1 Ericsson | Fourth Quarter and Full-Year Report 2016

## **Table of Contents**

### **CEO COMMENTS**

The negative industry trends remained in the fourth quarter. However, sales were positively impacted by favorable currency exchange rates combined with hardware deliveries, previously planned for Q1 2017. Profitability declined YoY following lower IPR licensing revenues mainly due to last year's agreement with Apple as well as increased restructuring charges. Operating cash flow in the fourth quarter was SEK 19.4 b., supported by reduced operating assets.

### **Business**

Group sales declined by -11% YoY, primarily due to the decrease of SEK -5.5 b in IPR licensing revenues. Full-year IPR licensing revenues were SEK 10.0 (14.4) b.

In 2016, a number of markets, in regions such as Latin America, the Middle East and Africa, were impacted by a weak macroeconomic environment with a negative effect on mobile broadband investments. The underlying market remained weak in the fourth quarter with further weakness in Latin America. However, hardware deliveries previously planned for Q1 2017 were made on customer requests, and had a positive impact on sales in the fourth quarter. In combination with a weakened SEK versus USD, this resulted in a stronger than expected sequential sales growth in mobile broadband. Segment Networks sales increased by 39% QoQ. The new radio platform, Ericsson Radio System (ERS), represented almost 15% of total deliveries of radio units for 2016 and the roll-out of the new platform is gradually ramping up.

Global Services sales declined by -4% YoY mainly due to the reduced scope of a managed services contract in North America. Support Solutions sales declined by -39% YoY, mainly due to lower IPR licensing revenues. In addition, TV & Media sales were lower than expected due to a rapid decline in legacy products.

Sales in the targeted areas declined by -7% YoY, mainly impacted by lower sales in OSS and BSS following the transition from legacy to new products. We are allocating resources into our digital transformation projects to secure important deliveries in 2017. Full-year sales for targeted areas were flat and accounted for 20% of group sales in 2016.

The current industry trends and business mix of coverage and capacity sales in mobile broadband are expected to prevail in 2017. At the Investor Update in November we presented our estimate of the Radio Access Network (RAN) equipment market in USD; a decline by -10% to -15% in 2016 and further decline by -2% to -6% in 2017.

The baseline for current IPR licensing contract portfolio is approximately SEK 7 b. on an annual basis. Smartphone volume growth, agreements with currently unlicensed handset manufacturers and IoT licensing will determine growth opportunities going forward.

### **Profitability**

Operating income decreased to SEK -0.3 (11.0) b. in the quarter, mainly due to lower IPR licensing revenues, higher restructuring charges and lower gross margin.

The execution pace of the cost and efficiency program was faster than predicted in the quarter resulting in front-loaded restructuring charges. With current plans, we expect restructuring charges of approximately SEK 3 b. for 2017.

## **Cash flow**

Operating cash flow in Q4 was SEK 19.4 b. Operating cash flow was mainly driven by reduced operating assets. Full-year operating cash flow amounted to SEK 14.0 b. Net cash at the end of quarter was SEK 31.2 b.

The Board will propose a dividend of SEK 1.00 (3.70) per share to the AGM. The Board believes that it is prudent to align the dividend level with 2016 earnings adjusted for restructuring charges and the current market outlook. However, the Board expresses confidence in the ongoing actions to improve Ericsson's financial performance, and has the ambition to increase the dividend over time as our performance improves.

## **Focus going forward**

We as well as our customers are going through a period of rapid change. As a consequence, we are reviewing our priorities in order to set the future direction of the company. This work has been initiated involving key teams in the company, to secure quality of decisions and speed in implementation once decisions are made. Emphasis will be on refining the strategy to focus investments into areas where we both can and must win. Building on the suggestion from the famous ice hockey player Wayne Gretzky; We will focus on skating where the puck will be, not where it has been.

In the near term, stability will be key to establishing a strong base for future growth. This means prioritizing profitability over growth, but also to diligently continue to work on efficiency and effectiveness across all operations. This can and will ensure that we remain at the forefront of technological development building on the combined strength across products, services and solutions.

In 2016, a number of markets, in regions such as Latin America, the Middle East and Africa, were impacted by a weak macroeconomic environment with a negative effect on mobile broadband investments. The underlying market remained weak in the fourth quarter with further weakness in Latin America. However, hardware deliveries previously planned for Q1 2017 were made on customer requests in countries such as Japan, Vietnam and Iran, and had a positive impact on sales in the fourth quarter. In combination with a weakened SEK versus USD, this resulted in a stronger than expected sequential sales growth in mobile broadband. Segment Networks sales increased by 39% QoQ.

The Networks business in North America, measured in local currency, declined slightly YoY due to continued reduced investments by one customer. Sales in Europe continued to decline YoY following completion of mobile broadband projects in 2015. Sales in Asia Pacific increased YoY, driven by transition from 3G to 4G.

Global Services sales declined by -4% YoY mainly due to lower sales in Managed Services related to the renewed managed services contract in North America. Support Solutions sales declined by -39% mainly due to lower IPR

licensing revenues and lower TV & Media sales.

IPR licensing revenues declined by SEK -5.5 b. YoY. IPR licensing revenues were flat QoQ. The baseline for current IPR licensing contract portfolio is approximately SEK 7 b. on an annual basis.

Sales in the targeted areas declined by -7% YoY, mainly impacted by lower sales in OSS and BSS.

### **Gross margin**

Gross margin declined YoY due to lower IPR licensing revenues, higher restructuring charges and a higher share of Global Services sales with reduced margin in the quarter. Sequentially gross margin was flat, negatively impacted by a lower share of IPR licensing revenues, offset by a lower share of services sales.

### **Cost and efficiency program and restructuring charges**

The cost and efficiency program, first initiated in November 2014, is progressing according to plan. The execution pace was faster than predicted in the quarter resulting in full-year restructuring charges of SEK 7.6 b. compared with the estimated SEK 5.5-6.5 b. As a consequence, restructuring charges will be lower in 2017. With current plans, they are estimated to be approximately SEK 3 b.

In addition, focus on reducing cost of sales to improve gross margin remains.

## **Table of Contents**

### **Operating expenses**

### **Other operating income and expenses**

Other operating income and expenses were stable YoY. The revaluation and realization effects of currency hedge contracts were SEK -0.4 (-0.1) b. The negative effects were more than offset by several positive items. The effects of currency hedge contracts are to be compared with SEK -0.2 b. in Q3, 2016.

The main part of the currency hedge contract balance is in USD. The SEK weakened further against the USD between Sep 30, 2016 (SEK/USD rate 8.62) and Dec 31, 2016 (SEK/USD rate 9.06).

### **Operating income**

Operating income decreased YoY to SEK -0.3 (11.0) b. mainly due to SEK -5.5 b. lower IPR licensing revenues, SEK 3.9 b. higher restructuring charges and lower gross margin. In the quarter operating margin was 0% (15%).

Operating income decreased QoQ due to higher restructuring charges and increased operating expenses. The decrease was partly offset by higher sales and higher other operating income and expenses.

Financial net declined YoY, due to lower interest rates. Financial net declined QoQ, mainly related to depreciated local currencies in certain markets.

### **Taxes**

The tax cost in the quarter decreased to SEK -0.6 (-3.3) b. due to low net income offset by non-deductable expenses and tax adjustments related to prior years.

### **Net income and EPS**

### **Employees**

The number of employees on Dec 31, 2016 was 111,464 compared with 113,797 on Sep 30, 2016. The decrease was mainly a result of headcount reductions as part of the cost and efficiency program.

4 Ericsson | Fourth Quarter and Full-Year Report 2016

**Table of Contents**

**FULL-YEAR COMMENTS**

**Net sales**

Reported sales decreased by -10% mainly due to lower demand for mobile broadband, especially in markets with a weak macroeconomic environment. Sales in Europe declined following completion of mobile broadband projects in 2015. Mobile broadband sales in North America remained stable while Professional Services sales declined, mainly due to lower managed services activities. A significant managed services contract in North America was renewed with reduced scope. Sales in South East Asia increased, driven by large deliveries in coverage projects.

IPR licensing revenues amounted to SEK 10.0 (14.4) b. Sales in 2015 were positively impacted by a global patent license agreement signed with Apple. The baseline for current IPR licensing contract portfolio is approximately SEK 7 b. on an annual basis. Smartphone volume growth, agreements with currently unlicensed handset manufacturers and IoT licensing will determine growth opportunities going forward.

Networks reported sales decreased by -12% mainly due to lower mobile broadband sales in markets negatively impacted by a weak macroeconomic environment. In addition, sales declined in Europe and India following completion of large coverage projects in 2015 and delayed spectrum auctions respectively. Lower IPR licensing revenues also impacted Networks sales negatively.

Reported Global Services sales declined by -6%. Professional Services sales declined, mainly due to lower managed services activities in North America where a contract was renewed with reduced scope. In addition, CDMA customer support sales declined. Lower mobile broadband demand impacted Network Rollout sales negatively, primarily in Europe and Latin America.

Mobile broadband investments were negatively impacted by a weak macroeconomic environment in a number of markets such as Latin America, the Middle East and South Africa. In addition, sales declined in Europe following the completion of large coverage projects in 2015 and in India due to delayed spectrum auctions. The sales decline was partly offset by sales growth in South East Asia where large deliveries in mobile broadband coverage projects were made.

In North America and in North East Asia investments in network equipment were stable. In Mainland China large-scale LTE deployments continued for the third consecutive year.

Ericsson Radio System (ERS) represented almost 15% of total deliveries of radio units for full-year 2016. The company is on track to reaching the target for 2017 of approximately 50% ERS of total deliveries.

**Operating income and margin**

Operating income and margin decreased, mainly due to a lower share of mobile broadband capacity sales and lower IPR licensing revenues. The decrease was partly offset by reduced operating expenses, mainly as an effect of the ongoing cost and efficiency program. The work to improve profitability continued with significant headcount reductions and structural changes.

Restructuring charges amounted to SEK -4.0 (-2.8) b. and the negative effect from currency hedge contracts was SEK -0.7 (-0.9) b.

### **DISCLOSURE PURSUANT TO SECTION 219 OF THE IRAN THREAT REDUCTION AND SYRIA HUMAN RIGHTS ACT OF 2012 (ITRA)**

During the fourth quarter of 2016, Ericsson made sales of telecommunications infrastructure related products and services in Iran to Hiweb, Mobile Communication Company of Iran and to MTN Irancell, which generated gross revenues (reported as net sales) of approximately SEK 1,168 million. Ericsson does not normally allocate quarterly net profit (reported as net income) on a country-by-country or activity-by-activity basis, other than as set forth in Ericsson's consolidated financial statements prepared in accordance with IFRS as issued by the IASB. However, Ericsson has estimated that its operating income (income before taxes and financial net) from such sales, after internal cost allocation, during the fourth quarter of 2016 would be substantially lower than such gross revenues. During the fourth quarter of 2016, Post Bank of Iran (a local bank in Iran) issued bank guarantees to secure an Iranian customer's payment obligations to Ericsson.

**Table of Contents**

**RISK FACTORS**

Ericsson's operational and financial risk factors and uncertainties are described in our Annual Report 2015.

Risk factors and uncertainties in focus short term for the Parent Company and the Ericsson Group include, but are not limited to:

Potential negative effects on operators' willingness to invest in network development due to uncertainty in the financial markets and a weak economic business environment, or reduced consumer telecom spending, or increased pressure on us to provide financing, or delayed auctions of spectrums;

Effects on gross margins and/or working capital of the business mix in the Networks segment between capacity sales and new coverage build-outs;

Effects on gross margins of the business mix in the Global Services segment including proportion of new network build-outs and share of new managed services or digital transformation deals with initial transition costs;

Effects of the ongoing industry consolidation among our customers as well as between our largest competitors, e.g. with postponed investments and intensified price competition as a consequence;

New JV arrangements or partnerships which may not be successful and expose us to future costs;

Changes in foreign exchange rates, in particular USD;

Political unrest or instability in certain markets;

Effects on production and sales from restrictions with respect to timely and adequate supply of materials, components and production capacity and other vital services on competitive terms;

No guarantees that specific restructuring or cost-savings initiatives will be sufficient, successful or executed in time to deliver any improvements in short-term earnings;

Various geopolitical forces may impact the global economy and our business;

Cyber security incidents, which may have material negative impact.

Ericsson stringently monitors the compliance with all relevant trade regulations and trade embargos applicable to dealings with customers operating in countries where there are trade restrictions or trade restrictions are discussed. We have reviewed the condensed interim financial information (interim report) of Telefonaktiebolaget LM Ericsson (publ.) as of December 31, 2016, and the twelve months period then ended. The board of directors and the CEO are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Swedish Annual Accounts Act. ACCOUNTING POLICIES

**THE GROUP**

This interim report is prepared in accordance with IAS 34. The term "IFRS" used in this document refers to the application of IAS and IFRS as well as interpretations of these standards as issued by IASB's Standards Interpretation Committee (SIC) and IFRS Interpretations Committee (IFRIC). The accounting policies adopted are consistent with those of the annual report for the year ended December 31, 2015, and should be read in conjunction with that annual report.

There is no significant difference between IFRS effective as per December 31, 2016 and IFRS as endorsed by the EU.

*Amendments applied as from the first quarter of 2016\**

**Presentation in financial statements**

In the Consolidated Balance Sheet, Interest-bearing securities, non-current has been added as a new line and Short term investments has been renamed Interest-bearing securities, current. On the Statement of Cash Flow, the line Short-term investments has been renamed Interest-bearing securities.

**Accounting for bonds**

Due to the conditions in the market for government and mortgage bonds in Sweden, Ericsson now intends to hold bonds purchased in its "Asset management" portfolio until maturity instead of intending to hold them for trading. Bonds purchased in this portfolio after January 1, 2016 are classified as available-for-sale. Bonds held as available-for-sale with a maturity longer than one year are included in Interest-bearing securities, non-current. Bonds held as available-for-sale with a maturity shorter than one year are included in Interest-bearing securities, current. Unrealized gains and losses are recognized in Other comprehensive income. When these securities are derecognized, the accumulated fair value adjustments will be included in financial income.

\* Updated in the third quarter of 2016 due to purchase of available-for-sale bond
