Huaneng Power International, Inc.  
Huaneng Building,  
6 Fuxingmennei Street,  
Xicheng District,  
Beijing, 100031 PRC

This Form 6-K consists of:

An announcement regarding power generation for the first quarter of 2016 Huaneng Power International, Inc. (the Registrant”), made by the Registrant on April 16, 2016.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange of Hong Kong Limited take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

POWER GENERATION  
FOR THE FIRST QUARTER OF 2016

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

According to the preliminary statistics of Huaneng Power International, Inc., for the first quarter of 2016, the Company's total power generation by the power plants within China on consolidated basis amounted to 76.860 billion kWh, representing a decrease of 6.89% over the same period last year. Total electricity sold by the Company amounted to 72.723 billion kWh, representing a decrease of 6.76% over the same period last year. For the first quarter of 2016, the Company's average on-grid electricity settlement price for its power plants within China amounted to RMB401.86 per MWh, representing a decrease of 10.69% over the same period last year.

The decrease in power output of the Company was mainly due to: (1) a slow growth in power consumption of the whole society and a decline in utilization hours in the first quarter of 2016; (2) the nation-wide cross-transmission increased in January and February when compared with the same period of last year, thus encroaching the power generation space of thermal power units in Henan, Chongqing, Shanghai, Jiangsu, Zhejiang, Guangdong areas. The Company has been affected to a greater extent as it has a relatively high proportion of thermal power generating units in such areas; (3) water supply is relatively abundant in the first quarter of this year. The hydropower output of power plants with capacity level above the nation-wide scale increased substantially when compared with the same period of last year. Thus encroaching the power generation space of thermal power in provinces and cities in Central China and East China; and (4) new nuclear generating units commenced production in Zhejiang, Fujian and Hainan in 2015, thus impacting the power output of the thermal generating units of the above areas.

The power generation (in billion kWh) by each of the Company's domestic power plants are listed below:
