FORWARD-LOOKING STATEMENTS

Certain statements in this Quarterly Report on Form 10-Q, including but not limited to statements made in Part I, Item 2–"Management's Discussion and Analysis of Financial Condition and Results of Operations," statements made with respect to future operating results, expectations of future customer orders and the availability of resources necessary for our business may be deemed to be forward-looking statements, as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by the use of words such as "may," "will," "should," "could," "continue," "future," "potential," "believe," "project," "plan," "intend," "seek," "estimate," "predict," "expect," "antic expressions, or the negative of such terms, or other comparable terminology. Forward-looking statements also include the assumptions underlying or relating to any of the foregoing statements. Such forward-looking statements are made based on our management's beliefs as well as assumptions made by, and information currently available to, our management. These forward-looking statements are subject to a number of risks and uncertainties, including, the cyclical nature of our industry and changes in consumer confidence; economic and market conditions; our customers' access to capital and credit to fund purchases, including the ability of our customers to secure floor plan financing; our dependence on outside suppliers of raw materials; changes in the cost of aluminum, steel and related raw materials; changes in fuel and other transportation costs, insurance costs and weather conditions; changes in government regulation; foreign currency fluctuation; competitors could impede our ability to attract or retain customers; our ability to develop or acquire proprietary products and technology; assertions against us relating to intellectual property rights; problems hiring or retaining skilled labor; the effects of new regulation relating to conflict minerals; the catastrophic loss of one of our manufacturing facilities; environmental and health and safety liabilities and requirements; loss of the services of our key executives; product warranty or product liability claims in excess of our insurance coverage; a disruption in our information technology systems; an inability to acquire insurance at commercially reasonable rates; and those other risks referenced herein, including those risks referred to in Part II, Item 1A–"Risk Factors" and those risks discussed in our other filings with the Securities and Exchange Commission, including those risks discussed under the caption "Risk Factors" in our Annual Report on Form 10-K for fiscal 2014, which discussion is incorporated herein by this reference. Such factors are not exclusive. We do not undertake to update any forward-looking statement that may be made from time to time by, or on behalf of, our company.

MILLER INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(in thousands, except share data and except as otherwise noted)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements of Miller Industries, Inc. and subsidiaries (the "Company") included herein have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. Nevertheless, the Company believes that the disclosures are adequate to make the financial information presented not misleading. In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, which are of a normal recurring nature, to present fairly the Company's financial position, results of operations and cash flows at the dates and for the periods presented. Cost of goods sold for interim periods for certain entities is determined based on estimated gross profit rates. Interim results of operations are not necessarily indicative of results to be expected for the fiscal year. Net income (loss) attributable to noncontrolling interests represents the portion of the earnings or losses from the operations of the Company's consolidated subsidiaries attributable to the interests of unrelated third party equity owners. Net income (loss) attributable to noncontrolling interests is deducted from net income to arrive at net income attributable to Miller Industries, Inc.

These condensed consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2014. The condensed consolidated financial statements include accounts of certain subsidiaries whose fiscal closing dates differ from December 31st by 31 days (or less) to facilitate timely reporting. Certain prior year amounts have been reclassified to conform to current year presentation, with no impact on previously reported shareholders' equity. The Company evaluated subsequent events through the date the financial statements were issued.

2. BASIC AND DILUTED INCOME PER SHARE

Basic income per share is computed by dividing net income attributable to Miller Industries, Inc. by the weighted average number of common shares outstanding. Diluted income per share is calculated by dividing net income attributable to Miller Industries, Inc. by the weighted average number of common and potential dilutive common shares outstanding. Diluted income per share takes into consideration the assumed exercise of outstanding stock options resulting in approximately 35,000 and 53,000 potential dilutive common shares for the three months ended June 30, 2015 and 2014, and 44,000 and 61,000 for the six months ended June 30, 2015 and 2014, respectively. For the three months and six months ended June 30, 2015 and 2014, none of the outstanding stock options would have been anti-dilutive.

3. INVENTORIES

Inventory costs include materials, labor and factory overhead. Inventories are stated at the lower of cost or market (net realizable value), determined on a first-in, first-out basis. Appropriate consideration is given to obsolescence, valuation and other factors in determining net realizable value. Revisions of these estimates could result in the need for adjustments. Inventories, net of reserves, at June 30, 2015 and December 31, 2014 consisted of the following:

	June 30, 2015	December 31, 2014
Chassis	$4,804	$ 4,700
Raw materials	26,431	24,291
Work in process	10,752	10,477
Finished goods	15,567	16,992
	$57,554	$ 56,460

4. LONG-LIVED ASSETS

The Company periodically reviews the carrying amount of its long-lived assets to determine if those assets may be recoverable based upon the future operating cash flows expected to be generated by those assets. Management believes that its long-lived assets are appropriately valued.

5. GOODWILL

Goodwill consists of the excess of cost of acquired entities over the sum of the amounts assigned to identifiable assets acquired less liabilities assumed. Goodwill is not amortized. However, the Company evaluates the carrying value of goodwill for impairment at least annually or if an event or circumstance occurs that would indicate that the carrying amount had been impaired. The Company reviews goodwill for impairment utilizing a qualitative assessment or a two-step process. If we choose to perform a qualitative analysis of goodwill and determine that the fair value more likely than not exceeds the carrying value, no further testing is needed. If we choose the two-step approach or if qualitative analysis determines the carrying value more likely than not exceeds fair value, the first step identifies potential impairment by comparing the fair value of the reporting unit with its carrying value. If the fair value exceeds the carrying value the second step is not necessary. If the carrying value is more than the fair value, the second step of testing is performed to compare the fair value of the goodwill with its carrying value. An impairment loss would be recognized to the extent that the carrying value of the goodwill exceeds its fair value.

6. LONG-TERM OBLIGATIONS

Credit Facility and Other Long-Term Obligations

Credit Facility

On December 30, 2014, the Company entered into an Amended and Restated Loan Agreement with First Tennessee Bank National Association (“First Tennessee”) for a $25,000 unsecured revolving credit facility (the “Credit Facility”). On June 11, 2015, the Company entered into the First Amendment to Amended and Restated Loan Agreement with First Tennessee, pursuant to which the maturity date of the Credit Facility was renewed and extended from March 31, 2017 to March 31, 2018, and the maximum amount of the Credit Facility was increased by $5,000 from $25,000 to $30,000. The Credit Facility contains customary representations and warranties, events of default, and financial, affirmative and negative covenants for loan agreements of this kind. Covenants under the Credit Facility restrict the payment of cash dividends if the Company would be in violation of the minimum tangible net worth test or the leverage ratio test in the current loan agreement as a result of the dividends, among various other restrictions.

In the absence of a default, all borrowings under the Credit Facility bear interest at the LIBOR Rate plus 1.50% per annum. The Company will pay a non-usage fee under the current loan agreement in an annual amount between 0.15% and 0.35% of the unused amount of the Credit Facility, which fee shall be paid quarterly.

At June 30, 2015 and December 31, 2014, the Company had no outstanding borrowings under the Credit Facility.

Interest Rate Risk

Changes in interest rates affect the interest paid on indebtedness under the Credit Facility because outstanding amounts of indebtedness under the Credit Facility are subject to variable interest rates. Under the Credit Facility, the non-default rate of interest was equal to the LIBOR Market Index Rate plus 1.50% per annum (for a rate of interest of 1.69% at June 30, 2015). Because there were no amounts outstanding under the Credit Facility, a one percent change in the interest rate on our variable-rate debt would not have a material impact on our financial position, results of operations or cash flows for the three-month period ended June 30, 2015.

Other Long-Term Obligations

At June 30, 2015, the Company had approximately $1,100 in non-cancelable operating lease obligations.

7.STOCK-BASED COMPENSATION

The Company did not issue any stock options during the three months ended June 30, 2015. For additional disclosures related to the Company's stock-based compensation refer to Notes 2 and 4 of the Notes to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

During the three months ended June 30, 2015 and 2014, options were exercised for the purchase of 17,500 shares of common stock at a weighted-average exercise price of $5.49 and 1,500 shares of common stock at a weighted-average exercise price of $5.49, respectively. During the six months ended June 30, 2015 and 2014, options were exercised for the purchase of 33,000 shares of common stock at a weighted-average exercise price of $5.49 and 30,697 shares of common stock at a weighted-average exercise price of $5.87, respectively.

8. COMMITMENTS AND CONTINGENCIES

Commitments

The Company has entered into arrangements with third-party lenders where it has agreed, in the event of default by a customer, to repurchase from the third-party lender Company products repossessed from the customer. These arrangements are typically subject to a maximum repurchase amount. The maximum amount of collateral that the Company could be required to purchase was approximately $40,160 at June 30, 2015, and $31,458 at December 31, 2014. However, the Company's risk under these arrangements is mitigated by the value of the products that would be repurchased as part of the transaction. The Company considered the fair value at inception of its liability under these arrangements and concluded that the liability associated with these potential repurchase obligations is not material and not probable at June 30, 2015.

At June 30, 2015, the Company had commitments of approximately $1,598 for construction and acquisition of property, plant and equipment. The Company is in the process of consolidating and expanding its Pennsylvania manufacturing operations to increase capacity and improve operating efficiencies. The plan includes consolidating primary manufacturing operations at one location while plans for the remaining plant location continue to be evaluated. The current estimated costs of this project are approximately $22,000, including machinery and equipment, buildings and improvements and land. Approximately $2,605 of these costs were incurred as of June 30, 2015 and are included in property, plant and equipment, net on the condensed consolidated balance sheets.. The remainder of these costs is expected to be incurred during the last half of 2015 and during 2016. The timing and costs of the project are subject to change. We do not anticipate any employee severance costs or any material relocation expense associated with the consolidation since the two existing facilities are very close to each other. The Company also intends to engage in several capital projects at its Ooltewah, Tennessee facility that it estimates will cost from $9,000 to $10,000 over the next year.

Contingencies

The Company is, from time to time, a party to litigation arising in the normal course of its business. Litigation is subject to various inherent uncertainties, and it is possible that some of these matters could be resolved unfavorably to the Company, which could result in substantial damages against the Company. The Company has established accruals for matters that are probable and reasonably estimable and maintains product liability and other insurance that management believes to be adequate. Management believes that any liability that may ultimately result from the resolution of these matters in excess of available insurance coverage and accruals will not have a material adverse effect on the consolidated financial position or results of operations of the Company.

9. INCOME TAXES

At June 30, 2015 and December 31, 2014, the Company had no unrecognized income tax positions recorded. The Company does not expect its unrecognized tax positions to change significantly in the next twelve months. If unrecognized tax positions existed, the interest and penalties related to the unrecognized tax positions would be recorded as income tax expense in the condensed consolidated statements of income.

The Company is subject to United States federal income taxes, as well as income taxes in various states and foreign jurisdictions. The Company's tax years 2011 through 2013 remain open to examination for U.S. federal income taxes. With few exceptions, the Company is no longer subject to state or non-U.S. income tax examinations prior to 2011.

10. SHAREHOLDERS EQUITY

Dividends

Prior to March 2010, we had never declared cash dividends on our common stock. On March 8, 2010, our board of directors adopted a dividend policy to consider and pay annual cash dividends subject to our ability to satisfy all applicable statutory and regulatory requirements and our continued financial strength. On May 10, 2011, the Company's board of directors approved a dividend policy to consider and pay quarterly dividends on its common stock subject to the Company's ability to satisfy all applicable statutory requirements and the Company's continued financial strength, replacing the previous policy of paying annual cash dividends. Dividend payments made for 2015, 2014, 2013 and 2012 were as follows:

Payment	Record Date	Payment Date	Dividend (per share)	Amount
Q1 2012	March 19, 2012	March 26, 2012	$ 0.13	$1,437
Q2 2012	June 18, 2012	June 25, 2012	0.13	1,439
Q3 2012	September 17, 2012	September 24, 2012	0.13	1,439
Q4 2012	December 10, 2012	December 17, 2012	0.13	1,447
Total for 2012			$ 0.52	$5,762
Q1 2013	March 18, 2013	March 25, 2013	$ 0.14	$1,569
Q2 2013	June 17, 2013	June 24, 2013	0.14	1,573
Q3 2013	September 16, 2013	September 23, 2013	0.14	1,575
Q4 2013	December 9, 2013	December 16, 2013	0.14	1,577
Total for 2013			$ 0.56	$6,294
Q1 2014	March 17, 2014	March 24, 2014	$ 0.15	$1,692
Q2 2014	June 16, 2014	June 23, 2014	0.15	1,695
Q3 2014	September 15, 2014	September 22, 2014	0.15	1,696
Q4 2014	December 8, 2014	December 15, 2014	0.15	1,695

Total for 2014			$ 0.60	$6,778
Q1 2015	March 16, 2015	March 23, 2015	$ 0.16	$1,809
Q2 2015	June 15, 2015	June 22, 2015	0.16	1,814
Total for 2015			$ 0.32	$3,623

On August 3, 2015, the Company's Board of Directors declared a quarterly cash dividend of $0.16 per share. The dividend is payable September 21, 2015 to shareholders of record as of September 14, 2015.

8

11. GEOGRAPHIC INFORMATION

Net sales and long-lived assets (property, plant and equipment and goodwill and intangible assets) by region were as follows (revenue is attributed to regions based on the locations of customers):

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2015	2014	2015	2014
Net Sales:				
North America	$130,555	$102,895	$239,005	$185,664
Foreign	20,982	19,537	39,320	40,936
	$151,537	$122,432	$278,325	$226,600

	June 30, 2015	December 31, 2014
Long Lived Assets:		
North America	$42,189	$ 41,176
Foreign	2,405	2,493
	$44,594	$ 43,669

12. CUSTOMER INFORMATION

No single customer accounted for 10% or more of consolidated net sales for the three months and six months ended June 30, 2015 and 2014.

13. OTHER (INCOME) EXPENSE

Other (income) expense for the six months ended June 30, 2015 consisted of a foreign currency transactional loss of $321. For the six months ended June 30, 2014 the Company had a loss of $117, including a loss on deconsolidation of a subsidiary of $83 and foreign currency transaction losses of $34. On February 28, 2014, the Company entered into an agreement to sell all of its interest in the Delavan joint venture to its joint venture partner, which closed on March 31, 2014. Our Greeneville facility has ceased the manufacturing of Delavan products as of the end of the first quarter of 2014 so no further losses from the venture are expected.

14. Fair Value of Financial Instruments

For assets and liabilities measured at fair value on a recurring and nonrecurring basis, a three-level hierarchy of measurements based upon observable and unobservable inputs is used to arrive at fair value. Observable inputs are developed based on market data obtained from independent sources, while unobservable inputs reflect our assumptions about valuation based on the best information available in the circumstances. Depending on the inputs, we classify each fair value measurement as follows:

Level 1—based upon quoted prices for *identical* instruments in active markets,

9

Level 2—based upon quoted prices for *similar* instruments, prices for identical or similar instruments in markets that are not active, or model-derived valuations, all of whose significant inputs are observable, and

Level 3—based upon one or more significant unobservable inputs.

The carrying values of cash and temporary investments, accounts receivable, accounts payable and accrued liabilities are reasonable estimates of their fair values because of the short maturity of these financial instruments.

The fair value of derivative assets and liabilities are measured assuming that the unit of account is an individual derivative transaction and that each derivative could be sold or transferred on a stand-alone basis. We classify within Level 2 our forward foreign currency exchange contracts based upon quoted prices for similar instruments that are actively traded. For more information regarding derivatives, see Note 15, *Derivative Financial Instruments*.

15. Derivative Financial Instruments

The Company periodically enters into foreign currency exchange contracts designed to mitigate the impact of foreign currency risk. In November 2012, the Company adopted a formal foreign currency exchange policy. Under this policy, for those foreign currency exchange contracts that qualify for hedge accounting treatment, changes in the fair value of such instruments are included in accumulated other comprehensive income (loss). The Company also assesses, both at inception and on an ongoing basis, whether the derivatives that are used in the hedging transaction are highly effective in offsetting changes in cash flows of the hedged items. For those foreign currency exchange contracts that do not qualify for hedge accounting treatment, changes in the fair value of such instruments are recognized each period in other (income) expense, net in our condensed consolidated statements of income. In December 2012, the Company entered into foreign exchange currency contracts with notional values of $4,418 at June 30, 2014 and $10,200 at December 31, 2013 maturing from September 2013 to October 2014 that were considered cash flow hedges. Changes in fair value of such cash flow hedges are recorded in accumulated other comprehensive income (loss) to the extent that the hedges are considered effective. At June 30, 2014, the net fair value of foreign currency exchange contracts was ($145), which is included in accounts receivable or accounts payable in our condensed consolidated balance sheets, depending on the asset or liability position of the derivative. At June 30, 2015, the Company had no outstanding foreign currency exchange contracts.

16. RECENT ACCOUNTING PRONOUNCEMENTS

Recently Issued Standards

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (FASB ASU 2014-09), which supersedes the revenue recognition requirements in ASC 605, Revenue Recognition. ASU 2014-09 outlines a new, single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. This new revenue recognition model provides a five-step analysis in determining when and how revenue is recognized. The new model will require revenue recognition to depict the transfer of promised goods or services to customers in an amount that reflects the consideration a company expects to receive in exchange for those goods or services. In July 2015, the FASB approved a one-year deferral of the effective date of the new standard. The provisions of FASB ASU 2014-09 is now effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption is not permitted. We are currently evaluating the impact of the adoption of this ASU on our consolidated financial statements.

In July 2015, the FASB issued Accounting Standards Update No. 2015-11, Simplifying the Measurement of Inventory (Topic 330) (FASB ASU 2015-11). ASU 2015-11 requires an entity to measure inventory at the lower of cost and net realizable value, rather than the lower of cost or market. The provisions of FASB ASU 2015-11 are effective for interim and annual periods beginning after December 15, 2016. Early adoption is permitted. We are currently evaluating the impact of the adoption of this ASU on our consolidated financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Overview

Miller Industries, Inc. is The World's Largest Manufacturer of Vehicle Towing and Recovery Equipment®, with domestic manufacturing subsidiaries in Tennessee and Pennsylvania, and foreign manufacturing subsidiaries in France and the United Kingdom. We offer a broad range of equipment to meet our customers' design, capacity and cost requirements under our Century®, Vulcan®, Challenger®, Holmes®, Champion®, Chevron™, Eagle®, Titan®, Jige™ and Boniface™ brand names. In this Item 2 – "Management's Discussion and Analysis of Financial Condition and Results of Operations," the words "Miller Industries," "the Company," "we," "our," "ours" and "us" refer to Miller Industries, Inc. and its subsidiaries or any of them.

Our management focuses on a variety of key indicators to monitor our overall operating and financial performance. These indicators include measurements of revenue, operating income, gross margin, earnings per share, capital expenditures and cash flow.

10

We derive revenues primarily from product sales made through our network of domestic and foreign independent distributors. Our revenues are sensitive to a variety of factors including general economic conditions as well as demand for, and price of, our products, our technological competitiveness, our reputation for providing quality products and reliable service, competition within our industry, and the cost of raw materials (including aluminum, steel and petroleum-related products).

Our industry is cyclical in nature. In recent years, the overall demand for our products and resulting revenues have been positively affected by recovering economic conditions and improving consumer sentiment. However, historically, the overall demand for our products and our resulting revenues have at times been negatively affected by:

- wavering levels of consumer confidence;
- volatility and disruption in domestic and international capital and credit markets and the resulting decrease in the availability of financing, including floor plan financing, for our customers and towing operators;
- significant periodic increases in fuel and insurance costs and their negative effect on the ability of our customers to purchase towing and related equipment; and
- the overall effects of global economic downturns.

We remain concerned about the continuing effects of these factors on the towing and recovery industry, and we continue to monitor our overall cost structure to see that it remains in line with business conditions.

In addition, we have been and will continue to be affected by changes in the prices that we pay for raw materials, particularly aluminum, steel, petroleum-related products and other raw materials, which represent a substantial part of our total cost of operations. In the past, as we have determined necessary, we have implemented price increases to offset these higher costs. We also developed alternatives to some of the components used in our production process that incorporate these raw materials, and our suppliers have implemented these alternatives in the production of our component parts. We continue to monitor raw material prices and availability in order to more favorably position the Company in this dynamic market.

As previously announced, our financial results through March 31, 2014 were negatively impacted by the Delavan joint venture. Losses before income taxes that are directly attributable to the Delavan joint venture were approximately $1,300 and $152 (including the loss on deconsolidation of the subsidiary) for 2013 and the first quarter of 2014, respectively. The Company also generated additional indirect losses associated with the Greeneville, Tennessee facility in connection with its manufacturing and supply agreement for the joint venture. Following a review and

evaluation of operations related to the Delavan joint venture, the Company made the decision to consider strategic alternatives with regard to the venture. On February 28, 2014, the Company entered into an agreement to sell all of its interest in the Delavan joint venture to its joint venture partner, which closed on March 31, 2014. Our Greeneville facility has ceased the manufacturing of Delavan products as of the end of the first quarter of 2014 so no further losses from the venture are expected.

There were no borrowings under the credit facility at June 30, 2015. The maximum amount of the credit facility was increased from $25,000 to $30,000 during the second quarter in order to provide flexibility in the financing of future capital expenditures, including the Pennsylvania consolidation.

Critical Accounting Policies

Our condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America, which require us to make estimates. Certain accounting policies are deemed "critical," as they require management's highest degree of judgment, estimates and assumptions. A discussion of critical accounting policies, the judgments and uncertainties affecting their application and the likelihood that materially different amounts would be reported under different conditions or using different assumptions follows:

Accounts receivable

We extend credit to customers in the normal course of business. Collections from customers are continuously monitored and an allowance for doubtful accounts is maintained based on historical experience and any specific customer collection issues. While such bad debt expenses have historically been within expectations and the allowance established, there can be no assurance that we will continue to experience the same credit loss rates as in the past.

Inventory

Inventory costs include materials, labor and factory overhead. Inventories are stated at the lower of cost or market (net realizable value), determined on a first-in, first-out basis. Appropriate consideration is given to obsolescence, valuation and other factors in determining net realizable value. Revisions of these estimates could result in the need for adjustments.

Long-lived assets

Long-lived assets are reviewed for impairment whenever events or circumstances indicate that the carrying amount of these assets may not be fully recoverable. When a determination has been made that the carrying amount of long-lived assets may not be fully recovered, the amount of impairment is measured by comparing an asset's estimated fair value to its carrying value. The determination of fair value is based on projected future cash flows discounted at a rate determined by management or, if available, independent appraisals or sales price negotiations. The estimation of fair value includes significant judgment regarding assumptions of revenue, operating costs, interest rates, property and equipment additions, and industry competition and general economic and business conditions among other factors. We believe that these estimates are reasonable, however, changes in any of these factors could affect these evaluations. Based on these estimations, we believe that our long-lived assets are appropriately valued.

Goodwill

Goodwill is tested for impairment annually or if an event or circumstance occurs that would more likely than not reduce the fair value of the reporting unit below the carrying amount. We review goodwill for impairment utilizing a qualitative assessment or a two-step approach. If we choose to perform a qualitative analysis of goodwill and determine that the fair value more likely than not exceeds the carrying value, no further testing is needed. If we choose the two-step approach or if qualitative analysis determines the carrying value more likely than not exceeds fair value, the first step identifies potential impairment by comparing the fair value of the reporting unit with its carrying value. If the fair value exceeds the carrying value the second step is not necessary. If the carrying value is more than the fair value, the second step of testing is performed to compare the fair value of the goodwill with its carrying value. An impairment loss would be recognized to the extent that the carrying value of the goodwill exceeds its fair value. We cannot predict the occurrence of certain events or changes in circumstances that might adversely affect the carrying value of goodwill. Such events might include, but are not limited to, the impact of the economic environment or a material change in a relationship with significant customers.

Warranty reserves

We estimate expense for product warranty claims at the time products are sold. These estimates are established using historical information about the nature, frequency, and average cost of warranty claims. We review trends of warranty claims and take actions to improve product quality and minimize warranty claims. We believe the warranty reserve is adequate; however, actual claims incurred could differ from the original estimates, requiring adjustments to the accrual.

Income taxes

We recognize deferred tax assets and liabilities based on differences between the financial statement carrying amounts and the tax bases of assets and liabilities. We consider the need to record a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. We consider tax loss carryforwards, reversal of deferred tax liabilities, tax planning and estimates of future taxable income in assessing the need for a valuation allowance. If unrecognized tax positions exist, we record interest and penalties related to the unrecognized tax positions as income tax expense in our condensed consolidated statement of income.

Revenues

Under our accounting policies, revenues are recorded when the risk of ownership for products has transferred to independent distributors or other customers, which generally occurs on shipment. From time to time, revenue is recognized under a bill and hold arrangement. Recognition of revenue on bill and hold arrangements occurs when risk of ownership has passed to the customer, a fixed written commitment has been provided by the customer, the goods are complete and ready for shipment, the goods are segregated from inventory, no performance obligation remains, and a schedule for delivery has been established. While we manufacture only the bodies of wreckers, which are installed on truck chassis manufactured by third parties, we frequently purchase the truck chassis for resale to our customers. Sales of company-purchased truck chassis are included in net sales. Margins are substantially lower on completed recovery vehicles containing company-purchased chassis because the markup over the cost of the chassis is nominal.

Foreign Currency Translation

The functional currency for our foreign operations is the applicable local currency. The translation from the applicable foreign currencies to U.S. dollars is performed for balance sheet accounts using current exchange rates in effect at the balance sheet date, historical rates for equity and the weighted average exchange rate during the period for revenue and expense accounts. Foreign currency translation adjustments are included in shareholders’ equity. Intercompany debt denominated in a currency other than the functional currency is remeasured into the functional currency. Gains and losses resulting from foreign currency transactions are included in other income and expense in our condensed consolidated statements of income.

Results of Operations–Three Months Ended June 30, 2015 Compared to Three Months Ended June 30, 2014

Net sales for the three months ended June 30, 2015 increased 23.8% to $151,537 from $122,432 for the comparable period in 2014. The increase in revenue was primarily attributable to increased demand levels in our domestic markets and corresponding increases in production levels based on recovering economic conditions and improving consumer sentiment.

Costs of operations for the three months ended June 30, 2015 increased 21.9% to $133,996 from $109,922 for the comparable period in 2014, which was attributable to the increased demand levels and increased production. Overall, costs of operations decreased slightly as a percentage of sales from 89.8% to 88.4%.

Selling, general, and administrative expenses for the three months ended June 30, 2015 increased to $7,648 from $6,964 for the three months ended June 30, 2014. The increase in expenses was primarily attributable to higher sales and production levels. As a percentage of sales, selling, general, and administrative expenses decreased to 5.0% for the three months ended June 30, 2015 from 5.7% for the three months ended June 30, 2014 due to the fixed nature of certain of these expenses.

Total interest expense increased to $245 from $126 for the three months ended June 30, 2015 as compared to the prior year period. Increases in interest expense were primarily due to increases in interest on distributor floor planning and on chassis purchases.

Other (income) expense relates to foreign currency translation gains and losses. For the three months ended June 30, 2015 the loss was $265 compared to a loss of $55 for the three months ended June 30, 2014.

The provision for income taxes for the three months ended June 30, 2015 and 2014 reflects a combined effective U.S. federal, state and foreign tax rate of 37.5% and 36.9%, respectively.

Results of operations – Six months ended June 30, 2015 compared to Six months ended June 30, 2014

Net sales for the six months ended June 30, 2015 increased 22.8% to $278,325 from $226,600 for the comparable period in 2014. The increase in revenue was primarily attributable to increased demand levels in our domestic markets and corresponding increases in production levels based on recovering economic conditions and improving consumer

sentiment.

Costs of operations for the six months ended June 30, 2015 increased 22.5% to $248,832 from $203,152 for the comparable period in 2014, which was attributable to the increased demand levels and increased production. Overall, costs of operations decreased slightly as a percentage of sales from 89.6% to 89.4%.

Selling, general, and administrative expenses for the six months ended June 30, 2015 increased to $15,088 from $14,130 for the six months ended June 30, 2014. The increase is primarily attributable to higher sales and production levels. As a percentage of sales, selling, general, and administrative expenses decreased to 5.4% for the six months ended June 30, 2015 from 6.2% for the six months ended June 30, 2014 due to the fixed nature of certain of these expenses.

Total interest expense increased to $408 from $196 for the six months ended June 30, 2015 as compared to the prior year period. Increases in interest expense were primarily due to increases in interest on distributor floor planning and on chassis purchases.

Other (income) expense, net for the six months ended June 30, 2015 was a loss of $321 relating to foreign currency transaction gains and losses. Other (income) expense, net for the six months ended June 30, 2014 was a loss of $117 that included a loss on deconsolidation of $83 and foreign currency transaction losses of $34

The provision for income taxes for the six months ended June 30, 2015 and 2014 reflects a combined effective U.S. federal, state and foreign tax rate of 34.7% and 36.9%, respectively. The lower effective tax rate in the current period results primarily from the lower corporate tax rates on the earnings of the European subsidiaries and the impact of U.S. federal domestic production activity deductions.

Liquidity and Capital Resources

Cash provided by operating activities was $4,431 for the six months ended June 30, 2015, compared to operating activities of $1,279 for the comparable period in 2014. The cash provided by operating activities for the 2015 period was primarily attributable to consolidated net income. Cash provided by operating activities reflects increases in accounts payables offset by increases in other components of working capital, including accounts receivable and inventory. Certain components of accounts receivable and accounts payable have extended collection and payment terms.

Cash used in investing activities was $3,071 for the six months ended June 30, 2015 compared to $1,993 for the comparable period in 2014. The cash used in investing activities for the 2015 period was primarily for the purchase of property, plant and equipment.

Cash used in financing activities was $3,342 for the six months ended June 30, 2015, compared to $3,185 for the comparable period in 2014. The cash used in financing activities for the 2015 period was primarily to pay cash dividends, slightly offset by proceeds from the exercise of stock options.

As of June 30, 2015, we had cash and cash equivalents of $35,971, exclusive of unused availability under our credit facility. Our primary cash requirements include working capital, capital expenditures, the funding of any declared cash dividends and interest and principal payments on indebtedness, if any, under our credit facility. At June 30, 2015, the Company had commitments of approximately $1,598 for construction and acquisition of property and equipment. We expect our primary sources of cash to be cash flow from operations and cash and cash equivalents on hand at June 30, 2015, with borrowings under our credit facility being available if needed. We expect these sources to be sufficient to satisfy our cash needs during 2015 and for the next several years. However, our ability to satisfy our cash needs will substantially depend upon a number of factors including our future operating performance, taking into account the economic and other factors discussed above and elsewhere in this Quarterly Report, as well as financial, business and other factors, many of which are beyond our control.

As of June 30, 2015 and December 31, 2014, $17,303 and $15,701, respectively, of the Company's cash and temporary investments were held by foreign subsidiaries and their holdings are generally based in the local currency. Amounts held by foreign subsidiaries are generally subject to U.S. income taxation on repatriation to the U.S.

The Company is in the process of consolidating and expanding its Pennsylvania manufacturing operations to increase capacity and improve operating efficiencies. The plan includes consolidating primary manufacturing operations at one location while plans for the remaining plant location continue to be evaluated. The current estimated costs of this project are approximately $22,000, including machinery and equipment, buildings and improvements and land. Approximately $2,605 of these costs were incurred as of June 30, 2015 and are included in property, plant and equipment, net on the condensed consolidated balance sheets. The remainder of these costs is expected to be incurred during the last half of 2015 and during 2016. The timing and costs of the project are subject to change. We do not anticipate any employee severance costs or any material relocation expense associated with the consolidation since the two existing facilities are very close to each other. The Company also intends to engage in several capital projects at its Ooltewah, Tennessee facility that it estimates will cost from $9,000 to $10,000 over the next year.

Credit Facilities and Other Obligations

Credit Facility

On December 30, 2014, the Company entered into an Amended and Restated Loan Agreement with First Tennessee Bank National Association ("First Tennessee") for a $25,000 unsecured revolving credit facility (the "Credit Facility"). On

June 11, 2015, the Company entered into the First Amendment to Amended and Restated Loan Agreement with First Tennessee, pursuant to which the maturity date of the Credit Facility was renewed and extended from March 31, 2017 to March 31, 2018, and the maximum amount of the Credit Facility was increased by $5,000 from $25,000 to $30,000. The Credit Facility contains customary representations and warranties, events of default, and financial, affirmative and negative covenants for loan agreements of this kind. Covenants under the Credit Facility restrict the payment of cash dividends if the Company would be in violation of the minimum tangible net worth test or the leverage ratio test in the current loan agreement as a result of the dividends, among various other restrictions.

In the absence of a default, all borrowings under the Credit Facility bear interest at the LIBOR Rate plus 1.50% per annum. The Company will pay a non-usage fee under the current loan agreement in an amount between 0.15% and 0.35% of the unused amount of the Credit Facility, which fee shall be paid quarterly.

At June 30, 2015 and December 31, 2014, the Company had no outstanding borrowings under the Credit Facility.

Other Long-Term Obligations

At June 30, 2015, we had approximately $1,100 in non-cancelable operating lease obligations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of our business, we are exposed to market risk from changes in interest rates and foreign currency exchange rates that could impact our results of operations and financial position.

Interest Rate Risk

Changes in interest rates affect the interest paid on indebtedness under our Credit Facility because the outstanding amounts of indebtedness under our Credit Facility are subject to variable interest rates. Under our Credit Facility, the non-default rate of interest was equal to the LIBOR Market Index Rate plus 1.50% per annum (for a rate of interest of 1.69% at June 30, 2015). Because there were no amounts outstanding under the Credit Facility, a one percent change in the interest rate on our variable-rate debt would not have materially impacted our financial position, results of operations or cash flows for the quarter ended June 30, 2015.

Foreign Currency Exchange Rate Risk

We are subject to risk arising from changes in foreign currency exchange rates related to our international operations in Europe. We manage our exposure to our foreign currency exchange rate risk through our regular operating and financing activities. Additionally, from time to time, we enter into certain forward foreign currency exchange contracts. Because we report in U.S. dollars on a consolidated basis, foreign currency exchange fluctuations could have a translation impact on our financial position. At June 30, 2015, we recognized a $2,729 decrease in our foreign currency translation adjustment account compared with December 31, 2014 because of fluctuations of the U.S. dollar against certain foreign currencies compared to a $165 increase for the prior year period. For the three months ended June 30, 2015 and 2014, the impact of foreign currency exchange rate changes on our results of operations and cash flows was a loss of $265 and $55, respectively. For the six months ended June 30, 2015 and 2014, the impact of foreign currency exchange rates on the results of operations and cash flows was a loss of $321 and $34, respectively.

ITEM 4. CONTROLS AND PROCEDURES

Within 90 days prior to the filing date of this report, we carried out an evaluation, under the supervision and with the participation of our management, including our co-Chief Executive Officers (CEOs) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Rules 13a-14(c) under the Securities Exchange Act of 1934. Based upon this evaluation, our CEOs and CFO have concluded that the disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

There were no significant changes in our internal controls or in other factors that could significantly affect internal controls subsequent to the date of this evaluation.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are, from time to time, a party to litigation arising in the normal course of our business. Litigation is subject to various inherent uncertainties, and it is possible that some of these matters could be resolved unfavorably to us, which could result in substantial damages against us. We have established accruals for matters that are probable and reasonably estimable and maintain product liability and other insurance that management believes to be adequate. Management believes that any liability that may ultimately result from the resolution of these matters in excess of available insurance coverage and accruals will not have a material adverse effect on our consolidated financial position or results of operations.

ITEM 1A. RISK FACTORS

There have been no material changes to the Risk Factors included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

ITEM 6. EXHIBITS

	Description	Incorporated by Reference to Registration File Number	Form or Report	Date of Report	Exhibit Number in Report
10.1	First Amendment to Amended and Restated Loan Agreement, dated as of June 11, 2015, by and among the Registrant, certain of the Registrant's wholly-owned subsidiaries, and First Tennessee Bank National Association		Form 8-K	June 17, 2015	10.1
10.2	Master Revolving Credit Note dated as of June 11, 2015 from the Registrant payable to First Tennessee Bank National Association		Form 8-K	June 17, 2015	10.2
31.1	Certification Pursuant to Rules 13a-14(a)/15d-14(a) by Co-Chief Executive Officer*				
31.2	Certification Pursuant to Rules				

	13a-14(a)/15d-14(a) by Co-Chief Executive Officer*
31.3	Certification Pursuant to Rules 13a-14(a)/15d-14(a) by Chief Financial Officer*
32.1	Certification Pursuant to Section 1350 of Chapter 63 of Title 18 of United States Code by Co-Chief Executive Officer*
32.2	Certification Pursuant to Section 1350 of Chapter 63 of Title 18 of United States Code by Co-Chief Executive Officer*
32.3	Certification Pursuant to Section 1350 of Chapter 63 of Title 18 of United States Code by Chief Financial Officer*
101	The following information from the Company's quarterly report

on Form 10-Q for the quarterly period ended June 30, 2015 formatted in Extensible Business Reporting Language (XBRL): (i) Condensed Consolidated Balance Sheets – June 30, 2015 and December 31, 2014; (ii) Condensed Consolidated Statements of Income for the three and six months ended June 30, 2015 and 2014; (iii) Condensed Consolidated Statements of Comprehensive Income for the three and six months ended June 30, 2015 and 2014; (iv) Condensed Consolidated Statements of Cash Flows for the six months ended June 30, 2015 and 2014; and (v) Notes to Condensed Consolidated Financial Statements.*
