Media Release

Credit Suisse announces profitable 3Q16

- Group reported PTI of CHF 222 million, up 12% compared to 2Q16
- Group adjusted* PTI of CHF 327 million, up 13% compared to 2Q16
- Combined reported PTI of CHF 1,155 million (adjusted* CHF 847 million) for APAC, SUB and IWM
- Adjusted* non-compensation expenses down 12% at constant FX rates compared to 3Q15; as of November 3, 2016, headcount¹ reduced by 5,400 of the 6,000 targeted for FY16
- Net income attributable to shareholders of CHF 41 million

Wealth Management NNA of CHF 30.9 billion for 9M16 in challenging markets

- Wealth Management NNA of CHF 9.2 billion for 3Q16
- Cumulative Wealth Management NNA for 9M16 of CHF 30.9 billion, up 40% compared to 9M15
- 9M16 Wealth Management AuM of CHF 725 billion, up 9% compared to 9M15

IBCM and GM profitable

- Strong revenue contribution in IBCM with outperformance in debt and equity underwriting
- Positive momentum in GM from core Credit franchise

Strengthening of capital position and leverage ratio

- Look-through CET1 ratio of 12%, up 180 bp compared to 3Q15; includes a gain on the sale of real estate of CHF 346 million and litigation provisions of CHF 357 million
- Look-through CET1 leverage ratio of 3.4%, up 60 bp compared to 3Q15
- SRU reduced leverage exposure by USD 29 billion and RWA by USD 3 billion compared to 2Q16, contributing to Group's improved capital position and look-through CET1 leverage ratio

Tidjane Thiam, Chief Executive Officer of Credit Suisse, stated: "In 3Q16, we remained focused on implementing our strategy with discipline. The hard work of our teams across our divisions has allowed us to confirm the positive trends that were visible in our 2Q16 results.

We have remained focused on reducing our cost base, with our total adjusted* operating cost base at constant FX rates decreasing by 2% compared to 3Q15. At constant FX rates, adjusted* non-compensation expenses decreased 12%, reflecting our restructuring efforts beyond straight headcount reductions. In parallel, as of November 3, 2016, our headcount¹ was reduced by 5,400. We estimate that the annualized equivalent of the net adjusted cost savings achieved in 9M16 is CHF 1.5 billion²: we are on track to beat our end-2016 target.

APAC, SUB and IWM were all profitable with combined adjusted* PTI of CHF 847 million and generated CHF 9.2 billion of Wealth Management NNA. Cumulative Wealth Management NNA of CHF 30.9 billion in 9M16 were up 40% compared to 9M15. Our IBCM division achieved a 16% increase in USD net revenues in 3Q16 compared to 3Q15 and our Global IBCM franchise achieved a 22% increase in 3Q16 revenues year on year. In our restructured GM division, RWA are down 16% and revenues are down 14% compared to 3Q15. Thanks to our focus on costs, GM was profitable for the second consecutive quarter with particular strength in Global Credit Products. We continued to make progress in the SRU, reducing leverage exposure by USD 78 billion and RWA by USD 20 billion compared to 3Q15. Over the same period, SRU costs have decreased by USD 310 million or 47%.

In APAC, net revenues for the division totaled CHF 917 million in 3Q16, representing an increase against both 2Q16 and 3Q15. Wealth Management produced record net revenues of CHF 346 million. NNA were strong at CHF 4.6 billion, and we reached record AuM of CHF 169 billion, driven by increased momentum with UHNWI and entrepreneur clients. Our integrated coverage model in these segments is continuing to gain traction as we deliver bespoke financing, underwriting and advisory services to this target client base.

1

SUB delivered solid adjusted* PTI of CHF 431 million in 3Q16. In Wealth Management, we recorded outflows of CHF 0.5 billion and CHF 0.4 billion as we exited a number of EAM relationships and in relation to ongoing regularization measures, respectively, resulting in NNA of CHF 0.2 billion. Compared to 2Q16, we generated stable NII, offset by seasonally lower transaction volumes.

IWM continued to attract strong NNA in Wealth Management, which totaled CHF 4.4 billion in 3Q16. Our 2016 growth initiatives, including the launch of the Strategic Client Partners unit with a dedicated coverage team, have allowed us to create further value for our UHNWI clients. In 3Q16, strong NII reflected higher loan volumes and higher margins, offsetting seasonally weaker transaction volumes that remained adversely affected in a challenging market environment.

In IBCM, we generated USD 55 million of adjusted* PTI in 3Q16. Overall, IBCM net revenues were up 16% from 3Q15, with Equity and Debt Underwriting up 40% and 13%, respectively, contributing to our top 5 position³ across key products. In Advisory, we continued to leverage the strength of our global franchise, with a number of marquee transactions exceeding USD 10 billion⁴ announced during 3Q16.

GM delivered adjusted* PTI of USD 150 million, a result achieved by a combination of our focus on cost reduction and the strong performance in Credit compared to 3Q15. Global Credit Products delivered its best third quarter performance since 2013 as our teams stayed close to clients across high yield and investment grade markets. This was offset by a weaker contribution from our equities businesses, particularly in equity derivatives and equities trading in Europe. In the US, our Equities franchise held up well and we maintained our strong positions with our core clients across Cash and Prime Services. We continue to make progress in creating operating leverage in GM and expect to approach our end-2018 cost target of USD 5.4 billion by end-2016.

Compared to 3Q15, the SRU delivered further reductions in leverage exposure of USD 78 billion and in RWA of USD 20 billion. Over the same period, SRU adjusted* costs have decreased by USD 310 million or 47%. The progress in the SRU is central to the restructuring of the Group as it contributes to generating the resources we need to invest in APAC, IWM, SUB and IBCM, where we expect to produce higher returns.

We further strengthened our capital position with a CET1 ratio of 12% on a look-through basis as of end-3Q16, including the impact of litigation provisions of CHF 357 million.

During 3Q16, we continued to make progress in implementing our strategy. We have reduced costs significantly and continued to grow profitably in our chosen markets, with cumulative NNA across Wealth Management up 40% year on year. Disciplined capital management, organic capital generation and the disposal of assets and businesses announced in March 2016 have allowed us to continue to invest in higher return areas.

Looking ahead, we expect market activity to continue to be influenced by geopolitical and macro-economic uncertainty over the next several quarters and the outlook to remain challenging.

We still have a long way to go in our journey but we are fully mobilized to deliver in challenging market conditions on our key commitments to reduce cost, strengthen our capital base and drive profitable business growth.”

The results of Credit Suisse Group comprise the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core results exclude revenues and expenses from our Strategic Resolution Unit.

As we move ahead with the implementation of our strategy, it is important to measure the progress achieved by our underlying business performance in a consistent manner. To achieve this, we will focus our analyses on adjusted results.

Adjusted results referred to in this release are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for the purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. We will report quarterly on the same adjusted* basis for the Group, Core and divisional results until end-2018 to allow investors to monitor our progress in implementing our strategy, given the material restructuring charges we are likely to incur and other items which are not reflective of our underlying performance but are to be borne in the interim period. Tables in the appendix of this Media Release provide the detailed reconciliation between reported and adjusted results for the Group, Core businesses and the individual divisions.

Asia Pacific (APAC)

APAC achieved **profitable growth** in 3Q16 with an adjusted* PTI of CHF 175 million and generated an **adjusted* return on regulatory capital of 13%**⁵. Net revenues totaled CHF 917 million, up 4% compared to 3Q15, demonstrating the strength of the Wealth Management franchise and the effectiveness of the integrated approach to serving clients. Compared to 2Q16, APAC reported higher restructuring expenses, principally in the Investment Bank. Wealth Management reported record **AuM of CHF 169 billion** at end-3Q16. Continued collaboration activity across the division contributed to **NNA of CHF 4.6 billion, representing an annualized growth rate of 12%**. Adjusted* net margin decreased 2 basis points compared to 3Q15, with growth in net interest income and transactional revenues offset by higher operating expenses and provision for credit losses. The increase in provision for credit losses relates to a small number of share-based loans in Hong Kong.

The Investment Bank delivered a strong performance in the business with UHNWI and entrepreneur clients. In 9M16, the **APAC IBCM franchise ranked #1 in terms of share of wallet in Asia Pacific ex-Japan among international banks**⁶. Fixed Income revenues increased 51% compared to 3Q15, mainly reflecting higher financing activities with UHNWI and entrepreneur clients. Equity sales and trading revenues were stable compared to 2Q16 and were lower compared to 3Q15 due to lower trading volumes.

International Wealth Management (IWM)

IWM delivered a **robust performance** in challenging markets with an **adjusted* PTI of CHF 241 million** and **continued NNA momentum** across businesses and regions. Adjusted* total operating expenses remained stable compared to 3Q15, with disciplined cost control being offset by further investments in growth and higher compliance and regulatory costs.

Wealth Management reported higher revenues compared to 3Q15, with **strong NII** reflecting the cumulative benefit from loan growth and higher margins. **Recurring revenues remained broadly stable** over the last three quarters while transactional revenues were adversely affected by a challenging market environment. The hiring of senior and experienced RMs continued in 3Q16, with the number of new hires offset by managed reductions and attrition. **Strong NNA of CHF 4.4 billion—representing an annualized growth rate of 6%** - reflected inflows from emerging markets and Europe. AuM of CHF 311.4 billion increased 9% compared to 3Q15.

In Asset Management, **adjusted* PTI increased significantly from 3Q15**, driven by lower operating expenses. **Higher investment-related gains and broadly stable management fees** were offset by lower investment and partnership income, mainly from single manager hedge funds, compared to 3Q15. **NNA of CHF 5 billion** include strong contributions from emerging markets and fixed income products.

Swiss Universal Bank (SUB)

SUB delivered **adjusted* PTI of CHF 431 million**, reflecting higher revenues from NII, partially offset by subdued transaction volumes across the franchise due to lower levels of client activity. Compared to 3Q15, **adjusted* total operating costs declined 7%** despite continuous investments in regulatory, compliance and digitalization initiatives in Wealth Management. SUB continued to focus on growing the *Bank for Entrepreneurs*.

In Wealth Management, **mandates penetration was 29%** at end-3Q16, an increase of 5% compared to 3Q15 driven by *Credit Suisse Invest*. **AuM remained strong** at CHF 244.5 billion. SUB recorded NNA of CHF 0.2 billion, including outflows from selected EAM exits and regularization. Wealth Management realized a gain on the sale of real estate of CHF 346 million (excl. from adjusted* PTI) in 3Q16.

Corporate & Institutional Banking achieved a strong result and maintained its leading market share in terms of announced M&A transactions⁷ and DCM⁸ deals despite challenging market conditions.

Credit Suisse (Schweiz) AG is on track to commence operations in November 2016. The planned partial (20-30%) initial public offering is scheduled to take place by end-2017, market conditions permitting⁹.

Investment Banking & Capital Markets (IBCM)

IBCM continued to execute its strategy as evidenced by **strong share of wallet gains**¹⁰ across all key products in 9M16 compared to 2015.

IBCM delivered an **adjusted* PTI of USD 55 million**. Compared to 3Q15, net revenues of USD 479 million were up 16%, reflecting an increase in debt and equity underwriting revenues, partially offset by lower advisory revenues.

Adjusted* total operating costs increased compared to 3Q15, driven by higher variable compensation expenses.

The **strength and connectivity of the global IBCM franchise** is also reflected in the global advisory and underwriting revenues¹¹ of USD 945 million, which increased 22% compared to 3Q15 and outperformed the industry-wide fee pool, which rose by 4%. Credit Suisse achieved global top 5 positions³ across its key products in 9M16.

RWA totaled USD 18.6 billion and were 21% higher than in 3Q15, primarily reflecting the increase in IBCM's share in the Corporate Bank.

Global Markets (GM)

GM had a **profitable 3Q16** with adjusted* PTI of USD 150 million. Compared to 3Q15, performance was driven by **continued strength in Credit products, improved emerging markets revenues, notably in Latin America, and our ability to sustain our market share during restructuring**¹². This was offset by a weaker contribution from Equities, in part as a result of the reduced allocation of capital to the business compared to 3Q15. In the US, our Equities franchise held up well and we maintained our strong positions with our core clients across Cash and Prime Services. In Europe, the performance in Equities was weaker, driven by lower client activity and less favorable trading conditions. Additionally, our equity derivatives business was impacted by a low volatility and low volume environment, resulting in weaker revenues compared to 3Q15.

GM saw **positive client momentum** and maintained market share in several businesses as the division further optimized its cost- and capital-efficient business model. GM continues to invest in its chosen products and geographies to further strengthen its market position.

As a result of GMAR, GM achieved **further operating efficiency gains** across the division with adjusted* total operating costs down 15% compared to 2Q16. GM continues to make progress in creating operating leverage and **expects to approach its end-2018 cost target of USD 5.4 billion by end-2016**.

RWA remained broadly stable compared to end-2Q16 and GM continues to operate below the end-2016 RWA ceiling of USD 60 billion.

Strategic Resolution Unit (SRU)

The **SRU continued to make substantial progress in reducing leverage exposure and RWA**, which decreased by USD 29 billion and USD 3 billion, respectively, compared to 2Q16, as a result of a broad range of transactions in 3Q16. These included various disposals, such as the sale of a number of corporate loan portfolios and the sale of Credit Suisse Park View BDC, Inc. as well as the continued progress of credit derivative trade exits and the execution of a large number of transactions aimed at reducing derivative exposures.

Adjusted* pre-tax loss improved by USD 230 million compared to 2Q16. Lower revenue losses in 3Q16 were driven by a recovery in the credit markets from 1H16, partially offset by losses on life insurance and a credit provision on ship finance portfolios. On a reported basis, the SRU recorded a pre-tax loss of USD 874 million, which included litigation provisions.

Adjusted* total operating costs decreased by USD 310 million compared to 3Q15, driven by the exit from the US Private Banking onshore business and a reduced footprint in legacy investment banking businesses.

SRU has continued to make significant progress since the strategy was announced in October 2015. Compared to 3Q15, RWA and leverage exposure decreased by USD 20 billion and USD 78 billion, respectively.

6

Footnotes

* Adjusted results are non-GAAP financial measures. For a reconciliation of the adjusted results to the most directly comparable US GAAP measures, see the Appendix of this media release for reconciliations of adjustment items.

¹ Headcount includes permanent full-time equivalent employees, contractors, consultants and other contingent workers. Includes departed and notified headcount.

² Cost savings comparing 9M16 adjusted operating expenses at constant FX rates to 75% of full year 2015 cost base of CHF 21.2 billion.

Important information

This Media Release contains select information from the full 3Q16 Financial Report and 3Q16 Results Presentation Slides that Credit Suisse believes is of particular interest to media professionals. The complete 3Q16 Financial Report and 3Q16 Results Presentation Slides, which have been distributed simultaneously, contain more comprehensive information about our results and operations for the reporting quarter, as well as important information about our reporting methodology and some of the terms used in these documents. The complete 3Q16 Financial Report and Results Presentation Slides are not incorporated by reference into this Media Release.

Information referenced in this Media Release, whether via website links or otherwise, is not incorporated into this Media Release.

“Adjusted operating expenses at constant FX rates” and “adjusted non-compensation operating expenses at constant FX rates” include adjustments as made in all our disclosures for restructuring expenses, major litigation expenses and a goodwill impairment taken in 4Q15 as well as adjustments for FX, applying the following main currency exchange rates for 1Q15: USD/CHF 0.9465, EUR/CHF 1.0482, GBP/CHF 1.4296, 2Q15: USD/CHF 0.9383, EUR/CHF 1.0418, GBP/CHF 1.4497, 3Q15: USD/CHF 0.9684, EUR/CHF 1.0787, GBP/CHF 1.4891, 1Q16: USD/CHF 0.9928, EUR/CHF 1.0941, GBP/CHF 1.4060, 2Q16: USD/CHF 0.9756, EUR/CHF 1.0956, GBP/CHF 1.3845, 3Q16: USD/CHF 0.9728, EUR/CHF 1.0882, GBP/CHF 1.2764. These currency exchange rates are unweighted, i.e. a straight line average of monthly rates. We apply this calculation consistently for the periods under review. Adjusted non-compensation expenses are adjusted operating expenses excluding compensation and benefits. To calculate adjusted non-compensation expenses at constant FX rates, we subtract compensation and benefits (adjusted at constant FX rates in the manner described above) from adjusted operating expenses at constant FX rates.

We may not achieve all of the expected benefits of our strategic initiatives. Factors beyond our control, including but not limited to the market and economic conditions, changes in laws, rules or regulations and other challenges discussed in our public filings, could limit our ability to achieve some or all of the expected benefits of these initiatives.

Mandates penetration means advisory and discretionary mandates in private banking businesses as a percentage of the related AuM, excluding those from the external asset manager business.

When we refer to Wealth Management focused divisions throughout this Media Release, we mean APAC, IWM and SUB. References to the “Wealth Management” businesses in APAC, IWM and SUB refer to those divisions’ Private Banking businesses.

When we refer to operating divisions throughout this Media Release, we mean SUB, IWM, APAC, IBCM and GM.

Investors and others should note that we announce material information (including quarterly earnings releases and financial reports) to the investing public using press releases, SEC and Swiss ad hoc filings, our website and public conference calls and webcasts. We intend to also use our Twitter account @creditsuisse

(<https://twitter.com/creditsuisse>) to excerpt key messages from our public disclosures, including earnings releases. We may retweet such messages through certain of our regional Twitter accounts, including @csschweiz

(<https://twitter.com/csschweiz>) and @csapac (<https://twitter.com/csapac>). Investors and others should take care to consider such abbreviated messages in the context of the disclosures from which they are excerpted. The information we post on these Twitter accounts is not a part of this Media Release.

In various tables, use of “–” indicates not meaningful or not applicable.

Cautionary statement regarding forward-looking information

This media release contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2016 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the

information set forth in “Risk factors” in I – Information on the company in our Annual Report 2015.

A-8

Disclaimer Cautionary statement regarding forward-looking statements This presentation contains forward-looking statements that involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements. A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2015 filed with the US Securities and Exchange Commission, and in other public filings and press releases. We do not intend to update these forward-looking statements except as may be required by applicable law. We may not achieve the benefits of our strategic initiatives We may not achieve all of the expected benefits of our strategic initiatives. Factors beyond our control, including but not limited to the market and economic conditions, changes in laws, rules or regulations and other challenges discussed in our public filings, could limit our ability to achieve some or all of the expected benefits of these initiatives. **Statement regarding purpose and basis of presentation** This presentation contains certain historical information that has been re-segmented to approximate what our results under our new structure would have been, had it been in place from 2015. In addition, "Illustrative," "Ambition" and "Goal" presentations are not intended to be viewed as targets or projections, nor are they considered to be Key Performance Indicators. All such presentations are subject to a large number of inherent risks, assumptions and uncertainties, many of which are outside of our control. Accordingly, this information should not be relied on for any purpose. In preparing this presentation, management has made estimates and assumptions which affect the reported numbers. Actual results may differ. Figures throughout presentation may also be subject to rounding adjustments. **Statement regarding non-GAAP financial measures** This presentation also contains non-GAAP financial measures, including adjusted results. Information needed to reconcile such non-GAAP financial measures to the most directly comparable measures under US GAAP can be found in this presentation, which is available on our website at credit-suisse.com. **Statement regarding capital, liquidity and leverage** As of January 1, 2013, Basel 3 was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. As of January 1, 2015, the Bank for International Settlements (BIS) leverage ratio framework, as issued by the Basel Committee on Banking Supervision (BCBS), was implemented in Switzerland by FINMA. Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this presentation. Capital and ratio numbers for periods prior to 2013 are based on estimates, which are calculated as if the Basel 3 framework had been in place in Switzerland during such periods. Unless otherwise noted, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments. Beginning in 2015, the Swiss leverage ratio is calculated as Swiss total capital, divided by period-end leverage exposure. The look-through BIS tier 1 leverage ratio and CET1 leverage ratio are calculated as look-through BIS tier 1 capital and CET1 capital, respectively, divided by end-period leverage exposure.

Reconciliation of adjustment items (1/2) Adjusted results are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

of all quarters from 2014 to 3Q16 is available in the time series. Adjusted results are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

Swisscard deconsolidation impact Impact of the deconsolidation on the Swiss Universal Bank Note: Adjusted results are non-GAAP financial measures. A reconciliation to reported results is included in this presentation † See Appendix-Notes This is an illustrative pro-forma presentation of the impact of the deconsolidation of the card issuing business on the historical results of SUB as if it had occurred on December 31, 2014. Given that as of July 1, 2015 the business has been deconsolidated and transferred to the equity method investment, Swisscard AECS GmbH and the transaction does not qualify for discontinued operations, the historical results are not restated in this respect. The reduction in pre-tax income in the Private Banking business of Swiss Universal Bank, is offset by the reduction in minority interest from the deconsolidation at the Group level, therefore there is no material impact on the Group's net income attributable to shareholders. These illustrative figures cannot be seen as being indicative of future trends or results

Notes Throughout the presentation rounding differences may occur. All risk-weighted assets (RWA) and leverage exposure figures shown in this presentation are as of the end of the respective period and on a “look-through” basis. Gross and net margins are shown in basis points (bps). Gross margin = adj. net revenues annualized / average AuM; net margin = adj. pre-tax income annualized / average AuM. Mandates penetration reflects advisory and discretionary mandates as percentage of total AuM, excluding AuM from the external asset manager (EAM) business. General notes * “Adjusted operating expenses at constant FX rates” and “adjusted non-compensation operating expenses at constant FX rates” include adjustments as made in all our disclosures for restructuring expenses, major litigation expenses and a goodwill impairment taken in 4Q15 as well as adjustments for FX, applying the following main currency exchange rates for 1Q15: USD/CHF 0.9465, EUR/CHF 1.0482, GBP/CHF 1.4296, 2Q15: USD/CHF 0.9383, EUR/CHF 1.0418, GBP/CHF 1.4497, 3Q15: USD/CHF 0.9684, EUR/CHF 1.0787, GBP/CHF 1.4891, 1Q16: USD/CHF 0.9928, EUR/CHF 1.0941, GBP/CHF 1.4060, 2Q16: USD/CHF 0.9756, EUR/CHF 1.0956, GBP/CHF 1.3845, 3Q16: USD/CHF 0.9728, EUR/CHF 1.0882, GBP/CHF 1.2764. These currency exchange rates are unweighted, i.e. a straight line average of monthly rates. We apply this calculation consistently for the periods under review. Adjusted non-compensation expenses are adjusted operating expenses excluding compensation and benefits. To calculate adjusted non-compensation expenses at constant FX rates, we subtract compensation and benefits (adjusted at constant FX rates in the manner described above) from adjusted operating expenses at constant FX rates. † Regulatory capital reflects the worst of 10% of RWA and 3.5% of leverage exposure. Return on regulatory capital is based on (adjusted) returns after tax assuming a tax rate of 30% for all periods and capital allocated based on the worst of 10% of average RWA and 3.5% of average leverage exposure Specific notes Adj. = Adjusted; AM = Asset Management; APAC = Asia Pacific; AuM = Assets under Management; Corp.
