Item 2.05 Costs Associated with Exit or Disposal Activities.

On August 3, 2007, we committed to exit all activities associated with our existing automated copper cross-connect (ACX) product line. We disclosed in our Quarterly Report on Form 10-Q for the period ended May 4, 2007 that we were facing continued uncertainty around both the scope and timing of potential deployments for our ACX product by key customers in Europe and, as a result, that we were conducting a review of this product line, its market and business case. We stated that if the outcome of that review was unfavorable it would result in write-offs or impairments of the inventory and fixed assets related to the ACX product line. We now have completed this review and decided to curtail all activities associated with our ACX product line. We presently estimate the charges for the write-off of obsolete inventory associated with this exit activity will be between \$7.0-\$9.0 million, which is subject to our ability to return, sell or use these materials in other applications. All inventory charges will be applied to cost of goods sold. We also estimate impairment charges on fixed assets will be between \$1.0-\$2.0 million as a result of this exit activity. As such, at this time we estimate total charges related to this exit activity will be between \$8.0-\$11.0 million. We presently do not expect there to be any significant additional charges or future cash expenditures as a result of the pending exit of the ACX product line. We expect to complete all exit activities during our fourth fiscal quarter. We will continue to monitor the development of the broader automation market and may determine to pursue this market in a modified manner if conditions warrant.

One-time GAAP charges arising in relation to the inventory and fixed asset charges described above are \$0.06 to \$0.09 per share on a fully diluted basis for our fiscal year 2007. Updated GAAP guidance including this charge will be provided in our earnings release for the third quarter ended August 3, 2007, which is expected to be on September 5, 2007.

Item 2.06 Material Impairments.

See Item 2.05 above for a description of the material impairments that we will incur in connection with our exit of all activities associated with our ACX product line.
