PART I

ITEM 1: BUSINESS

Corporate Information

We were incorporated in the State of Nevada on July 27, 2000. We are presently engaged in the acquisition and exploration of mining properties. The Company's address is 100 Wall Street, 10th Floor, New York, NY 10005. The Company's telephone number is (778) 892-9490.

Background

In August 2000, we acquired the right to prospect one mineral property containing eight mining claims located on Copperkettle Creek in British Columbia, Canada. We have allowed these claims to lapse. From August 26, 2006 to December 11, 2006, we did not conduct any operations. During that period, we intended to identify an acquisition or merger candidate with ongoing operations in any field. However in December 2006 we decided to acquire the right to explore a new property in British Columbia and returned to the business of mineral exploration. On April 30, 2009, the Company decided not to renew certain claims, and later determined not to pursue its remaining claim in Canada. The Company subsequently determined to pursue other mining development opportunities.

The Company's Current Business Operations

During the period covered by this Report, the Company has appointed new officers and directors, opened a new office, and negotiated and conducted due diligence regarding several potential acquisitions. The Company's most significant achievement to date has been its acquisition of Gold Hills Mining Ltda., as described below.

Gold Hills Mining Ltda.

In January of 2011, the Company entered into a term sheet to acquire Gold Hills Mining Ltda. ("Gold Hills"), a Brazilian corporation which possesses rights for mineral extraction on properties located in Northeastern Brazil. After the completion of due diligence, on May 4, 2011, the Company acquired Gold Hills pursuant to a Purchase Agreement

(the "Purchase Agreement") by and between the Company, Gold Hills and the two shareholders of Gold Hills (such shareholders are referred to herein as the "Sellers"). Pursuant to the Purchase Agreement, the Sellers have sold to the Company One Hundred Percent (100%) of all the issued and outstanding equity interests (the "Shares") of Gold Hills in accordance with the following terms:

(a) Payment of two hundred and fifty thousand U.S. dollars ($250,000), which has been paid.

(b) The Company shall conduct an exploration campaign at the properties (the "Exploration"). Upon the completion of the Exploration, the following amounts shall be paid by Gold Hills to the Sellers:

(i) If the Exploration confirms the existence of gold mineral reserves of less than Three Hundred Thousand (300,000) ounces, no additional payment shall be made by the Company to the Sellers.

(ii) If the Exploration confirms the existence of gold mineral reserves of between Three Hundred Thousand (300,000) and Four Hundred Ninety-Nine Thousand Nine Hundred and Ninety-Nine (499,999) ounces, the additional payment to be made to the Sellers shall be Four Hundred Thousand U.S. Dollars ($400,000).

(iii) If the Exploration confirms the existence of gold mineral reserves of greater than Four Hundred Ninety-Nine Thousand Nine Hundred and Ninety-Nine (499,999) ounces, the additional payment to be made to the Sellers shall be (a) One Million U.S. Dollars ($1,000,000); plus (b) Two U.S. Dollars ($2) per additional ounce in excess of the first Five Hundred Thousand (500,000) ounces, to be paid in four biannual installments starting in twelve (12) months.

(c) Upon Gold Hills obtaining certain enumerated environmental licenses which are necessary to commence Gold Hills planned mining operations, the Company will make an additional cash payment to the Sellers in the amount of Seven Hundred Thousand U.S. Dollars ($700,000).

(d) Upon the commencement of the successful mining and processing of gold by Gold Hills, the Sellers shall be entitled to receive a royalty equal to Two Percent (2%) of Gold Hills' gross income, as calculated in accordance with generally accepted accounting principals.

Subject to the Company's determination of the existence of such gold reserves as set forth above, the Company has agreed to invest Three Million Five Hundred Thousand U.S. Dollars ($3,500,000) in Gold Hills.

Pursuant to the Purchase Agreement, one of the Sellers shall be appointed to Gold Hills' Board. The Purchase Agreement also contains standard representations and warranties, and provides for arbitration in the event of any dispute.

On July 5, 2011, the Company announced that it has received a 43-101 Technical Report on Exploration prepared by SRK Consulting (U.S.) Inc. for the Gold Hills project. The report was prepared upon SRK's completion of a site visit and the analysis of geological and geophysical evidence. SRK confirmed the existence of a highly mineralized vein containing gold of high grade (4 to 7 g/t), originally prospected by the CPRM, an agency of the Brazilian government.

On July 2, 2012, the Company announced the commencement of geological exploration work at the Gold Hills project. On August 16, 2012, the Company announced that it has contracted Drilrent Ltd., a Brazilian-based company, to commence an exploratory drilling campaign at Gold Hills. The drilling program is anticipated to cost approximately $700,000. The Company's subsidiary Gold Hills Mining Ltda. has received a definitive exploration permit from the Ministry of Mines and Energy allowing the Company to commence its exploration program.

Acquisition of Mineral Rights in Brazil's Carajás Mining District in the State of Para, Brazil

The Company announced on October 24, 2011 that Gold Hills Mining Ltda., its wholly owned Brazilian subsidiary, has, effective October 18, 2011, closed on its acquisition of the mineral rights in a highly mineralized area of 9,000 Hectares located in the Carajas Mineral Province, State of Para, with an option exercise payment of $350,000 plus additional payments totaling $107,756 made to the Cooperativa dos Produtores de Minerios de Curionópolis

("COOPEMIC"). The Company refers to this property as Serra do Sereno, or Misty Hills.

The Serra dos Carajás Mineral Province is a distinct geologic dominium, well known worldwide for hosting Brazil's largest iron, copper and gold deposits. The Company plans to begin the initial exploration campaign at Misty Hills as soon as financing for the project can be obtained. The Company has agreed, under the Option Agreement, to expend a minimum of $5,000,000 in the exploration of the applicable mining rights area. The Company expects that the initial campaign will cost between $5,000,000 and $10,000,000.

In addition to the option exercise payment made to COOPEMIC, the Company has undertaken certain exploration commitments to COOPEMIC. The Company has also agreed to make subsequent payments to COOPEMIC on the basis of the exploration report and the extent of the extraction of gold, silver, copper and their respective by-products. If the Company determines it is advisable to continue exploration, the Company shall pay to COOPEMIC $250,000 after six months of exploration and an additional $150,000 after twelve months of exploration. If the Company's exploration activities confirm the existence of gold, silver or cooper and their respective by-products in

excess of 400,000 gold equivalent ounces, certified under the standard NI-43101, as established by the Canadian Securities Administration as "measured resources," the Company shall pay to COOPEMIC, at the end of such initial exploration, 30% of $24 per gold equivalent ounce contained in the mineral reserves in three tranches: (i) one-third shall be paid when the Brazilian National Department of Mineral Production shall approve the final mineral exploration report; (ii) one-third shall be paid upon commencement of the extraction of gold, silver, copper and their respective by-products, contained in the areas covered by the mining rights; and (iii) one-third shall be paid within six months from the date of commencement of the extraction of gold, silver and copper and their respective by-products, contained in the areas covered by the mining rights.

On August 23, 2012, the Company announced that the Brazilian National Department of Minerals Production has completed the legal procedures required to transfer to the Company the exploration rights for the Company's Misty Hills property.

Other Prospective Acquisitions

On September 25, 2010, the Company entered into a letter of intent (the "Letter of Intent") with Rio Sao Pedro Mineracao LTDA ("Rio Sao Pedro"), a Brazilian mining company. Rio Sao Pedro owns a prospective gold mine, the "Fazenda Lavras," which is near the Morro do Ouro mine of Kinross Gold Corporation in the city of Paracatu, located in the State of Minas Gerais, Brazil. The Rio Sao Pedro Fazenda Lavras property covers approximately 211 hectares (approximately 521 acres), with gold mining rights and other mineral rights on a total of 828 hectares (approximately 2,046 acres). The Company and Rio Sao Pedro and the Sellers continued negotiations for the acquisition of Rio Sao Pedro amicably for some time, however, at the present time, the Company does not anticipate that this transaction will proceed.

On December 12, 2010, the Company entered into an Exploration and Acquisition Agreement (the "Capri Agreement") with Afrocan Resources Ltd. ("Afrocan"). Afrocan owns 100% of all issued and outstanding shares of Capri General Trading Co. Ltd. ("Capri"), which is the legal and beneficial owner of 100% of all mineral rights on a property in Tanzania (the "Shenda Property"). The Company agreed that subject to certain conditions, including final due diligence satisfactory to the Company and the completion and execution of detailed long form agreements supplementing the terms and conditions of the Capri Agreement, the Company would conduct exploration activities at the Shenda Property. In the event that the Company could ascertain certain levels of commercially available and commercially exploitable reserves, the Company would acquire all of the issued and outstanding equity interests in Capri from Afrocan in exchange for shares of the Company's common stock. As of the date of this Report, the Company is no longer actively pursuing the Capri transaction.

During 2011, the Company agreed to general terms for the purchase of 100% of the shares of Sociedad Minera Las Cumbres SAC ("Las Cumbres"), the operator of a silver mine located in the Churín region of Peru, approximately 150 miles Northeast of the capital city of Lima. The Company also entered into an option agreement with Alfredo de Lima SMRL to purchase the mineral rights for the Condorsenga mine, where the Las Cumbres operation is located.

These agreements were subject to certain conditions which were not fulfilled by the counterparties, and the Company is no longer pursuing these transactions. The Company determined that due to certain political and regulatory changes and uncertainties, it is not advisable for the Company to pursue potential mining operations in Peru in the immediate future.

Employees

As of the end of the period covered by this Report, we had no employees in Brazil, other than Mr. Luciano Borges, and we utilized the services of consultants at the Gold Hills project as needed. Since June of 2012, we have also utilized the services of Para Geoexperts for certain tasks at the project. Subsequent to the period covered by this Report, the Company's staff has expanded, and now includes one employee in the United States, one in Brazil, and two in Europe (the Company's Chief Exploration Geologist / Exploration Vice President of Gold Hills Ltda. and the Company's Investor Relations Manager). The Company has also hired two independent consultants, a geologist and an exploration technician. In addition, subsequent to the period covered by this Report, the Company announced that it has contracted Drilrent Ltd., a Brazilian-based company, to commence an exploratory drilling campaign at Gold Hills, and certain work at Gold Hills will be conducted by temporary employees of Drilrent. The Gold Hills

project is currently staffed by between 30-35 technicians, laborers and geologists at any given time, including Mr. Borges, the Company's consultants, and employees of Para Geoexperts and Drilrent. The Company intends to maintain this level of staffing at the Gold Hills project through the end of December, 2012, as the Company proceeds with its exploratory campaign work.

Corporate Development Services Agreement

On September 27, 2010, the Company entered into a Corporate Development Services Agreement (the "Services Agreement") with CRG Finance AG ("CRG"). Pursuant to the Services Agreement, CRG agreed to render to the Company consulting and other strategic advisory services (collectively, the "Advisory Services"). The Company agreed to pay to CRG the following amounts for the Advisory Services: (i) an inception fee of US$100,000.00 (one hundred thousand U.S. dollars) and (ii) a monthly services fee of US$25,000.00 (twenty five thousand U.S. dollars) per month, payable each month for the period commencing as of September 1, 2010. The Company agreed to pay CRG $10,000 per month of the Advisory Services Fee beginning September 1, 2010, with the balance of $15,000 per month of the Advisory Services Fees together with the Inception Payment accruing until completion of the first Company financing when such accruals shall be fully due and payable. In consideration of any and all Investment Banking Services provided to the Company, CRG shall receive in cash ten percent (10%) of the total value of each such transaction, payable at the closing of each such transaction. The Services Agreement also contains provisions for the reimbursement of reasonable expenses incurred by CRG, and for indemnification of CRG and its affiliates from claims related to the services provided under the Services Agreement. The term of the Services Agreement shall be three years, and may be terminated at any time for any reason by CRG upon not less than thirty (30) days' advance written notice. During May and June 2011, the inception fee and the accrued monthly service fees through June 2011 were paid in full. In July 2011, Ardent Mines and CRG entered into a suspension agreement whereby the investment banking services were terminated and the monthly service fees beginning July 2011 will no longer be due. During the year ended June 30, 2011, we borrowed a total of $750,000 from CRG Finance AG at a rate of 7.5% per annum, calculated based on a year of 365 days and actual days elapsed. The loan, plus any interest accumulated, is due upon demand after the first anniversary of the agreement date within thirty calendar days upon delivery to the Borrower a written demand by the Lender. On October 18, 2011, the loan become convertible into common stock at the holder's option at $3.68 per share.

CRG Finance AG Commitment Agreement

On March 1, 2012, the Company and CRG Finance AG entered into a commitment letter (the "Commitment Letter") pursuant to which CRG Finance AG has agreed to provide the Company with up to One Million U.S. Dollars (USD $1,000,000) to maintain the Company's ordinary course of business operations. Funds underlying the Commitment Letter may be drawn by the Company in increments or tranches upon written consent of CRG Finance AG at any time prior to the first anniversary of the date of the Commitment Letter. The Commitment Letter will facilitate funding for the Company as a supplement to the prior commitment of CRG Finance AG in the amount of One Million U.S. Dollars (USD $1,000,000) that was contained in the Corporate Development Services Agreement between CRG Finance AG and the Company, dated September 27, 2010, which has been fully drawn by the Company.

Any and all draws against the Commitment Letter shall be subject to the following conditions: (i) adherence of the Company to its business plan; (ii) satisfactory progress with respect to operations of the Company; (iii) satisfactory management of the Company; (iv) satisfactory compliance of the Company with any and all laws, rules, and regulations applicable to the Company, its subsidiaries and their respective operations; and (v) in such increments or tranches reasonably acceptable to CRG Finance AG (collectively, each of (i), (ii), (iii), (iv) and (v), are referred to as the "Conditions Precedent"). The satisfactory nature of any and all of the Conditions Precedent shall in each case be determined at the sole discretion of CRG Finance AG. Neither the Company nor any third party shall have any rights of any nature of kind whatsoever to compel CRG Finance AG to perform in respect of the Commitment Letter if CRG Finance AG has determined that the Company is deficient with respect to one or more of the Conditions Precedent.

Amended and Restated Senior Secured Note

On March 1, 2012, the Company issued an Amended and Restated Senior Secured Note to CRG Finance AG in the amount of $1,142,900 (the "Amended and Restated Note"). The Amended and Restated Note consolidates (i) all the outstanding loans, advances and interest due and payable to CRG Finance AG for all periods prior to December 31, 2011; (ii) the additional advances and loans to the Company subsequent to December 31, 2011 through February 28, 2012, but without the inclusion of interest; and (iii) all advisory fees due and payable to CRG through February 28, 2012.

The Amended and Restated Note has an interest rate of seven and one-half percent (7.5%) per annum. All principal and interest on the Amended and Restated Note shall be due and payable thirty (30) days after notice and demand to the Company by CRG Finance AG. In the event of a default by the Company under the terms of the Amended and Restated Note, the interest rate shall increase to sixteen percent (16%) per annum.

Security Agreement

The Amended and Restated Note is secured by a senior security interest of CRG Finance AG in all tangible and intangible assets and properties of the Company and its subsidiaries as collateral pursuant to the terms and conditions of a Security Agreement entered into with CRG Finance AG (the "Security Agreement"). The Security Agreement will also secure and include all future notes issued by the Company as and when the Company draws upon the supplemental funds to be made available to the Company under the terms of the Commitment Letter. The extent of the security interest in such collateral includes all currently owned assets and properties of the Company and its subsidiaries and all after-acquired worldwide assets of the Company and its subsidiaries.

ITEM 1A. RISK FACTORS

An investment in our Company involves a risk of loss. You should carefully consider the risks described below, before you make any investment decision regarding our Company. Additional risks and uncertainties may also impair our business. If any such risks actually materialize, our business, financial condition and operating results could be adversely affected. In such case, the trading price of our common stock could decline.

Risks Related to Our Company

We have not yet commenced revenue generating operations under our business model and we have no past performance which can serve as an indicator of our future potential.

We are presently at the early stages of the implementation of our business plan. Our most recent financial statements will therefore not provide sufficient information to assess our future prospects. Our likelihood of success must be considered in light of all of the risks, expenses and delays inherent in establishing a new business, including, but not limited to unforeseen expenses, complications and delays, established competitors and other factors.

Our Auditors have issued an opinion expressing uncertainty regarding our ability to continue as a going concern. If we are not able to continue operations, investors could lose their entire investment in our Company.

We have a history of operating losses, and may continue to incur operating losses for the foreseeable future. This raises substantial doubts about our ability to continue as a going concern. Our auditors issued an opinion in their audit report dated October 15, 2012 expressing uncertainty about our ability to continue as a going concern. This means that there is substantial doubt whether we can continue as an ongoing business without additional financing and/or generating profits from our operations. If we are unable to continue as a going concern and our Company fails, investors in our Company could lose their entire investment.

We need to raise additional capital which may not be available to us or might not be available on favorable terms.

We will need additional funds to implement our business plan as our business model requires significant capital expenditures. We will need substantially more capital to execute our business plan. Our future capital requirements will depend on a number of factors, including our ability to grow our revenues and manage our business. Our growth will depend upon our ability to raise additional capital, possibly through the issuance of long-term or short-term

indebtedness or the issuance of our equity securities in private or public transactions. If we are successful in raising equity capital, because of the number and variability of factors that will determine our use of the capital, our ultimate use of the proceeds may vary substantially from our current plans.

We were incorporated in July 2000 and have yet to generate any revenues. We have losses which we expect to continue into the future. As a result, we may have to suspend or cease operations.

We were incorporated on July 27, 2000, and have not generated any revenues. Our net loss since inception is significant. To achieve and maintain profitability and positive cash flow we are dependent upon our ability to generate revenues and control exploration costs.

Based upon current plans, we expect to incur operating losses in future periods. This will happen because there are expenses associated with the exploration of our mineral properties. As a result, we may not generate revenues in the future. Failure to generate revenues will cause us to suspend or cease operations.

We will have to hire additional qualified personnel. If we cannot locate qualified personnel, we may have to suspend or cease operations.

We will have to hire additional qualified persons to perform surveying, exploration, and excavation of the Gold Hills property and properties we may acquire in the future. If we are unable to hire additional skilled employees, our operations will not succeed.

Indebtedness may burden us with high interest payments and highly restrictive terms which could adversely affect our business.

As a matter of Company policy, our financial plans will limit our debt exposure to a reasonable level. However, a significant amount of indebtedness could increase the possibility that we may be unable to generate sufficient revenues to service the payments on indebtedness, when due, including principal, interest and other amounts.

We may be exposed to tax audits.

Our U.S. federal and state tax returns may be audited by the U.S. Internal Revenue Service (the "IRS"). An audit may result in the challenge and disallowance of deductions claimed by us. We are unable to guarantee the deductibility of any item that we acquire. We will claim all deductions for federal and state income tax purposes which we reasonably believe that we are entitled to claim. In the event the IRS should disallow any of our deductions, the directors, in their sole discretion, will decide whether to contest such disallowance. No assurance can be given that in the event of such a contest the deductions would be sustained by the courts.

Because we intend to conduct our mineral exploration and development activities outside of the United States, we will be required to obtain approvals from foreign national and local governments.

The Company intends to pursue projects outside of the United States, which may require us to seek the approval of various foreign governments. Seeking such approvals may be expensive, complex, time consuming and uncertain.

Risks related to our Stock

We do not anticipate paying cash dividends.

We do not anticipate paying cash dividends in the foreseeable future. We intend to retain any cash flow we generate for investment in our business. Accordingly, our common stock may not be suitable for investors who are seeking current income from dividends. Any determination to pay dividends on our common stock in the future will be at the discretion of our board of directors.

Because the market for our common shares is limited, investors may not be able to resell their common shares.

Our common shares trade on the pink sheets electronic quotation system. Trading in our shares has historically been subject to very low volumes and wide disparity in pricing. Investors may not be able to sell or trade their common shares because of thin volume and volatile pricing with the consequence that they may have to hold your shares for an indefinite period of time.

There are legal restrictions on the resale of the common shares offered, including penny stock regulations under the U.S. Federal Securities Laws.

Our common stock may continue to be subject to the penny stock rules under the Securities Exchange Act of 1934, as amended. These rules regulate broker/dealer practices for transactions in “penny stocks.” Penny stocks are generally equity securities with a price of less than $5.00. The penny stock rules require broker/dealers to deliver a standardized risk disclosure document that provides information about penny stocks and the nature and level of risks in the penny stock market. The broker/dealer must also provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker/dealer and its salesperson and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations and the broker/dealer and salesperson compensation information must be given to the customer orally or in writing prior to completing the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction, the broker and/or dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. The transaction costs associated with penny stocks are high, reducing the number of broker-dealers who may be willing to engage in the trading of our shares. These additional penny stock disclosure requirements are burdensome and may reduce all of the trading activity in the market for our common

stock. As long as the common stock is subject to the penny stock rules, our shareholders may find it more difficult to sell their shares.

If we raise additional funds through the issuance of equity or convertible debt securities, your ownership will be diluted.

If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership held by existing shareholders will be reduced. New securities may contain certain rights, preferences or privileges that are senior to those of our common shares. Furthermore, any additional equity financing may be dilutive to shareholders, and debt financing, if available, may involve restrictive covenants, which may limit our operating flexibility with respect to certain business matters.

Grants of stock options and other rights to our directors, officers and employees may dilute your stock ownership.

We plan to attract and retain our directors, officers and employees in part by offering stock options and other purchase rights for a significant number of common shares. The issuance of common shares pursuant to such options, and additional options which may be issued in the future, will have the effect of reducing the percentage of ownership of our shareholders.

Our stock price may be volatile and market movements may adversely affect your investment.

The market price of our stock may fluctuate substantially due to a variety of factors, many of which are beyond our control. The stock markets in general have experienced substantial volatility that has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the market price of our stock. Future sales of our common shares by our shareholders could depress the price of our stock.

Risks Related to the Exploration of Minerals

Mining involves financial risk and uncertainty related to hazardous operations.

The operations carried out by the Company will be subject to all the hazards and risks normally encountered in the exploration and development of gold mineral reserves and mining operations generally, including unusual and unexpected geologic formations, seismic activity, cave-ins, flooding and other conditions involved in the drilling and removal of material, any of which could result in damage to, or destruction of, producing facilities, damage to life or property and environmental damage, all of which may result in possible legal liability. The exploration for and development of mineral deposits involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate.

The Company may not be able to adequately insure against risk.

Although we intend to maintain insurance to protect against certain risks in such amounts as we consider being reasonable, our insurance will not cover all the potential risks associated with our development, exploration and mining activities. We may also be unable to maintain insurance to cover these risks at economically feasible premiums. Insurance coverage may not continue to be available or may not be adequate to cover any resulting liability. We may also become subject to liability for pollution or other hazards that may not be insured against or that we may elect not to insure against because of premium costs or other reasons. Losses from these events may cause us to incur significant costs that could have a material adverse effect upon our financial performance and results of operations.

The financial success of a mining operation is difficult to predict.

Major expenses may be required to locate and establish mineral reserves. The same is true for the development of mining facilities at a particular site once such mineral reserves have been established. It is impossible to ensure that the exploration or development of the gold mineral reserves by us will result in a profitable commercial mining operation. Whether a mineral deposit will be commercially viable depends on a number of factors, some of which

are: the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in us not receiving an adequate return on invested capital.

The success of the exploration and development of gold mineral reserves by us will also be subject to a number of factors including the availability and performance of engineering and construction contractors, suppliers and consultants, the receipt of required governmental approvals and permits (including environmental permits). There can be no assurance that personnel and equipment will be available in a timely manner or on reasonable terms to successfully complete our activities as planned; that we will be able to obtain all necessary governmental approvals and permits if necessary; and that the ongoing operating costs associated with the exploration or development of the gold mineral reserves will not be significantly higher than anticipated by us. Any of the foregoing factors could adversely affect our operations and financial condition.

There is no certainty that the expenditures which will be made by us towards the search and evaluation of mineral deposits will result in discoveries or development of commercial quantities of gold ore.

Environmental risks and hazards may adversely impact the profitability of our Company.

All phases of our Gold Hills operations will be subject to environmental regulation in Brazil. Other mines that we may develop will also be subject to regulation in any other jurisdiction where we operate. These regulations may mandate, among other things, water quality standards and land reclamation. These standards may also regulate the generation, transportation, storage and disposal of hazardous waste. This will require a high degree of responsibility for us and our officers, directors and employees. There is no assurance that existing or future environmental regulation will not materially adversely affect our business, financial condition and results of operations.

Inadequate infrastructure could adversely impact the Company's profitability.

Development and exploration activities depend, to one degree or another, on adequate infrastructure. Reliable roads, bridges, power sources and water supply are important determinants, which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of such infrastructure could adversely affect our operations, financial condition and results of operations.

The Company will require certain permits to commence operations.

Our development and exploration activities are subject to receiving and maintaining permits from appropriate governmental authorities. There is no assurance that delays will not occur in connection with obtaining all necessary renewals of permits, additional permits for any possible future changes to operations, or additional permits associated with new legislation. Prior to any development on any of our properties, we must receive permits from appropriate governmental authorities. There can be no assurance that we will continue to hold all permits necessary to develop or continue operating at any particular property.

There are risks of economic and political instability in Brazil.

The Gold Hills property where the Company has rights for mineral extraction is located in Brazil. There are risks relating to an uncertain or unpredictable political and economic environment in Brazil.

Certain political and economic events, such as acts or failures to act by a government authority in Brazil and political and economic instability in Brazil could have a material adverse effect on our ability to start or continue our development and exploration activities in Brazil.

These risks and uncertainties include, but are not limited to: terrorism; hostage taking; extreme fluctuations in currency exchange rates; high rates of inflation; labor unrest; the risks of war or civil unrest; expropriation and nationalization; renegotiation or nullification of existing concessions, licenses, permits and contracts; changes in taxation policies; restrictions on foreign exchange and repatriation; and changing political conditions, currency

controls and governmental regulations that favor or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction.

The occurrence of these various factors and uncertainties cannot be accurately predicted and could have an adverse effect on our operations or profitability.

Changes in policy by the Brazilian Government could adversely impact the Company.

Changes, if any, in mining or investment policies or shifts in political attitude in Brazil where Gold Hills operates may adversely affect its operations or profitability. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, price controls, export controls, currency remittance, income and other taxes, expropriation of property, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people and water use. Failure to comply strictly with applicable laws, regulations and local practices relating to mineral right applications and tenure, could result in loss, reduction or expropriation of entitlements, or the imposition of additional local or foreign parties as joint venture partners with carried or other interests.

The Company could experience problems with title to its current property or to future properties.

Although we believe that we have taken reasonable measures to ensure proper title in all the issued and outstanding equity interests of Gold Hills and have carried out a reasonable due diligence as to the proper title of Gold Hills in the rights for mineral extraction on the property, there is no guarantee that any such title or interest will not be challenged or impaired. Third parties may have valid claims underlying portions of our Gold Hills interests, including prior unregistered liens, agreements, transfers or claims, and title may be affected by, among other things, undetected defects. In addition, we may be unable to exercise or to enforce our respective rights. As the Company acquires additional properties, similar issues could arise in connection with those properties as well.

The Company faces intense competition.

The mining industry is intensely competitive in all of its phases and we will compete with companies possessing greater financial and technical resources than we do. Competition in the precious metals mining industry is primarily for: mineral rich properties that can be developed and produced economically; the technical expertise to find, develop, and operate such properties; the labor to operate the properties; and the capital for the purpose of funding such properties. Existing or future competition in the mining industry could materially adversely affect our prospects for mineral exploration and success in the future.

The Company will face extensive governmental regulation of the mining industry.

Our mineral exploration activities will be subject to various laws governing exploration, development, production, taxes, labor standards, mine safety, toxic substances and other matters. Mining and exploration activities are also subject to various laws and regulations relating to the protection of the environment. Amendments to current laws and regulations governing the operations and activities of our Company or more stringent implementation thereof could have a material adverse effect on our business, financial condition and results of operations.

Our right to engage in mineral extraction may be terminated in certain circumstances. Under the laws of certain jurisdictions in which we may operate, mineral resources belong to the state and governmental concessions are required to explore for, and exploit, mineral reserves. Termination of any one or more of the Company's exploration or other rights could have a material adverse effect on our financial condition or results of operations.

ITEM 3: LEGAL PROCEEDINGS

During the fiscal year ended June 30, 2012, the Company filed a Complaint with the Supreme Court of the State of New York. The action was removed to the United States District Court for the Southern District of New York on May 17, 2011. The defendants include Tydus Richards; Lotus Funds, Inc.; Dave Hibbard, as trustee of the Irrevocable Trust For the Benefit of Sloane Ricky Richards dated January 14, 2008; Christopher Wilson, individually and as trustee of the Irrevocable Trust For the Benefit of Chloe Belle Richards dated January 14, 2008; Scott Richards, as trustee of the Irrevocable Trust For the Benefit of Major Tydus Richards, dated January 14, 2008; Blackwater Industries LLC; Shelly Sean Singhal; and Pacific Stock Transfer Company.

Tydus Richards has demanded the replacement of certain certificates of shares which he contends are his and which were lost or misplaced. The Company contends that Mr. Richards is not entitled to the certificates since he did not perform under a consulting agreement with the Company (Mr. Richards was supposed to perform certain services in consideration of the certificates). It is the Company's position that since Mr. Richards did not perform under his agreement with the Company, he is not entitled to the certificates. In January 2012 the Company filed a withdrawal of the injunctive action with the court and returned the certificates to counsel for the shareholders of record affiliated with Mr. Richards thereby terminating the litigation against the Richards shareholder group. Since January 2012, there has been no known or threatened legal action on the part of the Company or shareholders of record affiliated with Mr. Richards.

Dividend Policy

As of the date of this Report, we have not paid any cash dividends to stockholders. The declaration of any future cash dividend will be at the discretion of our board of directors and will depend upon our earnings, if any, our

capital requirements and financial position, our general economic conditions, and other pertinent conditions. It is our present intention not to pay any cash dividends in the foreseeable future, but rather to reinvest earnings, if any, in our business operations.

Nevada Anti-Takeover Laws

Nevada Revised Statutes sections 78.378 to 78.379 provide state regulation over the acquisition of a controlling interest in certain Nevada corporations unless the articles of incorporation or bylaws of the corporation provide that the provisions of these sections do not apply. Our articles of incorporation and bylaws do not state that these provisions do not apply. The statute creates a number of restrictions on the ability of a person or entity to acquire control of a Nevada company by setting down certain rules of conduct and voting restrictions in any acquisition attempt, among other things. The statute is limited to corporations that are organized in the state of Nevada and that have 200 or more stockholders, at least 100 of whom are stockholders of record and residents of the State of Nevada; and does business in the State of Nevada directly or through an affiliated corporation. Because of these conditions, the statute currently does not apply to our company.

Limitation on the liabilities of Directors

Our bylaws provide that we shall indemnify any and all of our present or former directors and officers for expenses incurred in connection with the defense of any action relating to their services. Costs, charges and expenses (including attorneys' fees) incurred by such person in defending a civil or criminal proceeding shall be paid by the Company in advance upon receipt of an undertaking to repay all amounts advanced if it is ultimately determined that the person is not entitled to be indemnified by the Company as authorized by the bylaws, and upon satisfaction of other conditions required by current or future legislation. To the extent that a director has been successful in defense of any proceeding, the Nevada Revised Statutes provide that he shall be indemnified against reasonable expenses incurred in connection therewith. These provisions may limit the ability of our stockholders to recover damages against our directors through legal proceeding or otherwise.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Company pursuant to the foregoing provisions, or otherwise, the Company has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy and is, therefore, unenforceable.

ITEM 6: SELECTED FINANCIAL DATA

The Company will be seeking equity financing to provide the capital required to implement its exploration phase.

Should the Company develop additional mining projects, the Company will require additional funds in amounts to be determined.

Liquidity and capital resources

As of the date of this Report, we have yet to generate any revenues from our business operations. The Company has raised funds through the sale of equity and borrowing. The Company will need to raise additional capital to commence operations. The amount of capital required will be determined by the size and nature of the mining projects which the Company may commence in the future. We have no assurance that financing will be available to us on acceptable terms. If financing is not available on satisfactory terms, we may be unable to continue, develop or expand our operations. Any equity financing we may pursue will result in additional dilution to existing shareholders.

The Company will require significant additional funding in order to conduct proposed operations for the next year. The amount of funding required will be determined by the number of acquisitions of mining properties the Company engages in during such time.

On September 7, 2011 (the "Closing Date"), pursuant to a securities purchase agreement, dated September 1, 2011, we completed the closing of a private placement offering of our securities (the "Offering") for a total subscription proceeds of $1,000,004 through the issuance of 259,741 shares of the Company's Common Stock at a purchase price of $3.85 per share (the "Shares") to certain accredited investors (the "Investors"). The Gold Hills project is currently staffed by between 30-35 technicians, laborers and geologists at any given time, including Mr. Borges, the Company's consultants, and employees of Para Geoexperts and Drilrent. Recent accounting pronouncements

Certain accounting pronouncements have been issued by the FASB and other standard setting organizations which are not yet effective and have not yet been adopted by the Company. The impact on the Company's financial position and results of operations from adoption of these standards is not expected to be material.

Off Balance Sheet Arrangements

As of June 30, 2012, we did not have any off balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We did not have any operations which implicated market risk as of the end of the latest fiscal year. We expect that our planned operations will engender market risk, particularly with respect to interest rate risk, foreign currency exchange rate risk, commodity price risk (in regard to our prospective customer base), and other relevant market risks, such as equity price risk. We intend to implement an analysis and assessment program which will on a regular basis determine exposures of our Company to such risks. We expect to report the results of all such quantitative and qualitative risk assessments prior to entering into any material agreements, and on a regular monthly and annual basis to our Audit Committee so that responsive risk management measures can be discussed and actions taken to the extent reasonably feasible.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors

Ardent Mines Limited

(An exploration stage company)

New York, New York

We have audited the accompanying consolidated balance sheets of Ardent Mines Limited and its subsidiary (an exploration stage company) ("Ardent Mines") as of June 30, 2012 and 2011, and the related consolidated statements of expenses, changes in stockholders' equity (deficit), and cash flows for the years then ended and for the period from July 27, 2000 (inception) through June 30, 2012. These consolidated financial statements are the responsibility of Ardent Mines' management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. Ardent Mines is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Ardent Mines' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Ardent Mines and its subsidiary as of June 30, 2012 and 2011, and the results of their operations and their cash flows for the years then ended and for the period from July 27, 2000 (inception) through June 30, 2012, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that Ardent Mines will continue as a going concern. As discussed in Note 2 to the consolidated financial statements, Ardent Mines has suffered recurring losses from operations and has negative working capital, which raises substantial doubt about its ability to continue as a going concern. Management's plans regarding those matters are described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

ARDENT MINES LIMITED

(An Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business. Ardent Mines Limited was incorporated in Nevada on July 27, 2000. Ardent Mines' principal business plan is to acquire, explore and develop mineral properties and to ultimately seek earnings by exploiting the mineral claims.

Ardent Mines has been in the exploration stage since its formation and has not yet realized any revenues from its planned operations. It is primarily engaged in the acquisition, exploration and development of mining properties. On May 4, 2011, Ardent Mines acquired Gold Hills Mining Ltda. which owns certain mining rights in Brazil and on October 18, 2011, Ardent Mines acquired additional mining rights in the Carajas Mineral Province of Brazil (see Note 3).

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Cash and Cash Equivalents. Investments with an original maturity date of three months or less when purchased are considered to be cash equivalents and are stated at cost.

Long-Lived Assets.

All long-lived assets are reviewed when events or changes in circumstances indicate that the carrying amounts of such assets may not be recoverable. An impairment loss is recognized when estimated undiscounted cash flows that can be generated by those assets are less than the carrying value of the assets. When an impairment loss is recognized, the carrying amount is reduced to its estimated fair value based on appraisals or other reasonable methods to estimate fair value. There was no impairment of long-lived assets during the years ended June 30, 2012 or 2011.

Income Taxes. Ardent Mines recognizes deferred tax assets and liabilities based on differences between the financial reporting and tax bases of assets and liabilities using the enacted tax rates and laws that are expected to be in effect

when the differences are expected to be recovered. Ardent Mines provides a valuation allowance for deferred tax assets for which it does not consider realization of such assets to be more likely than not.

Exploration and Development Costs. Ardent Mines has been in the exploration stage since its formation and has not yet realized any revenues from its planned operations. It is primarily engaged in the acquisition, exploration and development of mining properties. Mineral exploration costs are expensed as incurred. When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves, the costs incurred to develop such property, are capitalized. Such costs will be amortized using the units-of-production method over the estimated life of the probable reserve.

Basic and Diluted Net Loss Per Share. Basic and diluted net loss per share calculations are presented in accordance with ASC 260, and are calculated on the basis of the weighted average number of common shares outstanding during the year. They include the dilutive effect of common stock equivalents in years with net income. Diluted EPS excludes all dilutive potential shares if their effect is anti-dilutive.

Share-Based Payments. The Company accounts for share-based payments in accordance with the authoritative guidance issued by the FASB on stock compensation, which establishes the accounting for transactions in which an entity exchanges its equity instruments for goods or services. Under the provisions of the authoritative guidance, share-based compensation expense is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the requisite employee service period (generally the vesting period). The Company estimates the fair value of share-based payments using the Black-Scholes Option Pricing Model. Additionally, share-based awards to non-employees are expensed over the period in which the related services are rendered at their fair value.

Recent Accounting Pronouncements. Ardent Mines does not expect the adoption of any recently issued accounting pronouncements to have a significant impact on their results of operations, financial position or cash flows.

NOTE 2 - GOING CONCERN

Ardent Mines has incurred net losses since inception and has a negative working capital at June 30, 2012. The ability of Ardent Mines to emerge from the exploration stage with respect to any planned principal business activity is dependent upon its successful efforts to raise additional equity financing and/or attain profitable mining operations. Management has plans to seek additional capital through a private placement and public offering of its common stock. There is no guarantee that Ardent Mines will be able to complete any of the above objectives. These factors raise substantial doubt regarding the Ardent Mines' ability to continue as a going concern.

NOTE 3 – ACQUISITION OF MINING RIGHTS

On May 4, 2011, Ardent Mines acquired Gold Hills Mining Ltda. which owns certain mining rights in Brazil (Gold Hills Rights and Misty Hills Rights). The aggregate purchase price paid was $350,000 which was recorded as capitalized mining rights in the balance sheet as of June 30, 2012. $250,000 of this purchase price was paid prior to June 30, 2011 and the remaining $100,000 was paid during the year ended June 30, 2012.

Gold Hills Rights

Under the terms of the acquisition, additional amounts will be paid pursuant to the results of reserves testing performed on the mining properties. Exploratory drilling is currently occurring at Gold Hills. The reserves testing includes an economic assessment (feasibility study). Considering the progress of the exploration campaign and the physical characteristics of the Gold Hills deposit, our expectation is to complete this reserves test between the end of 2013 and early 2014.

Should the reserves testing confirm the existence of gold, silver and byproduct reserves of less than 300,000 equivalent gold ounces, Ardent Mines will not be required to make an additional payment. Should the reserves testing confirm the existence of gold, silver and byproduct reserves between 300,000 and 499,999 equivalent gold ounces; Ardent Mines will be required to pay an additional $400,000 payable within 30 days after completion of a pre-feasibility study. Should the reserves testing confirm the existence of gold, silver and byproduct reserves in excess of 499,999 equivalent gold ounces; Ardent Mines will be required to pay an additional $1,000,000, payable within 30 days after completion of a pre-feasibility study, and $2.00 per additional ounce in excess of 500,000 equivalent gold ounces.

Following the completion of the reserves testing, the Company anticipates that a final exploration report will be submitted to the Brazilian Mining Authority (DNPM) in early 2014. The approval of this report by the DNPM will trigger the obligation to make the payments described above. Usually, the DNPM takes some months to analyze, check and issue the report approval, so a reasonable forecast for the payment deadline is the second or third quarter of 2014.

In addition to the amounts to be paid based upon the reserves testing, Ardent Mines will also be required to pay an additional $700,000 within 30 days from the date that Ardent Mines obtains an environmental installation license. There are three licenses necessary to build and operate a mine. The first one is the “previous license”, which entitles the company to receive its mining concession. This usually takes from 4 to 6 months to be obtained. The second environmental license is the “installation license”, necessary to develop or build the mine. This depends fundamentally on the coherence between the previous license and the engineering project submitted to the licensing authority. Although this process is less complex than the first license, it takes between 8-12 months to be granted. The operation license depends upon the checking and confirmation by the environmental authority that the mine facilities has been built in accordance with the two previous licenses. Normally that license takes less time than the previous ones. Considering government operations and the project location characteristics, the size of the projects and the environmental/economic trade-off of the project, no difficulties are envisaged for the environmental licensing process. It is reasonable to assume that the operational license will be granted between 12 and 18 months after the end of the exploration campaign, projecting the deadline for this payment after the second quarter of 2015.

Once Ardent Mines begins extracting gold, silver or byproduct from the properties, Ardent Mines will be required to pay a monthly royalty equal to 2% of the net income from the sale of the mineral product. Ardent Mines will also be required to invest at least $3,500,000 in Gold Hills Mining Ltda. upon the development of an extensive extraction program.

Misty Hills Rights

For the Misty Hills (Serra do Sereno) project, there are additional fixed-date payments due as follows: $250,000 due on November 8th, 2012 and $150,000 on January 8th, 2013.

An additional payment of $7.20 per ounce of gold (43-101 certified measured + indicated resources), payable in six installments, is scheduled to be made after the start of production. Considering the size of the target, the exploration stage and the complexity of the environmental licensing process in the Amazon region where the project is located, it is estimated that the exploration should take at least 36 months to be completed and that the environmental licensing would consume another 18-24 months to be obtained. A reasonable projection for the payment of the first installment is the first quarter of 2017.

Carajas Mineral Province Rights

On October 18, 2011, Ardent Mines closed on its acquisition of the mineral rights in a highly mineralized area of 9,000 acres located in the Carajas Mineral Province of Brazil with an option exercise payment of $350,000 made to the Cooperativa dos Produtores de Minerios de Curionópolis (“COOPEMIC”). During the year ended June 30, 2012, aggregate payments (including the option exercise payment, purchase price and commissions) of $675,492 were made

towards this acquisition. The payments are classified on the balance sheet as mining rights during the year ended June 30, 2012.

In addition to the option exercise payment made to COOPEMIC, Ardent Mines has undertaken certain exploration commitments to COOPEMIC. Ardent Mines has also agreed to make subsequent payments to COOPEMIC on the basis of the exploration report and the extent of the extraction of gold, silver, copper and their respective by-products. If Ardent Mines determines it is advisable to continue exploration, Ardent Mines shall pay to COOPEMIC $250,000 after six months of exploration and an additional $150,000 after twelve months of exploration. If Ardent Mines' exploration activities confirm the existence of gold, silver or cooper and their respective by-products in excess of 400,000 gold equivalent ounces, Ardent Mines shall pay to COOPEMIC 30% of $24 per gold equivalent ounce contained in the mineral reserves in three tranches: (i) one-third shall be paid when the Brazilian National Department of Mineral Production shall approve the final mineral exploration report; (ii) one-third shall be paid upon commencement of the extraction of gold, silver, copper and their respective by-products, contained in the areas covered by the mining rights; and (iii) one-third shall be paid within six months from the date of commencement of the extraction of gold, silver and copper and their respective by-products, contained in the areas covered by the mining rights.

NOTE 6 – DERIVATIVE LIABILITIES

As of June 30, 2012, Ardent Mines has an aggregate of 277,923 outstanding warrants containing exercise price reset provisions which requires derivative treatment under FASB ASC 815-15. The warrants were originally issued on September 7, 2011.

The fair value of these liabilities as of September 7, 2011 and June 30, 2012 totaled $625,829 and $301,249, respectively and was calculated using a lattice model. The net change in the fair value of these derivative liabilities during the year ended June 30, 2012 resulted in a gain on the change in the fair value of derivatives of $324,580.

Fair Value Measurement

Ardent Mine's values its derivative instruments under FASB ASC 820 which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

As defined in ASC 820, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). Ardent utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. Ardent classifies fair value balances based on the observability of those inputs. ASC 820 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement).

The three levels of the fair value hierarchy defined by ASC 820 are as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 primarily consists of financial instruments such as exchange-traded derivatives, marketable securities and listed equities.

Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reported date.

Level 3 – Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value. Ardent Mine's uses Level 3 to value its derivative instruments.

The following table sets forth by level with the fair value hierarchy the Company's financial assets and liabilities measured at fair value on June 30, 2012.

	Level 1	Level 2	Level 3	Total
Assets				
None	$ -	$ -	$ -	$ -
Liabilities				
Derivative liabilities	$ -	$ -	$ 301,249	$ 301,249

The following table provides a summary of the changes in fair value, including net transfers in and/or out, of the derivative financial instruments measured at fair value on a recurring basis using significant unobservable inputs:

	Derivative Warrants
Fair value at June 30, 2011	$ -
Fair value of warrants issued	625,829
Change in fair value of derivative liabilities	(324,580)
Fair value at June 30, 2012	$ 301,249

ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A: CONTROLS AND PROCEDURES

As of the end of the period covered by this Report, an evaluation was carried out under the supervision and with the participation of our management, including our Interim Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures, as required by SEC Rule 15d-15(b). Based upon that evaluation, management has concluded that our current disclosure controls and procedures were not effective as of June 30, 2012. The conclusion that our disclosure controls and procedures were not effective was due to the presence of material weaknesses in internal control over financial reporting as identified below. Management intends to remediate the material weaknesses as set out below.

Management’s Annual Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Our internal control system was designed to, in general, provide reasonable assurance to the Company's management and board regarding the preparation and fair presentation of published financial statements, but because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of the Company's internal control over financial reporting as of June 30, 2012. The framework used by management in making that assessment was the criteria set forth in the document entitled " Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, our management has determined that as of June 30, 2012, the Company's internal control over financial reporting was not effective due to the following material weaknesses:

- *Non-timely recording of certain accounting entries.* Certain adjusting journal entries were required at the end of accounting periods, based on review by our outside accountants, which entries should

have been recorded during the period. In particular, share-based compensation expense, change in the fair value of derivative liabilities and accounts payable accruals were recorded only after review by our outside auditors instead of being recorded as the same arose which would have been the case had we maintained full-time internal accounting personnel.

- *Lack of procedures in place that include multiple levels of review over the bookkeeping and financial reporting functions.* Due to limited personnel, there does not exist a process that includes multiple levels of review over the bookkeeping and financial reporting process which resulted in multiple audit adjustments noted by our outside accountants.

We will upgrade the amount we spend on our accounting department if and when our mining operations become successful. Until then, we balance the cost of accounting personnel with the benefits of desired controls. We currently feel that our money is properly safeguarded and our transactions are timely and properly reported.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the quarter ended June 30, 2012 that has materially affected or is reasonably likely to materially affect the Company's internal control over financial reporting.
