CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. Nature of Operations and Significant Accounting Policies

Background

CSX Corporation (“CSX”), and together with its subsidiaries (the “Company”), based in Jacksonville, Florida, is one of the nation's leading transportation suppliers. The Company provides rail-based transportation services including traditional rail service and the transport of intermodal containers and trailers.

CSX’s principal operating subsidiary, CSX Transportation, Inc. (“CSXT”), provides an important link to the transportation supply chain through its approximately 21,000 route mile rail network, which serves major population centers in 23 states east of the Mississippi River, the District of Columbia and the Canadian provinces of Ontario and Quebec.

Other entities

In addition to CSXT, the Company’s subsidiaries include CSX Intermodal Terminals, Inc. (“CSX Intermodal Terminals”), Total Distribution Services, Inc. (“TDSI”), Transflo Terminal Services, Inc. (“Transflo”), CSX Technology, Inc. (“CSX Technology”) and other subsidiaries. CSX Intermodal Terminals owns and operates a system of intermodal terminals, predominantly in the eastern United States and also performs drayage services (the pickup and delivery of intermodal shipments) and trucking dispatch operations. TDSI serves the automotive industry with distribution centers and storage locations, while Transflo provides logistical solutions for transferring products from rail to trucks. CSX Technology and other subsidiaries provide support services for the Company.

CSX’s other holdings include CSX Real Property, Inc., a subsidiary responsible for the Company’s real estate sales, leasing, acquisition and management and development activities. These activities are classified in other income – net because they are not considered by the Company to be operating activities. Results of these activities fluctuate with the timing of non-operating real estate transactions.

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. Nature of Operations and Significant Accounting Policies, continued

Basis of Presentation

In the opinion of management, the accompanying consolidated financial statements contain all normal, recurring adjustments necessary to fairly present the following:

- Consolidated income statements for the quarter ended April 1, 2011 and March 26, 2010;
- Consolidated balance sheets at April 1, 2011 and December 31, 2010; and
- Consolidated cash flow statements for the quarter ended April 1, 2011 and March 26, 2010.

Pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”), certain information and disclosures normally included in the notes to the annual financial statements prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) have been omitted from these interim financial statements. CSX suggests that these financial statements be read in conjunction with the audited financial statements and the notes included in CSX's most recent Annual Report on Form 10-K and any Current Reports on Form 8-K.

Fiscal Year

CSX follows a 52/53 week fiscal reporting calendar with the last day of each reporting period ending on a Friday:

- The first fiscal quarter of 2011 and 2010 consisted of 13 weeks from January 1, 2011 through April 1, 2011 and December 26, 2009 through March 26, 2010, respectively. The first week of fiscal year 2010 included a holiday week and is typically a lower volume week.
- Fiscal year 2010 consisted of 53 weeks beginning December 26, 2009 through December 31, 2010. Therefore, the fourth quarter 2010 consisted of 14 weeks.
- Fiscal year 2011 will consist of 52 weeks beginning January 1, 2011 through December 30, 2011.

Except as otherwise specified, references to “first quarter(s)” or “three months” indicate CSX’s fiscal periods ending April 1, 2011 and March 26, 2010, and references to year-end indicate the fiscal year ended December 31, 2010.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. Nature of Operations and Significant Accounting Policies, continued

Comprehensive Earnings

CSX reports comprehensive earnings or loss in accordance with the Comprehensive Income Topic in the Accounting Standards Codification (“ASC”) in the Consolidated Statement of Changes in Shareholders' Equity. Total comprehensive earnings are defined as all changes in shareholders' equity during a period, other than those resulting from investments by and distributions to shareholders (e.g., issuance of equity securities and dividends). Generally, for CSX, total comprehensive earnings equals net earnings plus or minus adjustments for pension and other post-retirement liabilities. Total comprehensive earnings represent the activity for a period net of tax and were \$406 million and \$317 million for first quarters 2011 and 2010, respectively.

While total comprehensive earnings is the activity in a period and is largely driven by net earnings in that period, accumulated other comprehensive income or loss (“AOCI”) represents the cumulative balance of other comprehensive income, net of tax, as of the balance sheet date. For CSX, AOCI is primarily the cumulative balance related to pension and other post-retirement adjustments and reduced overall equity by \$760 million and \$771 million as of first quarter 2011 and December 2010, respectively.

Allowance for Doubtful Accounts

The Company maintains an allowance for doubtful accounts on uncollectible amounts related to freight receivables, government reimbursement receivables, claims for damages and other various receivables. The allowance is based upon the credit worthiness of customers, historical experience, the age of the receivable and current market and economic conditions. Uncollectible amounts are charged against the allowance account. Allowance for doubtful accounts of \$38 million is included in the consolidated balance sheets as of first quarter 2011 and December 2010.

Other Items

Retained Earnings

During first quarter 2011, CSX's other capital balance was reduced to zero as a result of share repurchases. In accordance with the Equity Topic in the ASC, other capital cannot be negative. Therefore, a reclassification of \$248 million was made between retained earnings and other capital to bring the other capital balance to zero. Generally, retained earnings is only impacted by net earnings and dividends.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 2. Earnings Per Share

The following table sets forth the computation of basic earnings per share and earnings per share, assuming dilution:

	First Quarters	
	2011	2010
Numerator (Dollars in millions):		
Net Earnings	\$395	\$305
Denominator (Units in thousands):		
Average Common Shares Outstanding	369,349	391,079
Other Potentially Dilutive Common Shares(a)	2,237	3,244
Average Common Shares Outstanding, Assuming Dilution	371,586	394,323
Net Earnings Per Share, Basic	\$1.07	\$0.78
Net Earnings Per Share, Assuming Dilution	\$1.06	\$0.78

(a) Other potentially dilutive common shares include convertible debt, stock options, common stock equivalents and performance units granted under a management incentive compensation plan.

Basic earnings per share is based on the weighted-average number of shares of common stock outstanding. Earnings per share, assuming dilution, is based on the weighted-average number of shares of common stock outstanding adjusted for the effects of common stock that may be issued as a result of the following types of potentially dilutive instruments:

- convertible debt;
- employee stock options; and
- other equity awards, which include long-term incentive awards.

The Earnings Per Share Topic in the ASC requires CSX to include additional shares in the computation of earnings per share, assuming dilution. The additional shares included in diluted earnings per share represents the number of shares that would be issued if all of the above potentially dilutive instruments were converted into CSX common stock.

Other potentially dilutive common shares include convertible debt, stock options, stock option common stock equivalents and performance units granted under a management incentive compensation plan. When calculating diluted earnings per share for stock option common stock equivalents, the Earnings Per Share Topic in the ASC requires CSX to include the potential shares that would be outstanding if all outstanding stock options were exercised. This is offset by shares CSX could repurchase using the proceeds from these hypothetical exercises to obtain the common stock equivalent. This number is different from outstanding stock options, which is included in Note 3, Share-Based Compensation. All stock options were dilutive for the periods presented; therefore, no stock options were excluded from the diluted earnings per share calculation.

Table of Contents

CSX CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

NOTE 2. Earnings Per Share, continued

As a result, diluted shares outstanding are not impacted when debentures are converted into CSX common stock because those shares were already included in the diluted shares calculation. Shares outstanding for basic earnings per share, however, are impacted on a weighted-average basis when conversions occur. During first quarters 2011 and 2010, approximately \$55 thousand and \$3 million of face value of convertible debentures were converted into 2 thousand and 95 thousand shares of CSX common stock, respectively. As of first quarter 2011, approximately \$10 million of convertible debentures at face value remained outstanding, which are convertible into approximately 357 thousand shares of CSX common stock.

NOTE 3. Share-Based Compensation

Under CSX share-based compensation plans, awards primarily consist of performance grants, restricted stock awards, restricted stock units, stock options and stock plans for directors. CSX has not granted stock options since 2003. Awards granted under the various plans are determined and approved by the Compensation Committee of the Board of Directors or, in certain circumstances, by the Chief Executive Officer for awards to management employees other than senior executives. The Board of Directors approves awards granted to the Company's non-management directors upon recommendation of the Governance Committee.

Total pre-tax expense associated with all share-based compensation and its related income tax benefit is as follows:

(Dollars in millions)	First Quarters	
	2011	2010
Share-Based Compensation Expense		
(a)	\$12	\$23
Income Tax Benefit	4	9

(a) Share-based compensation expense may fluctuate with estimates of the number of performance-based awards that are expected to be awarded in future periods.

The following table provides information about stock options exercised.

(In thousands)	First Quarters	
	2011	2010
Number of Stock Options		
Exercised	1,093	359

As of December 2009, all outstanding options were vested, and therefore, there will be no future expense related to these options. As of first quarter 2011, CSX had approximately 2 million stock options outstanding. However, the impact of options to diluted earnings per share is much smaller.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves

Casualty, environmental and other reserves are considered critical accounting estimates that involve significant management judgments. They are provided for in the consolidated balance sheets as follows:

(Dollars in Millions)	April 1, 2011			December 31, 2010		
	Current	Long-term	Total	Current	Long-term	Total
Casualty:						
Personal Injury	\$78	\$178	\$256	\$78	\$176	\$254
Occupational	10	31	41	10	30	40
Asbestos	9	65	74	9	72	81
Total Casualty	97	274	371	97	278	375
Separation	16	40	56	16	44	60
Environmental	37	67	104	37	70	107
Other	24	110	134	26	110	136
Total	\$174	\$491	\$665	\$176	\$502	\$678

Actual settlements and claims received could differ. The final outcome of these matters cannot be predicted with certainty. Considering the legal defenses available, the liabilities that have been recorded and other factors, it is the opinion of management that none of these items, when finally resolved, will have a material effect on the Company's financial condition, results of operations or liquidity. Should a number of these items occur in the same period, however, they could have a material effect on the Company's financial condition, results of operations or liquidity in that particular period.

Casualty

Casualty reserves represent accruals for personal injury, occupational injury claims and asbestos. During 2010 the Company increased its self-insured retention amount for these claims from \$25 million to \$50 million per injury for claims occurring on or after June 1, 2010. Currently, no individual claim is expected to exceed the self-insured retention amount. In accordance with the Contingencies Topic in the ASC, to the extent the value of an individual claim exceeds the self-insured retention amount; the Company would present the liability on a gross basis with a corresponding receivable for insurance recoveries. These reserves fluctuate based upon the timing of payments as well as changes in independent third-party estimates, which are reviewed by management. Most of the claims relate to CSXT unless otherwise noted below. Defense and processing costs, which historically have been insignificant and are anticipated to be insignificant in the future, are not included in the recorded liabilities.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves, continued

Personal Injury

Personal injury reserves represent liabilities for employee work-related and third-party injuries. Work-related injuries for CSXT employees are primarily subject to the Federal Employers' Liability Act ("FELA"). In addition to FELA liabilities, employees of other CSX subsidiaries are covered by various state workers' compensation laws, the Federal Longshore and Harbor Workers' Compensation Program or the Maritime Jones Act.

CSXT retains an independent actuarial firm to assist management in assessing the value of personal injury claims and cases. An analysis is performed by the independent actuarial firm semi-annually and is reviewed by management. The methodology used by the actuary includes a development factor to reflect growth or reduction in the value of these personal injury claims. It is based largely on CSXT's historical claims and settlement experience. Actual results may vary from estimates due to the number, type and severity of the injury, costs of medical treatments and uncertainties in litigation.

Occupational & Asbestos

Occupational claims arise from allegations of exposure to certain materials in the workplace, such as solvents, soaps, chemicals (collectively referred to as "irritants") and diesel fuels or allegations of chronic physical injuries resulting from work conditions, such as repetitive stress injuries, carpal tunnel syndrome and hearing loss. Also, asbestos claims are from employees alleging exposure to asbestos in the workplace.

An analysis of occupational and asbestos claims is performed semi-annually by a third-party specialist and is reviewed by management. The methodology used includes estimates of future anticipated incurred but not reported claims based on the Company's trends in average historical claim filing rates, future anticipated dismissal rates and future settlement rates. Actual claims may vary from these estimates due to the number, type and severity of the injury, costs of medical treatments and uncertainties in litigation.

Separation

Separation liabilities represent the estimated benefits provided to certain union employees as a result of implementing workforce reductions, improvements in productivity and certain other cost reductions at the Company's major transportation units since 1991. These liabilities are expected to be paid out over the next 10 to 15 years from general corporate funds and may fluctuate depending on the timing of payments and associated taxes.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves, continued

Environmental

The Company is a party to various proceedings related to environmental issues, including administrative and judicial proceedings involving private parties and regulatory agencies. The Company has been identified as a potentially responsible party at approximately 255 environmentally impaired sites. Many of these are, or may be, subject to remedial action under the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, or CERCLA, also known as the Superfund Law, or similar state statutes. Most of these proceedings arose from environmental conditions on properties used for ongoing or discontinued railroad operations. A number of these proceedings, however, are based on allegations that the Company, or its predecessors, sent hazardous substances to facilities owned or operated by others for treatment, recycling or disposal. In addition, some of the Company's land holdings were leased to others for commercial or industrial uses that may have resulted in releases of hazardous substances or other regulated materials onto the property and could give rise to proceedings against the Company.

In any such proceedings, the Company is subject to environmental clean-up and enforcement actions under the Superfund Law, as well as similar state laws that may impose joint and several liability for clean-up and enforcement costs on current and former owners and operators of a site without regard to fault or the legality of the original conduct. These costs could be substantial.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves, continued

In accordance with the Asset Retirement and Environmental Obligations Topic in the ASC, the Company reviews its role with respect to each site identified at least quarterly, giving consideration to a number of factors such as:

- type of clean-up required;
- nature of the Company's alleged connection to the location (e.g., generator of waste sent to the site or owner or operator of the site);
- extent of the Company's alleged connection (e.g., volume of waste sent to the location and other relevant factors); and
- number, connection and financial viability of other named and unnamed potentially responsible parties at the location.

Based on the review process, the Company has recorded amounts to cover anticipated contingent future environmental remediation costs with respect to each site to the extent such costs are estimable and probable. The recorded liabilities for estimated future environmental costs are undiscounted. The liability includes future costs for remediation and restoration of sites as well as any significant ongoing monitoring costs, but excludes any anticipated insurance recoveries. Payments related to these liabilities are expected to be made over the next several years. Environmental remediation costs are included in materials, supplies and other on the consolidated income statement.

Currently, the Company does not possess sufficient information to reasonably estimate the amounts of additional liabilities, if any, on some sites until completion of future environmental studies. In addition, conditions that are currently unknown could, at any given location, result in additional exposure, the amount and materiality of which cannot presently be reliably estimated. Based upon information currently available, however, the Company believes its environmental reserves are adequate to fund remedial actions to comply with present laws and regulations, and that the ultimate liability for these matters, if any, will not materially affect its overall financial condition, results of operations or liquidity.

See Item 1, Legal proceedings in Part II of this quarterly report on Form 10-Q for information related to an environmental settlement.

Other

Other reserves include liabilities for various claims, such as longshoremen disability claims, freight claims and claims for property, automobile and general liability. These liabilities are accrued at the estimable and probable amount in accordance with the Contingencies Topic in the ASC.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 5. Commitments and Contingencies

Insurance

The Company maintains numerous insurance programs with substantial limits for property damage (which includes business interruption) and third-party liability. A certain amount of risk is retained by the Company on each of the liability and property programs. The Company has a \$25 million retention per occurrence for the non-catastrophic property program and a \$50 million retention per occurrence for the liability and catastrophic property programs.

While the Company's current insurance coverage is adequate to cover its damages, future claims could exceed existing insurance coverage or insurance may not continue to be available at commercially reasonable rates.

Legal Proceedings

For information related to the Company's legal proceedings, see Item 1, Legal proceedings in Part II of this quarterly report on Form 10-Q.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 6. Employee Benefit Plans

The Company sponsors defined benefit pension plans principally for salaried, management personnel. The plans provide eligible employees with retirement benefits based predominantly on years of service and compensation rates near retirement. For employees hired after December 31, 2002, benefits are determined based on a cash balance formula, which provides benefits by utilizing interest and pays credits based upon age, service and compensation. In addition to these plans, the Company sponsors a self-insured post-retirement medical plan and a life insurance plan that provide benefits to full-time, salaried, management employees, hired prior to January 1, 2003, upon their retirement if certain eligibility requirements are met. Prior to 2011, the post-retirement medical plan was partially funded by all participating retirees, with retiree contributions adjusted annually. Beginning in 2011, Medicare-eligible retirees will be covered by a health reimbursement arrangement, which is an employer-funded account that can be used for reimbursement of eligible medical expenses. Non-Medicare eligible retirees will continue to be covered by the existing self-insured program. The life insurance plan is non-contributory.

The Company engages independent, external actuaries to compute the amounts of liabilities and expenses relating to these plans subject to the assumptions that the Company selects. These amounts are reviewed by management. The following table describes the components of expense/ (income) related to net benefit expense:

(Dollars in millions)	Pension Benefits		Other Post-retirement Benefits	
	First Quarters		First Quarters	
	2011	2010	2011	2010
Service Cost	\$10	\$10	\$1	\$1
Interest Cost	30	31	3	5
Expected Return on Plan Assets	(39)	(41)	-	-
Amortization of Net Loss	18	15	1	2
Amortization of Prior Service Cost	-	1	-	-
Total Expense	\$19	\$16	\$5	\$8

Qualified pension plan obligations are funded in accordance with prescribed regulatory requirements and with an objective of meeting minimum funding requirements necessary to avoid restrictions on flexibility of plan operation and benefit payments. At this time, the Company anticipates that no contributions to its qualified pension plans will be required in 2011. For further details, see Note 8, Employee Benefit Plans, in CSX's most recent Annual Report on Form 10-K.

Reclassifications	414	(414)	-
Long-term debt at first quarter 2011	\$503	\$7,637	\$8,140

For fair value information related to the Company's long-term debt, see Note 10, Fair Value Measurements.

Revolving Credit Facility

CSX has a \$1.25 billion unsecured revolving credit facility with a syndicate of banks. With the approval of the lending banks, CSX may increase its total borrowing capacity under the \$1.25 billion facility by \$500 million, or up to \$1.75 billion. The facility allows borrowings at floating (LIBOR-based) interest rates, plus a spread, depending upon CSX's senior unsecured debt ratings. LIBOR is the London Interbank Offered Rate which is a daily reference rate based on the interest rates at which banks offer to lend unsecured funds. As of first quarter 2011, this facility was not drawn on, and CSX was in compliance with all covenant requirements under the facility. The current facility expires in May 2012 and the Company plans to renew or replace this facility prior to its expiration.

Receivables Securitization Facility

The Company's \$250 million receivables securitization facility has a 364-day term and expires in December 2011. The purpose of this facility is to provide an alternative to commercial paper and a low cost source of short-term liquidity. As of the date of this filing, the Company has no outstanding balances under this facility. Under the terms of this facility, CSX Transportation transfers eligible third-party receivables to CSX Trade Receivables, a bankruptcy-remote special purpose subsidiary. A separate subsidiary of CSX will service the receivables. Upon transfer, the receivables become assets of CSX Trade Receivables and are not available to the creditors of CSX or any of its other subsidiaries. In the event CSX Trade Receivables draws under this facility, the Company will record an equivalent amount of debt on its consolidated financial statements.

NOTE 8. Other Income - Net

The Company derives income from items that are not considered operating activities. Income from these items is reported net of related expense. Other income – net consisted of the following:

(Dollars in millions)	First Quarters	
	2011	2010
Interest Income	\$1	\$1
Income from Real Estate	3	7
Miscellaneous Income	1	3
Total Other Income - Net	\$5	\$11

NOTE 9. Income Taxes

During last year's first quarter, the Patient Protection and Affordable Care Act was enacted and signed into law. This act included a provision eliminating the tax deductibility of retiree health care costs to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D coverage. As a result of this legislation and the Health Care and Education Reconciliation Act of 2010, the Company recorded tax expense of \$7 million in last year's quarter.

There have been no material changes to the balance of unrecognized tax benefits during first quarter 2011.

NOTE 10. Fair Value Measurements

The Financial Instruments Topic in the ASC requires disclosures about fair value of financial instruments in annual reports as well as in quarterly reports. For CSX, this statement applies to certain investments and long-term debt. Disclosure of the fair value of pension plan assets is only required annually.

Various inputs are considered when determining the value of the Company's investments, pension plan assets and long-term debt. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in these securities. These inputs are summarized in the three broad levels listed below.

- Level 1 – observable market inputs that are unadjusted quoted prices for identical assets or liabilities in active markets
- Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

Table of Contents

CSX CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

NOTE 10. Fair Value Measurements, continued

The valuation methods described below may produce a fair value calculation that is not indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Investments

The Company's investment assets, valued by a third-party trustee, consist primarily of corporate bonds and are carried at fair value, on the consolidated balance sheet per the Fair Value Measurements and Disclosures Topic in the ASC. Level 1 inputs were used to determine fair value of the Company's investment assets. The fair value and amortized cost of these bonds are as follows:

(Dollars in Millions)	April 2011	December 2010
Fair Value	\$129	\$123
Amortized Cost	\$128	\$121

These investments have the following maturities:

(Dollars in Millions)	April 2011	December 2010
Less than 1 year	\$46	\$44
1 - 2 years (a)	42	45
2 - 5 years (b)	41	31
Greater than 5 years	-	3
Total	\$129	\$123

(a) The 1-2 year category includes callable bonds of approximately \$5 million for both 2011 and 2010, which are classified as short-term investments on the consolidated balance sheet.

(b) The 2-5 year category includes callable bonds of approximately \$5 million for both 2011 and 2010, which are classified as short-term investments on the consolidated balance sheet.

Long-term Debt

Long-term debt is reported at carrying amount on the consolidated balance sheet and is the Company's only financial instrument with fair values significantly different from their carrying amounts. The majority of the Company's long-term debt is valued by an independent third party. For those instruments not valued by the third party, the fair value has been estimated using discounted cash flow analysis based upon the yields provided by the same independent

third party. Level 2 inputs were used to determine the fair value of the Company's long-term debt.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 10. Fair Value Measurements, continued

The fair value of outstanding debt fluctuates with changes in a number of factors. Such factors include, but are not limited to, interest rates, market conditions, values of similar financial instruments, size of the transaction, cash flow projections and comparable trades. Fair value will exceed carrying value when the current market interest rate is lower than the interest rate at which the debt was originally issued. The fair value of a company's debt is a measure of its current value under present market conditions. It does not impact the financial statements under current accounting rules. The fair value and carrying value of the Company's long-term debt is as follows:

(Dollars in Millions)	April 2011	December 2010
Long-term Debt Including Current Maturities:		
Fair Value	\$9,031	\$9,624
Carrying Value	\$8,140	\$8,664

NOTE 11. Summarized Consolidating Financial Data

In 2007, CSXT sold secured equipment notes maturing in 2023 and in 2008, CSXT sold additional secured equipment notes maturing in 2014 in registered public offerings. CSX has fully and unconditionally guaranteed the notes. In connection with the notes, the Company is providing the following condensed consolidating financial information in accordance with SEC disclosure requirements. Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use of the equity method of accounting to reflect ownership interests in subsidiaries which are eliminated upon consolidation and the allocation of certain expenses of CSX incurred for the benefit of its subsidiaries.

Condensed consolidating financial information for the obligor, CSXT, and parent guarantor, CSX, is as follows:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

STRATEGIC OVERVIEW

The Company and the rail industry provide customers with access to an expansive and interconnected transportation network that plays a key role in North American commerce. Through this network, the Company transports a broad portfolio of products, ranging from coal and new energy sources, like biodiesel and ethanol, to automobiles, chemicals, and consumer products.

CSX remains highly committed to delivering value to shareholders through a balanced approach to deploying capital that includes investments in infrastructure, dividend improvements and share repurchases. In 2011, the Company plans to invest \$2.0 billion to sustain core infrastructure and rolling stock, support various strategic investments and fund Positive Train Control ("PTC") implementation costs. Key terminal expansions and infrastructure projects are important components of CSX's investment strategy. Strategic investments through public-private partnerships, including the National Gateway initiative, will provide enhanced transit times and improved service for customers.

The National Gateway is a multi-year infrastructure initiative which will increase intermodal capacity on key corridors between Mid-Atlantic ports and the Midwest. Total project costs are approximately \$850 million, of which the Company has already committed approximately \$400 million. A key component of this initiative is the Company's new Northwest Ohio intermodal terminal that became operational during the first quarter 2011. This high-capacity terminal expands service offerings to customers as well as improves market access to and from east coast ports. In addition, this terminal utilizes environmentally-friendly technology to further enhance the benefits freight rail provides.

These long-term investments provide a foundation for volume growth, productivity as well as safe and reliable operations. To continue these types of investments, the Company must be able to operate in an environment in which it can generate adequate returns and drive shareholder value. CSX will continue to advocate for a fair and balanced regulatory environment to ensure that the value of the Company's rail service would be reflected in any potential new legislation or policies.

In addition to investing in its network, CSX continues to return value to its shareholders in the form of dividends, which the Company has increased eight times over the last five years. CSX also completed its multi-year \$3 billion share repurchase program during first quarter 2011.

Table of Contents

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FIRST QUARTER 2011 HIGHLIGHTS

- Revenue increased \$319 million or 13% to \$2.8 billion driven by increases in volume, core pricing gains and higher fuel recovery.
- Expenses increased \$178 million or 10% to \$2.0 billion primarily driven by higher fuel prices.
- Operating income increased \$141 million or 22% to \$773 million and operating ratio improved to 72.5%, which are both first quarter records.

	First Quarters	
(in thousands)	2011	2010
Volume	1,592	1,486
(in millions)		
Revenue	\$2,810	\$2,491
Expense	2,037	1,859
Operating Income	\$773	\$632
Operating Ratio	72.5%	74.6%

CSX first quarter results reflect continued strong year-over-year volume and revenue growth as demand for rail service increased and due to the improving economy. Revenue increased 13% from the prior year with volume higher in almost all markets with the greatest increases in automotive, emerging markets and intermodal. This volume gain of 7% along with ongoing emphasis on pricing above rail inflation and higher fuel recovery associated with the increase in fuel prices drove revenue-per-unit increases in most markets.

While revenue grew 13%, expenses increased only 10%, versus the prior year quarter. Total fuel costs increased \$119 million primarily due to higher fuel prices and contributed to the 10% increase in total expense. Volume-related expenses, inflation and other costs also contributed to this increase. Excluding the rise in total fuel costs, total expenses only increased 4% year over year.

For additional information, refer to Results of Operations discussed on pages 30 through 32.

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In addition to the financial highlights described above, the Company measures and reports safety and service performance. The Company strives for continuous improvement in these measures through training, initiatives and investment. For example, the Company's safety and train accident prevention programs rely on broad employee involvement. The programs utilize operating rules training, compliance measurement, root cause analysis and communication to create a safer environment for employees and the public. Continued capital investment in Company's assets, including track, bridges, signals, equipment and detection technology also supports safety performance.

The Company continued to advance its efforts on safety during first quarter 2011. The FRA reportable personal injuries frequency index improved to an all-time low company record of 0.78, a 5% improvement over 2010. The reported FRA train accident frequency rate decreased 24% to 2.57.

Overall, network reliability and service were resilient during the first quarter of 2011. However, key service measures in first quarter 2011 declined versus 2010. This decline was primarily driven by weather impacts to the merchandise market, which is one of the Company's three major markets. On-time train originations and arrivals declined to 66% and 59%, respectively. Dwell time increased to 26.6 hours from 25.8 hours in first quarter 2010. Average train velocity declined 2% to 20.5 miles per hour. The Company has taken steps to improve this performance, including adding labor and locomotive resources to the system.

	Freight Cars (owned and long-term leased)	78,518	82,452		(5)%

Key Performance Measures Definitions

FRA Personal Injury Frequency Index – Number of FRA-reportable injuries per 200,000 man-hours.

FRA Train Accident Rate – Number of FRA-reportable train accidents per million train-miles.

On-Time Train Originations – Percent of scheduled road trains that depart the origin yard on-time or ahead of schedule.

On-Time Destination Arrivals – Percent of scheduled road trains that arrive at the destination yard on-time to two hours late (30 minutes for intermodal trains).

Dwell – Average amount of time in hours between car arrival at and departure from the yard. It does not include cars moving through the yard on the same train.

Cars-On-Line – An average count of all cars on the network (does not include locomotives, cabooses, trailers, containers or maintenance equipment).

Train Velocity – Average train speed between terminals in miles per hour (does not include locals, yard jobs, work trains or passenger trains).

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

First Quarter 2011 Results of Operations

The Company achieved strong year-over-year volume and revenue growth as demand for rail service increased and economic conditions continued to improve. Volume was higher in almost all markets with the greatest volume increases in automotive, emerging markets and intermodal. Ongoing emphasis on pricing above rail inflation, along with higher fuel recovery associated with the increase in fuel prices drove revenue-per-unit increases in most markets.

Merchandise

Agricultural

Agricultural Products – Volume declined as feed shipments were lower year over year primarily due to a surge in exports last year as a result of the drought in South America.

Phosphates and Fertilizers – Domestic demand was strong for fertilizers as farmers increased application to improve crop yields. Export demand was also strong with recovery in exports to Central and South America after last year's drought.

Food and Consumer – Volume was flat as strength in truckload conversions of refrigerated products (driven by higher fuel prices) and continued consumer demand for alcoholic beverages was offset by lower shipments of canned goods.

Industrial

Chemicals – Growth occurred across most chemicals markets reflecting improvement in demand for intermediate products used in manufacturing automobiles and consumer goods. Specifically, many plastics and chemicals are key inputs in the production of both durable and nondurable goods, as well as packaging.

Automotive – Strong growth was due to the continued increase in North American light-vehicle production driven by higher sales.

Metals – Volume growth was driven by continued increased shipments of sheet steel for auto production and increases in scrap steel resulting from higher steel production.

Housing and Construction

Emerging Markets – Volume increased driven by improved shipments of aggregates (which include crushed stone, sand and gravel) and waste as a result of overall market growth due to the improving economy.

Forest Products – Volume increased despite the weakness in construction-related markets with strength in shipments of pulp board and paper used in packaging for consumer products.

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Coal

Growth was driven by higher export shipments due to greater demand for U.S. coal in Europe, Asia and South America. Utility coal shipments were weakened as electrical generation declined in the eastern U.S., most significantly in the Southeast. Also contributing to this decline, natural gas prices continued to remain at low levels and utility stockpiles remained at or slightly above normal levels. The increase in revenue per unit was driven by improved yield and positive mix.

Intermodal

Strength in volume was primarily driven by increased customer demand, the improving U.S. economy and new international gains as a result of the intermodal portfolio of service and network offerings. The revenue-per-unit decline was driven by the continued impact of terminating the prior purchase transportation agreement in 2010 and was partially offset by an improved pricing environment and increased fuel recovery due to higher fuel prices.

Expense

Expenses increased \$178 million from last year's first quarter. Significant variances are described below.

Labor and Fringe expense increased \$36 million primarily due to inflation of \$23 million. Volume-related and other expenses were \$13 million higher during the quarter.

Materials, Supplies and Other expense increased \$11 million due to:

- Volume-related, inflation and other expenses were \$31 million higher during the quarter.
- Prior year insurance and legal recoveries of \$17 million that did not repeat in the current quarter.
- Offsetting these increases was reductions of \$37 million related to the impact of terminating the prior intermodal purchased transportation agreement in the prior year.

Fuel expense increased \$119 million primarily due to a 36% increase in average price per gallon as well as higher volume.

Table of Contents

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Consolidated Results of Operations

Interest Expense

Interest expense decreased \$2 million primarily due to lower interest rates partially offset by higher average debt balances.

Other Income

Other income decreased \$6 million primarily due to lower real estate sales.

Income Tax Expense

Income tax expense increased \$47 million to \$243 million primarily due to higher earnings in first quarter 2011.

Net Earnings

Net earnings increased \$90 million to \$395 million and earnings per diluted share increased \$0.28 to \$1.06 driven by the after-tax impact of business results due to revenue growth offset mainly by higher fuel expense. Also, as the Company has continued to buy back shares, there were fewer shares outstanding.

LIQUIDITY AND CAPITAL RESOURCES

The following are material changes in the consolidated balance sheets and sources of liquidity and capital, which provide an update to the discussion included in CSX's most recent Annual Report on Form 10-K.

Material Changes in Consolidated Balance Sheets and Significant Cash Flows

Consolidated Balance Sheets

Total assets and liabilities plus shareholders' equity decreased \$564 million from year end. This decrease was driven by cash used for property additions of \$390 million, debt payments of \$524 million as well as total share repurchases of \$300 million offset by cash generated from operating activities.

Consolidated Cash Flow Statements

Cash provided by operating activities decreased \$238 million in first quarter 2011 compared to last year's quarter primarily as a result of higher payroll-related payments due to the timing of this year's quarter-end and higher incentive compensation payouts. This decrease was slightly offset by the net impact of bonus depreciation on tax accruals. More cash was used for investing activities mainly due to a \$62 million increase in property additions compared to last year's quarter. Cash used for financing activities increased \$418 million due to higher debt repayments in 2011 versus last year.

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Working Capital

As of the end of the first quarter, CSX had \$534 million of cash and cash equivalents. CSX also has a \$1.25 billion credit facility with a diverse syndicate of banks that was not drawn on. The current facility expires in May 2012 and the Company plans to renew or replace this facility prior to its expiration. CSX uses current cash balances for general corporate purposes, which may include capital expenditures, working capital requirements, improvements in productivity, dividend payments to shareholders and repurchases of CSX common stock.

The Company's \$250 million receivables securitization facility has a 364-day term and expires in December 2011. The purpose of this facility is to provide an alternative to commercial paper and a low cost source of short-term liquidity. As of the date of this filing, the Company has no outstanding balances under this facility. Under the terms of this facility, CSXT transfers eligible third-party receivables to CSX Trade Receivables, a bankruptcy-remote special purpose subsidiary. A separate subsidiary of CSX will service the receivables. Upon transfer, the receivables become assets of CSX Trade Receivables and are not available to the creditors of CSX or any of its other subsidiaries. In the event CSX Trade Receivables draws under this facility, the Company will record an equivalent amount of debt on its consolidated financial statements.

Working capital can also be considered a measure of a company's ability to meet its short-term needs. CSX had a working capital deficit of \$51 million as of the end of first quarter 2011 and a working capital surplus of \$318 million as of December 2010. The decline since December 2010 is primarily due to cash used for property additions of \$390 million and total share repurchases of \$300 million in first quarter 2011 offset by cash from operations. A working capital deficit is not unusual for CSX or other companies in the industry and does not indicate a lack of liquidity.

The Company's working capital balance varies due to factors such as the timing of scheduled debt payments and changes in cash and cash equivalent balances as discussed above. The Company continues to maintain adequate current assets to satisfy current liabilities and maturing obligations when they come due. Furthermore, CSX has sufficient financial capacity, including its revolving credit facility and shelf registration statement to manage its day-to-day cash requirements and any anticipated obligations. The Company from time to time accesses the credit markets for additional liquidity.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires that management make estimates in reporting the amounts of certain assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and certain revenues and expenses during the reporting period. Actual results may differ from those estimates. These estimates and assumptions are discussed with the Audit Committee of the Board of Directors on a regular basis. Consistent with the prior year, significant estimates using management judgment are made for the following areas:

- casualty, environmental and legal reserves;
- pension and post-retirement medical plan accounting;
- depreciation policies for assets under the group-life method; and
- income taxes.

For further discussion of CSX's critical accounting estimates, see the Company's most recent Annual Report on Form 10-K.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

Certain statements in this report and in other materials filed with the SEC, as well as information included in oral statements or other written statements made by the Company, are forward-looking statements. The Company intends for all such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and the provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements within the meaning of the Private Securities Litigation Reform Act may contain, among others, statements regarding:

- projections and estimates of earnings, revenues, volumes, rates, cost-savings, expenses, taxes or other financial items;
 - expectations as to results of operations and operational initiatives;
- expectations as to the effect of claims, lawsuits, environmental costs, commitments, contingent liabilities, labor negotiations or agreements on the Company's financial condition, results of operations or liquidity;
- management's plans, strategies and objectives for future operations, capital expenditures, share repurchases, proposed new services and other similar expressions concerning matters that are not historical facts, and management's expectations as to future performance and operations and the time by which objectives will be achieved; and
- future economic, industry or market conditions or performance and their effect on the Company's financial condition, results of operations or liquidity.

Forward-looking statements are typically identified by words or phrases such as "believe," "expect," "anticipate," "project," "estimate," "preliminary" and similar expressions. The Company cautions against placing undue reliance on forward-looking statements, which reflect its good faith beliefs with respect to future events and are based on information currently available to it as of the date the forward-looking statement is made. Forward-looking statements should not be read as a guarantee of future performance or results and will not necessarily be accurate indications of the timing when, or by which, such performance or results will be achieved.

Table of Contents

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-looking statements are subject to a number of risks and uncertainties and actual performance or results could differ materially from those anticipated by any forward-looking statements. The Company undertakes no obligation to update or revise any forward-looking statement. If the Company does update any forward-looking statement, no inference should be drawn that the Company will make additional updates with respect to that statement or any other forward-looking statements. The following important factors, in addition to those discussed in Part II, Item 1A (Risk Factors) of CSX's most recent annual report on Form 10-K and elsewhere in this report, may cause actual results to differ materially from those contemplated by any forward-looking statements:

- legislative, regulatory or legal developments involving transportation, including rail or intermodal transportation, the environment, hazardous materials, taxation, including the outcome of tax claims and litigation, the potential enactment of initiatives to further regulate the rail industry and the ultimate outcome of shipper and rate claims subject to adjudication;
- the outcome of litigation and claims, including, but not limited to, those related to fuel surcharge, environmental matters, taxes, personal injuries and occupational illnesses;
- changes in domestic or international economic, political or business conditions, including those affecting the transportation industry (such as the impact of industry competition, conditions, performance and consolidation) and the level of demand for products carried by CSXT;
- natural events such as severe weather conditions, including floods, fire, hurricanes and earthquakes, a pandemic crisis affecting the health of the Company's employees, its shippers or the consumers of goods, or other unforeseen disruptions of the Company's operations, systems, property or equipment;
- competition from other modes of freight transportation, such as trucking and competition and consolidation within the transportation industry generally;
- the cost of compliance with laws and regulations that differ from expectations (including those associated with PTC implementation) and costs, penalties and operational impacts associated with noncompliance with applicable laws or regulations;
- the impact of increased passenger activities in capacity-constrained areas, including potential effects of high speed rail initiatives, or regulatory changes affecting when CSXT can transport freight or service routes;
- unanticipated conditions in the financial markets that may affect timely access to capital markets and the cost of capital, as well as management's decisions regarding share repurchases;
 - changes in fuel prices, surcharges for fuel and the availability of fuel;

Table of Contents

CSX CORPORATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

- availability of insurance coverage at commercially reasonable rates or insufficient insurance coverage to cover claims or damages;
- the inherent business risks associated with safety and security, including the availability and vulnerability of information technology, adverse economic or operational effects from actual or threatened war or terrorist activities and any governmental response;
- labor and benefit costs and labor difficulties, including stoppages affecting either the Company's operations or the customers' ability to deliver goods to the Company for shipment;
 - the Company's success in implementing its strategic, financial and operational initiatives;
 - changes in operating conditions and costs or commodity concentrations; and
 - the inherent uncertainty associated with projecting economic and business conditions.

Other important assumptions and factors that could cause actual results to differ materially from those in the forward-looking statements are specified elsewhere in this report and in CSX's other SEC reports, accessible on the SEC's website at www.sec.gov and the Company's website at www.csx.com. The information on the CSX website is not part of this quarterly report on Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in market risk from the information provided under Part II, Item 7A (Quantitative and Qualitative Disclosures about Market Risk) of CSX's most recent Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

As of April 1, 2011, under the supervision and with the participation of CSX's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), management has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the CEO and CFO concluded that, as of April 1, 2011, the Company's disclosure controls and procedures were effective at the reasonable assurance level in timely alerting them to material information required to be included in CSX's periodic SEC reports. There were no changes in the Company's internal controls over financial reporting during the first quarter of 2011 that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Fuel Surcharge Antitrust Litigation

There were no material developments during the quarter concerning the fuel surcharge antitrust litigation. For further details, see Item 3, Legal Proceedings in Part I of CSX's most recent Annual Report on Form 10-K.

Environmental Settlement

During first quarter 2011, CSXT entered into an agreement in principle with the State of Ohio Attorney General ("OAG") in settlement of alleged claims pertaining to state water pollution violations dating back to 2006. Without admitting the allegations, CSXT agreed to pay a civil penalty of \$200 thousand. CSXT will also make a \$150 thousand payment to the Ohio Environmental Protection Agency's Surface Water Improvement Fund for a supplemental environmental project. The settlement agreement is embodied in a consent order negotiated between CSXT and OAG. The consent order is subject to public notice and comment and judicial approval.

PART II

ITEM 2. CSX Purchases of Equity Securities

CSX is required to disclose any purchases of its own common stock for the most recent quarter. CSX purchases its own shares for two primary reasons: to further its goals under its share repurchase program and to fund the Company's contribution required to be paid in CSX common stock under a 401(k) plan which covers certain union employees.

During first quarter 2011, CSX repurchased a total of \$300 million of its common shares. These repurchases included the remaining \$298 million of share repurchases under the Company's existing share repurchase program. Also, it included shares purchased to fund the Company's contribution to a 401(k) plan that covers certain union employees. Since March 2008, CSX has completed approximately \$3 billion in share repurchases and has exhausted the current repurchase authority.

CSX Purchases of Equity Securities
for the Quarter

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (a)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
Third Quarter				
Beginning Balance				\$298,286,880
January (January 1, 2011 - January 28, 2011)	796,060	\$68.61	771,500	245,422,311
February (January 29, 2011 - February 25, 2011)	1,624,840	72.01	1,624,600	128,440,283
March (February 26, 2011 - April 1, 2011)	1,721,960	74.58	1,721,800	20,610
Ending Balance	4,142,860	\$72.42	4,117,900	\$20,610

(a) The difference of 24,960 shares between the "Total Number of Shares Purchased" and the "Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs" for the quarter represents shares purchased to fund the Company's contribution to a 401(k) plan that covers certain union employees.
