Notes to Consolidated Financial Statements

(Expressed in United States dollars)

(Prepared in accordance with United States generally accepted accounting principles)

Three and nine months ended September 30, 2006 and 2005 (unaudited)

**1.**

**Basis of presentation:**

The accompanying interim unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by the United States generally accepted accounting principles for a complete set of annual consolidated financial statements.

In the opinion of management, all adjustments (consisting solely of normally recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine-month period ended September 30, 2006 are not necessarily indicative of the results that may be expected for the year ended December 31, 2006 or for any other period.

For further information, refer to the consolidated financial statements and footnotes thereto included in Unity Wireless Corporation's (the Corporation) annual report on Form 10-KSB for the year ended December 31, 2005. Except as indicated in note 11(c), the accounting policies applied in the preparation of these interim consolidated financial statements are consistent with those applied in the consolidated financial statements filed with the Corporation's annual report.

Certain comparative figures have been reclassified to conform to the presentation adopted in the current year. Note 8(d) describes a restatement that has been reflected in these interim consolidated financial statements for the nine months ended September 30, 2006.

These financial statements have been prepared on the going concern basis under which an entity is considered to be able to realize its assets and satisfy its liabilities in the ordinary course of business. Operations to date have been significantly financed by debt and equity transactions. At September 30, 2006, the Corporation requires additional financing to continue to operate at current levels throughout the year. Accordingly, the Corporation's future operations are dependent upon the identification and successful completion of additional debt and equity financing, the continued support of creditors and stockholders, and, ultimately, the achievement of profitable operations. There can be no assurances that the Corporation will be successful. If it is not, the Corporation will be required to reduce operations or liquidate assets. The Corporation will continue to evaluate its projected expenditures relative to its available cash and to seek additional means of financing in order to satisfy its working capital and other cash requirements. The consolidated financial statements do not include any adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should the Corporation be unable to continue as a going concern.

**Significant accounting policies:**

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America using the same accounting policies and methods of application as those disclosed in the Corporation's financial statements for the year ended December 31, 2005, except as disclosed below and 11(c).

(a) Amounts funded for employees' rights upon retirement:

Amounts funded for employees' rights upon retirement represent contributions to severance pay funds and cash surrender life insurance policies that are recorded at their current redemption value.

(b)

Recent accounting pronouncements:

In July 2006, the FASB issued Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, ( FIN 48 ) as an interpretation of FASB Statement No. 109, *Accounting for Income Taxes* ( SFAS 109 ). This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS 109 and prescribes a recognition threshold of more-likely-than-not to be sustained upon examination. Measurement of the tax uncertainty occurs if the recognition threshold has been met. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 will be effective for us beginning January 1, 2007. Differences between the amounts recognized in the statements of financial position prior to the adoption of FIN 48 and the amounts reported after adoption should be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. The impact of the adoption of this Interpretation on the Corporation's consolidated financial statements has not yet been determined.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. The impact of the adoption of SFAS No. 157 on the Corporation's consolidated financial statements has not yet been determined.

In September 2006, the Securities and Exchange Commission ( SEC ) issued Staff Accounting Bulletin No. 108 ( SAB 108 ) which provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements

should be considered in quantifying the materiality of a current year misstatement. SAB 108 is effective for fiscal years ending after November 15, 2006. The impact of the adoption of SAB 108 on the Corporation's consolidated financial statements has not yet been determined.

**Convertible debentures (continued):**

(d)

During February 2006, the Corporation realized gross cash proceeds of \$2,200,000 from the issuance of 8% redeemable convertible notes of the Corporation plus 6,875,000 share purchase warrants on the completion of a private placement effected pursuant to Regulation D under the Securities Act of 1933. The agreement was signed on February 28, 2006 and the notes are to mature on February 28, 2009. The notes are convertible into common stock at the option of the holders at \$0.16 per share provided that the notes and related warrants are convertible into a maximum aggregate of 10,000,000 shares of common stock. Also, subject to certain conditions, the Corporation can force conversion of the notes if the volume weighted average price of the common stock is at least \$0.32 for 20 consecutive trading days. Interest on these notes is payable quarterly. At the option of the Corporation, and subject to certain conditions being met, the Corporation may make quarterly interest payments in cash or in common stock of the Corporation. If the Corporation elects to settle with shares, the number of shares issuable is calculated by reference to the market price at that time. Each warrant issued entitles the holder to purchase one of the Corporation's common shares and is exercisable at a price of \$0.16 on or before February 28, 2011, on which date the warrants will expire.

During the quarter ended September 30, 2006, the original accounting for these convertible debentures, which reflected the warrants and beneficial conversion option as equity items, was retroactively restated to reflect the following accounting.

At the date of issuing the convertible note, the Corporation calculated the fair value of warrants issued at \$1,056,170 and recorded this value as long-term liability as the Corporation does not have sufficient authorized shares available to permit the exercise of these warrants into common shares. The fair value of the warrants was calculated using the Black-Scholes option-pricing model with the following assumptions: no dividend yield; volatility of 143%; a risk-free interest rate of 4% and an expected term of five years.

Of the remaining value of the convertible debentures of \$1,143,829, the fair value of the conversion feature on those debentures which can not be converted to common stock due to insufficient authorized common share capital being available, amounting to \$311,953, has been recorded as warrant and conversion feature liability on the balance sheet. The intrinsic value of the beneficial conversion option of \$831,876 on the remaining convertible debentures where there is sufficient authorized common share capital to allow conversion has been recorded as additional paid-in capital.

The warrants and conversion feature recorded as a liability on the balance sheet are recorded at fair value with any changes in fair value for each subsequent reporting period recorded as a charge or credit to the statement of operations until such time as an increase in authorized share capital is approved by the Corporation's stockholders.

On the approval date, the fair values of the warrants issued and the conversion feature recorded as a liability will be reclassified to equity. For the nine-month period ended September 30, 2006, the fair value of the warrants and liability portion of the conversion feature has decreased by \$659,832 resulting in a credit being recorded in the statement of operations. During the nine-month period ended September 30, 2006, no debentures were converted and accretion of \$35 has been recorded as a charged to the statement of operations. As at September 30, 2006, \$2,200,000 of these debentures remain outstanding.

(e)

On June 12, 2006 (See note 3(a)), the Corporation issued \$1,750,000 of non-interest bearing convertible promissory notes that are convertible into common stock at \$0.25 per share and warrants to purchase an aggregate of 600,000 shares of common stock at an exercise price of \$0.40 per share to complete the acquisition of Avantry. The notes mature on June 12, 2007. Each warrant issued entitles the holder to purchase one of the Corporation's common shares and is exercisable at a price of \$0.40 on or before June 8, 2009, on which date the warrants will expire.

For accounting purposes, the Corporation recorded additional paid-in capital of \$71,064 relating to the fair value of warrants issued. The remaining balance of \$1,684,083 at the date of issuance was recorded as a current liability. There was no intrinsic value of the beneficial conversion feature. The carrying value of the liability is being accreted to the redemption value of the debentures over the period from June 12, 2006 to the initial maturity date of June 12, 2007.

During the nine month period ended September 30, 2006, accretion of \$21,692 has been recorded as a charge to the statement of operations, and an increase in the carrying value of the liability. There were no debentures converted during the nine-month period ended September 30, 2006. As at September 30, 2006, the face value of \$1,750,000 of these debentures remain outstanding.

**9. Employee's rights upon retirement:**

The provision for employee severance benefits included in the balance sheet represents the total liabilities for such severance benefits, while the assets held for severance benefits included in the balance sheet represents the Corporation's Israeli subsidiaries contributions to severance pay funds and to insurance policies.

Stock option plan:

Prior to January 1, 2006, the Corporation accounted for employee stock-based awards under the fair value method of SFAS 123, Accounting for Stock Based Compensation as amended by FASB Statement No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*. Effective January 1, 2006, the Corporation adopted Statement of Financial Accounting Standard No. 123R, "Share-Based Payment" ("SFAS 123R"). SFAS 123R requires measurement of compensation cost for employee stock-based awards based upon fair value over the requisite service period for awards expected to vest. Furthermore, under SFAS 123R, liability based awards are recorded at fair value through to their settlement date.

Pursuant to the provisions of SFAS 123R, the Corporation applied the modified-prospective transition method. Under this method, the fair value provision of SFAS 123R is applied to new employee share-based payment awards granted or awards modified, repurchased or cancelled after December 31, 2005. Measurement and attribution of compensation cost for unvested awards at December 31, 2005, granted prior to the adoption of SFAS 123R, are recognized based upon the provisions of SFAS No. 123, after adjustment for estimated forfeitures. SFAS 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Under SFAS No. 123 the Corporation had recognized forfeitures as they occurred. The cumulative impact of estimating forfeitures instead of accounting for forfeitures as they occur was not material to the consolidated financial statements.

The fair value of stock options are determined using the Black-Scholes option-pricing model, which is consistent with the valuation techniques previously utilized for recording stock-based compensation expense reflected in the consolidated statement of operations under SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*. As a result, there was no material impact of adopting SFAS No. 123R on the financial statements of the Corporation. The Corporation has recorded \$342,074 and \$540,775 of stock-based compensation expense during the nine months ended September 30, 2006 and 2005, respectively, and there was no change in the previously reported basic and diluted loss per share in the first nine months of 2005.

The Corporation grants options to employees and non-employees. The fair value of employee and non-employee grants in 2006 and 2005 was calculated using the Black-Scholes option-pricing model with the following weighted-average assumptions: no dividend yield; volatility of 143% (2005 154%) based on daily stock price;

risk-free interest rate of 3.25% (2005 3.25%) and expected lives between 1 to 5 years.

**Contingent liabilities:**

(a)

The Corporation is currently a party to two actions in the Supreme Court of British Columbia, Vancouver Registry, brought by two different suppliers of the Corporation for approximately \$400,000 in total.

The Corporation provides for costs related to contingencies when a loss is probable and the amount is reasonably determinable. It is the opinion of management, based in part on advice of legal counsel, that the ultimate resolution of these contingencies, to the extent not previously provided for, will not have a material adverse effect on the financial condition of the Corporation.

(b)

Contingent liability on sale of products:

(i)

Under a license agreement, the Corporation is committed to make royalty payments based on the sales of products using certain technologies. Royalties are calculated based on 5% to 6% of sales of licensed products sold integrating the XNN Technology into various products to a minimum of \$150,000 within twelve months subsequent to the first commercial sales of the integrated product. No such sales have occurred to September 30, 2006.

(ii)

Under an agreement with the Government's National Research Council Canada IRAP ( IRAP ) program, the Corporation received conditionally repayable government assistance amounting to \$368,275 (CDN\$483,491) to support the development of a multi-carrier linear power amplifier. Under the terms of the agreement, an amount up to a maximum of \$534,000 (CDN\$725,236) is to be repaid at a rate of 1.5% of quarterly gross revenue commencing on September 1, 2003, on a quarterly basis. Under the terms of the agreement, commencing with the first commercial transaction, the assistance is repayable to the extent of 2.5% of yearly gross sales until 100% of the grant has been repaid. As of September 30, 2006, the Corporation has not yet commenced the commercialization of such product, and thus no repayment is required.

Under certain conditions, the Corporate Israeli s subsidiaries commitment to pay royalties at the rates mentioned above and the total obligation for royalties shall increase. The Corporate Israeli s subsidiaries are committed to pay increased royalties for income derived from the above mentioned sale of rights.

The grants are deducted from research and development expenses. The Corporate Israeli s subsidiaries are entitled to the grants only upon incurring research and development expenditures. The Corporate Israeli s subsidiaries are not obliged to repay any amount received from the OCS if the research effort is unsuccessful or if no products are sold. However, under certain limited circumstances, the OCS may withdraw its approval of a research program or amend the terms of its approval. Upon withdrawal of approval, the Corporate Israeli s subsidiaries may be required to refund the grants, in whole or in part, with or without interest, as the OCS determines.

The Corporate Israeli s subsidiaries total obligation for royalties, based on royalty-bearing government participation, totaled approximately \$14,242,000 as of September 30, 2006.

## **Item 2. Management's Discussion and Analysis or Plan of Operation**

The following discussion of the financial condition, changes in financial condition, and results of operations of Unity Wireless Corporation should be read in conjunction with our most recent financial statements and notes appearing: (1) in this Form 10-QSB; and (2) the Form 10-KSB for the year ended December 31, 2005 filed on March 31, 2006.

The financial statements have been prepared on the going concern basis under which an entity is considered to be able to realize its assets and satisfy its liabilities in the ordinary course of business. Operations to date have been primarily financed by borrowing and equity transactions. Our future operations are dependent upon the identification and successful completion of additional long-term or permanent equity financing, the continued support of creditors and stockholders, and, ultimately, the achievement of profitable operations. There can be no assurances that we will be successful. If we are not, we will be required to reduce operations or liquidate assets. We will continue to evaluate our projected expenditures relative to our available cash and to seek additional means of financing in order to satisfy our working capital and other cash requirements. The auditors' report on the audited consolidated financial statements for the fiscal year ended December 31, 2005 contained in the 10-KSB filed on March 31, 2006, includes an explanatory paragraph that states that as we have suffered recurring losses from operations, substantial doubt exists about our ability to continue as a going concern. The audited consolidated financial statements or the interim quarterly unaudited consolidated financial statements included with this quarterly report do not include any adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should we are unable to continue as a going concern.

### ***Forward-Looking Statements***

This quarterly report contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may", "will", "should", "expects", "plans", "anticipates", "believes", "estimates", "predicts", "potential" or "continue" or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks in the section entitled "Risk Factors", that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

Our financial statements are stated in United States Dollars (US\$) and are prepared in accordance with United States Generally Accepted Accounting Principles.

In this quarterly report, unless otherwise specified, all dollar amounts are expressed in United States dollars. All references to "CDN\$" refer to Canadian dollars and all references to "common shares" refer to the common shares in our capital stock.

As used in this quarterly report, the terms "we", "us", "our", and "Unity" mean Unity Wireless Corporation, unless otherwise indicated.

**General**

Unity Wireless products are divided into two main lines; The first is Coverage Enhancement Solutions (CES), such as repeaters, and tower mounted amplifiers, that are utilized by Wireless Network Operators to extend coverage and manipulate capacity so that their overall network performance is enhanced in the most cost effective manner. The second area of Unity's business is supplying high power amplifiers (HPA) and related subsystems to the large Original Equipment Manufacturers (OEM) of base transceiver stations (BTS or base stations). Base stations are the main radio system in any wireless network and Unity has developed over 40 HPA models that are used in cellular, personal communication services (PCS), paging, wireless local loop (WLL) and third generation (3G) BTSs. Almost all of the OEM products are custom made or adapted to satisfy each OEM customer's particular requirements.

*Liquidity and Capital Resources*

Since our inception, we have been dependent on investment capital and debt financing as our primary sources of liquidity. We had an accumulated deficit at September 30, 2006 of \$32,620,525. During the nine-month period ended September 30, 2006, we incurred a net loss, after stock-based compensation, of \$5,348,039.

During the nine-month period ended September 30, 2006, our cash position was increased to \$652,236. This increase was primarily due to convertible debentures issued in the period and cash acquired as part of the acquisitions of Avanty, Celletra and Celerica. The primary use of cash was for our continued operations.

During the nine-month period ended September 30, 2006, the Corporation issued 2,925,479 common shares in settlement of \$342,642 of accounts payable, 555,555 common shares upon exercise of warrants for cash proceeds of \$72,222, and 200,000 common shares upon exercise of options for cash proceeds of \$34,000.

During the nine-month period ended September 30, 2006, we purchased \$8,574 in equipment.

Other than leases for premises, leased vehicles and equipment commitments for an aggregate of \$1,121,724 through 2009, we have no material commitments outstanding at September 30, 2006.

Our capital requirements are difficult to plan in light of our current strategy to expand our customer base and to develop new products and technologies. We do not expect positive cash flow from operations in the near term. We may not be able to obtain additional equity or debt financing on acceptable terms when we need it. We have pledged all of our assets to secure convertible notes that we issued in August 2004, February 2005, March 2005 and February 2006. We may be required to obtain the consent of certain of our investors prior to the issuance of our common stock or common stock equivalents and prior to entering into an agreement to assume certain liabilities. Our operations to date have been primarily financed by sales of our equity securities and debt financing. We are restricted from declaring dividends on our common shares pursuant to Convertible Note and Warrant Purchase Agreements dated August 31, 2004, February 11, 2005, March 24, 2005 and February 28, 2006 for so long as any of these issued convertible notes are outstanding. As of September 30, 2006, we had working deficit of \$4,753,353. Our operations presently are generating negative cash flow, and we do not expect positive cash flow from operations in the near term.

Our ability to continue as a going concern is dependent upon obtaining further financing, successful and sufficient market acceptance of our current products and any new product offerings that we may introduce, the continuing successful development of our products and related technologies, and, finally, achieving a profitable level of operations. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

***Business Combination***

a) On June 8, 2006, the Company completed the merger by and among the Company, Unity Wireless Microwave Systems Ltd. ( UW Microwave ), an Israeli corporation and a wholly owned subsidiary of the Company, and Avantry Ltd. ( Avantry ), pursuant to the terms of a merger agreement entered into by and among the parties effective February 15, 2006 ( Merger Agreement ). Under the term of the Merger Agreement, Unity Wireless Corporation acquired all of the assets of Avantry in exchange for \$1,750,000 of convertible promissory notes that are convertible into common stock at \$0.25 per shares and warrants to purchase an aggregate of 600,000 shares of common stock at an exercise price of \$0.40.

Avantry offers a comprehensive transmission product line of integrated microwave radio and optical transport systems for carrying flexible combinations of voice and data traffic. Avantry s product line offering includes:

•

Radio Ring IP A point-to-point high capacity microwave radio with integrated SDH ADM and Ethernet Switching technologies.

•

WitLink A point-to-point low to medium capacity microwave radio for carrying PDH voice and Ethernet traffic.

•

Optisky A new generation of SDH optical access system integrating voice and data for the Metropolitan Area Network (MAN).

The high technology industry, in which Avantry is involved, is highly competitive and is characterized by the risks of rapidly changing technologies as well as penetration into world market required investment of considerable resources and continuous development efforts. Avantry s future success is dependent upon several factors including the technological quality and price / performance of its products relative to those of its competitors. There can be no assurance that Avantry will be able to maintain the high technological quality of its product or to continue to develop or market its new products effectively.

b) On July 3, 2006, the Company completed the merger pursuant to the terms of a merger agreement. Under the term of the Celerica Agreement, the Company acquired the net assets of Celerica in exchange for 20,000 shares of Series A convertible non-redeemable preferred shares. Each share of the Series A preferred stock will automatically convert into 1,000 shares of common stock. The preferred shares have been initially valued at a fair value of \$2,000,000 based on multiplying the stock price as of the date of the agreement by the number of common stock that the preferred stock is convertible into.

Celerica specializes in extending RF coverage and optimizing network capacity distribution of mobile communications in urban, suburban and rural areas, using optical wireless, fiber optics and microwave technology.

The high technology industry, in which Celerica is involved, is highly competitive and is characterized by the risks of rapidly changing technologies as well as penetration into world market required investment of considerable resources and continuous development efforts. Celerica s future success is dependent upon several factors including the technological quality and price / performance of its products relative to those of its competitors. There can be no assurance that Celerica will be able to maintain the high technological quality of its product or to continue to develop or market its new products effectively.

c) On August 17, 2006, the Company completed the merger pursuant to the terms of a merger agreement. Each share of the Series B preferred stock will automatically convert into 1,000 shares of common stock. The preferred shares have been initially valued at a fair value of \$9,000,000 based on multiplying the stock price as of the date of the agreement and the closing date by the number of non contingent and contingent common stock, respectively, which the preferred stock is convertible into. The warrants have been initially valued at a fair value of \$2,026,533 calculated using the Black-Scholes valuation model.

Celletra specializes in technology that provides wireless operators with solutions to achieve optimal coverage and to improve coverage and capacity of existing cells.
