CON-WAY INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Principal Accounting Policies

Organization

Con-way Inc. and its consolidated subsidiaries ("Con-way") provide transportation, logistics and supply-chain management services for a wide range of manufacturing, industrial and retail customers. Con-way's business units operate in regional and transcontinental less-than-truckload and full-truckload freight transportation, contract logistics and supply-chain management, multimodal freight brokerage and trailer manufacturing. As more fully discussed in Note 4, "Segment Reporting," for financial reporting purposes, Con-way is divided into four reporting segments: Freight, Logistics, Truckload and Other.

Basis of Presentation

These interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and Rule 10-01 of Regulation S-X, and should be read in conjunction with Con-way's 2009 Annual Report on Form 10-K. Accordingly, significant accounting policies and other disclosures normally provided have been omitted.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, including normal recurring adjustments, necessary to present fairly Con-way's financial condition, results of operations and cash flows for the periods presented. Results for the interim periods presented are not necessarily indicative of annual results.

Property, Plant and Equipment

Con-way periodically evaluates whether changes to estimated useful lives or salvage values are necessary to ensure that these estimates accurately reflect the economic use of the assets. In Con-way's recent periodic evaluation, the estimated useful lives for revenue equipment were extended in response to planned capital expenditure levels. As a result of the revised estimates, in January 2010, Con-way Freight extended the estimated useful life for most of its tractors to 10 years from 8 years and extended the estimated useful life for its trailers to 14 years from 13 years. Also effective in January 2010, Con-way Truckload extended the estimated useful life for its tractors to 6 years from 4 years, and decreased the associated estimated salvage values. As a result of these combined changes, net loss applicable to common shareholders in the first three months of 2010 decreased by \$1.1 million (\$0.02 per diluted share).

Loss per Share

Basic loss per share is computed by dividing reported loss by the weighted-average common shares outstanding. In the computation of diluted loss per share, only potential common shares that are dilutive are included. Potential common shares are dilutive if they reduce earnings per share or increase loss per share. Options, nonvested stock and convertible preferred stock are not included in the computation if the result is antidilutive, such as when a loss applicable to common shareholders is reported. Antidilutive securities not included in the computation of diluted loss per share were 3,673,931 and 6,636,748 for the three months ended March 31, 2010 and 2009, respectively.

New Accounting Standards

In June 2009, the FASB issued SFAS 166, “Accounting for Transfers of Financial Assets – an amendment of SFAS 140” and SFAS 167, “Amendments to FASB Interpretation 46R.” SFAS 166 and SFAS 167 were codified in the “Transfers and Servicing” and “Consolidations” topics of the FASB Accounting Standards Codification (“Codification”), respectively. SFAS 166 modifies the accounting for transfers of financial assets, eliminates the concept of a qualifying special-purpose entity and creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale. SFAS 167 changes the accounting rules to improve financial reporting by enterprises involved with a variable-interest entity (“VIE”). Primarily, the statement eliminates an existing provision that excludes certain special-purpose entities from consolidation requirements and also establishes principles-based criteria for determining whether a VIE should be consolidated. Con-way’s adoption of SFAS 166 and SFAS 167 in the first quarter of 2010 did not have a material effect on its financial statements.

In October 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-13, “Multi-Deliverable Revenue Arrangements- a consensus of the FASB Emerging Issues Task Force.” ASU 2009-13 was codified in the “Revenue Recognition” topic of the

Codification, which details the requirements that must be met for an entity to recognize revenue from the sale of a delivered item that is part of a multiple-element arrangement when other items have not yet been delivered. ASU 2009-13 addresses how to determine whether an arrangement involving multiple deliverables contains more than one unit of accounting and how the arrangement consideration should be allocated among separate units of accounting. One of the current requirements is that there be objective and reliable evidence of the standalone selling price of the undelivered items, which must be supported by either vendor-specific objective evidence (“VSOE”) or third-party evidence. ASU 2009-13 modifies the current GAAP by amending the objective and reliable evidence threshold to allow use of estimated selling price when VSOE does not exist. Under ASU 2009-13, deliverables would be expected to meet the separation criteria more frequently. ASU 2009-13 is effective for fiscal years beginning on or after June 15, 2010. Con-way will apply the guidance prospectively to revenue arrangements entered into or materially modified on or after January 1, 2011.

In January 2010, the FASB issued ASU 2010-06, “Fair Value Measurements and Disclosures” which amends the “Fair Value Measurements and Disclosures” topic of the Codification to add new requirements for disclosures about transfers of financial assets and liabilities between Levels 1 and 2 of the fair-value hierarchy and separate disclosures about purchases, sales, issuances and settlements relating to Level 3 measurements. ASU 2010-06 also clarifies existing fair-value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. Con-way’s adoption of ASU 2010-06 effective in the first quarter of 2010 did not have a material effect on its financial statements.

Reclassifications

Certain amounts in the prior-period financial statements have been reclassified to conform to the current-period presentation.

2. Goodwill and Intangible Assets

Goodwill

Goodwill is recorded as the excess of an acquired entity’s purchase price over the amounts assigned to assets acquired (including separately recognized intangible assets) and liabilities assumed. Goodwill is not amortized but is assessed for impairment on an annual basis in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. The assessment requires the comparison of the fair value of a reporting unit to the carrying value of its net assets, including allocated goodwill. If the carrying value of the reporting unit exceeds its fair value, Con-way must then compare the implied fair value of the reporting-unit goodwill with the carrying amount of the goodwill. If the carrying amount of the reporting-unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess.

The following table shows the changes in the carrying amounts of goodwill attributable to each applicable segment:

(Dollars in thousands)	Logistics	Truckload	Other	Total
Balances at December 31, 2008				
Goodwill	\$54,453	\$464,598	\$727	\$519,778
Accumulated impairment losses	(31,822)	--	--	(31,822)
	22,631	464,598	727	487,956
Impairment charge	--	(134,813)	--	(134,813)
Change in foreign-currency exchange rates	515	--	--	515
Balances at December 31, 2009				

Edgar Filing: Con-way Inc. - Form 10-Q

Goodwill	54,968	464,598	727	520,293
Accumulated impairment losses	(31,822)	(134,813)	--	(166,635)
	23,146	329,785	727	353,658
Change in foreign-currency exchange rates	(65)	--	--	(65)
Balances at March 31, 2010				
Goodwill	54,903	464,598	727	520,228
Accumulated impairment losses	(31,822)	(134,813)	--	(166,635)
	\$23,081	\$329,785	\$727	\$353,593

In 2009, Con-way evaluated its goodwill for impairment prior to its annual measurement date due primarily to deteriorating truckload market conditions, lower profit projections for Con-way Truckload and a decline in Con-way's market capitalization during the first quarter of 2009. In the first quarter of 2009, Con-way determined that the goodwill associated with Con-way Truckload was impaired and, as a result, Con-way Truckload recognized a \$134.8 million impairment charge to reduce the

carrying amount of the goodwill to its implied fair value. The impairment charge was primarily due to lower projected revenues and operating income and a discount rate that reflected the economic and market conditions at the measurement date.

For the valuation of Con-way Truckload, Con-way applied two equally weighted methods: public-company multiples and a discounted cash flow model. The key assumptions used in the discounted cash flow model were cash flow projections involving forecasted revenues and expenses, capital expenditures, working capital changes, the discount rate and the terminal growth rate applied to projected future cash flows. The discount rate was equal to the estimated weighted-average cost of capital for the reporting unit from a market-participant perspective. The terminal growth rate was based on inflation assumptions adjusted for factors that may impact future growth such as industry-specific expectations.

Intangible Assets

The fair value of intangible assets is amortized on a straight-line basis over the estimated useful life. Amortization expense related to intangible assets was \$0.9 million in the first quarter of 2010 and \$1.2 million in the first quarter of 2009. Intangible assets consisted of the following:

(Dollars in thousands)	March 31, 2010		December 31, 2009	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	\$27,236	\$ 7,754	\$31,472	\$ 8,346

In the first quarter of 2010, Con-way evaluated the fair value of Chic Logistics' customer-relationship intangible asset due to lower projected revenues from customers comprising the customer-relationship intangible asset. As a result, Menlo Worldwide Logistics recognized a \$2.8 million impairment loss and reduced the carrying amount of the intangible asset to zero.

Estimated amortization expense for the next five years is presented in the following table:

(Dollars in thousands)

Year ending December 31:

Remaining nine months of 2010	\$ 2,300
2011	3,100
2012	2,700
2013	2,400
2014	2,400
2015	2,400

3. Restructuring Activities

During the periods presented, Con-way incurred expenses in connection with a number of restructuring activities. Con-way reported the employee-separation costs in salaries, wages and other employee benefits and facility costs primarily in rents and leases in the statements of consolidated operations. As detailed below, Con-way recognized restructuring charges of \$0.8 million in the first three months of 2010 and \$1.1 million in the first three months of 2009, and expects to recognize \$1.4 million of additional expense in 2010. Con-way's remaining liability for amounts expensed but not yet paid was \$8.2 million at March 31, 2010. The remaining liability relates primarily to operating lease commitments that are expected to be payable over several years and employee-separation costs that are expected to be paid in 2010.

Con-way Other

Outsourcing Initiative

In 2009, as part of an ongoing effort to reduce costs and improve efficiencies, Con-way initiated a project to outsource a significant portion of its information-technology infrastructure function and a small portion of its administrative and accounting functions. Con-way expects the outsourcing initiative to be substantially complete by the end of the third quarter of 2010.

The following table summarizes the effect of the outsourcing initiative:

(Dollars in thousands)	Employee-Separation Costs
Balance at December 31, 2009	\$ 3,360
2010 charges	779
Cash payments	(104)
Balance at March 31, 2010	\$ 4,035
Total expense recognized to date	\$ 4,139
Expected remaining expenses	1,394

The expected remaining expenses of \$1.4 million exclude implementation and on-going service-provider costs expected to be incurred in connection with the outsourcing initiative.

In the first quarter of 2010, Con-way allocated corporate outsourcing charges of \$0.6 million and \$0.2 million to the Freight and Logistics segments, respectively.

Con-way Freight

Operational Restructuring

In August 2007, Con-way Freight began an operational restructuring to combine its three regional operating companies into one centralized operation to improve the customer experience and streamline its processes. The

Edgar Filing: Con-way Inc. - Form 10-Q

reorganization into a centralized entity was intended to improve customer service and efficiency through the development of uniform pricing and operational processes, and implementation of best practices. Con-way Freight completed the initiative in 2008.

The following table summarizes the effect Con-way Freight's operational restructuring:

(Dollars in thousands)	Employee-Separation Costs	Facility and Lease- Termination Costs	Asset-Impairment Charges	Other	Total
Balance at December 31, 2009	\$ --	\$ 2,108	\$ --	\$--	\$2,108
Cash payments	--	(284)	--	--	(284)
Balance at March 31, 2010	\$ --	\$ 1,824	\$ --	\$--	\$1,824
Total expense recognized to date	\$ 7,119	\$ 4,336	\$ 2,401	\$2,786	\$16,642

Network Re-Engineering

In November 2008, Con-way Freight completed a major network re-engineering to reduce service exceptions, improve on-time delivery and bring faster transit times while deploying a lower-cost, more efficient service center network better aligned to customer needs and business volumes. The re-engineering did not change Con-way Freight's service coverage, but did involve the closure of 40 service centers, with shipment volumes from closing locations redistributed and balanced among more than 100 nearby service centers.

The following table summarizes the effect of the network re-engineering:

		Employee-Separation	Facility and Lease-Termination	Asset-Impairment	
(Dollars in thousands)		Costs	Costs	Charges	Total
Balance at December 31, 2009	\$	--	\$ 2,448	\$ --	\$ 2,448
Cash payments		--	(118)	--	(118)
Balance at March 31, 2010	\$	--	\$ 2,330	\$ --	\$ 2,330
Total expense recognized to date	\$	5,968	\$ 5,781	\$ 1,656	\$ 13,405

4. Segment Reporting

Con-way discloses segment information in the manner in which the business units are organized for making operating decisions, assessing performance and allocating resources. For the periods presented, Con-way is divided into the following four reporting segments:

- **Freight.** The Freight segment consists of the operating results of the Con-way Freight business unit, which provides regional, inter-regional and transcontinental less-than-truckload freight services throughout North America.
- **Logistics.** The Logistics segment consists of the operating results of the Menlo Worldwide Logistics business unit, which develops contract-logistics solutions, including the management of complex distribution networks and supply-chain engineering and consulting, and also provides multimodal freight brokerage services.
- **Truckload.** The Truckload segment consists of the operating results of the Con-way Truckload business unit. Con-way Truckload provides asset-based full-truckload freight services throughout North America.
- **Other.** The Other reporting segment consists of the operating results of Road Systems, a trailer manufacturer, and certain corporate activities for which the related income or expense has not been allocated to other reporting segments.

Financial Data

Management evaluates segment performance primarily based on revenue and operating income (loss). Accordingly, investment income, interest expense and other non-operating items are not reported in segment results. Corporate expenses are generally allocated based on measurable services provided to each segment, or for general corporate expenses, based on segment revenue. Inter-segment revenue and related operating income (loss) have been eliminated to reconcile to consolidated revenue and operating income (loss). Transactions between segments are generally based on negotiated prices.

(Dollars in thousands)	Three Months Ended March 31,

5. Fair-Value Measurements

Assets and liabilities reported at fair value are classified in one of the following three levels within the fair-value hierarchy:

Level 1: Quoted market prices in active markets for identical assets or liabilities

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data

Level 3: Unobservable inputs that are not corroborated by market data

The following table summarizes the valuation of financial instruments within the fair-value hierarchy:

(Dollars in thousands)	Total	March 31, 2010		
		Level 1	Level 2	Level 3
Cash equivalents	\$432,427	\$112,702	\$319,725	\$--
Current marketable securities	22,260	--	22,260	--
Other marketable securities	6,587	--	--	6,587

(Dollars in thousands)	Total	December 31, 2009		
		Level 1	Level 2	Level 3
Cash equivalents	\$ 450,915	\$ 143,578	\$ 307,337	\$ --
Other marketable securities	6,691	--	--	6,691

Cash equivalents consist of short-term interest-bearing instruments (primarily commercial paper, certificates of deposit and money-market funds) with maturities of three months or less at the date of purchase. At March 31, 2010, the average remaining maturity of the cash equivalents was less than one month. Current marketable securities consist of variable-rate demand notes.

Money-market funds reflect their net asset value and are classified as Level 1 instruments within the fair-value hierarchy. Due to the lack of quoted market prices for identical instruments, commercial paper, certificates of deposit and variable-rate demand notes are generally valued using published interest rates for instruments with similar terms and maturities, and accordingly, are classified as Level 2 instruments within the fair-value hierarchy. Based on their short maturities, the carrying amount of the cash equivalents approximates their fair value.

Con-way's other marketable security consists of one auction-rate security, which was valued with an income approach that utilized a discounted cash flow model. The following table summarizes the change in fair values of Con-way's auction-rate security, which was valued using Level 3 inputs:

(Dollars in thousands)	Auction-rate security
Balance at December 31, 2008	\$ 6,712
Unrealized gain	379
Partial redemption	(400)
Balance at December 31, 2009	\$ 6,691
Unrealized gain	96
Partial redemption	(200)
Balance at March 31, 2010	\$ 6,587

Due primarily to changes in interest-rate benchmarks, the fair value of Con-way's auction-rate security increased \$0.1 million in the first quarter of 2010. Con-way has recorded the cumulative \$0.3 million decline in the carrying value of the auction-rate security with an equal and offsetting unrealized loss in accumulated other comprehensive loss in shareholders' equity. Con-way has evaluated the unrealized loss and concluded that the decline in fair value is not other-than-temporary.

6. Employee Benefit Plans

In the periods presented, employees of Con-way and its subsidiaries in the U.S. were covered under several retirement benefit plans, including defined benefit pension plans, defined contribution retirement plans, a postretirement medical plan and a long-term disability plan. See Note 12, "Employee Benefit Plans," of Item 8, "Financial Statements and Supplementary Data," in

Con-way's 2009 Annual Report on Form 10-K for additional information concerning its employee benefit plans. See "Cost-Reduction Actions" below for a discussion of employee benefits changes that were effective in April 2009.

Defined Benefit Pension Plans

The following table summarizes the components of net periodic benefit expense for Con-way's domestic defined benefit pension plans:

(Dollars in thousands)	Qualified Pension Plans		Non-Qualified Pension Plans	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2010	2009	2010	2009
Interest cost on benefit obligation	\$17,364	\$18,553	\$974	\$1,086
Expected return on plan assets	(19,381)	(16,443)	--	--
Net amortization and deferral	2,228	8,521	111	142
Net periodic benefit expense	\$211	\$10,631	\$1,085	\$1,228

Con-way expects to make a discretionary contribution of \$25.0 million to its Qualified Pension Plans in 2010; however, this could change based on variations in interest rates, asset returns, Pension Protection Act requirements and other factors.

Defined Contribution Retirement Plans

Con-way's defined contribution retirement plans consist mostly of the primary defined contribution retirement plan (the "Primary DC Plan").

Con-way's expense under the Primary DC Plan was \$8.9 million and \$19.6 million in the first quarter of 2010 and 2009, respectively. At March 31, 2010 and December 31, 2009, Con-way had recognized accrued liabilities of \$10.6 million and \$10.5 million, respectively, for its contributions related to the Primary DC Plan. In 2009, Con-way's contributions to the Primary DC Plan included allocations of Con-way preferred stock and contributions of cash and Con-way common stock. In 2010, Con-way's contributions were made with Con-way common stock. In the first three months of 2010 and 2009, Con-way used 251,732 shares and 277,795 shares, respectively, of repurchased common stock (also referred to as treasury stock), to fund \$8.8 million and \$7.4 million, respectively, of contributions to the Primary DC Plan.

Postretirement Medical Plan

The following table summarizes the components of net periodic benefit expense for the postretirement medical plan:

(Dollars in thousands)	Three Months Ended March 31,	
	2010	2009
Service cost – benefits earned during the period	\$398	\$478
Interest cost on benefit obligation	1,221	1,515
Net amortization and deferral	(301)	(305)

Net periodic benefit expense	\$1,318	\$1,688
------------------------------	---------	---------

In March 2010, the Patient Protection and Affordable Care Act, as modified by the Health Care and Education Reconciliation Act, was signed into law. Among other things, this health care reform legislation is expected to increase the costs associated with providing benefits under postretirement medical plans and will also affect employee medical plans. Certain provisions of this legislation eliminated future tax deductions for expenditures reimbursed under the Medicare Part D retiree drug subsidy program. Elimination of this tax deduction resulted in a \$2.3 million income-tax charge in the first quarter of 2010. The legislation contains other provisions that may affect Con-way's accounting for retiree and employee medical benefits in future periods. However, the extent of any further effect from these other provisions cannot be determined until regulations are issued and additional interpretations become available.

- 14 -

Long-term Disability Plan

Con-way's expense associated with the long-term disability plan was \$3.1 million and \$3.8 million in the first quarter of 2010 and 2009, respectively. In Con-way's consolidated balance sheets, the long-term and current portions of the long-term disability plan obligation are reported in employee benefits and accrued liabilities, respectively. At March 31, 2010, the long-term and current portions of the obligation were \$25.8 million and \$11.4 million, respectively, and at December 31, 2009, were \$28.2 million and \$11.4 million, respectively.

Cost-Reduction Actions

In response to economic conditions, in March 2009 Con-way announced several measures to reduce costs and conserve cash. The measures announced in March 2009 substantially consist of the suspension or curtailment of employee benefits and a reduction in salaries and wages, as detailed below.

Salaries and Wages

Effective March 29, 2009, the salaries and wages of certain employees were reduced by 5%, including corporate and shared-services employees and those at the Con-way Freight and Road Systems business units. Effective in January 2010, Con-way restored one-half of the salary and wage reductions.

Compensated Absences

Effective April 1, 2009, a compensated-absences benefit was suspended at Con-way Freight. Prior to the suspension, employees' current-year service earned a compensated-absences benefit eligible for use in the subsequent year. During the period of suspension, no compensated-absences benefits were earned for current-year service; however, employees could use previously vested benefits. Also, effective March 8, 2009, Menlo Worldwide Logistics reduced its compensated-absences benefit by 25%. Effective in April 2010, Con-way Freight and Menlo Worldwide Logistics reinstated their compensated-absences benefits.

Defined Contribution Plan

Effective April 26, 2009, employer contributions to Con-way's Primary DC Plan were suspended or limited. The matching and transition contributions were suspended and the basic contribution was limited to no more than 3% of an employee's eligible compensation. Effective in July 2009, basic contributions were made with repurchased Con-way common stock.

7. Comprehensive Income

Comprehensive income (loss), which is a measure of all changes in equity except those resulting from investments by owners and distributions to owners, was as follows:

(Dollars in thousands)	Three Months Ended	
	March 31, 2010	2009
Net loss	\$(4,037)	\$(152,349)

Edgar Filing: Con-way Inc. - Form 10-Q

Other comprehensive income (loss):		
Foreign currency translation adjustment	(1,043)	(694)
Unrealized gain (loss) on available-for-sale security, net of deferred tax of \$38 and \$313, respectively	58	(487)
Employee benefit plans, net of deferred tax of \$3,060 and \$3,260, respectively	3,493	5,098
Comprehensive loss	\$(1,529)	\$(148,432)

- 15 -

8. Share-Based Compensation

Under terms of the share-based compensation plans, Con-way grants various types of share-based compensation awards to employees and directors. The plans provide for awards in the form of stock options, nonvested stock (also known as restricted stock), performance-share plan units and stock appreciation rights. See Note 13, “Share-Based Compensation,” of Item 8, “Financial Statements and Supplementary Data,” in Con-way’s 2009 Annual Report on Form 10-K for additional information concerning its share-based compensation awards.

In the first quarter of 2010, Con-way awarded 694,033 cash-settled stock-appreciation rights (“SARs”) to eligible employees. The SARs were granted at the stock price on the grant date and have a three-year graded-vesting term. The awards provide for accelerated vesting if the employee ceases employment due to retirement, death, disability, or a change in control (as defined in the SAR agreement). The SARs are liability-classified awards and, as a result, Con-way will re-measure the fair value of the awards each reporting period until the awards are settled. During the vesting period, the compensation cost recognized will be based on the proportionate amount of service rendered to date. Con-way will recognize any changes in fair value after the vesting period as compensation cost in the current period. The ultimate expense recognized for the SARs is equal to the intrinsic value at settlement.

The following expense was recognized for share-based compensation:

(Dollars in thousands)	Three Months Ended March 31,	
	2010	2009
Salaries, wages and other employee benefits	\$3,575	\$2,952
Deferred income tax benefit	(1,371)	(1,135)
Net share-based compensation expense	\$2,204	\$1,817

9. Income Taxes

Con-way recognized a tax provision of \$1.1 million in the first quarter of 2010 and a tax benefit of \$13.5 million in the same quarter of 2009. The first-quarter tax provision in 2010 reflects a \$2.3 million charge related to recently enacted health care legislation, while the first-quarter tax benefit in 2009 includes the effect of the non-deductible goodwill-impairment charge. Excluding these items and other less material discrete adjustments, the first-quarter effective tax rate increased to 41.7% in 2010 from 36.5% in 2009, due primarily to a prior-year \$2.7 million benefit associated with a now-expired fuel-related tax credit.

Other accounts receivable in the consolidated balance sheets include income tax receivables of \$3.9 million and \$2.7 million at March 31, 2010 and December 31, 2009, respectively.

10. Commitments and Contingencies

Purchase Obligations

In connection with its outsourcing initiative, Con-way entered into agreements with third-party service providers in the first quarter of 2010. Payments to the third-party providers are estimated to be \$257 million between 2010 and 2016, when the agreements are expected to expire.

EWA

In February 2002, a lawsuit was filed against Emery Worldwide Airlines, Inc. (“EWA”) in the District Court for the Southern District of Ohio, alleging violations of the Worker Adjustment and Retraining Notification Act (the “WARN Act”) in connection with employee layoffs and ultimate terminations due to the August 2001 grounding of EWA’s airline operations and the shutdown of the airline operations in December 2001. The court subsequently certified the lawsuit as a class action on behalf of affected employees laid off between August 11 and August 15, 2001. The WARN Act generally requires employers to give 60-days notice, or 60-days pay and benefits in lieu of notice, of any shutdown of operations or mass layoff at a site of employment. The estimated range for potential loss on this matter is zero to approximately \$11 million, including accrued interest. The lawsuit was tried in early January 2009, and on September 28, 2009, the court issued its decision in favor of EWA. Plaintiffs have appealed the judgment.

- 16 -

MWF

In 2004, Con-way and Menlo Worldwide, LLC sold to United Parcel Service, Inc. (“UPS”) all of the issued and outstanding capital stock of Menlo Worldwide Forwarding, Inc. and its subsidiaries and Menlo Worldwide Expedite!, Inc. Con-way agreed to indemnify UPS against certain losses that UPS may incur after the closing of the sale with certain limitations. Any losses related to these indemnification obligations or any other costs, including any future cash expenditures related to the sale that have not been estimated and recognized, will be recognized in future periods as an additional loss from disposal when and if incurred.

Other

Menlo Worldwide, LLC (“MW”) has asserted claims against the sellers of Chic Holdings alleging inaccurate books and records, misstatement of revenue, and other similar matters related to the pre-sale financial performance of the Chic businesses and is pursuing all legal and equitable remedies available to MW. There currently exists a \$9 million hold-back in escrow against which MW may apply any award for breach of warranty under the purchase agreement. The ultimate outcome of this matter is uncertain and any resulting award will not be recognized until received.

Con-way is a defendant in various other lawsuits incidental to its businesses. It is the opinion of management that the ultimate outcome of these actions will not have a material effect on Con-way’s financial condition, results of operations or cash flows.

11. Subsequent Events

Leases

In April 2010, Con-way acquired \$35 million of tractors for Freight under a capital-lease agreement in which Con-way guarantees the residual value of the tractors at the end of the lease term. Including the stated amount of the residual-value guarantee, the minimum lease payments during the five-year term of the lease are estimated to be \$40 million. Con-way’s lease obligations as of December 31, 2009 are summarized in Note 9, “Leases,” of Item 8, “Financial Statements and Supplementary Data,” in Con-way’s 2009 Annual Report on Form 10-K.

Long-term Debt

On May 3, 2010, Con-way repaid the \$200 million outstanding under its 8 7/8% Notes Due 2010. See Note 8, “Debt and Other Financing Arrangements,” of Item 8, “Financial Statements and Supplementary Data,” in Con-way’s 2009 Annual Report on Form 10-K for additional information concerning Con-way’s debt instruments.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Management’s Discussion and Analysis of Financial Condition and Results of Operations (referred to as “Management’s Discussion and Analysis”) is intended to assist in a historical and prospective understanding of Con-way’s financial condition, results of operations and cash flows, including a discussion and analysis of the following:

- Overview of Business
- Results of Operations
- Liquidity and Capital Resources
- Critical Accounting Policies and Estimates
- New Accounting Standards
- Forward-Looking Statements

Overview of Business

Con-way provides transportation, logistics and supply-chain management services for a wide range of manufacturing, industrial and retail customers. Con-way’s business units operate in regional and transcontinental less-than-truckload and full-truckload freight transportation, contract logistics and supply-chain management, multimodal freight brokerage and trailer manufacturing. For financial reporting purposes, Con-way is divided into four reporting segments:

- **Freight.** The Freight segment consists of the operating results of the Con-way Freight business unit, which provides regional, inter-regional and transcontinental less-than-truckload freight services throughout North America.
- **Logistics.** The Logistics segment consists of the operating results of the Menlo Worldwide Logistics business unit, which develops contract-logistics solutions, including the management of complex distribution networks and supply-chain engineering and consulting, and also provides multimodal freight brokerage services.
- **Truckload.** The Truckload segment consists of the operating results of the Con-way Truckload business unit, which provides asset-based full-truckload freight services throughout North America.
- **Other.** The Other reporting segment consists of the operating results of Road Systems, a trailer manufacturer, and certain corporate activities for which the related income or expense has not been allocated to other reporting segments.

Con-way’s primary business-unit results generally depend on the number, weight and distance of shipments transported, the prices received on those shipments or services and the mix of services provided to customers, as well as the fixed and variable costs incurred by Con-way in providing the services and the ability to manage those costs under changing circumstances. Con-way’s primary business units are affected by the timing and degree of fluctuations in fuel prices and their ability to recover incremental fuel costs through fuel-surcharge programs and/or cost-recovery mechanisms, as more fully discussed in Item 3, “Quantitative and Qualitative Disclosures About Market Risk – Fuel.”

Con-way Freight primarily transports shipments utilizing a network of freight service centers combined with a fleet of company-operated line-haul and pickup-and-delivery tractors and trailers. Menlo Worldwide Logistics manages the logistics functions of its customers and primarily utilizes third-party transportation providers for the movement of

customer shipments. Con-way Truckload primarily transports shipments using a fleet of company-operated long-haul tractors and trailers.

- 18 -

Results of Operations

The overview below provides a high-level summary of Con-way's results for the periods presented and is intended to provide context for the remainder of the discussion on reporting segments. Refer to "Reporting Segment Review" below for more complete and detailed discussion and analysis.

(Dollars in thousands except per share amounts)	Three Months Ended March 31,	
	2010	2009
Revenues	\$1,161,911	\$962,932
Costs and expenses		
Loss from impairment of goodwill and intangible assets	2,767	134,813
Other costs and expenses	1,144,744	978,431
	1,147,511	1,113,244
Operating income (loss)	14,400	(150,312)
Other expense	17,314	15,513
Loss before income tax provision (benefit)	(2,914)	(165,825)
Income tax provision (benefit)	1,123	(13,476)
Net loss	(4,037)	(152,349)
Preferred stock dividends	--	1,617
Net loss applicable to common shareholders	\$(4,037)	\$(153,966)
Diluted loss per share	\$(0.08)	\$(3.35)

Overview

Con-way's consolidated revenue for the first quarter of 2010 increased 20.7% from the first quarter of 2009, reflecting increased revenue at all reporting segments.

Con-way's operating results consisted of operating income of \$14.4 million in the first quarter of 2010 compared to an operating loss of \$150.3 million in the first quarter of 2009. The loss in the first quarter of 2009 was due to a \$132.7 million loss at Truckload, which reflected a \$134.8 million goodwill-impairment charge, and a \$23.4 million loss at Freight. Excluding the impairment charges, consolidated operating income in the first quarter of 2010 increased due primarily to improved operating results at Freight and Logistics. Freight reduced its operating loss in the first quarter of 2010 as the result of cost-reduction measures, discussed more fully below, while Logistics' operating income increased 158.5% due to improved margins on higher revenue.

In the first quarter of 2010, non-operating expense increased \$1.8 million due in part to interest expense related to capital-lease transactions entered into during the fourth quarter of 2009.

Con-way recognized a tax provision of \$1.1 million in the first quarter of 2010 and a tax benefit of \$13.5 million in the same quarter of 2009. The first-quarter tax provision in 2010 reflects a \$2.3 million charge related to recently enacted health care legislation, while the first-quarter tax benefit in 2009 includes the effect of the non-deductible goodwill-impairment charge. Excluding these items and other less material discrete adjustments, the first-quarter

effective tax rate increased to 41.7% in 2010 from 36.5% in 2009, due primarily to a prior-year \$2.7 million benefit associated with a now-expired fuel-related tax credit.

In response to economic conditions, Con-way in March 2009 announced several measures to reduce costs and conserve cash. These measures substantially consist of the suspension or curtailment of employee benefits and a reduction in certain employees' salaries and wages, as detailed in Note 6, "Employee Benefit Plans," of Item 1, "Financial Statements." Approximately \$36 million of estimated savings were realized in the first quarter of 2010, including \$15 million related to compensated absences, \$14 million associated with contributions to the defined contribution retirement plan (including \$8 million related to matching contributions and \$6 million related to basic and transition contributions), and \$7 million in salaries and wages.

Savings associated with the cost-reduction measures are expected to be lower in periods beyond the first quarter of 2010, reflecting the reinstatement of certain suspended benefits and the restoration of salary and wage reductions. Additionally, reporting periods after the first quarter of 2010 will reflect the effect of cost-reduction measures in both years of the comparative periods. Effective in January 2010, Con-way restored one-half of the salary and wage reductions. The restoration of the remaining one-half of the salary and wage reductions is contingent upon the achievement of specified financial metrics. Con-way Freight and Menlo Worldwide Logistics reinstated their compensated-absences benefits effective in April 2010. The reinstatement of Con-way's basic and transition contributions to the defined contribution retirement plan to their prior levels is contingent upon the achievement of specified financial metrics.

As an additional measure to reduce costs, Con-way initiated a project to outsource a significant portion of its information-technology infrastructure function and a small portion of its administrative and accounting functions. Under the outsourcing initiative, Con-way expects to incur incremental expense in 2010, as employee-separation and implementation costs are expected to exceed estimated savings by \$4 million in 2010.

Reporting Segment Review

For the discussion and analysis of segment operating results, management utilizes revenue before inter-segment eliminations. Management believes that revenue before inter-segment eliminations, combined with the detailed operating expense information, provides the most meaningful analysis of segment results. Revenue before inter-segment eliminations is reconciled to revenue from external customers in Note 4, "Segment Reporting," of Item 1, "Financial Statements."

Freight

The following table compares operating results, operating margins, and the percentage change in selected operating statistics of the Freight reporting segment:

(Dollars in thousands)	Three Months Ended March 31,	
	2010	2009
Revenue before inter-segment eliminations	\$725,003	\$573,815
Salaries, wages and other employee benefits	365,517	331,216
Purchased transportation	120,007	79,948
Other operating expense	101,213	86,662
Fuel and fuel-related taxes	77,181	44,815
Depreciation and amortization	22,916	26,793
Maintenance	25,617	20,730
Rents and leases	11,408	6,753
Purchased labor	4,297	285
Total operating expenses	728,156	597,202
Operating loss	\$(3,153)	\$(23,387)
Operating margin	-0.4 %	-4.1 %

	2010 vs. 2009	
Selected Operating Statistics		
Weight per day	34.8	%
Revenue per hundredweight (“yield”)	-7.8	%
Shipments per day (“volume”)	23.4	%
Weight per shipment	9.3	%

Freight’s revenue in the first quarter of 2010 increased 26.3% from the first quarter of 2009 due to a 34.8% increase in weight per day and a half-day increase in the number of working days, partially offset by a 7.8% decline in yield. The 34.8% increase in weight per day reflects a 23.4% increase in shipments per day and a 9.3% increase in weight per shipment.

In the first quarter of 2010, the decline in yield was due primarily to decreases in base freight rates and the increase in weight per shipment, partially offset by an increase in fuel-surcharge revenue and a longer length of haul. Yield reflects the competitive pricing environment that is primarily the result of excess capacity in the less-than-truckload market. Excluding fuel surcharges,

yields in the first quarter of 2010 decreased 11.2%. Freight's fuel-surcharge revenue increased to 12.5% of revenue in the first quarter of 2010 from 9.1% in the first quarter of 2009.

Freight's operating loss in the first quarter of 2010 improved \$20.2 million from the first quarter of 2009 due primarily to cost-reduction measures that were partially offset by increased costs associated with a higher-volume lower-yield mix of freight. In the first quarter of 2010, the cost-reduction measures announced in March 2009 reduced expenses for salaries, wages and other employee benefits by approximately \$34 million, as more fully discussed below.

Expenses for salaries, wages and other employee benefits increased 10.4% in the first quarter of 2010. Salaries and wages, excluding variable compensation, increased 19.3% due to a higher average employee count in response to increased shipment volumes, partially offset by the cost-reduction measures. Employee benefits expense decreased 9.5% due to lower expenses for compensated absences, and the defined benefit and defined contribution retirement plans, partially offset by increased expense for workers' compensation claims and payroll taxes. Lower expense for compensated absences and the defined contribution retirement plan reflect Con-way's cost-reduction measures.

Purchased transportation expense in the first quarter of 2010 increased 50.1% over the prior-year first quarter due to an increase in freight transported by third-party providers and fuel-related rate increases. During the same period, expense for fuel and fuel-related taxes increased 72.2% due primarily to the increase in the cost per gallon of diesel fuel and increased fuel consumption due to increased shipment volumes.

Depreciation and amortization expense declined 14.5% in the first quarter of 2010 due primarily to changes in the estimated useful lives for Freight's tractor and trailer fleet, which lowered depreciation expense by \$3.5 million in the first quarter of 2010.

In the first quarter of 2010, maintenance expense increased 23.6%, expenses for rents and leases increased 68.9% and purchased labor expenses increased \$4.0 million due primarily to increased business volumes. Other operating expenses increased 16.8% in the first quarter of 2010, due primarily to increased self-insurance expense, particularly cargo-loss and damage and vehicular claims.

Logistics

The table below compares operating results and operating margins of the Logistics reporting segment. The table summarizes the segment's revenue as well as net revenue (revenue less purchased transportation expense). Carrier-management revenue is attributable to contracts for which Menlo Worldwide Logistics manages the transportation of freight but subcontracts to third parties the actual transportation and delivery of products, which Menlo Worldwide Logistics refers to as purchased transportation. Menlo Worldwide Logistics' management places emphasis on net revenue as a meaningful measure of the relative importance of its principal services since revenue earned on most carrier-management services includes the third-party carriers' charges to Menlo Worldwide Logistics for transporting the shipments. The table also includes operating income and operating margin excluding the loss from impairment of goodwill and intangible assets. Management believes these measures are relevant to evaluate its on-going operations.

(Dollars in thousands)	Three Months Ended March 31,			
	2010		2009	
Revenue before inter-segment eliminations	\$355,183		\$316,477	
Purchased transportation expense	(210,934)		(191,244)	
Net revenue	144,249		125,233	
Salaries, wages and other employee benefits	54,687		49,784	
Other operating expense	33,585		33,645	
Fuel and fuel-related taxes	213		388	
Depreciation and amortization	3,063		3,253	
Maintenance	1,731		2,749	
Rents and leases	16,245		15,883	
Purchased labor	19,102		14,557	
Loss from impairment of goodwill and intangible assets	2,767		--	
Total operating expenses excluding purchased transportation	131,393		120,259	
Operating income	\$12,856		\$4,974	
Operating income excluding impairment	\$15,623		\$4,974	
Operating margin on revenue excluding impairment	4.4	%	1.6	%
Operating margin on net revenue excluding impairment	10.8	%	4.0	%

In the first quarter of 2010, Logistics' revenue increased 12.2% due to an 18.2% increase in revenue from warehouse-management services and a 10.0% increase in revenue from carrier-management services. Increased revenue from warehouse-management services was due to contributions from new customers and growth at existing customers. Higher revenue from carrier-management services was due primarily to revenue from a government contract, which was in an implementation phase during 2009, partially offset by lower revenue as the result of changes to certain carrier and customer contracts.

Logistics' net revenue in the first quarter of 2010 increased 15.2% due to increases in net revenue from both warehouse-management and carrier-management services. In the first quarter of 2010, purchased transportation expense increased 10.3%.

As discussed more fully in Note 2, “Goodwill and Intangible Assets,” of Item 1, “Financial Statements,” Logistics recognized a \$2.8 million charge in the first quarter of 2010 for the impairment of a customer-relationship intangible asset. Excluding the loss from impairment, Logistics’ operating income in 2010 more than tripled from 2009, reflecting the increase in net revenue and improved margins on both carrier-management and warehouse-management services. Improved margins on carrier-management services were due largely to the recognition of revenue under performance-based arrangements. Under performance-based arrangements, revenue is recognized upon the achievement of contractually specified performance measures typically without an associated increase in operating expenses. The level of achievement relating to these performance measures varies each period. Results in the first quarter of 2010 also benefited from the earlier-mentioned cost-reduction measures announced in March 2009. In the first quarter of 2010, these measures reduced approximately \$2 million of costs related to salaries, wages and other employee benefits, as more fully discussed below.

- 22 -

Salaries, wages and other employee benefits increased 9.8% in the first quarter of 2010, reflecting increases in salaries and wages, partially offset by lower costs for employee benefits. In the first quarter of 2010, variable compensation increased \$3.2 million or 222.8% based on variations in performance measures relative to variable-compensation plan targets. Salaries and wages, excluding variable compensation, rose 8.2% in the first quarter of 2010 due primarily to increased staffing needs at Logistics-managed warehouses as the result of new customer contracts. Employee benefits expense declined 6.8%, due primarily to lower expenses related to the defined contribution retirement plan and compensated absences, which reflect cost-reduction measures announced in March 2009, and lower expense related to Con-way's defined benefit pension plan.

In the first quarter of 2010, maintenance expense declined 37.0% due to costs incurred in the first quarter of 2009 to reconfigure space in certain Logistics-managed warehouses. Purchased labor expense increased 31.2% in the first quarter of 2010 due to increased warehouse-management volumes associated with new customers and growth with existing customers.

Truckload

The table below compares operating results, operating margins and the percentage change in selected operating statistics of the Truckload reporting segment. The table summarizes the segment's revenue before inter-segment eliminations, including freight revenue, fuel-surcharge revenue and other non-freight revenue. The table also includes operating income and operating margin excluding the loss from impairment of goodwill. Truckload's management believes these measures are relevant to evaluate its on-going operations.

(Dollars in thousands)	Three Months Ended March 31,			
	2010		2009	
Freight revenue	\$116,202		\$120,218	
Fuel-surcharge revenue	20,745		12,066	
Other revenue	3,669		2,499	
Revenue before inter-segment eliminations	140,616		134,783	
Salaries, wages and other employee benefits	54,352		57,596	
Purchased transportation	6,188		5,060	
Other operating expenses	14,935		17,288	
Fuel and fuel-related taxes	36,900		28,568	
Depreciation and amortization	15,349		16,346	
Maintenance	9,411		7,067	
Rents and leases	219		206	
Purchased labor	287		517	
Loss from impairment of goodwill and intangible assets	--		134,813	
Total operating expenses	137,641		267,461	
Operating income (loss)	\$2,975		\$(132,678)	
Operating income excluding impairment	\$2,975		\$2,135	
Operating margin excluding impairment	2.1	%	1.6	%
2010 vs. 2009				

Selected Operating Statistics

Total miles	-3.5	%
Freight revenue per total mile	0.2	%

In the first quarter of 2010, Truckload's revenue increased 4.3% from the same period of 2009, due primarily to a 71.9% increase in fuel-surcharge revenue, partially offset by a 3.3% decline in freight revenue. Higher fuel-surcharge revenue was due primarily to higher fuel prices in 2010 compared to 2009. The 3.3% decline in freight revenue reflects a 3.5% decline in total miles and a 0.2% increase in revenue per mile. Total miles and revenue per mile reflect a smaller but more productive tractor fleet. Revenue per mile also reflects the adverse effects of the competitive truckload pricing environment, as revenue per loaded mile fell 0.5%.

Truckload earned operating income of \$3.0 million in the first quarter of 2010 and reported an operating loss of \$132.7 million in the first quarter of 2009. Truckload's operating loss in 2009 was due to a goodwill-impairment charge of \$134.8 million, more

fully discussed in Note 2, "Goodwill and Intangible Assets," of Item 1, "Financial Statements." Excluding the charge, operating income increased 39.3% due primarily to improved margins on higher revenue.

In the first quarter of 2010, expenses for salaries, wages and other employee benefits decreased 5.6% due primarily to a 4.6% decline in salaries and wages and a 35.4% decline in other employee-related costs. The decrease in expenses for salaries and wages was due primarily to fewer miles due to a reduction in the tractor fleet, while the decrease in other employee-related costs reflects lower costs for driver recruitment.

Expenses for fuel and fuel-related taxes increased 29.2% in the first quarter of 2010 due primarily to a higher fuel cost per gallon. Other operating expenses declined 13.6% in the first quarter of 2010 due primarily to the recognition of \$1.1 million in losses on tractor disposals in the first quarter of 2009. Expense for depreciation and amortization decreased 6.1% in the first quarter of 2010 due primarily to a reduction in the number of tractors and trailers. Maintenance expense increased 33.2% in the first quarter of 2010 due primarily to an increase in the average age of the tractor fleet, which resulted in an increase in repairs that were not covered under manufacturers' warranties.

In the first quarter of 2010, Truckload provided approximately \$35 million of affiliate transportation services to Freight. As a result of the bidding process in the first quarter of 2010 with external customers, Truckload's management expects improving truckload market pricing. In connection with Freight's bid process for truckload service providers, which requires carriers to commit assets for a full year, Con-way will reduce the amount of services Truckload provides to Freight. This decision allows Truckload to take advantage of the improving truckload market pricing with external customers. The current target is for Truckload to provide approximately \$10 million of quarterly affiliate transportation services to Freight. The redeployment of equipment to serve external customers may cause some deterioration in asset utilization, which could adversely affect Truckload's operating income in the second and third quarters of 2010.

Other

The Other reporting segment consists of the operating results of Road Systems, a trailer manufacturer, and certain corporate activities for which the related income or expense has not been allocated to other reporting segments. The table below summarizes the operating results for the Other reporting segment:

(Dollars in thousands)	Three Months Ended	
	March 31, 2010	2009
Revenue		
Road Systems	\$11,839	\$5,989
Operating income (loss)		
Road Systems	\$(109)	\$(356)
Con-way re-insurance activities	2,147	1,551
Con-way corporate properties	(337)	(167)
Other	21	(249)
	\$1,722	\$779

Liquidity and Capital Resources

Con-way's combined balance of cash, cash equivalents and current marketable securities increased to \$483.7 million at March 31, 2010 from \$476.6 million at December 31, 2009.

Cash and cash equivalents decreased to \$461.4 million at March 31, 2010 from \$476.6 million at December 31, 2009, as \$37.6 million used in investing activities and \$1.4 million used in financing activities exceeded \$23.9 million provided by operating activities. Cash used in investing activities primarily reflects investments in marketable securities and capital expenditures. Cash provided by operating activities came primarily from net income after adjustment for non-cash items.

(Dollars in thousands)	Three Months Ended March 31,	
	2010	2009
Operating Activities		
Net loss	\$(4,037)	\$(152,349)
Non-cash adjustments (1)	57,780	203,576
Changes in assets and liabilities	(29,893)	48,861
Net Cash Provided by Operating Activities	23,850	100,088
Net Cash Used in Investing Activities	(37,616)	(21,758)
Net Cash Used in Financing Activities	(1,416)	(31,260)
Net Cash Provided by (Used in) Continuing Operations	(15,182)	47,070
Net Cash Used in Discontinued Operations	--	(103)
Increase (Decrease) in Cash and Cash Equivalents	\$(15,182)	\$46,967

(1) "Non-cash adjustments" refer to depreciation, amortization, impairment charges, deferred income taxes, provision for uncollectible accounts, and other non-cash income and expenses.

Operating Activities

The most significant items affecting the comparison of Con-way's operating cash flows for the periods presented are summarized below:

In the first three months of 2010, net income, excluding non-cash adjustments, increased \$2.5 million from the same period of 2009. Changes in receivables decreased operating cash flow in the first quarter of 2010 when compared to the same prior-year period, while changes in accounts payable and self-insurance accruals increased operating cash flow.

In the first three months of 2010, receivables used \$102.5 million due primarily to increased trade accounts receivable resulting from increased revenue at the Freight and Logistics segments. In the first three months of 2009, receivables provided \$37.6 million due primarily to decreased receivables at the Logistics segment.

Accounts payable provided \$50.9 million in the first quarter of 2010, compared to \$2.0 million provided in the first quarter of 2009. The increase in accounts payable reflects the increasing business volumes during the first quarter of 2010, particularly at the Freight segment.

The change in self-insurance accruals provided \$12.0 million in the first three months of 2010, compared to \$4.5 million used in the first three months of 2009. The cash provided in the first quarter of 2010 was due primarily to increases in the liabilities for vehicular and cargo-loss and damage claims.

Investing Activities

Cash used in investing activities increased to \$37.6 million in the first three months of 2010, compared to \$21.8 million used in the first three months of 2009 due primarily to an increased investment in marketable securities.

Financing Activities

Financing activities used cash of \$1.4 million in the first three months of 2010, compared to \$31.3 million used in the same period of 2009. In the first quarter of 2009, Con-way used \$22.7 million for the repayment of the Primary DC Plan Notes, which matured in January 2009. Also, in the first three months of 2009, Con-way used \$3.5 million for the payment of preferred dividends. In the second quarter of 2009, Con-way redeemed all outstanding shares of preferred stock, as detailed in Note 12, "Employee Benefit Plans," of Item 8, "Financial Statements and Supplementary Data," in Con-way's 2009 Annual Report on Form 10-K.

Contractual Cash Obligations

Con-way's contractual cash obligations as of December 31, 2009 are summarized in Item 7, "Management's Discussion and Analysis – Liquidity and Capital Resources – Contractual Cash Obligations," of Con-way's 2009 Annual Report on Form 10-K. In the first three months of 2010, there have been no material changes in Con-way's contractual obligations outside the ordinary course of business, except for agreements entered into with third-party service providers to outsource a significant portion of Con-way's information-technology infrastructure function and a small portion of its administrative and accounting functions, and a capital-lease transaction.

In connection with its outsourcing initiative, Con-way entered into agreements with third-party service providers in the first quarter of 2010. Estimated payments to the third-party providers are expected to be \$16 million in 2010. The average annual payments are estimated to be \$40 million from 2011 to 2016, when the agreements are expected to expire. The payments made to the third-party service providers are expected to be more than offset by cost savings resulting from headcount reductions and lower expenses for operating and maintaining Con-way's technology platforms.

In April 2010, Con-way acquired \$35 million of tractors for Freight under a capital-lease agreement in which Con-way guarantees the residual value of the tractors at the end of the lease term. Including the stated amount of the residual-value guarantee, the minimum lease payments during the five-year term of the lease are estimated to be \$40 million.

Capital Resources and Liquidity Outlook

Con-way's capital requirements relate primarily to the acquisition of revenue equipment to support growth and/or replacement of older equipment with newer equipment. In funding these capital expenditures and meeting working-capital requirements, Con-way utilizes various sources of liquidity and capital, including cash and cash equivalents, current marketable securities, cash flow from operations, credit facilities and access to capital markets. Con-way may also manage its liquidity requirements and cash-flow generation by varying the timing and amount of capital expenditures and by implementing cost-reduction actions, as more fully discussed under "Results of Operations – Overview."

Con-way has a \$400 million revolving credit facility that matures on September 30, 2011. The revolving credit facility is available for cash borrowings and for the issuance of letters of credit, up to \$400 million. At March 31, 2010, no borrowings were outstanding under the revolving credit facility; however, \$184.0 million of letters of credit were outstanding, with \$216.0 million of available capacity for additional letters of credit or cash borrowings. The revolving facility is guaranteed by certain of Con-way's material domestic subsidiaries and contains two financial covenants: (i) a leverage ratio and (ii) a fixed-charge coverage ratio. At March 31, 2010, Con-way was in compliance with the revolving credit facility's financial covenants and expects to remain in compliance through December 31, 2010 and thereafter.

Con-way had other uncommitted unsecured credit facilities totaling \$55.1 million at March 31, 2010, which are available to support short-term borrowings, letters of credit, bank guarantees, and overdraft facilities. A total of \$38.6 million was outstanding under these facilities at March 31, 2010, leaving \$16.5 million of available capacity.

At March 31, 2010, Con-way's \$200 million 8 7/8% Notes due in May 2010 were classified as current liabilities in the consolidated balance sheets. On May 3, 2010, Con-way used \$200.0 million of cash and cash equivalents to repay these notes at maturity.

See “– Forward-Looking Statements” below and Item 1A, “Risk Factors,” and Note 8, “Debt and Other Financing Arrangements,” of Item 8, “Financial Statements and Supplementary Data,” in Con-way's 2009 Annual Report on Form 10-K for additional information concerning Con-way's \$400 million credit facility and its other debt instruments.

In 2010, Con-way estimates capital and software expenditures of approximately \$175 million, net of asset dispositions, primarily for the acquisition of revenue equipment and hand-held devices. Con-way's actual 2010 expenditures may differ from the estimated amount depending on factors such as availability and timing of delivery of equipment. In addition to the estimated

capital expenditures, Con-way acquired \$35 million of tractor equipment for Freight under a capital-lease agreement in April 2010, as more fully discussed above under “—Contractual Cash Obligations.”

At March 31, 2010, Con-way’s senior unsecured debt was rated as investment grade by Standard and Poor’s (BBB-), Fitch Ratings (BBB-), and Moody’s (Baa3). Standard and Poor’s and Moody’s assigned an outlook of “negative,” while Fitch Ratings assigned an outlook of “stable.”

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the U.S. requires management to adopt accounting policies and make significant judgments and estimates. In many cases, there are alternative policies or estimation techniques that could be used. Con-way maintains a process to evaluate the appropriateness of its accounting policies and estimation techniques, including discussion with and review by the Audit Committee of its Board of Directors and its independent auditors. Accounting policies and estimates may require adjustment based on changing facts and circumstances and actual results could differ from estimates. Con-way believes that the accounting policies that are most judgmental and material to the financial statements are those related to the following:

- Defined Benefit Pension Plans
- Self-Insurance Accruals
- Income Taxes
- Revenue Recognition
- Property, Plant and Equipment and Other Long-Lived Assets
- Goodwill
- Disposition and Restructuring Activities

There have been no significant changes to the critical accounting policies and estimates disclosed in Con-way's 2009 Annual Report on Form 10-K, excepted as noted below.

Goodwill

Due largely to the impairment of Chic Logistics' customer-relationship intangible asset, Con-way evaluated the goodwill associated with Chic Logistics during the first quarter of 2010. At March 31, 2010, Chic Logistics had \$16.4 million of goodwill. In the assessment of Chic Logistics' goodwill, the fair value of the reporting unit exceeded its carrying value by a marginal amount. An adverse change in discount rate or future results from those forecasted in the discounted cash flow models could result in a lower fair value and an impairment of goodwill. Considering Chic Logistics' historical operating losses, there is a degree of uncertainty relating to the future results forecasted in the discounted cash flow models.

In addition, Con-way expects Chic Logistics' liability for unrecognized tax benefits to decrease by \$2.4 million in the second quarter of 2010 due to lapses of statutes of limitations. The resulting increase in the carrying value of the reporting unit combined with a decline in its fair value may cause its carrying value to exceed its fair value, which would result in an impairment of goodwill.

New Accounting Standards

Refer to Note 1, "Principal Accounting Policies," of Item 1, "Financial Statements," for a discussion of recently issued accounting standards for which the required adoption dates are in future periods.

Forward-Looking Statements

Certain statements included herein constitute "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to a number of risks and uncertainties, and should not be relied upon as predictions of future events. All statements other than statements of historical fact are forward-looking statements, including:

- any projections of earnings, revenues, weight, yield, volumes, income or other financial or operating items;
- any statements of the plans, strategies, expectations or objectives of Con-way's management for future operations or other future items;
 - any statements concerning proposed new products or services;
 - any statements regarding Con-way's estimated future contributions to pension plans;
 - any statements as to the adequacy of reserves;
- any statements regarding the outcome of any legal and other claims and proceedings that may be brought against Con-way;
 - any statements regarding future economic conditions or performance;
 - any statements regarding strategic acquisitions; and
- any statements of estimates or belief and any statements or assumptions underlying the foregoing.

Certain such forward-looking statements can be identified by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "estimates" or "anticipates" or the negative or other variations of those terms or comparable terminology or by discussions of strategy, plans or intentions. Such forward-looking statements are necessarily dependent on assumptions, data and methods that may be incorrect or imprecise and there can be no assurance that they will be realized. In that regard, certain important factors, among others and in addition to the matters discussed elsewhere in this document and other reports and documents filed by Con-way with the Securities and Exchange Commission, could cause actual results and other matters to differ materially from those discussed in such forward-looking statements. A detailed description of certain of these risk factors is included in Item 1A, "Risk Factors," of Con-way's 2009 Annual Report on Form 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Con-way is exposed to a variety of market risks, including the effects of interest rates, fuel prices and foreign-currency exchange rates.

Con-way enters into derivative financial instruments only in circumstances that warrant the hedge of an underlying asset, liability or future cash flow against exposure to some form of interest rate, commodity or currency-related risk. Additionally, the designated hedges should have high correlation to the underlying exposure such that fluctuations in the value of the derivatives offset reciprocal changes in the underlying exposure. Con-way held no material derivative financial instruments at March 31, 2010.

Interest Rates

Con-way is subject to the effect of interest-rate fluctuations on the fair value of its long-term debt and on the amount of interest income earned on cash-equivalent investments and marketable securities, as more fully discussed in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," of Con-way's 2009 Annual Report on Form 10-K.

Fuel

Con-way is subject to risks associated with the availability and price of fuel, which are subject to political, economic and market factors that are outside of Con-way's control.

Con-way would be adversely affected by an inability to obtain fuel in the future. Although historically Con-way has been able to obtain fuel from various sources and in the desired quantities, there can be no assurance that this will continue to be the case in the future.

Con-way may also be adversely affected by the timing and degree of fluctuations in fuel prices. Currently, Con-way's business units have fuel-surcharge revenue programs or cost-recovery mechanisms in place with a majority of customers. Con-way Freight and Con-way Truckload maintain fuel-surcharge programs designed to offset or mitigate the adverse effect of rising fuel prices. Menlo Worldwide Logistics has cost-recovery mechanisms incorporated into most of its customer contracts under which it recognizes fuel-surcharge revenue designed to eliminate the adverse effect of rising fuel prices on purchased transportation.

Con-way's competitors in the less-than-truckload ("LTL") and truckload markets also impose fuel surcharges. Although fuel surcharges are generally based on a published national index, there is no industry-standard fuel-surcharge formula. As a result, fuel-surcharge revenue constitutes only part of the overall rate structure. Revenue excluding fuel surcharges (sometimes referred to as base freight rates) represent the collective pricing elements that exclude fuel surcharges. In the LTL market, changes in base freight rates reflect numerous factors such as length of haul, freight class, weight per shipment and customer-negotiated adjustments. In the truckload market, changes in base freight rates primarily reflect differences in origin and destination location and customer-negotiated adjustments. Ultimately, the total amount that Con-way Freight and Con-way Truckload can charge for their services is determined by competitive pricing pressures and market factors.

Historically, Con-way Freight's fuel-surcharge program has enabled it to more than recover increases in fuel costs and fuel-related increases in purchased transportation. As a result, Con-way Freight may be adversely affected if fuel prices fall and the resulting decrease in fuel-surcharge revenue is not offset by an equivalent increase in base freight-rate revenue. Although lower fuel surcharges may improve Con-way Freight's ability to increase the freight rates that it would otherwise charge, there can be no assurance in this regard. Con-way Freight may also be adversely

affected if fuel prices increase or return to historically high levels. Customers faced with fuel-related increases in transportation costs often seek to negotiate lower rates through reductions in the base freight rates and/or limitations on the fuel surcharges charged by Con-way Freight, which adversely affect Con-way Freight's ability to offset higher fuel costs with higher revenue.

Con-way Truckload's fuel-surcharge program mitigates the effect of rising fuel prices but does not always result in Con-way Truckload fully recovering increases in its cost of fuel. The extent of recovery may vary depending on the amount of customer-negotiated adjustments and the degree to which Con-way Truckload is not compensated due to empty and out-of-route miles or from engine idling during cold or warm weather.

Con-way would be adversely affected if, due to competitive and market factors, its business units are unable to continue their current fuel-surcharge programs and/or cost-recovery mechanisms. In addition, there can be no assurance that these programs, as currently maintained or as modified in the future, will be sufficiently effective to offset increases in the price of fuel.

Foreign Currency

The assets and liabilities of Con-way's foreign subsidiaries are denominated in foreign currencies, which create exposure to changes in foreign-currency exchange rates. Con-way does not currently use derivative financial instruments to manage foreign-currency risk.

- 31 -

ITEM 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

Con-way's management, with the participation of Con-way's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of Con-way's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on such evaluation, Con-way's Chief Executive Officer and Chief Financial Officer have concluded that Con-way's disclosure controls and procedures are effective as of the end of such period.

(b) Internal Control Over Financial Reporting

There have not been any changes in Con-way's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, Con-way's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Certain legal proceedings of Con-way are discussed in Note 10, “Commitments and Contingencies,” of Item 1, “Financial Statements.”

ITEM 1A. RISK FACTORS

There are no material changes to the risk factors previously disclosed in Item 1A, “Risk Factors,” of Con-way’s 2009 Annual Report on Form 10-K.
