NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements of Schlumberger Limited and its subsidiaries (Schlumberger) have been prepared in accordance with generally accepted accounting principles in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of Schlumberger management, all adjustments considered necessary for a fair statement have been included in the accompanying unaudited financial statements. All intercompany transactions and balances have been eliminated in consolidation. Operating results for the nine-month period ended September 30, 2013 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2013. The December 31, 2012 balance sheet information has been derived from the Schlumberger 2012 financial statements. For further information, refer to the Consolidated Financial Statements and notes thereto included in the Schlumberger Annual Report on Form 10-K for the year ended December 31, 2012, filed with the Securities and Exchange Commission on January 31, 2013.

2. Charges and Credits

Schlumberger recorded the following charges and credits during the first nine months of 2013 and 2012:

2013

Second quarter 2013:

Schlumberger recorded a pretax and after-tax gain of \$1.028 billion as a result of the deconsolidation of its subsea business in connection with the formation of the OneSubsea joint venture with Cameron International Corporation (Cameron). Refer to Note 4 Acquisitions for further details.

Schlumberger recorded a \$222 million pretax (\$203 million after-tax) impairment charge relating to an investment in a company involved in developing drilling-related technology and a \$142 million pretax and after-tax impairment charge relating to an investment in a contract drilling business.

The following is a summary of the charges and credits recorded during the second quarter of 2013:

(Stated in millions)

Consolidated Statement

	Pretax	Tax	Net	of Income Classification
Gain on formation of OneSubsea joint venture	\$ (1,028)	\$	\$ (1,028)	Gain on formation of OneSubsea
Impairment of equity-method investments	364	19	345	Impairment & other
	\$ (664)	\$ 19	\$ (683)	

First quarter 2013:

Although the functional currency of Schlumberger's operations in Venezuela is the US dollar, a portion of the transactions are denominated in local currency. In February 2013, Venezuela's currency was devalued from the prior exchange rate of 4.3 Bolivar Fuertes per US dollar to 6.3 Bolivar Fuertes per US dollar. As a result of this devaluation, Schlumberger recorded a pretax and after-tax foreign currency loss of \$92 million during the first quarter of 2013.

The following is a summary of the charges and credits recorded during the first nine months of 2013:

(Stated in millions)

	Pretax	Tax	Net	Consolidated Statement of Income Classification
Gain on formation of OneSubsea joint venture	\$ (1,028)	\$	\$ (1,028)	Gain on formation of OneSubsea

	(Stated in millions)	
	2013	2012
Third Quarter	13	21
Nine Months	13	21

4. Acquisitions

On June 30, 2013, Schlumberger and Cameron completed the formation of OneSubsea, a joint venture to manufacture and develop products, systems and services for the subsea oil and gas market. Schlumberger and Cameron each contributed all of their respective subsea businesses to the joint venture and Schlumberger made a \$600 million cash payment to Cameron. Schlumberger owns 40% of OneSubsea and accounts for this investment under the equity method. Schlumberger recognized a pretax and after-tax gain of \$1.028 billion, which is classified as Gain on formation of OneSubsea in the Consolidated Statement of Income, as a result of the deconsolidation of its subsea business. This gain is equal to the difference between the fair value of the Schlumberger subsea business, which was determined based on the present value of its estimated future cash flows, and its carrying value at the time of closing.

During the first nine months of 2013, Schlumberger made certain other acquisitions and investments, none of which were significant on an individual basis, for cash payments, net of cash acquired, of \$544 million.

5. Inventories

A summary of inventories follows:

	(Stated in millions)	
	Sept. 30, 2013	Dec. 31, 2012

The estimated fair value of Schlumberger's Long-term Debt at September 30, 2013 and December 31, 2012, based on quoted market prices, was \$10.0 billion and \$9.9 billion, respectively.

11. Derivative Instruments and Hedging Activities

Schlumberger is exposed to market risks related to fluctuations in foreign currency exchange rates and interest rates. To mitigate these risks, Schlumberger utilizes derivative instruments. Schlumberger does not enter into derivative transactions for speculative purposes.

Foreign Currency Exchange Rate Risk

As a multinational company, Schlumberger conducts business in more than 85 countries. Schlumberger's functional currency is primarily the US dollar, which is consistent with the oil and gas industry. However, outside the United States, a significant portion of Schlumberger's expenses is incurred in foreign currencies. Therefore, when the US dollar weakens (strengthens) in relation to the foreign currencies of the countries in which Schlumberger conducts business, the US dollar reported expenses will increase (decrease).

Schlumberger is exposed to risks on future cash flows to the extent that local currency expenses exceed revenues denominated in local currency that are other than the functional currency. In addition, Schlumberger is also exposed to risks on future cash flows relating to certain of its long-term debt which is denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts and foreign currency options to provide a hedge against a portion of these cash flow risks. These contracts are accounted for as cash flow hedges, with the effective portion of changes in the fair value of the hedge recorded on the Consolidated Balance Sheet and in Accumulated Other Comprehensive Loss. Amounts recorded in Accumulated Other Comprehensive Loss are reclassified into earnings in the same period or periods that the hedged item is recognized in earnings. The ineffective portion of changes in the fair value of hedging instruments, if any, is recorded directly to earnings.

At September 30, 2013, Schlumberger recognized a cumulative net \$18 million gain in Equity relating to revaluation of foreign currency forward contracts and foreign currency options designated as cash flow hedges, the majority of which is expected to be reclassified into earnings within the next 12 months.

Schlumberger is also exposed to changes in the fair value of assets and liabilities which are denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts and foreign currency options to hedge this exposure as it relates to certain currencies. These contracts are accounted for as fair value hedges with the fair value of the contracts recorded on the Consolidated Balance Sheet and changes in the fair value recognized in the Consolidated Statement of Income along with the change in fair value of the hedged item.

At September 30, 2013, contracts were outstanding for the US dollar equivalent of \$6.4 billion in various foreign currencies, of which \$3.2 billion related to hedges of debt denominated in currencies other than the functional currency.

Interest Rate Risk

Schlumberger is subject to interest rate risk on its debt and its investment portfolio. Schlumberger maintains an interest rate risk management strategy that uses a mix of variable and fixed rate debt combined with its investment portfolio and occasionally interest rate swaps to mitigate the exposure to changes in interest rates.

At September 30, 2013, Schlumberger had fixed rate debt aggregating \$9.0 billion and variable rate debt aggregating \$3.4 billion.

Short-term investments and Fixed income investments, held to maturity, totaled \$3.6 billion at September 30, 2013, and were comprised primarily of money market funds, eurodollar time deposits, certificates of deposit, commercial paper, euro notes and Eurobonds, and were substantially all denominated in US dollars. The carrying value of these investments approximated fair value, which was estimated using quoted market prices for those or similar investments.

The fair values of outstanding derivative instruments are summarized as follows:

	(Stated in millions)		Consolidated Balance Sheet Classification
	Fair Value of Derivatives		
	Sept. 30, 2013	Dec. 31, 2012	
Derivative Assets			
Derivatives designated as hedges:

12. Income Tax

Income before taxes which was subject to US and non-US income taxes was as follows:

	(Stated in millions)			
	Third Quarter		Nine Months	
	2013	2012	2013	2012

Outside United States	1,737	1,343	5,096	3,626
	\$ 2,231	\$ 1,798	\$ 6,521	\$ 5,204

There were no charges or credits in the third quarter of 2013. Schlumberger recorded pretax charges of \$32 million (\$20 million in the US and \$12 million outside of the US) during the third quarter of 2012.

Schlumberger recorded net pretax credits of \$572 million during the nine months ended September 30, 2013 (\$53 million of charges in the US and \$625 million of net credits outside of the US) and pretax charges of \$68 million during the nine months ended September 30, 2012 (\$41 million in the US and \$27 million outside the US). These charges and credits are included in the table above and are more fully described in Note 2 Charges and Credits.

The components of net deferred tax assets (liabilities) were as follows:

13. Contingencies

In 2009, Schlumberger learned that United States officials began a grand jury investigation and an associated regulatory inquiry, both related to certain Schlumberger operations in specified countries that are subject to United States trade and economic sanctions. Governmental agencies and authorities have a broad range of civil and criminal penalties that they may seek to impose for violations of trade and economic sanction laws including, but not limited to, disgorgement, fines, penalties and modifications to business practices. In recent years, these agencies and authorities have obtained a wide range of penalties in settlements with companies arising from trade and economic sanction investigations, including in some cases fines and other penalties in the tens and hundreds of millions of dollars. Schlumberger is cooperating with the governmental authorities and cannot currently predict the outcome or estimate the possible impact of the ultimate resolution of these matters.

On April 20, 2010, a fire and explosion occurred onboard the semisubmersible drilling rig Deepwater Horizon, owned by Transocean Ltd. and under contract to a subsidiary of BP plc. Pursuant to a contract between M-I SWACO and BP, M-I SWACO provided certain services under the direction of BP. A number of legal actions, certain of which named an M-I SWACO entity as a defendant, were filed in connection with the Deepwater Horizon incident. Many of these claims were consolidated into multidistrict litigation pending in federal court (the MDL). During the first quarter of 2013, the federal court entered its order dismissing all claims against M-I SWACO that were consolidated as part of the MDL.

Schlumberger and its subsidiaries are party to various other legal proceedings from time to time. A liability is accrued when a loss is both probable and can be reasonably estimated. Management believes that the probability of a material loss is remote. However, litigation is inherently uncertain and it is not possible to predict the ultimate disposition of these proceedings.

17. Discontinued Operations

During the second quarter of 2013, Schlumberger completed the wind down of its operations in Iran and, therefore, has classified the historical results of this business as a discontinued operation.

During the second quarter of 2012, Schlumberger sold its Wilson distribution business to National Oilwell Varco Inc. (NOV) for \$906 million in cash. During the third quarter of 2012, Schlumberger completed the sale of its 56% interest in CE Franklin Ltd. to NOV for \$122 million in cash. As Wilson and CE Franklin comprised Schlumberger's entire Distribution segment, the results of this segment were classified as discontinued operations in the Consolidated Statement of Income.

The following table summarizes the results of these discontinued operations (in millions):

	Third Quarter		Nine Months

OILFIELD SERVICES

Third-quarter revenue of \$11.61 billion was up 4% sequentially with International Area revenue of \$7.91 billion growing \$209 million, or 3% sequentially, while North America Area revenue of \$3.60 billion increased \$245 million, or 7% sequentially.

Reservoir Characterization Group revenue of \$3.23 billion grew 7% while Drilling Group revenue of \$4.41 billion increased 3%. These increases were due to strong exploration and drilling activity, both offshore and in key international land markets that benefited Wireline, Testing Services, Drilling & Measurements and M-I SWACO Technologies. WesternGeco revenue also increased from improved global marine vessel activity leading to high asset utilization during the quarter. Production Group revenue of \$4.02 billion

grew 3% despite the transfer of the Schlumberger subsea business at the end of the second quarter to OneSubsea, a Cameron/Schlumberger joint venture. Excluding this effect, the Production Group revenue grew 6% sequentially mainly from strong results in Well Services, Completions & Artificial Lift Technologies and Schlumberger Production Management (SPM) projects. The seasonal rebound in Western Canada following the spring break-up accounted for the majority of the sequential increase in Well Services activity with a significant amount also coming from improved efficiency in US land hydraulic fracturing services that enabled deployment of four additional fleets from existing equipment despite continued pricing weakness.

Geographically, North America led the increase with revenue of \$3.60 billion growing 7%. The performance in North America was driven by the offshore business setting a new high for quarterly revenue, Western Canada land rebounding from the seasonal spring break-up in the previous quarter, and US land being up from improved efficiency, growing new technology penetration, and market share gains. Middle East & Asia revenue of \$2.80 billion increased 5%, mainly from continued growth across a diversified portfolio of projects and activities in Saudi Arabia and Iraq, while high growth rates were posted in the United Arab Emirates and Qatar. Strong WesternGeco marine vessel activity in the Brunei, Malaysia & Philippines and Indonesia GeoMarkets, and increased land drilling and stimulation activities in China also contributed to the strong results. Europe/CIS/Africa revenue of \$3.18 billion increased 2% from high WesternGeco marine vessel activity in the North Sea and Equatorial Guinea and peak summer drilling and exploration activity in Russia and Central Asia, while Angola and North Africa activity continued to be subdued by project delays. Europe/CIS/Africa revenue for the third quarter reflects the absence of the results of the subsea business that was transferred to the OneSubsea joint venture in the second quarter of 2013. Excluding the effect of this business transfer, the revenue for Europe/CIS/Africa grew 5%. Latin America revenue of \$1.93 billion grew 1% with strong sequential growth posted in Venezuela and Argentina. Higher incremental production results from the SPM project in Ecuador also contributed to growth. These increases, however, were partially offset by a decrease in Brazil due to lower rig count, both on land and in deepwater.

Third-quarter pretax operating income of \$2.50 billion was up 10% sequentially. International pretax operating income of \$1.84 billion increased 9% sequentially, while North America pretax operating income of \$730 million increased 10% sequentially.

Sequentially, pretax operating margin of 21.5% increased 114 basis points (bps), as International pretax operating margin expanded 134 bps to 23.3%. Middle East & Asia posted a 151-bps sequential margin improvement to reach 26.1%, Europe/CIS/Africa increased by 189 bps to 22.5%, while Latin America was steady at 20.6%. The expansion in International margins was due to strong results in Russia & Central Asia resulting from deployment of higher-margin technologies during the peak summer drilling and exploration campaigns. Increased high-margin wireline and seismic activities also helped boost international margins further in Middle East & Asia as exploration work increased. North America pretax operating margin increased 57 bps sequentially to 20.3% as Western Canada recovered following the previous quarter's seasonal spring break-up. US land margin continued to expand on improving efficiency, better utilization, and lower raw material costs in pressure pumping stimulation services. North America offshore operating margin continued to grow on increasing activity and technology deployment but overall results decreased sequentially due to lower multiclient sales during the quarter.

Sequentially by Product Group, Reservoir Characterization Group pretax operating margin expanded 27 bps to 30.4% due to strong exploration activities that benefited Wireline and Testing Services Technologies. The pretax operating

margin of the Drilling Group increased 154 bps to 20.3% through improved Drilling & Measurements operational performance and increased profitability on Integrated Project Management (IPM) projects in the Latin America and Middle East & Asia Areas. Production Group pretax operating margin increased 165 bps to 17.6% on improved profitability in Well Services as Western Canada recovered from the previous quarter's spring break-up and US land margin continued to expand on improving efficiency, better utilization, and lower raw material costs. SPM projects in Latin America and Asia also continued to be accretive to the group's expanding margins.

Reservoir Characterization Group

Third-quarter revenue of \$3.23 billion increased 7% sequentially. Pretax operating income of \$983 million was 8% higher sequentially.

Sequentially, the increase in revenue was driven primarily by higher use of Wireline and Testing Services technologies as a result of strong exploration activity in the Middle East & Asia and Europe/CIS/Africa Areas. This was particularly marked in Russia & Central Asia where drilling & exploration activity increased during the summer. WesternGeco revenue also increased sequentially from improved global marine vessel activity leading to high asset utilization during the quarter, although the effect of this was partially offset by sequentially lower multiclient sales.

Pretax operating margin of 30.4% increased 27 bps sequentially from robust higher-margin exploration activity for Wireline in Russia and the Middle East & Asia Area, while Testing Services across all Areas also contributed to the group's expanding margin.

Drilling Group

Third-quarter revenue of \$4.41 billion increased 3% over the prior quarter. Pretax operating income of \$894 million was 11% higher than the second quarter.

Sequentially, revenue increased primarily on strong M-I SWACO performance from the rebound of Western Canada land activity, increased deepwater work in North America, and increased activity in Mexico and Russia. Strong Drilling & Measurements activity in the Middle East & Asia Area, in Russia, and offshore North America also contributed to growth.

Sequentially, pretax operating margin grew 154 bps to 20.3% as a result of improved profitability in Drilling & Measurements due to stronger activity and a more favorable geographical and technology mix. Improved profitability on IPM projects in the Middle East & Asia and Latin America Areas continued to contribute to the group's expanding margins.

Production Group

Third-quarter revenue of \$4.02 billion increased 3% sequentially. Pretax operating income of \$707 million was 13% higher sequentially.

The group's revenue increased 3% despite the transfer of the subsea business to the OneSubsea joint venture. Excluding the effect of the transfer of this business, the group grew 6% mainly from strong results in Well Services, Completions, Artificial Lift and SPM. The rebound from the seasonal spring break-up in Western Canada accounted for the majority of the sequential increase in Well Services while a significant proportion came through improved efficiency in the US land hydraulic fracturing market with the deployment of additional fleets and crews from existing assets despite continued pricing weakness. Strong sales of Completions and Artificial Lift products in the Latin America and Middle East & Asia Areas also contributed to growth.

Pretax operating margin of 17.6% increased 165 bps sequentially on improved profitability in Well Services as Western Canada recovered from the previous quarter's seasonal spring break-up and US land margin continued to expand on improving efficiency, better utilization, and lower raw material costs. SPM projects in Latin America and Asia also continued to be accretive to the group's expanding margins.

OILFIELD SERVICES

Third-quarter 2013 revenue of \$11.61 billion was 11% higher than the same period last year with International Area revenue of \$7.91 billion increasing 12% while North America Area revenue of \$3.60 billion was up 9%.

Internationally, higher exploration and development activities in a number of GeoMarkets both offshore and in key land markets contributed to the increase. The increase was led by the Middle East & Asia Area increasing 25%, mainly from robust results across a diversified portfolio of projects and activities in Saudi Arabia, Iraq and United Arab Emirates; increased seismic surveys across Asia; and sustained land and offshore drilling activity in the Australasia and China GeoMarkets. Europe/CIS/Africa Area increased 7% led by the Russia and Central Asia region on strong land activity in West Siberia and robust offshore projects in Sakhalin. The Sub-Saharan Africa region increased on strong development, exploration and seismic activities as well. Latin America Area was 4% higher, mainly due to solid progress on an SPM project in Ecuador and strong IPM results in Argentina.

North America growth was driven by increased offshore revenue as a result of higher drilling and exploration activities. The land business continues to experience pricing weakness in the areas of drilling, stimulation and wireline, although this was more than offset by increased service intensity, improved efficiency, market share gains and new technology penetration.

Reservoir Characterization revenue of \$3.23 billion grew 14% while Drilling Group revenue of \$4.41 billion increased 9%. These increases were a result of robust exploration and development activities in a number of international GeoMarkets and in North America offshore, particularly in the US Gulf of Mexico. Production Group revenue of \$4.02 billion grew 10%.

Third-quarter 2013 pretax operating income of \$2.50 billion grew \$413 million, or 20% versus the same period last year with International pretax operating income of \$1.84 billion increasing 24%, while North America pretax operating income of \$730 million increased 19%.

Third-quarter 2013 pretax operating margin of 21.5% grew 166 bps versus the same period last year, as International pretax operating margin expanded 227 bps to 23.3% while North America pretax operating margin increased 176 bps to 20.3%. The expansion in International margins was due to increased high-margin exploration, seismic and deepwater activities while the North America margin improvement was from improved efficiency, better utilization and lower raw material costs despite the weak pricing environment.

Reservoir Characterization Group

Third-quarter 2013 revenue of \$3.23 billion was 14.0% higher than the same period last year due to market share gains and higher exploration activity in both offshore and key international land markets.

Year-on-year, pretax operating margin increased 224 bps to 30.4% largely due to the higher-margin exploration activities that benefited Wireline and Testing Services and increased Schlumberger Information Services software sales.

Drilling Group

Third-quarter 2013 revenue of \$4.41 billion was 9% higher than the previous year primarily due to the robust demand for Drilling & Measurements services as offshore drilling activity strengthened in the US Gulf of Mexico, Sub-Sahara Africa, Russia and the Middle East & Asia Area and as rig count increased in key international land markets, namely in Saudi Arabia, China and Australia. M-I SWACO and Drilling Tools & Remedial Technologies expanded across all Areas and IPM grew on projects in Iraq, Australia and Argentina.

Year-on-year, pretax operating margin increased 224 bps to 20.3% primarily due to the increase in higher-margin activities of Drilling & Measurements that benefited from higher-margin exploration activities in North America offshore and in the international markets and improved profitability on IPM projects.

Production Group

Third-quarter 2013 revenue of \$4.02 billion increased 10% year-on-year on increasing Well Services and Well Intervention activity, strong international sales of Completion and Artificial Lift products and increased SPM project results. While North America land rig count declined, well & stage counts increased through drilling efficiency. Well Services revenue in North America increased despite pricing weakness on improved efficiency with the deployment of additional fleets and crews from existing assets.

Year-on-year, pretax operating margin increased 289 basis points to 17.6% mainly due to Well Services margin expansion mainly in US land due to improving efficiency, better asset utilization and lower raw material costs against the backdrop of a weak pricing environment. SPM projects in Latin America and Asia also continued to be accretive to the group's expanding margins.

OILFIELD SERVICES

Nine-month 2013 revenue of \$33.36 billion grew \$2.71 billion, or 9% versus the same period last year with International Area revenue of \$22.78 billion increasing \$2.52 billion, or 12%, while North America Area revenue of \$10.25 billion increased \$136 million, or 1%.

Internationally, higher exploration and development activities in a number of GeoMarkets both offshore and in key land markets contributed to the increase. The increase was led by the Middle East & Asia Area increasing 25%, mainly from robust results across a diversified portfolio of projects and activities in Saudi Arabia, Iraq, and United Arab Emirates; increased seismic surveys across Asia; and sustained land and offshore drilling activity in the Australasia and China GeoMarkets. Europe/CIS/Africa Area increased 8%, led by the Russia and Central Asia region on strong land activity in West Siberia and robust offshore projects in Sakhalin. The Sub-Saharan Africa region increased on strong development, exploration and seismic activities as well. Latin America Area was 5% higher, mainly due to solid progress on an SPM project in Ecuador and strong IPM results in Argentina.

North America growth was driven by increased offshore revenue as a result of higher drilling and exploration activities. This increase was largely offset by a decline in land as a result of a reduction in rig count and pricing weakness in the areas of drilling, stimulation and wireline, although the downward pricing trend slowed during the

second and third quarters.

Reservoir Characterization and Drilling Group (primarily Drilling & Measurements, M-I SWACO and Drilling Tools & Remedial) revenue increased 12% and 9%, respectively as a result of robust exploration and development activities in a number of international GeoMarkets and in North America offshore, particularly in the US Gulf of Mexico. Production Group revenue was up 7% mostly from Well Intervention, Completions, Artificial Lift, SPM and Well Services Technologies in the international GeoMarkets.

Year-to-date 2013 pretax operating income of \$6.74 billion grew \$734 million, or 12% versus the same period last year with International pretax operating income of \$4.96 billion increasing 23%, while North America pretax operating income of \$2.02 billion declined 3%.

Year-to-date 2013 pretax operating margin of 20.2% increased 61 bps versus the same period last year, as International pretax operating margin expanded 180 bps to 21.8% while North America pretax operating margin contracted 88 bps to 19.7%. The expansion in International margins was due to increased high-margin exploration, seismic and deepwater activities while the North American margin contraction was due to pricing weakness.

Reservoir Characterization Group

Nine-month 2013 revenue of \$9.00 billion was 12% higher than the same period last year due to market share gains and higher exploration activity in both offshore and key international land markets.

Year-on-year, pretax operating margin increased 201 basis points to 29.1% largely due to the higher-margin exploration activities that benefited Testing Services, WesternGeco and Wireline Technologies.

Drilling Group

Nine-month 2013 revenue of \$12.82 billion was 9% higher than the previous year primarily due to the robust demand for Drilling & Measurements services as offshore drilling activity strengthened in the US Gulf of Mexico, Sub-Sahara Africa, Russia and the Middle East & Asia Area and rig count increases in key international land markets, namely in Saudi Arabia, China and Australia. Drilling Tools & Remedial and M-I SWACO Technologies expanded across all Areas and IPM grew strongly on projects in Iraq, Australia and Argentina.

Year-on-year, pretax operating margin increased 109 bps to 18.9% primarily due to the increase in higher-margin activities of Drilling & Measurements that benefited from higher-margin exploration activities in North America offshore and in the international markets.

Production Group

Nine-month 2013 revenue of \$11.71 billion increased 7% year-on-year on increasing Well Intervention activity and strong international sales of Completion and Artificial Lift products and Well Services technologies. SPM also posted strong growth. While North America land rig count declined, well & stage counts increased through drilling efficiency. Despite the efficiency-driven activity increase, Well Services revenue in North America declined on pricing weakness.

Year-on-year, pretax operating margin increased slightly by 10 bps to 16.1%. Margin expanded on improving profitability in SPM, Completions and Artificial Lift but this was offset by a decline in margins of Well Services technologies, primarily in North America, as a result of pricing pressure and cost inflation.

INTEREST & OTHER INCOME

Interest & other income consisted of the following for the third quarter and nine months ended September 30, 2013 and 2012:

Research & engineering and General & administrative expenses, as a percentage of Revenue, for the third quarter and nine months ended September 30, 2013 and 2012 were as follows:

	Third Quarter		Nine Months	
	2013	2012	2013	2012
Research & engineering	2.5%	2.8%	2.6%	2.8%
General & administrative	0.9%	0.9%	0.9%	1.0%

The effective tax rate for the third quarter of 2013 was 22.7% compared to 24.2% for the same period of 2012.

The effective tax rate for the nine months ended September 30, 2013 was 20.9% compared to 24.4% for the same period of the prior year. The effective tax rate for the nine months ended September 30, 2013 was significantly impacted by the charges and credits described in Note 2 to the Consolidated Financial Statements. Excluding the impact of charges and credits, the effective tax rate for the nine months ended September 30, 2013 was 23.2% compared to 24.2% in the prior year. The decrease in the effective tax rate excluding charges and credits for the nine-month period ended September 30, 2013 as compared to the same period of the prior year, is primarily attributable to the fact that Schlumberger generated a smaller percentage of its pretax earnings in North America in 2013 as compared to 2012.

CHARGES AND CREDITS

Schlumberger recorded no charges or credits during the third quarter of 2013. The following charges and credits were recorded during the first nine months of 2013 and 2012. These charges and credits, which are summarized below, are more fully described in Note 2 to the Consolidated Financial Statements.

Key liquidity events during the first nine months of 2013 and 2012 included:

During the second quarter of 2013, Schlumberger paid Cameron \$600 million in connection with the formation of the OneSubsea joint venture.

On April 17, 2008, the Schlumberger Board of Directors (the Board) approved an \$8 billion share repurchase program for shares of Schlumberger common stock, to be acquired before December 31, 2011. On July 21, 2011, the Board approved an extension of this repurchase program to December 31, 2013. This program was completed during July of 2013. On July 18, 2013, the Board approved a new \$10 billion share repurchase program for shares of Schlumberger common stock, to be completed at the latest by June 30, 2018. Schlumberger had repurchased \$0.6 billion of shares under this new share repurchase program as of September 30, 2013.

The following table summarizes the activity, during the nine months ended September 30, under these share repurchase programs:

	(Stated in millions except per share amounts)		
	Total cost of shares purchased	Total number of shares purchased	Average price paid per share
Nine months ended September 30, 2013	\$ 1,526	19.4	\$ 78.61
Nine months ended September 30, 2012	\$ 972	14.1	\$ 68.99

Cash flow provided by operations was \$5.9 billion in the first nine months of 2013 compared to \$3.4 billion in the first nine months of 2012 primarily reflecting a lower increase in working capital requirements year-on-year.

Capital expenditures were \$2.8 billion in the first nine months of 2013 compared to \$3.2 billion during the first nine months of 2012. Capital expenditures for full year 2013 are expected to be approximately \$3.9 billion as compared to

\$4.7 billion in 2012.

In recent months, Schlumberger began experiencing delays in payment from OGX Petroleo e Gas SA (OGX), one of its customers in Brazil. OGX is currently experiencing liquidity issues and is pursuing various options. As of September 30, 2013, Schlumberger had outstanding accounts receivable due from OGX of approximately \$195 million. At this time, it is not possible to predict the ultimate outcome of this situation. Depending upon the ultimate outcome, Schlumberger may be required to write-off a portion or all of these receivables in future periods.

At times in recent quarters, Schlumberger has experienced delays in payments from its national oil company customer in Venezuela. Schlumberger operates in more than 85 countries. At September 30, 2013, only five of those countries (including Venezuela) individually accounted for greater than 5% of Schlumberger's accounts receivable balance of which only two, the United States and Mexico, represented greater than 10%.

As of September 30, 2013, Schlumberger had \$6.4 billion of cash and short-term investments on hand. Schlumberger had separate committed debt facility agreements aggregating \$4.0 billion with commercial banks, of which \$1.8 billion was available and unused as of September 30, 2013. This included \$3.5 billion of committed facilities which support commercial paper programs in the United States and Europe. Schlumberger believes that these amounts are sufficient to meet future business requirements for at least the next 12 months.

Schlumberger had commercial paper of \$1.9 billion outstanding as of September 30, 2013.

Other Matters

During the second quarter of 2013, Schlumberger completed the wind down of its service operations in Iran. Prior to this, certain non-U.S. subsidiaries of Schlumberger provided oilfield services to the National Iranian Oil Company and certain of its affiliates (NIOC). Schlumberger has classified the results of this business as a discontinued operation. All prior periods were restated accordingly.

Schlumberger's residual transactions or dealings with the government of Iran in the quarter consisted of payments of taxes, duties and other typical governmental charges, along with payments for transportation and hotel accommodations. Two non-U.S. subsidiaries of Schlumberger maintain depository accounts at the Dubai branch of Bank Saderat Iran (Saderat) and at Bank Tejarat (Tejarat) in Tehran for the deposit by NIOC of amounts owed to non-US subsidiaries of Schlumberger for prior services rendered in Iran. One of the non-U.S. subsidiaries also maintains the account at Tejarat for payment of local expenses such as taxes and utilities. Schlumberger anticipates that it will discontinue its dealings with Saderat and Tejarat following the receipt of all amounts owed to Schlumberger for prior services rendered in Iran.

FORWARD-LOOKING STATEMENTS

This Form 10-Q, and other statements we make contain forward-looking statements within the meaning of the federal securities laws, which include any statements that are not historical facts, such as our forecasts or expectations regarding business outlook; growth for Schlumberger as a whole and for each of its segments (and for specified products or geographic areas within each segment); oil and natural gas demand and production growth; oil and natural gas prices; improvements in operating procedures and technology; capital expenditures by Schlumberger and the oil and gas industry; the business strategies of Schlumberger's customers; future global economic conditions; and future results of operations. These statements are subject to risks and uncertainties, including, but not limited to, global economic conditions; changes in exploration and production spending by Schlumberger's customers and changes in the level of oil and natural gas exploration and development; general economic, political and business conditions in key regions of the world; pricing erosion; weather and seasonal factors; operational delays; production declines; changes in government regulations and regulatory requirements, including those related to offshore oil and gas exploration, radioactive sources, explosives, chemicals, hydraulic fracturing services and climate-related initiatives; the inability of technology to meet new challenges in exploration; and other risks and uncertainties detailed in our third-quarter 2013 earnings release, our most recent Form 10-K and other filings that we make with the Securities and Exchange Commission. If one or more of these or other risks or uncertainties materialize (or the consequences of such a development changes), or should our underlying assumptions prove incorrect, actual outcomes may vary materially from those reflected in our forward-looking statements. Schlumberger disclaims any intention or obligation to update publicly or revise such statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

For quantitative and qualitative disclosures about market risk affecting Schlumberger, see Item 7A, Quantitative and Qualitative Disclosures about Market Risk, of the Schlumberger Annual Report on Form 10-K for the fiscal year ended December 31, 2012. Schlumberger's exposure to market risk has not changed materially since December 31, 2012.

Item 4. Controls and Procedures.

Schlumberger has carried out an evaluation under the supervision and with the participation of Schlumberger's management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of Schlumberger's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, the CEO and the CFO have concluded that, as of the end of the period covered by this report, Schlumberger's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that Schlumberger files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Schlumberger's disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is accumulated and communicated to its management, including the CEO and the CFO, as appropriate, to allow timely decisions regarding required disclosure. There has been no change in Schlumberger's internal control over financial reporting that occurred during the quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, Schlumberger's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

The information with respect to Item 1 is set forth under Note 13 Contingencies, in the Consolidated Financial Statements.

Item 1A. Risk Factors.

As of the date of this filing, there have been no material changes from the risk factors previously disclosed in Part 1, Item 1A, of Schlumberger's Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Unregistered Sales of Equity Securities

None.

Issuer Repurchases of Equity Securities

On April 17, 2008, the Schlumberger Board of Directors (the Board) approved an \$8 billion share repurchase program for Schlumberger common stock (the 2008 Program). On July 21, 2011, the Board approved an extension of this repurchase program to December 31, 2013. The program was completed during July of 2013. On July 18, 2013, the Board approved a new \$10 billion share repurchase program for shares of Schlumberger common stock, to be completed at the latest by June 30, 2018 (the 2013 Program). As of September 30, 2013, \$9.4 billion remained available for repurchase under the 2013 Program.

Schlumberger's common stock repurchase program activity for the three months ended September 30, 2013 was as follows:

During the three months ended September 30, 2013, Schlumberger repurchased a total of 10.09 million shares of common stock under both the 2008 Program and the 2013 Program at an average price of \$82.61 for a total of \$833 million.

In connection with the exercise of stock options under Schlumberger's incentive compensation plans, Schlumberger routinely receives shares of its common stock from optionholders in consideration of the exercise price of the stock options. Schlumberger does not view these transactions as requiring disclosure under this Item as the number of shares of Schlumberger common stock received from optionholders is not material.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

The barite and bentonite mining operations of M-I LLC, an indirect wholly-owned subsidiary, are subject to regulation by the federal Mine Safety and Health Administration under the Federal Mine Safety and Health Act of 1977. Information concerning mine safety violations or other regulatory matters required by section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 to this Report.
