CBD Announces Third Quarter 2006 Results

São Paulo, Brazil, November 8, 2006 - Companhia Brasileira de Distribuição (CBD) (BOVESPA: PCAR4; NYSE: CBD), announces its third quarter 2006 results. The Company's operating and financial information, unless otherwise indicated, is presented on a consolidated basis and denominated in *Reais*, in accordance with the Brazilian Corporate Law. Comparisons in this document relate to 2005.

Highlights

Financial

Net sales totaled R\$ 3,298.9 million in the 3Q06, a 2.5% increase year-over-year;

R\$ 94.4 million provision in the present quarter - referring to the fine on the soybean transactions - negatively impacted quarterly results;

Pro forma gross margin (excluding the provision effect) reached 28.0% in the quarter, due to the increased competitiveness strategy of reducing prices;

Operating expenses as a percentage of net sales dropped from 21.3% in the 3Q05 to 20.9% in the 3Q06;

Pro forma EBITDA amounted to R\$ 233.7 million in the quarter, with a 7.1% margin;

Pro Forma Net Income totaled R\$ 31.5 million.

Operating

The Company will firmly maintain its competitive price strategy, which is aimed at increasing sales and market share gains, and will seek price competitiveness in the micro-markets in which the stores are located;

CBD expects to reach higher same store sales in the last quarter as the price strategy consolidates;

Industry data indicate that CBD had market share gains in the period. Additionally, the number of customers in the Company stores increased;

Sales of non-food products maintained substantial growth rates in the period (17.0%);

FIC (Financeira Itaú CBD) increased its customer portfolio, exceeding 5 million customers and having revenues increased by 40%, when comparing to the previous quarter. CBD expects FIC to reach its break-even in 2007.

Companhia Brasileira de Distribuição (CBD) is the largest Brazilian retailer, with 534 stores in 15 Brazilian states. It operates under three formats: supermarkets (**Pão de Açúcar, CompreBem and Sendas**), hypermarkets (**Extra**) and consumer electronics/home appliance stores (**Extra-Eletrô**).

Sales Performance

Total net sales increased by 2.5% in the quarter.

The Company's gross sales amounted to R\$3,914.6 million in the third quarter of 2006, a 1.3% increase compared to the previous year. Over the same period, the Company recorded net sales totaling R\$3,298.9 million, a 2.5% growth as compared to 2005. Year to date, gross sales amounted to R\$11,816.6 million, a 1.9% increase in relation to the first nine months of 2005, and net sales totaled R\$9,937.2 million, a 3.1% growth year-over-year.

Note: Same-store sales figures refer to only those stores that have been operational for at least 12 months.

Same store - Sales based on the same store concept had a slightly positive performance in the third quarter, with a 0.2% growth (gross sales) and a 1.5% increase (net sales). This result was primarily due to the sales of non-food products, which, even after the World Cup, maintained substantial growth rates in the period (17.0%), with a special highlight to the consumer electronics category (especially IT products). Despite its still low share in the Company's total sales, the e-commerce site (Extra.com) has also presented a substantial growth in the year. In addition, industry data indicate that CBD had market share gains in the period.

Food Still under the impact of price deflation in relevant product categories (primarily perishable foods and commodities) and also affected by the price reduction, as a consequence of the strategy adopted by the Company, the sales of food products dropped 5.1% in the quarter. This situation affected CBD's sales performance in July and August. However, in September, as a result of the price competitiveness strategy implemented over

the last months, food sales began to increase in volume (primarily in grocery), when compared to the previous months. In addition, the number of customers in the Company's stores increased.

Outlook For the next months, the Company will firmly maintain its competitive price strategy, which is aimed at increasing sales and market share gains, and will seek price competitiveness in the **micro-markets in which the stores are located**. CBD still expects to reach higher sales based on the same store concept in the last quarter as the price strategy consolidates.

Operating Performance

Focus on price competitiveness and expense reductions.

CBD has achieved important results related to its expense reductions, low expense dilution notwithstanding. The gains obtained enabled the Company to expand the investment in higher price competitiveness when compared to 2005 and to the previous quarter, which will be fundamental to achieve future market share gains. In order to support the competitiveness strategy, the pursuit of lower expenses will continue over the next quarters.

On October 31, 2006, the Company chose to adhere to the state fiscal amnesty program governed by Law no. 12,399/06, ratified by the Governor of the State of São Paulo, who partly and considerably pardoned the collection of interest and fine in the payment of fiscal debts resulting from taxable events related to the value-added tax (ICMS), occurred up to December 31, 2005. Thus, the Company paid the total debt related to tax assessments by transactions of purchase, industrialization and sales for exports of soybean and soybean byproducts (as per note disclosed in the Quarterly Information ITR of September 2005) on October 31, 2006, which after the 90% reduction ratified in the amount of fines and 50% in the amount of interest, totaled R\$96.8 million.

Meeting the requirements of NPC 10 - Subsequent Events to the Balance Sheet Date and CVM Resolution no. 505 as of June 19, 2006, the Company accounted, on September 30, 2006, the full payment made on October 31, 2006.

In accordance with the methodical interpretation of the sole paragraph of article 1 of Law 12,399/06, mentioned above, the taxpayer's adhesion to said amnesty does not imply waiver of right and therefore, it may not be used as a justification or foundation for questioning any other legal requirement.

Therefore, the total effect of the provision negatively impacted results in R\$96.8 million, of which R\$2.4 million had already been provisioned in the previous quarter and R\$ 94.4 million had impact in 3Q06. Of this total, R\$51.9 million had an impact on the Cost of Goods Sold (COGS) and R\$42.4 million affected the financial expenses (portion related to fines and interest). The effect net of tax income in net income was R\$74.9 million in the quarter, as shown in the table below:

Income Statement - Pro forma reconciliation (thousand R\$)

The following comments were prepared to reflect the Company's operating performance as well as its results in the quarter and therefore do not take into account the provision adjustment shown above, since it represents a nonrecurring item that affected the results in the period. Full pro forma income statement is presented in the table on page 10.

A 28.0% pro forma gross margin in the quarter
Price reduction strategy contributed to this performance

Pro forma gross income totaled R\$924.7 million in the quarter, with a 28.0% gross margin, 240 basis points lower than the 30.4% reported over the same period of the previous year. This performance was the result of the price reduction strategy adopted since June, i.e., gross margin was affected only during one month of last quarter while it was impacted during all months of the third quarter due to the increased competitiveness.

CBD continued its product price revision process aimed at reducing discrepancies compared to its main competitors and enhancing the price perception/image of some highly representative items in the consumers' cart. In addition, CBD adopted a more aggressive price reduction strategy for the traffic-generating products. This strategy brought about substantial results. Based on this strategy, the Company expects to present higher sales levels over the next months which, together with expense reductions, will offset the investment in prices.

The increase of sales based on the same store concept, coupled with the higher market share (based on data recently published by the competition) at the end of the quarter, indicates that the competitiveness strategy is on the right track.

Operating Expenses

Operating expenses level is lower than in the previous year, despite weak sales and nonrecurring expenses.

Operating expenses amounted to R\$691.0 million in the quarter, only a 1.0% growth as compared to the previous year. As a percentage of net sales, expenses amounted to 20.9%, lower than in the same period of the previous year (21.3%). This is a significant performance, since it was achieved despite a series of negative events, such as (i) current sales with low dilution, (ii) nonrecurring expenses, which had a negative impact on the quarter (R\$11.5 million), (iii) increases in the main expense accounts, such as utilities and personnel, (iv) additional lease expenses of the 60 stores that were not reflected in the previous year (R\$27.7 million).

Nonrecurring expenses had a R\$6.9 million impact on general and administrative expenses in the quarter. Net of this effect, nominal expenses would have been lower than in the previous year, as well as the expenses as a percentage of net sales, which would have been 3.3% (as compared to 3.5% in the previous year).

The highlight was selling expenses, which, despite nonrecurring expenses totaling R\$4.6 million, increased only 0.6% in relation to the previous year and 17.4% on the sales in the quarter (as compared to 17.7% in the same quarter of 2005). Net of nonrecurring expenditures, selling expenses as a net sales percentage would have been 17.2%.

Pro Forma EBITDA Margin was 7.1%

Price competitiveness strategy and nonrecurring expenses affected EBITDA in the period

Pro forma EBITDA for the quarter totaled R\$233.7 million, with a 7.1% margin which corresponds to a 20.4% drop in relation to the same period of 2005. This result was highly influenced by the Company's price competitiveness strategy and, as a result, by the 240 basis points reduction in the period pro forma gross margin. In addition, sales for the quarter were weakened and impacted by price decreases and did not contribute to a higher dilution of expenses.

Net of nonrecurring expenses and additional lease expenses of the 60 stores (which were not reflected in the previous year), EBITDA margin would have presented a 7.0% drop compared to the previous year, with an 8.3% EBITDA margin (9.1% over the same period of 2005).

Pro Forma Financial Income
Lower interest rates had a positive impact

The pro-forma net financial income was negative by R\$36.7 million in the quarter, an improvement compared to the R\$60.4 million negative financial income in the same period of previous year.

Financial expenses decreased from R\$185.7 million in previous year to R\$116.5 million this year, basically due to the decrease in nominal interest rates. As an example, the accumulated Interbank Deposit Certificate (CDI) variation decreased from 4.53% in 3Q05 to 3.51% in 3Q06.

Although net banking debt showed a R\$48.9 million growth year over year, the impact of interest rates decrease is most significant.

Gross bank indebtedness decreased by R\$142.9 million, reaching R\$1,947.7 million, whereas cash position decreased by R\$191.8 million (amounting to R\$1,409.7 million). The same positive impact occurred in the adjustments of tax contingencies and payment in installments, representing about 20% of the total financial expenses.

Total financial revenues decreased from R\$125.3 million in 2005 to R\$79.7 million in 2006. Besides the decrease of financial investment revenues due to the decline in interest rates, the promotional environment of credit sales continued to decrease the revenues with charges in installment sales.

The Company believes its current financial leverage is still low. EBITDA for the first nine months of the year was equivalent to 4.8 times net financial expenses. Net debt with banks was equivalent to 0.50 of EBITDA accumulated in the last four quarters.

Equity Income
Equity income is negative, but within the expected.

FIC (Financeira Itaú CBD), a company that offers financial products and services to CBD's customers, increased its customer portfolio in the quarter exceeding 5 million customers, with the following highlights: (i) over 617,000 credit card customers between general credit cards and exclusive store cards; (ii) 50,000 customers of the new personal loan product; (iii) 103,000 new credit plan contracts; and (iv) 108,000 new extended warranty contracts.

In order to reach this growth and prepare the ground for better results, the Company carried out a prepayment of expenses (infrastructure and development of products), with impact on the third quarter result, which was a negative R\$15.0 million for CBD. Net of this effect, the result arising from FIC this quarter would have been slightly lower than the R\$12.2 million obtained of the second quarter.

Revenues continue to follow a growth trend, having increased 40% in relation to the previous quarter. Default still remains high, although in line with the growth of the portfolio, presenting signs of improvement, which should become apparent as from the last quarter of this year.

At the end of the period, receivables amounted to R\$788 million through the products sold in the Company's 330 stores.

In line with the business development, we expect negative results to be reduced and break-even point to be achieved by FIC in 2007.

Non-Operating Income

Closing of stores and write-off of assets affect the results.

Net non-operating income for the quarter was a negative R\$12.6 million. This result was primarily due to the write-off of assets of closed stores (R\$4.4 million) and to the write-off of non-operating assets (R\$6.0 million).

Minority Interest: Sendas Distribuidora

Gross margin remains on the same level of 2Q06

Sendas Distribuidora's gross sales represented 19.2% of CBD's total sales and totaled R\$753.3 million in the quarter. Net sales amounted to R\$652.9 million.

Following the strategy of higher competitiveness that CBD has adopted since the last quarter, Sendas Distribuidora's gross margin totaled 25.3%, virtually the same level in relation to the previous quarter and 300 basis points lower than the gross margin of the 3Q05.

Even though impacted by nonrecurring expenditures amounting to R\$1.5 million in the period, operating expenses were 6.2% lower than in the same quarter of the previous year. In addition, sales have not yet shown a reaction so as to allow a higher dilution of the expenses of the quarter. As a result, EBITDA margin for the period was 1.7% (or 2.0% net of nonrecurring effects), lower than the 5.1% of the third quarter of 2005, due to the lower gross margin for the period.

Financial income was a negative R\$36.9 million, which had a strong influence on the results of Sendas Distribuidora. Net income for the quarter was a negative R\$42.2 million, generating a minority interest income for CBD amounting to R\$24.2 million (R\$15.9 million in the third quarter of 2005).

Pro Forma Net Income

Net income for the quarter strongly influenced by higher competitiveness and nonrecurring expenses.

Pro forma net income for the quarter amounted to R\$31.5 million, a 55.2% decrease in relation to the same period of 2005. This reduction was primarily due to a lower gross margin, which was a result of the price competitiveness strategy (lower by 240 basis points), by nonrecurring expenses, related to restructuring expenditures, in the amount of R\$11.5 million as well as by a non-operating income totaling R\$12.6 million.

The Company reported a net loss in the quarter amounting to R\$43.4 million, negatively impacted by the provision previously mentioned (please refer to comments in Operating Performance page 2). Accumulated net income in the first nine months totaled R\$57.8 million.

Investments

Amount allocated in the quarter totaled R\$226.9 million.

Investments for the period amounted to R\$226.9 million, as compared to R\$267.5 million in the third quarter of 2005, and were primarily directed to the construction of new stores to be opened in the fourth quarter, the opening of stores and the renovation of stores. In the first nine months of 2006, investments amounted to R\$520.5 million, as compared to R\$601.6 million in the previous year.

Third quarter highlights were:

- Opening of one Pão de Açúcar store in Piauí and one CompreBem store in São Paulo;
- Construction of 14 stores: four Extra hypermarkets (one in Brasília, one in Recife and two in São Paulo), eight CompreBem supermarkets (seven in São Paulo and one in Rio de Janeiro) and two Pão de Açúcar supermarkets (in São Paulo), all to be opened in the fourth quarter of 2006;
- Opening of two gas stations and one drugstore;
- Renovation of stores;

- Acquisition of land that will be used to build new stores;
- Investments in IT and logistics.

The information in the following tables was not reviewed by the independent auditors.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
