#### PART I

ITEM 1. BUSINESS

#### **SUMMARY**

Unless the context otherwise requires, the term Company as used herein refers to Trans-Lux Corporation and its subsidiaries. The Company is a leading designer and manufacturer of digital signage display solutions. The essential elements of these systems are the real-time, programmable digital displays the Company designs, manufactures, distributes and services. These display systems utilize LED (light emitting diode) technologies. Designed to meet the digital signage solutions for any size venue s indoor and outdoor needs, these display products include full color text, graphic and video displays for stock and commodity exchanges, financial institutions, college and high school sports stadiums, schools, casinos, convention centers, corporate applications, government applications, theatres, retail sites, airports, billboard sites and numerous other applications. In 2010, the Company started a new business opportunity in the LED lighting market with energy-saving lighting solutions that feature a comprehensive offering of the latest LED lighting technologies that provide facilities and public infrastructure with green lighting solutions that emit less heat, save energy and enable creative designs.

#### DIGITAL DISPLAY PRODUCTS

The Company s new generation of LED large screen systems features the latest digital display technologies and capabilities. The Company s product line of high performance state-of-the art digital displays and controllers are used to communicate messages and information in virtually any configuration in a variety of indoor and outdoor applications. Most of the Company s digital display products include hardware components and sophisticated software. In both the indoor and outdoor markets in which the Company serves, the Company adapts basic product types and technologies for specific use in various niche market applications. The Company also operates a direct service network throughout the United States and parts of Canada, which performs on-site project management, installation, service and maintenance for its customers and others.

The Company employs a modular engineering design strategy, allowing basic building blocks of electronic modules to be easily combined and configured in order to meet the broad application requirements of the various industries it serves. This approach ensures product flexibility, reliability, ease of service and minimum spare parts requirements.

The Company s Digital display market is comprised of two distinct segments: the Digital display sales division and the Digital display lease and maintenance division. Digital displays are used by financial institutions, including brokerage firms, banks, energy companies, insurance companies and mutual fund companies; sports stadiums and venues; educational institutions; outdoor advertising companies; corporate and government communication centers; retail outlets; casinos, race tracks and other gaming establishments; airports, train stations, bus terminals and other transportation facilities; movie theatres; health maintenance organizations and in various other applications.

*Digital Display Sales Division:* The Digital display sales market is currently dominated by five categories of users: financial, government/private sector, gaming, scoreboards and outdoor advertising.

The financial sector, which includes trading floors, exchanges, brokerage firms, banks, mutual fund companies and energy companies, has long been a user of electronic information displays due to the need for real-time dissemination of data. The major stock and commodity exchanges depend on reliable information displays to post stock and commodity prices, trading volumes, interest rates and other financial data. Brokerage firms use electronic ticker displays for both customers and brokers; they have also installed other larger displays to post major headline news events in their brokerage offices to enable their sales force to stay up-to-date on events affecting general market conditions and specific stocks. Banks and other financial institutions also use information displays to advertise product offerings to consumers. The financial sector has a product line of advanced last sale price displays, full color LED tickers and graphic/video displays.

The government/private sector includes applications found in major corporations, public utilities and government agencies for the display of real-time, critical data in command/control centers, data centers, help desks, visitor centers, lobbies, inbound/outbound telemarketing centers, retail applications to attract customers and for employee communications. Digital displays have found acceptance in applications for the healthcare industry such as outpatient pharmacies, military hospitals and HMOs to automatically post patient names when prescriptions are ready for pick up. Theatres use digital displays to post current box office and ticket information, directional information and to promote concession sales. Information displays are consistently used in airports, bus terminals and train stations to post arrival and departure times and gate and baggage claim information, all of which help to guide passengers through these facilities.

The gaming sector includes casinos, Indian gaming establishments and racetracks. These establishments generally use large information displays to post odds for race and sporting events and to display timely information such as results, track conditions, jockey weights, scratches and real-time video. Casinos and racetracks also use digital displays throughout their facilities to advertise to and attract gaming patrons.

The scoreboard sector includes digital displays used by high schools, college sports stadiums, sports venues, municipal sports playing fields, entertainment facilities and recreational facilities to disseminate pertinent game information and advertising to the audience. This sector generally sells through dealers and distributors.

The outdoor advertising sector includes digital displays used by automobile dealerships, churches, military installations, gas stations, highway departments, entertainment facilities and outdoor advertisers, such as digital billboards, attempting to capture the attention of passers-by.

Equipment for the digital display sales segment generally has a lead-time of 30 to 120 days depending on the size and type of equipment ordered and material availability.

*Digital Display Lease and Maintenance Division:* The Digital display lease and maintenance division leases and performs maintenance on digital displays across all of the sectors under agreement terms ranging from 30 days to 10 years.

*Sales Order Backlog (excluding leases):* The amount of sales order backlog at December 31, 2013 and 2012 was approximately \$4.2 million and \$2.2 million, respectively. The December 31, 2013 backlog is expected to be recognized as sales in 2014. These amounts include only the sale of products; they do not include new lease orders or renewals of existing lease agreements that may be presently in-house.

#### ENGINEERING AND PRODUCT DEVELOPMENT

The Company s ability to compete and operate successfully depends on its ability to anticipate and respond to the changing technological and product needs of its customers, among other factors. For this reason, the Company

continually develops enhancements to its existing product lines and examines and tests new display technologies.

In 2010, the Company introduced TLVision<sup>TM</sup>, our new generation of LED Large Screen Systems that feature the latest digital display technologies and capabilities, available in various pitch design, including the industry s first 3mm LED display solution. This new line of products consists of full color video products that can be used in a multitude of applications. These applications range from posting alphanumeric data to the displaying of full HD video. The pixel pitches of the products range from 3mm for very close distance viewing and up to 127mm for very long distance viewing. The Company also recently expanded its line of scoreboard solutions using its TLVision<sup>TM</sup> technology and improved hand-held, simple to operate remotes and wireless control devices.

As part of its ongoing development efforts, the Company seeks to package certain products for specific market segments as well as continually tracking emerging technologies that can enhance its products. Full color, live video and digital input technologies continue to be enhanced.

The Company maintains a staff of 6 people who are responsible for product development and support. The engineering, product enhancement and development efforts are supplemented by outside independent engineering consulting organizations, as required. Engineering expense and product enhancement and development costs amounted to \$730,000 and \$693,000 in 2013 and 2012, respectively.

#### MARKETING AND DISTRIBUTION

In North America, the Company markets its digital display products in the United States and Canada using a combination of distribution channels, including 8 direct sales representatives, 1 telemarketer and a network of independent dealers and distributors. By working with software vendors and using the internet to expand the quality and quantity of multimedia content that can be delivered to our digital displays, we are able to offer customers relevant, timely information, content management software and display hardware in the form of turnkey display communications packages.

The Company employs a number of different marketing techniques to attract new customers, including direct marketing efforts by its sales force to known and potential users of information displays; internet marketing; advertising in industry publications; and exhibiting at approximately 10 domestic and international trade shows annually.

Internationally, the Company uses a combination of internal sales people and independent distributors to market its products outside the United States. The Company has existing relationships with approximately 20 independent distributors worldwide covering Europe, the Middle East, South America, Africa, the Far East and Australia. Foreign revenues represented less than 10% of total revenues for the years ended December 31, 2013 and 2012, respectively.

Headquartered in New York, New York, the Company has sales and service offices in Des Moines, Iowa, Cartersville, Georgia and Burlington, Ontario, as well as approximately 13 satellite offices in the United States and Canada.

The Company s revenues in 2013 and 2012 did not include any single customer that accounted for more than 10% of total revenues.

#### MANUFACTURING AND OPERATIONS

The Company s production facilities are located in Des Moines, Iowa. The production facilities consist principally of the manufacturing, assembly and testing of digital display units and related components. The Company performs most subassembly and most final assembly of its products.

All product lines are design engineered by the Company and controlled throughout the manufacturing process. The Company has the ability to produce very large sheet metal fabrications, cable assemblies and surface mount and through-hole designed assemblies. Some of the subassembly processes are outsourced. The Company s production of many of the subassemblies and final assemblies gives the Company the control needed for on-time delivery to its customers.

The Company has the ability to rapidly modify its product lines. The Company s displays are designed with flexibility in mind, enabling the Company to customize its displays to meet different applications with a minimum amount of lead-time. The Company designs certain of its materials to match components furnished by suppliers. If such suppliers were unable to provide the Company with those components, the Company would have to contract with other suppliers to obtain replacement sources. Such replacement might result in engineering design changes, as well as delays in obtaining such replacement components. The Company believes it maintains suitable inventory and has contracts providing for delivery of sufficient quantities of such components to meet its needs. The Company also believes that there are presently other qualified vendors of these components. Other than the LEDs and LED modules which are manufactured by foreign sources, the Company does not acquire significant amounts of components directly from foreign suppliers. The Company s products are third-party certified as complying with applicable safety, electromagnetic emissions and susceptibility requirements worldwide.

#### SERVICE AND SUPPORT

The Company emphasizes the quality and reliability of its products and the ability of its field service personnel and third-party agents to provide timely and expert service to the Company s equipment on lease and maintenance bases and other types of customer-owned equipment. The Company believes that the quality and timeliness of its on-site service personnel are important components for the Company s ongoing and future success. The Company provides turnkey installation and support for the products it leases and sells in the United States and Canada. The Company provides training to end-users and provides ongoing support to users who have questions regarding operating procedures, equipment problems or other issues. The Company provides installation and service to those who purchase and lease equipment. Additionally, the Company s dealers and distributors offer support for the products they sell in the market segments they cover.

Personnel based in regional and satellite service locations throughout the United States and Canada provide high quality and timely on-site service for the installed equipment on lease and maintenance bases and other types of customer-owned equipment. Purchasers or lessees of the Company s larger products, such as financial exchanges, casinos and sports stadiums, often retain the Company to provide on-site service through the deployment of a service technician who is on-site daily for scheduled events. The Company operates its National Technical Services and Repair Center from its Des Moines, Iowa facility. Equipment repairs are performed in Des Moines and service technicians are dispatched nationwide from the Des Moines facility. The Company s field service division is augmented by various service companies in the United States, Canada and overseas. From time to time, the Company uses various third-party service agents to install, service and/or assist in the service of certain displays for reasons that include geographic area, size and height of displays.

#### **COMPETITION**

The Company s availability of short and long-term leases to customers and its nationwide sales, service and installation capabilities are major competitive advantages in the digital display business. The Company believes that it is the largest supplier of large-scale stock, commodity, sports and race book gaming digital displays in the United States, as well as one of the larger digital display and service organizations in the country.

The Company competes with a number of competitors, both larger and smaller than itself, with products based on different forms of technology. There are several competitors whose current products utilize similar technology to the Company s and who possess the resources necessary to develop competitive and more sophisticated products in the future.

#### LED LIGHTING

In 2010, the Company started a new business opportunity in the LED lighting market with energy-saving lighting solutions that features a comprehensive offering of the latest LED lighting technologies that provide facilities and public infrastructure with green lighting solutions that emit less heat, save energy and enable creative designs.

#### **DISCONTINUED OPERATIONS**

The Company owned an income-producing real estate property located in Santa Fe, New Mexico, which was sold in 2013 because it did not directly relate to our core business. The Company also owned land in Silver City, New Mexico, which was sold in 2012 because it did not directly relate to our core business.

#### **INTELLECTUAL PROPERTY**

The Company holds a number of trademarks for its products and considers such trademarks important to its business.

#### **EMPLOYEES**

The Company had approximately 89 employees as of April 30, 2014. Approximately 29% of the employees are unionized. The Company believes its employee relations are good.

#### ITEM 1A. RISK FACTORS

#### THERE IS SUBSTANTIAL DOUBT ABOUT OUR ABILITY TO CONTINUE AS A

Our independent registered public accounting firm has issued an opinion on our Consolidated Financial Statements that states that the Consolidated Financial Statements were prepared assuming we will continue as a going concern and further states that the continuing losses and uncertainty regarding the ability to make the required minimum funding contributions to the pension plan, as well as the sinking fund payments on the Debentures and the principal and interest payments on the Notes and the Debentures, raises substantial doubt about our ability to continue as a going concern. As a result, if the Company is unable to (i) obtain additional liquidity for working capital, (ii) make the required minimum funding contributions to the pension plan and/or (iii) make the required principal and interest payments on the Notes and Debentures, there would be a significant adverse impact on the financial position and the operating results of the Company.

#### WE HAVE EXPERIENCED OPERATING LOSSES FOR THE PAST SEVERAL YEARS, AND THERE CAN BE NO ASSURANCE THAT WE WILL BE ABLE TO INCREASE OUR REVENUE SUFFICIENTLY TO GENERATE THE CASH REQUIRED TO FUND OUR CURRENT OPERATIONS

The Company has incurred operating losses for the past several years. During the years ended December 31, 2013 and 2012, the Company incurred losses from continuing operations of \$2.5 million and \$1.2 million, respectively. The year ended December 31, 2013 includes a \$1.1 million gain on a warrant valuation adjustment. 2012 includes a \$4.0 million gain on a warrant valuation adjustment, a \$0.4 million additional restructuring charge and a \$0.1 million gain on debt extinguishment. The Company is dependent upon future operating performance to generate sufficient cash flows in order to continue to run its businesses. Future operating performance is dependent on general economic conditions, as well as financial, competitive and other factors beyond our control. We have experienced a decline in our sales and lease and maintenance bases for the past several years. There can be no assurance that we will be able to increase our revenue sufficiently to generate the cash required to fund our current operations.

#### THE CURRENT GLOBAL ECONOMIC CRISIS HAS NEGATIVELY IMPACTED OUR BUSINESS AND HAS IMPAIRED OUR ABILITY TO ACCESS CREDIT MARKETS AND FINANCE OUR OPERATIONS, WHICH MAY CONTINUE TO ADVERSELY AFFECT OUR BUSINESS

The continuing global economic crisis has adversely affected our customers, suppliers and other businesses such as ours. As a result, it has had a variety of negative effects on the Company such as reduction in revenues, increased costs, lower gross margin percentages, increased allowances for uncollectible accounts receivable and/or write-offs of accounts receivable. This economic crisis has also impaired our ability to access credit markets and finance our operations and could otherwise have material adverse effects on our business, results of operations, financial condition and cash flows.

## NON-PAYMENT OF PRINCIPAL AND INTEREST ON OUTSTANDING NOTES AND DEBENTURES HAS RESULTED IN EVENTS OF DEFAULT AND MAY CONTINUE TO NEGATIVELY AFFECT OUR BALANCE SHEET

The Company has \$1.1 million of 8<sup>1</sup>/<sub>4</sub>% Limited convertible senior subordinated notes due 2012 (the Notes ) which are no longer convertible into common shares and which matured as of March 1, 2012; interest was payable semi-annually. As part of the Company s restructuring plan, the Company offered the holders of the Notes the right to receive \$225, without accrued interest, plus 10 shares of the Company s Common Stock for each \$1,000 Note exchanged. The offer expired on October 31, 2011, but the Company continues to consider further exchanges of the Notes on the same terms as previously offered. \$9.0 million of the original \$10.1 million of principal amount of the Notes have been exchanged, leaving \$1.1 million outstanding. Based on the payment schedule prior to the offer to exchange, the Company had not remitted the March 1, 2010 and 2011 and September 1, 2010 and 2011 semi-annual interest payments of \$418,000 each and the March 1, 2012 semi-annual interest and principal payment of \$1.4 million to the trustee. The non-payments constituted an event of default under the Indenture governing the Notes. The trustee, by notice to the Company, or the holders of 25% of the principal amount of the Notes outstanding, by notice to the Company and the trustee, may declare the outstanding principal plus interest due and payable immediately. During the continuation of any event which, with notice or lapse of time or both, would constitute a default under any agreement under which Senior Indebtedness is issued, if the effect of such default is to cause or permit the holder of Senior Indebtedness to become due prior to its stated maturity, no payment of principal, premium or interest shall be made on the Notes unless and until such default shall have been remedied, if written notice of such default has been given to the trustee by the Company or the holder of Senior Indebtedness. If the holder of Senior Indebtedness accelerates the due date at any time, then no payment may be made until the default is cured or waived. The Notes are subordinate to all Senior Indebtedness of the Company. At December 31, 2013, the total amount outstanding under the Notes is classified as Current portion of long-term debt in the Consolidated Balance Sheet.

The Company has \$334,000 of 91/2% Subordinated debentures due 2012 (the Debentures ) which matured on December 1, 2012; interest was payable semi-annually. As part of the Company's restructuring plan, the Company offered the holders of the Debentures the right to receive \$100, without accrued interest, for each \$1,000 Debenture exchanged. The offer expired on October 31, 2011, but the Company continues to consider further exchanges of the Debentures on the same terms as previously offered. \$723,000 of the original \$1.1 million principal amount of the Debentures have been exchanged, leaving \$334,000 outstanding. Based on the payment schedule prior to the offer to exchange, the Company had not remitted the December 1, 2009, 2010 and 2011 sinking fund payments of \$106,000 each, the June 1, 2010, 2011 and 2012 and the December 1, 2010 and 2011 semi-annual interest payments of \$50,000 each and the December 1, 2012 semi-annual interest and principal payment of \$790,000 to the trustee. The non-payments constituted an event of default under the Indenture governing the Debentures. The trustee, by notice to the Company, or the holders of 25% of the principal amount of the Debentures outstanding, by notice to the Company and the trustee, may declare the outstanding principal plus interest due and payable immediately. During the continuation of any event which, with notice or lapse of time or both, would constitute a default under any agreement under which Senior Indebtedness is issued, if the effect of such default is to cause or permit the holder of Senior Indebtedness to become due prior to its stated maturity, no payment (including any required sinking fund payments) of principal, premium or interest shall be made on the Debentures unless and until such default shall have been remedied, if written notice of such default has been given to the trustee by the Company or the holder of Senior Indebtedness. The failure to make the sinking fund and interest payments are events of default under the Credit Agreement since it involves indebtedness over \$500,000. The Debentures are subordinate to all Senior Indebtedness of the Company. At December 31, 2013, the total amount outstanding under the Debentures is classified as Current portion of long-term debt in the Consolidated Balance Sheet.

#### WE HAVE RECEIVED WAIVERS, SUBJECT TO CERTAIN CONDITIONS, OF THE 2009, 2010 AND 2012 MINIMUM FUNDING STANDARDS FOR OUR DEFINED BENEFIT PLAN, WHICH IF WE FAIL TO FULFILL THE REQUIRED CONDITIONS FOR, MAY RESULT IN THE TERMINATION OF THE PLAN OR REQUIRE US TO MAKE THE UNPAID CONTRIBUTIONS

In March 2010, 2011 and 2013, the Company submitted to the Internal Revenue Service requests for waivers of the 2009, 2010 and 2012 minimum funding standards for its defined benefit plan. The waiver requests were submitted as a result of the economic climate and the business hardship that the Company experienced. The 2009, 2010 and 2012 plan year waivers have been approved and granted subject to certain conditions, and deferred payment of \$285,000, \$559,000 and \$871,000 of the minimum funding standard for the 2009, 2010 and 2012 plan years, respectively. If the Company does not fulfill the conditions of the waivers, the Pension Benefit Guaranty Corporation and the Internal Revenue Service have various enforcement remedies that can be implemented to protect the participant s benefits, such as termination of the plan or a requirement that the Company make the unpaid contributions. In 2013, the Company made \$669,000 of contributions to the plan. At this time, the Company is expecting to make its required contributions for 2014 and has already made \$218,000 of such contributions; however there is no assurance that we will be able to make any or all of such remaining payments. The Pension Benefit Guaranty Corporation has placed a lien on the Company s assets in respect of amounts owed under the plan.

# THE COMPANY HAS SIGNIFICANT LONG-TERM DEBT, WHICH COULD IMPAIR OUR FINANCIAL CONDITION

As of December 31, 2013, the Company s total long-term debt was \$2.9 million. Of this amount, \$2.5 million represented the current portion. We expect we may incur indebtedness in connection with new rental leases and working capital requirements. Our ability to satisfy our obligations will be dependent upon our future performance, which is subject to prevailing economic conditions and financial, business and other factors, including factors beyond our control. There can be no assurance that our operating cash flows will be sufficient to meet our long-term debt service requirements or that we will be able to refinance indebtedness at maturity. See Management s Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources.

## <u>COMPETITORS MAY POSSESS SUPERIOR RESOURCES AND DELIVER MORE MARKETABLE</u> <u>PRODUCTS, WHICH WOULD ADVERSELY AFFECT OUR OPERATION MARGINS</u>

Our digital displays compete with a number of competitors, both larger and smaller than us, and with products based on different forms of technology. In addition, there are several competitors whose current products utilize similar technology and who possess the resources to develop competitive and more sophisticated products in the future. Our success is, to some extent, dependent upon our ability to anticipate technological changes in the industry and to successfully identify, obtain, develop and market new products that satisfy evolving industry requirements. There can be no assurance that competitors will not market new products which may have perceived advantages over our products or which, because of pricing strategies, render the products currently sold by the Company less marketable or would otherwise adversely affect our operating margins.

#### OUR SUCCESS IS DEPENDENT UPON OUR ABILITY TO OBTAIN THE RENEWAL OF EXISTING LEASES OR ENTER INTO NEW LEASES AS OUR CURRENT LEASES EXPIRE, WHICH MAY NOT BE FEASABLE. THE INABILITY TO RENEW OR REPLACE OUR LEASES WOULD NEGATIVELY AFFECT OUR OPERATIONS

We derive a substantial percentage of our revenues from the leasing of our digital displays, generally pursuant to leases that have an average term of one to five years. Consequently, our future success is, at a minimum, dependent on our ability to obtain the renewal of existing leases or to enter into new leases as existing leases expire. We also derive a significant percentage of our revenues from maintenance agreements relating to our digital display products. The average term of such agreements is generally one to five years. A portion of the maintenance agreements are cancelable upon 30 days notice. There can be no assurance that we will be successful in obtaining the renewal of existing leases or maintenance agreements, obtaining replacement leases or realizing the value of assets currently

OUR SUCCESS IS DEPENDENT UPON OUR ABILITY TO OBTAIN THE RENEWAL OF EXISTING LEASES OR

under leases that are not renewed. See Management s Discussion and Analysis of Financial Condition and Results of Operations Results of Operations.

#### WE ARE DEPENDENT ON OUR PRESIDENT AND CHIEF EXECUTIVE OFFICER AND OTHER KEY PERSONNEL

We believe that our President and Chief Executive Officer, Jean-Marc Allain, plays a significant role in the success of the Company and the loss of his services could have an adverse effect on the Company. There can be no assurance that the Company would be able to find a suitable replacement for Mr. Allain. The Company has an employment agreement with Mr. Allain that expires in 2015. The Company believes that in addition to Mr. Allain, there is a core group of executives that also plays a significant role in the success of the Company.

### OUR INTERNATIONAL OPERATIONS SUBJECT US TO POTENTIAL FLUCTUATIONS IN EXCHANGE RATES BETWEEN THE UNITED STATES DOLLAR AND FOREIGN CURRENCIES, AS WELL AS INTERNATIONAL LEGAL REQUIREMENTS, WHICH COULD IMPACT OUR PROFITABILITY

Our financial condition, operating results and future growth could be significantly impacted by risks associated with our international activities, including specifically changes in the value of the U.S. dollar relative to foreign currencies and international tax rules. Because a significant portion of the Company s business is done in Canada, fluctuations in the exchange rate between the U.S. dollar and the Canadian dollar could seriously impact our manufacturing and other costs, as well as overall profitability. The risks to our business related to fluctuations in currency exchange rates is further magnified by the current volatility in the currency markets that are characteristic of financial markets, and currency markets in particular.

Compliance with U.S. and foreign laws and regulations that apply to our international operations, including import and export requirements, anti-corruption laws, including the Foreign Corrupt Practices Act, tax laws (including U.S. taxes on foreign subsidiaries), foreign exchange controls, anti-money laundering and cash repatriation restrictions, data privacy requirements, labor laws and anti-competition regulations, increases the costs of doing business in foreign jurisdictions, and may subject us to additional costs which may arise in the future as a result of changes in these laws and regulations or in their interpretation. We have not implemented formal policies and procedures designed to ensure compliance with all of these laws and regulations. Any such violations could individually or in the aggregate materially adversely affect our reputation, financial condition or operating results.

## OUR RELIANCE UPON THIRD PARTY MANUFACTURERS IN CHINA COULD SUBJECT US TO POLITICAL AND LEGAL RISKS BEYOND OUR CONTROL

Many components of our products are produced in China by third-party manufacturers. Our reliance on third-party Chinese manufacturers exposes us to risks that are not in our control, such as unanticipated cost increases or negative fluctuations in currency, which could negatively impact our results of operations and working capital. Any termination of or significant disruption in our relationship with our Chinese suppliers may prevent us from filling customer orders in a timely manner. Given the state of the Chinese political system, we cannot guaranty that our agreements with our Chinese suppliers will remain enforceable pursuant to Chinese law. Furthermore, we cannot guaranty that all rights to payment or performance under our agreements with our Chinese manufacturing partners will be enforceable, and that all debts owing to us, whether in the form of cash or product, will be collectable. While we do not envision any adverse change to our international operations or suppliers, especially given the gradual move towards global integration by the Chinese government and financial markets, adverse changes to these operations, as a result of political, governmental, regulatory, economic, exchange rate, labor, logistical or other factors, could have a material adverse effect on our future operating results.

#### SUPPLIERS MAY BE UNABLE OR UNWILLING TO FURNISH US WITH REQUIRED COMPONENTS, WHICH MAY DELAY OR REDUCE OUR PRODUCT SHIPMENTS AND NEGATIVELY AFFECT OUR BUSINESS

We design certain of our products to match components furnished by suppliers. If such suppliers were unable or unwilling to provide us with those components, we would have to contract with other suppliers to obtain replacement sources. In particular, we purchase most of the LEDs and LED module blocks used in our digital displays and lighting from three main suppliers. We do not have long-term supply contracts with these suppliers. A change in suppliers of either LED module blocks or certain other components may result in engineering design changes, as well as delays in obtaining such replacement components. We believe that there are presently other qualified vendors of these components. Our inability to obtain sufficient quantities of certain components as required, or to develop alternative sources at acceptable prices and within a reasonable time, could result in delays or reductions in product shipments that could have a materially adverse effect on our business and results of operations.

#### EFFECT OF CERTAIN ANTI-TAKEOVER PROVISIONS AND CONTROL BY EXISTING STOCKHOLDERS

Our Amended and Restated Certificate of Incorporation contains certain provisions that could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, control of us. Such provisions could limit the price that certain investors might be willing to pay in the future for shares of our Common Stock, thus making it less likely that a stockholder will receive a premium on any sale of shares of our Common Stock. Our Board of Directors is divided into three classes, each of which serves for a staggered three-year term, making it more difficult for a third party to gain control of our Board.

Additionally, we are authorized to issue 500,000 shares of Preferred Stock, none of which are outstanding as of December 31, 2013. The Preferred Stock contains such rights, preferences, privileges and restrictions as may be fixed by our Board of Directors, which may adversely affect the voting power or other rights of the holders of Common Stock or delay, defer or prevent a change in control of the Company, or discourage bids for the Common Stock at a premium over its market price or otherwise adversely affect the market price of the Common Stock.

As of December 31, 2013, 8 stockholders who are executive officers and/or directors of the Company beneficially own approximately 4.3% of the Common Stock and 1 stockholder who is neither an officer nor director of the Company beneficially owns approximately 40.6% of the Common Stock.

#### LIMITED TRADING VOLUME AND VOLATILITY OF THE PRICE OF OUR COMMON STOCK

Our Common Stock is not widely held and the volume of trading has been relatively low and sporadic. Accordingly, the Common Stock is subject to increased price volatility and reduced liquidity. There can be no assurance that a more active trading market for the Common Stock will develop or be sustained if it does develop. The limited public float of our Common Stock could cause the market price for the Common Stock to fluctuate substantially. In addition, stock markets have experienced wide price and volume fluctuations in recent periods and these fluctuations often have been unrelated to the operating performance of the specific companies affected. Any of these factors could adversely affect the market price of the Common Stock.

#### ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

#### ITEM 2. PROPERTIES

The Company s headquarters and principal executive offices are located in a leased facility at 950 Third Avenue, Suite 2804, New York, New York, which is used for administration. The Company owns a facility in Des Moines, Iowa where its manufacturing operations are maintained.

The Company leases two other premises throughout North America for use as sales, service and/or administrative operations. The aggregate rent expense was \$346,000 and \$327,000 for the years ended December 31, 2013 and 2012, respectively.

#### ITEM 3. LEGAL PROCEEDINGS

The Company is subject to legal proceedings and claims which arise in the ordinary course of its business and/or which are covered by insurance. The Company has accrued reserves individually and in the aggregate for such legal proceedings. Should actual litigation results differ from the Company s estimates, revisions to increase or decrease the accrued reserves may be required. Our former outside legal counsel had brought a claim against us for \$593,000 plus interest, which we have settled subsequent to the end of the year for \$600,000. The liability is included in Accrued liabilities on the Consolidated Balance Sheet at December 31, 2013. Of the settlement, \$275,000 was paid in April 2014, with the remainder due in monthly installments over the next 2 years.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

#### PART II

# ITEM 5. MARKET FOR THE REGISTRANT S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Since November 17, 2010, the Company s Common Stock has traded on the OTCQB under the symbol TNLX.Sales price information is set forth in Item 5(d) below.

(b) The Company had approximately 205 holders of record of its Common Stock as of May 12, 2014.

		٦		
3	l	ć	2	
			ļ	

(c) The Board of Directors did not declare any cash dividends for Common Stock during 2013. Management and the Board of Directors will continue to review whether payment of quarterly cash dividends will be made.

(d) The following table sets forth the range of Common Stock prices on the OTCQB, adjusted for the reverse and forward stock splits effected in 2013.

	2013		2	012
	High	Low	High	Low
First Quarter	\$8.00	\$5.25	\$21.25	\$11.25
Second Quarter	\$9.00	\$3.75	\$17.50	\$ 8.75
Third Quarter	\$6.75	\$3.25	\$ 8.75	\$ 6.00
Fourth Quarter	\$8.55	\$4.56	\$11.25	\$ 4.25

(e) The Company did not purchase any of its equity securities during any month of the fourth fiscal quarter of 2013.

#### ITEM 6. SELECTED FINANCIAL DATA

(a) Not applicable.

(b) Not applicable.

# ITEM 7. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Overview

Trans-Lux is a leading supplier of LED technology for high resolution video displays and lighting applications. The essential elements of these systems are the real-time, programmable digital displays and lighting fixtures that we design, manufacture, distribute and service. Designed to meet the digital signage solutions for any size venue s indoor and outdoor needs, these displays are used primarily in applications for the financial, banking, gaming, corporate, advertising, transportation, entertainment and sports markets. The Company s LED lighting fixtures offer energy-saving lighting solutions that feature a comprehensive offering of the latest LED lighting technologies that provide facilities and public infrastructure with green lighting solutions that emit less heat, save energy and enable creative designs. The Company operates in two reportable segments: Digital display sales and Digital display lease and maintenance.

The Digital display sales segment includes worldwide revenues and related expenses from the sales of both indoor and outdoor digital display signage and LED lighting solutions. This segment includes the financial, government/private, gaming, scoreboards and outdoor advertising markets. The Digital display lease and maintenance segment includes worldwide revenues and related expenses from the lease and maintenance of both indoor and outdoor digital display signage. This segment includes the lease and maintenance of digital display signage across all markets.

#### **Going Concern**

Our revenues have declined and we do not have adequate liquidity, including access to the debt and equity capital markets, to operate our business in the manner in which we have historically operated. As a result, our short-term business focus has been to preserve our liquidity position. Unless we are successful in obtaining additional liquidity, we believe that we will not have sufficient cash and liquid assets to fund normal operations for the next 12 months. In addition, the Company s obligations under its pension plan exceeded plan assets by \$4.8 million at December 31, 2013 and the Company has a significant amount due to its pension plan over the next 12 months. In addition, the Company has not made the December 1, 2009, 2010 and 2011 required sinking fund payments on its 9 1/2% Subordinated debentures due 2012 (the "Debentures") and the June 1, 2010, 2011 and 2012 as well as its December 1, 2010, 2011 and 2012 interest payments totaling \$301,200. In addition, the Company did not make the March 1, 2010, 2011 and 2012 as well as its September 1, 2010 and 2011 interest payments totaling \$2.1 million on its 8 1/4% Limited convertible senior subordinated notes due 2012 (the "Notes"). As a result, if the Company is unable to (i) obtain additional liquidity for working capital, (ii) make the required minimum funding contributions to the pension plan (iii) make the required sinking fund payments on the Debentures and/or (iv) make the required principal and interest payments on the Notes and the Debentures, there would be a significant adverse impact on the financial position and operating results of the Company, which could require the disposition of some or all of our assets, which could require us to curtail or cease operations.

Moreover, because of the uncertainty surrounding our ability to obtain additional liquidity and the potential of the noteholders and/or trustees to give notice to the Company of a default on either the Debentures or the Notes, our independent registered public accounting firm has issued an opinion on our Consolidated Financial Statements that states that the Consolidated Financial Statements were prepared assuming we will continue as a going concern and further states that the uncertainty regarding the ability to make the required principal and interest payments on the Notes and the Debentures, in addition to the significant amount due to the Company s pension plan over the next 12 months, raises substantial doubt about our ability to continue as a going concern. See Note 2 to the Consolidated Financial Statements - Going Concern.

#### **Critical Accounting Policies and Estimates**

Management s Discussion and Analysis of Financial Condition and Results of Operations discusses the Company s Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make

#### WE ARE DEPENDENT ON OUR PRESIDENT AND CHIEF EXECUTIVE OFFICER AND OTHER KEY PBRSONNI

estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, management evaluates its estimates and judgments, including those related to percentage of completion, uncollectible accounts receivable, slow-moving and obsolete inventories, rental equipment, goodwill, income taxes, warranty obligations, warrant liabilities, pension plan obligations, contingencies and litigation. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. Management has discussed the development and selection of these accounting estimates and the related disclosures with the Audit Committee of the Board of Directors.

Management believes the following critical accounting policies, among others, involve its more significant judgments and estimates used in the preparation of its Consolidated Financial Statements:

Percentage of Completion: The Company recognizes revenue on long-term equipment sales contracts usi
