Oil and natural gas production in June

Rio de Janeiro, July 17, 2017 - Petróleo Brasileiro S.A. - Petrobras reports that its total oil and natural gas production in June was 2.81 million barrels of oil equivalent per day (boed), of which 2.70 million boed produced in Brazil and 113 thousand boed produced abroad.

The average oil production in Brazil was 2.20 million barrels per day (bpd), a volume 0.6% higher than in May. This result is due mainly to the return to production after scheduled stoppage of platform P-43, in the Barracuda and Caratinga fields, in Campos Basin, and FPSO Cidade de Mangaratiba, in the Lula field, in Santos Basin's pre-salt.

In June, natural gas production in Brazil, excluding the liquefied volume, was 80.3 million m<sup>3</sup>/d, 1.8% above the previous month. This increase is due mainly to the return to production of FPSO Cidade de Mangaratiba.

Production in the pre-salt reaches new records.

In June, oil production operated by Petrobras (own share and partners), in the pre-salt layer, hit two new records: the monthly record, at 1.35 million bpd, and the daily record, achieved on June 19, at 1.42 million barrels. In addition, operated oil and natural gas production reached the new record of 1.69 million boed.

These results are due mainly to the production start at platform P-66, in the Lula field, and the entry into production of new producer wells throughout 2017 on FPSOs Cidade de Caraguatatuba, Cidade of Ilhabela, Cidade de Maricá, Cidade de Mangaratiba and Cidade de Saquarema - all of them installed in Santos Basin.

Oil and natural gas production abroad

In June, oil production in overseas fields was at 65 thousand bpd, a volume 0.1% higher than the previous month.

Natural gas production was 8.1 million m<sup>3</sup>/d, 13% below the volume produced in May 2017. This reduction was mainly the result of lower demand for gas production in Bolivia and production drop in the Hadrian South field, in the USA.

assurance that the expected events, trends or results will actually occur. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

The Company's actual results could differ materially from those expressed or forecast in any forward-looking statements as a result of a variety of assumptions and factors. These factors include, but are not limited to, the following: (i) failure to comply with laws or regulations, including fraudulent activity, corruption, and bribery; (ii) the outcome of ongoing corruption investigations and any new facts or information that may arise in relation to the "Lava Jato Operation"; (iii) the effectiveness of the Company's risk management policies and procedures, including operational risk; and (iv) litigation, such as class actions or proceedings brought by governmental and regulatory agencies. A description of other factors can be found in the Company's Annual Report on Form 20-F for the year ended December 31, 2016, and the Company's other filings with the U.S. Securities and Exchange Commission.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

PETRÓLEO BRASILEIRO S.A. – PETROBRAS
