NOTE 1 – THE COMPANY

Nature of Operations

TherapeuticsMD, Inc. ("Therapeutics" or the "Company"), through its wholly owned subsidiary vitaMedMD, LLC ("VitaMed"), is a specialty pharmaceutical company focused on providing the highest quality products to the women's health market to improve women's health and wellness. Our national sales force that calls on physicians and pharmacies is enhanced by our patent-pending technology and business methodology. This combination allows us to market both over-the-counter ("OTC") and prescription nutritional supplements, drugs, medical foods and other medical products through pharmacies and our web-site with the recommendation of physicians by creating a unique value proposition for patients, physician/providers and insurance payors.

New Products

On March 1, 2012, the Company launched its first prescription prenatal vitamin, vitaMedMD™ Plus Rx. vitaMedMD Plus Rx is a single-dose product containing one prenatal vitamin tablet and one life's DHA capsule.

On April 9, 2012, the Company launched its second prescription prenatal vitamin, vitaMedMD™ Plus One. vitaMedMD Plus One is a single dose containing one softgel with 14 vitamins, minerals and 200 mg of plant-based DHA.

On May 10, 2012, the Company launched its third prescription prenatal vitamin, vitaMedMD™ RediChew™ Rx. vitaMedMD RediChew Rx is a small, vanilla flavored, chewable prenatal vitamin tablet that dissolves quickly and is taken once daily.

Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. For the six months ended June 30, 2012, the Company incurred a loss from operations of approximately \$6,843,000 had negative cash flows from operations of approximately \$5,249,000 and had an accumulated deficit of approximately \$42,133,000. These matters raise substantial doubt about the Company's ability to continue as a going concern. Management's plans include raising additional proceeds from debt and equity transactions and to continue to increase its sales and marketing activities, however, there are no assurances that management will be successful in their efforts. The financial statements do not include adjustments relating to the recoverability and realization of assets and classification of liabilities that might be necessary should the Company be unable to continue in operation.

NOTE 2 – BASIS OF PRESENTATION AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Interim Financial Statements

The accompanying unaudited interim condensed consolidated financial statements of Therapeutics have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles (“GAAP”) for complete financial statements. In the opinion of management, such financial statements include all adjustments (consisting solely of normal recurring adjustments) necessary for the fair statement of the financial information included herein in accordance with GAAP and the rules and regulations of the Securities and Exchange Commission (the “SEC”). The balance sheet at December 31, 2011 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. Results of operations for interim periods are not necessarily indicative of results for the full year. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in our Annual Report on Form 10-K filed with the SEC for the year ended December 31, 2011.

Recently Issued and Newly Adopted Accounting Pronouncements

The Company does not expect that the adoption of any recent accounting pronouncements will have a material impact on its condensed consolidated financial statements.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, vitaMedMD and BocagreenMD, Inc., a Nevada corporation (“Bocagreen”). Bocagreen was formed by the Company on January 10, 2012 and is currently without operations. All material intercompany balances and transactions have been eliminated in consolidation.

Revenue Recognition

The Company recognizes revenue on arrangements in accordance with ASC 605, “Revenue Recognition” (“ASC 605”). Revenue is recognized only when the price is fixed or determinable, persuasive evidence of an arrangement exists, the service is performed and collectability is reasonably assured.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2012

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue Recognition (continued)

Over The Counter Products

The Company generates OTC revenue by sales of products primarily to retail consumers. The Company's policy is to recognize revenue from product sales upon shipment, when the rights of ownership and risk of loss have passed to the consumer. Outbound shipping and handling fees are included in sales and are billed upon shipment. Shipping expenses are included in cost of sales. The majority of the Company's sales are paid with credit cards and the Company usually receives the cash settlement in two to three banking days. Credit card sales minimize accounts receivable balances relative to sales. We provide an unconditional thirty-day money-back return policy whereby we accept product returns from our retail and eCommerce customers. The Company's revenue from OTC sales is recognized net of returns, sales discounts, and eCommerce fees.

For the six months ended June 30, 2012 and 2011, the Company recorded an allowance for returns of \$28,156 and \$10,756, respectively. The Company estimates the allowance for returns based on historical return activity, which is reviewed, and adjusted if necessary, on a quarterly basis.

Prescription Products

The Company's prescription products are sold primarily through drug wholesalers and retail pharmacies. The Company's revenue from prescription product sales is recognized net of sales discounts and end-user rebates.

The Company accepts returns of unsalable product from customers within a return period of six months prior to and following product expiration. The Company's prescription products currently have a shelf-life of 24 months from date of manufacture. Given the limited history of prescriptions products, the Company currently cannot reliably estimate expected returns of the prescription products at the time of shipment. Accordingly, the Company defers recognition of revenue on prescription products until the right of return no longer exists, which occurs at the earlier of the time the prescription products are dispensed through patient prescriptions or expiration of the right of return. As a result of this policy, the Company has a deferred revenue balance of approximately \$619,000 at June 30, 2012.

The Company maintains various rebate programs in an effort to maintain a competitive position in the marketplace and to promote sales and customer loyalty. The rebate program is designed to enable the end-user to return a coupon to the Company. If the coupon qualifies, the Company sends a rebate check to the end-user. The Company estimates the allowance for rebates based on industry averages, which is reviewed, and adjusted if necessary, on a quarterly basis. For the six months ended June 30, 2012 and 2011, the Company recorded rebate expense of \$11,740 and \$0, respectively.

Inventories

Inventories represent packaged nutritional products and supplements which are valued at the lower of cost or market using the average cost method. The costs of manufacturing the prescription products associated with the deferred revenue (as discussed in Revenue Recognition) are record as deferred costs, which are included in inventory, until such time as the related deferred revenue is recognized.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Use of Estimates

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make significant estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosure of contingent assets and liabilities. We evaluate our estimates, including those related to contingencies, on an ongoing basis. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

NOTE 9 – NOTES PAYABLE

Issuance of Promissory Notes

In January and February 2012, the Company sold six-percent promissory notes (the "Promissory Notes") for an aggregate of \$900,000 with due dates of March 1, 2012. As discussed below, these Promissory Notes were modified on February 24, 2012 through the issuance of secured promissory notes (the "February 2012 Notes").

Issuance of February 2012 Notes

On February 24, 2012, the Company sold and issued the February 2012 Notes to an individual and an entity (the "Parties"), both of which are shareholders of the Company, in the principal base amount of \$1,358,014 and \$1,357,110 respectively (the "Principal Base Amount(s)") and granted Warrants for the purchase in the aggregate of 9,000,000 shares (4,500,000 to each Party) (the "February 2012 Warrants") pursuant to the terms of a Note Purchase Agreement (the "Note Purchase Agreement") also dated February 24, 2012. As consideration for the February 2012 Notes and the February 2012 Warrants, the Company received an aggregate of \$1,000,000 of new funding from the Parties (the "New Funding") and the Parties surrendered certain promissory notes previously issued by the Company in the amount of \$1,700,000 plus accrued interest of \$15,124 (collectively known as the "Prior Notes"). The Company granted 5,685,300 Warrants in consideration of the modification of the Prior Notes and 3,314,700 Warrants with the New Funding. The Company determined that the resulting modification of the Prior Notes was substantial in accordance with ASC 470-50, "Modifications and Extinguishments." As such the modification was accounted for as an

extinguishment and restructuring of the debt, and the 5,685,300 warrants issued were expensed. The fair value of the Prior Notes was estimated by calculating the present value of the future

cash flows discounted at a market rate of return for comparable debt instruments to be \$1,517,741, resulting in a debt discount of \$197,583. The Company recognized a loss on extinguishment of debt of \$10,307,864 which represented the fair value of the 5,685,300 warrants net of the difference between the carrying amount of the Prior Notes and their fair value as of the date of the modification.

The Company determined the relative fair value of the 3,314,700 Warrants granted with the New Funding to be \$859,647 and recorded the amount as debt discount to be amortized over the term of the February 2012 Notes. As a result of the surrender of the February 2012 Notes on June 19, 2012 (see Issuance of June 2012 Notes below), the Company expensed the remaining unamortized debt discount. As of June 30, 2012, the Company recorded interest expense totaling \$859,647 related to the February 2012 Notes.

Under the February 2012 Notes, the Parties loaned the Company an additional \$2,000,000 during March, April, and May 2012.

On June 19, 2012 the Company settled \$3,102,000 in principle and interest of the February 2012 Notes in exchange for the exercise of 8,145,486 Common Stock purchase warrants. As discussed below, the remaining balance of \$2,691,847 of the February 2012 Notes was modified on June 19, 2012 through the issuance of secured promissory notes (the "June 2012 Notes").

Issuance of June 2012 Notes

On June 19, 2012, the Company sold and issued the June 2012 Notes to the same Parties described in the paragraph above in the principal base amount of \$2,347,128 and \$2,344,719 respectively pursuant to the terms of a Note Purchase Agreement. As consideration for the June 2012 Notes, the Parties surrendered the remaining balance of the February 2012 Notes in the aggregate amount of \$1,347,128 and \$1,344,719, respectively (which sums included principle and interest through June 19, 2012), and the Company received an aggregate of \$2,000,000 of new funding from the Parties (the "New Funding"). The principal base amount of each of the June 2012 Notes, plus any additional advance made to the Company thereafter, together with accrued interest at the annual rate of six percent (6%), is due in one lump sum payment on February 24, 2014. As security for the Company's obligations under the Note Purchase Agreement and the June 2012 Notes, the Company entered into a Security Agreement and pledged all of its assets, tangible and intangible, as further described therein. The Company granted 7,000,000 Warrants in connection with the New Funding. NOTE 9 – NOTES PAYABLE (continued)

Conversion of July 2011 Secured Notes

In July 2011, VitaMed sold two Senior Secured Promissory Notes (the "Secured Notes") to the Parties described in the paragraphs above in the amount of \$500,000 each and also entered into a Security Agreement under which VitaMed pledged all of its assets to secure the obligation. The Secured Notes bear interest at the rate of six percent (6%) per annum, are due on the one (1) year anniversary thereof, and are convertible into shares of the Company's Common Stock at the option of the Company. The Company may pay the Secured Notes by delivering such number of shares of the Company's Common Stock as shall be determined by dividing the outstanding principal then due and owing by the Company's Share Price. For purposes of the Secured Notes, the "Share Price" shall mean the lower of the most recent price at which the Company offered and sold shares of its Common Stock (not including any shares issued upon the exercise of options and/or warrants or upon the conversion of any convertible securities) or the five-day average closing bid price immediately preceding the date of conversion. On June 19, 2012, the Company and the Parties agreed to convert the Secured Notes, and according to the terms thereof, aggregated principal and interest through June 19, 2012 of \$1,054,647 was converted at \$0.38 per share into an aggregate of 2,775,415 shares of the Company's Common Stock. Personal guarantees and cash collateral limited to \$100,000 each were provided by Robert Finizio and John Milligan, officers of VitaMed, and by Reich Family Limited Partnership, an entity controlled by Mitchell Krassan, also an officer of VitaMed. The Bank LOC Extension accrues interest at the rate of 2.35% and is due on March 1, 2013. At June 30, 2012, the outstanding principle balance of the Bank LOC was \$299,220. During the three and six months ended June 30, 2012, interest expense of \$1,777 and \$4,709, respectively was paid and is included in interest expense on the accompanying condensed consolidated financial statements.

Common Stock

Warrants

The valuation methodology used to determine the fair value of Common Stock purchase warrants ("Warrants") is the Black-Scholes-Merton option-pricing model ("Black-Scholes Model"). The Black-Scholes Model requires the use of a number of assumptions including volatility of the stock price, the risk-free interest rate and the term of the Common Stock purchase warrant. The weighted average fair value per share of Warrants granted and the assumptions used in the Black-Scholes Model during the six months ended June 30, 2012 are described below. The risk-free interest rate assumption is based upon observed interest rates on zero coupon U.S. Treasury bonds whose maturity period is appropriate for the term. Estimated volatility is a measure of the amount by which the Company's stock price is expected to fluctuate each year during the term of the award. The Company's estimated volatility is an average of the historical volatility of the stock prices of its peer entities whose stock prices were publicly available. The Company's calculation of estimated volatility is based on historical stock prices over a period equal to the term of the awards. The Company used the historical volatility of peer entities due to the lack of sufficient historical data of its stock price.

Stock Options

In 2009, the Company adopted the 2009 Long Term Incentive Compensation Plan (the "LTIP") to provide financial incentives to employees, members of the Board, and advisers and consultants of the Company who are able to contribute towards the creation of or who have created stockholder value by providing them options for the purchase of the Company's Common Stock ("Options") and other stock and cash incentives (the "Awards"). The Awards available under the LTIP consist of stock options, stock appreciation rights, restricted stock, restricted stock units, performance stock, performance units, EVA awards, and other stock or cash awards as described in the LTIP. There are 25,000,000 shares authorized for issuance thereunder.

On February 23, 2012, the Company's Board of Directors adopted the 2012 Stock Incentive Plan, a non-qualified plan not requiring approval by the Company's shareholders ("2012 SOP"). The 2012 SOP was designed to serve as an incentive for retaining qualified and competent key employees, officers and directors, and certain consultants and advisers of the Company. There are 10,000,000 shares authorized for issuance thereunder. No shares have been issued under the 2012 SOP.

The valuation methodology used to determine the fair value of Options is the Black-Scholes Model. The Black-Scholes Model requires the use of a number of assumptions including volatility of the stock price, the risk-free interest rate, and the expected life.

The assumptions used in the Black-Scholes Model during the six months ended June 30, 2012 are set forth in the table below.

Risk-free interest rate	0.84-2.23	%
Volatility	40.77-43.10	%
Expected life (in years)	5.5-6.75	
Dividend yield	0.00	%

The risk-free interest rate assumption is based upon observed interest rates on zero coupon U.S. Treasury bonds whose maturity period is appropriate for the expected life. Estimated volatility is a measure of the amount by which the Company's stock price is expected to fluctuate each year during the term of the award. The Company's estimated volatility is an average of the historical volatility of the stock prices of its peer entities whose stock prices were publicly available. The Company's calculation of estimated volatility is based on historical stock prices over a period equal to the term of the awards. The Company used the historical volatility of peer entities due to the lack of sufficient historical data of its stock price. The average expected life is based on the contractual term of the option using the simplified method.

In January 2012, certain individuals exercised their right to purchase an aggregate of 1,630,022 shares of the Company's Common Stock for an aggregate purchase price of \$166,000. The shares were issued in reliance upon an

The Company does not expect to pay any significant federal or state income tax for 2012 as a result of the losses recorded during the six months ended June 30, 2012, additional losses expected for the remainder of 2012 as well as from net operating loss carry forwards from prior years. Accounting standards require the consideration of a valuation allowance for deferred tax assets if it is "more likely than not" that some component or all of the benefits of deferred tax assets will not be realized. As of June 30, 2012, the Company maintains a full valuation allowance for all deferred tax assets. Based on these requirements, no provision or benefit for income taxes has been recorded. The Company determined that the resulting modification of the February 2012 Notes was substantial in accordance with ASC 470-50, "Modifications and Extinguishments." As such the modification was accounted for as an extinguishment and restructuring of the debt, and the February 2012 Warrants issued, valued at approximately \$10,500,000, were expensed as loss on the extinguishment of debt. The relative fair value of the Prior Notes was estimated to be \$1,500,000 by calculating the present value of future cash flows discounted at a market rate of return for comparable debt instruments. Beneficial conversion feature of approximately \$6,717,000 consists of non-cash costs associated with the conversion of approximately \$1,055,000 in debt into 2,775,415 shares of the Company's Common Stock.

Other Income (Expense), net

Other non-operating expense increased by approximately \$1,255,000 for the six months ended June 30, 2012 in comparison to the same period in 2011 due primarily to the addition of amortization of debt discount not incurred during 2011.

Liquidity and Capital Resources

As of June 30, 2012, the Company's working capital was approximately \$967,000, our accumulated deficit was approximately \$42,133,000 and our stockholders' deficit was approximately \$704,000.

We began the operation of our current business plan in June 2008 and have not yet attained a level of revenue to allow us to meet our current overhead. Based on our current marketing plan and expected sales demand, we do not contemplate attaining profitable operations until 2013, and there is no assurance that such an operating level can ever be achieved. We are dependent upon obtaining additional financing in order to adequately fund working capital, infrastructure, manufacturing expenses and significant marketing/investor related expenditures to gain market recognition, so that we can achieve a level of revenue adequate to support our cost structure, none of which can be assured. Management believes it will be able to raise the capital required to execute the Company's business plan and become profitable.

While we believe that we will have sufficient financial resources for the next twelve (12) month period, we cannot provide assurance as to how much we will need to spend in order to develop, manufacture, and market new products and technologies in the future. We are currently working to bring additional products to market including prescription products for the treatment of menopausal symptoms for which clinical studies will be conducted and for which FDA approval will be sought. We expect to spend at least \$4,500,000 on research and development in 2012, which amount could increase based on positive research results and funding. As we increase the market penetration of our current products and we expand our product base to include prescription products, the need for increased inventory levels will become a necessity. This increase is estimated to be approximately \$800,000.

We may not have sufficient resources to fully develop any new products or technologies or expand our inventory levels unless we are able to raise additional financing. We can make no assurances these required funds will be available on favorable terms, if at all. If additional capital is raised through the sale of equity or convertible debt securities, the issuance of such securities would result in dilution to our existing stockholders. Additionally, these conditions may increase costs to raise capital and/or result in further dilution. Our failure to raise capital when needed would adversely affect our business, financial condition and results of operations, and could force us to reduce or cease our operations.

We believe that we will be able to meet the costs of growth and public reporting with funds generated from operations and additional amounts generated through debt and equity financing. Although management believes that the required financing to fund product development and increasing inventory levels can be secured at terms satisfactory to the Company, there is no guarantee these funds will be made available, and if funds are available, that the terms will be satisfactory to the Company.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports filed or submitted under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported, within the time period specified in the SEC's rules and forms and is accumulated and communicated to our principal executive officer and principal financial officer, as appropriate, in order to allow timely decisions in connection with required disclosure.

Evaluation of Disclosure Controls and Procedures

Robert G. Finizio and Daniel A. Cartwright, currently serving as the Company's Chief Executive Officer and Chief Financial Officer respectively, evaluated the effectiveness of the design and operation of our Company's disclosure controls and procedures (as such term is defined in Rules 13a-15 and 15d-15 under the Exchange Act) as of the end of the period covered by this quarterly report. Based on such evaluation, they concluded that the Company's disclosure controls and procedures are not effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC's rules and forms. This conclusion is based on findings that constituted material weaknesses. A material weakness is a deficiency, or a combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's interim financial statements will not be prevented or detected on a timely basis. These material weaknesses include our inability to achieve the optimal level of segregation of duties relative to key financial reporting functions.

Changes in Internal Controls

During the three months ended June 30, 2012, there were no significant changes in the Company's internal control over financial reporting that has affected, or is reasonably likely to affect, the Company's internal control over financial reporting, or other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
