The information in this preliminary prospectus is not complete and may be changed. Neither we nor the selling stockholder may sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities and neither we nor the selling stockholder are soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

PRELIMINARY PROSPECTUS

**SUBJECT TO COMPLETION, DATED APRIL 4, 2014
Shares**

New Residential Investment Corp.

Common Stock

We are a publicly traded real estate investment trust (REIT) primarily focused on investing in residential mortgage related assets. We are externally managed by an affiliate of Fortress Investment Group LLC (Fortress). We were formed as a wholly owned subsidiary of Newcastle Investment Corp. (Newcastle) in September 2011 and were spun-off from Newcastle on May 15, 2013.

We are offering _____ shares of our common stock as described in this prospectus. An affiliate of Fortress (the Selling Stockholder) is offering an additional _____ shares of our common stock acquired through the exercise of outstanding options (the Option Shares). Certain officers and directors may purchase shares of our common stock in this offering directly from us at the public offering price (without any payment by us or them of any underwriting discounts or commissions). Our shares of common stock are listed on the New York Stock Exchange under the symbol NRZ. On April 3, 2014, the last reported sales price for our common stock on the New York Stock Exchange was \$6.48 per share.

We intend to elect and qualify to be taxed as a REIT for U.S. federal income tax purposes commencing with our initial taxable year ended December 31, 2013. To assist us in qualifying as a REIT, among other purposes, stockholders are generally restricted from owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of capital stock. In addition, our certificate of incorporation contains various other restrictions on the ownership and transfer of our common stock. See Description of Capital Stock Restrictions on Ownership and Transfer of Our Capital Stock.

See Risk Factors beginning on page 32 for a discussion of the following and other risks:

We have a very limited operating history as an independent company and may not be able to successfully operate our business strategy or generate sufficient revenue to make or sustain distributions to our stockholders;

Servicer advances may not be recoverable or may take longer to recover than we expect, which could cause us to fail to achieve our targeted return on our investment in servicer advances.

Edgar Filing: New Residential Investment Corp. - Form S-11/A

We rely heavily on mortgage servicers to achieve our investment objective and have no direct ability to influence their performance;

We are subject to significant counterparty concentration and default risks;

Many of our investments may be illiquid, and this lack of liquidity could significantly impede our ability to vary our portfolio in response to changes in economic and other conditions or to realize the value at which such investments are carried if we are required to dispose of them;

We may not be able to finance our investments on attractive terms or at all, and financing for our excess mortgage servicing rights investments may be particularly difficult to obtain;

Maintenance of our Investment Company Act of 1940 exclusion imposes limits on our operations;

There are conflicts of interest in our relationship with FIG LLC, our Manager; and

Our failure to qualify as a REIT would result in higher taxes and reduced cash available for distribution to our stockholders.

Neither the Securities and Exchange Commission (SEC) nor any state or other securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Per share	Total
Public offering price	\$	\$
Underwriting discounts and commissions (1)	\$	\$
Proceeds to us, before expenses (2)	\$	\$
Proceeds to the Selling Stockholder, before expenses	\$	\$

(1) There will be no underwriting discounts and commissions paid on shares of our common stock purchased by officers and directors in this offering.

(2) We will pay the fees and expenses related to obtaining the required approval of certain terms of this offering from the Financial Industry Regulatory Authority, Inc (FINRA). See Underwriting.

The underwriters may also exercise their option to purchase up to an additional _____ shares of our common stock at the public offering price from us, less the underwriting discounts and commissions payable by us within 30 days from the date of this prospectus.

The underwriters expect to deliver the shares on or about _____, 2014.

Industry Data

Unless otherwise indicated, information contained in this prospectus concerning the mortgage and mortgage servicing industry, including our general expectations and market position and market opportunity, is based on information from various sources (including government and industry publications, surveys, analyses, valuations and forecasts and our internal research), assumptions that we have made (which we believe are reasonable based on those data from such sources and other similar sources) and our knowledge of the markets. The projections, assumptions and estimates of our future performance and the future performance of the mortgage and mortgage servicing industry are necessarily subject to a high degree of uncertainty and risk due to a variety of factors, including those described under **Risk Factors** and elsewhere in this prospectus. These and other factors could cause results to differ materially from those expressed in the projections and estimates included in this prospectus.

Table of Contents

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It does not contain all of the information that you should consider before making a decision to invest in our common stock. You should read carefully the more detailed information set forth under Risk Factors and the other information included in this prospectus.

Unless the context otherwise requires, any references in this prospectus to we, our, us, New Residential and the Company refer to New Residential Investment Corp. and its consolidated subsidiaries. Any references in this prospectus to Newcastle refer to Newcastle Investment Corp. and its consolidated subsidiaries. Our Manager refers to FIG LLC, a Delaware limited liability company, our external manager, and an affiliate of Fortress.

Our Company

New Residential is a publicly traded REIT primarily focused on investing in residential mortgage related assets. We are externally managed by an affiliate of Fortress. We were formed as a wholly owned subsidiary of Newcastle in September 2011 and were spun-off from Newcastle on May 15, 2013, which we refer to as the separation date or distribution date.

Our goal is to drive strong risk-adjusted returns primarily through investments in servicing related assets, residential securities and loans and other investments. We generally target assets that generate significant current cash flows and/or have the potential for meaningful capital appreciation. We aim to generate attractive returns for our stockholders without the excessive use of financial leverage. A significant portion of our portfolio is currently composed of investments in agency securities. The securities in which we can invest are limited by the exclusion we maintain from the Investment Company Act of 1940, as amended (the 1940 Act).

We intend to continue to invest opportunistically across the residential real estate market. Our investment guidelines are purposefully broad to enable us to make investments in a wide array of assets in diverse markets. In the past, we have taken advantage of this flexibility to invest in assets that are not strictly real estate related (e.g., consumer loans), and we may do so again in the future. We expect our asset allocation and target assets to change over time depending on the types of investments our Manager identifies and the investment decisions our Manager makes in light of prevailing market conditions. For more information about our investment guidelines, see Business Investment Guidelines.

Our Manager

We are managed by our Manager, an affiliate of Fortress. We are able to draw upon the long-standing expertise and resources of Fortress, a global investment management firm with \$61.8 billion of alternative and traditional assets under management as of December 31, 2013.

We are also able to capitalize on our Manager's relationship with Nationstar Mortgage LLC (Nationstar), which is majority-owned by Fortress funds managed by our Manager, to source investment opportunities. Nationstar (NYSE: NSM) is one of the largest residential loan servicers, according to Inside Mortgage Finance, and it was ranked among the highest quality servicers by Federal National Mortgage Association (Fannie Mae) in August 2013. We have developed an innovative strategy for co-investing in Excess MSR's with Nationstar, as described below under Market Opportunity and Target Assets Servicing Related Assets Excess Mortgage Servicing Rights (Excess MSR's). On December 17, 2013, we completed our first acquisition of servicer advances from Nationstar through a co-investment with certain third parties. See Our Portfolio Servicing Related Assets Servicer Advances below.

Edgar Filing: New Residential Investment Corp. - Form S-11/A

Pursuant to the terms of our management agreement with our Manager (the Management Agreement), our Manager provides a management team and other professionals who are responsible for implementing our business strategy and performing certain services for us, subject to oversight by our board of directors. Our

Table of Contents

Manager's duties include: (1) performing all of our day-to-day functions, (2) determining investment criteria in conjunction with, and subject to the supervision of, our board of directors, (3) sourcing, analyzing and executing on investments and sales, (4) performing investment and liability management duties, including financing and hedging, and (5) performing financial and accounting management. For its services, our Manager is entitled to an annual management fee and is eligible to receive incentive compensation, depending upon our performance, as described below under Management Agreement.

Our Manager also manages our predecessor, Newcastle, a publicly traded REIT that pursues a broad range of real estate related investments. Our management team is not required to exclusively dedicate their services to us and they provide services for other entities affiliated with our Manager, including, but not limited to, Newcastle.

Market Opportunity and Target Assets

We believe that unfolding developments in the U.S. residential housing market are generating significant investment opportunities. The U.S. residential real estate market is vast: the value of the housing market totaled approximately \$20 trillion as of September 2013, including about \$10 trillion of outstanding mortgages, according to Inside Mortgage Finance. In the aftermath of the U.S. financial crisis, the residential mortgage industry is undergoing major structural changes that are transforming the way mortgages are originated, owned and serviced. We believe these changes are creating a compelling set of investment opportunities.

We also believe that New Residential is one of only a select number of market participants that have the combination of capital, industry expertise and key business relationships we think are necessary to take advantage of this opportunity. We are focused on the investment opportunities described below, as well as identifying other opportunities that may arise as the residential mortgage market evolves. A significant portion of our portfolio is currently composed of investments in agency securities. The securities in which we can invest are limited by the exclusion we maintain from the 1940 Act.

For more information about the mortgage industry, see Business Mortgage Industry included elsewhere in this prospectus.

Servicing Related Assets

Excess Mortgage Servicing Rights (Excess MSR)

In our view, the mortgage servicing sector presents a number of compelling investment opportunities. A mortgage servicing right (MSR) provides a mortgage servicer with the right to service a pool of mortgages in exchange for a portion of the interest payments made on the underlying mortgages. This amount typically ranges from 25 to 50 basis points (bps) times the unpaid principal balance (UPB) of the mortgages. Approximately 77% of MSRs were owned by banks as of the fourth quarter of 2013, according to Inside Mortgage Finance. We expect this number to decline as banks face pressure to reduce their MSR exposure as a result of heightened capital reserve requirements under Basel III, regulatory scrutiny and a more challenging servicing environment. As a result, we believe the volume of MSR sales is likely to be substantial for some period of time.

As banks sell MSRs, there may be an opportunity for entities such as New Residential to participate through co-investment in the corresponding Excess MSRs. An MSR is made up of two components: a basic fee and an Excess MSR. The basic fee is the amount of compensation for the performance of servicing duties, and the Excess MSR is the amount that exceeds the basic fee. For example, if an MSR is 30 bps and the basic fee is 5 bps, then the Excess MSR is 25 bps. In our capacity as the owner of an Excess MSR, we are not required to assume any servicing duties, advance

obligations or liabilities associated with the portfolios underlying our investment. However, we, through co-investments made by our subsidiaries, have separately purchased servicer advances, including the basic fee component of the related MSR, on certain portfolios underlying our Excess MSR. See Our Portfolio Servicing Related Assets below.

Table of Contents

There are a number of reasons why we believe Excess MSR are a compelling investment opportunity:

Supply-Demand Imbalance. Since 2010, banks have sold or committed to sell MSR totaling more than \$1 trillion of the approximately \$10 trillion mortgage market. As a result of the regulatory and other pressures facing bank servicers, we believe the volume of MSR sales is likely to be substantial for some period of time. We estimate that MSR on approximately \$200-300 billion of mortgages are currently for sale, which would require a capital investment of approximately \$2-3 billion based on current pricing dynamics. We believe many non-bank servicers, who acquire MSR and are constrained by capital limitations, will continue to sell a portion of the Excess MSR. We also estimate that approximately \$1-2 trillion of MSR could be sold over the next several years. In addition, approximately \$1.2 trillion of new loans are expected to be created annually according to the Mortgage Bankers Association. We believe this creates an opportunity to enter into flow arrangements, whereby loan originators agree to sell Excess MSR on newly originated loans on a recurring basis (often monthly or quarterly). We believe that MSR are being sold at a discount to historical pricing levels, although increased competition for these assets has driven prices higher recently.

Attractive Pricing. We believe MSR are currently being sold at a discount to historical pricing levels. While prices have rebounded from the lows, we believe that prices remain lower than their peak. At current prices, we believe investments in Excess MSR can generate attractive returns without leverage.

Significant Barrier to Entry. Non-servicers, like us, cannot directly own an MSR as a named servicer and would therefore need to partner with a servicer in order to invest in MSR. The number of strong, scalable non-bank servicers is limited. Moreover, in the case of Excess MSR on Agency pools, the servicer must be Agency-approved. As a result, non-servicers seeking to invest in Excess MSR generally face a significant barrier to entering the market, particularly if they do not have a relationship with a quality servicer. We believe our track record of investing in Excess MSR and our established relationship with Nationstar give us a competitive advantage over other potential investors.

We pioneered investments in Excess MSR (while we were a wholly owned subsidiary of Newcastle). We believe we remain the most active REIT in the sector. For details about our investments in Excess MSR, see [Our Portfolio Servicing Related Assets Excess MSR](#) below.

Servicer Advances

We believe there are attractive opportunities to invest in residential mortgage servicer advances. On December 17, 2013, we made our first investment in servicer advances, including the basic fee component of the related MSR, from Nationstar through a co-investment with two subsidiaries of Athene Holding Ltd., affiliates of The Blackstone Group, and affiliates of, and funds/accounts managed by, Omega Advisors, Inc. See [Our Portfolio Servicing Related Assets Servicer Advances](#) below.

Servicer advances are generally reimbursable cash payments made by a servicer when the borrower fails to make scheduled payments due on a mortgage loan or when the servicer makes cash payments (i) on behalf of a borrower for real estate taxes and insurance premiums on the property that have not been paid on a timely basis by the borrower and (ii) to third parties for the costs and expenses incurred in connection with the foreclosure, preservation and sale of the mortgaged property, including attorneys' and other professional fees. Servicer advances are a customary feature of

residential mortgage securitization transactions and represent one of the duties for which a servicer is compensated through the basic fee component of the related MSR. The purpose of the advances is to provide liquidity, rather than credit enhancement, to the underlying residential mortgage securitization transaction. Servicer advances are usually repaid from amounts received with respect to the related mortgage loan, including payments from the borrower or amounts received from the liquidation of the property securing the loan, which is referred to as loan-level recovery.

Table of Contents

Servicer advances typically fall into one of three categories:

Principal and Interest Advances: Cash payments made by the servicer to cover scheduled payments of principal of, and interest on, a mortgage loan that have not been paid on a timely basis by the borrower.

Escrow Advances (Taxes and Insurance Advances): Cash payments made by the servicer to third parties on behalf of the borrower for real estate taxes and insurance premiums on the property that have not been paid on a timely basis by the borrower.

Foreclosure Advances: Cash payments made by the servicer to third parties for the costs and expenses incurred in connection with the foreclosure, preservation and sale of the mortgaged property, including attorneys and other professional fees.

Residential mortgage servicing agreements generally require a servicer to make advances in respect of serviced mortgage loans unless the servicer determines in good faith that the advance would not be ultimately recoverable from the proceeds of the related mortgage loan or the mortgaged property. In many cases, if the servicer determines that an advance previously made would not be recoverable from these sources, or if such advance is not recovered when the loan is repaid or related property is liquidated, then the servicer is entitled to withdraw funds from the custodial account for payments on the serviced mortgages to reimburse the applicable advance. This is what is often referred to as a general collections backstop. See Risk Factors Risks Related to Our Business Servicer advances may not be recoverable or may take longer to recover than we expect, which could cause us to fail to achieve our targeted return on our investment in servicer advances.

We believe that the market in servicer advances could present us with additional investment opportunities. For example, we have the right to purchase additional servicer advances from Nationstar, as described under Our Portfolio Servicing Related Assets Servicer Advances Call Right and Transaction 2. The status of investments in servicer advances for purposes of the REIT requirements is uncertain, and therefore our ability to make these kinds of investments may be limited. We currently hold our investment in servicer advances in a taxable REIT subsidiary (TRS).

Residential Securities and Loans

Residential Mortgage Backed Securities (RMBS)

We invest in both Agency adjustable-rate mortgage (ARM) RMBS and Non-Agency RMBS, which we believe complement our Excess MSR investments. RMBS are securities created through the securitization of a pool of residential mortgage loans. As of the fourth quarter of 2013, approximately \$7 trillion of the \$10 trillion of residential mortgages outstanding was securitized, according to Inside Mortgage Finance. Of the securitized mortgages, approximately \$6 trillion were Agency RMBS according to Inside Mortgage Finance, which are RMBS issued or guaranteed by a U.S. Government agency, such as the Government National Mortgage Association (Ginnie Mae), or by a government-sponsored enterprise (GSE), such as Fannie Mae or the Federal Home Loan Mortgage Corporation (Freddie Mac). The balance was securitized by either public or private trusts (private label securitizations), and these securities are referred to as Non-Agency RMBS. For more information about the securitization market, see Business Mortgage Industry Overview included elsewhere in this prospectus.

Agency ARM RMBS generally offer more stable cash flows and historically have been subject to lower credit risk and greater price stability than the other types of residential mortgage investments we target. More information about certain types of Agency ARM RMBS in which we have invested or may invest is set forth under Business Market Opportunity and Target Assets Residential Securities and Loans RMBS. Details about our existing investments in Agency ARM RMBS are set forth under Our Portfolio Residential Securities and Loans Agency ARM RMBS below.

Table of Contents

Since the onset of the financial crisis in 2007, there has been significant volatility in the prices for Non-Agency RMBS. This has resulted from a widespread contraction in capital available for this asset class, deteriorating housing fundamentals, and an increase in forced selling by institutional investors (often in response to rating agency downgrades). While the prices of these assets have started to recover from their lows, we believe a meaningful gap still exists between current prices and the recovery value of many Non-Agency RMBS. Accordingly, we believe there are opportunities to acquire Non-Agency RMBS at attractive risk-adjusted yields, with the potential for meaningful upside if the U.S. economy and housing market continue to strengthen. We believe the value of existing Non-Agency RMBS may also rise if the number of buyers returns to pre-2007 levels. Furthermore, we believe that in many Non-Agency RMBS vehicles there is a meaningful discrepancy between the value of the Non-Agency RMBS and the recovery value of the underlying collateral. We intend to pursue opportunities to structure transactions that would enable us to realize this difference. For details about our investments in Non-Agency RMBS, see [Our Portfolio Residential Securities and Loans Non-Agency RMBS](#) below.

Real Estate Loans

We believe there may be attractive opportunities to invest in portfolios of non-performing and other residential mortgage loans. In these investments, we would expect to acquire the loans at a deep discount to their face amount, and we (either independently or with a servicing co-investor) would seek to resolve the loans at a substantially higher valuation. We would seek to improve performance by transferring the servicing to Nationstar or another reputable servicer, which we believe could increase unlevered yields. In addition, we may seek to employ leverage to increase returns, either through traditional financing lines or, if available, securitization options.

While a number of portfolios of non-performing residential loans have been sold since the financial crisis, we believe the volume of such sales may increase for a number of reasons. For example, with improved balance sheets, many large banks have more financial flexibility to recognize losses on non-performing assets. The U.S. Department of Housing and Urban Development (HUD), which acquires the non-performing loans from Ginnie Mae securitizations, has been increasing the number of portfolio sales. In addition, we believe that residential loan servicers which have traditionally resorted to loan foreclosure procedures and subsequent property sales to maximize recoveries on non-performing loans may increase sales of defaulted loans. To the extent any of these dynamics results in a meaningful volume of non-performing loan sales, we believe they may pose attractive investment opportunities for us. For details about our investments in residential mortgage loans, see [Our Portfolio Residential Securities and Loans Real Estate Loans](#) below.

Other Investments

We may pursue other types of investments as the market evolves, such as our opportunistic investment in consumer loans in April 2013. See [Our Portfolio Consumer Loans](#) below. Our Manager makes decisions about our investments in accordance with broad investment guidelines adopted by our board of directors. Accordingly, we may, without a stockholder vote, change our target asset classes and acquire a variety of assets that differ from, and are possibly riskier than, our current portfolio of target assets. For more information about our investment guidelines, see [Business Investment Guidelines](#) included elsewhere in this prospectus.

Our Strengths

Focused Strategy

We pursue an investment strategy focused primarily on attractive opportunities across the residential spectrum. With an approximately \$20 trillion housing market undergoing major structural changes, we believe a dedicated strategy

presents investors with an opportunity to participate in that restructuring.

Table of Contents

Experienced Management Team

Our Manager is an affiliate of Fortress, a leading alternative asset manager with \$61.8 billion of assets under management as of December 31, 2013. Residential and other real estate related assets, including those in our portfolio, have been a significant component of the investment strategies of both Fortress and Newcastle. Through our Manager, we have access to Fortress' s extensive and long-standing relationships with major issuers of real estate related securities and the broker-dealers that trade these securities, as well as their banking relationships in the mortgage servicing industry. We believe these relationships, together with Fortress' s infrastructure, provide us access to a pipeline of attractive investment opportunities, many of which may not be available to our competitors. We also believe that the breadth of Fortress' s experience enables us to react nimbly to the changing residential landscape in order to execute on emerging investment opportunities. For instance, in 2012, we obtained a private letter ruling from the U.S. Internal Revenue Service (the "IRS") that permits us to treat Excess MSR as qualifying assets that generate qualifying income for purposes of the REIT asset and income tests, which gave us an early advantage for investing in Excess MSR.

Existing Portfolio

Our portfolio is currently composed of servicing related assets, residential securities and loans and other investments. Under current market conditions, we target returns on invested equity that average in the mid-teens. We believe these returns are attainable given the performance of our existing investments to date and based on market dynamics that we believe will foster significant opportunities to invest in additional residential real estate assets at similar returns. For example, our underwriting assumptions projected a weighted average internal rate of return ("IRR") of 16.0% for the Excess MSR we owned as of December 31, 2013, based on their original purchase price, and this portfolio has performed better than our underwriting assumptions. We believe that various market dynamics, including the current low-interest rate environment, a supply-demand imbalance for investments in residential mortgage servicing assets, and barriers to entry with respect to this asset class, support our target returns. However, the returns of individual assets, as well as different asset classes, will vary, and there can be no assurance that any of our assets, or our portfolio as a whole, will generate target returns. In addition, our ability to achieve target returns on certain of our assets, depends in part on the use of leverage and our ability to quickly deploy the proceeds of any financing at attractive returns. There can be no assurance that we will be able to secure financing on favorable terms, or at all. In addition, there can be no assurance that we will be able to source, or quickly complete, attractive investments for which the proceeds of any such financing could be used.

Relationship with Nationstar

As a result of our Manager' s relationship with Nationstar, which is majority-owned by Fortress funds managed by our Manager, we believe we are uniquely positioned to source opportunities to acquire residential mortgage servicing assets. Nationstar (NYSE: NSM) is one of the largest residential loan servicers, according to Inside Mortgage Finance, and it was ranked among the highest quality servicers by Fannie Mae in August 2013. We have developed an innovative strategy for co-investing in Excess MSR with Nationstar. Given that non-servicers, like us, cannot acquire an MSR directly, this strategy creates the opportunity for us to co-invest in Excess MSR and affords Nationstar the opportunity to invest in MSR on a "capital light" basis. To date, we have completed several co-investments with Nationstar, as described under "Our Portfolio Servicing Related Assets" below. In addition, we have capitalized on Nationstar' s origination capabilities by entering into a "recapture agreement" in each of our Excess MSR investments to date. Under the recapture agreements, we are generally entitled to a pro rata interest in the Excess MSR on any initial or subsequent refinancing by Nationstar of a loan in the original portfolio. In other words, we are generally entitled to a pro rata interest in the Excess MSR on both (i) a loan resulting from a refinancing by Nationstar of a loan in the original portfolio, and (ii) a loan resulting from a refinancing by Nationstar of a previously recaptured loan. We

believe this arrangement

Table of Contents

mitigates our exposure to the prepayment risk associated with Excess MSR. Furthermore, we have purchased servicer advances from Nationstar through a co-investment with certain third parties. See [Our Portfolio Servicing Related Assets Servicer Advances](#) below. Nationstar is also the master servicer and/or servicer of the vast majority of the loans underlying the Non-Agency RMBS in our portfolio.

Tax Efficient REIT Status

We will elect to be treated as, and expect to operate in conformity with the requirements for qualification and taxation as, a REIT. REIT status will provide us with certain tax advantages compared to some of our competitors. Those advantages include an ability to reduce our corporate-level income taxes by making dividend distributions to our stockholders, and an ability to pass our capital gains through to our stockholders in the form of capital gains dividends. We believe our REIT status will provide us with a significant advantage as compared to other companies or industry participants who do not have a similar tax efficient structure. From time to time, we may make investments through TRSs, which is currently the case with our investment in servicer advances, which will impact the returns on such investments and reduce cash available for distribution to our stockholders.

Our Portfolio

Our portfolio is currently composed of servicing related assets, residential securities and loans and other investments, as described in more detail below. A significant portion of our portfolio is currently composed of investments in agency securities. The securities in which we can invest are limited by the exclusion we maintain from the 1940 Act. Over time, we expect to opportunistically adjust our portfolio composition in response to market conditions. Our Manager will make decisions about our investments in accordance with broad investment guidelines adopted by our board of directors. Accordingly, we may, without a stockholder vote, change our target asset classes and acquire a variety of assets that differ from, and are possibly riskier than, our current portfolio of target assets. For more information about our investment guidelines, see [Business Investment Guidelines](#) included elsewhere in this prospectus.

Servicing Related Assets

Excess MSRs

As of December 31, 2013, we had approximately \$676.9 million estimated carrying value of Excess MSRs, of which a portion is held directly by us and the remainder is held through joint ventures.

As of December 31, 2013, our completed investments represented an effective 33.5% to 80% interest in the Excess MSRs on pools of mortgage loans with an aggregate UPB of approximately \$252.6 billion.

Nationstar is the servicer of the loans underlying all of our investments in Excess MSRs to date, and it earns a basic fee in exchange for providing all servicing functions. In addition, Nationstar retains a 20% to 35% interest in the Excess MSRs and all ancillary income associated with the portfolios. In our capacity as owner of Excess MSRs, we do not have any servicing duties, liabilities or obligations associated with the servicing of portfolios underlying our Excess MSRs. However, we, through co-investments made by our subsidiaries, have separately purchased servicer advances, including the right to receive the basic fee component of related MSRs, on certain of our Non-Agency portfolios (Pools 5, 10, 12, 17 and 18) underlying our Excess MSR investments. See [Servicer Advances](#) below.

Each of our Excess MSR investments to date is subject to a recapture agreement with Nationstar. Under the recapture agreements, we are generally entitled to a pro rata interest in the Excess MSRs on any initial or subsequent

refinancing by Nationstar of a loan in the original portfolio. In other words, we are generally entitled to a pro rata interest in the Excess MSR on both (i) a loan resulting from a refinancing by Nationstar of a loan in the original portfolio, and (ii) a loan resulting from a refinancing by Nationstar of a previously recaptured loan.

Table of Contents

The tables below summarize the terms of our investments in Excess MSR completed as of December 31, 2013.

Summary of Direct Excess MSR Investments as of December 31, 2013

	Investment Date	Initial Current ²		Loan Type ³	MSR Component ¹		Interest		Excess MSR

Total/Weighted Avg.		\$ 14.0	\$ 14.0		29bps	21bps			\$ 33.8

(1) The MSR is a weighted average as of the commitment date, and the Excess MSR represents the difference between the weighted average MSR and the basic fee (which fee remains constant).

(2) As of the commitment date.

(3) PLS refers to loans in private label securitizations. GSE refers to loans in Fannie Mae or Freddie Mac securitization.

(4) The actual amount invested will be based on the UPB at the time of close.

(5) Pool in which we also invested in related servicer advances, including the basic fee component of the related MSR as of December 31, 2013 (see Note 6 to our consolidated financial statements included herein).

Subsequent to December 31, 2013, we invested approximately \$19.1 million in Excess MSRs on a portfolio of PLS residential mortgage loans with a UPB of approximately \$8.1 billion. We have remaining commitments of approximately \$1.5 million to fund additional investments in this portfolio of PLS residential mortgage loans, which have not yet closed and will increase the UPB by approximately \$0.9 billion.

In addition, we have commitments to invest approximately \$32.3 million in Excess MSRs on portfolios of GSE residential mortgage loans with an aggregate outstanding UPB of \$13.1 billion. In each transaction, we have agreed to acquire a 33.3% direct interest in the Excess MSRs. Nationstar as servicer will perform all servicing and advancing functions, and retain the ancillary income, servicing obligations and liabilities as the servicer of the underlying loans in the portfolios. Commitments related to GSE residential mortgage loans are contingent upon GSE approval of Nationstar to service such loans and transfer the Excess MSRs to us.

We expect to complete our pending investments in the second quarter of 2014, subject to the receipt of regulatory, third-party and certain rating agency approvals. There can be no assurance that we will complete these investments as anticipated or at all. However, we believe that it is probable that we will be able to obtain pending approvals and subsequently complete these investments.

(2) As of the date the transaction closed.

(3) PLS refers to loans in private label securitizations.

(4) Amounts invested based on the UPB at the time of close.

(5) Pool in which we also invested in related servicer advances, including the basic fee component of the related MSR as of December 31, 2013 (see Note 6 to our consolidated financial statements included herein).

On December 13, 2013, we entered into a \$75.0 million secured corporate loan with Credit Suisse First Boston Mortgage Capital LLC, an affiliate of Credit Suisse Securities (USA) LLC, one of the underwriters of this offering. The loan bears interest equal to the sum of (i) a floating rate index rate equal to the one-month London Interbank Offered Rate (LIBOR) and (ii) a margin of 4.00%. The loan contains customary covenants and event of default provisions, including event of default provisions triggered by a 50% equity decline as of the end of the corresponding period in the prior fiscal year, or a 35% equity decline as of the end of the quarter immediately preceding the most recently completed fiscal quarter and a four-to-one indebtedness to tangible net worth provision. Subsequent to December 31, 2013, the loan was paid down by \$5.9 million, and the maturity was extended to May 31, 2014.

We currently expect to continue to make co-investments with Nationstar, and we may also acquire Excess MSRs from other servicers. Nationstar does not, however, have any obligation to offer us any future co-investment opportunity. In the event that we cannot co-invest in Excess MSRs with Nationstar, we may not be able to find other suitable counterparties from which to acquire Excess MSRs, which could have a material adverse effect on our business. At the same time, our co-investments with Nationstar expose us to counterparty concentration risk, which could increase if we do not or cannot acquire Excess MSRs from other counterparties or continue to pursue co-investments with Nationstar. Nationstar publicly discloses its financial statements and other material information in filings with the SEC, which may be obtained at the SEC's website, www.sec.gov. The contents of Nationstar's public disclosure are not incorporated by reference herein, do not form part of this prospectus and have not been verified by us.

Additional information about our investments in Excess MSR is set forth under Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Servicing Related Assets Excess MSR and Business Our Portfolio Servicing Related Assets Excess MSR.

Servicer Advances

The following is a summary of the investments in Servicer advances, including the basic fee component of the related MSR, made by Advance Purchaser LLC, a joint venture entity (the Buyer) capitalized by us, two subsidiaries of Athene Holding Ltd., affiliates of The Blackstone Group, and affiliates of, and funds/accounts managed by, Omega Advisors, Inc.

Table of Contents

(dollars in thousands):

	December 31, 2013				Year Ended December 31, 2013
	Amortized Cost Basis	Carrying Value (A)	Weighted Average Yield	Weighted Average Life (Years) (B)	Change in Fair Value Recorded in Other Income
Servicer advances	\$ 2,665,551	\$ 2,665,551	4.4%	2.7	\$

(A) Carrying value represents the fair value of the investment in servicer advances, including the basic fee component of the related MSR.

(B) Weighted Average Life represents the weighted average expected timing of the receipt of expected net cash flows for this investment.

The following is additional information regarding the servicer advances, and related financing, of the Buyer, as of December 31, 2013 (dollars in thousands):

	UPB of Underlying Residential Mortgage Loans	Servicer Advances to UPB of Underlying Residential Mortgage Loans	Carrying Value of Notes Payable	Loan-to-Value Gross	Cost of Funds (B) Net (A)	Gross	Net

Overview of Transaction 1

On December 17, 2013, the Buyer entered into a Master Servicing Rights Purchase Agreement and three related Sale Supplements (collectively, the Purchase Agreement) with Nationstar (Transaction 1). One of our wholly-owned subsidiaries is the managing member of the Buyer.

Table of Contents

Pursuant to the Purchase Agreement, the Buyer agreed to purchase servicer advances on a portfolio of loans in exchange for the right to receive the basic fee component of the related MSR. Specifically, the Buyer acquired from Nationstar:

the right to repayment with respect to approximately \$3.2 billion of outstanding servicer advances (the Outstanding Advances) outstanding on three pools of Non-Agency mortgage loans with an aggregate UPB of approximately \$54.6 billion as of December 31, 2013;

the obligation to purchase future servicer advances made by Nationstar on the pools (the Future Advances and, together with the Outstanding Advances, the Funded Advances) and the right to repayment with respect to the Future Advances; and

the right to receive the basic fee component of the MSR on the pools (the Purchased Basic Fee), which was 23.2 basis points on a weighted average basis as of December 31, 2013.

For certain financial information about our investments, see Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Servicing Related Assets Servicer Advances. We estimate that the amount of Future Advances in Transaction 1 will be approximately \$7.3 billion based on both (i) our management's estimates with respect to the pools of (a) the credit and prepayment performance of the underlying loans, (b) the amount of advances recoverable prior to liquidation of the related collateral and (c) the percentage of the pools with respect to which management expects not to have any additional advance obligations and (ii) Nationstar's historical rate of making servicer advances. The actual amount of future advances related to Transaction 1 is subject to significant uncertainty and could be materially different than our estimates.

While the Buyer acquired legal title to the basic fee component of the MSR on the pools, Nationstar remains the named servicer under the related servicing agreements and will continue to perform all servicing duties for the pools. The Buyer will not become the named servicer until all required consents and ratings agency letters required for a formal change of the named servicer have been obtained (and the Buyer has no obligations to obtain such consents and letters).

In exchange for Nationstar's performance of servicing duties, the Buyer will pay Nationstar a servicing fee (the Servicing Fee) and a performance fee (the Performance Fee). The Buyer will pay the Performance Fee if the amounts from the Purchased Basic Fee (the Basic Fee Amounts), net of the Servicing Fee (the Net Collections) exceed a 14% return (the Targeted Return) on its equity in the Funded Advances.

The investment structure, and the Targeted Return in particular, is designed to achieve three objectives: (i) provide a reasonable risk-adjusted return to the Buyer based on the expected amount and timing of estimated cash flows from the Purchased Basic Fee and the Funded Advances, with both upside and downside based on the performance of the investment, (ii) provide Nationstar with a sufficient fee to compensate it for acting as servicer, and (iii) provide Nationstar with an incentive to effectively service the underlying loans. The Targeted Return implements these objectives by allocating the Purchased Basic Fee between the Buyer and Nationstar. For more detail, see Servicing Fee, Targeted Return and Performance Fee below. Nationstar is also entitled to retain investment income on servicing accounts, prepayment interest excess and all ancillary income in connection with servicing the mortgage loans.

Pursuant to the Purchase Agreement, the Buyer has the right to become the named servicer under the applicable servicing agreements upon the satisfaction of certain conditions, such as obtaining any required licenses to be a residential mortgage servicer. However, unless and until the Buyer seeks to satisfy such conditions (which it has no obligation to satisfy) and becomes the named servicer under the applicable servicing agreements, the Buyer has no obligation to perform any servicing duties or assume any servicing-related liabilities with respect to the pools. The Buyer does not currently intend to become the named servicer under the applicable servicing agreements.

Table of Contents

Purchase Price and Settlement

The purchase price for Transaction 1 was approximately \$3.2 billion. The value of our investment was established by discounting the aggregate estimated future cash flows associated with the Funded Advances and the Purchased Basic Fee at an appropriate discount rate. The purchase price is equal to the par amount of the Outstanding Advances on their respective settlement dates.

The Buyer funded approximately \$0.4 billion of the purchase price with cash from equity subscriptions and contributions to the Buyer, and the remainder with debt. The debt was incurred by certain wholly owned subsidiaries of the Buyer that have become the issuers under the financing for the Funded Advances, as described in more detail below under Advance Financing.

Transaction 1 was completed in stages. As of December 31, 2013, the Buyer had completed the purchase of approximately \$2.7 billion of Funded Advances. Subsequent to December 31, 2013, the Buyer settled an additional \$509.4 million of Funded Advances, which represents substantially all of the remaining balance of Transaction 1.

Advance Financing

Prior to Transaction 1, special purpose subsidiaries of Nationstar had previously borrowed approximately \$2.13 billion under limited recourse variable funding notes (the Original Notes) to finance the Outstanding Advances. The Original Notes were issued through two wholly owned special purpose subsidiaries (the Original Issuers) pursuant to two servicer advance facilities (the Barclays Facility and the Credit Suisse Facility and, collectively, the Facilities). The counterparty on the Barclays Facility was Barclays Bank PLC, an affiliate of Barclays Capital Inc., one of the underwriters of this offering. Credit Suisse AG, New York Branch and Morgan Stanley Bank, N.A., affiliates of Credit Suisse Securities (USA) LLC and Morgan Stanley & Co. LLC, respectively, each an underwriter of this offering, are counterparties on the Credit Suisse Facility. In connection with Transaction 1, the Buyer purchased the equity of wholly owned special purpose subsidiaries of Nationstar that owned the Original Issuers. A portion of the outstanding Original Notes were repaid with the proceeds of new notes issued in March 2014. After giving effect to such repayments, the Barclays Facility was terminated and the borrowing capacity under the Credit Suisse Facility was reduced to \$1.5 billion. For details about the financing, see Financing Strategy Servicing Related Assets Servicer Advances below.

The Pools

The pools in Transaction 1 are Pool 10 (a portion of which is excluded from Transaction 1 and is expected to be included in Transaction 2 (as defined below)), Pool 17 and Pool 18, and the pools in Transaction 2 are Pool 5, the portion of Pool 10 not included in Transaction 1, and Pool 12. We previously acquired an interest in the Excess MSRs related to each of these pools.

Types of Advances

The servicer advances typically include (i) principal and interest advances, (ii) escrow advances and (iii) foreclosure advances. As of the date hereof, the Buyer acquired (or agreed to acquire) the following types of advances:

Transaction 1			Transaction 2		
Settled (bn)	Unsettled (bn)	Total (bn)	Settled	Unsettled	Total

Edgar Filing: New Residential Investment Corp. - Form S-11/A

Principal and Interest Advances	\$ 1.97	\$ 0.01	\$ 1.98	\$ 0.49	NA	\$ 0.49
Escrow Advances	1.00	0.00	1.00	0.43	NA	0.43
Foreclosure Advances	0.28	0.00	0.28	0.14	NA	0.14
Total	\$ 3.24	\$ 0.01	\$ 3.26	\$ 1.06	NA	\$ 1.06

Table of Contents

The Buyer

As of December 31, 2013, we owned approximately 32% of the Buyer, and the third-party co-investors owned the remainder. At the expiration of the Call Right (as defined below) and the settlement of the associated advances, we expect that we will own approximately 45-50% of the Buyer to the extent we actually make additional capital contributions to the Buyer. As noted below, there can be no assurance that the Call Right will be exercised in full.

In the event that any member does not fund its capital contribution, each other member has the right, but not the obligation, to make pro rata capital contributions in excess of its stated commitment, provided that any member's decision not to fund any such capital contribution will result in a pro rata reduction of its membership percentage to the extent funded by other members. For more information about the rights of the members of the Buyer, see

Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Servicing Related Assets Servicer Advances The Buyer.

Call Right and Transaction 2

In Transaction 1, the Buyer has the right, but not the obligation (the Call Right), to purchase from Nationstar any or all servicer advances in a par amount of \$3.1 billion as of December 31, 2013 and the basic fee of the related MSR on two pools of Non-Agency mortgage loans (Transaction 2). The terms of Transaction 2 will be substantially similar to the terms of Transaction 1, subject to the receipt of applicable consents. The Call Right expires on June 30, 2014.

The Buyer exercised a portion of the Call Right in February and March 2014. The outstanding balance of the servicer advances subject to the portion of the Call Right that was exercised was approximately \$1.1 billion as of the exercise dates, February 28, 2014 and March 7, 2014. If the Buyer exercises the Call Right in full, it expects to fund the total purchase price with approximately \$2.5 billion of debt and \$0.3 billion of equity, excluding working capital. As of the date hereof, the Buyer has settled \$1.1 billion of advances related to Transaction 2, which was financed with approximately \$0.9 billion of debt. The remaining balance of the Call Right is expected to be settled in the second quarter of 2014. There can be no assurance that Transaction 2 will be completed on the terms we expect or at all. The remaining servicer advances that are subject to the Call Right cannot be purchased unless and until the related financings are repaid or renegotiated or until the related collateral is released in accordance with the terms of such financings (which would require the consent of various third parties).

Servicing Fee

Nationstar remains the named servicer under the servicing agreements related to the pools and will continue to perform all servicing duties for the pools. In exchange for its services, the Buyer will pay Nationstar a monthly servicing fee (the Servicing Fee) representing a portion of the Purchased Basic Fee.

The Servicing Fee is equal to a fixed percentage (the Servicing Fee Percentage) of the Basic Fee Amounts. The Servicing Fee Percentage as of December 31, 2013 was approximately 8.6%, which is equal to (i) 2 basis points divided by (ii) the basic fee of the pools, which was 23.2 basis points on a weighted average basis as of December 31, 2013.

Targeted Return

The Targeted Return is designed to achieve three objectives: (i) provide a reasonable risk-adjusted return to the Buyer based on the expected amount and timing of estimated cash flows from the Purchased Basic Fee and the Funded Advances, with both upside and downside based on the performance of the investment, (ii) provide

Table of Contents

Nationstar with a sufficient fee to compensate it for acting as servicer, and (iii) provide Nationstar with an incentive to effectively service the underlying loans. The Targeted Return implements these objectives by allocating the Purchased Basic Fee between the Buyer and Nationstar.

The amount available to satisfy the Targeted Return is equal to: (i) the Basic Fee Amounts, minus (ii) the Servicing Fee (Net Collections). The Buyer will retain the amount of Net Collections necessary to achieve the Targeted Return. Amounts in excess of the Targeted Return will be used to pay the Performance Fee.

The Targeted Return, which is payable monthly, is equal to (i) 14% multiplied by (ii) the Buyer's total invested capital in the Funded Advances. Total invested capital, as defined in the Purchase Agreement, is the sum of the Buyer's (i) equity in Funded Advances as of the beginning of the prior month, plus (ii) working capital (equal to a percentage of the equity as of the beginning of the prior month), plus (iii) equity and working capital contributed during the course of the prior month.

The Targeted Return is calculated after giving effect to (i) interest expense on the advance financing, (ii) other expenses and fees of the Buyer related to the financing, (iii) write-offs on account of any non-recoverable servicer advances, and (iv) any shortfall with respect to a prior month in the satisfaction of the Targeted Return (collectively, the Fees and Expenses).

Performance Fee

The Performance Fee is calculated as follows. Pursuant to the Purchase Agreement, Net Collections is divided into two subsets: the Retained Amount and the Surplus Amount. The Retained Amount is equal to 15.4 basis points of the UPB of the pools related to the basic fee, and the Surplus Amount is the remainder. If the amount necessary to achieve the Targeted Return is equal to or less than the Retained Amount, then 50% of the excess Retained Amount (if any) and 100% of the Surplus Amount is paid to Nationstar as the Performance Fee. If the amount necessary to achieve the Targeted Return is greater than the Retained Amount but less than Net Collections, then 100% of the excess Surplus Amount is paid to Nationstar as a Performance Fee.

For a simplified example of the allocation of the Purchased Basic Fee pursuant to the Purchase Agreement, for a given month, see Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Servicing Related Assets Servicer Advances Illustrative Example.

Residential Securities and Loans

Agency ARM RMBS

As of December 31, 2013, we owned \$1.3 billion face amount of Agency ARM RMBS, as described in the table below (in thousands).

Summary of Agency ARM RMBS as of December 31, 2013

Asset Type	Outstanding Face Amount	Amortized Cost Basis ¹	Gross Unrealized		Carrying Value ^{1, 2}	Outstanding Repurchase Agreements
			Gains	Losses		

Agency ARM RMBS	\$ 1,314,130	\$ 1,392,612	\$ 3,434	\$ (3,885)	\$ 1,392,161	\$ 1,332,954
-----------------	--------------	--------------	----------	------------	--------------	--------------

- (1) Amortized cost basis and carrying value exclude \$10.6 million of principal receivables as of December 31, 2013.
- (2) Fair value, which is equal to carrying value for all securities.

Table of Contents

Subsequent to December 31, 2013, we acquired no new Agency ARM RMBS. We sold five Agency ARM RMBS with a face amount of approximately \$154.2 million and an amortized cost basis of approximately \$162.2 million for approximately \$162.9 million, recording a gain on sale of approximately \$0.7 million. Prior to the sale, impairment was recorded on these five Agency ARM RMBS of approximately \$1.0 million.

Additional information about our investments in Agency ARM RMBS is set forth under Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Residential Securities and Loans Real Estate Securities Agency ARM RMBS and Business Our Portfolio Residential Securities and Loans Real Estate Securities Agency ARM RMBS.

Non-Agency RMBS

As of December 31, 2013, we had approximately \$872.9 million face amount of Non-Agency RMBS, as described in the table below (in thousands).

Summary of Non-Agency RMBS as of December 31, 2013

Asset Type	Outstanding Face Amount	Amortized Cost Basis	Gross Unrealized		Carrying Value ⁽¹⁾	Outstanding Repurchase Agreements
			Gains	Losses		
Non-Agency RMBS	\$ 872,866	\$ 566,760	\$ 7,618	\$ (3,953)	\$ 570,425	\$ 287,757

(1) Fair value, which is equal to carrying value for all securities.

On October 30, 2013, we terminated our existing \$342.9 million master repurchase agreement and entered into a new \$414.2 million master repurchase agreement with Alpine Securitization Corp., an asset-backed commercial paper facility sponsored by Credit Suisse AG, an affiliate of Credit Suisse Securities (USA) LLC, one of the underwriters of this offering, which has a one year maturity and is subject to margin calls. The new \$414.2 million master repurchase agreement is subject to margin call provisions as well as customary loan covenants and event of default provisions, including event of default provisions triggered by a 50% equity decline over any 12 month period and 35% equity decline over any 3 month period and a four-to-one indebtedness to tangible net worth provision. The financing bears interest at one-month LIBOR plus 1.75%. As of January 22, 2014, \$104.0 million has been drawn on the facility. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Debt Obligations.

Subsequent to December 31, 2013, we acquired Non-Agency RMBS with an aggregate face amount of approximately \$740.6 million for approximately \$308.9 million. We sold eight Non-Agency RMBS with a face amount of approximately \$437.9 million and an amortized cost basis of approximately \$244.6 million for approximately \$248.5 million, recording a gain on sale of approximately \$3.8 million.

Additional information about our investments in Non-Agency RMBS is set forth under Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Residential Securities and Loans Real Estate Securities Non-Agency RMBS and Business Our Portfolio Residential Securities and Loans Real Estate Securities Non-Agency RMBS.

Real Estate Loans

As of December 31, 2013, we had approximately \$57.6 million outstanding face amount of residential mortgage loans. In February 2013, we invested approximately \$35.1 million to acquire a 70% interest in the mortgage

Table of Contents

loans. Nationstar co-invested pari passu with us in 30% of the mortgage loans and is the servicer of the loans, performing all servicing and advancing functions, and retaining the ancillary income, servicing obligations and liabilities as the servicer. On December 31, 2013, Nationstar financed the mortgage loans and related participation interests in a repurchase facility with Barclays Bank PLC, an affiliate of Barclays Capital Inc., one of the underwriters of this offering, which resulted in our receipt of approximately \$22.8 million of financing proceeds corresponding to our 70% interest in the mortgage loans. Additional information about our investments in residential mortgage loans is set forth under Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Residential Securities and Loans Real Estate Loans Residential Mortgage Loans and Business Our Portfolio Residential Securities and Loans Real Estate Loans Residential Mortgage Loans.

On November 25, 2013, we entered into a \$300.0 million master repurchase agreement with The Royal Bank of Scotland plc (RBS) with advance rates ranging from 65% to 85% and an interest cost of one-month LIBOR plus 2.5% to 2.75%. The repurchase agreement, which contains customary covenants and event of default provisions and is subject to margin calls, will be used to finance the purchase of residential mortgage loans and matures on November 24, 2014. As of January 22, 2014, we had drawn \$60.1 million under this facility.

In the fourth quarter of 2013, we purchased a portfolio of non-performing residential mortgage loans with a UPB of approximately \$170.1 million at a price of approximately \$92.7 million. The purchase was financed using the \$300.0 million master repurchase agreement with RBS discussed above.

On January 15, 2014, we also purchased a portfolio of non-performing residential mortgage loans with a UPB of approximately \$65.6 million at a price of approximately \$33.7 million. To finance this purchase, on January 15, 2014, we entered into a \$25.3 million repurchase agreement with Credit Suisse Securities (USA) LLC, one of the underwriters of this offering, which matures on January 14, 2015. Borrowings under the agreement bear interest equal to the sum of (i) a floating rate index rate equal to one-month LIBOR and (ii) a margin of 3.00%. The agreement contains customary covenants and event of default provisions.

Other Investments

On April 1, 2013, we completed, through newly formed limited liability companies (together, the Consumer Loan Companies), a co-investment in a portfolio of consumer loans with a UPB of approximately \$4.2 billion as of December 31, 2012. The portfolio includes over 400,000 personal unsecured loans and personal homeowner loans originated through subsidiaries of HSBC Finance Corporation. The Consumer Loan Companies acquired the portfolio from HSBC Finance Corporation and its affiliates. We invested approximately \$250 million for 30% membership interests in each of the Consumer Loan Companies. Of the remaining 70% of the membership interests, Springleaf Finance Inc. (Springleaf), which is majority-owned by Fortress funds managed by our Manager, acquired 47% and an affiliate of Blackstone Tactical Opportunities Advisors L.L.C. acquired 23%. Springleaf acts as the managing member of the Consumer Loan Companies. On January 8, 2014, we financed all of our ownership interest in each of the Consumer Loan Companies under a \$150.0 million master repurchase agreement with Credit Suisse Securities (USA) LLC, one of the underwriters of this offering, which matures on June 30, 2014. Borrowings under the facility bear interest equal to the sum of (i) a floating rate index rate equal to one-month LIBOR and (ii) a margin of 4.00%. The facility contains customary covenants and event of default provisions.

The Consumer Loan Companies initially financed \$2.2 billion (\$1.7 billion outstanding as of December 31, 2013) of the approximately \$3.0 billion purchase price with asset-backed notes that have a maturity of April 2021, and pay a coupon of 3.75%. In September 2013, the Consumer Loan Companies issued and sold an additional \$372.0 million of asset-backed notes for 96% of par. These notes are subordinate to the debt issued in April 2013, have a maturity of December 2024, and pay a coupon of 4%.

Table of Contents

The Consumer Loan Companies were formed on March 19, 2013, for the purpose of making this investment, and commenced operations upon the completion of the investment. After a servicing transition period, Springleaf is now the servicer of the loans and will provide all servicing and advancing functions for the portfolio. Additional information about our investment in consumer loans is set forth under Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Other Consumer Loans and Business Our Portfolio Other Investments.

Financing Strategy

Our objective is to generate attractive risk-adjusted returns for our stockholders without excessive use of leverage. We do not have a predetermined target leverage level. The amount of leverage we deploy for a

particular investment depends upon an assessment of a variety of factors, which may include the anticipated liquidity and price volatility of our assets; the gap between the duration of assets and liabilities, including hedges; the availability and cost of financing the assets; our opinion of the creditworthiness of financing counterparties; the health of the U.S. economy and the residential mortgage and housing markets; our outlook for the level, slope and volatility of interest rates; the credit quality of the loans underlying our RMBS; and our outlook for asset spreads relative to financing costs. See Management's Discussion and Analysis of Financial Condition Liquidity and Capital Resources Debt Obligations for additional details.

Servicing Related Assets

Excess MSR's

We have funded the acquisition of Excess MSR's primarily on an unlevered basis. On December 13, 2013, we entered into a \$75.0 million secured corporate loan with Credit Suisse First Boston Mortgage LLC, an affiliate of Credit Suisse Securities (USA) LLC, one of the underwriters of this offering. The loan bears interest equal to the sum of (i) a floating rate index rate equal to one-month LIBOR and (ii) a margin of 4.00%. The loan contains customary covenants and event of default provisions, including event of default provisions triggered by a 50% equity decline as of the end of the corresponding period in the prior fiscal year, or a 35% equity decline as of the end of the quarter immediately preceding the most recently completed fiscal quarter and a four-to-one indebtedness to tangible net worth provision. As of December 31, 2013, the loan was fully drawn. Subsequent to December 31, 2013, the loan was paid down by \$5.9 million, and the maturity was extended to May 31, 2014.

Servicer Advances

As of December 31, 2013, the Buyer had approximately \$2.4 billion of drawn principal under the Original Notes to finance the advances with an interest rate equal to the sum of (i) a floating rate index rate equal to one-month LIBOR cost of funds rate, as applicable, and (ii) a margin ranging from 2.0% to 2.6%, borrowing capacity of up to \$3.9 billion in aggregate and maturity dates in September 2014. A portion of the outstanding Original Notes were repaid with the proceeds of new notes issued in March 2014. After giving effect to such repayments, the Barclays Facility was terminated and the borrowing capacity under the Credit Suisse Facility was reduced to \$1.5 billion.

Residential Securities and Loans

RMBS

As of December 31, 2013, we had outstanding repurchase agreements with an aggregate face amount of approximately \$287.8 million to finance Non-Agency RMBS and approximately \$1.3 billion to finance Agency ARM RMBS. Our repurchase agreements generally have 30 day terms and are subject to margin calls. On October 30, 2013, we replaced an existing master repurchase agreement with a new \$414.2 million master

Table of Contents

repurchase agreement with Alpine Securitization Corp., an asset-backed commercial paper facility sponsored by Credit Suisse AG, an affiliate of Credit Suisse Securities (USA) LLC, one of the underwriters of this offering, which has a one year maturity and is subject to margin calls. As of January 22, 2014, \$104.0 million has been drawn on the facility.

Under repurchase agreements, we sell a security to a counterparty and concurrently agree to repurchase the same security at a later date for a higher specified price. The sale price represents financing proceeds, and the difference between the sale and repurchase prices represents interest on the financing. The price at which the security is sold generally represents the market value of the security less a discount or haircut, which can range broadly, for example from 5% for Agency ARM RMBS to between 20% and 40% for Non-Agency RMBS. During the term of the repurchase agreement, the counterparty holds the security as collateral. If the agreement is subject to margin calls, the counterparty monitors and calculates what it estimates to be the value of the collateral during the term of the agreement. If this value declines by more than a de minimis threshold, the counterparty could require us to post additional collateral (or margin) in order to maintain the initial haircut on the collateral. This margin is typically required to be posted in the form of cash and cash equivalents.

These repurchase agreements have terms that generally conform to the terms of the standard master repurchase agreement published by the Securities Industry and Financial Markets Association (SIFMA) as to repayment, margin requirements and segregation of all securities sold under any repurchase transactions. In addition, each counterparty typically requires that we include supplemental terms and conditions to the standard master repurchase agreement. Typical supplemental terms and conditions include changes to the margin maintenance requirements, required haircuts, purchase price maintenance requirements, requirements that all controversies related to the repurchase agreement be litigated in a particular jurisdiction and cross default provisions. These provisions may differ for each of our counterparties and are not determined until we engage in a specific repurchase transaction.

Residential Mortgage Loans

On November 25, 2013, we also entered into a \$300.0 million master repurchase agreement with RBS with advance rates ranging from 65% to 85% and an interest cost of one-month LIBOR plus 2.5% to 2.75%. The repurchase agreement, which contains customary covenants and event of default provisions and is subject to margin calls, will be used to finance the purchase of residential mortgage loans and matures on November 24, 2014. Pursuant to the repurchase agreement we may sell, and later repurchase, (x) trust certificates representing interests in certain residential mortgage loans and (y) the capital stock of a corporation that holds certain real estate owned properties (collectively, the Purchased Assets). The principal amount paid by RBS for such Purchased Assets is based on a percentage of the lesser of the market value or the UPB of such mortgage assets backing the Purchased Assets. Upon our repurchase of Purchased Assets sold under the repurchase agreement, we are required to repay RBS a repurchase amount based on the purchase price plus accrued interest. We are also required to pay certain administrative costs and expenses in connection with the structuring, management and ongoing administration of the repurchase agreement. As of January 22, 2014, we had drawn \$60.1 million under this facility.

On January 15, 2014, we entered into a \$25.3 million repurchase agreement with Credit Suisse Securities (USA) LLC, one of the underwriters of this offering, which matures on January 14, 2015. Borrowings under the agreement bear interest equal to the sum of (i) a floating rate index rate equal to one-month LIBOR and (ii) a margin of 3.00%. The agreement contains customary covenants and event of default provisions, including event of default provisions triggered by a 50% equity decline as of the end of the corresponding period in the prior fiscal year, or a 35% equity decline as of the end of the quarter immediately preceding the most recently completed fiscal quarter and a four-to-one indebtedness to tangible net worth provision.

Table of Contents***Consumer Loans***

On January 8, 2014, we financed all of our ownership interest in each of the Consumer Loan Companies under a \$150.0 million master repurchase agreement with Credit Suisse Securities (USA) LLC, one of the underwriters of this offering, which matures on June 30, 2014. Borrowings under the facility bear interest equal to the sum of (i) a floating rate index rate equal to one-month LIBOR and (ii) a margin of 4.00%. The facility contains customary covenants and event of default provisions.

Management Agreement

In connection with our spin-off from Newcastle, we entered into a Management Agreement with our Manager. Our Management Agreement requires our Manager to manage our business affairs in conformity with broad investment guidelines adopted and monitored by our board of directors. For more information about our investment guidelines, see *Business Investment Guidelines* included elsewhere in this prospectus.

Our Management Agreement has an initial one-year term and is automatically renewed for one-year terms thereafter unless terminated either by us or our Manager. Our Manager is entitled to receive from us a management fee and is eligible to receive incentive compensation that is based on our performance. In addition, we are obligated to reimburse certain expenses incurred by our Manager. Our Manager is also entitled to receive a termination fee from us under certain circumstances. The terms of our Management Agreement are summarized below and described in more detail under *Our Manager and Management Agreement* elsewhere in this prospectus.

Type**Description**

Management Fee

1.5% per annum of our gross equity calculated and payable monthly in arrears in cash. Gross equity is generally the equity that was transferred to us by Newcastle on the distribution date, plus total net proceeds from common and preferred stock offerings, plus certain capital contributions to subsidiaries, less capital distributions and repurchases of common stock. From the date of the spin-off through December 31, 2013, we have accrued \$11.2 million in management fees.

Incentive Compensation

Our Manager is entitled to receive annual incentive compensation in an amount equal to the product of (A) 25% of the dollar amount by which (1)(a) the funds from operations before the incentive compensation, excluding funds from operations from investments in the Consumer Loan Companies and any unrealized gains or losses from mark-to-market valuation changes on Excess MSR and on equity method investees invested in Excess MSR, per share of common stock, plus (b) earnings (or losses) from the Consumer Loan Companies computed on a level-yield basis (such that the loans are treated as if they qualified as loans acquired with a discount for credit quality as set forth in ASC 310-30, as such codification was in effect on June 30, 2013) as if the Consumer Loan Companies had been acquired at their GAAP basis on the distribution date, earnings (or losses) from equity method investees invested in Excess MSR as if such equity method investees had not made a fair value election, and gains (or losses) from

debt restructuring and gains (or losses) from sales of property, in each case per share of common stock, exceed (2) an amount equal to (a) the weighted average of the book value per share of the equity that was transferred to us by Newcastle on the distribution date and the prices per share of our common stock

Table of Contents**Type****Description**

in any offerings by us (adjusted for prior capital dividends or capital distributions) multiplied by (b) a simple interest rate of 10% per annum, multiplied by (B) the weighted average number of shares of common stock outstanding.

Reimbursement of Expenses

Funds from operations means net income (computed in accordance with U.S. generally accepted accounting principles (GAAP)), excluding gains (losses) from debt restructuring and gains (or losses) from sales of property, plus depreciation on real estate assets, and after adjustments for unconsolidated partnerships and joint ventures. Funds from operations will be computed on an unconsolidated basis. The computation of funds from operations may be adjusted at the direction of our independent directors based on changes in, or certain applications of, GAAP. Funds from operations are determined from the date of our separation from Newcastle and without regard to Newcastle s prior performance. Funds from operations does not represent cash generated from operating activities in accordance with GAAP and should not be considered as an alternative to net income as an indication of our performance or to cash flows as a measure of liquidity or ability to make distributions. From the date of the spin-off through December 31, 2013, we have accrued \$16.8 million in incentive compensation. We pay, or reimburse our Manager, for performing certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, provided that such costs and reimbursements are no greater than those which would be paid to outside professionals or consultants on an arm s-length basis and shall not be reimbursed in excess of \$500,000 per annum. We also pay all operating expenses, except those specifically required to be borne by our Manager under our Management Agreement. Our Manager is responsible for all costs incident to the performance of its duties under the Management Agreement, including compensation of our Manager s employees, rent for facilities, and other overhead expenses; we do not reimburse our Manager for these expenses. The expenses required to be paid by us include, but are not limited to, issuance and transaction costs incident to the acquisition, disposition and financing of our investments, legal and auditing fees and expenses, the compensation and expenses of our independent directors, the costs associated with the establishment and maintenance of any credit facilities and other indebtedness of ours (including commitment fees, legal fees, closing costs, etc.), expenses associated with other securities offerings of ours, the costs of printing and mailing proxies and reports to our stockholders, costs incurred by employees of our manager for travel on our behalf, costs associated with any computer software or hardware that is used solely for us, costs to obtain liability insurance to indemnify our directors and officers and the compensation and expenses of our transfer agent. From the date of the spin-off through December 31, 2013, we have accrued \$0.5 million for reimbursement to our

Manager.

Table of Contents

Type	Description
Termination Fee	The termination fee is a fee equal to the sum of (1) the amount of the management fee during the 12 months immediately preceding the date of termination, and (2) the Incentive Compensation Fair Value Amount. The Incentive Compensation Fair Value Amount is an amount equal to the Incentive Compensation that would be paid to the Manager if our assets were sold for cash at their then current fair market value (as determined by an appraisal, taking into account, among other things, the expected future value of the underlying investments).

Summary Risk Factors

You should carefully read and consider the risk factors set forth under Risk Factors, as well as all other information contained in this prospectus. If any of the following risks occur, our business, financial condition, liquidity and results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline significantly, and you could lose all or a portion of your investment.

We have a very limited operating history as an independent company and may not be able to successfully operate our business strategy or generate sufficient revenue to make or sustain distributions to our stockholders. The financial information included in this prospectus may not be indicative of the results we would have achieved as a separate stand-alone company and are not a reliable indicator of our future performance or results.

The value of our Excess MSR and servicer advances is based on various assumptions that could prove to be incorrect and could have a negative impact on our financial results.

Servicer advances may not be recoverable or may take longer to recover than we expect, which could cause us to fail to achieve our targeted return on our investment in servicer advances.

We rely heavily on mortgage servicers to achieve our investment objective and have no direct ability to influence their performance.

We have significant counterparty concentration risk in Nationstar and Springleaf and are subject to other counterparty concentration and default risks.

GSE initiatives and other actions may adversely affect returns from investments in Excess MSRs.

Many of our investments may be illiquid, and this lack of liquidity could significantly impede our ability to vary our portfolio in response to changes in economic and other conditions or to realize the value at which such investments are carried if we are required to dispose of them.

Many of the RMBS in which we invest are collateralized by subprime mortgage loans, which are subject to increased risks.

The value of our Excess MSR, servicer advances and RMBS may be adversely affected by deficiencies in servicing and foreclosure practices, as well as related delays in the foreclosure process.

The lenders under our repurchase agreements may elect not to extend financing to us, which could quickly and seriously impair our liquidity.

Our investments in RMBS may be subject to significant impairment charges, which would adversely affect our results of operations.

We may not be able to finance our investments on attractive terms or at all, and financing for Excess MSR may be particularly difficult to obtain.

Table of Contents

The consumer loans underlying our investments are subject to delinquency and loss, which could have a negative impact on our financial results.

Interest rate fluctuations and shifts in the yield curve may cause losses.

Maintenance of our exclusion under the 1940 Act imposes limits on our operations.

We are dependent on our Manager and may not find a suitable replacement if our Manager terminates the Management Agreement.

There are conflicts of interest in our relationship with our Manager.

Our directors have approved broad investment guidelines for our Manager and do not approve each investment decision made by our Manager. In addition, we may change our investment strategy without a stockholder vote, which may result in our making investments that are different, riskier or less profitable than our current investments.

We may compete with affiliates of our Manager, including Newcastle, which could adversely affect our and their results of operations.

We do not know what impact the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) will have on our business.

Our failure to qualify as a REIT would result in higher taxes and reduced cash available for distribution to our stockholders.

The failure of assets subject to repurchase agreements to qualify as real estate assets could adversely affect our ability to qualify as a REIT.

The failure of our Excess MSR to qualify as real estate assets or the income from our Excess MSR to qualify as mortgage interest could adversely affect our ability to qualify as a REIT.

REIT distribution requirements could adversely affect our liquidity and our ability to execute our business plan.

Your percentage ownership in us may be diluted in the future.

Conflicts of Interest

Although we have established certain policies and procedures designed to mitigate conflicts of interest, there can be no assurance that these policies and procedures will be effective in doing so. It is possible that actual, potential or perceived conflicts of interest could give rise to investor dissatisfaction, litigation or regulatory enforcement actions.

One or more of our officers and directors have responsibilities and commitments to entities other than us, including, but not limited to, Newcastle, Nationstar and Springleaf. For example, we have some of the same directors and officers as Newcastle, Nationstar and Springleaf. In addition, we do not have a policy that expressly prohibits our directors, officers, securityholders or affiliates from engaging for their own account in business activities of the types conducted by us. However, our code of business conduct and ethics prohibits, subject to the terms of our certificate of incorporation, the directors, officers and employees of our Manager from engaging in any transaction that involves an actual conflict of interest with us. See [Risk Factors](#) [Risks Related to Our Manager](#) There are conflicts of interest in our relationship with our Manager.

Our key agreements, including our Management Agreement, were negotiated among related parties, and their respective terms, including fees and other amounts payable, may not be as favorable to us as terms negotiated on an arm's-length basis with unaffiliated parties. Our independent directors may not vigorously enforce the

Table of Contents

provisions of our Management Agreement against our Manager. For example, our independent directors may refrain from terminating our Manager because doing so could result in the loss of key personnel.

The structure of the Manager's compensation arrangement may have unintended consequences for us. We have agreed to pay our Manager a management fee that is not tied to our performance and incentive compensation that is based entirely on our performance. The management fee may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us, while the performance-based incentive compensation component may cause our Manager to place undue emphasis on the maximization of earnings, including through the use of leverage, at the expense of other objectives, such as preservation of capital, to achieve higher incentive distributions. Investments with higher yield potential are generally riskier or more speculative than investments with lower yield potential. This could result in increased risk to the value of our portfolio of assets and your investment in us.

We may compete with entities affiliated with our Manager or Fortress, including Newcastle, for certain target assets. From time to time, affiliates of Fortress may focus on investments in assets with a similar profile as our target assets that we may seek to acquire. These affiliates may have meaningful purchasing capacity, which may change over time depending upon a variety of factors, including, but not limited to, available equity capital and debt financing, market conditions and cash on hand. Currently, Fortress has two funds primarily focused on investing in Excess MSR's with approximately \$1.7 billion in capital commitments in aggregate. We intend to co-invest with these funds in Excess MSR's. Fortress funds generally have a fee structure similar to ours, but the fees actually paid will vary depending on the size, terms and performance of each fund. Fortress had approximately \$61.8 billion of assets under management as of December 31, 2013.

Our Manager may determine, in its discretion, to make a particular investment through an investment vehicle other than us. Investment allocation decisions will reflect a variety of factors, such as a particular vehicle's availability of capital (including financing), investment objectives and concentration limits, legal, regulatory, tax and other similar considerations, the source of the investment opportunity and other factors that the Manager, in its discretion, deems appropriate. Our Manager does not have an obligation to offer us the opportunity to participate in any particular investment, even if it meets our investment objectives.

Operational and Regulatory Structure

REIT Qualification

We will elect to be taxed and intend to qualify as a REIT for U.S. federal income tax purposes commencing with our initial taxable year ended December 31, 2013. Our qualification as a REIT will depend upon our ability to meet, on a continuing basis, various complex requirements under the Internal Revenue Code of 1986, as amended (the "Code"), relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels to our stockholders and the concentration of ownership of our capital stock. We believe that, commencing with our initial taxable year ended December 31, 2013, we will be organized in conformity with the requirements for qualification and taxation as a REIT under the Code, and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT. In connection with this offering, we will receive an opinion of Skadden, Arps, Slate, Meagher & Flom LLP to the effect that we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Code, and that our proposed method of operation will enable us to meet the requirements for qualification and taxation as a REIT.

1940 Act Exclusion

We intend to continue to conduct our operations so that neither we nor any of our subsidiaries are required to register as an investment company under the 1940 Act. Section 3(a)(1)(A) of the 1940 Act defines an investment

Table of Contents

company as any issuer that is or holds itself out as being engaged primarily in the business of investing, reinvesting or trading in securities. Section 3(a)(1)(C) of the 1940 Act defines an investment company as any issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities and owns or proposes to acquire investment securities having a value exceeding 40% of the value of the issuer's total assets (exclusive of U.S. Government securities and cash items) on an unconsolidated basis (the 40% test). Excluded from the term investment securities, among other things, are U.S. Government securities and securities issued by majority owned subsidiaries that are not themselves investment companies and are not relying on the exclusion from the definition of investment company for private funds set forth in Section 3(c)(1) or Section 3(c)(7) of the 1940 Act.

We are organized as a holding company that conducts its businesses primarily through wholly owned and majority owned subsidiaries. We intend to continue to conduct our operations so that we do not come within the definition of an investment company because less than 40% of the value of our adjusted total assets on an unconsolidated basis will consist of investment securities in compliance with the 40% test under Section 3(a)(1)(C) of the 1940 Act. The value of securities issued by any wholly owned or majority owned subsidiaries that we may form in the future that are excluded from the definition of investment company based on Section 3(c)(1) or 3(c)(7) of the 1940 Act, together with any other investment securities we may own, may not exceed the 40% test under Section 3(a)(1)(C) of the 1940 Act. For purposes of the foregoing, we currently treat our interests in our taxable REIT subsidiaries that hold our servicer advances and our subsidiaries that hold consumer loans as investment securities because these subsidiaries presently rely on the exclusion provided by Section 3(c)(7) of the 1940 Act. We will monitor our holdings to ensure continuing and ongoing compliance with the 40% test under Section 3(a)(1)(C) of the 1940 Act. In addition, we believe we will not be considered an investment company under Section 3(a)(1)(A) of the 1940 Act because we will not engage primarily or hold ourselves out as being engaged primarily in the business of investing, reinvesting or trading in securities. Rather, through our wholly owned subsidiaries, we will be primarily engaged in the non-investment company businesses of these subsidiaries.

If the value of securities issued by our subsidiaries that are excluded from the definition of investment company by Section 3(c)(1) or 3(c)(7) of the 1940 Act, together with any other investment securities we own, exceeds the 40% test under Section 3(a)(1)(C) of the 1940 Act (e.g., the value of our interests in the taxable REIT subsidiaries that hold servicer advances increases significantly in proportion to the value of our other assets), or if one or more of such subsidiaries fail to maintain an exclusion or exception from the 1940 Act, we could, among other things, be required either (a) to substantially change the manner in which we conduct our operations to avoid being required to register as an investment company or (b) to register as an investment company under the 1940 Act, either of which could have an adverse effect on us and the market price of our securities. As discussed above, for purposes of the foregoing, we currently treat our interests in our TRSs that hold our servicer advances and our subsidiaries that hold consumer loans as investment securities because these subsidiaries presently rely on the exclusion provided by Section 3(c)(7) of the 1940 Act. If we were required to register as an investment company under the 1940 Act, we could, among other things, be required either to (a) change the manner in which we conduct our operations to avoid being required to register as an investment company, (b) effect sales of our assets in a manner that, or at a time when, we would not otherwise choose to do so, or (c) register as an investment company, any of which could negatively affect the value of our common stock, the sustainability of our business model, and our ability to make distributions.

For purposes of the foregoing, we treat our interests in certain of our wholly owned and majority owned subsidiaries, which constitutes more than 60% of the value of our adjusted total assets on an unconsolidated basis, as non-investment securities because such subsidiaries qualify for exclusion from the definition of an investment company under the 1940 Act pursuant to Section 3(c)(5)(C) of the 1940 Act (the Section 3(c)(5)(C) exclusion). The Section 3(c)(5)(C) exclusion is available for entities primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate. The

Table of Contents

Section 3(c)(5)(C) exclusion generally requires that at least 55% of these subsidiaries' assets comprise qualifying real estate assets and at least 80% of each of their portfolios must comprise qualifying real estate assets and real estate-related assets under the 1940 Act. We expect each of our subsidiaries relying on Section 3(c)(5)(C) to rely on guidance published by the SEC staff or on our analyses of guidance published with respect to other types of assets to determine which assets are qualifying real estate assets and real estate-related assets. To the extent that the SEC staff publishes new or different guidance with respect to these matters, or disagrees with our analysis, we may be required to adjust our strategy accordingly. In addition, we may be limited in our ability to make certain investments and these limitations could result in the subsidiary holding assets we might wish to sell or selling assets we might wish to hold.

In August 2011, the SEC issued a concept release soliciting public comments on a wide range of issues relating to companies engaged in the business of acquiring mortgages and mortgage-related instruments and that rely on Section 3(c)(5)(C) of the 1940 Act. Therefore, there can be no assurance that the laws and regulations governing the 1940 Act status of REITs, or guidance from the SEC or its staff regarding the Section 3(c)(5)(C) exclusion, will not change in a manner that adversely affects our operations. If we or our subsidiaries fail to maintain an exclusion or exception from the 1940 Act, we could, among other things, be required either to (a) change the manner in which we conduct our operations to avoid being required to register as an investment company, (b) effect sales of our assets in a manner that, or at a time when, we would not otherwise choose to do so, or (c) register as an investment company, any of which could negatively affect the value of our common stock, the sustainability of our business model, and our ability to make distributions.

See **Business Operational and Regulatory Structure** **1940 Act Exclusion** for a further discussion of the specific exclusions under the 1940 Act that our subsidiaries are expected to rely on and the treatment of certain of our targeted asset classes for purposes of such exclusions.

Qualification for an exclusion from registration under the 1940 Act will limit our ability to make certain investments. See **Risk Factors** **Risks Related to Our Business** **Maintenance of our 1940 Act exclusion** imposes limits on our operations.

Our Corporate Information

We were formed as NIC MSR LLC, a Delaware limited liability company, in September 2011 and were a wholly owned subsidiary of Newcastle. We converted to a Delaware corporation and changed our name to New Residential Investment Corp. in December 2012. On May 15, 2013, we separated from Newcastle through the distribution of our shares of common stock to the stockholders of Newcastle and became a stand-alone publicly traded company. Our principal executive offices are located at 1345 Avenue of the Americas, New York, New York 10105, c/o New Residential Investment Corp. Our telephone number is 212-479-3150. Our web address is www.newresi.com. The information on or otherwise accessible through our web site does not constitute a part of this prospectus or any other report or document we file with or furnish to the SEC.

THE OFFERING

Common stock offered by us	shares.
Common stock offered by the Selling Stockholder	Option Shares.
Common stock to be outstanding after this offering	shares, including the Option Shares sold by the Selling Stockholder which will be issued upon the exercise of outstanding options in connection with the offering (shares if the underwriters exercise their option to purchase additional shares of common stock in full).
Option to purchase additional shares from us	We have granted the underwriters a 30-day option to purchase up to additional shares of our common stock at the public offering price, less underwriting discounts and commission.
Use of proceeds by us	We estimate that the net proceeds to us from this offering, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, will be approximately \$ million, assuming a public offering price of \$ per share, the last reported sales price of our common stock on the New York Stock Exchange (NYSE) on , 2014 (the assumed public offering price) (or \$ million if the underwriters exercise their option to purchase additional shares of common stock in full). We intend to use the net proceeds from this offering for general corporate purposes, including to make a variety of investments, which may include, but is not limited to, investments in Excess MSR, servicer advances, real estate securities and real estate related loans. We will not receive any proceeds from the sale of Option Shares by the Selling Stockholder. See Use of Proceeds.
Distribution policy	We intend to make regular quarterly distributions, which include all or substantially all of our REIT taxable income, to holders of our common stock out of assets legally available for this purpose. Any distributions will be authorized by our board of directors and declared by us based on a number of factors, including actual results of operations, liquidity and financial condition, restrictions under Delaware law or applicable financing covenants, our taxable income, the annual distribution requirements under the REIT provisions of the Code, our operating expenses and other factors our directors deem relevant. For more information, see Distribution Policy included elsewhere in this

prospectus.

Ownership and transfer restrictions

To assist us in qualifying as a REIT, among other purposes stockholders are generally restricted from owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of

Table of Contents

shares, whichever is more restrictive, of our outstanding shares of capital stock. In addition, our certificate of incorporation contains various other restrictions on the ownership and transfer of our common stock. See Description of Our Capital Stock Restrictions on Ownership and Transfer of Our Capital Stock.

Risk Factors

Investing in our common stock involves a high degree of risk. See Risk Factors beginning on page 32.

Except as otherwise indicated, all information in this prospectus assumes no exercise by the underwriters of their option to purchase an additional shares of common stock from us.

The number of shares of our common stock that will be outstanding after this offering is based on 253,209,669 shares of our common stock outstanding as of April 2, 2014, and excludes:

- (i) options to purchase an aggregate of 15,232,638 shares of our common stock held by an affiliate of our Manager,
- (ii) options to purchase an aggregate of 5,157,470 shares of our common stock assigned to employees of affiliates of our Manager,
- (iii) options to purchase an aggregate of 12,000 shares of our common stock held by our directors, and
- (iv) options to purchase shares of our common stock, representing 10% of the number of shares being offered by us hereby, that will be granted to an affiliate of our Manager in connection with this offering, and subject to adjustment if the underwriters exercise their option to purchase additional shares of our common stock.

SUMMARY HISTORICAL AND PRO FORMA FINANCIAL INFORMATION

We were formed in September 2011 as NIC MSR LLC, a Delaware limited liability company and wholly owned subsidiary of Newcastle. We converted to a Delaware corporation and changed our name to New Residential Corp. in December 2012. On May 15, 2013, which we refer to as the separation date or distribution date, we separated from Newcastle through the distribution of our shares of common stock to the stockholders of Newcastle and became a stand-alone publicly traded company.

The following table presents our summary historical and pro forma financial information for the period from the commencement of our operations on December 8, 2011 through December 31, 2011 and for the years ended December 31, 2012 and 2013.

The summary historical consolidated statements of income for the years ended December 31, 2013 and 2012 and for the period from December 8, 2011 (commencement of operations) to December 31, 2011 and the summary historical consolidated balance sheets as of December 31, 2013 and 2012 have been derived from our audited financial statements included elsewhere in this prospectus. The summary historical consolidated balance sheet as of December 31, 2011 has been derived from our audited financial statements not included in this prospectus.

The unaudited pro forma condensed consolidated financial information presented below was derived from the application of pro forma adjustments to our consolidated financial statements. These unaudited pro forma condensed consolidated financial statements should be read in conjunction with the information under Management's Discussion and Analysis of Financial Condition and Results of Operations, and our historical financial statements and related notes, which are included elsewhere in this prospectus.

The unaudited pro forma information set forth below reflects our historical information with certain adjustments. The unaudited pro forma condensed consolidated balance sheet has been adjusted to give effect to all of the transactions described below as if each had occurred on December 31, 2013.

Acquisition and settlement of additional Excess MSRs subsequent to December 31, 2013.

Commitments to acquire additional Excess MSRs subsequent to December 31, 2013.

Acquisition and settlement of additional servicer advances subsequent to December 31, 2013 and the net increase of notes payable thereto.

Repayment of certain notes payable using new notes issued pursuant to an advance receivables trust that issued variable funding and term notes.

The sale of Agency ARM RMBS subsequent to December 31, 2013. The Agency ARM RMBS had a face amount of approximately \$154.2 million and a sales price of approximately \$162.9 million.

Edgar Filing: New Residential Investment Corp. - Form S-11/A

The net decrease in repurchase agreements related to Agency ARM RMBS, which includes the repurchase agreements related to Agency ARM RMBS which had not settled on December 31, 2013.

The purchase and settlement of Non-Agency RMBS subsequent to December 31, 2013. The Non-Agency RMBS had a face amount of approximately \$740.6 million and a purchase price of approximately \$308.9 million.

The sale of Non-Agency RMBS subsequent to December 31, 2013. The Non-Agency RMBS had a face amount of approximately \$437.9 million and a sales price of approximately \$248.5 million.

The net increase in repurchase agreements related to Non-Agency RMBS, which includes the repurchase agreements related to Non-Agency RMBS that had not settled on December 31, 2013.

Acquisition of long and short positions in to-be-announced (TBA) Agency RMBS, which did not require an initial net investment.

The purchase of mezzanine and subordinate tranches of a Non-Agency RMBS securitization previously sponsored by Springleaf and a repurchase agreement to finance this transaction.

Table of Contents

The purchase of non-performing loans which were financed with repurchase agreements and treated as linked transactions with the net basis recorded as a non-hedge derivative instrument.

The \$150.0 million of financing related to our ownership interest in the Consumer Loan Companies.

The offering of _____ shares of common stock by us and _____ Option Shares by the Selling Stockholder to which this prospectus relates.

The unaudited pro forma condensed consolidated statements of income only include adjustments to reflect (i) interest income from certain Agency ARM RMBS acquired or sold during the period from January 1, 2014 through April 3, 2014; (ii) interest expense from the financing of certain Agency ARM RMBS during the period from January 1, 2014 through April 3, 2014; (iii) interest expense from the financing of certain Non-Agency RMBS, Excess MSR, residential mortgage loans and the Consumer Loan Companies during the period from January 1, 2014 through April 3, 2014 and (iv) interest expense from the financing of the Funded Advances subsequent to December 31, 2013, in each case as if the transactions giving rise to (i), (ii), (iii) and (iv), had occurred on January 1, 2013. Accordingly, the unaudited pro forma condensed consolidated statement of income excludes adjustments for (i) earnings from the consumer loan co-investment transaction; (ii) earnings from the additional Excess MSR transactions; (iii) interest income from investments in Non-Agency RMBS; (iv) earnings from the non-performing residential mortgage loans transactions; and (v) earnings from the servicer advances transaction.

Our decision to include or exclude an adjustment in the unaudited pro forma condensed consolidated statement of income was based on whether such adjustment would be factually supportable and historically based, as set forth in more detail below.

With respect to Agency ARM RMBS, Newcastle held substantial investments in Agency ARM RMBS during the entire period covered by the pro forma statement of income. Although Newcastle did not own the exact securities contributed to us for the entire period presented, management considers Agency ARM RMBS to be fungible because, among other factors, they are guaranteed by the U.S. government and thus have consistent credit characteristics. As a result, we determined that adjustments related to these securities are factually supportable.

In contrast to Agency ARM RMBS, the yields of Non-Agency RMBS can have significant variances as a result of differences in the collateral and credit characteristics of each asset. Newcastle did not hold the specific Non-Agency RMBS contributed to us during the entire period presented, and neither Newcastle nor New Residential have records relating to the performance of these assets prior to their acquisition. As a result, management believes that adjustments for the interest income from the Non-Agency RMBS would not be factually supportable.

The investments in equity method investees were made in newly formed entities with no historical operations. Neither we nor Newcastle owned any of the underlying excluded investments prior to their acquisition by the investee entities. Furthermore, the underlying loans were not serviced by an affiliate of our Manager prior to their acquisition. As a result, Newcastle does not have records relating to the performance of these loans prior to the acquisition of the related investments. In addition, the composition of the loan pools and the loans underlying the Excess MSR and consumer loan investees necessarily differ from the composition of the respective pools during the period covered by the pro forma statement of income due to prepayment and default activity prior to acquisition. As a result, an adjustment related to these investees was not considered factually supportable.

The investments in the Funded Advances were also made in a newly formed entity with no historical operations. The Funded Advances were not held by an affiliate of our Manager for the entire period covered by the pro forma

statements of income. In addition, the composition of the Funded Advances balance necessarily differs from the composition of the respective servicer advances covered by the pro forma statements of income due to repayments and new advances made. As a result, an adjustment related to the Funded Advances was not considered factually supportable.

Table of Contents

In the opinion of management, all adjustments necessary to reflect the effects of the transactions described in the notes to the unaudited pro forma condensed consolidated balance sheet and pro forma condensed statement of income have been included and are based upon available information and assumptions that we believe are reasonable.

Further, the historical financial information presented herein has been adjusted to give pro forma effect to events that we believe are factually supportable and which are expected to have a continuing impact on our results. However, such adjustments are estimates and may not prove to be accurate. Information regarding these adjustments is subject to risks and uncertainties that could cause actual results to differ materially from those anticipated. See Risk Factors and Cautionary Statement Regarding Forward-Looking Statements.

The unaudited pro forma financial information below is provided for information purposes only. The unaudited pro forma financial information does not purport to represent what our results of operations and/or financial condition would have been had such transactions been consummated on the dates indicated, nor do they represent our financial condition or results of operations for any future date.

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully read and consider the following risk factors and all other information contained in this prospectus before making a decision to purchase our common stock. If any of the following risks occur, our business, financial condition, liquidity or results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline, which could result in a partial or complete loss of your investment. The risk factors summarized below are categorized as follows: (i) Risks Related to Our Business, (ii) Risks Related to Our Manager, (iii) Risks Related to the Financial Markets, (iv) Risks Related to Our Taxation as a REIT, and (v) Risks Related to Our Common Stock. However, these categories do overlap and should not be considered exclusive.

RISKS RELATED TO OUR BUSINESS

We have a very limited operating history as an independent company and may not be able to successfully operate our business strategy or generate sufficient revenue to make or sustain distributions to our stockholders. The financial information included in this prospectus may not be indicative of the results we would have achieved as a separate stand-alone company and are not a reliable indicator of our future performance or results.

We have very limited experience operating as an independent company and cannot assure you that we will be able to successfully operate our business or implement our operating policies and strategies. We were formed in September 2011 as a subsidiary of Newcastle and spun-off from Newcastle on May 15, 2013. We completed our first investment in Excess MSRs in December 2011, and our Manager has limited experience with transactions involving GSEs. The timing, terms, price and form of consideration that we and servicers pay in future transactions may vary meaningfully from prior transactions.

There can be no assurance that we will be able to generate sufficient returns to pay our operating expenses and make satisfactory distributions to our stockholders, or any distributions at all. Our results of operations and our ability to make or sustain distributions to our stockholders depend on several factors, including the availability of opportunities to acquire attractive assets, the level and volatility of interest rates, the availability of adequate short- and long-term financing, conditions in the real estate market, the financial markets and economic conditions.

We did not operate as a separate, stand-alone company for the entirety of the historical periods presented in the financial information included in this prospectus, which has been derived from Newcastle's historical financial statements. Therefore, the financial information in this prospectus does not necessarily reflect what our financial condition, results of operations or cash flows would have been had we been a separate, stand-alone public company prior to our separation from Newcastle. This is primarily a result of the following factors:

The financial results in this prospectus do not reflect all of the expenses we will incur as a public company;

The working capital requirements and capital for general corporate purposes for our assets were satisfied prior to the spin-off as part of Newcastle's corporate-wide cash management policies of Newcastle. Newcastle will not provide us with funds to finance our working capital or other cash requirements, so we will need to obtain additional financing from banks, through public offerings or private placements of debt or equity securities, strategic relationships or other arrangements; and

Our cost structure, management, financing and business operations are significantly different as a result of operating as an independent public company. These changes result in increased costs, including, but not limited to, fees paid to our Manager, legal, accounting, compliance and other costs associated with being a public company with equity securities traded on the NYSE.

Table of Contents

The value of our investments in Excess MSR and servicer advances is based on various assumptions that could prove to be incorrect and could have a negative impact on our financial results.

When we invest in Excess MSR and servicer advances, we base the price we pay and the rate of amortization of those assets on, among other things, our projection of the cash flows from the related pool of mortgage loans. Our right to the basic fee is an important component of the value of our servicer advances. We record Excess MSR and servicer advances on our balance sheet at fair value, and we measure their fair value on a recurring basis. Our projections of the cash flow from Excess MSR and servicer advances, and the determination of the fair value of Excess MSR and servicer advances, are based on assumptions about various factors, including, but not limited to:

rates of prepayment and repayment of the underlying mortgage loans;

interest rates;

rates of delinquencies and defaults; and

recapture rates (in the case of Excess MSR only) and the amount and timing of servicer advances (in the case of servicer advances only).

Our assumptions could differ materially from actual results. The use of different estimates or assumptions in connection with the valuation of these assets could produce materially different fair values for such assets, which could have a material adverse effect on our consolidated financial position, results of operations and cash flows. The ultimate realization of the value of our Excess MSR and servicer advances may be materially different than the fair values of such assets as reflected in our consolidated statement of financial position as of any particular date.

When mortgage loans underlying our Excess MSR are prepaid as a result of a refinancing or otherwise, the related cash flows payable to us cease (unless the loans are recaptured upon a refinancing). Borrowers under residential mortgage loans are generally permitted to prepay their loans at any time without penalty. Our expectation of prepayment speeds is a significant assumption underlying our cash flow projections. Prepayment speed is the measurement of how quickly borrowers pay down the UPB of their loans or how quickly loans are otherwise brought current, modified, liquidated or charged off. If the fair value of our Excess MSR decreases, we would be required to record a non-cash charge, which would have a negative impact on our financial results. Furthermore, a significant increase in prepayment speeds could materially reduce the ultimate cash flows we receive from Excess MSR, and we could ultimately receive substantially less than what we paid for such assets. Consequently, the price we pay to acquire Excess MSR may prove to be too high.

The values of Excess MSR and our servicer advances are highly sensitive to changes in interest rates. Historically, the value of MSR, which underpin the value of our Excess MSR and servicer advances, has increased when interest rates rise and decreased when interest rates decline due to the effect of changes in interest rates on prepayment speeds. However, prepayment speeds could increase in spite of the current interest rate environment, as a result of a general economic recovery or other factors, which would reduce the value of our interests in MSR.

Moreover, delinquency rates have a significant impact on the value of Excess MSR. When delinquent loans are resolved through foreclosure (or repurchased by the GSEs), the UPB of such loans cease to be a part of the aggregate

UPB of the serviced loan pool when the related properties are foreclosed on and liquidated and the related cash flows payable to us, as the holder of the Excess MSR or basic fee, cease. An increase in delinquencies will generally result in lower revenue because typically we will only collect on our Excess MSRs from GSEs or mortgage owners for performing loans. An increase in delinquencies with respect to the loans underlying our servicer advances could also result in a higher advance balance and the need to obtain additional financing, which we may not be able to do on favorable terms or at all. In addition, delinquencies on the loans underlying our servicer advances give rise to accrued but unpaid servicing fees, or deferred servicing fees, which we have agreed to purchase in connection with our purchase of servicer advances, and deferred servicing fees generally cannot be financed on terms as favorable as the terms available to other types of servicer advances.

Table of Contents

If delinquencies are significantly greater than expected, the estimated fair value of the Excess MSR and servicer advances could be diminished. As a result, we could suffer a loss, which would have a negative impact on our financial results.

We are party to recapture agreements whereby we receive a new Excess MSR with respect to a loan that was originated by the servicer and used to repay a loan underlying an Excess MSR that we previously acquired from that same servicer. In lieu of receiving an Excess MSR with respect to the loan used to repay a prior loan, the servicer may supply a similar Excess MSR. We believe that recapture agreements will mitigate the impact on our returns in the event of a rise in voluntary prepayment rates. There are no assurances, however, that servicers will enter into recapture agreements with us in connection with any future investment in Excess MSRs. If the servicer does not meet anticipated recapture targets, the servicing cash flow on a given pool could be significantly lower than projected, which could have a material adverse effect on the value of our Excess MSRs and consequently on our business, financial condition, results of operations and cash flows. Our recapture target for each of our current recapture agreements is stated in the table in Note 12 to our consolidated financial statements included herein. In our investment in servicer advances, we are not entitled to the cash flows from recaptured loans.

Servicer advances may not be recoverable or may take longer to recover than we expect, which could cause us to fail to achieve our targeted return on our investment in servicer advances.

We have agreed, together with certain third-party investors, to purchase from Nationstar all servicer advances related to certain loan pools, as a result of which we are entitled to amounts representing repayment for such advances. During any period in which a borrower is not making payments, a servicer (including Nationstar) is generally required under the applicable servicing agreement to advance its own funds to cover the principal and interest remittances due to investors in the loans, pay property taxes and insurance premiums to third parties, and to make payments for legal expenses and other protective advances. The servicer also advances funds to maintain, repair and market real estate properties on behalf of investors in the loans.

Repayment for servicer advances and payment of deferred servicing fees are generally made from late payments and other collections and recoveries on the related mortgage loan (including liquidation, insurance and condemnation proceeds) or, if a general collections backstop is available, from collections on other mortgage loans to which the applicable servicing agreement relates. The rate and timing of payments on the servicer advances and the deferred servicing fees, are unpredictable for several reasons, including the following:

payments on the servicer advances and the deferred servicing fees depend on the source of repayment, and whether and when the related servicer receives such payment (certain servicer advances are reimbursable only out of late payments and other collections and recoveries on the related mortgage loan, while others are also reimbursable out of principal and interest collections with respect to all mortgage loans serviced under the related servicing agreement, and as a consequence, the timing of such reimbursement is highly uncertain);

the length of time necessary to obtain liquidation proceeds may be affected by conditions in the real estate market or the financial markets generally, the availability of financing for the acquisition of the real estate and other factors, including, but not limited to, government intervention;

the length of time necessary to effect a foreclosure may be affected by variations in the laws of the particular jurisdiction in which the related mortgaged property is located, including whether or not foreclosure requires judicial action;

the requirements for judicial actions for foreclosure (which can result in substantial delays in reimbursement of servicer advances and payment of deferred servicing fees), which vary from time to time as a result of changes in applicable state law; and

the ability of the related servicer to sell delinquent mortgage loans to third parties prior to liquidation, resulting in the early reimbursement of outstanding unreimbursed servicer advances in respect of such mortgage loans.

Table of Contents

As home values change, the servicer may have to reconsider certain of the assumptions underlying its decisions to make advances. In certain situations, its contractual obligations may require the servicer to make certain advances for which it may not be reimbursed. In addition, when a mortgage loan defaults or becomes delinquent, the repayment of the advance may be delayed until the mortgage loan is repaid or refinanced, or a liquidation occurs. To the extent that Nationstar fails to recover the servicer advances in which we have invested, or takes longer than we expect to recover such advances, the value of our investment could be adversely affected and we could fail to achieve our expected return and suffer losses.

Servicing agreements related to residential mortgage securitization transactions generally require a residential mortgage servicer to make servicer advances in respect of serviced mortgage loans unless the servicer determines in good faith that the servicer advance would not be ultimately recoverable from the proceeds of the related mortgage loan, the mortgaged property or the related mortgagor. In many cases, if the servicer determines that a servicer advance previously made would not be recoverable from these sources, the servicer is entitled to withdraw funds from the related custodial account in respect of payments on the related pool of serviced mortgages to reimburse the related servicer advance. This is what is often referred to as a general collections backstop. The timing of when a servicer may utilize a general collections backstop can vary (some contracts require actual liquidation of the related loan first, while others do not), and contracts vary in terms of the types of servicer advances for which reimbursement from a general collections backstop is available. Approximately 80% of our services advances had a general collections backstop based on the most recent data as of the date hereof. Accordingly, a servicer may not ultimately be reimbursed if both (i) the payments from related loan, property or mortgagor payments are insufficient for reimbursement, and (ii) a general collections backstop is not available or is insufficient. Also, if a servicer improperly makes a servicer advance, it would not be entitled to reimbursement. Historically, Nationstar has recovered more than 99% of the advances that it has made. While we do not expect this recovery rate to vary materially during the term of our investment, there can be no assurance regarding future recovery rates related to our portfolio.

We rely heavily on mortgage servicers to achieve our investment objective and have no direct ability to influence their performance.

The value of our investments in Excess MSR, servicer advances and Non-Agency RMBS is dependent on the satisfactory performance of servicing obligations by the mortgage servicer. The duties and obligations of mortgage servicers are defined through contractual agreements, generally referred to as Servicing Guides in the case of GSEs, or Pooling and Servicing Agreements in the case of private-label securities (collectively, the Servicing Guidelines). Our investment in the Excess MSR is subject to all of the terms and conditions of the applicable Servicing Guidelines. Servicing Guidelines generally provide for the possibility for termination of the contractual rights of the servicer in the absolute discretion of the owner of the mortgages being serviced. Under the GSE Servicing Guidelines, the servicer may be terminated by the applicable GSE for any reason, with or without cause, for all or any portion of the loans being serviced for such GSE. In the event a mortgage owner terminates the servicer, the related Excess MSR and basic fees would under most circumstances lose all value on a going forward basis. If the servicer is terminated as servicer for any Agency Pools, the related Excess MSR will be extinguished and our investment in such Excess MSR will likely lose all of its value. Any recovery in such circumstances will be highly conditioned and will require, among other things, a new servicer willing to pay for the right to service the applicable mortgage loans while assuming responsibility for the origination and prior servicing of the mortgage loans. In addition, any payment received from a successor servicer will be applied first to pay the GSE for all of its claims and costs, including claims and costs against the servicer that do not relate to the mortgage loans for which we own the Excess MSR. A termination could also result in an event of default under our financings for servicer advances. It is expected that any termination by a mortgage owner of a servicer would take effect across all mortgages of such mortgage owner and would not be limited to a particular vintage or other subset of mortgages. Therefore, it is expected that all investments with a given servicer would lose all their value in the event a mortgage owner terminates such servicer. Nationstar is

the servicer of all of the loans underlying all of our investments in Excess MSR's and servicer advances, and it is the servicer or master servicer of the vast majority of the loans underlying our Non-Agency RMBS to date. See We have significant

Table of Contents

counterparty concentration risk in Nationstar and Springleaf and are subject to other counterparty concentration and default risks. As a result, we could be materially and adversely affected if the servicer is unable to adequately service the underlying mortgage loans due to:

its failure to comply with applicable laws and regulation;

a downgrade in its servicer rating;

its failure to maintain sufficient liquidity or access to sources of liquidity;

its failure to perform its loss mitigation obligations;

its failure to perform adequately in its external audits;

a failure in or poor performance of its operational systems or infrastructure;

regulatory scrutiny regarding foreclosure processes lengthening foreclosure timelines;

a GSE's or a whole-loan owner's transfer of servicing to another party; or

any other reason.

Nationstar is subject to numerous legal proceedings, federal, state or local governmental examinations, investigations or enforcement actions, which could adversely affect its reputation and its liquidity, financial position and results of operations. For example, on March 5, 2014, Nationstar received a letter from Benjamin Lawsky, Superintendent of the New York Department of Financial Services, in connection with Nationstar's recent growth and certain alleged recent complaints from certain New York consumers.

Loss mitigation techniques are intended to reduce the probability that borrowers will default on their loans and to minimize losses when defaults occur, and they may include the modification of mortgage loan rates, principal balances and maturities. If Nationstar (or any other applicable servicer or subservicer) fails to adequately perform their loss mitigation obligations, we could be required to purchase servicer advances in excess of those that we might otherwise have had to purchase, and the time period for collecting servicer advances may extend. Any increase in servicer advances or material increase in the time to resolution of a defaulted loan could result in increased capital requirements and financing costs for us and our co-investors and could adversely affect our liquidity and net income. In the event that Nationstar receives requests for advances in excess of amounts that we or the co-investors is willing or able to fund, Nationstar may not be able to fund these advance requests, which could result in a termination event under the applicable Servicing Guidelines, an event of default under our advance facilities and a breach of our purchase agreement with Nationstar. As a result, we could experience a partial or total loss of the value of our

investment in servicer advances.

MSRs and servicer advances are subject to numerous federal, state and local laws and regulations and may be subject to various judicial and administrative decisions. If the servicer actually or allegedly failed to comply with applicable laws, rules or regulations, it could be terminated as the servicer, which could have a material adverse effect on our business, financial condition, results of operations or cash flows. In addition, servicer advances that are improperly made may not be eligible for financing under our facilities and may not be reimbursable by the related securitization trust or other owner of the mortgage loan, which could cause us to suffer losses.

Favorable ratings from third-party rating agencies such as Standard & Poor's, Moody's and Fitch are important to the conduct of a mortgage servicer's loan servicing business, and a downgrade in a mortgage servicer's ratings could have an adverse effect on the value of our Excess MSRs and servicer advances, and result in an event of default under our financing for advances. Downgrades in a mortgage servicer's servicer ratings could adversely affect their and our ability to finance servicer advances and maintain their status as an approved servicer by Fannie Mae and Freddie Mac. Downgrades in servicer ratings could also lead to the early termination of existing advance facilities and affect the terms and availability of match funded advance facilities that a mortgage servicer or we may seek in the future. A mortgage servicer's failure to maintain favorable or specified ratings may cause

Table of Contents

their termination as a servicer and may impair their ability to consummate future servicing transactions, which could result in an event of default under our financing for servicer advances and have an adverse effect on the value of our investments since we will rely heavily on mortgage servicers to achieve our investment objective and have no direct ability to influence their performance.

In addition, a bankruptcy by any mortgage servicer that services the mortgage loans underlying our Excess MSR and servicer advances could result in:

the validity and priority of our ownership in the Excess MSR or servicer advances being challenged in a bankruptcy proceeding;

payments made by such servicer to us, or obligations incurred by it, being voided by a court under federal or state preference laws or federal or state fraudulent conveyance laws;

a re-characterization of any sale of Excess MSR, servicer advances or other assets to us as a pledge of such assets in a bankruptcy proceeding;

any agreement pursuant to which we acquired the Excess MSR or servicer advances being rejected in a bankruptcy proceeding; or

a default under our financing for servicer advances and a partial or total loss of the value of our investment in servicer advances.

For additional information about the ways in which we may be affected by mortgage servicers, see The value of our Excess MSR, servicer advances and RMBS may be adversely affected by deficiencies in servicing and foreclosure practices, as well as related delays in the foreclosure process.

We have significant counterparty concentration risk in Nationstar and Springleaf and are subject to other counterparty concentration and default risks.

We are not restricted from dealing with any particular counterparty or from concentrating any or all of our transactions with a few counterparties. Any loss suffered by us as a result of a counterparty defaulting, refusing to conduct business with us or imposing more onerous terms on us would also negatively affect our business, results of operations, cash flows and financial condition.

To date, all of our co-investments in Excess MSR and servicer advances relate to loans serviced by Nationstar. If Nationstar is terminated as the servicer of some or all of these portfolios, or in the event that it files for bankruptcy, our expected returns on these investments would be severely impacted. In addition, the vast majority of the loans underlying our Non-Agency RMBS are serviced by Nationstar. We closely monitor Nationstar's mortgage servicing performance and overall operating performance, financial condition and liquidity, as well as its compliance with regulations and Servicing Guidelines. We have various information, access and inspection rights in our agreements with Nationstar that enable us to monitor Nationstar's financial and operating performance and credit quality, which we periodically evaluate and discuss with Nationstar's management. However, we have no direct ability to influence

Nationstar's performance, and our diligence cannot prevent, and may not even help us anticipate, the termination of a Nationstar servicing agreement. Furthermore, Nationstar is subject to numerous legal proceedings, federal, state or local governmental examinations, investigations or enforcement actions, which could adversely affect its reputation and its liquidity, financial position and results of operations. For example, on March 5, 2014, Nationstar received a letter from Benjamin Lawsky, Superintendent of the New York Department of Financial Services, in connection with Nationstar's recent growth and certain alleged recent complaints from certain New York consumers.

Nationstar has no obligation to offer us any future co-investment opportunity on the same terms as prior transactions, or at all, and we may not be able to find suitable counterparties other than Nationstar from which to acquire Excess MSR's and servicer advances, which could impact our business strategy. See We rely heavily on mortgage servicers to achieve our investment objective and have no direct ability to influence their performance.

Table of Contents

Repayment of the outstanding amount of servicer advances (including payment with respect to deferred servicing fees) may be subject to delay, reduction or set-off in the event that Nationstar (or any other applicable servicer or subservicer) breaches any of its obligations under the related servicing agreements, including, without limitation, any failure of Nationstar (or any other applicable servicer or subservicer) to perform its servicing and advancing functions in accordance with the terms of such servicing agreements. If Nationstar (or any other applicable servicer) is terminated or resigns as servicer and the applicable successor servicer does not purchase all outstanding servicer advances at the time of transfer, collection of the servicer advances will be dependent on the performance of such successor servicer and, if applicable, reliance on such successor servicer's compliance with the first-in, first-out or FIFO provisions of the servicing agreements. In addition, such successor servicers may not agree to purchase the outstanding advances on the same terms as our current purchase arrangements and may require, as a condition of their purchase, modification to such FIFO provisions, which could further delay our repayment and have adversely affect the returns from our investment.

We are subject to substantial other operational risks associated to Nationstar or any other applicable servicer or subservicer in connection with the financing of servicer advances. In our current financing facilities for servicer advances, the failure of Nationstar to satisfy various covenants and tests can result in a target amortization event, a facility early amortization event and/or an event of default. We have no direct ability to control Nationstar's compliance with those covenants and tests. Failure of Nationstar to satisfy any such covenants or tests could result in a partial or total loss on our investment.

In addition, the consumer loans in which we have invested are serviced by Springleaf. If Springleaf is terminated as the servicer of some or all of these portfolios, or in the event that it files for bankruptcy, our expected returns on these investments could be severely impacted.

Moreover, we are party to repurchase agreements with a limited number of counterparties. If any of our counterparties elected not to roll our repurchase agreements, we may not be able to find a replacement counterparty, which would have a material adverse effect on our financial condition.

Our risk-management processes may not accurately anticipate the impact of market stress or counterparty financial condition, and as a result, we may not take sufficient action to reduce our risks effectively. Although we will monitor our credit exposures, default risk may arise from events or circumstances that are difficult to detect, foresee or evaluate. In addition, concerns about, or a default by, one large participant could lead to significant liquidity problems for other participants, which may in turn expose us to significant losses.

In the event of a counterparty default, particularly a default by a major investment bank, we could incur material losses rapidly, and the resulting market impact of a major counterparty default could seriously harm our business, results of operations, cash flows and financial condition. In the event that one of our counterparties becomes insolvent or files for bankruptcy, our ability to eventually recover any losses suffered as a result of that counterparty's default may be limited by the liquidity of the counterparty or the applicable legal regime governing the bankruptcy proceeding.

Counterparty risks have increased in complexity and magnitude as a result of the insolvency of a number of major financial institutions (such as Lehman Brothers) in recent years and the consequent decrease in the number of potential counterparties. In addition, counterparties have generally tightened their underwriting standards and increased their margin requirements for financing, which could negatively impact us in several ways, including by decreasing the number of counterparties willing to provide financing to us, decreasing the overall amount of leverage available to us, and increasing the costs of borrowing.

GSE initiatives and other actions may adversely affect returns from investments in Excess MSRs.

On January 17, 2011, the Federal Housing Finance Agency (FHFA) announced that it had instructed Fannie Mae and Freddie Mac to study possible alternatives to the current residential mortgage servicing and

Table of Contents

compensation system used for single-family mortgage loans. It is unclear what the GSEs, including Fannie Mae or Freddie Mac, may propose as alternatives to current servicing compensation practices, or when any such alternatives may become effective. Although we do not expect MSR that have already been created to be subject to any changes implemented by Fannie Mae or Freddie Mac, it is possible that, because of the significant role of Fannie Mae or Freddie Mac in the secondary mortgage market, any changes they implement could become prevalent in the mortgage servicing industry generally. Other industry stakeholders or regulators may also implement or require changes in response to the perception that the current mortgage servicing practices and compensation do not appropriately serve broader housing policy objectives. These proposals are still evolving. To the extent the GSEs implement reforms that materially affect the market for conforming loans, there may be secondary effects on the subprime and Alt-A markets. These reforms may have a material adverse effect on the economics or performance of any Excess MSR that we may acquire in the future.

Changes to the minimum servicing amount for GSE loans could occur at any time and could impact us in significantly negative ways that we are unable to predict or protect against.

Currently, when a loan is sold into the secondary market for Fannie Mae or Freddie Mac loans, the servicer is generally required to retain a minimum servicing amount (MSA) of 25 bps of the UPB for fixed rate mortgages. As has been widely publicized, in September 2011, the FHFA announced that a Joint Initiative on Mortgage Servicing Compensation was seeking public comment on two alternative mortgage servicing compensation structures detailed in a discussion paper. Changes to the MSA structure could significantly impact our business in negative ways that we cannot predict or protect against. For example, the elimination of a MSA could radically change the mortgage servicing industry and could severely limit the supply of Excess MSR available for sale. In addition, a removal of, or reduction in, the MSA could significantly reduce the recapture rate on the affected loan portfolio, which would negatively affect the investment return on our Excess MSR. We cannot predict whether any changes to current MSA rules will occur or what impact any changes will have on our business, results of operations, liquidity or financial condition.

Our investments in Excess MSR and servicer advances may involve complex or novel structures.

Investments in Excess MSR and servicer advances are new types of transactions and may involve complex or novel structures. Accordingly, the risks associated with such transactions and structures are not fully known to buyers and sellers. In the case of Excess MSR on Agency pools, GSEs may require that we submit to costly or burdensome conditions as a prerequisite to their consent to an investment in Excess MSR on Agency pools. GSE conditions may diminish or eliminate the investment potential of Excess MSR on Agency pools by making such investments too expensive for us or by severely limiting the potential returns available from Excess MSR on Agency pools.

It is possible that a GSE's views on whether any such acquisition structure is appropriate or acceptable may not be known to us when we make an investment and may change from time to time for any reason or for no reason, even with respect to a completed investment. A GSE's evolving posture toward an acquisition or disposition structure through which we invest in or dispose of Excess MSR on Agency pools may cause such GSE to impose new conditions on our existing investments in Excess MSR on Agency pools, including the owner's ability to hold such Excess MSR on Agency pools directly or indirectly through a grantor trust or other means. Such new conditions may be costly or burdensome and may diminish or eliminate the investment potential of the Excess MSR on Agency pools that are already owned by us. Moreover, obtaining such consent may require us or our co-investment counterparties to agree to material structural or economic changes, as well as agree to indemnification or other terms that expose us to risks to which we have not previously been exposed and that could negatively affect our returns from our investments.

Table of Contents

Many of our investments may be illiquid, and this lack of liquidity could significantly impede our ability to vary our portfolio in response to changes in economic and other conditions or to realize the value at which such investments are carried if we are required to dispose of them.

Many of our investments are illiquid. Illiquidity may result from the absence of an established market for the investments, as well as legal or contractual restrictions on their resale, refinancing or other disposition. Dispositions of investments may be subject to contractual and other limitations on transfer or other restrictions that would interfere with subsequent sales of such investments or adversely affect the terms that could be obtained upon any disposition thereof.

Excess MSR and servicer advances are highly illiquid and may be subject to numerous restrictions on transfers, including without limitation the receipt of third-party consents. For example, the Servicing Guidelines of a mortgage owner generally require that holders of Excess MSR obtain the mortgage owner's prior approval of any change of direct ownership of such Excess MSR. Such approval may be withheld for any reason or no reason in the discretion of the mortgage owner. Moreover, we have not received and do not expect to receive any assurances from any GSEs that their conditions for the sale by us of any Excess MSR will not change. Therefore, the potential costs, issues or restrictions associated with receiving such GSEs' consent for any such dispositions by us cannot be determined with any certainty. Additionally, investments in Excess MSR and servicer advances are new types of transaction, and the risks associated with the transactions and structures are not fully known to buyers or sellers. As a result of the foregoing, we may be unable to locate a buyer at the time we wish to sell Excess MSR or servicer advances. There is some risk that we will be required to dispose of Excess MSR or servicer advances either through an in-kind distribution or other liquidation vehicle, which will, in either case, provide little or no economic benefit to us, or a sale to a co-investor in the Excess MSR or servicer advances, which may be an affiliate. Accordingly, we cannot provide any assurance that we will obtain any return or any benefit of any kind from any disposition of Excess MSR or servicer advances. We may not benefit from the full term of the assets and for the aforementioned reasons may not receive any benefits from the disposition, if any, of such assets.

In addition, some of our real estate related securities may not be registered under the relevant securities laws, resulting in a prohibition against their transfer, sale, pledge or other disposition except in a transaction that is exempt from the registration requirements of, or is otherwise in accordance with, those laws. There are also no established trading markets for a majority of our intended investments. Moreover, certain of our investments, including our investments in consumer loans, servicer advances and certain investments in Excess MSR, are made indirectly through a vehicle that owns the underlying assets. Our ability to sell our interest may be contractually limited or prohibited. As a result, our ability to vary our portfolio in response to changes in economic and other conditions may be limited.

Our real estate related securities have historically been valued based primarily on third-party quotations, which are subject to significant variability based on the liquidity and price transparency created by market trading activity. A disruption in these trading markets could reduce the trading for many real estate related securities, resulting in less transparent prices for those securities, which would make selling such assets more difficult. Moreover, a decline in market demand for the types of assets that we hold would make it more difficult to sell our assets. If we are required to liquidate all or a portion of our illiquid investments quickly, we may realize significantly less than the amount at which we have previously valued these investments.

Market conditions could negatively impact our business, results of operations, cash flows and financial condition.

The market in which we operate is affected by a number of factors that are largely beyond our control but can nonetheless have a potentially significant, negative impact on us. These factors include, among other things:

Interest rates and credit spreads;

The availability of credit, including the price, terms and conditions under which it can be obtained;

Table of Contents

The quality, pricing and availability of suitable investments and credit losses with respect to our investments;

The ability to obtain accurate market-based valuations;

Loan values relative to the value of the underlying real estate assets;

Default rates on the loans underlying our investments and the amount of the related losses;

Prepayment speeds, delinquency rates and legislative/regulatory changes with respect to our investments in Excess MSR, servicer advances, RMBS, and loans, and the timing and amount of servicer advances;

The actual and perceived state of the real estate markets, market for dividend-paying stocks and public capital markets generally;

Unemployment rates; and

The attractiveness of other types of investments relative to investments in real estate or REITs generally. Changes in these factors are difficult to predict, and a change in one factor can affect other factors. For example, during 2007, increased default rates in the subprime mortgage market played a role in causing credit spreads to widen, reducing availability of credit on favorable terms, reducing liquidity and price transparency of real estate related assets, resulting in difficulty in obtaining accurate mark-to-market valuations, and causing a negative perception of the state of the real estate markets and of REITs generally. These conditions worsened during 2008, and intensified meaningfully during the fourth quarter of 2008 as a result of the global credit and liquidity crisis, resulting in extraordinarily challenging market conditions. Since then, market conditions have generally improved, but they could deteriorate in the future as a result of a variety of factors beyond our control.

The geographic distribution of the loans underlying, and collateral securing, certain of our investments subjects us to geographic real estate market risks, which could adversely affect the performance of our investments, our results of operations and financial condition.

The geographic distribution of the loans underlying, and collateral securing, our investments, including our Excess MSR, servicer advances, Non-Agency RMBS and consumer loans, exposes us to risks associated with the real estate and commercial lending industry in general within the states and regions in which we hold significant investments. These risks include, without limitation: possible declines in the value of real estate; risks related to general and local economic conditions; possible lack of availability of mortgage funds; overbuilding; extended vacancies of properties; increases in competition, property taxes and operating expenses; changes in zoning laws; increased energy costs; unemployment; costs resulting from the clean-up of, and liability to third parties for damages resulting from, environmental problems; casualty or condemnation losses; uninsured damages from floods, earthquakes or other natural disasters; and changes in interest rates. As of December 31, 2013, 26.0% of the total UPB of the residential mortgage loans underlying our Excess MSR was secured by properties located in California and 9.4% was secured by properties located in Florida. As of December 31, 2013, 36.3% of the collateral securing our Non-Agency RMBS

was located in the Western U.S., 22.7% was located in the Southeastern U.S., 18.9% was located in the Northeastern U.S., 11.3% was located in the Midwestern U.S. and 5.9% was located in the Southwestern U.S. To the extent any of the foregoing risks arise in states and regions where we hold significant investments, the performance of our investments, our results of operations, cash flows and financial condition could suffer a material adverse effect.

Many of the RMBS in which we invest are collateralized by subprime mortgage loans, which are subject to increased risks.

Many of the RMBS in which we invest are backed by collateral pools of subprime residential mortgage loans.

Subprime mortgage loans refer to mortgage loans that have been originated using underwriting standards that

Table of Contents

are less restrictive than the underwriting requirements used as standards for other first and junior lien mortgage loan purchase programs, such as the programs of Fannie Mae and Freddie Mac. These lower standards include mortgage loans made to borrowers having imperfect or impaired credit histories (including outstanding judgments or prior bankruptcies), mortgage loans where the amount of the loan at origination is 80% or more of the value of the mortgage property, mortgage loans made to borrowers with low credit scores, mortgage loans made to borrowers who have other debt that represents a large portion of their income and mortgage loans made to borrowers whose income is not required to be disclosed or verified. Due to economic conditions, including increased interest rates and lower home prices, as well as aggressive lending practices, subprime mortgage loans have in recent periods experienced increased rates of delinquency, foreclosure, bankruptcy and loss, and they are likely to continue to experience delinquency, foreclosure, bankruptcy and loss rates that are higher, and that may be substantially higher, than those experienced by mortgage loans underwritten in a more traditional manner. Thus, because of the higher delinquency rates and losses associated with subprime mortgage loans, the performance of RMBS backed by subprime mortgage loans could be correspondingly adversely affected, which could adversely impact our results of operations, liquidity, financial condition and business.

The value of our Excess MSRs, servicer advances and RMBS may be adversely affected by deficiencies in servicing and foreclosure practices, as well as related delays in the foreclosure process.

Allegations of deficiencies in servicing and foreclosure practices among several large sellers and servicers of residential mortgage loans that surfaced in 2010 raised various concerns relating to such practices, including the improper execution of the documents used in foreclosure proceedings (so-called robo signing), inadequate documentation of transfers and registrations of mortgages and assignments of loans, improper modifications of loans, violations of representations and warranties at the date of securitization and failure to enforce put-backs.

As a result of alleged deficiencies in foreclosure practices, a number of servicers temporarily suspended foreclosure proceedings beginning in the second half of 2010 while they evaluated their foreclosure practices. In late 2010, a group of state attorneys general and state bank and mortgage regulators representing nearly all 50 states and the District of Columbia, along with the U.S. Justice Department and the Department of Housing and Urban Development, began an investigation into foreclosure practices of banks and servicers. The investigations and lawsuits by several state attorneys general led to a settlement agreement in early February 2012 with five of the nation's largest banks, pursuant to which the banks agreed to pay more than \$25 billion to settle claims relating to improper foreclosure practices. The settlement does not prohibit the states, the federal government, individuals or investors from pursuing additional actions against the banks and servicers in the future.

Under the terms of the agreement governing our investment in servicer advances, we (together with third-party co-investors) are required to purchase from Nationstar advances on certain pools. While a mortgage loan is in foreclosure, servicers, including Nationstar, are generally required to continue to advance delinquent principal and interest and to also make advances for delinquent taxes and insurance and foreclosure costs and the upkeep of vacant property in foreclosure to the extent it determines that such amounts are recoverable. Servicer advances are generally recovered when the delinquency is resolved.

Foreclosure moratoria or other actions that lengthen the foreclosure process increase the amount of servicer advances Nationstar is required to make and we are required to purchase, lengthen the time it takes for us to be repaid for such advances and increase the costs incurred during the foreclosure process. In addition, our advance financing facilities contain provisions that modify the advance rates for, and limit the eligibility of, servicer advances to be financed based on the length of time that servicer advances are outstanding, and, as a result, an increase in foreclosure timelines could further increase the amount of servicer advances that we need to fund with our own capital. Such increases in foreclosure timelines could increase our need for capital to fund servicer advances (which do not bear interest), which

would increase our interest expense, reduce the value of our investment and potentially reduce the cash that we have available to pay our operating expenses or to pay dividends.

Table of Contents

Even in states where servicers have not suspended foreclosure proceedings or have lifted (or will soon lift) any such delayed foreclosures, servicers, including Nationstar, have faced, and may continue to face, increased delays and costs in the foreclosure process. For example, the current legislative and regulatory climate could lead borrowers to contest foreclosures that they would not otherwise have contested under ordinary circumstances, and servicers may incur increased litigation costs if the validity of a foreclosure action is challenged by a borrower. In general, regulatory developments with respect to foreclosure practices could result in increases in the amount of servicer advances and the length of time to recover servicer advances, fines or increases in operating expenses, and decreases in the advance rate and availability of financing for servicer advances. This would lead to increased borrowings, reduced cash and higher interest expense which could negatively impact our liquidity and profitability. Although the terms of our investment in servicer advances contain adjustment mechanisms that would reduce the amount of performance fees payable to Nationstar if servicer advances exceed pre-determined amounts, those fee reductions may not be sufficient to cover the expenses resulting from longer foreclosure timelines.

A failure by any or all of the members to make capital contributions for amounts required to fund servicer advances could result in an event of default under our advance facilities and a complete loss of our investment.

The integrity of the servicing and foreclosure processes are critical to the value of the mortgage loan portfolios underlying our Excess MSRs, servicer advances and RMBS, and our financial results could be adversely affected by deficiencies in the conduct of those processes. For example, delays in the foreclosure process that have resulted from investigations into improper servicing practices may adversely affect the values of, and result in losses on, these investments. Foreclosure delays may also increase the administrative expenses of the securitization trusts for the RMBS, thereby reducing the amount of funds available for distribution to investors. In addition, the subordinate classes of securities issued by the securitization trusts may continue to receive interest payments while the defaulted loans remain in the trusts, rather than absorbing the default losses. This may reduce the amount of credit support available for the senior classes of RMBS that we own, thus possibly adversely affecting these securities. Additionally, a substantial portion of the \$25 billion settlement is a credit to the banks and servicers for principal write-downs or reductions they may make to certain mortgages underlying RMBS. There remains uncertainty as to how these principal reductions will work and what effect they will have on the value of related RMBS. As a result, there can be no assurance that any such principal reductions will not adversely affect the value of our Excess MSRs, servicer advances and RMBS.

While we believe that the sellers and servicers would be in violation of their servicing contracts to the extent that they have improperly serviced mortgage loans or improperly executed documents in foreclosure or bankruptcy proceedings, or do not comply with the terms of servicing contracts when deciding whether to apply principal reductions, it may be difficult, expensive, time consuming and, ultimately, uneconomic for us to enforce our contractual rights. While we cannot predict exactly how the servicing and foreclosure matters or the resulting litigation or settlement agreements will affect our business, there can be no assurance that these matters will not have an adverse impact on our results of operations, cash flows and financial condition.

The loans underlying the securities we invest in and the loans we directly invest in are subject to delinquency, foreclosure and loss, which could result in losses to us.

Mortgage backed securities are securities backed by mortgage loans. The ability of borrowers to repay these mortgage loans is dependent upon the income or assets of these borrowers. If a borrower has insufficient income or assets to repay these loans, it will default on its loan. Our investments in RMBS will be adversely affected by defaults under the loans underlying such securities. To the extent losses are realized on the loans underlying the securities in which we invest, we may not recover the amount invested in, or, in extreme cases, any of our investment in such securities.

Residential mortgage loans, manufactured housing loans and subprime mortgage loans are secured by single-family residential property and are also subject to risks of delinquency and foreclosure, and risks of loss. The

Table of Contents

ability of a borrower to repay a loan secured by a residential property is dependent upon the income or assets of the borrower. A number of factors may impair borrowers' abilities to repay their loans, including, among other things, changes in the borrower's employment status, changes in national, regional or local economic conditions, changes in interest rates or the availability of credit on favorable terms, changes in regional or local real estate values, changes in regional or local rental rates and changes in real estate taxes.

In the event of default under a loan held directly by us, we will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral and the outstanding principal and accrued but unpaid interest of the loan, which could adversely affect our results of operations, cash flows and financial condition.

Our investments in real estate related securities are subject to changes in credit spreads, which could adversely affect our ability to realize gains on the sale of such investments.

Real estate related securities are subject to changes in credit spreads. Credit spreads measure the yield demanded on securities by the market based on their credit relative to a specific benchmark.

Fixed rate securities are valued based on a market credit spread over the rate payable on fixed rate U.S. Treasuries of like maturity. Floating rate securities are valued based on a market credit spread over LIBOR and are affected similarly by changes in LIBOR spreads. As of December 31, 2013, 99.2% of our Non-Agency RMBS Portfolio consisted of floating rate securities and 0.8% consisted of fixed rate securities, and our entire Agency ARM RMBS portfolio consisted of floating rate securities. Excessive supply of these securities combined with reduced demand will generally cause the market to require a higher yield on these securities, resulting in the use of a higher, or wider, spread over the benchmark rate to value such securities. Under such conditions, the value of our real estate related securities portfolios would tend to decline. Conversely, if the spread used to value such securities were to decrease, or tighten, the value of our real estate related securities portfolio would tend to increase. Such changes in the market value of our real estate securities portfolios may affect our net equity, net income or cash flow directly through their impact on unrealized gains or losses on available-for-sale securities, and therefore our ability to realize gains on such securities, or indirectly through their impact on our ability to borrow and access capital. During 2008 through the first quarter of 2009, credit spreads widened substantially. Widening credit spreads could cause the net unrealized gains on our securities and derivatives, recorded in accumulated other comprehensive income or retained earnings, and therefore our book value per share, to decrease and result in net losses.

Prepayment rates on the mortgage loans underlying our real estate related securities may adversely affect our profitability.

In general, the mortgage loans backing our real estate related securities may be prepaid at any time without penalty. Prepayments on our real estate related securities result when homeowners/mortgagees satisfy (i.e., pay off) the mortgage upon selling or refinancing their mortgaged property. When we acquire a particular security, we anticipate that the underlying mortgage loans will prepay at a projected rate which, together with expected coupon income, provides us with an expected yield on such securities. If we purchase assets at a premium to par value, and borrowers prepay their mortgage loans faster than expected, the corresponding prepayments on the real estate related security may reduce the expected yield on such securities because we will have to amortize the related premium on an accelerated basis. Conversely, if we purchase assets at a discount to par value, when borrowers prepay their mortgage loans slower than expected, the decrease in corresponding prepayments on the real estate related security may reduce the expected yield on such securities because we will not be able to accrete the related discount as quickly as originally anticipated. Prepayment rates on loans are influenced by changes in mortgage and market interest rates and a variety of economic, geographic and other factors, all of which are beyond our control. Consequently, such prepayment rates cannot be predicted with certainty and no strategy can completely insulate us from prepayment or

other such risks. In periods of declining interest rates, prepayment rates on mortgage loans generally increase. If general interest rates decline at the same time, the proceeds of such prepayments received during such periods are likely to be reinvested by us in assets yielding

Table of Contents

less than the yields on the assets that were prepaid. In addition, the market value of our real estate related securities may, because of the risk of prepayment, benefit less than other fixed-income securities from declining interest rates.

With respect to Agency ARM RMBS, we intend to purchase securities that have a higher coupon rate than the prevailing market interest rates. In exchange for a higher coupon rate, we would then pay a premium over par value to acquire these securities. In accordance with GAAP, we will amortize the premiums on our Agency ARM RMBS over the life of the related securities. If the mortgage loans securing these securities prepay at a more rapid rate than anticipated, we will have to amortize our premiums on an accelerated basis which may adversely affect our profitability. Defaults on the mortgage loans underlying Agency ARM RMBS typically have the same effect as prepayments because of the underlying Agency guarantee.

Prepayments, which are the primary feature of mortgage backed securities that distinguish them from other types of bonds, are difficult to predict and can vary significantly over time. As the holder of the security, on a monthly basis, we receive a payment equal to a portion of our investment principal in a particular security as the underlying mortgages are prepaid. In general, on the date each month that principal prepayments are announced (i.e., factor day), the value of our real estate related security pledged as collateral under our repurchase agreements is reduced by the amount of the prepaid principal and, as a result, our lenders will typically initiate a margin call requiring the pledge of additional collateral or cash, in an amount equal to such prepaid principal, in order to re-establish the required ratio of borrowing to collateral value under such repurchase agreements. Accordingly, with respect to our Agency ARM RMBS, the announcement on factor day of principal prepayments is in advance of our receipt of the related scheduled payment, thereby creating a short-term receivable for us in the amount of any such principal prepayments. However, under our repurchase agreements, we may receive a margin call relating to the related reduction in value of our Agency ARM RMBS and, prior to receipt of this short-term receivable, be required to post additional collateral or cash in the amount of the principal prepayment on or about factor day, which would reduce our liquidity during the period in which the short-term receivable is outstanding. As a result, in order to meet any such margin calls, we could be forced to sell assets in order to maintain liquidity. Forced sales under adverse market conditions may result in lower sales prices than ordinary market sales made in the normal course of business. If our real estate related securities were liquidated at prices below our amortized cost (i.e., the cost basis) of such assets, we would incur losses, which could adversely affect our earnings. In addition, in order to continue to earn a return on this prepaid principal, we must reinvest it in additional real estate related securities or other assets; however, if interest rates decline, we may earn a lower return on our new investments as compared to the real estate related securities that prepay.

Prepayments may have a negative impact on our financial results, the effects of which depend on, among other things, the timing and amount of the prepayment delay on our Agency ARM RMBS, the amount of unamortized premium on our real estate related securities, the rate at which prepayments are made on our Non-Agency RMBS, the reinvestment lag and the availability of suitable reinvestment opportunities.

Our investments in RMBS may be subject to significant impairment charges, which would adversely affect our results of operations.

We will be required to periodically evaluate our investments for impairment indicators. The value of an investment is impaired when our analysis indicates that, with respect to a security, it is probable that the value of the security is other than temporarily impaired. The judgment regarding the existence of impairment indicators is based on a variety of factors depending upon the nature of the investment and the manner in which the income related to such investment was calculated for purposes of our financial statements. If we determine that an impairment has occurred, we are required to make an adjustment to the net carrying value of the investment, which would adversely affect our results of operations in the applicable period and thereby adversely affect our ability to pay dividends to our stockholders.

Table of Contents

The lenders under our repurchase agreements may elect not to extend financing to us, which could quickly and seriously impair our liquidity.

We finance a meaningful portion of our investments in RMBS with repurchase agreements, which are short-term financing arrangements. Under the terms of these agreements, we will sell a security to a counterparty for a specified price and concurrently agree to repurchase the same security from our counterparty at a later date for a higher specified price. During the term of the repurchase agreement which can be as short as 30 days the counterparty will make funds available to us and hold the security as collateral. Our counterparties can also require us to post additional margin as collateral at any time during the term of the agreement. When the term of a repurchase agreement ends, we will be required to repurchase the security for the specified repurchase price, with the difference between the sale and repurchase prices serving as the equivalent of paying interest to the counterparty in return for extending financing to us. If we want to continue to finance the security with a repurchase agreement, we ask the counterparty to extend or roll the repurchase agreement for another term.

Our counterparties are not required to roll our repurchase agreements upon the expiration of their stated terms, which subjects us to a number of risks. Counterparties electing to roll our repurchase agreements may charge higher spread and impose more onerous terms upon us, including the requirement that we post additional margin as collateral. More significantly, if a repurchase agreement counterparty elects not to extend our financing, we would be required to pay the counterparty the full repurchase price on the maturity date and find an alternate source of financing. Alternate sources of financing may be more expensive, contain more onerous terms or simply may not be available. If we were unable to pay the repurchase price for any security financed with a repurchase agreement, the counterparty has the right to sell the underlying security being held as collateral and require us to compensate it for any shortfall between the value of our obligation to the counterparty and the amount for which the collateral was sold (which may be a significantly discounted price). As of December 31, 2013, we had outstanding repurchase agreements with an aggregate face amount of approximately \$287.8 million to finance Non-Agency RMBS and approximately \$1.3 billion to finance Agency ARM RMBS. Moreover, our repurchase agreement obligations are currently with a limited number of counterparties. If any of our counterparties elected not to roll our repurchase agreements, we may not be able to find a replacement counterparty in a timely manner. Finally, some of our repurchase agreements contain covenants, and our failure to comply with such covenants could result in a loss of our investment. See Management Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Debt Obligations.

The financing sources under our servicer advance financing facilities may elect not to extend financing to us, which could quickly and seriously impair our liquidity.

We finance a meaningful portion of our investments in servicer advances with structured financing arrangements. These arrangements are commonly of a short-term nature. These arrangements are generally accomplished by having the Buyer transfer its right to repayment for certain servicer advances it has acquired from Nationstar to a wholly owned bankruptcy remote subsidiary of the Buyer (a Depositor). The Buyer is generally required to continue to transfer to the related Depositor all of its rights to repayment for any particular pool of servicer advances as they arise (and are transferred from Nationstar) until the related financing arrangement is paid in full and is terminated. The related Depositor then transfers such rights to an Issuer. The Issuer then issues limited recourse notes to the financing sources backed by such rights to repayment.

The outstanding balance of servicer advances securing these arrangements is not likely to be repaid on or before the expected repayment date of such financing arrangements. Accordingly, we rely heavily on our financing sources to extend or refinance the terms of such financing arrangements. Our financing sources are not required to extend the arrangements upon the expiration of their stated terms, which subjects us to a number of risks. Financing sources

electing to extend may charge higher interest rates and impose more onerous terms upon us, including without limitation, lowering the amount of financing that can be extended against any particular pool of servicer advances.

Table of Contents

If a financing source is unable or unwilling to extend financing, the related Issuer be required to repay the outstanding balance of the financing on the related maturity date. Additionally, there may be substantial increases in the interest rates under a financing arrangement if the related notes are not repaid, extended or refinanced prior to the expected repayment dated, which may be before the related maturity date. If an Issuer is unable to pay the outstanding balance of the notes, the financing sources generally have the right to foreclose on the servicer advances pledged as collateral.

As of December 31, 2013, all of the notes issued under our structured servicer advance financing arrangements accrued interest at a floating rate of interest. Servicer advances are non-interest bearing assets. Accordingly, if there is an increase in prevailing interest rates and/or our financing sources increase the interest rate margins or spreads, the amount of financing that we could obtain against any particular pool of servicer advances may decrease substantially and/or we may be required to obtain interest rate hedging arrangements. There is no assurance that we will be able to obtain any such interest rate hedging arrangements.

Alternate sources of financing may be more expensive, contain more onerous terms or simply may not be available. Moreover, our structured servicer advance financing arrangements are currently with a limited number of sources. If any of our sources are unable to or elected not to extend or refinance such arrangements, we may not be able to find a replacement counterparty in a timely manner.

We may not be able to finance our investments on attractive terms or at all, and financing for Excess MSR may be particularly difficult to obtain.

The ability to finance investments with securitizations or other long-term non-recourse financing not subject to margin requirements has been more challenging since 2007 as a result of market conditions. In addition, it may be particularly challenging to securitize our investments in consumer loans, given that consumer loans are generally riskier than mortgage financing. These conditions may result in having to use less efficient forms of financing for any new investments, which will likely require a larger portion of our cash flows to be put toward making the initial investment and thereby reduce the amount of cash available for distribution to our stockholders and funds available for operations and investments, and which will also likely require us to assume higher levels of risk when financing our investments. In addition, there is no established market for financing of investments in Excess MSR, and it is possible that one will not develop for a variety of reasons, such as the challenges with perfecting security interests in the underlying collateral.

Some of our advance facilities mature as early as September 2014, and there can be no assurance that we will be able to renew these facilities on favorable terms or at all. Moreover, an increase in delinquencies with respect to the loans underlying our servicer advances could result in the need for additional financing, which may not be available to us on favorable terms or at all. If we are not able to obtain adequate financing to purchase servicer advances from Nationstar in accordance with our agreement, Nationstar could default on its obligation to fund such advances, which could result in their termination as servicer under the applicable pooling and servicing agreements and a partial or total loss of our investment in servicer advances and Excess MSR.

The non-recourse long-term financing structures we use expose us to risks, which could result in losses to us.

We use securitization and other non-recourse long-term financing for our investments to the extent available and we believe appropriate. In such structures, our lenders typically would have only a claim against the assets included in the securitizations rather than a general claim against us as an entity. Prior to any such financing, we would seek to finance our investments with relatively short-term facilities until a sufficient portfolio is accumulated. As a result, we would be subject to the risk that we would not be able to acquire, during the period that any short-term facilities are available, sufficient eligible assets or securities to maximize the efficiency of a securitization. We also bear the risk

that we would not be able to obtain new short-term facilities or would not be able to renew any short-term facilities after they expire should we need more time to seek and acquire sufficient

Table of Contents

eligible assets or securities for a securitization. In addition, conditions in the capital markets may make the issuance of any such securitization less attractive to us even when we do have sufficient eligible assets or securities. While we would intend to retain the unrated equity component of securitizations and, therefore, still have exposure to any investments included in such securitizations, our inability to enter into such securitizations may increase our overall exposure to risks associated with direct ownership of such investments, including the risk of default. Our inability to refinance any short-term facilities would also increase our risk because borrowings thereunder would likely be recourse to us as an entity. If we are unable to obtain and renew short-term facilities or to consummate securitizations to finance our investments on a long-term basis, we may be required to seek other forms of potentially less attractive financing or to liquidate assets at an inopportune time or price.

Risks associated with our investment in the consumer loan sector could have a material adverse effect on our business and financial results.

Our portfolio includes an investment in the consumer loan sector. Although many of the risks applicable to consumer loans are also applicable to residential real estate loans, and thus the type of risks that we have experience managing, there are nevertheless substantial risks and uncertainties associated with engaging in a new category of investment. There may be factors that affect the consumer loan sector with which we are not as familiar compared to the residential mortgage loan sector. Moreover, our underwriting assumptions for these investments may prove to be materially incorrect. It is also possible that the addition of consumer loans to our investment portfolio could divert our Manager's time away from our other investments. Furthermore, external factors, such as compliance with regulations, may also impact our ability to succeed in the consumer loan investment sector. Failure to successfully manage these risks could have a material adverse effect on our business and financial results.

The consumer loans underlying our investments are subject to delinquency and loss, which could have a negative impact on our financial results.

The ability of borrowers to repay the consumer loans underlying our investments may be adversely affected by numerous personal factors, including unemployment, divorce, major medical expenses or personal bankruptcy. General factors, including an economic downturn, high energy costs or acts of God or terrorism, may also affect the financial stability of borrowers and impair their ability or willingness to repay the consumer loans in our investment portfolio. In the event of any default under a loan in the consumer loan portfolio in which we have invested, we will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral securing the loan, if any, and the principal and accrued interest of the loan. In addition, our investments in consumer loans may entail greater risk than our investments in residential real estate loans, particularly in the case of consumer loans that are unsecured or secured by assets that depreciate rapidly. In such cases, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. Further, repossessing personal property securing a consumer loan can present additional challenges, including locating the collateral and taking possession of it. In addition, borrowers under consumer loans may have lower credit scores. There can be no guarantee that we will not suffer unexpected losses on our investments as a result of the factors set out above, which could have a negative impact on our financial results.

The servicer of the loans underlying our consumer loan investment may not be able to accurately track the default status of senior lien loans in instances where our consumer loan investments are secured by second or third liens on real estate.

A portion of our investment in consumer loans is secured by second and third liens on real estate. When we hold the second or third lien another creditor or creditors, as applicable, holds the first and/or second, as applicable, lien on the

real estate that is the subject of the security. In these situations our second or third lien is subordinate in right of payment to the first and/or second, as applicable, holder's right to receive payment. Moreover, as the

Table of Contents

servicer of the loans underlying our consumer loan portfolio is not able to track the default status of a senior lien loan in instances where we do not hold the related first mortgage, the value of the second or third lien loans in our portfolio may be lower than our estimates indicate.

The consumer loan investment sector is subject to various initiatives on the part of advocacy groups and extensive regulation and supervision under federal, state and local laws, ordinances and regulations, which could have a negative impact on our financial results.

In recent years consumer advocacy groups and some media reports have advocated governmental action to prohibit or place severe restrictions on the types of short-term consumer loans in which we have invested. Such consumer advocacy groups and media reports generally focus on the Annual Percentage Rate to a consumer for this type of loan, which is compared unfavorably to the interest typically charged by banks to consumers with top-tier credit histories. The fees charged on the consumer loans in the portfolio in which we have invested may be perceived as controversial by those who do not focus on the credit risk and high transaction costs typically associated with this type of investment. If the negative characterization of these types of loans becomes increasingly accepted by consumers, demand for the consumer loan products in which we have invested could significantly decrease. Additionally, if the negative characterization of these types of loans is accepted by legislators and regulators, we could become subject to more restrictive laws and regulations in the area.

In addition, we are, or may become, subject to federal, state and local laws, regulations, or regulatory policies and practices, including the Dodd-Frank Act (which, among other things, established the Consumer Financial Protection Bureau with broad authority to regulate and examine financial institutions), which may, amongst other things, limit the amount of interest or fees allowed to be charged on the consumer loans underlying our investments, or the number of consumer loans that customers may receive or have outstanding. The operation of existing or future laws, ordinances and regulations could interfere with the focus of our investments which could have a negative impact on our financial results.

Certain jurisdictions require licenses to purchase, hold, enforce or sell residential mortgage loans, and we may not be able to obtain and/or maintain such licenses.

Certain jurisdictions require a license to purchase, hold, enforce or sell residential mortgage loans. We currently do not hold any such licenses. In the event that any licensing requirement is applicable to us, there can be no assurance that we will obtain such licenses or, if obtained, that we will be able to maintain them. Our failure to obtain or maintain such licenses could restrict our ability to invest in loans in these jurisdictions if such licensing requirements are applicable. In lieu of obtaining such licenses, we may contribute our acquired residential mortgage loans to one or more wholly owned trusts whose trustee is a national bank, which may be exempt from state licensing requirements. We may form one or more subsidiaries to apply for certain state licenses. If these subsidiaries obtain the required licenses, any trust holding loans in the applicable jurisdictions may transfer such loans to such subsidiaries, resulting in these loans being held by a state-licensed entity. There can be no assurance that we will be able to obtain the requisite licenses in a timely manner or at all or in all necessary jurisdictions, or that the use of the trusts will reduce the requirement for licensing. In addition, even if we obtain necessary licenses, we may not be able to maintain them. Any of these circumstances could limit our ability to invest in residential mortgage loans in the future and have a material adverse effect on us.

Our determination of how much leverage to apply to our investments may adversely affect our return on our investments and may reduce cash available for distribution.

We leverage certain of our assets through a variety of borrowings. Our investment guidelines do not limit the amount of leverage we may incur with respect to any specific asset or pool of assets. The return we are able to earn on our investments and cash available for distribution to our stockholders may be significantly reduced due to changes in market conditions, which may cause the cost of our financing to increase relative to the income that can be derived from our assets.

Table of Contents

Certain of our investments are not match funded, which may increase the risks associated with these investments.

When available, a match funding strategy mitigates the risk of not being able to refinance an investment on favorable terms or at all. However, our Manager may elect for us to bear a level of refinancing risk on a short-term or longer-term basis, as in the case of investments financed with repurchase agreements, when, based on its analysis, our Manager determines that bearing such risk is advisable or unavoidable (as is the case with our investments in servicer advances and our Agency ARM and Non-Agency RMBS portfolios). In addition, we may be unable, as a result of conditions in the credit markets, to match fund our investments. For example since the 2008 recession, non-recourse term financing not subject to margin requirements has been more difficult to obtain, which impairs our ability to match fund our investments. Moreover, we may not be able to enter into interest rate swaps. A decision not to, or the inability to, match fund certain investments exposes us to additional risks.

Furthermore, we anticipate that, in most cases, for any period during which our floating rate assets are not match funded with respect to maturity (as is the case with most of our RMBS portfolios), the income from such assets may respond more slowly to interest rate fluctuations than the cost of our borrowings. Because of this dynamic, interest income from such investments may rise more slowly than the related interest expense, with a consequent decrease in our net income. Interest rate fluctuations resulting in our interest expense exceeding interest income would result in operating losses for us from these investments.

Accordingly, to the extent our investments are not match funded with respect to maturities and interest rates, we are exposed to the risk that we may not be able to finance or refinance our investments on economically favorable terms, or at all, or may have to liquidate assets at a loss.

Interest rate fluctuations and shifts in the yield curve may cause losses.

Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Our primary interest rate exposures relate to our investments in Excess MSR, servicer advances, RMBS, consumer loans and any floating rate debt obligations that we may incur. Changes in interest rates, including changes in expected interest rates or yield curves, affect our business in a number of ways. Changes in the general level of interest rates can affect our net interest income, which is the difference between the interest income earned on our interest-earning assets and the interest expense incurred in connection with our interest-bearing liabilities and hedges. Changes in the level of interest rates also can affect, among other things, our ability to acquire real estate related securities at attractive prices, the value of our real estate related securities and derivatives and our ability to realize gains from the sale of such assets. We may wish to use hedging transactions to protect certain positions from interest rate fluctuations, but we may not be able to do so as a result of market conditions, REIT rules or other reasons. In such event, interest rate fluctuations could adversely affect our financial condition, cash flows and results of operations.

In the event of a significant rising interest rate environment and/or economic downturn, loan and collateral defaults may increase and result in credit losses that would adversely affect our liquidity and operating results.

Our ability to execute our business strategy, particularly the growth of our investment portfolio, depends to a significant degree on our ability to obtain additional capital. Our financing strategy for our real estate related securities is dependent on our ability to place the debt we use to finance our investments at rates that provide a positive net spread. If spreads for such liabilities widen or if demand for such liabilities ceases to exist, then our ability to execute future financings will be severely restricted.

Interest rate changes may also impact our net book value as our real estate related securities are marked to market each quarter. Debt obligations are not marked to market. Generally, as interest rates increase, the value of our fixed rate securities decreases, which will decrease the book value of our equity.

Table of Contents

Furthermore, shifts in the U.S. Treasury yield curve reflecting an increase in interest rates would also affect the yield required on our real estate related securities and therefore their value. For example, increasing interest rates would reduce the value of the fixed rate assets we hold at the time because the higher yields required by increased interest rates result in lower market prices on existing fixed rate assets in order to adjust the yield upward to meet the market, and vice versa. This would have similar effects on our real estate related securities portfolio and our financial position and operations to a change in interest rates generally.

Any hedging transactions that we enter into may limit our gains or result in losses.

We may use, when feasible and appropriate, derivatives to hedge a portion of our interest rate exposure, and this approach has certain risks, including the risk that losses on a hedge position will reduce the cash available for distribution to stockholders and that such losses may exceed the amount invested in such instruments. We have adopted a general policy with respect to the use of derivatives, which generally allows us to use derivatives where appropriate, but does not set forth specific policies and procedures or require that we hedge any specific amount of risk. From time to time, we may use derivative instruments, including forwards, futures, swaps and options, in our risk management strategy to limit the effects of changes in interest rates on our operations. A hedge may not be effective in eliminating all of the risks inherent in any particular position. Our profitability may be adversely affected during any period as a result of the use of derivatives.

There are limits to the ability of any hedging strategy to protect us completely against interest rate risks. When rates change, we expect the gain or loss on derivatives to be offset by a related but inverse change in the value of any items that we hedge. We cannot assure you, however, that our use of derivatives will offset the risks related to changes in interest rates. We cannot assure you that our hedging strategy and the derivatives that we use will adequately offset the risk of interest rate volatility or that our hedging transactions will not result in losses. In addition, our hedging strategy may limit our flexibility by causing us to refrain from taking certain actions that would be potentially profitable but would cause adverse consequences under the terms of our hedging arrangements.

The REIT provisions of the Code limit our ability to hedge. In managing our hedge instruments, we consider the effect of the expected hedging income on the REIT qualification tests that limit the amount of gross income that a REIT may receive from hedging. We need to carefully monitor, and may have to limit, our hedging strategy to assure that we do not realize hedging income, or hold hedges having a value, in excess of the amounts that would cause us to fail the REIT gross income and asset tests.

Accounting for derivatives under GAAP is extremely complicated. Any failure by us to account for our derivatives properly in accordance with GAAP in our financial statements could adversely affect our earnings. In addition, under applicable accounting standards, we may be required to treat some of our investments, such as our investments in portfolios of non-performing loans in January 2014, as derivatives, which could adversely affect our results of operations.

Maintenance of our 1940 Act exclusion imposes limits on our operations.

We intend to continue to conduct our operations so that neither we nor any of our subsidiaries are required to register as an investment company under the 1940 Act. We believe we will not be considered an investment company under Section 3(a)(1)(A) of the 1940 Act because we will not engage primarily, or hold ourselves out as being engaged primarily, in the business of investing, reinvesting or trading in securities. However, under Section 3(a)(1)(C) of the 1940 Act, because we are a holding company that will conduct its businesses primarily through wholly owned and majority owned subsidiaries, the securities issued by our subsidiaries that are excluded from the definition of investment company under Section 3(c)(1) or Section 3(c)(7) of the 1940 Act, together with any other investment

securities we may own, may not have a combined value in excess of 40% of the value of our total assets (exclusive of U.S. Government securities and cash items) on an unconsolidated basis (the 40% test). For purposes of the foregoing, we currently treat our interests in our TRSs that hold our servicer

Table of Contents

advances and our subsidiaries that hold consumer loans as investment securities because these subsidiaries presently rely on the exclusion provided by Section 3(c)(7) of the 1940 Act. The 40% test under Section 3(a)(1)(C) of the 1940 Act limits the types of businesses in which we may engage through our subsidiaries. In addition, the assets we and our subsidiaries may originate or acquire are limited by the provisions of the 1940 Act and the rules and regulations promulgated under the 1940 Act, which may adversely affect our business.

If the value of securities issued by our subsidiaries that are excluded from the definition of investment company by Section 3(c)(1) or 3(c)(7) of the 1940 Act, together with any other investment securities we own, exceeds the 40% test under Section 3(a)(1)(C) of the 1940 Act (e.g., the value of our interests in the TRSs that hold servicer advances increases significantly in proportion to the value of our other assets), or if one or more of such subsidiaries fail to maintain an exclusion or exception from the 1940 Act, we could, among other things, be required either (a) to substantially change the manner in which we conduct our operations to avoid being required to register as an investment company or (b) to register as an investment company under the 1940 Act, either of which could have an adverse effect on us and the market price of our securities. As discussed above, for purposes of the foregoing, we currently treat our interests in our TRSs that hold our servicer advances and our subsidiaries that hold consumer loans as investment securities because these subsidiaries presently rely on the exclusion provided by Section 3(c)(7) of the 1940 Act. If we or any of our subsidiaries were required to register as an investment company under the 1940 Act, the registered entity would become subject to substantial regulation with respect to capital structure (including the ability to use leverage), management, operations, transactions with affiliated persons (as defined in the 1940 Act), portfolio composition, including restrictions with respect to diversification and industry concentration, compliance with reporting, record keeping, voting, proxy disclosure and other rules and regulations that would significantly change our operations.

Failure to maintain an exclusion would require us to significantly restructure our investment strategy. For example, because affiliate transactions are generally prohibited under the 1940 Act, we would not be able to enter into transactions with any of our affiliates if we are required to register as an investment company, and we might be required to terminate our management agreement and any other agreements with affiliates, which could have a material adverse effect on our ability to operate our business and pay distributions. If we were required to register us as an investment company but failed to do so, we would be prohibited from engaging in our business, and criminal and civil actions could be brought against us. In addition, our contracts would be unenforceable unless a court required enforcement, and a court could appoint a receiver to take control of us and liquidate our business.

For purposes of the foregoing, we treat our interests in certain of our wholly owned and majority owned subsidiaries, which constitutes more than 60% of the value of our adjusted total assets on an unconsolidated basis, as non-investment securities because such subsidiaries qualify for exclusion from the definition of an investment company under the 1940 Act pursuant to Section 3(c)(5)(C) of the 1940 Act (the Section 3(c)(5)(C) exclusion). The Section 3(c)(5)(C) exclusion is available for entities primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate. The Section 3(c)(5)(C) exclusion generally requires that at least 55% of these subsidiaries' assets must comprise qualifying real estate assets and at least 80% of each of their portfolios must comprise qualifying real estate assets and real estate-related assets under the 1940 Act. We expect each of our subsidiaries relying on Section 3(c)(5)(C) to rely on guidance published by the SEC staff or on our analyses of such guidance to determine which assets are qualifying real estate assets and real estate-related assets. However, the SEC's guidance was issued in accordance with factual situations that may be substantially different from the factual situations each of our subsidiaries may face, and much of the guidance was issued more than 20 years ago. No assurance can be given that the SEC staff will concur with the classification of each of our subsidiaries' assets. In addition, the SEC staff may, in the future, issue further guidance that may require us to re-classify some of our subsidiaries' assets for purposes of qualifying for an exclusion from regulation under the 1940 Act. For example, the SEC and its staff have not published guidance with respect to the treatment of whole pool Non-Agency RMBS for

purposes of the Section 3(c)(5)(C) exclusion. Accordingly, based on our own judgment and analysis of the guidance from the SEC and its staff identifying Agency whole pool certificates as qualifying real estate assets under

Table of Contents

Section 3(c)(5)(C), we treat whole pool Non-Agency RMBS issued with respect to an underlying pool of mortgage loans in which our subsidiary relying on Section 3(c)(5)(C) holds all of the certificates issued by the pool as qualifying real estate assets. Based on our own judgment and analysis of the guidance from the SEC and its staff with respect to analogous assets, we treat Excess MSR as real estate-related assets for purposes of satisfying the 80% test under the Section 3(c)(5)(C) exclusion. If we are required to re-classify any of our subsidiaries' assets, including those subsidiaries holding whole pool Non-Agency RMBS and/or Excess MSRs, such subsidiaries may no longer be in compliance with the exclusion from the definition of an investment company provided by Section 3(c)(5)(C) of the 1940 Act, and in turn, we may not satisfy the requirements to avoid falling within the definition of an investment company provided by Section 3(a)(1)(C). To the extent that the SEC staff publishes new or different guidance or disagrees with our analysis with respect to any assets of our subsidiaries we have determined to be qualifying real estate assets or real estate-related assets, we may be required to adjust our strategy accordingly. In addition, we may be limited in our ability to make certain investments and these limitations could result in a subsidiary holding assets we might wish to sell or selling assets we might wish to hold.

In August 2011, the SEC issued a concept release soliciting public comments on a wide range of issues relating to companies engaged in the business of acquiring mortgages and mortgage-related instruments and that rely on Section 3(c)(5)(C) of the 1940 Act. Therefore, there can be no assurance that the laws and regulations governing the 1940 Act status of REITs, or guidance from the SEC or its staff regarding the Section 3(c)(5)(C) exclusion, will not change in a manner that adversely affects our operations. If we or our subsidiaries fail to maintain an exclusion or exception from the 1940 Act, we could, among other things, be required either to (a) change the manner in which we conduct our operations to avoid being required to register as an investment company, (b) effect sales of our assets in a manner that, or at a time when, we would not otherwise choose to do so, or (c) register as an investment company, any of which could negatively affect the value of our common stock, the sustainability of our business model, and our ability to make distributions. In addition, if we or any of our subsidiaries were required to register as an investment company under the 1940 Act, the registered entity would become subject to substantial regulation with respect to capital structure (including the ability to use leverage), management, operations, transactions with affiliated persons (as defined in the 1940 Act), portfolio composition, including restrictions with respect to diversification and industry concentration, compliance with reporting, record keeping, voting, proxy disclosure and other rules and regulations that would significantly change our operations.

Rapid changes in the values of assets that we hold may make it more difficult for us to maintain our qualification as a REIT or our exclusion from the 1940 Act.

If the market value or income potential of qualifying assets for purposes of our qualification as a REIT or our exclusion from registration as an investment company under the 1940 Act declines as a result of increased interest rates, changes in prepayment rates or other factors, or the market value or income from non-qualifying assets increases, we may need to increase our investments in qualifying assets and/or liquidate our non-qualifying assets to maintain our REIT qualification or our exclusion from registration under the 1940 Act. If the change in market values or income occurs quickly, this may be especially difficult to accomplish. This difficulty may be exacerbated by the illiquid nature of any non-qualifying assets we may own. We may have to make investment decisions that we otherwise would not make absent the intent to maintain our qualification as a REIT and exclusion from registration under the 1940 Act.

We are subject to significant competition, and we may not compete successfully.

We are subject to significant competition in seeking investments. We compete with other companies, including other REITs, insurance companies and other investors, including funds and companies affiliated with our Manager. Some of our competitors have greater resources than we possess or have greater access to capital or various types of financing

structures than are available to us, and we may not be able to compete successfully for investments or provide attractive investment returns relative to our competitors. These competitors may be

Table of Contents

willing to accept lower returns on their investments and, as a result, our profit margins could be adversely affected. Furthermore, competition for investments that are suitable for us may lead to the returns available from such investments decreasing, which may further limit our ability to generate our desired returns. We cannot assure you that other companies will not be formed that compete with us for investments or otherwise pursue investment strategies similar to ours or that we will be able to complete successfully against any such companies.

Furthermore, we currently do not have a mortgage servicing platform. Therefore, we may not be an attractive buyer for those sellers of MSRMs that prefer to sell MSRMs and their mortgage servicing platform in a single transaction. Since our business model does not currently include acquiring and running servicing platforms, to engage in a bid for such a business we would need to find a servicer to acquire and run the platform or we would need to incur additional costs to shut down the acquired servicing platform. The need to work with a servicer in these situations increases the complexity of such potential acquisitions, and Nationstar may be unwilling or unable to act as servicer or subservicer on any acquisitions of Excess MSRMs or servicer advances we want to execute. The complexity of these transactions and the additional costs incurred by us if we were to execute future acquisitions of this type could adversely affect our future operating results.

The valuations of our assets are subject to uncertainty since most of our assets are not traded in an active market.

There is not anticipated to be an active market for most of the assets in which we will invest. In the absence of market comparisons, we will use other pricing methodologies, including, for example, models based on assumptions regarding expected trends, historical trends following market conditions believed to be comparable to the then current market conditions and other factors believed at the time to be likely to influence the potential resale price of, or the potential cash flows derived from, an investment. Such methodologies may not prove to be accurate and any inability to accurately price assets may result in adverse consequences for us. A valuation is only an estimate of value and is not a precise measure of realizable value. Ultimate realization of the market value of a private asset depends to a great extent on economic and other conditions beyond our control. Further, valuations do not necessarily represent the price at which a private investment would sell since market prices of private investments can only be determined by negotiation between a willing buyer and seller. If we were to liquidate a particular private investment, the realized value may be more than or less than the valuation of such asset as carried on our books.

Changes in accounting rules could occur at any time and could impact us in significantly negative ways that we are unable to predict or protect against.

As has been widely publicized, the SEC, the Financial Accounting Standards Board (the FASB) and other regulatory bodies that establish the accounting rules applicable to us have recently proposed or enacted a wide array of changes to accounting rules. Moreover, in the future these regulators may propose additional changes that we do not currently anticipate. Changes to accounting rules that apply to us could significantly impact our business or our reported financial performance in negative ways that we cannot predict or protect against. We cannot predict whether any changes to current accounting rules will occur or what impact any codified changes will have on our business, results of operations, liquidity or financial condition.

A prolonged economic slowdown, a lengthy or severe recession, or declining real estate values could harm our operations.

We believe the risks associated with our business are more severe during periods in which an economic slowdown or recession is accompanied by declining real estate values, as was the case in 2008. Declining real estate values generally reduce the level of new mortgage loan originations, since borrowers often use increases in the value of their

existing properties to support the purchase of, or investment in, additional properties. Borrowers may also be less able to pay principal and interest on the loans underlying our securities, Excess MSRs and servicer advances, if the real estate economy weakens. Further, declining real estate values

Table of Contents

significantly increase the likelihood that we will incur losses on our securities in the event of default because the value of our collateral may be insufficient to cover our basis. Any sustained period of increased payment delinquencies, foreclosures or losses could adversely affect our net interest income from the assets in our portfolio, which would significantly harm our revenues, results of operations, financial condition, liquidity, business prospects and our ability to make distributions to our stockholders.

Compliance with changing regulation of corporate governance and public disclosure has and will continue to result in increased compliance costs and pose challenges for our management team.

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on us and, more generally, the financial services and mortgage industries. Additionally, we cannot predict whether there will be additional proposed laws or reforms that would affect us, whether or when such changes may be adopted, how such changes may be interpreted and enforced or how such changes may affect us. However, the costs of complying with any additional laws or regulations could have a material effect on our financial condition and results of operations.

RISKS RELATED TO OUR MANAGER

We are dependent on our Manager and may not find a suitable replacement if our Manager terminates the Management Agreement.

We have no employees. Our officers and other individuals who perform services for us are employees of our Manager. We are completely reliant on our Manager, which has significant discretion as to the implementation of our operating policies and strategies, to conduct our business. We are subject to the risk that our Manager will terminate the Management Agreement and that we will not be able to find a suitable replacement for our Manager in a timely manner, at a reasonable cost or at all. Furthermore, we are dependent on the services of certain key employees of our Manager whose compensation is partially or entirely dependent upon the amount of incentive or management compensation earned by our Manager and whose continued service is not guaranteed, and the loss of such services could adversely affect our operations.

There are conflicts of interest in our relationship with our Manager.

Our Management Agreement with our Manager was not negotiated at arm's-length, and its terms, including fees payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party.

There are conflicts of interest inherent in our relationship with our Manager insofar as our Manager and its affiliates including investment funds, private investment funds, or businesses managed by our Manager, including Newcastle, Nationstar and Springleaf invest in real estate related securities, consumer loans and Excess MSR and servicer advances and whose investment objectives overlap with our investment objectives. Certain investments appropriate for us may also be appropriate for one or more of these other investment vehicles. Certain members of our board of directors and employees of our Manager who are our officers also serve as officers and/or directors of these other entities. For example, we have some of the same directors and officers as Newcastle. Although we have the same Manager, we may compete with entities affiliated with our Manager or Fortress, including Newcastle, for certain target assets. From time to time, affiliates of Fortress focus on investments in assets with a similar profile as our target assets that we may seek to acquire. These affiliates may have meaningful purchasing capacity, which may change over time depending upon a variety of factors, including, but not limited to, available equity capital and debt financing, market conditions and cash on hand. Currently, Fortress has two funds primarily focused on investing in Excess MSR with approximately \$1.7 billion in capital commitments in aggregate. We intend to co-invest with these funds in

Excess MSRs. We have broad investment guidelines, and we may co-invest with Fortress funds or portfolio companies of private equity funds managed by our Manager (or an affiliate thereof) in a variety of investments. We also may invest in securities that are senior or junior to securities owned by funds managed by our

Table of Contents

Manager. Fortress funds generally have a fee structure similar to ours, but the fees actually paid will vary depending on the size, terms and performance of each fund. Fortress had approximately \$61.8 billion of assets under management as of December 31, 2013.

Our Management Agreement with our Manager generally does not limit or restrict our Manager or its affiliates from engaging in any business or managing other pooled investment vehicles that invest in investments that meet our investment objectives. Our Manager intends to engage in additional real estate related management and real estate and other investment opportunities in the future, which may compete with us for investments or result in a change in our current investment strategy. In addition, our certificate of incorporation provides that if Fortress or an affiliate or any of their officers, directors or employees acquire knowledge of a potential transaction that could be a corporate opportunity, they have no duty, to the fullest extent permitted by law, to offer such corporate opportunity to us, our stockholders or our affiliates. In the event that any of our directors and officers who is also a director, officer or employee of Fortress or its affiliates acquires knowledge of a corporate opportunity or is offered a corporate opportunity, provided that this knowledge was not acquired solely in such person's capacity as a director or officer of New Residential and such person acts in good faith, then to the fullest extent permitted by law such person is deemed to have fully satisfied such person's fiduciary duties owed to us and is not liable to us if Fortress or its affiliates pursues or acquires the corporate opportunity or if such person did not present the corporate opportunity to us.

The ability of our Manager and its officers and employees to engage in other business activities, subject to the terms of our Management Agreement with our Manager, may reduce the amount of time our Manager, its officers or other employees spend managing us. In addition, we may engage (subject to our investment guidelines) in material transactions with our Manager or another entity managed by our Manager or one of its affiliates, including Newcastle, Nationstar and Springleaf which may include, but are not limited to, certain financing arrangements, purchases of debt, co-investments in Excess MSR, consumer loans, servicer advances and other assets that present an actual, potential or perceived conflict of interest. It is possible that actual, potential or perceived conflicts could give rise to investor dissatisfaction, litigation or regulatory enforcement actions. Appropriately dealing with conflicts of interest is complex and difficult, and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more potential, actual or perceived conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation, which could materially adversely affect our business in a number of ways, including causing an inability to raise additional funds, a reluctance of counterparties to do business with us, a decrease in the prices of our equity securities and a resulting increased risk of litigation and regulatory enforcement actions.

The management compensation structure that we have agreed to with our Manager, as well as compensation arrangements that we may enter into with our Manager in the future (in connection with new lines of business or other activities), may incentivize our Manager to invest in high risk investments. In addition to its management fee, our Manager is currently entitled to receive incentive compensation. In evaluating investments and other management strategies, the opportunity to earn incentive compensation may lead our Manager to place undue emphasis on the maximization of earnings, including through the use of leverage, at the expense of other criteria, such as preservation of capital, in order to achieve higher incentive compensation. Investments with higher yield potential are generally riskier or more speculative than lower-yielding investments. Moreover, because our Manager receives compensation in the form of options in connection with the completion of our common equity offerings, our Manager may be incentivized to cause us to issue additional common stock, which could be dilutive to existing stockholders. In addition, our Manager's management fee is not tied to our performance and may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us.

It would be difficult and costly to terminate our Management Agreement with our Manager.

It would be difficult and costly for us to terminate our Management Agreement with our Manager. The Management Agreement may only be terminated annually upon (i) the affirmative vote of at least two-thirds of our independent directors, or by a vote of the holders of a simple majority of the outstanding shares of our

Table of Contents

common stock, that there has been unsatisfactory performance by our Manager that is materially detrimental to us or (ii) a determination by a simple majority of our independent directors that the management fee payable to our Manager is not fair, subject to our Manager's right to prevent such a termination by accepting a mutually acceptable reduction of fees. Our Manager will be provided 60 days' prior notice of any termination and will be paid a termination fee equal to the amount of the management fee earned by the Manager during the twelve-month period preceding such termination. In addition, following any termination of the Management Agreement, our Manager may require us to purchase its right to receive incentive compensation at a price determined as if our assets were sold for their fair market value (as determined by an appraisal, taking into account, among other things, the expected future value of the underlying investments) or otherwise we may continue to pay the incentive compensation to our Manager. These provisions may increase the effective cost to us of terminating the Management Agreement, thereby adversely affecting our ability to terminate our Manager without cause.

Our directors have approved broad investment guidelines for our Manager and do not approve each investment decision made by our Manager. In addition, we may change our investment strategy without a stockholder vote, which may result in our making investments that are different, riskier or less profitable than our current investments.

Our Manager is authorized to follow broad investment guidelines. For more information about our investment guidelines, see "Business Investment Guidelines" included elsewhere in this prospectus. Consequently, our Manager has great latitude in determining the types and categories of assets it may decide are proper investments for us, including the latitude to invest in types and categories of assets that may differ from those in which we currently invest. Our directors will periodically review our investment guidelines and our investment portfolio. However, our board does not review or pre-approve each proposed investment or our related financing arrangements. In addition, in conducting periodic reviews, the directors rely primarily on information provided to them by our Manager. Furthermore, transactions entered into by our Manager may be difficult or impossible to unwind by the time they are reviewed by the directors even if the transactions contravene the terms of the Management Agreement. In addition, we may change our investment strategy, including our target asset classes, without a stockholder vote.

Our investment strategy may evolve in light of existing market conditions and investment opportunities, and this evolution may involve additional risks depending upon the nature of the assets in which we invest and our ability to finance such assets on a short or long-term basis. Investment opportunities that present unattractive risk-return profiles relative to other available investment opportunities under particular market conditions may become relatively attractive under changed market conditions and changes in market conditions may therefore result in changes in the investments we target. Decisions to make investments in new asset categories present risks that may be difficult for us to adequately assess and could therefore reduce our ability to pay dividends on our common stock or have adverse effects on our liquidity, results of operations or financial condition. A change in our investment strategy may also increase our exposure to interest rate, foreign currency, real estate market or credit market fluctuations and expose us to new legal and regulatory risks. In addition, a change in our investment strategy may increase our use of non-match-funded financing, increase the guarantee obligations we agree to incur or increase the number of transactions we enter into with affiliates. Our failure to accurately assess the risks inherent in new asset categories or the financing risks associated with such assets could adversely affect our results of operations, liquidity and financial condition.

Our Manager will not be liable to us for any acts or omissions performed in accordance with the Management Agreement, including with respect to the performance of our investments.

Pursuant to our Management Agreement, our Manager will not assume any responsibility other than to render the services called for thereunder in good faith and will not be responsible for any action of our board of directors in

following or declining to follow its advice or recommendations. Our Manager, its members, managers, officers and employees will not be liable to us or any of our subsidiaries, to our board of directors, or our or any subsidiary's stockholders or partners for any acts or omissions by our Manager, its members, managers, officers

Table of Contents

or employees, except by reason of acts constituting bad faith, willful misconduct, gross negligence or reckless disregard of our Manager's duties under our Management Agreement. We shall, to the full extent lawful, reimburse, indemnify and hold our Manager, its members, managers, officers and employees and each other person, if any, controlling our Manager harmless of and from any and all expenses, losses, damages, liabilities, demands, charges and claims of any nature whatsoever (including attorneys' fees) in respect of or arising from any acts or omissions of an indemnified party made in good faith in the performance of our Manager's duties under our Management Agreement and not constituting such indemnified party's bad faith, willful misconduct, gross negligence or reckless disregard of our Manager's duties under our Management Agreement.

Our Manager's due diligence of investment opportunities or other transactions may not identify all pertinent risks, which could materially affect our business, financial condition, liquidity and results of operations.

Our Manager intends to conduct due diligence with respect to each investment opportunity or other transaction it pursues. It is possible, however, that our Manager's due diligence processes will not uncover all relevant facts, particularly with respect to any assets we acquire from third parties. In these cases, our Manager may be given limited access to information about the investment and will rely on information provided by the target of the investment. In addition, if investment opportunities are scarce, the process for selecting bidders is competitive, or the timeframe in which we are required to complete diligence is short, our ability to conduct a due diligence investigation may be limited, and we would be required to make investment decisions based upon a less thorough diligence process than would otherwise be the case. Accordingly, investments and other transactions that initially appear to be viable may prove not to be over time, due to the limitations of the due diligence process or other factors.

The ownership by our executive officers and directors of shares of common stock, options, or other equity awards of Springleaf, Nationstar, and other entities either owned by Fortress funds managed by affiliates of our Manager or managed by our Manager may create, or may create the appearance of, conflicts of interest.

Some of our directors, officers and other employees of our Manager hold positions with Springleaf, Nationstar, and other entities either owned by Fortress funds managed by affiliates of our Manager or managed by our Manager and own such entities' common stock, options to purchase such entities' common stock or other equity awards. Such ownership may create, or may create the appearance of, conflicts of interest when these directors, officers and other employees are faced with decisions that could have different implications for such entities than they do for us.

RISKS RELATED TO THE FINANCIAL MARKETS

We do not know what impact the Dodd-Frank Act will have on our business.

On July 21, 2010, the U.S. enacted the Dodd-Frank Act. The Dodd-Frank Act affects almost every aspect of the U.S. financial services industry, including certain aspects of the markets in which we operate. The Dodd-Frank Act imposes new regulations on us and how we conduct our business. For example, the Dodd-Frank Act will impose additional disclosure requirements for public companies and generally require issuers or originators of asset-backed securities to retain at least five percent of the credit risk associated with the securitized assets.

The Dodd-Frank Act imposes mandatory clearing and exchange-trading requirements on many derivatives transactions (including formerly unregulated over-the-counter derivatives) in which we may engage. In addition, the Dodd-Frank Act is expected to increase the margin requirements for derivatives transactions that are not subject to mandatory clearing requirements, which may impact our activities. The Dodd-Frank Act also creates new categories of regulated market participants, such as swap-dealers, security-based swap dealers, major swap participants and major security-based swap participants, and subjects (or, once the applicable rules have

Table of Contents

been finalized, will subject) these regulated entities to significant new capital, registration, recordkeeping, reporting, disclosure, business conduct and other regulatory requirements that will give rise to new administrative costs.

Even if certain new requirements are not directly applicable to us, they may still increase our costs of entering into transactions with the parties to whom the requirements are directly applicable. Moreover, new exchange-trading and trade reporting requirements may lead to reductions in the liquidity of derivative transactions, causing higher pricing or reduced availability of derivatives, or the reduction of arbitrage opportunities for us, which could adversely affect the performance of certain of our trading strategies. Importantly, many key aspects of the changes imposed by the Dodd-Frank Act will continue to be established by various regulatory bodies and other groups over the next several years. As a result, we do not know how significantly the Dodd-Frank Act will affect us. It is possible that the Dodd-Frank Act could, among other things, increase our costs of operating as a public company, impose restrictions on our ability to securitize assets and reduce our investment returns on securitized assets.

We do not know what impact certain U.S. government programs intended to stabilize the economy and the financial markets will have on our business.

In recent years, the U.S. government has taken a number of steps to attempt to strengthen the financial markets and U.S. economy, including direct government investments in, and guarantees of, troubled financial institutions as well as government-sponsored programs such as the Term Asset-Backed Securities Loan Facility program and the Public Private Investment Partnership Program. The U.S. government continues to evaluate or implement an array of other measures and programs intended to help improve U.S. financial and market conditions. While conditions appear to have improved relative to the depths of the global financial crisis, it is not clear whether this improvement is real or will last for a significant period of time. It is not clear what impact the government's future actions to improve financial and market conditions will have on our business. We may not derive any meaningful benefit from these programs in the future. Moreover, if any of our competitors are able to benefit from one or more of these initiatives, they may gain a significant competitive advantage over us.

The federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between these agencies and the U.S. government, may adversely affect our business.

Due to increased market concerns about the ability of Fannie Mae and Freddie Mac to withstand future credit losses associated with securities held in their investment portfolios, and on which they provide guarantees without the direct support of the U.S. federal government, on July 30, 2008, the U.S. government passed the Housing and Economic Recovery Act of 2008. On September 7, 2008, the FHFA, placed Fannie Mae and Freddie Mac into conservatorship and, together with the U.S. Treasury, established a program designed to boost investor confidence in their respective debt and MBS.

As the conservator of Fannie Mae and Freddie Mac, the FHFA controls and directs the operations of Fannie Mae and Freddie Mac and may (i) take over the assets and operations of Fannie Mae and Freddie Mac with all the powers of the shareholders, the directors and the officers of Fannie Mae and Freddie Mac and conduct all business of Fannie Mae and Freddie Mac; (ii) collect all obligations and money due to Fannie Mae and Freddie Mac; (iii) perform all functions of Fannie Mae and Freddie Mac which are consistent with the conservator's appointment; (iv) preserve and conserve the assets and property of Fannie Mae and Freddie Mac; and (v) contract for assistance in fulfilling any function, activity, action or duty of the conservator.

In addition to the FHFA becoming the conservator of Fannie Mae and Freddie Mac, the U.S. Treasury and the FHFA have entered into preferred stock purchase agreements among the U.S. Treasury, Fannie Mae and Freddie Mac

pursuant to which the U.S. Treasury will ensure that each of Fannie Mae and Freddie Mac maintains a positive net worth.

Table of Contents

Although the U.S. Treasury has committed capital to Fannie Mae and Freddie Mac, these actions may not be adequate for their needs. If these actions are inadequate, Fannie Mae and Freddie Mac could continue to suffer losses and could fail to honor their guarantees and other obligations. The future roles of Fannie Mae and Freddie Mac could be significantly reduced and the nature of their guarantees could be considerably limited relative to historical measurements. Any changes to the nature of the guarantees provided by Fannie Mae and Freddie Mac could redefine what constitutes agency and government conforming mortgage backed securities (MBS) and could have broad adverse market implications. Such market implications could adversely affect our business and prospects.

Legislation that permits modifications to the terms of outstanding loans may negatively affect our business, financial condition, liquidity and results of operations.

The U.S. government has enacted legislation that enables government agencies to modify the terms of a significant number of residential and other loans to provide relief to borrowers without the applicable investor's consent. These modifications allow for outstanding principal to be deferred, interest rates to be reduced, the term of the loan to be extended or other terms to be changed in ways that can permanently eliminate the cash flow (principal and interest) associated with a portion of the loan. These modifications are currently reducing, or in the future may reduce, the value of a number of our current or future investments, including investments in mortgage backed securities and Excess MSR's. As a result, such loan modifications are negatively affecting our business, results of operations, liquidity and financial condition. In addition, certain market participants propose reducing the amount of paperwork required by a borrower to modify a loan, which could increase the likelihood of fraudulent modifications and materially harm the U.S. mortgage market and investors that have exposure to this market. Additional legislation intended to provide relief to borrowers may be enacted and could further harm our business, results of operations and financial condition.

RISKS RELATED TO OUR TAXATION AS A REIT

Our failure to qualify as a REIT would result in higher taxes and reduced cash available for distribution to our stockholders.

We intend to operate in a manner intended to qualify us as a REIT for U.S. federal income tax purposes. Our ability to satisfy the asset tests depends upon our analysis of the fair market values of our assets, some of which are not susceptible to a precise determination, and for which we do not obtain independent appraisals. Our compliance with the REIT income and quarterly asset requirements also depends upon our ability to successfully manage the composition of our income and assets on an ongoing basis. Moreover, the proper classification of one or more of our investments may be uncertain in some circumstances, which could affect the application of the REIT qualification requirements. Accordingly, there can be no assurance that the IRS will not contend that our investments violate the REIT requirements.

If we were to fail to qualify as a REIT in any taxable year, we would be subject to U.S. federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates, and distributions to stockholders would not be deductible by us in computing our taxable income. Any such corporate tax liability could be substantial and would reduce the amount of cash available for distribution to our stockholders, which in turn could have an adverse impact on the value of, and trading prices for, our stock. Unless entitled to relief under certain provisions of the Code, we also would be disqualified from taxation as a REIT for the four taxable years following the year during which we initially ceased to qualify as a REIT. The rule against reelecting REIT status following a loss of such status would also apply to us if Newcastle fails to qualify as a REIT, and we are treated as a successor to Newcastle for U.S. federal income tax purposes. Although, as described under the heading Certain Relationships and Transactions with Related Persons, Affiliates and Affiliated Entities, Newcastle has (i) represented in the separation

and distribution agreement that it entered into with us on April 26, 2013 (the Separation and Distribution Agreement)
that it has no knowledge

Table of Contents

of any fact or circumstance that would cause us to fail to qualify as a REIT and (ii) covenanted in the Separation and Distribution Agreement to use its reasonable best efforts to maintain its REIT status for each of Newcastle's taxable years ending on or before December 31, 2014 (unless Newcastle obtains an opinion from a nationally recognized tax counsel or a private letter ruling from the IRS to the effect that Newcastle's failure to maintain its REIT status will not cause us to fail to qualify as a REIT under the successor REIT rule referred to above), no assurance can be given that such representation and covenant would prevent us from failing to qualify as a REIT. Although, in the event of a breach, we may be able to seek damages from Newcastle, there can be no assurance that such damages, if any, would appropriately compensate us. In addition, if Newcastle were to fail to qualify as a REIT despite its reasonable best efforts, we would have no claim against Newcastle. See "U.S. Federal Income Tax Considerations" for a discussion of material U.S. federal income tax consequences relating to us and our common stock.

Our failure to qualify as a REIT would cause our stock to be delisted from the NYSE.

The NYSE requires, as a condition to the listing of our shares, that we maintain our REIT status. Consequently, if we fail to maintain our REIT status, our shares would promptly be delisted from the NYSE, which would decrease the trading activity of such shares. This could make it difficult to sell shares and would likely cause the market volume of the shares trading to decline.

If we were delisted as a result of losing our REIT status and desired to relist our shares on the NYSE, we would have to reapply to the NYSE to be listed as a domestic corporation. As the NYSE's listing standards for REITs are less onerous than its standards for domestic corporations, it would be more difficult for us to become a listed company under these heightened standards. We might not be able to satisfy the NYSE's listing standards for a domestic corporation. As a result, if we were delisted from the NYSE, we might not be able to relist as a domestic corporation, in which case our shares could not trade on the NYSE.

The failure of assets subject to repurchase agreements to qualify as real estate assets could adversely affect our ability to qualify as a REIT.

We enter into financing arrangements that are structured as sale and repurchase agreements pursuant to which we nominally sell certain of our assets to a counterparty and simultaneously enter into an agreement to repurchase these assets at a later date in exchange for a purchase price. Economically, these agreements are financings that are secured by the assets sold pursuant thereto. We believe that, for purposes of the REIT asset and income tests, we should be treated as the owner of the assets that are the subject of any such sale and repurchase agreement, notwithstanding that those agreements generally transfer record ownership of the assets to the counterparty during the term of the agreement. It is possible, however, that the IRS could assert that we did not own the assets during the term of the sale and repurchase agreement, in which case we might fail to qualify as a REIT.

The failure of our Excess MSR investments to qualify as real estate assets or the income from our Excess MSR investments to qualify as mortgage interest could adversely affect our ability to qualify as a REIT.

We have received from the IRS a private letter ruling substantially to the effect that our Excess MSR investments represent interests in mortgages on real property and thus are qualifying real estate assets for purposes of the REIT asset test, which generate income that qualifies as interest on obligations secured by mortgages on real property for purposes of the REIT income test. The ruling is based on, among other things, certain assumptions as well as on the accuracy of certain factual representations and statements that we and Newcastle have made to the IRS. If any of the representations or statements that we have made in connection with the private letter ruling, are, or become, inaccurate or incomplete in any material respect with respect to one or more Excess MSR investments, or if we acquire an Excess MSR investment with terms that are not consistent with the terms of the Excess MSR investments described in the

private letter ruling, then we will not be able to rely on the private letter ruling. If we are unable to rely on the private letter ruling with respect to an Excess MSR investment, the IRS could assert that such Excess MSR investments do not qualify under the REIT asset and income tests, and if successful, we might fail to qualify as a REIT.

Table of Contents

Dividends payable by REITs do not qualify for the reduced tax rates available for some dividends.

Dividends payable to domestic stockholders that are individuals, trusts, and estates are generally taxed at reduced tax rates. Dividends payable by REITs, however, generally are not eligible for the reduced rates. The more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our common stock. In addition, the relative attractiveness of real estate in general may be adversely affected by the favorable tax treatment given to non-REIT corporate dividends, which could affect the value of our real estate assets negatively.

Qualifying as a REIT involves highly technical and complex provisions of the Code.

Qualification as a REIT involves the application of highly technical and complex Code provisions for which only limited judicial and administrative authorities exist. Even a technical or inadvertent violation could jeopardize our REIT qualification. Our qualification as a REIT will depend on our satisfaction of certain asset, income, organizational, distribution, stockholder ownership and other requirements on a continuing basis. Compliance with these requirements must be carefully monitored on a continuing basis. Monitoring and managing our REIT compliance has become challenging due to the increased size and complexity of the assets in our portfolio, a meaningful portion of which are not qualifying REIT assets. There can be no assurance that our Manager's personnel responsible for doing so will be able to successfully monitor our compliance or maintain our REIT status.

REIT distribution requirements could adversely affect our liquidity and our ability to execute our business plan.

We generally must distribute annually at least 90% of our REIT taxable income, excluding any net capital gain, in order for corporate income tax not to apply to earnings that we distribute. We intend to make distributions to our stockholders to comply with the REIT requirements of the Code. However, differences in timing between the recognition of taxable income and the actual receipt of cash could require us to sell assets or borrow funds on a short-term or long-term basis to meet the 90% distribution requirement of the Code. Certain of our assets may generate substantial mismatches between taxable income and available cash. As a result, the requirement to distribute a substantial portion of our net taxable income could cause us to: (i) sell assets in adverse market conditions; (ii) borrow on unfavorable terms; (iii) distribute amounts that would otherwise be invested in future acquisitions, capital expenditures or repayment of debt; or (iv) make taxable distributions of our capital stock or debt securities in order to comply with REIT requirements. Further, amounts distributed will not be available to fund investment activities. If we fail to obtain debt or equity capital in the future, it could limit our ability to satisfy our liquidity needs, which could adversely affect the value of our common stock.

We may be required to report taxable income for certain investments in excess of the economic income we ultimately realize from them.

Based on IRS guidance concerning the classification of Excess MSR, we intend to treat our Excess MSR as ownership interests in the interest payments made on the underlying mortgage loans, akin to an interest only strip. Under this treatment, for purposes of determining the amount and timing of taxable income, each Excess MSR is treated as a bond that was issued with original issue discount on the date we acquired such Excess MSR. In general, we will be required to accrue original issue discount based on the constant yield to maturity of each Excess MSR, and to treat such original issue discount as taxable income in accordance with the applicable U.S. federal income tax rules. The constant yield of an Excess MSR will be determined, and we will be taxed, based on a prepayment assumption regarding future payments due on the mortgage loans underlying the Excess MSR. If the mortgage loans underlying

an Excess MSR prepay at a rate different than that under the prepayment assumption, our recognition of original issue discount will be either increased or decreased depending on the

Table of Contents

circumstances. Thus, in a particular taxable year, we may be required to accrue an amount of income in respect of an Excess MSR that exceeds the amount of cash collected in respect of that Excess MSR. Furthermore, it is possible that, over the life of the investment in an Excess MSR, the total amount we pay for, and accrue with respect to, the Excess MSR may exceed the total amount we collect on such Excess MSR. No assurance can be given that we will be entitled to a deduction for such excess, meaning that we may be required to recognize phantom income over the life of an Excess MSR.

Other debt instruments that we may acquire, including consumer loans, may be issued with, or treated as issued with, original issue discount. Those instruments would be subject to the original issue discount accrual and income computations that are described above with regard to Excess MSRs.

We may acquire debt instruments in the secondary market for less than their face amount. The discount at which such debt instruments are acquired may reflect doubts about their ultimate collectability rather than current market interest rates. The amount of such discount will nevertheless generally be treated as market discount for U.S. federal income tax purposes. Accrued market discount is reported as income when, and to the extent that, any payment of principal of the debt instrument is made. If we collect less on the debt instrument than our purchase price plus the market discount we had previously reported as income, we may not be able to benefit from any offsetting loss deductions.

In addition, we may acquire debt instruments that are subsequently modified by agreement with the borrower. If the amendments to the outstanding instrument are significant modifications under the applicable Treasury regulations, the modified instrument will be considered to have been reissued to us in a debt-for-debt exchange with the borrower. In that event, we may be required to recognize taxable gain to the extent the principal amount of the modified instrument exceeds our adjusted tax basis in the unmodified instrument, even if the value of the instrument or the payment expectations have not changed. Following such a taxable modification, we would hold the modified loan with a cost basis equal to its principal amount for U.S. federal tax purposes.

Finally, in the event that any debt instruments acquired by us are delinquent as to mandatory principal and interest payments, or in the event payments with respect to a particular instrument are not made when due, we may nonetheless be required to continue to recognize the unpaid interest as taxable income as it accrues, despite doubt as to its ultimate collectability. Similarly, we may be required to accrue interest income with respect to debt instruments at the stated rate regardless of whether corresponding cash payments are received or are ultimately collectible. In each case, while we would in general ultimately have an offsetting loss deduction available to us when such interest was determined to be uncollectible, the utility of that deduction could depend on our having taxable income of an appropriate character in that later year or thereafter.

In any event, if our investments generate more taxable income than cash in any given year, we may have difficulty satisfying our annual REIT distribution requirement. See U.S. Federal Income Tax Considerations Taxation of New Residential Annual Distribution Requirements.

We may be unable to generate sufficient revenue from operations to pay our operating expenses and to pay distributions to our stockholders.

As a REIT, we are generally required to distribute at least 90% of our REIT taxable income (determined without regard to the dividends paid deduction and not including net capital losses) each year to our stockholders. To qualify for the tax benefits accorded to REITs, we intend to make distributions to our stockholders in amounts such that we distribute all or substantially all of our net taxable income each year, subject to certain adjustments. However, our ability to make distributions may be adversely affected by the risk factors described herein.

Table of Contents

The stock ownership limit imposed by the Code for REITs and our certificate of incorporation may inhibit market activity in our stock and restrict our business combination opportunities.

In order for us to maintain our qualification as a REIT under the Code, not more than 50% in value of our outstanding stock may be owned, directly or indirectly, by five or fewer individuals (as defined in the Code to include certain entities) at any time during the last half of each taxable year after our first taxable year. Our certificate of incorporation, with certain exceptions, authorizes our board of directors to take the actions that are necessary and desirable to preserve our qualification as a REIT. Stockholders are generally restricted from owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of capital stock. Our board may grant an exemption in its sole discretion, subject to such conditions, representations and undertakings as it may determine in its sole discretion. These ownership limits could delay or prevent a transaction or a change in our control that might involve a premium price for our common stock or otherwise be in the best interest of our stockholders.

Even if we remain qualified as a REIT, we may face other tax liabilities that reduce our cash flow.

Even if we remain qualified for taxation as a REIT, we may be subject to certain federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes. Moreover, if a REIT distributes less than 85% of its taxable income to its stockholders during any calendar year (including any distributions declared by the last day of the calendar year but paid in the subsequent year), then it is required to pay an excise tax on 4% of any shortfall between the required 85% and the amount that was actually distributed. Any of these taxes would decrease cash available for distribution to our stockholders. In addition, in order to meet the REIT qualification requirements, or to avert the imposition of a 100% tax that applies to certain gains derived by a REIT from dealer property or inventory, we currently hold some of our assets through TRSs, such as our investment in servicer advances. Such subsidiaries will be subject to corporate level income tax at regular rates.

Complying with the REIT requirements may negatively impact our investment returns or cause us to forego otherwise attractive opportunities, liquidate assets or contribute assets to a TRS.

To qualify as a REIT for U.S. federal income tax purposes, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. As a result of these tests, we may be required to make distributions to stockholders at disadvantageous times or when we do not have funds readily available for distribution, forego otherwise attractive investment opportunities, liquidate assets in adverse market conditions or contribute assets to a TRS that is subject to regular corporate federal income tax. Our ability to acquire Excess MSR, servicer advances and other investments will be subject to the applicable REIT qualification tests, and we may have to hold these interests through TRSs, which would negatively impact our returns from these assets. In general, compliance with the REIT requirements may hinder our ability to make and retain certain attractive investments.

Complying with the REIT requirements may limit our ability to hedge effectively.

The existing REIT provisions of the Code may substantially limit our ability to hedge our operations because a significant amount of the income from those hedging transactions is likely to be treated as non-qualifying income for purposes of both REIT gross income tests. In addition, we must limit our aggregate income from non-qualified hedging transactions, from our provision of services and from other non-qualifying sources, to less than 5% of our annual gross income (determined without regard to gross income from qualified hedging transactions). As a result, we may have to limit our use of certain hedging techniques or implement those hedges through TRSs. This could result in

greater risks associated with changes in interest rates than we would otherwise want to incur or could increase the cost of our hedging activities. If we fail to comply with these limitations, we could lose our

Table of Contents

REIT qualification for U.S. federal income tax purposes, unless our failure was due to reasonable cause, and not due to willful neglect, and we meet certain other technical requirements. Even if our failure were due to reasonable cause, we might incur a penalty tax.

Distributions to tax-exempt investors may be classified as unrelated business taxable income.

Neither ordinary nor capital gain distributions with respect to our stock nor gain from the sale of stock should generally constitute unrelated business taxable income to a tax-exempt investor. However, there are certain exceptions to this rule. In particular:

part of the income and gain recognized by certain qualified employee pension trusts with respect to our stock may be treated as unrelated business taxable income if shares of our stock are predominantly held by qualified employee pension trusts, and we are required to rely on a special look-through rule for purposes of meeting one of the REIT ownership tests, and we are not operated in a manner to avoid treatment of such income or gain as unrelated business taxable income;

part of the income and gain recognized by a tax-exempt investor with respect to our stock would constitute unrelated business taxable income if the investor incurs debt in order to acquire the stock; and

to the extent that we are (or a part of us, or a disregarded subsidiary of ours, is) a taxable mortgage pool, or if we hold residual interests in a real estate mortgage investment conduit (REMIC), a portion of the distributions paid to a tax-exempt stockholder that is allocable to excess inclusion income may be treated as unrelated business taxable income.

The taxable mortgage pool rules may increase the taxes that we or our stockholders may incur, and may limit the manner in which we effect future securitizations.

We may enter into securitization or other financing transactions that result in the creation of taxable mortgage pools for U.S. federal income tax purposes. As a REIT, so long as we own 100% of the equity interests in a taxable mortgage pool, we would generally not be adversely affected by the characterization of a securitization as a taxable mortgage pool. Certain categories of stockholders, however, such as foreign stockholders eligible for treaty or other benefits, stockholders with net operating losses, and certain tax-exempt stockholders that are subject to unrelated business income tax, could be subject to increased taxes on a portion of their dividend income from us that is attributable to the taxable mortgage pool. In addition, to the extent that our stock is owned by tax-exempt disqualified organizations, such as certain government-related entities and charitable remainder trusts that are not subject to tax on unrelated business income, we could incur a corporate level tax on a portion of our income from the taxable mortgage pool. In that case, we might reduce the amount of our distributions to any disqualified organization whose stock ownership gave rise to the tax. Moreover, we may be precluded from selling equity interests in these securitizations to outside investors, or selling any debt securities issued in connection with these securitizations that might be considered to be equity interests for tax purposes. These limitations may prevent us from using certain techniques to maximize our returns from securitization transactions.

Uncertainty exists with respect to the treatment of TBAs for purposes of the REIT asset and income tests.

We purchase and sell Agency RMBS through TBAs and recognize income or gains from the disposition of those TBAs, through dollar roll transactions or otherwise. In a dollar roll transaction, we exchange an existing TBA for another TBA with a different settlement date. There is no direct authority with respect to the qualification of TBAs as real estate assets or U.S. Government securities for purposes of the 75% asset test or the qualification of income or gains from dispositions of TBAs as gains from the sale of real property (including interests in real property and interests in mortgages on real property) or other qualifying income for purposes of the 75% gross income test. For a particular taxable year, we would treat such TBAs as qualifying assets for purposes of the REIT asset tests, and income and gains from such TBAs as qualifying income for purposes of the 75% gross

Table of Contents

income test, to the extent set forth in an opinion from Skadden, Arps, Slate, Meagher & Flom LLP substantially to the effect that (i) for purposes of the REIT asset tests, our ownership of a TBA should be treated as ownership of the underlying Agency RMBS, and (ii) for purposes of the 75% REIT gross income test, any gain recognized by us in connection with the settlement of such TBAs should be treated as gain from the sale or disposition of the underlying Agency RMBS. Opinions of counsel are not binding on the IRS, and no assurance can be given that the IRS would not successfully challenge the conclusions set forth in such opinions. In addition, it must be emphasized that any opinion of Skadden, Arps, Slate, Meagher & Flom LLP would be based on various assumptions relating to any TBAs that we enter into and would be conditioned upon fact-based representations and covenants made by our management regarding such TBAs. No assurance can be given that the IRS would not assert that such assets or income are not qualifying assets or income. If the IRS were to successfully challenge any conclusions of Skadden, Arps, Slate, Meagher & Flom LLP, we could be subject to a penalty tax or we could fail to qualify as a REIT if a sufficient portion of our assets consists of TBAs or a sufficient portion of our income consists of income or gains from the disposition of TBAs.

The tax on prohibited transactions will limit our ability to engage in transactions which would be treated as prohibited transactions for U.S. federal income tax purposes.

Net income that we derive from a prohibited transaction is subject to a 100% tax. The term prohibited transaction generally includes a sale or other disposition of property (including mortgage loans, but other than foreclosure property, as discussed below) that is held primarily for sale to customers in the ordinary course of our trade or business. We might be subject to this tax if we were to dispose of or securitize loans or Excess MSR in a manner that was treated as a prohibited transaction for U.S. federal income tax purposes.

We intend to conduct our operations so that no asset that we own (or are treated as owning) will be treated as, or as having been, held for sale to customers, and that a sale of any such asset will not be treated as having been in the ordinary course of our business. As a result, we may choose not to engage in certain sales of loans or Excess MSR at the REIT level, and may limit the structures we utilize for our securitization transactions, even though the sales or structures might otherwise be beneficial to us. In addition, whether property is held primarily for sale to customers in the ordinary course of a trade or business depends on the particular facts and circumstances. No assurance can be given that any property that we sell will not be treated as property held for sale to customers, or that we can comply with certain safe-harbor provisions of the Code that would prevent such treatment. The 100% prohibited transaction tax does not apply to gains from the sale of property that is held through a TRS or other taxable corporation, although such income will be subject to tax in the hands of the corporation at regular corporate rates. We intend to structure our activities to prevent prohibited transaction characterization.

New legislation or administrative or judicial action, in each instance potentially with retroactive effect, could make it more difficult or impossible for us to qualify as a REIT.

The present U.S. federal income tax treatment of REITs may be modified, possibly with retroactive effect, by legislative, judicial or administrative action at any time, which could affect the U.S. federal income tax treatment of an investment in us. The U.S. federal income tax rules dealing with REITs constantly are under review by persons involved in the legislative process, the IRS and the U.S. Treasury Department, which results in statutory changes as well as frequent revisions to regulations and interpretations. Revisions in U.S. federal tax laws and interpretations thereof could affect or cause us to change our investments and commitments and affect the tax considerations of an investment in us.

Liquidation of assets may jeopardize our REIT qualification or create additional tax liability for us.

To qualify as a REIT, we must comply with requirements regarding the composition of our assets and our sources of income. If we are compelled to liquidate our investments to repay obligations to our lenders, we may

Table of Contents

be unable to comply with these requirements, ultimately jeopardizing our qualification as a REIT, or we may be subject to a 100% tax on any resultant gain if we sell assets that are treated as dealer property or inventory.

RISKS RELATED TO OUR COMMON STOCK

There can be no assurance that the market for our stock will provide you with adequate liquidity.

Our common stock began trading (on a when issued basis) on the NYSE on May 2, 2013. There can be no assurance that an active trading market for our common stock will develop or be sustained in the future, and the market price of our common stock may fluctuate widely, depending upon many factors, some of which may be beyond our control. These factors include, without limitation:

a shift in our investor base;

our quarterly or annual earnings, or those of other comparable companies;

actual or anticipated fluctuations in our operating results;

changes in accounting standards, policies, guidance, interpretations or principles;

announcements by us or our competitors of significant investments, acquisitions or dispositions;

the failure of securities analysts to cover our common stock;

changes in earnings estimates by securities analysts or our ability to meet those estimates;

the operating and stock price performance of other comparable companies;

overall market fluctuations; and

general economic conditions.

Stock markets in general have experienced volatility that has often been unrelated to the operating performance of a particular company. These broad market fluctuations may adversely affect the trading price of our common stock.

Sales or issuances of shares of our common stock could adversely affect the market price of our common stock.

Sales of substantial amounts of shares of our common stock in the public market, or the perception that such sales might occur, could adversely affect the market price of our common stock. The issuance of our common stock in connection with property, portfolio or business acquisitions or the exercise of outstanding stock options or otherwise could also have an adverse effect on the market price of our common stock. See Shares Eligible for Future Sale.

We, the Selling Stockholder, our Manager and our officers and directors have agreed that, for a period of days from the date of this prospectus, we and they will not, without the prior written consent of Credit Suisse Securities (USA) LLC, dispose of or hedge any shares or any securities convertible into or exchangeable for our common stock. Credit Suisse Securities (USA) LLC, in its sole discretion, may release any of the securities subject to these lock-up agreements at any time, which, in the case of officers and directors, shall be with notice. If the restrictions under the lock-up agreements are waived, our common stock may become available for sale into the market, subject to applicable law, which could reduce the market price for our common stock.

Failure to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act could have a material adverse effect on our business and stock price.

As a public company, we are required to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Internal control over financial reporting is complex and

Table of Contents

may be revised over time to adapt to changes in our business, or changes in applicable accounting rules. We have made investments through joint ventures, and accounting for such investments can increase the complexity of maintaining effective internal control over financial reporting. We cannot assure you that our internal control over financial reporting will be effective in the future or that a material weakness will not be discovered with respect to a prior period for which we had previously believed that internal controls were effective. If we are not able to maintain or document effective internal control over financial reporting, our independent registered public accounting firm will not be able to certify as to the effectiveness of our internal control over financial reporting. Matters impacting our internal controls may cause us to be unable to report our financial information on a timely basis, or may cause us to restate previously issued financial information, and thereby subject us to adverse regulatory consequences, including sanctions or investigations by the SEC, or violations of applicable stock exchange listing rules. There could also be a negative reaction in the financial markets due to a loss of investor confidence in us and the reliability of our financial statements. Confidence in the reliability of our financial statements is also likely to suffer if we or our independent registered public accounting firm reports a material weakness in our internal control over financial reporting. This could materially adversely affect us by, for example, leading to a decline in our share price and impairing our ability to raise capital.

Your percentage ownership in us may be diluted in the future.

Your percentage ownership in us may be diluted in the future because of equity awards that we expect will be granted to our Manager, to the directors, officers and employees of our Manager who perform services for us, and to our directors, officers and employees, as well as other equity instruments such as debt and equity financing. Our board of directors has approved a Nonqualified Stock Option and Incentive Award Plan (the Plan) which provides for the grant of equity-based awards, including restricted stock, stock options, stock appreciation rights (SARs), performance awards, tandem awards and other equity-based and non equity-based awards, in each case to our Manager, to the directors, officers, employees, service providers, consultants and advisor of our Manager who perform services for us, and to our directors, officers, employees, service providers, consultants and advisors. We reserved 30,000,000 shares of our common stock for issuance under the Plan. On the first day of each fiscal year beginning during the ten-year term of the Plan and in and after calendar year 2014, that number will be increased by a number of shares of our common stock equal to 10% of the number of shares of our common stock newly issued by us during the immediately preceding fiscal year (and, in the case of fiscal year 2013, after the effective date of the Plan). For a more detailed description of the Plan, see Management Nonqualified Stock Option and Incentive Award Plan. In connection with this offering, we will issue to our Manager options to purchase shares of our common stock, representing 10% of the number of shares being offered by us hereby, that will be granted to an affiliate of our manager in connection with this offering, and subject to adjustment if the underwriters exercise their option to purchase additional shares of our common stock. Our board of directors may also determine to issue options to the Manager that are not subject to the Plan, provided that the number of shares underlying any options granted to the Manager in connection with capital raising efforts would not exceed 10% of the shares sold in such offering and would be subject to NYSE rules.

We may incur or issue debt or issue equity, which may negatively affect the market price of our common stock.

We may in the future incur or issue debt or issue equity or equity-related securities. Upon our liquidation, lenders and holders of our debt and holders of our preferred stock (if any) would receive a distribution of our available assets before common stockholders. Any future incurrence or issuance of debt would increase our interest cost and could adversely affect our results of operations and cash flows. We are not required to offer any additional equity securities to existing common stockholders on a preemptive basis. Therefore, additional issuances of common stock, directly or through convertible or exchangeable securities (including limited partnership interests in our operating partnership), warrants or options, will dilute the holdings of our existing common stockholders and such issuances, or the perception of such issuances, may reduce the market price of our common stock. Any preferred stock issued by us

would likely have a preference on distribution payments, periodically or upon liquidation, which could eliminate or otherwise limit our ability to make distributions to common stockholders.

Table of Contents

Because our decision to incur or issue debt or issue equity or equity-related securities in the future will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing, nature or success of our future capital raising efforts. Thus, common stockholders bear the risk that our future incurrence or issuance of debt or issuance of equity or equity-related securities will adversely affect the market price of our common stock.

We have not established a minimum distribution payment level and we cannot assure you of our ability to pay distributions in the future.

We intend to make quarterly distributions of all or substantially all of our REIT taxable income to holders of our common stock out of assets legally available therefor. We have not established a minimum distribution payment level and our ability to pay distributions may be adversely affected by a number of factors, including the risk factors described in this prospectus. Any distributions will be authorized by our board of directors and declared by us based upon a number of factors, including actual results of operations, liquidity and financial condition, restrictions under Delaware law or applicable financing covenants, our taxable income, the annual distribution requirements under the REIT provisions of the Code, our operating expenses and other factors our directors deem relevant. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions in the future.

Furthermore, while we are required to make distributions in order to maintain our REIT status (as described above under **Risks Related to our Taxation as a REIT** We may be unable to generate sufficient revenue from operations to pay our operating expenses and to pay distributions to our stockholders), we may elect not to maintain our REIT status, in which case we would no longer be required to make such distributions. Moreover, even if we do elect to maintain our REIT status, we may elect to comply with the applicable requirements by, after completing various procedural steps, distributing, under certain circumstances, a portion of the required amount in the form of shares of our common stock in lieu of cash. If we elect not to maintain our REIT status or to satisfy any required distributions in shares of common stock in lieu of cash, such action could negatively affect our business, results of operations, liquidity and financial condition as well as the price of our common stock. No assurance can be given that we will pay any dividends on shares of our common stock in the future.

We may in the future choose to pay dividends in our own stock, in which case you could be required to pay income taxes in excess of the cash dividends you receive.

We may in the future distribute taxable dividends that are payable in cash and shares of our common stock at the election of each stockholder. Taxable stockholders receiving such dividends will be required to include the full amount of the dividend as ordinary income to the extent of our current and accumulated earnings and profits for federal income tax purposes. As a result, stockholders may be required to pay income taxes with respect to such dividends in excess of the cash dividends received. If a U.S. stockholder sells the stock that it receives as a dividend in order to pay this tax, the sale proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to certain non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our common stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common stock.

It is unclear whether and to what extent we will be able to pay taxable dividends in cash and stock in later years. Moreover, various aspects of such a taxable cash/stock dividend are uncertain and have not yet been addressed by the IRS. No assurance can be given that the IRS will not impose additional requirements in the future with respect to

taxable cash/stock dividends, including on a retroactive basis, or assert that the requirements for such taxable cash/stock dividends have not been met.

Table of Contents

An increase in market interest rates may have an adverse effect on the market price of our common stock.

One of the factors that investors may consider in deciding whether to buy or sell shares of our common stock is our distribution rate as a percentage of our share price relative to market interest rates. If the market price of our common stock is based primarily on the earnings and return that we derive from our investments and income with respect to our investments and our related distributions to stockholders, and not from the market value of the investments themselves, then interest rate fluctuations and capital market conditions will likely affect the market price of our common stock. For instance, if market interest rates rise without an increase in our distribution rate, the market price of our common stock could decrease as potential investors may require a higher distribution yield on our common stock or seek other securities paying higher distributions or interest. In addition, rising interest rates would result in increased interest expense on our variable rate debt, thereby adversely affecting cash flow and our ability to service our indebtedness and pay distributions.

Provisions in our certificate of incorporation and bylaws and of Delaware law may prevent or delay an acquisition of our company, which could decrease the trading price of our common stock.

Our certificate of incorporation, bylaws and Delaware law contain provisions that are intended to deter coercive takeover practices and inadequate takeover bids by making such practices or bids unacceptably expensive to the raider and to encourage prospective acquirers to negotiate with our board of directors rather than to attempt a hostile takeover. These provisions include, among others:

a classified board of directors with staggered three-year terms;

provisions regarding the election of directors, classes of directors, the term of office of directors, the filling of director vacancies and the resignation and removal of directors for cause only upon the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote thereon;

provisions regarding corporate opportunity only upon the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote thereon;

removal of directors only for cause and only with the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote in the election of directors;

our board of directors to determine the powers, preferences and rights of our preferred stock and to issue such preferred stock without stockholder approval;

advance notice requirements applicable to stockholders for director nominations and actions to be taken at annual meetings;

a prohibition, in our certificate of incorporation, stating that no holder of shares of our common stock will have cumulative voting rights in the election of directors, which means that the holders of a majority of the issued and outstanding shares of common stock can elect all the directors standing for election; and

a requirement in our bylaws specifically denying the ability of our stockholders to consent in writing to take any action in lieu of taking such action at a duly called annual or special meeting of our stockholders.

Public stockholders who might desire to participate in these types of transactions may not have an opportunity to do so, even if the transaction is considered favorable to stockholders. These anti-takeover provisions could substantially impede the ability of public stockholders to benefit from a change in control or a change in our management and board of directors and, as a result, may adversely affect the market price of our common stock and your ability to realize any potential change of control premium. See Certain Provisions of the Delaware General Corporation Law and Our Certificate of Incorporation and Bylaws Anti-Takeover Effects of Delaware Law, Our Certificate of Incorporation and Bylaws.

Table of Contents

ERISA may restrict investments by plans in our common stock.

A plan fiduciary considering an investment in our common stock should consider, among other things, whether such an investment is consistent with the fiduciary obligations under the Employee Retirement Income Security Act of 1974, as amended (ERISA), including whether such investment might constitute or give rise to a prohibited transaction under ERISA, the Code or any substantially similar federal, state or local law and, if so, whether an exemption from such prohibited transaction rules is available.

Table of Contents

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, which statements involve substantial risks and uncertainties. Such forward-looking statements relate to, among other things, the operating performance of our investments, the stability of our earnings, our financing needs and the size and attractiveness of market opportunities. Forward-looking statements are generally identifiable by use of forward-looking terminology such as may, will, should, potential, intend, expect, endeavor, seek, anticipate, estimate, overestimate, underestimate, believe, could, project, predict, continue or expressions. Forward-looking statements are based on certain assumptions, discuss future expectations, describe future plans and strategies, contain projections of results of operations, cash flows or financial condition or state other forward-looking information. Our ability to predict results or the actual outcome of future plans or strategies is inherently uncertain. Although we believe that the expectations reflected in such forward-looking statements are based on reasonable assumptions, our actual results and performance could differ materially from those set forth in the forward-looking statements. These forward-looking statements involve risks, uncertainties and other factors that may cause our actual results in future periods to differ materially from forecasted results. Factors which could have a material adverse effect on our operations and future prospects include, but are not limited to:

reductions in cash flows received from our investments;

our ability to take advantage of investment opportunities at attractive risk-adjusted prices;

our ability to take advantage of investment opportunities in Excess MSR, servicer advances, real estate securities and real estate related loans;

servicer advances may not be recoverable or may take longer to recover than we expect, which could cause us to fail to achieve our targeted return on our investment in servicer advances;

our ability to deploy capital accretively;

our counterparty concentration and default risks in Nationstar, Springleaf and other third-parties;

a lack of liquidity surrounding our investments which could impede our ability to vary our portfolio in an appropriate manner;

the impact that risks associated with subprime mortgage loans and consumer loans, as well as deficiencies in servicing and foreclosure practices, may have on the value of our Excess MSR, servicer advances, RMBS and consumer loan portfolios;

the risks that default and recovery rates on our Excess MSR, servicer advances, real estate securities, residential mortgage loans and consumer loans deteriorate compared to our underwriting estimates;

changes in prepayment rates on the loans underlying certain of our assets, including, but not limited to, our Excess MSR;

the risk that projected recapture rates on the portfolios underlying our Excess MSR are not achieved;

the relationship between yields on assets which are paid off and yields on assets in which such monies can be reinvested;

the relative spreads between the yield on the assets we invest in and the cost of financing;

changes in economic conditions generally and the real estate and bond markets specifically;

adverse changes in the financing markets we access affecting our ability to finance our investments on attractive terms, or at all;

the quality and size of the investment pipeline and the rate at which we can invest our cash;

changing risk assessments by lenders that potentially lead to increased margin calls, not extending our repurchase agreements or other financings in accordance with their current terms or not entering into new financings with us;

Table of Contents

changes in interest rates and/or credit spreads, as well as the success of any hedging strategy we may undertake in relation to such changes;

impairments in the value of the collateral underlying our investments and the relation of any such impairments to our judgments as to whether changes in the market value of our securities or loans are temporary or not and whether circumstances bearing on the value of such assets warrant changes in carrying values;

the availability and terms of capital for future investments;

competition within the finance and real estate industries;

the legislative/regulatory environment, including, but not limited to, the impact of the Dodd-Frank Act, U.S. government programs intended to stabilize the economy, the federal conservatorship of Fannie Mae and Freddie Mac and legislation that permits modification of the terms of loans;

our ability to maintain our qualification as a REIT for U.S. federal income tax purposes and the potentially onerous consequences that any failure to maintain such qualification would have on our business; and

our ability to maintain our exclusion from registration under the 1940 Act and the fact that maintaining such exemption imposes limits on our operations.

We also direct readers to other risks and uncertainties referenced in this prospectus, including those set forth under Risk Factors. We caution that you should not place undue reliance on any of our forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made. New risks and uncertainties arise from time to time, and it is impossible for us to predict those events or how they may affect us. Except as required by law, we are under no obligation (and expressly disclaim any obligation) to update or alter any forward-looking statement, whether written or oral, that we may make from time to time, whether as a result of new information, future events or otherwise.

Table of Contents

USE OF PROCEEDS

We estimate that the net proceeds to us from this offering, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, will be approximately \$ million, assuming a public offering price of \$ per share, the last reported sales price of our common stock on the NYSE on , 2014 (or \$ million if the underwriters exercise their option to purchase additional shares of common stock in full). We will not receive any proceeds from the sale of Option Shares by the Selling Stockholder.

We intend to use the net proceeds from this offering for general corporate purposes, including to make a variety of investments, which may include, but is not limited to, investments in Excess MSRs, servicer advances, real estate securities and real estate related loans.

A \$1.00 increase (decrease) in the assumed public offering price of \$ per share (the last reported sales price of our common stock on the NYSE on , 2014) would increase (decrease) the net proceeds to us from this offering by \$ million, assuming the number of shares of common stock offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

Table of Contents

DISTRIBUTION POLICY

We intend to make regular quarterly distributions, which include all or substantially all of our REIT taxable income, to holders of our common stock out of assets legally available therefor. We declared a quarterly dividend of \$0.07 per share of common stock for the quarter ended June 30, 2013, which was paid in July 2013. We declared a quarterly dividend of \$0.175 per share of common stock for the quarter ending September 30, 2013, which was paid on October 31, 2013. On December 17, 2013, we declared a quarterly dividend of \$0.175 per share of common stock for the quarter ending December 31, 2013 and a special cash dividend of \$0.075 per share of common stock. The combined dividend of \$0.25 per share of common stock was paid on January 31, 2014, to stockholders of record as of December 30, 2013. On March 19, 2014, we declared a first quarter 2014 dividend of \$0.175 per share of common stock, which is payable on April 30, 2014 to stockholders of record as of March 31, 2014. Accordingly, purchasers of our common stock in this offering will not be entitled to receive this dividend. The amount of any future dividend is subject to board approval and depends on a variety of factors, as set forth below. As a result, the amount of any future dividend is uncertain, and any dividends declared in future periods may differ materially from dividends declared in past periods.

To qualify as a REIT we must distribute annually to our stockholders an amount at least equal to:

90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gains (which does not necessarily equal net income as calculated in accordance with GAAP); plus

90% of the excess of our taxable income from foreclosure property (as defined in Section 856 of the Code) over the tax imposed on such income by the Code; less

Any excess non-cash income (as determined under the Code). See U.S. Federal Income Tax Considerations. We will be subject to income tax on our taxable income that is not distributed and to an excise tax to the extent that certain percentages of our taxable income are not distributed by specified dates. See U.S. Federal Income Tax Considerations Taxation of New Residential Annual Distribution Requirements. Income as computed for purposes of the foregoing tax rules will not necessarily correspond to our income as determined for financial reporting purposes.

Any distributions will be authorized by our board of directors and declared by us based upon a number of factors, including actual and anticipated results of operations, liquidity and financial condition, restrictions under Delaware law or applicable financing covenants, our taxable income, the annual distribution requirements under the REIT provisions of the Code, our operating expenses and other factors our directors deem relevant. Our ability to make distributions to our stockholders will depend upon the performance of our asset portfolio, and, in turn, upon our Manager's management of our business. Any declared distributions will be made in cash to the extent that cash is available for distribution. We may not be able to generate sufficient investment results to pay distributions to our stockholders. In addition, our board of directors may change our distribution policy in the future. See Risk Factors.

Distributions to stockholders will generally be taxable to our stockholders as ordinary income. However, a portion of such distributions may be designated by us as long-term capital gain to the extent that such portion is attributable to our sale of capital assets held for more than one year. If we pay distributions in excess of our current and accumulated earnings and profits, such distributions will be treated as a tax-free return of capital to the extent of each stockholder's

tax basis in our common stock and as capital gain thereafter. We will furnish annually to each of our stockholders a statement setting forth distributions paid during the preceding year and their U.S. federal income tax status. For a discussion of the U.S. federal income tax treatment of our distributions, see U.S. Federal Income Tax Considerations Taxation of New Residential and U.S. Federal Income Tax Considerations Taxation of Stockholders.

Our certificate of incorporation allows us to issue preferred stock that could have a preference on distributions. We currently have no intention to issue any preferred stock, but if we do, the distribution preference on the preferred stock could limit our ability to make distributions to the holders of our common stock.

Table of Contents

To the extent that our cash available for distribution is less than the amount required to be distributed under the REIT provisions of the Code, we may consider various funding sources to cover any such shortfall, including borrowing under available debt facilities, selling certain of our assets or using a portion of the net proceeds we receive in future offerings of equity and debt securities. Our distribution policy enables us to review the alternative funding sources available to us from time to time.

Table of Contents**CAPITALIZATION**

The following table sets forth our cash and cash equivalents and capitalization at December 31, 2013 (1) on an actual basis and (2) on a pro forma basis giving effect to the transactions described under Prospectus Summary Summary Historical and Pro Forma Financial Information. You should read this table together with the section titled Use of Proceeds and our consolidated financial statements and related notes included elsewhere in this prospectus.

	As of December 31, 2013	
	Actual	Pro Forma
	(Unaudited)	
	(In thousands)	
Cash and cash equivalents	\$ 271,994	\$
Restricted cash	33,338	
Debt:		
Repurchase Agreements on Agency ARM RMBS	1,332,954	
Repurchase Agreements on Non-Agency RMBS	287,757	
Repurchase Agreements on Consumer Loan Companies		
Notes Payable Related to Secured Term Loan	75,000	
Notes Payable on Funded Advances	2,390,778	
Notes Payable on Residential Mortgage Loans	22,840	
Total debt	4,109,329	
Stockholders' Equity:		
Common Stock, \$0.01 par value, 2,000,000,000 shares authorized, 253,197,974 issued and outstanding at December 31, 2013 and issued and outstanding at December 31, 2013 on a pro forma basis	2,532	
Additional paid-in capital	1,157,118	
Retained earnings	102,986	
Accumulated other comprehensive income, net of tax	3,214	
Total stockholders' equity	1,265,850	
Total capitalization	\$ 5,375,179	\$

Table of Contents**PRICE RANGE OF COMMON STOCK**

Our common stock has been listed on the NYSE under the symbol NRZ since May 2, 2013, and regular-way trading began on May 16, 2013. Prior to the listing, there was no public market for our common stock. The following table presents the high and low sales prices for our common stock on the NYSE for the periods indicated.

	High	Low
2013:		
Second Quarter from May 2, 2013 through June 30, 2013	\$7.29	\$5.85
Third Quarter	\$6.99	\$5.89
Fourth Quarter	\$7.02	\$5.79
2014:		
First Quarter	\$6.86	\$6.43
Second Quarter through April 3, 2014	\$6.05	\$6.66

The closing sale price of our common stock, as reported by the NYSE, on April 3, 2014, was \$6.48. As of April 2, 2014 there were 44 holders of record of our common stock. The number of beneficial stockholders is substantially greater than the number of holders of record as a large portion of our stock is held through brokerage firms.

Table of Contents**SELECTED HISTORICAL FINANCIAL INFORMATION**

We were formed in September 2011 as NIC MSR LLC, a Delaware limited liability company and wholly owned subsidiary of Newcastle. We converted to a Delaware corporation and changed our name to New Residential Investment Corp. in December 2012. On May 15, 2013, we were spun-off from Newcastle and became a stand-alone public company.

The following table presents our selected historical financial information for the period from the commencement of our operations on December 8, 2011 through December 31, 2011 and for the years ended December 31, 2013 and 2012.

The selected historical consolidated statements of income for the years ended December 31, 2013 and 2012 and for the period from December 8, 2011 (commencement of operations) to December 31, 2011 and the selected historical consolidated balance sheets as of December 31, 2013 and 2012 have been derived from our audited financial statements included elsewhere in this prospectus. The selected historical consolidated balance sheet as of December 31, 2011 has been derived from our audited financial statements not included in this prospectus.

You should read the following selected financial information in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and with our consolidated financial statements and related notes included elsewhere in this prospectus.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with the financial statements and related notes appearing elsewhere in this prospectus. This section contains forward-looking statements that involve risks and uncertainties. Our actual results may vary materially from those discussed in the forward-looking statements as a result of various factors, including, without limitation, those set forth in Risk Factors. See Cautionary Statement Regarding Forward-Looking Statements.

We were formed as NIC MSR LLC, a Delaware limited liability company and wholly owned subsidiary of Newcastle, in September 2011. We converted to a Delaware corporation and changed our name to New Residential Investment Corp. in December 2012. On May 15, 2013, we were spun-off from Newcastle and became a stand-alone public company. We have not yet completed a full year as a stand-alone public company. The historical results presented below may not be indicative of our future performance and do not necessarily reflect what our financial condition or results of operations would have been had we operated as a separate, stand-alone entity since our formation.

GENERAL

New Residential is a publicly traded REIT primarily focused on investing in residential mortgage related assets. We are externally managed by an affiliate of Fortress. Our goal is to drive strong risk-adjusted returns primarily through investments in servicing related assets, residential securities and loans and other investments. New Residential's investment guidelines are purposefully broad to enable us to make investments in a wide array of assets in diverse markets, including non-real estate related assets such as consumer loans. We generally target assets that generate significant current cash flows and/or have the potential for meaningful capital appreciation. We aim to generate attractive returns for our stockholders without the excessive use of financial leverage.

Our portfolio is currently composed of servicing related assets, residential securities and loans and other investments. A significant portion of our portfolio is currently composed of investments in agency securities. The securities in which we can invest are limited by the exclusion we maintain from the 1940 Act. Our asset allocation and target assets may change over time, depending on our Manager's investment decisions in light of prevailing market conditions. The assets in our portfolio are described in more detail below under Our Portfolio.

On May 15, 2013, Newcastle completed the distribution of shares of New Residential to Newcastle stockholders of record as of May 6, 2013. Following the distribution, New Residential is an independent, publicly-traded REIT (NYSE: NRZ).

MARKET CONSIDERATIONS

Various market factors, which are outside of our control, affect our results of operations and financial condition. One such factor is developments in the U.S. residential housing market, which we believe are generating significant investment opportunities. Since the 2008 financial crisis, the residential mortgage industry has been undergoing major structural changes that are transforming the way mortgages are originated, owned and serviced.

Since 2010, banks have sold or committed to sell MSRs totaling more than \$1 trillion of the approximately \$10 trillion mortgage market. An MSR provides a mortgage servicer with the right to service a pool of mortgages in exchange for a portion of the interest payments made on the underlying mortgages. This amount typically ranges from 25 to 50 bps multiplied by the UPB of the mortgages. Approximately 77% of MSRs were owned by banks as of the fourth quarter

of 2013, according to Inside Mortgage Finance. We expect this number to decline as banks face pressure to reduce their MSR exposure as a result of heightened capital reserve requirements under Basel III, regulatory scrutiny and a more challenging servicing environment. As a result, we believe the volume of MSR sales is likely to be substantial for some period of time.

Table of Contents

We estimate that MSR on approximately \$200 – 300 billion of mortgages are currently for sale, which would require a capital investment of approximately \$2 – 3 billion based on current pricing dynamics. We believe many non-bank servicers, who acquire MSR and are constrained by capital limitations, will continue to sell a portion of the Excess MSR. We also estimate that approximately \$1 – 2 trillion of MSR could be sold over the next several years. In addition, approximately \$1.2 trillion of new loans are expected to be created annually, according to the Mortgage Bankers Association. We believe this creates an opportunity to enter into flow arrangements, whereby loan originators agree to sell Excess MSR on newly originated loans on a recurring basis (often monthly or quarterly). We believe that MSR are being sold at a discount to historical pricing levels, although increased competition for these assets has driven prices higher recently. There can be no assurance that any future investment in Excess MSR will generate returns similar to the returns on our current investments in Excess MSR.

As of the fourth quarter of 2013, approximately \$7 trillion of the \$10 trillion of residential mortgages outstanding has been securitized, according to Inside Mortgage Finance. Approximately \$6 trillion are Agency RMBS according to Inside Mortgage Finance, which are securities issued or guaranteed by a U.S. Government agency, such as Ginnie Mae, or by a GSE, such as Fannie Mae or Freddie Mac. The balance has been securitized by either public trusts or PLS, and are referred to as Non-Agency RMBS.

Since the financial crisis, there has been significant volatility in the prices for Non-Agency RMBS, which resulted from a widespread contraction in capital available for this asset class, deteriorating housing fundamentals, and an increase in forced selling by institutional investors (often in response to rating agency downgrades). While the prices of these assets have started to recover from their lows, we believe a meaningful gap still exists between current prices and the recovery value of many Non-Agency RMBS. Accordingly, we believe there are opportunities to acquire Non-Agency RMBS at attractive risk-adjusted yields, with the potential for meaningful upside if the U.S. economy and housing market continue to strengthen. We believe the value of existing Non-Agency RMBS may also rise if the number of buyers returns to pre-2007 levels. The primary causes of mark-to-market changes in our RMBS portfolio are changes in interest rates and credit spreads.

Interest rates have risen significantly in recent months and may continue to increase, although the timing of any further increases is uncertain. In periods of rising interest rates, the rates of prepayments and delinquencies with respect to mortgage loans generally decline. Generally, the value of our Excess MSR is expected to increase when interest rates rise or delinquencies decline, and the value is expected to decrease when interest rates decline or delinquencies increase, due to the effect of changes in interest rates on prepayment speeds and delinquencies. However, prepayment speeds and delinquencies could increase even in the current interest rate environment, as a result of, among other things, a general economic recovery, government programs intended to foster refinancing activity or other reasons, which could reduce the value of our investments. Moreover, the value of our Excess MSR is subject to a variety of factors, as described under Risk Factors. In the fourth quarter of 2013, the fair value of our investments in Excess MSR (directly and through equity method investees) increased by approximately \$8.2 million and the weighted average discount rate of the portfolio remained relatively unchanged at 12.5%.

We do not expect changes in interest rates to have a meaningful impact on the net interest spread of our Agency ARM and Non-Agency portfolios. Our RMBS are primarily floating rate or hybrid (i.e., fixed to floating rate) securities, which we generally finance with floating rate debt. Therefore, while rising interest rates will generally result in a higher cost of financing, they will also result in a higher coupon payable on the securities. The net interest spread on our Agency ARM RMBS portfolio as of December 31, 2013 was 0.94%, which was the same as the net interest spread as of September 30, 2013. The net interest spread on our Non-Agency RMBS portfolio as of December 31, 2013 was 2.83%, compared to 2.85% as of September 30, 2013.

Credit performance also affects the value of our portfolio. Higher rates of delinquency and/or defaults can reduce the value of our Excess MSRs, Non-Agency RMBS, Agency RMBS and consumer loan portfolios. For our Excess MSRs on Agency portfolios and our Agency RMBS, delinquency and default rates have an effect similar

Table of Contents

to prepayment rates. Our Excess MSR on Non-Agency RMBS are not affected by delinquency rates because the servicer continues to advance the Excess MSR until a default occurs on the applicable loan; defaults have an effect similar to prepayments. For the Non-Agency RMBS and consumer loans, higher default rates can lead to greater loss of principal.

Credit spreads continued to decrease, or tighten, in the fourth quarter of 2013 relative to the first three quarters of 2013, which has had a favorable impact on the value of our securities and loan portfolio. Credit spreads measure the yield relative to a specified benchmark that the market demands on securities and loans based on such assets' credit risk. For a discussion of the way in which interest rates, credit spreads and other market factors affect us, see Quantitative and Qualitative Disclosures About Market Risk.

The value of our consumer loan portfolio is influenced by, among other factors, the U.S. macroeconomic environment, and unemployment rates in particular. We believe that losses are highly correlated to unemployment; therefore, we expect that an improvement in unemployment rates would support the value of our investment, while deterioration in unemployment rates would result in a decline in its value.

APPLICATION OF CRITICAL ACCOUNTING POLICIES

Management's discussion and analysis of financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires the use of estimates and assumptions that could affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenue and expenses. Actual results could differ from these estimates. Management believes that the estimates and assumptions utilized in the preparation of the consolidated financial statements are prudent and reasonable. Actual results historically have been in line with management's estimates and judgments used in applying each of the accounting policies described below, as modified periodically to reflect current market conditions. The following is a summary of our accounting policies that are most affected by judgments, estimates and assumptions.

Excess MSRs

Upon acquisition, we elected to record each investment in Excess MSRs at fair value. We elected to record our investments in Excess MSRs at fair value in order to provide users of the financial statements with better information regarding the effects of prepayment risk and other market factors on the Excess MSRs.

GAAP establishes a framework for measuring fair value of financial instruments and a set of related disclosure requirements. A three-level valuation hierarchy has been established based on the transparency of inputs to the valuation of a financial instrument as of the measurement date. The three levels are defined as follows:

Level 1 Quoted prices in active markets for identical instruments.

Level 2 Valuations based principally on other observable market parameters, including:

Quoted prices in active markets for similar instruments,

Quoted prices in less active or inactive markets for identical or similar instruments,

Other observable inputs (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates), and

Market corroborated inputs (derived principally from or corroborated by observable market data).

Level 3 Valuations based significantly on unobservable inputs.

The level in the fair value hierarchy within which a fair value measurement or disclosure in its entirety is based on the lowest level of input that is significant to the fair value measurement or disclosure in its entirety.

Table of Contents

Our Excess MSR are categorized as Level 3 under the GAAP hierarchy. The inputs used in the valuation of Excess MSR include prepayment speed, delinquency rate, recapture rate, excess mortgage servicing amount and discount rate. The determination of estimated cash flows used in pricing models is inherently subjective and imprecise. The methods used to estimate fair value may not result in an amount that is indicative of net realizable value or reflective of future fair values. Changes in market conditions, as well as changes in the assumptions or methodology used to determine fair value, could result in a significant increase or decrease in fair value. Management validates significant inputs and outputs of our models by comparing them to available independent third party market parameters and models for reasonableness. We believe the assumptions we use are within the range that a market participant would use, and factor in the liquidity conditions in the markets. Any changes to the valuation methodology will be reviewed by management to ensure the changes are appropriate.

In order to evaluate the reasonableness of its fair value determinations, management engages an independent valuation firm to separately measure the fair value of its Excess MSR pools. The independent valuation firm determines an estimated fair value range based on its own models and issues a fairness opinion with this range. Management compares the range included in the opinion to the values generated by its internal models. For Excess MSR acquired prior to the current quarter, the fairness opinion relates to the valuation at the current quarter end date. For Excess MSR acquired during the current quarter, the fairness opinion relates to the valuation at the time of acquisition. To date, we have not made any significant valuation adjustments as a result of these fairness opinions.

For Excess MSR acquired during the current quarter, we revalue the Excess MSR at the quarter end date if a payment is received between the acquisition date and the end of the quarter. Otherwise, Excess MSR acquired during the current quarter are carried at their amortized cost basis if there has been no change in assumptions since acquisition.

Investments in Excess MSR are aggregated into pools as applicable; each pool of Excess MSR is accounted for in the aggregate. Interest income for Excess MSR is accreted using an effective yield or interest method, based upon the expected income from the Excess MSR through the expected life of the underlying mortgages. Changes to expected cash flows result in a cumulative retrospective adjustment, which will be recorded in the period in which the change in expected cash flows occurs. Under the retrospective method, the interest income recognized for a reporting period would be measured as the difference between the amortized cost basis at the end of the period and the amortized cost basis at the beginning of the period, plus any cash received during the period. The amortized cost basis is calculated as the present value of estimated future cash flows using an effective yield, which is the yield that equates all past actual and current estimated future cash flows to the initial investment. In addition, our policy is to recognize interest income only on Excess MSR in existing eligible underlying mortgages.

Under the fair value election, the difference between the fair value of Excess MSR and their amortized cost basis is recorded as Change in fair value of investments in excess mortgage servicing rights, as applicable. Fair value is generally determined by discounting the expected future cash flows using discount rates that incorporate the market risks and liquidity premium specific to the Excess MSR, and therefore may differ from their effective yields.

Table of Contents

The following tables summarize the estimated change in fair value of our interests in the Excess MSR owned directly as of December 31, 2013 given several parallel shifts in the discount rate, prepayment rate, delinquency rate and recapture rate (dollars in thousands):

Fair value as of December 31, 2013	\$ 324,151			
Discount rate shift in %	-20%	-10%	10%	20%

Change in estimated fair value:				
Amount	\$ (12,119)	\$ (6,134)	\$ 6,228	\$ 12,618
%	-3.4%	-1.7%	1.8%	3.6%

Table of Contents

The sensitivity analysis is hypothetical and should be used with caution. In particular, the results are calculated by stressing a particular economic assumption independent of changes in any other assumption; in practice, changes in one factor may result in changes in another, which might counteract or amplify the sensitivities. Also, changes in the fair value based on a 10% variation in an assumption generally may not be extrapolated because the relationship of the change in the assumption to the change in fair value may not be linear.

Servicer Advances

We account for investments in servicer advances, which include the right to receive the basic fee component of the related MSR (the servicer advance investments), as financial instruments, since we are not a licensed mortgage servicer. We believe servicer advance investments meet the definition of a financial instrument under ASC 825.

We have elected to account for the servicer advance investments at fair value. Accordingly, we estimate the fair value of the servicer advance investments at each reporting date and reflect changes in the fair value of the servicer advance investments as gains or losses.

We initially recorded the servicer advance investments at the purchase price paid, which we believe reflects the value a market participant would attribute to the investments at the time of our purchase. We recognize interest income from our servicer advance investments using the interest method, with adjustments to the yield applied based upon changes in actual or expected cash flows. The servicer advances are not interest-bearing, but we accrete the effective rate of interest applied to the aggregate cash flows from the servicer advances and the basic fee component of the related MSR.

We categorize servicer advance investments under Level 3 of the GAAP hierarchy described above under Application of Critical Accounting Policies Excess MSRs, since we use internal pricing models to estimate the future cash flows related to the servicer advance investments that incorporate significant unobservable inputs and include assumptions that are inherently subjective and imprecise.

Our estimations of future cash flows include the combined cash flows of all of the components that comprise the servicer advance investments: existing advances, the requirement to purchase future advances and the right to the basic fee component of the related MSR. The factors that most significantly impact the fair value include (i) the rate at which the servicer advance balance declines, which we estimate is approximately \$500 million per year on average over the term of the investment held as of December 31, 2013, (ii) the duration of outstanding servicer advances, which we estimate is approximately nine months on average for an advance balance at a given point in time (not taking into account new advances made with respect to the pool), and (iii) the UPB of the underlying loans with respect to which we have the obligation to make advances and the right to receive the basic fee component.

As described above, we recognize income from servicer advance investments in the form of (i) interest income, which we reflect as a component of net interest income and (ii) changes in the fair value of the servicer advances, which we reflect as a component of other income.

As described above, we remit to Nationstar a portion of the basic fee component of the MSR related to our servicer advance investments as compensation for acting as servicer, as described in more detail below under Management's Discussion and Analysis of Financial Condition and Results of Operations Our Portfolio Servicing Related Assets Servicer Advances Servicing Fees.

Our interest income is recorded net of the servicing fee owed to Nationstar. Furthermore, we recognize the interest cost of the financing on servicer advance investments as interest expense.

Real Estate Securities (RMBS)

Our Non-Agency RMBS and Agency ARM RMBS are classified as available-for-sale. As such, they are carried at fair value, with net unrealized gains or losses reported as a component of accumulated other comprehensive income, to the extent impairment losses are considered temporary, as described below.

Table of Contents

We expect that any RMBS we acquire will be categorized under Level 2 or Level 3 of the GAAP hierarchy described above under Application of Critical Accounting Policies Excess MSR, depending on the observability of the inputs. Fair value may be based upon broker quotations, counterparty quotations, pricing service quotations or internal pricing models. The significant inputs used in the valuation of our securities include the discount rate, prepayment speeds, default rates and loss severities, as well as other variables.

The determination of estimated cash flows used in pricing models is inherently subjective and imprecise. The methods used to estimate fair value may not be indicative of net realizable value or reflective of future fair values. Changes in market conditions, as well as changes in the assumptions or methodology used to determine fair value, could result in a significant increase or decrease in fair value. Management validates significant inputs and outputs of our models by comparing them to available independent third party market parameters and models for reasonableness. We believe the assumptions we use are within the range that a market participant would use, and factor in the liquidity conditions in the markets. Any changes to the valuation methodology will be reviewed by management to ensure the changes are appropriate.

Pursuant to ASC 320-10-35, we must also assess whether unrealized losses on securities, if any, reflect a decline in value that is other-than-temporary and, if so, record an other-than-temporary impairment through earnings. A decline in value is deemed to be other-than-temporary if (i) it is probable that we will be unable to collect all amounts due according to the contractual terms of a security that was not impaired at acquisition (there is an expected credit loss), or (ii) if we have the intent to sell a security in an unrealized loss position or it is more likely than not that we will be required to sell a security in an unrealized loss position prior to its anticipated recovery (if any). For the purposes of performing this analysis, we will assume the anticipated recovery period is until the expected maturity of the applicable security. Also, for securities that represent beneficial interests in securitized financial assets within the scope of ASC 325-40, whenever there is a probable adverse change in the timing or amounts of estimated cash flows of a security from the cash flows previously projected, an other-than-temporary impairment will be deemed to have occurred. Our Non-Agency RMBS acquired with evidence of deteriorated credit quality for which it was probable, at acquisition, that we would be unable to collect all contractually required payments receivable, fall within the scope of ASC 310-30, as opposed to ASC 325-40. All of our other Non-Agency RMBS, those not acquired with evidence of deteriorated credit quality, fall within the scope of ASC 325-40.

Pursuant to ASC 835-30-35, income on these securities is recognized using a level yield methodology based upon a number of cash flow assumptions that are subject to uncertainties and contingencies. Such assumptions include the rate and timing of principal and interest receipts (which may be subject to prepayments and defaults). These assumptions are updated on at least a quarterly basis to reflect changes related to a particular security, actual historical data, and market changes. These uncertainties and contingencies are difficult to predict and are subject to future events, and economic and market conditions, which may alter the assumptions. For securities acquired at a discount for credit losses, we recognize the excess of all cash flows expected over our investment in the securities as interest income on a loss adjusted yield basis. The loss-adjusted yield is determined based on an evaluation of the credit status of securities, as described in connection with the analysis of impairment above.

Real Estate Loans

We invest in loans, including but not limited to, residential mortgage loans. Loans for which we have the intent and ability to hold for the foreseeable future, or until maturity or payoff, are classified as held-for-investment. Loans are presented in the consolidated balance sheet at cost net of any unamortized discount (or gross of any unamortized premium). We determine at acquisition whether loans will be aggregated into pools based on common risk characteristics (credit quality, loan type, and date of origination or acquisition); loans aggregated into pools are accounted for as if each pool were a single loan.

Income on these loans is recognized similarly to that on our securities using a level yield methodology and is subject to similar uncertainties and contingencies, which are also analyzed on at least a quarterly basis.

Table of Contents

Valuation of Derivatives

We financed certain investments with the same counterparty from which it purchased those investments, and we accounted for the contemporaneous purchase of the investments and the associated financings as linked transactions. Accordingly, we recorded a non-hedge derivative instrument on a net basis, with changes in market value recorded as Other Income in the Consolidated Statements of Income.

Impairment of Loans

To the extent that they are classified as held-for-investment, we must periodically evaluate each of these loans or loan pools for possible impairment. Impairment is indicated when it is deemed probable that we will be unable to collect all amounts due according to the contractual terms of the loan, or for loans acquired at a discount for credit losses, when it is deemed probable that we will be unable to collect as anticipated. Upon determination of impairment, we would establish a specific valuation allowance with a corresponding charge to earnings. We continually evaluate our loans receivable for impairment.

Our residential mortgage loans are aggregated into pools for evaluation based on like characteristics, such as loan type and acquisition date. Pools of loans are evaluated based on criteria such as an analysis of borrower performance, credit ratings of borrowers, loan to value ratios, the estimated value of the underlying collateral, the key terms of the loans and historical and anticipated trends in defaults and loss severities for the type and seasoning of loans being evaluated. This information is used to estimate provisions for estimated unidentified incurred losses on pools of loans. Significant judgment is required in determining impairment and in estimating the resulting loss allowance. Furthermore, we must assess our intent and ability to hold our loan investments on a periodic basis. If we do not have the intent to hold a loan for the foreseeable future or until its expected payoff, the loan must be classified as held for sale and recorded at the lower of cost or estimated value, which could adversely affect our results of operations.

Investment Consolidation

The analysis as to whether to consolidate an entity is subject to a significant amount of judgment. Some of the criteria considered are the determination as to the degree of control over an entity by its various equity holders, the design of the entity, how closely related the entity is to each of its equity holders, the relation of the equity holders to each other and a determination of the primary beneficiary in entities in which we have a variable interest. These analyses involve estimates, based on the assumptions of management, as well as judgments regarding significance and the design of entities.

Variable interest entities (VIEs) are defined as entities in which equity investors do not have the characteristics of a controlling financial interest o
