Registrant s telephone number, including area code: (800) 882-0052, Option 4

Date of fiscal year end: 12/31/2015

Date of reporting period: 12/31/2015

Explanatory Note: The Registrant is filing this amendment to its Form N-CSR for the period ended December 31, 2015, filed with the Securities and Exchange Commission on March 1, 2016 (Accession Number 0001193125-16-488046). The report of independent registered public accounting firm reflects a dual date due to correction of previously issued financial statements, as disclosed within Note 2 to the Financial Statements. For the year ended December 31, 2015, the Distributions in excess of net investment income was overstated by \$168,242 within the section. Net Assets Consist of on the Statements of Assets and Liabilities for BGY. As a result, there was a corresponding understatement of Net Assets within this section. In addition, the Statements of Changes in Net Assets and the Financial Highlights reflected the immaterial error in the Distributions in excess of net investment income and Net Assets amounts, respectively. The affiliated income disclosed in the Notes to the Schedule of Investments was overstated by \$168,242 as well. Management elected to revise the financial statements to correct these errors. The corrections have no impact on the amounts previously reported for net investment income, performance or net asset value per share. Except for such corrections, this amendment does not amend, update or change any other items or disclosures found in the original Form N-CSR filing.

<sup>\*</sup> Certain Trusts estimate that they have distributed more than the amount of earned income and net realized gains; therefore, a portion of the distribution may be a return of capital. A return of capital may occur, for example, when some or all of the shareholder s investment in a Trust is returned to the shareholder. A return of capital does not necessarily reflect a Trust s investment performance and should not be confused with yield or income. When distributions exceed total return performance, the difference will reduce the Trust s net asset value per share.

Section 19(a) notices for the Trusts, as applicable, are available on the BlackRock website http://www.blackrock.com.

#### Section 19(b) Disclosure

The Trusts, acting pursuant to a U.S. Securities and Exchange Commission (SEC) exemptive order and with the approval of each Trust s Board of Trustees/Directors (the Board), each have adopted a plan, consistent with its investment objectives and policies to support a level distribution of income, capital gains and/or return of capital (the Plan). In accordance with the Plans, the Trusts distributed the following fixed amounts per share on a monthly basis as of December 31, 2015:

Exchange Symbol	<b>Amount Per Common Share</b>
BGR	\$0.1100
CII	\$0.1000
BDJ	\$0.0467
BOE	\$0.0970
BME	\$0.2000

BGY	\$0.0490
BCX	\$0.0655
BST	\$0.1000
BUI	\$0.1210

The fixed amounts distributed per share are subject to change at the discretion of each Trust s Board. Under its Plan, each Trust will distribute all available investment income to its shareholders, consistent with its primary investment objectives and as required by the Internal Revenue Code of 1986, as amended (the Code ). If sufficient investment income is not available on a monthly basis, the Trusts will distribute long-term capital gains and/or return of capital to shareholders in order to maintain a level distribution. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential distribution rate increases or decreases to enable the Trusts to comply with the distribution requirements imposed by the Code.

Shareholders should not draw any conclusions about each Trust s investment performance from the amount of these distributions or from the terms of the Trust s Plan. Each Trust s total return performance on net asset value is presented in its financial highlights table.

The Board may amend, suspend or terminate a Trust s Plan at any time without prior notice to the Trust s shareholders if it deems such actions to be in the best interests of the Trust or its shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if the Trust s stock is trading at or above net asset value) or widening an existing trading discount. The Trusts are subject to risks that could have an adverse impact on their ability to maintain level distributions. Examples of potential risks include, but are not limited to, economic downturns impacting the markets, decreased market volatility, companies suspending or decreasing corporate dividend distributions and changes in the Code. Please refer to each Trust s prospectus for a more complete description of its risks.

### The Markets in Review

Dear Shareholder.

Diverging monetary policies and shifting economic outlooks across regions have been the overarching themes driving financial markets over the past couple of years. With U.S. growth outpacing the global economic recovery in 2015 while inflationary pressures remained low, investors spent most of the year anticipating a short-term rate hike from the Federal Reserve (the Fed ), which ultimately came to fruition in December. In contrast, the European Central Bank ( ECB ) and the Bank of Japan moved to a more accommodative stance during the year. In this environment, the U.S. dollar strengthened considerably, causing profit challenges for U.S. exporters and high levels of volatility in emerging market currencies and commodities. Oil prices were particularly volatile and below the historical norm due to an ongoing imbalance in global supply and demand.

Market volatility broadly increased in the middle of 2015, beginning with a sharp, but temporary, selloff in June as Greece s long-brewing debt troubles came to an impasse. Just as these concerns abated, Chinese equities tumbled amid weakness in the country s economy. This, combined with a depreciation of the yuan and declining confidence in China s policymakers, stoked worries about the potential impact to the broader world economy, causing heightened volatility to spread throughout markets globally. Given a dearth of meaningful growth across most of the world, financial markets became more reliant on central bank policies to drive performance. In that vein, risk assets (such as equities and high yield bonds) rallied in October when China s central bank provided more stimulus, the ECB hinted at further easing, and soft U.S. data pushed back expectations for a Fed rate hike. As the period came to a close, however, the ECB disappointed investors with its subdued policy changes. The Fed s December rate hike had a positive impact on the markets as it removed a source of uncertainty, but this was counteracted by the dampening effect of a stronger U.S. dollar, falling oil prices and tighter credit conditions.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit **blackrock.com** for further insight about investing in today s markets.

### The Benefits and Risks of Option Over-Writing

In general, the goal of each of the Trusts is to provide total return through a combination of current income and realized and unrealized gains (capital appreciation). The Trusts seek to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to enhance the Trusts distribution rate and total return performance. However, these objectives cannot be achieved in all market conditions.

The Trusts primarily write single stock covered call options, and may also from time to time write single stock put options. When writing (selling) a covered call option, the Trust holds an underlying equity security and enters into an option transaction which allows the counterparty to purchase the equity security at an agreed-upon price (strike price) within an agreed-upon time period. The Trusts receive cash premiums from the counterparties upon writing (selling) the option, which along with net investment income and net realized gains, if any, are generally available to support current or future distributions paid by the Trusts. During the option term, the counterparty may elect to exercise the option if the market value of the equity security rises above the strike price, and the Trust is obligated to sell the equity security to the counterparty at the strike price, realizing a gain or loss. Premiums received increase gains or reduce losses realized on the sale of the equity security. If the option remains unexercised upon its expiration, the Trusts realize gains equal to the premiums received. Alternatively, an option may be closed out by an offsetting purchase or sale of an option prior to expiration. The Trust realizes a capital gain from a closing purchase or sale transaction if the premium paid is less than the premium received from writing the option. The Trust realizes a capital loss from a closing purchase or sale transaction if the premium received is less than the premium paid to purchase the option.

Writing covered call options entails certain risks, which include, but are not limited to, the following: an increase in the value of the underlying equity security above the strike price can result in the exercise of a written option (sale by the Trust to the counterparty) when the Trust might not otherwise have sold the security; exercise of the option by the counterparty may result in a sale below the current market value and a gain or loss being realized by the Trust; and limiting the potential appreciation that could be realized on the underlying equity security to the extent of the strike price of the option. As such, an option over-writing strategy may outperform the general equity market in flat or falling markets but underperform in rising markets.

Each Trust employs a plan to support a level distribution of income, capital gains and/or return of capital. The goal of the plan is to provide shareholders with consistent and predictable cash flows by setting distribution rates based on expected long-term returns of the Trusts. Such distributions, under certain circumstances, may exceed a Trust s total return performance. When total distributions exceed total return performance for the period, the difference reduces the Trust s total assets and net asset value per share (NAV) and, therefore, could have the effect of increasing the Trust s expense ratio and reducing the amount of assets the Trust has available for long term investment. In order to make these distributions, a Trust may have to sell portfolio securities at less than opportune times.

The final tax characterization of distributions is determined after the fiscal year and is reported in the Trust s annual report to shareholders. Distributions can be characterized as ordinary income, capital gains and/or return of capital. The Trust s taxable net investment income or net realized capital gains (taxable income) may not be sufficient to support the level of distributions paid. To the extent that distributions exceed the Trust s current and accumulated earnings and profits, the excess may be treated as a non-taxable return of capital. Distributions that exceed a Trust s taxable income but do not exceed the Trust s current and accumulated earnings and profits, may be classified as ordinary income which are taxable to shareholders. Such distributions are reported as distributions in excess of net investment income.

A return of capital distribution does not necessarily reflect a Trust s investment performance and should not be confused with yield or income. A return of capital is a return of a portion of an investor s original investment. A return of capital is not taxable, but it reduces a shareholder s tax basis in his or her shares, thus reducing any loss or increasing any gain on a subsequent disposition by the shareholder of his or her shares. It is possible that a substantial portion of the distributions paid during a calendar year may ultimately be classified as return of capital or as distributions in excess of net investment income for income tax purposes when the final determination of the source and character of the distributions is made.

To illustrate these concepts, assume the following: (1) a common stock purchased at and currently trading at \$37.15 per share; (2) a three-month call option is written by a Trust with a strike price of \$40 (i.e., 7.7% higher than the current market price); and (3) the Trust receives \$2.45, or 6.6% of the common stock s value, as a premium. If the stock price remains unchanged, the option expires and there would be a 6.6% return for the three-month period. If the stock were to decline in price by 6.6% (i.e., decline to \$34.70 per share), the option strategy would break-even from an economic perspective resulting in neither a gain nor a loss. If the stock were to climb to a price of \$40 or above, the option would be exercised and the stock would return 7.7% coupled with the option premium received of 6.6% for a total return of 14.3%. Under this scenario, the Trust loses the benefit of any appreciation of the stock above \$40, and thus is limited to a 14.3% total return. The premium from writing the call option serves to offset some of the unrealized loss on the stock in the event that the price of the stock declines, but if the stock were to decline more than 6.6% under this scenario, the Trust s downside protection is eliminated and the stock could eventually become worthless.

Each Trust intends to write covered call options to varying degrees depending upon market conditions. Please refer to each Trust s Schedule of Investments and the Notes to Financial Statements for details of written options.

**BlackRock Energy and Resources Trust** 

#### **Trust Overview**

BlackRock Energy and Resources Trust s (BGR) (the Trust ) investment objective is to provide total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its total assets in equity securities of energy and natural resources companies and equity derivatives with exposure to the energy and natural resources industry. The Trust may invest directly in such securities or synthetically through the use of derivatives. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

No assurance can be given that the Trust s investment objective will be achieved.

The following discussion relates to the Trust s absolute performance based on NAV:

#### What factors influenced performance?

All returns reflect reinvestment of dividends and/or distributions.

<sup>2</sup> The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

<sup>3</sup> Average return.

Global oil production outstripped demand during 2015, contributing to extreme weakness in oil prices and leading to both elevated volatility and poor performance for the energy sector. In this environment, the Trust s position in the refining and marketing company Phillips 66 was the leading contributor to performance. Since crude oil is the primary input cost for the refining & marketing industry, lower prices boosted profit margins and enabled the group to outperform the broader energy sector.

During the first half of the year, the investment advisor positioned the portfolio for a U-shaped recovery in oil prices. The rationale for this move was the increasing evidence that lower oil prices had compelled energy companies to change their behavior in ways that would lead to a more favorable balance of supply and demand for oil. The Trust achieved this shift by adding to positions in exploration and production (E&P) companies and reducing exposure to lower-beta, more defensive integrated oil & gas companies. The integrated oil and gas companies typically display less sensitivity to the oil price due to their exposure to both

upstream (production) and downstream (refining) elements of the supply chain. The E&P companies typically display greater sensitivity to the oil price as they are focused in the upstream elements only. In order to increase the Trust s oil price sensitivity during the period, we added to our positions in E&P companies Pioneer Natural Resources and Marathon Oil and reduced exposure to integrated oil and gas companies Royal Dutch Shell, Exxon and Chevron. The recovery process proved slower than the advisor anticipated and the oil price continued to weaken during the year (Brent and WTI declined (30.5)% and (33.5)% respectively). Those companies with greater oil price sensitivity declined more than those with less sensitivity to the oil price and as such, the decision to increase the Trust s sensitivity to oil prices weighed on absolute performance in 2015.

The Trust s investment in Royal Dutch Shell PLC was the largest detractor from absolute returns, owing to both the stock s large weighting in the portfolio and the market s negative market reaction to the company s takeover bid for BG Group PLC. The Trust s positions in the U.S. E&P companies Marathon Oil Corp., Devon Energy Corp. and Encana Corp. were also notable detractors due to their relatively high sensitivity to oil prices.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a positive impact on performance during the period.

Describe recent portfolio activity.

The investment advisor retained a bias to higher-quality companies, with an emphasis on those with strong balance sheets, high-quality assets and low costs of production. During the fourth calendar quarter, the investment advisor added to the Trust s weighting in integrated companies based on its expectation for continued volatility in the broader energy sector.

Describe portfolio positioning at period end.

The Trust held its largest allocations in the integrated oil & gas and exploration & production sub-industries, with smaller allocations to oil services, distribution, and refining & marketing stocks.

The following discussion relates to the Trust s relative performance based on the S&P 500 Index:

#### What factors influenced performance?

The Trust generated a positive return through its stock selection across multiple sectors, in particular consumer discretionary, health care and energy.

Within consumer discretionary, Orbitz Worldwide, Inc. made the largest contribution to return after industry leader Expedia, Inc. announced it would acquire the company at a premium. Positions in specialty retail and automobiles also contributed in the sector. The Trust soverweight to managed-care companies proved most advantageous in the health care sector as the companies consistently beat earnings expectations and raised guidance on strong underlying fundamentals,

while further benefiting from the summer s favorable Supreme Court ruling concerning insurance subsidies under the Affordable Care Act and, more critically, the broader consolidation trend in the industry. Strength in energy was attributable to both the Trust s underweight to the benchmark s worst-performing names concentrated in exploration & production, and overweight to refining & marketing. The benefit of this positioning more than offset weakness resulting from an overweight in energy services companies, which struggled amid the steep decline in the price of oil.

Information technology ( IT ) was the prime detractor from relative performance, largely owing to the Trust s tilt toward enterprise hardware and compute-intensive semiconductor companies. Key names underperformed as the magnitude of PC unit weakness was worse than anticipated, pressuring earnings and forward guidance of several holdings with PC exposure. Micron Technology Inc. and Western Digital Corp. were leading individual detractors within the Trust for the 12-month period. Elsewhere in the portfolio, zero exposure to internet & catalog retail name Amazon.com Inc. hindered relative returns as the stock more than doubled in the period.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a positive impact on performance during the period.

Describe recent portfolio activity.

During the 12-month period, the Trust s exposure to the consumer staples, health care and IT sectors increased. Reductions were made in several sectors, including consumer discretionary, telecommunication services, industrials and financials.

Describe portfolio positioning at period end.

Relative to the S&P 500<sup>®</sup> Index, the Trust ended the period with its largest sector overweights in consumer discretionary, health care and IT. The Trust s most notable underweights were industrials, telecommunication services and utilities.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

#### **Trust Overview**

BlackRock Enhanced Equity Dividend Trust s (BDJ) (the Trust) primary investment objective is to provide current income and current gains, with a secondary investment objective of long-term capital appreciation. The Trust seeks to achieve its investment objectives by investing in common stocks that pay dividends and have the potential for capital appreciation and by utilizing an option writing (selling) strategy to seek total return performance and enhance distributions. The Trust invests, under normal market conditions, at least 80% of its total assets in dividend paying equities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

#### What factors influenced performance?

The largest contributors to relative performance came from the Trust s underweight allocation and stock selection in energy. Notable relative contributors within the sector included an overweight in the refiner Marathon Oil Corp. and the decision not to have a position in the benchmark holding Kinder Morgan, Inc. An under-weight in the exploration & production and oilfield service industries also proved beneficial amid falling crude oil prices. Stock selection in the consumer staples and consumer discretionary sectors also added to relative returns. Within consumer staples, top contributors included a position in the grocery store operator Kroger Co. and an overweight to the tobacco industry. Within consumer discretionary, the Trust s position in The Home Depot, Inc. outperformed due to stronger than expected sales and earnings growth. In addition, stock selection in industrials, especially an overweight to the aerospace & defense sub-industry, contributed positively.

The largest detractor from relative performance came from a combination of stock selection and portfolio allocation decisions in the health care segment. Notably, an

overweight in the managed care industry hurt relative returns, as did a lack of holdings in the benchmark companies Cigna Corporation and Humana Inc., both of which benefited from merger & acquisition activity during the period. In addition, a combination of stock selection and allocation decisions in financials detracted from relative return. In particular, stock selection in the insurance industry and an underweight within real estate investment trusts were costly. In financials, an over- weight in American Express Co. also negatively impacted returns. Lastly, a combination of stock selection and an overweight in materials weighed on relative performance.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a positive impact on performance during the period.

#### Describe recent portfolio activity.

During the 12-month period, the Trust s exposure to the health care sector was increased through the initiation of new positions in the managed care providers UnitedHealth Group, Inc., Anthem, Inc., and Aetna, Inc. Other notable new pur- chases included the consumer discretionary holding Dollar General Corp. and the financials firm American International Group, Inc. Conversely, the Trust reduced exposure to the consumer discretionary sector by exiting its position in VF Corp. and reducing its allocation to Comcast Corp. Lastly, the Trust reduced its financials allocation by exiting positions in The Toronto-Dominion Bank and Fifth Third Bancorp, and by trimming its holdings in American Express Co.

#### Describe portfolio positioning at period end.

The Trust s largest overweight positions were in the industrials, health care and consumer staples sectors. Conversely, the Trust s largest underweights were in the information technology, financials and energy sectors.

#### **BlackRock Global Opportunities Equity Trust**

#### Trust Overview

BlackRock Global Opportunities Equity Trust s (BOE) (the Trust ) primary investment objective is to provide current income and current gains, with a secondary investment objective of long-term capital appreciation. The Trust seeks to achieve its investment objectives by investing primarily in equity securities issued by companies located in countries throughout the world and utilizing an option writing (selling) strategy to seek total return performance and enhance distributions. The Trust invests, under normal market conditions, at least 80% of its assets in equity securities or options on equity securities or indices or sectors of equity securities. Under normal circumstances, the Trust invests a substantial amount of its total assets in foreign issuers, issuers that primarily trade in a market located outside the United States or issuers that do a substantial amount of business outside the United States. The Trust may invest directly in such securities or synthetically through the use of derivatives.

#### What factors influenced performance?

Gains for the period were dispersed through seven of ten market sectors, led by stock selection in the information technology ( IT ) and financials segments. Within IT, stock selection in the Internet software & services sub- industry led performance after holdings in Facebook, Inc. performed strongly on the company s positive earnings momentum, driven by increasing advertising revenue. The investment advisor believes that Facebook s valuation remains attractive given its growth profile. Within utilities, stock selection in the electric utilities sub-industry was the next largest contributor to the Trust s performance, as the group generally traded higher on the basis of strong earnings and a positive outlook.

The Trust s position in private company Jasper InfoTech Private Ltd., Series F and Uber Technologies, Inc., Series D contributed positively to performance.

Conversely, stock selection in the consumer staples and industrials sectors led detractors for the period. Within consumer staples, stock selection in the tobacco sub-industry hindered returns as shares of ITC Ltd. declined after a steep increase in state taxes in India that is projected to hurt the company s future earnings potential. The Trust sold the position. Stock selection in the airlines sub-industry was the second largest detractor based on the underperformance of the Trust sposition in American Airlines Group Inc., which was negatively affected by investor concerns regarding over-capacity and increased competition. The Trust continues to hold the shares because of the company s strong future growth profile following its acquisition of U.S. Airways, and because airlines generally should benefit from significantly lower fuel costs.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a positive impact on performance during the period.

Describe recent portfolio activity.

During the 12-month period, the Trust shifted to more defensive stocks in the telecommunication services and utilities sectors, funded by profit taking within the financials and health care sectors. Regionally, these sector decisions resulted in increased exposure to Europe and the emerging markets, and decreased exposure to North America.

Describe portfolio positioning at period end.

Relative to the MSCI All Country World Index, the Trust ended the period with its largest overweight positions in the IT and consumer discretionary sectors, and underweight positions in the financials and industrials sectors. Regionally, this resulted in overweight positions in Europe and the emerging markets, and underweights in North America and the Pacific Basin.

BlackRock Health Sciences Trust

#### **Trust Overview**

**BlackRock Health Sciences Trust** s (**BME**) (the Trust) investment objective is to provide total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in equity securities of companies engaged in the health sciences and related industries and equity derivatives with exposure to the health sciences industry. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

No assurance can be given that the Trust s investment objective will be achieved.

The following discussion relates to the Trust s relative performance based on the index cited above:

#### What factors influenced performance?

The Trust generated strong stock selection in all four of the sub-sectors within health care (pharmaceuticals, biotechnology, medical devices & supplies and health care providers & services), with biotechnology leading the way. The gains from biotechnology were broad-based, with a number of holdings including Receptos, Inc., Ultragenyx Pharmaceutical, Inc., Dyax Corp. and Synageva BioPharma Corp. benefiting from positive clinical developments and/or being acquired. Favorable clinical developments also boosted the shares of the pharmaceutical stocks Eisai, Inc., Intra-Cellular Therapies, Inc., and Nektar Therapeutics.

Many of the Trust s holdings benefited from solid financial results, including the specialty pharmaceutical stocks Teva Pharmaceuticals Industries Ltd. and Perrigo Co., as well as the medical devices & supplies companies Boston Scientific Corp., DexCom, Inc., Masimo Corp., Becton Dickinson and Co. and Charles River Laboratories International, Inc. Lastly, the Trust s underweight in several large-cap pharmaceuticals with substantial weightings in the benchmark, including Johnson & Johnson and Merck & Co. Inc., aided relative performance.

During a period of strong returns for the health care sector, there were only a handful of detractors from the Trust s performance. Most notably, the Trust s overweight allocation in managed care stocks and its stock selection in the health care distributors industry hindered performance. In the latter group, McKesson Corp. detracted after reporting mixed financial results. Other positions that weighed on results included Mallinckrodt PLC (pharmaceuticals), The Cooper Cos., Inc. (medical devices & supplies) and an underweight in the strong performing biotechnology stock Gilead Sciences, Inc. The Trust s lack of a position in Pharmacyclics, Inc., which was acquired by AbbVie, Inc., also detracted.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a modest impact on performance during the period.

#### Describe recent portfolio activity.

The Trust s allocations generally remained in line with its allocations at the prior fiscal year-end. The Trust s weightings in biotechnology and health care providers & services sub-sectors increased slightly, while its weightings in the medical devices & supplies and pharmaceutical sub-sectors declined. These allocations were the by-product of the Trust s bottom-up, fundamental investment process.

#### Describe portfolio positioning at period end.

The Trust continues to focus on identifying innovative companies. Accordingly, its three largest allocations were to the biotechnology, medical devices & supplies and pharmaceuticals industries, where favorable trends in the innovation cycle have supported positive secular growth.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

the bank continues to take market share from legacy state-owned enterprises in India. Within the consumer discretionary sector, the Trust s position in Jasper Infotech Private Ltd., Series F, an online marketplace company based in India, was the second-largest individual contributor. The Trust s investment in Jasper InfoTech Private Ltd., a private company, benefited when additional rounds of funding increased the valuation of the company.

Conversely, stock selection within the information technology ( IT ) and health care sectors hindered performance over the period. Within IT, holdings in the

Internet software & services company Baidu, Inc. detracted given the firm s large share of revenue exposure to China. The Trust exited the position. In health care, stock selection in the pharmaceuticals sub-industry was the next largest detractor after shares of Sanofi detracted due to disappointing earnings results. The investment advisor remains optimistic regarding Sanofi s cardiovascular drug for cholesterol and the Trust has retained its position there.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a negative impact on performance during the period.

Describe recent portfolio activity.

During the 12-month period, exposure to the financials and telecommunication services (telecom) sectors was increased, funded by profit taking in the consumer discretionary and health care sectors. Regionally, these sector decisions resulted in increased exposure to Europe and a decreased weighting in emerging Asia.

Describe portfolio positioning at period end.

Relative to the MSCI All Country World Index ex-US, the Trust ended the period with overweight positions in the telecom and IT sectors, and underweights in materials and utilities. Regionally, the Trust remains overweight in Europe, and underweight in the emerging markets and the Pacific Basin.

#### BlackRock Resources & Commodities Strategy Trust

#### **Trust Overview**

BlackRock Resources & Commodities Strategy Trust s (BCX) (the Trust) primary investment objective is to seek high current income and current gains, with a secondary objective of capital appreciation. The Trust will seek to achieve its investment objectives, under normal market conditions, by investing at least 80% of its total assets in equity securities issued by commodity or natural resources companies, derivatives with exposure to commodity or natural resources companies or investments in securities and derivatives linked to the underlying price movement of commodities or natural resources. While permitted, the Trust does not currently expect to invest in securities and derivatives linked to the underlying price movement of commodities or natural resources. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

No assurance can be given that the Trust s investment objectives will be achieved.

The following discussion relates to the Trust s absolute performance based on NAV:

#### What factors influenced performance?

Tyson Foods, Inc., which continued to deliver on its strategy to develop and expand its value-added and branded capabilities, was one of the largest positive contributors to the Trust s absolute performance in 2015. The company s profit margins generally outperformed expectations

as management s efforts to improve the quality of its operations, especially in its chicken business, paid off.

The Trust s exposure to the Russian nickel miner MMC Norilsk Nickel PJSC contributed positively to absolute performance during the year. The company benefited from a decline in the perceived political risk in Russia, as well as a reduction in costs stemming from the weakness in the Russian ruble.

The mining industry detracted dramatically during the year due to a combination of slow global growth and oversupply in a number of the mined commodities. The sector was also hurt by weakening economic data in China, including a sharp drop in industrial activity and evidence of domestic firms struggling under heavy

debt burdens. The Trust s investment in the diversified miner BHP Billiton Ltd. which was hurt by both its exposure to falling oil prices and the tragic collapse of a mining dam in Brazil detracted from performance, as did its position in the copper producer First Quantum Minerals Ltd.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a positive impact on performance during the period and helped offset some of the volatility among resources stocks.

#### Describe recent portfolio activity.

At the beginning of 2015, the Trust was positioned with the majority of its investments in agriculture and energy, with the lowest weighting in the mining sector. These allocations were driven by the investment advisor s views regarding the varying outlooks and relative valuations for the three sectors. This positioning benefited performance in the first half of the year, during which the agriculture sector held up better than the energy and mining sectors.

During the third calendar quarter, the investment advisor made significant shifts to the portfolio, taking down its agriculture exposure and substantially increasing its weightings in the energy and mining groups. This adjustment reflected the investment advisor s view that indiscriminate selling in mining and energy shares had created compelling tactical opportunities.

#### Describe portfolio positioning at period end.

The energy sector was the Trust's largest allocation, followed by metals & mining and agriculture stocks, respectively.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Returns Rosed On

#### Trust Overview

**BlackRock Science and Technology Trust** s (**BST**) (the **Trust**) investment objective is to provide income and total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in equity securities of science and technology companies. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

No assurance can be given that the Trust s investment objective will be achieved.

The following discussion relates to the Trust s relative performance based on the index cited above:

#### What factors influenced performance?

Performance for the 12-month period was led by the Trust s position in Amazon.com, Inc., which rallied on strong revenue growth and margin control, both of which exceeded analysts forecasts. The Trust s investment advisor looks favorably on Amazon.com, Inc. s long-term opportunities. The second largest individual contributor to performance was the Trust s position in Facebook, Inc., Class A, as the stock

benefited from strong earnings momentum driven by an increase in the company s advertising revenues.

Conversely, the Trust s position in the Indian language film company Eros International PLC detracted after questions arose concerning the firm s accounting practices. In addition, the Trust s position in Oracle Corp. detracted after some investors became skeptical about revenue recognition after discovering aggressive sales incentives. During this time, the

Trust sold out of the stock, but reinvested later in the year after the stock appeared to be undervalued, as the investment advisor is optimistic concerning Oracle s future growth prospects around cloud computing.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a negative impact on performance during the period.

Describe recent portfolio activity.

Over the 12-month period, the Trust added to positions in the software & services and retailing industries, funded by reductions within the semi- conductors & semiconductor equipment and technology hardware & equipment industries. From a regional perspective, the Trust increased exposure to North America and Europe and rotated out of the emerging markets, particularly emerging Asia.

Describe portfolio positioning at period end.

Relative to the MSCI World Information Technology Index, the Trust s positioning reflected a number of themes. These included company-specific software & services opportunities, particularly in China, to capture the proliferation of Internet search demand and e-commerce. In addition, the Trust was overweight in companies successfully transitioning out of declining PC-related industries and into enterprise-driven big data initiatives. Lastly, the portfolio included companies the investment advisor views as industry-leading innovators that consistently re-invent their business models.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Trust Summary as of December 31, 2015

#### **BlackRock Utility and Infrastructure Trust**

#### **Trust Overview**

BlackRock Utility and Infrastructure Trust s (BUI) (the Trust ) investment objective is to provide total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in equity securities issued by companies that are engaged in the Utilities and Infrastructure business segments anywhere in the world and by utilizing an option writing (selling) strategy in an effort to seek total return performance and enhance distributions. The Trust considers the Utilities business segment to include products, technologies and services connected to the management, ownership, operation, construction, development or financing of facilities used to generate, transmit or distribute electricity, water, natural resources or telecommunications and the Infrastructure business segment to include companies that own or operate infrastructure assets or that are involved in the development, construction, distribution or financing of infrastructure assets. Under normal circumstances, the Trust invests a substantial amount of its total assets in foreign issuers, issuers that primarily trade in a market located outside the United States or issuers that do a substantial amount of business outside the United States. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

## Performance and Portfolio Management Commentary

## Returns for the 12-month period ended December 31, 2015 were as follows:

		Returns Based On		
	Market Price	Net Asset Value		
BUI <sup>1,2</sup>	(12.45)%	(6.09)%		
Lipper Utility Funds <sup>3</sup>	(15.83)%	(12.88)%

<sup>&</sup>lt;sup>2</sup> The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

<sup>3</sup> Average return.

The following discussion relates to the Trust s absolute performance based on NAV:

#### What factors influenced performance?

Broadly, U.S. utilities experienced weak performance in 2015, with a rebound in U.S. interest rates and uncertainty over the timing of future Federal Reserve monetary policy actions contributing to poor returns. The largest detractor from absolute returns was the Trust s exposure to master limited partnerships (MLPs) within the oil, gas & consumable fuels industry. Weakness in crude oil prices negatively impacted MLP returns, as did reduced expectations for long-term growth within the industry. Notable MLP detractors included Dominion Midstream Partners LP, Plains All American Pipeline, L.P. and Enbridge Inc. Stock selection in the independent power & renewables and electric utilities industries also hindered absolute returns.

The Trust s position in water utility operator American Water Works Company, Inc. was the largest absolute contributor to performance. Exposure to the transportation infrastructure industry also added to returns, with notable contributions from Atlantia S.p.A. and Transurban Group Ltd. Finally, the Trust s

allocation to gas utilities and multi-utilities also contributed modestly to portfolio absolute returns.

From a country allocation standpoint, the Trust s international exposure contributed positively to absolute returns. Portfolio holdings based in Italy and Australia performed particularly well during the reporting period.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced returns while continuing to participate in the performance of the underlying equities. The Trust s option writing strategy had a positive impact on performance during the period.

## Describe recent portfolio activity.

The Trust increased its transportation infrastructure exposure, by adding to existing positions in Atlantia S.p.A. and Sydney Airport. In utilities, exposure to larger-cap operators including Dominion Resources, Inc., CMS Energy Corporation, and NextEra Energy, Inc. was increased. Finally, the Trust increased its construction & engineering industry allocation by initiating a new position in VINCI SA. Conversely, MLP exposure was reduced, with notable sales including positions in MarkWest Energy Partners, L.P. and TransCanada Corporation.

## Describe portfolio positioning at period end.

The utilities sector accounted for just over one-half of the Trust sassets, with holdings weighted toward in the U.S. electric and multi-utilities industries. The Trust also maintained a significant allocation to the industrial sectors, including construction and infrastructure operators, and the sector represented approximately 20% of the portfolio. MLPs also accounted for approximately 20% of the portfolio, with a tilt toward midstream pipeline operators with manageable debt burdens, low capital costs and strong coverage ratios. In view of uncertainty around the pace of U.S. interest rate increases and the changing global backdrop against which Trust holdings operate, the Trust was positioned with an emphasis on investments across multiple geographic and regulatory environments.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## **Derivative Financial Instruments**

The Trusts may invest in various derivative financial instruments. Derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage. Derivative financial instruments also involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative

financial instrument. The Trusts ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Trust can realize on an investment and/or may result in lower distributions paid to shareholders. The Trusts investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.

Derivative financial instruments are options written, which are shown at value.

The Trust may hold assets in which the fair value approximates the carrying amount for financial statement purposes. As of period end, foreign currency of \$1,212 are categorized as Level 1 within the disclosure hierarchy.

During the year ended December 31, 2015, there were no transfers between levels.

A reconciliation of Level 3 investments is presented when the Trust had a significant amount of Level 3 investments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Preferred Stocks	Total
Assets:			
Opening Balance, as of December 31, 2014	\$ 251,899	\$ 425,376	\$ 677,275

Closing Balance, as of December 31, 2015		\$ 5,907,930	\$ 5,907,930
Net change in unrealized appreciation/depreciation on investments still held at December 31, 2015 <sup>2</sup>		\$ 1,704,045	\$ 1,704,045

Included in the related net change in unrealized appreciation (depreciation) in the Statements of Operations.

The following table summarizes the valuation techniques used and unobservable inputs utilized by the BlackRock Global Valuation Methodologies Committee (the Global Valuation Committee ) to determine the value of certain of the Trust s Level 3 investments as of period end.

	Value	Valuation Techniques	Unobservable Inputs	Range of Unobservable Inputs Utilized
Assets: Preferred Stocks.	\$ 4,362,568	Discounted Cash Flow Cost <sup>2</sup>	Discount Rate <sup>1</sup> N/A	1.87%
Total	\$ 4.362.568			

Any difference between net change in unrealized appreciation (depreciation) and net change in unrealized appreciation (depreciation) on investments still held at December 31, 2015 is generally due to investments no longer held or categorized as Level 3 at period end.

- Increase in unobservable input may result in a significant increase to value, while a decrease in the unobservable input may result in a significant decrease to value.
- <sup>2</sup> The Trust fair values certain of its Level 3 investments using acquisition cost, although the transaction may not have occurred during the current reporting period. These investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Trust.

The following table summarizes the valuation techniques used and unobservable inputs utilized by the BlackRock Global Valuation Methodologies Committee (the Global Valuation Committee ) to determine the value of certain of the Trust's Level 3 investments as of period end.

			Unobservable	Range of
	Value	Valuation Techniques	Inputs	Unobservable Inputs Utilized
Assets:				
Common Stocks	\$ 4,465,011	Market Comparables	Tangible Book Value Multiple <sup>1</sup>	2.10x
