H.B. FULLER COMPANY AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(Amounts in thousands, except share and per share amounts)

(Unaudited)

Note 1: Basis of Presentation

The accompanying unaudited interim Condensed Consolidated Financial Statements of H.B. Fuller Company and Subsidiaries have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information necessary for a fair presentation of results of operations, comprehensive income, financial position, and cash flows in conformity with U.S. generally accepted accounting principles. In our opinion, the unaudited interim Condensed Consolidated Financial Statements reflect all adjustments of a normal recurring nature considered necessary for the fair presentation of the results for the periods presented. Operating results for interim periods are not necessarily indicative of results that may be expected for the fiscal year as a whole.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements and during the reporting period. Actual results could differ from these estimates. These unaudited interim Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and Notes thereto included in our Annual Report on Form 10-K for the year ended November 28, 2015 as filed with the Securities and Exchange Commission.

As of the beginning of the first quarter ending February 27, 2016, we created a new global operating segment named Engineering Adhesives, which includes the electronics, automotive and Tonsan and Cyberbond businesses from around the world. We also began reporting our Construction Products business on a global basis by combining our Europe, India, Middle East and Africa (EIMEA) and Asia Pacific construction businesses with our Construction Products operating segment. We now have five reportable segments: Americas Adhesives, EIMEA, Asia Pacific, Construction Products and Engineering Adhesives.

New Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)*. This ASU requires changes in the presentation of certain items including but not limited to debt prepayment or debt extinguishment costs; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies and distributions received from equity method investees. Our effective date for adoption of this guidance is our fiscal year beginning December 2, 2018. We are currently evaluating the effect that this guidance will have on our Consolidated Financial Statements.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments - Credit Losses (Topic 326), Measurement of Credit Losses on Financial Statements*. This ASU requires a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. Our effective date for adoption of this guidance is our fiscal year beginning November 29, 2020. We are currently evaluating the effect that this guidance will have on our Consolidated Financial Statements.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting*. This ASU provides simplification in the accounting for share-based payment transactions including the accounting for income taxes, forfeitures, statutory tax withholding requirements and classification in the statement of cash flows. Our effective date for adoption of this guidance is our fiscal year beginning December 3, 2017. We are currently evaluating the effect that this guidance will have on our Consolidated Financial Statements.

In March 2016, the FASB issued ASU No. 2016-08, *Revenue from Contracts with Customers (Topic 606), Principal versus Agent Considerations (Reporting Revenue Gross versus Net)*. This ASU provides guidance on recording revenue on a gross basis versus a net basis based on the determination of whether an entity is a principal or an agent when another party is involved in providing goods or services to a customer. The amendments in this ASU affect the guidance in ASU No. 2014-09 and are effective in the same timeframe as ASU No. 2014-09 as discussed below.

Table Of Contents

In February 2016, the FASB issued ASU No. 2016-05, *Derivatives and Hedging (Topic 815)*. The amendments in this guidance clarify that a change in the counterparty to a derivative instrument that has been designated as a hedging instrument under Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. Our effective date for adoption of this guidance is our fiscal year beginning December 4, 2016. We have evaluated the effect that this guidance will have on our Consolidated Financial Statements and related disclosures and determined it will not have a material impact.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Subtopic 842)*. This guidance changes accounting for leases and requires lessees to recognize the assets and liabilities arising from all leases, including those classified as operating leases under previous accounting guidance, on the balance sheet and requires disclosure of key information about leasing arrangements to increase transparency and comparability among organizations. Our effective date for adoption of this guidance is our fiscal year beginning December 1, 2019 with early adoption permitted. The new guidance must be adopted using a modified retrospective transition approach, and provides for certain practical expedients. We are currently evaluating the impact that the new guidance will have on our Consolidated Financial Statements.

In June 2014, the FASB issued ASU No. 2014-12, *Compensation - Stock Compensation (Topic 718), Accounting for Share-Based Payments When the Terms of an Award That a Performance Target Could Be Achieved after the Requisite Service Period*, which requires a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award and compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. Our effective date for adoption of this guidance is our fiscal year beginning December 4, 2016, however we elected to early adopt this guidance as of our first quarter ended February 27, 2016. The adoption of this guidance did not have a material impact on our Consolidated Financial Statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This guidance will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for fiscal years and interim periods beginning after December 15, 2017 (as stated in ASU No. 2015-14 which defers the effective date and was issued in August 2015) and is now effective for our fiscal year beginning December 2, 2018. Early application as of the original effective date is permitted under ASU 2015-14. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that this guidance will have on our Consolidated Financial Statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

Note 2: Acquisitions

Cyberbond

On June 8, 2016, we acquired Cyberbond, L.L.C., headquartered in Batavia, Illinois, which is a provider of industrial adhesives for the electronics, medical, audio equipment, automotive and structural markets. The acquisition will help us to broaden our global position and accelerate our growth in the high margin, high growth Engineering Adhesives segment. The purchase price of \$42,516 was funded through existing cash and was recorded in our Engineering Adhesives operating segment. We incurred acquisition related costs of approximately \$558, which were recorded as selling, general and administrative expenses in the Condensed Consolidated Statements of Income.

The acquisition fair value measurement was preliminary as of August 27, 2016, subject to the completion of the valuation of Cyberbond and further management reviews and assessment of the preliminary fair values of the assets acquired and liabilities assumed. We expect the fair value measurement process to be completed in the fourth quarter of 2016.

Table Of Contents

The following table summarizes the preliminary fair value measurement of the assets acquired and liabilities assumed as of the date of acquisition:

	August 27, 2016
Current assets	\$4,410
Property, plant and equipment	1,460
Goodwill	38,152
Other assets	673
Current liabilities	(1,526)
Long-term liabilities	(653)
Total purchase price	\$42,516

We have preliminarily allocated the entire excess purchase price to goodwill in the amount of \$38,152 pending completion of the valuation of other identified intangible assets. Such goodwill is not deductible for tax purposes. The goodwill was assigned to our Engineering Adhesives operating segment. The Cyberbond acquisition does not represent a material business combination, therefore pro forma financial information is not provided.

Advanced Adhesives

On April 29, 2016, we acquired Advanced Adhesives Pty Limited and the business assets of Advanced Adhesives (New Zealand) Limited (Advanced Adhesives), providers of industrial adhesives in Australia and New Zealand. The acquisition will help us to strengthen our industrial adhesives market position and leverage a broader technology portfolio in both Australia and New Zealand. The combined purchase price of \$10,365 was funded through existing cash and was recorded in our Asia Pacific operating segment. We incurred acquisition related costs of approximately \$670, which were recorded as selling, general and administrative expenses in the Condensed Consolidated Statements of Income.

During the third quarter of 2016, the Company substantially completed its procedures related to the working capital accounts and obtained a preliminary valuation of the identified intangible assets in order to allocate the purchase price to the assets acquired and liabilities assumed. The outcome of these procedures are reflected in the adjustments in the table below. The acquisition fair value measurement as of August 27, 2016, is subject to the completion of the final assessment of the fair values of the assets acquired and liabilities assumed, specifically related to the identified intangible assets. We expect the fair value measurement process to be completed in the fourth quarter of 2016.

The following table summarizes the fair value measurement of the assets acquired and liabilities assumed as of the date of acquisition:

	May 28, 2016	Adjustments	August 27, 2016
Current assets	\$6,197	\$ (663)	\$5,534
Property, plant and equipment	751	(167)	584
Customer relationships	-	7,639	7,639
Trademarks	-	146	146
Goodwill	4,546	(4,546)	-
Current liabilities	(2,371)	(288)	(2,659)
Long-term liabilities	-	(879)	(879)
Total purchase price	\$9,123	\$ 1,242	\$10,365

The expected lives of the acquired intangible assets are 15 years for customer relationships and one year for trademarks.

Continental Products Limited

On February 3, 2015, we acquired the equity of Continental Products Limited, a provider of industrial adhesives, based in Nairobi, Kenya. The purchase price of \$1,647, net of cash acquired of \$371, was funded through existing cash.

Table Of Contents*Tonsan Adhesive, Inc.*

On February 2, 2015, we acquired 95 percent of the equity of Tonsan Adhesive, Inc., an independent engineering adhesives provider based in Beijing, China. The purchase price was 1.4 billion Chinese renminbi, or approximately \$215,925, net of cash acquired of \$7,754, which was financed with the proceeds from our October 31, 2014 term loan, drawn in conjunction with the acquisition.

Concurrent with the acquisition, we entered into an agreement to acquire the remaining 5 percent of Tonsan's equity beginning February 1, 2019 for 82 million Chinese renminbi or approximately \$13,038. In addition, the agreement requires us to pay up to 418 million Chinese renminbi or approximately \$66,848 in contingent consideration based upon a formula related to Tonsan's gross profit in fiscal 2018. The fair values of the agreement to purchase the remaining equity and the contingent consideration based upon a discounted cash flow model as of the date of acquisition were \$11,773 and \$7,714, respectively. See Note 14 for further discussion of the fair value of the contingent consideration.

The following table summarizes the fair value measurement of the assets acquired and liabilities assumed as of the date of acquisition:

	Amount
Current assets	\$49,839
Property, plant and equipment	59,142
Goodwill	125,790
Other intangibles	
Developed technology	18,600
Customer relationships	25,700
Trademarks/trade names	11,000
Current liabilities	(38,068)
Other liabilities	(24,305)
Redeemable non-controlling interests	(11,773)
Total purchase price	\$215,925

Note 3: Accounting for Share-Based Compensation*Overview*

We have various share-based compensation programs, which provide for equity awards including stock options, incentive stock options, restricted stock shares, restricted stock units, performance awards and deferred compensation. These equity awards fall under several plans and are described in detail in our Annual Report on Form 10-K for the year ended November 28, 2015.

Table Of Contents*Grant-Date Fair Value*

We use the Black-Scholes option pricing model to calculate the grant-date fair value of an award. There were no options granted during the third quarter of 2015. The fair value of options granted during the three months ended August 27, 2016 and nine months ended August 27, 2016 and August 29, 2015 were calculated using the following weighted average assumptions:

	Three Months Ended		Nine Months Ended		
	August 27, 2016		August 27, 2016		August 29, 2015
Expected life (in years)	4.75		4.74		4.61
Weighted-average expected volatility	26.77%		28.96%		30.91%
Expected volatility	25.71% -	27.10%	25.71% -	29.23%	25.50% - 31.67%
Risk-free interest rate	0.98%		1.43%		1.26%
Expected dividend yield	1.26%		1.54%		1.17%
Weighted-average fair value of grants	\$9.38		\$7.72		\$10.21

Expected life – We use historical employee exercise and option expiration data to estimate the expected life assumption for the Black-Scholes grant-date valuation. We believe that this historical data is currently the best estimate of the expected term of a new option. We use a weighted-average expected life for all awards.

Expected volatility – Volatility is calculated using our historical volatility for the same period of time as the expected life. We have no reason to believe that our future volatility will differ materially from historical volatility.

Risk-free interest rate – The rate is based on the U.S. Treasury yield curve in effect at the time of the grant for the same period of time as the expected life.

Expected dividend yield – The calculation is based on the total expected annual dividend payout divided by the average stock price.

Expense Recognition

We use the straight-line attribution method to recognize share-based compensation expense for option awards, restricted stock shares and restricted stock units with graded and cliff vesting. Incentive stock options and performance awards are based on certain performance-based metrics and the expense is adjusted quarterly, based on our projections of the achievement of those metrics. The amount of share-based compensation expense recognized during a period is based on the value of the portion of the awards that are ultimately expected to vest.

Total share-based compensation expense of \$2,501 and \$3,006 was included in our Condensed Consolidated Statements of Income for the third quarter ended August 27, 2016 and August 29, 2015, respectively. Total share-based compensation expense of \$9,469 and \$10,325 was included in our Condensed Consolidated Statements of Income for the nine months ended August 27, 2016 and August 29, 2015, respectively. All share-based compensation expense was recorded as selling, general and administrative expense. For the third quarter ended August 27, 2016 and August 29, 2015 there was \$870 and \$411 of excess tax benefit recognized, respectively. For the nine months ended August 27, 2016 and August 29, 2015 there was \$1,462 and \$1,321 of excess tax benefit recognized, respectively.

As of August 27, 2016, there was \$8,059 of unrecognized compensation costs related to unvested stock option awards, which is expected to be recognized over a weighted-average period of 1.2 years. Unrecognized compensation costs related to unvested restricted stock shares was \$194 which is expected to be recognized over a weighted-average period of 0.4 years. Unrecognized compensation costs related to unvested restricted stock units was \$9,120 which is expected to be recognized over a weighted-average period of 1.3 years.

Table Of Contents*Share-based Activity*

A summary of option activity as of August 27, 2016 and changes during the nine months then ended is presented below:

	Options	Weighted-Average Exercise Price
Outstanding at November 28, 2015	2,912,073	\$ 33.37
Granted	844,033	33.86
Exercised	(539,165)	24.05
Forfeited or cancelled	(164,337)	39.37
Outstanding at August 27, 2016	3,052,604	\$ 34.82

There were no options granted during the third quarter ended August 29, 2015. The total fair value of options granted during the third quarter ended August 27, 2016 was \$47. Total intrinsic value of options exercised during the third quarter ended August 27, 2016 and August 29, 2015 was \$3,365 and \$1,565, respectively. Intrinsic value is the difference between our closing stock price on the respective trading day and the exercise price, multiplied by the number of options exercised. The total fair value of options granted during the nine months ended August 27, 2016 and August 29, 2015 was \$6,509 and \$7,189, respectively. Total intrinsic value of options exercised during the nine months ended August 27, 2016 and August 29, 2015 was \$10,641 and \$5,114, respectively. Proceeds received from option exercises during the third quarter ended August 27, 2016 and August 29, 2015 were \$2,676 and \$391, respectively, and \$9,759 and \$4,342 during the nine months ended August 27, 2016 and August 29, 2015, respectively.

A summary of nonvested restricted stock as of August 27, 2016 and changes during the nine months then ended is presented below:

	Units	Shares	Total	Weighted-Average Grant Date Fair Value	Weighted-Average Remaining Contractual Life (in Years)
Nonvested at November 28, 2015	237,013	110,160	347,173	\$ 42.17	0.8
Granted	243,628	-	243,628	35.32	1.6
Vested	(104,051)	(70,428)	(174,479)	41.88	-

Edgar Filing: FULLER H B CO - Form 10-Q

Forfeited	(31,337)	(179)	(31,516)	38.34	1.7
Nonvested at August 27, 2016	345,253	39,553	384,806	\$ 38.33	1.2

Total fair value of restricted stock vested during the third quarter ended August 27, 2016 and August 29, 2015 was \$25 and \$57, respectively. Total fair value of restricted stock vested during the nine months ended August 27, 2016 and August 29, 2015 was \$6,101 and \$6,121, respectively. The total fair value of nonvested restricted stock at August 27, 2016 was \$14,934.

We repurchased 189 and 193 restricted stock shares during the third quarter ended August 27, 2016 and August 29, 2015, respectively and 67,742 and 54,196 during the nine months ended August 27, 2016 and August 29, 2015, respectively. The repurchases relate to statutory minimum tax withholding.

Table Of Contents

We have a Directors' Deferred Compensation plan that allows non-employee directors to defer all or a portion of their directors' compensation in a number of investment choices, including units representing shares of our common stock. We also have a Key Employee Deferred Compensation Plan that allows key employees to defer a portion of their eligible compensation in a number of investment choices, including units, representing shares of our common stock. We provide a 10 percent match on deferred compensation invested into units, representing shares of our common stock. A summary of deferred compensation units as of August 27, 2016, and changes during the nine months then ended is presented below:

	Non-employee		
	Directors	Employees	Total
Units outstanding November 28, 2015	380,170	45,906	426,076
Participant contributions	35,678	4,379	40,057
Company match contributions	3,568	438	4,006
Payouts	(301)	(7,834)	(8,135)
Units outstanding August 27, 2016	419,115	42,889	462,004

Deferred compensation units are fully vested at the date of contribution.

Note 4: Earnings Per Share

A reconciliation of the common share components for the basic and diluted earnings per share calculations is as follows:

	Three Months Ended		Nine Months Ended	
	August 27, 2016	August 29, 2015	August 27, 2016	August 29, 2015
(Shares in thousands)				
Weighted-average common shares - basic	50,261	50,421	50,122	50,318
Equivalent shares from share-based compensations plans	1,192	1,109	1,112	1,142
Weighted-average common and common equivalent shares - diluted	51,453	51,530	51,234	51,460

Basic earnings per share is calculated by dividing net income attributable to H.B. Fuller by the weighted-average number of common shares outstanding during the applicable period. Diluted earnings per share is based upon the weighted-average number of common and common equivalent shares outstanding during the applicable period. The difference between basic and diluted earnings per share is attributable to share-based compensation awards. We use the treasury stock method to calculate the effect of outstanding shares, which computes total employee proceeds as the

sum of (a) the amount the employee must pay upon exercise of the award, (b) the amount of unearned share-based compensation costs attributed to future services and (c) the amount of tax benefits, if any, that would be credited to additional paid-in capital assuming exercise of the award. Share-based compensation awards for which total employee proceeds exceed the average market price over the applicable period have an antidilutive effect on earnings per share, and accordingly, are excluded from the calculation of diluted earnings per share.

Options to purchase 386,496 and 1,533,690 shares of common stock at a weighted-average exercise price of \$48.57 and \$42.88 for the quarters ended August 27, 2016 and August 29, 2015, respectively, were excluded from the diluted earnings per share calculations because they were antidilutive. Options to purchase 762,509 and 416,544 shares of common stock at a weighted-average exercise price of \$44.86 and \$48.89 for the nine months ended August 27, 2016 and August 29, 2015, respectively, were excluded from the diluted earnings per share calculations because they were antidilutive.

Table Of Contents**Note 5: Accumulated Other Comprehensive Income (Loss)**

The following table provides details of total comprehensive income (loss):

	Three Months Ended August 27, 2016				Three Months Ended August 29, 2015

Accumulated other comprehensive loss	\$(227,322)	\$ (227,284)	\$ (38)

Note 6: Special Charges, net

The integration of the industrial adhesives business we acquired in March 2012 involved a significant amount of restructuring and capital investment to optimize the new combined entity. In addition, we have taken a series of actions in our existing EIMEA operating segment to improve the profitability and future growth prospects of this operating segment. We combined these two initiatives into a single project which we refer to as the “Business Integration Project”. During the third quarter ended August 27, 2016 and August 29, 2015, we incurred special charges, net of \$(2,807) and \$1,297, respectively, for costs related to the Business Integration Project. During the nine months ended August 27, 2016 and August 29, 2015, we incurred special charges, net of \$(2,024) and \$4,592, respectively, for costs related to the Business Integration Project. Included in facility exit costs for the three and nine months ended August 27, 2016 is a \$3.6 million gain on the sale of our production facility located in Wels, Austria, which closed during the third quarter of 2016.

The following table provides detail of special charges, net:

	Three Months		Nine Months	
	Ended		Ended	
	August	August	August	August
	27,	29,	27,	29,
	2016	2015	2016	2015
Acquisition and transformation related costs	\$55	\$48	\$242	\$595
Workforce reduction costs	-	216	(1)	2

Note 8: Inventories

The composition of inventories is as follows:

	August 27, 2016	November 28, 2015
Raw materials	\$125,421	\$121,545
Finished goods	148,829	142,195

LIFO reserve	(12,887)	(15,236)
Total inventories	\$261,363	\$ 248,504

Note 9: Financial Instruments

Foreign Currency Derivative Instruments

As a result of being a global enterprise, our earnings, cash flows and financial position are exposed to foreign currency risk from foreign currency denominated receivables and payables. These items are denominated in various foreign currencies, including the Euro, British pound sterling, Canadian dollar, Chinese renminbi, Japanese yen, Australian dollar, Argentine peso, Brazilian real, Colombian peso, Mexican peso, Turkish lira, Egyptian pound, Indian rupee and Malaysian ringgit.

Our objective is to balance, where possible, local currency denominated assets to local currency denominated liabilities to have a natural hedge and minimize foreign exchange impacts. We take steps to minimize risks from foreign currency exchange rate fluctuations through normal operating and financing activities and, when deemed appropriate, through the use of derivative instruments. We do not enter into any speculative positions with regard to derivative instruments.

Table Of Contents

We enter into derivative contracts with a group of investment grade multinational commercial banks. We evaluate the credit quality of each of these banks on a periodic basis as warranted.

Effective October 7, 2015, we entered into three cross-currency swap agreements to convert a notional amount of \$134,736 of foreign currency denominated intercompany loans into US dollars. The first swap matures in 2017, the second swap matures in 2018 and the third swap matures in 2019. As of August 27, 2016, the combined fair value of the swaps was a liability of \$2,048 and was included in other liabilities in the Condensed Consolidated Balance Sheets. The swaps were designated as cash-flow hedges for accounting treatment. The lesser amount between the cumulative change in the fair value of the actual swaps and the cumulative change in the fair value of hypothetical swaps is recorded in accumulated other comprehensive income (loss) in the Condensed Consolidated Balance Sheets. The difference between the cumulative change in the fair value of the actual swaps and the cumulative change in the fair value of hypothetical swaps are recorded as other income (expense), net in the Condensed Consolidated Statements of Income. In a perfectly effective hedge relationship, the two fair value calculations would exactly offset each other. Any difference in the calculation represents hedge ineffectiveness. The ineffectiveness calculations as of August 27, 2016 resulted in additional pre-tax gain of \$40 for the nine months ended August 27, 2016 as the change in fair value of the cross-currency swaps was less than the change in the fair value of the hypothetical swaps. The amount in accumulated other comprehensive income (loss) related to cross-currency swaps was a loss of \$1,473 as of August 27, 2016. The estimated net amount of the existing loss that is reported in accumulated other comprehensive income (loss) as of August 27, 2016 that is expected to be reclassified into earnings within the next twelve months is \$827. As of August 27, 2016, we do not believe any gains or losses will be reclassified into earnings as a result of the discontinuance of these cash flow hedges because the original forecasted transaction will not occur.

The following table summarizes the cross-currency swaps outstanding as of August 27, 2016:

	Fiscal Year of Expiration	Interest Rate	Notional Value	Fair Value
Pay EUR	2017	3.05%	\$44,912	\$(342)
Receive USD		3.9145%		
Pay EUR	2018	3.45%	\$44,912	\$(689)
Receive USD		4.5374%		
Pay EUR	2019	3.80%	\$44,912	\$(1,017)
Receive USD		5.0530%		
Total			\$134,736	\$(2,048)

Except for the cross-currency swap agreements listed above, foreign currency derivative instruments outstanding are not designated as hedges for accounting purposes. The gains and losses related to mark-to-market adjustments are recognized as other income or expense in the Condensed Consolidated Statements of Income during the periods in which the derivative instruments are outstanding. See Note 14 for fair value amounts of these derivative instruments.

As of August 27, 2016, we had forward foreign currency contracts maturing between September 12, 2016 and February 24, 2017. The mark-to-market effect associated with these contracts, on a net basis, was a loss of \$4,570 at August 27, 2016. These losses were largely offset by the underlying transaction gains and losses resulting from the foreign currency exposures for which these contracts relate.

Interest Rate Swaps

We have interest rate swap agreements to convert \$75,000 of our senior notes to variable interest rates. The change in fair value of the senior notes, attributable to the change in the risk being hedged, was a liability of \$2,284 at August 27, 2016 and was included in long-term debt and current maturities of long-term debt in the Condensed Consolidated Balance Sheets. The combined fair value of the swaps were an asset of \$2,337 at August 27, 2016 and \$3,395 at November 28, 2015 and were included in other assets in the Condensed Consolidated Balance Sheets. The swaps were designated for hedge accounting treatment as fair value hedges.

Table Of Contents

The changes in the fair value of the swap and the fair value of the senior notes attributable to the change in the risk being hedged are recorded as other income (expense), net in the Condensed Consolidated Statements of Income. In a perfectly effective hedge relationship, the two fair value calculations would exactly offset each other. Any difference in the calculation represents hedge ineffectiveness. For the nine months ended August 27, 2016 and August 29, 2015, a pretax gain of \$14 and \$62, respectively, was recorded as the fair value of the senior notes decreased by more than the change in the fair value of the interest rate swaps attributable to the change in the risk being hedged.

Concentrations of credit risk with respect to trade accounts receivable are limited due to the large number of entities in the customer base and their dispersion across many different industries and countries. As of August 27, 2016, there were no significant concentrations of credit risk.

Note 10: Commitments and Contingencies

Environmental Matters

From time to time, we become aware of compliance matters relating to, or receive notices from, federal, state or local entities regarding possible or alleged violations of environmental, health or safety laws and regulations. We review the circumstances of each individual site, considering the number of parties involved, the level of potential liability or our contribution relative to the other parties, the nature and magnitude of the hazardous substances involved, the method and extent of remediation, the estimated legal and consulting expense with respect to each site and the time period over which any costs would likely be incurred. Also, from time to time, we are identified as a potentially responsible party (PRP) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and/or similar state laws that impose liability for costs relating to the clean up of contamination resulting from past spills, disposal or other release of hazardous substances. We are also subject to similar laws in some of the countries where current and former facilities are located. Our environmental, health and safety department monitors compliance with applicable laws on a global basis. To the extent we can reasonably estimate the amount of our probable liabilities for environmental matters, we establish a financial provision.

Currently we are involved in various environmental investigations, clean up activities and administrative proceedings and lawsuits. In particular, we are currently deemed a PRP in conjunction with numerous other parties, in a number of government enforcement actions associated with landfills and/or hazardous waste sites. As a PRP, we may be required to pay a share of the costs of investigation and clean up of these sites. In addition, we are engaged in environmental remediation and monitoring efforts at a number of current and former operating facilities. While uncertainties exist with respect to the amounts and timing of the ultimate environmental liabilities, based on currently available information, we have concluded that these matters, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow.

Other Legal Proceedings

From time to time and in the ordinary course of business, we are a party to, or a target of, lawsuits, claims, investigations and proceedings, including product liability, personal injury, contract, patent and intellectual property, environmental, health and safety, tax and employment matters. While we are unable to predict the outcome of these matters, we have concluded, based upon currently available information, that the ultimate resolution of any pending matter, individually or in the aggregate, including the asbestos litigation described in the following paragraphs, will not have a material adverse effect on our results of operations, financial condition or cash flow.

We have been named as a defendant in lawsuits in which plaintiffs have alleged injury due to products containing asbestos manufactured more than 30 years ago. The plaintiffs generally bring these lawsuits against multiple defendants and seek damages (both actual and punitive) in very large amounts. In many cases, plaintiffs are unable to demonstrate that they have suffered any compensable injuries or that the injuries suffered were the result of exposure to products manufactured by us. We are typically dismissed as a defendant in such cases without payment. If the plaintiff presents evidence indicating that compensable injury occurred as a result of exposure to our products, the case is generally settled for an amount that reflects the seriousness of the injury, the length, intensity and character of exposure to products containing asbestos, the number and solvency of other defendants in the case, and the jurisdiction in which the case has been brought.

Table Of Contents

A significant portion of the defense costs and settlements in asbestos-related litigation is paid by third parties, including indemnification pursuant to the provisions of a 1976 agreement under which we acquired a business from a third party. Currently, this third party is defending and paying settlement amounts, under a reservation of rights, in most of the asbestos cases tendered to the third party.

In addition to the indemnification arrangements with third parties, we have insurance policies that generally provide coverage for asbestos liabilities, including defense costs. Historically, insurers have paid a significant portion of our defense costs and settlements in asbestos-related litigation. However, certain of our insurers are insolvent. We have entered into cost-sharing agreements with our insurers that provide for the allocation of defense costs and settlements and judgments in asbestos-related lawsuits. These agreements require, among other things, that we fund a share of settlements and judgments allocable to years in which the responsible insurer is insolvent

A summary of the number of and settlement amounts for asbestos-related lawsuits and claims is as follows:

	Nine Months Ended August		3 Years Ended November
(\$ in thousands)	27, 2016	29, 2015	28, 2015
Lawsuits and claims settled	9	6	25
Settlement amounts	\$978	\$ 463	\$ 2,072
Insurance payments received or expected to be received	\$645	\$ 373	\$ 1,648

We do not believe that it would be meaningful to disclose the aggregate number of asbestos-related lawsuits filed against us because relatively few of these lawsuits are known to involve exposure to asbestos-containing products that we manufactured. Rather, we believe it is more meaningful to disclose the number of lawsuits that are settled and result in a payment to the plaintiff. To the extent we can reasonably estimate the amount of our probable liabilities for pending asbestos-related claims, we establish a financial provision and a corresponding receivable for insurance recoveries.

Based on currently available information, we have concluded that the resolution of any pending matter, including asbestos-related litigation, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow.

Note 11: Operating Segments

We are required to report segment information in the same way that we internally organize our business for assessing performance and making decisions regarding allocation of resources. We evaluate the performance of each of our operating segments based on segment operating income, which is defined as gross profit less selling, general and administrative expenses. Segment operating income excludes special charges, net. Corporate expenses are fully allocated to each operating segment. Inter-segment revenues are recorded at cost plus a markup for administrative costs. Operating results of each segment are regularly reviewed by our chief operating decision maker to make decisions about resources to be allocated to the segments and assess their performance.

Through the fourth quarter of 2015, our business was reported in four operating segments: Americas Adhesives, EIMEA, Asia Pacific and Construction Products. Changes in our management reporting structure during the first quarter of 2016 required us to conduct an operating segment assessment in accordance with ASC Topic 280, *Segment Reporting*, to determine our reportable segments. As a result of this assessment, we now have five reportable segments: Americas Adhesives, EIMEA, Asia Pacific, Construction Products and Engineering Adhesives. Prior period segment information has been recast retrospectively to reflect our new operating segments.

Table Of Contents

The table below provides certain information regarding net revenue and segment operating income for each of our operating segments:

	Three Months Ended			August 29, 2015		
	August 27, 2016					
	Inter-	Segment		Inter-	Segment	
	Trade	Segment	Operating	Trade	Segment	Operating
	Revenue	Revenue	Income	Revenue	Revenue	Income
Americas Adhesives	\$198,957	\$ 4,096	\$ 31,900	\$206,623	\$ 4,725	\$ 33,617
EIMEA	130,619	4,056	8,430	133,512	4,513	5,325
Asia Pacific	57,488	1,540	2,510	54,645	1,137	2,749
Construction Products	64,402	185	2,093	72,404	119	3,421
Engineering Adhesives	61,392	-	3,496	56,949	-	3,431
Total	\$512,858		\$ 48,429	\$524,133		\$ 48,543

	Nine Months Ended			August 29, 2015		
	August 27, 2016

Americas Adhesives	\$588,422	\$ 11,821	\$ 94,043	\$618,172	\$ 16,428	\$ 91,021
EIMEA	394,807	13,821	25,620	405,044	12,174	8,303
Asia Pacific	171,467	3,801	9,299	167,541	8,570	8,838
Construction Products	192,111	340	5,412	206,690	541	10,790
Engineering Adhesives	172,891	-	6,465	138,109	-	(681)
Total	\$1,519,698		\$ 140,839	\$1,535,556		\$ 118,271

Reconciliation of segment operating income to income before income taxes and income from equity method investments:

	Three Months Ended		Nine Months Ended	
	August 27, 2016	August 29, 2015	August 27, 2016	August 29, 2015
Segment operating income	\$48,429	\$48,543	\$140,839	\$118,271

Special charges, net	2,807	(1,297)	2,024	(4,592)
Other income (expense), net	(956)	(1,040)	(7,603)	(1,246)
Interest expense	(6,809)	(6,448)	(19,714)	(18,765)
Income before income taxes and income from equity method investments	\$43,471	\$39,758	\$115,546	\$93,668

Note 12: Income Taxes

As of August 27, 2016, we had a liability of \$4,508 recorded under FASB ASC 740, *Income Taxes*, for gross unrecognized tax benefits (excluding interest), compared to \$5,124 as of November 28, 2015. As of August 27, 2016, we had accrued \$639 of gross interest relating to unrecognized tax benefits. For the quarter ended August 27, 2016, our recorded liability for gross unrecognized tax benefits decreased by \$652.

Table Of Contents**Note 13: Goodwill and Other Intangible Assets**

A summary of goodwill activity as of August 27, 2016 and changes during the nine months then ended is presented below:

	Americas	EIMEA	Asia	Construction	Engineering	Total
	Adhesives		Pacific	Products	Adhesives	
Balance at November 28, 2015	\$ 59,706	\$ 100,638	\$ 17,329	\$ 22,668	\$ 153,863	\$ 354,204
Acquisitions	-	-	-	-	38,852	1 38,852
Currency impact	116	3,885	812	97	(4,715	) 195
Balance at August 27, 2016	\$ 59,822	\$ 104,523	\$ 18,141	\$ 22,765	\$ 188,000	\$ 393,251

Preliminary
goodwill
1 balance as
of August
27, 2016.

As discussed in Note 11, during the first quarter of fiscal year 2016, we changed our operating segments as a result of a change in our management reporting structure. This resulted in a change in our reporting units. We allocated goodwill to our new reporting units using the relative fair value approach.

Balances of amortizable identifiable intangible assets, excluding goodwill and other non-amortizable intangible assets are as follows:

	August 27, 2016			
	Purchased			
Amortizable Intangible Assets	Technology &	Customer Relationships	All Other	Total
	Patents			
Original cost	\$ 70,237	\$ 243,017	\$ 49,776	\$ 363,030
Accumulated amortization	(23,727)	(110,258	) (28,343)	(162,328)
Net identifiable intangibles	\$ 46,510	\$ 132,759	\$ 21,433	\$ 200,702

November 28, 2015

Purchased

Amortizable Intangible Assets	Technology	Customer	All	Total
	& Patents	Relationships	Other	
Original cost	\$69,792	\$ 234,995	\$49,563	\$354,350
Accumulated amortization	(17,613)	(99,405)	) (24,801)	(141,819)
Net identifiable intangibles	\$52,179	\$ 135,590	\$24,762	\$212,531

Amortization expense with respect to amortizable intangible assets was \$20,509 and \$20,046 for the nine months ended August 27, 2016 and August 29, 2015, respectively.

Estimated aggregate amortization expense based on the current carrying value of amortizable intangible assets for the next five fiscal years are as follows:

Fiscal Year	Remainder					
	2016	2017	2018	2019	2020	Thereafter
Amortization Expense	\$ 7,023	\$25,901	\$25,444	\$23,506	\$22,527	\$ 96,301

Non-amortizable intangible assets as of August 27, 2016 are \$462 and are related to trademarks and trade names.

Table Of Contents**Note 14: Fair Value Measurements**

Estimates of fair value for financial assets and liabilities are based on the framework established in the accounting guidance for fair value measurements. The framework defines fair value, provides guidance for measuring fair value and requires certain disclosures. The framework discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow) and the cost approach (cost to replace the service capacity of an asset or replacement cost). The framework utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly.

These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect management's assumptions, and include situations where there is little, if any, market activity for the asset or liability.

Balances Measured at Fair Value on a Recurring Basis

The following table presents information about our financial assets and liabilities that are measured at fair value on a recurring basis as of August 27, 2016 and November 28, 2015, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value.

	August 27, 2016	Fair Value Measurements Using:		
Description		Level 1	Level 2	Level 3
Assets:				
Marketable securities	\$1,816	\$1,816	\$-	\$-
Derivative assets	2,931	-	2,931	-
Interest rate swaps	2,337	-	2,337	-
Liabilities:				
Derivative liabilities	\$7,501	\$-	\$7,501	\$-
Contingent consideration liability	10,192	-	-	10,192
Cash-flow hedges	2,048	-	2,048	-

	November 28, 2015	Fair Value Measurements Using:		
Description		Level 1	Level 2	Level 3
Assets:				
Marketable securities	\$ 1,698	\$1,698	\$-	\$-
Derivative assets	15,185	-	15,185	-
Interest rate swaps	3,395	-	3,395	-
Cash-flow hedges	5,384	-	5,384	-
Liabilities:				
Derivative liabilities	\$ 4,744	\$-	\$4,744	\$-
Contingent consideration liability	10,854	-	-	10,854

We use the income approach in calculating the fair value of our contingent consideration liabilities using a real option model with Level 3 inputs. The expected cash flows are affected by various significant judgments and assumptions, including revenue growth rates, profit margin percentages, volatility and discount rate, which are sensitive to change. Estimates of fair value are inherently uncertain and represent only management's reasonable expectation regarding future developments. These estimates and the judgments and assumptions upon which the estimates are based will, in all likelihood, differ in some respects from actual future results. The valuation of the contingent consideration liability related to the acquisition of Tonsan Adhesive, Inc. resulted in a fair value of \$10,221 as of August 27, 2016 and a \$2,018 mark to market adjustment recorded as a credit to selling, general and administrative in the Condensed Consolidated Statement of Income as of August 27, 2016.

Table Of Contents

Contingent consideration liabilities		
Level 3 balance November 28, 2015		\$ 10,854
Opening balance sheet adjustment	700	
Mark to market adjustment	(2,055)	
Foreign currency translation adjustment	693	
Level 3 balance August 27, 2016		\$ 10,192

Note 15: Share Repurchase Program

On September 30, 2010, the Board of Directors authorized a share repurchase program of up to \$100,000 of our outstanding common shares. Under the program, we are authorized to repurchase shares for cash on the open market, from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases is dependent on price, market conditions and applicable regulatory requirements. Upon repurchase of the shares, we reduced our common stock for the par value of the shares with the excess being applied against additional paid-in capital.

Under this program, we repurchased shares with an aggregate value of \$5,326 during the third quarter of 2016. During the nine months ended August 27, 2016, we repurchased shares under this program with an aggregate value of \$9,536. Of this amount, \$250 reduced common stock and \$9,286 reduced additional paid-in capital. We did not repurchase any shares during the nine months ended August 29, 2015.

Note 16: Redeemable Non-Controlling Interest

We account for the non-controlling interest in H.B. Fuller Kimya Sanayi Ticaret A.S. (HBF Kimya) as a redeemable non-controlling interest because both the non-controlling shareholder and H.B. Fuller have an option, exercisable beginning August 1, 2018, to require the redemption of the shares owned by the non-controlling shareholder at a price determined by a formula based on 24 months trailing EBITDA. Since the option makes the redemption of the non-controlling ownership shares of HBF Kimya outside of our control, these shares are classified as a redeemable non-controlling interest in temporary equity in the Condensed Consolidated Balance Sheets. The non-controlling shareholder is entitled to increase his ownership by 1 percent per year for 5 years up to a maximum of 13 percent ownership based on the achievement of profitability targets in each year. The option is subject to a minimum price of €3,500. The redemption value of the option, if it were currently redeemable, is estimated to be €3,500.

The results of operations for the HBF Kimya non-controlling interest is consolidated in our financial statements. Both the non-controlling interest and the accretion adjustment to redemption value are included in net income attributable to non-controlling interests in the Condensed Consolidated Statements of Income and in the carrying value of the

redeemable non-controlling interest on the Condensed Consolidated Balance Sheets. HBF Kimya's functional currency is the Turkish lira and changes in exchange rates will affect the reported amount of the redeemable non-controlling interest.

	Redeemable
	Non-Controlling
	Interest
Balance at November 28, 2015	\$ 4,199
Net income (loss) attributed to redeemable non-controlling interest	161
Foreign currency translation adjustment	52
Balance at August 27, 2016	\$ 4,412

Table Of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with the MD&A included in our Annual Report on Form 10-K for the year ended November 28, 2015 for important background information related to our business.

As of the beginning of the first quarter ending February 27, 2016, we created a new global operating segment named Engineering Adhesives, which includes the electronics, automotive and Tonsan and Cyberbond businesses from around the world. We also began reporting our Construction Products business on a global basis by combining our EIMEA and Asia Pacific construction businesses with our Construction Products operating segment. We now have five reportable segments: Americas Adhesives, EIMEA, Asia Pacific, Construction Products and Engineering Adhesives.

Net revenue in the third quarter of 2016 decreased 2.2 percent from the third quarter of 2015. Sales volume increased 0.9 percent and product pricing decreased 2.1 percent compared to the third quarter of 2015. A weaker Chinese renminbi, Egyptian pound, Turkish lira, Indian rupee and Malaysian ringgit, partially offset by a stronger Euro compared to the U.S. dollar, for the third quarter of 2016 compared to the third quarter of 2015 were the main drivers of a negative 1.0 percent currency effect. Gross profit margin increased 50 basis points primarily due to lower raw material costs.

Net revenue in the first nine months of 2016 decreased 1.0 percent from the first nine months of 2015. Sales volume increased 2.5 percent and product pricing decreased 1.3 percent compared to the first nine months of 2015. A weaker Chinese renminbi, Euro, Turkish lira, Canadian dollar, and Egyptian pound compared to the U.S. dollar, for the first nine months of 2016 compared to the first nine months of 2015 were the main drivers of a negative 2.2 percent currency effect. Gross profit margin increased 230 basis points primarily due to lower raw material costs.

Net income attributable to H.B. Fuller in the third quarter of 2016 was \$32.7 million as compared to \$26.8 million in the third quarter of 2015. On a diluted earnings per share basis, the third quarter of 2016 was \$0.64 per share as compared to \$0.52 per share for the third quarter of 2015.

Net income attributable to H.B. Fuller in the first nine months of 2016 was \$85.0 million as compared to \$61.7 million in the first nine months of 2015. On a diluted earnings per share basis, the first nine months of 2016 was \$1.66 per share as compared to \$1.20 per share for the same period of 2015.

Results of Operations

Net revenue:

	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
(\$ in millions)	2016	2015	2015	2016	2015	2015
Net revenue	\$512.9	\$524.1	(2.2%)	\$1,519.7	\$1,535.6	(1.0%)

We review variances in net revenue in terms of changes related to product pricing, sales volume, changes in foreign currency exchange rates and large acquisitions. The product pricing/sales volume variance and small acquisitions such as Cyberbond, Advanced Adhesives, Tonsan Adhesive, Inc. and Continental Products Limited are viewed as constant currency growth. The following table shows the net revenue variance analysis for the third quarter and first nine months of 2016 compared to the same periods in 2015:

	Three Months Ended August 27, 2016 vs August 29, 2015	Nine Months Ended August 27, 2016 vs August 29, 2015
Product pricing	(2.1%)	(1.3%)
Sales volume	0.9 %	2.5 %
Currency	(1.0%)	(2.2%)
Total	(2.2%)	(1.0%)

Table Of Contents

Constant currency growth was a negative 1.2 percent in the third quarter of 2016 compared to the third quarter of 2015. Sales volume increased 0.9 percent and product pricing decreased 2.1 percent compared to 2015. The negative 1.2 percent constant currency growth in the third quarter of 2016 was driven by 11.8 percent growth in Engineering Adhesives, 9.6 percent growth in Asia Pacific offset by a 2.0 percent decrease in EIMEA, 3.6 percent decrease in Americas Adhesives and a 11.0 percent decrease in Construction Products. The negative 1.0 percent currency impact was primarily driven by the devaluation of the Chinese renminbi, Egyptian pound, Turkish lira, Indian rupee, and Malaysian ringgit, partially offset by a stronger Euro compared to the U.S. dollar.

Constant currency growth was 1.2 percent in the first nine months of 2016 compared to the first nine months of 2015. Sales volume increased 2.5 percent and product pricing decreased 1.3 percent compared to 2015. The 1.2 percent constant currency growth in the first nine months of 2016 was driven by 30.0 percent growth in Engineering Adhesives, 7.7 percent growth in Asia Pacific and 1.1 percent growth in EIMEA, offset by a 4.3 percent decrease in Americas Adhesives and a decrease of 6.6 percent in Construction Products. The negative 2.2 percent currency impact was primarily driven by the devaluation of the Chinese renminbi, Euro, Turkish lira, Canadian dollar, and Egyptian pound compared to the U.S. dollar.

Cost of sales:

	Three Months Ended			Nine Months Ended		
	August	August	2016	August	August	2016
(\$ in millions)	27,	29,	vs	27,	29,	vs
	2016	2015	2015	2016	2015	2015
Raw materials	\$273.9	\$288.2	(5.0%)	\$813.4	\$862.2	(5.7%)
Other manufacturing costs	92.8	89.1	4.2 %	264.3	261.4	1.1 %
Cost of sales	\$366.7	\$377.3	(2.8%)	\$1,077.7	\$1,123.6	(4.1%)
Percent of net revenue	71.5 %	72.0 %		70.9 %	73.2 %	

Cost of sales in the third quarter of 2016 compared to the third quarter of 2015 decreased 50 basis points as a percentage of net revenue. Raw material cost as a percentage of net revenue decreased 160 basis points compared to last year due to lower raw material costs and sales mix, partially offset by the impact of valuing inventory acquired in the Cyberbond acquisition at fair value. Other manufacturing costs as a percentage of revenue increased 110 basis points compared to the third quarter of last year.

Cost of sales in the first nine months of 2016 compared to the first nine months of 2015 decreased 230 basis points as a percentage of net revenue. Raw material cost as a percentage of net revenue decreased 270 basis points compared to last year due to lower raw material costs, sales mix and the 2015 impact of valuing inventories acquired in the Tonsan Adhesive, Inc. acquisition at fair value. Other manufacturing costs as a percentage of revenue increased 40 basis

points compared to last year.

Gross profit:

	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
(\$ in millions)						
	2016	2015	2015	2016	2015	2015
Gross profit	\$146.1	\$146.8	(0.5%)	\$442.0	\$412.0	7.3 %
Percent of net revenue	28.5 %	28.0 %		29.1 %	26.8 %	

Gross profit in the third quarter of 2016 decreased 0.5 percent and gross profit margin increased 50 basis points compared to the third quarter of 2015. The combined impact of lower revenue, lower raw material costs and higher other manufacturing costs in the third quarter of 2016 resulted in the decrease in gross profit.

Gross profit in the first nine months of 2016 increased \$30.0 million or 7.3 percent and gross profit margin increased 230 basis points compared to the first nine months of 2015. Reduced raw material costs, better sales mix and a full nine months of Tonsan in 2016 resulted in the increase in gross profit.

Table Of Contents**Selling, general and administrative (SG&A) expenses:**

	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
(\$ in millions)						
	2016	2015	2015	2016	2015	2015
SG&A	\$97.7	\$ 98.3	(0.6%)	\$301.1	\$293.7	2.5 %
Percent of net revenue	19.0%	18.8 %		19.8 %	19.1 %	

SG&A expenses for the third quarter of 2016 decreased \$0.6 million or 0.6 percent, compared to the third quarter of 2015. The decrease is primarily due to lower variable compensation, offset by incremental expenses related to the Advanced Adhesives and Cyberbond acquisitions and higher personnel costs related to increased head count.

SG&A expenses for the first nine months of 2016 increased \$7.4 million or 2.5 percent, compared to the first nine months of 2015. The increase is mainly due to a full nine months of Tonsan for 2016 and incremental expenses coming from newly acquired businesses compared to the first nine months of 2015. This increase is partially offset by lower expenses related to general spending reductions, foreign currency exchange rate benefits on spending outside the U.S. and the net mark to market adjustment related to the Tonsan contingent consideration liability.

We make SG&A expense plans at the beginning of each fiscal year and barring significant changes in business conditions or our outlook for the future, we maintain these spending plans for the entire year. Management routinely monitors our SG&A spending relative to these fiscal year plans for each operating segment and for the company overall. We feel it is important to maintain a consistent spending program in this area as many of the activities within the SG&A category such as the sales force, technology development, and customer service are critical elements of our business strategy. For the current year, we planned SG&A expenses to increase relative to last year by an amount higher than our expected growth in net revenue.

Special charges, net	\$(2.8)	\$ 1.3	\$(2.0)	\$ 4.6

The integration of the industrial adhesives business we acquired in March 2012 involved a significant amount of restructuring and capital investment to optimize the new combined entity. In addition to this acquisition, we announced our intentions to take a series of actions in our existing EIMEA operating segment to improve the profitability and future growth prospects of this operating segment. We combined these two initiatives into a single project which we refer to as the “Business Integration Project”. During the third quarter ended August 27, 2016 and August 29, 2015, we incurred special charges, net of \$(2.8) million and \$1.3 million respectively, and for the nine months ended August 27, 2016 and August 29, 2015, we incurred special charges, net of \$(2.0) million and \$4.6 million respectively, for costs related to the Business Integration Project. Included in facility exit costs for the three and nine months ended August 27, 2016 is a \$3.6 million gain on the sale of our production facility located in Wels, Austria, which closed during the third quarter of 2016.

We present operating segment information consistent with how we organize our business internally, assess performance and make decisions regarding the allocation of resources. Segment operating income is defined as gross profit less selling, general and administrative expenses. Because this definition excludes special charges, we have not allocated special charges to the operating segments or included them in Management’s Discussion and Analysis of operating segment results. The following table provides the special charges, net attributable to each operating segment for the periods presented:

Table Of Contents

	Three Months Ended		Nine Months Ended	
	August		August	
	27,	29,	27,	29,
(\$ in millions)	2016	2015	2016	2015
Americas Adhesives	\$-	\$ -	\$-	\$ (0.9)
EIMEA	(2.8)	1.3	2.0	5.2
Company-wide	-	-	-	0.3
Special Charges, net	\$(2.8)	\$ 1.3	\$2.0	\$ 4.6

We expect total project costs will be approximately \$164.0 million. The following table provides detail of costs incurred inception-to-date as of August 27, 2016 for the Business Integration Project:

	Costs Incurred
	Inception-to-Date
	as of August 27,
	2016
Acquisition and transformation related costs	\$ 43.3
Work force reduction costs	41.1
Cash facility exit costs	37.7
Non-cash facility exit costs	17.7
Other related costs	19.5
Business Integration Project	\$ 159.3

Non-cash costs are primarily related to accelerated depreciation of long-lived assets.

Other income (expense), net:

	Three Months Ended			Nine Months Ended		
	August			August		
	27,	29,	2016 vs	27,	29,	2016 vs
(\$ in millions)	2016	2015	2015	2016	2015	2015
Other income (expense), net	\$(1.0)	\$(1.0)	)NMP	\$(7.6)	\$(1.2)	)NMP

NMP = Non-meaningful percentage

Other income (expense), net in the third quarter of 2016 included \$1.0 million of currency translation and re-measurement losses and \$0.2 million of net financing expense, offset by \$0.5 million of interest income. Other income (expense), net in the third quarter of 2015 included \$1.3 million of currency translation and re-measurement losses.

Other income (expense), net in the first nine months of 2016 included \$9.1 million of currency translation and re-measurement losses offset by \$1.5 million of interest income. The majority of the \$9.1 million of currency translation and re-measurement losses is related to the devaluation of the Argentine peso. Other income (expense), net in the first nine months of 2015 included \$2.1 million of currency translation and re-measurement losses offset by \$0.5 million of net financing income, \$0.2 million of interest income, and \$0.2 million of gains on disposal of fixed assets.

Interest expense:

	Three Months Ended			Nine Months Ended		
	August 2016	August 2016	vs	August 2016	August 2016	2016
	27,	29,		27,	29,	vs
(\$ in millions)						
	2016	2015	2015	2016	2015	2015
Interest expense	\$6.8	\$ 6.4	5.6 %	\$19.7	\$ 18.8	5.1 %

Interest expense in the third quarter of 2016 as compared to the same period last year was higher due to higher LIBOR rates on floating rate debt held in the U.S. and larger local currency debt balances at higher interest rates, offset by higher capitalized interest and lower average U.S. debt balances. We capitalized \$0.2 million of interest expense in the third quarter of 2016 compared to \$0.1 million in the same period last year.

Table Of Contents

Interest expense for the first nine months of 2016 as compared to the same period last year was higher due to higher LIBOR rates on floating rate debt and larger local currency debt balances at higher interest rates, offset by higher capitalized interest. We capitalized \$0.6 million of interest expense in the first nine months of 2016 compared to \$0.1 million in the same period last year.

Income taxes:

(\$ in millions)	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
	2016	2015	2015	2016	2015	2015
Income taxes	\$12.5	\$14.4	(12.9%)	\$35.6	\$34.5	3.0 %
Effective tax rate	28.8 %	36.1 %		30.8 %	36.9 %	

Income tax expense of \$12.5 million in the third quarter of 2016 includes \$1.1 million of discrete tax benefit and \$0.8 million of tax expense relating to the special charges for costs related to the Business Integration Project. Excluding the discrete tax expense and the effects of items included in special charges, the overall effective tax rate was 31.4 percent.

Income tax expense of \$35.6 million in the first nine months of 2016 includes \$1.7 million of discrete tax benefits and \$0.7 million of tax expense relating to special charges for costs related to the Business Integration Project. Excluding the discrete tax benefits and the effects of items included in special charges, the overall effective tax rate was 32.2 percent.

Income from equity method investments:

(\$ in millions)	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
	2016	2015	2015	2016	2015	2015
Income from equity method investments	\$1.8	\$1.5	22.7 %	\$5.2	\$4.2	24.4 %

The income from equity method investments relates to our 50 percent ownership of the Sekisui-Fuller joint venture in Japan. The higher income for the third quarter and first nine months of 2016 compared to the same periods of 2015 is primarily related to higher net income in our joint venture.

Net income attributable to non-controlling interests:

	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs 2015	August 27,	August 29,	2016 vs 2015
(\$ in millions)						
Net income attributable to non-controlling interests	\$ (0.1)	\$ (0.1)	)NMP	\$ (0.2)	\$ (0.3)	)NMP

NMP = Non-meaningful percentage

Net income attributable to non-controlling interests relates to an 11 percent redeemable non-controlling interest in HBF Turkey.

Table Of Contents**Net income attributable to H.B. Fuller:**

	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
(\$ in millions)						
	2016	2015	2015	2016	2015	2015
Net income attributable to H.B. Fuller	\$32.7	\$ 26.8	22.2 %	\$85.0	\$ 61.7	37.8 %
Percent of net revenue	6.4 %	5.1 %		5.6 %	4.0 %	

The net income attributable to H.B. Fuller for the third quarter of 2016 was \$32.7 million compared to \$26.8 million for the third quarter of 2015. The diluted earnings per share for the third quarter of 2016 was \$0.64 per share as compared to \$0.52 per share for the third quarter of 2015.

The net income attributable to H.B. Fuller for the first nine months of 2016 was \$85.0 million compared to \$61.7 million for the first nine months of 2015. The diluted earnings per share for the first nine months of 2016 was \$1.66 per share as compared to \$1.20 per share for the first nine months of 2015.

Operating Segment Results

Through the fourth quarter of 2015, our business was reported in four operating segments: Americas Adhesives, Europe, India, Middle East and Africa (EIMEA), Asia Pacific and Construction Products. Changes in our management reporting structure during the first quarter of 2016 required us to conduct an operating segment assessment in accordance with ASC Topic 280, *Segment Reporting*, to determine our reportable segments. As a result of this assessment, we now have five reportable segments: Americas Adhesives, EIMEA, Asia Pacific, Construction Products and Engineering Adhesives. Prior period segment information has been recast retrospectively to reflect our new operating segments.

Operating results of each of these segments are regularly reviewed by our chief operating decision maker to make decisions about resources to be allocated to the segments and assess their performance.

The tables below provide certain information regarding the net revenue and segment operating income of each of our operating segments. For segment evaluation by the chief operating decision maker, segment operating income is defined as gross profit less selling, general and administrative expenses. Segment operating income excludes special

charges, net. The product pricing/sales volume variance and small acquisitions are viewed as constant currency growth.

Net Revenue by Segment:

Edgar Filing: FULLER H B CO - Form 10-Q

	2016	2015	2015	2016	2015	2015
Net revenue	\$199.0	\$206.7	(3.7%)	\$588.4	\$618.2	(4.8%)
Segment operating income	\$31.9	\$33.6	(5.1%)	\$94.0	\$91.0	3.3 %
Segment operating margin	16.0 %	16.3 %		16.0 %	14.7 %	

The following tables provide details of the Americas Adhesives net revenue variances:

	Three Months Ended August 27, 2016		Nine Months Ended August 27, 2016	
	vs August 29, 2015		vs August 29, 2015	
Constant currency growth	(3.6	%)	(4.3	%)
Currency	(0.1	%)	(0.5	%)
Total	(3.7	%)	(4.8	%)

Net revenue decreased 3.7 percent in the third quarter of 2016 compared to the third quarter of 2015. The 3.6 percent decrease in constant currency growth was attributable to a 0.1 percent decrease in sales volume and 3.5 percent decrease in product pricing. The 0.1 percent negative currency effect was due to the weaker Canadian dollar compared to the U.S. dollar. As a percentage of net revenue, raw material costs decreased 30 basis points mainly due to reductions in raw material costs. Other manufacturing costs as a percentage of net revenue increased 30 basis points, primarily due to lower revenues. Segment operating income decreased 5.1 percent and segment operating margin as a percentage of net revenue decreased 30 basis points in the third quarter of 2016 compared to the third quarter of 2015.

Table Of Contents

Net revenue decreased 4.8 percent in the first nine months of 2016 compared to the first nine months of 2015. The 4.3 percent decrease in constant currency growth was attributable to a 1.8 percent decrease in sales volume and a 2.5 percent decrease in product pricing. The 0.5 percent negative currency effect was due to the weaker Canadian dollar compared to the U.S. dollar. The sales volume decrease was driven by general end-market weakness in Latin America and unfavorable sales mix partially offset by modest market share gains. As a percentage of net revenue, raw material costs decreased 260 basis points mainly due to reductions in raw material costs. Other manufacturing costs as a percentage of net revenue increased 50 basis points. Segment operating income increased 3.3 percent and segment operating margin as a percentage of net revenue increased 130 basis points in the first nine months of 2016 compared to the first nine months of 2015.

EIMEA

	Three Months Ended			Nine Months Ended		
	August	August	2016	August	August	2016
(\$ in millions)	27,	29,	vs	27,	29,	vs
	2016	2015	2015	2016	2015	2015
Net revenue	\$ 130.6	\$ 133.5	(2.2%)	\$ 394.8	\$ 405.1	(2.5%)
Segment operating income	\$ 8.4	\$ 5.3	58.3 %	\$ 25.6	\$ 8.3	208.6 %
Segment operating margin	6.5 %	4.0 %		6.5 %	2.0 %	

The following table provides details of the EIMEA net revenue variances:

	Three Months Ended August 27, 2016		Nine Months Ended August 27, 2016	
	vs	August 29, 2015	vs	August 29, 2015
Constant currency growth	(2.0 %)		1.1 %	
Currency	(0.2 %)		(3.6 %)	
Total	(2.2 %)		(2.5 %)	

Net revenue decreased 2.2 percent in the third quarter of 2016 compared to the third quarter of 2015. Sales volume increased 0.3 percent and product pricing decreased 2.3 percent. The negative currency effect of 0.2 percent was primarily the result of a weaker Egyptian pound, Turkish lira, and Indian rupee compared to the U.S. dollar partially

offset by a stronger Euro. Sales volume growth was primarily related to the hygiene and packaging markets, with strong growth in the emerging markets. Raw material cost as a percentage of net revenue decreased 260 basis points in the third quarter of 2016 compared to the third quarter of 2015 primarily due to lower raw material costs. Other manufacturing costs as a percentage of net revenue were 100 basis points higher in the third quarter of 2016 compared to the third quarter of 2015. Segment operating income increased 58.3 percent and segment operating margin increased 250 basis points compared to the third quarter of 2015.

Net revenue decreased 2.5 percent in the first nine months of 2016 compared to the first nine months of 2015. Sales volume increased 2.1 percent and product pricing decreased 1.0 percent. The 3.6 percent negative currency effect was primarily the result of a weaker Euro, Turkish lira, and Indian rupee and compared to the U.S. dollar. Sales volume growth was primarily related to the hygiene market, with strong growth in the emerging markets, as well as growth in core Europe. Raw material cost as a percentage of net revenue decreased 280 basis points in the first nine months of 2016 compared to the first nine months of 2015 primarily due to lower raw material costs. Other manufacturing costs as a percentage of net revenue were 110 basis points lower than 2015 as a result of the reduction of production inefficiencies incurred in the prior year related to the Business Integration Project. As a result, segment operating income increased 208.6 percent and segment operating margin increased 450 basis points compared to the first nine months of 2015.

Asia Pacific

	Three Months Ended			Nine Months Ended		
	August 27,	August 29,	2016 vs	August 27,	August 29,	2016 vs
(\$ in millions)	2016	2015	2015	2016	2015	2015
Net revenue	\$57.5	\$ 54.6	5.2 %	\$171.5	\$ 167.5	2.4 %
Segment operating income	\$2.5	\$ 2.8	(8.7%)	\$9.3	\$8.8	5.2 %
Segment operating margin	4.4 %	5.0 %		5.4 %	5.3 %	

Table Of Contents

The following table provides details of the Asia Pacific net revenue variances:

	Three Months Ended August 27, 2016		Nine Months Ended August 27, 2016	
	vs August 29, 2015		vs August 29, 2015	
Constant currency growth	9.6	%	7.7	%
Currency	(4.4	%)	(5.3	%)
Total	5.2	%	2.4	%

Net revenue in the third quarter of 2016 increased 5.2 percent compared to the third quarter of 2015. The 9.6 percent increase in constant currency growth was attributable to a 10.6 percent increase in sales volume partially offset by a 1.0 percent decrease in product pricing. Most of the growth compared to the third quarter of 2015 is driven by the acquisition of Advanced Adhesives that occurred during the second quarter of 2016, as well as growth in Southeast Asia and Greater China. Negative currency effects of 4.4 percent compared to the third quarter of 2015 were primarily driven by the weaker Chinese renminbi and Malaysian ringgit compared to the U.S. dollar. Raw material costs as a percentage of net revenue decreased 220 basis points compared to the third quarter of 2015 due to lower raw material costs and changes in sales mix. Other manufacturing costs as a percentage of net revenue increased 230 basis points compared to the third quarter of 2015, primarily due to the acquisition of Advanced Adhesives and the costs to rationalize certain production capabilities in Southeast Asia. Segment operating income decreased 8.7 percent and segment operating margin decreased 60 basis points compared to the third quarter of 2015.

Net revenue in the first nine months of 2016 increased 2.4 percent compared to the first nine months of 2015. The 7.7 percent increase in constant currency growth was attributable to a 9.0 percent increase in sales volume partially offset by a 1.3 percent decrease in product pricing. Most of the growth compared to the first nine months of 2015 is driven by the acquisition of Advanced Adhesives that occurred during the second quarter of 2016, as well as growth in Southeast Asia and Greater China. Negative currency effects of 5.3 percent compared to the first nine months of 2015 were primarily driven by the weaker Chinese renminbi, Australian dollar and Malaysian ringgit compared to the U.S. dollar. Raw material costs as a percentage of net revenue decreased 120 basis points compared to the first nine months of 2015 due to lower raw material costs and changes in sales mix, partially offset by the impact of valuing inventories related to the Advanced Adhesives acquisition at fair value. Other manufacturing costs as a percentage of net revenue increased 150 basis points compared to the first nine months of 2015, primarily due to the acquisition of Advanced Adhesives and the costs to rationalize certain production capabilities in Southeast Asia. Segment operating income increased 5.2 percent and segment operating margin increased 10 basis points compared to the first nine months of 2015.

Construction Products

(\$ in millions)	Three Months Ended			Nine Months Ended		
	August	August	2016 vs	August	August	2016 vs
	27,	29,		27,	29,	
	2016	2015	2015	2016	2015	2015
Net revenue	\$64.4	\$72.4	(11.1%)	\$192.1	\$206.7	(7.1%)
Segment operating income	\$2.1	\$3.4	(38.8%)	\$5.4	\$10.8	(49.8%)
Segment operating margin	3.3 %	4.7 %		2.8 %	5.2 %	

The following tables provide details of the Construction Products net revenue variances:

	Three Months Ended August 27, 2016		Nine Months Ended August 27, 2016	
	vs		vs	
	August 29, 2015		August 29, 2015	
Constant currency growth	(11.0 %)	(6.6 %)		
Currency	(0.1 %)	(0.5 %)		
Total	(11.1 %)	(7.1 %)		

Net revenue decreased 11.1 percent in the third quarter of 2016 compared to the third quarter of 2015. The decrease in constant currency growth was driven by a 11.2 percent decrease in sales volume offset by a 0.2 percent increase in product pricing. Negative currency effects of 0.1 percent compared to the third quarter of 2015 were primarily driven by the weaker Australian dollar compared to the U.S. dollar. The decrease in sales volume was primarily attributed to a strong third quarter of 2015 driven by market share gains with certain retail partners. The increase in pricing is mainly due to price increases related to certain product lines in multiple channels. Raw material cost as a percentage of net revenue was 350 basis points lower in the third quarter of 2016 compared to last year primarily due to changes in product mix and slightly lower raw material costs. Other manufacturing costs as a percentage of net revenue were 330 basis points higher in the third quarter of 2016 compared to the third quarter of 2015 mainly due to higher supply chain costs as we complete the facility upgrade and expansion project. Operating expense as a percentage of net revenue increased 160 basis points compared to the third quarter of 2015 due to lower revenues. Segment operating income decreased 38.8 percent and segment operating margin decreased 140 basis points in the third quarter of 2016 compared to the third quarter of 2015.

Table Of Contents

Net revenue decreased 7.1 percent in the first nine months of 2016 compared to the first nine months of 2015. The decrease in constant currency growth was driven by a 7.5 percent decrease in sales volume offset by a 0.9 percent increase in product pricing. Negative currency effects of 0.5 percent compared to the first nine months of 2015 were primarily driven by the weaker Australian dollar compared to the U.S. dollar. The decrease in sales volume was primarily attributed to lower export revenue, inventory rebalancing with certain channel partners and a strong third quarter of 2015 driven by market share gains with certain retail partners. The increase in pricing is mainly due to price increases related to certain product lines in multiple channels. Raw material cost as a percentage of net revenue was 270 basis points lower in the first nine months of 2016 compared to 2015 primarily due to changes in product mix and slightly lower raw material costs. Other manufacturing costs as a percentage of net revenue were 300 basis points higher in the first nine months of 2016 compared to the first nine months of 2015 mainly due to higher supply chain costs as we complete the facility upgrade and expansion project. Operating expense as a percentage of net revenue increased 210 basis points compared to the first nine months of 2015 primarily due to lower revenues. Segment operating income decreased 49.8 percent and segment profit margin decreased 240 basis points in the first nine months compared to the first nine months of 2015.

Total	7.8 %		25.2 %	

Net revenue increased 7.8 percent in the third quarter of 2016 compared to the third quarter of 2015. The 11.8 percent increase in constant currency growth was driven by the acquisition of Cyberbond that occurred during the third quarter of 2016, while product pricing remained flat. Negative currency effects of 4.0 percent compared to the third quarter of last year were primarily driven by the weaker Chinese renminbi compared to the U.S. dollar. Raw material cost as a percentage of net revenue was 140 basis points lower in the third quarter of 2016 compared to the third quarter of 2015. Other manufacturing costs as a percentage of net revenue were 190 basis points higher in the third quarter of 2016 compared to the third quarter of 2015 primarily due to the Cyberbond acquisition. Segment operating income increased 1.9 percent and segment operating margin decreased 30 basis points in the third quarter of 2016 compared to the third quarter of 2015.

Net revenue increased 25.2 percent in the first nine months of 2016 compared to the first nine months of 2015. The increase was driven by a 30.6 percent increase in sales volume partially offset by a 0.6 percent decrease in product pricing. The increase in sales volume was partially attributed to a full period of the Tonsan business, which was acquired late in the first quarter of 2015, as well as the acquisition of Cyberbond that occurred during the third quarter of 2016. Raw material cost as a percentage of net revenue was 400 basis points lower in the first nine months of 2016 compared to the first nine months of 2015 primarily due to the impact of valuing inventories related to the Tonsan acquisition at fair value, lower raw material costs and changes in product mix associated with the acquisition of Tonsan. Other manufacturing costs as a percentage of net revenue were 80 basis points higher in the first nine months of 2016 compared to the first nine months of 2015 primarily due to the impact of a full nine months of the Tonsan business and the Cyberbond acquisition. Operating expense as a percentage of net revenue decreased 90 basis points compared to the first nine months of 2015, partially due to the net mark to market adjustment related to the Tonsan contingent consideration liability offset by the Cyberbond acquisition. Segment operating income increased \$7.1 million and segment operating margin increased 420 basis points in the first nine months of 2016 compared to the first nine months of 2015.

Table Of Contents**Financial Condition, Liquidity and Capital Resources**

Total cash and cash equivalents as of August 27, 2016 were \$133.1 million compared to \$119.2 million as of November 28, 2015 and \$85.8 million as of August 29, 2015. Of the \$133.1 million in cash and cash equivalents as of August 27, 2016, \$120.3 million was held outside the United States. Total long and short-term debt was \$713.6 million as of August 27, 2016, \$722.9 million as of November 28, 2015 and \$727.6 million as of August 29, 2015. The total debt to total capital ratio as measured by Total Debt divided by (Total Debt plus Total Equity) was 42.6 percent as of August 27, 2016 as compared to 45.3 percent as of November 28, 2015 and 44.6 percent as of August 29, 2015.

We believe that cash flows from operating activities will be adequate to meet our ongoing liquidity and capital expenditure needs. In addition, we believe we have the ability to obtain both short-term and long-term debt to meet our financing needs for the foreseeable future. Cash available in the United States has historically been sufficient and we expect it will continue to be sufficient to fund U.S. operations and U.S. capital spending and U.S. pension and other postretirement benefit contributions in addition to funding U.S. acquisitions, dividend payments, debt service and share repurchases as needed. For those international earnings considered to be reinvested indefinitely, we currently have no intention to, and plans do not indicate a need to, repatriate these funds for U.S. operations.

Our credit agreements and note purchase agreements include restrictive covenants that, if not met, could lead to a renegotiation of our credit lines and a significant increase in our cost of financing. At August 27, 2016, we were in compliance with all covenants of our contractual obligations as shown in the following table:

Covenant	Debt Instrument	Measurement	Result as of August 27, 2016
TTM EBITDA / TTM Interest Expense	All Debt Instruments	Not less than 2.5	10.5
Total Indebtedness / TTM EBITDA	All Debt Instruments	Not greater than 3.5	2.6

TTM = Trailing 12 months

EBITDA for covenant purposes is defined as consolidated net income, plus (i) interest expense, (ii) taxes, (iii) depreciation and amortization, (iv) non-cash impairment losses, (v) extraordinary non-cash losses incurred other than in the ordinary course of business, (vi) nonrecurring extraordinary non-cash restructuring charges, (vii) [reserved] , (viii) cash expenses incurred during fiscal years 2013 through 2015 in connection with facilities consolidation, restructuring and integration, discontinuance of operations, work force reduction, sale or abandonment of assets other than inventory, and professional and other fees incurred in connection with the acquired business or the restructuring of the company's Europe, India, Middle East and Africa operations, not to exceed (x) \$39.8 million for the period beginning with the fiscal quarter ending November 30, 2013 through and including the fiscal quarter ending May 31, 2014 and (y) \$20.0 million for the period beginning with the fiscal quarter ending August 30, 2014 through and including the fiscal quarter ending November 28, 2015, (ix) cash expenses related to the Tonsan acquisition for advisory services and for arranging financing for the acquired business (including the non-cash write-off of deferred financing costs and any loss or expense on foreign exchange transactions intended to hedge the purchase price for the acquired business) with cash expenses not to exceed \$10.0 million, minus extraordinary non-cash gains incurred other than in the ordinary course of business. For the Total Indebtedness / TTM EBITDA ratio, TTM EBITDA is adjusted for the pro forma results from Material Acquisitions and Material Divestitures as if the acquisition or divestiture occurred at the beginning of the calculation period. Additional detail is provided in the Form 8-K dated October 31, 2014.

Pursuant to the Credit Agreement dated October 31, 2014, the company elected to increase the Total Indebtedness / TTM EBITDA ratio to a maximum of 3.75 to 1.00 for four quarters beginning with first fiscal quarter ending February 28, 2015. The maximum ratio returned to 3.50 to 1.00 in the first fiscal quarter 2016.

We believe we have the ability to meet all of our contractual obligations and commitments in fiscal 2016.

Table Of Contents**Selected Metrics of Liquidity**

Key metrics we monitor are net working capital as a percent of annualized net revenue, trade accounts receivable days sales outstanding (DSO), inventory days on hand, free cash flow and debt capitalization ratio.

	August 27,		August 29,
	2016		2015
Net working capital as a percentage of annualized net revenue ¹	21.7 %		20.9 %
Accounts receivable DSO (in days) ²	60		59
Inventory days on hand ³	67		68
Free cash flow (in millions) ⁴	\$ 75.8		\$ 85.2
Total debt to total capital ratio ⁵	42.6 %		44.6 %

¹ Current quarter net working capital (trade receivables, net of allowance for doubtful accounts plus inventory minus trade payables) divided by annualized net revenue (current quarter multiplied by four).

² Trade receivables net of the allowance for doubtful accounts at the balance sheet date multiplied by 56 (8 weeks) and divided by the net revenue for the last 2 months of the quarter.

³ Total inventory multiplied by 56 and divided by cost of sales (excluding delivery costs) for the last 2 months of the quarter.

⁴ Year-to-date net cash provided by (used in) operations from continuing operations, less purchased property, plant and equipment and dividends paid.

⁵ Total debt divided by (total debt plus total stockholders' equity).

Another key metric is the return on invested capital, or ROIC. The calculation is represented by total return divided by total invested capital.

Total return is defined as: gross profit less selling, general and administrative expenses, less taxes at the effective tax rate plus income from equity method investments. Total return is calculated using trailing 12 month information.

Total invested capital is defined as the sum of notes payable, current maturities of long-term debt, long-term debt, redeemable non-controlling interest and total equity.

We believe ROIC provides a true measure of return on capital invested and is focused on the long term. The following table shows the ROIC calculations based on the definition above:

	Trailing 12 months	Trailing 12 months
(\$ in millions)	as of August 27, 2016	as of August 29, 2015
Gross profit	\$598.0	\$544.4
Selling, general and administrative expenses	(405.0)	(387.2)
Income taxes at effective rate	(68.9)	(55.0)
Income from equity method investments	6.9	4.1
Total return	\$131.0	\$106.3
 Total invested capital	 \$1,672.8	 \$1,636.2
 Return on invested capital	 7.8 %	 6.5 %

Summary of Cash Flows

Cash Flows from Operating Activities:

	Nine Months Ended August 27,	August 29,
(\$ in millions)	2016	2015
Net cash provided by operating activities	\$145.9	\$153.0

Table Of Contents

Net income including non-controlling interests was \$85.2 million in the first nine months of 2016 compared to \$62.0 million in the first nine months of 2015. Depreciation and amortization expense totaled \$57.2 million in the first nine months of 2016 compared to \$55.7 million in the first nine months of 2015. Accrued compensation was a use of cash of \$6.7 million in 2016 compared to a use of cash of \$4.6 million in 2015. Other accrued expenses was a use of cash of \$4.9 million in the first nine months of 2016 compared to a source of cash of \$4.7 million in the first nine months of 2015. Other liabilities was a use of cash of \$9.9 million in the first nine months of 2016 compared to a use of cash of \$3.3 million in the first nine months of 2015.

Changes in net working capital (trade receivables, inventory and trade payables) accounted for a source of cash of \$18.0 million compared to a source of cash of \$6.5 million in 2015. The table below provides the cash flow impact due to changes in the components of net working capital:

	Nine Months Ended August August	
	27,	29,
(\$ in millions)		
	2016	2015
Trade receivables, net	\$25.6	\$ 15.9
Inventory	(6.2)	(20.0)
Trade payables	(1.4)	10.6
Total cash flow impact	\$18.0	\$ 6.5

Trade Receivables, net – Trade receivables, net was a source of cash of \$25.6 million in 2016 compared to a source of cash of \$15.9 million in 2015. The higher source of cash in 2016 compared to 2015 was due to lower revenues. The DSO were 60 days at August 27, 2016 and 59 days at August 29, 2015.

Inventory – Inventory was a use of cash of \$6.2 million and \$20.0 million in 2016 and 2015, respectively. The lower use of cash in 2016 is related to lower raw material costs and lower seasonal build of inventory in 2016, partially offset by acquisitions. Inventory days on hand were 67 days as of August 27, 2016 and 68 days as of August 29, 2015.

Trade Payables – For the first nine months of 2016 trade payables was a use of cash of \$1.4 million compared to a source of cash of \$10.6 million in 2015. The use of cash in 2016 compared to the source of cash in 2015 is primarily related to lower purchases of inventory and property, plant and equipment.

Cash Flows from Investing Activities:

**Nine Months
Ended
August 27, August 29,**

(\$ in millions)

	2016	2015
Net cash used in investing activities	\$(96.5)	\$(264.7)

Purchases of property, plant and equipment were \$49.6 million in the first nine months of 2016 as compared to \$48.6 million for the same period of 2015. The decrease in 2016 compared to 2015 was primarily related to lower capital expenditures for the Business Integration Project in 2016 offset by the building of a new plant in Indonesia and the facility upgrade and expansion project in the Construction Products segment. We acquired Advanced Adhesives for \$10.4 million in the second quarter of 2016 and Cyberbond for \$42.5 million in the third quarter of 2016. In the first quarter of 2015, we acquired Tonsan Adhesive, Inc. for \$215.9 million and Continental Products Limited for \$1.6 million.

Cash Flows from Financing Activities:

**Nine Months
Ended
August 27, August 29,**

(\$ in millions)

	2016	2015
Net cash provided by (used in) financing activities	\$(31.5)	\$ 131.7

Table Of Contents

We did not have any proceeds from long-term debt in the first nine months of 2016 compared to \$357.0 million in the first nine months of 2015. Included in the 2015 proceeds of \$357.0 million is \$300.0 million from our October 31, 2014 term loan, drawn in conjunction with the acquisition of Tonsan. Repayments of long-term debt were \$16.9 million in the first nine months of 2016 and \$207.5 million in the first nine months of 2015. Included in the \$207.5 million of repayments in 2015 were \$70.0 million from our October 31, 2014 term loan used to repay outstanding balances under the revolving credit facility. Net proceeds from notes payable were \$6.6 million in 2016 compared to net payments of \$2.1 million in 2015. Cash dividends paid were \$20.6 million in 2016 compared to \$19.2 million in 2015. Repurchases of common stock were \$11.9 million in the first nine months of 2016 compared to \$2.2 million in the first nine months of 2015. The \$11.9 million common stock repurchases in 2016 includes \$4.2 million from our 2010 share repurchase program.

Forward-Looking Statements and Risk Factors

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In this Quarterly Report on Form 10-Q, we discuss expectations regarding our future performance which include anticipated financial performance, savings from restructuring and process initiatives, global economic conditions, liquidity requirements, the impact of litigation and environmental matters, the effect of new accounting pronouncements and one-time accounting charges and credits, and similar matters. This Quarterly Report on Form 10-Q contains forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements may be identified by the use of words like "plan," "expect," "aim," "believe," "project," "anticipate," "intend," "estimate," "will," "should," "could" (including the negative or variations thereof) and other expressions that indicate future events and trends. These plans and expectations are based upon certain underlying assumptions, including those mentioned with the specific statements. Such assumptions are in turn based upon internal estimates and analyses of current market conditions and trends, our plans and strategies, economic conditions and other factors. These plans and expectations and the assumptions underlying them are necessarily subject to risks and uncertainties inherent in projecting future conditions and results. Actual results could differ materially from expectations expressed in the forward-looking statements if one or more of the underlying assumptions and expectations proves to be inaccurate or is unrealized. In addition to the factors described in this report, Part II, Item 1A. Risk Factors in this report and Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended November 28, 2015, identify some of the important factors that could cause our actual results to differ materially from those in any such forward-looking statements. This list of important factors does not include all such factors nor necessarily present them in order of importance. In order to comply with the terms of the safe harbor, we have identified these important factors which could affect our financial performance and could cause our actual results for future periods to differ materially from the anticipated results or other expectations expressed in the forward-looking statements. Additionally, the variety of products sold by us and the regions where we do business makes it difficult to determine with certainty the increases or decreases in revenues resulting from changes in the volume of products sold, currency impact, changes in geographic and product mix and selling prices. Our best estimates of these changes as well as changes in other factors have been included. References to volume changes include volume, product mix and delivery charges, combined. These factors should be considered, together with any similar risk factors or other cautionary language, which may be made elsewhere in this Quarterly Report on Form 10-Q.

We may refer to Part II, Item 1A. Risk Factors and this section of the Form 10-Q to identify risk factors related to other forward looking statements made in oral presentations, including investor conferences and/or webcasts open to the public.

This disclosure, including that under "Forward-Looking Statements and Risk Factors," and other forward-looking statements and related disclosures made by us in this report and elsewhere from time to time, represents our best judgment as of the date the information is given. We do not undertake responsibility for updating any of such information, whether as a result of new information, future events, or otherwise, except as required by law. Investors are advised, however, to consult any further public company disclosures (such as in filings with the Securities and Exchange Commission or in company press releases) on related subjects.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market Risk

We are exposed to various market risks, including changes in interest rates, foreign currency rates and prices of raw materials. Market risk is the potential loss arising from adverse changes in market rates and prices, such as interest rates, foreign currency exchange rates and cost of raw materials.

Our financial performance may be negatively affected by the unfavorable economic conditions. Recessionary economic conditions may have an adverse impact on our sales volumes, pricing levels and profitability. As domestic and international economic conditions change, trends in discretionary consumer spending also become unpredictable and subject to reductions due to uncertainties about the future. A general reduction in consumer discretionary spending due to recession in the domestic and international economies, or uncertainties regarding future economic prospects, could have a material adverse effect on our results of operations.

Table Of Contents

Interest Rate Risk

Exposure to changes in interest rates result primarily from borrowing activities used to fund operations. Committed floating rate credit facilities are used to fund a portion of operations. We believe that probable near-term changes in interest rates would not materially affect financial condition, results of operations or cash flows. The annual impact on interest expense of a one-percentage point interest rate change on the outstanding balance of our variable rate debt as of August 27, 2016 would be approximately \$2.7 million or \$0.05 per diluted share.

Foreign Exchange Risk

As a result of being a global enterprise, there is exposure to market risks from changes in foreign currency exchange rates, which may adversely affect operating results and financial condition. We enter into cross border transactions through importing and exporting raw materials, our products and other goods to and from different countries and locations. These transactions generate foreign exchange risk as they create assets, liabilities and cash flows in currencies other than the functional currency. This also applies to services provided and other cross border agreements among subsidiaries.

Approximately 58 percent of net revenue was generated outside of the United States for the first nine months of 2016. Principal foreign currency exposures relate to the Euro, British pound sterling, Canadian dollar, Chinese renminbi, Japanese yen, Australian dollar, Argentine peso, Brazilian real, Colombian peso, Mexican peso, Turkish lira, Egyptian pound, Indian rupee, Indonesian rupiah and Malaysian ringgit.

Our objective is to match our non-functional currency product costs with non-functional currency revenues to create a natural hedge and minimize foreign exchange impacts on our gross margins. In situations where these non-functional costs and revenues cannot be matched or changes in our functional currency selling price are unable to offset the impact of the foreign currency rate change, the change will impact our profitability. Based on the financial results of the first nine months of 2016, a hypothetical 1 percent change in our cost of sales due to foreign currency rate changes would have resulted in a change in net income of approximately \$3.4 million or \$0.07 per diluted share.

In addition, we strive to balance, where possible, non-functional currency denominated assets to non-functional currency denominated liabilities through normal operating and financing activities to have a natural hedge and minimize foreign exchange impacts. When deemed appropriate, we enter into derivative instruments to further mitigate foreign currency exchange risks. We do not enter into any speculative positions with regard to derivative instruments. Based on the financial results of the first nine months of 2016, and foreign currency balance sheet positions as of August 27, 2016, a hypothetical overall 10 percent change in the U.S. dollar would have resulted in a

change in net income of approximately \$5.0 million or \$0.10 per diluted share.

In addition, the translation of financial results from non U.S. dollar functional entities into U.S. dollars for purposes of reporting consolidated financial results may be adversely impacted by changes in foreign currency exchange rates. The Company does not take measures to mitigate these translation effects.

Raw Materials

The principal raw materials used to manufacture products include tackifying resins, polymers, synthetic rubbers, vinyl acetate monomer and plasticizers. Many of these raw materials are petroleum and natural gas based derivatives that are manufactured on a global basis. As such, the price of these raw materials fluctuate based upon changes in the cost of petroleum and natural gas, supply and demand and changes in foreign currency exchange rates.

We generally avoid single source supplier arrangements for raw materials. While alternate supplies of most key raw materials are available, unplanned supplier production outages may lead to strained supply-demand situations for several key raw materials such as tackifiers and base polymers.

For the nine months ended August 27, 2016, our single largest expenditure was the purchase of raw materials. Our objective is to purchase raw materials that meet both our quality standards and production needs at the lowest total cost. Most raw materials are purchased on the open market or under contracts that limit the frequency but not the magnitude of price increases. In some cases, however, the risk of raw material price changes is managed by strategic sourcing agreements which limit price increases to increases in supplier feedstock costs, while requiring decreases as feedstock costs decline. The leverage of having substitute raw materials approved for use wherever possible is used to minimize the impact of possible price increases.

Table Of Contents

Based on the financial results of the first nine months of 2016, a hypothetical 1 percent change in our raw material costs would have resulted in a change in net income of approximately \$5.6 million or \$0.11 per diluted share.

Item 4. Controls and Procedures

Controls and Procedures

We conducted an evaluation, under the supervision and with the participation of our president and chief executive officer and executive vice president, chief financial officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)) as of August 27, 2016. Our president and chief executive officer and executive vice president, chief financial officer concluded that, as a result of the material weakness in internal control over financial reporting identified and described in Item 9A of our Annual Report on Form 10-K for the fiscal year ended November 28, 2015, our disclosure controls and procedures were not effective as of August 27, 2016.

For purposes of Rule 13a-15(e), the term *disclosure controls and procedures* means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act (15 U.S.C. 78a et seq.) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its president and chief executive officer and executive vice president, chief financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Remediation Plan for Material Weakness in Internal Control over Financial Reporting

We are in the process of improving our policies and procedures relating to the recognition and measurement of business acquisitions and designing more effective controls to remediate the material weakness described in Item 9A of our Annual Report on Form 10-K for the fiscal year ended November 28, 2015. Management plans to enhance the controls related to business combinations by a) supplementing its resources, b) enhancing the design and documentation of management review controls, and c) improving the documentation of internal control procedures.

We believe these measures will strengthen our internal controls over financial reporting and will prevent a reoccurrence of the material weakness described in Item 9A of our Annual Report on Form 10-K for the fiscal year ended November 28, 2015.

Changes in Internal Control over Financial Reporting

Other than the actions taken under *Remediation Plan for Material Weakness in Internal Control over Financial Reporting* discussed above, there were no changes in our internal control over financial reporting during our most recently completed fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Environmental Matters

From time to time, we become aware of compliance matters relating to, or receive notices from, federal, state or local entities regarding possible or alleged violations of environmental, health or safety laws and regulations. We review the circumstances of each individual site, considering the number of parties involved, the level of potential liability or our contribution relative to the other parties, the nature and magnitude of the hazardous substances involved, the method and extent of remediation, the estimated legal and consulting expense with respect to each site and the time period over which any costs would likely be incurred. Also, from time to time, we are identified as a potentially responsible party (PRP) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and/or similar state laws that impose liability for costs relating to the clean up of contamination resulting from past spills, disposal or other release of hazardous substances. We are also subject to similar laws in some of the countries where current and former facilities are located. Our environmental, health and safety department monitors compliance with applicable laws on a global basis. To the extent we can reasonably estimate the amount of our probable liabilities for environmental matters, we establish a financial provision.

Table Of Contents

Currently we are involved in various environmental investigations, clean up activities and administrative proceedings and lawsuits. In particular, we are currently deemed a PRP in conjunction with numerous other parties, in a number of government enforcement actions associated with landfills and/or hazardous waste sites. As a PRP, we may be required to pay a share of the costs of investigation and clean up of these sites. In addition, we are engaged in environmental remediation and monitoring efforts at a number of current and former operating facilities. While uncertainties exist with respect to the amounts and timing of the ultimate environmental liabilities, based on currently available information, we have concluded that these matters, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow. However, adverse developments and/or periodic settlements could negatively impact the results of operations or cash flows in one or more future periods.

Other Legal Proceedings

From time to time and in the ordinary course of business, we are a party to, or a target of, lawsuits, claims, investigations and proceedings, including product liability, personal injury, contract, patent and intellectual property, environmental, health and safety, tax and employment matters. While we are unable to predict the outcome of these matters, we have concluded, based upon currently available information, that the ultimate resolution of any pending matter, individually or in the aggregate, including the asbestos litigation described in the following paragraphs, will not have a material adverse effect on our results of operations, financial condition or cash flow.

We have been named as a defendant in lawsuits in which plaintiffs have alleged injury due to products containing asbestos manufactured more than 30 years ago. The plaintiffs generally bring these lawsuits against multiple defendants and seek damages (both actual and punitive) in very large amounts. In many cases, plaintiffs are unable to demonstrate that they have suffered any compensable injuries or that the injuries suffered were the result of exposure to products manufactured by us. We are typically dismissed as a defendant in such cases without payment. If the plaintiff presents evidence indicating that compensable injury occurred as a result of exposure to our products, the case is generally settled for an amount that reflects the seriousness of the injury, the length, intensity and character of exposure to products containing asbestos, the number and solvency of other defendants in the case, and the jurisdiction in which the case has been brought.

A significant portion of the defense costs and settlements in asbestos-related litigation is paid by third parties, including indemnification pursuant to the provisions of a 1976 agreement under which we acquired a business from a third party. Currently, this third party is defending and paying settlement amounts, under a reservation of rights, in most of the asbestos cases tendered to the third party.

In addition to the indemnification arrangements with third parties, we have insurance policies that generally provide coverage for asbestos liabilities (including defense costs). Historically, insurers have paid a significant portion of our defense costs and settlements in asbestos-related litigation. However, certain of our insurers are insolvent. We have

entered into cost-sharing agreements with our insurers that provide for the allocation of defense costs and settlements and judgments in asbestos-related lawsuits. These agreements require, among other things, that we fund a share of settlements and judgments allocable to years in which the responsible insurer is insolvent.

A summary of the number of and settlement amounts for asbestos-related lawsuits and claims is as follows:

(\$ in millions)	Nine Months		3 Years
	Ended	Ended	Ended
	August	August	November
	27,	29,	28, 2015
	2016	2015	
Lawsuits and claims settled	9	6	25
Settlement amounts	\$1.0	\$ 0.5	\$ 2.1
Insurance payments received or expected to be received	\$0.6	\$ 0.4	\$ 1.6

We do not believe that it would be meaningful to disclose the aggregate number of asbestos-related lawsuits filed against us because relatively few of these lawsuits are known to involve exposure to asbestos-containing products that we manufactured. Rather, we believe it is more meaningful to disclose the number of lawsuits that are settled and result in a payment to the plaintiff. To the extent we can reasonably estimate the amount of our probable liabilities for pending asbestos-related claims, we establish a financial provision and a corresponding receivable for insurance recoveries.

Table Of Contents

Based on currently available information, we have concluded that the resolution of any pending matter, including asbestos-related litigation, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial condition or cash flow. However, adverse developments and/or periodic settlements could negatively impact the results of operations or cash flows in one or more future periods.

Item 1A. Risk Factors

This Form 10-Q contains forward-looking statements concerning our future programs, products, expenses, revenue, liquidity and cash needs as well as our plans and strategies. These forward-looking statements are based on current expectations and we assume no obligation to update this information. Numerous factors could cause actual results to differ significantly from the results described in these forward-looking statements, including the risk factors identified under Part I, Item 1A. Risk Factors contained in our Annual Report on Form 10-K for the fiscal year ended November 28, 2015. There have been no material changes in the risk factors disclosed by us under Part I, Item 1A. Risk Factors contained in the Annual Report on Form 10-K for the fiscal year ended November 28, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

Information on our purchases of equity securities during the third quarter follows:

Period	(a)	(b)	(c)	(d)
	Total	Average	Total	Maximum
	Number of	Price	Number of	Approximate
	Shares	Paid	Shares	Dollar
	Purchased¹	per	Purchased	Value of

July 31, 2016 - August 27, 2016	-	\$ -	-	\$ 40.6

¹ The total number of shares purchased includes 1,106 shares withheld to satisfy the employees' withholding taxes upon vesting of restricted stock.

Repurchases of common stock are made to support our stock-based employee compensation plans and for other corporate purposes. Upon vesting of restricted stock awarded to employees, shares are withheld to cover the employees' minimum withholding taxes.

In 2010, the Board of Directors authorized a share repurchase program of up to \$100.0 million of our outstanding common shares. Under the program, we are authorized to repurchase shares for cash on the open market, from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases is dependent on price, market conditions and applicable regulatory requirements. Upon repurchase of the shares, we reduced our common stock for the par value of the shares with the excess being applied against additional paid-in capital.
