing activities	\$ 1.1	\$ 7.7

Net cash provided by investing activities was \$1.1 million for the nine months ended September 30, 2013. During the nine months ended September 30, 2013, we used approximately \$7.2 million on the net purchase of equipment. This was offset by the net proceeds from the sale of investments of \$8.3 million.

Net cash provided by investing activities was \$7.7 million for the nine months ended September 30, 2012. During the nine months ended September 30, 2012, we used approximately \$9.4 million on the purchase of land and equipment. This was offset by the net proceeds from the sale of investments of \$17.1 million.

We have purchased land to construct a second crystal growth facility in Batavia, Illinois, but we have not yet determined when construction will begin. We anticipate spending on capital expenditures in 2013 to be between \$10.0 million to \$12.0 million and will primarily be focused on investments in equipment to produce patterned sapphire substrates and to enhance our polishing platform.

Cash flows from financing activities

Net cash provided by financing activities was \$146,000 and \$30,000 for the nine months ended September 30, 2013 and 2012, respectively. Net cash provided by financing activities for the nine months ended September 30, 2013 represents \$140,000 in net proceeds from the exercise of stock options and \$6,000 from a decrease in restricted cash. Net cash used in financing activities for the nine months ended September 30, 2012 represents \$12,000 in net proceeds from the exercise of stock options and \$18,000 from a decrease in restricted cash.

Table of Contents

Future liquidity requirements

We believe that our existing cash, cash equivalents, investments and anticipated cash flows from operating activities will be sufficient to meet our anticipated cash needs for at least the next twelve months. In addition, on January 2, 2013, we signed an agreement with a bank to provide us with a \$25.0 million senior secured credit facility. This facility provides us with additional operating cash flow flexibility. Our cash needs include cash required to fund our operations, the capital needed to fund our planned expansion in the U.S. and Asia and investments in new product development. If the assumptions underlying our business plan regarding future revenues and expenses change, or if unexpected opportunities or needs arise, we may seek to raise additional cash by selling equity or convertible debt securities. If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership of our stockholders could be significantly diluted, and these newly-issued securities may have rights, preferences or privileges senior to those of existing stockholders. If we obtain additional debt financing or draw on our credit facility a substantial portion of our operating cash flow may be dedicated to the payment of principal and interest on such indebtedness, and the terms of the debt securities issued could impose significant restrictions on our operations. If we are unable to obtain financing on terms favorable to us, we may be unable to successfully execute our business plan.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We consider to be critical those accounting policies that require our most subjective or complex judgments, which often result from a need to make estimates about the effect of matters that are inherently uncertain, and that are among the most important of our accounting policies in the portrayal of our financial condition and results of operations. We believe the following to be our critical accounting policies, including the more significant estimates and assumptions used in preparation of our financial statements.

Foreign currency translation and transaction

Rubicon Worldwide LLC's assets and liabilities are translated into U.S. dollars at exchange rates existing at the respective balance sheet dates and capital accounts at historical exchange rates. The results of operations are translated into U.S. dollars at the average exchange rates during the respective period. Translation adjustments resulting from fluctuations in exchange rates for Rubicon Worldwide LLC are recorded as a separate component of accumulated other comprehensive income (loss) within stockholders' equity.

We have determined that the functional currency of Rubicon Sapphire Technology (Malaysia) SDN BHD is the U.S. dollar. Rubicon Sapphire Technology (Malaysia) SDN BHD's assets and liabilities are translated into U.S. dollars using the remeasurement method. Non-monetary assets are translated at historical exchange rates and monetary assets are translated at exchange rates existing at the respective balance sheet dates. Translation adjustments for Rubicon Sapphire Technology (Malaysia) SDN BHD are included in determining net income (loss) for the period. The results of operations are translated into U.S. dollars at the average exchange rates during the respective period. We record these gains and losses in other income (expense).

Foreign currency transaction gains and losses are generated from the effects of exchange rate changes on transactions denominated in a currency other than our functional currency, which is the U.S. dollar. Gains and losses on foreign currency transactions are generally required to be recognized in the determination of net income (loss) for the period. We record these gains and losses in other income (expense).

Revenue recognition

We recognize revenue from sales of products and billings for costs and fees from government contracts. We recognize revenue from sales of products when:

Persuasive evidence of an arrangement exists. We require evidence of a purchase order with the customer specifying the terms and specifications of the product to be delivered, typically in the form of a signed quotation or purchase order from the customer.

Title has passed and the product has been delivered. Title passage and product delivery generally occurs when the product is delivered to a common carrier.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

The price is fixed or determinable. All terms are fixed in the signed quotation or purchase order received from the customer. The purchase orders do not contain rights of cancellation, return, exchanges or refunds.

Collection of the resulting receivable is reasonably assured. Our standard arrangement with customers includes payment terms. Customers are subject to a credit review process that evaluates each customer's financial position and its ability to pay. We determine collectability by considering the length of time the customer has been in business and our history of collections with that customer. If we determine that collection is not probable, no product is shipped and no revenue is recognized unless cash is received in advance.

In July 2012, we signed a contract with the Air Force Research Laboratory to produce large-area sapphire windows on a cost plus fixed fee basis. We will recognize revenue in the period during which the related costs are incurred over the contractually defined period. Our current contract will be over a period of three years.

All of our revenue is denominated in U.S. dollars.

Table of Contents

Inventory valuation

We value our inventory at the lower of cost or market. Market is determined based on net realizable value. Cost for raw materials, work in process and finished goods is based on actual costs on a first-in, first-out basis. We establish inventory reserves when conditions exist that suggest inventory may be in excess of anticipated demand or is obsolete based on customer required specifications. We evaluate the ability to realize the value of our inventory based on a combination of factors, including forecasted sales, estimated current and future market value and changes in customers' product specifications. For the three and nine months ended September 30, 2013, we determined that we had inventory that was in excess or obsolete and recorded an adjustment which reduced inventory and increased cost of goods by \$11,000 and \$266,000, respectively. While pricing has improved, in the three months ended September 30, 2013, we had accepted sales orders during 2013 for smaller diameter core material at prices lower than our cost. Based on these sales prices, we recorded for the nine months ended September 30, 2013 an adjustment which decreased inventory and increased costs of goods sold by \$421,000. Our method of estimating excess and obsolete inventory has remained consistent for all periods presented. However, if our recognition of excess or obsolete inventory is, or if our estimates of our inventory's potential utility become, less favorable than currently expected, additional inventory reserves may be required. We determine our normal operating capacity and record as an expense costs attributable to lower utilization of equipment and staff. For the three and nine months ended September 30, 2013, we determined that we were not operating at capacity and recorded costs associated with lower utilization of equipment and staff of \$3.9 million and \$9.9 million, respectively. Although we expect demand to improve throughout the remainder of 2013, it is likely that we will incur additional costs due to lower utilization of equipment and staff.

Investments

We invest available cash primarily in investment grade commercial paper, corporate notes, FDIC guaranteed certificates of deposits, common stock, and government securities. Investments classified as available-for-sale securities are carried at fair market value with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Investments in trading securities are reported at fair value, with both realized and unrealized gains and losses recorded in other income (expense), net in the Consolidated Statement of Operations. Investments in which we have the ability and intent, if necessary, to liquidate in order to support our current operations are classified as short-term.

We review our available-for-sale securities investments at the end of each quarter for other-than-temporary declines in fair value based on the specific identification method. We consider various factors in determining whether an impairment is other-than-temporary, including the severity and duration of the impairment, changes in underlying credit ratings, forecasted recovery, our ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value and the probability that the scheduled cash payments will continue to be made. When we conclude that an other-than-temporary impairment has resulted, the difference between the fair value and carrying value is written off and recorded as a charge on the Consolidated Statement of Operations. As of September 30, 2013, no impairment was recorded.

Allowance for doubtful accounts

We estimate the allowance for doubtful accounts based on an assessment of the collectability of specific customer accounts. The determination of risk for collection is assessed on a customer-by-customer basis considering our historical experience and future orders with the customer, changes in payment patterns, and recent information we have about the current status of our accounts receivable balances. If we determine that a specific customer is a risk for collection, we provide a specific allowance for credit losses to reduce the net recognized receivable to the amount we reasonably believe will be collected. We believe that, based on the customers to whom we sell and the nature of our agreements with them, our estimates are reasonable. Our method of estimating collectability has remained consistent for all periods presented and with past collections experience.

Stock-based compensation

We expense stock options based upon the fair market value on the date of grant. We use the Black-Scholes option pricing model to determine the fair value of stock options. The determination of the fair value of stock-based payment awards on the date of grant using an option-pricing model will be affected by assumptions regarding a number of complex and subjective variables. These variables include our expected stock volatility over the term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rates, forfeitures and expected dividends.

The expected term represents the weighted-average period that our stock options are expected to be outstanding and is based upon the vesting term of our options, a review of a peer group of companies, and expected exercise behavior. Until November 2007, we were operating as a private company, and, as a result, we were unable to use our actual price volatility data. Therefore, we estimate the volatility of our common stock based on volatility of similar entities over the expected term of our stock options. We base the risk-free interest rate that we use in the

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

option pricing model on U.S. Treasury zero-coupon issues with remaining terms similar to the expected term on the options. We do not anticipate paying any cash dividends in the foreseeable future and, therefore, use an expected dividend yield of zero in the option pricing model. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. The current forfeiture rate of 19.18% was based on our past history of forfeitures.

Table of Contents

We allocate stock based compensation costs using a straight-line method which amortizes the fair value of each option on a straight-line basis over the service period. Based on the variables affecting the valuation of our common stock and the method used for allocating compensation costs, we recognized \$482,000 and \$1.2 million in stock compensation expense during the three and nine months ended September 30, 2013, respectively.

All option grants made during the three and nine months ended September 30, 2013 and 2012 were granted at an exercise price per share equal to the closing market price of our common stock on the date of grant. Therefore, there is no intrinsic value because the exercise price per share of each option was equal to the fair value of the common stock on the date of grant.

Based on the fair market value of the common stock at September 30, 2013, the intrinsic value of all stock options exercisable is \$461,000 and there is no aggregate intrinsic value of all stock options outstanding.

Income tax valuation allowance

Evaluating the need for and amount of a valuation allowance for deferred tax assets requires significant judgment and extensive analysis of all the positive and negative evidence available to determine whether all or some portion of the deferred tax assets will not be realized. A valuation allowance must be established for deferred tax assets when it is more likely than not (a probability level of more than 50 percent) that they will not be realized. In general, realization refers to the incremental benefit achieved through the reduction in future taxes payable or an increase in future taxes refundable from the deferred tax assets, assuming that the underlying deductible differences and carryforwards are the last items to enter into the determination of future taxable income. In determining our valuation allowance, we consider the source of taxable income, including taxable income in prior carryback years, future reversals of existing temporary differences, the required use of tax planning strategies, and future taxable income exclusive of reversing temporary differences and carryforwards. Such evaluations involve the application of significant judgment and multiple factors, both positive and negative, are considered. For the period ended September 30, 2013, a valuation allowance has not been included in the 2013 forecasted effective tax rate. Based on future results, if we were to conclude that the deferred tax assets not more likely than not recoverable a valuation allowance would be recorded to reduce the deferred tax assets reported value to the amount that is more likely than not recoverable. There would be a significant impact on the forecasted effective tax rate for the year as a whole and the quarterly effective tax rate in the quarter that a valuation allowance is established.

RECENT ACCOUNTING PRONOUNCEMENT

In July 2013, the FASB issued Accounting Standards Update No. 2013-11 (ASU 2013-11), *Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*. ASU No. 2013-11 clarifies that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. This ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of ASU 2013-11 is not expected to have a material impact on our consolidated financial statements.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

For the nine months ended September 30, 2013, there were no material changes in the information regarding market risk contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Management's evaluation of disclosure controls and procedures

Based on evaluations at September 30, 2013, our chief executive officer and chief financial officer (together, our certifying officers), with the participation of the management team, have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that material information relating to the Company is accumulated and communicated to management, including our certifying officers, as appropriate to allow timely decisions regarding required disclosures.

Changes in internal control over financial reporting

Our certifying officers have concluded that there were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the three months ended September 30, 2013 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

From time to time we may be named in claims arising in the ordinary course of business. Currently, there are no legal proceedings or claims pending against us or involving us that, in the opinion of our management, could reasonably be expected to have a material adverse effect on our business or financial condition.

ITEM 1A. RISK FACTORS

Our business is influenced by many factors that are difficult to predict, involve uncertainties that may materially affect actual results and are often beyond our control. We have identified a number of these risk factors in our Annual Report on Form 10-K for the year ended December 31, 2012, which factors should be taken into consideration when reviewing the information contained in this report. There have been no material changes with regard to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2012.
