

BANK OF MONTREAL /CAN/

Form 424B2

March 03, 2014

The information in this preliminary pricing supplement is not complete and may be changed. This preliminary pricing supplement is not an offer to sell nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Registration Statement No. 333-173924

Filed Pursuant to Rule 424(b)(2)

Subject to Completion, dated March 3, 2014

Pricing Supplement to the Prospectus dated June 22, 2011, the Prospectus Supplement dated June 22, 2011 and the Product Supplement dated June 23, 2011

US\$

Senior Medium-Term Notes, Series B

Buffered Bullish Enhanced Return Notes due March 31, 2017

Linked to the iShares® China Large-Cap ETF

- The notes are designed for investors who seek a 200% leveraged return based on the appreciation in the share price of the iShares® China Large-Cap ETF (the “Underlying Asset”). Investors should be willing to accept a payment at maturity that is capped at the Maximum Redemption Amount (as defined below), be willing to forgo periodic interest, and be willing to lose 1% of their principal amount for each 1% that the price of the Underlying Asset decreases by more than 15% from its price on the Pricing Date. An investor in the notes may lose up to 85% of their principal at maturity.
- The maximum return at maturity will be equal to the product of the Upside Leverage Factor of 200% and the Cap of 15.50%. Accordingly, the Maximum Redemption Amount will be \$1,310 for each \$1,000 in principal amount (a 31.00% return).
- Any payment at maturity is subject to the credit risk of Bank of Montreal.
- The notes will be issued in minimum denominations of \$1,000 and integral multiples of \$1,000.
- The offering is expected to price on March 26, 2014, and the notes are expected to settle through the facilities of The Depository Trust Company on or about March 31, 2014.
- The notes are scheduled to mature on March 31, 2017.
- The CUSIP number of the notes is 06366RTF2
- Our subsidiary, BMO Capital Markets Corp. (“BMOCM”), is the agent for this offering. See “Supplemental Plan of Distribution (Conflicts of Interest)” below.

Investing in the notes involves risks, including those described in the “Selected Risk Considerations” section beginning on page P-4 of this pricing supplement, the “Additional Risk Factors Relating to the Notes” section beginning on page PS-5 of the product supplement, and the “Risk Factors” section beginning on page S-3 of the prospectus supplement and on page 7 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these notes or passed upon the accuracy of this pricing supplement, the product supplement, the prospectus supplement or the prospectus. Any representation to the contrary is a criminal offense.

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

The notes will be our unsecured obligations and will not be savings accounts or deposits that are insured by the United States Federal Deposit Insurance Corporation, the Bank Insurance Fund, the Canada Deposit Insurance Corporation or any other governmental agency or instrumentality or other entity.

On the date of this preliminary pricing supplement, based on the terms set forth above, the estimated initial value of the notes is \$953.40 per \$1,000 in principal amount. The estimated initial value of the notes on the Pricing Date may differ from this value but will not be less than \$935.00 per \$1,000 in principal amount. However, as discussed in more detail in this pricing supplement, the actual value of the notes at any time will reflect many factors and cannot be predicted with accuracy.

	Price to Public	Agent's Commission(1)	Proceeds to Bank of Montreal
Per Note	US\$1,000	US\$	US\$
Total	US\$	US\$	US\$

(1) The actual agent's commission will be set forth in the final pricing supplement.

BMO CAPITAL MARKETS

Key Terms of the Notes:

Underlying Asset:	iShares® China Large-Cap ETF (NYSE Arca symbol: FXI). See the section below entitled “The Underlying Asset” for additional information about the Underlying Asset.
Payment at Maturity:	If the Percentage Change is greater than or equal to the Cap, then the amount that the investors will receive at maturity for each \$1,000 in principal amount of the notes will equal the Maximum Redemption Amount. If the Percentage Change is positive but is less than the Cap, then the amount that the investors will receive at maturity for each \$1,000 in principal amount of the notes will be calculated as follows: $\text{Principal Amount} + [\text{Principal Amount} \times (\text{Percentage Change} \times \text{Upside Leverage Factor})]$ If the Percentage Change is between 0% and -15% inclusive, then the amount that the investors will receive at maturity will equal the principal amount of the notes. If the Percentage Change is less than -15%, then the payment at maturity will be calculated as follows: $\text{Principal Amount} + [\text{Principal Amount} \times (\text{Percentage Change} + \text{Buffer Percentage})]$
Upside Leverage Factor:	200%
Cap:	15.50%, to be confirmed on the Pricing Date.
Maximum Redemption Amount:	The payment at maturity will not exceed the Maximum Redemption Amount of \$1,310 per \$1,000 in principal amount of the notes.
Initial Level:	The closing price of one share of the Underlying Asset on the Pricing Date.
Final Level:	The closing price of one share of the Underlying Asset on the Valuation Date.
Buffer Level:	85% of the Initial Level.
Buffer Percentage:	15%. Accordingly, you will receive the principal amount of your notes at maturity only if the price of the Underlying Asset does not decrease by more than 15%. If the Final Level is less than the

Buffer Level, you will receive less than the principal amount of your notes at maturity, and you could lose up to 85% of the principal amount of your notes.

Percentage Change:	Final Level – Initial Level, expressed as a percentage. Initial Level
Pricing Date:	On or about March 26, 2014.
Settlement Date:	On or about March 31, 2014, as determined on the Pricing Date.
Valuation Date:	On or about March 28, 2017, as determined on the Pricing Date.
Maturity Date:	On or about March 31, 2017, as determined on the Pricing Date.
Automatic Redemption:	Not applicable
Calculation Agent:	BMOCM
Selling Agent:	BMOCM

The Pricing Date and the Settlement Date are subject to change. The actual Pricing Date, Settlement Date, Valuation Date and Maturity Date for the notes will be set forth in the final pricing supplement.

We may use this pricing supplement in the initial sale of the notes. In addition, BMOCM or another of our affiliates may use this pricing supplement in market-making transactions in any notes after their initial sale. Unless our agent or we inform you otherwise in the confirmation of sale, this pricing supplement is being used in a market-making transaction.

Additional Terms of the Notes

You should read this pricing supplement together with the product supplement dated June 23, 2011, the prospectus supplement dated June 22, 2011 and the prospectus dated June 22, 2011. This pricing supplement, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours or the agent. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors Relating to the Notes” in the product supplement, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement dated June 23, 2011:
<http://www.sec.gov/Archives/edgar/data/927971/000121465911002118/f622112424b5.htm>

- Prospectus supplement dated June 22, 2011:
<http://www.sec.gov/Archives/edgar/data/927971/000095012311060741/o71090b5e424b5.htm>

- Prospectus dated June 22, 2011:
<http://www.sec.gov/Archives/edgar/data/927971/000095012311060730/o71090b2e424b2.htm>

Our Central Index Key, or CIK, on the SEC website is 927971. As used in this pricing supplement, the “Company,” “we,” “us” or “our” refers to Bank of Montreal.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Underlying Asset. These risks are explained in more detail in the “Additional Risk Factors Relating to the Notes” section of the product supplement.

- Your investment in the notes may result in a loss. — You may lose some or substantially all of your investment in the notes. The payment at maturity will be based on the Final Level, and whether the Final Level of the Underlying Asset on the Valuation Date has declined from the Initial Level to a level that is less than the Buffer Level. You will lose 1% of the principal amount of your notes for each 1% that the Final Level is less than the Buffer Level. Accordingly, you could lose up to 85% of the principal amount of the notes.
- Your return on the notes is limited to the Maximum Redemption Amount, regardless of any appreciation in the share price of the Underlying Asset. — You will not receive a payment at maturity with a value greater than the Maximum Redemption Amount per \$1,000 in principal amount of the notes. This will be the case even if the Percentage Change exceeds the Cap.
- Your investment is subject to the credit risk of Bank of Montreal. — Our credit ratings and credit spreads may adversely affect the market value of the notes. Investors are dependent on our ability to pay the amount due at maturity, and therefore investors are subject to our credit risk and to changes in the market’s view of our creditworthiness. Any decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the notes.
- Potential conflicts. — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. We or one or more of our affiliates may also engage in trading of shares of the Underlying Asset or securities included in the Underlying Index (as defined below) on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for our customers. Any of these activities could adversely affect the price of the Underlying Asset and, therefore, the market value of the notes. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the performance of the Underlying Asset. By introducing competing products into the marketplace in this manner, we or one or more of our affiliates could adversely affect the market value of the notes.
 - Our initial estimated value of the notes will be lower than the price to public. — Our initial estimated value of the notes is only an estimate, and is based on a number of factors. The price to public of the notes will exceed our initial estimated value, because costs associated with offering, structuring and hedging the notes are included in the price to public, but are not included in the estimated value. These costs include the agent’s commission, and the profits that we and our affiliates expect to realize for assuming the risks in hedging our obligations under the notes and the estimated cost of hedging these obligations. The initial estimated value of the notes may be as low as the amount indicated on the cover page of this pricing supplement.
- Our initial estimated value does not represent any future value of the notes, and may also differ from the estimated value of any other party. — Our initial estimated value of the notes as of the date of this preliminary pricing supplement is, and our estimated value as determined on the Pricing Date will be, derived using our internal pricing models. This value is based on market conditions and other relevant factors, which include volatility of the Underlying Asset, dividend rates and interest rates. Different pricing models and assumptions could provide values

for the notes that are greater than or less than our initial estimated value. In addition, market conditions and other relevant factors after the Pricing Date are expected to change, possibly rapidly, and our assumptions may prove to be incorrect. After the Pricing Date, the value of the notes could change dramatically due to changes in market conditions, our creditworthiness, and the other factors set forth in this pricing supplement and the product supplement. These changes are likely to impact the price, if any, at which we or BMOCM would be willing to purchase the notes from you in any secondary market transactions. Our initial estimated value does not represent a minimum price at which we or our affiliates would be willing to buy your notes in any secondary market at any time.

- The terms of the notes are not determined by reference to the credit spreads for our conventional fixed-rate debt. — To determine the terms of the notes, we will use an internal funding rate that represents a discount from the credit spreads for our conventional fixed-rate debt. As a result, the terms of the notes are less favorable to you than if we had used a higher funding rate.

- Certain costs are likely to adversely affect the value of the notes. — Absent any changes in market conditions, any secondary market prices of the notes will likely be lower than the price to public. This is because any secondary market prices will likely take into account our then-current market credit spreads, and because any secondary market prices are likely to exclude all or a portion of the agent's commission and the hedging profits and estimated hedging costs that are included in the price to public of the notes and that may be reflected on your account statements. In addition, any such price is also likely to reflect a discount to account for costs associated with establishing or unwinding any related hedge transaction, such as dealer discounts, mark-ups and other transaction costs. As a result, the price, if any, at which BMOCM or any other party may be willing to purchase the notes from you in secondary market transactions, if at all, will likely to be lower than the price to public. Any sale that you make prior to the maturity date could result in a substantial loss to you.
- Owning the notes is not the same as owning shares of the Underlying Asset or a security directly linked to the Underlying Asset. — The return on your notes will not reflect the return you would realize if you actually owned the Underlying Asset or a security directly linked to the performance of the Underlying Asset and held that investment for a similar period. Your notes may trade quite differently from the Underlying Asset. Changes in the price of the Underlying Asset may not result in comparable changes in the market value of your notes. Even if the price of the Underlying Asset increases during the term of the notes, the market value of the notes prior to maturity may not increase to the same extent. It is also possible for the market value of the notes to decrease while the price of the Underlying Asset increases. In addition, any dividends or other distributions paid on the Underlying Asset will not be reflected in the amount payable on the notes.
- You will not have any shareholder rights and will have no right to receive any shares of the Underlying Asset at maturity. — Investing in your notes will not make you a holder of any shares of the Underlying Asset or any securities held by the Underlying Asset. Neither you nor any other holder or owner of the notes will have any voting rights, any right to receive dividends or other distributions, or any other rights with respect to the Underlying Asset or such other securities.
- Changes that affect the FTSE China 25 Index will affect the market value of the notes and the amount you will receive at maturity. — The policies of the FTSE Group, the sponsor of the FTSE China 25 Index (the "Underlying Index"), concerning the calculation of the Underlying Index, additions, deletions or substitutions of the components of the Underlying Index and the manner in which changes affecting those components, such as stock dividends, reorganizations or mergers, may be reflected in the Underlying Index and, therefore, could affect the share price of the Underlying Asset, the amount payable on the notes at maturity, and the market value of the notes prior to maturity. The amount payable on the notes and their market value could also be affected if the Index Sponsor changes these policies, for example, by changing the manner in which it calculates the Underlying Index, or if the Index Sponsor discontinues or suspends the calculation or publication of the Underlying Index.
- We have no affiliation with the Index Sponsor and will not be responsible for any actions taken by the Index Sponsor. — The Index Sponsor is not an affiliate of ours and will not be involved in the offering of the notes in any way. Consequently, we have no control over the actions of the Index Sponsor, including any actions of the type that would require the calculation agent to adjust the payment to you at maturity. The Index Sponsor has no obligation of any sort with respect to the notes. Thus, the Index Sponsor has no obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the notes. None of our proceeds from the issuance of the notes will be delivered to the Index Sponsor.
- Adjustments to the Underlying Asset could adversely affect the notes. — BlackRock, Inc. (collectively with its affiliates "BlackRock"), as the sponsor and advisor of the Underlying Asset, is responsible for calculating and maintaining the Underlying Asset. BlackRock can add, delete or substitute the stocks comprising the Underlying Asset or may make other methodological changes that could change the share price of the Underlying Asset at any

time. If one or more of these events occurs, the calculation of the amount payable at maturity may be adjusted to reflect such event or events. Consequently, any of these actions could adversely affect the amount payable at maturity and/or the market value of the notes.

- We and our affiliates do not have any affiliation with the investment advisor of the Underlying Asset and are not responsible for its public disclosure of information. — The investment advisor of the Underlying Asset advises the Underlying Asset on various matters including matters relating to the policies, maintenance and calculation of the Underlying Asset. We and our affiliates are not affiliated with the investment advisor in any way and have no ability to control or predict its actions, including any errors in or discontinuance of disclosure regarding its methods or policies relating to the Underlying Asset. The investment advisor is not involved in the offering of the notes in any way and has no obligation to consider your interests as an owner of the notes in taking any actions relating to the Underlying Asset that might affect the value of the notes. Neither we nor any of our affiliates has independently verified the adequacy or accuracy of the information about the investment advisor or the Underlying Asset contained in any public disclosure of information. You, as an investor in the notes, should make your own investigation into the Underlying Asset.

- The correlation between the performance of the Underlying Asset and the performance of the Underlying Index may be imperfect. — The performance of the Underlying Asset is linked principally to the performance of the Underlying Index. However, because of the potential discrepancies identified in more detail in the product supplement, the return on the Underlying Asset may correlate imperfectly with the return on the Underlying Index.
- The Underlying Asset is subject to management risks. — The Underlying Asset is subject to management risk, which is the risk that the investment advisor's investment strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. For example, the investment advisor may invest a portion of the Underlying Asset's assets in securities not included in the relevant industry or sector but which the investment advisor believes will help the Underlying Asset track the relevant industry or sector.
- Lack of liquidity. — The notes will not be listed on any securities exchange. BMOCM may offer to purchase the notes in the secondary market, but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade the notes is likely to depend on the price, if any, at which BMOCM is willing to buy the notes.
- Hedging and trading activities. — We or any of our affiliates may carry out hedging activities related to the notes, including purchasing or selling securities included in the Underlying Asset, or futures or options relating to the Underlying Asset, or other derivative instruments with returns linked or related to changes in the performance of the Underlying Asset. We or our affiliates may also engage in trading of shares of the Underlying Asset or securities included in the Underlying Index from time to time. Any of these hedging or trading activities on or prior to the Pricing Date and during the term of the notes could adversely affect our payment to you at maturity.
- Many economic and market factors will influence the value of the notes. — In addition to the price of the Underlying Asset and interest rates on any trading day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, and which are described in more detail in the product supplement.
- You must rely on your own evaluation of the merits of an investment linked to the Underlying Asset. — In the ordinary course of their businesses, our affiliates from time to time may express views on expected movements in the price of the Underlying Asset or the securities held by the Underlying Asset. One or more of our affiliates have published, and in the future may publish, research reports that express views on the Underlying Asset or these securities. However, these views are subject to change from time to time. Moreover, other professionals who deal in the markets relating to the Underlying Asset at any time may have significantly different views from those of our affiliates. You are encouraged to derive information concerning the Underlying Asset from multiple sources, and you should not rely on the views expressed by our affiliates.

Neither the offering of the notes nor any views which our affiliates from time to time may express in the ordinary course of their businesses constitutes a recommendation as to the merits of an investment in the notes.

- Significant aspects of the tax treatment of the notes are uncertain. — The tax treatment of the notes is uncertain. We do not plan to request a ruling from the Internal Revenue Service or from any Canadian authorities regarding the tax treatment of the notes, and the Internal Revenue Service or a court may not agree with the tax treatment described in this pricing supplement.

The Internal Revenue Service has issued a notice indicating that it and the Treasury Department are actively considering whether, among other issues, a holder should be required to accrue interest over the term of an instrument such as the notes even though that holder will not receive any payments with respect to the notes until maturity and

whether all or part of the gain a holder may recognize upon sale or maturity of an instrument such as the notes could be treated as ordinary income. The outcome of this process is uncertain and could apply on a retroactive basis.

Please read carefully the section entitled “U.S. Federal Tax Information” in this pricing supplement, the section entitled “Supplemental Tax Considerations—Supplemental U.S. Federal Income Tax Considerations” in the accompanying product supplement, the section “United States Federal Income Taxation” in the accompanying prospectus and the section entitled “Certain Income Tax Consequences” in the accompanying prospectus supplement. You should consult your tax advisor about your own tax situation.

Additional Risks Relating to the iShares® China Large-Cap ETF

- An investment in the notes linked to the iShares® China Large-Cap ETF is subject to risks associated with foreign securities markets. — The Underlying Index of this fund tracks the value of certain Chinese equity securities. You should be aware that investments in securities linked to the value of foreign equity securities involve particular risks. The Chinese securities market may have less liquidity and may be more volatile than U.S. or other securities markets and market developments may affect the Chinese market differently from U.S. or other securities markets. Direct or indirect government intervention to stabilize the Chinese securities markets, as well as cross-shareholdings in Chinese companies, may affect trading prices and volumes in that market. Also, there is generally less publicly available information about foreign companies than about those U.S. companies that are subject to the reporting requirements of the U.S. Securities and Exchange Commission, and Chinese companies are subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

Prices of securities in China are subject to political, economic, financial and social factors that apply in that country. These factors, which could negatively affect the Chinese securities market, include the possibility of recent or future changes in the Chinese government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to Chinese companies or investments in Chinese equity securities and the possibility of fluctuations in the rate of exchange between currencies, the possibility of outbreaks of hostility and political instability and the possibility of natural disaster or adverse public health developments in the region. Moreover, Chinese economies may differ favorably or unfavorably from the U.S. economy in important respects such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

- An investment in the notes linked to the iShares® China Large-Cap ETF is subject to foreign currency exchange rate risk. — The share price of the Underlying Asset will fluctuate based upon its net asset value, which will in turn depend in part upon changes in the value of the currencies in which the stocks held by the Underlying Asset are traded. Accordingly, investors in the notes will be exposed to currency exchange rate risk with respect to the currencies in which the stocks held by the Underlying Asset are traded. An investor's net exposure will depend on the extent to which these currencies strengthen or weaken against the U.S. dollar. If the dollar strengthens against these currencies, the net asset value of the Underlying Asset will be adversely affected and the price of the Underlying Asset may decrease.

Hypothetical Return on the Notes at Maturity

The following table and examples illustrate the hypothetical return at maturity on a \$1,000 investment in the notes. The “return,” as used in this section is the number, expressed as a percentage, which results from comparing the payment at maturity per \$1,000 in principal amount of the notes to \$1,000. The hypothetical total returns set forth below are based on a hypothetical Initial Level of \$100, a Buffer Percentage of 15% (the Buffer Level is 85% of the Initial Level), an Upside Leverage Factor of 200%, a hypothetical Cap of 15.50% (a percentage change in the Underlying Asset of 15.50% results in a maximum return on the notes of 31.00%), and a hypothetical Maximum Redemption Amount of \$1,310.00. The hypothetical returns set forth below are for illustrative purposes only and may not be the actual returns applicable to investors in the notes. The numbers appearing in the following table and in the examples below have been rounded for ease of analysis.

Hypothetical Final Level	Percentage Change	Return on the Notes
\$0.00	-100.00%	-85.00%
\$25.00	-75.00%	-60.00%
\$50.00	-50.00%	-35.00%
\$65.00	-35.00%	-20.00%
\$80.00	-20.00%	-5.00%
\$85.00	-15.00%	0.00%
\$95.00	-5.00%	0.00%
\$100.00	0.00%	0.00%
\$105.00	5.00%	10.00%
\$110.00	10.00%	20.00%
\$115.50	15.50%	31.00%
\$120.00	20.00%	31.00%
\$130.00	30.00%	31.00%
\$150.00	50.00%	31.00%
\$200.00	100.00%	31.00%

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the returns set forth in the table above are calculated.

Example 1: The price of the Underlying Asset decreases from the hypothetical Initial Level of \$100.00 to a hypothetical Final Level of \$80.00, representing a Percentage Change of -20%. Because the Percentage Change is negative and the hypothetical Final Level of \$80.00 is less than the Initial Level by more than the Buffer Percentage of 15%, the investor receives a payment at maturity of \$950.00 per \$1,000.00 in principal amount of the notes, calculated as follows:

$$\$1,000 + [\$1,000 \times (-20\% + 15\%)] = \$950.00$$

Example 2: The price of the Underlying Asset decreases from the hypothetical Initial Level of \$100.00 to a hypothetical Final Level of \$95.00, representing a Percentage Change of -5%. Although the Percentage Change is negative, because the hypothetical Final Level of \$95.00 is less than the Initial Level by not more than the Buffer Percentage of 15%, the investor receives a payment at maturity of \$1,000.00 per \$1,000.00 in principal amount of the notes.

Example 3: The price of the Underlying Asset increases from the hypothetical Initial Level of \$100.00 to a hypothetical Final Level of \$105.00, representing a Percentage Change of 5%. Because the hypothetical Final Level of \$105.00 is greater than the Initial Level and the Percentage Change of 5% does not exceed the Cap, the investor receives a payment at maturity of \$1,100.00 per \$1,000.00 in principal amount of the notes, calculated as follows:

$$\$1,000 + [\$1,000 \times (5\% \times 200\%)] = \$1,100.00$$

Example 4: The price of the Underlying Asset increases from the hypothetical Initial Level of \$100.00 to a hypothetical Final Level of \$120.00, representing a Percentage Change of 20%. Because the hypothetical Final Level of \$120.00 is greater than the Initial Level and the Percentage Change of 20% exceeds the Cap, the investor receives a payment at maturity of \$1,310.00 per \$1,000.00 in principal amount of the notes, the Maximum Redemption Amount.

U.S. Federal Tax Information

By purchasing the notes, each holder agrees (in the absence of a change in law, an administrative determination or a judicial ruling to the contrary) to treat each note as a pre-paid cash-settled derivative contract for U.S. federal income tax purposes. However, the U.S. federal income tax consequences of your investment in the notes are uncertain and the Internal Revenue Service could assert that the notes should be taxed in a manner that is different from that described in the preceding sentence. Please see the discussion (including the opinion of our counsel Morrison & Foerster LLP) in the product supplement under “Supplemental Tax Considerations—Supplemental U.S. Federal Income Tax Considerations,” which applies to the notes.

A “dividend equivalent” payment is treated as a dividend from sources within the U.S. and such payments generally would be subject to a 30% U.S. withholding tax if paid to a non-United States holder (as defined in the product supplement). Under recently proposed U.S. Treasury Department regulations, payments (including deemed payments) that are contingent upon or determined by reference to actual or estimated U.S. source dividends with respect to certain equity-linked instruments, whether explicitly stated or implicitly taken into account in computing one or more of the terms of such instruments, may be treated as dividend equivalents. If enacted in their current form, the regulations will impose a withholding tax on payments made on the notes on or after January 1, 2016 that are treated as dividend equivalents. In that case, we (or the applicable paying agent) would be entitled to withhold taxes without being required to pay any additional amounts with respect to amounts so withheld.

The Treasury Department has issued final regulations and a notice affecting the legislation enacted on March 18, 2010 and discussed in the product supplement under “Supplemental Tax Considerations—Supplemental U.S. Federal Income Tax Considerations—Legislation Affecting Taxation of Notes Held By or Through Foreign Entities.” Pursuant to the notice, withholding requirements with respect to the notes will generally begin no earlier than July 1, 2014. Additionally, the withholding tax will not be imposed on payments pursuant to obligations outstanding on July 1, 2014. Account holders subject to information reporting requirements pursuant to the legislation may include holders of the notes. Foreign financial institutions and non-financial foreign entities located in jurisdictions that have an intergovernmental agreement with the United States governing the legislation may be subject to different rules. Holders are urged to consult their own tax advisors regarding the implications of this legislation and subsequent guidance on their investment in the notes.

Supplemental Plan of Distribution (Conflicts of Interest)

BMOCM will purchase the notes from us at a purchase price reflecting the commission set forth on the cover page of this pricing supplement. BMOCM has informed us that, as part of its distribution of the notes, it will reoffer the notes to other dealers who will sell them. Each such dealer, or additional dealer engaged by a dealer to whom BMOCM reoffers the notes, will purchase the notes at an agreed discount to the initial price to public.

We own, directly or indirectly, all of the outstanding equity securities of BMOCM, the agent for this offering. In accordance with FINRA Rule 5121, BMOCM may not make sales in this offering to any of its discretionary accounts without the prior written approval of the customer.

We reserve the right to withdraw, cancel or modify the offering of the notes and to reject orders in whole or in part. You may cancel any order for the notes prior to its acceptance.

You should not construe the offering of the notes as a recommendation of the merits of acquiring an investment linked to the Underlying Asset or as to the suitability of an investment in the notes.

Regular record dates for interest. With respect to each interest payment date, the regular record date for interest on global securities in registered form will be the close of business on the Clearing System Business Day immediately prior to the date for payment, where the term "Clearing System Business Day" means Monday to Friday inclusive except December 25 and January 1. The regular record date for interest on debt securities that are represented by physical certificates will be the date that is 15 calendar days prior to such date, whether or not such date is a business day.

Payment of additional amounts. All payments on the debt securities will be made without deducting U.K. withholding taxes (except as required by law). If any deduction is required on payments to non-U.K. investors, we will pay additional amounts on those payments to the extent described under " Payment of Additional Amounts".

Optional tax redemption. We may redeem any or all of the debt securities before they mature if we are obligated to pay additional amounts due to changes on or after the date specified in the applicable prospectus supplement in U.K. withholding tax requirements, a merger or consolidation with another entity or a sale or lease of substantially all our assets and other limited circumstances described under " Payment of Additional Amounts". In that event, we may redeem any or all of the tranches of the debt securities in whole but not in part on any interest payment date, at a price equal to 100% of their principal amount plus accrued interest to the date fixed for redemption.

Optional make-whole redemption. If the debt securities are fixed rate debt securities, we may redeem the debt securities, in whole or in part, at any time and from time to time at a redemption price equal to the greater of (1) 100% of the principal amount of such notes plus accrued interest to the date of redemption and (2) as determined by the quotation agent, the sum of the present values of the remaining scheduled payments of principal and interest on such notes (excluding any portion of such payments of interest accrued as of the date of redemption) discounted to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the adjusted treasury rate, plus the applicable spread, together with accrued interest to the date of redemption.

Adjusted treasury rate. Adjusted treasury rate means, with respect to any redemption date, the rate per year equal to the semi-annual equivalent yield to maturity of the comparable treasury issue, assuming a price for the comparable treasury issue (expressed as a percentage of its principal amount) equal to the comparable treasury price for such redemption date. Comparable treasury issue means the U.S. Treasury security selected by the quotation agent as having a maturity comparable to the remaining term of such notes to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining terms of such notes. Comparable treasury price means, with respect to any redemption date, the average of the reference treasury dealer quotations for such redemption date. Quotation agent means the reference treasury dealer appointed by the trustee after consultation with us. Reference treasury dealer means any primary U.S. government securities dealer in New York City selected by the trustee after consultation with us. Reference treasury dealer quotations means with respect to each reference treasury

Table of Contents

dealer and any redemption date, the average, as determined by the trustee, of the bid and asked prices for the comparable treasury issue (expressed as a percentage of its principal amount) quoted in writing to the trustee by such reference treasury dealer at 5:00 p.m. Eastern Standard Time on the third business day preceding such redemption date.

Listing We may file an application to list the debt securities on the London Stock Exchange or the New York Stock Exchange, or on any other "recognized stock exchange".

Interest rates

We currently expect to issue floating rate debt securities that bear interest at rates based on one or more of the following base rates:

LIBOR;

EURIBOR; or

any other interest rates (which may include a combination of more than one of the interest rate bases described above) as may be described in the applicable prospectus supplement.

LIBOR. A LIBOR note is a floating rate debt security that will bear interest at a base rate equal to LIBOR, which will be the London interbank offered rate for deposits in U.S. dollars or any other index currency, as specified in the applicable prospectus supplement. In addition, the applicable LIBOR base rate will be adjusted by the spread or spread multiplier, if any, specified in the applicable prospectus supplement.

LIBOR will be determined in the following manner:

LIBOR will be the arithmetic mean of the offered rates appearing on the Reuters LIBOR page, unless that page by its terms cites only one rate, in which case that rate; in either case, as of 11:00 A.M., London time, on the relevant interest determination date, for deposits of the relevant index currency having the relevant index maturity beginning on the relevant interest reset date. The applicable prospectus supplement will indicate the index currency, the index maturity and the reference page that apply to the debt security.

If fewer than two of the rates described above appears on the Reuters LIBOR page or no rate appears on any page on which only one rate normally appears, then LIBOR will be determined on the basis of the rates, at approximately 11:00 A.M., London time, on the relevant interest determination date, at which deposits of the following kind are offered to prime banks in the London interbank market by four major banks in that market selected by the calculation agent: deposits of the index currency having the relevant index maturity, beginning on the relevant interest reset date and in a representative amount. The calculation agent will request the principal London office of each of these banks to provide a quotation of its rate. If at least two quotations are provided, LIBOR for the relevant interest determination date will be the arithmetic mean of the quotations.

If fewer than two quotations are provided as described in the preceding paragraph, LIBOR for the relevant interest determination date will be the arithmetic mean of the rates for loans of the following kind to leading European banks quoted, at approximately 11:00 A.M., London time, in the principal financial center for the country of the index currency, on that interest determination date, by three major banks in that financial center selected by the calculation agent: loans of the index currency having the relevant index maturity, beginning on the relevant interest reset date and in a representative amount.

If fewer than three banks selected by the calculation agent are quoting as described above, LIBOR for the new interest period will be LIBOR in effect for the prior interest period. If the initial base rate has been in effect for the prior interest period, however, it will remain in effect.

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

The reference banks and dealers employed by the calculation agent in determining the base rate may include the calculation agent itself and its affiliates.

Table of Contents

EURIBOR. A EURIBOR note is a floating rate debt security that will bear interest at a base rate equal to the interest rate for deposits in euros designated as "EURIBOR" and sponsored jointly by the European Banking Federation and ACI – the Financial Market Association, or any company established by the joint sponsors for purposes of compiling and publishing that rate. In addition, the EURIBOR base rate will be adjusted by the spread or spread multiplier, if any, specified in the applicable prospectus supplement.

EURIBOR will be determined in the following manner:

EURIBOR will be the offered rate for deposits in euros having the relevant index maturity beginning on the relevant interest reset date, as that rate appears on Reuters EURIBOR01 as of 11:00 A.M., Brussels time, on the relevant interest determination date.

If the rate described in the preceding paragraph does not appear on Reuters EURIBOR01, EURIBOR will be determined on the basis of the rates, at approximately 11:00 A.M., Brussels time, on the relevant interest determination date, at which deposits of the following kind are offered to prime banks in the euro-zone interbank market by the principal euro-zone offices of major banks in that market selected by the calculation agent: euro deposits having the relevant index maturity, beginning on the relevant interest reset date and in a representative amount calculated based on an Actual/360 (ISDA) basis. The calculation agent will request the principal euro-zone office of each of these banks to provide a quotation of its rate. If at least two quotations are provided, EURIBOR for the relevant interest determination date will be the arithmetic mean of the quotations.

If fewer than two quotations are provided as described above, EURIBOR for the relevant interest determination date will be the arithmetic mean of the rates for loans of the following kind to leading euro-zone banks quoted, at approximately 11:00 A.M., Brussels time, on that interest determination date, by major banks in the euro-zone selected by the calculation agent: loans of euros having the relevant index maturity, beginning on the relevant interest reset date and in a representative amount.

If fewer than three banks selected by the calculation agent are quoting as described above, EURIBOR for the new interest period will be EURIBOR in effect for the prior interest period. If the initial base rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Additional Mechanics

Form, Exchange and Transfer

The debt securities will be issued, unless otherwise indicated in the applicable prospectus supplement, in denominations that are even multiples of \$1,000.

You may have your debt securities broken into more debt securities of smaller denominations or combined into fewer debt securities of larger denominations, as long as the total principal amount is not changed. This is called an exchange. (*Section 305*)

In the case of registered debt securities, you may exchange or transfer your registered debt securities at the office of the trustee. The trustee acts as our agent for registering debt securities in the names of holders and transferring registered debt securities. We may change this appointment to another entity or perform the service ourselves. The entity performing the role of maintaining the list of registered holders is called the "security registrar". It will also register transfers of the registered debt securities. However, you may not exchange registered debt securities for bearer debt securities. (*Section 305*)

You will not be required to pay a service charge to exchange or transfer debt securities, but you may be required to pay any tax or other governmental charge associated with the exchange or transfer. The exchange or transfer of a registered debt security will only be made if the security registrar is satisfied with your proof of ownership.

Table of Contents

If we designate additional transfer agents, they will be named in the applicable prospectus supplement. We may cancel the designation of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts. (*Section 1002*)

If the debt securities are redeemable and we redeem less than all of the debt securities of a particular series, we may block the exchange or transfer of debt securities in order to freeze the list of holders to prepare the mailing during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing. We may also refuse to register exchanges or transfers of debt securities selected for redemption. However, we will continue to permit exchanges and transfers of the unredeemed portion of any debt security being partially redeemed. (*Section 305*)

For a discussion of transfers of book-entry securities issued in respect of global securities in bearer form, see "Description of the Securities Depositary Agreement Transfers" on page 32.

Payment and Paying Agents

If your debt securities are in registered form, we will pay interest to you if you are a direct holder listed in the trustee's records at the close of business on a particular day in advance of each due date for interest, even if you no longer own the security on the interest due date. That particular day, usually the Clearing System Business Day immediately prior to the interest due date, is called the "regular record date" and will be stated in the prospectus supplement. (*Section 307*)

We will pay interest, principal and any other money due on the registered debt securities at the corporate trust office of the trustee in New York City. That office is currently located at 101 Barclay Street, 7E, New York, NY 10286.

Interest on global securities will be paid to the holder thereof by wire transfer of same-day funds. For a discussion of payments with respect to book-entry securities issued in respect of global securities in bearer form, see "Description of the Securities Depositary Agreement Payments" on page 32.

Holders buying and selling debt securities must work out between them how to compensate for the fact that we will pay all the interest for an interest period to, in the case of registered debt securities, the one who is the registered holder on the regular record date or, in the case of bearer debt securities, to the bearer. The most common manner is to adjust the sales price of the debt securities to pro rate interest fairly between buyer and seller. This pro rated interest amount is called "accrued interest". The paying agent for a particular series will be set forth in the prospectus supplement establishing that series.

Street name and other indirect holders should consult their banks or brokers for information on how they will receive payments.

We may also arrange for additional payment offices, and may cancel or change these offices, including our use of the trustee's corporate trust office. These offices are called "paying agents". We may also choose to act as our own paying agent. We must notify you of changes in the paying agents for the debt securities of any series that you hold. (*Section 1002*)

Notices

We and the trustee will send notices only to direct holders, using their addresses as listed in the trustee's records. (*Sections 101 and 106*)

Regardless of who acts as paying agent, all money that we pay to a paying agent that remains unclaimed at the end of two years after the amount is due to direct holders will be repaid to us upon our request. After that two-year period, direct holders may look only to us for payment and not to the trustee, any other paying agent or anyone else. (*Section 1003*)

Table of Contents

Special Situations

Mergers and Similar Events

We are generally permitted to consolidate or merge with another entity. We are also permitted to sell or lease substantially all of our assets to another entity or to buy or lease substantially all of the assets of another entity. No vote by holders of debt securities approving any of these actions is required, unless as part of the transaction we make changes to the indenture requiring your approval, as described later under " Modification and Waiver". We may take these actions as part of a transaction involving outside third parties or as part of an internal corporate reorganization. We may take these actions even if they result in:

a lower credit rating being assigned to the debt securities; or

additional amounts becoming payable in respect of withholding tax, and the debt securities thus being subject to redemption at our option, as described later under " Optional Tax Redemption".

We have no obligation under the indenture to seek to avoid these results, or any other legal or financial effects that are disadvantageous to you, in connection with a merger, consolidation or sale or lease of assets that is permitted under the indenture. However, we may not take any of these actions unless all the following conditions are met:

If we merge out of existence or sell or lease our assets, the other entity must assume our obligations on the debt securities and under the indenture, including the obligation to pay the additional amounts described on page 19 under "Payment of Additional Amounts". This assumption may be by way of a full and unconditional guarantee in the case of a sale or lease of substantially all of our assets.

If such other entity is organized under the laws of a country other than the United States or England and Wales, it must indemnify you against any governmental charge or other cost resulting from the transaction.

We must not be in default on the debt securities immediately prior to such action and such action must not cause a default. For purposes of this no-default test, a default would include an event of default that has occurred and not been cured, as described later on page 29 under "Default and Related Matters Events of Default What Is an Event of Default?" A default for this purpose would also include any event that would be an event of default if the requirements for notice of default or existence of defaults for a specified period of time were disregarded.

If we sell or lease substantially all of our assets and the entity to which we sell or lease such assets guarantees our obligations, that entity must execute a supplement to the indenture, known as a supplemental indenture. In the supplemental indenture, the entity must promise to be bound by every obligation in the indenture. Furthermore, in this case, the trustee must receive an opinion of counsel stating that the entity's guarantees are valid, that certain registration requirements applicable to the guarantees have been fulfilled and that the supplemental indenture complies with the Trust Indenture Act of 1939. The entity that guarantees our obligations must also deliver certain certificates and other documents to the trustee.

We must deliver certain certificates and other documents to the trustee.

We must satisfy any other requirements specified in the prospectus supplement. (*Section 801*)

It is possible that the United States Internal Revenue Service may deem a merger or other similar transaction to cause for U.S. federal income tax purposes an exchange of debt securities for new securities by the holders of the debt securities. This could result in the recognition of taxable gain or loss for U.S. federal income tax purposes and possible other adverse tax consequences.

Modification and Waiver

There are three types of changes we can make to the indenture and the debt securities.

Table of Contents

Changes Requiring Approval of Each Holder. First, there are changes that cannot be made to the debt securities without the approval of each holder. These are the following types of changes:

change the stated maturity of the principal or interest on a debt security;

reduce any amounts due on a debt security;

change any obligation to pay the additional amounts described on page 19 under "Payment of Additional Amounts";

reduce the amount of principal payable upon acceleration of the maturity of a debt security following a default;

change the place or currency of payment on a debt security;

impair any of the conversion rights of the debt securities;

impair your right to sue for payment or conversion;

reduce the percentage of holders of debt securities whose consent is needed to modify or amend the indenture;

reduce the percentage of holders of debt securities whose consent is needed to waive compliance with various provisions of the indenture or to waive specified defaults; and

modify any other aspect of the provisions dealing with modification and waiver of the indenture. (*Section 902*).

Changes Requiring a Majority Vote. The second type of change to the indenture and the debt securities is the kind that requires a vote of approval by the holders of debt securities which together represent a majority of the outstanding principal amount of the particular series affected. Most changes fall into this category, except for clarifying changes, amendments, supplements and other changes that would not adversely affect holders of the debt securities in any material respect. For example, this vote would be required for us to obtain a waiver of all or part of any covenants described in an applicable prospectus supplement or a waiver of a past default. However, we cannot obtain a waiver of a payment default or any other aspect of the indenture or the debt securities listed in the first category described above under "Changes Requiring Approval of Each Holder" unless we obtain your individual consent to the waiver. (*Section 513*)

Changes Not Requiring Approval. The third type of change does not require any vote by holders of debt securities. This type is limited to clarifications, amendments, supplements and other changes that would not adversely affect holders of the debt securities in any material respect. (*Section 901*)

Further Details Concerning Voting. When taking a vote, we will use the following rules to decide how much principal amount to attribute to a security:

For original issue discount securities, we will use the principal amount that would be due and payable on the voting date if the maturity of the debt securities were accelerated to that date because of a default.

For debt securities whose principal amount is not known (for example, because it is based on an index), we will use a special

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

rule for that security described in the prospectus supplement for that security.

For debt securities denominated in one or more foreign currencies, currency units or composite currencies, we will use the U.S. dollar equivalent as of the date on which such debt securities were originally issued.

Debt securities will not be considered outstanding, and therefore will not be eligible to vote, if we have deposited or set aside in trust for you money for their payment or redemption. Debt securities will also not be eligible to vote if they have been fully defeased as described on page 28 under "Defeasance and Discharge". (*Section 101*)

We will generally be entitled to set any day as a record date for the purpose of determining the holders of outstanding debt securities that are entitled to vote or take other action under the indenture. In limited

Table of Contents

circumstances, the trustee will be entitled to set a record date for action by holders. If we or the trustee set a record date for a vote or other action to be taken by holders of a particular series, that vote or action may be taken only by persons who are holders of outstanding debt securities of that series on the record date and must be taken within 180 days following the record date or another period that we or, if it sets the record date, the trustee may specify. We may shorten or lengthen (but not beyond 180 days) this period from time to time. (*Section 104*)

Street name and other indirect holders should consult their banks or brokers for information on how approval may be granted or denied if we seek to change the indenture or the debt securities or request a waiver.

Redemption and Repayment

Unless otherwise indicated in your prospectus supplement, your debt security will not be entitled to the benefit of any sinking fund that is, we will not deposit money on a regular basis into any separate custodial account to repay your debt securities. In addition, we will not be entitled to redeem your debt security before its stated maturity unless your prospectus supplement specifies a redemption commencement date. You will not be entitled to require us to buy your debt security from you, before its stated maturity, unless your prospectus supplement specifies one or more repayment dates.

If your prospectus supplement specifies a redemption commencement date or a repayment date, it will also specify one or more redemption prices or repayment prices, which may be expressed as a percentage of the principal amount of your debt security or by reference to one or more formulae used to determine the redemption price(s). It may also specify one or more redemption periods during which the redemption prices relating to a redemption of debt securities during those periods will apply.

If your prospectus supplement specifies a redemption commencement date, we may redeem your debt security at our option at any time on or after that date. If we redeem your debt security, we will do so at the specified redemption price, together with interest accrued to the redemption date. If different prices are specified for different redemption periods, the price we pay will be the price that applies to the redemption period during which your debt security is redeemed.

If your prospectus supplement specifies a repayment date, your debt security will be repayable by us at your option on the specified repayment date(s) at the specified repayment price(s), together with interest accrued to the repayment date.

In the event that we exercise an option to redeem any debt security, we will give to the holder written notice of the principal amount of the debt security to be redeemed, not less than 30 days nor more than 60 days before the applicable redemption date. We will give the notice in the manner described above under "Additional Mechanics Notices".

If a debt security represented by a global security is subject to repayment at the holder's option, the depositary or its nominee, as the holder, will be the only person that can exercise the right to repayment. Any indirect holders who own beneficial interests in the global security and wish to exercise a repayment right must give proper and timely instructions to their banks or brokers through which they hold their interests, requesting that they notify the depositary to exercise the repayment right on their behalf. Different firms have different deadlines for accepting instructions from their customers, and you should take care to act promptly enough to ensure that your request is given effect by the depositary before the applicable deadline for exercise.

Street name and other indirect holders should consult their banks or brokers for information on how to exercise a repayment right in a timely manner.

In the event that the option of the holder to elect repayment as described above is deemed to be a "tender offer" within the meaning of Rule 14e-1 under the Exchange Act, we will comply with Rule 14e-1 as then in effect to the extent it is applicable to us and the transaction.

We or our affiliates may purchase debt securities from investors who are willing to sell from time to time, either in the open market at prevailing prices or in private transactions at negotiated prices. Debt securities that we or they purchase may, in our discretion, be held, resold or cancelled.

Table of Contents

Optional Tax Redemption

We may have the option to redeem, in whole but not in part, the debt securities in the three situations described below. In such cases, the redemption price for debt securities (other than original issue discount debt securities) will be equal to the principal amount of the debt securities being redeemed plus accrued interest and any additional amounts due on the date fixed for redemption. The redemption price for original issue discount debt securities will be specified in the prospectus supplement for such securities. Furthermore, we must give you between 30 and 60 days' notice before redeeming the debt securities.

The first situation is where, as a result of a change in or amendment to any laws or regulations, or as a result of any execution of or amendment to any treaty or treaties, or any change in the official application or interpretation of such laws, regulations or treaties, we would be required to pay additional amounts as described later under "Payment of Additional Amounts".

This applies only in the case of events described in the preceding paragraph that occur on or after the date specified in the applicable prospectus supplement and in the jurisdiction where we are incorporated. If succeeded by another entity, the applicable jurisdiction will be the jurisdiction in which such successor entity is organized, and the applicable date will be the date the entity became a successor.

We would not have the option to redeem in this case if we could have avoided the payment of additional amounts or the deduction or withholding by using reasonable measures available to us.

The second situation is where, as a result of any delivery or requirement to deliver debt securities in definitive registered form, after having used all reasonable efforts to avoid having to issue such definitive registered debt securities, we would be required to pay additional amounts as described later under "Payment of Additional Amounts".

We would not have the option to redeem in this case if we could have avoided the payment of additional amounts or the deduction or withholding by using reasonable measures available to us.

The third situation is where, following a merger, consolidation or sale or lease of our assets to a person that assumes or, if applicable, guarantees our obligations on the debt securities, that person is required to pay additional amounts as described later under "Payment of Additional Amounts".

We, or the other person, would have the option to redeem the debt securities in this situation even if additional amounts became payable immediately upon completion of the merger or sale transaction, including in connection with an internal corporate reorganization. Neither we nor that person have any obligation under the indenture to seek to avoid the obligation to pay additional amounts in this situation.

Conversion

Your debt securities may be convertible into or exchangeable for our ordinary shares or other securities if your prospectus supplement so provides. If your debt securities are convertible or exchangeable, your prospectus supplement will include provisions as to whether conversion or exchange is mandatory, at your option or at our option. Your prospectus supplement would also include provisions regarding the adjustment of the number of securities to be received by you upon conversion or exchange.

Payment of Additional Amounts

The government of any jurisdiction in which we are incorporated may require us to withhold amounts from payments on the principal or any premium or interest on a debt security for taxes or any other governmental charges. If the jurisdiction requires a withholding of this type, we may be required to pay you an additional amount so that the net amount you receive will be the amount specified in the debt security to which you are entitled. However, in order for you to be entitled to receive the additional amount, you must not be resident in the jurisdiction that requires the withholding.

Table of Contents

We will **not** have to pay additional amounts under any of the following circumstances:

The U.S. government or any political subdivision of the U.S. government is the entity that is imposing the tax or governmental charge.

The withholding is imposed only because the holder was or is connected to the taxing jurisdiction or, if the holder is not an individual, the tax or governmental charge was imposed because a fiduciary, settlor, beneficiary, member or shareholder of the holder or a party possessing a power over a holder that is an estate or trust was or is connected to the taxing jurisdiction. These connections include those where the holder or related party:

is or has been a citizen or resident of the jurisdiction;

is or has been engaged in trade or business in the jurisdiction; or

has or had a permanent establishment in the jurisdiction.

The withholding is imposed due to the presentation of a debt security, if presentation is required, for payment on a date more than 30 days after the security became due or after the payment was provided for.

The withholding is imposed due to the presentation of a debt security for payment in the United Kingdom.

The withholding is on account of an estate, inheritance, gift, sale, transfer, personal property or similar tax or other governmental charge.

The withholding is for a tax or governmental charge that is payable in a manner that does not involve withholding.

The withholding is imposed or withheld because the holder or beneficial owner failed to comply with any of our requests for the following that the statutes, treaties, regulations or administrative practices of the taxing jurisdiction require as a precondition to exemption from all or part of such withholding:

to provide information about the nationality, residence or identity of the holder or beneficial owner; or

to make a declaration or satisfy any information requirements.

The holder is a fiduciary or partnership or other entity that is not the sole beneficial owner of the payment in respect of which the withholding is imposed, and the laws of the taxing jurisdiction require the payment to be included in the income of a beneficiary or settlor of such fiduciary or a member of such partnership or another beneficial owner who would not have been entitled to such additional amounts had it been the holder of such debt security.

With respect to debt securities originally issued in bearer form, the payment relates to a debt security that is in physical form. However, this exception only applies if:

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

the debt security in physical form was issued at the holder's request following an event of default; and

we have not issued physical certificates for the entire principal amount of such series of debt securities.

The withholding or deduction is imposed pursuant to European Council Directive 2003/48/EC on the taxation of savings income or any law implementing or complying with, or introduced in order to conform to, such Directive.

The withholding or deduction is imposed on a holder or beneficial owner who could have avoided such withholding or deduction by presenting its debt securities to another paying agent.

These provisions will also apply to any taxes or governmental charges imposed by any jurisdiction in which a successor to us is organized. The prospectus supplement relating to the debt securities may describe additional circumstances in which we would not be required to pay additional amounts. (*Sections 205, 802 and 1004*)

In certain circumstances, payments made to holders of debt securities may be subject to withholding or deduction for or on account of U.K. tax. These circumstances might include, for example, if payments are made on

Table of Contents

debt securities issued by us that are not listed on a "recognized stock exchange" for U.K. tax purposes at the time of payment. For more information see the section entitled "Taxation United Kingdom Taxation Debt Securities Interest Payments" on page 50.

Restrictive Covenants

The indenture does not contain any covenants restricting our ability to make payments, incur indebtedness, dispose of assets, enter into sale and leaseback transactions, issue and sell capital stock, enter into transactions with affiliates, create or incur liens on our property or engage in business other than our present business. A particular series of debt securities, however, may contain restrictive covenants of this type, which we will describe in the applicable prospectus supplement.

Defeasance and Discharge

The following discussion of full defeasance and discharge and covenant defeasance and discharge will only be applicable to your series of debt securities if we choose to apply them to that series, in which case we will state that in the prospectus supplement. (*Sections 301 and 1401-1406*)

Full Defeasance

Except for various obligations described below, we can legally release ourselves from any payment or other obligations on the debt securities (called "full defeasance") if we, in addition to other actions, put in place the following arrangements for you to be repaid:

We must deposit in trust for your benefit and the benefit of all other direct holders of the debt securities a combination of money and U.S. government or U.S. government agency notes or bonds that, in the opinion of a nationally recognized public accounting firm, will generate enough cash to make interest, principal and any other payments on the debt securities on their various due dates.

We must deliver to the trustee a legal opinion of our counsel, based upon a ruling by the United States Internal Revenue Service or upon a change in applicable U.S. federal income tax law, confirming that under then current U.S. federal income tax law we may make the above deposit without causing you to be taxed on the debt securities any differently than if we did not make the deposit and just repaid the debt securities ourselves.

If the debt securities are listed on any securities exchange, we must deliver to the trustee a legal opinion of our counsel confirming that the deposit, defeasance and discharge will not cause the debt securities to be delisted. (*Sections 1402 and 1404*)

If we ever did accomplish full defeasance as described above, you would have to rely solely on the trust deposit for repayment on the debt securities. You could not look to us for repayment in the unlikely event of any shortfall. Conversely, the trust deposit would most likely be protected from claims of our lenders and other creditors if we ever become bankrupt or insolvent. However, even if we take these actions, a number of our obligations relating to the debt securities and under the indenture will remain. These include the following obligations:

to register the exchange and transfer of debt securities;

to replace mutilated, destroyed, lost or stolen debt securities;

to maintain paying agencies; and

to hold money for payment in trust.

Covenant Defeasance

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

We can make the same type of deposit described above and be released from all or some of the restrictive covenants (if any) that apply to the debt securities of any particular series. This is called "covenant defeasance". In

Table of Contents

that event, you would lose the protection of those restrictive covenants but would gain the protection of having money and securities set aside in trust to repay the debt securities. In order to achieve covenant defeasance:

We must deposit in trust for your benefit and the benefit of all other direct holders of the debt securities a combination of money and U.S. government or U.S. government agency notes or bonds that, in the opinion of a nationally recognized public accounting firm, will generate enough cash to make interest, principal and any other payments on the debt securities on their various due dates.

We must deliver to the trustee a legal opinion of our counsel confirming that under then current U.S. federal income tax law we may make the above deposit without causing you to be taxed on the debt securities any differently than if we did not make the deposit and just repaid the debt securities ourselves.

If we accomplish covenant defeasance, the following provisions of the indenture and/or the debt securities would no longer apply:

Any covenants applicable to the series of debt securities and described in the applicable prospectus supplement.

The events of default relating to breach of covenants and acceleration of the maturity of other debt, described later under "Default and Related Matters Events of Default What Is An Event of Default?".

If we accomplish covenant defeasance, you can still look to us for repayment of the debt securities if there were a shortfall in the trust deposit. In fact, if any event of default occurred (such as our bankruptcy) and the debt securities become immediately due and payable, there may be such a shortfall. Depending on the event causing the default, you may not be able to obtain payment of the shortfall. (*Sections 1403 and 1404*)

Default and Related Matters

Ranking

The debt securities are not secured by any of our property or assets. Accordingly, your ownership of debt securities means you are one of our unsecured creditors. The debt securities may or may not be subordinated to any of our other debt obligations as indicated in the applicable prospectus supplement. If they are not subordinated, they will rank equally with all our other unsecured and unsubordinated indebtedness.

Events of Default

You will have special rights if an event of default occurs and is not cured, as described later in this subsection.

What Is an Event of Default? The term event of default means any of the following:

We do not pay the principal or any premium on a debt security within 14 days of its due date.

We do not pay interest on a debt security within 21 days of its due date.

We do not deposit any sinking fund payment within 14 days of its due date, if we agreed to maintain a sinking fund for your debt securities and the other debt securities of the same series.

We remain in breach of any covenant or any other term of the indenture for 30 days after we receive a notice of default stating that we are in breach. The notice must be sent by either the trustee or holders of 25% of the principal amount of debt

securities of the affected series.

We remain in default in the conversion of any convertible security of a given series for 30 days after we receive a notice of default stating that we are in default. The notice must be sent by either the trustee or the holders of 25% of the principal amount of debt securities of the affected series.

Table of Contents

If the total aggregate principal amount of all of our indebtedness for borrowed money, which meets one of the following conditions, together with the amount of any guarantees and indemnities described in the next point, equals or exceeds £50 million or, after August 1, 2014, £150 million:

the principal amount of such indebtedness becomes due and payable prematurely as a result of an event of default (however described) under the agreement(s) governing that indebtedness;

we fail to make any payment in respect of such indebtedness on the date when it is due (as extended by any originally applicable grace period); or

any security that we have granted securing the payment of any such indebtedness becomes enforceable by reason of any default relating thereto and steps are taken to enforce the security.

We fail to make payment due under any guarantee and/or indemnity (after the expiry of any originally applicable grace period) of another person's indebtedness for borrowed money in an amount that, when added to the indebtedness for borrowed money which meets one of the conditions described in the prior point, equals or exceeds £50 million or, after August 1, 2014, £150 million.

We are ordered by a court or pass a resolution to wind up or dissolve, save for the purposes of a reorganization on terms approved in writing by the trustee.

We stop paying or are unable to pay our debts as they fall due, or we are adjudicated or found bankrupt or insolvent, or we enter into any composition or other similar arrangement with our creditors under the U.K. Insolvency Act.

If a receiver or administrator is appointed in relation to, or a distress, execution, attachment, sequestration or other process is levied, enforced upon, sued out or put in force against, the whole or a substantial part of our undertakings or assets and (other than the appointment of an administrator) is not discharged or removed within 90 days.

Any other event of default described in the applicable prospectus supplement occurs. (*Section 501*)

An event of default for a particular series of debt securities does not necessarily constitute an event of default for any other series of debt securities issued under the indenture.

For these purposes, "indebtedness for borrowed money" means any present or future indebtedness (whether it is principal, premium, interest or other amounts) for or in respect of:

money borrowed (including in the form of any bonds, notes, debentures, debenture stock or loan stock); or

liabilities under or in respect of any acceptance or acceptance credit.

Remedies If an Event of Default Occurs. If an event of default has occurred and has not been cured, the trustee or the holders of 25% in principal amount of the debt securities of the affected series may declare the entire principal amount of all the debt securities of that series to be due and immediately payable. This is called a declaration of acceleration of maturity. If an event of default occurs because of certain events in bankruptcy, insolvency or reorganization, the principal amount of all the debt securities of that series will be automatically accelerated without any action by the trustee, any holder or any other person. A declaration of acceleration of maturity may be canceled by the holders of at least a majority in principal amount of the debt securities of the affected series. (*Section 502*)

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

The holders of a majority in principal amount of the outstanding debt securities of any series will have the right to direct the time, method, and place of conducting any proceeding for any remedy available to the trustee, or exercising any trust or power conferred on the trustee, with respect to the securities of such series, provided that (a) such direction must not be in conflict with any rule of law or with the indenture, (b) the trustee may take any other action deemed proper by the trustee which is not inconsistent with such direction, and (c) such holders shall have offered to the trustee security or indemnity satisfactory to the trustee against the costs, expenses, and liabilities which might be incurred by it in compliance with such request or direction. (*Sections 512 and 603*) Before you bypass

Table of Contents

the trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to the debt securities, the following must occur:

You must give the trustee written notice that an event of default has occurred and remains uncured.

The holders of 25% in principal amount of all outstanding debt securities of the relevant series must make a written request that the trustee take action because of the default, and must offer satisfactory indemnity to the trustee against the cost and other liabilities of taking that action.

The trustee must have not taken action for 60 days after receipt of the above notice and offer of indemnity.

The holders of a majority in principal amount of all outstanding debt securities of the relevant series must not have given the trustee a direction that is inconsistent with the above notice. (*Section 507*)

However, you are entitled at any time to bring a lawsuit for the payment of money due on your debt security on or after its due date. (*Section 508*)

Street name and other indirect holders should consult their banks or brokers for information on how to give notice or direction to or make a request of the trustee and to make or cancel a declaration of acceleration.

We will furnish to the trustee every year a written statement of certain of our officers that will either certify that, to their knowledge, we are in compliance with the indenture and the debt securities or specify any default. (*Section 1005*)

Regarding the Trustee

We and some of our subsidiaries maintain banking relations with the trustee in the ordinary course of our business.

If an event of default occurs, or an event occurs that would be an event of default if the requirements for giving us notice of the default or our default having to exist for a specified period of time were disregarded, the trustee may be considered to have a conflicting interest with respect to the debt securities or the indenture for purposes of the Trust Indenture Act of 1939. In that case, the trustee may be required to resign as trustee under the applicable indenture and we would be required to appoint a successor trustee.

Description of the Securities Depositary Agreement

If we issue debt securities represented by a global security in bearer form, we will deposit such security with The Bank of New York Mellon, as depositary. The provisions described below will be applicable to such debt securities.

The arrangements for depositing and holding of the global securities in bearer form by The Bank of New York Mellon are set forth in a document called the securities depositary agreement between us and The Bank of New York Mellon, and the owners of book-entry securities. This section summarizes that agreement, a copy of which is filed as an exhibit to our registration statement. Because this section is a summary, it does not describe every aspect of the agreement. The description here is subject to and qualified by the detailed terms in the definitive securities depositary agreement that we have entered into with the depositary and the owners of book-entry securities.

General

The global security in bearer form representing the debt securities will be deposited with, and held by, The Bank of New York Mellon, as the depositary for DTC. The Bank of New York Mellon will maintain on our behalf a book-entry register for the applicable debt securities. It will register DTC or any person DTC nominates as the owner of the certificateless depositary interests it will issue in respect of the global securities. For a detailed description of DTC, see "Clearance and Settlement" on page 46.

Table of Contents

Ownership of beneficial interests in the certificateless depositary interest will be in the form of book-entry securities. Ownership of book-entry securities will be limited to participants or indirect participants in DTC. Procedures related to the transfer of ownership of book-entry securities are described below under "Transfers".

The ultimate beneficial owners of the global security in bearer form can only be indirect holders. We do not recognize this type of investor as a holder of debt securities and instead only deal with the depositary that holds the global security. As an indirect holder, an investor's rights and obligations relating to a global security will be governed by applicable procedures of DTC and the account rules of The Bank of New York Mellon and the investor's financial institution. We, the trustee, any paying agent, The Bank of New York Mellon, as depositary and registrar, and any of our or their agents will not be responsible for the obligations under the rules and procedures of DTC, its participants or an investor's financial institution.

DTC's policies will govern payments, exchanges, transfers and other matters relating to the investor's interest in the global security. In general, we and the trustee have no responsibility for DTC's actions and do not supervise DTC in any way.

We have no responsibility for any aspect of the actions of any participant in DTC or for payments related to, or for its records of, ownership interests in the global security. We also do not supervise the participants in DTC in any way, nor will we govern payments, exchanges, transfers and other matters relating to the investor's interest in the global security.

Payments

Payments related to the applicable debt securities will be made to The Bank of New York Mellon. The Bank of New York Mellon then must distribute all payments to DTC by wire transfer of immediately available funds. Upon receipt, DTC has informed us that it will credit its participants' accounts on that date with payments in amounts proportionate to their respective ownership interests as shown on DTC's records. Payments by participants in DTC to the owners of book-entry securities will be the participants' responsibility. We expect that payments by participants in DTC to the owners of interests in book-entry securities will be governed by standard customary practices, as is now the case with the securities held for the accounts of customers registered in street name.

All payments will be made by The Bank of New York Mellon without any deduction or withholding for any taxes, duties, assessments or other governmental charges. If the laws or regulations from the country in which we are incorporated require withholding, then we will add to the payment so it is the same as it would have been without the withholding. These added payments are subject to various exceptions and limitations that are described in the section called "Payment of Additional Amounts". They are also subject to the optional redemption rights that are described in "Special Situations Optional Tax Redemption".

Redemption

If and when the global securities are redeemed, The Bank of New York Mellon will deliver all amounts it receives in respect of the redemption to DTC. The redemption price that will be paid for the book-entry securities will be equal to the amount paid to The Bank of New York Mellon for the applicable global securities.

Transfers

Transfers of all or any portion of the certificateless depositary interests may be made only through the book-entry register. Until the book-entry securities are exchanged for definitive securities, the certificateless depositary interests may only be transferred as a whole by:

DTC to a nominee of DTC;

by a nominee of DTC to DTC or another nominee of DTC; or

by DTC or any such nominee to a successor of DTC or a nominee of such successor.

Table of Contents

DTC will record all transfers of the interests in book-entry securities using its book-entry system. DTC will use the customary procedures described in detail in the securities depositary agreement.

Procedures for Issuing Definitive Securities

Holders of book-entry securities will receive definitive securities in the situations described earlier under "Legal Ownership Global Securities Special Situations in Which a Global Security Will Be Terminated". No definitive securities in bearer form will be issued. Definitive securities issued in exchange for book-entry securities will be issued in registered form only, without coupons. They will be registered in the name or names that The Bank of New York Mellon instructs the registrar based on the instructions of DTC.

Action by Holders of Book-Entry Securities

The Bank of New York Mellon must send any notices it receives concerning consents, requests for a waiver or any other action to DTC, as promptly as practicable after receipt. If DTC requests in writing that The Bank of New York Mellon take action, it is expected that The Bank of New York Mellon will take the action when it receives reasonable indemnity from DTC.

The Bank of New York Mellon will not make any independent decisions relating to the certificateless depositary interests or the global securities.

We understand that under existing industry practices, if we request any action to be taken by the holders of debt securities or if a holder of debt securities desires to give or take any action the holder is entitled to give or take under the debt securities or the indenture, DTC will authorize its participants holding book-entry securities to give or take the action and the participants will then authorize the beneficial owners to take the action or will act upon those owners' instructions.

Reports

The Bank of New York Mellon must send a copy of any communications that relate to us to DTC immediately after it receives them. This is also true for any communications that relate to the global and the book-entry securities.

Action by the Holders of the Global Securities

If a default occurs and the holders of the global securities request The Bank of New York Mellon to take action, it is expected that The Bank of New York Mellon will take the action when it receives reasonable indemnity from the holders of the global securities. Action taken in the event of a default is subject to limitations which are described in detail in the securities depositary agreement.

Charges Incurred by the Depositary Will Be Paid by Us

We have agreed to pay all charges of The Bank of New York Mellon under the securities depositary agreement. We have also agreed to indemnify The Bank of New York Mellon against certain liabilities it incurs under the securities depositary agreement.

Amendment and Termination

We and The Bank of New York Mellon may amend the securities depositary agreement. DTC's consent will not be required in connection with the following amendments:

to cure any inconsistency, omission, defect or ambiguity in the securities depositary agreement;

to add to the covenants and agreements of The Bank of New York Mellon or us;

to assign The Bank of New York Mellon's rights and duties to a qualified successor;

Table of Contents

to evidence the succession of another person to us and the assumption by the successor of our covenants, where the parties are amending the indenture in a similar way;

to comply with the Securities Act of 1933 (the "Securities Act"), the Exchange Act, the Investment Company Act of 1940 or the Trust Indenture Act of 1939; or

to modify, alter, amend or supplement the securities depositary agreement in any other manner that is not adverse to DTC or the holders of book-entry securities.

No amendment to the securities depositary agreement or the book-entry securities that affects DTC or the holders of book-entry securities in an adverse way will be allowed without DTC's consent.

When definitive securities are issued to all of the holders of book-entry securities, the book-entry provisions of the securities depositary agreement will no longer apply. Definitive securities may be issued upon the resignation of the depositary if no successor has been appointed within 120 days.

Resignation or Removal of the Depositary

The Bank of New York Mellon may resign at any time by delivering written notice to us, and the resignation will take effect when we appoint a new depositary and the new depositary accepts the appointment. If no successor has been appointed at the end of 120 days after The Bank of New York Mellon gives notice, it may petition a court of competent jurisdiction for the appointment of a successor.

Obligations of the Depositary

The Bank of New York Mellon must perform only the duties and obligations set forth in the definitive securities depositary agreement. You should not read any implied covenants or obligations into the definitive securities depositary agreement.

Table of Contents

DESCRIPTION OF WARRANTS WE MAY OFFER

We may issue warrants to purchase our debt securities, preference shares or ordinary shares. Warrants may be issued independently or together with any securities and may be attached to or separate from those securities. Each series of warrants will be issued under a separate warrant agreement to be entered into by us and a bank or trust company, as warrant agent, all as will be set forth in the applicable prospectus supplement.

Debt Warrants

The following briefly summarizes the material terms that will generally be included in a debt warrant agreement. However, we may include different terms in the debt warrant agreement for any particular series of debt warrants and such other terms and all pricing and related terms will be disclosed in the applicable prospectus supplement. You should read the particular terms of any debt warrants that are offered by us and the related debt warrant agreement which will be described in more detail in the applicable prospectus supplement. The prospectus supplement will also state whether any of the generalized provisions summarized below do not apply to the debt warrants being offered.

General

We may issue warrants for the purchase of our debt securities. As explained below, each debt warrant will entitle its holder to purchase debt securities at an exercise price set forth in, or to be determined as set forth in, the applicable prospectus supplement. Debt warrants may be issued separately or together with debt securities.

The debt warrants are to be issued under debt warrant agreements to be entered into by us and one or more banks or trust companies, as debt warrant agent, all as will be set forth in the applicable prospectus supplement. At or around the time of an offering of debt warrants, a form of debt warrant agreement, including a form of debt warrant certificate representing the debt warrants, reflecting the alternative provisions that may be included in the debt warrant agreements to be entered into with respect to particular offerings of debt warrants, will be filed by amendment as an exhibit to the registration statement of which this prospectus forms a part.

Terms of the Debt Warrants to Be Described in the Prospectus Supplement

The particular terms of each issue of debt warrants, the debt warrant agreement relating to such debt warrants and such debt warrant certificates representing debt warrants will be described in the applicable prospectus supplement. This description will include:

the initial offering price;

the currency, currency unit or composite currency in which the exercise price for the debt warrants is payable;

the title, aggregate principal amount and terms of the debt securities that can be purchased upon exercise of the debt warrants;

the title, aggregate principal amount and terms of any related debt securities with which the debt warrants are issued and the number of the debt warrants issued with each debt security;

if applicable, whether and when the debt warrants and the related debt securities will be separately transferable;

the principal amount of debt securities that can be purchased upon exercise of each debt warrant and the exercise price;

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

the date on or after which the debt warrants may be exercised and any date or dates on which this right will expire in whole or in part;

if applicable, a discussion of material U.K. and U.S. federal income tax, accounting or other considerations applicable to the debt warrants;

Table of Contents

whether the debt warrants will be issued in registered or bearer form, and, if registered, where they may be transferred and registered; and

any other terms of the debt warrants.

You may exchange your debt warrant certificates for new debt warrant certificates of different denominations but they must be exercisable for the same aggregate principal amount of debt securities. If your debt warrant certificates are in registered form, you may present them for registration of transfer at the corporate trust office of the debt warrant agent or any other office indicated in the applicable prospectus supplement. Before the exercise of debt warrants, holders of debt warrants will not be entitled to receive payments of principal or any premium or interest on the debt securities that can be purchased upon such exercise, or to enforce any of the covenants in the indenture relating to the debt securities that may be purchased upon such exercise.

Exercise of Debt Warrants

Unless otherwise provided in the applicable prospectus supplement, each debt warrant will entitle the holder to purchase a principal amount of debt securities for cash at an exercise price in each case that will be set forth in, or to be determined as set forth in, the applicable prospectus supplement. Debt warrants may be exercised at any time up to the close of business on the expiration date specified in the applicable prospectus supplement. After the close of business on the expiration date or any later date to which we extend the expiration date, unexercised debt warrants will become void.

Debt warrants may be exercised as set forth in the prospectus supplement applicable to the particular debt warrants. Upon delivery of payment of the exercise price and the debt warrant certificate properly completed and duly executed at the corporate trust office of the debt warrant agent or any other office indicated in the applicable prospectus supplement, we will, as soon as practicable, forward the debt securities that can be purchased upon such exercise of the debt warrants to the person entitled to them. If fewer than all of the debt warrants represented by the debt warrant certificate are exercised, a new debt warrant certificate will be issued for the remaining unexercised debt warrants. Holders of debt warrants will be required to pay any tax or governmental charge that may be imposed in connection with transferring the underlying debt securities in connection with the exercise of the debt warrants.

Street name and other indirect holders of debt warrants should consult their bank or brokers for information on how to exercise their debt warrants.

Modification and Waiver

There are three types of changes we can make to the debt warrant agreement and the debt warrants of any series.

Changes Requiring Approval of Each Holder. First, there are changes that cannot be made to the debt warrants or the debt warrant agreement under which they were issued without the approval of each holder. These are the following types of changes:

any increase in the exercise price;

any decrease in the principal amount of debt securities that can be purchased upon exercise of any debt warrant;

any reduction of the period of time during which the debt warrants may be exercised;

any other change that materially and adversely affects the exercise rights of a holder of debt warrant certificates or the debt securities that can be purchased upon such exercise; and

any reduction in the number of outstanding unexercised debt warrants whose consent is required for any modification or amendment described below under "Changes Requiring a Majority Vote".

Changes Requiring a Majority Vote. The second type of change to the debt warrant agreement or debt warrants of any series is the kind that requires a vote of approval by the holders of not less than a majority in number of the

Table of Contents

then outstanding unexercised debt warrants of that series. This category includes all changes other than those listed above under " Changes Requiring Approval of Each Holder" or changes that would not adversely affect holders of debt warrants or debt securities in any material respect.

Changes Not Requiring Approval. The third type of change does not require any vote or consent by the holders of debt warrant certificates. This type is limited to clarifications and other changes that would not adversely affect such holders in any material respect.

Street name and other indirect holders of debt warrants should consult their bank or brokers for information on how approval may be granted or denied if we seek to change your debt warrants or the debt warrant agreement under which they were issued or to request a waiver.

Merger, Consolidation, Sale or Other Dispositions

Under the debt warrant agreement for each series of debt warrants, we may consolidate with, or sell, convey or lease all or substantially all of our assets to, or merge with or into, any other corporation or firm to the extent permitted by the indenture for the debt securities that can be purchased upon exercise of such debt warrants. If we consolidate with or merge into, or sell, lease or otherwise dispose of all or substantially all of our assets to, another corporation or firm, that corporation or firm must become legally responsible for our obligations under the debt warrant agreements and debt warrants. If we sell or lease substantially all of our assets, one way the other firm or company can become legally responsible for our obligations is by way of a full and unconditional guarantee of our obligations. If the other company becomes legally responsible by a means other than a guarantee, we will be relieved from all such obligations.

Enforceability of Rights; Governing Law

The debt warrant agent will act solely as our agent in connection with the issuance and exercise of debt warrants and will not assume any obligation or relationship of agency or trust for or with any holder of a debt warrant certificate or any owner of a beneficial interest in debt warrants. The holders of debt warrant certificates, without the consent of the debt warrant agent, the trustee, the holder of any debt securities issued upon exercise of debt warrants or the holder of any other debt warrant certificates, may, on their own behalf and for their own benefit, enforce, and may institute and maintain any suit, action or proceeding against us to enforce, or otherwise in respect of, their rights to exercise debt warrants evidenced by their debt warrant certificates. Except as may otherwise be provided in the applicable prospectus supplement, each issue of debt warrants and the related debt warrant agreement will be governed by the laws of the State of New York.

Equity Warrants

The following briefly summarizes the material terms that will generally be included in an equity warrant agreement. However, we may include different terms in the equity warrant agreement for any particular series of equity warrants and such other terms and all pricing and related terms will be disclosed in the applicable prospectus supplement. You should read the particular terms of any equity warrants that are offered by us and the related equity warrant agreement which will be described in more detail in the applicable prospectus supplement. The prospectus supplement will also state whether any of the general provisions summarized below do not apply to the equity warrants being offered.

General

We may issue warrants for the purchase of our equity securities (i.e., our ordinary shares and preference shares). As explained below, each equity warrant will entitle its holder to purchase equity securities at an exercise price set forth in, or to be determined as set forth in, the applicable prospectus supplement. Equity warrants may be issued separately or together with equity securities.

The equity warrants are to be issued under equity warrant agreements to be entered into by us and one or more banks or trust companies, as equity warrant agent, all as will be set forth in the applicable prospectus

Table of Contents

supplement. At or around the time of an offering of equity warrants, a form of equity warrant agreement, including a form of equity warrant certificate representing the equity warrants, reflecting the alternative provisions that may be included in the equity warrant agreements to be entered into with respect to particular offerings of equity warrants, will be filed by amendment as an exhibit to the registration statement of which this prospectus forms a part.

Terms of the Equity Warrants to Be Described in the Prospectus Supplement

The particular terms of each issue of equity warrants, the equity warrant agreement relating to such equity warrants and the equity warrant certificates representing such equity warrants will be described in the applicable prospectus supplement. This description will include:

the initial offering price;

the currency, currency unit or composite currency in which the exercise price for the equity warrants is payable;

the designation and terms of the equity securities (i.e., preference shares or ordinary shares) that can be purchased upon exercise of the equity warrants;

the total number of preference shares or ordinary shares that can be purchased upon exercise of each equity warrant and the exercise price;

the date or dates on or after which the equity warrants may be exercised and any date or dates on which this right will expire in whole or in part;

the designation and terms of any related preference shares or ordinary shares with which the equity warrants are issued and the number of the equity warrants issued with each preference share or ordinary share;

if applicable, whether and when the equity warrants and the related preference shares or ordinary shares will be separately transferable;

if applicable, a discussion of material U.K. and U.S. federal income tax, accounting or other considerations applicable to the equity warrants; and

any other terms of the equity warrants, including terms, procedures and limitations relating to the exchange and exercise of the equity warrants.

You may exchange your equity warrant certificates for new equity warrant certificates of different denominations but they must be exercisable for the same aggregate principal amount of equity securities. If your equity warrant certificates are in registered form, you may present them for registration of transfer and exercise them at the corporate trust office of the equity warrant agent or any other office indicated in the applicable prospectus supplement. Before the exercise of equity warrants, holders of equity warrants will not be entitled to receive dividends or exercise voting rights with respect to the equity securities that can be purchased upon such exercise, to receive notice as shareholders with respect to any meeting of shareholders for the election of our directors or any other matter, or to exercise any rights whatsoever as a shareholder.

Unless the applicable prospectus supplement states otherwise, the exercise price payable and the number of ordinary shares or preference shares that can be purchased upon the exercise of each equity warrant will be subject to adjustment in certain events, including the issuance of a stock dividend to holders of ordinary shares or preference shares or a stock split, reverse stock split, combination, subdivision or reclassification of ordinary shares or preference shares. Instead of adjusting the number of ordinary shares or preference shares that can be purchased upon exercise of each equity warrant, we may elect to adjust the number of equity warrants. No adjustments in the number of shares that can be purchased upon exercise of the equity warrants will be required until cumulative adjustments require an adjustment of at least 1% of those

shares. We may, at our option, reduce the exercise price at any time. We will not issue fractional shares upon exercise of equity warrants, but we will pay the cash value of any fractional shares otherwise issuable.

Table of Contents

Notwithstanding the previous paragraph, if there is a consolidation, merger or sale or conveyance of substantially all of our property, the holder of each outstanding equity warrant will have the right to the kind and amount of shares and other securities and property (including cash) receivable by a holder of the number of ordinary shares or preference shares into which that equity warrant was exercisable immediately prior to the consolidation, merger, sale or conveyance.

Exercise of Equity Warrants

Unless otherwise provided in the applicable prospectus supplement, each equity warrant will entitle the holder to purchase a number of equity securities for cash at an exercise price in each case that will be set forth in, or to be determined as set forth in, the prospectus supplement. Equity warrants may be exercised at any time up to the close of business on the expiration date specified in the applicable prospectus supplement. After the close of business on the expiration date or any later date to which we extend the expiration date, unexercised equity warrants will become void. Equity warrants for the purchase of preference shares or ordinary shares may be issued in the form of American Depositary Receipts.

Equity warrants may be exercised as set forth in the prospectus supplement applicable to the particular equity warrants. Upon delivery of payment of the exercise price and the equity warrant certificate properly completed and duly executed at the corporate trust office of the equity warrant agent or any other office indicated in the applicable prospectus supplement, we will, as soon as practicable, forward the equity securities that can be purchased upon such exercise of the equity warrants to the person entitled to them. If fewer than all of the equity warrants represented by the equity warrant certificate are exercised, a new equity warrant certificate will be issued for the remaining equity warrants. Holders of equity warrants will be required to pay any tax or governmental charge that may be imposed in connection with transferring the underlying equity securities in connection with the exercise of the equity warrants.

Street name and other indirect holders of equity warrants should consult their bank or brokers for information on how to exercise their equity warrants.

Modification and Waiver

There are three types of changes we can make to the equity warrant agreement and the equity warrants of any series.

Changes Requiring Approval of Each Holder. First, there are changes that cannot be made to the equity warrants or the equity warrant agreement under which they were issued without the approval of each holder. These are the following types of changes:

any increase in the exercise price;

any decrease in the total number of preference shares or ordinary shares that can be purchased upon exercise of any equity warrant;

any reduction of the period of time during which the equity warrants may be exercised;

any other change that materially and adversely affects the exercise rights of a holder of equity warrant certificates or the equity securities that can be purchased upon such exercise; and

any reduction in the number of outstanding unexercised equity warrants whose consent is required for any modification or amendment described below under " Changes Requiring a Majority Vote".

Changes Requiring a Majority Vote. The second type of change to the equity warrant agreement or equity warrants of any series is the kind that requires a vote of approval by the holders of not less than a majority in number of the then outstanding unexercised equity warrants of that series. This category includes all changes other than those listed above under " Changes Requiring Approval of Each Holder" or changes that would not adversely affect holders of equity warrants in any material respect.

Table of Contents

Changes Not Requiring Approval. The third type of change does not require any vote or consent by the holders of equity warrant certificates. This type is limited to clarifications, amendments, supplement and other changes that would not adversely affect such holders in any material respect.

Street name and other indirect holders of equity warrants should consult their bank or brokers for information on how approval may be granted or denied if we seek to change your equity warrants or the equity warrant agreement under which they were issued or request a waiver.

Merger, Consolidation, Sale or Other Dispositions

Under the equity warrant agreement for each series of equity warrants, we may consolidate with, or sell, convey or lease all or substantially all of our assets to, or merge with or into, any other corporation or firm to the extent permitted by the terms of the equity securities that can be purchased upon exercise of such equity warrants. If we consolidate with or merge into, or sell, lease or otherwise dispose of all or substantially all of our assets to, another corporation or firm, that corporation or firm must become legally responsible for our obligations under the equity warrant agreements and equity warrants and we will be relieved from all such obligations.

Enforceability of Rights; Governing Law

The equity warrant agent will act solely as our agent in connection with the issuance and exercise of equity warrants and will not assume any obligation or relationship of agency or trust for or with any holder of an equity warrant certificate or any owner of a beneficial interest in equity warrants. The holders of equity warrant certificates, without the consent of the equity warrant agent, the holder of any equity securities issued upon exercise of equity warrants or the holder of any other equity warrant certificates, may, on their own behalf and for their own benefit, enforce, and may institute and maintain any suit, action or proceeding against us to enforce, or otherwise in respect of, their rights to exercise equity warrants evidenced by their equity warrant certificates. Except as may otherwise be provided in the applicable prospectus supplement, each issue of equity warrants and the related equity warrant agreement will be governed by the laws of England and Wales.

Table of Contents

DESCRIPTION OF PREFERENCE SHARES WE MAY OFFER

Provided that the directors have the required authority to allot shares, our articles of association allow us to issue new share capital with any rights or restrictions to it, subject to any special rights given to the holders of the existing share capital. The rights and restrictions attaching to such share capital can be decided either by shareholders by ordinary resolution or by the board of directors, provided that the rights or restrictions decided by the directors do not conflict with any decision by the shareholders. Under the laws of England and Wales, the board of directors requires express authority to allot preference shares which authority must either be given by an ordinary resolution of shareholders or be set out in the articles of association. Our board of directors currently has authority to allot shares up to a nominal amount of US\$1,855,428,879 prior to the earlier of September 30, 2014 and our Annual General Meeting in 2014. Our board of directors also has authority to allot further equity securities up to a nominal amount of US\$1,855,428,879 by way of a rights issue prior to the earlier of September 30, 2014 and our Annual General Meeting in 2014.

If the preference shares have the right to participate only up to a specified amount of a dividend or capital distribution, we may issue them without complying with the provisions of English law that otherwise require companies to offer shares first to existing shareholders on a pre-emptive basis (these rights of existing shareholders are sometimes referred to as "pre-emptive rights"). However, pre-emptive rights would apply to any issuance of preference shares that are convertible into, or exchangeable for, other classes of our shares unless such rights are waived by a special resolution of our shareholders. Our shareholders have currently waived pre-emptive rights with respect to ordinary shares up to an aggregate nominal amount of US\$304,689,550 issued for cash prior to the earlier of September 30, 2014 and our Annual General Meeting in 2014.

Subject to the foregoing, applicable law and the rights of other holders of our share capital, we may seek to issue preference shares in one or more series with such terms, rights and restrictions the company by ordinary resolution decides, or if no resolution has been passed or the resolution does not make specific provision, with such terms, rights and restrictions as our board of directors decides, including the following:

the maximum number of shares in the series;

the designation of the series;

any dividend rate, or basis for determining such a rate, on the shares of the series;

whether or not dividends will be cumulative and, if so, from which date or dates;

whether the shares of the series will be redeemable and, if so, the dates, prices and other terms and conditions of redemption;

whether the shares of the series will be convertible into, or exchangeable for, shares of stock of any other class or classes and, if so, the rate or rates of conversion or exchange, any terms of adjustment and whether the shares of the series will be convertible or exchangeable at our option, the option of holders of preference shares or both;

whether the shares of the series will have voting rights in addition to those provided by law and, if so, the terms of those voting rights;

the rights of the shares of the series in the event of a voluntary or involuntary liquidation, dissolution or winding up of Vodafone; and

any other relative rights, powers, preferences, qualifications, limitations or restrictions relating to the shares of the series.

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

The specific terms of each series of preference shares will be described in a prospectus supplement. However, the description of the preference shares set forth in this prospectus and in any applicable prospectus supplement is not complete without reference to the documents that govern the preference shares. These include our articles of association and any document filed with the Companies Registrar in England and Wales setting out the terms of such preference shares. Any preference shares will be fully paid and nonassessable.

Table of Contents

The terms and manner in which we may redeem shares must be either set forth in our articles of association (which would require us to amend our articles of association by special resolution to include such provisions) or be determined by our board of directors pursuant to the express authority set out in our articles of association. We must be authorized by our shareholders to repurchase any of our shares. Our shareholders have currently authorized us to make market purchases (e.g., purchases on the London Stock Exchange) of up to 10% of our existing ordinary shares (nominal value US\$0.11^{3/7} per share) at a price not exceeding the higher of 1) 5% above the average closing price of such shares for the five business days on the London Stock Exchange prior to the date of purchase and 2) the higher of the last independent trade and the highest current independent bid as stipulated by Article 5(1) of Commission Regulation (EC) 22 December 2003 implementing the Market Abuse Directive as regards exemptions for buy-back programs and stabilisation of financial instruments (No 2273/2003). From December 1, 2003, any shares repurchased by us may be canceled or held in treasury. Shares held in treasury may be reissued for cash or used to settle employee share schemes. The issuance for cash may include the release of a liability of the Company for a liquidated sum as well as an undertaking to pay cash to the Company within 90 days, but does not include selling shares in exchange for other shares or for goods or services.

Table of Contents

LEGAL OWNERSHIP

Street Name and Other Indirect Holders

We generally will not recognize investors who hold securities in accounts at banks or brokers as legal holders of securities. When we refer to the "holders" of securities, we mean only the actual legal and (if applicable) record holder of those securities. Holding securities in accounts at banks or brokers is called holding in "street name". If you hold securities in street name, we will recognize only the bank or broker or the financial institution the bank or broker uses to hold its securities. These intermediary banks, brokers and other financial institutions pass along principal, interest, dividends and other payments on the securities, either because they agree to do so in their customer agreements or because they are legally required. If you hold securities in street name, you should check with your own institution to find out:

how it handles securities payments and notices;

whether it imposes fees or charges;

how it would handle voting if it were ever required;

whether and how you can instruct it to send you securities and, if the securities are in registered form, have them registered in your own name, so you can be a direct holder as described below; and

how it would pursue rights under the securities if there were a default or other event triggering the need for holders to act to protect their interests.

Direct Holders

Our obligations, as well as the obligations of the trustee and those of any third parties employed by us or the trustee, under the securities run only to the person with whom the securities are deposited, in the case of debt securities in bearer form, or in the special situations described on page 22, to persons who are registered as holders of the securities, in the case of securities in registered form. As noted above, we do not have obligations to you if you hold in street name or other indirect means, either because you choose to hold securities in that manner or because the securities are issued in the form of global securities as described below. For example, once we make payment to the registered holder or person with whom the security is deposited, we have no further responsibility for the payment even if that holder is legally required to pass the payment along to you as a street name customer but does not do so.

Global Securities

What is a Global Security?

A global security is a special type of indirectly held security. If we choose to issue securities in the form of global securities, the ultimate beneficial owners can only be indirect holders. We may do this in two ways, depending on whether the security is in registered or bearer form.

If the security is in registered form, we require that the global security be registered in the name of a financial institution we select. If the security is a debt security in bearer form, we will deposit the global security with a financial institution we select.

In both cases, we require that the securities included in the global security not be transferred to the name of any other direct holder unless the special circumstances described below occur. The financial institution that acts as the sole direct holder of the global security is called the "depository". Any person wishing to own a security must do so indirectly by virtue of an account with a broker, bank or other financial institution that in turn has an account with the depository. A prospectus supplement relating to the offering of a series of securities will indicate whether the series will be issued only in the form of global securities, and whether such global securities will be in bearer form, fully registered

form or both. For a description of provisions relating to global debt securities in bearer form, see " Special Arrangements for Global Securities in Bearer Form" on page 45.

Table of Contents

Special Investor Considerations for Global Securities

As an indirect holder, an investor's rights relating to a global security will be governed by the account rules of the investor's financial institution and of the depositary, as well as general laws relating to securities transfers. We do not recognize this type of investor as a holder of securities and instead deal only with the depositary that holds the global security.

If you are an investor in securities that are issued only in the form of global securities, you should be aware that:

You cannot get securities registered in your own name.

You cannot receive physical certificates for your interest in the securities.

You will be a street name holder and must look to your own bank or broker for payments on the securities and protection of your legal rights relating to the securities, as explained earlier under "Street Name and Other Indirect Holders" on page 43.

You may not be able to sell interests in the securities to some insurance companies and other institutions that are required by law to own their securities in the form of physical certificates.

The depositary's policies will govern payments, transfers, exchange and other matters relating to your interest in the global security. We and the trustee have no responsibility for any aspect of the depositary's actions or for its records of ownership interests in the global security. We and the trustee also do not supervise the depositary in any way.

The depositary will require that interests in a global security be purchased or sold within its system using same-day funds. By contrast, payment for purchases and sales in the market for corporate bonds and other securities is generally made in next-day funds. This difference could have some effect on how interests in global securities trade, but we do not know what that effect will be.

Special Situations in Which a Global Security Will Be Terminated

In a few special situations described below, a global security will terminate and interests in it will be exchanged for physical certificates representing securities. After that exchange, the choice of whether to hold securities directly or in street name will be up to the investor. Investors must consult their own bank or brokers to find out how to have their interests in securities transferred to their own name so that they will be direct holders. The rights of street name investors and direct holders in the securities have been previously described in the subsections entitled "Street Name and Other Indirect Holders" and "Direct Holders" on page 43.

The special situations for termination of a global security are:

When the depositary notifies us that it is unwilling, unable or no longer qualified to continue as depositary and, in the case of debt securities in bearer form, we do not appoint a successor within 120 days.

When, in the case of debt securities in bearer form, The Depository Trust Company, referred to later as DTC, notifies the depositary that it is unwilling, unable or no longer qualified to continue holding certificateless depositary interests issued by the depositary with respect to the global securities, and we do not appoint a successor within 120 days.

When we, in the case of debt securities in bearer form, elect to exchange the global securities representing such debt securities for physical certificates representing such debt securities.

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

When an event of default on the securities has occurred and has not been cured. Defaults on debt securities are discussed below under "Description of Debt Securities We May Offer Default and Related Matters Events of Default" on page 29.

The prospectus supplement(s) may also list additional situations for terminating a global security that would apply only to the particular series of securities covered by the prospectus supplement. When a global security

Table of Contents

terminates, the depositary, and neither we nor, in the case of debt securities, the trustee is responsible for deciding the names of the institutions that will be the initial direct holders. For more information, see "Description of Debt Securities We May Offer Description of the Securities Depositary Agreement Procedures for Issuing Definitive Securities" on page 33.

Special Arrangements for Global Securities in Bearer Form

If the debt securities of a series are issued in bearer form, we will deposit a global security representing the debt securities of that series with The Bank of New York Mellon, acting as "depositary", or any successor depositary who will hold the global security. In turn, it will issue certificateless depositary interests representing 100% of the global security and deposit them with or on behalf of DTC.

You can hold a beneficial interest in the certificateless depositary interests only directly through DTC or indirectly through participants or indirect participants in DTC. These beneficial interests may be held in such denominations as are permitted by DTC. Indirect participants are banks, brokers, dealers, trust companies and other parties, including the Euroclear System and Clearstream, Luxembourg, that clear through or maintain a custodial relationship with a participant. For a description of the arrangements we have made with The Bank of New York Mellon relating to the deposit of the global security with The Bank of New York Mellon and The Bank of New York Mellon's issuance of certificateless depositary interests, see "Description of Debt Securities We May Offer Description of the Securities Depositary Agreement" on page 33. Beneficial interests in the certificateless depositary interests are called book-entry securities.

In the remainder of this description "you" means direct holders and not street name or other indirect holders of securities. Indirect holders should read the previous subsection on page 43 entitled "Street Name and Other Indirect Holders".

CLEARANCE AND SETTLEMENT

General

Securities we issue may be held through one or more international and domestic clearing systems. The principal clearing systems we will use are the book-entry systems operated by DTC in the United States, Clearstream, Luxembourg in Luxembourg and Euroclear in Brussels, Belgium. These systems have established electronic securities and payment transfer, processing, depositary and custodial links among themselves and others, either directly or through custodians and depositaries. These links allow securities to be issued, held and transferred among the clearing systems without the physical transfer of certificates.

Special procedures to facilitate clearance and settlement have been established among these clearing systems to trade securities across borders in the secondary market. Where payments for registered securities in global form will be made in U.S. dollars, these procedures can be used for cross-market transfers and the securities will be cleared and settled on a delivery against payment basis.

Cross-market transfers of securities that are not in global form may be cleared and settled in accordance with other procedures that may be established among the clearing systems for these securities. Investors in securities that are issued outside of the United States, its territories and possessions must initially hold their interests through Euroclear, Clearstream, Luxembourg or the clearance system that is described in the applicable prospectus supplement.

The policies of DTC, Clearstream, Luxembourg, and Euroclear will govern payments, transfers, exchange and other matters relating to the investor's interest in securities held by them. This is also true for any other clearance system that may be named in a prospectus supplement.

We have no responsibility for any aspect of the actions of DTC, Clearstream, Luxembourg or Euroclear or any of their direct or indirect participants. We have no responsibility for any aspect of the records kept by DTC, Clearstream, Luxembourg or Euroclear or any of their direct or indirect participants. We also do not supervise these systems in any way. This is also true for any other clearing system indicated in a prospectus supplement.

DTC, Clearstream, Luxembourg, Euroclear and their participants perform these clearance and settlement functions under agreements they have made with one another or with their customers. You should be aware that they are not obligated to perform these procedures and may modify them or discontinue them at any time.

The description of the clearing systems in this section reflects our understanding of the rules and procedures of DTC, Clearstream, Luxembourg and Euroclear as they are currently in effect. These systems could change their rules and procedures at any time.

As used in this section, any reference to securities also refers to book-entry securities issued in respect of securities in bearer form.

The Clearing Systems

DTC

DTC has advised us as follows:

DTC is:

a limited purpose trust company organized under the laws of the State of New York;

a member of the Federal Reserve System;

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

a "clearing corporation" within the meaning of the Uniform Commercial Code; and

a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act.

Table of Contents

DTC was created to hold securities for its participants and to facilitate the clearance and settlement of securities transactions between participants through electronic book-entry changes to accounts of its participants. This eliminates the need for physical movement of certificates.

Participants in DTC include securities brokers and dealers, banks, trust companies and clearing corporations and may include certain other organizations. DTC is partially owned by some of these participants or their representatives.

Indirect access to the DTC system is also available to banks, brokers, dealers and trust companies that have relationships with participants.

The rules applicable to DTC and DTC participants are on file with the SEC.

Clearstream, Luxembourg

Clearstream, Luxembourg has advised us as follows:

Clearstream, Luxembourg is a duly licensed bank organized as a *société anonyme* incorporated under the laws of Luxembourg and is subject to regulation by the Luxembourg Commission for the Supervision of the Financial Sector (*Commission de Surveillance du Secteur Financier*).

Clearstream, Luxembourg holds securities for its customers and facilitates the clearance and settlement of securities transactions among them. It does so through electronic book-entry changes to the accounts of its customers. This eliminates the need for physical movement of certificates.

Clearstream, Luxembourg provides other services to its participants, including safekeeping, administration, clearance and settlement of internationally traded securities and lending and borrowing of securities. It interfaces with the domestic markets in over 30 countries through established depository and custodial relationships.

Clearstream, Luxembourg's customers include worldwide securities brokers and dealers, banks, trust companies and clearing corporations and may include professional financial intermediaries. Its U.S. customers are limited to securities brokers and dealers and banks.

Indirect access to the Clearstream, Luxembourg system is also available to others that clear through Clearstream, Luxembourg customers or that have custodial relationships with its customers, such as banks, brokers, dealers and trust companies.

Euroclear

Euroclear has advised us as follows:

Euroclear is incorporated under the laws of Belgium as a bank and is subject to regulation by the Belgian Banking and Finance Commission (Commission Bancaire et Financière) and the National Bank of Belgium (Banque Nationale de Belgique).

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

Euroclear holds securities for its customers and facilitates the clearance and settlement of securities transactions among them. It does so through simultaneous electronic book-entry delivery against payment, thereby eliminating the need for physical movement of certificates.

Euroclear provides other services to its customers, including credit custody, lending and borrowing of securities and tri-party collateral management. It interfaces with the domestic markets of several other countries.

Euroclear customers include banks, including central banks, securities brokers and dealers, banks, trust companies and clearing corporations and may include certain other professional financial intermediaries.

Indirect access to the Euroclear system is also available to others that clear through Euroclear customers or that have relationships with Euroclear customers.

Table of Contents

All securities in Euroclear are held on a fungible basis. This means that specific certificates are not matched to specific securities clearance accounts.

Other Clearing Systems

We may choose any other clearing system for a particular series of securities. The clearance and settlement procedures for the clearing system we choose will be described in the applicable prospectus supplement.

Primary Distribution

The distribution of securities will be cleared through one or more of the clearing systems that we have described above or any other clearing system that is specified in the applicable prospectus supplement. Payment for securities will be made on a delivery versus payment or free delivery basis. These payment procedures will be more fully described in the applicable prospectus supplement.

Clearance and settlement procedures may vary from one series of securities to another according to the currency that is chosen for the specific series of securities. Customary clearance and settlement procedures are described below.

We will submit applications to the relevant system or systems for the securities to be accepted for clearance. The clearance numbers that are applicable to each clearance system will be specified in the applicable prospectus supplement.

Clearance and Settlement Procedures DTC

DTC participants that hold securities through DTC on behalf of investors will follow the settlement practices applicable to U.S. corporate debt obligations in DTC's Same-Day Funds Settlement System.

Securities will be credited to the securities custody accounts of these DTC participants against payment in the same-day funds, for payments in U.S. dollars, on the settlement date. For payments in a currency other than U.S. dollars, securities will be credited free of payment on the settlement date.

Clearance and Settlement Procedures Euroclear and Clearstream, Luxembourg

We understand that investors that hold their securities through Euroclear or Clearstream, Luxembourg accounts will follow the settlement procedures that are applicable to conventional Eurobonds in registered form.

Securities will be credited to the securities custody accounts of Euroclear and Clearstream, Luxembourg participants on the business day following the settlement date, for value on the settlement date. They will be credited either free of payment or against payment for value on the settlement date.

Secondary Market Trading

Trading between DTC Participants

We understand that secondary market trading between DTC participants will occur in the ordinary way in accordance with DTC's rules. Secondary market trading will be settled using procedures applicable to U.S. corporate debt obligations in DTC's Same-Day Funds Settlement System.

If payment is made in U.S. dollars, settlement will be in same-day funds. If payment is made in a currency other than U.S. dollars, settlement will be free of payment. If payment is made other than in U.S. dollars, separate payment arrangements outside of the DTC system must be made between the DTC participants involved.

Trading between Euroclear and/or Clearstream, Luxembourg Participants

We understand that secondary market trading between Euroclear and/or Clearstream, Luxembourg participants will occur in the ordinary way following the applicable rules and operating procedures of Euroclear and

Table of Contents

Clearstream, Luxembourg. Secondary market trading will be settled using procedures applicable to conventional Eurobonds in registered form.

Trading between a DTC Seller and a Euroclear or Clearstream, Luxembourg Purchaser

A purchaser of securities that are held in the account of a DTC participant must send instructions to Euroclear or Clearstream, Luxembourg at least one business day prior to settlement. The instructions will provide for the transfer of the securities from the selling DTC participant's account to the account of the purchasing Euroclear or Clearstream, Luxembourg participant. Euroclear or Clearstream, Luxembourg, as the case may be, will then instruct the common depositary for Euroclear and Clearstream, Luxembourg to receive the securities either against payment or free of payment.

The interests in the securities will be credited to the respective clearing system. The clearing system will then credit the account of the participant, following its usual procedures. Credit for the securities will appear on the next day, European time. Cash debit will be back-valued to, and the interest on the securities will accrue from, the value date, which would be the preceding day, when settlement occurs in New York. If the trade fails and settlement is not completed on the intended date, the Euroclear or Clearstream, Luxembourg cash debit will be valued as of the actual settlement date instead.

Euroclear participants or Clearstream, Luxembourg participants will need the funds necessary to process same-day funds settlement. The most direct means of doing this is to preposition funds for settlement, either from cash or from existing lines of credit, as for any settlement occurring within Euroclear or Clearstream, Luxembourg. Under this approach, participants may take on credit exposure to Euroclear or Clearstream, Luxembourg until the securities are credited to their accounts one business day later.

As an alternative, if Euroclear or Clearstream, Luxembourg has extended a line of credit to them, participants can choose not to preposition funds and will allow that credit line to be drawn upon to finance settlement. Under this procedure, Euroclear participants or Clearstream, Luxembourg participants purchasing securities would incur overdraft charges for one business day, (assuming they cleared the overdraft as soon as the securities were credited to their accounts). However, interest on the securities would accrue from the value date. Therefore, in many cases, the investment income on securities that is earned during that one business day period may substantially reduce or offset the amount of the overdraft charges. This result will, however, depend on each participant's particular cost of funds.

Because the settlement will take place during New York business hours, DTC participants will use their usual procedures to deliver securities to the depositary on behalf of Euroclear participants or Clearstream, Luxembourg participants. The sale proceeds will be available to the DTC seller on the settlement date. For the DTC participants, then, a cross-market transaction will settle no differently than a trade between two DTC participants.

Special Timing Considerations

You should be aware that investors will only be able to make and receive deliveries, payments and other communications involving securities through Clearstream, Luxembourg and Euroclear on days when those systems are open for business. Those systems may not be open for business on days when banks, brokers and other institutions are open for business in the United States.

In addition, because of time-zone differences, there may be problems with completing transactions involving Clearstream, Luxembourg and Euroclear on the same business day as in the United States. U.S. investors who wish to transfer their interests in the securities, or to receive or make a payment or delivery of securities, on a particular day, may find that the transactions will not be performed until the next business day in Luxembourg or Brussels, depending on whether Clearstream, Luxembourg or Euroclear is used.

Table of Contents

TAXATION

This section describes the material U.K. and U.S. federal income tax consequences of acquiring, owning and disposing of ordinary shares or ADSs, preference shares or debt securities that we may issue. It is the opinion of Linklaters LLP as to matters of U.K. tax law and U.S. federal income tax law.

United Kingdom Taxation

The comments below are of a general nature based on current U.K. law and United Kingdom HM Revenue & Customs ("HMRC") practice. They do not necessarily apply where the income is deemed for tax purposes to be the income of any other person and may not apply to certain classes of persons.

Please consult your own tax advisor concerning the consequences of owning the offered securities in your particular circumstances.

Debt Securities

Interest Payments. References to "interest" in this section mean interest as understood in U.K. tax law. The statements do not take account of any different definitions of interest that may prevail under any other law or which may be created by the terms and conditions of the debt securities or any related documentation. If debt securities are issued with a redemption premium, then any such premium may constitute interest for U.K. tax purposes and so be treated in the manner described below.

Payments of interest on debt securities will not be subject to withholding or deduction for or on account of U.K. taxation so long as the debt securities carry a right to interest and are and continue to be listed on a "recognized stock exchange" within the meaning of Section 1005 of the U.K. Income Tax Act 2007 (which includes the New York Stock Exchange and the London Stock Exchange).

In all other cases, payments of interest will generally be made after deduction of tax at a rate which is currently 20%. Certain holders of debt securities who are U.S. residents will generally be entitled to receive payments free of deductions on account of U.K. tax under the double taxation treaty between the United Kingdom and the United States and may therefore be able to obtain a direction to that effect from HMRC. Holders of debt securities who are resident in other jurisdictions may also be able to receive payment free of deductions or subject to a lower rate of deduction under an appropriate double taxation treaty and may be able to obtain a direction to that effect.

However, such a direction will, in either case, only be issued on prior application to HMRC by the holder in question. If such a direction is not in place at the time a payment of interest is made, the person making the payment will be required to withhold tax, although a holder of debt securities resident in another jurisdiction who is entitled to relief may subsequently claim the amount withheld from HMRC.

The interest on the debt securities has a U.K. source and accordingly may be chargeable to U.K. tax by direct assessment. Where the interest is paid without withholding or deduction, the interest will not be assessed to U.K. tax in the hands of holders of the debt securities who are not resident in the United Kingdom, except where:

- (i) in the case of corporate holders, such persons carry on a trade in the United Kingdom through a permanent establishment; or
- (ii) in the case of other holders, such persons carry on a trade, profession or vocation in the United Kingdom through a U.K. branch or agency

in connection with which the interest is received or to which the debt securities are attributable, in which case (subject to exemptions for interest received by certain categories of agent) tax may be levied on the U.K. permanent establishment or branch or agency.

Table of Contents

In the event that payments of interest on debt securities are subject to withholding or deduction for or on account of U.K. taxation (for example, as a result of a failure to maintain a listing on a "recognized stock exchange") then the provisions referred to in "Description of Debt Securities We May Offer Payment of Additional Amounts" on page 19 may apply so that the net amount received by the holders after such reduction will not be less than the amount the holders would have received in the absence of such withholding or deduction.

Holders of the debt securities should note that the provisions relating to additional amounts referred to in "Description of Debt Securities We May Offer Payment of Additional Amounts" on page 19 would not apply if HMRC sought to assess directly the person entitled to the relevant interest to U.K. tax. However exemption from, or reduction of, such U.K. tax liability might be available under an applicable double taxation treaty.

Provision of Information. HMRC has powers to obtain information relating to securities in certain circumstances. This may include details of the beneficial owners of the debt securities (or the persons for whom the debt securities are held), details of the persons to whom payments derived from the debt securities are or may be paid and information and documents in connection with transactions relating to the debt securities. Information may be required to be provided by, amongst others, the holders of the debt securities, persons by (or via) whom payments derived from the debt securities are made or who receive (or would be entitled to receive) such payments, persons who effect or are a party to transactions relating to the debt securities on behalf of others and certain registrars or administrators. In certain circumstances, the information obtained by HMRC may be exchanged with tax authorities in other countries.

European Union Directive on the Taxation of Savings. The Council of the European Union has adopted a directive regarding the taxation of savings income. Member States are required to provide to the tax authorities of another Member State details of payments of interest (or other similar income) paid by a person within its jurisdiction to or for the benefit of an individual resident in that other Member State, except that Luxembourg and Austria will instead operate a withholding system for a transitional period in relation to such payments. Under such a withholding system, they are required to allow the recipient of the interest payment to request that no tax be withheld if the recipient complies with certain provision of information procedures. The Luxembourg government has announced its intention to elect out of the withholding system in favor of automatic exchange of information with effect from 1 January 2015. The European Commission has proposed certain amendments to the directive, which may, if implemented, amend or broaden the scope of the requirements described above.

Issue of Debt Securities to Form Part of Earlier Series. In the earlier section entitled "Description of Debt Securities We May Offer Types of Debt Securities" we set out certain situations in which we may issue additional debt securities to form part of an existing series. Any relevant U.K. tax consequences as a result of such an issue will be described in an applicable prospectus supplement.

Optional Tax Redemption. In the earlier section entitled "Description of Debt Securities We May Offer Special Situations Optional Tax Redemption" we set out certain situations in which we may redeem debt securities. Any relevant U.K. tax consequences as a result of a change in, execution of or amendment to any laws or treaties or the official application or interpretation of any laws or treaties will be described in an applicable prospectus supplement.

Disposal (including Redemption). This section offers general guidance only and in particular does not discuss the U.K. tax treatment relevant to convertible or exchangeable securities, asset linked securities or securities issued at anything other than the redemption amount or a fixed discount to their redemption amount.

Generally, a holder of debt securities who is not resident in the United Kingdom for tax purposes will not be liable for U.K. taxation in respect of a disposal of a debt security, or in respect of any gain accrued in respect of a debt security or any change in the value of a debt security.

This may not, however, be the case if:

- (i) in the case of corporate holders, such persons carry on a trade in the United Kingdom through a permanent establishment; or

Table of Contents

- (ii) in the case of other holders, such persons carry on a trade, profession or vocation in the United Kingdom through a U.K. branch or agency

in connection with which the interest is received or to which the debt securities are attributable.

Inheritance Tax. A holder of debt securities who is an individual domiciled outside the United Kingdom (and is not deemed domiciled in the United Kingdom under certain rules relating to previous domicile or long residence) will generally not be liable for U.K. inheritance tax in respect of his holding of debt securities. This will be the case if a register of debt securities is maintained outside the United Kingdom. If no register is maintained, there may be a liability for inheritance tax if the debt securities are held in the United Kingdom. If so, exemption from any U.K. inheritance tax liability will normally be available for holders of debt securities who are domiciled in the United States under the U.S.-U.K. Estate Tax Treaty.

Stamp Duty and Stamp Duty Reserve Tax. U.K. stamp duty, or SDRT, will not normally be payable by a holder of debt securities on the issue or transfer of the debt securities, unless such securities carry:

- (i) a right of conversion into shares or other securities or to the acquisition of shares or other securities (including securities of the same description);
- (ii) a right to interest, the amount of which is or was determined to any extent by reference to the results of, or of any part of, a business or to the value of any property;
- (iii) a right to interest the amount of which exceeds a reasonable commercial return on the nominal amount of the capital; or
- (iv) a right on repayment to an amount which exceeds the nominal amount of the capital and is not reasonably comparable with what is generally repayable (in respect of a similar nominal amount of capital) under the terms of issue of loan capital listed on the Official List of the London Stock Exchange.

Warrants

A prospectus supplement will describe, if applicable, the U.K. tax consequences of the ownership of warrants.

Shares

Dividends. We will not be required to withhold tax at source when paying a dividend. Dividends may carry a tax credit. However, non-U.K. resident shareholders will not generally be able to claim repayment from HMRC of any part of such tax credit.

Disposals. A shareholder who is not resident in the United Kingdom for U.K. tax purposes will generally only be liable for U.K. taxation on chargeable gains in respect of his shares in the same circumstances in which he would be liable to such taxation in respect of debt securities (see above).

Inheritance Tax. An individual domiciled outside the United Kingdom is generally liable for U.K. inheritance tax in respect of assets situated in the United Kingdom. Our shares will probably be so situated. However, an exemption from any U.K. inheritance tax liability will normally be available for shareholders who are domiciled in the United States under the U.S.-U.K. Estate Tax Treaty.

Stamp Duty and Stamp Duty Reserve Tax. An instrument of transfer in respect of a transfer on sale of shares will generally be subject to U.K. stamp duty at a rate of 0.5% of the purchase price. The purchaser normally pays the stamp duty.

An agreement to transfer shares will normally give rise to a charge to stamp duty reserve tax at a rate of 0.5% of the agreed price. If a duly stamped transfer in respect of the agreement is produced within six years of the date on which the agreement is made (or, if the agreement is conditional, the date on which the condition is satisfied) any

Table of Contents

stamp duty reserve tax paid is repayable, generally with interest, and otherwise the stamp duty reserve tax charge is cancelled. Stamp duty reserve tax is, in general, payable by the purchaser.

Paperless transfers of shares within the CREST system are generally liable to stamp duty reserve tax, rather than stamp duty, at the rate of 0.5% of the purchase price. CREST is obliged to collect stamp duty reserve tax on relevant transactions settled within the CREST system. Deposits of shares into CREST will not generally be subject to stamp duty reserve tax, unless the transfer into CREST is itself for consideration.

Proposed Financial Transactions Tax ("FTT")

The European Commission recently published a proposal for a directive for a common FTT in Austria, Belgium, Estonia, France, Germany, Greece, Italy, Portugal, Slovakia, Slovenia and Spain. The proposed FTT potentially has effect outside of these countries and could, if introduced in its current form, apply to certain securities offered pursuant to this prospectus, depending on the circumstances. However, the FTT proposal remains subject to negotiation between the participating Member States and is the subject of legal challenge. It may therefore be altered prior to any implementation, and the timing of any implementation remains unclear. Prospective investors are advised to seek their own professional advice in relation to the FTT.

U.S. Federal Income Taxation

This section applies to you only if you acquire the offered security in an offering governed by this prospectus and hold the offered security as a capital asset for tax purposes. It does not apply to you if you are a member of a special class of holders subject to special rules, including:

a dealer in securities;

a trader in securities that elects to use a mark-to-market method of accounting for your securities holdings;

a tax-exempt organization;

a life insurance company;

a person that holds the offered security as part of a straddle or a hedging or conversion transaction;

in the case of debt securities, a bank or a person that owns debt securities that are a hedge or that are hedged against interest rate or currency risks;

a person liable for net investment income tax;

in the case of ordinary shares, preference shares and warrants, a person liable for alternative minimum tax or that actually or constructively owns 10% or more of our voting stock; or

a U.S. holder (as defined below) whose functional currency is not the U.S. dollar.

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions, as well as on the income tax convention between the United States and the United Kingdom (the "Treaty"), all as currently in effect. These laws are subject to change, possibly on a retroactive basis. In addition, this section is based in part on the representations of the depositary and the assumption that each obligation in the Deposit Agreement and any related agreement will be

performed according to its terms.

For U.S. federal income tax purposes, holders of ADRs evidencing ADSs will be treated as the owners of the shares represented by those ADRs. Exchanges of shares for ADRs and ADRs for shares generally will not be subject to U.S. federal income tax.

The U.S. federal income tax consequences of acquiring, owning and disposing of warrants will be discussed in an applicable prospectus supplement.

The U.S. federal income tax treatment of a partner in an entity treated as a partnership for U.S. federal income tax purposes that holds an offered security will depend on the status of the partner and the activities of the

Table of Contents

partnership. If you are an entity treated as a partnership for U.S. federal income tax purposes, you should consult your own tax advisor concerning the U.S. federal income tax consequences to your partners of the acquisition, ownership and disposition of an offered security by the partnership.

United States Holders

This subsection describes the tax consequences to a U.S. holder of acquiring, owning and disposing of ordinary shares or ADSs, preference shares or debt securities that we may issue. You are a U.S. holder if you are a beneficial owner of an offered security and you are:

a citizen or resident of the United States;

a domestic corporation;

an estate whose income is subject to U.S. federal income tax regardless of its source; or

a trust if a U.S. court can exercise primary supervision over the trust's administration and one or more U.S. persons are authorized to control all substantial decisions of the trust, or the trust has validly elected to be treated as a domestic trust for U.S. federal income tax purposes.

If you are not a U.S. holder, this subsection does not apply to you and you should refer to " United States Alien Holders" below.

You should consult your own tax advisor regarding the U.S. federal, state and local and other tax consequences of owning and disposing of an offered security in your particular circumstances.

This section addresses only U.S. federal income taxation.

Taxation of Debt Securities

This subsection deals only with debt securities that are due to mature 30 years or less from the date on which they are issued. The U.S. federal income tax consequences of owning debt securities that are due to mature more than 30 years from their date of issue will be discussed in an applicable prospectus supplement.

Payments of Interest

Except as described below in the case of interest on a discount debt security that is not qualified stated interest each as defined below under "Original Issue Discount General", you will be taxed on any interest on your debt securities, whether payable in U.S. dollar or a foreign currency, including a composite currency or basket of currencies other than U.S. dollars, as ordinary income at the time you receive the interest or when it accrues, depending on your method of accounting for tax purposes. Interest paid by us on the debt securities and original issue discount, if any, accrued with respect to the notes (as described below under "Original Issue Discount") constitute income from sources outside the United States, subject to the rules regarding the foreign tax credit allowable to a U.S. holder. Under the foreign tax credit rules, interest paid will generally be "passive" category income.

Cash Basis Taxpayers. If you are a taxpayer that uses the cash receipts and disbursements method of accounting for tax purposes and you receive an interest payment that is denominated in, or determined by reference to, a foreign currency, you must recognize income equal to the U.S. dollar value of the interest payment, based on the exchange rate in effect on the date of receipt, regardless of whether you actually convert the payment into U.S. dollars.

Accrual Basis Taxpayers. If you are a taxpayer that uses an accrual method of accounting for tax purposes, you may determine the amount of income that you recognize with respect to an interest payment denominated in, or determined by reference to, a foreign currency by using one of two methods. Under the first method, you will

Table of Contents

determine the amount of income accrued based on the average exchange rate in effect during the interest accrual period or, with respect to an accrual period that spans two taxable years, that part of the period within the taxable year.

If you elect the second method, you would determine the amount of income accrued on the basis of the exchange rate in effect on the last day of the accrual period, or, in the case of an accrual period that spans two taxable years, the exchange rate in effect on the last day of the part of the period within the taxable year. Additionally, under this second method, if you receive a payment of interest within five business days of the last day of your accrual period or taxable year, you may instead translate the interest accrued into U.S. dollars at the exchange rate in effect on the day that you actually receive the interest payment. If you elect the second method it will apply to all debt instruments that you hold at the beginning of the first taxable year to which the election applies and to all debt instruments that you subsequently acquire. You may not revoke this election without the consent of the United States Internal Revenue Service.

When you actually receive an interest payment, including a payment attributable to accrued but unpaid interest upon the sale or retirement of your note, denominated in, or determined by reference to, a foreign currency for which you accrued an amount of income, you will recognize ordinary income or loss measured by the difference, if any, between the exchange rate that you used to accrue interest income and the exchange rate in effect on the date of receipt, regardless of whether you actually convert the payment into U.S. dollars.

Original Issue Discount

General. If you own a debt security, other than a short-term debt security with a term of one year or less, it will be treated as a discount debt security issued at an original issue discount if the debt security's stated redemption price at maturity exceeds its issue price by more than a *de minimis* amount. Generally, a debt security's issue price will be the first price at which a substantial amount of debt securities included in the issue of which the debt security is a part is sold to persons other than bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placement agents or wholesalers. A debt security's stated redemption price at maturity is the total of all payments provided by the debt security that are not payments of qualified stated interest. Generally, an interest payment on a debt security is qualified stated interest if it is one of a series of stated interest payments on a debt security that are unconditionally payable at least annually at a single fixed rate, with certain exceptions for lower rates paid during some periods, applied to the outstanding principal amount of the debt security. There are special rules for variable rate debt securities that are discussed below under " Variable Rate Debt Securities".

In general, your debt security is not a discount debt security if the amount by which its stated redemption price at maturity exceeds its issue price is less than the *de minimis* amount of $\frac{1}{4}$ of 1% of its stated redemption price at maturity multiplied by the number of complete years to its maturity. Your debt security will have *de minimis* original issue discount if the amount of the excess is less than the *de minimis* amount. If your debt security has *de minimis* original issue discount, you must include the *de minimis* amount in income as stated principal payments are made on the debt security, unless you make the election described below under " Election to Treat All Interest as Original Issue Discount". You can determine the includible amount with respect to each such payment by multiplying the total amount of your debt security's *de minimis* original issue discount by a fraction equal to:

the amount of the principal payment made

divided by:

the stated principal amount of the debt security.

Generally, if your discount debt security matures more than one year from its date of issue, you must include original issue discount, or OID, in income before you receive cash attributable to that income. The amount of OID that you must include in income is calculated using a constant-yield method, and generally you will include increasingly greater amounts of OID in income over the life of your debt security. More specifically, you can calculate the amount of OID that you must include in income by adding the daily portions of OID with respect to your discount debt security for each day during the taxable year or portion of the taxable year that you hold your discount debt security. You can determine the daily portion by allocating to each day in any accrual period a *pro rata*

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

Table of Contents

portion of the OID allocable to that accrual period. You may select an accrual period of any length with respect to your discount debt security and you may vary the length of each accrual period over the term of your discount debt security. However, no accrual period may be longer than one year and each scheduled payment of interest or principal on the discount debt security must occur on either the first or final day of an accrual period.

You can determine the amount of OID allocable to an accrual period by:

multiplying your discount debt security's adjusted issue price at the beginning of the accrual period by your debt security's yield to maturity; and then

subtracting from this figure the sum of the payments of qualified stated interest on your debt security allocable to the accrual period.

You must determine the discount debt security's yield to maturity on the basis of compounding at the close of each accrual period and adjusting for the length of each accrual period. Further, you determine your discount debt security's adjusted issue price at the beginning of any accrual period by:

adding your discount debt security's issue price and any accrued OID for each prior accrual period; and then

subtracting any payments previously made on your discount debt security that were not qualified stated interest payments.

If an interval between payments of qualified stated interest on your discount debt security contains more than one accrual period, then, when you determine the amount of OID allocable to an accrual period, you must allocate the amount of qualified stated interest payable at the end of the interval, including any qualified stated interest that is payable on the first day of the accrual period immediately following the interval, *pro rata* to each accrual period in the interval based on their relative lengths. In addition, you must increase the adjusted issue price at the beginning of each accrual period in the interval by the amount of any qualified stated interest that has accrued prior to the first day of the accrual period but that is not payable until the end of the interval. You may compute the amount of OID allocable to an initial short accrual period by using any reasonable method if all other accrual periods, other than a final short accrual period, are of equal length.

The amount of OID allocable to the final accrual period is equal to the difference between:

the amount payable at the maturity of your debt security, other than any payment of qualified stated interest; and

your debt security's adjusted issue price as of the beginning of the final accrual period.

Acquisition Premium. If you purchase your debt security for an amount that is less than or equal to the sum of all amounts, other than qualified stated interest, payable on your debt security after the purchase date but is greater than the amount of your debt security's adjusted issue price, as determined above under " General", the excess is acquisition premium. If you do not make the election described below under " Election to Treat All Interest as Original Issue Discount", then you must reduce the daily portions of OID by a fraction equal to:

the excess of your adjusted basis in the debt security immediately after purchase over the adjusted issue price of the debt security

divided by:

the excess of the sum of all amounts payable, other than qualified stated interest, on the debt security after the purchase date over the debt security's adjusted issue price.

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

Pre-Issuance Accrued Interest. An election may be made to decrease the issue price of your debt security by the amount of pre-issuance accrued interest if:

a portion of the initial purchase price of your debt security is attributable to pre-issuance accrued interest;

Table of Contents

the first stated interest payment on your debt security is to be made within one year of your debt security's issue date; and

the payment will equal or exceed the amount of pre-issuance accrued interest.

If this election is made, a portion of the first stated interest payment will be treated as a return of the excluded pre-issuance accrued interest and not as an amount payable on your debt security. You should consult your own tax advisors concerning the U.S. federal income tax consequences of holding Notes if this election is not made.

Debt Securities Subject to Contingencies, Including Optional Redemption. Your debt security is subject to a contingency if it provides for an alternative payment schedule or schedules applicable upon the occurrence of a contingency or contingencies, other than a remote or incidental contingency, whether such contingency relates to payments of interest or of principal. In such a case, you must determine the yield and maturity of your debt security by assuming that the payments will be made according to the payment schedule most likely to occur if:

the timing and amounts of the payments that comprise each payment schedule are known as of the issue date; and

one of such schedules is significantly more likely than not to occur.

If there is no single payment schedule that is significantly more likely than not to occur, other than because of a mandatory sinking fund, you must include income on your debt security in accordance with the general rules that govern contingent payment obligations. If applicable, these rules will be discussed in the prospectus supplement.

Notwithstanding the general rules for determining yield and maturity, if your debt security is subject to contingencies, and either you or we have an unconditional option or options that, if exercised, would require payments to be made on the debt security under an alternative payment schedule or schedules, then:

in the case of an option or options that we may exercise, we will be deemed to exercise or not exercise an option or combination of options in the manner that minimizes the yield on your debt security; and

in the case of an option or options that you may exercise, you will be deemed to exercise or not exercise an option or combination of options in the manner that maximizes the yield on your debt security.

If both you and we hold options described in the preceding sentence, those rules will apply to each option in the order in which they may be exercised. You may determine the yield on your debt security for the purposes of those calculations by using any date on which your debt security may be redeemed or repurchased as the maturity date and the amount payable on the date that you chose in accordance with the terms of your debt security as the principal amount payable at maturity.

If a contingency, including the exercise of an option, actually occurs or does not occur contrary to an assumption made according to the above rules then, except to the extent that a portion of your debt security is repaid as a result of this change in circumstances and solely to determine the amount and accrual of OID, you must redetermine the yield and maturity of your debt security by treating your debt security as having been retired and reissued on the date of the change in circumstances for an amount equal to your debt security's adjusted issue price on that date.

Election to Treat All Interest as Original Issue Discount. You may elect to include in gross income all interest that accrues on your debt security using the constant-yield method described above under "General", with the modifications described below. For purposes of this election, interest will include stated interest, OID, *de minimis* original issue discount, market discount, *de minimis* market discount and unstated interest, as adjusted by any amortizable bond premium, described below under "Debt Securities Purchased at a Premium", or acquisition premium.

If you make this election for your debt security, then, when you apply the constant-yield method:

the issue price of your debt security will equal your cost;

the issue date of your debt security will be the date you acquired it; and

Table of Contents

no payments on your debt security will be treated as payments of qualified stated interest.

Generally, this election will apply only to the debt security for which you make it; however, if the debt security has amortizable bond premium, you will be deemed to have made an election to apply amortizable bond premium against interest for all debt instruments with amortizable bond premium, other than debt instruments the interest on which is excludible from gross income, that you hold as of the beginning of the taxable year to which the election applies or any taxable year thereafter. Additionally, if you make this election for a market discount debt instrument, you will be treated as having made the election discussed below under "Market Discount" to include market discount in income currently over the life of all debt instruments that you currently own or later acquire. You may not revoke any election to apply the constant-yield method to all interest on a debt security or the deemed elections with respect to amortizable bond premium or market discount debt securities without the consent of the United States Internal Revenue Service.

Variable Rate Debt Securities. Your debt security will be a variable rate debt security if:

your debt security's issue price does not exceed the total noncontingent principal payments by more than the lesser of:

1.5% of the product of the total noncontingent principal payments and the number of complete years to maturity from the issue date; or

15% of the total noncontingent principal payments; and

your debt security provides for stated interest, compounded or paid at least annually, only at:

one or more qualified floating rates;

a single fixed rate and one or more qualified floating rates;

a single objective rate; or

a single fixed rate and a single objective rate that is a qualified inverse floating rate.

Your debt security will have a variable rate that is a qualified floating rate if:

variations in the value of the rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which your debt security is denominated; or

the rate is equal to such a rate multiplied by either:

a fixed multiple that is greater than 0.65 but not more than 1.35; or

a fixed multiple greater than 0.65 but not more than 1.35, increased or decreased by a fixed rate; and

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

the value of the rate on any date during the term of your debt security is set no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

If your debt security provides for two or more qualified floating rates that are within 0.25 percentage points of each other on the issue date or can reasonably be expected to have approximately the same values throughout the term of the debt security, the qualified floating rates together constitute a single qualified floating rate.

Your debt security will not have a qualified floating rate, however, if the rate is subject to certain restrictions (including caps, floors, governors, or other similar restrictions) unless such restrictions are fixed throughout the term of the debt security or are not reasonably expected to significantly affect the yield on the debt security.

Table of Contents

Your debt security will have a variable rate that is a single objective rate if:

the rate is not a qualified floating rate;

the rate is determined using a single, fixed formula that is based on objective financial or economic information that is not within the control of or unique to the circumstances of the issuer or a related party; and

the value of the rate on any date during the term of your debt security is set no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

Your debt security will not have a variable rate that is an objective rate, however, if it is reasonably expected that the average value of the rate during the first half of your debt security's term will be either significantly less than or significantly greater than the average value of the rate during the final half of your debt security's term.

An objective rate as described above is a qualified inverse floating rate if:

the rate is equal to a fixed rate minus a qualified floating rate; and

the variations in the rate can reasonably be expected to inversely reflect contemporaneous variations in the cost of newly borrowed funds.

Your debt security will also have a single qualified floating rate or an objective rate if interest on your debt security is stated at a fixed rate for an initial period of one year or less followed by either a qualified floating rate or an objective rate for a subsequent period, and either:

the fixed rate and the qualified floating rate or objective rate have values on the issue date of the debt security that do not differ by more than 0.25 percentage points; or

the value of the qualified floating rate or objective rate is intended to approximate the fixed rate.

In general, if your variable rate debt security provides for stated interest at a single qualified floating rate or objective rate, or one of those rates after a single fixed rate for an initial period, all stated interest on your debt security is qualified stated interest. In this case, the amount of OID, if any, is determined by using, in the case of a qualified floating rate or qualified inverse floating rate, the value as of the issue date of the qualified floating rate or qualified inverse floating rate, or, for any other objective rate, a fixed rate that reflects the yield reasonably expected for your debt security.

If your variable rate debt security does not provide for stated interest at a single qualified floating rate or a single objective rate, and also does not provide for interest payable at a fixed rate other than a single fixed rate for an initial period, you generally must determine the interest and OID accruals on your debt security by:

determining a fixed rate substitute for each variable rate provided under your variable rate debt security;

constructing the equivalent fixed rate debt instrument, using the fixed rate substitute described above;

determining the amount of qualified stated interest and OID with respect to the equivalent fixed rate debt instrument; and

adjusting for actual variable rates during the applicable accrual period.

When you determine the fixed rate substitute for each variable rate provided under the variable rate debt security, you generally will use the value of each variable rate as of the issue date or, for an objective rate that is not a qualified inverse floating rate, a rate that reflects the reasonably expected yield on your debt security.

If your variable rate debt security provides for stated interest either at one or more qualified floating rates or at a qualified inverse floating rate, and also provides for stated interest at a single fixed rate other than at a single fixed rate for an initial period, you generally must determine interest and OID accruals by using the method described in the previous paragraph. However, your variable rate debt security will be treated, for purposes of the first three steps of the determination, as if your debt security had provided for a qualified floating rate, or a qualified inverse floating rate, rather than the fixed rate. The qualified floating rate, or qualified inverse floating rate, that replaces the fixed rate must be such that the fair market value of your variable rate debt security as of the issue date

Table of Contents

approximates the fair market value of an otherwise identical debt instrument that provides for the qualified floating rate, or qualified inverse floating rate, rather than the fixed rate.

Short-Term Debt Securities. In general, if you are an individual or other cash basis U.S. holder of a short-term debt security, you are not required to accrue OID, as specially defined below for the purposes of this paragraph, for U.S. federal income tax purposes unless you elect to do so (although it is possible that you may be required to include any stated interest in income as you receive it). If you are an accrual basis taxpayer, a taxpayer in a special class, including, but not limited to, a regulated investment company, common trust fund, or a certain type of pass-through entity, or a cash basis taxpayer who so elects, you will be required to accrue OID on short-term debt securities on either a straight-line basis or under the constant-yield method, based on daily compounding. If you are not required and do not elect to include OID in income currently, any gain you realize on the sale or retirement of your short-term debt security will be ordinary income to the extent of the accrued OID, which will be determined on a straight-line basis unless you make an election to accrue the OID under the constant-yield method, through the date of sale or retirement. However, if you are not required and do not elect to accrue OID on your short-term debt securities, you will be required to defer deductions for interest on borrowings allocable to your short-term debt securities in an amount not exceeding the deferred income until the deferred income is realized.

When you determine the amount of OID subject to these rules, you must include all interest payments on your short-term debt security, including stated interest, in your short-term debt security's stated redemption price at maturity.

Foreign Currency Discount Notes. If your discount debt security is denominated in, or determined by reference to, a foreign currency, you must determine OID for any accrual period on your discount debt security in the foreign currency and then translate the amount of OID into U.S. dollars in the same manner as stated interest accrued by an accrual basis U.S. holder, as described above under "Payments of Interest". You may recognize ordinary income or loss when you receive an amount attributable to OID in connection with a payment of interest or the sale or retirement of your debt security.

Market Discount

You will be treated as if you purchased your debt security, other than a short-term debt security, at a market discount, and your debt security will be a market discount debt security if:

you purchase your debt security for less than its issue price as determined above under "Original Issue Discount General"; and

the difference between the debt security's stated redemption price at maturity or, in the case of a discount debt security, the debt security's revised issue price, and the price you paid for your debt security is equal to or greater than $\frac{1}{4}$ of 1% of your debt security's stated redemption price at maturity or revised issue price, respectively, multiplied by the number of complete years to the debt security's maturity. To determine the revised issue price of your debt security for these purposes, you generally add any OID that has accrued on your debt security to its issue price.

If your debt security's stated redemption price at maturity or, in the case of a discount debt security, its revised issue price, exceeds the price you paid for the debt security by less than $\frac{1}{4}$ of 1% multiplied by the number of complete years to the debt security's maturity, the excess constitutes *de minimis* market discount, and the rules discussed below are not applicable to you.

You must treat any gain you recognize on the maturity or disposition of your market discount debt security as ordinary income to the extent of the accrued market discount on your debt security. Alternatively, you may elect to include market discount in income currently over the life of your debt security. If you make this election, it will apply to all debt instruments with market discount that you acquire on or after the first day of the first taxable year to which the election applies. You may not revoke this election without the consent of the United States Internal Revenue Service. If you own a market discount debt security and do not make this election, you will generally be required to defer deductions for interest on borrowings allocable to your debt security in an amount not exceeding the accrued market discount on your debt security until the maturity or disposition of your debt security.

Table of Contents

You will accrue market discount on your market discount debt security on a straight-line basis unless you elect to accrue market discount using a constant-yield method. If you make this election, it will apply only to the debt security with respect to which it is made and you may not revoke it.

Debt Securities Purchased at a Premium

If you purchase your debt security for an amount in excess of its principal amount, you may elect to treat the excess as amortizable bond premium. If you make this election, you will reduce the amount required to be included in your income each year with respect to interest on your debt security by the amount of amortizable bond premium allocable to that year, based on your debt security's yield to maturity. If your debt security is denominated in, or determined by reference to, a foreign currency, you will compute your amortizable bond premium in units of the foreign currency and your amortizable bond premium will reduce your interest income in units of the foreign currency. Gain or loss recognized that is attributable to changes in exchange rates between the time your amortized bond premium offsets interest income and the time of the acquisition of your debt security is generally taxable as ordinary income or loss. If you make an election to amortize bond premium, it will apply to all debt instruments, other than debt instruments the interest on which is excludible from gross income, that you hold at the beginning of the first taxable year to which the election applies or that you thereafter acquire, and you may not revoke it without the consent of the United States Internal Revenue Service. See also "Original Issue Discount Election to Treat All Interest as Original Issue Discount".

Purchase, Sale and Retirement of the Debt Securities

Your tax basis in your debt security will generally be the U.S. dollar cost, as defined below, of your debt security, adjusted by:

adding any OID or market discount, *de minimis* original issue discount and *de minimis* market discount previously included in income with respect to your debt security; and then

subtracting any payments on your debt security that are not qualified stated interest payments and any amortizable bond premium applied to reduce interest on your debt security.

If you purchase your debt security with foreign currency, the U.S. dollar cost of your note will generally be the U.S. dollar value of the purchase price on the date of purchase. However, if you are a cash basis taxpayer, or an accrual basis taxpayer if you so elect, and your debt security is traded on an established securities market, the U.S. dollar cost of your debt security will be the U.S. dollar value of the purchase price on the settlement date of your purchase.

You will generally recognize gain or loss on the sale or retirement of your debt security equal to the difference between the amount you realize on the sale or retirement and your tax basis in your debt security. If your debt security is sold or retired for an amount in foreign currency, the amount you realize will be the U.S. dollar value of such amount on the date the note is disposed of or retired except that, in the case of a note that is traded on an established securities market, a cash basis taxpayer, or an accrual basis taxpayer that so elects, will determine the amount realized based on the U.S. dollar value of the foreign currency on the settlement date for the sale.

You will recognize capital gain or loss when you sell or retire your debt security, except to the extent:

described above under "Original Issue Discount Short-Term Debt Securities" or "Market Discount";

attributable to accrued but unpaid interest;

the rules governing contingent payment obligations apply; or

attributable to changes in exchange rates as described below.

Capital gain of a noncorporate U.S. holder is generally taxed at a special reduced rate where the holder has a holding period greater than one year. You must treat any portion of the gain or loss that you recognize on the sale or retirement of a debt security as ordinary income or loss to the extent attributable to changes in exchange rates. However, you take exchange gain or loss into account only to the extent of the total gain

or loss you realize on the transaction.

Table of Contents

Exchange of Amounts in Other Currency Than U.S. Dollars

If you receive foreign currency as interest on your debt security or on the sale or retirement of your debt security, your tax basis in the foreign currency will equal its U.S. dollar value when the interest is received or at the time of the sale or retirement. If you purchase foreign currency you generally will have a tax basis equal to the U.S. dollar value of the foreign currency on the date of your purchase. If you sell or dispose of a foreign currency, including if you use it to purchase debt securities or exchange it for U.S. dollars, any gain or loss recognized generally will be ordinary income or loss.

Indexed Debt Securities

The applicable prospectus supplement will discuss any special U.S. federal income tax rules with respect to debt securities the payments on which are determined by reference to any index and other debt securities that are subject to the rules governing contingent payment obligations which are not subject to the rules governing variable rate debt securities.

Treasury Regulations Requiring Disclosure of Reportable Transactions

U.S. taxpayers are required to report certain transactions that give rise to a loss in excess of certain thresholds (a "Reportable Transaction"). Under these regulations, if the debt securities are denominated in a foreign currency, a U.S. holder (or a U.S. alien holder that holds the debt securities in connection with a U.S. trade or business) that recognizes a loss with respect to the notes that is characterized as an ordinary loss due to changes in currency exchange rates (under any of the rules discussed above) would be required to report the loss on Internal Revenue Service Form 8886 (Reportable Transaction Statement) if the loss exceeds the thresholds set forth in the regulations. For individuals and trusts, this loss threshold is \$50,000 in any single taxable year. For other types of taxpayers and other types of losses, the thresholds are higher. You should consult with your tax advisor regarding any tax filing and reporting obligations that may apply in connection with acquiring, owning and disposing of debt securities.

Taxation of Ordinary Shares and Preference Shares

Dividends

Under the U.S. federal income tax laws, and subject to the passive foreign investment company, or PFIC, rules discussed below, if you are a U.S. holder, the gross amount of any dividend we pay out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) is subject to U.S. federal income taxation. If you are a noncorporate U.S. holder, dividends paid to you that constitute qualified dividend income will be taxable to you at the special reduced rate normally applicable to long-term capital gains provided that you hold the shares or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date or, in the case of preference shares, if the dividend is attributable to a period or periods aggregating over 366 days, provided that you hold the preference shares for more than 90 days during the 181-day period beginning 90 days before the ex-dividend date and meet other holding period requirements. Dividends we pay with respect to the shares or ADSs generally will be qualified dividend income. Distributions in excess of current and accumulated earnings and profits, as determined for U.S. federal income tax purposes, will be treated as a non-taxable return of capital to the extent of your basis in the shares or ADSs and thereafter as capital gain.

The dividend is taxable to you when you, in the case of shares, or the depositary, in the case of ADSs, receive the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to U.S. corporations in respect of dividends received from other U.S. corporations. In the case of ordinary shares and preference shares, the amount of the dividend distribution that you must include in your income as a U.S. holder will be the U.S. dollar value of the pound sterling payments made, determined at the spot pound sterling/U.S. dollar rate on the date the dividend distribution is includible in your income, regardless of whether the payment is in fact converted into U.S. dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date you include the dividend payment in income to the date you convert the payment into U.S. dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate

Table of Contents

applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes.

Dividends will be income from sources outside the United States, and will, depending on your circumstances, be "passive" or "general" income. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the long-term capital gains' tax rate.

Capital Gains

Subject to the PFIC rules discussed below, if you are a U.S. holder and you sell or otherwise dispose of your shares or ADSs, you will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the U.S. dollar value of the amount that you realize and your tax basis, determined in U.S. dollars, in your shares or ADSs. Capital gain of a noncorporate U.S. holder is generally taxed at the long-term capital gains' tax rate where the holder has a holding period greater than one year. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

PFIC Rules

Vodafone believes that shares and ADSs should not be treated as stock of a PFIC for United States federal income tax purposes, but this conclusion is a factual determination that is made annually and thus may be subject to change. If Vodafone were to be treated as a PFIC, unless a U.S. holder elects to be taxed annually on a mark-to-market basis with respect to the shares or ADSs, gain realized on the sale or other disposition of your shares or ADSs would in general not be treated as capital gain. Instead, if you are a U.S. holder, you would be treated as if you had realized such gain and certain "excess distributions" ratably over your holding period for the shares or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, together with an interest charge in respect of the tax attributable to each such year. With certain exceptions, your shares or ADSs will be treated as stock in a PFIC if Vodafone were a PFIC at any time during your holding period in your shares or ADSs. Dividends that you receive from Vodafone will not be eligible for the special tax rates applicable to qualified dividend income if Vodafone is treated as a PFIC with respect to you either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

United States Alien Holders

This subsection describes the tax consequences to a U.S. alien holder of acquiring, owning and disposing of ordinary shares or ADSs, preference shares or debt securities that we may issue. You are a U.S. alien holder if you are a beneficial owner of an offered security and you are, for U.S. federal income tax purposes:

a nonresident alien individual;

a foreign corporation;

a foreign partnership; or

an estate or trust that in either case is not subject to U.S. federal income tax on a net income basis on income or gain from a debt security.

If you are a U.S. holder, this subsection does not apply to you.

Interest on Debt Securities

Under U.S. federal income tax law, and subject to the discussion of backup withholding below, if you are a U.S. alien holder, interest on a debt security paid to you is exempt from U.S. federal income tax, including withholding tax, whether or not you are engaged in a trade or business in the United States, unless:

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

you are an insurance company carrying on a U.S. insurance business to which the interest is attributable, within the meaning of the Internal Revenue Code, or

Table of Contents

you have an office or other fixed place of business in the United States to which the interest is attributable and derive the interest in the active conduct of a banking, financing or similar business within the United States.

Dividends on Shares or ADSs

If you are a U.S. alien holder, dividends paid to you in respect of shares or ADSs will not be subject to U.S. federal income tax unless the dividends are "effectively connected" with your conduct of a trade or business within the United States, and, if required by an applicable income tax treaty as a condition for subjecting you to U.S. taxation on a net income basis, the dividends are attributable to a permanent establishment that you maintain in the United States. In such cases you generally will be taxed in the same manner as a U.S. holder. If you are a corporate U.S. alien holder, "effectively connected" dividends may, under certain circumstances, be subject to an additional "branch profits tax" at a rate of 30% or a lower rate if you are eligible for the benefits of an income tax treaty that provides for a lower rate.

Capital Gains

If you are a U.S. alien holder, you generally will not be subject to U.S. federal income tax on gain realized on the sale, exchange or retirement of an ordinary share or ADS, preference share or debt security unless:

the gain is effectively connected with your conduct of a trade or business in the United States, and the gain is attributable to a permanent establishment that you maintain in the United States if that is required by an applicable income tax treaty as a condition for subjecting you to U.S. taxation on a net income basis, or

you are an individual, you are present in the United States for 183 or more days during the taxable year in which the gain is realized and certain other conditions exist.

Information Reporting and Backup Withholding

If you are a noncorporate U.S. holder, information reporting requirements on Internal Revenue Service Form 1099 generally will apply to:

payments of principal, interest on a debt security, accrued OID on a discount debt security, and dividends or other taxable distributions with respect to shares or ADSs within the United States, including payments made by wire transfer from outside the United States to an account you maintain in the United States; and

the payment of the proceeds from the sale of an offered security effected at a U.S. office of a broker.

Additionally, backup withholding will apply to such payments if you are a noncorporate U.S. holder that:

fails to provide an accurate taxpayer identification number;

is notified by the United States Internal Revenue Service that you have failed to report all interest and dividends required to be shown on your federal income tax returns; or

in certain circumstances, fails to comply with applicable certification requirements.

If you are a U.S. alien holder, you are generally exempt from backup withholding and information reporting requirements with respect to:

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

payments of principal and interest on a debt security or dividends with respect to shares or ADS made to you outside the United States by us or another non-U.S. payor; and

Table of Contents

other payments of principal, interest and dividends and the payment of the proceeds from the sale of an offered security effected at a U.S. office of a broker, as long as the income associated with such payments is otherwise exempt from U.S. federal income tax; and:

the payor or broker does not have actual knowledge or reason to know that you are a U.S. person and you have furnished to the payor or broker:

an Internal Revenue Service Form W-8BEN or an acceptable substitute form upon which you certify, under penalties of perjury, that you are a non-U.S. person; or

other documentation upon which it may rely to treat the payments as made to a non-U.S. person in accordance with U.S. Treasury regulations; or

you otherwise establish an exemption.

Payment of the proceeds from the sale of an offered security effected at a foreign office of a broker generally will not be subject to information reporting or backup withholding. However, a sale of an offered security that is effected at a foreign office of a broker will be subject to information reporting and backup withholding if:

the proceeds are transferred to an account maintained by you in the United States;

the payment of proceeds or the confirmation of the sale is mailed to you at a U.S. address; or

the sale has some other specified connection with the United States as provided in U.S. Treasury regulations,

unless the broker does not have actual knowledge or reason to know that you are a U.S. person and the documentation requirements described above are met or you otherwise establish an exemption. In addition, a sale of an offered security effected at a foreign office of a broker will be subject to information reporting if the broker is:

a U.S. person;

a controlled foreign corporation for U.S. tax purposes;

a foreign person 50% or more of whose gross income is effectively connected with the conduct of a U.S. trade or business for a specified three-year period; or

a foreign partnership, if at any time during its tax year:

one or more of its partners are "U.S. persons", as defined in U.S. Treasury regulations, who in the aggregate hold more than 50% of the income or capital interest in the partnership; or

such foreign partnership is engaged in the conduct of a U.S. trade or business,

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

unless the broker does not have actual knowledge or reason to know that you are a U.S. person and the documentation requirements described above are met or you otherwise establish an exemption. Backup withholding will apply if the sale is subject to information reporting and the broker has actual knowledge that you are a U.S. person. You generally may obtain a refund of any amounts withheld under the backup withholding rules that exceed your income tax liability by filing a refund claim with the United States Internal Revenue Service.

Foreign Financial Asset Reporting Legislation enacted in March of 2010 imposes reporting requirements on the holding of certain foreign financial assets, including debt and equity of foreign entities, if the aggregate value of all of these assets exceeds \$50,000 at the end of the taxable year or \$75,000 at any time during the taxable year. Our debt securities, shares or ADSs are expected to constitute foreign financial assets subject to these requirements unless they are held in an account at a domestic financial institution. You should consult your tax advisor regarding the application of this legislation.

Table of Contents

PLAN OF DISTRIBUTION

We may sell the securities offered by this prospectus through agents, underwriters or dealers, or directly to one or more purchasers. In addition, third parties may sell securities under the registration statement for their own account.

The prospectus supplement relating to any offering will identify or describe:

any underwriter, dealers or agents;

their compensation;

the net proceeds to us;

the purchase price of the securities;

the initial public offering price of the securities; and

any exchange on which the securities will be listed.

Agents

We may designate agents who agree to use their reasonable efforts to solicit purchases of securities during the term of their appointment to sell securities on a continuing basis.

We may enter into derivative transactions with third parties, or sell securities not covered by this prospectus to third parties in privately negotiated transactions. If the applicable prospectus supplement so indicates, in connection with those derivatives, the third parties may sell securities covered by this prospectus and the applicable prospectus supplement, including in short sale transactions. If so, the third party may use securities pledged by us or borrowed from us or others to settle those sales or to close out any related open borrowings of stock, and may use securities received from us in settlement of those derivatives to close out any related open borrowings of stock. The third party in such sale transactions will be an underwriter and, if not identified in this prospectus, will be identified in the applicable prospectus supplement (or a post-effective amendment).

Underwriters

If we use underwriters for the sale of securities, they will acquire securities for their own account. The underwriters may resell the securities from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. Unless we otherwise state in the applicable prospectus supplement, various conditions will apply to the underwriters' obligation to purchase securities, and the underwriters will be obligated to purchase all of the securities contemplated in an offering if they purchase any of such securities. Any initial public offering price and any discounts or concessions allowed or reallocated or paid to dealers may be changed from time to time.

Selling Restrictions

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State"), each underwriter will represent and agree, and each further underwriter will be required to represent and agree, that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "Relevant Implementation

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

Date") it has not made and will not make an offer of securities which are the subject of the offering contemplated by this prospectus as completed by the final terms in relation thereto to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of securities to the public in that Relevant Member State:

- (a) if the final terms in relation to the securities specify that an offer of those securities may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Relevant Member State (a "Non-exempt Offer"), following the date of publication of a prospectus in relation to such

Table of Contents

securities which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such prospectus has subsequently been completed by the final terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or final terms, as applicable, and the Company has consented in writing to its use for the purpose of such Non-exempt Offer;

- (b) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (c) at any time to fewer than 100 or, if the Relevant Member State has implemented the relevant provision of the 2010 PD Amending Directive, 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant underwriter or underwriters nominated by us for any such offer; or
- (d) at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of securities referred to in (b) to (d) above shall require us or any underwriter to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression an "offer of securities to the public" in relation to any securities in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the securities to be offered so as to enable an investor to decide to purchase or subscribe the securities, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, the expression "Prospectus Directive" means Directive 2003/7 I/EC (and amendments thereto, including the 2010 PD Amending Directive, to the extent implemented in the Relevant Member State) and includes any relevant implementing measure in each Relevant Member State, and the expression "2010 PD Amending Directive" means Directive 2010/73/EU.

Each underwriter will represent, warrant and agree that, in connection with the distribution of the securities:

- (a) in relation to any securities which have a maturity of less than one year (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business; and (ii) it has not offered or sold and will not offer or sell the securities other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the securities would otherwise constitute a contravention of Section 19 of the Financial Services and Markets Act 2000 ("FSMA") by the Company;
- (b) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the securities in, from or otherwise involving the United Kingdom; and
- (c) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any securities in circumstances in which Section 21(1) of the FSMA does not apply to the Company.

Dealers

If we use dealers in the sale, unless we otherwise indicate in the applicable prospectus supplement, we will sell securities to the dealers as principals. The dealers may then resell the securities to the public at varying prices that the dealers may determine at the time of resale.

Table of Contents

Direct Sales

We may also sell securities directly without using agents, underwriters, or dealers.

Securities Act; Indemnification

Underwriters, dealers and agents that participate in the distribution of the securities may be underwriters as defined in the Securities Act, and any discounts or commissions they receive from us and any profit on their resale of securities may be treated as underwriting discounts and commissions under the Securities Act. Agreements that we will enter into with underwriters, dealers or agents may entitle them to indemnification by us against various civil liabilities. These include liabilities under the Securities Act. The agreements may also entitle them to contribution for payments which they may be required to make as a result of these liabilities. Underwriters, dealers and agents may be customers of, engage in transactions with, or perform services for, us in the ordinary course of business.

Market Making

In the event that we do not list securities of any type or series on a U.S. national securities exchange, various broker-dealers may make a market in the securities, but will have no obligation to do so, and may discontinue any market making at any time without notice. Consequently, it may be the case that no broker-dealer will make a market in securities of any series or that the liquidity of the trading market for the securities will be limited.

VALIDITY OF SECURITIES

The validity of the debt securities, warrants and preference shares will be passed upon for us by Linklaters LLP or any other law firm named in the applicable prospectus supplement as to certain matters of English and New York law. The validity of the debt securities and debt warrants will be passed upon for any underwriters or agents by Cleary Gottlieb Steen & Hamilton LLP or any other law firm named in the applicable prospectus supplement as to certain matters of New York law.

EXPERTS

The consolidated financial statements of Vodafone Group Plc incorporated in this prospectus by reference from the Annual Report on Form 20-F of Vodafone Group Plc, and the effectiveness of Vodafone Group Plc's internal control over financial reporting, have been audited by Deloitte LLP, an independent registered public accounting firm, as stated in their reports which are incorporated herein by reference. Such financial statements have been so incorporated in reliance upon the reports of such firm given upon their authority as experts in accounting and auditing.

The consolidated financial statements of Cellco Partnership d/b/a Verizon Wireless incorporated in this prospectus by reference from the Annual Report on Form 20-F of Vodafone Group Plc have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report dated February 26, 2013 (June 7, 2013 as to Note 11), which is incorporated herein by reference. Such consolidated financial statements have been so incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

ENFORCEABILITY OF CERTAIN CIVIL LIABILITIES

We are a public limited company incorporated under the laws of England and Wales. Many of our directors and officers, and some of the experts named in this prospectus, reside outside the United States, principally in the United Kingdom. In addition, although we have substantial assets in the United States, a large portion of our assets and the assets of our directors and officers are located outside of the United States. As a result, U.S. investors may find it difficult in a lawsuit based on the civil liability provisions of the U.S. federal securities laws:

(1)

to effect service within the United States upon us or our directors and officers located outside the United States;

Table of Contents

- (2) to enforce in U.S. courts or outside the United States judgments obtained against us or those persons in U.S. courts;
- (3) to enforce in U.S. courts judgments obtained against us or those persons in courts in jurisdictions outside the United States; and
- (4) to enforce against us or those persons in the United Kingdom, whether in original actions or in actions for the enforcement of judgments of U.S. courts, civil liabilities based solely upon the U.S. federal securities laws.

**PART II OF FORM F-3
INFORMATION NOT REQUIRED IN PROSPECTUS**

Item 8. *Indemnification of Directors and Officers*

Article 145 of Vodafone Group Public Limited Company's (the "Company") Articles of Association provides:

"145.1 Subject to the provisions of, and so far as may be permitted by and consistent with, the Companies Acts, rules made by the UK Listing Authority and local law as applicable, every director, Secretary and officer of the Company and of each Associated Company of the Company may be indemnified by the Company out of its own funds against:

any liability incurred by or attaching to him in connection with any negligence, default, breach of duty or breach of trust by him in relation to the Company or any Associated Company of the Company other than in the case of a director of the Company or any Associated Company:

- (i) any liability to the Company or any Associated Company; and
- (ii) liability of the kind referred to in Section 234(3) of the Companies Act 2006; and

any other liability incurred by or attaching to him in the actual or purported execution and/or discharge of his duties and/or the exercise or purported exercise of his powers and/or otherwise in relation to or in connection with his duties, powers or office."

"145.2 Subject to the provisions of, and so far as may be permitted by and consistent with, the Companies Acts, the rules of the UK Listing Authority and local law as applicable, every director, Secretary and officer of the Company and of each Associated Company of the Company may be indemnified by the Company out of its own funds against:

any liability incurred by or attaching to him in connection with any negligence, default, breach of duty or breach of trust by him in relation to the Company or any Associated Company of the Company, if it is the trustee of an occupational pension scheme (within the meaning of Section 235(6) of the Companies Act 2006), in so far as such liability relates to the Company's or any such Associated Companies' activities as trustee of such occupational pension scheme and other than in the case of a director of the Company or any Associated Company any liability of the kind referred to in Section 235(3) of the Companies Act 2006; and

any other liability incurred by or attaching to him in the actual or purported execution and/or discharge of his duties and/or the exercise or purported exercise of his powers and/or otherwise in relation to or in connection with his duties, powers or office."

"145.3 Where a director, Secretary or officer is indemnified against any liability in accordance with this Article 145, such indemnity shall extend to all costs, charges, losses, expenses and liabilities incurred by him in relation thereto."

"145.4 In this Article Associated Company shall have the meaning given by Section 256 of the Companies Act 2006."

"145.5 So far as the Companies Acts allow, the Secretary and other officers, who are not directors of the Company or an Associated Company of the Company are exempted from any liability to the Company or any Associated Company of the Company where that liability would be covered by the indemnity in Article 145.1."

Table of Contents

Sections 232 to 235 of the Companies Act 2006 provide as follows:

"232. Provisions protecting directors from liability

1. Any provision that purports to exempt a director of a company (to any extent) from any liability that would otherwise attach to him in connection with any negligence, default, breach of duty or breach of trust in relation to the company is void.
2. Any provision by which a company directly or indirectly provides an indemnity (to any extent) for a director of the company, or of an associated company, against any liability attaching to him in connection with any negligence, default, breach of duty or breach of trust in relation to the company of which he is a director is void, except as permitted by:
 - (a) section 233 (provision of insurance),
 - (b) section 234 (qualifying third party indemnity provision), or
 - (c) section 235 (qualifying pension scheme indemnity provision).
3. This section applies to any provision, whether contained in a company's articles or in any contract with the company or otherwise.
4. Nothing in this section prevents a company's articles from making such provision as has previously been lawful for dealing with conflicts of interest.

233. Provisions of insurance

1. Section 232(2) (voidness of provisions for indemnifying directors) does not prevent a company from purchasing and maintaining for a director of the company, or of an associated company, insurance against any such liability as is mentioned in that subsection.

234. Qualifying third party indemnity provision

1. Section 232(2) (voidness of provisions for indemnifying directors) does not apply to qualifying third party indemnity provision.
2. Third party indemnity provision means provision for indemnity against liability incurred by the director to a person other than the company or an associated company. Such provision is qualifying third party indemnity provision if the following requirements are met.
3. The provision must not provide any indemnity against:
 - (a) any liability of the director to pay:
 - (i)

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

a fine imposed in criminal proceedings, or

(ii)

a sum payable to a regulatory authority by way of a penalty in respect of non-compliance with any requirement of a regulatory nature (however arising); or

(b)

any liability incurred by the director:

(i)

in defending criminal proceedings in which he is convicted, or

(ii)

in defending civil proceedings brought by the company, or an associated company, in which judgment is given against him, or

(iii)

in connection with an application for relief (see subsection (6)) in which the court refuses to grant him relief.

4.

The references in subsection (3)(b) to a conviction, judgment or refusal of relief are to the final decision in the proceedings.

Table of Contents

5.
 - For this purpose:
 - (a)
 - a conviction, judgment or refusal of relief becomes final:
 - (i) if not appealed against, at the end of the period for bringing an appeal, or
 - (ii) if appealed against, at the time when the appeal (or any further appeal) is disposed of; and
 - (b) an appeal is disposed of:
 - (i) if it is determined and the period for bringing any further appeal has ended, or
 - (ii) if it is abandoned or otherwise ceases to have effect.
 6.

The reference in subsection (3)(b)(iii) to an application for relief is to an application for relief under:

section 661(3) or (4) (power of court to grant relief in case of acquisition of shares by innocent nominee), or

section 1157 (general power of court to grant relief in case of honest and reasonable conduct).
235. *Qualifying pension scheme indemnity provision*
 1.

Section 232(2) (voidness of provisions for indemnifying directors) does not apply to qualifying pension scheme indemnity provision.
 2.

Pension scheme indemnity provision means provision indemnifying a director of a company that is a trustee of an occupational pension scheme against liability incurred in connection with the company's activities as trustee of the scheme. Such provision is qualifying pension scheme indemnity provision if the following requirements are met.
 3.

The provision must not provide any indemnity against:

 - (a)
 - any liability of the director to pay
 - (i) a fine imposed in criminal proceedings, or
 - (ii) a sum payable to a regulatory authority by way of a penalty in respect of non-compliance with any requirement of a regulatory nature (however arising); or
 - (b) any liability incurred by the director in defending criminal proceedings in which he is convicted.
 4.

The reference in subsection (3)(b) to a conviction is to the final decision in the proceedings.
 - 5.

Edgar Filing: BANK OF MONTREAL /CAN/ - Form 424B2

For this purpose:

- (a) a conviction becomes final:
 - (i) if not appealed against, at the end of the period for bringing an appeal, or
 - (ii) if appealed against, at the time when the appeal (or any further appeal) is disposed of; and
- (b) an appeal is disposed of:
 - (i) if it is determined and the period for bringing any further appeal has ended, or
 - (ii) if it is abandoned or otherwise ceases to have effect.

6.

In this section "occupational pension scheme" means an occupational pension scheme as defined in section 150(5) of the Finance Act 2004 (c. 12) that is established under a trust."

Table of Contents

Section 1157 of the Companies Act 2006 provides as follows:

"1157. *Power of court to grant relief in certain cases*

1.
 - If in proceedings for negligence, default, breach of duty or breach of trust against
 - (a)
 - an officer of a company, or
 - (b)
 - a person employed by a company as auditor (whether he is or is not an officer of the company),
 - it appears to the court hearing the case that the officer or person is or may be liable but that he acted honestly and reasonably, and that having regard to all the circumstances of the case (including those connected with his appointment) he ought fairly to be excused, the court may relieve him, either wholly or in part, from his liability on such terms as it thinks fit.
2.
 - If any such officer or person has reason to apprehend that a claim will or might be made against him in respect of negligence, default, breach of duty or breach of trust
 - (a)
 - he may apply to the court for relief, and
 - (b)
 - the court has the same power to relieve him as it would have had if it had been a court before which proceedings against him for negligence, default, breach of duty or breach of trust had been brought.
3.

Where a case to which subsection (1) applies is being tried by a judge with a jury, the judge, after hearing the evidence, may, if he is satisfied that the defendant (in Scotland, the defender) ought in pursuance of that subsection to be relieved either in whole or in part from the liability sought to be enforced against him, withdraw the case from the jury and forthwith direct judgment to be entered for the defendant (in Scotland, grant decree of absolvitor) on such terms as to costs (in Scotland, expenses) or otherwise as the judge may think proper."

The Company has obtained directors' and officers' insurance coverage, which, subject to policy terms and limitations, includes coverage to reimburse the Company for amounts that it may be required or permitted by law to pay or indemnify its directors or officers."

Item 10. Undertakings

The undersigned registrant hereby undertakes:

- (1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:
 - (i) To include any prospectus required by Section 10(a) (3) of the Securities Act;
 - (ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the SEC pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and
 - (iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

provided, however, that paragraphs (1)(i), (1)(ii) and (1)(iii) do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the SEC by the registrant pursuant to Section 13 or Section 15(d) of the Exchange Act that are incorporated by reference in the registration statement, or is contained in a form of prospectus filed pursuant to Rule 424(b) that is part of the registration statement;

- (2) That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof;
- (3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering;
- (4) To file a post-effective amendment to the registration statement to include any financial statements required by Item 8. A. of Form 20-F at the start of any delayed offering or throughout a continuous offering. Financial statements and information otherwise required by Section 10(a)(3) of the Act need not be furnished, provided, that the registrant includes in the prospectus, by means of a post-effective amendment, financial statements required pursuant to this paragraph (4) and other information necessary to ensure that all other information in the prospectus is at least as current as the date of those financial statements. Notwithstanding the foregoing, a post-effective amendment need not be filed to include financial statements and information required by Section 10(a)(3) of the Act or Item 8. A. of Form 20-F if such financial statements and information are contained in periodic reports filed with or furnished to the SEC by the registrant pursuant to Section 13 or Section 15 (d) of the Exchange Act that are incorporated by reference in the registration statement;
- (5) That, for the purpose of determining liability under the Securities Act to any purchaser:
 - (i) Each prospectus filed by a registrant pursuant to Rule 424(b)(3) shall be deemed to be part of the registration statement as of the date the filed prospectus was deemed part of and included in the registration statement; and

(ii)

Each prospectus required to be filed pursuant to Rule 424(b)(2), (b)(5) or (b)(7) as part of a registration statement in reliance on Rule 430B relating to an offering made pursuant to

II-7

Table of Contents

Rule 415(a)(1)(i), (vii) or (x) for the purpose of providing the information required by Section 10(a) of the Securities Act shall be deemed to be part of and included in the registration statement as of the earlier of the date such form of prospectus is first used after effectiveness or the date of the first contract of sale of securities in the offering described in the prospectus. As provided in Rule 430B, for liability purposes of the issuer and any person that is at that date an underwriter, such date shall be deemed to be a new effective date of the registration statement relating to the securities in the registration statement to which the prospectus relates, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such effective date, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such effective date;

(6)

That, for the purpose of determining liability of a registrant under the Securities Act to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

(i)

Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;

(ii)

Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;

(iii)

The portion of any other free writing prospectus relating to the offering containing material information about an undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and

(iv)

Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

The undersigned registrant hereby undertakes that, for purposes of determining any liability under the Securities Act, each filing of the registrant's annual report pursuant to Section 13(a) or 15(d) of the Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Exchange Act) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant, of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted against the registrant by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.
