realized gains of \$11.1 million (C\$13.6 million) after tax in Q1 last year. Net operating income, however, increased 11% to \$30.0 million (C\$34.6 million) compared to \$27.0 million (C\$33.2 million) last year. Net operating income information is calculated as net income excluding after-tax net realized gains and losses on investments.

The combined ratio improved to 96.2% compared to 96.3% in the same quarter last year, producing a record first quarter underwriting profit of \$16.4 million (C\$18.9 million). Investment income increased by 20% to \$26.6 million (C\$30.7 million) compared to \$22.1 million (C\$27.1 million) in the same quarter last year.

Diluted earnings per share decreased 24% to \$0.51 (C\$0.58) for the quarter, compared to \$0.67 (C\$0.82) for the first quarter of 2005. Net realized investment losses after tax reduced earnings per share by \$0.02 (C\$0.02) in the quarter, whereas net investment gains after tax increased earnings per share by \$0.20 (C\$0.24) in the same quarter last year. Net operating earnings per share increased 11% to \$0.53 (C\$0.60) compared to \$0.47 (C\$0.58).

We are pleased with the positive start that we have made to 2006, said Bill Star, President & Chief Executive Officer. Each of our operating subsidiaries reported an underwriting profit which led to a record underwriting profit and an improved combined ratio for the quarter. Our investment managers repositioned their portfolios and disposed of underperforming equity investments, and as a result, the unrealized gain position in our equity portfolio increased by \$15.5 million to \$55.6 million from year end. We continue to maintain our underwriting discipline in all of our markets, and anticipate that capacity constraints in reinsurance markets in the United States will provide opportunities for our growth as 2006 progresses.

### PRESIDENT S MESSAGE TO SHAREHOLDERS

Dear Shareholders:

On behalf of the Board of Directors, I am pleased to report our financial results for the first quarter ended March 31, 2006 **in U.S. dollars except where indicated.**

Net income decreased by 24% to \$28.9 million (C\$33.4 million), compared to \$38.1 million (C\$46.8 million) in the first quarter of last year due to the impact of net losses realized on investments. Net realized investment losses were \$1.1 million (C\$1.2 million) after tax, compared with net realized gains of \$11.1 million (C\$13.6 million) after tax in Q1 last year. Net operating income, however, increased 11% to \$30.0 million (C\$34.6 million) compared to \$27.0 million (C\$33.2 million) last year.

The combined ratio improved to 96.2% compared to 96.3% in the same quarter last year, producing a record first quarter underwriting profit of \$16.4 million (C\$18.9 million). Investment income increased by 20% to \$26.6 million (C\$30.7 million) compared to \$22.1 million (C\$27.1 million) in the same quarter last year.

Diluted earnings per share decreased 24% to \$0.51 (C\$0.58) for the quarter, compared to \$0.67 (C\$0.82) for the first quarter of 2005. Net realized investment losses after tax reduced earnings per share by \$0.02 (C\$0.02) in the quarter, whereas net investment gains after tax increased earnings per share by \$0.20 (C\$0.24) in the same quarter last year. Net operating earnings per share increased 11% to \$0.53 (C\$0.60) compared to \$0.47 (C\$0.58).

We are pleased with the positive start that we have made to 2006. Each of our operating subsidiaries reported an underwriting profit which led to a record underwriting profit and an improved combined ratio for the quarter. Our investment managers repositioned their portfolios and disposed of underperforming equity investments, and as a result, the unrealized gain position in our equity portfolio increased by \$15.5 million to \$55.6

million from year end.

### **Outlook**

In Canada, we are generally experiencing flat pricing with competitive but rational activity in the marketplace for commercial products. Government activism in personal lines products in Ontario and Alberta is leading to further rate reductions in the Ontario marketplace as well as significant losses from the Facility residual market in Alberta. We expect that 2006 should be a good year for the Canadian industry but do not anticipate that industry combined ratios will be as strong as 2005.

---

Page 17 of 36

In the United States, we are generally seeing stable pricing conditions though we expect that the shortage of reinsurance capacity for smaller companies, particularly in the southern states, will start to emerge during the 2006. The rising interest rate environment is generating increased yields on our investment portfolio compared to 2005.

We continue to maintain our underwriting discipline in all of our markets, and anticipate that capacity constraints in reinsurance markets in the United States will provide opportunities for our growth as 2006 progresses.

I am pleased to announce that the Board of Directors has declared a quarterly dividend of C\$0.0625 per common share, payable on June 30, 2006 to shareholders of record on June 15, 2006.

This President's Message contains forward looking statements that are subject to risks and uncertainties. The reader should review the Forward Looking Statements section of Management's Discussion and Analysis to assist in identifying risk factors that could cause actual results to differ materially from those anticipated in the forward looking statements.

Sincerely,

/s/ William G. Star

President & Chief Executive Officer

The following management's discussion and analysis (MD&A) should be read in conjunction with the Company's unaudited interim consolidated financial statements for the first quarter of fiscal 2006 and 2005; with the MD&A set out on pages 16 to 55 in the Company's 2005 Annual Report, including the section on risk factors; and with the notes to the interim consolidated financial statements for the first quarter of fiscal 2006 and the notes to the audited consolidated financial statements for fiscal 2005 set out on pages 63 to 76 of the Company's 2005 Annual Report.

The Company financial results are reported in U.S. dollars. Unless otherwise indicated, all amounts are in U.S. dollars and have been derived from financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP).

### **Non-GAAP Measures**

The Company uses both GAAP and certain non-GAAP measures to assess performance. Securities regulators require that companies caution readers about non-GAAP measures that do not have a standardized meaning under GAAP and are unlikely to be comparable to similar measures used by other companies. Kingsway, like many insurance companies, analyzes performance based on underwriting ratios such as combined, expense and loss ratios. These terms are defined in the glossary of terms section beginning on page 81 of the 2005 Annual Report. The Company also uses investment portfolio per share information which is calculated based on the fair value of the investment portfolio divided by the number of issued and outstanding common shares. The Company uses net operating income information which is calculated as net income

The net proceeds from this offering were invested into a Kingsway controlled entity which is not consolidated based on accounting standards. The effect of this transaction is to show additional debt on the Company's financial statements and an off-setting equity investment of \$8.3 million into the non-consolidated affiliated entity. The Company does not have any other off-balance sheet financing arrangements.

**For the three months ended March 31, 2006 and 2005**  
**(Unaudited tabular amounts in thousands of U.S. dollars)**

**1. Basis of presentation**

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles using the same accounting policies as were used for the Company's consolidated financial statements for the year ended December 31, 2005. Effective December 31, 2005, the Company reported its consolidated financial statements in U.S. dollars. As a result of this change in reporting currency, the results of the first quarter of 2005 have been converted into U.S. dollars using as the same methodology as described in note 1 of the 2005 audited consolidated financial statements. These interim consolidated financial statements do not contain all disclosures required by generally accepted accounting principles and accordingly should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2005 as set out on pages 56 to 76 of the Company's 2005 Annual Report. The results of the operations for the interim periods are not necessarily indicative of the full-year results.

**2. Stock-based compensation**

As reported on pages 64 of the Company's 2005 Annual Report, effective January 1, 2003 the Company adopted on a prospective basis the fair-value method of accounting for stock-based compensation awards granted to employees and non-employee directors. During the first quarter 2006, the Company recorded \$488,000 of stock-based compensation expense included in employee compensation expense.

For stock options granted in years prior to 2003, the Company must provide the following pro forma disclosures of net income and earnings per share as if the Company had measured the additional compensation element of stock options granted based on the fair value on the date of grant. Such proforma disclosure follows:

	<b>Three months ended March 31,</b>	
	<b>2006</b>	<b>2005</b>
Net income		
As reported	\$28,882	\$38,121
Pro forma	28,882	38,053

As reported	\$ 0.51	\$ 0.68
Pro forma	0.51	0.68
Diluted earnings per share		
As report	\$ 0.51	\$ 0.67

**(Unaudited tabular amounts in thousands of U.S. dollars)**

**2. Stock-based compensation continued:**

The per share weighted average fair value of options granted during 2006 and 2005 was C\$6.88 and C\$3.58, respectively. The fair value of the options granted was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted average assumptions:

	<b>As at March 31</b>	
	<b>2006</b>	<b>2005</b>
Risk-free interest rate	4.02%	3.53%
Dividend yield	1.02%	1.02%

Edgar Filing: KINGSWAY FINANCIAL SERVICES INC - Form 6-K

Volatility of the expected market price of the Company's common shares	31.4%	22.5%
Expected option life (in years)	3.5	3.9

The Black-Scholes option valuation model was developed for use in estimating fair value of traded options which have no vesting restrictions and are fully transferable. As the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the above pro forma adjustments are not necessarily a reliable single measure of the fair value of the Company's employee stock options.

**3. Segmented information**

The Company provides property and casualty insurance and other insurance related services in three reportable segments, Canada, the United States and corporate and other insurance related services. The Company's Canadian and United States segments include transactions with the Company's reinsurance subsidiaries. At the present time, other insurance related services are not significant. Results for the Company's operating segments are based on the Company's internal financial reporting systems and are consistent with those followed in the preparation of the consolidated financial statements.
