Form 10-Q  
November 09, 2018  
Table of Contents

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D. C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended September 30, 2018

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number 001-11339

PROTECTIVE LIFE CORPORATION  
(Exact name of registrant as specified in its charter)  
DELAWARE 95-2492236  
(State or other jurisdiction of incorporation or organization) (IRS Employer Identification Number)

2801 HIGHWAY 280 SOUTH  
BIRMINGHAM, ALABAMA 35223  
(Address of principal executive offices and zip code)

Registrant's telephone number, including area code (205) 268-1000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated Filer

Non-accelerated filer  Smaller Reporting Company

Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

Number of shares of Common Stock, \$0.01 Par Value, outstanding as of October 23, 2018: 1,000

PROTECTIVE LIFE CORPORATION  
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS  
(Unaudited)

1. BASIS OF PRESENTATION

Basis of Presentation

On February 1, 2015, Protective Life Corporation (the “Company”) became a wholly owned subsidiary of The Dai-ichi Life Insurance Company, Limited, a kabushiki kaisha organized under the laws of Japan (now known as Dai-ichi Life Holdings, Inc., “Dai-ichi Life”), when DL Investment (Delaware), Inc., a wholly owned subsidiary of Dai-ichi Life, merged with and into the Company (the “Merger”). Prior to February 1, 2015, the Company’s stock was publicly traded on the New York Stock Exchange. Subsequent to the Merger, the Company remains as an SEC registrant within the United States. The Company is a holding company with subsidiaries that provide financial services through the production, distribution, and administration of insurance and investment products. The Company markets individual life insurance, credit life and disability insurance, guaranteed investment contracts, guaranteed funding agreements, fixed and variable annuities, and extended service contracts throughout the United States. The Company also maintains a separate segment devoted to the acquisition of insurance policies from other companies. Founded in 1907, Protective Life Insurance Company (“PLICO”) is the Company’s largest operating subsidiary.

These financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for the interim periods presented herein. In the opinion of management, the accompanying financial statements reflect all adjustments (consisting only of normal recurring items) necessary for a fair statement of the results for the interim periods presented. Operating results for the three and nine months ended September 30, 2018, are not necessarily indicative of the results of operations that may be expected for the year ending December 31, 2018. The year-end consolidated condensed financial data included herein was derived from audited financial statements but does not include all disclosures required by GAAP within this report. For further information, refer to the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017.

The operating results of companies in the insurance industry have historically been subject to significant fluctuations due to changing competition, economic conditions, interest rates, investment performance, insurance ratings, claims, persistency, and other factors.

Entities Included

The consolidated condensed financial statements in this report include the accounts of Protective Life Corporation and subsidiaries and its affiliate companies in which the Company holds a majority voting or economic interest.

Intercompany balances and transactions have been eliminated.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant Accounting Policies

For a full description of significant accounting policies, see Note 2 to Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017. There were no significant changes to the Company’s accounting policies during the nine months ended September 30, 2018 other than those discussed below.

Property and Casualty Insurance Products

Property and casualty insurance products include service contract business, surety bonds, and guaranteed asset protection (“GAP”). Premiums and fees associated with service contracts and GAP products are recognized based on expected claim patterns. For all other products, premiums are generally recognized over the terms of the contract on a pro-rata basis. Commissions and fee income associated with other products are recognized as earned when the related services are provided to the customer. Unearned premium reserves are maintained for the portion of the premiums that is related to the unexpired period of the policy. Benefit reserves are recorded when insured events occur. Benefit reserves include case basis reserves for known but unpaid claims as of the balance sheet date as well as incurred but not reported (“IBNR”) reserves for claims where the insured event has occurred but has not been reported to the Company as of the balance sheet date. The case basis reserves and IBNR are calculated based on historical experience and on assumptions relating to claim severity and frequency, the level of used vehicle prices, and other factors. These

assumptions are modified as necessary to reflect anticipated trends.

9

---

Table of Contents

Effective January 1, 2018, the Company adopted Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers. In consideration of the amendments in this Update, the Company revised its recognition pattern for administrative fees associated with certain vehicle service and GAP products. Previously, these fees were recognized based on the work effort involved in satisfying the Company's contract obligations. The Company will recognize these fees on a claims occurrence basis in future periods. To reflect this change in accounting principle, the Company recorded a cumulative effect adjustment as of January 1, 2018 that resulted in a decrease in retained earnings of \$92.5 million. The pre-tax impact to each affected line item on the Company's financial statements is reflected in the table below:

Financial Statement Line Item:	As of September 30, 2018			
	As Reported	Previous Accounting Method		
	(Dollars In Millions)			
Balance Sheet				
Deferred policy acquisition costs and value of business acquired	\$2,974.3	\$ 2,832.4		
Other liabilities	\$2,575.1	\$ 2,308.7

	As Reported	Previous Accounting Method	As Reported	Previous Accounting Method
	(Dollars In Millions)		(Dollars In Millions)	
Financial Statement Line Item:				
Statements of Income				
Other income	\$113.5	\$ 115.1	\$341.8	\$ 345.3
Amortization of deferred policy acquisition costs and value of business acquired	\$33.5	\$ 21.7	\$144.0	\$ 107.3
Other operating expenses, net of reinsurance ceded	\$224.6	\$ 237.7	\$684.9	\$ 725.1

Accounting Pronouncements Recently Adopted

ASU No. 2014-09 - Revenue from Contracts with Customers (Topic 606). This Update provides for significant revisions to the recognition of revenue from contracts with customers across various industries. Under the new guidance, entities are required to apply a prescribed 5-step process to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The accounting for revenues associated with insurance products is not within the scope of this Update. The Update was originally effective for annual and interim periods beginning after December 15, 2016. However, in August 2015, the FASB issued ASU No. 2015-14 - Revenues from Contracts with Customers: Deferral of the Effective Date, to defer the effective date of ASU No. 2014-09 by one year to annual and interim periods beginning after December 15, 2017. The Company adopted this Update using the modified retrospective approach via a cumulative effect adjustment to retained earnings as of January 1, 2018. The amendments in the Update, along with clarifying updates issued subsequent to ASU 2014-09, impacted some of the Company's smaller lines of business, specifically revenues at the Company's affiliated broker dealers and insurance agency, and certain revenues associated with the Company's Asset Protection products. The lines of business to which the revised guidance applies are not

material to the Company's financial statements. In consideration of the amendments in this Update, the Company revised its recognition pattern for administrative fees associated with certain vehicle service and GAP products. Previously, these fees were recognized based on the work effort involved in satisfying the Company's contract obligations. The Company will recognize these fees on a claims occurrence basis in future periods. To reflect this change in accounting principle, the Company recorded a cumulative effect adjustment as of January 1, 2018 that resulted in a decrease in retained earnings of \$92.5 million. The Company also implemented minor changes to its accounting and disclosures with respect to the lines of business referenced above to ensure compliance with the revised guidance. See above for additional discussion.

ASU No. 2016-01 - Financial Instruments - Recognition and Measurement of Financial Assets and Financial Liabilities. The amendments in this Update address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. Most notably, the Update requires that equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) be measured at fair value with changes in fair value recognized in net income. The Update also introduces a single-step impairment model for equity investments without a readily determinable fair value. Additionally, the Update requires changes in instrument-specific credit risk for fair value option liabilities to be recorded in other comprehensive income. The amendments in this Update are effective for annual and interim periods beginning after December 15, 2017 and were applied on a modified retrospective basis. The Company recorded a cumulative-

Table of Contents

effect adjustment at the date of adoption, January 1, 2018, transferring unrealized gains and losses on available-for-sale equity securities to retained earnings from accumulated other comprehensive income. The impact of this adjustment, net of income tax, resulted in a \$10.6 million increase to retained earnings and a corresponding decrease to accumulated other comprehensive income, resulting in no net impact to consolidated shareowner's equity. The Company has updated its disclosures in Note 5, Investment Operations and Note 6, Fair Value of Financial Instruments in accordance with the ASU.

ASU No. 2016-15 - Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments. The amendments in this Update are intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. Specific transactions addressed in the new guidance include: Debt prepayment/extinguishment costs, contingent consideration payments, proceeds from the settlement of corporate-owned life insurance policies, and distributions received from equity method investments. The Update does not introduce any new accounting or financial reporting requirements, and is effective for annual and interim periods beginning after December 15, 2017 using the retrospective method. There was no financial impact.

ASU No. 2016-18 - Statement of Cash Flows (Topic 230): Restricted Cash (a consensus of the FASB Emerging Task Force). The amendments in this update provide guidance on the presentation of restricted cash or restricted cash equivalents in the statement of cash flows, thereby reducing diversity in practice related to the presentation of these amounts. The amendments require that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. The Update is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. There was no impact to the Company on adoption.

ASU No. 2017-01 - Business Combinations (Topic 805): Clarifying the Definition of a Business. The purpose of this update is to clarify the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The amendments in the Update provide a specific test by which an entity may determine whether an acquisition involves a set of assets or a business. The amendments in the Update are to be applied prospectively for periods beginning after December 15, 2017. The Company has reviewed the revised requirements, and does not anticipate that the changes will impact its policies or recent conclusions related to its acquisition activities.

ASU No. 2017-07 - Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The amendments in this update require entities to disaggregate the current-service-cost component from other components of net benefit cost and present it with other current compensation costs in the income statement. The other components of net benefit cost must be presented outside of income from operations if that subtotal is presented. In addition, the Update requires entities to disclose the income statement lines that contain the other components if they are not presented on appropriately described separate lines. The amendments in this update are effective for interim and annual periods beginning after December 15, 2017. As provided for in the ASU, the Company expects to apply the provisions of the statement retrospectively for components of net periodic pension costs and prospectively for capitalization of the service costs component of net periodic costs and net periodic postretirement benefits. The Update did not impact the Company's financial position, results of operations, or current disclosures.

Accounting Pronouncements Not Yet Adopted

ASU No. 2016-02 - Leases. The amendments in this Update address certain aspects of recognition, measurement, presentation, and disclosure of leases. The most significant change will relate to the accounting model used by lessees. The Update will require all leases with terms greater than 12 months to be recorded on the balance sheet in the form of a lease asset and liability. The lease asset and liability will be measured at the present value of the minimum lease payments less any upfront payments or fees. The amendments in the Update are effective for annual and interim

periods beginning after December 15, 2018 on a modified retrospective basis. The Company has completed an inventory of all leases in the organization. Based on our lease portfolio as of September 30, 2018, the Company expects to record a right of use asset and lease liability of approximately \$21 million on its consolidated condensed balance sheet in the period of adoption. However, the ultimate impact of adopting the ASU will depend on the Company's lease portfolio as of the adoption date.

ASU No. 2016-13 - Financial Instruments-Credit Losses: Measurement of Credit Losses on Financial Instruments. The amendments in this Update introduce a new current expected credit loss ("CECL") model for certain financial assets, including mortgage loans and reinsurance receivables. The new model will not apply to debt securities classified as available-for-sale. For assets within the scope of the new model, an entity will recognize as an allowance against earnings its estimate of the contractual cash flows not expected to be collected on day one of the asset's acquisition. The allowance may be reversed through earnings if a security recovers in value. This differs from the current impairment model, which requires recognition of credit losses when they have been incurred and recognizes a security's subsequent recovery in value in other comprehensive income. The Update also makes targeted changes to the current impairment model for available-for-sale debt securities, which comprise the majority of the Company's invested assets. Similar to the CECL model, credit loss impairments will be recorded in an allowance against earnings that may be reversed for subsequent recoveries in value. The amendments in this Update are effective for annual and interim periods beginning after December 15, 2019 on a modified retrospective basis. The Company is reviewing its policies and processes to ensure compliance with the requirements in this Update, upon adoption, and assessing the impact this standard will have on its operations and financial results.

ASU No. 2017-08 - Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities. The amendments in this Update require that premiums on callable debt securities be amortized to the first call date. This is a change from current guidance, under which premiums are amortized to the maturity date of the security. The amendments are effective for annual and interim periods beginning after December 15, 2018, and early adoption

Table of Contents

is permitted. Transition will be through a modified retrospective approach in which the cumulative effect of application is recorded to retained earnings at the beginning of the annual period in which an entity adopts the revised guidance. Based on our population of callable debt securities held as of September 30, 2018, the Company estimates it would record a reduction to retained earnings of approximately \$56.1 million as a result of adopting the ASU. However, the adoption impact will ultimately depend on the population of callable debt securities held as of the adoption date.

ASU No. 2017-12 - Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The amendments in this Update are designed to permit hedge accounting to be applied to a broader range of hedging strategies as well as to more closely align hedge accounting and risk management objectives. Specific provisions include requiring changes in the fair value of a hedging instrument be recorded in the same income statement line as the hedged item when it affects earnings. In addition, after a hedge has initially qualified as an effective hedge the Update permits the use of a qualitative hedge effectiveness test in subsequent periods. The amendments in this Update are effective for annual and interim periods beginning after December 15, 2018 and early adoption is permitted. The Company does not expect the adoption of this standard to have a material impact on its operations or financial results.

ASU No. 2018-12 - Financial Services - Insurance (Topic 944): Targeted Improvements to Accounting for Long-Duration Contracts. The amendments in this Update are designed to make improvements to the existing recognition, measurement, presentation, and disclosure requirements for certain long-duration contracts issued by an insurance company. The new amendments require insurance entities to provide a more current measure of the liability for future policy benefits for traditional and limited-payment contracts by regularly refining the liability for actual past experience and updated future assumptions. This differs from current requirements where assumptions are locked-in at contract issuance for these contract types. In addition, the updated liability will be discounted using an upper-medium grade (low-credit-risk) fixed income instrument yield that reflects the characteristics of the liability which differs from currently used rates based on the invested assets supporting the liability. In addition, the amendments introduce new requirements to assess market-based insurance contract options and guarantees for Market Risk Benefits and measure them at fair value. This Update also requires insurance entities to amortize deferred acquisition costs on a constant-level basis over the expected life of the contract. Finally this Update requires new disclosures including liability rollforwards and information about significant inputs, judgements, assumptions, and methods used in the measurement. The amendments in this Update are effective for annual and interim periods beginning after December 15, 2020 with early adoption permitted. The Company is currently reviewing its policies, processes, and applicable systems to determine the impact this standard will have on its operations and financial results.

### 3. SIGNIFICANT TRANSACTIONS

On May 1, 2018, The Lincoln National Life Insurance Company (“Lincoln Life”) completed its previously announced acquisition (the “Closing”) of Liberty Mutual Group Inc.’s (“Liberty Mutual”) Group Benefits Business and Individual Life and Annuity Business (the “Life Business”) through the acquisition of all of the issued and outstanding capital stock of Liberty Life Assurance Company of Boston (“Liberty”). In connection with the Closing and pursuant to the Master Transaction Agreement, dated January 18, 2018 (the “Master Transaction Agreement”), previously reported in our Current Report on Form 8-K filed on January 23, 2018, PLICO and Protective Life and Annuity Insurance Company (“PLAIC”), a wholly owned subsidiary of PLICO, entered into reinsurance agreements (the “Reinsurance Agreements”) and related ancillary documents (including administrative services agreements and transition services agreements) providing for the reinsurance and administration of the Life Business.

Pursuant to the Reinsurance Agreements, Liberty ceded to PLICO and PLAIC the insurance policies related to the Life Business on a 100% coinsurance basis. The aggregate ceding commission for the reinsurance of the Life Business was \$422.4 million, which is the purchase price. Other than cash received as part of the acquired Liberty investment portfolio as reflected in “amounts received from reinsurance transaction” in the Consolidated Condensed Statement of

Cash Flows and as reflected in the table below, this was a non-cash transaction.

All policies issued in states other than New York were ceded to PLICO under a reinsurance agreement between Liberty and PLICO, and all policies issued in New York were ceded to PLAIC under a reinsurance agreement between Liberty and PLAIC. The aggregate statutory reserves of Liberty ceded to PLICO and PLAIC as of the closing of the Transaction were approximately \$13.3 billion, which amount was based on initial estimates and is subject to adjustment following the Closing. Pursuant to the terms of the Reinsurance Agreements, each of PLICO and PLAIC are required to maintain assets in trust for the benefit of Liberty to secure their respective obligations to Liberty under the Reinsurance Agreements. The trust accounts were initially funded by each of PLICO and PLAIC principally with the investment assets that were received from Liberty. Additionally, PLICO and PLAIC have each agreed to provide, on behalf of Liberty, administration and policyholder servicing of the Life Business reinsured by it pursuant to administrative services agreements between Liberty and each of PLICO and PLAIC.

The terms of the Reinsurance Agreements resulted in an acquisition of the Life Business by the Company in accordance with Accounting Standards Codification (“ASC”) Topic 805, Business Combinations.

The following table details the purchase consideration and preliminary allocation of assets acquired and liabilities assumed from the Life Business reinsurance transaction as of the transaction date. These estimates remain preliminary and are subject to adjustment. While they are not expected to be materially different than those shown, any material adjustments to the estimates will be reflected, retroactively, as of the date of the acquisition.

Table of Contents

	Fair Value as of May 1, 2018 (Dollars In Thousands)
<b>ASSETS</b>	
Fixed maturities	\$ 12,588,512
Mortgage loans	435,405

Other policyholders' funds	41,954
Other liabilities	57,107
Total liabilities	13,667,001
NET ASSETS ACQUIRED	\$—

The following unaudited pro forma condensed consolidated results of operations assumes that the aforementioned transactions of the Life Business were completed as of January 1, 2017. The unaudited pro forma condensed results of operations are presented solely for information purposes and are not necessarily indicative of the consolidated condensed results of operations that might have been achieved had the transaction been completed as of the date indicated.

	Unaudited For The Three Months Ended September 30, 2018		Unaudited For The Nine Months Ended September 30, 2018	
	2017	2018	2017	2018
Revenue	\$ 1,344,806	\$ 1,397,739	\$ 4,078,285	\$ 4,231,177
Net income	\$ 110,100	\$ 118,547	\$ 311,851	\$ 347,113

The amount of revenue and income before income tax of the Life Business since the transaction date, May 1, 2018, included in the consolidated condensed statements of income for the three and nine months ended September 30, 2018 amounted to \$218.1 million and \$360.9 million and \$26.1 million and \$33.7 million, respectively. Also, included in the income before income tax for the nine months ended September 30, 2018, is approximately \$5.5 million of non-recurring transaction costs.

Table of Contents

Based on the balance recorded as of May 1, 2018, the expected amortization of VOBA for the next five years is as follows:

Years	Expected Amortization (Dollars In Thousands)
Remainder of 2018	\$ 5,265
2019	21,063
2020	19,950
2021	18,329
2022	16,611

#### 4. MONY CLOSED BLOCK OF BUSINESS

In 1998, MONY Life Insurance Company (“MONY”) converted from a mutual insurance company to a stock corporation (“demutualization”). In connection with its demutualization, an accounting mechanism known as a closed block (the “Closed Block”) was established for certain individuals’ participating policies in force as of the date of demutualization. Assets, liabilities, and earnings of the Closed Block are specifically identified to support its participating policyholders. The Company acquired the Closed Block in conjunction with the acquisition of MONY in 2013.

Assets allocated to the Closed Block inure solely to the benefit of each Closed Block’s policyholders and will not revert to the benefit of MONY or the Company. No reallocation, transfer, borrowing or lending of assets can be made between the Closed Block and other portions of MONY’s general account, any of MONY’s separate accounts or any affiliate of MONY without the approval of the Superintendent of The New York State Department of Financial Services (the “Superintendent”). Closed Block assets and liabilities are carried on the same basis as similar assets and liabilities held in the general account.

The excess of Closed Block liabilities over Closed Block assets (adjusted to exclude the impact of related amounts in AOCI) at the acquisition date of October 1, 2013, represented the estimated maximum future post-tax earnings from the Closed Block that would be recognized in income from continuing operations over the period the policies and contracts in the Closed Block remain in force. In connection with the acquisition of MONY, the Company developed an actuarial calculation of the expected timing of MONY’s Closed Block’s earnings as of October 1, 2013. Pursuant to the acquisition of the Company by Dai-ichi Life, this actuarial calculation of the expected timing of MONY’s Closed Block earnings was recalculated and reset as February 1, 2015, along with the establishment of a policyholder dividend obligation as of such date.

If the actual cumulative earnings from the Closed Block are greater than the expected cumulative earnings, only the expected earnings will be recognized in the Company’s net income. Actual cumulative earnings in excess of expected cumulative earnings at any point in time are recorded as a policyholder dividend obligation because they will ultimately be paid to Closed Block policyholders as an additional policyholder dividend unless offset by future performance that is less favorable than originally expected. If a policyholder dividend obligation has been previously established and the actual Closed Block earnings in a subsequent period are less than the expected earnings for that period, the policyholder dividend obligation would be reduced (but not below zero). If, over the period the policies and contracts in the Closed Block remain in force, the actual cumulative earnings of the Closed Block are less than the expected cumulative earnings, only actual earnings would be recognized in income from continuing operations. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from assets outside the Closed Block.

Many expenses related to Closed Block operations, including amortization of VOBA, are charged to operations outside of the Closed Block; accordingly, net revenues of the Closed Block do not represent the actual profitability of the Closed Block operations. Operating costs and expenses outside of the Closed Block are, therefore, disproportionate to the business outside of the Closed Block.

Table of Contents

Summarized financial information for the Closed Block as of September 30, 2018, and December 31, 2017, is as follows:

	As of	
	September 30, 2018	December 31, 2017

	\$39,783,880	\$ 718,229	\$(682,181)	\$39,819,928	\$ (28)

(1) These amounts are included in the gross unrealized gains and gross unrealized losses columns above.

Table of Contents

The fair values of the Company's investments classified as trading are as follows:

	As of September 30, 2018	As of December 31, 2017
	(Dollars In Thousands)	
Fixed maturities:		
Residential mortgage-backed securities	\$254,037	\$259,694
Commercial mortgage-backed securities	135,403	146,804
Other asset-backed securities	111,770	138,097
U.S. government-related securities	58,081	27,234
Other government-related securities	43,030	63,925
States, municipals, and political subdivisions	296,618	326,925
Corporate securities	1,569,652	1,698,183
Redeemable preferred stock	3,165	3,327
	2,471,756	2,664,189
Equity securities	3,801	5,244
Short-term investments	55,865	56,261
	\$2,531,422	\$2,725,694

The amortized cost and fair value of available-for-sale and held-to-maturity fixed maturities as of September 30, 2018, by expected maturity, are shown below. Expected maturities of securities without a single maturity date are allocated based on estimated rates of prepayment that may differ from actual rates of prepayment.

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(Dollars In Thousands)			
Due in one year or less	\$957,984	\$955,779	\$—	\$—
Due after one year through five years	9,269,777	9,096,671	—	—
Due after five years through ten years	9,259,344	9,001,644	—	—
Due after ten years	32,596,570	30,855,614	2,653,605	2,577,841
	\$52,083,675	\$49,909,708	\$2,653,605	\$2,577,841

The charts below summarize the Company's other-than-temporary impairments of investments. All of the impairments were related to fixed maturities.

	For The Three Months Ended September 30, 2018	For The Nine Months Ended September 30, 2018
	Fixed Maturities (Dollars In Thousands)	
Other-than-temporary impairments	\$ (14 )	\$ (715 )
Non-credit impairment losses recorded in other comprehensive income	—	(2,949 )
Net impairment losses recognized in earnings	\$ (14 )	\$ (3,664 )

Table of Contents

	For The Three Months Ended September 30, 2017			For The Nine Months Ended September 30, 2017

	\$29,871,063	\$(991,547)	\$13,226,886	\$(1,379,164)	\$43,097,949	\$(2,370,711)

RMBS and CMBS had gross unrealized losses greater than twelve months of \$25.1 million and \$42.0 million, respectively, as of September 30, 2018. Factors such as the credit enhancement within the deal structure, the average life of the securities, and the performance of the underlying collateral support the recoverability of these investments.

Table of Contents

The other asset-backed securities had a gross unrealized loss greater than twelve months of \$7.3 million as of September 30, 2018. This category predominately includes student loan backed auction rate securities whose underlying collateral is at least 97% guaranteed by the Federal Family Education Loan Program (“FFELP”). At this time, the Company has no reason to believe that the U.S. Department of Education would not honor the FFELP guarantee, if it were necessary.

The U.S. government-related securities and the other government-related securities had gross unrealized losses greater than twelve months of \$58.7 million and \$14.2 million as of September 30, 2018, respectively. These declines were related to changes in interest rates.

The states, municipalities, and political subdivisions category had gross unrealized losses greater than twelve months of \$88.9 million as of September 30, 2018. The aggregate decline in market value of these securities was deemed temporary due to positive factors supporting the recoverability of the respective investments. Positive factors considered include credit ratings, the financial health of the issuer, the continued access of the issuer to capital markets, and other pertinent information.

The corporate securities category had gross unrealized losses greater than twelve months of \$1.1 billion as of September 30, 2018. The aggregate decline in market value of these securities was deemed temporary due to positive factors supporting the recoverability of the respective investments. Positive factors considered include credit ratings, the financial health of the issuer, the continued access of the issuer to capital markets, and other pertinent information.

As of September 30, 2018, the Company had a total of 4,367 positions that were in an unrealized loss position, but the Company does not consider these unrealized loss positions to be other-than-temporary. This is based on the aggregate factors discussed previously and because the Company has the ability and intent to hold these investments until the fair values recover, and the Company does not intend to sell or expect to be required to sell the securities before recovering the Company’s amortized cost of the securities.

The following table includes the gross unrealized losses and fair value of the Company’s investments that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position as of December 31, 2017:

	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
	(Dollars In Thousands)

Other asset-backed securities	86,506	(322)	134,316	(5,441)	220,822	(5,763)
U.S. government-related securities	94,110	(688)	1,072,232	(31,489)	1,166,342	(32,177)
Other government-related securities	24,830	(169)	115,294	(4,778)	140,124	(4,947)
States, municipalities, and political subdivisions	170,268	(1,738)	1,027,747	(43,874)	1,198,015	(45,612)
Corporate securities	5,054,316	(55,795)	10,962,689	(472,394)	16,017,005	(528,189)
Redeemable preferred stock	22,048	(1,120)	23,197	(2,383)	45,245	(3,503)
Equities	86,586	(1,401)	91,195	(7,370)	177,781	(8,771)
	\$7,062,734	\$(79,496)	\$14,639,347	\$(602,685)	\$21,702,081	\$(682,181)

RMBS and CMBS had gross unrealized losses greater than twelve months of \$13.4 million and \$21.6 million, respectively, as of December 31, 2017. Factors such as the credit enhancement within the deal structure, the average life of the securities, and the performance of the underlying collateral support the recoverability of these investments. The other asset-backed securities had a gross unrealized loss greater than twelve months of \$5.4 million as of December 31, 2017. This category predominately includes student loan backed auction rate securities whose underlying collateral is at least 97% guaranteed by the FFELP. At this time, the Company has no reason to believe that the U.S. Department of Education would not honor the FFELP guarantee, if it were necessary.

The U.S. government-related securities and other government-related securities had gross unrealized losses greater than twelve months of \$31.5 million and \$4.8 million as of December 31, 2017, respectively. These declines were

related to changes in interest rates.

The states, municipalities, and political subdivisions category had gross unrealized losses greater than twelve months of \$43.9 million as of December 31, 2017. These declines were related to changes in interest rates.

The corporate securities category had gross unrealized losses greater than twelve months of \$472.4 million as of December 31, 2017. The aggregate decline in market value of these securities was deemed temporary due to positive factors supporting the recoverability of the respective investments. Positive factors considered include credit ratings, the financial health of the issuer, the continued access of the issuer to capital markets, and other pertinent information.

Table of Contents

As of September 30, 2018, the Company had securities in its available-for-sale portfolio which were rated below investment grade of \$1.7 billion and had an amortized cost of \$1.7 billion. In addition, included in the Company's trading portfolio, the Company held \$175.6 million of securities which were rated below investment grade. Approximately \$263.1 million of the available-for-sale and trading securities that were below investment grade were not publicly traded.

The change in unrealized gains (losses), net of income tax, on fixed maturities, classified as available-for-sale is summarized as follows:

	For The Three Months Ended September 30, 2018	2017	For The Nine Months Ended September 30, 2018	2017
--	--	------	---	------

(Dollars In Thousands)

Fixed maturities \$(229,912) \$168,062 \$(1,735,210) \$868,767

The amortized cost and fair value of the Company's investments classified as held-to-maturity as of September 30, 2018 and December 31, 2017, are as follows:

As of September 30, 2018	Amortized Cost	Gross Unrecognized Holding Gains	Gross Unrecognized Holding Losses	Fair Value	Total OTTI Recognized in OCI
--------------------------	-------------------	---	--	---------------	------------------------------------

(Dollars In Thousands)

Fixed maturities:  
Securities issued by affiliates:

Red Mountain, LLC	\$736,605	\$ —	\$ (77,492 )	\$659,113	\$ —
Steel City, LLC	1,917,000	1,728	—	1,918,728	—
	\$2,653,605	\$ 1,728	\$ (77,492 )	\$2,577,841	\$ —

As of December 31, 2017	Amortized Cost	Gross Unrecognized Holding Gains	Gross Unrecognized Holding Losses	Fair Value	Total OTTI Recognized in OCI
-------------------------	-------------------	---	--	---------------	------------------------------------

(Dollars In Thousands)

Fixed maturities:  
Securities issued by affiliates:

Red Mountain, LLC	\$704,904	\$ —	\$ (19,163 )	\$685,741	\$ —
Steel City, LLC	2,014,000	76,586	—	2,090,586	—
	\$2,718,904	\$ 76,586	\$ (19,163 )	\$2,776,327	\$ —

During the three and nine months ended September 30, 2018 and 2017, the Company recorded no other-than-temporary impairments on held-to-maturity securities.

The Company's held-to-maturity securities had \$1.7 million of gross unrecognized holding gains and \$77.5 million of gross unrecognized holding losses by maturity as of September 30, 2018. The Company does not consider these unrecognized holding losses to be other-than-temporary based on certain positive factors associated with the securities which include credit ratings of the guarantor, financial health of the issuer and guarantor, continued access of the issuer to capital markets and other pertinent information. These held-to-maturity securities are issued by affiliates of the Company which are considered variable interest entities ("VIEs"). The Company is not the primary beneficiary of these entities and thus the securities are not eliminated in consolidation. These securities are collateralized by non-recourse funding obligations issued by captive insurance companies that are affiliates of the Company.

The Company's held-to-maturity securities had \$76.6 million of gross unrecognized holding gains and \$19.2 million of gross unrecognized holding losses by maturity as of December 31, 2017. The Company does not consider these unrecognized holding losses to be other-than-temporary based on certain positive factors associated with the securities

which include credit ratings of the guarantor, financial health of the issuer and guarantor, continued access of the issuer to capital markets and other pertinent information.

Table of Contents

## Variable Interest Entities

The Company holds certain investments in entities in which its ownership interests could possibly be considered variable interests under Topic 810 of the Financial Accounting Standards Board (“FASB”) Accounting Standard Codification (“ASC” or “Codification”) (excluding debt and equity securities held as trading, available for sale, or held to maturity). The Company reviews the characteristics of each of these applicable entities and compares those characteristics to applicable criteria to determine whether the entity is a VIE. If the entity is determined to be a VIE, the Company then performs a detailed review to determine whether the interest would be considered a variable interest under the guidance. The Company then performs a qualitative review of all variable interests with the entity and determines whether the Company is the primary beneficiary. ASC 810 provides that an entity is the primary beneficiary of a VIE if the entity has 1) the power to direct the activities of the VIE that most significantly impact the VIE’s economic performance, and 2) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE.

Based on this analysis, the Company had an interest in two subsidiaries as of September 30, 2018 and December 31, 2017, Red Mountain, LLC (“Red Mountain”) and Steel City, LLC (“Steel City”), that were determined to be VIEs. The activity most significant to Red Mountain is the issuance of a note in connection with a financing transaction involving Golden Gate V Vermont Captive Insurance Company (“Golden Gate V”) in which Golden Gate V issued non-recourse funding obligations to Red Mountain and Red Mountain issued a note (the “Red Mountain Note”) to Golden Gate V. For details of this transaction, see Note 11, Debt and Other Obligations. The Company had the power, via its 100% ownership through an affiliate, to direct the activities of the VIE, but did not have the obligation to absorb losses related to the primary risks or sources of variability to the VIE. The variability of loss would be borne primarily by the third party in its function as provider of credit enhancement on the Red Mountain Note. Accordingly, it was determined that the Company is not the primary beneficiary of the VIE. The Company’s risk of loss related to the VIE is limited to its investment, through an affiliate, of \$10,000. Additionally, the Company has guaranteed Red Mountain’s payment obligation for the credit enhancement fee to the unrelated third party provider. As of September 30, 2018, no payments have been made or required related to this guarantee.

Steel City, a wholly owned subsidiary of the Company, entered into a financing agreement on January 15, 2016 involving Golden Gate Captive Insurance Company (“Golden Gate”), in which Golden Gate issued non-recourse funding obligations to Steel City and Steel City issued three notes (the “Steel City Notes”) to Golden Gate. Credit enhancement on the Steel City Notes is provided by unrelated third parties. For details of the financing transaction, see Note 11, Debt and Other Obligations. The activity most significant to Steel City is the issuance of the Steel City Notes. The Company had the power, via its 100% ownership, to direct the activities of the VIE, but did not have the obligation to absorb losses related to the primary risks or sources of variability to the VIE. The variability of loss would be borne primarily by the third parties in their function as providers of credit enhancement on the Steel City Notes. Accordingly, it was determined that the Company is not the primary beneficiary of the VIE. The Company’s risk of loss related to the VIE is limited to its investment of \$10,000. Additionally, the Company has guaranteed Steel City’s payment obligation for the credit enhancement fee to the unrelated third party providers. As of September 30, 2018, no payments have been made or required related to this guarantee.

## 6. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company determined the fair value of its financial instruments based on the fair value hierarchy established in FASB guidance referenced in the Fair Value Measurements and Disclosures Topic which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The Company has adopted the provisions from the FASB guidance that is referenced in the Fair Value Measurements and Disclosures Topic for non-financial assets and liabilities (such as property and equipment, goodwill, and other intangible assets) that are required to be measured at fair value on a periodic basis. The effect on the Company’s periodic fair value measurements for non-financial assets and liabilities was not material.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three level hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level

input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value on the consolidated balance sheets are categorized as follows:

•Level 1: Unadjusted quoted prices for identical assets or liabilities in an active market.

•Level 2: Quoted prices in markets that are not active or significant inputs that are observable either directly or indirectly. Level 2 inputs include the following:

a. Quoted prices for similar assets or liabilities in active markets;

b. Quoted prices for identical or similar assets or liabilities in non-active markets;

c. Inputs other than quoted market prices that are observable; and

d. Inputs that are derived principally from or corroborated by observable market data through correlation or other means.

Level 3: Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. They reflect management's own estimates about the assumptions a market participant would use in pricing the asset or liability.

Table of Contents

The following table presents the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis as of September 30, 2018:

## Determination of fair values

The valuation methodologies used to determine the fair values of assets and liabilities reflect market participant assumptions and are based on the application of the fair value hierarchy that prioritizes observable market inputs over unobservable inputs. The Company determines the fair values of certain financial assets and financial liabilities based on quoted market prices, where available. The Company also determines certain fair values based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's credit standing, liquidity, and where appropriate, risk margins on unobservable parameters. The following is a discussion of the methodologies used to determine fair values for the financial instruments as listed in the above table.

The fair value of fixed maturity, short-term, and equity securities is determined by management after considering one of three primary sources of information: third party pricing services, non-binding independent broker quotations, or pricing matrices. Security pricing is applied using a "waterfall" approach whereby publicly available prices are first sought from third party pricing services, the remaining unpriced securities are submitted to independent brokers for non-binding prices, or lastly, securities are priced using a pricing matrix. Typical inputs used by these three pricing methods include, but are not limited to: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data including market research publications. Third party pricing services price approximately 93.3% of the Company's available-for-sale and trading fixed maturity securities. Based on the typical trading volumes and the lack of quoted market prices for available-for-sale and trading fixed maturities, third party pricing services derive the majority of security prices from observable market inputs such as recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information outlined above. If there are no recent reported trades, the third party pricing services and brokers may use matrix or model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Certain securities are priced via independent non-binding broker quotations, which are considered to have no significant unobservable inputs. When using non-binding independent broker quotations, the Company obtains one quote per security, typically from the broker from which we purchased the security. A pricing matrix is used to price securities for which the Company is unable to obtain or effectively rely on either a price from a third party pricing service or an independent broker quotation.

The pricing matrix used by the Company begins with current spread levels to determine the market price for the security. The credit spreads, assigned by brokers, incorporate the issuer's credit rating, liquidity discounts, weighted average of contracted cash flows, risk premium, if warranted, due to the issuer's industry, and the security's time to maturity. The Company uses credit ratings provided by nationally recognized rating agencies.

For securities that are priced via non-binding independent broker quotations, the Company assesses whether prices received from independent brokers represent a reasonable estimate of fair value through an analysis using internal and external cash flow models developed based on spreads and, when available, market indices. The Company uses a market-based cash flow analysis to validate the reasonableness of prices received from independent brokers. These analytics, which are updated daily, incorporate various metrics (yield curves, credit spreads, prepayment rates, etc.) to determine the valuation of such holdings. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon the analytics, the price received from the independent broker is adjusted accordingly. The Company did not adjust any quotes or prices received from brokers during the nine months ended September 30, 2018.

The Company has analyzed the third party pricing services' valuation methodologies and related inputs and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs that is in accordance with the Fair Value Measurements and Disclosures Topic of the ASC. Based on this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3. Most prices provided by third party pricing services are classified into Level 2 because the significant inputs used in pricing the securities are market observable and the observable inputs are corroborated by the Company. Since the matrix pricing of certain debt securities includes significant non-observable inputs, they are classified as Level 3.

#### Asset-Backed Securities

This category mainly consists of residential mortgage-backed securities, commercial mortgage-backed securities, and other asset-backed securities (collectively referred to as asset-backed securities or “ABS”). As of September 30, 2018, the Company held \$7.1 billion of ABS classified as Level 2. These securities are priced from information provided by a third party pricing service and independent broker quotes. The third party pricing services and brokers mainly value securities using both a market and income approach to valuation. As part of this valuation process they consider the following characteristics of the item being measured to be relevant inputs: 1) weighted-average coupon rate, 2) weighted-average years to maturity, 3) types of underlying assets, 4) weighted-average coupon rate of the underlying assets, 5) weighted-average years to maturity of the underlying assets, 6) seniority level of the tranches owned, and 7) credit ratings of the securities.

After reviewing these characteristics of the ABS, the third party pricing service and brokers use certain inputs to determine the value of the security. For ABS classified as Level 2, the valuation would consist of predominantly market observable inputs such as, but not limited to: 1) monthly principal and interest payments on the underlying assets, 2) average life of the security, 3) prepayment speeds, 4) credit spreads, 5) treasury and swap yield curves, and 6) discount margin. The Company reviews the methodologies and valuation techniques (including the ability to observe inputs) in assessing the information received from external pricing services and in consideration of the fair value presentation.

As of September 30, 2018, the Company held \$549.7 million of Level 3 ABS, which included \$521.7 million of other asset-backed securities classified as available-for-sale and \$28.0 million of other asset-backed securities classified as trading. These securities are predominantly ARS whose underlying collateral is at least 97% guaranteed by the FFELP. The Company prices its ARS using an income approach valuation model. As part of the valuation process the Company reviews the following characteristics

## Table of Contents

of the ARS in determining the relevant inputs: 1) weighted-average coupon rate, 2) weighted-average years to maturity, 3) types of underlying assets, 4) weighted-average coupon rate of the underlying assets, 5) weighted-average years to maturity of the underlying assets, 6) seniority level of the tranches owned, 7) credit ratings of the securities, 8) liquidity premium, and 9) paydown rate. In periods where market activity increases and there are transactions at a price that is not the result of a distressed or forced sale we consider those prices as part of our valuation. If the market activity during a period is solely the result of the issuer redeeming positions we consider those transactions in our valuation, but still consider them to be level three measurements due to the nature of the transaction.

Corporate Securities, U.S. Government-Related Securities, States, Municipals, and Political Subdivisions, and Other Government-Related Securities

As of September 30, 2018, the Company classified approximately \$43.1 billion of corporate securities, U.S. government-related securities, states, municipals, and political subdivisions, and other government-related securities as Level 2. The fair value of the Level 2 securities is predominantly priced by broker quotes and a third party pricing service. The Company has reviewed the valuation techniques of the brokers and third party pricing service and has determined that such techniques used Level 2 market observable inputs. The following characteristics of the securities are considered to be the primary relevant inputs to the valuation: 1) weighted average coupon rate, 2) weighted-average years to maturity, 3) seniority, and 4) credit ratings. The Company reviews the methodologies and valuation techniques (including the ability to observe inputs) in assessing the information received from external pricing services and in consideration of the fair value presentation.

The brokers and third party pricing service utilize valuation models that consist of a hybrid income and market approach to valuation. The pricing models utilize the following inputs: 1) principal and interest payments, 2) treasury yield curve, 3) credit spreads from new issue and secondary trading markets, 4) dealer quotes with adjustments for issues with early redemption features, 5) liquidity premiums present on private placements, and 6) discount margins from dealers in the new issue market.

As of September 30, 2018, the Company classified approximately \$633.5 million of securities as Level 3 valuations. Level 3 securities primarily represent investments in illiquid bonds for which no price is readily available. To determine a price, the Company uses a discounted cash flow model with both observable and unobservable inputs. These inputs are entered into an industry standard pricing model to determine the final price of the security. These inputs include: 1) principal and interest payments, 2) coupon rate, 3) sector and issuer level spread over treasury, 4) underlying collateral, 5) credit ratings, 6) maturity, 7) embedded options, 8) recent new issuance, 9) comparative bond analysis, and 10) an illiquidity premium.

Equities

As of September 30, 2018, the Company held approximately \$64.3 million of equity securities classified as Level 2 and Level 3. Of this total, \$63.4 million represents Federal Home Loan Bank (“FHLB”) stock. The Company believes that the cost of the FHLB stock approximates fair value.

Other Long-term Investments and Other Liabilities

Other long-term investments and other liabilities consist entirely of free-standing and embedded derivative financial instruments. Refer to Note 7, Derivative Financial Instruments for additional information related to derivatives. Derivative financial instruments are valued using exchange prices, independent broker quotations, or pricing valuation models, which utilize market data inputs. Excluding embedded derivatives, as of September 30, 2018, 100% of derivatives based upon notional values were priced using exchange prices or independent broker quotations. Inputs used to value derivatives include, but are not limited to, interest swap rates, credit spreads, interest rate and equity market volatility indices, equity index levels, and treasury rates. The Company performs monthly analysis on derivative valuations that includes both quantitative and qualitative analyses.

Derivative instruments classified as Level 1 generally include futures and options, which are traded on active exchange markets.

Derivative instruments classified as Level 2 primarily include swaps, options, and swaptions, which are traded over-the-counter. Level 2 also includes certain centrally cleared derivatives. These derivative valuations are determined using independent broker quotations, which are corroborated with observable market inputs.

Derivative instruments classified as Level 3 were embedded derivatives and include at least one significant non-observable input. A derivative instrument containing Level 1 and Level 2 inputs will be classified as a Level 3 financial instrument in its entirety if it has at least one significant Level 3 input.

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instruments may not be classified within the same fair value hierarchy level as the associated assets and liabilities. Therefore, the changes in fair value on derivatives reported in Level 3 may not reflect the offsetting impact of the changes in fair value of the associated assets and liabilities.

The embedded derivatives are carried at fair value in "other long-term investments" and "other liabilities" on the Company's consolidated condensed balance sheet. The changes in fair value are recorded in earnings as "Realized investment gains (losses) - Derivative financial instruments". Refer to Note 7, Derivative Financial Instruments for more information related to each embedded derivatives gains and losses.

The fair value of the guaranteed living withdrawal benefits ("GLWB") embedded derivative is derived through the income method of valuation using a valuation model that projects future cash flows using multiple risk neutral stochastic equity scenarios and policyholder behavior assumptions. The risk neutral scenarios are generated using the current swap curve and projected equity

Table of Contents

volatilities and correlations. The projected equity volatilities are based on a blend of historical volatility and near-term equity market implied volatilities. The equity correlations are based on historical price observations. For policyholder behavior assumptions, expected lapse and utilization assumptions are used and updated for actual experience, as necessary. The Company assumes age-based mortality from the Ruark 2015 ALB table with attained age factors varying from 91.1% - 106.6%. The present value of the cash flows is determined using the discount rate curve, which is based upon LIBOR plus a credit spread (to represent the Company's non-performance risk). As a result of using significant unobservable inputs, the GLWB embedded derivative is categorized as Level 3. Policyholder assumptions are reviewed on an annual basis.

The balance of the FIA embedded derivative is impacted by policyholder cash flows associated with the FIA product that are allocated to the embedded derivative in addition to changes in the fair value of the embedded derivative during the reporting period. The fair value of the FIA embedded derivative is derived through the income method of valuation using a valuation model that projects future cash flows using current index values and volatility, the hedge budget used to price the product, and policyholder assumptions (both elective and non-elective). For policyholder behavior assumptions, expected lapse and withdrawal assumptions are used and updated for actual experience, as necessary. The Company assumes age-based mortality from the 2015 Ruark ALB mortality table modified with company experience, with attained age factors varying from 87% - 100%. The present value of the cash flows is determined using the discount rate curve, which is based upon LIBOR up to one year and constant maturity treasury rates plus a credit spread (to represent the Company's non-performance risk) thereafter. Policyholder assumptions are reviewed on an annual basis. As a result of using significant unobservable inputs, the FIA embedded derivative is categorized as Level 3.

The balance of the indexed universal life ("IUL") embedded derivative is impacted by policyholder cash flows associated with the IUL product that are allocated to the embedded derivative in addition to changes in the fair value of the embedded derivative during the reporting period. The fair value of the IUL embedded derivative is derived through the income method of valuation using a valuation model that projects future cash flows using current index values and volatility, the hedge budget used to price the product, and policyholder assumptions (both elective and non-elective). For policyholder behavior assumptions, expected lapse and withdrawal assumptions are used and updated for actual experience, as necessary. The Company assumes age-based mortality from the SOA 2015 VBT Primary Tables modified with company experience, with attained age factors varying from 37% - 577%. The present value of the cash flows is determined using the discount rate curve, which is based upon LIBOR up to one year and constant maturity treasury rates plus a credit spread (to represent the Company's non-performance risk) thereafter. Policyholder assumptions are reviewed on an annual basis. As a result of using significant unobservable inputs, the IUL embedded derivative is categorized as Level 3.

The Company has assumed and ceded certain blocks of policies under modified coinsurance agreements in which the investment results of the underlying portfolios inure directly to the reinsurers. As a result, these agreements contain embedded derivatives that are reported at fair value. Changes in their fair value are reported in earnings. The investments supporting these agreements are designated as "trading securities"; therefore changes in their fair value are also reported in earnings. As of September 30, 2018, the fair value of the embedded derivative is based upon the relationship between the statutory policy liabilities (net of policy loans) of \$2.3 billion and the statutory unrealized gain (loss) of the securities of \$60.0 million. As a result, changes in the fair value of the embedded derivatives are largely offset by the changes in fair value of the related investments and each are reported in earnings. The fair value of the embedded derivative is considered a Level 3 valuation due to the unobservable nature of the policy liabilities.

**Annuity Account Balances**

The Company records a certain legacy block of FIA reserves at fair value. Based on the characteristics of these reserves, the Company believes that the fund value approximates fair value. The fair value measurement of these reserves is considered a Level 3 valuation due to the unobservable nature of the fund values. The Level 3 fair value as of September 30, 2018 is \$78.5 million.

**Separate Accounts**

Separate account assets are invested in open-ended mutual funds and are included in Level 1.

Table of Contents

## Valuation of Level 3 Financial Instruments

The following table presents the valuation method for material financial instruments included in Level 3, as well as the unobservable inputs used in the valuation of those financial instruments:

	Fair Value As of September 30, 2018 (Dollars In Thousands)	Valuation Technique	Unobservable Input	Range (Weighted Average)
<b>Assets:</b>				
Other asset-backed securities	\$ 502,020	Liquidation	Liquidation value	\$90 - \$97 (\$94.92)
		Discounted cash flow	Liquidity premium	0.0% - 1.40% (0.62%)
			Paydown rate	11.09% - 13.15% (12.38%)
Corporate securities	621,392	Discounted cash flow	Spread over treasury	0.90% - 4.23% (1.51%)
<b>Liabilities:<sup>(1)</sup></b>				
Embedded derivatives - GLWB <sup>(2)</sup>	\$ 37,794	Actuarial cash flow model	Mortality	87% to 100% of Ruark 2015 ALB table
			Lapse	Ruark Predictive Model 99%. 10% of policies have a one-time over-utilization of 400%
			Utilization	
			Nonperformance risk	0.13% - 0.88%
Embedded derivative - FIA	256,912	Actuarial cash flow model	Expenses	\$145 per policy
			Withdrawal rate	1.5% prior to age 70, 100% of the RMD for ages 70+
			Mortality	1994 MGDB table with company experience
			Lapse	1.0% - 30.0%, depending on duration/surrender charge period
			Nonperformance risk	0.13% - 0.88%
Embedded derivative - IUL	95,739	Actuarial cash flow model	Mortality	37% - 577% of 2015 VBT Primary Tables
			Lapse	0.5% - 10.0%, depending on duration/distribution channel and smoking class
			Nonperformance risk	0.13% - 0.88%

(1) Excludes modified coinsurance arrangements.

(2) The fair value for the GLWB embedded derivative is presented as a net liability.

The chart above excludes Level 3 financial instruments that are valued using broker quotes and for which book value approximates fair value.

The Company has considered all reasonably available quantitative inputs as of September 30, 2018, but the valuation techniques and inputs used by some brokers in pricing certain financial instruments are not shared with the Company. This resulted in \$60.5 million of financial instruments being classified as Level 3 as of September 30, 2018. Of the \$60.5 million, \$47.7 million are other asset-backed securities, \$12.1 million are corporate securities, and \$0.7 million are equity securities.

In certain cases, the Company has determined that book value materially approximates fair value. As of September 30, 2018, the Company held \$63.6 million of financial instruments where book value approximates fair value which was predominantly FHLB stock.

Table of Contents

The following table presents the valuation method for material financial instruments included in Level 3, as well as the unobservable inputs used in the valuation of those financial instruments:

	Fair Value As of December 31, 2017 (Dollars In Thousands)	Valuation Technique	Unobservable Input	Range (Weighted Average)
<b>Assets:</b>				
Other asset-backed securities	\$ 504,228	Liquidation	Liquidation value	\$90 - \$97 (\$94.91)
		Discounted Cash Flow	Liquidity premium	0.06% - 1.17% (0.75%)
Corporate securities	617,770	Discounted cash flow	Paydown rate Spread over treasury	11.31% - 11.97% (11.54%) 0.81% - 3.95% (1.06%)
<b>Liabilities:<sup>(1)</sup></b>				
Embedded derivatives - GLWB <sup>(2)</sup>	\$ 111,760	Actuarial cash flow model	Mortality	91.1% to 106.6% of Ruark 2015 ALB table
			Lapse	1.0% - 30.0%, depending on product/duration/funded status of guarantee
			Utilization	99%. 10% of policies have a one-time over-utilization of 400%
			Nonperformance risk	0.11% - 0.79%
Embedded derivative - FIA	218,676	Actuarial cash flow model	Expenses	\$146 per policy
			Withdrawal rate	1.5% prior to age 70, 100% of the RMD for ages 70+
			Mortality	1994 MGDB table with company experience
			Lapse	1.0% - 30.0%, depending on duration/surrender charge period
			Nonperformance risk	0.11% - 0.79%
Embedded derivative - IUL	80,212	Actuarial cash flow model	Mortality	34% - 152% of 2015 VBT Primary Tables
			Lapse	0.5% - 10.0%, depending on duration/distribution channel and smoking class
			Nonperformance risk	0.11% - 0.79%

(1) Excludes modified coinsurance arrangements.

(2) The fair value for the GLWB embedded derivative is presented as a net liability.

The chart above excludes Level 3 financial instruments that are valued using broker quotes and for which book value approximates fair value.

The Company had considered all reasonably available quantitative inputs as of December 31, 2017, but the valuation techniques and inputs used by some brokers in pricing certain financial instruments are not shared with the Company. This resulted in \$50.4 million of financial instruments being classified as Level 3 as of December 31, 2017. Of the \$50.4 million, \$35.4 million are other asset-backed securities, \$14.6 million are corporate securities, and \$0.4 million are equity securities.

In certain cases the Company has determined that book value materially approximates fair value. As of December 31, 2017, the Company held \$65.7 million of financial instruments where book value approximates fair value which was predominantly FHLB stock.

The asset-backed securities classified as Level 3 are predominantly ARS. A change in the paydown rate (the projected annual rate of principal reduction) of the ARS can significantly impact the fair value of these securities. A decrease in the paydown rate would increase the projected weighted average life of the ARS and increase the sensitivity of the ARS' fair value to changes in interest rates. An increase in the liquidity premium would result in a decrease in the fair value of the securities, while a decrease in the liquidity premium would increase the fair value of these securities. The liquidation values for these securities are sensitive to the issuer's available cash flows and ability to redeem the securities, as well as the current holders' willingness to liquidate at the specified price.

Table of Contents

The fair value of corporate bonds classified as Level 3 is sensitive to changes in the interest rate spread over the corresponding U.S. Treasury rate. This spread represents a risk premium that is impacted by company-specific and market factors. An increase in the spread can be caused by a perceived increase in credit risk of a specific issuer and/or an increase in the overall market risk premium associated with similar securities. The fair values of corporate bonds are sensitive to changes in spread. When holding the treasury rate constant, the fair value of corporate bonds increases when spreads decrease, and decreases when spreads increase.

The fair value of the GLWB embedded derivative is sensitive to changes in the discount rate which includes the Company's nonperformance risk, volatility, lapse, and mortality assumptions. The volatility assumption is an observable input as it is based on market inputs. The Company's nonperformance risk, lapse, and mortality are unobservable. An increase in the three unobservable assumptions would result in a decrease in the fair value of the liability and conversely, if there is a decrease in the assumptions the fair value would increase. The fair value is also dependent on the assumed policyholder utilization of the GLWB where an increase in assumed utilization would result in an increase in the fair value of the liability and conversely, if there is a decrease in the assumption, the fair value would decrease.

The fair value of the FIA embedded derivative is predominantly impacted by observable inputs such as discount rates and equity returns. However, the fair value of the FIA embedded derivative is sensitive to non-performance risk, which is unobservable. The value of the liability increases with decreases in the discount rate and non-performance risk and decreases with increases in the discount rate and non-performance risk. The value of the liability increases with increases in equity returns and the liability decreases with a decrease in equity returns.

The fair value of the IUL embedded derivative is predominantly impacted by observable inputs such as discount rates and equity returns. However, the fair value of the IUL embedded derivative is sensitive to non-performance risk, which is unobservable. The value of the liability increases with decreases in the discount rate and non-performance risk and decreases with increases in the discount rate and non-performance risk. The value of the liability increases with increases in equity returns and the liability decreases with a decrease in equity returns.

Table of Contents

The following table presents a reconciliation of the beginning and ending balances for fair value measurements for the three months ended September 30, 2018, for which the Company has used significant unobservable inputs (Level 3):

	Beginning Balance	Total Realized and Unrealized Gains	Total Realized and Unrealized Losses	Included in Other Comprehensive Income	Included in Other Comprehensive Income	Purchases	Sales	Issuances	Settlements	Transfers into/out of Level 3	Other	Ending Balance

(1) Represents certain freestanding and embedded derivatives.

(2) Represents liabilities related to fixed indexed annuities.

For the three months ended September 30, 2018, there were \$19.9 million securities transferred into Level 3.

For the three months ended September 30, 2018, there were \$47.7 million securities transferred into Level 2. This amount was transferred from Level 3. These transfers resulted from securities that were priced internally using significant unobservable inputs where market observable inputs were not available in previous periods but were priced by independent pricing services or brokers as of September 30, 2018.

For the three months ended September 30, 2018, there were no transfers from Level 2 to Level 1.

For the three months ended September 30, 2018, there were no transfers from Level 1 into Level 2.

For the nine months ended September 30, 2017, there were an immaterial amount of transfers of securities into Level 3.

For the nine months ended September 30, 2017, \$28.9 million of securities were transferred into Level 2. This amount was transferred from Level 3. These transfers resulted from securities that were priced internally using significant unobservable inputs where market observable inputs were not available in previous periods but were priced by independent pricing services or brokers as of September 30, 2017.

For the nine months ended September 30, 2017, there were no securities transferred into Level 1.

For the nine months ended September 30, 2017, there were no securities transferred into Level 2.

Total realized and unrealized gains (losses) on Level 3 assets and liabilities are primarily reported in either realized investment gains (losses) within the consolidated condensed statements of income (loss) or other comprehensive income (loss) within shareowner's equity based on the appropriate accounting treatment for the item.

Purchases, sales, issuances, and settlements, net, represent the activity that occurred during the period that results in a change of the asset or liability but does not represent changes in fair value for the instruments held at the beginning of the period. Such activity primarily relates to purchases and sales of fixed maturity securities and issuances and settlements of fixed indexed annuities.

The Company reviews the fair value hierarchy classifications each reporting period. Changes in the observability of the valuation attributes may result in a reclassification of certain financial assets or liabilities. Such reclassifications are reported as transfers in and out of Level 3 at the beginning fair value for the reporting period in which the changes occur. The asset transfers

Table of Contents

in the table(s) above primarily related to positions moved from Level 3 to Level 2 as the Company determined that certain inputs were observable.

The amount of total gains (losses) for assets and liabilities still held as of the reporting date primarily represents changes in fair value of trading securities and certain derivatives that exist as of the reporting date and the change in fair value of fixed indexed annuities.

Estimated Fair Value of Financial Instruments

The carrying amounts and estimated fair values of the Company's financial instruments as of the periods shown below are as follows:

	Fair Value Level	As of			
		September 30, 2018 Carrying Amounts (Dollars In Thousands)	Fair Values	December 31, 2017 Carrying Amounts	Fair Values
<b>Assets:</b>					
Mortgage loans on real estate	3	\$7,572,349	\$7,335,547	\$6,817,723	\$6,740,177
Policy loans	3	1,703,462	1,703,462	1,615,615	1,615,615
Fixed maturities, held-to-maturity <sup>(1)</sup>	3	2,653,605	2,577,841	2,718,904	2,776,327
<b>Liabilities:</b>					
Stable value product account balances	3	\$5,211,668	\$5,147,084	\$4,698,371	\$4,698,868
Future policy benefits and claims <sup>(2)</sup>	3	223,091	223,091	220,498	220,498
Other policyholders' funds <sup>(3)</sup>	3	131,338	130,672	133,508	134,253
<b>Debt:<sup>(4)</sup></b>					
Bank borrowings	3	\$—	\$—	\$—	\$—
Senior Notes	2	1,105,978	1,074,695	943,370	933,926
Subordinated debentures	2	495,392	497,760	495,289	501,215
Subordinated funding obligations	3	110,000	97,451	—	—
Non-recourse funding obligations <sup>(5)</sup>	3	2,651,967	2,580,278	2,747,477	2,804,983

Except as noted below, fair values were estimated using quoted market prices.

(1) Securities purchased from unconsolidated affiliates, Red Mountain, LLC and Steel City, LLC.

(2) Single premium immediate annuity without life contingencies.

(3) Supplementary contracts without life contingencies.

(4) Excludes capital lease obligations of \$1.4 million and \$1.7 million as of September 30, 2018 and December 31, 2017, respectively.

(5) As of September 30, 2018, carrying amount of \$2.6 billion and a fair value of \$2.6 billion related to non-recourse funding obligations issued by Golden Gate and Golden Gate V. As of December 31, 2017, carrying amount of \$2.7 billion and a fair value of \$2.8 billion related to non-recourse funding obligations issued by Golden Gate and Golden Gate V.

Fair Value MeasurementsMortgage loans on real estate

The Company estimates the fair value of mortgage loans using an internally developed model. This model includes inputs derived by the Company based on assumed discount rates relative to the Company's current mortgage loan lending rate and an expected cash flow analysis based on a review of the mortgage loan terms. The model also contains the Company's determined representative risk adjustment assumptions related to credit and liquidity risks.

Policy loans

The Company believes the fair value of policy loans approximates book value. Policy loans are funds provided to policyholders in return for a claim on the policy. The funds provided are limited to the cash surrender value of the underlying policy. The nature of policy loans is to have a negligible default risk as the loans are fully collateralized by the value of the policy. Policy loans do not have a stated maturity and the balances and accrued interest are repaid

either by the policyholder or with proceeds from the policy. Due to the collateralized nature of policy loans and unpredictable timing of repayments, the Company believes the fair value of policy loans approximates carrying value. Fixed maturities, held-to-maturity

The Company estimates the fair value of its fixed maturity, held-to-maturity securities using internal discounted cash flow models. The discount rates used in the model are based on a current market yield for similar financial instruments.

## Table of Contents

### Stable value product and other investment contract balances

The Company estimates the fair value of stable value product account balances and other investment contract balances (included in Future policy benefits and claims as well as Other policyholder funds line items on our balance sheet) using models based on discounted expected cash flows. The discount rates used in the models are based on a current market rate for similar financial instruments.

### Debt

#### Bank borrowings

The Company believes the carrying value of its bank borrowings approximates fair value as the borrowings pay a floating interest rate plus a spread based on the rating of the Company's senior debt which the Company believes approximates a market interest rate.

#### Funding obligations

The Company estimates the fair value of its subordinated and non-recourse funding obligations using internal discounted cash flow models. The discount rates used in the model are based on a current market yield for similar financial instruments.

## 7. DERIVATIVE FINANCIAL INSTRUMENTS

### Types of Derivative Instruments and Derivative Strategies

The Company utilizes a risk management strategy that incorporates the use of derivative financial instruments to reduce exposure to certain risks, including but not limited to, interest rate risk, currency exchange risk, volatility risk, and equity market risk. These strategies are developed through the Company's analysis of data from financial simulation models and other internal and industry sources, and are then incorporated into the Company's risk management program.

Derivative instruments expose the Company to credit and market risk and could result in material changes from period to period. The Company attempts to minimize its credit in connection with its overall asset/liability management programs and risk management strategies. In addition, all derivative programs are monitored by our risk management department.

#### Derivatives Related to Interest Rate Risk Management

Derivative instruments that are used as part of the Company's interest rate risk management strategy include interest rate swaps, interest rate futures, interest rate caps, and interest rate swaptions.

#### Derivatives Related to Foreign Currency Exchange Risk Management

Derivative instruments that are used as part of the Company's foreign currency exchange risk management strategy include foreign currency swaps, foreign currency futures, foreign equity futures, and foreign equity options.

#### Derivatives Related to Risk Mitigation of Certain Annuity Contracts

The Company may use the following types of derivative contracts to mitigate its exposure to certain guaranteed benefits related to VA contracts, fixed indexed annuities, and indexed universal life contracts:

- Foreign Currency Futures
- Variance Swaps
- Interest Rate Futures
- Equity Options
- Equity Futures
- Credit Derivatives
- Interest Rate Swaps
- Interest Rate Swaptions
- Volatility Futures
- Volatility Options
- Total Return Swaps

#### Accounting for Derivative Instruments

The Company records its derivative financial instruments in the consolidated balance sheet in "other long-term investments" and "other liabilities" in accordance with GAAP, which requires that all derivative instruments be recognized in the balance sheet at fair value. The change in the fair value of derivative financial instruments is

reported either in the statement of income or in other comprehensive income (loss), depending upon whether it qualified for and also has been properly identified as being part of a hedging relationship, and also on the type of hedging relationship that exists.

For a derivative financial instrument to be accounted for as an accounting hedge, it must be identified and documented as such on the date of designation. For cash flow hedges, the effective portion of their realized gain or loss is reported as a component of other comprehensive income and reclassified into earnings in the same period during which the hedged item impacts earnings. Any remaining gain or loss, the ineffective portion, is recognized in current earnings. For fair value hedge derivatives, their gain or loss as well as the offsetting loss or gain attributable to the hedged risk of the hedged item is recognized in current earnings. Effectiveness of the Company's hedge relationships is assessed on a quarterly basis.

Table of Contents

The Company reports changes in fair values of derivatives that are not part of a qualifying hedge relationship through earnings in the period of change. Changes in the fair value of derivatives that are recognized in current earnings are reported in "Realized investment gains (losses)-Derivative financial instruments".

Derivative Instruments Designated and Qualifying as Hedging Instruments

Cash-Flow Hedges

To hedge a fixed rate note denominated in a foreign currency, the Company entered into a fixed-to-fixed foreign currency swap in order to hedge the foreign currency exchange risk associated with the note. The cash flows received on the swap are identical to the cash flow paid on the note.

To hedge a floating rate note, the Company entered into an interest rate swap to exchange the floating rate on the note for a fixed rate in order to hedge the interest rate risk associated with the note. The cash flows received on the swap are identical to the cash flow variability paid on the note.

Derivative Instruments Not Designated and Not Qualifying as Hedging Instruments

The Company uses various other derivative instruments for risk management purposes that do not qualify for hedge accounting treatment. Changes in the fair value of these derivatives are recognized in earnings during the period of change.

Derivatives Related to Variable Annuity Contracts

The Company uses equity futures, equity options, total return swaps, interest rate futures, interest rate swaps, interest rate swaptions, currency futures, volatility futures, volatility options, and variance swaps to mitigate the risk related to certain guaranteed minimum benefits, including GLWB, within its VA products. In general, the cost of such benefits varies with the level of equity and interest rate markets, foreign currency levels, and overall volatility.

The Company markets certain VA products with a GLWB rider. The GLWB component is considered an embedded derivative, not considered to be clearly and closely related to the host contract.

Derivatives Related to Fixed Annuity Contracts

The Company uses equity futures and options to mitigate the risk within its fixed indexed annuity products. In general, the cost of such benefits varies with the level of equity markets and overall volatility.

The Company markets certain fixed indexed annuity products. The FIA component is considered an embedded derivative as it is, not considered to be clearly and closely related to the host contract.

Derivatives Related to Indexed Universal Life Contracts

The Company uses equity futures and options to mitigate the risk within its indexed universal life products. In general, the cost of such benefits varies with the level of equity markets.

The Company markets certain IUL products. The IUL component is considered an embedded derivative as it is not considered to be clearly and closely related to the host contract.

Other Derivatives

The Company uses various swaps and other types of derivatives to manage risk related to other exposures.

The Company is involved in various modified coinsurance and funds withheld arrangements which contain embedded derivatives. Changes in their fair value are recorded in current period earnings. The investment portfolios that support the related modified coinsurance reserves and funds withheld arrangements had fair value changes which substantially offset the gains or losses on these embedded derivatives.

Table of Contents

The following table sets forth realized investments gains and losses for the periods shown:

## Realized investment gains (losses) - derivative financial instruments

## 8. OFFSETTING OF ASSETS AND LIABILITIES

Certain of the Company's derivative instruments are subject to enforceable master netting arrangements that provide for the net settlement of all derivative contracts between the Company and a counterparty in the event of default or upon the occurrence of certain termination events. Collateral support agreements associated with each master netting arrangement provide that the Company will receive or pledge financial collateral in the event either minimum thresholds, or in certain cases ratings levels, have been reached. Additionally, certain of the Company's repurchase agreements provide for net settlement on termination of the agreement. Refer to Note 11, Debt and Other Obligations for details of the Company's repurchase agreement programs.

Collateral received includes both cash and non-cash collateral. Cash collateral received by the Company is recorded on the consolidated condensed balance sheet as "cash", with a corresponding amount recorded in "other liabilities" to

represent the Company's obligation to return the collateral. Non-cash collateral received by the Company is not recognized on the consolidated condensed balance sheet unless the Company exercises its right to sell or re-pledge the underlying asset. As of September 30, 2018, the fair value of non-cash collateral received was \$8.2 million. As of December 31, 2017, the Company had not received any non-cash collateral.

## 9. MORTGAGE LOANS

## Mortgage Loans

The Company invests a portion of its investment portfolio in commercial mortgage loans. As of September 30, 2018, the Company's mortgage loan holdings were approximately \$7.6 billion. The Company has specialized in making loans on credit-oriented commercial properties, credit-anchored strip shopping centers, senior living facilities, and apartments. The Company's underwriting procedures relative to its commercial loan portfolio are based, in the Company's view, on a conservative and disciplined approach. The Company concentrates on a small number of commercial real estate asset types associated with the necessities of life (retail, multi-family, senior living, professional office buildings, and warehouses). The Company believes that these asset types tend to weather economic downturns better than other commercial asset classes in which it has chosen not to participate. The Company believes this disciplined approach has helped to maintain a relatively low delinquency and foreclosure rate throughout its history. The majority of the Company's mortgage loans portfolio was underwritten by the Company. From time to time, the Company may acquire loans in conjunction with an acquisition.

The Company's commercial mortgage loans are stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Amortization of premiums and discounts is recorded using the effective yield method. Interest income, amortization of premiums and discounts and prepayment fees are reported in net investment income.

Certain of the mortgage loans have call options that occur within the next 11 years. However, if interest rates were to significantly increase, the Company may be unable to exercise the call options on its existing mortgage loans commensurate with the significantly increased market rates. As of September 30, 2018, assuming the loans are called at their next call dates, approximately \$80.7 million of principal would become due for the remainder of 2018, \$933.4 million in 2019 through 2023, \$91.8 million in 2024 through 2028, and \$1.9 million thereafter.

The Company offers a type of commercial mortgage loan under which the Company will permit a loan-to-value ratio of up to 85% in exchange for a participating interest in the cash flows from the underlying real estate. As of September 30, 2018 and December 31, 2017, approximately \$757.0 million and \$669.3 million, respectively, of the Company's total mortgage loans principal balance have this participation feature. Cash flows received as a result of this participation feature are recorded as interest income. During the three and nine months ended September 30, 2018 and 2017, the Company recognized \$9.5 million, \$22.0 million, \$14.2 million, and \$25.7 million, respectively, of participating mortgage loan income.

As of September 30, 2018, \$3.0 million of the Company's invested assets consisted of nonperforming mortgage loans, restructured mortgage loans, or mortgage loans that were foreclosed and were converted to real estate properties. For all mortgage loans, the impact of troubled debt restructurings is generally reflected in our investment balance and in the allowance for mortgage loan credit losses. During the nine months ended September 30, 2018, the Company recognized one troubled debt restructuring as a result of the Company granting a concession to a borrower which included loan terms unavailable from other lenders. This concession was the result of an agreement between the creditor and the debtor, and the Company did not identify any loans whose principal was permanently impaired. The Company's mortgage loan portfolio consists of two categories of loans: 1) those not subject to a pooling and servicing agreement and 2) those subject to a contractual pooling and servicing agreement. As of September 30, 2018, the Company held \$3.0 million of mortgage loans not subject to a pooling and servicing agreement that were nonperforming mortgage loans, restructured, or mortgage loans that were foreclosed and were converted to real estate properties. The Company did not foreclose on any nonperforming loans not subject to a pooling and servicing agreement during the nine months ended September 30, 2018.

As of September 30, 2018, none of the loans subject to a pooling and servicing agreement were nonperforming or restructured. The Company did not foreclose on any nonperforming loans subject to a pooling and servicing agreement during the nine months ended September 30, 2018.

As of September 30, 2018, the Company had an allowance for mortgage loan credit losses of \$1.5 million and as of December 31, 2017, there was no allowance for mortgage loan credit losses. Due to the Company's loss experience and nature of the loan portfolio, the Company believes that a collectively evaluated allowance would be inappropriate.

The Company believes an allowance calculated through an analysis of specific loans that are believed to have a higher risk of credit impairment provides a more accurate presentation of expected losses in the portfolio and is consistent with the applicable guidance for loan impairments in ASC Subtopic 310. Since the Company uses the specific identification method for calculating the allowance, it is necessary to review the economic situation of each borrower to determine those that have higher risk of credit impairment. The Company has a team of professionals that monitors borrower conditions such as payment practices, borrower credit, operating performance, and property conditions, as well as ensuring the timely payment of property taxes and insurance. Through this monitoring process, the Company assesses the risk of each loan. When issues are identified, the severity of the issues are assessed and reviewed for possible credit impairment. If a loss is probable, an expected loss calculation is performed and an allowance is established for that loan based on the expected loss. The expected loss is calculated as the excess carrying value of a loan over either the present value of expected future cash flows discounted at the loan's original effective interest rate, or the current estimated fair value of the loan's underlying collateral. A loan may be subsequently charged off at such point that the Company no longer expects to receive cash payments, the present value of future expected payments of the renegotiated loan is less than the current principal balance, or at such time that the Company is party to foreclosure or bankruptcy proceedings associated with the borrower and does not expect to recover the principal balance of the loan.

Table of Contents

A charge off is recorded by eliminating the allowance against the mortgage loan and recording the renegotiated loan or the collateral property related to the loan as investment real estate on the balance sheet, which is carried at the lower of the appraised fair value of the property or the unpaid principal balance of the loan, less estimated selling costs associated with the property.

	For The Nine Months Ended September 30, 2018 (Dollars In Thousands)
Beginning balance, December 31, 2017	\$ —
Charge offs	—
Recoveries	(24 )
Provision	1,505
Ending balance, September 30, 2018	\$ 1,481

It is the Company's policy to cease to carry accrued interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is the Company's general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. For loans subject to a pooling and servicing agreement, there are certain additional restrictions and/or requirements related to workout proceedings, and as such, these loans may have different attributes and/or circumstances affecting the status of delinquency or categorization of those in nonperforming status. An analysis of the delinquent loans is shown in the following chart.

	30-59 Days Delinquent	60-89 Days Delinquent	Greater than 90 Days Delinquent	Total Delinquent
As of September 30, 2018	(Dollars In Thousands)			
Commercial mortgage loans	\$1,180	\$ —	\$ 1,243	\$ 2,423
Number of delinquent commercial mortgage loans	1	—	1	2
As of December 31, 2017	(Dollars In Thousands)			
Commercial mortgage loans	\$1,817	\$ —	\$ —	\$ 1,817
Number of delinquent commercial mortgage loans	2	—	—	2

Table of Contents

The Company's commercial mortgage loan portfolio consists of mortgage loans that are collateralized by real estate. Due to the collateralized nature of the loans, any assessment of impairment and ultimate loss given a default on the loans is based upon a consideration of the estimated fair value of the real estate. The Company limits accrued interest income on impaired loans to 90 days of interest. Once accrued interest on the impaired loan is received, interest income is recognized on a cash basis.

	Unpaid Recorded Principal Investment Balance	Related Allowance	Average Recorded Investment	Interest Income Recognized	Cash Basis Interest Income
(Dollars In Thousands)					
As of September 30, 2018					
Commercial mortgage loans:					
With no related allowance recorded	\$ —	\$ —	\$ —	\$ —	\$ —

As of December 31, 2017			
Troubled debt restructuring:			
Commercial mortgage loans 1	\$ 418	\$ 418	

**10. GOODWILL**

The balance of goodwill for the Company as of September 30, 2018 was \$793.5 million. There has been no change to goodwill during the nine months ended September 30, 2018.

Accounting for goodwill requires an estimate of the future profitability of the associated lines of business to assess the recoverability of the capitalized acquisition goodwill. The Company evaluates the carrying value of goodwill at the segment (or reporting unit) level at least annually and between annual evaluations if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount. Such circumstances could include, but are not limited to: 1) a significant adverse change in legal factors or in business climate, 2) unanticipated competition, or 3) an adverse action or assessment by a regulator. When evaluating whether goodwill is impaired, the Company first determines through qualitative analysis whether relevant events and circumstances indicate that it is more likely than not that segment goodwill balances are impaired as of the testing date. If it is determined that it is more likely than not that impairment exists, the Company compares its estimate of the fair value of the reporting unit to which the goodwill is assigned to the reporting unit's carrying amount, including goodwill. The Company utilizes a fair value measurement (which includes a discounted cash flows analysis) to assess the carrying value of the reporting units in consideration of the recoverability of the goodwill balance assigned to each reporting unit as of the measurement date. The Company's material goodwill balances are attributable to certain of its operating segments (which are each considered to be reporting units). The cash flows used to determine the fair value

of the Company's reporting units are dependent on a number of significant assumptions. The Company's estimates, which consider a market participant view of fair value, are subject to change given the inherent uncertainty in predicting future results and cash flows, which are impacted by such things as policyholder behavior, competitor pricing, capital limitations, new product introductions, and specific industry and market conditions.

The balance recognized as goodwill is not amortized, but is reviewed for impairment on an annual basis, or more frequently as events or circumstances may warrant, including those circumstances which would more likely than not reduce the fair value of the Company's reporting units below its carrying amount. During the fourth quarter of 2017, the Company performed its annual

Table of Contents

evaluation of goodwill based on information as of October 1, 2017, and determined that no adjustment to impair goodwill was necessary. During the nine months ended September 30, 2018, the Company did not identify any events or circumstances which would indicate that the fair value of its operating segments would have declined below their book value, either individually or in the aggregate.

**11. DEBT AND OTHER OBLIGATIONS****Debt and Subordinated Debt**

Debt and subordinated debt are summarized as follows:

	As of		As of	
	September 30, 2018	December 31, 2017	September 30, 2018	December 31, 2017
	Outstanding	Carrying	Outstanding	Carrying

8.45% Senior Notes (2009), due 2039	190,044	289,250	232,928	357,046
4.30% Senior Notes (2018), due 2028	400,000	395,381	—	—
	\$991,455	\$1,107,388	\$784,610	\$945,052
Subordinated debt (year of issue):				
5.35% Subordinated Debentures (2017), due 2052	\$500,000	\$495,392	\$500,000	\$495,289
3.55% Subordinated Funding Obligations (2018), due 2038	55,000	55,000	—	—
3.55% Subordinated Funding Obligations (2018), due 2038	55,000	55,000	—	—
	\$610,000	\$605,392	\$500,000	\$495,289

During the nine months ended September 30, 2018, the Company repurchased and subsequently extinguished \$65.6 million (par value - \$42.9 million) of the Company's 8.45% Senior Notes due 2039. These repurchases resulted in a \$1.8 million pre-tax gain for the Company. The gain is recorded in other income in the consolidated condensed statements of income.

During 2018, PLICO issued \$110.0 million of Subordinated Funding Obligations at a rate of 3.55% due 2038. These obligations are non-recourse to the Company.

During 2018, the Company issued \$400.0 million of its Senior Notes at a rate of 4.30%, due 2028. These notes were issued net of a discount of \$1.0 million. These notes are carried on the Company's balance sheet net of the discount and the associated deferred issuance expenses of \$3.7 million. The Company used the net proceeds from the offering for general corporate purposes, including the repayment of amounts outstanding under our Credit Facility.

During 2017, the Company issued \$500.0 million of its Subordinated Debentures due 2052. These Subordinated Debentures are carried on the Company's balance sheet net of the associated deferred issuance expenses of \$4.8 million. The Company used the net proceeds from the offering to call and redeem, at par, the entire \$150.0 million of 6.00% Subordinated Debentures due 2042 and \$287.5 million of 6.25% Subordinated Debentures due 2042.

Under a revolving line of credit arrangement that was in effect until May 3, 2018 (the "2015 Credit Facility"), the Company had the ability to borrow on an unsecured basis up to an aggregate principal amount of \$1.0 billion. The Company had the right in certain circumstances to request that the commitment under the 2015 Credit Facility be increased up to a maximum principal amount of \$1.25 billion. Balances outstanding under the 2015 Credit Facility accrued interest at a rate equal to, at the option of the Borrowers, (i) LIBOR plus a spread based on the ratings of the Company's Senior Debt, or (ii) the sum of (A) a rate equal to the highest of (x) the Administrative Agent's Prime rate, (y) 0.50% above the Funds rate, or (z) the one-month LIBOR plus 1.00% and (B) a spread based on the ratings of the Company's Senior Debt. The 2015 Credit Facility also provided for a facility fee at a rate that varies with the ratings of the Company's Senior Debt and that is calculated on the aggregate amount of commitments under the 2015 Credit Facility, whether used or unused. The annual facility fee rate is 0.125% of the aggregate principal amount. The 2015

Credit Facility provides that the Company is liable for the full amount of any obligations for borrowings or letters of credit, including those of PLICO, under the 2015 Credit Facility. The maturity date of the 2015 Credit Facility was February 2, 2020.

On May 3, 2018, the Company amended the 2015 Credit Facility (as amended, the "Credit Facility"). Under the Credit Facility, the Company has the ability to borrow on an unsecured basis up to an aggregate principal amount of \$1.0 billion. The

Table of Contents

Company has the right in certain circumstances to request that the commitment under the Credit Facility be increased up to a maximum principal amount of \$1.5 billion. Balances outstanding under the Credit Facility accrue interest at a rate equal to, at the option of the Borrowers, (i) LIBOR plus a spread based on the ratings of the Company's Senior Debt, or (ii) the sum of (A) a rate equal to the highest of (x) the Administrative Agent's Prime rate, (y) 0.50% above the Funds rate, or (z) the one-month LIBOR plus 1.00% and (B) a spread based on the ratings of the Company's Senior Debt. The Credit Facility also provided for a facility fee at a rate that varies with the ratings of the Company's Senior Debt and that is calculated on the aggregate amount of commitments under the Credit Facility, whether used or unused. The annual facility fee rate is 0.125% of the aggregate principal amount. The Credit Facility provides that the Company is liable for the full amount of any obligations for borrowings or letters of credit, including those of PLICO, under the Credit Facility. The maturity date of the Credit Facility is May 3, 2023. The Company is not aware of any non-compliance with the financial debt covenants of the Credit Facility as of September 30, 2018. There was no outstanding balance as of September 30, 2018.

## Non-Recourse Funding Obligations

Non-recourse funding obligations outstanding as of September 30, 2018, on a consolidated basis, are shown in the following table:

Issuer	Outstanding Principal	Carrying Value <sup>(1)</sup>	Maturity Year	Year-to-Date Weighted-Avg Interest Rate
	(Dollars In Thousands)			
Golden Gate Captive Insurance Company <sup>(2)(3)</sup>	\$1,917,000	\$ 1,917,000	2039	4.75 %
Golden Gate II Captive Insurance Company	20,600	17,689	2052	4.87 %
Golden Gate V Vermont Captive Insurance Company <sup>(2)(3)</sup>	655,000	714,921	2037	5.12 %
MONY Life Insurance Company <sup>(3)</sup>	1,091	2,357	2024	6.19 %
Total	\$2,593,691	\$ 2,651,967		

(1) Carrying values include premiums and discounts and do not represent unpaid principal balances.

(2) Obligations are issued to non-consolidated subsidiaries of the Company. These obligations collateralize certain held-to-maturity securities issued by wholly owned subsidiaries of PLICO.

(3) Fixed rate obligations

During the nine months ended September 30, 2018, the Company and its affiliates repurchased \$38.0 million of its outstanding non-recourse funding obligations, at a discount. These repurchases did not result in a material gain or loss for the Company.

Non-recourse funding obligations outstanding as of December 31, 2017, on a consolidated basis, are shown in the following table:

Issuer	Outstanding Principal	Carrying Value <sup>(1)</sup>	Maturity Year	Year-to-Date Weighted-Avg Interest Rate
	(Dollars In Thousands)			
Golden Gate Captive Insurance Company <sup>(2)(3)</sup>	\$2,014,000	\$ 2,014,000	2039	4.75 %
Golden Gate II Captive Insurance Company	58,600	49,787	2052	3.88 %
Golden Gate V Vermont Captive Insurance Company <sup>(2)(3)</sup>	620,000	681,285	2037	5.12 %
MONY Life Insurance Company <sup>(3)</sup>	1,091	2,405	2024	6.19 %
Total	\$2,693,691	\$ 2,747,477		

(1) Carrying values include premiums and discounts and do not represent unpaid principal balances.

(2) Obligations are issued to non-consolidated subsidiaries of the Company. These obligations collateralize certain held-to-maturity securities issued by wholly owned subsidiaries of PLICO.

(3) Fixed rate obligations

Secured Financing Transactions

Repurchase Program Borrowings

While the Company anticipates that the cash flows of its operating subsidiaries will be sufficient to meet its investment commitments and operating cash needs in a normal credit market environment, the Company recognizes that investment

48

---

Table of Contents

commitments scheduled to be funded may, from time to time, exceed the funds then available. Therefore, the Company has established repurchase agreement programs for certain of its insurance subsidiaries to provide liquidity when needed. The Company expects that the rate received on its investments will equal or exceed its borrowing rate. Under this program, the Company may, from time to time, sell an investment security at a specific price and agree to repurchase that security at another specified price at a later date. These borrowings are typically for a term less than 90 days. The market value of securities to be repurchased is monitored and collateral levels are adjusted where appropriate to protect the counterparty against credit exposure. Cash received is invested in fixed maturity securities, and the agreements provided for net settlement in the event of default or on termination of the agreements. As of September 30, 2018, the fair value of securities pledged under the repurchase program was \$457.5 million, and the repurchase obligation of \$417.1 million was included in the Company's consolidated condensed balance sheets (at an average borrowing rate of 223 basis points). During the nine months ended September 30, 2018, the maximum balance outstanding at any one point in time related to these programs was \$427.5 million. The average daily balance was \$225.9 million (at an average borrowing rate of 208 basis points) during the nine months ended September 30, 2018. As of December 31, 2017, the fair value of securities pledged under the repurchase program was \$1,006.6 million, and the repurchase obligation of \$885.0 million was included in the Company's consolidated condensed balance sheets (at an average borrowing rate of 142 basis points). During 2017, the maximum balance outstanding at any one point in time related to these programs was \$988.5 million. The average daily balance was \$624.7 million (at an average borrowing rate of 101 basis points) during the year ended December 31, 2017.

**Securities Lending**

The Company participates in securities lending, primarily as an investment yield enhancement, whereby securities that are held as investments are loaned out to third parties for short periods of time. The Company requires initial collateral of 102% of the market value of the loaned securities to be separately maintained. The loaned securities' market value is monitored on a daily basis. As of September 30, 2018, securities with a market value of \$92.0 million were loaned under this program. As collateral for the loaned securities, the Company receives short-term investments, which are recorded in "short-term investments" with a corresponding liability recorded in "secured financing liabilities" to account for its obligation to return the collateral. As of September 30, 2018, the fair value of the collateral related to this program was \$97.3 million and the Company has an obligation to return \$97.3 million of collateral to the securities borrowers.

The following table provides the amount by asset class of securities of collateral pledged for repurchase agreements and securities that have been loaned as part of securities lending transactions as of September 30, 2018 and December 31, 2017:

**12. COMMITMENTS AND CONTINGENCIES**

The Company has entered into indemnity agreements with each of its current directors other than those that are employees of Dai-ichi Life that provide, among other things and subject to certain limitations, a contractual right to indemnification to the fullest extent permissible under the law. The Company has agreements with certain of its officers providing up to \$10 million in indemnification. These obligations are in addition to the customary obligation to indemnify officers and directors contained in the Company's governance documents.

Under the insurance guaranty fund laws in most states, insurance companies doing business therein can be assessed up to prescribed limits for policyholder losses incurred by insolvent companies. From time to time, companies may be asked to contribute amounts beyond prescribed limits. It is possible that the Company could be assessed with respect to product lines not offered by the Company. In addition, legislation may be introduced in various states with respect to guaranty fund assessment laws related to insurance products, including long term care insurance and other specialty products, that increases the cost of future assessments or alters future premium tax offsets received in connection with guaranty fund assessments. The Company cannot predict the amount, nature or timing of any future assessments or legislation, any of which could have a material and adverse impact on the Company's financial condition or results of operations.

A number of civil jury verdicts have been returned against insurers, broker-dealers, and other providers of financial services involving sales, refund or claims practices, alleged agent misconduct, failure to properly supervise representatives, relationships with agents or persons with whom the insurer does business, and other matters. Often these lawsuits have resulted in the award of substantial judgments that are disproportionate to the actual damages, including material amounts of punitive and non-economic compensatory damages. In some states, juries, judges, and arbitrators have substantial discretion in awarding punitive and non-economic compensatory damages which creates the potential for unpredictable material adverse judgments or awards in any given lawsuit or arbitration. Arbitration awards are subject to very limited appellate review. In addition, in some class action and other lawsuits, companies have made material settlement payments. The financial services and insurance industries in particular are also sometimes the target of law enforcement and regulatory investigations relating to the numerous laws and regulations that govern such companies. Some companies have been the subject of law enforcement or regulatory actions or other actions resulting from such investigations. The Company, in the ordinary course of business, is involved in such matters.

The Company establishes liabilities for litigation and regulatory actions when it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. For matters where a loss is believed to be reasonably possible, but not probable, no liability is established. For such matters, the Company may provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. The Company reviews relevant information with respect to litigation and regulatory matters on a quarterly and annual basis and updates its established liabilities, disclosures and estimates of reasonably possible losses or range of loss based on such reviews. Certain of the Company's insurance subsidiaries, as well as certain other insurance companies for which the Company has coinsured blocks of life insurance and annuity policies, are under audit for compliance with the unclaimed property laws of a number of states. The audits are being conducted on behalf of the treasury departments or unclaimed property administrators in such states. The focus of the audits is on whether there have been unreported deaths, maturities, or policies that have exceeded

Table of Contents

limiting age with respect to which death benefits or other payments under life insurance or annuity policies should be treated as unclaimed property that should be escheated to the state. The Company is presently unable to estimate the reasonably possible loss or range of loss that may result from the audits due to a number of factors, including uncertainty as to the legal theory or theories that may give rise to liability, the early stages of the audits being conducted, and uncertainty as to whether the Company or other companies are responsible for the liabilities, if any, arising in connection with certain co-insured policies. The Company will continue to monitor the matter for any developments that would make the loss contingency associated with the audits reasonably estimable.

Certain of the Company's subsidiaries are under a targeted multi-state examination with respect to their claims paying practices and their use of the U.S. Social Security Administration's Death Master File or similar databases (a "Death Database") to identify unreported deaths in their life insurance policies, annuity contracts and retained asset accounts. There is no clear basis in previously existing law for requiring a life insurer to search for unreported deaths in order to determine whether a benefit is owed, and substantial legal authority exists to support the position that the prevailing industry practice was lawful. A number of life insurers, however, have entered into settlement or consent agreements with state insurance regulators under which the life insurers agreed to implement procedures for periodically comparing their life insurance and annuity contracts and retained asset accounts against a Death Database, treating confirmed deaths as giving rise to a death benefit under their policies, locating beneficiaries and paying them the benefits and interest, escheating the benefits and interest to the state if the beneficiary could not be found, and paying penalties to the state, if required. It has been publicly reported that the life insurers have paid administrative and/or examination fees to the insurance regulators in connection with the settlement or consent agreements. The Company believes that insurance regulators could demand from the Company administrative and/or examination fees relating to the targeted multi-state examination. Based on publicly reported payments by other life insurers, the Company does not believe such fees, if assessed, would have a material effect on its financial statements.

Advance Trust & Life Escrow Services, LTA, as Securities Intermediary of Life Partners Position Holder Trust v. Protective Life Insurance Company, Case No. 2:18-CV-01290, is a putative class action that was filed on August 13, 2018 in the United States District Court for the Northern District of Alabama. Plaintiff alleges that PLICO required policyholders to pay unlawful and excessive cost of insurance charges. Plaintiff seeks to represent all owners of universal life and variable universal life policies issued or administered by PLICO or its predecessors that provide that cost of insurance rates are to be determined based on expectations of future mortality experience. The plaintiff seeks class certification, compensatory damages, pre-judgment and post-judgment interest, costs, and other unspecified relief. The Company is vigorously defending this matter and cannot predict the outcome of or reasonably estimate the possible loss or range of loss that might result from this litigation.

Table of Contents

## 13. EMPLOYEE BENEFIT PLANS

Components of the net periodic benefit cost for the three and nine months ended September 30, 2018 and 2017, are as follows:

	For The Three Months Ended September 30, 2018				For The Nine Months Ended September 30, 2017			
	Qualified Pension Plan	Nonqualified Excess Pension Plan	Qualified Pension Plan	Nonqualified Excess Pension Plan	Qualified Pension Plan	Nonqualified Excess Pension Plan	Qualified Pension Plan	Nonqualified Excess Pension Plan
	(Dollars In Thousands)							
Service cost — benefits earned during the period	\$3,006	\$ 288	\$3,348	\$ 334	\$9,888	\$ 1,062	\$10,044	\$ 1,002
Interest cost on projected benefit obligation	2,577	359	2,191	297	7,371	1,077	6,573	891
Expected return on plan assets	(4,743 )	—	(3,352 )	—	(12,795)	—	(10,056 )	—
Amortization of prior service cost	—	—	—	—	—	—	—	—
Amortization of actuarial loss/(gain)	—	196	—	118	—	726	—	354
Preliminary net periodic benefit cost	840	843	2,187	749	4,464	2,865	6,561	2,247
Settlement/curtailment expense <sup>(1)</sup>	—	986	—	—	—	986	—	—
Total net periodic benefit costs	\$840	\$ 1,829	\$2,187	\$ 749	\$4,464	\$ 3,851	\$6,561	\$ 2,247

<sup>(1)</sup> The unfunded excess benefit plan triggered settlement accounting for the nine months ended September 30, 2018 since total lump sum payments exceeded the settlement threshold of service cost plus interest cost.

During the nine months ended September 30, 2018, the Company contributed \$18.8 million to its defined benefit pension plan for the 2017 plan year. The Company will make contributions in future periods as necessary to at least satisfy minimum funding requirements, to maintain an adjusted funding target attainment percentage (“AFTAP”) of at least 80% and to avoid certain Pension Benefit Guaranty Corporation (“PBGC”) reporting triggers. The Company may also make additional discretionary contributions in excess of the contribution amounts established by the current funding policy.

Table of Contents

## 14. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following tables summarize the changes in the accumulated balances for each component of accumulated other comprehensive income (loss) (“AOCI”) as of September 30, 2018 and December 31, 2017.

## Changes in Accumulated Other Comprehensive Income (Loss) by Component

	Unrealized Gains and Losses on Investments	Accumulated Gain and Loss Derivatives	Minimum Pension Liability Adjustment	Total Accumulated Other Comprehensive Income (Loss)
(Dollars In Thousands, Net of Tax)				
Beginning Balance, December 31, 2017	\$25,874	\$ 747	\$(13,925 )	\$ 12,696
Other comprehensive income (loss) before reclassifications	(1,206,478 )	3,060	—	(1,203,418 )
Other comprehensive income (loss) relating to other-than-temporary impaired investments for which a portion has been recognized in earnings	22	—	—	22
Amounts reclassified from accumulated other comprehensive income (loss) <sup>(1)</sup>	(2,086 )	631	—	(1,455 )
Net current-period other comprehensive income (loss)	(1,208,542 )	3,691	—	(1,204,851 )
Cumulative effect adjustments	(10,552 )	—	—	(10,552 )
Ending Balance, September 30, 2018	\$(1,193,220)	\$ 4,438	\$(13,925 )	\$(1,202,707 )

(1) See Reclassification table below for details.

(2) As of September 30, 2018, net unrealized losses reported in AOCI were offset by \$524.1 million due to the impact those net unrealized losses would have had on certain of the Company’s insurance assets and liabilities if the net unrealized losses had been recognized in net income.

## Changes in Accumulated Other Comprehensive Income (Loss) by Component

	Unrealized Gains and Losses on Investments	Accumulated Gain and Loss Derivatives	Minimum Pension Liability Adjustment	Total Accumulated Other Comprehensive Income (Loss)
(Dollars In Thousands, Net of Tax)				
Beginning Balance, December 31, 2016	\$(656,322)	\$ 727	\$ 1,072	\$(654,523 )
Other comprehensive income (loss) before reclassifications	700,536	(563 )	(15,726 )	684,247
Other comprehensive income (loss) relating to other-than-temporary impaired investments for which a portion has been recognized in earnings	7,153	—	—	7,153
Amounts reclassified from accumulated other comprehensive income (loss) <sup>(1)</sup>	642	451	501	1,594
Net current-period other comprehensive income (loss)	708,331	(112 )	(15,225 )	692,994
Cumulative effect adjustments	(26,135 )	132	228	(25,775 )
Ending Balance, December 31, 2017	\$25,874	\$ 747	\$(13,925 )	\$ 12,696

(1) See Reclassification table below for details.

(2) As of December 31, 2016 and December 31, 2017, net unrealized losses reported in AOCI were offset by \$424.1 million and \$(6.3) million, respectively, due to the impact those net unrealized losses would have had on certain of the Company’s insurance assets and liabilities if the net unrealized losses had been recognized in net income.

Table of Contents

The following tables summarize the reclassifications amounts out of AOCI for the three and nine months ended September 30, 2018 and 2017.

Table of Contents

## 15. INCOME TAXES

The Company used its respective estimates for its annual 2018 and 2017 incomes in computing its effective income tax rates for the three and nine months ended September 30, 2018 and 2017. The estimate of the annual 2018 income excluded unrealized gains and losses on equity securities due to an inability to forecast future gains and losses. The Company's effective tax rate related to continuing operations varied from the maximum federal income tax rates as follows:

	For The Three Months Ended September 30, 2018		For The Nine Months Ended September 30, 2017	
Statutory federal income tax rate applied to pre-tax income	21.0 %	35.0 %	21.0 %	35.0 %
State income taxes	1.2	0.5	1.2	0.6
Investment income not subject to tax	(1.8)	(5.4)	(2.6)	(3.8)
Uncertain tax positions	—	(2.0)	—	(0.3)
Change in State Tax Rate	—	—	(0.5)	—
Prior period adjustments	—	(2.6)	—	(0.8)
Other	(0.9)	—	(0.3)	(0.1)
	19.5 %	25.5 %	18.8 %	30.6 %

In April 2017, a routine review by Congress' Joint Committee on Taxation related to IRS examinations for 2003 through 2011 was finalized and the Company received an approximate \$6.2 million net refund in the fourth quarter of 2017. The resulting net adjustment to the Company's current income taxes and the collection of this refund for the years 2003 through 2011 did not materially affect the Company or its effective tax rate.

There have been no material changes to the balance of unrecognized tax benefits, where the changes impact earnings, during the quarter ending September 30, 2018. The Company believes that in the next twelve months, none of the unrecognized tax benefits will be reduced.

In general, the Company is no longer subject to income tax examinations by taxing authorities for tax years that began before 2014. Furthermore, due to the aforementioned IRS adjustments to the Company's pre-2014 taxable income, the Company has amended certain of its 2003 through 2013 state income tax returns. Such amendments will cause such years to remain open, pending the states' acceptances of the returns.

During the year ended December 31, 2016, the Company entered into a reinsurance transaction. This transaction generated an operating loss on the Company's consolidated 2016 U.S. income tax return. The Company partially carried back this loss and received refunds for substantially all of the U.S. income taxes it paid in 2014 and 2015 and expects to fully utilize the remaining operating loss carryforward during the carryforward period. Based on the Company's current assessment of future taxable income, including available tax planning opportunities, the Company anticipates that it is more likely than not that it will generate sufficient taxable income to realize all of its material deferred tax assets. The Company did not record a valuation allowance against its material deferred tax assets as of September 30, 2018 and December 31, 2017.

In the tax year ended December 31, 2017, the Company recognized provisional impacts related to the revaluation of certain deferred tax assets under the Tax Reform Act under Staff Accounting Bulletin No. 118. The ultimate impact may differ from these provisional amounts, possibly materially, due to, among other things, additional regulatory guidance that may be issued, additional analysis, and resulting changes in interpretations and assumptions the Company has made. Any adjustments to these provisional amounts will be reported as a component of income tax expense (benefit) in the reporting period in which any such adjustments are determined. There are no material adjustments for the nine months ended September 30, 2018. The accounting is expected to be complete by December 22, 2018.

## 16. OPERATING SEGMENTS

The Company has several operating segments, each having a strategic focus. An operating segment is distinguished by products, channels of distribution, and/or other strategic distinctions. The Company periodically evaluates its

operating segments and makes adjustments to its segment reporting as needed. A brief description of each segment follows.

The Life Marketing segment markets fixed universal life (“UL”), indexed universal life (“IUL”), variable universal life (“VUL”), bank-owned life insurance (“BOLI”), and level premium term insurance (“traditional”) products on a national basis primarily through networks of independent insurance agents and brokers, broker-dealers, financial institutions, independent marketing organizations, and affinity groups.

The Acquisitions segment focuses on acquiring, converting, and servicing policies and contracts acquired from other companies. The segment’s primary focus is on life insurance policies and annuity products that were sold to individuals. The level of the segment’s acquisition activity is predicated upon many factors, including available capital, operating capacity, potential return on capital, and market dynamics. Policies acquired through the Acquisitions segment are typically blocks of business where no new policies are being marketed. Therefore

Table of Contents

earnings and account values are expected to decline as the result of lapses, deaths, and other terminations of coverage unless new acquisitions are made.

The Annuities segment markets fixed and VA products. These products are primarily sold through broker-dealers, financial institutions, and independent agents and brokers.

The Stable Value Products segment sells fixed and floating rate funding agreements directly to the trustees of municipal bond proceeds, money market funds, bank trust departments, and other institutional investors. This segment also issues funding agreements to the FHLB, and markets guaranteed investment contracts (“GICs”) to 401(k) and other qualified retirement savings plans. The Company also has an unregistered funding agreement-backed notes program which provides for offers of notes to both domestic and international institutional investors.

The Asset Protection segment markets extended service contracts, GAP products, credit life and disability insurance, and other specialized ancillary products to protect consumers’ investments in automobiles, recreational vehicles, watercraft, and powersports. GAP products are designed to cover the difference between the scheduled loan pay-off amount and an asset’s actual cash value in the case of a total loss. Each type of specialized ancillary product protects against damage or other loss to a particular aspect of the underlying asset.

The Corporate and Other segment primarily consists of net investment income on assets supporting our equity capital, unallocated corporate overhead and expenses not attributable to the segments above (including interest on corporate debt). This segment includes earnings from several non-strategic or runoff lines of business, various financing and investment related transactions, and the operations of several small subsidiaries.

The Company's management and Board of Directors analyzes and assesses the operating performance of each segment using "pre-tax adjusted operating income (loss)" and "after-tax adjusted operating income (loss)". Consistent with GAAP accounting guidance for segment reporting, pre-tax adjusted operating income (loss) is the Company's measure of segment performance. Pre-tax adjusted operating income (loss) is calculated by adjusting "income (loss) before income tax," by excluding the following items:

- realized gains and losses on investments and derivatives,
- changes in the GLWB embedded derivatives exclusive of the portion attributable to the economic cost of the GLWB,
- actual GLWB incurred claims, and
- the amortization of deferred policy acquisition costs (“DAC”), value of business acquired (“VOBA”), and certain policy liabilities that is impacted by the exclusion of these items.

The items excluded from adjusted operating income (loss) are important to understanding the overall results of operations. Pre-tax adjusted operating income (loss) and after-tax adjusted operating income (loss) are not substitutes for income before income taxes or net income (loss), respectively. These measures may not be comparable to similarly titled measures reported by other companies. The Company believes that pre-tax and after-tax adjusted operating income (loss) enhances management’s and the Board of Directors’ understanding of the ongoing operations, the underlying profitability of each segment, and helps facilitate the allocation of resources.

After-tax adjusted operating income (loss) is derived from pre-tax adjusted operating income (loss) with the inclusion of income tax expense or benefits associated with pre-tax adjusted operating income. Income tax expense or benefits is allocated to the items excluded from pre-tax adjusted operating income (loss) at the statutory federal income tax rate for the associated period. For periods ending on and prior to December 31, 2017, a rate of 35% was used. Beginning in 2018, a statutory federal income tax rate of 21% will be used to allocate income tax expense or benefits to items excluded from pre-tax adjusted operating income (loss). Income tax expense or benefits allocated to after-tax adjusted operating income (loss) can vary period to period based on changes in the Company’s effective income tax rate.

In determining the components of the pre-tax adjusted operating income (loss) for each segment, premiums and policy fees, other income, benefits and settlement expenses, and amortization of DAC and VOBA are attributed directly to each operating segment. Net investment income is allocated based on directly related assets required for transacting the business of that segment. Realized investment gains (losses) and other operating expenses are allocated to the segments in a manner that most appropriately reflects the operations of that segment. Investments and other assets are allocated based on statutory policy liabilities net of associated statutory policy assets, while DAC/VOBA and goodwill are shown in the segments to which they are attributable.

There were no significant intersegment transactions during the three and nine months ended September 30, 2018 and 2017.

## 17. SUBSEQUENT EVENTS

The Company has evaluated the effects of events subsequent to September 30, 2018, and through the date we filed our consolidated condensed financial statements with the United States Securities and Exchange Commission. All accounting and disclosure requirements related to subsequent events are included in our consolidated condensed financial statements.

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) should be read in conjunction with our consolidated condensed financial statements included under Part I, Item 1, Financial Statements (Unaudited), of this Quarterly Report on Form 10-Q and our audited consolidated financial statements for the year ended December 31, 2017, included in our Annual Report on Form 10-K.

For a more complete understanding of our business and current period results, please read the following MD&A in conjunction with our latest Annual Report on Form 10-K and other filings with the United States Securities and Exchange Commission (the “SEC”).

Certain reclassifications have been made in the previously reported financial statements and accompanying notes to make the prior period amounts comparable to those of the current period. Such reclassifications had no effect on previously reported net income or shareowner’s equity.

**FORWARD-LOOKING STATEMENTS — CAUTIONARY LANGUAGE**

This report reviews our financial condition and results of operations, including our liquidity and capital resources. Historical information is presented and discussed, and where appropriate, factors that may affect future financial performance are also identified and discussed. Certain statements made in this report include “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include any statement that may predict, forecast, indicate, or imply future results, performance, or achievements instead of historical facts and may contain words like “believe,” “expect,” “estimate,” “project,” “budget,” “forecast,” “anticipate,” “plan,” “will,” “shall,” “may,” and other words, phrases, or expressions with similar meaning. Forward-looking statements involve risks and uncertainties, which may cause actual results to differ materially from the results contained in the forward-looking statements, and we cannot give assurances that such statements will prove to be correct. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future developments or otherwise. For more information about the risks, uncertainties, and other factors that could affect our future results, please refer to Part I, Item 2, Management’s Discussion and Analysis of Financial Condition and Results of Operations, and Part II, Item 1A, Risk Factors, of this report, as well as Part I, Item 1A, Risk Factors, of our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

**IMPORTANT INVESTOR INFORMATION**

We file reports with the SEC, including Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and other reports as required. The public may read and copy any materials we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. We are an electronic filer and the SEC maintains an internet site at [www.sec.gov](http://www.sec.gov) that contains these reports and other information filed electronically by us. We make available through our website, [www.protective.com](http://www.protective.com), our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports as soon as reasonably practicable after such materials are electronically filed with or furnished to the SEC. We will furnish such documents to anyone who requests such copies in writing. Requests for copies should be directed to: Financial Information, Protective Life Corporation, P. O. Box 2606, Birmingham, Alabama 35202, Telephone (205) 268-3912, Fax (205) 268-3642.

We also make available to the public current information, including financial information, regarding the Company and our affiliates on the Financial Information page of our website, [www.protective.com](http://www.protective.com). We encourage investors, the media and others interested in us and our affiliates to review the information we post on our website. The information found on our website is not part of this or any other report filed with or furnished to the SEC.

**OVERVIEW**

**Our Business**

On February 1, 2015, Protective Life Corporation (the “Company”) became a wholly owned subsidiary of The Dai-ichi Life Insurance Company, Limited, a kabushiki kaisha organized under the laws of Japan (now known as Dai-ichi Life Holdings, Inc., “Dai-ichi Life”), when DL Investment (Delaware), Inc., a wholly owned subsidiary of Dai-ichi Life, merged with and into the Company (the “Merger”). Prior to February 1, 2015, our stock was publicly traded on the New

York Stock Exchange. Subsequent to the Merger, we remain an SEC registrant for financial reporting purposes in the United States. The Company, which is headquartered in Birmingham, Alabama, operates as a holding company for its insurance and other subsidiaries that provide financial services primarily in the United States through the production, distribution, and administration of insurance and investment products. Founded in 1907, Protective Life Insurance Company (“PLICO”) is our largest operating subsidiary. Unless the context otherwise requires, the “Company,” “we,” “us,” or “our” refers to the consolidated group of Protective Life Corporation and our subsidiaries.

We have several operating segments, each having a strategic focus. An operating segment is distinguished by products, channels of distribution, and/or other strategic distinctions. We periodically evaluate our operating segments and make adjustments to our segment reporting as needed.

Our operating segments are Life Marketing, Acquisitions, Annuities, Stable Value Products, Asset Protection, and Corporate and Other.

Table of Contents

**Life Marketing**—We market fixed universal life (“UL”), indexed universal life (“IUL”), variable universal life (“VUL”), bank-owned life insurance (“BOLI”), and level premium term insurance (“traditional”) products on a national basis primarily through networks of independent insurance agents and brokers, broker-dealers, financial institutions, independent distribution organizations, and affinity groups.

**Acquisitions**—We focus on acquiring, converting, and/or servicing policies and contracts from other companies. This segment’s primary focus is on life insurance policies and annuity products that were sold to individuals. The level of the segment’s acquisition activity is predicated upon many factors, including available capital, operating capacity, potential return on capital, and market dynamics. Policies acquired through the Acquisitions segment are typically blocks of business where no new policies are being marketed. Therefore earnings and account values are expected to decline as the result of lapses, deaths, and other terminations of coverage unless new acquisitions are made.

**Annuities**—We market fixed and variable annuity (“VA”) products. These products are primarily sold through broker-dealers, financial institutions, and independent agents and brokers.

**Stable Value Products**—We sell fixed and floating rate funding agreements directly to the trustees of municipal bond proceeds, money market funds, bank trust departments, and other institutional investors. The segment also issues funding agreements to the Federal Home Loan Bank (“FHLB”), and markets guaranteed investment contracts (“GICs”) to 401(k) and other qualified retirement savings plans. We also have an unregistered funding agreement-backed notes program which provides for offers of notes to both domestic and international institutional investors.

**Asset Protection**—We market extended service contracts, guaranteed asset protection (“GAP”) products, credit life and disability insurance, and other specialized ancillary products to protect consumers’ investments in automobiles, recreational vehicles, watercraft, and powersports. GAP products are designed to cover the difference between the scheduled loan pay-off amount and an asset’s actual cash value in the case of a total loss. Each type of specialized ancillary product protects against damage or other loss to a particular aspect of the underlying asset.

**Corporate and Other**—This segment primarily consists of net investment income on assets supporting our equity capital, unallocated corporate overhead, and expenses not attributable to the segments above (including interest on corporate debt). This segment includes earnings from several non-strategic or runoff lines of business, financing and investment related transactions, and the operations of several small subsidiaries.

**RECENT DEVELOPMENTS**

On May 1, 2018, The Lincoln National Life Insurance Company (“Lincoln Life”) completed its previously announced acquisition (the “Closing”) of Liberty Mutual Group Inc.’s (“Liberty Mutual”) Group Benefits Business and Individual Life and Annuity Business (the “Life Business”) through the acquisition of all of the issued and outstanding capital stock of Liberty Life Assurance Company of Boston (“Liberty”). In connection with the Closing and pursuant to the Master Transaction Agreement, dated January 18, 2018 (the “Master Transaction Agreement”), previously reported in our Current Report on Form 8-K filed on January 23, 2018, PLICO and Protective Life and Annuity Insurance Company (“PLAIC”), a wholly owned subsidiary of PLICO, entered into reinsurance agreements (the “Reinsurance Agreements”) and related ancillary documents (including administrative services agreements and transition services agreements) providing for the reinsurance and administration of the Life Business.

Pursuant to the Reinsurance Agreements, Liberty ceded to PLICO and PLAIC the insurance policies related to the Life Business on a 100% coinsurance basis. The aggregate ceding commission for the reinsurance of the Life Business was \$422.4 million. All policies issued in states other than New York were ceded to PLICO under a reinsurance agreement between Liberty and PLICO, and all policies issued in New York were ceded to PLAIC under a reinsurance agreement between Liberty and PLAIC. The aggregate statutory reserves of Liberty ceded to PLICO and PLAIC as of the closing of the Transaction were approximately \$13.3 billion, which amount was based on initial estimates and is subject to adjustment following the Closing. Pursuant to the terms of the Reinsurance Agreements, each of PLICO and PLAIC are required to maintain assets in trust for the benefit of Liberty to secure their respective obligations to Liberty under the Reinsurance Agreements. The trust accounts were initially funded by each of PLICO and PLAIC principally with the investment assets that were received from Liberty. Additionally, PLICO and PLAIC have each agreed to provide, on behalf of Liberty, administration and policyholder servicing of the Life Business reinsured by it pursuant to administrative services agreements between Liberty and each of PLICO and PLAIC.

## RISKS AND UNCERTAINTIES

The factors which could affect our future results include, but are not limited to, general economic conditions and the following risks and uncertainties:

### General

- we are controlled by Dai-ichi Life, which has the ability to make important decisions affecting our business;
- exposure to risks related to natural and man-made disasters, catastrophes, diseases, epidemics, pandemics, malicious acts, cyber-attacks, terrorist acts and climate change could adversely affect our operations and results;
- a disruption affecting the electronic systems of the Company or those on whom the Company relies could adversely affect our business, financial condition and results of operations;

Table of Contents

confidential information maintained in the systems of the Company or other parties upon which the Company relies could be compromised or misappropriated, damaging our business and reputation and adversely affecting our financial condition and results of operations;

our results and financial condition may be negatively affected should actual experience differ from management's assumptions and estimates;

we may not realize our anticipated financial results from our acquisitions strategy;

assets allocated to the MONY Closed Block benefit only the holders of certain policies; adverse performance of Closed Block assets or adverse experience of Closed Block liabilities may negatively affect us;

we are dependent on the performance of others;

our risk management policies, practices, and procedures could leave us exposed to unidentified or unanticipated risks, which could negatively affect our business or result in losses;

our strategies for mitigating risks arising from our day-to-day operations may prove ineffective resulting in a material adverse effect on our results of operations and financial condition;

events that damage our reputation could adversely impact our business, results of operations, or financial condition;

Financial Environment

interest rate fluctuations or sustained periods of high or low interest rates could negatively affect our interest earnings and spread income, or otherwise impact our business;

our investments are subject to market and credit risks, which could be heightened during periods of extreme volatility or disruption in financial and credit markets;

equity market volatility could negatively impact our business;

our use of derivative financial instruments within our risk management strategy may not be effective or sufficient;

credit market volatility or disruption could adversely impact our financial condition or results from operations;

our ability to grow depends in large part upon the continued availability of capital;

we could be adversely affected by a ratings downgrade or other negative action by a rating organization;

we could be forced to sell investments at a loss to cover policyholder withdrawals;

disruption of the capital and credit markets could negatively affect our ability to meet our liquidity and financing needs;

difficult general economic conditions could materially adversely affect our business and results of operations;

we may be required to establish a valuation allowance against our deferred tax assets, which could have a material adverse effect on our results of operations, financial condition, and capital position;

we could be adversely affected by an inability to access our credit facility;

we could be adversely affected by an inability to access FHLB lending;

our securities lending program may subject us to liquidity and other risks;

our financial condition or results of operations could be adversely impacted if our assumptions regarding the fair value and future performance of our investments differ from actual experience;

adverse actions of certain funds or their advisers could have a detrimental impact on our ability to sell our variable life and annuity products, or maintain current levels of assets in those products;

the amount of statutory capital or risk-based capital that we have and the amount of statutory capital or risk-based capital that we must hold to maintain our financial strength and credit ratings and meet other requirements can vary significantly from time to time and such amounts are sensitive to a number of factors outside of our control;

we operate as a holding company and depend on the ability of our subsidiaries to transfer funds to us to meet our obligations;

Industry and Regulation

the business of our company is highly regulated and is subject to routine audits, examinations and actions by regulators, law enforcement agencies, and self-regulatory organizations;

we may be subject to regulations of, or regulations influenced by, international regulatory authorities or initiatives;

NAIC actions, pronouncements and initiatives may affect our product profitability, reserve and capital requirements, financial condition or results of operations;

.

our use of captive reinsurance companies to finance statutory reserves related to our term and universal life products and to reduce volatility affecting our variable annuity products may be limited or adversely affected by regulatory action, pronouncements and interpretations;

laws, regulations and initiatives related to unreported deaths and unclaimed property and death benefits may result in operational burdens, fines, unexpected payments or escheatments;

we are subject to insurance guaranty fund laws, rules and regulations which could adversely affect our financial condition or results of operations;

we are subject to insurable interest laws, rules and regulations which could adversely affect our financial condition or results of operations;

the Healthcare Act and related regulations could adversely affect our results of operations or financial condition;

laws, rules and regulations promulgated in connection with the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act may adversely affect our results of operations or financial condition;

new and amended regulations regarding the standard of care or standard of conduct applicable to investment professionals, insurance agencies, and financial institutions that recommend or sell annuities or life insurance products may have a material adverse impact on our ability to sell annuities and other products, to retain in-force business and on our financial condition or results of operations;

we may be subject to regulation, investigations, enforcement actions, fines and penalties imposed by the SEC, FINRA and other federal and international regulators in connection with our business operations;

## Table of Contents

changes to tax law, such as the effect of the Tax Cuts and Jobs Act which was enacted on December 22, 2017, or interpretations of existing tax law could adversely affect our ability to compete with non-insurance products or reduce the demand for certain insurance products;

- financial services companies are frequently the targets of legal proceedings, including class action litigation, which could result in substantial judgments;
- the financial services and insurance industries are sometimes the target of law enforcement investigations and the focus of increased regulatory scrutiny;
- new accounting rules, changes to existing accounting rules, or the grant of permitted accounting practices to competitors could negatively impact us;
- if our business does not perform well, we may be required to recognize an impairment of our goodwill and indefinite lived intangible assets which could adversely affect our results of operations or financial condition;
- use of reinsurance introduces variability in our statements of income;
- our reinsurers could fail to meet assumed obligations, increase rates, terminate agreements, or be subject to adverse developments that could affect us;
- our policy claims fluctuate from period to period resulting in earnings volatility;
- we operate in a mature, highly competitive industry, which could limit our ability to gain or maintain our position in the industry and negatively affect profitability;
- our ability to maintain competitive unit costs is dependent upon the level of new sales and persistency of existing business; and
- we may not be able to protect our intellectual property and may be subject to infringement claims.

For more information about the risks, uncertainties, and other factors that could affect our future results, please see Part II, Item 1A of this report and our Annual Report on Form 10-K.

### CRITICAL ACCOUNTING POLICIES

Our accounting policies require the use of judgments relating to a variety of assumptions and estimates, including, but not limited to expectations of current and future mortality, morbidity, persistency, expenses, and interest rates, as well as expectations around the valuations of securities. Because of the inherent uncertainty when using the assumptions and estimates, the effect of certain accounting policies under different conditions or assumptions could be materially different from those reported in the consolidated condensed financial statements. For a complete listing of our critical accounting policies, refer to our Annual Report on Form 10-K for the year ended December 31, 2017.

### RESULTS OF OPERATIONS

Our management and Board of Directors analyzes and assesses the operating performance of each segment using "pre-tax adjusted operating income (loss)" and "after-tax adjusted operating income (loss)". Consistent with GAAP accounting guidance for segment reporting, pre-tax adjusted operating income (loss) is our measure of segment performance. Pre-tax adjusted operating income (loss) is calculated by adjusting "income (loss) before income tax," by excluding the following items:

- realized gains and losses on investments and derivatives,
- changes in the guaranteed living withdrawal benefits ("GLWB") embedded derivatives exclusive of the portion attributable to the economic cost of the GLWB,
- actual GLWB incurred claims, and
- the amortization of deferred policy acquisition costs ("DAC"), value of business acquired ("VOBA"), and certain policy liabilities that is impacted by the exclusion of these items.

After-tax adjusted operating income (loss) is derived from pre-tax adjusted operating income (loss) with the inclusion of income tax expense or benefits associated with pre-tax adjusted operating income. Income tax expense or benefits is allocated to the items excluded from pre-tax adjusted operating income (loss) at the statutory federal income tax rate for the associated period. For periods ending on and prior to December 31, 2017 a rate of 35% was used. Beginning in 2018, a statutory federal income tax rate of 21% will be used to allocate income tax expense or benefits to items excluded from pre-tax adjusted operating income (loss). Income tax expense or benefits allocated to after-tax adjusted

operating income (loss) can vary period to period based on changes in our effective income tax rate.

The items excluded from adjusted operating income (loss) are important to understanding the overall results of operations. Pre-tax adjusted operating income (loss) and after-tax adjusted operating income (loss) are not substitutes for income before income taxes or net income (loss), respectively. These measures may not be comparable to similarly titled measures reported by other companies. Our belief is that pre-tax and after-tax adjusted operating income (loss) enhances management's and the Board of Directors' understanding of the ongoing operations, the underlying profitability of each segment, and helps facilitate the allocation of resources.

In determining the components of the pre-tax adjusted operating income (loss) for each segment, premiums and policy fees, other income, benefits and settlement expenses, and amortization of DAC and VOBA are attributed directly to each operating segment. Net investment income is allocated based on directly related assets required for transacting the business of that segment. Realized investment gains (losses) and other operating expenses are allocated to the segments in a manner that most appropriately reflects the operations of that segment. Investments and other assets are allocated based on policy liabilities net of associated policy assets, while DAC/VOBA and goodwill are shown in the segments to which they are attributable.

We periodically review and update as appropriate our key assumptions used to measure certain balances related to insurance products, including future mortality, expenses, lapses, premium persistency, benefit utilization, investment yields, interest

Table of Contents

rates, and separate account fund returns. Changes to these assumptions result in adjustments which increase or decrease DAC and VOBA amortization and/or benefits and expenses. The periodic review and updating of assumptions is referred to as “unlocking.” When referring to unlocking the reference is to changes in all balance sheet components associated with these assumption changes.

The following table presents a summary of results and reconciles pre-tax adjusted operating income (loss) to consolidated income before income tax and net income:

	For The Three Months Ended September 30, 2018		For The Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
	(Dollars In Thousands)

(1) Includes amortization of DAC/VOBA and benefits and settlement expenses that are impacted by realized gains (losses).

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017 Net income for the three months ended September 30, 2018 included a \$15.0 million, or 10.6%, increase in pre-tax adjusted operating income. The increase consisted of a \$30.8 million increase in the Acquisitions segment, a \$1.1 million increase in the Asset Protection segment, and a \$6.9 million increase in the Corporate and Other segment. These increases were partially offset by a decrease of \$6.4 million in the Life Marketing segment, a \$16.4 million decrease in the Annuities segment, and a \$0.9 million decrease in the Stable Value Products segment.

Net realized losses on investments and derivatives for the three months ended September 30, 2018 was \$20.3 million as compared to \$31.1 million for the three months ended September 30, 2017.

Table of Contents

Life Marketing segment pre-tax adjusted operating income was \$2.5 million for the three months ended September 30, 2018, representing a decrease of \$6.4 million from the three months ended September 30, 2017. The decrease was primarily due to the impact of unlocking during the current quarter compared to the prior year. The segment recorded an unfavorable \$6.9 million of unlocking for the three months ended September 30, 2018, as compared to a favorable \$1.8 million of unlocking for the three months ended September 30, 2017.

Acquisitions segment pre-tax adjusted operating income was \$93.6 million for the three months ended September 30, 2018, an increase of \$30.8 million as compared to the three months ended September 30, 2017, due to the favorable impact of \$26.1 million from the Liberty reinsurance transaction completed on May 1, 2018 and a decrease in benefit and settlement expenses on the other in-force blocks of business. For the three months ended September 30, 2018, the segment recorded favorable prospective unlocking of \$0.7 million as compared to unfavorable \$3.7 million of prospective unlocking for the three months ended September 30, 2017.

Annuities segment pre-tax adjusted operating income was \$45.6 million for the three months ended September 30, 2018, as compared to \$62.0 million for the three months ended September 30, 2017, a decrease of \$16.4 million, or 26.5%. This variance was primarily the result of unfavorable unlocking and a decline in variable annuity ("VA") fee income, partially offset by increased interest spreads and a favorable change in single premium immediate annuities ("SPIA") mortality. Segment results were negatively impacted by \$4.8 million of unfavorable unlocking for the three months ended September 30, 2018, as compared to \$13.0 million of favorable unlocking for the three months ended September 30, 2017.

Stable Value segment pre-tax adjusted operating income was \$27.1 million and decreased \$0.9 million, or 3.1%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The decrease in adjusted operating earnings primarily resulted from higher interest expenses. Participating mortgage income for the three months ended September 30, 2018, was \$9.0 million as compared to \$12.4 million for the three months ended September 30, 2017. The adjusted operating spread, which excludes participating income, decreased by 10 basis points for the three months ended September 30, 2018, from the prior year, due primarily to an increase in credited interest.

Asset Protection segment pre-tax adjusted operating income was \$8.0 million, representing an increase of \$1.1 million, or 15.3%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. Service contract earnings increased \$1.3 million primarily due to favorable loss ratios and higher investment income. Earnings from the GAP and credit insurance product lines both decreased \$0.1 million primarily due to lower volume and higher losses.

The Corporate and Other segment pre-tax adjusted operating loss was \$19.9 million for the three months ended September 30, 2018, as compared to a pre-tax adjusted operating loss of \$26.9 million for the three months ended September 30, 2017. The decreased operating loss was primarily due to an increase in investment income due to higher invested asset balances and decreased interest and corporate overhead expenses.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017 Net income for the nine months ended September 30, 2018 included a \$57.1 million, or 13.5%, decrease in pre-tax adjusted operating income. The decrease consisted of a \$74.2 million decrease in the Life Marketing segment, a \$19.5 million decrease in the Annuities segment. These decreases were partially offset by a \$23.4 million increase in the Acquisitions segment, a \$1.9 million increase in the Stable Value Products segment, a \$2.3 million increase in the Asset Protection segment, and an increase of \$9.1 million in the Corporate and Other segment.

Net realized losses on investments and derivatives for the nine months ended September 30, 2018 was \$39.1 million as compared to \$74.5 million for the nine months ended September 30, 2017.

Life Marketing segment pre-tax adjusted operating loss was \$23.1 million for the nine months ended September 30, 2018, representing a decrease of \$74.2 million from the nine months ended September 30, 2017. The decrease was primarily due to the impact of unlocking and higher life claims compared to the prior year. The segment recorded an unfavorable \$19.8 million of unlocking for the nine months ended September 30, 2018, as compared to a favorable \$3.0 million of unlocking for the nine months ended September 30, 2017. Life claims were approximately \$57.3 million higher for the nine months ended September 30, 2018 when compared to the nine months ended September 30, 2017.

Acquisitions segment pre-tax adjusted operating income was \$208.2 million for the nine months ended September 30, 2018, an increase of \$23.4 million as compared to the nine months ended September 30, 2017, primarily due to the favorable impact of \$33.1 million from the Liberty reinsurance transaction completed on May 1, 2018 partly offset by the expected runoff of the in-force blocks of business. For the nine months ended September 30, 2018, the segment recorded favorable prospective unlocking of \$0.7 million as compared to unfavorable \$3.7 million of prospective unlocking for the nine months ended September 30, 2017.

Annuities segment pre-tax adjusted operating income was \$142.1 million for the nine months ended September 30, 2018, as compared to \$161.6 million for the nine months ended September 30, 2017, a decrease of \$19.5 million, or 12.1%. This variance was primarily the result of unfavorable unlocking, a decline in VA fee income, and higher non-deferred expenses, partially offset by a favorable change in SPIA mortality and increased interest spreads. Segment results were negatively impacted by \$11.7 million of unfavorable unlocking for the nine months ended September 30, 2018, as compared to \$14.9 million of favorable unlocking for the nine months ended September 30, 2017.

Table of Contents

Stable Value segment pre-tax adjusted operating income was \$76.2 million and increased \$1.9 million, or 2.6%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The increase in adjusted operating earnings primarily resulted from higher average account values. Participating mortgage income for the nine months ended September 30, 2018, was \$20.9 million as compared to \$23.6 million for the nine months ended September 30, 2017. The adjusted operating spread, which excludes participating income, decreased by 21 basis points for the nine months ended September 30, 2018, from the prior year, due primarily to an increase in credited interest.

Asset Protection segment pre-tax adjusted operating income was \$21.4 million, representing an increase of \$2.3 million, or 12.1%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. Service contract earnings increased \$2.5 million primarily due to favorable loss ratios and higher investment income. Earnings from the GAP product line increased \$0.3 million primarily due to lower expenses. Credit insurance earnings decreased \$0.4 million primarily due to lower volume and higher losses.

The Corporate and Other segment pre-tax adjusted operating loss was \$58.4 million for the nine months ended September 30, 2018, as compared to a pre-tax adjusted operating loss of \$67.5 million for the nine months ended September 30, 2017. The decreased operating loss was primarily due to an increase in investment income due to higher invested asset balances, partly offset by an increase in overhead expenses.

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017

Pre-tax adjusted operating income (loss)

Pre-tax adjusted operating income was \$2.5 million for the three months ended September 30, 2018, representing a decrease of \$6.4 million from the three months ended September 30, 2017. The decrease was primarily due to the impact of unlocking during the current quarter compared to the prior year. The segment recorded an unfavorable \$6.9 million of unlocking for the three months ended September 30, 2018, as compared to a favorable \$1.8 million of unlocking for the three months ended September 30, 2017.

Operating revenues

Total operating revenues for the three months ended September 30, 2018, increased \$24.4 million, or 5.8%, as compared to the three months ended September 30, 2017. This increase was driven by higher traditional life premiums during the current quarter compared to the prior year.

Net premiums and policy fees

Net premiums and policy fees increased by \$20.0 million, or 7.7%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, due to an increase in traditional life premiums.

Net investment income

Net investment income in the segment increased \$1.0 million, or 0.7%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, driven by higher universal life investment income of \$1.9 million, offset by lower traditional life investment income of \$0.8 million.

Other income

Other income increased \$3.4 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017 due to higher revenue in the segment's non-insurance operations.

Benefits and settlement expenses

Benefits and settlement expenses increased by \$38.2 million, or 11.0%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, due to unlocking and an increase in traditional life reserves. For the three months ended September 30, 2018, universal life unlocking increased policy benefits and settlement expenses \$12.2 million, as compared to an increase of \$1.8 million for the three months ended September

30, 2017.

69

---

Table of Contents

Amortization of DAC/VOBA

DAC/VOBA amortization decreased \$10.2 million, or 37.8%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to lower VOBA amortization in the traditional life block. For the three months ended September 30, 2018, universal life unlocking decreased amortization \$5.3 million, as compared to a decrease of \$3.6 million for the three months ended September 30, 2017.

Other operating expenses

Other operating expenses increased \$2.9 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. This increase was driven by higher commissions and lower ceding allowances, partly offset by a decrease in general and administrative expenses.

Sales

Sales for the segment increased \$1.8 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to higher traditional life sales, offset by lower sales in the universal life block. The change between products was due to a shift in sales focus from a product within the universal life block to a new term life product.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017

Pre-tax adjusted operating income (loss)

Pre-tax adjusted operating loss was \$23.1 million for the nine months ended September 30, 2018, representing a decrease of \$74.2 million from the nine months ended September 30, 2017. The decrease was primarily due to the impact of unlocking and higher life claims compared to the prior year. The segment recorded an unfavorable \$19.8 million of unlocking for the nine months ended September 30, 2018, as compared to a favorable \$3.0 million of unlocking for the nine months ended September 30, 2017. Life claims were approximately \$57.3 million higher for the nine months ended September 30, 2018 when compared to the nine months ended September 30, 2017.

Operating revenues

Total operating revenues for the nine months ended September 30, 2018, increased \$28.6 million, or 2.3%, as compared to the nine months ended September 30, 2017. This increase was driven by higher premiums and policy fees and distribution company revenue.

Net premiums and policy fees

Net premiums and policy fees increased by \$14.5 million, or 1.9%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, due to an increase in premiums and policy fees associated with continued growth in universal life and traditional life business.

Net investment income

Net investment income in the segment increased \$0.6 million, or 0.2%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, due to higher universal life investment income of \$6.1 million, offset by lower traditional life and distribution company investment income of \$4.4 million and \$0.7 million, respectively.

Other income

Other income increased \$13.5 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, due to higher revenue in the segment's non-insurance operations.

Benefits and settlement expenses

Benefits and settlement expenses increased by \$88.3 million, or 8.9%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, driven by unlocking and an increase in claims. For the nine months ended September 30, 2018, universal life unlocking increased policy benefits and settlement expenses \$20.1 million, as compared to an increase of \$1.3 million for the nine months ended September 30, 2017.

Amortization of DAC/VOBA

DAC/VOBA amortization decreased \$4.7 million, or 5.4%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, due to lower VOBA amortization in the traditional life

blocks, offset by higher VOBA amortization in the universal life block. For the nine months ended September 30, 2018, universal life unlocking decreased amortization \$0.3 million, as compared to a decrease of \$4.4 million for the nine months ended September 30, 2017.

Other operating expenses

Other operating expenses increased \$19.2 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. This increase was driven by higher commissions and lower ceding allowances.

Table of Contents

## Sales

Sales for the segment increased \$2.5 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to higher traditional life sales, offset by lower sales in the universal life block. The change between products was due to a shift in sales focus from a product within the universal life block to a new term life product.

## Reinsurance

Currently, the Life Marketing segment reinsures significant amounts of its life insurance in-force. Pursuant to the underlying reinsurance contracts, reinsurers pay allowances to the segment as a percentage of both first year and renewal premiums. Reinsurance allowances represent the amount the reinsurer is willing to pay for reimbursement of acquisition costs incurred by the direct writer of the business. A portion of reinsurance allowances received is deferred as part of DAC and a portion is recognized immediately as a reduction of other operating expenses. As the non-deferred portion of allowances reduces operating expenses in the period received, these amounts represent a net increase to adjusted operating income during that period.

Reinsurance allowances do not affect the methodology used to amortize DAC or the period over which such DAC is amortized. However, they do affect the amounts recognized as DAC amortization. DAC on universal life-type, limited-payment long duration, and investment contracts business is amortized based on the estimated gross profits of the policies in-force. Reinsurance allowances are considered in the determination of estimated gross profits, and therefore, impact DAC amortization on these lines of business. Deferred reinsurance allowances on level term business are recorded as ceded DAC, which is amortized over estimated ceded premiums of the policies in-force. Thus, deferred reinsurance allowances may impact DAC amortization. A more detailed discussion of the components of reinsurance can be found in the Reinsurance section of Note 2, Summary of Significant Accounting Policies to our consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

## Impact of reinsurance

Reinsurance impacted the Life Marketing segment line items as shown in the following table:

## Life Marketing Segment

## Line Item Impact of Reinsurance

	For The Three Months Ended September 30, 2018		For The Nine Months Ended September 30, 2018	
	2017	2018	2017	2018
	(Dollars In Thousands)			
<b>REVENUES</b>				
Reinsurance ceded		\$ (144,607)	\$ (200,616)	\$ (630,736)
<b>BENEFITS AND EXPENSES</b>				
Benefits and settlement expenses	(131,528 )	(170,468 )	(579,246 )	(504,652 )
Amortization of DAC/VOBA	(1,409 )	(1,418 )	(4,120 )	(4,270 )
Other operating expenses <sup>(1)</sup>	(45,570 )	(46,756 )	(121,420 )	(130,426 )
Total benefits and expenses	(178,507 )	(218,642 )	(704,786 )	(639,348 )
<b>NET IMPACT OF REINSURANCE</b>		\$ 33,900	\$ 18,026	\$ 74,050
				\$ 37,509
Allowances received		\$ (47,782 )	\$ (48,948 )	\$ (126,666)
Less: Amount deferred		2,212	2,192	5,246
Allowances recognized (ceded other operating expenses) <sup>(1)</sup>		\$ (45,570 )	\$ (46,756 )	\$ (121,420)

(1) Other operating expenses ceded per the income statement are equal to reinsurance allowances recognized after capitalization.

The table above does not reflect the impact of reinsurance on our net investment income. By ceding business to the assuming companies, we forgo investment income on the reserves ceded. Conversely, the assuming companies will

receive investment income on the reserves assumed, which will increase the assuming companies' profitability on the business that we cede. The net investment income impact to us and the assuming companies has not been quantified. The impact of including foregone investment income would be to substantially reduce the favorable net impact of reinsurance reflected above. We estimate that the impact of foregone investment income would be to reduce the net impact of reinsurance presented in the table above by 275% to 480%. The Life Marketing segment's reinsurance programs do not materially impact the "other income" line of our income statement.

As shown above, reinsurance generally has a favorable impact on the Life Marketing segment's operating income results. The impact of reinsurance is largely due to our quota share coinsurance program in place prior to mid-2005. Under that program,

Table of Contents

generally 90% of the segment's traditional new business was ceded to reinsurers. Since mid-2005, a much smaller percentage of overall term business has been ceded due to a change in reinsurance strategy on traditional business. In addition, since 2012, a much smaller percentage of the segment's new universal life business has been ceded. As a result of that change, the relative impact of reinsurance on the Life Marketing segment's overall results is expected to decrease over time. While the significance of reinsurance is expected to decline over time, the overall impact of reinsurance for a given period may fluctuate due to variations in mortality and the unlocking of balances.

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017 The lower ceded premium and policy fees for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, was caused primarily by lower ceded traditional life premiums of \$76.9 million, partially offset by higher universal life policy fees of \$20.9 million.

Ceded benefits and settlement expenses were lower for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, due to lower ceded traditional life reserves and claims, partly offset by higher ceded universal life reserves and claims. Traditional life ceded reserves decreased \$82.3 million and universal life ceded reserves increased \$48.2 million as compared to the three months ended September 30, 2017. Ceded traditional life claims were \$13.7 million lower and ceded universal life claims were \$8.2 million higher for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017.

Ceded amortization of DAC and VOBA decreased slightly for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017.

Ceded other operating expenses reflect the impact of reinsurance allowances net of amounts deferred.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017 The higher ceded premium and policy fees for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, was caused primarily by higher universal life policy fees of \$51.5 million, offset by lower ceded traditional life premiums of \$23.2 million.

Ceded benefits and settlement expenses were higher for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, due to higher ceded claims, partly offset by lower ceded traditional life reserves. Universal life and traditional life ceded claims were \$82.3 million and \$20.3 million higher, respectively, as compared to the nine months ended September 30, 2017. Traditional life ceded reserves decreased \$31.0 million as compared to the nine months ended September 30, 2017.

Ceded amortization of DAC and VOBA decreased slightly for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017.

Ceded other operating expenses reflect the impact of reinsurance allowances net of amounts deferred.

(3) Earned rates exclude portfolios supporting modified coinsurance and crediting rates exclude 100% cessions.

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017  
Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$93.6 million for the three months ended September 30, 2018, an increase of \$30.8 million as compared to the three months ended September 30, 2017, due to the favorable impact of \$26.1 million from the Liberty reinsurance transaction completed on May 1, 2018 and a decrease in benefit and settlement expenses on the other in-force blocks of business. For the three months ended September 30, 2018, the segment recorded favorable prospective unlocking of \$0.7 million as compared to unfavorable \$3.7 million of prospective unlocking for the three months ended September 30, 2017.

Operating revenues

Net premiums and policy fees increased \$65.5 million, or 34.2%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to the premiums associated with the Liberty reinsurance transaction more than offsetting the expected runoff of the in-force blocks of business. Net investment income increased \$141.4 million, or 77.8%, for the three months ended September 30, 2018, primarily due to the \$140.0 million impact of the Liberty reinsurance transaction.

Total benefits and expenses

Total benefits and expenses increased \$176.2 million, or 55.8%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The increase was primarily due to the Liberty reinsurance transaction, which increased benefits and expenses \$192.0 million. This was partly offset by the expected runoff of the in-force blocks of business.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017  
Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$208.2 million for the nine months ended September 30, 2018, an increase of \$23.4 million as compared to the nine months ended September 30, 2017, primarily due to the favorable impact of \$33.1 million from the Liberty reinsurance transaction completed on May 1, 2018, partly offset by the expected runoff of the in-force blocks of business. For the nine months ended September 30, 2018, the segment recorded favorable prospective unlocking of \$0.7 million as compared to unfavorable \$3.7 million of prospective unlocking for the nine months ended September 30, 2017.

Operating revenues

Net premiums and policy fees increased \$101.8 million, or 17.3%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to the premiums associated with the Liberty reinsurance

Table of Contents

transaction more than offsetting the expected runoff of the in-force blocks of business. Net investment income increased \$223.9 million, or 39.9%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, due to the \$232.9 million impact of the Liberty reinsurance transaction, partly offset by the expected runoff of the in-force blocks of business.

## Total benefits and expenses

Total benefits and expenses increased \$305.1 million, or 31.1%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The increase was primarily due to the Liberty reinsurance transaction, which increased benefits and expenses \$327.2 million.

## Reinsurance

The Acquisitions segment currently reinsures portions of both its life and annuity in-force. The cost of reinsurance to the segment is reflected in the chart shown below. A more detailed discussion of the components of reinsurance can be found in the Reinsurance section of Note 2, Summary of Significant Accounting Policies of our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

## Impact of reinsurance

Reinsurance impacted the Acquisitions segment line items as shown in the following table:

## Acquisitions Segment

## Line Item Impact of Reinsurance

	For The Three Months Ended September 30, 2018		For The Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
	(Dollars In Thousands)			
<b>REVENUES</b>				
Reinsurance ceded	\$(75,743)	\$(78,647)	\$(231,988)	\$(239,785)
<b>BENEFITS AND EXPENSES</b>				
Benefits and settlement expenses	(52,497 )	(53,233 )	(192,117 )	(207,339 )
Amortization of VOBA	(138 )	(183 )	(513 )	(440 )
Other operating expenses	(8,994 )	(9,710 )	(26,488 )	(29,272 )
Total benefits and expenses	(61,629 )	(63,126 )	(219,118 )	(237,051 )
<b>NET IMPACT OF REINSURANCE<sup>(1)</sup></b>	<b>\$(14,114)</b>	<b>\$(15,521)</b>	<b>\$(12,870 )</b>	<b>\$(2,734 )</b>

(1) Assumes no investment income on reinsurance. Foregone investment income would substantially reduce the favorable impact of reinsurance.

The segment's reinsurance programs do not materially impact the other income line of the income statement. In addition, net investment income generally has no direct impact on reinsurance cost. However, by ceding business to the assuming companies, we forgo investment income on the reserves ceded to the assuming companies. Conversely, the assuming companies will receive investment income on the reserves assumed which will increase the assuming companies' profitability on business assumed from the Company. For business ceded under modified coinsurance arrangements, the amount of investment income attributable to the assuming company is included as part of the overall change in policy reserves and, as such, is reflected in benefit and settlement expenses. The net investment income impact to us and the assuming companies has not been quantified as it is not fully reflected in our consolidated financial statements.

The net impact of reinsurance was more favorable by \$1.4 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to lower ceded revenue partly offset by lower ceded benefits and expenses. For the three months ended September 30, 2018, ceded revenues decreased by \$2.9 million, while ceded benefits and expenses decreased by \$1.5 million.

The net impact of reinsurance was less favorable by \$10.1 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to lower ceded benefits and expenses, partly offset by lower ceded revenue. For the nine months ended September 30, 2018, ceded revenues decreased by \$7.8 million, while ceded benefits and expenses decreased by \$17.9 million.

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017

Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$45.6 million for the three months ended September 30, 2018, as compared to \$62.0 million for the three months ended September 30, 2017, a decrease of \$16.4 million, or 26.5%. This variance

was primarily the result of unfavorable unlocking and a decline in VA fee income, partially offset by increased interest spreads and a favorable change in SPIA mortality. Segment results were negatively impacted by \$4.8 million of unfavorable unlocking for the three months ended September 30, 2018, as compared to \$13.0 million of favorable unlocking for the three months ended September 30, 2017.

Operating revenues

Segment operating revenues increased \$2.8 million, or 2.0%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to higher investment income, partially offset by lower VA fee income.

Table of Contents

The higher investment income related to growth in fixed account value. Average fixed account balances increased 10.8% and average variable account balances decreased 1.5% for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017.

Benefits and settlement expenses

Benefits and settlement expenses increased \$2.0 million, or 3.7%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. This increase was primarily the result of higher credited interest and unfavorable unlocking, partially offset by a favorable change in SPIA mortality. Included in benefits and settlement expenses was \$2.4 million of unfavorable unlocking for the three months ended September 30, 2018, as compared to \$0.1 million of favorable unlocking for the three months ended September 30, 2017.

Amortization of DAC and VOBA

DAC and VOBA amortization unfavorably changed by \$17.7 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The unfavorable change was primarily due to unfavorable unlocking. DAC and VOBA unlocking for the three months ended September 30, 2018, was \$2.4 million unfavorable as compared to \$12.9 million favorable for the three months ended September 30, 2017.

Other operating expenses

Other operating expenses decreased \$0.5 million, or 1.3%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. Lower non-deferred maintenance and overhead expense and commission expenses were partially offset by higher non-deferred acquisition expense.

Sales

Total sales increased \$249.2 million, or 74.6%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. Sales of variable annuities decreased \$17.9 million, or 20.6% for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to the relative competitiveness of our product within the market. Sales of fixed annuities increased by \$267.1 million, or 108.2%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to an increase in single premium deferred annuities (“SPDA”) sales.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017

Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$142.1 million for the nine months ended September 30, 2018, as compared to \$161.6 million for the nine months ended September 30, 2017, a decrease of \$19.5 million, or 12.1%. This variance was primarily the result of unfavorable unlocking, a decline in VA fee income, and higher non-deferred expenses, partially offset by a favorable change in SPIA mortality and increased interest spreads. Segment results were negatively impacted by \$11.7 million of unfavorable unlocking for the nine months ended September 30, 2018, as compared to \$14.9 million of favorable unlocking for the nine months ended September 30, 2017.

Operating revenues

Segment operating revenues increased \$9.8 million, or 2.3%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to higher investment income. The higher investment income related to growth in fixed account value. Average fixed account balances increased 8.5% and average variable account balances were relatively unchanged for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017.

Benefits and settlement expenses

Benefits and settlement expenses decreased \$0.3 million, or 0.2%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. This decrease was primarily the result of a favorable change in SPIA mortality, partially offset by higher credited interest and unfavorable unlocking. Included in benefits and settlement expenses was \$3.5 million of unfavorable unlocking for the nine months ended September 30, 2018, as compared to \$0.2 million of favorable unlocking for the nine months ended September 30, 2017.

Amortization of DAC and VOBA

DAC and VOBA amortization unfavorably changed by \$26.6 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The unfavorable change was primarily due to unfavorable unlocking. DAC and VOBA unlocking for the nine months ended September 30, 2018, was \$8.2 million unfavorable as compared to \$14.7 million favorable for the nine months ended September 30, 2017.

Other operating expenses

Other operating expenses increased \$3.1 million, or 2.8%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. Increases in non-deferred acquisition expense and maintenance and overhead expense were partially offset by lower non-deferred commission expense.

Table of Contents

Sales

Total sales increased \$697.8 million, or 61.8%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. Sales of variable annuities decreased \$93.5 million, or 28.9% for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to the relative competitiveness of our product within the market. Sales of fixed annuities increased by \$791.3 million, or 98.1%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to an increase in SPDA sales.

Table of Contents

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017

Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$27.1 million and decreased \$0.9 million, or 3.1%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The decrease in adjusted operating earnings primarily resulted from higher interest expenses. Participating mortgage income for the three months ended September 30, 2018, was \$9.0 million as compared to \$12.4 million for the three months ended September 30, 2017. The adjusted operating spread, which excludes participating income, decreased by 10 basis points for the three months ended September 30, 2018, from the prior year, due primarily to an increase in credited interest.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017

Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$76.2 million and increased \$1.9 million, or 2.6%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The increase in adjusted operating earnings primarily resulted from higher average account values. Participating mortgage income for the nine months ended September 30, 2018, was \$20.9 million as compared to \$23.6 million for the nine months ended September 30, 2017. The adjusted operating spread, which excludes participating income, decreased by 21 basis points for the nine months ended September 30, 2018, from the prior year, due primarily to an increase in credited interest.

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017  
Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$8.0 million, representing an increase of \$1.1 million, or 15.3%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. Service contract earnings increased \$1.3 million primarily due to favorable loss ratios and higher investment income. Earnings from

the GAP and credit insurance product lines both decreased \$0.1 million primarily due to lower volume and higher losses.

Table of Contents

Net premiums and policy fees

Net premiums and policy fees decreased \$3.7 million, or 9.4%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. GAP premiums decreased \$4.0 million and credit insurance premiums decreased \$0.4 million as a result of lower sales. This was partly offset by a small increase in service contract premiums of \$0.8 million.

Other income

Other income decreased \$1.7 million, or 4.4%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The change was primarily due to lower volume and the impact of an accounting change implemented in conjunction with the adoption of ASU No. 2014-09.

Benefits and settlement expenses

Benefits and settlement expenses decreased \$3.5 million, or 10.6%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. GAP claims decreased \$3.7 million due to lower volume. Service contract claims decreased \$0.1 million due to lower loss ratios. Credit insurance claims increased \$0.4 million due to higher loss ratios.

Amortization of DAC and VOBA and Other operating expenses

Amortization of DAC and VOBA increased \$11.3 million and other operating expenses decreased \$13.4 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The changes were primarily due to the impact of an accounting change implemented in conjunction with the adoption of ASU No. 2014-09.

Sales

Total segment sales decreased \$13.1 million, or 9.4%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. GAP sales decreased \$9.3 million due to discontinuing the relationship with a significant distribution partner. Service contract sales decreased \$2.9 million due to lower volume resulting from the impact of previous price increases. Credit insurance sales decreased \$0.9 million due to decreasing demand for the product.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017

Pre-tax adjusted operating income

Pre-tax adjusted operating income was \$21.4 million, representing an increase of \$2.3 million, or 12.1%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. Service contract earnings increased \$2.5 million primarily due to favorable loss ratios and higher investment income. Earnings from the GAP product line increased \$0.3 million primarily due to lower expenses. Credit insurance earnings decreased \$0.4 million primarily due to lower volume and higher losses.

Net premiums and policy fees

Net premiums and policy fees decreased \$10.0 million, or 8.6%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. GAP premiums decreased \$8.6 million and credit insurance premiums decreased \$2.0 million as a result of lower sales. This was partly offset by a small increase in service contract premiums of \$0.6 million.

Other income

Other income decreased \$5.0 million, or 4.5%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The change was primarily due to lower volume and the impact of an accounting change implemented in conjunction with the adoption of ASU No. 2014-09.

Benefits and settlement expenses

Benefits and settlement expenses decreased \$8.8 million, or 9.2%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. GAP claims decreased \$6.3 million due to lower volume. Service contract claims decreased \$2.6 million due to lower loss ratios. Credit insurance claims increased \$0.1 million due to higher loss ratios.

Amortization of DAC and VOBA and Other operating expenses

Amortization of DAC and VOBA increased \$34.2 million and other operating expenses decreased \$40.5 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The changes

were primarily due to the impact of an accounting change implemented in conjunction with the adoption of ASU No. 2014-09.

Sales

Total segment sales decreased \$44.5 million, or 10.7%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. GAP sales decreased \$35.7 million due to discontinuing the relationship with a significant distribution partner. Service contract sales decreased \$6.4 million due to lower volume resulting from the impact of previous price increases. Credit insurance sales decreased \$2.4 million due to decreasing demand for the product.

Table of Contents

## Reinsurance

The majority of the Asset Protection segment's reinsurance activity relates to the cession of single premium credit life and credit accident and health insurance, vehicle service contracts, and guaranteed asset protection insurance to producer affiliated reinsurance companies ("PARCs"). These arrangements are coinsurance contracts ceding the business on a first dollar quota share basis at 100% to limit our exposure and allow the PARCs to share in the underwriting income of the product. Reinsurance contracts do not relieve us from our obligations to our policyholders. A more detailed discussion of the components of reinsurance can be found in the Reinsurance section of Note 2, Summary of Significant Accounting Policies, to our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

## Impact of Reinsurance

Reinsurance impacted the Asset Protection segment line items as shown in the following table:

## Asset Protection Segment

## Line Item Impact of Reinsurance

	For The Three Months Ended September 30, 2018		For The Nine Months Ended September 30, 2018

Other operating expenses	133	(845 )	(1,154 )	(3,126 )
Total benefits and expenses	(22,170 )	(25,939 )	(67,216 )	(68,242 )
<b>NET IMPACT OF REINSURANCE<sup>(1)</sup></b>	<b>\$(26,812)</b>	<b>\$(19,928)</b>	<b>\$(75,728 )</b>	<b>\$(74,156 )</b>

(1) Assumes no investment income on reinsurance. Foregone investment income would substantially change the impact of reinsurance.

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017 Reinsurance premiums ceded increased \$3.1 million, or 6.8%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The increase was primarily due to an increase in ceded service contract premiums.

Benefits and settlement expenses ceded decreased \$3.0 million, or 12.3%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The decrease was primarily due to lower ceded losses in the GAP product line, as a result of Hurricane Harvey claims incurred in 2017 somewhat offset by higher ceded losses in the service contract line.

Amortization of DAC and VOBA ceded increased \$0.2 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, as the result of changes in ceded activity in all product lines.

Other operating expenses ceded decreased \$1.0 million for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, as a result of changes in ceded activity in all product lines.

Net investment income has no direct impact on reinsurance cost. However, by ceding business to the assuming companies, we forgo investment income on the reserves ceded. Conversely, the assuming companies will receive investment income on the reserves assumed which generally will increase the assuming companies' profitability on business we cede. The net investment income impact to us and the assuming companies has not been quantified as it is not reflected in our consolidated financial statements.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017 Reinsurance premiums ceded increased \$0.5 million, or 0.4%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The increase was primarily due to an increase in ceded

service contract premiums offset by declines in ceded GAP and credit premiums.

Benefits and settlement expenses ceded increased \$0.3 million, or 0.4%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The increase was due to higher ceded losses in the service contract product line offset by lower ceded losses in the GAP product line as a result of Hurricane Harvey claims incurred in 2017.

Amortization of DAC and VOBA ceded increased \$0.7 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, as the result of changes in ceded activity in the service contract and credit product

Table of Contents

lines. Other operating expenses ceded decreased \$2.0 million for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, as a result of changes in ceded activity in all product lines. Net investment income has no direct impact on reinsurance cost. However, by ceding business to the assuming companies, we forgo investment income on the reserves ceded. Conversely, the assuming companies will receive investment income on the reserves assumed which generally will increase the assuming companies' profitability on business we cede. <b>PRE-TAX ADJUSTED OPERATING INCOME (LOSS)</b>	<b>\$(19,937)</b>	<b>\$(26,870)</b>	<b>\$(58,413)</b>	<b>\$(67,466)</b>

For The Three Months Ended September 30, 2018, as compared to The Three Months Ended September 30, 2017

Pre-tax adjusted operating income (loss)

Pre-tax adjusted operating loss was \$19.9 million for the three months ended September 30, 2018, as compared to a pre-tax adjusted operating loss of \$26.9 million for the three months ended September 30, 2017. The decreased operating loss was primarily due to an increase in investment income due to higher invested asset balances and decreased interest and corporate overhead expenses.

Operating revenues

Net investment income for the segment increased \$5.7 million, or 11.0%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017. The increase was primarily due to an increase in invested asset balances.

Total benefits and expenses

Total benefits and expenses decreased \$1.1 million or 1.3%, for the three months ended September 30, 2018, as compared to the three months ended September 30, 2017, primarily due to decreases in interest expense and corporate overhead expenses.

For The Nine Months Ended September 30, 2018, as compared to The Nine Months Ended September 30, 2017

Pre-tax adjusted operating income (loss)

Pre-tax adjusted operating loss was \$58.4 million for the nine months ended September 30, 2018, as compared to a pre-tax adjusted operating loss of \$67.5 million for the nine months ended September 30, 2017. The decreased operating loss was primarily due to an increase in investment income due to higher invested asset balances, partially offset by an increase in overhead expenses.

Table of Contents

Operating revenues

Net investment income for the segment increased \$19.5 million, or 12.4%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017. The increase was primarily due to an increase in invested asset balances.

Total benefits and expenses

Total benefits and expenses increased \$10.1 million or 4.3%, for the nine months ended September 30, 2018, as compared to the nine months ended September 30, 2017, primarily due to increases in interest expense and corporate overhead expenses.

Table of Contents

## CONSOLIDATED INVESTMENTS

As of September 30, 2018, our investment portfolio was approximately \$66.6 billion. The types of assets in which we may invest are influenced by various state insurance laws which prescribe qualified investment assets. Within the parameters of these laws, we invest in assets giving consideration to such factors as liquidity and capital needs, investment quality, investment return, matching of assets and liabilities, and the overall composition of the investment portfolio by asset type and credit exposure.

Within our fixed maturity investments, we maintain portfolios classified as “available-for-sale”, “trading”, and “held-to-maturity”. We purchase our available-for-sale investments with the intent to hold to maturity by purchasing investments that match future cash flow needs. However, we may sell any of our available-for-sale and trading investments to maintain proper matching of assets and liabilities. Accordingly, we classified \$49.9 billion, or 90.7%, of our fixed maturities as “available-for-sale” as of September 30, 2018. These securities are carried at fair value on our consolidated condensed balance sheets. Changes in fair value for our available-for-sale portfolio, net of tax and the related impact on certain insurance assets and liabilities are recorded directly to shareowner’s equity. Declines in fair value that are other-than-temporary are recorded as realized losses in the consolidated condensed statements of income, net of any applicable non-credit component of the loss, which is recorded as an adjustment to other comprehensive income (loss).

Trading securities are carried at fair value and changes in fair value are recorded on the income statement as they occur. Our trading portfolio accounted for \$2.5 billion, or 4.5%, of our fixed maturities and \$55.9 million of short-term investments as of September 30, 2018. Changes in fair value on the Modco trading portfolios, including gains and losses from sales, are passed to third party reinsurers through the contractual terms of the related reinsurance arrangements. Partially offsetting these amounts are corresponding changes in the fair value of the embedded derivative associated with the underlying reinsurance arrangement.

Fixed maturities with respect to which we have both the positive intent and ability to hold to maturity are classified as “held-to-maturity”. We classified \$2.7 billion, or 4.8%, of our fixed maturities as “held-to-maturity” as of September 30, 2018. These securities are carried at amortized cost on our consolidated condensed balance sheets.

Fair values for private, non-traded securities are determined as follows: 1) we obtain estimates from independent pricing services and 2) we estimate fair value based upon a comparison to quoted issues of the same issuer or issues of other issuers with similar terms and risk characteristics. We analyze the independent pricing services valuation methodologies and related inputs, including an assessment of the observability of market inputs. Upon obtaining this information related to fair value, management makes a determination as to the appropriate valuation amount. For more information about the fair values of our investments please refer to Note 6, Fair Value of Financial Instruments, to the financial statements.

The following table presents the reported values of our invested assets:

	As of			
	September 30, 2018		December 31, 2017	
	(Dollars In Thousands)			
Publicly issued bonds (amortized cost: 2018 - \$40,864,922; 2017 - \$30,880,196)	\$39,105,287	58.7 %	\$30,860,541	56.5 %
Privately issued bonds (amortized cost: 2018 - \$16,246,587; 2017 - \$12,984,569)	15,839,478	23.8	12,939,997	23.7
Preferred stock (amortized cost: 2018 - \$97,527; 2017 - \$97,690)	90,304	0.1	94,418	0.1
Fixed maturities	55,035,069	82.6 %	43,894,956	80.3 %
Equity securities (cost: 2018 - \$663,338; 2017 - \$740,813)	662,880	1.0	754,360	1.4
Mortgage loans	7,572,349	11.4	6,817,723	12.5
Investment real estate	7,147	—	8,355	—
Policy loans	1,703,462	2.6	1,615,615	3.0
Other long-term investments	1,051,719	1.6	915,595	1.7
Short-term investments	532,053	0.8	615,210	1.1
Total investments	\$66,564,679	100.0 %	\$54,621,814	100.0 %

Included in the preceding table are \$2.5 billion and \$2.7 billion of fixed maturities and \$55.9 million and \$56.3 million of short-term investments classified as trading securities as of September 30, 2018 and December 31, 2017, respectively. All of the fixed maturities in the trading portfolio are invested assets that are held pursuant to Modco arrangements under which the economic risks and benefits of the investments are passed to third party reinsurers. Also included above are \$2.7 billion and \$2.7 billion of securities classified as held-to-maturity as of September 30, 2018 and December 31, 2017, respectively.

## Fixed Maturity Investments

As of September 30, 2018, our fixed maturity investment holdings were approximately \$55.0 billion. The approximate percentage distribution of our fixed maturity investments by quality rating is as follows:

Rating	As of			
	September 30, 2018		December 31, 2017	
	(Dollars In Thousands)			
AAA	\$6,666,135	12.1 %	\$5,740,115	13.1 %
AA	6,220,422	11.3	3,577,512	8.2
A	17,970,336	32.6	13,969,721	31.8
BBB	19,677,646	35.8	15,752,970	35.9
Below investment grade	1,846,925	3.4	2,135,734	4.8
Not rated <sup>(1)</sup>	2,653,605	4.8	2,718,904	6.2
	\$55,035,069	100.0%	\$43,894,956	100.0%

(1) Our “not rated” securities are \$2.7 billion or 4.8% of our fixed maturity investments, of held-to-maturity securities issued by affiliates of the Company which are considered variable interest entities (“VIEs”) and are discussed in Note 5, Investment Operations, to the consolidated condensed financial statements. We are not the primary beneficiary of these entities and thus these securities are not eliminated in consolidation. These securities are collateralized by non-recourse funding obligations issued by captive insurance companies that are wholly owned subsidiaries of the Company.

We use various Nationally Recognized Statistical Rating Organizations’ (“NRSRO”) ratings when classifying securities by quality ratings. When the various NRSRO ratings are not consistent for a security, we use the second-highest convention in assigning the rating. When there are no such published ratings, we assign a rating based on the statutory accounting rating system if such ratings are available.

The distribution of our fixed maturity investments by type is as follows:

Type	As of	
	September 30, 2018	December 31, 2017
	(Dollars In Thousands)	
Corporate securities	\$38,591,577	\$31,400,193

A portion of our bond portfolio is invested in residential mortgage-backed securities (“RMBS”), commercial mortgage-backed securities (“CMBS”), and other asset-backed securities (collectively referred to as asset-backed securities or “ABS”). ABS are securities that are backed by a pool of assets. These holdings as of September 30, 2018, were approximately \$7.6 billion. Mortgage-backed securities (“MBS”) are constructed from pools of mortgages and may have cash flow volatility as a result of changes in the rate at which prepayments of principal occur with respect to the underlying loans. Excluding limitations on access

Table of Contents

to lending and other extraordinary economic conditions, prepayments of principal on the underlying loans can be expected to accelerate with decreases in market interest rates and diminish with increases in interest rates.

The following tables include the percentage of our collateral grouped by rating category and categorizes the estimated fair value by year of security origination for our Prime, Non-Prime, Commercial, and Other asset-backed securities as of September 30, 2018 and December 31, 2017.

## (1) Included in Residential Mortgage-Backed securities

The majority of our RMBS holdings as of September 30, 2018, were super senior or senior bonds in the capital structure. Our total non-agency portfolio has a weighted-average life of 13.77 years. The following table categorizes the weighted-average life for our non-agency portfolio, by category of material holdings, as of September 30, 2018:

## Weighted-Average

Non-agency portfolio	Life
Prime	13.82
Alt-A	4.31
Sub-prime	3.17

## Mortgage Loans

We invest a portion of our investment portfolio in commercial mortgage loans. As of September 30, 2018, our mortgage loan holdings were approximately \$7.6 billion. We have specialized in making loans on either credit-oriented commercial properties or credit-anchored strip shopping centers and apartments. Our underwriting procedures relative to our commercial loan portfolio are based, in our view, on a conservative and disciplined approach. We concentrate on a small number of commercial real estate asset types associated with the necessities of life (retail, multi-family, senior living, professional office buildings, and warehouses). We believe that these asset

types tend to weather economic downturns better than other commercial asset classes in which we have chosen not to participate. We believe this disciplined approach has helped to maintain a relatively low delinquency and foreclosure rate throughout our history. The majority of our mortgage loans portfolio was underwritten and funded by us. From time to time, we may acquire loans in conjunction with an acquisition.

Our commercial mortgage loans are stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Amortization of premiums and discounts is recorded using the effective yield method. Interest income, amortization of premiums and discounts, and prepayment fees are reported in net investment income.

Table of Contents

Certain of the mortgage loans have call options that occur within the next 11 years. However, if interest rates were to significantly increase, we may be unable to exercise the call options on our existing mortgage loans commensurate with the significantly increased market rates. As of September 30, 2018, assuming the loans are called at their next call dates, approximately \$80.7 million of principal would become due for the remainder of 2018, \$933.4 million in 2019 through 2023, \$91.8 million in 2024 through 2028, and \$1.9 million thereafter.

We offer a type of commercial mortgage loan under which we will permit a loan-to-value ratio of up to 85% in exchange for a participating interest in the cash flows from the underlying real estate. As of September 30, 2018 and December 31, 2017, approximately \$757.0 million and \$669.3 million, respectively, of our total mortgage loans principal balance have this participation feature. Cash flows received as a result of this participation feature are recorded as interest income. During the three and nine months ended September 30, 2018 and 2017, we recognized \$9.5 million, \$22.0 million, \$14.2 million, and \$25.7 million, respectively, of participating mortgage loan income.

We record mortgage loans net of an allowance for credit losses. This allowance is calculated through analysis of specific loans that have indicators of potential impairment based on current information and events. As of September 30, 2018, there was an allowance for mortgage loan credit loss of \$1.5 million and as of December 31, 2017, there was no allowance for mortgage loan credit losses. While our mortgage loans do not have quoted market values, as of September 30, 2018, we estimated the fair value of our mortgage loans to be \$7.3 billion (using an internal fair value model which calculates the value of most loans by using the loan's discounted cash flows to the loan's call or maturity date), which was approximately 3.13% less than the amortized cost, less any related loan loss reserve.

At the time of origination, our mortgage lending criteria targets that the loan-to-value ratio on each mortgage is 75% or less. We target projected rental payments from credit anchors (i.e., excluding rental payments from smaller local tenants) of 70% of the property's projected operating expenses and debt service.

As of September 30, 2018, \$3.0 million of the Company's invested assets consisted of nonperforming mortgage loans, restructured mortgage loans, or mortgage loans that were foreclosed and were converted to real estate properties. For all mortgage loans, the impact of troubled debt restructurings is reflected in our investment balance and in the allowance for mortgage loan credit losses. During the nine months ended September 30, 2018, we recognized one troubled debt restructuring as a result of granting a concession to a borrower which included loan terms unavailable from other lenders. This concession was the result of an agreement between the creditor and the debtor, and we did not identify any loans whose principal was permanently impaired.

Our mortgage loan portfolio consists of two categories of loans: 1) those not subject to a pooling and servicing agreement and 2) those subject to a contractual pooling and servicing agreement. As of September 30, 2018, the Company held \$3.0 million of mortgage loans not subject to a pooling and servicing agreement that were nonperforming mortgage loans, restructured, or mortgage loans that were foreclosed and were converted to real estate properties. We did not foreclose on any nonperforming loans not subject to a pooling and servicing agreement during the nine months ended September 30, 2018.

As of September 30, 2018, none of the loans subject to a pooling and servicing agreement were nonperforming or restructured. We did not foreclose on any nonperforming loans subject to a pooling and servicing agreement during the nine months ended September 30, 2018.

We do not expect these investments to adversely affect our liquidity or ability to maintain proper matching of assets and liabilities.

It is our policy to cease to carry accrued interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is our general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. For loans subject to a pooling and servicing agreement, there are certain additional restrictions and/or requirements related to workout proceedings, and as such, these loans may have different attributes and/or circumstances affecting the status of delinquency or categorization of those in nonperforming status.

#### Unrealized Gains and Losses — Available-for-Sale Securities

The information presented below relates to investments at a certain point in time and is not necessarily indicative of the status of the portfolio at any time after September 30, 2018, the balance sheet date. Information about unrealized

gains and losses is subject to rapidly changing conditions, including volatility of financial markets and changes in interest rates. Management considers a number of factors in determining if an unrealized loss is other-than-temporary, including the expected cash to be collected and the intent, likelihood, and/or ability to hold the security until recovery. Consistent with our long-standing practice, we do not utilize a “bright line test” to determine other-than-temporary impairments. On a quarterly basis, we perform an analysis on every security with an unrealized loss to determine if an other-than-temporary impairment has occurred. This analysis includes reviewing several metrics including collateral, expected cash flows, ratings, and liquidity. Furthermore, since the timing of recognizing realized gains and losses is largely based on management’s decisions as to the timing and selection of investments to be sold, the tables and information provided below should be considered within the context of the overall unrealized gain/(loss) position of the portfolio. We had an overall net unrealized loss of \$2.2 billion, prior to tax and the related impact of certain insurance assets and liabilities offsets, as of September 30, 2018, and an overall net unrealized gain of \$36.0 million as of December 31, 2017.

Table of Contents

For fixed maturity securities held that are in an unrealized loss position as of September 30, 2018, the fair value, amortized cost, unrealized loss, and total time period that the security has been in an unrealized loss position are presented in the table below:

	Fair Value	% Fair Value	Amortized Cost	% Amortized Cost	Unrealized Loss	% Unrealized Loss
(Dollars In Thousands)						
<= 90 days	\$12,288,063	28.5 %	\$12,492,886	27.5 %	\$(204,823)	8.6 %
>90 days but <= 180 days	4,452,728	10.3	4,599,552	10.1	(146,824)	6.2

Below investment grade	924,544	2.1 %	1,021,420	2.2 %	(96,876)	4.1 %
Total	\$43,097,949	100.0%	\$45,468,660	100.0 %	\$(2,370,711)	100.0 %

As of September 30, 2018, the Barclays Investment Grade Index was priced at 101.8 bps versus a 10 year average of 164.9 bps. Similarly, the Barclays High Yield Index was priced at 333.5 bps versus a 10 year average of 620.7 bps. As of September 30, 2018, the five, ten, and thirty-year U.S. Treasury obligations were trading at levels of 3.0%, 3.1%, and 3.2%, as compared to 10 year averages of 1.6%, 2.5%, and 3.3%, respectively.

As of September 30, 2018, 95.9% of the unrealized loss was associated with securities that were rated investment grade. We have examined the performance of the underlying collateral and cash flows and expect that our investments will continue to perform in accordance with their contractual terms. Factors such as credit enhancements within the deal structures and the underlying collateral performance/characteristics support the recoverability of the investments. Based on the factors discussed, we do not consider these unrealized loss positions to be other-than-temporary.

However, from time to time, we may sell securities in the ordinary course of managing our portfolio to meet diversification, credit quality, yield enhancement, asset/liability management, and liquidity requirements.

Expectations that investments in mortgage-backed and asset-backed securities will continue to perform in accordance with their contractual terms are based on assumptions that a market participant would use in determining the current fair value. It is reasonably possible that the underlying collateral of these investments will perform worse than current market expectations and that such an event may lead to adverse changes in the cash flows on our holdings of these types of securities. This could lead to potential future write-downs within our portfolio of mortgage-backed and asset-backed securities. Expectations that our investments in corporate securities and/or debt obligations will continue to perform in accordance with their contractual terms are based on evidence gathered through our normal credit surveillance process. Although we do not anticipate such events, it is reasonably possible that issuers of our

investments in corporate securities will perform worse than current expectations. Such events may lead us to recognize potential future write-downs within our portfolio of corporate securities. It is also possible that such unanticipated events would lead us to dispose of those certain holdings and recognize the effects of any such market movements in our financial statements.

As of September 30, 2018, there were estimated gross unrealized losses of \$0.3 million related to our mortgage-backed securities collateralized by Alt-A mortgage loans. Gross unrealized losses in our securities collateralized by Alt-A residential mortgage loans as of September 30, 2018, were primarily the result of continued widening spreads, representing marketplace

Table of Contents

uncertainty arising from higher defaults in Alt-A residential mortgage loans and rating agency downgrades of securities collateralized by Alt-A residential mortgage loans.

As of September 30, 2018, we held a total of 4,367 positions that were in an unrealized loss position. Included in that amount were 160 positions of below investment grade securities with a fair value of \$924.5 million that were in an unrealized loss position. Total unrealized losses related to below investment grade securities were \$96.9 million, \$75.1 million of which had been in an unrealized loss position for more than twelve months. Below investment grade securities in an unrealized loss position were 1.4% of invested assets.

As of September 30, 2018, securities in an unrealized loss position that were rated as below investment grade represented 2.1% of the total fair value and 4.1% of the total unrealized loss. We have the ability and intent to hold these securities to maturity. After a review of each security and its expected cash flows, we believe the decline in market value to be temporary.

The following table includes the fair value, amortized cost, unrealized loss, and total time period that the security has been in an unrealized loss position for all below investment grade securities as of September 30, 2018:

	Fair Value	% Fair Value	Amortized Cost	% Amortized Cost	Unrealized Loss	% Unrealized Loss

## Risk Management and Impairment Review

We monitor the overall credit quality of our portfolio within established guidelines. The following table includes our available-for-sale fixed maturities by credit rating as of September 30, 2018:

Rating	Fair Value (Dollars In Thousands)	Percent of Fair Value
AAA	\$ 6,375,012	12.8 %
AA	5,919,775	11.9
A	17,096,659	34.3
BBB	18,846,917	37.7
Investment grade	48,238,363	96.7
BB	1,202,041	2.4
B	283,471	0.6
CCC or lower	185,833	0.3
Below investment grade	1,671,345	3.3
Total	\$ 49,909,708	100.0 %

Not included in the table above are \$2.3 billion of investment grade and \$175.6 million of below investment grade fixed maturities classified as trading securities and \$2.7 billion of fixed maturities classified as held-to-maturity.

Limiting bond exposure to any creditor group is another way we manage credit risk. We held no credit default swaps on the positions listed below as of September 30, 2018. The following table summarizes our ten largest fixed maturity exposures to an individual creditor group as of September 30, 2018:

Creditor	Fair Value of		
	Funded Securities	Unfunded Exposures	Total Fair Value
	(Dollars In Millions)		
AT&T Inc.	\$325.5	\$ —	\$ 325.5
Federal Home Loan Bank	320.2	—	320.2
Wells Fargo & Co.	258.3	0.7	259.0
Berkshire Hathaway	254.4	—	254.4
Duke Energy Corp.	245.4	—	245.4
Morgan Stanley	236.3	—	236.3
Goldman Sachs Group Inc.	226.7	—	226.7
Bank of America Corp.	224.6	1.7	226.3
JPMorgan Chase & Co.	217.2	7.7	224.9
Exelon Corp.	223.0	—	223.0
Total	\$2,531.6	\$ 10.1	\$ 2,541.7

Determining whether a decline in the current fair value of invested assets is an other-than-temporary decline in value is both objective and subjective, and can involve a variety of assumptions and estimates, particularly for investments that are not actively traded in established markets. We review our positions on a monthly basis for possible credit concerns and review our current exposure, credit enhancement, and delinquency experience.

Management considers a number of factors when determining the impairment status of individual securities. These include the economic condition of various industry segments and geographic locations and other areas of identified risks. Since it is possible for the impairment of one investment to affect other investments, we engage in ongoing risk management to safeguard against and limit any further risk to our investment portfolio. Special attention is given to correlative risks within specific industries, related parties, and business markets.

For certain securitized financial assets with contractual cash flows, including RMBS, CMBS, and other asset-backed securities (collectively referred to as asset-backed securities or “ABS”), GAAP requires us to periodically update our best estimate of cash flows over the life of the security. If the fair value of a securitized financial asset is less than its cost or amortized cost and there has been a decrease in the present value of the expected cash flows since the last

revised estimate, considering both timing and amount, an other-than-temporary impairment charge is recognized. Estimating future cash flows is a quantitative and qualitative process that incorporates information received from third party sources along with certain internal assumptions and judgments regarding the future performance of the underlying collateral. Projections of expected future cash flows may change based upon

Table of Contents

new information regarding the performance of the underlying collateral. In addition, we consider our intent and ability to retain a temporarily depressed security until recovery.

Securities in an unrealized loss position are reviewed at least quarterly to determine if an other-than-temporary impairment is present based on certain quantitative and qualitative factors. We consider a number of factors in determining whether the impairment is other-than-temporary. These include, but are not limited to: 1) actions taken by rating agencies, 2) default by the issuer, 3) the significance of the decline, 4) an assessment of our intent to sell the security (including a more likely than not assessment of whether we will be required to sell the security) before recovering the security's amortized cost, 5) the time period during which the decline has occurred, 6) an economic analysis of the issuer's industry, and 7) the financial strength, liquidity, and recoverability of the issuer. Management performs a security-by-security review each quarter in evaluating the need for any other-than-temporary impairments. Although no set formula is used in this process, the investment performance, collateral position, and continued viability of the issuer are significant measures considered, along with an analysis regarding our expectations for recovery of the security's entire amortized cost basis through the receipt of future cash flows. Based on our analysis, for the nine months ended September 30, 2018, we recognized approximately \$3.7 million of credit related impairments on investment securities in an unrealized loss position that were other-than-temporarily impaired resulting in a charge to earnings.

There are certain risks and uncertainties associated with determining whether declines in fair values are other-than-temporary. These include significant changes in general economic conditions and business markets, trends in certain industry segments, interest rate fluctuations, rating agency actions, changes in significant accounting estimates and assumptions, commission of fraud, and legislative actions. We continuously monitor these factors as they relate to the investment portfolio in determining the status of each investment.

We have deposits with certain financial institutions which exceed federally insured limits. We have reviewed the creditworthiness of these financial institutions and believe that there is minimal risk of a material loss.

Certain European countries have experienced varying degrees of financial stress, which could have a detrimental impact on regional or global economic conditions and on sovereign and non-sovereign obligations. The chart shown below includes our non-sovereign fair value exposures in these countries as of September 30, 2018. As of September 30, 2018, we had no material unfunded exposure and had no material direct sovereign exposure.

Realized gains and losses on investments reflect portfolio management activities designed to maintain proper matching of assets and liabilities and to enhance long-term investment portfolio performance. The change in net realized investment gains (losses), excluding impairments and Modco trading portfolio activity during the three and nine months ended September 30, 2018, primarily reflects the normal operation of our asset/liability program within the context of the changing interest rate and spread environment.

Table of Contents

Realized losses are comprised of other-than-temporary impairments and actual sales of investments. These other-than-temporary impairments resulted from our analysis of circumstances and our belief that credit events, loss severity, changes in credit enhancement, and/or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to these investments. These other-than-temporary impairments are presented in the chart below:

	For The Three Months Ended September 30, 2018		For The Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
	(Dollars In Thousands)			
Alt-A MBS	\$—	\$—	\$—	\$—
Other MBS	14	6	50	44
Corporate securities	—	—	3,614	7,948
Equities	—	—	—	2,630
Other	—	267	—	267
Total	\$14	\$273	\$3,664	\$10,889

As previously discussed, management considers several factors when determining other-than-temporary impairments. Although we purchase securities with the intent to hold them until maturity, we may change our position as a result of a change in circumstances. Any such decision is consistent with our classification of all but a specific portion of our investment portfolio as available-for-sale. For the nine months ended September 30, 2018, we sold securities in an unrealized loss position with a fair value of \$380.5 million. For such securities, the proceeds, realized loss, and total time period that the security had been in an unrealized loss position are presented in the table below:

	Proceeds	% Proceeds	Realized Loss	% Realized Loss
	(Dollars In Thousands)			
<= 90 days	\$286,478	75.3 %	\$ (6,509 )	42.5 %
>90 days but <= 180 days	67,310	17.7	(6,812 )	44.5
>180 days but <= 270 days	1,582	0.4	(102 )	0.7
>270 days but <= 1 year	1,843	0.5	(73 )	0.5
>1 year	23,280	6.1	(1,796 )	11.8
Total	\$380,493	100.0 %	\$ (15,292 )	100.0 %

For the three and nine months ended September 30, 2018, we sold securities in an unrealized loss position with a fair value (proceeds) of \$122.3 million and \$380.5 million. The losses realized on the sale of these securities were \$5.4 million and \$15.3 million. We made the decision to exit these holdings in conjunction with our overall asset/liability management process.

For the three and nine months ended September 30, 2018, we sold securities in an unrealized gain position with a fair value of \$306.6 million and \$914.9 million. The gains realized on the sale of these securities were \$3.4 million and \$21.6 million.

The \$0.3 million of other realized losses recognized for the three months ended September 30, 2018, included \$0.5 million of realized losses associated with our mortgage loan portfolio and partnership gains of \$0.2 million, respectively.

The \$1.5 million of other realized gains recognized for the nine months ended September 30, 2018, included \$1.9 million of realized gains associated with our mortgage loan portfolio, partnership gains of \$0.3 million, fixed asset losses of \$0.1 million, and real estate losses of \$0.6 million, respectively.

For the three and nine months ended September 30, 2018, net losses of \$10.9 million and \$148.4 million, primarily related to changes in fair value on our Modco trading portfolios, were included in realized gains and losses. Of the \$148.4 million for the nine months ended September 30, 2018, approximately \$8.3 million of losses were realized

through the sale of certain securities, which will be returned to us from our reinsurance partners over time through the reinsurance settlement process for this block of business.

The Modco embedded derivative associated with the trading portfolios had realized pre-tax gains of \$10.8 million and \$138.7 million, during the three and nine months ended September 30, 2018. The gains during the three months ended September 30, 2018, were due to credit spreads tightening which were more than offset by treasury yields increasing. The gains for the nine months ended September 30, 2018, were due to credit spreads widening and treasury yields increasing.

Realized investment gains and losses related to derivatives represent changes in their fair value during the period and termination gains/(losses) on those derivatives that were closed during the period.

We use various derivative instruments to manage risks related to certain life insurance and annuity products. We can use these derivatives as economic hedges against risks inherent in the products. These risks have a direct impact on the cost of these products and are correlated with the equity markets, interest rates, foreign currency levels, and overall volatility. The hedged risks are recorded through the recognition of embedded derivatives associated with the products. These products include the GLWB

## Table of Contents

rider associated with the variable annuity, fixed indexed annuity products as well as indexed universal life products. During the three and nine months ended September 30, 2018, we experienced net realized losses on derivatives related to VA contracts of approximately \$37.3 million and \$93.3 million. These net losses on derivatives related to VA contracts were affected by capital market impacts, changes in our non-performance risk, unlocking of assumptions, and variations in actual sub-account fund performance from the indices included in our hedging program during the three and nine months ended September 30, 2018.

We also use various swaps and other types of derivatives to mitigate risk related to other exposures. For the three and nine months ended September 30, 2018, these contracts generated losses of \$0.1 million.

### LIQUIDITY AND CAPITAL RESOURCES

#### The Holding Company

##### Overview

Our primary sources of funding are dividends from our operating subsidiaries; revenues from investment management, data processing, legal, and management services rendered to subsidiaries; investment income; and external financing. These sources of cash support our general corporate needs including our common stock dividends and debt service. We expect to use a portion of our positive cash flow from operations to pay dividends to our parent, Dai-ichi Life. We paid a \$140.0 million dividend during the nine months ended September 30, 2018, and do not expect to pay a dividend for the remainder of 2018.

The states in which our insurance subsidiaries are domiciled impose certain restrictions on the insurance subsidiaries' ability to pay us dividends. These restrictions are based in part on the prior year's statutory income and/or surplus. Generally, these restrictions pose no short-term liquidity concerns. We plan to retain portions of the earnings of our insurance subsidiaries in those companies primarily to support their future growth.

##### Debt and other capital resources

Our primary sources of capital are through retained income from our operating subsidiaries, capital infusions from our parent, Dai-ichi Life, as well as our ability to access debt financing markets. Additionally, we have access to the Credit Facility discussed below.

On May 3, 2018, we amended the Credit Facility (as amended the "Credit Facility"). We have the ability to borrow under a Credit Facility arrangement on an unsecured basis up to an aggregate principal amount of \$1.0 billion. We have the right in certain circumstances to request that the commitment under the Credit Facility be increased up to a maximum principal amount of \$1.5 billion. We are not aware of any non-compliance with the financial debt covenants of the Credit Facility as of September 30, 2018. There was no outstanding balance as of September 30, 2018.

##### Liquidity

Liquidity refers to a company's ability to generate adequate amounts of cash to meet its needs. We meet our liquidity requirements primarily through positive cash flows from our operating subsidiaries. Primary sources of cash from the operating subsidiaries are premiums, deposits for policyholder accounts, investment sales and maturities, and investment income. Primary uses of cash include benefit payments, withdrawals from policyholder accounts, investment purchases, policy acquisition costs, interest payments, and other operating expenses. We believe that we have sufficient liquidity to fund our cash needs under normal operating scenarios.

In the event of significant unanticipated cash requirements beyond our normal liquidity needs, we have additional sources of liquidity available depending on market conditions and the amount and timing of the liquidity need. These additional sources of liquidity include cash flows from operations, the sale of liquid assets, accessing our credit facility, and other sources described herein. Our decision to sell investment assets could be impacted by accounting rules, including rules relating to the likelihood of a requirement to sell securities before recovery of our cost basis. Under stressful market and economic conditions, liquidity may broadly deteriorate, which could negatively impact our ability to sell investment assets. If we require on short notice significant amounts of cash in excess of normal requirements, we may have difficulty selling investment assets in a timely manner, be forced to sell them for less than we otherwise would have been able to realize, or both.

The liquidity requirements of our regulated insurance subsidiaries primarily relate to the liabilities associated with their various insurance and investment products, operating expenses, and income taxes. Liabilities arising from insurance and investment products include the payment of policyholder benefits, as well as cash payments in

connection with policy surrenders and withdrawals, policy loans, and obligations to redeem funding agreements.

Our insurance subsidiaries maintain investment strategies intended to provide adequate funds to pay benefits and expected surrenders, withdrawals, loans, and redemption obligations without forced sales of investments. In addition, our insurance subsidiaries hold highly liquid, high-quality short-term investment securities and other liquid investment grade fixed maturity securities to fund our expected operating expenses, surrenders, and withdrawals. As of September 30, 2018, our total cash and invested assets were \$66.8 billion. The life insurance subsidiaries were committed as of September 30, 2018, to fund mortgage loans in the amount of \$825.6 million.

Our positive cash flows are used to fund an investment portfolio that provides for future benefit payments. We employ a formal asset/liability program to manage the cash flows of our investment portfolio relative to our long-term benefit obligations.

Table of Contents

The holding company held \$146.5 million of cash and short-term investments, and our subsidiaries held approximately \$527.8 million in cash and short-term investments as of September 30, 2018.

The following chart includes the cash flows provided by or used in operating, investing, and financing activities for the following periods:

	For The Nine Months Ended September 30, 2018      2017	
	(Dollars In Thousands)	
Net cash used in provided by operating activities	\$(201,414)	\$(7,762 )
Net cash provided by (used in) investing activities	(1,516,715)	(1,948,618)
Net cash provided by financing activities	1,660,279	1,865,760
Total	\$(57,850 )	\$(90,620 )

For The Nine Months Ended September 30, 2018 as compared to the Nine Months Ended September 30, 2017

Net cash (used in) provided by operating activities - Cash flows from operating activities are affected by the timing of premiums received, investment income, and benefits and expenses paid. Principal sources of cash inflows from operating activities include sales of our products and services as well as income from investments. Due to the nature of our business and the fact that many of the products we sell produce financing and investing cash flows, it is important to consider cash flows generated by investing and financing activities in conjunction with those generated by operating activities.

Net cash provided by (used in) investing activities - Changes in cash from investing activities primarily related to our investment portfolio.

Net cash provided by financing activities - Changes in cash from financing activities included \$503.3 million of outflows from secured financing liabilities for the nine months ended September 30, 2018, as compared to the \$198.2 million of outflows for the nine months ended September 30, 2017 and \$2.1 billion inflows of investment product and universal life net activity as compared to \$2.2 billion in the prior year. Net activity related to the Credit Facility resulted in inflows of \$317.1 million for the nine months ended September 30, 2018, as compared to \$40.9 million of inflows for nine months ended September 30, 2017. Net repayment of non-recourse funding obligations equaled \$100.0 million during the nine months ended September 30, 2018, as compared to \$36.0 million during the nine months ended September 30, 2017. The Company paid a dividend during the nine month period ended September 30, 2018 of \$140.0 million, as compared to a dividend of \$143.8 million during the nine months ended September 30, 2017.

Through our subsidiaries, we are members of the FHLB of Cincinnati and the FHLB of New York. FHLB advances provide an attractive funding source for short-term borrowing and for the sale of funding agreements. Membership in the FHLB requires that we purchase FHLB capital stock based on a minimum requirement and a percentage of the dollar amount of advances outstanding. Our borrowing capacity is determined by criteria established by each respective bank. In addition, our obligations under the advances must be collateralized. We maintain control over any such pledged assets, including the right of substitution. As of September 30, 2018, we had \$550.9 million of funding agreement-related advances and accrued interest outstanding under the FHLB program.

While we anticipate that the cash flows of our operating subsidiaries will be sufficient to meet our investment commitments and operating cash needs in a normal credit market environment, we recognize that investment commitments scheduled to be funded may, from time to time, exceed the funds then available. Therefore, we have established repurchase agreement programs for certain of our insurance subsidiaries to provide liquidity when needed. We expect that the rate received on its investments will equal or exceed its borrowing rate. Under this program, we may, from time to time, sell an investment security at a specific price and agree to repurchase that security at another specified price at a later date. These borrowings are typically for a term less than 90 days. The market value of securities to be repurchased is monitored and collateral levels are adjusted where appropriate to protect the counterparty against credit exposure. Cash received is invested in fixed maturity securities, and the agreements provided for net settlement in the event of default or on termination of the agreements. As of September 30, 2018, the

fair value of securities pledged under the repurchase program was \$457.5 million and the repurchase obligation of \$417.1 million was included in our consolidated condensed balance sheets (at an average borrowing rate of 223 basis points). During the nine months ended September 30, 2018, the maximum balance outstanding at any one point in time related to these programs was \$427.5 million. The average daily balance was \$225.9 million (at an average borrowing rate of 208 basis points) during the nine months ended September 30, 2018. As of December 31, 2017, the fair value of securities pledged under the repurchase program was \$1,006.6 million and the repurchase obligation of \$885.0 million was included in our consolidated condensed balance sheets (at an average borrowing rate of 142 basis points). During 2017, the maximum balance outstanding at any one point in time related to these programs was \$988.5 million. The average daily balance was \$624.7 million (at an average borrowing rate of 101 basis points) during the year ended December 31, 2017.

We participate in securities lending, primarily as an investment yield enhancement, whereby securities that are held as investments are loaned out to third parties for short periods of time. We require initial collateral of 102% of the market value of the loaned securities to be separately maintained. The loaned securities' market value is monitored on a daily basis. As of September 30, 2018, securities with a market value of \$92.0 million were loaned under this program. As collateral for the loaned securities, we receive short-term investments, which are recorded in "short-term investments" with a corresponding liability

Table of Contents

recorded in “other liabilities” to account for its obligation to return the collateral. As of September 30, 2018, the fair value of the collateral related to this program was \$97.3 million and we have an obligation to return \$97.3 million of collateral to the securities borrowers.

**Statutory Capital**

A life insurance company’s statutory capital is computed according to rules prescribed by the NAIC, as modified by state law. Generally speaking, other states in which a company does business defer to the interpretation of the domiciliary state with respect to NAIC rules, unless inconsistent with the other state’s regulations. Statutory accounting rules are different from GAAP and are intended to reflect a more conservative view, for example, requiring immediate expensing of policy acquisition costs. The NAIC’s risk-based capital requirements require insurance companies to calculate and report information under a risk-based capital formula. The achievement of long-term growth will require growth in the statutory capital of our insurance subsidiaries. The subsidiaries may secure additional statutory capital through various sources, such as retained statutory earnings or our equity contributions. In general, dividends up to specified levels are considered ordinary and may be paid without prior approval of the insurance commissioner of the state of domicile. Dividends in larger amounts are considered extraordinary and are subject to affirmative prior approval by such commissioner. The maximum amount that would qualify as an ordinary dividend to us from our insurance subsidiaries in 2018 is approximately \$853.2 million.

State insurance regulators and the NAIC have adopted risk-based capital (“RBC”) requirements for life insurance companies to evaluate the adequacy of statutory capital and surplus in relation to investment and insurance risks. The requirements provide a means of measuring the minimum amount of statutory surplus appropriate for an insurance company to support its overall business operations based on its size and risk profile. A company’s risk-based statutory surplus is calculated by applying factors and performing calculations relating to various asset, premium, claim, expense, and reserve items. Regulators can then measure the adequacy of a company’s statutory surplus by comparing it to RBC. We manage our capital consumption by using the ratio of our total adjusted capital, as defined by the insurance regulators, to our company action level RBC (known as the RBC ratio), also as defined by insurance regulators.

Statutory reserves established for VA contracts are sensitive to changes in the equity markets and are affected by the level of account values relative to the level of any guarantees and product design. As a result, the relationship between reserve changes and equity market performance may be non-linear during any given reporting period. Market conditions greatly influence the capital required due to their impact on the valuation of reserves and derivative investments mitigating the risk in these reserves. Risk mitigation activities may result in material and sometimes counterintuitive impacts on statutory surplus and RBC ratio. Notably, as changes in these market and non-market factors occur, both our potential obligation and the related statutory reserves and/or required capital can vary at a non-linear rate.

Our statutory surplus is impacted by credit spreads as a result of accounting for the assets and liabilities on our fixed MVA annuities. Statutory separate account assets supporting the fixed MVA annuities are recorded at fair value. In determining the statutory reserve for the fixed MVA annuities, we are required to use current crediting rates based on U.S. Treasuries. In many capital market scenarios, current crediting rates based on U.S. Treasuries are highly correlated with market rates implicit in the fair value of statutory separate account assets. As a result, the change in the statutory reserve from period to period will likely substantially offset the change in the fair value of the statutory separate account assets. However, in periods of volatile credit markets, actual credit spreads on investment assets may increase or decrease sharply for certain sub-sectors of the overall credit market, resulting in statutory separate account asset market value gains or losses. As actual credit spreads are not fully reflected in current crediting rates based on U.S. Treasuries, the calculation of statutory reserves will not substantially offset the change in fair value of the statutory separate account assets resulting in a change in statutory surplus.

We cede material amounts of insurance and transfer related assets to other insurance companies through reinsurance. However, notwithstanding the transfer of related assets, we remain liable with respect to ceded insurance should any reinsurer fail to meet the obligations that it assumed. We evaluate the financial condition of our reinsurers and monitor the associated concentration of credit risk. For the three and nine months ended September 30, 2018, we ceded premiums to third party reinsurers amounting to \$269.3 million and \$1.0 billion, respectively. In addition, we had receivables from reinsurers amounting to \$4.8 billion as of September 30, 2018. We review reinsurance receivable amounts for collectability and establish bad debt reserves if deemed appropriate.

#### Captive Reinsurance Companies

Our life insurance subsidiaries are subject to a regulation entitled “Valuation of Life Insurance Policies Model Regulation,” commonly known as “Regulation XXX,” and a supporting guideline entitled “The Application of the Valuation of Life Insurance Policies Model Regulation,” commonly known as “Guideline AXXX.” The regulation and supporting guideline require insurers to establish statutory reserves for term and universal life insurance policies with long-term premium guarantees that are consistent with the statutory reserves required for other individual life insurance policies with similar guarantees. Many market participants believe that these levels of reserves are non-economic. We use captive reinsurance companies to implement reinsurance and capital management actions to satisfy these reserve requirements by financing the non-economic reserves either through the issuance of non-recourse funding obligations by the captives or obtaining Letters of Credit from third-party financial institutions.

Our captive reinsurance companies assume business from affiliates only. Our captives are capitalized to a level we believe is sufficient to support the contractual risks and other general obligations of the respective captive entity. All of our captive reinsurance companies are wholly owned subsidiaries and are located domestically. The captive insurance companies are subject to regulations in the state of domicile.

Table of Contents

The National Association of Insurance Commissioners (“NAIC”), through various committees, subgroups and dedicated task forces, is reviewing the use of captives and special purpose vehicles used to transfer insurance risk in relation to existing state laws and regulations, and several committees have adopted or exposed for comment white papers and reports that, if or when implemented, could impose additional requirements on the use of captives and other reinsurers. The Financial Condition (E) Committee of the NAIC established a Variable Annuity Issues Working Group to examine company use of variable annuity captives. The Committee has proposed changes in the regulation of variable annuities and variable annuity captives, which could adversely affect our future financial condition and results of operations if adopted.

The NAIC has adopted Actuarial Guideline XLVIII (“AG48”) and the substantially similar “Term and Universal Life Insurance Reserve Financing Model Regulation” (the “Reserve Model”) which establish national standards for new reserve financing arrangements for term life insurance and universal life insurance with secondary guarantees. AG48 and the Reserve Model govern collateral requirements for captive reinsurance arrangements. In order to obtain reserve credit, AG48 and the Reserve Model require a minimum level of funds, consisting of primary and other securities, to be held by or on behalf of ceding insurers as security under each captive life reinsurance treaty. As a result of AG48 and the Reserve Model, the implementation of new captive structures in the future may be less capital efficient, lead to lower product returns and/or increased product pricing or result in reduced sales of certain products. In some circumstances, AG48 and the Reserve Model could impact the Company’s ability to engage in certain reinsurance transactions with non-affiliates.

We also use a captive reinsurance company to reinsure risks associated with GLWB and GMDB riders which helps us to manage those risks on an economic basis. In an effort to mitigate the equity market risks relative to our RBC ratio, in the fourth quarter of 2012, we established an insurance subsidiary, Shades Creek Captive Insurance Company (“Shades Creek”), to which PLICO has reinsured GLWB and GMDB riders related to its VA contracts. The purpose of Shades Creek is to reduce the volatility in RBC due to non-economic variables included within the RBC calculation.

We maintain an intercompany capital support agreement with Shades Creek that provides through a guarantee that we will contribute assets or purchase surplus notes (or cause an affiliate or third party to contribute assets or purchase surplus notes) in amounts necessary for Shades Creek’s regulatory capital levels to equal or exceed minimum thresholds as defined by the agreement. As of September 30, 2018, Shades Creek maintained capital levels in excess of the required minimum thresholds. The maximum potential future payment amount which could be required under the capital support agreement will be dependent on numerous factors, including the performance of equity markets, the level of interest rates, performance of associated hedges, and related policyholder behavior.

**Ratings**

Various Nationally Recognized Statistical Rating Organizations (“rating organizations”) review the financial performance and condition of insurers, including our insurance subsidiaries, and publish their financial strength ratings as indicators of an insurer’s ability to meet policyholder and contract holder obligations. These ratings are important to maintaining public confidence in an insurer’s products, its ability to market its products and its competitive position. The following table summarizes the current financial strength ratings of our significant member companies from the major independent rating organizations:

Ratings	Standard &			
	A.M. Best	Fitch	Poor’s	Moody’s
Insurance company financial strength rating:				
Protective Life Insurance Company	A+	A+	AA-	A1
West Coast Life Insurance Company	A+	A+	AA-	A1
Protective Life and Annuity Insurance Company	A+	A+	AA-	—
Protective Property & Casualty Insurance Company	A	—	—	—
MONY Life Insurance Company	A+	A+	A+	A1

Our ratings are subject to review and change by the rating organizations at any time and without notice. A downgrade or other negative action by a rating organization with respect to the financial strength ratings of our insurance subsidiaries could adversely affect sales, relationships with distributors, the level of policy surrenders and withdrawals, competitive position in the marketplace, and the cost or availability of reinsurance. The rating agencies may take various actions, positive or negative, with respect to the financial strength ratings of our insurance subsidiaries, including as a result of our status as a subsidiary of Dai-ichi Life.

Rating organizations also publish credit ratings for the issuers of debt securities, including the Company. Credit ratings are indicators of a debt issuer's ability to meet the terms of debt obligations in a timely manner. These ratings are important in the debt issuer's overall ability to access credit markets and other types of liquidity. Ratings are not recommendations to buy our securities or products. A downgrade or other negative action by a rating organization with respect to our credit rating could limit our access to capital markets, increase the cost of issuing debt, and a downgrade of sufficient magnitude, combined with other negative factors, could require us to post collateral. The rating agencies may take various actions, positive or negative, with respect to our debt ratings, including as a result of our status as a subsidiary of Dai-ichi Life.

Table of Contents

## LIABILITIES

Many of our products contain surrender charges and other features that are designed to reward persistency and penalize the early withdrawal of funds. Certain stable value and annuity contracts have market-value adjustments that protect us against investment losses if interest rates are higher at the time of surrender than at the time of issue.

As of September 30, 2018, we had policy liabilities and accruals of approximately \$42.9 billion. Our interest-sensitive life insurance policies have a weighted average minimum credited interest rate of approximately 3.47%.

## Contractual Obligations

We enter into various obligations to third parties in the ordinary course of our operations. However, we do not believe that our cash flow requirements can be assessed solely based upon an analysis of these obligations. The most significant factors affecting our future cash flows are our ability to earn and collect cash from our customers, and the cash flows arising from our investment program. Future cash outflows, whether they are contractual obligations or not, will also vary based upon our future needs. Although some outflows are fixed, others depend on future events. Examples of fixed obligations include our obligations to pay principal and interest on fixed-rate borrowings.

Examples of obligations that will vary include obligations to pay interest on variable-rate borrowings and insurance liabilities that depend on future interest rates, market performance, or surrender provisions. Many of our obligations are linked to cash-generating contracts. In addition, our operations involve significant expenditures that are not based upon contractual obligations. These include expenditures for income taxes and payroll.

As of September 30, 2018, we carried a \$6.7 million liability for uncertain tax positions, including interest on unrecognized tax benefits. These amounts are not included in the long-term contractual obligations table because of the difficulty in making reasonably reliable estimates of the occurrence or timing of cash settlements with the respective taxing authorities.

The table below sets forth future maturities of our contractual obligations:

	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
	(Dollars In Thousands)				
Debt <sup>(1)</sup>	\$1,530,675	\$62,759	\$467,747	\$66,517	\$933,652
Non-recourse funding obligations <sup>(2)</sup>	4,389,587	281,364	647,474	628,193	2,832,556
Subordinated debt <sup>(3)</sup>	1,592,258	30,655	61,310	61,310	1,438,983
Stable value products <sup>(4)</sup>	5,500,754	1,453,493	3,210,755	697,764	138,742
Operating leases <sup>(5)</sup>	25,445	5,739	7,354	6,180	6,172
Home office lease <sup>(6)</sup>	75,915	75,915	—	—	—
Mortgage loan and investment commitments	959,446	854,676	104,770	—	—
Secured financing liabilities <sup>(7)</sup>	514,495	514,495	—	—	—
Policyholder obligations <sup>(8)</sup>	56,479,119	11,950,755	5,144,914	5,446,220	33,937,230
Total <sup>(9)</sup>	\$71,067,694	\$15,229,851	\$9,644,324	\$6,906,184	\$39,287,335

(1) Debt includes all principal amounts owed on note agreements and expected interest payments due over the term of the notes.

(2) Non-recourse funding obligations include all undiscounted principal amounts owed and expected future interest payments due over the term of the notes. Of the total undiscounted cash flows, \$1.7 billion relates to the Golden Gate V transaction. These cash outflows are matched and predominantly offset by the cash inflows Golden Gate V receives from notes issued by a nonconsolidated variable interest entity. Additionally, \$2.6 billion relates to the Golden Gate transaction. These cash outflows are matched and predominantly offset by the cash inflows Golden Gate receives from notes issued by a nonconsolidated variable interest entity. The remaining amounts are associated with the Golden Gate II notes held by third parties as well as certain obligations assumed with the acquisition of MONY Life Insurance Company.

(3) Subordinated debt securities includes all principal amounts and interest payments due over the term of the obligations.

- (4) Anticipated stable value products cash flows including interest.
- (5) Includes all lease payments required under operating lease agreements.
- (6) The lease payments shown assume we exercise our option to purchase the building at the end of the lease term.
- (7) Represents secured borrowings and accrued interest as part of our repurchase program as well as liabilities associated with securities lending transactions.
- (8) Estimated contractual policyholder obligations are based on mortality, morbidity, and lapse assumptions comparable to our historical experience, modified for recent observed trends. These obligations are based on current balance sheet values and include expected interest crediting, but do not incorporate an expectation of future market growth, or future deposits. Due to the significance of the assumptions used, the amounts presented could materially differ from actual results. As variable separate account obligations are legally insulated from general account obligations, the variable separate account obligations will be fully funded by cash flows from variable separate account assets. We expect to fully fund the general account obligations from cash flows from general account investments.
- (9) Excluded from this table are certain pension obligations.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS

We have entered into indemnity agreements with each of our directors as well as operating leases that do not result in an obligation being recorded on the balance sheet. Refer to Note 12, Commitments and Contingencies, of the consolidated condensed financial statements for more information on our indemnity agreements.

MARKET RISK EXPOSURES

Our financial position and earnings are subject to various market risks including changes in interest rates, the yield curve, spreads between risk-adjusted and risk-free interest rates, foreign currency rates, used vehicle prices, and equity price risks and issuer defaults. We analyze and manage the risks arising from market exposures of financial instruments, as well as other risks, through an integrated asset/liability management process. Our asset/liability management programs and procedures involve the monitoring of asset and liability durations for various product lines; cash flow testing under various interest rate scenarios; and the continuous rebalancing of assets and liabilities with respect to yield, credit and market risk, and cash flow characteristics. These programs also incorporate the use of derivative financial instruments primarily to reduce our exposure to interest rate risk, inflation risk, currency exchange risk, volatility risk, and equity market risk. See Note 7, Derivative Financial Instruments, to the consolidated financial statements included in this report for additional information on our financial instruments.

The primary focus of our asset/liability program is the management of interest rate risk within the insurance operations. This includes monitoring the duration of both investments and insurance liabilities to maintain an appropriate balance between risk and profitability for each product category, and for us as a whole. It is our policy to maintain asset and liability durations within one year of one another, although, from time to time, a broader interval may be allowed.

We are exposed to credit risk within our investment portfolio and through derivative counterparties. Credit risk relates to the uncertainty of an obligor's continued ability to make timely payments in accordance with the contractual terms of the instrument or contract. We manage credit risk through established investment policies which attempt to address quality of obligors and counterparties, credit concentration limits, diversification requirements, and acceptable risk levels under expected and stressed scenarios. Derivative counterparty credit risk is measured as the amount owed to us, net of collateral held, based upon current market conditions. In addition, we periodically assess exposure related to potential payment obligations between us and our counterparties. We minimize the credit risk in derivative financial instruments by entering into transactions with high quality counterparties (A-rated or higher at the time we enter into the contract), and we maintain credit support annexes with certain of those counterparties.

We utilize a risk management strategy that incorporates the use of derivative financial instruments to reduce exposure to certain risks, including but not limited to, interest rate risk, currency exchange risk, volatility risk, and equity market risk. These strategies are developed through our analysis of data from financial simulation models and other internal and industry sources, and are then incorporated into our risk management program.

Derivative instruments expose us to credit and market risk and could result in material changes from period to period. We attempt to minimize our credit risk by entering into transactions with highly rated counterparties. We manage the market risk by establishing and monitoring limits as to the types and degrees of risk that may be undertaken. We monitor our use of derivatives in connection with our overall asset/liability management programs and risk management strategies. In addition, all derivative programs are monitored by our risk management department. Derivative instruments that are used as part of our interest rate risk management strategy include interest rate swaps, interest rate futures, interest rate caps, and interest rate swaptions.

Derivative instruments that are used as part of the Company's foreign currency exchange risk management strategy include foreign currency swaps, foreign currency futures, foreign equity futures, and foreign equity options.

We may use the following types of derivative contracts to mitigate our exposure to certain guaranteed benefits related to VA and fixed indexed annuities:

- Foreign Currency Futures
- Variance Swaps
- Interest Rate Futures
- Equity Options

- Equity Futures
- Credit Derivatives
- Interest Rate Swaps
- Interest Rate Swaptions
- Volatility Futures
- Volatility Options
- Total Return Swaps

We believe that our asset/liability management programs and procedures and certain product features provide protection against the effects of changes in interest rates under various scenarios. Additionally, we believe our asset/liability management programs and procedures provide sufficient liquidity to enable us to fulfill our obligation to pay benefits under our various insurance and deposit contracts. However, our asset/liability management programs and procedures incorporate assumptions about the relationship between short-term and long-term interest rates (i.e., the slope of the yield curve), relationships between risk-adjusted and risk-free interest rates, market liquidity, spread movements, implied volatility, policyholder behavior, and other factors, and

Table of Contents

the effectiveness of our asset/liability management programs and procedures may be negatively affected whenever actual results differ from those assumptions.

In the ordinary course of our commercial mortgage lending operations, we may commit to provide a mortgage loan before the property to be mortgaged has been built or acquired. The mortgage loan commitment is a contractual obligation to fund a mortgage loan when called upon by the borrower. The commitment is not recognized in our financial statements until the commitment is actually funded. The mortgage loan commitment contains terms, including the rate of interest, which may be different than prevailing interest rates. As of September 30, 2018, we had outstanding mortgage loan commitments of \$825.6 million at an average rate of 4.4%.

**Impact of Continued Low Interest Rate Environment**

Significant changes in interest rates expose us to the risk of not realizing anticipated spreads between the interest rate earned on investments and the interest rate credited to in-force policies and contracts. In addition, certain of our insurance and investment products guarantee a minimum guaranteed interest rate (“MGIR”). In periods of prolonged low interest rates, the interest spread earned may be negatively impacted to the extent our ability to reduce policyholder crediting rates is limited by the guaranteed minimum credited interest rates. Additionally, those policies without account values may exhibit lower profitability in periods of prolonged low interest rates due to reduced investment income.

The tables below present account values by range of current minimum guaranteed interest rates and current crediting rates for our universal life and deferred fixed annuity products as of September 30, 2018, and December 31, 2017:

**Credited Rate Summary**

As of September 30, 2018

We are active in mitigating the impact of a continued low interest rate environment through product design, as well as adjusting crediting rates on current in-force policies and contracts. We also manage interest rate and reinvestment risks through our asset/liability management process. Our asset/liability management programs and procedures involve the monitoring of asset and liability durations; cash flow testing under various interest rate scenarios; and the regular rebalancing of assets and liabilities with respect to yield, credit and market risk, and cash flow characteristics. These programs also incorporate the use of derivative financial instruments primarily to reduce our exposure to interest rate risk, inflation risk, currency exchange risk, volatility risk, and equity market risk.

**IMPACT OF INFLATION**

Inflation increases the need for life insurance. Many policyholders who once had adequate insurance programs may increase their life insurance coverage to provide the same relative financial benefit and protection. Higher interest rates may result in higher sales of certain of our investment products.

The higher interest rates that have traditionally accompanied inflation could also affect our operations. Policy loans increase as policy loan interest rates become relatively more attractive. As interest rates increase, disintermediation of stable value and annuity account balances and individual life policy cash values may increase. The market value of our fixed-rate, long-term investments may decrease, we may be unable to implement fully the interest rate reset and call provisions of our mortgage loans, and our ability to make attractive mortgage loans, including participating mortgage loans, may decrease. In addition, participating mortgage loan income may decrease. The difference between the interest rate earned on investments and the interest rate credited to life insurance and investment products may also be adversely affected by rising interest rates. During the periods covered by this report, we believe inflation has not had a material impact on our business.

**RECENTLY ISSUED ACCOUNTING STANDARDS**

See Note 2, Summary of Significant Accounting Policies, to the consolidated condensed financial statements for information regarding recently issued accounting standards.

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

See Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, "Liquidity and Capital Resources" and Part II, Item 1A, Risk Factors, of this report for market risk disclosures.

Table of Contents

Item 4. Controls and Procedures

(a) Disclosure controls and procedures

In order to ensure that the information the Company must disclose in its filings with the Securities and Exchange Commission is recorded, processed, summarized, and reported on a timely basis, the Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), except as otherwise noted below. Based on their evaluation as of the end of the period covered by this Form 10-Q, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective. It should be noted that any system of controls, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of any control system is based in part upon certain judgments, including the costs and benefits of controls and the likelihood of future events. Because of these and other inherent limitations of control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within the Company have been detected.

In conducting our evaluation of the effectiveness of internal control over financial reporting as of September 30, 2018, the Company has excluded the internal controls relating to the administrative systems and processes being provided by third parties for the Liberty Life Assurance Company of Boston (Liberty) block of business reinsured from Liberty. As of September 30, 2018, the Company is in the process of, but has not completed its own evaluation of the design and operation of the internal controls relating to the administrative systems and processes, including those currently being provided by third parties, for the Liberty business. For the nine months ended September 30, 2018, Liberty Business represented revenues and income before income tax of \$360.9 million and \$33.7 million, of the Company's consolidated income before income tax.

(b) Changes in internal control over financial reporting

During the second quarter of 2018, the Company began the conversion and integration of administrative processing into its internal controls over financial reporting for the Liberty block of business. The conversion to the Company's operating environment was in process as of September 30, 2018.

There were no changes in the Company's internal control over financial reporting during the three months ended September 30, 2018, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. The Company's internal controls exist within a dynamic environment and the Company continually strives to improve its internal controls and procedures to enhance the quality of its financial reporting.

PART II

Item 1. Legal Proceedings

See Note 12, Commitments and Contingencies, to the Notes to Consolidated Condensed Financial Statements included in this report.

Item 1A. Risk Factors

The operating results of companies in the insurance industry have historically been subject to significant fluctuations. The factors which could affect the Company's future results include, but are not limited to, general economic conditions and known trends and uncertainties. In addition to other information set forth in this report, you should carefully consider the risk factors discussed in Part I, Item 1A, Risk Factors, in the Company's Annual Report on Form 10-K for the year ended December 31, 2017, which could materially affect the Company's business, financial condition, or future results of operations which are discussed more fully below.

The Company's use of derivative financial instruments within its risk management strategy may not be effective or sufficient.

The Company uses derivative financial instruments within its risk management strategy to mitigate risks to which it is exposed, including risks related to credit and equity markets, interest rate levels, foreign exchange, and volatility on its fixed indexed annuity and variable annuity products and associated guaranteed benefit features. The Company may also use derivative financial instruments within its risk management strategy to mitigate risks arising from its exposure to investments in individual issuers or sectors of issuers and to mitigate the adverse effects of interest rate levels or volatility on its overall financial condition or results of operations.

These derivative financial instruments may not effectively offset the changes in the carrying value of the exposures due to, among other things, the time lag between changes in the value of such exposures and the changes in the value of the derivative financial instruments purchased by the Company, extreme credit and/or equity market and/or interest rate levels or volatility, contract holder behavior that differs from the Company's expectations, and basis risk.

The use of derivative financial instruments by the Company generally to hedge various risks that impact GAAP earnings may have an adverse impact on the level of statutory capital and risk-based capital ratios because earnings are recognized differently under GAAP and statutory accounting methods.

Table of Contents

The Company may also choose not to hedge, in whole or in part, these or other risks that it has identified, due to, for example, the availability and/or cost of a suitable derivative financial instrument. In addition, the Company may fail to identify risks, or the magnitude thereof, to which it is exposed. The derivative financial instruments used by the Company in its risk management strategy may not be properly designed, may not be properly implemented as designed and/or may be insufficient to hedge the risks in relation to the Company's obligations.

The Company is subject to the risk that its derivative counterparties or clearinghouse may fail or refuse to meet their obligations to the Company, which may result in associated derivative financial instruments becoming ineffective or inefficient.

The above factors, either alone or in combination, may have a material adverse effect on the Company's financial condition and results of operations.

The Company may be required to establish a valuation allowance against its deferred tax assets, which could have a material adverse effect on the Company's results of operations, financial condition, and capital position.

Deferred tax assets are attributable to certain differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets represent future savings of taxes that would otherwise be paid in cash. In general, the realization of the deferred tax assets is dependent upon the generation of sufficient future ordinary and capital taxable income. If it is determined that a certain deferred tax asset cannot be realized, then a deferred tax valuation allowance must be established, with a corresponding charge to either adjusted operating income or other comprehensive income (depending on the nature of the deferred tax asset).

Based on the Company's current assessment of future taxable income, including available tax planning opportunities, the Company anticipates that it is more likely than not that it will generate sufficient taxable income to realize its material deferred tax assets net of any existing valuation allowance. The Company has recognized valuation allowances of \$4.6 million and \$5.0 million as of September 30, 2018 and December 31, 2017, respectively, related to state operating loss carryforwards which are more likely than not to expire unutilized. If future events differ from the Company's current forecasts, an additional valuation allowance may need to be established, which could have a material adverse effect on the Company's results of operations, financial condition, or capital position.

The Company could be adversely affected by an inability to access FHLB lending.

Certain subsidiaries of the Company are members of the Federal Home Loan Bank (the "FHLB") of Cincinnati and the FHLB of New York. Membership provides these Company subsidiaries with access to FHLB financial services, including advances that provide an attractive funding source for short-term borrowing and for the sale of funding agreements. The extent to which these services are available could be impacted by legislative or regulatory action at the state or federal level. It is unclear at this time whether or to what extent additional or new legislation or regulatory action regarding continued access to FHLB financial services will be enacted or adopted. Any developments that limit access to FHLB financial services could have a material adverse effect on the Company.

The amount of statutory capital or risk-based capital that the Company has and the amount of statutory capital or risk-based capital that it must hold to maintain its financial strength and credit ratings and meet other requirements can vary significantly from time to time and such amounts are sensitive to a number of factors outside of the Company's control.

The Company primarily conducts business through licensed insurance company subsidiaries. Insurance regulators have established regulations that provide minimum capitalization requirements based on risk-based capital formulas for life and property and casualty companies. The risk-based capital formula for life insurance companies establishes

capital requirements relating to insurance, business, asset, interest rate, and certain other risks. The risk-based capital formula for property and casualty companies establishes capital requirements relating to asset, credit, underwriting, and certain other risks.

In any particular year, statutory surplus amounts and risk-based capital ratios may increase or decrease depending on a variety of factors, including, but not limited to, the amount of statutory income or losses generated by the Company's insurance subsidiaries (which itself is sensitive to equity market and credit market conditions), the amount of additional capital its insurance subsidiaries must hold to support business growth, changes in the Company's statutory reserve requirements, the Company's ability to secure capital market solutions to provide statutory reserve relief, changes in equity market levels, the value of certain fixed-income and equity securities in its investment portfolio, the credit ratings of investments held in its portfolio, including those issued by, or explicitly or implicitly guaranteed by, a government, the value of certain derivative instruments, changes in interest rates, foreign currency exchange rates or tax rates, credit market volatility, changes in consumer behavior, and changes to the National Association of Insurance Commissioners (the "NAIC") risk-based capital formulas. Most of these factors are outside of the Company's control.

At its June 2018 meeting, the NAIC's Capital Adequacy Task Force adopted a change to the formulas used to calculate risk-based capital to reflect the lower federal corporate income tax rate. The NAIC's risk-based capital formulas now employ a tax factor of 21%, instead of 35%. This change will have a one-time lowering effect on the risk-based capital ratios of the Company and its subsidiaries when it becomes effective at the end of 2018.

Another proposed change to the NAIC's risk-based capital formula that is currently under consideration would update the factors used to calculate required capital for bonds. While the extent and timing of this change is unknown, if adopted, the revision would likely increase the Company's required capital and decrease the statutory risk-based capital ratios of the Company and its subsidiaries.

## Table of Contents

The Company's financial strength and credit ratings are significantly influenced by the statutory surplus amounts and risk-based capital ratios of its insurance company subsidiaries. Rating agencies may implement changes to their internal models that have the effect of increasing or decreasing the amount of statutory capital the Company must hold in order to maintain its current ratings. In addition, rating agencies may downgrade the investments held in the Company's portfolio, which could result in a reduction of the Company's capital and surplus and/or its risk-based capital ratio.

In scenarios of equity market declines, the amount of additional statutory reserves or risk-based capital the Company is required to hold for its variable product guarantees may increase at a rate greater than the rate of change of the markets. Increases in reserves or risk-based capital could result in a reduction to the Company's capital, surplus, and/or risk-based capital ratio. Also, in environments where there is not a correlative relationship between interest rates and spreads, the Company's market value adjusted annuity product can have a material adverse effect on the Company's statutory surplus position.

The Company may be subject to regulations of, or regulations influenced by, international regulatory authorities or initiatives.

The NAIC and the Company's state regulators may be influenced by the initiatives of international regulatory bodies, and those initiatives may not translate readily into the legal system under which U.S. insurers must operate. There is increasing pressure to conform to international standards due to the globalization of the business of insurance and the most recent financial crisis. In addition to developments at the NAIC and in the United States, the Financial Stability Board ("FSB"), consisting of representatives of national financial authorities of the G20 nations, and the G20 have issued a series of proposals intended to produce significant changes in how financial companies, particularly companies that are members of large and complex financial groups, should be regulated.

The International Association of Insurance Supervisors ("IAIS"), at the direction of the FSB, has published an evolving methodology for identifying "global systemically important insurers" ("G-SIIs") and high-level policy measures that will apply to G-SIIs. The FSB, working with national authorities and the IAIS, has designated nine insurance groups as G-SIIs. The IAIS is working on the policy measures which include higher capital requirements and enhanced supervision. Although neither the Company nor Dai-ichi Life has been designated as a G-SII, the list of designated insurers will be updated periodically by the FSB. It is possible that the greater size and reach of the combined group as a result of the Company becoming a subsidiary of Dai-ichi Life, or a change in the methodologies or their application, could lead to the combined group's designation as a G-SII.

The IAIS is also in the process of developing a common framework for the supervision of internationally active insurance groups ("IAIGs"). The framework, which is currently under discussion, may include a global capital measurement standard for insurance groups deemed to be IAIGs that could exceed the sum of state or other local capital requirements. In addition, the IAIS is developing a model framework for the supervision of IAIGs that contemplates "group wide supervision" across national boundaries and legal entities, which could require each IAIG to conduct its own risk and solvency assessment to monitor and manage its overall solvency. It is likely that, as a result of the Merger, the combined group will be deemed an IAIG, in which case it may be subject to supervision requirements and capital measurement standards beyond those applicable to any competitors who are not designated as an IAIG.

The Company's sole stockholder, Dai-ichi Life, is also subject to regulation by the Japanese Financial Services Authority ("JFSA"). Under applicable laws and regulations, Dai-ichi Life is required to provide notice to or obtain the consent of the JFSA prior to taking certain actions or engaging in certain transactions, either directly or indirectly through its subsidiaries, including the Company and its consolidated subsidiaries, which could limit the ability of the Company to engage in certain transactions or business initiatives.

While it is not yet known how or the extent to which the Company will be impacted by these regulations, the Company may experience increased costs of compliance, increased disclosure, less flexibility in capital management, and more burdensome regulation and capital requirements for specific lines of business. In addition, such regulations could impact the business of the Company and its reserve and capital requirements, financial condition or results of operations.

NAIC actions, pronouncements and initiatives may affect the Company's product profitability, reserve and capital requirements, financial condition or results of operations.

Although some NAIC pronouncements, particularly as they affect accounting, reserving and risk-based capital issues, may take effect automatically without affirmative action taken by the states, the NAIC is not a governmental entity and its processes and procedures do not comport with those to which governmental entities typically adhere. Therefore, it is possible that actions could be taken by the NAIC that become effective without the procedural safeguards that would be present if governmental action was required. In addition, with respect to some financial regulations and guidelines, states sometimes defer to the interpretation of the insurance department of a non-domiciliary state. Neither the action of the non-domiciliary state nor the action of the NAIC is binding on a domiciliary state. Accordingly, a state could choose to follow a different interpretation. The Company is also subject to the risk that compliance with any particular regulator's interpretation of a legal, accounting or actuarial issue may result in non-compliance with another regulator's interpretation of the same issue, particularly when compliance is judged in hindsight. There is an additional risk that any particular regulator's interpretation of a legal, accounting or actuarial issue may change over time to the Company's detriment, or that changes to the overall legal or market environment may cause the Company to change its practices in ways that may, in some cases, limit its growth or profitability. Statutes, regulations, interpretations, and instructions may be applied with retroactive impact, particularly in areas such as accounting, reserve and risk-based capital requirements. Also, regulatory actions with prospective impact can potentially have a significant impact on currently sold products.

The NAIC has announced more focused inquiries on certain matters that could have an impact on the Company's financial condition and results of operations. Such inquiries concern, for example, insurer use of captive reinsurance companies, variable

Table of Contents

annuity reserves and capital treatment, certain aspects of insurance holding company reporting and disclosure, reinsurance, cybersecurity practices, liquidity assessment, and risk-based capital calculations. In addition, the NAIC continues to consider various initiatives to change and modernize its financial and solvency requirements and regulations. It has adopted principles-based reserving methodologies for life insurance and annuity reserves, but additional formulas and/or guidance relevant to the new standard are being developed. The NAIC is also considering changes to accounting and risk-based capital regulations, risk-based capital calculations, governance practices of insurers, and other items. Additionally, the NAIC is studying a group capital calculation that would aggregate required capital across U.S.-based insurance groups. The Company cannot currently estimate what impact these more focused inquiries or proposed changes, if they occur, will have on its product mix, product profitability, reserve and capital requirements, financial condition or results of operations.

The Company's use of captive reinsurance companies to finance statutory reserves related to its term and universal life products and to reduce volatility affecting its variable annuity products may be limited or adversely affected by regulatory action, pronouncements and interpretations.

The Company currently uses affiliated captive reinsurance companies in various structures to finance certain statutory reserves based on a regulation entitled "Valuation of Life Insurance Policies Model Regulation," commonly known as "Regulation XXX," and a supporting guideline entitled "The Application of the Valuation of Life Insurance Policies Model Regulation," commonly known as "Guideline AXXX," which are associated with term life insurance and universal life insurance with secondary guarantees, respectively, as well as to reduce the volatility in statutory risk-based capital associated with certain guaranteed minimum withdrawal and death benefit riders associated with certain of the Company's variable annuity products.

The NAIC has adopted Actuarial Guideline XLVIII ("AG48") and the substantially similar "Term and Universal Life Insurance Reserve Financing Model Regulation" (the "Reserve Model") which establish national standards for new reserve financing arrangements for term life insurance and universal life insurance with secondary guarantees. AG48 and the Reserve Model govern collateral requirements for captive reinsurance arrangements. In order to obtain reserve credit, AG48 and the Reserve Model require a minimum level of funds, consisting of primary and other securities, to be held by or on behalf of ceding insurers as security under each captive life reinsurance treaty. As a result of AG48 and the Reserve Model, the implementation of new captive structures in the future may be less capital efficient, lead to lower product returns and/or increased product pricing, or result in reduced sales of certain products. In some circumstances, AG48 and the Reserve Model could impact the Company's ability to engage in certain reinsurance transactions with non-affiliates.

The Financial Condition (E) Committee of the NAIC has adopted a framework for changes to current rules and regulations applicable to the determination of variable annuity reserves and risk-based capital. The changes are intended to decrease incentives for insurers to establish variable annuities captives and will apply to both in-force and new business. The new rules and regulations will likely have a 2020 effective date and an optional 3- to 7-year transition period from current rules and regulations, beginning on the effective date. The changes could adversely affect our future financial condition and results of operations.

The NAIC adopted revisions to the Part A Laws and Regulations Preamble (the "Preamble") of the NAIC Financial Regulation Standards and Accreditation Program that includes within the definition of "multi-state insurer" certain insurer-owned captives and special purpose vehicles that are single-state licensed but assume reinsurance from cedants operating in multiple states. The revised definition subjects certain captives, including XXX/AXXX captives, variable annuity and long-term care captives, to all of the accreditation standards applicable to other traditional multi-state insurers, including standards related to capital and surplus requirements, risk-based capital requirements, investment laws and credit for reinsurance laws. Although we do not expect the revised definition to affect our existing life insurance captives (or our ability to engage in life insurance captive transactions in the future), such application will

likely prevent us from engaging in variable annuity captive transactions on the same or a similar basis as in the past and, if applied retroactively, would likely cause us to recapture business from and unwind our existing variable annuity captive (“VA Captive”).

While the recapture of business from our existing VA Captive, caused either by actions of the VAIWG or the effect of the Preamble, would not have a material adverse effect on the Company given current market conditions, in the future the Company could experience fluctuations in its risk-based capital ratio due to market volatility if it were prohibited from engaging in similar transactions or required to unwind its existing VA Captive, which could adversely affect our future financial condition and results of operations.

Any regulatory action or change in interpretation that materially adversely affects the Company’s use or materially increases the Company’s cost of using captives or reinsurers for the affected business, either retroactively or prospectively, could have a material adverse impact on the Company’s financial condition or results of operations. If the Company were required to discontinue its use of captives for intercompany reinsurance transactions on a retroactive basis, adverse impacts would include early termination fees payable to third party finance providers with respect to certain structures, diminished capital position and higher cost of capital. Additionally, finding alternative means to support policy liabilities efficiently is an unknown factor that would be dependent, in part, on future market conditions and the Company’s ability to obtain required regulatory approvals. On a prospective basis, discontinuation of the use of captives could impact the types, amounts and pricing of products offered by the Company’s insurance subsidiaries.

Table of Contents

Laws, regulations and initiatives related to unreported deaths and unclaimed property and death benefits may result in operational burdens, fines, unexpected payments or escheatments.

Since 2012, various states have enacted laws that require life insurers to search for unreported deaths. The National Conference of Insurance Legislators (“NCOIL”) has adopted the Model Unclaimed Life Insurance Benefits Act (the “Unclaimed Benefits Act”) and legislation or regulations have been enacted in numerous states that are similar to the Unclaimed Benefits Act, although each state’s version differs in some respects. The Unclaimed Benefits Act, if adopted by any state, imposes new requirements on insurers to periodically compare their life insurance and annuity contracts and retained asset accounts against the U.S. Social Security Administration’s Death Master File or similar databases (a “Death Database”), investigate any potential matches to confirm the death and determine whether benefits are due, and to attempt to locate the beneficiaries of any benefits that are due or, if no beneficiary can be located, escheat the benefit to the state as unclaimed property. Other states in which the Company does business may also consider adopting legislation similar to the Unclaimed Benefits Act. The Company cannot predict whether such legislation will be proposed or enacted in additional states.

The Uniform Laws Commission has adopted revisions to the Uniform Unclaimed Property Act in a manner likely to impact state unclaimed property laws and requirements, though it is not clear at this time to what extent or whether requirements will conflict with otherwise imposed search requirements. Other life insurance industry associations and regulatory associations are also considering these matters. Certain states have amended or may amend their unclaimed property laws to require insurers to compare in-force and certain terminated life insurance policies, annuity contracts, and retained asset accounts against a Death Database, to investigate potential matches to determine whether the named insured is deceased, to attempt to locate and pay beneficiaries any unclaimed benefits required to be paid, and, if no beneficiary can be located, to escheat policy benefits to the appropriate state as unclaimed property. The enactment of such unclaimed property laws may require the Company to incur significant expenses, including benefits with respect to terminated policies for which no reserves are currently held and unanticipated operational expenses. Any of the foregoing could have a material adverse effect on the Company’s financial condition and results of operations.

A number of state treasury departments and administrators of unclaimed property have audited life insurance companies for compliance with unclaimed property laws. The focus of the audits has been to determine whether there have been maturities of policies or contracts, or policies that have exceeded limiting age with respect to which death benefits or other payments under the policies should be treated as unclaimed property that should be escheated to the state. In addition, the audits have sought to identify unreported deaths of insureds. There is no clear basis in previously existing law for treating an unreported death as giving rise to a policy benefit that would be subject to unclaimed property procedures. A number of life insurers, however, have entered into resolution agreements with state treasury departments and administrators of unclaimed property under which the life insurers agreed to procedures for comparing their previously issued life insurance and annuity contracts and retained asset accounts against a Death Database, treating confirmed deaths as giving rise to a death benefit under their policies, locating beneficiaries and paying them the benefits and interest, escheating the benefits and interest, in some cases at a negotiated rate, to the state if the beneficiary could not be found, and paying penalties to the state, if required. The amounts publicly reported to have been paid to beneficiaries and/or escheated to the states have been substantial.

State insurance regulators have initiated targeted multi-state examinations of life insurance companies with respect to the companies’ claims paying practices and use of a Death Database to identify unreported deaths in their life insurance policies, annuity contracts and retained asset accounts, despite having no clear basis in previously existing law for requiring a life insurer to search for unreported deaths in order to determine whether a benefit is owed. A number of life insurers, however, have entered into settlement or consent agreements with state insurance regulators under which the life insurers agreed to implement systems and procedures for periodically comparing their life insurance and annuity contracts and retained asset accounts against a Death Database, treating confirmed deaths as giving rise to a death benefit under their policies, locating beneficiaries and paying them the benefits and interest, escheating the

benefits and interest to the state if the beneficiary could not be found, and paying penalties to the state, if required. It has been publicly reported that the life insurers have paid substantial administrative and/or examination fees to the insurance regulators in connection with the settlement or consent agreements.

Certain of the Company's subsidiaries as well as certain other insurance companies from whom the Company has reinsured blocks of life insurance and annuity policies are subject to unclaimed property audits and/or targeted multi-state examinations by insurance regulators similar to those described above. It is possible that the audits, examinations and/or the enactment of state laws similar to the Unclaimed Benefits Act could result in additional payments to beneficiaries, additional escheatment of funds deemed abandoned under state laws, payment of administrative penalties and/or examination fees to state authorities, and changes to the Company's procedures for identifying unreported deaths and escheatment of abandoned property. It is possible any such additional payments and any costs related to changes in Company procedures could materially impact the Company's financial condition and/or results of operations. It is also possible that life insurers, including the Company, may be subject to claims, regulatory actions, law enforcement actions, and civil litigation arising from their prior business practices, unclaimed property practices or related audits and examinations. Any resulting liabilities, payments or costs, including initial and ongoing costs of changes to the Company's procedures or systems, could be significant and could have a material adverse effect on the Company's financial condition and/or results of operations.

During December 2012, the West Virginia Treasurer filed actions against the Company's subsidiaries Protective Life Insurance Company and West Coast Life Insurance Company in West Virginia state court (State of West Virginia ex rel. John D. Perdue v. Protective Life Insurance Company; State of West Virginia ex rel. John D. Perdue v. West Coast Life Insurance Company; Defendants' Motions to Dismiss granted on December 27, 2013; Notice of Appeal filed on January 27, 2014; dismissal reversed by the West Virginia Supreme Court of Appeals on June 16, 2015; Petition for Rehearing filed by Defendant insurance companies denied on September 21, 2015). The actions, which also name numerous other life insurance companies, allege that the companies violated the West Virginia Uniform Unclaimed Property Act, seek to compel compliance with the Act, and seek payment of

Table of Contents

unclaimed property, interest, and penalties. While the legal theory or theories that may give rise to liability in the West Virginia Treasurer litigation are uncertain, it is possible that other jurisdictions may pursue similar actions. The Company does not currently believe that losses, if any, arising from the West Virginia Treasurer litigation will be material. The Company cannot, however, predict whether other jurisdictions will pursue similar actions or if they do, whether such actions will have a material impact on the Company's financial condition and/or results of operations.

New and amended regulations regarding the standard of care or standard of conduct applicable to investment professionals, insurance agencies, and financial institutions that recommend or sell annuities or life insurance products may have a material adverse impact on our ability to sell annuities and other products, to retain in-force business and on our financial condition or results of operations.

Sales of life insurance policies, contracts, and annuities offered by the Company are subject to regulations relating to sales practices adopted by a variety of federal and state regulatory authorities. Certain annuities and life insurance policies such as variable annuities and variable universal life insurance are regulated under the federal securities laws administered by the U.S. Securities and Exchange Commission (the "SEC"). On April 18, 2018, the SEC voted to propose rulemakings and interpretations relating to the standard of conduct applicable to broker-dealers, investment advisers, and their representatives when making certain recommendations to retail customers. Specifically, under the proposed regulations, a broker-dealer would be required to act in the best interest of a retail customer when recommending any securities transaction or investment strategy involving securities to a retail customer. The SEC also proposed an interpretation reaffirming and, in some cases, clarifying its views of the fiduciary duty that investment advisers owe to their clients. Another SEC proposal would require broker-dealers and investment advisers to provide each customer with a summary of the nature of the customer's relationship with the investment professional, as well as a restriction on the use of the terms "adviser" and "advisor" by broker-dealers.

In addition, broker-dealers, insurance agencies and other financial institutions sell the Company's annuities to employee benefit plans governed by provisions of the Employee Retirement Income Security Act ("ERISA") and Individual Retirement Accounts ("IRAs") that are governed by similar provisions under the Internal Revenue Code (the "Code"). Consequently, our activities and those of the firms that sell the Company's products are subject to restrictions that require ERISA fiduciaries to perform their duties solely in the interests of ERISA plan participants and beneficiaries, and that prohibit ERISA fiduciaries from causing a covered plan or retirement account to engage in certain prohibited transactions absent an exemption.

The NAIC is considering revisions to the Suitability in Annuity Transactions Model Regulation which, if adopted by regulators, could impose a stricter standard of care upon insurers who sell annuities. Likewise, several states are considering or have adopted legislation or regulatory measures that would implement new requirements and standards applicable to the sale of annuities and, in some cases, life insurance products. These standards vary widely in scope, applicability and timing of implementation. The adoption and enactment of these or any revised standards as law or regulation could have a material adverse effect upon the manner in which the Company's products are sold.

There remains significant uncertainty surrounding the final form that these regulations may take. Our current distributors may continue to move forward with their plans to limit the number of products they offer, including the types of products offered by the Company. The Company may find it necessary to change sales representative and/or broker compensation, to limit the assistance or advice it can provide to owners of the Company's annuities, to replace or engage additional distributors, or otherwise change the manner in which it designs and supports sales of its annuities. In addition, the Company continues to incur expenses in connection with initial and ongoing compliance obligations with respect to such rules, and in the aggregate these expenses may be significant. Any of the foregoing regulatory, legislative or judicial measures or the reaction to such activity by consumers or other members of the insurance industry could have a material adverse impact on our ability to sell annuities and other products, to retain in-force business, and on our financial condition or results of operations.

The Company may be subject to regulation, investigations, enforcement actions, fines and penalties imposed by the SEC, FINRA and other federal and international regulators in connection with its business operations.

Certain life insurance policies, contracts, and annuities offered by the Company are subject to regulation under the federal securities laws administered by the SEC. The federal securities laws contain regulatory restrictions and criminal, administrative, and private remedial provisions. From time to time, the SEC and the Financial Industry Regulatory Authority (“FINRA”) examine or investigate the activities of broker-dealers and investment advisors, including the Company’s affiliated broker-dealers and investment advisers. These examinations or investigations often focus on the activities of the registered representatives and registered investment advisers doing business through such entities and the entities’ supervision of those persons. It is possible that any examination or investigation could lead to enforcement action by the regulator and/or may result in payments of fines and penalties, payments to customers, or both, as well as changes in systems or procedures of such entities, any of which could have a material adverse effect on the Company’s financial condition or results of operations.

The Company may also be subject to regulation by governments of the countries in which it currently does, or may in the future, do, business, as well as regulation by the U.S. Government with respect to its operations in foreign countries, such as the Foreign Corrupt Practices Act. Penalties for violating the various laws governing the Company’s business in other countries may include restrictions upon business operations, fines and imprisonment, both within the U.S. and abroad. U.S. enforcement of anti-corruption laws continues to increase in magnitude, and penalties may be substantial.

The Company is subject to conditions and requirements set forth in the Telephone Consumer Protection Act (“TCPA”), which places restrictions on the use of automated telephone and facsimile machines. Class action lawsuits alleging violations of the act have been filed against a number of companies, including life insurance carriers. These class action lawsuits contain allegations that defendant carriers were vicariously liable for the alleged wrongful conduct of agents who violated the TCPA.

## Table of Contents

Some of the class actions have resulted in substantial settlements against other insurers. Any such actions against the Company could result in a material adverse effect upon our financial condition or results of operations.

Other types of regulation that could affect the Company and its subsidiaries include, but are not limited to, insurance company investment laws and regulations, state statutory accounting and reserving practices, antitrust laws, minimum solvency requirements, enterprise risk requirements, state securities laws, federal privacy laws, cybersecurity regulation, technology and data regulations, insurable interest laws, federal anti-money laundering and anti-terrorism laws, employment and immigration laws (including laws in Alabama where over half of the Company's employees are located), and because the Company owns and operates real property, state, federal, and local environmental laws. Under some circumstances, severe penalties may be imposed for breach of these laws.

The Company cannot predict what form any future changes to laws and/or regulations affecting participants in the financial services sector and/or insurance industry, including the Company and its competitors or those entities with which it does business, may take, or what effect, if any, such changes may have.

The Company's ability to enter into certain transactions is influenced by how such a transaction might affect Dai-ichi Life's taxation in Japan.

Changes to tax law, such as the effect of the Tax Cuts and Jobs Act (the "Tax Reform Act") which was enacted on December 22, 2017, or interpretations of existing tax law could adversely affect the Company and its ability to compete with non-insurance products or reduce the demand for certain insurance products.

In general, existing law exempts policyholders from current taxation on the increase in value of most insurance and annuity products during these products' accumulation phase. This favorable tax treatment provides some of the Company's products with a competitive advantage over products offered by non-insurance companies. To the extent that the law is revised to either reduce the tax-deferred status of life insurance and annuity products, or to establish the tax-deferred status of competing products, then all life insurance companies, including the Company's subsidiaries, would be adversely affected with respect to their ability to sell their products. Furthermore, such changes would generally cause increased surrenders of existing life insurance and annuity products. For example, a change in law that further restricts the deductibility of interest expense when a business owns a life insurance product would result in increased surrenders of these products.

The Company is subject to corporate income, excise, franchise, and premium taxes. Federal tax law provides certain benefits to the Company, such as the dividends-received deduction, the deferral of current taxation on derivatives' and securities' economic income and the current deduction for future policy benefits and claims. The Tax Reform Act will require the Company to report higher amounts of taxable income both currently and in the future. However, the legislation also significantly reduced the corporate income tax rate. Overall, the Company expects to pay less income tax in the future.

The Company's mid-2005 transition from relying on reinsurance for newly-written traditional life products to reinsuring some of these products' reserves into its captive insurance companies resulted in a net reduction in its current taxes, offset by an increase in its deferred taxes. The resulting benefit of reduced current taxes is attributed to the applicable life products and is an important component of the profitability of these products. The Tax Reform Act, with its overall lower tax rate, has decreased the economic tax benefit associated with these products. Ultimately, the profitability and competitive position of these products is dependent on the Company's ability to continue deducting its provision for future policy benefits and claims and the Company's ability to generate taxable income.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the quarter ended September 30, 2018, the Company sold no equity securities in transactions which were not registered under the Securities Act of 1933, as amended.

Purchases of Equity Securities by the Issuer

During the quarter ended September 30, 2018, 100% of the Company's common stock was owned by Dai-ichi Life Holdings, Inc., and was not available for repurchase by the Company.
