UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES AND EXCHANGE ACT OF 1934

For the quarterly period ended September 30, Commission File No. 001-31852
2006

Tri-Valley Corporation
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
Incorporation or organization)

84-0617433
(I.R.S. Employer Identification No.)

4550 California Ave., Suite 600, Suite 200, Bakersfield, California 93309
(Address of principal executive offices)

(661) 864-0500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes[X] No []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer (as defined in Rule 12b-2 of the Exchange Act).

Large Accelerated Filer [] Accelerated Filer [X] Non-accelerated Filer []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes [] No [X]

The number of shares of the issuer's common stock outstanding at October 31, 2006, was 23,303,942.

TRI-VALLEY CORPORATION

NOTES TO CONDENSED FINANCIAL STATEMENTS

(Unaudited)

Note 1 - Description of Business and Basis of Presentation

Description of Business

Tri-Valley Corporation (“TVC” or the Company), a Delaware corporation formed in 1971, is in the business of exploring, acquiring and developing petroleum and metal and mineral properties and interests therein. Tri-Valley has five subsidiaries and three operating segments or business lines.

- Tri-Valley Oil & Gas Company (“TVOG”) operates the oil & gas activities. TVOG derives the majority of its revenue from oil and gas drilling and development. TVOG primarily generates its own exploration prospects from its internal database, and also screens prospects from other geologists and companies. TVOG generates these geological “plays” within a certain geographic area of mutual interest. The prospect is then presented to potential co-venturers. The company deals with both accredited individual investors and energy industry companies. TVOG serves as the operator of these co-ventures. TVOG operates both the oil and gas production segment and the drilling and development segment of our business lines.
- Select Resources Corporation (“Select”) was created in late 2004 to manage, grow and operate Tri-Valley’s mineral interests. Select operates the Minerals segment of our business lines both through a joint venture with Tri-Western Resources, LLC and as owner/operator of individual properties.
- Great Valley Production Services, LLC, (“Great Valley Productions Services”) was formed in 2006 to operate oil production and drilling rigs, primarily for TVOG. Tri-Valley plans to sell 49% of the ownership interest and retain a 51% ownership interest in this subsidiary and remain operator. As of September 30, 2006, \$4,306,000 has been invested by private parties in a 48% ownership interest.
- Great Valley Drilling Company, LLC (“Great Valley Drilling”) was formed in 2006 to operate oil drilling rigs, primarily for TVOG. Tri-Valley has sold 49% of the ownership interest to private parties for \$1,760,000 and has retained a 51% ownership interest in this subsidiary.
- Tri-Valley Power Corporation is inactive at the present time.

Basis of Presentation

The financial information included herein is unaudited; however, such information reflects all adjustments (consisting solely of normal recurring adjustments), which are, in the opinion of management, necessary for a fair statement of results for the interim periods. The results of operations for the nine-month period ended September 30, 2006, are not necessarily indicative of the results to be expected for the full year.

The accompanying consolidated financial statements do not include footnotes and certain financial presentations normally required under generally accepted accounting principles in the United States of America; and, therefore, should be read in conjunction with our Annual Report on Form 10-K, filed with the Securities and Exchange Commission on March 31, 2006, for the year ended December 31, 2005.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries, Tri-Valley Oil & Gas Co., and Select Resources, Inc. and Tri-Valley Power Corporation, since their inception. Partially owned subsidiaries Great Valley Drilling Company, LLC and Great Valley Production Services, LLC are also included. Because the Company is the principal beneficiary of a mining venture, it has also consolidated a 50% owned joint venture, Tri-Western Resources, LLC. Other partnerships in which the Company has an operating or nonoperating interest in which the Company is not the primary beneficiary and owns less than 51%, are proportionately combined. These include Opus I, Martins-Severin, Martins-Severin Deep, and Tri-Valley Exploration 1971-1 partnerships. All material intra and intercompany accounts and transactions have been eliminated in combination and consolidation

Note 2 - Per Share Computations

Basic earnings per share computations are based upon the weighted-average number of common shares outstanding during each year. Diluted earnings per share include common stock equivalents

Note 3 - Recent Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 123 (revised 2004), "Share-Based Payment" ("Statement 123R"), which is a revision of FASB Statement No. 123, "Accounting for Stock-Based Compensation." Statement 123R supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees," and amends FASB Statement No. 95, "Statement of Cash Flows." Statement 123R requires a public company to measure the cost of employee services received in exchange for an award of equity instruments, including stock options, based on the grant-date fair value of the award, with limited exceptions. That cost will be recognized over the period during which the employee is required to provide service in exchange for the award, which is typically the vesting period. Statement 123R eliminates the alternative to use Opinion 25's intrinsic value method of accounting that was provided in Statement 123 as originally issued.

The Company adopted Statement 123R as of January 1, 2006, using the "modified prospective" method permitted by the Statement. The modified prospective method in which compensation cost is recognized beginning with the effective date (a) based on the requirements of Statement 123R for all share-based payments granted after the effective date and (b) based on the requirements of Statement 123 for all awards granted to employees prior to the effective date of Statement 123R that remain unvested on the effective date.

In March 2005, the FASB issued Interpretation No. 47, "Accounting for Conditional Asset Retirement Obligations - an interpretation of FASB Statement No. 143," (FIN 47) which clarifies the term "conditional asset retirement obligation" used in SFAS No. 143, "Accounting for Asset Retirement Obligations," and specifically when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. We adopted FIN 47 as of December 31, 2005. We do not expect the adoption of FIN 47 to have a material impact on our consolidated results of operations and financial condition.

In April 2006, the FASB issued FSP FIN 46R - 6, Determining the Variability to Be Considered in Applying FASB Interpretation No. 46R. FSP FIN 46R - 6 addresses the requirement to determine the variability to be considered in applying FASB Interpretation No. 46 based on an analysis of the design of the entity. Specifically, the FSP requires (1) an analysis of the nature of the risks in the entity and (2) a determination of the purpose(s) for which the entity was created and determination of the variability (created by the risks identified in Step 1) the entity is designed to create and pass along to its interest holders. As required, we adopted FSP FIN 46R - 6 effective July 1, 2006, for any new arrangements entered into after the effective date. Although we do not expect the adoption of FSP FIN 46R - 6 to have a material financial impact, we currently are unable to determine the potential impact in future periods.

The Financial Accounting Standards Board (FASB) issued SFAS 154, "Accounting Changes and Error Corrections": SFAS 154 replaces APBO 20, Accounting Changes, and SFAS 3, Reporting Accounting Changes in Interim Financial Statements. Unless it is impracticable to do so, SFAS 154 requires retrospective application to prior periods' financial statements of voluntary changes in accounting principle and to changes required by an accounting pronouncement in instances where the pronouncement does not include specific transition provisions. This statement is effective for accounting changes and error corrections made in fiscal years beginning after December 15, 2005. No such changes have been made by the Company in 2006.

Note 4 - Notes Payable

During the third quarter, we purchased two Chevrolet Silverado trucks and signed two notes for \$49,174.05 and \$31,978.57. Both notes are for 60 months and have interest rates of 4.90% and 6.90% respectively. The lender is GMAC.

Note 5 - Changes in Securities

During the third quarter of 2006, we issued 24,541 shares of common stock. A director exercised stock options issued previously to purchase 3,000 shares of common stock totaling \$1,500. We issued 5,280 shares to a consultant for \$43,042.00 of services at an agreed price of \$8.15 per share. The remaining 16,261 shares were issued as a \$100,000. deposit on the purchase of three leases at a price of \$6.15 per share.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Notice Regarding Forward-Looking Statements

This report contains forward-looking statements. The words, "anticipate," "believe," "expect," "plan," "intend," "estimate," "project," "could," "may," "foresee," and similar expressions are intended to identify forward-looking statements. These statements include information regarding expected development of Tri-Valley's business, lending activities, relationship with customers, and development in the oil and gas industry. Should one or more of these risks or uncertainties occur, or should underlying assumptions prove incorrect, actual results may vary materially and adversely from those anticipated, believed, estimated or otherwise indicated

Overview

Petroleum Activities

In the third quarter of 2006, TVOG, in conjunction with Great Valley Production Services, LLC, bought at auction, all of the major components that would allow Production Rig #103 to be utilized as a drilling rig capable of drilling to approximately 5,500 feet. Over a two month period, we reconditioned, modified and assembled the components to allow Rig #103 to function as a drilling rig. On August 18, 2006, using a single daylight crew, Rig #103 spudded its first TVC well, the Lundin-Weber #D-353-30, in the South Belridge Field, to drill a well into the Diatomite formation. The well was drilled to 1,500 feet, completed, and ultimately 3-stage hydraulically fractured with 510,000-lbs of 10/40 sand on September 23, 2006. Following the clean-out of well following the hydraulic fracturing job by Halliburton, Rig #103 was moved to the Lundin-Weber #D540-30 location on September 29, 2006. Also during the third quarter, we continued to refurbish Rig #75 (a single pulling unit) and Rig #105 for delivery to Great Valley Production Services, some time in the fourth quarter.

With the completion of these refurbishing tasks in the fourth quarter, we expect to be in the enviable position of being able to perform production work on any of our wells to 12,000 feet and to drill a well to 5,500 feet without relying on third parties contractors for a production or drilling rig to conduct and fulfill our future obligations. In recent years we have suffered delays in our planned drilling activities due to unavailability of drilling rigs, equipment and crews in

California. The availability of rigs, equipment and crews from Great Valley Production Services should help to reduce or eliminate these delays in the future.

In house planning continued on a large natural gas exploration play in the San Joaquin Valley in which we have 100% working interest. We plan to commence drilling in mid to late 2007.

While developing its producible properties in conjunction with our Opus Drilling Program LP, we continue to assemble high potential exploration targets in an effort to add significant value.

Great Valley Production Services, LLC

Great Valley Production Services had two of its remanufactured rigs crewed and working in the third quarter on our Temblor Valley West property. Rig #60, a “single” production rig, was employed re-working idle wells to restore them to production. The Company expects continued use of that rig to service the 49 existing wells on the property. Rig #103, a “double” production rig modified to drill up to 5,500 feet, successfully drilled the first development test well to 1,500 feet into the Diatomite formation, a traditionally low permeability zone that can carry exceptional quantities of oil. The new crew performed very well and is speeding up the procedure on the second test well. Great Valley Production Services continues to recruit personnel to build crew strength and man additional rigs as they come out of re-manufacture. In the fourth quarter, Great Valley Production Services expects to put into service Rig #75, a single production rig that can also drill to 2,000 feet, and Rig #105, a double that is one of the largest production rigs on the west coast and can perform workovers on wells up to 18,000 feet or drill to 8,000 feet.

Great Valley Drilling Co., LLC

This 10,000 foot Nevada based rig is still completing an existing contract, so Great Valley Drilling has yet to take possession of the rig. Great Valley Drilling has obtained its contractors license and arranged for proper insurance when the rig and crew transfer. In anticipation of the transfer, Great Valley Drilling is negotiating its first contract to drill a well in Nevada and expects the rig to be able to work rather continuously because of the scarcity of rigs in Nevada, which is becoming an exploration province of wider interest.

Mining Activities

Precious Metals

Mineral programs in the third quarter consisted largely of continued assessment and compilation of the geologic information collected in previous work programs associated with the Richardson and Shorty Creek properties in Alaska.

The Company also undertook an on-site visit of the Richardson property, including the evaluation of adjacent claims. During this visit, Select also undertook annual repair and maintenance activities associated with the Richardson Roadhouse, 65 miles south of Fairbanks at milepost 295 on the Alaska Richardson Highway, which is owned by Select and has been used in the past as a base camp for Richardson related exploration activities.

During the third quarter, Select evaluated and rejected one gold property in central Oregon.

Base Metals

Select added two copper properties to its base metals exploration portfolio. Both properties are located in Nevada. The first property, the FARJK claims, target oxide copper in Nye County and covers roughly one square mile and the claim position can be expanded. Select controls 100% of this claim block. The second property, the Delcer property, with oxide and sulphide copper, covers approximately one square mile in Elko County. This property has experienced limited copper production that dates back to World War I. Select is a joint venture participant in the Delcer property.

During the third quarter, Select continued its arrangement to assist Duluth Metals Limited, a Canadian corporation, in its initial public offering and listing on the Toronto Stock Exchange. Duluth Metals is involved in the acquisition and exploration of copper, nickel and platinum group metals in the Duluth Complex in northern Minnesota. Duluth Metals is providing Select financial remuneration, stock options and assistance by Duluth Metals on the monetizing of Select and its properties as compensation for Select providing management and technical assistance to Duluth Metals.

Industrial Minerals

During the third quarter, the Tri-Western Resources Joint Venture (50% owned and managed by Select) continued to expand production of cinders from the joint venture's Boron facilities. Primary demand was from lightweight block manufacturers (cinder block) and as decorative stone. The Boron basalt plant continued to produce limited production of roofing granules and is generating revenue. In addition, both cinder and basalt fine grind materials and dusts are being tested for sale into the horticultural markets. Continued expansions of the facilities will be determined based on increased demand and revenue generation potential in the marketplace.

Limited work associated with continued permitting activities was undertaken on the Monarch calcium carbonate property in California during this period.

The Admiral Calder calcium carbonate mine in Alaska (100% owned and managed by Select) was on care and maintenance during the third quarter. Select continued its market and operational assessment studies for the Admiral Calder quarry product as the mine is in the top 1% of high grade chemical and high brightness calcium carbonate deposits in the world, and one of the few deposits to be directly on tidewater. Repair and maintenance activities at the site were initiated in the third quarter.

Results of Operations

For the quarter ended September 30, 2006, total revenues were approximately \$1.1 million more than the same period in 2005, but revenue for the first nine months of 2006 was \$6.1 million less than the first nine months of 2005. We had a net loss from operations of \$2.7 million for the quarter and \$9 million for the nine months, compared to a net loss of \$500,000 in the third quarter and \$4.4 million in the first nine months of 2005.

For the past three fiscal years, our largest source of revenue has been sale of oil and gas prospects to joint ventures. We record revenue from drilling and development when we complete drilling wells that have been sold to venture partners, including the OPUS I drilling partnership sponsored by Tri-Valley. In the first quarter of 2006, we recorded no income from drilling and development. In the second quarter we completed and recorded one prospect for \$559,556, and in the third quarter we turn keyed the Lundin Weber 352 well for \$900,000. The drop in drilling and development income was the largest component in our loss for the nine month period in 2006. We believe that our revenue from drilling activities during the fourth quarter of 2006, using our newly acquired drilling rigs, will help to increase total 2006 revenue from drilling and development.

Our revenues from the sale of oil and gas increased from \$193,537 in the third quarter of 2005 to \$268,385 in the third quarter of 2006. This increase was due to the acquisition of oil producing properties and price increases.

We began to realize income from production and sale of industrial minerals from our Boron facilities in the second quarter of 2006. In the third quarter, our revenues from the sale of minerals more than doubled from the second quarter to about \$125,000 from \$60,000 as we ramped up operations. We expect sale of minerals to continue increasing in the fourth quarter. We had no revenue from mineral operations prior to the second quarter of 2006.

Company other income rose from \$14,863 for the third quarter of 2005 to \$54,179 for the third quarter of 2006. This was primarily due to receiving \$43,000 from Duluth Metals for consulting services. Other revenue for the first nine months of 2006 increased by \$124,135 over the same period in 2005, \$43,000 from the previously mentioned consulting and approximately \$80 thousand increase from well operations which we bill to other parties. This increase is due to the increased number of wells which the Company is servicing due to an acquisition.

We receive interest on cash advances and investments from joint venture partners and others, pending expenditure of funds received on oil and gas drilling and other activities. In the third quarter we continued to receive interest income

substantially less than prior years (\$5,890 for the quarter) because we hold decreased advances for oil and gas investment and other projects. We expect our interest income to remain at approximately these levels for the rest of 2006, though it will fall as we expend funds on drilling projects. Interest income is a relatively insignificant part of our total income.

Our costs and expenses rose approximately \$3.3 million in the third quarter over a year ago, although total costs for the first nine months of 2006 were down \$1.6 million from the first nine months of 2005. The overall decrease is mainly a reflection of decreased drilling and development activity in 2006. The changes in operating expenses reflect start-up operations that we expect to yield future returns, especially in the areas of mining exploration expense, operating expenses for our drilling rig operations (Great Valley Drilling and Great Valley Production Services) and future oil and gas development, which accounted for much of the increase in our general and administrative costs.

Mining exploration expenses increased to \$923,663 in the third quarter of 2006 versus \$46,411 in the third quarter of 2005. Mining exploration was only beginning in the third quarter of 2005, and the 2006 figure represents an ongoing commitment to mining operations at the basalt and cinder mill near Boron, California. In the 2005 period, we incurred \$1 million in expenses for preparation of our Monarch mine in California, in addition to \$2.7 million in mining exploration expense. Thus, overall mining expenses for the nine months have totaled about \$3.3 million in 2006 compared to \$3.7 million in 2005.

Operating expenses for the drilling subsidiaries was \$514,049 in the third quarter and the nine month period of 2006. These subsidiaries were only formed in early 2006, and this expenditure represents the cost of refurbishing rigs that we recently began to operate or hope to put to work in the next quarter.

Our mining subsidiary, Select, is continuing our search for additional properties to acquire. Funds to acquire additional properties would likely come from the proceeds of private equity investments in Tri-Valley by third party investors. We do not have a budget or target for a specified number or amount of mining property acquisitions in 2006 or future years. We are reviewing a variety of additional precious and base metal and industrial mineral opportunities.

The increased general and administrative expense of \$1,291,627 (versus \$424,433 in the third quarter of 2005) was spent for additional staffing for anticipated oil and gas exploration and development activity in coming months.

Drilling and development costs for the third quarter rose to \$344,082 from \$197,900 in the third quarter of 2005 as we began to use Great Valley Production Services rigs and crews to develop our existing properties. During the third quarter of 2005, the lack of available rigs and crews significantly restricted our drilling activities. Total drilling and development costs for the nine month period were down 86.6% in 2006 compared to the same period in 2005.

Oil and gas lease expenses increased in the third quarter from the third quarter of 2005 because of expenses associated with increased production. Operating expenses are more than double our 2005 levels and will likely continue to increase as we add new wells and workover existing wells. Oil and gas lease expenses may increase again in 2007 if we succeed in bringing wells drilled in 2006 into production or in reworking the shut-in wells.

In the first nine months of 2006, we recorded non-cash expenses of \$926,180 from issuance of stock options to our directors and employees. Prior to adoption of SFAS 123R in 2006, we did not record compensation expenses upon the issuance of stock options to directors and employees. *See Note 3 to our Unaudited Consolidated Financial Statements.*

Capital Resources and Liquidity

Our oil and gas activities are largely funded by selling interests in our private drilling limited partnership. We do not borrow to fund drilling activities. Our drilling activity relies on our ability to raise money through our drilling partnership.

Current assets were approximately \$4.1 million at September 30, 2006, which is lower than December 31, 2005 by \$1.2 million. The reduction in current assets is due primarily to a reduction of \$1.5 million in our cash position. Property and equipment was about \$1.8 million higher at September 30, 2006, than at December 31, 2005 primarily due to the acquisition of equipment by Great Valley Production Services. Deposits increased approximately \$1.3 million including a \$1.1 million pledge of Company stock as collateral for two notes payable to the Ed Moss Family Trust. There also were deposits on the equipment that is being acquired for our drilling operations.

Current liabilities increased approximately \$1.25 million in the first nine months of 2006, due to an approximate \$850,000 decrease in advances from joint venture participants related to the Opus drilling partnership, and a \$2 million increase in accounts payable from increased purchases of capital equipment in both the petroleum and minerals operations. Of this increase, about \$1.3 million is due to the increase in accounts payable for our recently formed Great Valley Production Services, which is purchasing and rebuilding drilling rigs and equipment. Long term liabilities increased about \$500,000 as we borrowed to purchase equipment.

Operating Activities

We had a negative cash flow of about \$5.5 million for the nine months ended September 30, 2006, compared to a negative cash flow of \$1.6 million for the same period in 2005. Our loss from operations was nearly \$9 million, which included non-cash expenses of about \$926,000 in stock option expense, \$458,000 in impairment expense and \$896,000 in depreciation expense. We experienced a decrease in deposits of \$87,059. Of this amount, \$1,110,000 was a non-cash deposit of our common stock pledged as collateral on a loan, and the remainder of the deposits was for drilling equipment.

The largest change in cash flow was an increase in trade accounts payable which decreased by about \$287,000 in the first nine months of 2005 but increased nearly \$2 million in the first nine months of 2006. Start up expenses cost at Great Valley Production Services accounted for \$1.3 million of this increase. The next largest increase is advances from joint venture participants of which went from a positive \$1.1 million in the first nine months of 2005 to a negative \$844,000 for the first nine months of 2006. These funds do not contribute to operating revenues at the time received but are held in cash until expended in drilling and operations. We cannot predict the levels at which we will continue to receive funds for additional drilling

Investing Activities

Cash used in investing activities was about \$3.15 million for the first nine months of 2006. The purchase of drilling rigs and equipment used about \$2.8 million, primarily in Great Valley Production Services. The remainder was used for investment in equipment for TVOG and Tri-Western Resources.

Financing Activities

Net cash provided by financing activities was about \$7.3 million for the first nine months of 2006. Approximately \$5.4 million of this amount consists of proceeds from membership units in the Great Valley Production Services and the Great Valley Drilling. Issuance of long-term debt provided \$1.4 million and the principal payments on long-term debt used about \$822,000. The remaining \$1.3 million was provided by sales of common stock in individually negotiated private transactions, which will be used for property acquisitions and working capital.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Tri-Valley Corporation does not engage in hedging activities and does not use commodity futures or forward contracts in its cash management functions.

Item 4. Controls and Procedures

As of September 30, 2006, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. These controls and procedures are based on the definition of disclosure controls and procedures in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934. Based on that evaluation, our management, including the CEO and CFO concluded that our disclosure controls and procedures were effective as of September 30, 2006.

Management, including our CEO and CFO, do not expect that our disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. In designing and evaluating our control system, management recognized that any control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance of achieving the desired control objectives. Further, the design of a control system

must reflect the fact that there are resource constraints, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any that may affect our operations have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake.

During the third quarter of 2006, there were no material changes in the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

Item 2. Unregistered Sales of Equity Securities

During the third quarter of 2006, we issued 16,261 shares of our common stock in payment for a deposit on the purchase of three leases at a price of \$6.15 per share

Also during the third quarter of 2006, \$2,048,000 in membership units of Great Valley Production Services, LLC, were sold to 16 private investors. During the third quarter of 2006, \$207,000 in membership units of Great Valley Drilling Company, LLC were sold to three private investors. All of these sales were made in privately negotiated transactions in reliance on the exemption from registration requirements of the Securities Act of 1933 contained in Section 4(2) of that Act.

Item 6. Exhibits

31.1 Rule 13a-14(a)/15d-14(a) Certification

31.2 Rule 13a-14(a)/15d-14(a) Certification

32.1 18 U.S.C. § 1350 Certification

32.2 18 U.S.C. § 1350 Certification

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Edgar Filing: TRI VALLEY CORP - Form 10-Q

Arthur M. Evans

Chief Financial Officer

Exhibit 31.1

I, F. Lynn Blystone, President and Chief Executive Officer of Tri-Valley Corporation, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Tri-Valley Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
