Cautionary Note Regarding Forward-Looking Information

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions, or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as “anticipates,” “believes,” “can,” “could,” “may,” “predicts,” “potential,” “should,” “will,” “estimate,” “plans,” “projects,” “continuing,” “ongoing,” “expects,” similar words or phrases. Although we believe that the expectations reflected in these forward-looking statements are reasonable, these statements are not guarantees of future performance and involve risks and uncertainties which are subject to change based on various important factors, some of which are beyond our control. For additional discussion of these risks, refer to Part II, Item 1A—Risk Factors. Among the factors that could cause our financial performance to differ materially from that suggested by the forward-looking statements are:

adverse economic conditions in the United States and worldwide may negatively impact our results;
our business could suffer if our access to funding is reduced;
we face significant risks implementing our growth strategy, some of which are outside our control;
our agreement with Chrysler Group LLC (“Chrysler”) may not result in currently anticipated levels of growth and is subject to certain performance conditions that could result in termination of the agreement;
our business could suffer if we are unsuccessful in developing and maintaining relationships with automobile dealerships;
our financial condition, liquidity, and results of operations depend on the credit performance of our loans;
loss of our key management or other personnel, or an inability to attract such management and personnel, could negatively impact our business;
future changes in our relationship with Banco Santander, S.A. (“Santander”) could adversely affect our operations; and
we operate in a highly regulated industry and continually changing federal, state, and local laws and regulations could materially adversely affect our business.

If one or more of the factors affecting our forward-looking information and statements proves incorrect, its actual results, performance or achievements could differ materially from those expressed in, or implied by, forward-looking information and statements. Therefore, we caution not to place undue reliance on any forward-looking information or statements. The effect of these factors is difficult to predict. Factors other than these also could adversely affect our results, and the reader should not consider these factors to be a complete set of all potential risks or uncertainties. New factors emerge from time to time, and management cannot assess the impact of any such factor on our business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. Any forward-looking statements only speak as of the date of this document, and we undertake no obligation to update any forward-looking information or statements, whether written or oral, to reflect any change, except as required by law. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

SANTANDER CONSUMER USA HOLDINGS INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share amounts)

(Unaudited)

1. Description of Business, Basis of Presentation, and Changes in Significant Accounting Policies and Practices
Santander Consumer USA Holdings Inc., a Delaware Corporation (“SCUSA Delaware” or, together with its subsidiaries, “SCUSA” or “the Company”), is the holding company for Santander Consumer USA Inc., an Illinois corporation (“SCUSA Illinois”), and subsidiaries, a specialized consumer finance company focused on vehicle finance and unsecured consumer lending products.

The Company is owned approximately 60.5% by Santander Holdings USA, Inc. (“SHUSA”), a subsidiary of Banco Santander, S.A. (“Santander”), approximately 4.1% by Sponsor Auto Finance Holdings Series LP (“Auto Finance Holdings”), approximately 10.0% by DDFS LLC, an entity affiliated with Thomas G. Dundon, the Company’s Chairman and Chief Executive Officer (“CEO”), approximately 25.3% by public shareholders and approximately 0.1% by other holders, primarily members of senior management.

The Company’s primary business is the indirect origination of retail installment contracts principally through manufacturer-franchised dealers in connection with their sale of new and used vehicles to retail consumers.

In conjunction with a ten-year private label financing agreement with Chrysler Group (the “Chrysler Agreement”) that became effective May 1, 2013, the Company offers a full spectrum of auto financing products and services to Chrysler customers and dealers under the Chrysler Capital brand. These products and services include consumer retail installment contracts and leases, as well as dealer loans for inventory, construction, real estate, working capital and revolving lines of credit.

The Company also originates vehicle loans through a Web-based direct lending program, purchases vehicle retail installment contracts from other lenders, and services automobile and recreational and marine vehicle portfolios for other lenders. Additionally, in 2013 the Company began originating and acquiring unsecured consumer loans.

Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts of the Company and its subsidiaries, including certain special purpose financing trusts utilized in financing transactions (“Trusts”), which are considered variable interest entities (“VIEs”). The Company consolidates other VIEs for which it was deemed the primary beneficiary. All intercompany balances and transactions have been eliminated in consolidation.

The accompanying condensed consolidated financial statements as of March 31, 2014 and December 31, 2013, and for the three months ended March 31, 2014 and 2013, have been prepared in accordance with United States (U.S.) generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, these financial statements contain all adjustments, consisting of normal recurring accruals, necessary to present fairly the financial position, results of operations and cash flows for the periods indicated. Results of operations for the periods

presented herein are not necessarily indicative of results of operations for the entire year.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities as of the date of the financial statements and the amount of revenue and expenses during the reporting periods. Actual results could differ from those estimates and those differences may be material. These estimates include the determination of loan loss allowance, discount accretion, impairment, expected end-of-term lease residual values, values of repossessed assets, and income taxes. These estimates, although based on actual historical trends and modeling, may potentially show significant variances over time.

Business Segment Information

The Company has one reportable segment: Consumer Finance, which includes the Company's vehicle financial products and services, including retail installment contracts, vehicle leases, and dealer loans, as well as financial products and services related to motorcycles, RVs, and watercraft. It also includes the Company's unsecured personal loan and point-of-sale financing operations.

Accounting Policies

The Company has identified the following critical accounting policies and estimates used by management in the preparation of the Company's financial statements: retail installment contracts, unsecured consumer loans, receivables from dealers, provision for loan losses, leased vehicles, income taxes, and earnings per share. As of March 31, 2014, there have been no significant changes to the Company's accounting policies as disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Recent Accounting Pronouncements

In July 2013, the FASB issued ASU 2013-11, Income Taxes: Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. This ASU provides guidance on the presentation of unrecognized tax benefits, particularly the manner in which an entity would settle, at the reporting date, any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. This guidance became effective for the Company January 1, 2014 and implementation did not have a significant impact on the Company's financial position, results of operations, or cash flows.

2. Finance Receivables

Finance receivables held for investment at March 31, 2014 and December 31, 2013, were comprised as follows:

March 31, 2014					
Retail Installment Contracts Held for Investment					
	Loans Acquired Individually	Purchased Receivables Portfolios	Total	Receivables from Dealers Held for Investment	Unsecured Consumer Loans
Unpaid principal balance	\$22,826,639	\$1,566,897	\$24,393,536	\$109,105	\$1,217,755
Loan loss allowance (Note 3)	(2,444,552)	(206,170)	(2,650,722)	(1,035)	(203,190)
Discount	(649,416)	(41,311)	(690,727)	—	(14,866)
Capitalized origination costs and fees	35,086	—	35,086	130	846
Net carrying balance	\$19,767,757	\$1,319,416	\$21,087,173	\$108,200	\$1,000,545

December 31, 2013					
Retail Installment Contracts Held for Investment					
	Loans Acquired Individually	Purchased Receivables Portfolios	Total	Receivables from Dealers Held for	Unsecured Consumer Loans

				Investment	
Unpaid principal balance	\$21,238,281	\$1,961,060	\$23,199,341	\$ 95,835	\$1,165,778
Loan loss allowance (Note 3)	(2,132,634)	(226,356)	(2,358,990)	(1,090)	(179,350)
Discount	(573,462)	(81,216)	(654,678)	—	(32,831)
Capitalized origination costs	33,936	—	33,936	—	592
Net carrying balance	\$18,566,121	\$1,653,488	\$20,219,609	\$ 94,745	\$954,189

As of March 31, 2014, retail installment contracts and receivables from dealers held for sale totaled \$144,772 and \$26,694, respectively. As of December 31, 2013, retail installment contracts and receivables from dealers held for sale totaled \$56,066 and \$26,437, respectively. Sales of retail installment contracts for the three months ended March 31, 2014 included principal balance amounts of approximately \$1,685,723. No receivables from dealers were sold during the three months ended March 31, 2014.

Retail installment contracts are collateralized by vehicle titles, and the Company has the right to repossess the vehicle in the event the consumer defaults on the payment terms of the contract. Most of the Company's retail installment contracts held for investment are pledged against warehouse facilities or securitization bonds (Note 6). Most of the creditors on the Company's retail installment contracts are retail consumers; however, approximately \$477,062 and \$345,177 of the unpaid principal balance represented fleet contracts with commercial consumers as of March 31, 2014 and December 31, 2013, respectively.

Borrowers on the Company's retail installment contracts held for investment are located in Texas (17%), Florida (10%), California (8%), Georgia (5%), North Carolina (5%), and other states each individually representing less than 5% of the Company's total.

Receivables from dealers held for investment includes a term loan, which was previously a residual warehouse credit facility, with a third-party vehicle dealer and lender that operates in multiple states. The loan allowed committed borrowings of \$50,000 at March 31, 2014 and December 31, 2013, and the facility balance was \$50,000 at each of those dates.

Borrowers on the Company's remaining receivables from dealers held for investment, all of which are Chrysler-affiliated, are located in Texas (29%), Ohio (18%), New York (13%), New Jersey (12%), California (8%), Tennessee (8%), Louisiana (5%) and other states each individually representing less than 5% of the Company's total.

Borrowers on the Company's unsecured consumer loans are located in California (9%), New York (8%), Texas (8%), Florida (6%), Pennsylvania (5%) and other states each individually representing less than 5% of the Company's total.

Changes in accretable yield on the Company's purchased receivables portfolios for the periods indicated were as follows:

	For the Three Months Ended	
	March 31, 2014	March 31, 2013
Balance — beginning of period	\$403,400	\$816,854
Additions (loans acquired during the period)	—	—
Accretion of accretable yield	(65,046)	(135,199)
Reclassifications from nonaccretable difference	24,469	61,693
Balance — end of period	\$362,823	\$743,348

The Company did not acquire any vehicle loan portfolios for which it was probable at acquisition that not all contractually required payments would be collected during the three months ended March 31, 2014 and 2013. Interest receivable on purchased receivables portfolios totaled \$12,446 and \$16,950 at March 31, 2014 and December 31, 2013, respectively.

3. Loan Loss Allowance and Credit Quality

Loan Loss Allowance

The Company estimates loan losses on individually acquired retail installment contracts and unsecured consumer loans held for investment based on delinquency status, historical loss experience, estimated values of underlying collateral, when applicable, and various economic factors. The Company maintains a general loan loss allowance for receivables from dealers based on risk ratings, and individually evaluates the loans for specific impairment as necessary. The activity in the loan loss allowance for individually acquired loans for the three months ended March 31, 2014 and 2013 was as follows:

Three Months Ended March 31, 2014

	Retail Installment Contracts Acquired Individually	Receivables from Dealers Held for Investment	Unsecured Consumer Loans
Balance — beginning of period	\$2,132,634	\$ 1,090	\$ 179,350
Provision for loan losses	656,706	(55)	62,129
Charge-offs	(752,565)	—	(40,948)
Recoveries	407,777	—	2,659
Balance — end of period	\$2,444,552	\$ 1,035	\$ 203,190

The loan loss allowance for receivables from dealers is comprised entirely of general allowances as none of these receivables have been determined to be individually impaired.

	Three Months Ended March 31, 2013		
	Retail Installment Contracts Acquired Individually	Receivables from Dealers Held for Investment	Unsecured Consumer Loans
Balance — beginning of period	\$1,555,362	\$ —	\$ —
Provision for loan losses	251,641	—	—
Charge-offs	(384,726)	—	—
Recoveries	238,335	—	—
Balance — end of period	\$1,660,612	\$ —	\$ —

The activity in the loan loss allowance related to purchased receivables portfolios for the three months ended March 31, 2014 and 2013 was as follows:

	Three Months Ended March 31,	
	2014	2013
Balance — beginning of period	\$226,356	\$218,640
Incremental provisions for purchased receivable portfolios	1,325	21,662
Incremental reversal of provisions for purchased receivable portfolios	(21,511)	(56,110)
Balance — end of period	\$206,170	\$184,192

Delinquencies

Retail installment contracts and unsecured consumer amortizing term loans are classified as non-performing when they are greater than 60 days past due as to principal or interest. At the time a loan is placed on non-accrual status, previously accrued and uncollected interest is reversed against interest income. When an account is returned to a performing status of 60 days or less past due, the Company returns to accruing interest on the contract. The accrual of interest on receivables from dealers and revolving unsecured consumer loans continues until the loan is charged off. A summary of delinquencies as of March 31, 2014 and December 31, 2013 is as follows:

	March 31, 2014				
	Retail Installment Contracts Held for Investment			Receivables from Dealers	Unsecured Consumer Loans
	Loans Acquired Individually	Purchased Receivables Portfolios	Total	Held for Investment	
Principal, current	\$20,933,262	\$1,247,506	\$22,180,768	\$109,105	\$1,088,013
Principal, 31-60 days past due	1,290,394	210,344	1,500,738	—	39,639
Delinquent principal over 60 days	602,983	109,047	712,030	—	90,103
Total principal	\$22,826,639	\$1,566,897	\$24,393,536	\$109,105	\$1,217,755

	December 31, 2013				
	Retail Installment Contracts Held for Investment			Receivables from Dealers	Unsecured Consumer Loans
	Loans Acquired Individually	Purchased Receivables Portfolios	Total	Held for Investment	

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

Principal, current	\$18,653,827	\$1,457,813	\$20,111,640	\$ 95,835	\$1,072,316
Principal, 31-60 days past due	1,729,139	321,549	2,050,688	—	28,102
Delinquent principal over 60 days	855,315	181,698	1,037,013	—	65,360
Total principal	\$21,238,281	\$1,961,060	\$23,199,341	\$ 95,835	\$1,165,778

As of March 31, 2014 and December 31, 2013, there were no receivables held for sale that were non-performing.

FICO® Distribution — A summary of the credit risk profile of the Company's consumer loans by Fair Isaac Corporation (FICO®) distribution, determined at origination, as of March 31, 2014 and December 31, 2013 was as follows:

March 31, 2014		
	Retail Installment Contracts Held for Investment	Unsecured Consumer Loans
FICO Band		
<540	27.0%	3.6%
540-599	32.2%	27.7%
600-659	26.2%	43.8%
>660	14.6%	24.9%

December 31, 2013		
	Retail Installment Contracts Held for	Unsecured Consumer
FICO Band	Investment	Loans
<540	26.8%	6.3%
540-599	31.8%	24.2%
600-659	26.3%	39.4%
>660	15.1%	30.1%

Commercial Lending Credit Quality Indicators — The credit quality of receivables from dealers, which are considered commercial loans, is summarized according to standard regulatory classifications as follows:

Pass — Asset is well protected by the current net worth and paying capacity of the obligor or guarantors, if any, or by the fair value less costs to acquire and sell any underlying collateral in a timely manner.

Special Mention — Asset has potential weaknesses that deserve management's close attention, which, if left uncorrected, may result in deterioration of the repayment prospects for an asset at some future date. Special Mention assets are not adversely classified.

Substandard — Asset is inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. A well-defined weakness or weaknesses exist that jeopardize the liquidation of the debt. The loans are characterized by the distinct possibility that the Company will sustain some loss if deficiencies are not corrected.

Doubtful — Exhibits the inherent weaknesses of a substandard credit. Additional characteristics exist that make collection or liquidation in full highly questionable and improbable, on the basis of currently known facts, conditions and values. Possibility of loss is extremely high, but because of certain important and reasonable specific pending factors which may work to the advantage and strengthening of the credit, an estimated loss cannot yet be determined.

Loss — Credit is considered uncollectible and of such little value that it does not warrant consideration as an active asset. There may be some recovery or salvage value, but there is doubt as to whether, how much or when the recovery would occur.

Commercial loan credit quality indicators for receivables from dealers held for investment as of March 31, 2014 and December 31, 2013 were as follows:

March 31,	December 31,
--------------	-----------------

	2014	2013
Pass	\$89,785	\$ 95,835
Special Mention	19,320	—
Substandard	—	—
Doubtful	—	—
	\$ 109,105	\$ 95,835

Troubled Debt Restructurings

In certain circumstances, the Company modifies the terms of its finance receivables to troubled borrowers. Modifications may include a reduction in interest rate, an extension of the maturity date, rescheduling future cash flows, or a combination thereof. A modification of finance receivable terms is considered a troubled debt restructuring (“TDR”) if the Company grants a concession to a borrower for economic or legal reasons related to the debtor’s financial difficulties which would not otherwise have been considered. Management considers TDRs to include all individually acquired retail installment contracts that have been modified at least once, deferred for a period of 90 days or more, or deferred at least twice during the period. Additionally, modifications set forth through bankruptcy proceeding are deemed to be TDRs by the Company. The purchased receivables portfolio is excluded from the scope of the applicable guidance. As of March 31, 2014 and December 31, 2013 there were no receivables from dealers classified as a TDR.

The table below presents the Company's loans modified in TDRs as of March 31, 2014 and December 31, 2013:

	March 31, 2014		December 31, 2013	
	Retail	Unsecured	Retail	Unsecured
	Installment	Consumer	Installment	Consumer
	Contracts	Loans	Contracts	Loans
Total TDR principal	\$2,812,852	\$ 9,600	\$2,604,351	\$ 8,391
Accrued interest	68,967	—	70,965	—
Discount	(80,025)	(147)	(70,321)	(274)
Origination costs	4,324	8	4,161	5
Outstanding recorded investment	2,806,118	9,461	2,609,156	8,122
Allowance for loan losses	(498,811)	(3,870)	(475,128)	(2,345)
Outstanding recorded investment, net of allowance	\$2,307,307	\$ 5,591	\$2,134,028	\$ 5,777

A summary of the Company's performing and non-performing TDRs at March 31, 2014 and December 31, 2013, is as follows:

	March 31, 2014		December 31, 2013	
	Retail	Unsecured	Retail	Unsecured
	Installment	Consumer	Installment	Consumer
	Contracts	Loans	Contracts	Loans
Current	\$2,028,793	4,008	\$1,690,893	\$ 6,120
31-60 days past due	500,876	1,171	556,489	875
Greater than 60 days past due (non-performing)	283,183	4,421	356,969	1,396
Total TDRs	\$2,812,852	\$ 9,600	\$2,604,351	\$ 8,391

A loan that has been classified as a TDR remains so until the loan is liquidated through payoff or charge-off. Consistent with other of the Company's retail installment contracts, TDRs are placed on nonaccrual status when the account becomes past due more than 60 days, and return to accrual status when the account is 60 days or less past due. Average recorded investment and income recognized on TDR loans are as follows:

	Three Months Ended		March 31, 2013	
	March 31, 2014		March 31, 2013	
	Retail	Unsecured	Retail	Unsecured
	Installment	Consumer	Installment	Consumer
	Contracts	Loans	Contracts	Loans
Average outstanding recorded investment in TDRs	\$2,707,637	\$ 8,996	\$1,556,410	\$ —
Interest income recognized	\$120,451	\$ 329	\$92,141	\$ —

TDR Impact on Allowance for Loan Losses

Prior to a loan being classified as a TDR, the Company generally estimates an appropriate allowance for loan loss based on delinquency status, the Company's historical loss experience, estimated values of underlying collateral, and various economic factors. Once a loan has been classified as a TDR, impairment is measured based on present value of expected future cash flows considering all available evidence, including collateral values.

The following table summarizes the financial effects of loan modifications accounted for as TDRs that occurred during the three-months ended March 31, 2014 and 2013 (dollars in thousands):

	Three Months Ended		March 31,
	March 31, 2014		2013
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts
Troubled Debt Restructurings:			
Outstanding recorded investment before TDR	\$624,009	\$ 11,495	\$ 290,861
Outstanding recorded investment after TDR	\$581,053	\$ 11,336	\$ 288,841
Number of contracts	39,229	14,829	20,474

Loan modifications accounted for as TDRs within the previous 12 months that subsequently defaulted during the three-months ended March 31, 2014 and 2013 are summarized in the following table:

	Three Months Ended		March 31,
	March 31, 2014		2013
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts
Troubled debt restructurings that subsequently defaulted	\$ 11,389	\$ —	\$ 10,072
Number of contracts	1,348	—	822

TDRs that have subsequently defaulted but are currently active are written down to estimated collateral value less cost to sell. As of March 31, 2014, the principal writedown on active TDRs totaled approximately \$50,832.

4. Leased Vehicles, net

Leased vehicles consisted of the following as of March 31, 2014 and December 31, 2013:

	March 31, 2014	December 31, 2013
Leased vehicles	\$3,603,848	\$2,402,052
Origination fees and other costs	1,927	2,716
Manufacturer subvention payments	(407,424)	(259,152)
	3,198,351	2,145,616
Depreciation	(241,441)	(122,183)
	\$2,956,910	\$2,023,433

The following summarizes the future minimum rental payments due to the Company as lessor under operating leases as of March 31, 2014:

Remainder of 2014	\$417,563
2015	529,880
2016	366,658
2017	25,961

2018	14
Thereafter	—
Total	\$ 1,340,076

5. Debt

Revolving Credit Facilities

The following table presents information regarding credit facilities as of March 31, 2014 and December 31, 2013:

March 31, 2014

Total revolving credit facilities		\$8,099,773	\$15,273,673		\$4,490,044	\$ 89,118

(a) One-fourth of any outstanding balance on this facility matures in each of the following months: April 2014, November 2014, March 2015, and November 2015.

(b) This line is held exclusively for Chrysler Capital retail loan and lease financing, with lease financing comprising no more than 50% of the outstanding balance upon advance.

(c) This line is held exclusively for unsecured consumer term loans.

(d) The repurchase facility is also collateralized by securitization bonds and residuals retained by the Company. No portion of this facility is unsecured. This facility has rolling 30-day and 90-day maturities.

(e) This line is collateralized by residuals retained by the Company.

(f) This line is collateralized by securitization notes payable retained by the Company.

(g) These lines are also collateralized by securitization notes payable and residuals retained by the Company. As of March 31, 2014 and December 31, 2013, \$2,216,127 and \$1,123,354 of the aggregate outstanding balances on these facilities were unsecured.

Facilities with Third Parties

The warehouse lines and repurchase facility are fully collateralized by a designated portion of the Company's retail installment contracts (Note 2) and leased vehicles (Note 4) and securitization residuals and notes payable retained by the Company. The Company was in compliance with all covenants related to these financing arrangements at March 31, 2014.

Lines of Credit with Santander and Related Subsidiaries

Through its New York branch, Santander provides the Company with \$4,500,000 of long-term committed revolving credit facilities. Through SHUSA, under an agreement entered into on March 6, 2014, Santander provides the Company with an additional \$300,000 of committed revolving credit, collateralized by residuals retained on its own securitizations. The fundings through the New York branch and through SHUSA are collectively known as the "Santander Credit Facilities."

The facilities offered through the New York branch are structured as three and five year floating rate facilities, with current maturity dates of December 31, 2016 and 2018. Santander has the option to continue to renew the term of these facilities annually going forward, thereby maintaining the three and five year maturities. These facilities currently permit unsecured borrowing but generally are collateralized by retail installment contracts and retained residuals. Any secured balances outstanding under the facilities at the time of their maturity will amortize to match the maturities and expected cash flows of the corresponding collateral.

Secured Structured Financings

The following table presents information regarding secured structured financings as of March 31, 2014 and December 31, 2013:

March 31, 2014						
	Original Estimated Maturity Date(s)	Balance	Initial Note Amounts Issued	Initial Weighted Average Interest Rate	Collateral	Restricted Cash
2010 Securitizations	October 2016 - November 2017	\$509,699	\$4,671,749	1.04%-1.44%	\$941,754	\$206,218
2011 Securitizations	October 2015-September 2017	843,443	5,605,609	1.21%-2.80%	1,208,325	179,484

2013 Private issuances	2018-September 2020	2,868,353	2,693,754	1.13%-1.38%	3,554,569	97,100
Privately issued amortizing notes		3,780,721	8,136,587		4,876,685	145,000
Total secured structured financings		\$15,195,887	\$33,127,485		\$19,133,315	\$1,280,881

Notes Payable — Secured Structured Financings

The principal and interest on secured structured financings are paid using the cash flows from the underlying retail installment contracts, loans and leases, which serve as collateral for the notes. Accordingly, the timing of the principal payments on these notes is dependent on the payments received on the underlying collateral.

Most of the Company's secured structured financings are in the form of public, SEC-registered securitizations. The Company also executes private securitizations under Rule 144A of the Securities Act and periodically issues private term amortizing notes, which are structured similarly to securitizations but are acquired by banks and conduits. Historically, all of the Company's securitizations and private issuances have been collateralized by vehicle retail installment contracts and loans; however, in 2013, the Company issued its first amortizing notes backed by vehicle leases. As of March 31, 2014, the Company had private issuances of notes backed by vehicle leases totaling approximately \$1,396,011.

Unamortized debt issuance costs are amortized as interest expense over the terms of the related notes payable using a method that approximates the effective interest method. Amortization of premium or accretion of discount on acquired notes payable is also included in interest expense using a method that approximates the effective interest method, over the estimated remaining life of the acquired notes. Total interest expense on secured structured financings for the three months ended March 31, 2014 and 2013 was \$59,862 and \$57,710, respectively.

6. Asset Securitizations

The Company transfers retail installment contracts and leased vehicles into newly formed Trusts which then issue one or more classes of notes payable backed by the collateral. The Company's continuing involvement with the credit facilities and Trusts are in the form of servicing loans held by SPEs and, except for the Chrysler Capital securitizations, through holding a residual interest in the SPE. These transactions are structured without recourse. The Trusts are considered VIEs under U.S. GAAP and, except for the Chrysler Capital securitizations, are consolidated because the Company has: (a) power over the significant activities of the entity as servicer of its financial assets and (b), because of the residual interest and in some cases debt securities held by the Company, an obligation to absorb losses or the right to receive benefits from the VIE which are potentially significant to the VIE. The Company did not retain any debt or equity interests in the Chrysler Capital securitizations executed in 2013 and 2014, and recorded these transactions as sales of the associated retail installment contracts.

The collateral, borrowings under credit facilities and securitization notes payable of the consolidated Trusts remain on the consolidated balance sheets. The Company recognizes finance charges and fee income on the retail installment contracts and leased vehicles and interest expense on the debt, and records a provision for loan losses to cover probable inherent losses on the contracts. All of the Trusts are separate legal entities and the collateral and other assets held by these subsidiaries are legally owned by them and are not available to other creditors.

The following table summarizes the assets and liabilities related to VIEs included in the Company's consolidated financial statements:

	March 31, 2014	December 31, 2013
Restricted cash	\$1,550,657	\$1,370,174
Retail installment contracts, net	19,910,992	19,166,392
Various other assets	3,695,594	2,564,902
Notes payable	25,514,661	23,810,950
Various other liabilities	49,412	25,682

A summary of the cash flows received from on-balance sheet securitization trusts during the three months ended March 31, 2014 and 2013, is as follows:

	Three Months Ended March 31, 2014	March 31, 2013
Receivables securitized	\$3,316,248	\$2,803,734
Net proceeds from new securitizations	\$2,734,093	\$2,450,000
Cash received for servicing fees	145,772	101,588
Cash received upon release from reserved and restricted cash accounts	749	3,419
Net distributions from Trusts	320,861	327,567
Total cash received from securitization trusts	\$3,201,475	\$2,882,574

The Company retains servicing responsibility for receivables transferred to the Trusts and receives a monthly servicing fee on the outstanding principal balance. Supplemental fees, such as late charges, for servicing the receivables are reflected in fees, commissions and other income. As of March 31, 2014 and December 31, 2013, the Company was servicing \$22,936,058 and \$21,935,874, respectively, of gross retail installment contracts that have been transferred to consolidated Trusts. The remainder of the Company's retail installment contracts is either pledged in private issuances or warehouse facilities or unpledged.

During the three months ended March 31, 2014, the Company sold \$774,183 of gross retail installment contracts in off-balance sheet securitizations for a gain of approximately \$32,538. As of March 31, 2014 and December 31, 2013,

the Company was servicing \$1,681,856 and \$1,017,756, respectively, of gross retail installment contracts that have been sold in these off-balance sheet Chrysler Capital securitizations.

7. Derivative Financial Instruments

Certain of the Company's interest rate swap agreements are designated as cash flow hedges for accounting purposes. The Company's remaining interest rate swap agreements, as well as its interest rate cap agreements, the corresponding options written in to offset the interest rate cap agreements, and a total return swap, are not designated as hedges for accounting purposes. The underlying notional amounts and aggregate fair values of these agreements at March 31, 2014 and December 31, 2013, were as follows:

	March 31, 2014		December 31, 2013	
	Notional	Fair Value	Notional	Fair Value
Interest rate swap agreements designated as cash flow hedges	\$5,142,500	\$(2,230)	\$3,873,000	\$(5,686)
Interest rate swap agreements not designated as hedges	3,237,133	(26,205)	3,444,459	(31,360)
Interest rate cap agreements	4,929,458	43,599	4,616,960	28,274
Options for interest rate cap agreements	4,929,458	(43,680)	4,616,960	(28,389)
Total return swap	250,594	—	—	—

The aggregate fair value of the interest rate swap agreements was included on the Company's consolidated balance sheets in other assets and other liabilities, as appropriate. The interest rate cap agreements were included in other assets and the related options in other liabilities on the Company's consolidated balance sheets.

In March 2014, the Company entered into a financing arrangement with a third party where by the Company pledged certain bonds retained in its own securitizations in exchange for approximately \$250,594 in cash. In conjunction with the financing arrangement, the Company entered into a total return swap related to the bonds as an effective avenue to monetize the Company's retained bonds as a source of financing. The Company will receive the fixed return on the bonds in exchange for paying a variable rate of three-month LIBOR plus 75 basis points. In addition, at maturity, the Company will receive a payment from, or make a payment to, the counterparty based on the change in fair value of the bonds during the one-year term of the facility. Throughout the term of the facility, the party in a net liability position must post collateral. The Company has the ability to substitute collateral and may do so if a bond is set to begin amortizing. Alternatively, the amortization may be utilized to reduce the notional amount of the facility.

The Company enters into legally enforceable master netting agreements which reduce risk by permitting netting of transactions, such as derivatives and collateral posting, with the same counterparty on the occurrence of certain events. A master netting agreement allows two counterparties the ability to net-settle amounts under all contracts, including any related collateral posted, through a single payment. The right to offset and certain terms regarding the collateral process, such as valuation, credit events and settlement, are contained in ISDA master agreements.

Information on the offsetting of derivative assets and derivative liabilities due to the right of offset was as follows, as of March 31, 2014 and December 31, 2013:

	Offsetting of Financial Assets			Gross Amounts Not Offset in the Consolidated Balance Sheet

The Company is the holder of a warrant that gives it the right, if certain vesting conditions are satisfied, to purchase additional shares in a company in which it has a cost method investment. This warrant was issued in 2012 and is carried at its estimated fair value of zero at March 31, 2014 and December 31, 2013.

The gross gains (losses) reclassified from accumulated other comprehensive income to net income, and gains (losses) recognized in net income, are included as components of interest expense. The Company's interest rate swap agreements had effects on its consolidated statements of income and comprehensive income for the three months ended March 31, 2014 and 2013 as follows:

	March 31, 2014		
	Gross Gains (Losses)		Gross Gains (Losses)
	Recognized in		Reclassified From
	Gains (Losses)		Accumulated Other
	Recognized in Comprehensive		Comprehensive Income
	Interest Expense		To Interest Expense
Interest rate swap agreements designated as cash flow hedges	\$138	\$ 654	\$ (2,664)
Derivative instruments not designated as hedges	\$5,189		

	March 31, 2013		
	Gross Gains (Losses)		Gross Gains (Losses)
	Recognized in		Reclassified From
	Gains (Losses)		Accumulated Other
	Recognized in		Comprehensive
	Interest Expense		to Interest Expense
Interest rate swap agreements designated as cash flow hedges	\$—	\$ (505) \$ (4,995
Derivative instruments not designated as hedges	\$6,657		

The ineffectiveness related to the interest rate swap agreements designated as cash flow hedges was not material for the three months ended March 31, 2014 and 2013.

8. Other Assets

Other assets were comprised as follows:

	March 31, 2014	December 31, 2013
Upfront fee (a)	\$136,250	\$140,000
Inventory of repossessed vehicles	137,648	129,323
Manufacturer subvention payments receivable (a)	111,075	55,579
Derivative assets (Note 7)	46,666	29,875
Indemnification payments receivable (b)	8,603	8,603
Other	81,451	46,925
	\$521,693	\$410,305

(a) These amounts relate to the Chrysler agreement. The Company paid a \$150,000 upfront fee at the effective date of the agreement. This fee is being amortized into finance and other interest income over the ten-year term of the agreement. As the preferred financing provider for Chrysler, the Company is entitled to subvention payments on loans and leases with below-market customer payments.

(b) This amount represents tax indemnification payments to the original equity investors in two investment partnerships now owned by the Company. These payments are expected to be recovered through tax refunds passed through to the Company as the original investors recognize losses related to the investments.

9. Income Taxes

The Company makes its best estimate to arrive at an expected annual effective tax rate; this rate is evaluated quarterly or more frequently if deemed necessary. In arriving at an expected annual effective tax rate, the Company does not consider unusual or infrequent events; discrete events are accounted for in the period in which they occur and may cause a variation from the normal relationship between income tax expense and pre-tax net income.

The Company recorded income tax expense of \$48,041 (37.1% effective tax rate) and \$152,798 (34.6% effective tax rate) during the three months ended March 31, 2014 and 2013, respectively. The effective tax rate increased primarily due to the non-recurrence of a partial release of a valuation allowance during the three months ended March 31, 2013.

Significant judgment is required in evaluating and reserving for uncertain tax positions. Although management believes adequate reserves have been established for all uncertain tax positions, the final outcomes of these matters may differ. Reserves for uncertain tax positions are adjusted as events occur and as new information arises. Reserves are released as statutes of limitations close. Additional interest on uncertain tax positions is accrued quarterly. The provision for income taxes includes a reserve for uncertain tax positions as well as the associated penalties and net interest accrued.

The Company is currently under audit in various tax jurisdictions for various years. Although the outcomes are uncertain, a reserve for potential liabilities has been established based on the best available information as to the audit outcomes. As audits are finalized, any excess reserves are released or any additional liabilities due exceeding reserves are expensed at the time the outcome is made known. Management does not believe the outcome of any current tax audits, individually or combined, will have a material effect on the results of operations. Reserves for potential tax assessments are included in the provision for income taxes.

10. Commitments and Contingencies

In connection with the sale of retail installment contracts through securitizations, the Company has made standard representations and warranties customary to the consumer finance industry. Violations of these representations and warranties may require the Company to repurchase loans previously sold. As of March 31, 2014, the Company had no repurchase requests outstanding. In the opinion of management, the potential exposure of other recourse obligations related to the Company's retail installment contract sales agreements will not have a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

The Company has a letter of credit facility with Santander — New York Branch totaling \$500,000 at March 31, 2014 and December 31, 2013. The amount issued was zero as of March 31, 2014 and December 31, 2013. The letters of credit can serve as collateral for certain warehouse lines. These commitments will expire on December 31, 2014.

Santander has provided guarantees on the covenants, agreements, and obligations of the Company under the governing documents of its warehouse facilities and privately issued amortizing notes. These guarantees are limited to the obligations of SCUSA as servicer.

The Company committed to purchase certain new advances of unsecured revolving financings originated by a third party retailer, along with existing balances on accounts with new advances, for an initial term ending in April 2020. The Company also is required to make a profit-sharing payment to the retailer each month.

Under terms of the agreement with Chrysler, the Company must make revenue sharing payments to Chrysler and also must make loss-sharing payments when residual losses on leased vehicles exceed a specified threshold.

The Company is obligated to make purchase price holdback payments to a third party originator of loans that it purchases on a periodic basis, when losses are lower than originally expected.

The Company has a flow agreement with Bank of America whereby the Company is committed to sell up to \$300,000 of eligible loans to the bank each month through May 31, 2018. The Company retains servicing on all sold loans and will receive or pay a servicer performance payment if yields, net of credit losses, on the loans are higher or lower, respectively, than expected at origination.

The Company has an agreement with Santander Bank N.A. ("SBNA," formerly Sovereign Bank), a subsidiary of SHUSA, whereby the Company provides SBNA the first right to review and assess Chrysler dealer lending opportunities and, if SBNA elects, to provide the proposed financing. The Company provides servicing on all loans originated under this arrangement. The Company received a \$9,000 referral fee in June 2013 in connection with this arrangement and is amortizing the fee into income over the ten-year term of agreement. The Company also will receive or pay a servicer performance payment if yields, net of credit losses, on the loans are higher or lower, respectively, than expected at origination. At the end of each quarter, the Company has the first right to originate loans in an amount equal to the amount of originations the Company made during the quarter due to SBNA decline or a failure to timely respond. Throughout the year, these amounts aggregate if the Company does not exercise its right of first refusal. At the end of each year, any amounts not used expire and do not roll over to the next year. As of March 31, 2014 and December 31, 2013, approximately \$347,247 and \$202,494 had been originated by SBNA under this agreement, and SCUSA had not exercised its right to originate additional loans.

The Company also has agreements with SBNA to service recreational and marine vehicle portfolios. These agreements call for a periodic retroactive adjustment, based on cumulative return performance, of the servicing fee rate to inception of the contract. The adjustment for the three months ended March 31, 2014 and 2013 was a downward adjustment of \$1,920 and zero, respectively.

The Company also provides SBNA with the first right to review and approve consumer vehicle lease applications. As of March 31, 2014, the Company was required to make SBNA whole on approximately \$36,187 of leases that had been originated by SBNA under this program but were subsequently determined not to meet SBNA's underwriting requirements.

On July 3, 2013, the Company entered into a purchase agreement and amended a servicing agreement with a peer-to-peer unsecured lending platform company from which the Company already was acquiring prime amortizing term unsecured consumer loans. Under terms of the new agreements, the Company has committed to purchase at least the lesser of \$30,000 per month or 75% of the lending platform company's near-prime originations through July 2015, and the lesser of \$30,000 per month or 50% of the lending platform company's near-prime originations thereafter through July 2017. This commitment can be reduced or cancelled with 90 days' notice.

Periodically, the Company is party to or otherwise involved in other legal proceedings arising in the normal course of business. The Company does not believe that there are any proceedings threatened or pending, if determined adversely, that would have a material adverse effect on the consolidated financial position, results of operations, or liquidity of the Company.

11. Related-Party Transactions

Related-party transactions not otherwise disclosed in these footnotes to the consolidated financial statements include the following:

The Company has a line of credit agreement with Santander — New York Branch (Note 5). Interest expense on these lines of credit totaled \$24,874 and \$6,494 for the three months ended March 31, 2014 and 2013, respectively. Accrued interest was \$10,119 and \$11,435 at March 31, 2014 and December 31, 2013, respectively.

During the first quarter of 2014, the Company established a line of credit agreement with SHUSA (Note 5). Interest expense on this line of credit totaled \$363 for the three months ended March 31, 2014. Accrued interest was \$213 as of March 31, 2014.

The Company has a letter of credit facility with Santander — New York Branch (Note 10). Letter of credit fees for the used and unused portions, which are included as a component of interest expense, totaled \$125 and \$144 for the three months ended March 31, 2014 and 2013, respectively. Accrued fees totaled \$125 and \$128 at March 31, 2014 and December 31, 2013, respectively.

The Company has derivative financial instruments with Santander and affiliates with outstanding notional amounts of \$12,580,549 and \$10,461,378 at March 31, 2014 and December 31, 2013, respectively (Note 7). Interest expense on these agreements, which is included as a component of interest expense, totaled \$8,881 and \$4,874 for the three months ended March 31, 2014 and 2013, respectively.

During 2013, the Company sold approximately \$222,384 of the Company's receivables from dealers to SBNA. The Company continues to service these loans but the loans are not subject to the servicer performance payment that applies to dealer loans originated under the SBNA flow agreement, described in Note 10. Servicing fee income recognized on receivables from dealers sold to SBNA or originated by SBNA totaled \$1,265 for the three months ended March 31, 2014, including \$464 in servicer performance payments on loans originated by SBNA. Other information on the dealer loan portfolio serviced for SBNA as of March 31, 2014 and December 31, 2013 is as follows:

	March 31, 2014	December 31, 2013
Total serviced portfolio	\$676,856	\$513,684
Cash collections due to owner	\$8,830	\$6,941
Servicing fees receivable	\$997	\$817

The Company also has agreements with SBNA to service auto retail installment contracts and recreational and marine vehicle portfolios. Servicing fee income recognized under these agreements totaled \$865 and \$6,214 for the three

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

months ended March 31, 2014 and 2013, respectively. Other information on the serviced auto loan and retail installment contract portfolios for SBNA as of March 31, 2014 and December 31, 2013 is as follows:

	March 31, 2014	December 31, 2013
Total serviced portfolio	\$1,096,905	\$1,175,566
Cash collections due to owner	\$32,698	\$32,831
Servicing fees receivable (refundable)	\$661	\$(3,163)

During 2014, the Company entered into a flow agreement with SBNA whereby SBNA has the first right to review and approve Chrysler Capital consumer vehicle lease applications. SCUSA may review any applications declined by SBNA for the Company's own portfolio. The Company provides servicing and receives an origination fee on all leases originated under this agreement. Origination and service fee income recognized on leases originated and serviced for SBNA totaled \$3,685 and \$94, respectively, for the three months ended March 31, 2014. Other information on the consumer vehicle lease portfolio serviced for SBNA as of March 31, 2014 is as follows:

Total serviced portfolio	\$	241,878
Cash collections due to owner	\$	260
Origination and servicing fees receivable	\$	4,780
Lease originations receivable	\$	16,123

Produban Servicios Informaticos Generales S.L., a Santander affiliate, is under contract with the Company to provide professional services, telecommunications, and internal and/or external applications. Expenses incurred, which are included as a component of data processing, communications and other expenses, totaled \$22 and \$38 for the three month periods ended March 31, 2014 and 2013, respectively.

During the three months ended March 31, 2014, the Company originated \$704 in unsecured revolving loans under terms of entered into a Master Services Agreement (MSA) with a company in which it has a cost method investment and holds a warrant to increase its ownership if certain vesting conditions are satisfied. The MSA enables SCUSA to review credit applications of retail store customers.

The Company paid expenses totaling zero and \$381 for the three months ended March 31, 2014 and 2013, respectively, on behalf of the former managing member of the investment partnerships described in note 8. The former managing member is an investor in Auto Finance Holdings.

12. Computation of Basic and Diluted Earnings per Common Share

Earnings per common share is computed using the two-class method required for participating securities. Restricted stock awards are considered to be participating securities because holders of such shares have non-forfeitable dividend rights in the event of a declaration of a dividend on the Company's common shares.

We have excluded 28,000 employee stock option awards from the calculation of earnings per share for the three months ended March 31, 2014, because the effect would be anti-dilutive.

	Three Months Ended March 31,	
	2014	2013
Earnings per common share		
Net income attributable to SCUSA	81,466	290,402
Weighted average number of common shares outstanding before restricted participating shares (in thousands)	347,518	346,165
Weighted average number of participating restricted common shares outstanding (in thousands)	584	—
Weighted average number of common shares outstanding (in thousands)	348,102	346,165
Earnings per common share	\$0.23	\$0.84
Earnings per common share - assuming dilution		
Net income attributable to SCUSA	81,466	290,402
Weighted average number of common shares outstanding (in thousands)	348,102	346,165
Effect of employee stock-based awards (in thousands)	8,223	—
Weighted average number of common shares outstanding - assuming dilution (in thousands)	356,325	346,165
Earnings per common share - assuming dilution	\$0.23	\$0.84

13. Fair Value of Financial Instruments

Fair value estimates, methods, and assumptions are as follows:

	March 31, 2014		December 31, 2013	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Cash and cash equivalents (a)	\$112,835	\$112,835	\$10,531	\$10,531
Receivables held for sale (b)	171,466	176,425	82,503	83,344
Retail installment contracts held for investment, net (c)	21,087,173	21,644,945	20,219,609	21,465,236
Unsecured consumer loans, net (d)	1,000,545	1,071,108	954,189	1,187,286
Receivables from dealers held for investment (e)	108,200	108,200	94,745	94,745
Restricted cash (a)	1,830,392	1,830,392	1,563,613	1,563,613
Notes payable — credit facilities (f)	9,573,726	9,573,726	8,099,773	8,099,773
Notes payable — secured structured financings (g)	15,783,587	15,924,794	15,195,887	15,565,013

- (a) Cash and cash equivalents and restricted cash — The carrying amount of cash and cash equivalents, including restricted cash, approximated fair value at March 31, 2014 and December 31, 2013, due to the short maturity of these instruments and is considered a Level 1 measurement.
- (b) Receivables held for sale — Receivables held for sale are carried at the lower of cost or market, as determined on an aggregate basis. The estimated fair value is based on the prices obtained or expected to be obtained in the subsequent sales and is considered a Level 1 measurement.
- (c) Retail installment contracts held for investment — Retail installment contracts are carried at amortized cost, net of loan loss allowance. The estimated fair value is calculated based on estimated market rates for similar contracts with similar credit risks and is considered a Level 3 measurement.
- (d) Unsecured consumer loans, net — Unsecured consumer loans are carried at amortized cost, net of loan loss allowance. Carrying value approximates fair value for unsecured revolving loans because the loans are short term in duration, do not have a defined maturity date and/or are at a market-based interest rate. For unsecured amortizing loans, the estimated fair value is calculated based on estimated market rates for similar loans with similar credit risks and is considered a level 3 measurement.
- (e) Receivables from dealers held for investment — Receivables from dealers held for investment are carried at amortized cost, net of loan loss allowance. The estimated fair value is calculated based on estimated market rates for similar receivables with similar credit risks and is considered a Level 3 measurement.
- (f) Notes payable — credit facilities — The carrying amount of notes payable related to revolving credit facilities is estimated to approximate fair value as of March 31, 2014 and December 31, 2013. Management believes that the terms of these credit agreements approximate market terms for similar credit agreements. The fair value of notes payable is considered a Level 3 measurement.
- (g) Notes payable — secured structured financings — The estimated fair value of notes payable related to secured structured financings is calculated based on market quotes for the Company's publicly traded debt and estimated market rates currently available from recent transactions involving similar debt with similar credit risks, and is considered a Level 2 measurement.

The following table presents the Company's assets and liabilities that are measured at fair value on a recurring basis at March 31, 2014 and December 31, 2013, and are categorized using the fair value hierarchy. The fair value hierarchy includes three levels based on the reliability of the inputs used to determine the fair value:

Fair Value Measurements at March 31, 2014				
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets — trading interest rate caps (a)	\$43,599	\$	— \$ 43,599	\$ —
Assets — cash flow hedging interest rate swaps (a)	\$2,497	\$	— \$ 2,497	\$ —
Assets — trading interest rate swaps (a)	\$570	\$	— \$ 570	\$ —
Liabilities — trading options for interest rate caps (a)	\$43,680	\$	— \$ 43,680	\$ —
Liabilities — cash flow hedging interest rate swaps (a)	\$4,727	\$	— \$ 4,727	\$ —
Liabilities — trading interest rate swaps (a)	\$26,775	\$	— \$ 26,775	\$ —
Total return swap (b)	\$—	\$	— \$ —	\$ —

Fair Value Measurements at December 31, 2013

		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Total			
Assets — trading interest rate caps (a)	\$28,274	\$	—\$ 28,274	\$ —
Assets — cash flow hedging interest rate swaps (a)	\$1,601	\$	—\$ 1,601	\$ —
Liabilities — trading options for interest rate caps (a)	\$28,389	\$	—\$ 28,389	\$ —
Liabilities — cash flow hedging interest rate swaps (a)	\$7,287	\$	—\$ 7,287	\$ —
Liabilities — trading interest rate swaps (a)	\$31,360	\$	—\$ 31,360	\$ —

(a) The valuation of swaps and caps is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivative, including the period to maturity, and uses observable market-based inputs. The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurement of its derivatives. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings and guarantees. Effective January 1, 2012, the Company made an election to use the exception in ASC 820-10-35-18D (commonly referred to as the "portfolio exception") with respect to measuring counterparty credit risk for instruments (Note 7).

(b) The total return swap is valued based on the estimated market value of the underlying bonds pledged to the associated credit facility.

No amounts were transferred in or out of Level 3 during 2014 or 2013.

The following table presents the Company's assets and liabilities that are measured at fair value on a nonrecurring basis at March 31, 2014 and December 31, 2013, and are categorized using the fair value hierarchy:

Fair Value Measurements at March 31, 2014

	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Total			

		(Level 1)		
Assets — repossessed vehicle inventory	\$ 137,648	\$	— \$ 137,648	\$ —
TDRs that have subsequently defaulted (Note 3)	\$ 49,502	\$	— \$ —	\$ 49,502

Fair Value Measurements at December 31, 2013

		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets — repossessed vehicle inventory	Total	\$ 129,323	\$ — \$ 129,323	\$ —
TDRs that have subsequently defaulted (Note 3)	\$ 40,619	\$	— \$ —	\$ 40,619

The Company estimates the fair value of its repossessed vehicle inventory using historical auction rates and current market levels of used car prices. TDRs that have subsequently defaulted but are currently active are written down to estimated collateral value less cost to sell.

14. Employee Benefit Plans

SCUSA Compensation Plan — Beginning in 2012, the Company granted stock options to certain executives, other employees, and independent directors under a Management Equity Plan (the “Plan”). The Plan is administered by the Board of Directors and enables the Company to make stock awards up to a total of approximately 29 million common shares (net of shares canceled and forfeited), or 8.5% of the equity invested in the Company as of December 31, 2011.

Stock options granted have an exercise price based on the estimated fair market value of the Company's common stock on the grant date. The stock options expire after ten years and include both time vesting options and performance vesting options. The fair value of the stock options is amortized into income over the vesting period as time and performance vesting conditions are met. Under the Management Shareholder Agreements entered into by certain employees, no shares obtained through exercise of stock options could be transferred until the later of December 31, 2016, and the Company's execution of an IPO (the later date of which is referred to as the Lapse Date). Until the Lapse Date, if an employee were to leave the Company, the Company would have the right to repurchase any or all of the stock obtained by the employee through option exercise. If the employee were terminated for cause (as defined in the Plan) or voluntarily left the Company without good reason (as defined in the Plan), in each case, prior to the Lapse Date the repurchase price would be the lower of the strike price or fair market value at the date of repurchase. If the employee were terminated without cause or voluntarily left the Company with good reason, in each case, prior to the Lapse Date the repurchase price is the fair market value at the date of repurchase. Management believes the Company's repurchase right caused the IPO event to constitute an implicit vesting condition and therefore did not record any stock compensation expense until the date of the IPO, January 23, 2014.

On December 28, 2013, the Board approved certain changes to the Plan and the Management Shareholders Agreement, including acceleration of vesting for certain employees, removal of transfer restrictions for shares underlying a portion of the options outstanding under the Plan, and addition of transfer restrictions for shares underlying another portion of the outstanding options. All of the changes were contingent on, and effective upon, the Company's execution of an IPO and, as such, became effective upon pricing of the IPO on January 22, 2014. Also on December 28, 2013, the Board established the Omnibus Incentive Plan, which enables the Company to grant awards of nonqualified and incentive stock options, stock appreciation rights, restricted stock awards, restricted stock units and other awards that may be settled in or based upon the value of the Company's common stock up to a total of 5,192,640 common shares. As of March 31, 2014, the Company had granted 583,890 shares of restricted stock to certain executives under terms of the Omnibus Incentive Plan. Compensation expense related to this restricted stock is recognized over a five-year vesting period, with \$604 recorded for the three months ended March 31, 2014.

On January 23, 2014, the Company executed an IPO, in which selling stockholders offered and sold to the public 85,242,042 shares of common stock at a price of \$24.00 per share. The Company received no proceeds from the initial public offering. Stock-based compensation expense totaling \$117,770 related to vested options was recognized upon the IPO, including expense related to accelerated vesting for certain executives of \$33,845.

During the three months ended March 31, 2014, the Company granted additional stock options from the Management Equity Plan to certain executives, other employees, and an independent director, with an estimated fair value of \$15,210, which will be recognized over the five-year vesting period of the awards.

A summary of the Company's stock options and related activity as of and for the three months ended March 31, 2014 is as follows:

	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)		Aggregate Intrinsic Value
		Shares	Price	

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

	(in whole dollars)			
Options outstanding at January 1, 2014	23,910,062	\$ 9.81	8.0	
Granted	1,434,834	24.03		
Exercised	(2,816,093)	9.55		(40,918)
Expired	—	—		
Forfeited	(333,177)	9.91		
Options outstanding at March 31, 2014	22,195,626	10.76	7.9	295,677
Options exercisable at March 31, 2014	15,745,500	9.87	7.8	223,821

15. Accumulated Other Comprehensive Loss

A summary of changes in accumulated other comprehensive loss, net of tax, for the three months ended March 31, 2014 and 2013 is as follows:

	Three Months Ended March 31, 2014			Three Months Ended March 31, 2013		
	Unrealized gains (losses) on cash flow hedges (a)	Unrealized gains (losses) on investments available for sale (a)	Total	Unrealized gains (losses) on cash flow hedges (a)	Unrealized gains (losses) on investments available for sale (a)	Total
Beginning balance	\$ (2,853)	\$ —	\$ (2,853)	\$ (12,416)	\$ 3,252	\$ (9,164)
Other comprehensive income (loss) before reclassifications						
reclassifications	412	—	412	(319)	(1,135)	(1,454)
Amounts reclassified out of accumulated other comprehensive income (loss) (b)	1,676	—	1,676	3,153	(321)	2,832
Ending balance	\$ (765)	\$ —	\$ (765)	\$ (9,582)	\$ 1,796	\$ (7,786)

(a) Amounts in this table are net of tax

(b) Amounts reclassified out of accumulated other comprehensive income (loss) consist of the following:

	Three Months Ended March 31, 2014		Three Months Ended March 31, 2013	
	Amount reclassified	Income statement line item	Amount reclassified	Income statement line item
Reclassification				
Cash flow hedges:				
Settlements of derivatives	\$2,664	Interest expense	\$4,995	Interest expense
Tax expense (benefit)	(988)		(1,842)	
Net of tax	\$1,676		\$3,153	
Investments available for sale:				
Discount accretion	\$—		\$ (508)	Interest expense
Tax expense (benefit)	—		187	
Net of tax	\$—		\$ (321)	

16. Subsequent Events

On April 2, 2014, SCUSA expanded its unsecured personal lending business by executing an additional agreement with LendingClub Corporation, whereby SCUSA has the first opportunity to review for its own portfolio applications that do not meet either the public credit policy or custom credit policy facilitated by Lending Club's platform.

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

On April 22, 2014, SCUSA entered into an agreement with a technology company, GreenSky Trade Credit, LLC, whereby GreenSky will facilitate SCUSA's origination of turn-down loans in the retail home improvement space.

On April 22, 2014, SCUSA executed an application transfer agreement with an original equipment manufacturer (OEM), whereby SCUSA will provide nonprime retail auto financing through a turn-down program for new and used vehicles for the OEM's customers and dealers in the U.S.

On May 1, 2014, SCUSA's Board of Directors declared a cash dividend of \$0.15 per share to be paid on May 30, 2014 to shareholders of record as of the close of business on May 12, 2014.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Background and Overview

We are a full-service, technology-driven consumer finance company focused on vehicle finance and unsecured consumer lending products. We believe that, since our founding in 1995, we have achieved strong brand recognition in the nonprime vehicle finance space. We mainly originate loans indirectly through manufacturer-franchised and selected independent automotive dealers, as well as through relationships with national and regional banks and OEMs. We also directly originate and refinance vehicle loans online. In February 2013, we entered into a ten-year agreement with Chrysler whereby we originate private-label loans and leases under the Chrysler Capital brand. With this agreement, we are now the preferred financing provider for all of Chrysler's retail consumers, including both prime and nonprime customers. From May 1, 2013, the effective date of the agreement, through March 31, 2014, 30% of our retail installment contract origination volume has been prime, as compared to only 14% in 2012, the last full year prior to our entry into the agreement. In addition, we have several relationships through which we provide unsecured consumer loans, and we have recently expanded into private label credit cards and other consumer finance products. We generate revenues and cash flows through interest and other finance charges on our loans and leases. We also earn servicing fee income on our serviced for others portfolios, which consist of loans that we service but do not own and do not report on our balance sheet.

We have demonstrated significant access to the capital markets by funding our operations through securitization transactions and committed credit lines. We raised a total of over \$26 billion of ABS for the years ended 2010 through 2013, and we have been the largest issuer of retail auto ABS in 2011, 2012, 2013, and year-to-date in 2014. We have significant bank funding relationships, with third-party banks and Santander currently providing approximately \$15.4 billion and \$4.8 billion, respectively, in committed financing. In addition, we have flow agreements in place with Bank of America and SBNA to fund Chrysler Capital business. We have produced consistent, controlled growth and robust profitability in both growth periods and economic downturns. We have been profitable every year for the past ten years, we delivered an average return on assets of 3.7% from 2009 to 2013 and a return on total common equity of more than 27% in each of those years.

Economic and Business Environment

Consistent with indicators throughout 2013, the U.S. economy continued its slow-paced recovery during the first quarter of 2014. According to the Bureau of Labor Statistics, unemployment remained at 6.7% throughout the quarter. The Federal Reserve continues to taper its bond purchases. After a slow start to the year due to poor weather conditions, vehicle sales were strong in March and are on pace to total 16.4 million for the year. Wholesale used vehicle prices also rose near the end of the quarter and are up over 3% year over year.

Regulatory Matters

The U.S. lending industry is highly regulated under various U.S. federal laws, including the Truth-in-Lending, Truth-in-Savings, Equal Credit Opportunity, Fair Credit Reporting, Fair Debt Collection Practices Service Members Civil Relief, and Unfair and Deceptive Practices Acts, as well as various state laws. We are subject to inspections, examinations, supervision, and regulation by each state in which we are licensed, the Consumer Financial Protection Bureau ("CFPB"), and the Federal Trade Commission. In addition, because our largest shareholder is a bank holding company, we are subject to certain bank regulations, including oversight by the Office of the Comptroller of the Currency, the Bank of Spain, and the Federal Reserve, which may have the ability to limit certain of our activities, such as the timing and amount of dividends and certain transactions that we might otherwise desire to enter into, such as merger and acquisition opportunities, or to impose other limitations on our growth.

Dodd-Frank Wall Street Reform and Consumer Protection Act

At the federal level, Congress enacted comprehensive financial regulatory reform legislation on July 21, 2010. A significant focus of the new law (the Dodd-Frank Act) is heightened consumer protection. The Dodd-Frank Act established a new body, the CFPB, which has regulatory, supervisory, and enforcement powers over providers of consumer financial products and services, including us, including explicit supervisory authority to examine and require registration of non-depository lenders and promulgate rules that can affect the practices and activities of lenders.

Although the Dodd-Frank Act expressly provides that the CFPB has no authority to establish usury limits, some consumer advocacy groups have suggested that various forms of alternative financial services or specific features of consumer loan products should be a regulatory priority, and it is possible that at some time in the future the CFPB could propose and adopt rules making such lending services materially less profitable or impractical, which may impact finance loans or other products that we offer.

In March 2013, the CFPB issued a bulletin recommending that indirect vehicle lenders, a class that includes us, take steps to monitor and impose controls over dealer markup policies whereby dealers charge consumers higher interest rates, with the markup shared between the dealer and the lender.

The CFPB is also conducting supervisory audits of large vehicle lenders and has indicated it intends to study and take action with respect to possible Equal Credit Opportunity Act (“ECOA”) “disparate impact” credit discrimination in indirect vehicle finance. If the CFPB enters into a consent decree with one or more lenders on disparate impact claims, it could negatively impact the business of the affected lenders, and potentially the business of dealers and other lenders in the vehicle finance market. This impact on dealers and lenders could increase our regulatory compliance requirements and associated costs.

In addition to the grant of certain regulatory powers to the CFPB, the Dodd-Frank Act gives the CFPB authority to pursue administrative proceedings or litigation for violations of federal consumer financial laws. In these proceedings, the CFPB can obtain cease and desist orders (which can include orders for restitution or rescission of contracts, as well as other kinds of affirmative relief) and monetary penalties.

Certain banks and bank holding companies, including SHUSA, are required to perform a stress test and submit a capital plan to the Federal Reserve on an annual basis, and to receive a notice of non-objection to the plan from the Federal Reserve before taking capital actions, such as paying dividends, implementing common equity repurchase programs, or redeeming or repurchasing capital instruments. As a consolidated subsidiary of SHUSA, SCUSA is included in SHUSA’s stress tests and capital plans. On March 26, 2014, the Federal Reserve announced that, based on qualitative concerns, it objected to, and is requiring resubmission of, SHUSA’s capital plan. This action could have a negative impact on SCUSA.

Additional legal and regulatory matters affecting the Company’s activities are further discussed in part II, Item 1A—Risk Factors

Disclosure Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act

Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012, which added Section 13(r) to the Securities Exchange Act of 1934, as amended (the “Exchange Act”), an issuer is required to disclose in its annual or quarterly reports, as applicable, whether it or any of its affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with individuals or entities designated pursuant to certain Executive Orders. Disclosure is generally required even where the activities, transactions or dealings were conducted in compliance with applicable law.

SCUSA does not have any activities, transactions, or dealings with Iran or Syria which require disclosure. The following activities are disclosed in response to Section 13(r) with respect to affiliates of the Company through its relationship with Santander. During the period covered by this quarterly report:

▲ Santander UK plc (Santander UK) entity holds frozen savings and current accounts for three customers resident in the U.K. who are currently designated by the U.S for terrorism. The accounts held by each customer were blocked after the customer's designation and have remained blocked and dormant throughout 2013 and the first quarter 2014. No revenue was generated by Santander UK on these accounts.

▲ U.K. company maintained two commercial accounts at Santander UK that were used to provide payroll processing services for a UK entity that is currently designated by the U.S. under the Iran sanctions regime. The accounts may have been used to provide payroll services to other Iranian clients. Santander UK became aware of this account activity in September 2013 and exited the relationship in January 2014. No revenue was generated by Santander UK on these accounts.

▲An Iranian national, resident in the UK, who is currently designated by the U.S. and the UK under the Iranian Financial Sanctions Regulations and the NPWMD designation held a mortgage with Santander UK that was issued prior to any such designation. No further draw-down has been made (or would be allowed) under this mortgage although Santander UK continues to receive repayment installments. In the first quarter 2014, total revenue in connection with the mortgage was £14,750 while net profits were negligible relative to the overall profits of Santander UK. Santander UK does not intend to enter into any new relationships with this customer, and any disbursements will only be made in accordance with applicable sanctions. The same Iranian national also holds two investment accounts with Santander Asset Management UK Limited. The accounts remained frozen throughout 2013 and the first quarter of 2014. The investment returns are being automatically reinvested, and no disbursements have been made to the customer. Total revenue for Santander in connection with the investment accounts was £23,017, while net profits in the first quarter of 2014 were negligible relative to the overall profits of Santander.

31

In addition, Santander has certain legacy export credits and performance guarantees with Bank Mellat, which is included in the US Department of the Treasury's Office of Foreign Assets Control's Specially Designated Nationals and Blocked Persons List. Bank Mellat entered into two bilateral credit facilities in February 2000 in an aggregate principal amount of €25.9 million. Both credit facilities matured in 2012. In addition, in 2005, Santander participated in a syndicated credit facility for Bank Mellat of €15.5 million, which matures on July 6, 2015. As of March 31, 2014, Santander was owed €3.6 million under this credit facility.

Bank Mellat has been in default under all of these agreements in recent years and Santander has been and expects to continue to be repaid any amounts due by official export credit agencies, which insure between 95% and 99% of the outstanding amounts under these credit facilities. No funds have been extended by Santander under these facilities since they were granted.

Santander also has certain legacy performance guarantees for the benefit of Bank Sepah and Bank Mellat (stand-by letters of credit to guarantee the obligations - either under tender documents or under contracting agreements - of contractors who participated in public bids in Iran) that were in place prior to April 27, 2007. However, should any of the contractors default in their obligations under the public bids, Santander would not be able to pay any amounts due to Bank Sepah or Bank Mellat because any such payments would be frozen pursuant to Council Regulation (EU) No. 961/2010.

In the aggregate, all of the transactions described above resulted in approximately €60,400 gross revenues and approximately €43,000 net loss to Santander in the first quarter 2014, all of which resulted from the performance of export credit agencies rather than any Iranian entity. Santander has undertaken significant steps to withdraw from the Iranian market such as closing its representative office in Iran and ceasing all banking activities therein, including correspondent relationships, deposit taking from Iranian entities and issuing export letters of credit, except for the legacy transactions described above. Santander is not contractually permitted to cancel these arrangements without either (i) paying the guaranteed amount - which payment would be frozen as explained above (in the case of the performance guarantees), or (ii) forfeiting the outstanding amounts due to it (in the case of the export credits). As such, Santander intends to continue to provide the guarantees and hold these assets in accordance with company policy and applicable laws.

How We Assess Our Business Performance

Net income attributable to our shareholders, and the associated return on equity, are the primary metrics by which we judge the performance of our business. Accordingly, we closely monitor the primary drivers of net income:

Net financing income — We track the spread between the interest and finance charge income earned on our assets and the interest expense incurred on our liabilities, and continually monitor the components of our yield and our cost of funds. In addition, we monitor external rate trends, including the Treasury swap curve and spot and forward rates.

Net credit losses — Each of our loans and leases is priced using our risk-based proprietary models. The profitability of a loan is directly connected to whether or not the actual net credit losses are consistent with forecasted losses; therefore, we closely analyze credit performance. We perform this analysis at the vintage level for individually acquired retail installment contracts and at the pool level for purchased portfolios, enabling us to pinpoint drivers of any unusual or unexpected trends. We also monitor recovery rates, both industry-wide and our own, because of their contribution to the severity of our charge offs. Additionally, because delinquencies are an early indicator of future net credit losses, we analyze delinquency trends, adjusting for seasonality, to determine whether or not our loans are performing in line with our original estimation.

Operating expenses — We assess our operational efficiency using our cost-to-income ratio. We perform extensive analysis to determine whether observed fluctuations in operating expense levels indicate a trend or are the nonrecurring impact of large projects. Our operating expense analysis also includes a loan- and portfolio-level review

of origination and servicing costs to assist us in assessing profitability by pool and vintage.

Because volume and portfolio size determine the magnitude of the impact of each of the above factors on our earnings, we also closely monitor new business volume along with annual percentage rate (“APR”) and discounts (including subvention and net of dealer participation).

Recent Developments and Other Factors Affecting Our Results of Operations

Reorganization

In July 2013, SCUSA Illinois formed SCUSA Delaware and SCUSA Merger Sub Inc., an Illinois corporation and a wholly owned subsidiary of SCUSA Delaware (“SCUSA Merger Sub”). On January 16, 2014, pursuant to an Agreement and Plan of Merger by and among SCUSA Illinois, SCUSA Delaware and SCUSA Merger Sub, SCUSA Merger Sub merged with and into SCUSA Illinois, with SCUSA Illinois surviving the merger as a wholly owned subsidiary of SCUSA Delaware, the registrant. In the merger, all of the outstanding shares of common stock of SCUSA Illinois were exchanged for shares of SCUSA Delaware common stock on a 2.6665 for 1.00 basis. We refer to these transactions as the “Reorganization.” The Reorganization did not result in any change in the business, management, jobs, fiscal year, assets, liabilities, or location of the principal facilities of SCUSA Illinois.

Initial Public Offering

On January 23, 2014, we completed an initial public offering (IPO) in which certain shareholders sold to the public 85,242,042 shares of Class A common stock at a public offering price of \$24.00 per share. We received no net proceeds from the offering.

Chrysler Capital

Effective May 1, 2013, we became the preferred provider for Chrysler’s consumer loans and leases and dealer loans under terms of a ten-year Master Private Label Financing Agreement (“Chrysler Agreement”). Business generated under terms of the Chrysler Agreement is branded as Chrysler Capital. In connection with entering into the Chrysler Agreement, we paid Chrysler a \$150 million upfront, nonrefundable fee, which is being amortized over the ten-year term as an adjustment to finance and other interest income. We have also executed an Equity Option Agreement with Chrysler, whereby Chrysler may elect to purchase an equity participation of any percentage in the Chrysler Capital portion of our business at fair market value.

Under the Chrysler Agreement, we were required to meet specific transition milestones related to market penetration rates, approval rates, dedicated staffing, and service-level standards for the initial year following launch. If the transition milestones were not met in the first year, the agreement could terminate and we could lose the ability to operate as Chrysler Capital. We recently agreed with Chrysler that these milestones have been met to Chrysler’s satisfaction as of the end of the first year, April 30, 2014, and that the Agreement will continue in effect. We must continue to meet penetration and approval rate targets and maintain service-level standards or the agreement can be terminated. Our penetration rate targets, which are measured as of the end of each year of the Chrysler Agreement (April 30), for years one through five of the Chrysler Agreement are 31%, 44%, 54%, 64% and 65%, respectively. Our penetration rate for the three months ended March 31, 2014 was 38%. During the period from the May 1, 2013 launch of the Chrysler Capital business through April 30, 2014, we originated over \$12 billion of Chrysler Capital retail installment contracts and facilitated the origination of over \$4 billion of Chrysler Capital vehicle leases. The Chrysler Agreement could also be terminated in the event of a change in control of SCUSA, which, as defined in the agreement, would occur if both a single shareholder acquired more than 20% of our outstanding shares of common stock and SHUSA owned fewer shares than that shareholder.

In addition to the various flow agreements established in 2013, in February 2014 we entered into a lease flow agreement with SBNA, whereby we provide SBNA with the first right to review and approve consumer vehicle lease applications. We continue to service the leases originated under this agreement. As of March 31, 2014, \$245 million had been originated under this agreement.

In 2014, we have made two bulk loan sales of prime Chrysler Capital loans to Citizens Bank of Pennsylvania (CBP) (a subsidiary of RBS Citizens Financial Group) totaling \$526 million. We continue to service these sold loans.

Other OEM Relationships

In April 2014, SCUSA executed an application transfer agreement with an OEM, whereby SCUSA will provide nonprime retail auto financing through a turn-down program for new and used vehicles for the OEM's customers and dealers in the U.S.

Unsecured Lending

In April 2014, SCUSA expanded its unsecured personal lending business by executing an additional agreement with LendingClub Corporation, whereby SCUSA has the first opportunity to review for its own portfolio applications that do not meet either the public credit policy or custom credit policy facilitated by Lending Club's platform.

In April 2014, SCUSA also signed an agreement with a technology company, GreenSky Trade Credit, LLC, whereby GreenSky will facilitate SCUSA's origination of turn-down loans in the retail home improvement space.

Stock Compensation

Beginning in 2012, we granted stock options to certain executives and other employees under the Santander Consumer USA Inc. 2011 Management Equity Plan (the “Management Equity Plan”). The Management Equity Plan is administered by our Board of Directors and enables us to make stock awards up to a total of approximately 29 million common shares, or 8.5% of our equity as of December 31, 2011. Stock options granted have an exercise price based on the estimated fair market value of our common stock on the grant date. The stock options expire after ten years and include both time vesting and performance vesting options. Generally, no shares obtained through exercise of stock options may be transferred until December 31, 2016; however, our Board of Directors has approved the amendment of option award agreements with respect to options previously granted under the Management Equity Plan (the “Amended Options”) and the amendment of the Management Shareholders Agreements effective as of and subject to the occurrence of an IPO to remove certain of these transfer restrictions with respect to shares underlying a portion of such outstanding options and provide for additional transfer restrictions with respect to shares underlying another portion of such outstanding options.

The fair value of the stock options is amortized into income over the vesting period as time and performance vesting conditions are met. Prior to the amendments that took effect upon the IPO, all options had a restriction such that until the later of an IPO or December 31, 2016, if an option holder terminated employment, we had the right to repurchase any or all of the stock obtained by the employee through option exercise. If the employee was terminated for cause or voluntarily left the Company without good reason, the repurchase price would be the lower of the strike price or fair market value at the date of repurchase. If the employee was terminated without cause or voluntarily left the Company with good reason, the repurchase price would be the fair market value at the date of repurchase. Management believes the Company’s repurchase right caused the IPO event to constitute an implicit vesting condition. The Company recognized approximately \$118 million of this expense on a pre-tax basis upon occurrence of the IPO, with an additional \$25 million to be recognized over the remaining vesting period.

Upon and since the IPO, we granted additional options to certain executives, other employees, and our two independent directors under terms of the Management Equity Plan. The fair value of additional options granted through March 31, 2014 is approximately \$15 million and is being amortized into income over the vesting period as time and, if applicable, performance vesting conditions are met.

In December 2013, we granted restricted shares to certain executives under the Santander Consumer USA Inc. Omnibus Incentive Plan (the “Omnibus Incentive Plan”). The Omnibus Incentive Plan is administered by our Board of Directors and enables us to grant awards of nonqualified and incentive stock options, stock appreciation rights (“SARs”), restricted stock awards, restricted stock units and other awards that may be settled in or based upon the value of our common stock up to a total of 5,192,640 common shares.

The fair value of any instruments issued under the Omnibus Incentive Plan is amortized into income over the vesting period as time and performance vesting conditions are met. As of March 31, 2014, the Company had granted 583,890 shares of restricted stock to certain executives under terms of the Omnibus Incentive Plan. Compensation expense related to this restricted stock of approximately \$12 million, based on the estimated fair market value of our common stock on the grant date, will be recognized over a five-year vesting period, with \$0.6 million recorded for the three months ended March 31, 2014.

Our Reportable Segment

The Company has one reportable segment: Consumer Finance. This segment includes our vehicle financial products and services, including retail installment contracts, vehicle leases, and dealer loans, as well as financial products and services related to motorcycles, RVs, and watercraft. It also includes our unsecured personal loan and point-of-sale

financing operations.

34

Originations and Acquisitions

Our volume of individually acquired loans and leases, including net balance increases on revolving loans, average APR, and average discount during the three months ended March 31, 2014 and 2013 have been as follows:

	Three Months Ended			
	March 31,		March 31,	
	2014		2013	
	(Dollar amounts in thousands)			
Retail installment contracts	\$5,612,636		\$2,684,891	
Average APR	13.7	%	17.4	%
Average discount	2.5	%	5.9	%
Unsecured consumer loans	\$107,902		\$203	
Average APR	20.8	%	19.6	%
Average discount	—		—	
Receivables from dealers	\$14,823		\$83,080	
Average APR	3.4	%	3.7	%
Average discount	—		—	
Leases	\$1,211,999		\$60	

We record interest income from individually acquired retail installment contracts, unsecured consumer loans and receivables from dealers in accordance with the terms of the loans, generally discontinuing and reversing accrued income once a loan becomes more than 60 days past due, except in the case of revolving unsecured loans and receivables from dealers, for which we continue to accrue interest until charge off. Receivables from dealers and term unsecured consumer loans generally are not acquired at a discount. We amortize discounts, subvention payments from manufacturers, and origination costs as adjustments to income from individually acquired retail installment contracts using the effective yield method. We amortize the discount, if applicable, on revolving unsecured consumer loans straight-line over the estimated period over which the receivables are expected to be outstanding.

For individually acquired retail installment contracts, unsecured consumer loans and receivables from dealers, we also establish a loan loss allowance for the estimated losses inherent in the portfolio. We estimate probable losses based on contractual delinquency status, historical loss experience, expected recovery rates from sale of repossessed collateral, bankruptcy trends, and general economic conditions such as unemployment rates.

We classify substantially all of our vehicle leases as operating leases. The net capitalized cost of each lease is recorded as an asset, which is depreciated straight-line over the contractual term of the lease to the expected residual value. Lease payments due from customers are recorded as income until and unless a customer becomes more than 60 days delinquent, at which time the accrual of revenue is discontinued and reversed. The accrual is resumed and reinstated if a delinquent account subsequently becomes 60 days or less past due. Subvention payments from the manufacturer, down payments from the customer, and initial direct costs incurred in connection with originating the lease are amortized straight-line over the contractual term of the lease.

Historically, our primary means of acquiring retail installment contracts was through individual acquisitions immediately after origination by a dealer. We also periodically purchase pools of receivables and had significant volumes of these purchases during the credit crisis. While we continue to pursue such opportunities when available, we did not purchase any material pools during the three months ended March 31, 2014 and 2013. All of the retail installment contracts acquired during these periods were acquired individually. For our existing purchased receivables portfolios, which were acquired at a discount partially attributable to credit deterioration since origination, we estimate the expected yield on each portfolio at acquisition and record monthly accretion income based on this expectation. We periodically re-evaluate performance expectations and may increase the accretion rate if a pool is performing better than expected. If a pool is performing worse than expected, we are required to continue to record accretion income at the previously established rate and to record a loan loss provision to account for the worsening performance.

Interest on Finance Receivables and Loans

	Three Months Ended				
	March 31,	March 31,	Increase		
	2014	2013	(Decrease)	Amount	Percent
	(Dollar amounts in thousands)				
Interest on individually acquired retail installment contracts	\$988,053	\$675,618	\$312,435	46	%
Interest on purchased receivable portfolios	68,938	135,281	(66,343)	-49	%
Interest on receivables from dealers	1,330	1,008	322	32	%
Interest on unsecured consumer loans	82,008	—	82,008	—	
Total interest on finance receivables and loans	\$1,140,329	\$811,907	\$328,422	40	%

38

Income from individually acquired retail installment contracts increased \$312 million, or 46%, from the first quarter of 2013 to the first quarter of 2014, or slightly less than the growth in the average outstanding balance of our portfolio of these contracts by 51%, due to the larger proportion of lower-yielding prime assets in our portfolio in 2014.

Income from purchased receivables portfolios decreased \$66 million, or 49%, from the first quarter of 2013 to the first quarter of 2014, due to the continued runoff of the portfolios, as we have made no portfolio acquisitions since 2012. The average balance of the portfolios decreased from \$4.0 billion in the first quarter of 2013 to \$1.8 billion in the first quarter of 2014. The impact of the decrease in portfolio size was partially offset by increased accretion income due to improved performance on certain acquired pools.

Income from receivables from dealers increased from prior year due to the origination of Chrysler Capital dealer loans for the first time beginning in second quarter 2013.

Income from unsecured consumer loans includes interest earned on our unsecured revolving and term consumer loans, substantially all of which were originated or acquired subsequent to first quarter 2013. It also includes accretion of discount on our unsecured revolving consumer loans.

Leased Vehicle Income and Expense

	Three Months Ended		
	March 31, 2014	March 31, 2013	Increase (Decrease)
	(Dollar amounts in thousands)		
Leased vehicle income	\$147,123	\$ —	\$ 147,123
Leased vehicle expense	120,069	—	120,069
	\$27,054	\$ —	\$ 27,054

The Company began originating vehicle leases in first quarter 2013 due to the Chrysler Capital agreement effective May 1, 2013. Leased vehicle revenue includes customer payments and the accretion of manufacturer incentive payments and discounts, net of amortization of initial direct costs incurred in connection with origination of the leases and amortization of dealer participation. Leased vehicle expense includes depreciation of the leased vehicle and gains and losses on sale of vehicle upon lease termination.

Interest Expense

	Three Months Ended				
	March 31, 2014	March 31, 2013	Increase (Decrease) Amount	Percent	
	(Dollar amounts in thousands)				
Interest expense on notes payable	\$115,603	\$77,298	\$38,305	50	%
Interest expense on derivatives	8,843	5,699	3,144	55	%
Total interest expense	\$124,446	\$82,997	\$41,449	50	%
Average debt outstanding	\$24,570,719	\$16,296,712	\$8,274,007	51	%

Interest expense on notes payable increased \$38 million, or 50%, from the first quarter of 2013 to the first quarter of 2014, less than the growth in average debt outstanding of 51%, due to the more favorable interest rates on our most recent secured structured financings.

Interest expense on derivatives increased \$3 million, or 55%, from the first quarter of 2013 to the first quarter of 2014, due to \$1.6 million less favorable positive impact of mark-to-market adjustments on trading derivatives in 2014 as compared to 2013, as interest rates moved less favorably on our positions. We also incurred approximately \$1.6 million more interest expense on our derivatives due to an increasing notional balance outstanding.

Provision for Loan Losses

	Three Months Ended			
	March 31, 2014	March 31, 2013	Increase (Decrease) Amount	Percent
(Dollar amounts in thousands)				
Provision for loan losses on individually acquired retail installment contracts	\$656,706	\$251,641	\$405,065	161 %
Incremental increase (decrease) in allowance related to purchased receivable portfolios	(20,186)	(34,448)	14,262	-41 %
Provision for loan losses on receivables from dealers	(55)	—	(55)	
Provision for loan losses on unsecured consumer loans	62,129	—	62,129	
Provision for loan losses	\$698,594	\$217,193	\$481,401	222 %

Provision for loan losses on our individually acquired retail installment contracts increased \$405 million, or 161%, from the first quarter of 2013 to the first quarter of 2014, driven by portfolio growth and a build in coverage from 10.0% to 10.7%. Our net charge off rate increased from the first quarter of 2013 to the first quarter of 2014 due to increased competition having made it more difficult for lenders, including us, to price for incremental risk.

The allowance for purchased receivables decreased \$20 million in the first quarter of 2014 as compared to \$34 million in the first quarter of 2013, as we continue to see performance improve relative to expectations as certain portfolios age.

We began recording provision on receivables from dealers and unsecured consumer loans in the second quarter of 2013 due to our entry into the Chrysler dealer loan business and the unsecured lending business. We released some provision on receivables from dealers during the first quarter of 2014 due to a decrease in estimated weighted average probability of default.

Profit Sharing

Three Months
Ended
March March
31, 31,
2014 2013
(Dollar amounts
in thousands)

Profit sharing \$32,161 \$ —

Profit sharing includes revenue sharing payments due to Chrysler Group based on a portion of net interest income on consumer loans and leased vehicle income originated under the Chrysler Capital business since May 1, 2013.

Payments are accrued as incurred and paid quarterly in arrears, beginning in July 2013. Profit sharing also includes profit sharing payments due to the originator and servicer of the Company's unsecured revolving loan portfolio.

Payments are accrued as incurred and paid monthly in arrears, beginning in June 2013.

Other Income

	Three Months Ended				
	March 31, 2014	March 31, 2013	Increase (Decrease) Amount	Percent	
	(Dollar amounts in thousands)				
Gain on sale of receivables	\$35,814	\$—	\$35,814		
Servicing fee income	10,405	7,271	3,134	43	%
Fees, commissions and other	89,304	68,858	20,446	30	%
Total other income	\$135,523	\$76,129	\$59,394	78	%
Average serviced for others portfolio	\$5,070,582	\$2,368,369	\$2,702,213	114	%
Total serviced portfolio	\$6,231,150	\$2,262,407	\$3,968,743	175	%

	March 31,	
	2014	2013
	(Dollar amounts in thousands)	
SBNA dealer loans	\$676,856	\$—
SBNA retail installment contracts	1,096,905	1,517,858
SBNA leases	241,878	—
Total serviced for related parties	2,015,639	1,517,858
Chrysler Capital securitizations	1,681,856	—
Other third parties	2,533,655	744,549
Total serviced for third parties	4,215,511	744,549
Total serviced for others	\$6,231,150	\$2,262,407

Gain on sale of receivables is primarily comprised of the gain recognized on a Chrysler Capital off-balance sheet securitization, whereby the Company sold approximately \$774 million in loans and recognized a \$32.5 million gain. The Company recognized an additional \$2.6 million gain on a bulk sale of approximately \$201 million in Chrysler Capital loans to CBP, and gains totaling approximately \$0.9 million on monthly sales totaling approximately \$710 million in Chrysler Capital loans to Bank of America under terms of a flow agreement.

We record servicing fee income on loans that we service but do not own and do not report on our balance sheet. Servicing fee income increased 43% in the first quarter of 2014 as compared to the first quarter of 2013, less than the growth in our average serviced for others portfolio, which more than doubled, due to the growth of lower-yielding recently originated prime assets as a percentage of the serviced portfolio.

Fees, commissions, and other increased \$20 million, or 30%, from the first quarter of 2013 to the first quarter of 2014, as the impact of growth in portfolio more than offset the \$26 million decline in deficiency income (proceeds on loans that were charged off prior to our acquiring them) to an insignificant amount.

Operating Expenses

	Three Months Ended			
	March 31, 2014	March 31, 2013	Increase (Decrease) Amount	Percent
	(Dollar amounts in thousands)			
Salary and benefits expense	\$201,915	\$62,547	\$139,368	223 %
Repossession expense	48,431	36,158	12,273	34 %
Other operating costs	68,102	50,169	17,933	36 %
Total operating expenses	\$318,448	\$148,874	\$169,574	114 %

Total operating expenses more than doubled from the first quarter of 2013 to the first quarter of 2014, primarily due to the recording of \$121 million in stock compensation expense related to option plans. The remaining increase is driven by growth in our portfolio.

Income Tax Expense

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

	Three Months Ended			
	March	March	Increase (Decrease)	
	31,	31,	Amount	Percent
	2014	2013		
	(Dollar amounts in thousands)			
Income tax expense	\$48,041	\$152,798	\$(104,757)	-69 %
Income before income taxes	129,507	441,657	(312,150)	-71 %
Effective tax rate	37.1 %	34.6 %		

41

Our effective tax rate increased from 34.6% in the first quarter of 2013 to 37.1% in the first quarter of 2014, primarily due to the release in the first quarter of 2013 of a portion (\$6 million) of a valuation allowance established in 2012 for capital loss carryforwards for which we did not have a plan to recognize offsetting capital gains, enabling recognition of the losses before their expiration in 2017. The deficiency balance sale in the first quarter of 2013 resulted in the expected realization for tax purposes of capital gains that partially offset the capital losses carried forward from the prior year.

Other Comprehensive Income (Loss)

	Three Months Ended			
	March 31, 2014	March 31, 2013	Increase (Decrease) Amount	Percent
(Dollar amounts in thousands)				
Increase (decrease) in unrealized gains (losses) on cash flow hedges, net of tax	\$2,088	\$2,834	\$(746)	-26 %
Increase (decrease) in unrealized gains on investments available for sale, net of tax	—	(1,456)	1,456	-100 %
Other comprehensive income (loss), net	\$2,088	\$1,378	\$710	52 %

The unrealized gains on our investments decreased in the first quarter of 2013 as the bonds continued to amortize. The bonds were paid off in August 2013.

Credit Quality

Loans and Other Finance Receivables

Nonprime loans comprise 85% of our portfolio as of March 31, 2014. We record an allowance for loan losses to cover expected losses on our individually acquired retail installment contracts and other loans and receivables. For retail installment contracts we acquired in pools subsequent to their origination, we anticipate the expected credit losses at purchase and record income thereafter based on the expected effective yield, recording a provision for loan losses only if performance is worse than expected at purchase.

Delinquency

An account is considered delinquent if a substantial portion of a scheduled payment has not been received by the date such payment was contractually due. Delinquencies may vary from period to period based upon the average age or seasoning of the portfolio, seasonality within the calendar year, and economic factors. Historically, our delinquencies have been highest in the period from November through January due to consumers' holiday spending.

The following is a summary of retail installment contracts held for investment that are (i) 31-60 days delinquent and (ii) more than 60 days delinquent but not yet in repossession:

	March 31, 2014			December 31, 2013					
	Retail Installment			Retail Installment					
	Contracts Held for			Contracts Held for					
	Investment			Investment					
	Unsecured			Unsecured					
	Consumer Loans			Consumer Loans

Average number of receivables outstanding	1,629,618	1,646,182	1,538,371	n/a

during the period (1)					
Number of repossessions (1)	56,503	n/a	43,019	n/a	
Number of repossessions as a percent of average					
number of receivables outstanding (3)	13.87	% n/a	11.19	% n/a	
Net losses	\$368,311	\$38,289	\$182,885	\$	—
Net losses as a percent of average principal					
amount outstanding (2)	6.26	% 12.87	% 3.90	% n/a	

(1) Repossessions are net of redemptions. The number of repossessions includes repossessions from the outstanding portfolio and from accounts already charged off.

(2) The percentages for the three months ended March 31, 2014 and 2013 are annualized and are not necessarily indicative of a full year's actual results.

We have had no charge offs on our receivables from dealers.

Deferrals and Troubled Debt Restructurings

In accordance with our policies and guidelines, we, at times, offer payment deferrals to borrowers on our retail installment contracts, whereby the consumer is allowed to move up to three delinquent payments to the end of the loan. Our policies and guidelines limit the number and frequency of deferrals that may be granted to one every six months and eight over the life of a loan. Additionally, we generally limit the granting of deferrals on new accounts until a requisite number of payments has been received. During the deferral period, we continue to accrue and collect interest on the loan in accordance with the terms of the deferral agreement.

At the time a deferral is granted, all delinquent amounts may be deferred or paid, resulting in the classification of the loan as current and therefore not considered a delinquent account. Thereafter, such account is aged based on the timely payment of future installments in the same manner as any other account.

The following is a summary of deferrals on our retail installment contracts held for investment as of the dates indicated:

	March 31, 2014		December 31, 2013	
	(Dollar amounts in thousands)			
Never deferred	\$18,246,628	74.8 %	\$17,532,461	75.6 %
Deferred once	3,412,264	14.0 %	2,935,099	12.7 %
Deferred twice	1,344,032	5.5 %	1,356,957	5.8 %
Deferred 3 - 4 times	1,324,496	5.4 %	1,311,791	5.7 %
Deferred greater than 4 times	66,116	0.3 %	63,033	0.3 %
Total	\$24,393,536		\$23,199,341	

We evaluate the results of our deferral strategies based upon the amount of cash installments that are collected on accounts after they have been deferred versus the extent to which the collateral underlying the deferred accounts has depreciated over the same period of time. Based on this evaluation, we believe that payment deferrals granted according to our policies and guidelines are an effective portfolio management technique and result in higher ultimate cash collections from the portfolio.

Changes in deferral levels do not have a direct impact on the ultimate amount of consumer finance receivables charged off by us. However, the timing of a charge-off may be affected if the previously deferred account ultimately results in a charge-off. To the extent that deferrals impact the ultimate timing of when an account is charged off, historical charge-off ratios, loss confirmation periods, and cash flow forecasts for loans classified as troubled debt restructurings (“TDRs”) used in the determination of the adequacy of our allowance for loan losses are also impacted. Increased use of deferrals may result in a lengthening of the loss confirmation period, which would increase expectations of credit losses inherent in the portfolio and therefore increase the allowance for loan losses and related provision for loan losses. Changes in these ratios and periods are considered in determining the appropriate level of allowance for loan losses and related provision for loan losses.

If a customer’s financial difficulty is not temporary, we may agree, or be required by a bankruptcy court, to grant a modification involving one or a combination of the following: a reduction in interest rate, a reduction in loan principal balance, or an extension of the maturity date. The servicer also may grant concessions on our unsecured consumer loans in the form of principal or interest rate reductions or payment plans. The following is a summary of the principal balance as of March 31, 2014 and December 31, 2013 of loans that have received these modifications and concessions:

	March 31, 2014		December 31, 2013	
	Retail	Unsecured	Retail	Unsecured
	Installment	Consumer	Installment	Consumer
	Contracts	Loans	Contracts	Loans
	(Dollar amounts in thousands)

Total TDRs	\$2,812,852	\$ 9,600	\$2,604,351	\$ 8,391

As of March 31, 2014 and December 31, 2013, we did not have any dealer loans classified as TDRs and had not granted deferrals or modifications on any of these loans.

Liquidity and Capital Resources

We require a significant amount of liquidity to originate and acquire loans and leases and to service debt. We fund our operations primarily through securitization in the ABS market and committed credit lines from third-party banks and Santander. In addition, we utilize large flow agreements. We seek to issue debt that appropriately matches the cash flows of the assets that we originate. We have over \$2.9 billion of stockholders' equity that supports our access to the securitization markets, credit facilities, and flow agreements.

In the first quarter of 2014, our origination volume increased to a company-record production of \$6.9 billion. We are executing more frequent securitization transactions, as well as continuing to add additional credit facilities and flow agreements, to fund the increased origination volume from our Chrysler Capital and unsecured lending business.

As of March 31, 2014, our revolving credit facilities consisted of the following (\$000s):

March 31, 2014

	Maturity Date(s)	Utilized Balance	Committed Amount	Effective Rate	Assets Pledged	Restricted Cash Pledged

Total revolving credit facilities		\$9,573,726	\$15,701,799		\$6,883,064	\$120,803

(a) As of March 31, 2014, one-fourth of the outstanding balance on this facility was scheduled to mature in each of the following months: April 2014, November 2014, March 2015, and November 2015. On April 17, 2014, the maturity of this facility was extended such that one-half of the outstanding balance now matures in each of the following months: March 2015 and March 2016.

(b) This line is held exclusively for Chrysler Capital retail loan and lease financing, with lease financing comprising no more than 50% of the outstanding balance upon advance.

(c) This line is held exclusively for unsecured consumer term loans.

(d) The repurchase facility is collateralized by bonds and residuals we retained from our own securitizations. This facility has rolling 30-day and 90-day maturities.

(e)

This line is collateralized by residuals we retained from our own securitizations.

(f) This line is collateralized by bonds we retained from our own securitizations.

(g) These lines are also collateralized by bonds and residuals we retained from our own securitizations. As of March 31, 2014, \$2.2 billion of the outstanding balances on credit facilities were unsecured.

46

Our secured structured financings primarily consist of public, SEC-registered securitizations. We also execute private securitizations under Rule 144A of the Securities Act and privately issue amortizing notes. As of March 31, 2014, our secured structured financings consisted of the following (\$000s):

March 31, 2014						
	Original Estimated Maturity Date(s)	Balance	Initial Note Amounts Issued	Initial Weighted Average Interest Rate	Collateral	Restricted Cash
2010 Securitizations	October 2016 -					
(a)	November 2017	\$509,699	\$4,671,749	1.04%-1.44%	\$941,754	\$206,218
2011 Securitizations	October					
(a)	2015-September 2017	843,443	5,605,609	1.21%-2.80%	1,208,325	179,484

Privately issued amortizing notes		4,536,388	9,368,838		6,002,330	181,133
Total secured structured financings		\$15,783,587	\$35,859,736		\$20,069,771	\$1,429,853

(a) On April 16, 2014, we provided notice of our intent to execute a clean-up call on one 2010 securitization and one 2011 securitization effective on the May 15, 2014 distribution date.

(b) On April 14, 2014, we issued \$409 million in amortizing notes backed by the residuals in certain of our public securitizations. On April 23, 2014, we issued \$1.35 billion in notes in a public securitization.

(c) On May 8, 2014, we advanced an additional \$755 million on our 2011 private issuance.

(d) On May 8, 2014, we advanced an additional \$98 million on our 2013 private issuance backed by vehicle leases.

(e) On May 8, 2014, we issued \$916 million in amortizing notes backed by retail installment contracts and leases.

In addition to our credit facilities and secured structured financings, we have flow agreements in place with Bank of America for Chrysler Capital retail installment contracts and with SBNA for Chrysler Capital consumer vehicle leases and dealer loans.

Credit Facilities

Third-party Revolving Credit Facilities

Warehouse Lines

Warehouse lines are used to fund new originations. Each line specifies the required collateral characteristics, collateral concentrations, credit enhancement, and advance rates. Our warehouse lines generally are backed by auto retail installment contracts and, in the case of the Chrysler Capital dedicated facility described below, leases. These credit lines generally have one- or two-year commitments, staggered maturities and floating interest rates. We maintain daily funding forecasts for originations, acquisitions, and other large outflows such as tax payments in order to balance the desire to minimize funding costs with our liquidity needs.

Our warehouse lines generally have net spread, delinquency, and net loss ratio limits. Generally, these limits are calculated based on the portfolio collateralizing the respective line; however, for one of our warehouse lines, delinquency and net loss ratios are calculated with respect to our serviced portfolio as a whole. Failure to meet any of these covenants could trigger increased overcollateralization requirements or, in the case of limits calculated with respect to the specific portfolio underlying certain credit lines, result in an event of default under these agreements. If an event of default occurs under one of these agreements, the lenders could elect to declare all amounts outstanding under the impacted agreement to be immediately due and payable, enforce their interests against collateral pledged under the agreement, restrict our ability to obtain additional borrowings under the agreement, and/or remove us as servicer. None of our warehouse lines currently have any ratios above their limits, and we have never had a warehouse line terminated due to failure to comply with any ratio or a failure to meet any covenant. A default under one of these agreements can be enforced only with respect to the impacted warehouse line.

In order to comply with the Chrysler Agreement's requirement that SCUSA maintain at least \$4.5 billion of financing reserved for the exclusive use of providing short-term liquidity needs to support Chrysler retail financing, we have a credit facility with seven banks providing an aggregate commitment of \$4.55 billion. The facility can be used for both loan and lease financing (with lease financing comprising no more than 50% of the outstanding balance upon advance). The facility requires reduced advance rates in the event of delinquency, net loss, or residual loss ratios exceeding specified thresholds.

Repurchase Facility

We also obtain financing through an investment management agreement whereby we pledge retained subordinate bonds on our own securitizations as collateral for repurchase agreements with various borrowers and at renewable terms ranging from 30 to 90 days. These repurchase agreements provide an aggregate commitment of approximately \$1 billion.

Our equity interests in certain of our subsidiaries have been pledged as collateral under certain of our revolving credit facilities.

Total Return Swap

Beginning in the first quarter of 2014, we also obtain financing through a total return swap whereby we pledge retained subordinate bonds on our own securitizations as collateral for a financing facility that also includes a requirement that we settle with the counterparty at maturity an amount based on the change in the fair value of the underlying bonds during the term of the facility.

Santander Credit Facilities

Santander historically has provided, and continues to provide our business with significant funding support in the form of committed credit facilities. Through its New York branch, Santander provides us with \$4.5 billion of long-term committed revolving credit facilities. Through SHUSA, under an agreement entered into on March 6, 2014, Santander provides us with an additional \$0.3 billion of committed revolving credit, collateralized by residuals retained on our own securitizations. The fundings through the New York branch and through SHUSA are collectively known as the "Santander Credit Facilities."

The facilities offered through the New York branch are structured as three and five year floating rate facilities, with current maturity dates of December 31, 2016 and 2018. Santander has the option to allow us to continue to renew the term of these facilities annually going forward, thereby maintaining the three and five year maturities. These facilities currently permit unsecured borrowing but generally are collateralized by retail installment contracts and retained

residuals. Any secured balances outstanding under the facilities at the time of their maturity will amortize to match the maturities and expected cash flows of the corresponding collateral.

There was an average outstanding balance of approximately \$4.1 billion and \$1.2 billion under the Santander Credit Facilities during the quarters ended March 31, 2014 and 2013, respectively. The maximum outstanding balance during each period was \$4.4 billion and \$1.5 billion, respectively.

Santander also has provided a \$500 million letter of credit facility with a maturity date of December 31, 2014 that we can use as credit enhancement to support increased borrowings on certain third-party credit facilities. We have not used this facility since December 2012. Santander affiliates also serve as the counterparty for many of our derivative financial instruments.

Secured Structured Financings

We obtain long-term funding for our receivables through securitization in the ABS market. ABS provides an attractive source of funding due to the cost efficiency of the market, a large and deep investor base, and tenors that appropriately match the cash flows of the debt to the cash flows of the underlying assets. The term structure of a securitization locks in fixed rate funding for the life of the underlying fixed rate assets, and the matching amortization of the assets and liabilities provides committed funding for the collateralized loans throughout their terms. Because of prevailing market rates, we did not issue ABS transactions in 2008 and 2009, but we began issuing ABS again in 2010. We have been the largest issuer of retail auto ABS in 2011, 2012, 2013, and year-to-date in 2014. SCUSA has issued a total of over \$26 billion in retail auto ABS for the years ended 2010 through 2013.

We execute each securitization transaction by selling receivables to securitization trusts (“Trusts”) that issue ABS to investors. In order to attain specified credit ratings for each class of bonds, these securitization transactions have credit enhancement requirements in the form of subordination, restricted cash accounts, excess cash flow, and overcollateralization, whereby more receivables are transferred to the Trusts than the amount of ABS issued by the Trusts.

Excess cash flows result from the difference between the finance and interest income received from the obligors on the receivables and the interest paid to the ABS investors, net of credit losses and expenses. Initially, excess cash flows generated by the Trusts are used to pay down outstanding debt in the Trusts, increasing over collateralization until the targeted percentage level of assets has been reached. Once the targeted percentage level of overcollateralization is reached and maintained, excess cash flows generated by the Trusts are released to us as distributions from the Trusts. We also receive monthly servicing fees as servicer for the Trusts. Our securitizations each require an increase in credit enhancement levels if Cumulative Net Losses, as defined in the documents underlying each ABS transaction, exceed a specified percentage of the pool balance. None of our securitizations have Cumulative Net Loss percentages above their limits.

Our on-balance sheet securitization transactions utilize bankruptcy-remote special purpose entities which are also VIEs that meet the requirements to be consolidated in our financial statements. Following a securitization, the finance receivables and the notes payable related to the securitized retail installment contracts remain on the consolidated balance sheets. We recognize finance and interest income as well as fee income on the collateralized retail installment contracts and interest expense on the ABS issued. We also record a provision for loan losses to cover probable loan losses on the retail installment contracts. While these Trusts are included in our consolidated financial statements, these Trusts are separate legal entities; thus, the finance receivables and other assets sold to these Trusts are legally owned by these Trusts, are available to satisfy the notes payable related to the securitized retail installment contracts, and are not available to our creditors or our other subsidiaries.

We have completed three securitizations year-to-date in 2014, in addition to executing six subordinate bond transactions to fund residual interests from existing securitizations. We currently have 35 securitizations outstanding in the market with a cumulative ABS balance of over \$13 billion. Our securitizations generally have several classes of notes, with principal paid sequentially based on seniority and any excess spread distributed to the residual holder. We generally retain the lowest bond class and the residual. We use the proceeds from securitization transactions to repay borrowings outstanding under our credit facilities, originate and acquire new loans and leases, and for general corporate purposes. We generally exercise clean-up call options on our securitizations when the collateralization pool balance reaches 10% of its original balance. We recently gave notice that we will be exercising this option on two of our securitizations effective on the May 15, 2014 distribution date.

We also periodically privately issue amortizing notes, in transactions that are structured similarly to our public and Rule 144A securitizations but are issued to banks and conduits. Historically, all of the Company’s securitizations and

private issuances have been collateralized by vehicle retail installment contracts and loans; however, in 2013, the Company issued its first amortizing notes backed by vehicle leases. As of March 31, 2014, the Company had private issuances of notes backed by vehicle leases totaling approximately \$1.4 billion.

Flow Agreements

In order to manage our balance sheet and provide funding for our recent significant increase in volume of originations, we are actively seeking to enter into flow agreements under which we will sell, or otherwise source to third parties, loans and leases on a periodic basis. These loans and leases will not be on our balance sheet but may provide a gain on sale and will provide a stable stream of servicing fee income.

On June 13, 2013, we entered into a flow agreement with Bank of America whereby we are committed to sell a contractually determined amount of eligible loans to Bank of America on a monthly basis. The amount sold monthly may vary depending on the amount and credit quality of eligible current month originations and prior month sales. On September 26, 2013, we amended this flow agreement to replace the maximum annual sale amounts with a monthly limit of \$300 million and to extend the term of the agreement from December 31, 2015 to May 31, 2018, such that the total maximum committed sales, \$17 billion, remains the same. For loans sold, we retain the servicing rights at contractually agreed upon rates. We also will receive or pay a servicer performance payment if net credit losses on the sold loans are lower or higher, respectively, than expected net credit losses at the time of sale. These servicer performance payments are limited to a percentage of principal balance sold or expected losses at time of sale and are not expected to be significant to our total servicing compensation from the flow agreement. As of March 31, 2014, the Company had sold approximately \$2.1 billion of loans under this agreement, including \$710 million sold during the three months ended March 31, 2014.

On June 28, 2013, we entered into a flow agreement with SBNA whereby we provide the bank with the first right to review and assess dealer lending opportunities and, if the bank elects, to provide the proposed financing. We provide servicing on all loans originated under this arrangement. We also will receive or pay a servicer performance payment if yields, net of credit losses, on the loans are higher or lower, respectively, than expected at origination. As of March 31, 2014, approximately \$347 million of loans had been originated under this agreement, including \$145 million originated during the three months ended March 31, 2014. Servicer performance payments earned for the three months ended March 31, 2014 totaled approximately \$464,000.

On February 4, 2014, we entered into a flow agreement with SBNA whereby we provide SBNA with the first right to review and approve consumer vehicle lease applications. We may review any applications declined by SBNA for our own portfolio. We provide servicing and receive an origination fee on all leases originated under this agreement. As of April 30, 2014, approximately \$432 million of leases had been originated under this agreement, of which approximately \$49 million are subject to make-whole provisions.

Off-Balance Sheet Financing

During the fourth quarter of 2013 and the first quarter of 2014, we executed a total of three Chrysler Capital-branded securitizations, all of which were executed under Rule 144A of the Securities Act. Because all of the notes and residual interests in these securitizations were issued to third parties, we recorded these transactions as true sales of the retail installment contracts securitized, and removed the sold assets from our consolidated balance sheets. We intend to execute similar transactions throughout 2014.

As of March 31, 2014, substantially all of the dealer floorplan loans originated under Chrysler Capital were held by our affiliate, SBNA, under the terms of either of two agreements, a flow agreement entered into in June 2013 and a sale agreement entered into in August 2013. In November 2013, we entered into an additional sale agreement to sell substantially all of the non-floorplan dealer loans to SBNA.

Cash Flow Comparison

We have produced positive net cash from operating activities every year since 2003. Our investing activities primarily consist of originations and acquisitions of retail installment contracts. Our financing activities primarily consist of borrowing, repayments of debt, and payment of dividends.

Three Months Ended

March 31,
2014 2013

(Dollar amounts in
thousands)

Net cash provided by operating activities	\$851,342	\$625,710
Net cash used in investing activities	\$(2,790,813)	\$(1,038,341)
Net cash provided by financing activities	\$2,041,775	\$345,767

Cash Provided by Operating Activities

For the three months ended March 31, 2014, net cash provided by operating activities of \$851 million consisted of net income of \$81 million, adjustments for non-cash items of \$693 million, net proceeds from sales and repayments of loans of \$1.2 billion, and changes in working capital of \$156 million, partially offset by net originations of loans held for sale of \$1.3 billion. Adjustments for non-cash items consisted primarily of \$699 million in provision for credit losses, \$121 million in stock compensation expense, partly offset by \$36 million in gain on sale, \$27 million in deferred tax benefit, and \$59 million in accretion of discount, net of depreciation and amortization of capitalized origination costs. Changes in working capital primarily consisted of a \$124 million increase in outstanding checks classified as a liability.

For the three months ended March 31, 2013, net cash provided by operating activities of \$626 million consisted of net income of \$289 million, adjustments for non-cash items of \$108 million, and changes in working capital of \$229 million. Adjustments for non-cash items consisted primarily of \$217 million in provision of credit losses, partially offset by \$97 million in accretion of discount and capitalized origination costs. Cash provided by changes in working capital and other activities was primarily impacted by federal, state, and other income taxes of \$154 million and accounts payable and accrued expenses and other liabilities of \$69 million.

Cash Used in Investing Activities

For the three months ended March 31, 2014, net cash used in investing activities of \$2.8 billion primarily consisted of \$5.6 billion in loan and lease originations and net balance increases on revolving lines, partially offset by \$2.3 billion in collections, \$554 million in proceeds from loan sales, and \$217 million in manufacturer incentives received. Net cash used in investing activities also includes a \$267 million increase in restricted cash.

For the three months ended March 31, 2013, net cash used in investing activities of \$1.0 billion primarily consisted of retail installment contract originations, net of collections on retail installment contracts, of \$522 million and changes in restricted cash of \$447 million.

Cash Provided by Financing Activities

For the three months ended March 31, 2014, net cash provided by financing activities of \$2.0 billion was driven by net advances of \$1.5 billion on credit facilities, in addition to net proceeds on new secured structured financings exceeding payments on secured structured financings by \$584 million.

For the three months ended March 31, 2013, net cash provided by financing activities of \$346 million was driven by net proceeds on new secured structured financings exceeding payments on secured structured financings by \$581 million, partially offset by a net use of cash for notes payable related to credit facilities of \$284 million. Also, during the first quarter of 2013, \$48 million was received from SHUSA as a capital contribution pursuant to the shareholders agreement in force at the time between SCUSA and certain of its shareholders.

Contingencies and Off-Balance Sheet Arrangements

Litigation

On September 13, 2013, Ally Financial Inc. filed suit against us in the United States District Court for the Eastern District of Michigan in a matter pending as Case No. 13-CV-13929, alleging copyright infringement and misappropriation of trade secrets and confidential information in connection with our launch of Chrysler Capital and, in particular, our offering of floorplan lines of credit to Chrysler dealerships. We consider the allegations to be without merit and intend to vigorously defend the case.

Periodically, we are party to or otherwise involved in other legal proceedings arising in the normal course of business. We have recorded no material reserves for any cases and do not believe that there are any proceedings threatened or pending that would have a material adverse effect on us if determined adversely.

Lending Arrangements

We are obligated to make purchase price holdback payments to a third-party originator of loans that we purchase on a periodic basis, when losses are lower than originally expected.

We have extended revolving lines of credit to certain auto dealers. Under this arrangement, we are committed to lend up to each dealer's established credit limit.

In March 2013, we entered into certain agreements with LendingClub under which we have the option to purchase up to 25% of LendingClub's total originations for a term of three years. In July 2013, we entered into certain additional agreements with LendingClub under which we are committed to purchase at least the lesser of \$30 million per month or 75% of the lending platform company's near-prime originations through July 2015, and the lesser of \$30 million per month or 50% of the lending platform company's near-prime originations thereafter through July 2017. This commitment can be reduced or cancelled with 90 days' notice.

In April 2013, we entered into certain agreements with Bluestem. The terms of the agreements include a commitment by us to purchase new advances originated by Bluestem, along with existing balances on accounts with new advances, for an initial term ending in April 2020. Each customer account generated under the agreements generally is approved with a credit limit higher than the amount of the initial purchase, with each subsequent purchase automatically approved as long as it does not cause the account to exceed its limit and the customer is in good standing. As these credit lines do not have a specified maturity, but rather can be terminated at any time in the event of adverse credit changes or lack of use, we have not recorded an allowance for unfunded commitments. We are required to make a monthly profit-sharing payment to Bluestem.

Flow Agreements

In June 2013, we entered into a flow agreement that, as amended in September 2013, commits us to sell up to \$300 million per month of prime loans to Bank of America. For loans sold, we retain the servicing rights at contractually agreed upon rates. We also will receive or pay a servicer performance payment if net credit losses on the sold loans are lower or higher, respectively, than expected net credit losses at the time of sale.

In June 2013, we entered into a flow agreement with SBNA whereby we provide SBNA with the first right to review and assess Chrysler dealer lending opportunities and, if SBNA elects, SBNA will provide the proposed financing. We provide servicing on all loans originated under this arrangement. We also will receive or pay a servicer performance payment if yields, net of credit losses, on the loans are higher or lower, respectively, than expected at origination.

In February 2014, we entered into a flow agreement with SBNA whereby we provide SBNA with the first right to review and approve consumer vehicle lease applications. Any applications declined by SBNA may be reviewed for our own portfolio. We provide servicing and receive an origination fee on all leases originated under this agreement.

Credit Enhancement Arrangements

In connection with the sale of retail installment contracts to securitization trusts, we have made standard representations and warranties customary to the consumer finance industry. Violations of these representations and warranties may require us to repurchase loans previously sold. As of March 31, 2014, we had no repurchase requests outstanding.

We have a letter of credit facility in the amount of \$500 million from Santander with a maturity date of December 31, 2014 that we can use as credit enhancement to support increased borrowings on certain third-party credit facilities. We have not used this letter of credit facility since December 2012.

Chrysler-related Contingencies

Throughout the ten-year term of our agreement with Chrysler, we are obligated to make quarterly payments to Chrysler representing a percentage of gross profits earned from a portion of the Chrysler Capital consumer loan and lease platform. We also are obligated to make quarterly payments to Chrysler sharing residual gains on leases in quarters in which we experience lease terminations with gains over a specified percentage threshold.

Contractual Obligations

We lease our headquarters in Dallas, Texas, our servicing centers in Texas and Colorado, and an operations facility in California under non-cancelable operating leases that expire at various dates through 2026.

Risk Management Framework

SCUSA has established a risk governance structure that assigns responsibility for risk management among front-line business personnel, an independent risk management function, and internal audit. According to this model, business owners maintain responsibility for identifying and mitigating the risks generated through their business activities. The Chief Compliance and Risk Officer (CCRO), who reports to the Chief Executive Officer (CEO) and is independent of any business line, is responsible for developing and maintaining a risk framework that ensures risks are appropriately identified and mitigated, and for reporting on the overall level of risk in the Company.

The CCRO also reports to the Board Enterprise Risk Committee (“BERC”), which has been established by the Board of Directors (the Board) and charged with responsibility for establishing the governance over the risk management process, providing oversight in managing the aggregate risk position and reporting on the comprehensive portfolio of risk categories and the potential impact these risks can have on our risk profile. The BERC is principally composed of the executive management team representing the different risk areas and business units who are appointed by the CEO.

The BERC meets no less often than quarterly and is chartered to assist the Board in promoting the best interests of the Company by overseeing policies, procedures and risk practices relating to enterprise-wide risk and compliance with regulatory guidance. Members of the BERC are selected such that the committee comprises individuals whose experiences and qualifications can lead to broad and informed views on risk matters facing us and the financial services industry, including, but not limited to, risk matters that address credit, market, liquidity, operational, compliance, legal and other general business conditions. A comprehensive risk report is submitted to the BERC each quarter providing management’s view of our risk position provided by the CCRO.

In addition to the BERC, the CEO delegates risk responsibility to management committees. These committees are: Executive Operations Committee (EOC), Asset Liability Committee (ALCO), Finance & Treasury Committee, Pricing and Credit Risk Oversight Committee (PCROC), the Legal & Compliance Committee (L&C), Allowance for Loan and Lease Losses Committee and the Model Risk Committee. The CCRO participates in each of these committees. Additionally, the Company has established an enterprise risk management (ERM) function to coordinate risk management activities. ERM has developed a Risk Tolerance Statement, which is approved by the Board and details the types of risk and size of risk-taking activities permissible in the course of executing business strategy.

Interest Rate Risk

A change from the current low interest rate environment, a flat or inverted yield curve, and changes in prevailing interest rates can have an adverse impact on our business. Loans and leases originated or otherwise acquired by us and pledged to secure borrowings under our revolving credit facilities bear fixed interest rates and finance charges. Our gross interest rate spread, which is the difference between the income we earn through the interest and finance charges on our finance receivables and lease contracts and the interest we pay on our funding, is affected by changes in interest rates as a result of our dependence on the incurrence of variable rate debt. We are exposed to variable rate funding through our borrowings under our revolving credit facilities.

The variable rates on the borrowings under our revolving credit facilities are indexed to LIBOR or commercial paper rates and fluctuate periodically based on movements in those indexes. We sometimes use interest rate swap agreements to convert the variable rate exposures on these borrowings to a fixed rate, thereby mitigating our interest rate exposure. Interest rate swap agreements purchased by us do not impact the contractual cash flows to be paid to the creditor. The counterparty for most of our interest rate swaps is Santander or one of its affiliates. As of March 31, 2014, the notional value of our hedges with Santander and affiliates was approximately \$8.4 billion.

In our public and Rule 144A securitization transactions, we transfer fixed rate to trusts that, in turn, issue fixed or floating rate securities to investors. The interest rate demanded by investors in our securitization transactions and other secured financings depends on the general interest rate environment and prevailing interest rate spreads for securitizations. We are able to obtain attractive interest rate spreads on our securitizations due to among other factors: (i) the credit quality of the receivables in the trusts; (ii) the historical credit performance of similar pools of our receivables; (iii) the significant expansion of our securitization investor base since 2010; (iv) the historical lack of defaults in auto ABS; (v) the structure of our securitizations (with first losses going to the equity residual retained by us); and (vi) our obtaining of ratings from at least two ratings agencies on each securitization.

We are, in certain circumstances, required to hedge our interest rate risk on our secured structured financings and the borrowings under our revolving credit facilities, and we use both interest rate swaps and interest rate caps to satisfy these requirements. We currently hold purchased interest rate caps and offsetting sold interest rate caps related to several of our secured structured financings and to our Chrysler retail financing facility. Although the interest rate caps are purchased by these financing facilities, cash outflows from the facilities ultimately impact our retained interests in the secured structured financings as cash expended by the facilities will decrease the ultimate amount of cash to be received by us. Therefore, when economically feasible, we may simultaneously sell a corresponding interest rate cap to offset the premium paid to purchase the interest rate cap. The fair values of our interest rate cap agreements purchased and sold net to an immaterial value in our financial statements and have an immaterial earnings impact comprised solely of their execution cost. The counterparties for certain of our interest rate caps and related options are affiliates of Santander. As of March 31, 2014, the notional value of our caps and options with these affiliates was approximately \$4.2 billion.

Our Board of Directors requires that we closely monitor and manage the amount of our interest rate risk exposure. We monitor our interest rate risk by conducting sensitivity analyses that include parallel shifts in prevailing interest rates. As of March 31, 2014, the impact of a hypothetical 100 basis point parallel increase in the interest rate curve on our net interest income and our economic net worth was a decrease of \$54.2 million and \$88.5 million, respectively. We assess interest rate risk by monitoring the repricing gap by maturity date of our interest-bearing assets and liabilities to ensure appropriate duration matching. The following table provides information about maturities of our interest rate-sensitive financial instruments by expected maturity date as of March 31, 2014:

	1M	3M	6M	12M	2 Y	3 Y	4 Y	5 Y	>5 Y
	(Dollar amounts in thousands)								
Total Assets	934	1,720	2,450	4,545	6,764	5,551	1,519	282	554
Total Liabilities	15,160	974	1,347	2,117	3,086	1,947	756	—	—
Net Swaps	8,253	(355)	(467)	(1,298)	(3,083)	(2,096)	(805)	(150)	—
Repricing Gap	(5,972)	391	636	1,130	595	1,509	(42)	132	554
Cumulative Gap	(5,972)	(5,581)	(4,945)	(3,815)	(3,220)	(1,711)	(1,754)	(1,621)	(1,067)

Finance receivables are estimated to be realized by us in future periods using discount rate, prepayment, and credit loss assumptions similar to our historical experience. Notional amounts on interest rate swap and cap agreements are based on contractual terms. Credit facilities and securitization notes payable amounts have been classified based on expected payoff.

The notional amounts of interest rate swap and cap agreements, which are used to calculate the contractual payments to be exchanged under the contracts, represent average amounts that will be outstanding for each of the years included in the table. Notional amounts do not represent amounts exchanged by parties and, thus, are not a measure of our exposure to loss through our use of these agreements.

Management monitors our interest rate hedging activities to ensure that the value of derivative financial instruments, their correlation to the contracts being hedged, and the amounts being hedged continue to provide effective protection against interest rate risk. However, there can be no assurance that our strategies will be effective in minimizing interest rate risk or that increases in interest rates will not have an adverse effect on our profitability.

Liquidity Risk

We view liquidity as integral to other key elements such as capital adequacy, asset quality and profitability. Because our debt is nearly entirely serviced by collections on consumer receivables, our primary liquidity risk relates to the ability to continue to grow our business through the funding of new originations. We have a robust liquidity policy in place to manage this risk.

Our liquidity policy also establishes the following guidelines:

- that we maintain at least eight external credit providers (as of March 31, 2014, we had twelve);
- that we rely on Santander and affiliates for no more than 30% of our funding (as of March 31, 2014, Santander and affiliates provided 17% of our funding);
- that no more than 35% and 65% of our debt mature in the next six and twelve months, respectively (as of March 31, 2014, only 8% and 14%, respectively, of our debt is scheduled to mature in these timeframes);
- that we maintain unused capacity of at least \$6.0 billion, including flow agreements, in excess of our expected peak usage over the following twelve months (as of March 31, 2014, we had twelve-month rolling unused capacity of approximately \$6.6 billion); and

that we maintain a minimum liquidity ratio, defined as our short-term assets divided by our short-term liabilities, of at least 70% over periods of one, three, six, and twelve months (as of March 31, 2014, our minimum liquidity ratio was 83% and 89% over periods of one and three months, respectively, and over 100% over periods of six and twelve months).

Our liquidity policy also requires that our Asset and Liability Committee monitor many indicators, both market-wide and company-specific, to determine if action may be necessary to maintain our liquidity position. These indicators include:

- delinquency and loss ratios on our securitizations;
- available commitments on our borrowing lines;
- Santander ratings, market capitalization, and commercial paper rate;
- spreads on U.S. and Spanish debt;

swap rates; and

the Manheim Used Vehicle Index.

We generally look for funding first from structured secured financings, second from third-party credit facilities, and last from Santander. We believe this strategy helps us avoid being overly reliant on Santander for funding. We also utilize financing structures whereby even if a credit facility is canceled, balances outstanding are not due and payable immediately but rather run off only as the underlying collateral amortizes. Additionally, we can reduce originations to significantly lower levels if necessary during times of limited liquidity.

Our liquidity management tools include daily and twelve-month rolling cash requirements forecasts, monthly funding usage and availability reports, daily sources and uses reporting, structural liquidity risk exercises, and the establishment of liquidity contingency plans. We also perform quarterly stress tests in which we forecast the impact of various negative scenarios (alone and in combination), including reduced credit availability, higher funding costs, lower advance rates, lower customer interest rates, dealer discount rates, and higher credit losses.

We have established a qualified like-kind exchange program in order to defer tax liability on gains on sale of vehicle assets at lease termination. If we do not meet the safe harbor requirements of IRS Revenue Procedure 2003-39, we may be subject to large, unexpected tax liabilities, thereby generating immediate liquidity needs. We believe that our compliance monitoring policies and procedures are adequate to enable us to remain in compliance with the program requirements.

Credit Risk

The risk inherent in our loan and lease portfolios is driven by credit quality and is affected by borrower-specific and economy-wide factors such as changes in employment. We manage this risk through our underwriting and credit approval guidelines and servicing policies and practices, as well as geographic and manufacturer concentration limits.

Our automated originations process reflects a disciplined approach to credit risk management. Our robust historical data on both organically originated and acquired loans provides us with the ability to perform advanced loss forecasting. Each applicant is automatically assigned a proprietary loss forecasting score ("LFS") using information such as FICO®, debt-to-income ratio, loan-to-value ratio, and over 30 other predictive factors, placing the applicant in one of 100 pricing tiers. The pricing in each tier is continuously monitored and adjusted to reflect market and risk trends. In addition to our automated process, we maintain a team of underwriters for manual review, consideration of exceptions, and review of deal structures with dealers. We generally tighten our underwriting requirements in times of greater economic uncertainty (including during the recent financial crisis) to compete in the market at loss and approval rates acceptable for meeting our required returns. We have also adjusted our underwriting standards to meet the requirements of our contracts such as the Chrysler agreement. In both cases, we have accomplished this by adjusting our risk-based pricing, the material components of which include interest rate, down payment, and loan-to-value.

We monitor early payment defaults and other potential indicators of dealer or customer fraud, and use the monitoring results to identify dealers who will be subject to more extensive stipulations when presenting customer applications, as well as dealers with whom we will not do business at all.

As part of our plan for minimizing credit losses from our new dealer lending product line, we will conduct periodic inventories, generally without advance notice to the dealer, of the collateral for floorplan lines of credit we have extended. We also will reevaluate the creditworthiness of each dealer with an outstanding balance on at least an annual basis, and more often if events indicate a possible decline in creditworthiness.

See additional discussion of our servicing approach in "Business."

Collateral Risk

Our lease portfolio presents an inherent risk that residual values recognized upon lease termination will be lower than those used to price the contracts at inception. Although we have elected not to purchase residual value insurance, our residual risk is somewhat mitigated by our residual risk-sharing agreement with Chrysler, as all of our leases are originated under terms of the Chrysler Agreement with Chrysler. We also utilize industry data, including the Automotive Lease Guide (“ALG”) benchmark for residual values, and employ a team of individuals experienced in forecasting residual values.

Similarly, lower used vehicle prices also reduce the amount we can recover when remarketing repossessed vehicles that serve as collateral underlying loans. We manage this risk through loan-to-value limits on originations, monitoring of new and used vehicle values using standard industry guides, and active, targeted management of the repossession process.

Legal and Compliance Risk

We must comply with the significant number of laws and regulations governing the consumer finance industry and, specifically, consumer protection. Compliance with applicable law is costly and can affect operating results. Compliance also requires a robust framework of governance and controls, which may create operational constraints.

To manage our legal and compliance risk, we maintain an extensive compliance, internal control, and monitoring framework, which includes the gathering of corporate control performance threshold indicators, Sarbanes-Oxley testing, monthly quality control tests, ongoing compliance monitoring with all applicable regulations, internal control documentation and review of processes, and internal audits. We also utilize internal and external legal counsel for expertise when needed. All associates upon new hire and annually receive comprehensive mandatory regulatory compliance training. In addition, the Board of Directors receives annual regulatory and compliance training. We use industry-leading call mining and other software solutions that assist us in analyzing potential breaches of regulatory requirements and customer service. Our call mining software analyzes all customer service calls, converting speech to text and mining for specific words and phrases that may indicate inappropriate comments by a representative. The software also detects escalated voice volume, enabling a supervisor to intervene if necessary. This tool enables us to effectively manage and identify training opportunities for associates, as well as track and resolve customer complaints through a robust quality assurance program. An example of another system control to mitigate compliance risk is that our customer dialing system has been programmed based on regulatory requirements to not permit dialing a customer phone number outside of permissible time periods or that already has been called the maximum number of times that day.

Operational and Technological Risk

We are exposed to loss that occurs in the process of carrying out our business activities. These relate to failures arising from inadequate or failed processes, failures in our people or systems, or from external events. Our operational risk management program encompasses risk event reporting, analysis, and remediation; key risk indicator monitoring; and risk profile self-assessments.

Foreign Exchange Risk

As we do not currently operate in foreign markets, substantially all of our vendors are based in the United States, and we have only three employees outside of the United States (employees in Canada working to establish our presence in that country). As a result, we do not currently have material exposure to currency fluctuations.

Inflation Risk

The risk of inflation does not have a significant impact on our business.

Other Information

Further information on risk factors can be found under Part II, Item 1A - "Risk Factors."

Glossary of Selected Terms

Advance Rate-The maximum percentage of the value of collateral that a lender is willing to extend for a loan. The advance rate helps a borrower determine what kind of collateral to provide in order to secure the desired loan amount, and helps minimize a lender's loss exposure when accepting collateral that can fluctuate in value.

Clean-Up Call-The action of an issuer of a debt instrument (such as a bond) requiring early redemption of the instrument before it is fully amortized.

Credit/Warehouse Facility (Line of Credit)-Any credit source extended to a business by a bank or other financial institution. A line of credit is effectively a source of funds that can readily be tapped at the borrower's discretion. Interest is paid only on money actually withdrawn. However, the borrower may be required to pay an unused line fee, often an annualized percentage fee on the money not withdrawn. Lines of credit can be secured by collateral, or may be unsecured.

Credit Enhancement-Through credit enhancement, the lender is provided with reassurance that the borrower will honor the obligation through additional collateral, insurance, or a third-party guarantee. Credit enhancement reduces credit/default risk of a debt, thereby increasing the overall credit rating and lowering interest rates.

Dealer Loans- Floorplan lines of credit, real estate loans, and working capital loans to automotive dealers.

FICO® -A type of credit score that makes up a substantial portion of the credit report that lenders use to assess an applicant's credit risk and whether to extend a loan. FICO® is an acronym for the Fair Isaac Corporation, the creator of the FICO® score. Using mathematical models, the FICO® score takes into account various factors in each of these five areas to determine credit risk: payment history, current level of indebtedness, types of credit used, length of credit history, and new credit. A person's FICO® score will range between 300 and 850.

Floorplan Lines of Credit- A revolving line of credit that allows the borrower to obtain financing for retail goods. These loans are made against a specific piece of collateral (e.g., auto, recreational vehicle, manufactured home). When each piece of collateral is sold by the dealer, the loan advance against that piece of collateral is repaid.

Nonaccretable Difference- The difference between the undiscounted contractual cash flows and the undiscounted expected cash. The nonaccretable difference represents an estimate of the credit risk in the loan portfolio at the acquisition date.

Overcollateralization- The process of posting more collateral than is needed to obtain or secure financing. Overcollateralization is often used as a method of credit enhancement by lowering the creditor's exposure to default risk.

Private-Label Loans/Leases- Financings branded in the name of the product manufacturer rather than in the name of the finance company.

Remarketing- Vehicle remarketing is the controlled disposal of fleet and leasing vehicles that have reached the end of their fixed term or the process to resell repossessed vehicles.

Residual Values- Residual value describes the future value of an asset at the end of the lease term based upon the percentage of depreciation of its initial value.

Subvention Program- Reimbursement to the finance company by a manufacturer for the difference between a market loan or lease rate and the below-market rate granted to the customer.

Turn-down – A turn-down loan or program is one in which the lender has the opportunity to review the application for approval only after the primary lender or lenders have declined the application.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Incorporated by reference from Part I, Item 2 - "Management's Discussion and Analysis of Financial Conditions and Results of Operations —Risk Management Framework" above.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our CEO and Chief Financial Officer (CFO), has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a- 15(e) and 15d- 15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our CEO and CFO have concluded that as of March 31, 2014, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable

assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (SEC), and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the period covered by this Quarterly Report on Form 10-Q that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

On September 13, 2013, Ally Financial Inc. filed suit against us in the United States District Court for the Eastern District of Michigan, in a matter pending as Case No. 13-CV-13929, alleging copyright infringement and misappropriation of trade secrets and confidential information in connection with our launch of Chrysler Capital and, in particular, our offering of floorplan lines of credit to Chrysler dealerships. We consider the allegations to be without merit and intend to vigorously defend the case.

From time to time, we may become involved in various additional lawsuits and legal proceedings that arise in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. We do not expect that the legal proceedings to which we are currently party, individually, or in the aggregate, will have a material adverse impact.

Item 1A. Risk Factors.

The Company is subject to a number of risks that could materially and adversely affect SCUSA's business, financial condition and results of operations. The following description of risk factors includes any material changes to, and supersedes the description of, risk factors associated with the Company's business previously disclosed in Part I, Item 1A of the Company's 2013 Form 10-K under the heading "Risk Factors." Any one or more of these risk factors could have a material adverse impact on the business, financial condition and operating results of the Company, in addition to presenting other possible adverse consequences, which are described below. The risk factors discussed below do not identify all risks that we face because our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations.

Explanatory Note: The risk factors set forth below with an asterisk (*) before the title are risk factors containing substantive changes from the risk factors previously disclosed in Part I, Item 1A of the Company's 2013 Form 10-K.

Business Risks

Adverse economic conditions in the United States and worldwide may negatively impact our results.

We are subject to changes in general economic conditions that are beyond our control. During periods of economic slowdown such as the recent economic downturn, delinquencies, defaults, repossessions, and losses generally increase while proceeds from auction sales decrease. These periods may also be accompanied by increased unemployment rates, decreased consumer demand for automobiles and other consumer products, and declining values of automobiles and other consumer products securing outstanding accounts, which weaken collateral coverage and increase the amount of a loss in the event of default. Additionally, higher gasoline prices, unstable real estate values, reset of adjustable rate mortgages to higher interest rates, general availability of consumer credit, or other factors that impact consumer confidence or disposable income could increase loss frequency and decrease consumer demand for automobiles and other consumer products as well as weaken collateral values on certain types of automobiles and other consumer products. Because our historical focus has been predominantly on nonprime consumers, the actual rates of delinquencies, defaults, repossessions, and losses on these loans could be more dramatically affected by a general economic downturn. In addition, during an economic slowdown or recession, our servicing costs may increase without a corresponding increase in our finance charge income. Furthermore, our business is significantly affected by monetary and regulatory policies of the U.S. federal government and its agencies. Changes in any of these policies are

influenced by macroeconomic conditions and other factors that are beyond our control and could have a material adverse effect on us through interest rate changes, costs of compliance with increased regulation, and other factors.

Although market conditions have improved, unemployment in the United States remains at elevated levels, and conditions remain challenging for financial institutions. Furthermore, certain Eurozone member countries have fiscal outlays that exceed their fiscal revenue, which has raised concerns about such countries' abilities to continue to service their debt and foster economic growth. A weakened European economy could undermine investor confidence in European financial institutions and the stability of European member economies. Notwithstanding its geographic diversification, this could adversely impact Santander, with whom we have a significant relationship. Such events could also negatively affect U.S.-based financial institutions, counterparties with which we do business, and the stability of the global financial markets. Disruptions in the global financial markets have also adversely affected the corporate bond markets, debt and equity underwriting, and other elements of the financial markets. In recent years, downgrades of the sovereign debt of some European countries have resulted in increased volatility in capital markets and have caused some lenders and institutional investors to reduce and, in some cases, cease to provide funding to certain borrowers, including other financial institutions. The impact on available credit, increased volatility in the financial markets, and reduced business activity has adversely affected, and may continue to adversely affect, our businesses, capital, liquidity, or other financial conditions and results of operations, and access to credit.

The process we use to estimate losses inherent in our credit exposure requires complex judgments, including forecasts of economic conditions and how those economic conditions might impair the ability of our borrowers to repay their loans. The degree of uncertainty concerning economic conditions may adversely affect the accuracy of our estimates, which may, in turn, impact the reliability of the process and the quality of our assets.

Our business could be negatively impacted if our access to funding is reduced.

We rely upon our ability to sell securities in the ABS market and upon our ability to access various credit facilities to fund our operations. The ABS market, along with credit markets in general, experienced unprecedented disruptions during the recent economic downturn. Although market conditions have improved since 2009, for a number of years following the economic downturn, certain issuers experienced increased risk premiums while there was a relatively lower level of investor demand for certain ABS (particularly those securities backed by nonprime collateral). In addition, the risk of volatility surrounding the global economic system and uncertainty surrounding regulatory reforms such as the Dodd-Frank Act continue to create uncertainty around access to the capital markets. As a result, there can be no assurance that we will continue to be successful in selling securities in the ABS market. Adverse changes in our ABS program or in the ABS market generally could materially adversely affect our ability to securitize loans on a timely basis or upon terms acceptable to us. This could increase our cost of funding, reduce our margins or cause us to hold assets until investor demand improves.

We also depend on various credit facilities and flow agreements to fund our future liquidity needs. We cannot guarantee that these financing sources will continue to be available beyond the current maturity dates, on reasonable terms, or at all. As our volume of loan acquisitions and originations increases, especially due to our recent relationship with Chrysler, we will require the expansion of our borrowing capacity on our existing credit facilities and flow agreements or the addition of new credit facilities and flow agreements. The availability of these financing sources depends, in part, on factors outside of our control, including regulatory capital treatment for unfunded bank lines of credit, the financial strength and strategic objectives of Santander and the other banks that participate in our credit facilities and flow agreements, and the availability of bank liquidity in general. We may also experience the occurrence of events of default or breach of financial covenants, which could reduce our access to bank funding. In the event of a sudden or unexpected shortage of funds in the banking system, we cannot be sure that we will be able to maintain necessary levels of funding without incurring high funding costs, a reduction in the term of funding instruments, or the liquidation of certain assets.

We have not experienced a significant increase in risk premiums or cost of funding to date, but we are not isolated from general market conditions that may affect issuers of ABS and other borrowers and we could experience increased risk premiums or funding costs in the future. In addition, if the sources of funding described above are not available to us on a regular basis for any reason, we may have to curtail or suspend our loan acquisition and origination activities. Downsizing the scale of our business would have a material adverse effect on our financial position, liquidity, and results of operations.

We face significant risks in implementing our growth strategy, some of which are outside our control.

We intend to continue our growth strategy to (i) expand our vehicle finance franchise by increasing market penetration via the number and depth of our relationships in the vehicle finance market, pursuing additional relationships with OEMs, and expanding our direct-to-consumer footprint and (ii) grow our unsecured consumer lending platform. Our ability to execute this growth strategy is subject to significant risks, some of which are beyond our control, including:

- the inherent uncertainty regarding general economic conditions;
- our ability to obtain adequate financing for our expansion plans;
- the prevailing laws and regulatory environment of each state in which we operate or seek to operate, and, to the extent applicable, federal laws and regulations, which are subject to change at any time;
- the degree of competition in new markets and its effect on our ability to attract new customers;
- our ability to recruit qualified personnel, in particular in areas where we face a great deal of competition; and
- our ability to obtain and maintain any regulatory approvals, government permits, or licenses that may be required on a timely basis.

*Our recent agreement with Chrysler may not result in currently anticipated levels of growth and is subject to certain performance conditions that could result in termination of the agreement.

In February 2013, we entered into a ten-year Master Private Label Financing Agreement (the “Chrysler Agreement”) with Chrysler whereby we launched the Chrysler Capital brand, which originates private-label loans and leases to facilitate the purchase of Chrysler vehicles by consumers and Chrysler-franchised automotive dealers. The financing services that we provide under the Chrysler Agreement, which launched May 1, 2013, include credit lines to finance Chrysler-franchised dealers’ acquisitions of vehicles and other products that Chrysler sells or distributes, automotive loans and leases to finance consumer acquisitions of new and used vehicles at Chrysler-franchised dealerships, financing for commercial and fleet customers, and ancillary services. In addition, we will offer dealers dealer loan financing, construction loans, real estate loans, working capital loans, and revolving lines of credit. In accordance with the terms of the Chrysler Agreement, in May 2013 we paid Chrysler a \$150 million upfront, nonrefundable payment, which will be amortized over ten years but would be recognized as expense immediately if the Chrysler Agreement is terminated in accordance with its terms.

As part of the Chrysler Agreement, we received limited exclusivity rights to participate in specified minimum percentages of certain of Chrysler’s financing incentive programs, which include loan rate subvention and automotive lease residual support subvention. We have committed to certain revenue sharing arrangements, as well as to considering future revenue sharing opportunities. We will bear the risk of loss on loans originated pursuant to the Chrysler Agreement, but Chrysler will share in any residual gains and losses in respect of automotive leases, subject to specific provisions in the Chrysler Agreement, including limitations on our participation in gains and losses. In addition, under the Chrysler Agreement, Chrysler has the option to acquire, for fair market value, an equity participation in an operating entity through which the financial services contemplated by the Chrysler Agreement are offered and provided, through either an equity interest in the new entity or participation in a joint venture or other similar business relationship or structure. There is no maximum limit on the size of Chrysler’s potential equity participation. Although the Chrysler Agreement contains provisions that are designed to address a situation in which the parties disagree on the fair market value of the equity participation interest, there is a risk that we ultimately receive less than what we believe to be the fair market value for such interest.

The Chrysler Agreement is subject to early termination in certain circumstances, including the failure by either party to comply with certain of their ongoing obligations under the Chrysler Agreement. Chrysler may also terminate the agreement, among other circumstances, if (i) we fail to meet certain performance metrics, including certain penetration and approval rate targets, during the term of the agreement, (ii) a person other than Santander and its affiliates or our other stockholders owns 20% or more of our common stock and Santander and its affiliates own fewer shares of common stock than such person, (iii) we become, control, or become controlled by, an OEM that competes with Chrysler or (iv) if certain of our credit facilities become impaired.

The loans and leases originated through Chrysler Capital are expected to provide us with the majority of our projected growth over the next several years. Our ability to realize the full strategic and financial benefits of our relationship with Chrysler depends in part on the successful development of our Chrysler Capital business, which will require a significant amount of management’s time and effort. If we are unable to realize the expected benefits of our relationship with Chrysler, or if the Chrysler Agreement were to terminate, our ability to generate or grow revenues could be reduced, and we may not be able to implement our business strategy, which would negatively impact our future growth.

Our business could be negatively impacted if we are unsuccessful in developing and maintaining relationships with automobile dealerships.

Our ability to acquire loans and automotive leases is reliant on our relationships with automotive dealers. In particular, our automotive finance operations depend in large part upon our ability to establish and maintain relationships with reputable automotive dealers that direct customers to our offices or originate loans at the point-of-sale, which we subsequently purchase. Although we have relationships with certain automotive dealers, none of our relationships are exclusive and some of them are newly established and they may be terminated at any time. As a result of the recent economic downturn and contraction of credit to both dealers and their customers, there was an increase in dealership closures and our existing dealer base experienced decreased sales and loan volume in the past and may experience decreased sales and loan volume in the future, which may have an adverse effect on our business, results of operations, and financial condition.

A reduction in demand for our products and failure by us to adapt to such reduction could adversely affect our business, results of operations, and financial condition.

The demand for the products we offer may be reduced due to a variety of factors, such as demographic patterns, changes in customer preferences or financial conditions, regulatory restrictions that decrease customer access to particular products, or the availability of competing products. Should we fail to adapt to significant changes in our customers' demand for, or access to, our products, our revenues could decrease significantly and our operations could be harmed. Even if we do make changes to existing products or introduce new products to fulfill customer demand, customers may resist such changes or may reject such products. Moreover, the effect of any product change on the results of our business may not be fully ascertainable until the change has been in effect for some time, and, by that time, it may be too late to make further modifications to such product without causing further harm to our business, results of operations, and financial condition.

*Our financial condition, liquidity, and results of operations depend on the credit performance of our loans.

As of March 31, 2014, over 85% of our vehicle consumer loans and over 75% of our unsecured consumer loans are nonprime receivables with obligors who do not qualify for conventional consumer finance products as a result of, among other things, a lack of or adverse credit history, low income levels, and/or the inability to provide adequate down payments. While underwriting guidelines were designed to establish that, notwithstanding such factors, the obligor would be a reasonable credit risk, the receivables nonetheless will experience higher default rates than a portfolio of obligations of prime obligors. In the event of such a default on an auto loan, generally the most practical alternative is repossession of the financed vehicle, although the collateral value of the vehicle usually does not cover the outstanding account balance and costs of recovery. Repossessions and foreclosure sales that do not yield sufficient proceeds to repay the receivables in full could result in losses on those receivables. We repossessed 56,503 vehicles, incurring \$368 million in net losses, during the three months ended March 31, 2014, of which 53,886 repossessions and \$347 million of net losses were on nonprime receivables. We experienced a default rate of 7.2% for nonprime receivables and 2.6% for prime receivables during the three months ended March 31, 2014.

From time to time we are the subject of unfavorable news or editorial coverage and we, like many peer companies, are the subject of various complaint websites in connection with our repossession and collection activities. Regardless of merit, this type of negative publicity could damage our reputation and lead consumers to choose other consumer finance companies. This could, in turn, lead to decreased business which could have a material adverse impact on our financial position. We do not believe we have experienced any such impact as our lending is primarily indirect, with the end consumer interacting directly with a dealer rather than the finance company.

In addition, our prime portfolio is rapidly growing. While prime portfolios typically have lower default rates than nonprime portfolios, we have less ability to make risk adjustments to the pricing of prime loans compared to nonprime loans. As a result, a larger proportion of our business will consist of loans with respect to which we have less flexibility to adjust pricing to absorb losses. As a result of these factors, we may sustain higher losses than anticipated in our prime portfolio.

We depend on the accuracy and completeness of information about borrowers and counterparties and any misrepresented information could adversely affect our business, results of operations, and financial condition.

In deciding whether to approve loans or to enter into other transactions with borrowers and counterparties in our retail lending and commercial lending businesses, we may rely on information furnished to us by or on behalf of borrowers and counterparties, including financial statements and other financial information. We also may rely on representations of borrowers and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. If any of this information is intentionally or

negligently misrepresented and such misrepresentation is not detected prior to loan funding, the value of the loan may be significantly lower than expected. Whether a misrepresentation is made by the loan applicant, another third party, or one of our employees, we generally bear the risk of loss associated with the misrepresentation. Our controls and processes may not have detected or may not detect all misrepresented information in our loan originations or from our business clients. Any such misrepresented information could adversely affect our business, financial condition, and results of operations.

Loss of our key management or other personnel, or an inability to attract such management and other personnel, could negatively impact our business.

The successful implementation of our growth strategy depends in part on our ability to retain our experienced management team and key employees and on our ability to attract appropriately qualified new personnel as well as have an effective succession planning framework in place. For instance, our Chief Executive Officer is one of the founders of SCUSA and has extensive experience in the vehicle finance industry. He has a proven track record of successfully operating our business, including by leading us through the recent economic downturn. The loss of any key member of our management team or other key employees could hinder or delay our ability to implement our growth strategy effectively. Further, if we are unable to attract appropriately qualified new personnel as we expand, we may not be successful in implementing our growth strategy. In either instance, our profitability and financial performance could be adversely affected. See “Management” for more detail on our executive officers.

Future changes in our relationship with Santander may adversely affect our operations.

Santander, through SHUSA, owns 210,995,049 shares (approximately 60.5%) of our common stock. We rely on our relationship with Santander, through SHUSA, for several competitive advantages including relationships with OEMs and regulatory best practices. Santander also provides us with significant funding support, through both committed liquidity and opportunistic extensions of credit. During the recent financial downturn, Santander and its affiliates provided us with over \$6 billion in financing that enabled us to pursue several acquisitions and/or conversions of vehicle loan portfolios at a time when most major banks were curtailing or eliminating their commercial lending activities. If Santander or SHUSA elects not to provide such support or provide it to the same degree, we may not be able to replace such support ourselves or to obtain substitute arrangements with third parties. We may be unable to obtain such support because of financial or other constraints or be unable to implement substitute arrangements on a timely basis on terms that are comparable, or at all, which could adversely affect our operations.

Furthermore, subject to certain limitations in the shareholders agreement that was entered into among us and certain of our shareholders, including SHUSA, Auto Finance Holdings and DDFS (the “Shareholders Agreement”), Santander is permitted to sell its interest in us. If Santander reduces its equity interest in us, it may be less willing to provide us with the support it has provided in the past. In addition, our right to use the Santander name is on the basis of a non-exclusive, royalty-free, and non-transferable license from Santander, and further only extends to uses in connection with our current and future operations within the United States. Santander may terminate such license at any time Santander ceases to own, directly or indirectly, 50% or more of our common stock. If we were required to change our name, we would incur the administrative costs and time associated with revising legal documents and marketing materials, and also may experience loss of brand and loss of business or loss of funding due to consumers’ and banks’ relative lack of familiarity with our new name. Additionally, Chrysler may terminate the Chrysler Agreement if a person other than Santander and its affiliates or our other stockholders owns 20% or more of our common stock and Santander and its affiliates own fewer shares of common stock than such person.

Santander has provided guarantees on the covenants, agreements, and our obligations under the governing documents of our warehouse facilities and privately issued amortizing notes. These guarantees are limited to our obligations as servicer.

Some terms of our credit agreements are influenced by, among other things, the credit ratings of Santander. If Santander were to suffer credit ratings downgrades or other adverse financial developments, we could be negatively impacted, either directly or indirectly. Santander’s short-term credit ratings downgrades in 2012, from A-1 to A-2 (Standard & Poor’s) and from P-1 to P-2 (Moody’s), did not directly impact our cost of funds. However, due to the contractual terms of certain of our debt agreements, these downgrades resulted in the loss of our ability to commingle funds. The loss of commingling increased the amount of funds we were required to borrow, thereby indirectly raising

our cost of funds by approximately \$1 million per month. In addition, because of the methodologies applied by credit ratings agencies, our securitization ratings in our ABS offerings are indirectly tied to Santander's credit ratings.

Santander applies certain standardized banking policies, procedures and standards across its affiliated entities, including with respect to internal audit, credit approval, governance, risk management, and compensation practices. We currently follow certain of these Santander policies and may in the future become subject to additional Santander policies, procedures and standards, which could result in changes to our practices.

It is also possible that our continuing relationship with Santander or SHUSA could reduce the willingness of other banks to develop relationships with us due to general competitive dynamics among such banks.

Negative changes in the business of the OEMs with which we have strategic relationships, including Chrysler, could adversely affect our business.

A significant adverse change in Chrysler's or other automotive manufacturers' business, including (i) significant adverse changes in their respective liquidity position and access to the capital markets, (ii) the production or sale of Chrysler or other automotive manufacturers' vehicles (including the effects of any product recalls), (iii) the quality or resale value of Chrysler or other vehicles, (iv) the use of marketing incentives, (v) Chrysler's or other automotive manufacturers' relationships with their key suppliers, or (vi) Chrysler's or other automotive manufacturers' respective relationships with the United Auto Workers and other labor unions and other factors impacting automotive manufacturers or their employees could have a material adverse effect on our profitability and financial condition.

Under the Chrysler Agreement, we originate private-label loans and leases to facilitate the purchase of Chrysler vehicles by consumers and Chrysler-franchised automotive dealers. In the future, it is possible that Chrysler or other automotive manufacturers with whom we have relationships could utilize other companies to support their financing needs, including offering products or terms that we would not or could not offer, which could have a material adverse impact on our business and operations. Furthermore, Chrysler or other automotive manufacturers could expand or establish or acquire captive finance companies to support their financing needs thus reducing their need for our services.

There is no assurance that the global automotive market, or Chrysler's or our other OEM partners' share of that market, will not suffer downturns in the future, and any negative impact could in turn have a material adverse effect on our business, results of operations, and financial position.

Our information technology may not support our future volumes and business strategies.

We rely on our proprietary origination and servicing platforms that utilize database-driven software applications, including nearly 20 years of internal historical credit data and extensive third-party data, to continuously adapt our origination and servicing operations to evolving consumer behavior and to new vehicle finance and consumer loan products. We employ an extensive team of engineers, information technology analysts, and website designers to ensure that our information technology systems remain on the cutting edge. However, due to the continued rapid changes in technology, there can be no assurance that our information technology solutions will continue to be adequate for the business or to provide a competitive advantage.

Our network and information systems are important to our operating activities and any network and information system shutdowns could disrupt our ability to process loan applications, originate loans, or service our existing loan portfolios, which could have a material adverse impact on our operating activities. Shutdowns may be caused by unforeseen catastrophic events, including natural disasters, terrorist attacks, large-scale power outages, software or hardware defects, computer viruses, cyber attacks, external or internal security breaches, acts of vandalism, misplaced or lost data, programming or human errors, difficulties in migrating technology facilities from one location to another, or other similar events. Although we maintain, and regularly assess the adequacy of, a disaster recovery plan designed to effectively manage the effects of such unforeseen events, we cannot be certain that such plan will function as intended, or otherwise resolve or compensate for such effects. Such a failure of our disaster recovery plan, if and when experienced, may have a material adverse effect on our revenue and ability to support and service our customer base.

We are required to make significant estimates and assumptions in the preparation of our financial statements and our estimates and assumptions may not be accurate.

The preparation of our consolidated financial statements in conformity with generally accepted accounting principles in the United States of America (“GAAP”) requires our management to make significant estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of income and expense during the reporting periods. We also use estimates and assumptions in determining the residual values of leased vehicles. Critical estimates are made by management in determining, among other things, the allowance for loan losses, amounts of impairment, and valuation of income taxes. If our underlying estimates and assumptions prove to be incorrect, our financial condition and results of operations may be materially adversely affected.

*Our allowance for loan losses and impairments may prove to be insufficient to absorb probable losses inherent in our loan portfolio.

We maintain an allowance for loan losses, established through a provision for loan losses charged to expense, that we believe is appropriate to provide for probable losses inherent in our originated loan portfolio. For receivables portfolios purchased from other lenders at a discount to the aggregate principal balance of the receivables, the portion of the discount that was attributable to credit deterioration since origination of the loans is recorded as a nonaccretable difference. Any deterioration in the performance of the purchased portfolios after acquisition results in an incremental allowance. Our allowance for loan losses has increased from \$384 million, or 5.1% of outstanding principal balance, at December 31, 2009, to \$2.9 billion, or 11.0 % of outstanding principal balance, at March 31, 2014. The determination of the appropriate level of the allowance for loan losses, and nonaccretable difference inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks and future trends, all of which are subject to change. Changes in economic conditions affecting borrowers, new information regarding our loans, and other factors, both within and outside of our control, may require an increase in the allowance for loan losses. Furthermore, growth in our loan portfolio generally would lead to an increase in the provision for loan losses. Some of our planned growth is in lending areas other than vehicle loans, and we are not experienced in estimating loan and credit losses in those other areas. In addition, if net charge-offs in future periods exceed the allowance for loan losses, we will need to make additional provisions to increase the allowance for loan losses. There is no accurate method for predicting loan and credit losses, and we cannot assure you that our loan loss allowance will be sufficient to cover actual losses. Any increases in the allowance for loan losses will result in a decrease in net income and capital and may have a material adverse effect on us.

Our profitability and financial condition could be materially adversely affected if the value of used cars declines, resulting in lower residual values of our vehicle leases and lower recoveries in sales of repossessed vehicles.

General economic conditions, the supply of off-lease and other used vehicles to be sold, new vehicle market prices and marketing programs, vehicle brand image and strength, perceived vehicle quality, general consumer preference and confidence levels, overall price and volatility of gasoline or diesel fuel, among other factors, heavily influence used vehicle prices and thus the residual value of our leased vehicles and the amount we recover in remarketing repossessed vehicles. We expect our financial results to be more sensitive to used auto prices as leases become a larger part of our business.

Our expectation of the residual value of a leased vehicle is a critical input in determining the amount of the lease payments at the inception of a lease contract. Our lease customers are responsible only for any deviation from expected residual value that is caused by excess mileage or excess wear and tear, while we retain the obligation to absorb any general market changes in the value of the vehicle. Therefore, our operating lease expense is increased when we have to take an impairment on our residual values or when the realized residual value of a vehicle at lease termination is less than the expected residual value for the vehicle at lease inception. In addition, the timeliness, effectiveness, and quality of our remarketing of off-lease vehicles affects the net proceeds realized from the vehicle sales. While we have elected not to purchase residual value insurance, our exposure is somewhat lessened by Chrysler's residual subvention programs and the sharing of losses over a specified threshold. However, we take the first portion of loss on any vehicle, and such losses could have a negative impact on our profitability and financial condition.

Lower used vehicle prices also reduce the amount we can recover when remarketing repossessed vehicles that serve as collateral underlying loans. As a result, declines in used vehicle prices could have a negative impact on our profitability and financial condition.

*Poor portfolio performance may trigger credit enhancement provisions in our revolving credit facilities or secured structured financings.

Our revolving credit facilities generally have net spread, delinquency, and net loss ratio limits on the receivables pledged to each facility that, if exceeded, would increase the level of credit enhancement requirements for that facility and redirect all excess cash to the credit providers. Generally, these limits are calculated based on the portfolio collateralizing the respective credit line; however, for certain of our warehouse lines, delinquency and net loss ratios are calculated with respect to our serviced portfolio as a whole. Our facilities used to finance vehicle lease originations also have a residual loss ratio limit calculated with respect to our serviced lease portfolio as a whole.

The documents that govern our secured structured financings also contain cumulative net loss ratio limits on the receivables included in each securitization trust. If, at any measurement date, a cumulative net loss trigger with respect to any financing were to exceed the specified limits, provisions of the financing agreements would increase the level of credit enhancement requirements for that financing and redirect all excess cash to the holders of the ABS. During this period, excess cash flow, if any, from the facility would be used to fund the increased credit enhancement levels rather than being distributed to us. Once an impacted trust reaches the new requirement, we would return to receiving a residual distribution from the trust.

Future significant loan, lease, or unsecured consumer loan repurchase requirements could harm our profitability and financial condition.

We have repurchase obligations in our capacity as servicer in securitizations and whole-loan sales. If a servicer breaches a representation, warranty, or servicing covenant with respect to the loans sold, the servicer may be required by the servicing provisions to repurchase that asset from the purchaser or otherwise compensate one or more classes of investors for losses caused by the breach. If significant repurchases of assets or other payments are required under our responsibility as servicer, it could have a material adverse effect on our financial condition, liquidity, and results of operations.

*We apply financial leverage to our operations, which may materially adversely affect our business, results of operations, and financial condition.

We currently apply financial leverage, pledging most of our assets to credit facilities and securitization trusts, and we intend to continue to apply financial leverage in our retail lending operations. Our debt-to-assets ratio is 88% as of March 31, 2014. Unlike banks, we are not subject to regulatory restrictions on the amount of our leverage. Our total borrowings are only restricted by covenants in our credit facilities and market conditions, and our Board of Directors may change our target borrowing levels at any time without the approval of our stockholders. Incurring substantial debt subjects us to the risk that our cash flow from operations may be insufficient to service our outstanding debt.

*Our indebtedness and other obligations are significant and impose restrictions on our business.

We have a significant amount of indebtedness. At March 31, 2014 and December 31, 2013, we had approximately \$25.4 billion and \$23.3 billion, respectively, in principal amount of indebtedness outstanding (including approximately \$23.1 billion and \$22.2 billion, respectively, in secured indebtedness). Interest expense on our indebtedness constituted approximately 11% of our total interest income for the three months ended March 31, 2014.

Our debt reduces operational flexibility and creates default risks. Our revolving credit facilities contain a borrowing base or advance rate formula which requires us to pledge finance contracts in excess of the amounts which we can borrow under the facilities. We are also required to hold certain funds in restricted cash accounts to provide additional collateral for borrowings under the credit facilities. In addition, certain facilities require the replacement of delinquent or defaulted collateral, and the finance contracts pledged as collateral in securitizations must be less than 31 days delinquent at the time the securitization is issued. Accordingly, increases in delinquencies or defaults resulting from weakened economic conditions would require us to pledge additional finance contracts to support the same borrowing levels and may cause us to be unable to securitize loans to the extent we desire. These outcomes would adversely impact our financial position, liquidity, and results of operations.

Additionally, the credit facilities generally contain various covenants requiring in certain cases minimum financial ratios, asset quality, and portfolio performance ratios (portfolio net loss and delinquency ratios, and pool level cumulative net loss ratios) as well as limits on deferral levels. Generally, these limits are calculated based on the portfolio collateralizing the respective line; however, for certain of our third-party credit facilities, delinquency and net loss ratios are calculated with respect to our serviced portfolio as a whole. Covenants on our debts also limit our ability to:

- incur or guarantee additional indebtedness;

- purchase large loan portfolios in bulk;
 - pay dividends or make distributions on our capital stock or make certain other restricted payments;
 - sell assets, including our loan portfolio or the capital stock of our subsidiaries;
 - enter into transactions with affiliates;
 - create or incur liens; and
 - consolidate, merge, sell, or otherwise dispose of all or substantially all of our assets.
- Additionally, one of our private ABS facilities contains a minimum tangible net worth requirement, and certain of our revolving credit facilities contain key man provisions.

Failure to meet any of these covenants could result in an event of default under these agreements. If an event of default occurs under these agreements, the lenders could elect to declare all amounts outstanding under these agreements to be immediately due and payable, enforce their interests against collateral pledged under these agreements, restrict our ability to obtain additional borrowings under these agreements and/or remove us as servicer.

We currently have the ability to pledge retained residuals and create additional unsecured indebtedness on our credit facilities provided by Santander. Santander may elect not to renew these facilities, causing us to have to find other funding sources prior to the maturity of the facilities.

If our debt service obligations increase, whether due to the increased cost of existing indebtedness or the incurrence of additional indebtedness, we may be required to dedicate a significant portion of our cash flow from operations to the payment of principal of, and interest on, our indebtedness, which would reduce the funds available for other purposes. Our indebtedness also could limit our ability to withstand competitive pressures and reduce our flexibility in responding to changing business and economic conditions.

In addition, certain of our funding arrangements may require us to make payments to third parties if losses exceed certain thresholds, including, for example, our flow agreements with Bank of America and SBNA and arrangements with certain third-party loan originators of loans that we purchase on a periodic basis.

Competition with other lenders could adversely affect us.

The vehicle finance market is served by a variety of entities, including the captive finance affiliates of major automotive manufacturers, banks, savings and loan associations, credit unions, and independent finance companies. The market is highly fragmented, with no individual lender capturing more than 10% of the market. Our competitors often provide financing on terms more favorable to automobile purchasers or dealers than we offer. Many of these competitors also have long-standing relationships with automobile dealerships and may offer dealerships or their customers other forms of financing that we do not offer.

We anticipate that we will encounter greater competition as we expand our operations and as the economy continues to emerge from recession. In addition, certain of our competitors are not subject to the same regulatory regimes that we are. As a result, these competitors may have advantages in conducting certain businesses and providing certain services, and may be more aggressive in their loan origination activities. Increasing competition could also require us to lower the rates we charge on loans in order to maintain loan origination volume, which could also have a material adverse effect on our business, including our profitability.

Changes in interest rates may adversely impact our profitability and risk profile.

Our profitability may be directly affected by interest rate levels and fluctuations in interest rates. As interest rates change, our gross interest rate spread on new originations either increases or decreases because the rates charged on the contracts originated or purchased from dealers are limited by market and competitive conditions, restricting our ability to pass on increased interest costs to the consumer. Additionally, although the majority of our borrowers are nonprime and are not highly sensitive to interest rate movement, increases in interest rates may reduce the volume of loans we originate. While we monitor the interest rate environment and employ hedging strategies designed to mitigate the impact of increased interest rates, we cannot provide assurance that hedging strategies will fully mitigate the impact of changes in interest rates.

We are subject to market, operational, and other related risks associated with our derivative transactions that could have a material adverse effect on us.

We enter into derivative transactions for economic hedging purposes. We are subject to market and operational risks associated with these transactions, including basis risk, the risk of loss associated with variations in the spread between the asset yield and the funding and/or hedge cost, credit or default risk, the risk of insolvency, or other inability of the counterparty to a particular transaction to perform its obligations thereunder, including providing sufficient collateral. Additionally, certain of our derivative agreements require us to post collateral when the fair value

of the derivative is negative. Our ability to adequately monitor, analyze, and report derivative transactions continues to depend, to a great extent, on our information technology systems. This factor further increases the risks associated with these transactions and could have a material adverse effect on us.

Adverse outcomes to current and future litigation against us may negatively impact our financial position, liquidity, and results of operations.

As a consumer finance company, we are subject to various consumer claims and litigation seeking damages and statutory penalties. Some litigation against us could take the form of class action complaints by consumers. As the assignee of loans originated by automotive dealers, we also may be named as a co-defendant in lawsuits filed by consumers principally against automotive dealers.

We are party to various litigation claims and legal proceedings. We evaluate these litigation claims and legal proceedings to assess the likelihood of unfavorable outcomes and to estimate, if possible, the amount of potential losses. Based on these assessments and estimates, we establish reserves or disclose the relevant litigation claims or legal proceedings, as appropriate. These assessments and estimates are based on the information available to management at the time and involve a significant amount of management judgment. Actual outcomes or losses may differ materially from our current assessments and estimates and any adverse resolution of litigation pending or threatened against us could negatively impact our financial position, liquidity, and results of operations.

A security breach or a cyber attack could adversely affect our business.

In the normal course of business, we collect, process and retain sensitive and confidential consumer information and may, subject to applicable law, share that information with our third-party service providers. Despite the security measures we have in place, our facilities and systems, and those of third-party service providers, could be vulnerable to external or internal security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming or human errors, or other similar events. A security breach or cyber attack of our computer systems could interrupt or damage our operations or harm our reputation. If third parties or our employees are able to penetrate our network security or otherwise misappropriate our customers' personal information or contract information, or if we give third parties or our employees improper access to consumers' personal information or contract information, we could be subject to liability. This liability could include investigations, fines, or penalties imposed by state or federal regulatory agencies, including the loss of necessary permits or licenses. This liability could also include identity theft or other similar fraud-related claims, claims for other misuses, or losses of personal information, including for unauthorized marketing purposes or claims alleging misrepresentation of our privacy and data security practices.

We rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure online transmission of confidential consumer information. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive consumer transaction data. A party who is able to circumvent our security measures could misappropriate proprietary information or cause interruptions in our operations. We may be required to expend capital and other resources to protect against such security breaches or cyber attacks or to alleviate problems caused by such breaches or attacks. Our security measures are designed to protect against security breaches and cyber attacks, but our failure to prevent such security breaches and cyber attacks, whether due to an external cyber-security incident, a programming error, or other cause, could damage our reputation, expose us to mitigation costs and the risks of private litigation and government enforcement, disrupt our business, or otherwise have a material adverse effect on our sales and results of operations.

We partially rely on third parties to deliver services, and failure by those parties to provide these services or meet contractual requirements could have a material adverse effect on our business.

We depend on third-party service providers for many aspects of our business operations. For example, we depend on third parties like Experian to obtain data related to our market that we use in our origination and servicing platforms. In addition, we rely on third-party servicing centers for a portion of our servicing activities and on third-party repossession agents. If a service provider fails to provide the services that we require or expect, or fails to meet contractual requirements, such as service levels or compliance with applicable laws, the failure could negatively impact our business by adversely affecting our ability to process customers' transactions in a timely and accurate manner, otherwise hampering our ability to service our customers, or subjecting us to litigation or regulatory risk for poor vendor oversight. Such a failure could adversely affect the perception of the reliability of our networks and services, and the quality of our brands, and could have a material and adverse effect on our financial condition and results of operations.

Catastrophic events may negatively affect our business, financial condition, and results of operations.

Natural disasters, acts of war, terrorist attacks, and the escalation of military activity in response to these attacks or otherwise may have negative and significant effects, such as imposition of increased security measures, changes in applicable laws, market disruptions, and job losses. These events may have an adverse effect on the economy in general. Moreover, the potential for future terrorist attacks and the national and international responses to these threats could affect our business in ways that cannot be predicted. The effect of any of these events or threats could have a material adverse effect on our business, results of operations, and financial condition.

The obligations associated with being a public company will require significant resources and management attention, which will increase our costs of operations and may divert focus from our business operations.

Until our IPO, we were not required to comply with Securities and Exchange Commission (“SEC”) requirements to file periodic reports with the SEC. As a public company, we are now required to file periodic reports containing our consolidated financial statements with the SEC within a specified time following the completion of quarterly and annual periods. As a public company, we will also incur significant legal, accounting, insurance, and other expenses. Compliance with these reporting requirements and other rules of the SEC and the rules of the NYSE will increase our legal and financial compliance costs and make some activities more time consuming and costly. Furthermore, the need to establish the corporate infrastructure demanded of a public company may divert management’s attention from implementing our growth strategy, which could prevent us from successfully implementing our strategic initiatives and improving our business, results of operations, and financial condition. Among other things, we are required to: prepare and distribute periodic reports and other stockholder communications in compliance with our obligations under the federal securities laws and applicable stock exchange rules; appoint new independent members to our Board of Directors and committees; create or expand the roles and duties of our Board of Directors and committees of the board; institute more comprehensive compliance and internal audit functions; evaluate and maintain our system of internal control over financial reporting, and report on management’s assessment thereof, in compliance with the requirements of Section 404 of the Sarbanes-Oxley Act and the related rules and regulations of the SEC and the Public Company Accounting Oversight Board; involve and retain outside legal counsel and accountants in connection with the activities listed above; enhance our investor relations function; and maintain internal policies, including those relating to disclosure controls and procedures. We have made, and will continue to make, changes to our internal controls and procedures for financial reporting and accounting systems to meet our reporting obligations as a public company. However, we cannot predict or estimate the amount of additional costs we may incur in order to comply with these requirements. We anticipate that these costs will materially increase our total costs and expenses.

Internal controls over financial reporting may not prevent or detect all errors or acts of fraud.

We maintain disclosure controls and procedures designed to ensure that we timely report information as specified in the rules and regulations of the SEC. We also maintain a system of internal control over financial reporting. However, these controls may not achieve their intended objectives. Control processes that involve human diligence and compliance, such as our disclosure controls and procedures and internal control over financial reporting, are subject to lapses in judgment and breakdowns resulting from human failures. Controls can also be circumvented by collusion or improper management override. Because of such limitations, there are risks that material misstatements due to error or fraud may not be prevented or detected and that information may not be reported on a timely basis. If our controls are not effective, it could have a material adverse effect on our financial condition, results of operations, and market for our common stock, and could subject us to regulatory scrutiny.

Regulatory Risks

We operate in a highly regulated industry and continually changing federal, state, and local laws and regulations could materially adversely affect our business.

Due to the highly regulated nature of the consumer finance industry, we are required to comply with a wide array of federal, state, and local laws and regulations that regulate, among other things, the manner in which we conduct our origination and servicing operations. These regulations directly impact our business and require constant compliance, monitoring, and internal and external audits. Although we have an extensive enterprise-wide compliance framework structured to continuously monitor our activities, compliance with applicable law is costly, and may create operational constraints.

These laws and their implementing regulations include, among others, usury laws, Anti-Money Laundering requirements (Bank Secrecy Act and USA PATRIOT Act), ECOA, Fair Debt Collection Practices Act, Fair Credit Reporting Act, Privacy Regulations (Gramm-Leach Bliley Act and Right to Financial Privacy Act), Electronic Funds Transfer Act, Servicemembers' Civil Relief Act, Telephone Consumer Protection Act, Truth in Lending Act, and requirements related to unfair, deceptive, or abusive acts or practices.

Many states and local jurisdictions have consumer protection laws analogous to, or in addition to, those listed above. These federal, state, and local laws regulate the manner in which financial institutions deal with customers when making loans or conducting other types of financial transactions.

New legislation and regulation may include changes with respect to consumer financial protection measures and systematic risk oversight authority. Such changes present the risk of financial loss due to regulatory fines or penalties, restrictions or suspensions of business, or costs associated with mandatory corrective action as a result of failure to adhere to applicable laws, regulations, and supervisory guidance. Failure to comply with these laws and regulations could also give rise to regulatory sanctions, customer rescission rights, action by state and local attorneys general, civil or criminal liability, or damage to our reputation, which could materially and adversely affect our business, financial condition, and results of operations.

In connection with the SEC's review of the Annual Reports on Form 10-K filed by Santander Drive Auto Receivables Trust 2010-1 and Santander Drive Auto Receivables Trust 2010-2 (together, the "2010 Trusts") for the fiscal year ended December 31, 2012, the 2010 Trusts received a comment from the SEC regarding the applicability to SCUSA, as the servicer of the 2010 Trusts, of certain servicing criteria set forth in Regulation AB relating to the safeguarding of pool assets and related documentation of the 2010 Trusts. We completed our final response to this comment letter, including amendments to the Form 10-K filings by the 2010 Trusts, in September 2013 and believe there has been no adverse impact on our business.

*We may be subject to certain banking regulations that may limit our business activities.

Because our largest shareholder, SHUSA, is a bank holding company and because we provide third-party services to banks, we are subject to certain banking regulations, including oversight by the Federal Reserve, the Office of the Comptroller of the Currency, and the Bank of Spain. Such banking regulations could limit the activities and the types of businesses that we may conduct. The Federal Reserve has broad enforcement authority over bank holding companies and their subsidiaries. The Federal Reserve could exercise its power to restrict SHUSA from having a non-bank subsidiary that is engaged in any activity that, in the Federal Reserve's opinion, is unauthorized or constitutes an unsafe or unsound business practice, and could exercise its power to restrict us from engaging in any such activity. This power includes the authority to prohibit or limit the payment of dividends if, in the Federal Reserve's opinion, such payment would constitute an unsafe or unsound practice. Moreover, certain banks and bank holding companies, including SHUSA, are required to perform a stress test and submit a capital plan to the Federal Reserve on an annual basis, and to receive a notice of non-objection to the plan from the Federal Reserve before taking capital actions, such as paying dividends, implementing common equity repurchase programs, or redeeming or repurchasing capital instruments. This requirement could have a negative impact on SCUSA. The Federal Reserve may also impose substantial fines and other penalties for violations that we may commit, and has the authority to approve or disallow acquisitions we may contemplate, which may limit our future growth plans. To the extent that we are subject to banking regulation, we could be at a competitive disadvantage because some of our competitors are not subject to these limitations.

The Dodd-Frank Act and the creation of the CFPB in addition to recently issued rules and guidance will likely increase our regulatory compliance burden and associated costs.

The Dodd-Frank Act introduced a substantial number of reforms that continue to reshape the structure of the regulation of the financial services industry. In particular, the Dodd-Frank Act includes, among other things, the creation of the CFPB, which is authorized to promulgate and enforce consumer protection regulations relating to financial products and services.

In March 2013, the CFPB issued a bulletin recommending that indirect vehicle lenders, a class that includes us, take steps to monitor and impose controls over dealer markup policies where dealers charge consumers higher interest rates, with the markup shared between the dealer and the lender.

The CFPB is also conducting supervisory audits of large vehicle lenders and has indicated it intends to study and take action with respect to possible ECOA "disparate impact" credit discrimination in indirect vehicle finance. If the CFPB enters into a consent decree with one or more lenders on disparate impact claims, it could negatively impact the business of the affected lenders, and potentially the business of dealers and other lenders in the vehicle finance market. This impact on dealers and lenders could increase our regulatory compliance requirements and associated costs.

Unlike competitors that are banks, we are subject to the licensing and operational requirements of states and other jurisdictions and our business would be adversely affected if we lost our licenses.

Because we are not a depository institution, we do not benefit from exemptions to state loan servicing or debt collection licensing and regulatory requirements. To the extent that they exist, we must comply with state licensing and various operational compliance requirements in all 50 states and the District of Columbia. These include, among others, form and content of contracts, other documentation, collection practices and disclosures, and record keeping requirements. We are sensitive to regulatory changes that may increase our costs through stricter licensing laws, disclosure laws, or increased fees. Currently, we have all required licenses as applicable to do business in all 50 states and the District of Columbia.

In addition, we are subject to periodic examinations by state and other regulators. The states that currently do not provide extensive regulation of our business may later choose to do so. The failure to comply with licensing or permit requirements and other local regulatory requirements could result in significant statutory civil and criminal penalties, monetary damages, attorneys' fees and costs, possible review of licenses, and damage to reputation, brand, and valued customer relationships.

Risks Related to Our Common Stock

The market price of our common stock may be volatile, which could cause the value of an investment in our common stock to decline.

The market price of our common stock may fluctuate substantially due to a variety of factors, many of which are beyond our control, including:

- general market conditions;
- domestic and international economic factors unrelated to our performance;
- actual or anticipated fluctuations in our quarterly operating results;
- changes in or failure to meet publicly disclosed expectations as to our future financial performance;
- downgrades in securities analysts' estimates of our financial performance or lack of research and reports by industry analysts;
- changes in market valuations or earnings of similar companies;
- any future sales of our common stock or other securities; and
- additions or departures of key personnel.

The stock markets in general have experienced substantial volatility that has often been unrelated to the operating performance of particular companies. These types of broad market fluctuations may adversely affect the trading price of our common stock. In the past, stockholders have sometimes instituted securities class action litigation against companies following periods of volatility in the market price of their securities. Any similar litigation against us could result in substantial costs, divert management's attention and resources, and harm our business or results of operations. For example, we are currently operating in, and have benefited from, a protracted period of historically low interest rates that will not be sustained indefinitely, and future fluctuations in interest rates could cause an increase in volatility of the market price of our common stock.

Certain provisions of our amended and restated certificate of incorporation and amended and restated bylaws may have anti-takeover effects, which could limit the price investors might be willing to pay in the future for our common stock. In addition, Delaware law may inhibit takeovers of us and could limit our ability to engage in certain strategic transactions our Board of Directors believes would be in the best interests of stockholders.

Certain provisions of our amended and restated certificate of incorporation and amended and restated bylaws could discourage unsolicited takeover proposals that stockholders might consider to be in their best interests. Among other things, our amended and restated certificate of incorporation and amended and restated bylaws include provisions that:

- do not permit cumulative voting in the election of directors, which would otherwise allow less than a majority of stockholders to elect director candidates;
- fix the number of directors and provide that the number of directors may only be changed by an amendment to our bylaws;
- limit the ability of our stockholders to nominate candidates for election to our Board of Directors;
- authorize the issuance of “blank check” preferred stock without any need for action by stockholders;
- limit the ability of stockholders to call special meetings of stockholders or to act by written consent in lieu of a meeting; and
- establish advance notice requirements for nominations for election to our Board of Directors or for proposing matters that may be acted on by stockholders at stockholder meetings.

The foregoing factors, as well as the significant common stock ownership by SHUSA, could impede a merger, takeover, or other business combination or discourage a potential investor from making a tender offer for our common stock, which, under certain circumstances, could reduce the market value of our common stock.

In addition, Section 203 of the Delaware General Corporation Law (the “DGCL”) generally affects the ability of an “interested stockholder” to engage in certain business combinations, including mergers, consolidations, or acquisitions of additional shares, for a period of three years following the time that the stockholder becomes an “interested stockholder.” An “interested stockholder” is defined to include persons owning directly or indirectly 15% or more of the outstanding voting stock of a corporation. We elected in our amended and restated certificate of incorporation not to be subject to Section 203 of the DGCL. However, our amended and restated certificate of incorporation contains provisions that have the same effect as Section 203, except that they provide that each of SHUSA and its successors and affiliates and certain of its direct transferees are not deemed to be “interested stockholders,” and, accordingly are not subject to such restrictions, as long as it and its affiliates own at least 10% of our outstanding shares of common stock.

Our common stock is subordinate to all of our existing and future indebtedness and any preferred stock, and effectively subordinated to all indebtedness and preferred equity claims against our subsidiaries.

Shares of our common stock are common equity interests in us and, as such, rank junior to all of our existing and future indebtedness and other liabilities. Additionally, holders of our common stock may become subject to the prior dividend and liquidation rights of holders of any classes or series of preferred stock that our Board of Directors may designate and issue without any action on the part of the holders of our common stock. Furthermore, our right to participate in a distribution of assets upon any of our subsidiaries’ liquidation or reorganization is subject to the prior claims of that subsidiary’s creditors and preferred stockholders.

SHUSA has significant influence over us, including control over decisions that require the approval of stockholders, which could limit your ability to influence the outcome of key transactions, including a change of control.

SHUSA owns approximately 60.5% of our common stock, and accordingly has significant influence over us, including and pursuant to the terms of the Shareholders Agreement. Pursuant to the Shareholders Agreement, SHUSA has the right to nominate a majority of our directors, provided certain minimum share ownership thresholds are maintained. Through our Board of Directors, SHUSA controls our policies and operations, including, among other things, the appointment of management, future issuances of our common stock or other securities, the payment of dividends, if any, on our common stock, the incurrence of debt by us, and the entering into of extraordinary transactions.

In addition, the Shareholders Agreement provides the directors nominated by SHUSA with approval rights over certain specific material actions taken by SCUSA, provided certain minimum share ownership thresholds are maintained. These material actions include changes in material accounting policies, changes in material tax policies or positions and changes in our principal line of business.

We are a “controlled company” within the meaning of the NYSE rules and, as a result, will qualify for, and intend to rely on, exemptions from certain corporate governance requirements. You will not have the same protections afforded to stockholders of companies that are subject to such requirements.

SHUSA owns a majority of the voting power of our outstanding common stock. As a result, we are a “controlled company” within the meaning of the corporate governance standards. Under these rules, a company of which more than 50% of the voting power is held by an individual, group, or another company is a “controlled company” and may elect not to comply with certain corporate governance requirements, including:

- the requirement that a majority of the Board of Directors consist of independent directors;
- the requirement that we have a separate nominating and corporate governance committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities;
- the requirement that we have a separate compensation committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and
- the requirement for an annual performance evaluation of the nominating and corporate governance and compensation committees.

We intend to utilize these exemptions. As a result, we will not have a majority of independent directors and we will not have a nominating and corporate governance committee. Additionally, we will not have a compensation committee comprised of a majority of independent directors. Accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the NYSE.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of the Company's common stock during the period covered by this Quarterly Report on Form 10-Q.

Item 3. Defaults upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits

The following exhibits are included herein:

Exhibit Number	Description
