Review report of independent registered public accounting firm

To the Board of Directors and Shareholders of

Petróleo Brasileiro S.A. - Petrobras

Rio de Janeiro - Brazil

We have reviewed the accompanying condensed consolidated balance sheet of Petróleo Brasileiro S.A. - Petrobras and subsidiaries as of September 30, 2010, and the related condensed consolidated statements of operations, cash flows and changes in shareholders' equity for the nine-month periods ended September 30, 2010 and 2009. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the consolidated financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modification that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(except as otherwise indicated)

(unaudited)

1. Basis of Financial Statements Preparation

The accompanying unaudited consolidated financial statements of Petróleo Brasileiro S.A. - Petrobras and its subsidiaries (together referred as the Company) have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and the rules and regulations of the Securities and Exchange Commission (SEC) for interim financial statements. Accordingly they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. These unaudited consolidated financial statements and the accompanying notes should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2009 and the notes thereto.

The balance sheet at December 31, 2009 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

The consolidated financial statements as of September 30, 2010 and for the nine-month periods ended September 30, 2010 and 2009, included in this report, are unaudited. However, in management's opinion, such consolidated financial statements reflect all normal recurring adjustments that are necessary for a fair presentation. The results for the interim periods are not necessarily indicative of trends or of results expected for the full year ending December 31, 2010.

The preparation of these financial statements requires the use of estimates and assumptions to reflect the assets, liabilities, revenues and expenses reported in the financial statements, as well as amounts included in the notes thereto. Management reviews its estimates periodically, including those related to oil and gas reserves, pension and health care

liabilities, depreciation, depletion and amortization, abandonment costs, contingencies and income taxes. While the Company uses its best estimates and judgements, actual results could differ from those estimates as further confirming events occur.

Certain prior years amounts have been reclassified to conform to current year presentation standards. These reclassifications are not significant to the consolidated financial statements and had no impact on the Company's net income.

Events subsequent to September 30, 2010, were evaluated until the time of the Form 6-K filing with the Securities and Exchange Commission.

(unaudited)

Pursuant to Rule 436 (c) under the Securities Act of 1933 (the Act), this is not a report and should not be considered a part of any registration statement prepared or certified within the meanings of Sections 7 and 11 of the Act and therefore, the independent accountant's liability under Section 11 does not extend to the information included herein.

2. Accounting Policies

2.1 Recently Adopted Accounting Standards

a) Transfers and Servicing (ASC 860), Accounting for Transfers of Financial Assets (ASU 2009-16)

The FASB issued ASU 2009-16 in December 2009. This standard removes the concept of a Qualifying Special Purpose Entity (QSPE) and the exception for QSPE consolidation and clarifies the requirements for financial asset transfers eligible for sale accounting. ASU 2009-16 was adopted on January 1, 2010, and did not impact the Company's results of operations, financial position or liquidity.

b) Consolidation (ASC 810), Improvements to Financial Reporting by Enterprises Involved With Variable Interest Entities (ASU 2009-17)

The FASB issued ASU 2009-17 in December 2009. This standard became effective for the Company on January 1, 2010. ASU 2009-17 requires the enterprise to qualitatively assess if it is the primary beneficiary of a variable-interest entity (VIE), and, if so, the VIE must be consolidated. Additionally, this Statement requires continuous assessments of whether an enterprise is the primary beneficiary of a VIE. ASU 2009-17 was adopted on January 1, 2010, and did not impact the Company's results of operations, financial position or liquidity.

2.2 Change in accounting estimates

The Company changed at the beginning of 2010, as a consequence of the periodic assessment of the expected useful lives of its assets, depreciation rates from thermoelectric power plants and facilities from Refining, Transporting and Marketing segment, based on reports prepared by independent appraisers. The changes were accounted for prospectively in accordance ASC 250 (Accounting changes and error corrections) and the Company's results of operations were increased in US\$246, net of taxes, in the nine-month period ended September 30, 2010.

2. Accounting Policies (Continued)

2.3 IFRS adoption for local purposes

The Brazilian Corporation Law was amended in 2007 to permit Brazilian GAAP to converge with International Financial Reporting Standards, or IFRS, as issued by the International Accounting Standards Board, or IASB. The adoption of IFRS in Brazil is mandatory for the year ended December 31, 2010 and it is tax neutral in accordance with the current income tax legislation.

The Company chose to present its financial statements for local purposes for the first time in accordance with IFRS in the first quarter of 2010. The Company's financial statements prepared in accordance with U.S. GAAP were not affected by the adoption of IFRS other than dividends and profit sharing payable to our employees, which are based on the net income calculated under IFRS.

3. Derivative Instruments, Hedging and Risk Management Activities

The Company is exposed to a number of market risks arising from its normal course of business. Such market risks principally involve the possibility that changes in interest rates, foreign currency exchange rates or commodity prices will adversely affect the value of the Company's financial assets and liabilities or future cash flows and earnings.

Petrobras risk management is performed by means of its Board of Directors pursuant to a corporate policy risk management. In March 2010, regarding the new corporate governance model developed by the Company, the Financial Committee, in place of the Risk Management Committee, was organized by the Executive Board. Such a Committee is sponsored by the Financial Board and made up of all executive managers from the Financial area, and executive managers of Business can also be called to discuss about specific subjects. Among the Financial Committee liabilities, it shall evaluate risk exposures and establish guidelines to measure, supervise and manage the risk concerning the Company's operation. The Board of Directors shall be liable to decide about the issues.

The risk management policy of Petrobras aims at contributing towards an appropriate balance between its objectives for growth and return and its level of risk exposure, whether inherent to the exercise of its activities or arising from the context within which it operates, so that, through effective allocation of its physical, financial and human resources the Company may attain its strategic goals.

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)

The Company may use derivative and non-derivative instruments to implement its corporate risk management strategy. However, by using derivative instruments, the Company exposes itself to credit and market risk. Credit risk is the failure of a counterparty to perform under the terms of the derivative contract. Market risk is the possible adverse effect on the value of an asset or liability, including financial instruments that results from changes in interest rates, currency exchange rates, or commodity prices. The Company addresses credit risk by restricting the counterparties to such derivative financial instruments to major financial institutions. Market risk is managed by the Company's executive officers. The Company does not hold or issue derivative financial instruments for trading purposes.

a) Commodity price risk management

The Company is exposed to commodity price risks as a result of the fluctuation of crude oil and oil product prices. The Company's commodity risk management activities are primarily undertaken through the uses of future contracts traded on stock exchanges; and options and swaps entered into with major financial institutions. The Company does not use derivative contracts for speculative purposes.

The Company usually does not use derivatives to manage overall commodity price risk exposure, taking into consideration that the Company's business plan uses conservative price assumptions associated to the fact that, under normal market conditions, price fluctuations of commodities do not represent a substantial risk to achieve strategic objectives.

The decision to enter into hedging or non-hedging derivatives is reviewed periodically and recommended, or not, to the Risk Management Committee. If entering into derivative is indicated, in scenarios with a significant probability of adverse events, and such decision is approved by the Board of Directors, the derivative transactions should be carried out with the aim of protecting the Company's solvency, liquidity and execution of the corporate investment plan, considering an integrated analysis of all the Company's risk exposures.

Outstanding derivative contracts aimed to mitigate price risk exposures from specific transactions, in which positive or negative results in the derivative transactions are totally or partially offset by the opposite result in the physical positions. The transactions covered by commodity derivatives are certain cargoes traded from import and export operations and transactions between different geographical markets.

As a result of the Company's current price risk management, derivatives are contracted for short term operations, to mitigate the price risk of specific forecasted transactions. The operations are carried out on the New York Mercantile Exchange (NYMEX) and the Intercontinental Exchange (ICE), as well as on the international over-the-counter market.

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)

a) Commodity price risk management (Continued)

The Company's exposure from these contracts is limited to the difference between the contract value and market value on the volumes contracted. Crude oil future contracts are marked-to-market and related gains and losses are recognized in current period earnings, irrespective of when the physical crude sales occur.

The main parameters used in risk management for variations of Petrobras' oil and oil products prices are the cash flow at risk (CFAR) for medium-term assessments, Value at Risk (VAR) for short-term assessments, and Stop Loss. Corporate limits are defined for VAR and Stop Loss.

The hedges settled during the period from January to September 2010 corresponded to approximately 68% of the traded volume of imports and exports to and from Brazil plus the total volume of the products traded abroad.

The main counterparties of operations for derivatives for oil and oil products are the New York Stock Exchange (NYMEX), the Intercontinental Exchange, BNP Paribas, Shell (STASCO) and Morgan Stanley.

The commodity derivative contracts are reflected at fair value as either assets or liabilities on the Company's consolidated balance sheets, recognizing gain or losses in earnings, using market to market accounting, in the period of change.

As of September 30, 2010, the Company had the following outstanding commodity derivative contracts:

Commodity Contracts	Notional amount in thousands of bbl*
Maturity in 2010	As of September 30, 2010
Futures and Forward contracts	(10,673)
Option contracts	(9,834)

b) Foreign currency risk management

Exchange risk is one of the financial risks that the Company is exposed to originating from changes in the levels or volatility of exchange rates. With respect to the management of these risks, the Company seeks to identify and handle them in an integrated manner, seeking to assure efficient allocation of the resources earmarked for the derivative.

Taking advantage of operating in an integrated manner in the energy segment, the Company seeks, primarily, to identify or create natural risk mitigation, benefiting from the correlation between its income and expenses. In the specific case of exchange variations inherent to the contracts with the cost and remuneration involved in different currencies, this natural risk mitigation is carried out through allocating the cash investments between the real and the US dollar or another currency.

The risk management is based on the Company's net exposure. Periodical analyses of the exchange risk are prepared, assisting the decisions of the executive committee. The exchange risk management strategy involves the use of derivative instruments to minimize the exchange exposure of certain of the Company's obligations.

BR Distribuidora (wholly owned subsidiary) entered into an over the counter contract, not qualified as hedge accounting, for covering the trading margins inherent to exports (aviation segment) for foreign clients. The objective of the operation, contracted contemporaneously with the definition of the cost of the products exported, is to lock the

trading margins agreed with the foreign clients. Internal policy limits the volume of derivative contracts to the volume of products exported.

The over the counter contract is presented at fair value as either assets or liabilities on the Company's consolidated balance sheets, recognizing gains or losses in earnings, using market to market accounting, in the period of change.

As of September 30, 2010, the Company had the following foreign currency derivative contracts, not qualified as hedging accounting:

Foreign Currency	Notional Amount US\$ million
Sell USD / Pay BRL	149

Cash flow hedge

In September 2006, the Company contracted a hedge known as a cross currency swap for coverage of the bonds issued in Yens in order to fix the Company's costs in this operation in dollars. In a cross currency swap there is an exchange of interest rates in different currencies. The exchange rate of the Yen for the US dollar is fixed at the beginning of the transaction and remains fixed during its existence. The Company does not intend to settle these contracts before the end of the term.

The Company has qualified its cross currency swap as a cash flow hedge. Both at the inception of a hedge and on an ongoing basis, a cash flow hedge is expected to be highly effective in achieving to offset cash flows attributable to the hedged risk during the term of the hedge. Derivative instruments qualified as cash flow hedges are reflected as either assets or liabilities on the Company's consolidated balance sheets. Change in fair value, to the extent the hedge is

effective, is presented in accumulated other comprehensive income until the cash flows of the hedged item occurs.

Effectiveness tests are conducted quarterly in order to measure how the changes in the fair value or the cash flow of the hedged items are being absorbed by the hedge mechanisms. The effectiveness calculation indicated that the cross currency swap is highly effective to offset the variation in the cash flows of the bonds issued in Yens.

c) Interest rate risk management

The Company's interest rate risk is a function of the Company's long-term debt and to a lesser extent, its short-term debt. The Company's foreign currency floating rate debt is principally subject to fluctuations in LIBOR and the

Company's floating rate debt denominated in Reais is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP) as fixed by the National Monetary Counsel. The Company currently does not use derivative financial instruments to manage its exposure to fluctuations in interest rates.

b.1) Defined benefits plan (Continued)

The Company's obligation, through the Financial Commitment Agreement, presents a counterpart to the concessions made by the members/beneficiaries of the Petros Plan in the amendment of the plan's regulations, in relation to the benefits, and in the closing of existing litigations.

At September 30, 2010, Petrobras had long-term National Treasury Notes in the amount of US\$2,601 (US\$2,363 at December 31, 2009), acquired to balance liabilities with Petros, which will be held in the Company's portfolio and used as a guarantee for the Financial Commitment Agreement.

b.2) Variable contribution plan

As from July 01, 2007, the Company implemented the new supplementary pension plan, a Variable Contribution (CV) or mixed plan, called Petros Plan 2, for all new employees.

A portion of this plan with defined benefits characteristics refers to the risk coverage for disability and death, a guarantee of a minimum benefit and a lifetime income, and the related actuarial commitments are recorded according to the projected credit unit method. The portion of the plan with defined contribution characteristics, earmarked for forming a reserve for programmed retirement, was recognized in the results for the year as the contributions are made. In the nine-month period ended September 30, 2010, the contribution of Petrobras and subsidiaries to the defined contribution portion of this plan was US\$142.

Petrobras and the other sponsors fully assumed the contributions corresponding to the period in which the participants had no plan. The plan will continue to admit new subscribers after this date but no longer including any payment for the period relating to past service.

The disbursements related to the cost of past service will be made on a monthly basis over the same number of months during which the participant had no plan and, therefore, should cover the part related to the participants and the sponsors.

c) Interest on shareholders' equity - fiscal year 2010

The Company's Board of Directors approved distribution in advance of remuneration to shareholders in the form of interest on shareholders' equity, as established in article 9 of Law 9249/95 and Decrees 2673/98 and 3381/00, as follows:

- On May 14, 2010, in the amount of US\$977 (R\$1,755 million), which was made available to shareholders on May 31, 2010, based on the shareholding position at May 21, 2010.
- On July 16, 2010, in the amount of US\$986 (R\$1,755 million), which was made available to shareholders on August 31, 2010, based on the shareholding position at July 30, 2010.
- On October 22, 2010, in the amount of US\$1,074 (R\$1,826 million), to be made available not later than December 31, 2010, based on the shareholding position at November 1, 2010.

This interest on shareholders' equity should be discounted from the remuneration that will be distributed at the closing of the fiscal year 2010. The amount will be monetarily updated according to the variation of the SELIC rate since the

date of effective payment until the end of the aforementioned fiscal year.

The interest on shareholders' equity is subject to the levy of income tax at the rate of 15% (fifteen percent), except for shareholders that are declared immune or exempt.

15. Commitments and Contingencies

Petrobras is subject to a number of commitments and contingencies arising from its normal course of business. Additionally, the operations and earnings of the Company have been, and may be in the future, affected from time to time in varying degrees by political developments and laws and regulations, such as the Federal Government's continuing role as the controlling shareholder of the Company, the status of the Brazilian economy, forced divestiture of assets, tax increases and retroactive tax claims, or environmental regulations. The likelihood of such occurrences and their overall effect upon the Company are not readily predictable.

a) Litigation

The Company is a defendant in numerous legal actions involving civil, tax, labor, corporate and environment issues arising from its normal course of business. Based on the advice of its internal legal counsel and management's best judgment, the Company has recorded accruals to provide sufficiently for losses that are considered probable and reasonably estimable.

At September 30, 2010 and December 31, 2009, the respective amounts accrued by type of claims are as follows:

a) Litigation (Continued)

As of September 30, 2010 and December 31, 2009, in accordance with Brazilian law, the Company had US\$1,533 and US\$1,158, respectively, into federal deposit accounts to provide for certain claims until they are settled. These amounts are reflected in the balance sheet as restricted deposits for legal proceedings and guarantees.

The principal proceedings, disclosed previously as a possible loss, this quarter are classified as a probable loss, due to the development of the legal case or agreements in progress, as follows:

a.1) ICMS Sinking of Platform P-36

In 2001, Platform P-36 was imported by Petrobras through temporary admission in accordance with the special regime for imports and exports (REPETRO) which suspends taxation and, therefore, on this occasion state taxes were not due.

With the sinking of the platform, the State of Rio de Janeiro initiated actions for collection of the suspended ICMS through tax foreclosure proceedings as it understands that there will no longer be return of the platform.

In February 2010, with an unfavorable decision at the last level of appeals in the Superior Court of Rio de Janeiro, Petrobras began to evaluate the legal aspects of the suit and the economic aspects of the use of the benefits of tax amnesty established in State Law 5647, of January 18, 2010, which permits elimination of fines and an expressive decrease in other charges, as well as the possibility of payment with court order debts.

Petrobras adhered to the payment conditions of the aforementioned State Law, fixing the total amount agreed upon with the State of Rio de Janeiro in the amount of US\$265.

In May 2010 Petrobras paid the amount of US\$185. The remaining balance of US\$80, has been provided and will be paid in court order debts. In addition, the State of Rio de Janeiro has analyzed tax benefits related to other projects and negotiations with the Company.

a.2) Triunfo Agro Industrial S.A and others

During the year 2000, Triunfo Agro Industrial and Others filed a suit against Petrobras, claiming losses and damages as a result of the annulling of a credit assignment transaction – excise tax (IPI) premium. The hearing by the Superior Court of Rio de Janeiro, in the second instance, was unfavorable to Petrobras and approval was denied for the appeal lodged by the Company. Appeals will be filed against this decision in the higher courts in Brasilia.

Parallely to the filing of the aforementioned appeals, on September 28, 2010 Petrobras filed a rescissory action with the Superior Court of Rio de Janeiro.

Based on its legal counsels' advice, the Company has assessed risk of loss to be possible. The maximum estimated exposure as at September 30, 2010, is around US\$278, which has been provided.

a.3) Notice of infraction – National Agency for Petroleum, National Gas and Biofuel – ANP

On July 1, 2010, the Company received a notice that a suit had been filed by ANP, in the amount of US\$131, for the alleged miscalculations of the special participation tax basis in the Barracuda and Caratinga fields.

On July 15, 2010, Petrobras filed its defense with ANP.

ANP presented a new official letter, with a review of the amount for the official notification, as it understands that part of the leasing agreement would not consist of a financing transaction.

At September 30, 2010, the maximum estimated exposure is around US\$49, which has been provided.

On October 28, 2010, Petrobras paid the first installment of a total of 30, with respect to this liability.

18. Acquisition/Sales of Assets and Interests

a) Sale option of the Pasadena refinery by Astra

In a decision reached on April 10, 2009, in the existing arbitration process between Petrobras America Inc - PAI and others and Astra Oil Trading NV - ASTRA and others, the exercise of the put option by ASTRA with respect to PAI, of the remaining 49.13% of the shares of ASTRA in Pasadena Refinery Systems Inc. ("PRSI"), was considered valid.

According to the decision reached on April 10, 2009, the consideration to acquire the remaining shareholding interest in the refinery and in the trading company in Pasadena was fixed at US\$466. There is still a pending consideration, regarding the acquisition of the shares, which will be made by Petrobras to Astra in September, 2010 in the amount of US\$85.

In March 2009, a loss was recognized in the amount of US\$147, corresponding to the difference between the fair value of the net assets and the value defined by the arbitration panel. As a result of this decision, the Company recorded a charge of US\$289 in Additional Paid in Capital due to the acquisition of the remaining 49.13% of the shares of ASTRA in Pasadena Refinery Systems Inc. ("PRSI").

There are still judicial proceedings ongoing asking for indemnifications by both parties and others revindications.

b) Investment agreement between Petrobras, Petroquisa, Braskem, Odebrecht and Unipar

On January 22, 2010, Petrobras and Odebrecht entered into an agreement to consolidate all petrochemical interests of both companies into Braskem, which resulted in the following transactions up to the third quarter of 2010.

In April 2010, Petrobras contributed to Braskem approximately US\$1,388, through an affiliate, as a result of a private subscription.

On April 27, 2010, Braskem acquired from Unipar 60% of Quattor Participações and, on May 10, 2010, 100% of Unipar Comercial and 33.33% of Polibutenos.

On June 18, 2010, shares representing 40% of interest in Quattor Participações S.A. held by Petrobras were exchanged by 18,000,087 new common shares issued by Braskem. The exchange was accounted for in accordance with ASC 860 "Transfers and Servicing", based on the fair value of the interest received from Braskem at the date of the transaction. As a result of the transaction a loss of US\$226, net of tax, was recognized.

On August 17, 2010, Braskem transferred 1,515,433 of its preferred shares for a nominal amount in order to accomplish the terms of the agreement.

On August 30, 2010, shares representing 10% of interest in Rio Polímeros S.A. held by Petrobras were exchanged into 1,280,132 new preferred shares issued by Braskem. The exchange was accounted for in accordance with ASC 860 "Transfers and Servicing", based on the fair value of the interest received from Braskem at the date of the transaction. As a result of the transaction a loss of US\$ 46, net of tax, was recognized.

As a result of the abovementioned transactions, Petrobras increased its interest in Braskem from 25.41% to 36.1% throughout 2010.

d) Investment in Açúcar Guarani S.A.

On April 30, 2010, an investment agreement established the entry of Petrobras into the capital of Açúcar Guarani S.A., by a capital contribution of US\$894 until 2015, when it will then hold 45.7% of the capital shares. Açúcar Guarani S.A. is engaged in sugar cane processing focused on the ethanol and sugar market.

In May 14, 2010, Petrobras contributed US\$379 into the capital of Cruz Alta Participações S.A (a wholly owned subsidiary of Guarani). As a result of the contribution, Petrobras has 49% of interest in Cruz Alta Participações S.A .

On August 13, 2010 the corporate restructuring was concluded, where Tereos Internacional incorporated the shares of Guarani, which became a wholly owned subsidiary. After this restructuring there are corporate acts in progress which will promote the replacement of the shares of Cruz Alta by shares of Guarani.

e) Increase of interest in the capital of Breitener Energética S.A.

On December 31, 2009, Petrobras had 30% of the capital of Breitener Energética S.A., a company established for the purpose of generating electric power, located in the city of Manaus, in the state of Amazonas. On February 12, 2010, Petrobras obtained control of Breitener by acquiring an additional 35% of interest for US\$2. As a result of the acquisition, Petrobras has 65% of interest in Breitener Energética S.A. Due to immateriality, proforma information has

not been presented.

f) Sale option of the Nansei Sekiyu refinery

On April 1, 2010 the Sumitomo Corporation announced its interest in exercising the right of sale to Petrobras, through its wholly owned subsidiary Petrobras Internacional Braspetro B.V., PIBBV , of 12.5% of the shares of the capital of the Nansei Sekiyu K.K. refinery (Nansei). The remaining shares (87.5%) are already owned by PIBBV since 2008.

The share purchase agreement was signed on September 29, 2010, and on October 20, 2010 the payment was made in the amount equivalent to US\$29 (R\$48,843 thousand - JPY 2,365,268 thousand), through the delivery of the shares.

As a result of the exercise of the right of sale by Sumitomo Corporation, a loss was recognized in the amount of US\$10 corresponding to the difference between the fair value of the shares and the estimated purchase price.

g) Acquisition of Gás Brasileiro Distribuidora S.A.

On May 26, 2010 Petrobras S.A., through its subsidiary Petrobras Gás S.A. (Gaspetro), entered into an agreement with Enti Nazionale Idrocarburi S.p.A. (ENI) for acquisition of 100% of the shares of Gas Brasileiro Distribuidora S.A. (GBD), for the approximate amount of US\$250, subject to adjustments due to the value of the company's working capital on the date of settlement of the transaction.

Transfer of the control will be made only after the conclusion of the transaction, which is subject to approval by the Regulatory Agency for Sanitation and Energy of the State of Sao Paulo (ARSESP).

h) Sale of the San Lorenzo refinery and part of the distribution network in Argentina

On May 4, 2010, Petrobras Argentina S.A. (formerly Petrobras Energia S.A.) approved the terms and conditions of the agreement for the sale to Oil Combustibles S.A. of refining and distribution assets in Argentina. The deal comprises a refinery located in San Lorenzo in the province of Santa Fé, a fluvial unit and a fuel trading network connected to this refinery, consisting of 360 sales points and associated wholesaler clients.

The offer for the aforementioned assets was approximately US\$36. In addition, on the closing date the petroleum inventories and the different products will be sold to Oil Combustibles for approximately US\$74. The total amount of the transaction is estimated at around US\$110.

The transaction is in the process of approval by the administrative authorities required by the prevailing legislation in Argentina.

The transaction does not consider the sale of the reformer unit that Petrobras Argentina has in its Puerto General San Martín Petrochemical Complex.

19. Petroleum Exploration Rights Onerous Assignment

a) Accounting treatment of Assignment Agreement (Cessão Onerosa)

On September 3, 2010, Petrobras entered into an agreement with the Brazilian federal government (Assignment Agreement), under which the government assigned to the Company the right to conduct research activities and the exploration and production of fluid hydrocarbons in specified pre-salt areas, subject to a maximum production of five billion barrels of oil equivalent.

The Assignment Agreement was approved by our Board of Directors and our minority shareholders, following a valuation procedure based on, among other factors, an assessment prepared by independent third party experts.

The total purchase price of the rights acquired under the Assignment Agreement was US\$43,868. It was paid to the Federal Government through funds obtained by the global offering of shares of the Company (see Note 14), US\$39,768 through the transfer of Brazilian Treasury Securities and the remaining US\$4,100 in cash.

In accordance with ASC 932 Extractive Activities Oil and Gas , the rights acquired by the Company were recognized as Property Plant & Equipment (long-term asset) as acquisition costs. The acquisition cost will be depreciated based on the unit-of-production method during the period of production of the related reserves and will also be subject to the impairment test. After the production of all the volumes that we were entitled, the acquisition costs will be completely depreciated.

The Assignment Agreement provides for a subsequent revision of the volume and the price, based on an independent third party assessment. If the contract parties determine that the value of the rights we acquired is higher than the initial purchase price, we may either pay the difference to the Brazilian federal government, in which case we expect we will recognize the difference as Property Plant & Equipment (long-term asset), or reduce the total volume acquired under the contract, in which case there would be no impact on our balance sheet. If the contract parties determine that the value of the rights we acquired is lower than the initial purchase price, the Brazilian federal government will pay us for the difference and we expect we would reduce the amount originally recorded as Property Plant & Equipment (long-term asset) by the amount received from the Brazilian federal government.
