5 Business Review and Prospects and Management’s Discussion and Analysis

5.1 Business Review

The first half of 2016 saw weak global economic recovery. China’s GDP grew by 6.7% year on year. The oil products pricing mechanism was further improved with the price floor put into place. Domestic consumption of oil products was up by 4.4%, driven by gasoline and kerosene consumption growth and partly offset by continuing decline in diesel consumption, showing continuous divergence in the consumption mix of oil products. Domestic consumption of major chemicals continued to grow. Ethylene equivalent consumption increased by 1.7% compared with the first half of 2015. Chemical prices were lower following decline in feedstock prices, but chemical products margin remains at high levels.

In the first half of 2016, international crude prices recorded a sharp decline from prices in the first half of 2015, and bottomed out during the period, with the average spot price of Platts Brent at USD 39.81 per barrel, 31.2% below the level in the same period last year.

Operation Review

(1)

Exploration and production

To address the challenge of low oil prices, we effectively optimised exploration and development activities in the first half of this year. Our continuing efforts in exploration paid off with new oil discoveries in the Tahe of Xingjiang Autonomous Region, the Beibu Gulf off-shore in Guangxi and the Yin-E Basin in the Nei Mongol Autonomous Region and new natural gas findings in west Sichuan and the Erdos Basin. A strong focus was placed on the development of natural gas. Phase Two shale gas development project in Fuling Shale Gas field further facilitated our shale gas development. Production in the first half of 2016 was 218.99 million barrels of oil equivalent, of which domestic crude production was 128.38 million barrels, overseas crude production was 25.79 million barrels, and total gas production was 388.69 billion cubic feet. In production, we strengthened cost discipline, reduced high-cost oil production, and increased natural gas production.

Exploration and Production: Summary of Operations

	Six-month period ended 30 June		Changes
	2016	2015	(%)
Oil and gas production (mmboe)	218.99	232.95	(5.99)
Crude oil production (mmbbls)	154.17	174.07	(11.43)
 China	128.38	147.47	(12.95)
 Overseas	25.79	26.60	(3.05)
Natural gas production (bcf)	388.69	353.26	10.03

(2)

Refining

In the first half of this year, we adjusted our product mix in response to sharp increase of throughput from independent refineries and ample market supply. We further optimised our oil product slate by increasing the production of gasoline, kerosene and light chemical feedstock and decreasing diesel-to-gasoline ratio to 1.17, reduced our crude purchasing costs, moderately increased refined oil products export and pressed ahead with oil products standards upgrading. Centralised marketing of the lubricant, LPG and asphalt businesses helped enhance the profitability of those products. In the first half of 2016, we processed 116 million tonnes of crude oil and produced 73.26 million tonnes of refined oil products, with production of gasoline and kerosene up by 3.74% and 3.36%, respectively, from levels in the first half of 2015.

Refining: Summary of Operations

	Six-month period ended 30 June		Changes
	2016	2015	(%)

Marketing and distribution

In the first half of 2016, we coordinated and optimised resources and took full advantage of the synergy between our fuel and non-fuel businesses, achieving growth in both total business volume and retail sales despite ample domestic fuel supply and strong competition in the market. In addition, we adjusted marketing efforts by increasing the retailing of premium products with high octane number. We further improved our product pipeline network, accelerated the building of service stations and optimised marketing network. The total sales volume of refined oil products in the first half of 2016 was up by 4.5% from the corresponding period last year to 97.17 million tonnes, of which domestic sales accounted for 86.51 million tonnes, up by 3.1%. Non-fuel business transaction was up by 43% from the first half of 2015 to RMB 18.5 billion owing to Internet+ marketing promotions and other measures

Marketing and Distribution: Summary of Operations

	Six-month period ended 30 June		Change (%)
	2016	2015	
Total sales volume of refined oil products (million tonnes)	97.17	92.97	4.52
Total domestic sales volume of refined oil products (million tonnes)	86.51	83.92	3.09

(4)

Chemicals

In the first half of this year, we continued to adjust the structure of our feedstock, products and facilities to address market changes and maximise profit. We further lowered the feedstock cost for ethylene, strengthened the integration among production, sales, product R&D and customer needs, and continuously optimised operations of our manufacturing facilities, which has achieved great results. Ethylene production for the first half of 2016 was 5.478 million tonnes, up by 0.38% from the corresponding period last year. We strengthened the R&D, production and marketing capabilities of new high value-added products, with the ratio of performance polymer reaching 58% and the differential ratio of synthetic fiber reaching 83.2%. We also focused on bettering customer services and enhancing customer loyalty. At the same time, we held firm to our strategies of low inventories and differentiated marketing. In the first half of 2016, total chemicals sales volume increased by 8.3% from the corresponding period last year to 32.82 million tonnes.

Major Chemical Products: Summary of Operations	Six-month period ended 30 June		Unit:
	2016	2015	thousand tonnes Changes (%)
Ethylene	5,478	5,457	0.38
Synthetic resin	7,500	7,476	0.32

Synthetic fiber	637	638	(0.16)
Synthetic rubber	411	453	(9.27)

Note: Includes 100% of production of domestic joint ventures.

5.1.2

Safety Management and Environmental Protection

Work safety has always been at the core of our operations and we continued to strengthen our safety management in the first half of 2016. We conducted special work to reduce safety risks in our oil and gas pipelines and tank farms, put protective measures in place to cope with strong rainfall and bad weather, spared no efforts to implement prevention & control measures, and realised safe production in general.

We strengthened our green and low-carbon strategy by intensifying our work in environmental protection, energy conservation and emissions control. We continued to advance our energy performance contract model and energy management system, defined the projects of our Energy Efficiency Doubling initiative, and completed our Clear Water, Blue Sky program. In the first half of 2016, energy intensity was down by 0.69%, chemical oxygen demand in discharged waste water was down by 7.88%, ammoniac nitrogen emissions were down by 3.96%, sulfur dioxide emissions were down by 6.88%, and NOx emissions were down by 3.02% from levels in the corresponding period last year, and all hazardous chemicals, discharged water, gas, and solid waste were properly treated.

5.1.3

Capital Expenditures

To address the changing business environment, we improved the decision-making mechanism for investments and focused on managing investment return and increasing growth quality and efficiency. In the first half of 2016 total capital expenditure was RMB 13.474 billion. Capital expenditure for the exploration and production segment was RMB 5.168 billion, mainly for Phase Two of shale gas development in Fuling, the LNG terminals in Guangxi and Tianjin, and Phase Two of the Jinan-Qingdao gas pipeline. Capital expenditure for the refining segment was RMB 2.774 billion, mainly for gasoline and diesel quality upgrading and refinery optimisation projects. Capital expenditure for the marketing and distribution segment was RMB 2.61 billion, mainly for renovations of service stations, refined oil products pipelines and depots and safety projects. Capital expenditure for the chemicals segment was RMB 2.44 billion, mainly for feedstock and product optimisation projects and coal chemical projects of East Ningxia project and Zhongtianhechuang project. Capital expenditure for corporate and others was RMB 482 million, mainly for R&D facilities and IT application projects.

5.2

Business Prospects

China's economic growth is expected to be steady in the second half of 2016, which will drive the growth of domestic demand for refined oil products and petrochemical products. The consumption mix of oil products shall continue to change, and demand for chemical products shall be gradually going for more high-end products. Yet over-supply in the international oil market is likely to persist, and international oil prices will stay at a low level. The competitiveness of naphtha based chemicals will remain strong.

Against this background, we will spare no effort to expand our markets, optimise our operations, control costs, adjust asset structure and manage risks with the following focuses in each business segment:

We will maintain the level of input intensity in exploration and optimise planning of our exploration program to achieve high efficiency. For oil, we will strengthen progressive exploration and reservoir evaluation for oil projects to increase the quality of new projects and apply refined management over existing projects. For natural gas, we will speed up key capacity building projects, optimise production and sales, intensify reservoir assessment in west Sichuan and Northeast China, and press ahead with development of Fuling Shale Gas field. In the second half of 2016, we plan to produce 147 million barrels of crude oil, of which domestic production will account for 125 million barrels and overseas production will account for 22 million barrels. We plan to produce 421.2 billion cubic feet of natural gas during the period.

We will base our refining facility utilisation rates on market conditions, allocate crude resources and refining throughput according to profit margins and regional conditions, optimise our product slate to increase high value-added products, and emphasise technology R&D. We will continue to lower the diesel-to-gasoline ratio, upgrade the refined oil products' quality, increase clean fuel production and expand the sales volume of lubricants, LPG and asphalt. We plan to process 120 million tonnes of crude in the second half of this year.

We will focus on both sales volume and profits in marketing and distribution business, with profits as priority goals of operation. We will redouble efforts to expand our markets, increase our retail volume, optimise our sales structure, develop our automotive gas business by building and operating more CNG/LNG stations, and promote our non-fuel businesses by improving operations of convenience stores, adding new and specialty products and innovating our business model, and shall facilitate our transformation into a modern and comprehensive service provider. We plan to sell 84 million tonnes of refined oil products in domestic market in the second half of this year.

We will further optimise our chemical feedstock structure to further reduce cost of feedstock, and operations and intensify profit analysis and evaluation of our product value chain and facilities. Contribution to profit margins will determine the slate of production and utilisation of facilities, and we will strengthen optimisation of product mix, produce more new and high value-added products in accordance with market demand. We will strengthen the development and application of new products, and upgrade three major synthetic materials. We will also make further improvements to the marketing network and customer services by providing our customers with value-added services and integrated solutions. We plan to produce 5.56 million tonnes of ethylene in the second half of 2016.

In the second half of the year, we will remain focused on implementing the development plan for 2016 through 2020, transforming the pattern of growth, adjusting asset structure, upgrading asset quality and promoting sustainable growth to achieve solid business results.

5.3 Management's Discussion and Analysis

The following discussion and analysis should be read in conjunction with the Company's audited interim financial statements and the accompanying notes in the interim report of Sinopec Corp. Parts of the following financial data, unless otherwise stated, were abstracted from the company's audited interim financial statements that have been prepared according to IFRS.

5.3.1 Consolidated results of operations

In the first half of 2016, the Company's turnover and other operating revenues were RMB 879.2 billion, representing a decline of 15.6% year on year, and operating profit was RMB 35.1 billion, representing a decline of 13.3% year on year.

The following table sets forth the principal revenue and expenses items from the Company's consolidated financial statements for the first half of 2016 and the corresponding period in 2015:

(1) Turnover and other operating revenues

In the first half of 2016, the Company's turnover was RMB 856.8 billion, representing a decrease of 16.2% year on year. The change was mainly attributable to the decline of international crude oil price and petrochemical product prices as compared with the same period of last year.

The following table sets forth the external sales volume, average realised prices and respective change rates of the Company's major products in the first half of 2016 as compared with the first half of 2015.

	Sales Volume (thousand tonnes)			Average realised price (VAT excluded) (RMB/tonne, RMB/thousand cubic meters)		
	Six-month periods ended 30		Change (%)	Six-month periods ended		Change (%)

Most of the crude oil and a small portion of natural gas produced by the Company were internally used for refining and chemical production with the remaining sold to other customers. In the first half of 2016, the turnover from crude oil, natural gas and other upstream products sold externally amounted to RMB 23.0 billion, decreased by 20.9% year on year, accounting for 2.6% of the Company's turnover and other operating revenues. The change was mainly attributable to lower prices of crude oil and natural gas as well as declined external sales volume of crude oil under the Company's profit-oriented production plan with a focus on optimisation of crude oil production.

Petroleum products (mainly consisting of oil products and other refined petroleum products) sold by the Refining Segment and the Marketing and Distribution Segment achieved external sales revenues of RMB 538.6 billion, representing a decrease of 13.0% year on year and accounting for 61.3% of the Company's turnover and other operating revenues. Those changes were mainly due to the decline of downstream product prices driven by sharp drop of crude oil prices. The sales revenue of gasoline, diesel and kerosene was RMB 467.2 billion, representing a decrease of 10.0% year on year, accounting for 86.7% of the sales revenue of petroleum products. Sales revenue of other refined petroleum products was RMB 71.5 billion, representing a decline of 28.5% year on year, accounting for 13.3% of the sales revenue of petroleum products.

The Company's external sales revenue of chemical products was RMB 126.3 billion, representing a decrease of 10.8% year on year, accounting for 14.4% of its turnover and other operating revenues. The decreased sales revenue as a result of lower chemical product price was partly offset by the company's marketing effort in expanding market.

(2) Operating expenses

In the first half of 2016, the Company's operating expenses were RMB 844.1 billion, representing a decrease of 15.6% year on year. The operating expenses mainly consisted of the following:

Purchased Crude oil, products and operating supplies and expenses were RMB 615.4 billion, representing a decrease of 20.2% year on year, accounting for 72.9% of total operating expenses, of which:

• Crude oil purchasing expenses were RMB 163.1 billion, representing a decrease of 35.2% year on year. Throughput of crude oil purchased externally in the first half of 2016 was 85.88 million tonnes (excluding the volume processed for third parties), decreased by 4.4% year on year. The average cost of crude oil purchased externally was RMB 1,900 per tonne, decreased by 32.2% year on year.

• Other purchasing expenses were RMB 452.3 billion, decreased by 12.8% year on year. The change was mainly due to the decline of crude oil prices, which resulted in lower purchase prices of crude oil related petrochemical products.

Selling, general and administrative expenses of the Company totaled RMB 33.1 billion, representing an increase of 2.5% year on year. The change was mainly due to increased investment in R&D and intensified conversions of research outcomes into productivity. The R&D expense was up by RMB 1.2 billion year on year. Under the Company's cost-saving efforts, other expenses decreased as compared with the corresponding period of 2015.

Depreciation, depletion and amortisation expenses of the Company were RMB 49.1 billion, representing an increase of 6.1% year on year. This was mainly due to the continued investments in fixed assets.

Exploration expenses in the first half of 2016 were RMB 4.7 billion, representing a decrease of 21.6% year on year. This was mainly due to higher successful exploration rate and optimised deployment.

Personnel expenses were RMB 29.1 billion, representing an increase of 8.8 % year on year. The change was mainly attributable to the improvement of our recruitment system, resulting in transfer of part of remuneration related expense from selling, general and administrative expenses into personnel expenses.

Taxes other than income tax were RMB 112.8 billion, representing a decrease of 5.9% year on year. This was mainly due to declined domestic consumption of diesel, resulting in a decrease of sales volume of diesel from refineries as compared with the corresponding period of 2015, which cause a decrease of RMB 5.6 billion in consumption tax. The special oil income levy decreased by RMB 0.8 billion as a result of decreased prices of crude oil and natural gas.

(3) Operating profit

In the first half of 2016, the Company's operating profit was RMB 35.1 billion, representing a decrease of 13.3% year on year.

(4) Net finance costs

In the first half of 2016, the Company's net finance costs were RMB 4.3 billion, up by RMB 0.9 billion, representing an increase of 26.6% year on year, of which: foreign currency exchange losses amounted to RMB 0.48 billion due to RMB depreciation, compared with a net gain of RMB 0.16 billion in the corresponding period of 2015. After the implementation of exchange rate reform by People's Bank of China in 2015, the Company has adjusted its debt structure in time by gradually deleveraging its debt in foreign currencies. As of the end of this period, the Company had almost eliminated its foreign exchange rate risk exposure of debt in foreign currencies. Meanwhile, the Company took measures to hedge exchange risk of accounts payable with financial derivatives while relevant earnings were added into investment incomes, offsetting effects of currency fluctuations on the Company's performance.

(5) Profit before taxation

In the first half of 2016, the Company's profit before taxation amounted to RMB 35.5 billion, representing a decrease of 14.1% year on year.

(6) Tax expense

In the first half of 2016, the Company's tax expense totaled RMB 8.4 billion, down by 13.4% year on year.

(7) Profit attributable to non-controlling interests of the Company

In the first half of 2016, profit attributable to non-controlling shareholders was RMB 7.2 billion, up by RMB 1 billion, representing an increase of 15.8% year on year. This was mainly due to higher profitability of the Company's non-controlling subsidiaries in refining and chemicals segments.

(8) Profit attributable to Owners of the Company

In the first half of 2016, profit attributable to owners of the Company was RMB 19.9 billion, representing a decrease of 21.6% year on year. The Company's upstream business suffered a wider loss year on year due to declined prices of crude oil and natural gas, however, profits from refining and marketing segments increased while performance of chemicals segment remained stable, demonstrating advantages of the Company's integrated business model.

6 Dividend

6.1 Dividend distribution for the year ended 31 December 2015

Upon its approval at the annual general meeting of the Sinopec Corp. for the year 2015, Sinopec Corp. distributed the final dividend of RMB 0.06 per share (tax inclusive). The final dividend for 2015 has been distributed to shareholders on and before 30 June 2016 who were registered as existing shareholders as at 23 June 2016. Combined with the 2015 interim dividend of RMB 0.09 per share (tax inclusive), the total cash dividend for the year 2015 amounted to RMB 0.15 per share (tax inclusive).

6.2 Interim dividend distribution plan for the six-month ended 30 June 2016

As approved by the 8th meeting of the sixth session of the board of directors of Sinopec Corp. (the "Board"), the interim dividend for the six-month ended 30 June 2016 of RMB 0.079 per share (tax inclusive) will be distributed based on the total number of shares as of 20 September 2016 (the Record Date) in cash.

The Sinopec Corp's 2016 interim profit distribution proposal is in compliance with the Articles of Association and relevant procedures. The independent non-executive directors have issued independent opinions on it.

The interim cash dividend will be distributed on or before 30 September 2016 (Friday) to all shareholders whose names appear on the register of members of Sinopec Corp. on the record date of 20 September 2016 (Tuesday). To be entitled to the interim dividend, holders of H shares shall lodge their share certificate(s) and transfer documents with Hong Kong Registrars Limited at 1712-1716, 17th floor, Hopewell Centre, No. 183 Queen's Road East, Wanchai, Hong Kong, for registration of transfer, no later than 4:30 p.m. on 12 September 2016 (Monday). The register of members of the H shares of Sinopec Corp. will be closed from 13 September 2016 (Tuesday) to 20 September 2016 (Tuesday) (both dates inclusive).

The dividend will be denominated and declared in Renminbi (RMB), and distributed to domestic and Shanghai-Hong Kong Stock Connect shareholders in RMB and to foreign shareholders in Hong Kong Dollar. The exchange rate for dividend to be paid in Hong Kong dollars is based on the average benchmark exchange rate of RMB against Hong Kong dollar as published by the People's Bank of China one week preceding the date of declaration of the interim dividend, being 26 August 2016 (Friday).

In accordance with the Enterprise Income Tax Law of the People's Republic of China and its implementation regulations which came into effect on 1 January 2008, Sinopec Corp. is required to withhold and pay enterprise income tax at the rate of 10% on behalf of the non-resident enterprise shareholders whose names appear on the register of members for H Shares of Sinopec Corp. when distributing the cash dividends to them. Any H Shares of the Sinopec Corp. registered not under the name of an individual shareholder, including HKSCC Nominees Limited, other nominees, agents or trustees, or other organisations or groups, shall be deemed as shares held by non-resident enterprise shareholders. Therefore, enterprise income tax shall be withheld from dividends payable to such shareholders. If holders of H Shares intend to change their shareholder status, they should enquire about the relevant procedures with their agents or trustees. Sinopec Corp. will withhold and pay enterprise income tax on behalf of the relevant shareholders based on the register of members for H shares of Sinopec Corp. as at the Record Date in accordance with the laws or the requirements of relevant government authorities.

If the individual holders of the H shares who are Hong Kong or Macau residents or residents of the countries which had an agreed tax rate of 10% for cash dividends to them with China under relevant tax agreement, Sinopec Corp. should withhold and pay individual income tax on behalf of the relevant shareholders at a rate of 10%. Should the individual holders of the H Shares are residents of the countries which had an agreed tax rate of less than 10% with China under relevant tax agreement, Sinopec Corp. shall withhold and pay individual income tax on behalf of the relevant shareholders at a rate of 10%. In that case, if the relevant individual holders of the H Shares wish to reclaim the extra amount withheld (the “Extra Amount”) due to the application of 10% tax rate, Sinopec Corp. can apply for the relevant agreed preferential tax treatment provided that the relevant shareholders submit the evidence required by the notice of the tax agreement to the share register for H shares of Sinopec Corp. Sinopec Corp. will assist with the tax refund after the approval of the competent tax authority. Should the individual holders of the H Shares are residents of the countries which had an agreed tax rate of over 10% but less than 20% with China under the tax agreement, Sinopec Corp. shall withhold and pay the individual income tax at the agreed actual rate in accordance with relevant tax agreements. In the case that the individual holders of the H Shares are residents of the countries which had an agreed tax rate of 20% with China, or which has not entered into any tax agreement with China, or otherwise, Sinopec Corp. shall withhold and pay the individual income tax at a rate of 20%.

Pursuant to the Notice on the Tax Policies Related to the Pilot Program of the Shanghai-Hong Kong Stock Connect (沪港通) (Caishui [2014] No. 81):

For domestic investors investing in the H Shares of Sinopec Corp. through Shanghai-Hong Kong Stock Connect, Sinopec Corp. shall withhold and pay income tax at the rate of 20% on behalf of individual investors and securities investment funds. Sinopec Corp. will not withhold or pay the income tax of dividends for domestic enterprise investors and those domestic enterprise investors shall report and pay the relevant tax themselves.

For investors of the Hong Kong Stock Exchange (including enterprises and individuals) investing in the A Shares of Sinopec Corp. through Shanghai-Hong Kong Stock Connect, the Company will withhold and pay income taxes at the rate of 10% on behalf of those investors and will report to the tax authorities for the withholding. For investors who are tax residents of other countries and whose country of domicile is a country which has entered into a tax treaty with China stipulating a dividend tax rate of lower than 10%, those enterprises and individuals may, or may entrust a withholding agent to, apply to the competent tax authorities for the entitlement of the rate under such tax treaty. Upon approval by the tax authorities, the paid amount in excess of the tax payable based on the tax rate according to such tax treaty will be refunded.

7.3 Changes in accounting polices

Applicable; Not applicable

On 26 August 2016, the 8th meeting of the sixth session of the Board was convened, during which the "Proposal on Changes in Accounting Policy of Sinopec Corp." (the "Changes in Accounting Policy") was considered and approved unanimously by the Board.

In 2014, the International Accounting Standards Board published Amendments to International Accounting Standard 27 (IAS 27) — Separate Financial Statements. These amendments allowed entities to use equity method to account for investments in subsidiaries, joint ventures and associates in their separate financial statements. Entities wishing to change to the equity method must do so retrospectively. The amendment is effective from 1 January 2016.

In order to eliminate the difference regarding subsequent measurements on investments in joint ventures and associates between separate financial statements prepared in accordance with ASBE and IFRS, Sinopec Corp. changed its subsequent measurements on investments in associates and joint ventures from cost method to equity method in its separate financial statements prepared in accordance with IFRS from 1 January 2016.

By adopting the amendments to IAS 27 — Separate Financial Statements, the balance of investments in associates, investments in joint ventures, retained earnings and other reserves as at 31 December 2015 would be increased by RMB 8,056 million, RMB 644 million, RMB 8,672 million and RMB 28 million in the separated financial statements prepared in accordance with IFRS due to the retrospective adjustment.

The Changes in Accounting Policy has no impact on financial statements prepared in accordance with ASBE or consolidated financial statements prepared in accordance with IFRS.

7.4 The Group has no material accounting errors during the reporting period.

7.5 Changes in the scope of consolidation as compared with those for last annual report

√ Applicable □ Not applicable

Sinopec Corp. and Sinopec Assets Management Corporation (“SAMC”) jointly set up Gaoqiao Petrochemical Co. Ltd. for RMB 100 million in cash in 2016. Subsequently, Sinopec Corp. subscribed capital contribution with the net assets of Gaoqiao Branch of the Company and SAMC subscribed capital contribution with the net assets of Gaoqiao Branch of SAMC. The capital contribution was completed on 1 June 2016, after which Sinopec Corp. held 55% of Gaoqiao Petrochemical Co. Ltd.’s voting rights and become the parent company of Gaoqiao Petrochemical Co. Ltd.

As China Petrochemical Corporation controls both the Company and SAMC, the transaction described above between Sinopec Corp. and SAMC has been accounted as business combination under common control. Accordingly, the assets and liabilities of Gaoqiao Branch of SAMC have been accounted for at historical cost, and the consolidated financial statements of the Company prior to these acquisitions have been restated to include the results of operation and the assets and liabilities of Gaoqiao Branch of SAMC on a combined basis.

7.6 Notes on the financial statements prepared under IFRS

7.6.1 Turnover

Turnover primarily represents revenue from the sales of crude oil, natural gas, petroleum and chemical products.

ANNOUNCEMENT ON CHANGES IN ACCOUNTING POLICY

Important Note:

The captioned Changes in Accounting Policy have no impact on the financial statements prepared in accordance with China Accounting Standards for Business Enterprises (“ASBE”) and consolidated financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”)

1. Introduction of the Changes in Accounting Policy

On 26 August 2016, the eighth meeting of the Sixth Session of the board of directors (the “Board”) of China Petroleum & Chemical Corporation (“Sinopec Corp.” or the “Company”) was convened, during which the “Proposal on Changes in Accounting Policy of Sinopec Corp.” (the “Changes in Accounting Policy”) was considered and approved unanimously by the Board.

The Changes in Accounting Policy is not subject to the approval of shareholders at the general meeting of the Company.

2. Details of Changes in Accounting Policy and Impacts on the Company

1) Nature, content and reason for the Changes in Accounting Policy

In 2014, the International Accounting Standards Board published Amendments to International Accounting Standard 27 (IAS 27) — Separate Financial Statements. These amendments allowed entities to use equity method to account for investments in subsidiaries, joint ventures and associates in their separate financial statements. Entities wishing to change to the equity method must do so retrospectively. The amendment is effective from 1 January 2016.

In order to eliminate the difference regarding subsequent measurements on investments in joint ventures and associates between separate financial statements prepared in accordance with ASBE and IFRS, the Company changed its subsequent measurements on investments in associates and joint ventures from cost method to equity method in its separate financial statements prepared in accordance with IFRS from 1 January 2016.

2) The impacts on the Company of the Changes in Accounting Policy

By adopting the amendments to IAS 27 — Separate Financial Statements, the balance of investments in associates, investments in joint ventures, retained earnings and other reserves as at 31 December 2015 would be increased by RMB8,056 million, RMB644 million, RMB8,672 million and RMB28 million in the separated financial statements prepared in accordance with IFRS due to the retrospective adjustment.

The Changes in Accounting Policy has no impact on financial statements prepared in accordance with ASBE or consolidated financial statements prepared in accordance with IFRS.

3. Opinion of Independent Directors

The independent non-executive directors of the Company are of the view that the decision-making procedures for the Changes in Accounting Policy have complied with applicable laws and regulations and the articles of association of the Company. The Changes in Accounting Policy are in the interests of the Company and its shareholder as a whole, and without prejudice to the interests of Sinopec Corp. and its independent shareholders. Consent has been given to the above Changes in the Accounting Policy.
