

Edgar Filing: Unum Group - Form 10-Q

Unum Group
Form 10-Q
October 26, 2017

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549
FORM 10-Q
(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2017

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____
Commission file number 1-11294

Unum Group
(Exact name of registrant as specified in its charter)

Delaware 62-1598430
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

1 FOUNTAIN SQUARE
CHATTANOOGA, TENNESSEE 37402
(Address of principal executive offices) (Zip Code)

423.294.1011
(Registrant's telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: Unum Group - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

(Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

224,389,084 shares of the registrant's common stock were outstanding as of October 24, 2017.

Cautionary Statement Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the Act) provides a "safe harbor" to encourage companies to provide prospective information, as long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. Certain information contained in this Quarterly Report on Form 10-Q (including certain statements in the consolidated financial statements and related notes and Management's Discussion and Analysis), or in any other written or oral statements made by us in communications with the financial community or contained in documents filed with the Securities and Exchange Commission (SEC), may be considered forward-looking statements within the meaning of the Act. Forward-looking statements are those not based on historical information, but rather relate to our outlook, future operations, strategies, financial results, or other developments. Forward-looking statements speak only as of the date made. We undertake no obligation to update these statements, even if made available on our website or otherwise. These statements may be made directly in this document or may be made part of this document by reference to other documents filed by us with the SEC, a practice which is known as "incorporation by reference." You can find many of these statements by looking for words such as "will," "may," "should," "could," "believes," "expects," "anticipates," "estimates," "plans," "assumes," "intends," "projects," "goals," "objectives," or similar expressions in this document or in documents incorporated herein.

These forward-looking statements are subject to numerous assumptions, risks, and uncertainties, many of which are beyond our control. We caution readers that the following factors, in addition to other factors mentioned from time to time, may cause actual results to differ materially from those contemplated by the forward-looking statements:

• Sustained periods of low interest rates.

• Fluctuation in insurance reserve liabilities and claim payments due to changes in claim incidence, recovery rates, mortality and morbidity rates, and policy benefit offsets due to, among other factors, the rate of unemployment and consumer confidence, the emergence of new diseases, epidemics, or pandemics, new trends and developments in medical treatments, the effectiveness of our claims operational processes, and changes in government programs.

• Unfavorable economic or business conditions, both domestic and foreign.

• Legislative, regulatory, or tax changes, both domestic and foreign, including the effect of potential legislation and increased regulation in the current political environment.

• Investment results, including, but not limited to, changes in interest rates, defaults, changes in credit spreads, impairments, and the lack of appropriate investments in the market which can be acquired to match our liabilities.

• A cyber attack or other security breach could result in the unauthorized acquisition of confidential data.

• The failure of our business recovery and incident management processes to resume our business operations in the event of a natural catastrophe, cyber attack, or other event.

• Increased competition from other insurers and financial services companies due to industry consolidation, new entrants to our markets, or other factors.

• Execution risk related to our technology needs.

• Changes in our financial strength and credit ratings.

• Damage to our reputation due to, among other factors, regulatory investigations, legal proceedings, external events, and/or inadequate or failed internal controls and procedures.

• Actual experience that deviates from our assumptions used in pricing, underwriting, and reserving.

• Actual persistency and/or sales growth that is higher or lower than projected.

• Changes in demand for our products due to, among other factors, changes in societal attitudes, the rate of unemployment, consumer confidence, and/or legislative and regulatory changes, including healthcare reform.

• Effectiveness of our risk management program.

• Contingencies and the level and results of litigation.

• Availability of reinsurance in the market and the ability of our reinsurers to meet their obligations to us.

•

Edgar Filing: Unum Group - Form 10-Q

Ineffectiveness of our derivatives hedging programs due to changes in the economic environment, counterparty risk, ratings downgrades, capital market volatility, changes in interest rates, and/or regulation.

• Changes in accounting standards, practices, or policies.

• Fluctuation in foreign currency exchange rates.

• Ability to generate sufficient internal liquidity and/or obtain external financing.

• Recoverability and/or realization of the carrying value of our intangible assets, long-lived assets, and deferred tax assets.

• Terrorism, both within the U.S. and abroad, ongoing military actions, and heightened security measures in response to these types of threats.

For further discussion of risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements, see Part 1, Item 1A of our annual report on Form 10-K for the year ended December 31, 2016.

All subsequent written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Unum Group and Subsidiaries

September 30, 2017

Note 1 - Basis of Presentation

The accompanying consolidated financial statements of Unum Group and its subsidiaries (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended December 31, 2016.

In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Interim results are not necessarily indicative of full year performance.

Note 2 - Accounting Developments

Accounting Updates Adopted in 2017:

Accounting Standards Codification (ASC)	Description	Date of Adoption	Effect on Financial Statements
ASC 944 "Financial Services - Insurance"	This update changed the disclosure requirements for certain insurance contracts. These changes included a requirement to disclose the rollforward of the liability for unpaid claims and claim adjustment expenses in both interim and annual reporting periods for long-duration and short-duration insurance contracts. Additional claims disclosures were also required for short-duration contracts. The guidance is to be applied retrospectively.	January 1, 2016 for annual reporting period disclosures and January 1, 2017 for interim reporting period disclosures.	The adoption of this update expanded our interim reporting period disclosures but had no effect on our financial position or results of operations. The annual reporting period disclosure requirements were only applicable to our individual dental products, which we deem immaterial, and therefore did not alter our annual disclosures.
ASC 718 "Compensation - Stock Compensation"	This update changed the accounting and disclosure requirements for certain aspects of share-based payments to employees. The update required all income tax effects of stock-based compensation awards to be recognized in the income statement when the awards vest or are settled. The update also allows an employer to repurchase more of an employee's shares than it can today for tax withholding purposes without triggering liability accounting and to make a policy election to account for forfeitures as they occur. Additionally, the update required reclassification of tax-related cash flows	January 1, 2017	The adoption of this update did not have a material effect on our financial position or results of operations. The impact of the update reduced our effective income tax rate by a de minimis amount during the three and nine months ended September 30, 2017. During periods in which the vesting date fair value differs from the grant date fair value of certain stock-based compensation awards, we may experience volatility in the income tax recognized in our results of

resulting from share-based payments to be classified as operating activities instead of financing activities on the statement of cash flows. Transition guidance for the amendments varies between the retrospective, modified retrospective, and prospective methods depending on the specific requirement of the update.

operations. The amendment related to the reclassification of tax-related cash flows in our consolidated statements of cash flows has been applied prospectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 2 - Accounting Developments - Continued

Accounting Updates Outstanding:

ASC	Description	Date of Adoption	Effect on Financial Statements
ASC 230 "Statement of Cash Flows"	This update provides clarifying guidance intended to reduce the diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The update addresses eight specific cash flow issues that relate to various transactions. The guidance is to be applied retrospectively, with early adoption permitted.	January 1, 2018	The adoption of this update will result in reclassifications to certain cash receipts and payments within our consolidated statements of cash flows but will have no effect on our financial position or results of operations.
ASC 606 "Revenue from Contracts with Customers"	These updates supersede virtually all existing guidance regarding the recognition of revenue from customers. Specifically excluded from the scope of these updates are insurance contracts, although our fee-based service products are included within the scope. Our fee-based service products, which are primarily sold in our Unum US segment, are reported in other income within our consolidated statements of income and represent less than one percent of our total revenue. The core principle of this guidance is that revenue recognition should depict the transfer of goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. The guidance may be applied retrospectively for all periods presented or retrospectively with a cumulative-effect adjustment at the date of adoption, with early adoption permitted.	January 1, 2018	The adoption of these updates will not have a material effect on our financial position or results of operations.
ASC 740 "Income Taxes"	This update eliminates the exception that requires the tax effect of intra-entity asset transfers other than inventory to be deferred until the transferred asset is sold to a third party or otherwise recovered through use. It requires recognition of tax expense from the sale of the asset in the seller's tax jurisdiction when the transfer occurs, even though the pre-tax effects of that transaction are eliminated in consolidation. The guidance is to be applied retrospectively, with early adoption permitted.	January 1, 2018	The adoption of this update will not have a material effect on our financial position or results of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 2 - Accounting Developments - Continued

ASC	Description	Date of Adoption	Effect on Financial Statements
ASC 825 "Financial Instruments - Overall"	This update changes the accounting and disclosure requirements for certain financial instruments. These changes include a requirement to measure equity investments, other than those that result in consolidation or are accounted for under the equity method, at fair value through net income unless the investment qualifies for certain practicability exceptions. In addition, the update clarifies guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale fixed maturity securities. Changes also include the modification of certain disclosures around the fair value of financial instruments, including the requirement for separate presentation of financial assets and liabilities by measurement category, as well as the elimination of certain disclosures around methods and significant assumptions used to estimate fair value. The guidance is to be applied using a modified retrospective approach through a cumulative-effect adjustment to accumulated other comprehensive income with a corresponding adjustment to retained earnings as of the beginning of the fiscal year the guidance is adopted. Early adoption is generally not permitted, with certain exceptions as defined in the update.	January 1, 2018	We have determined that certain of our limited partnership investments are within the scope of this update. Although we do not expect this update to have a material impact on our financial position or results of operations, we may experience an increase in volatility in net investment income. In addition, we will be required to modify certain of our disclosures upon adoption.
ASC 715 "Compensation - Retirement Benefits"	This update requires the service cost component of net periodic pension and postretirement benefit costs to be included as a component of compensation costs in an entity's statement of income. Other components of net periodic pension and postretirement benefit costs are required to be presented separately from the service cost along with a disclosure identifying the line items in which these costs are presented in the statement of income. The amendments in this update are to be applied retrospectively or prospectively depending on the specific requirement of the update, with early adoption permitted.	January 1, 2018	The adoption of this update will result in reclassifications to certain line items within our consolidated statements of income but will have no effect on our financial position or results of operations.
ASC 842 "Leases"	This update changes the accounting for leases, requiring lessees to report most leases on their balance sheets, regardless of whether the lease is classified as a finance lease or an operating lease. For lessees, the initial lease liability is equal to the present value of lease payments, and a corresponding asset, adjusted for certain items, is	January 1, 2019	We have not yet determined the expected impact on our financial position or results of operations.

also recorded. Expense recognition for lessees will remain similar to current accounting requirements for capital and operating leases. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. The guidance is to be applied using a modified retrospective approach at the beginning of the earliest comparative period presented and early adoption is permitted.

ASC 310
"Receivables -
Nonrefundable
Fees and Other
Costs"

This update shortens the amortization period to the earliest call date for certain callable debt securities held at a premium. This update does not impact securities held at a discount. The guidance is to be applied using a modified retrospective approach, with early adoption permitted.

January 1,
2019

We have not yet determined the expected impact on our financial position or results of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 2 - Accounting Developments - Continued

ASC	Description	Date of Adoption	Effect on Financial Statements
ASC 815 "Derivatives and Hedge Accounting"	<p>This update provides targeted improvements to accounting for hedging activities for both nonfinancial and financial risk components, aligns the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements, eases certain documentation and effectiveness assessment requirements, and enhances transparency through expanded disclosures. For cash flow and net investment hedges existing at the date of adoption, the guidance is to be applied using a modified retrospective approach through a cumulative-effect adjustment to accumulated other comprehensive income with a corresponding adjustment to retained earnings as of the beginning of the fiscal year the guidance is adopted. The amended presentation and disclosure guidance is required prospectively. Early adoption is permitted.</p>	January 1, 2019	<p>We have not yet determined the expected impact on our financial position or results of operations.</p>
ASC 350 "Intangibles - Goodwill and Other"	<p>This update eliminates the requirement to calculate the implied fair value of goodwill (the second step in the current two-step test) to measure a goodwill impairment charge. Instead, entities should perform the goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and recognize an impairment charge for the excess of the carrying amount over the fair value, with the loss not to exceed the total amount of goodwill allocated to that reporting unit. The guidance is to be applied prospectively, with early adoption permitted for goodwill impairment tests performed on testing dates after January 1, 2017.</p>	January 1, 2020	<p>The adoption of this update will not have a material effect on our financial position or results of operations.</p>
ASC 326 "Financial Instruments - Credit Losses"	<p>This update amends the guidance on the impairment of financial instruments. The update adds an impairment model known as the current expected credit loss model that is based on expected losses rather than incurred losses and will generally result in earlier recognition of allowances for losses. The current expected credit loss model applies to financial instruments such as mortgage loans, fixed maturity securities classified as held-to-maturity, and certain receivables. The update also modifies the other-than-temporary impairment model used for available-for-sale fixed maturity securities such that credit losses are recognized as an allowance rather than as a reduction in the amortized cost of the security. The reversal of previously recognized credit losses on available-for-sale fixed maturity securities is allowed under specified circumstances. Additional disclosures will also be required, including information used to develop the allowance for losses. The guidance is to be applied to most instruments in scope using a modified retrospective approach at the beginning of the earliest comparative period presented with</p>	January 1, 2020	<p>We have not yet determined the expected impact on our financial position or results of operations.</p>

early adoption permitted. For available-for-sale fixed maturity securities, the update is applied prospectively. Other-than-temporary impairment losses recognized on available-for-sale fixed maturity securities prior to adoption of the update cannot be reversed.

Note 3 - Fair Values of Financial Instruments

Presented as follows are the carrying amounts and fair values of financial instruments. The carrying values of financial instruments such as short-term investments, cash and bank deposits, accounts and premiums receivable, accrued investment income, securities lending agreements, and short-term debt approximate fair value due to the short-term nature of the instruments. As such, these financial instruments are not included in the following chart.

	September 30, 2017		December 31, 2016	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in millions of dollars)			
Assets				
Fixed Maturity Securities	\$45,422.6	\$45,422.6	\$44,217.3	\$44,217.3
Mortgage Loans	2,145.3	2,246.7	2,038.9	2,122.2
Policy Loans	3,567.5	3,674.7	3,463.2	3,564.2
Other Long-term Investments				
Derivatives	20.6	20.6	32.7	32.7
Equity Securities	1.3	1.3	1.2	1.2
Miscellaneous Long-term Investments	577.6	577.6	541.9	541.9
Liabilities				
Policyholders' Funds				
Deferred Annuity Products	\$589.9	\$589.9	\$597.4	\$597.4
Supplementary Contracts without Life Contingencies	602.2	602.2	608.8	608.8
Long-term Debt	2,754.1	3,054.5	2,999.4	3,175.8
Payables for Collateral on Investments				
Federal Home Loan Bank (FHLB) Funding Agreements	350.0	350.0	350.0	350.0
Other Liabilities				
Derivatives	52.2	52.2	52.8	52.8
Embedded Derivative in Modified Coinsurance Arrangement	25.2	25.2	46.7	46.7
Unfunded Commitments to Investment Partnerships	4.5	4.5	5.0	5.0

The methods and assumptions used to estimate fair values of financial instruments are discussed as follows.

Fair Value Measurements for Financial Instruments Not Carried at Fair Value

Mortgage Loans: Fair values are estimated using discounted cash flow analyses and interest rates currently being offered for similar loans to borrowers with similar credit ratings and maturities. Loans with similar characteristics are aggregated for purposes of the calculations. These financial instruments are assigned a Level 2 within the fair value hierarchy.

Policy Loans: Fair values for policy loans, net of reinsurance ceded, are estimated using discounted cash flow analyses and interest rates currently being offered to policyholders with similar policies. Carrying amounts for ceded policy loans, which equal \$3,306.2 million and \$3,206.1 million as of September 30, 2017 and December 31, 2016, respectively, approximate fair value and are reported on a gross basis in our consolidated balance sheets. A change in interest rates for ceded policy loans will not impact our financial position because the benefits and risks are fully

ceded to reinsuring counterparties. These financial instruments are assigned a Level 3 within the fair value hierarchy.

Miscellaneous Long-term Investments: Carrying amounts for tax credit partnerships equal the unamortized balance of our contractual commitments and approximate fair value. Fair values for private equity partnerships are primarily derived from net asset values provided by the general partner in the partnerships' financial statements. Our private equity partnerships represent funds that are primarily invested in bank loans, the financial services industry, general private equity, railcar leasing, and mezzanine debt. Distributions received from the funds arise from income generated by the underlying investments as well as the liquidation of the underlying investments. As of September 30, 2017, we estimate that the underlying assets of the funds will be liquidated over the next one to ten years. These financial instruments are assigned a Level 3 within the fair value hierarchy. Our

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 3 - Fair Values of Financial Instruments - Continued

shares of FHLB common stock are carried at cost, which approximates fair value. These financial instruments are considered restricted investments and are assigned a Level 2 within the fair value hierarchy.

Policyholders' Funds: Policyholders' funds are comprised primarily of deferred annuity products and supplementary contracts without life contingencies and represent customer deposits plus interest credited at contract rates. Carrying amounts approximate fair value. These financial instruments are assigned a Level 3 within the fair value hierarchy.

Fair values for insurance contracts other than investment contracts are not required to be disclosed. However, the fair values of liabilities under all insurance contracts are taken into consideration in our overall management of interest rate risk, which seeks to minimize exposure to changing interest rates through the matching of investment maturities with amounts due under insurance contracts.

Long-term Debt: Fair values for long-term debt are obtained from independent pricing services or discounted cash flow analyses based on current incremental borrowing rates for similar types of borrowing arrangements. Debt instruments which are valued by pricing services using active trades for which there was current market activity in that specific debt instrument have fair values of \$2,150.9 million and \$709.8 million as of September 30, 2017 and December 31, 2016, respectively, and are assigned a Level 1 within the fair value hierarchy. Debt instruments which are valued by pricing services that generally use observable inputs for securities or comparable securities in active markets in their valuation techniques have fair values of \$903.6 million and \$2,466.0 million as of September 30, 2017 and December 31, 2016, respectively, and are assigned a Level 2.

FHLB Funding Agreements: Funding agreements with the FHLB represent cash advances used for the purpose of investing in fixed maturity securities. Carrying amounts approximate fair value and are assigned a Level 2 within the fair value hierarchy.

Unfunded Commitments to Investment Partnerships: Unfunded equity commitments represent amounts that we have committed to fund certain investment partnerships. These commitments are legally binding, subject to the partnerships meeting specified conditions. Carrying amounts approximate fair value and are assigned a Level 2 within the fair value hierarchy.

Fair Value Measurements for Financial Instruments Carried at Fair Value

We report fixed maturity securities, derivative financial instruments, and unrestricted equity securities at fair value in our consolidated balance sheets. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and less judgment utilized in measuring fair value. An active market for a financial instrument is a market in which transactions for an asset or a similar asset occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available. Conversely, financial instruments rarely traded or not quoted have less observability and are measured at fair value using valuation techniques that require more judgment. Pricing observability is generally impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, and overall market conditions.

Valuation techniques used for assets and liabilities accounted for at fair value are generally categorized into three types. The market approach uses prices and other relevant information from market transactions involving identical or comparable assets or liabilities. The income approach converts future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. The cost approach is based upon the amount that currently would be required to replace the service capacity of an asset, or the current replacement cost.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data are available that can be obtained without undue cost and effort. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate. If we use multiple valuation techniques to measure fair value, we evaluate and weigh the results, as appropriate, considering the reasonableness of the range indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 3 - Fair Values of Financial Instruments - Continued

The selection of the valuation method(s) to apply considers the definition of an exit price and depends on the nature of the asset or liability being valued. For assets and liabilities accounted for at fair value, we generally use valuation techniques consistent with the market approach, and to a lesser extent, the income approach. We believe the market approach provides more observable data than the income approach, considering the type of investments we hold. Our fair value measurements could differ significantly based on the valuation technique and available inputs. When using a pricing service, we obtain the vendor's pricing documentation to ensure we understand their methodologies. We periodically review and approve the selection of our pricing vendors to ensure we are in agreement with their current methodologies. When markets are less active, brokers may rely more on models with inputs based on the information available only to the broker. Our internal investment management professionals, which include portfolio managers and analysts, monitor securities priced by brokers and evaluate their prices for reasonableness based on benchmarking to available primary and secondary market information. In weighing a broker quote as an input to fair value, we place less reliance on quotes that do not reflect the result of market transactions. We also consider the nature of the quote, particularly whether the quote is a binding offer. If prices in an inactive market do not reflect current prices for the same or similar assets, adjustments may be necessary to arrive at fair value. When relevant market data is unavailable, which may be the case during periods of market uncertainty, the income approach can, in suitable circumstances, provide a more appropriate fair value. During 2017, we have applied valuation approaches and techniques on a consistent basis to similar assets and liabilities and consistent with those approaches and techniques used at year end 2016.

We use observable and unobservable inputs in measuring the fair value of our fixed maturity and equity securities. For securities categorized as Level 1, fair values equal active Trade Reporting and Compliance Engine (TRACE) pricing or unadjusted broker market maker prices. For securities categorized as Level 2 or Level 3, inputs that may be used in valuing each class of securities at any given time period are presented as follows. Actual inputs used to determine fair values will vary for each reporting period depending on the availability of inputs which may, at times, be affected by the lack of market liquidity.

Instrument	Level 2 Observable Inputs	Level 3 Unobservable Inputs

The management of our investment portfolio includes establishing pricing policy and reviewing the reasonableness of sources and inputs used in developing pricing. We review all prices obtained to ensure they are consistent with a variety of observable market inputs and to verify the validity of a security's price. In the event we receive a vendor's market price that does not appear reasonable based on our market analysis, we may challenge the price and request further information about the assumptions and methodologies used by the vendor to price the security. We may change the vendor price based on a better data source such as an actual trade. We also review all price changes from the prior month which fall outside a predetermined corridor. The overall valuation process for determining fair values may include adjustments to valuations obtained from our pricing sources when they do not represent a valid exit price. These adjustments may be made when, in our judgment and considering our knowledge of the financial conditions and industry in which the issuer operates, certain features of the financial instrument require that an adjustment be made to the value originally obtained from our pricing sources. These features may include the complexity of the financial instrument, the market in which the financial instrument is traded, counterparty credit risk, credit structure,

concentration, or liquidity. Additionally, an adjustment to the price derived from a model typically reflects our judgment of the inputs that other participants in the market for the financial instrument being measured at fair value would consider in pricing that same financial instrument. In the event an asset is sold, we test the validity of the fair value determined by our valuation techniques by comparing the selling price to the fair value determined for the asset in the immediately preceding month end reporting period.

The parameters and inputs used to validate a price on a security may be adjusted for assumptions about risk and current market conditions on a quarter to quarter basis, as certain features may be more significant drivers of valuation at the time of pricing. Changes to inputs in valuations are not changes to valuation methodologies; rather, the inputs are modified to reflect direct or indirect impacts on asset classes from changes in market conditions.

Fair values for derivatives other than embedded derivatives in modified coinsurance arrangements are based on market quotes or pricing models and represent the net amount of cash we would have paid or received if the contracts had been settled or closed as

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 3 - Fair Values of Financial Instruments - Continued

of the last day of the period. We analyze credit default swap spreads relative to the average credit spread embedded within the LIBOR-setting syndicate in determining the effect of credit risk on our derivatives' fair values. If net counterparty credit risk for a derivative asset is determined to be material and is not adequately reflected in the LIBOR-based fair value obtained from our pricing sources, we adjust the valuations obtained from our pricing sources. For purposes of valuing net counterparty risk, we measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date under current market conditions. In regard to our own credit risk component, we adjust the valuation of derivative liabilities wherein the counterparty is exposed to our credit risk when the LIBOR-based valuation of our derivatives obtained from pricing sources does not effectively include an adequate credit component for our own credit risk. Fair values for our embedded derivative in a modified coinsurance arrangement are estimated using internal pricing models and represent the hypothetical value of the duration mismatch of assets and liabilities, interest rate risk, and third party credit risk embedded in the modified coinsurance arrangement.

Certain of our investments do not have readily determinable market prices and/or observable inputs or may at times be affected by the lack of market liquidity. For these securities, we use internally prepared valuations combining matrix pricing with vendor purchased software programs, including valuations based on estimates of future profitability, to estimate the fair value. Additionally, we may obtain prices from independent third-party brokers to aid in establishing valuations for certain of these securities. Key assumptions used by us to determine fair value for these securities include risk free interest rates, risk premiums, performance of underlying collateral (if any), and other factors involving significant assumptions which may or may not reflect those of an active market.

At September 30, 2017, approximately 21.7 percent of our fixed maturity securities were valued using active trades from TRACE pricing or broker market maker prices for which there was current market activity in that specific security (comparable to receiving one binding quote). The prices obtained were not adjusted, and the assets were classified as Level 1, the highest category of the three-level fair value hierarchy classification wherein inputs are unadjusted and represent quoted prices in active markets for identical assets or liabilities.

The remaining 78.3 percent of our fixed maturity securities were valued based on non-binding quotes or other observable and unobservable inputs, as discussed below.

Approximately 64.8 percent of our fixed maturity securities were valued based on prices from pricing services that generally use observable inputs such as prices for securities or comparable securities in active markets in their valuation techniques. These assets were classified as Level 2. Level 2 assets or liabilities are those valued using inputs (other than prices included in Level 1) that are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Approximately 3.0 percent of our fixed maturity securities were valued based on one or more non-binding broker quotes, if validated by observable market data, or on TRACE prices for identical or similar assets absent current market activity. When only one price is available, it is used if observable inputs and analysis confirms that it is appropriate. These assets, for which we were able to validate the price using other observable market data, were classified as Level 2.

•

Approximately 10.5 percent of our fixed maturity securities were valued based on prices of comparable securities, matrix pricing, market models, and/or internal models or were valued based on non-binding quotes with no other observable market data. These assets were classified as either Level 2 or Level 3, with the categorization dependent on whether there was other observable market data. Level 3 is the lowest category of the fair value hierarchy and reflects the judgment of management regarding what market participants would use in pricing assets or liabilities at the measurement date. Financial assets and liabilities categorized as Level 3 are generally those that are valued using unobservable inputs to extrapolate an estimated fair value.

We consider transactions in inactive or disorderly markets to be less representative of fair value. We use all available observable inputs when measuring fair value, but when significant other unobservable inputs and adjustments are necessary, we classify these assets or liabilities as Level 3.

Note 3 - Fair Values of Financial Instruments - Continued

Realized and unrealized investment gains and losses presented in the preceding tables represent gains and losses only for the time during which the applicable financial instruments were classified as Level 3. The transfers between levels resulted primarily from a change in observability of three inputs used to determine fair values of the securities transferred: (1) transactional data for new issuance and secondary trades, (2) broker/dealer quotes and pricing, primarily related to changes in the level of activity in the market and whether the market was considered orderly, and (3) comparable bond metrics from which to perform an analysis. For fair value measurements of financial instruments that were transferred either into or out of Level 3, we reflect the transfers using the fair value at the beginning of the period. We believe this allows for greater transparency, as all changes in fair value that arise during the reporting period of the transfer are disclosed as a component of our Level 3 reconciliation. Gains which are included in earnings and are attributable to the change in fair value of assets or liabilities valued using significant unobservable inputs and still held at period end were \$6.7 million and \$21.5 million for the three and nine months ended September 30, 2017, respectively, and \$9.7 million and \$14.3 million for the three and nine months ended September 30, 2016, respectively. These amounts relate entirely to the change in fair value of an embedded derivative in a modified coinsurance arrangement and are reported as a component of realized investment gains and losses.

The table below provides quantitative information regarding the significant unobservable inputs used in Level 3 fair value measurements derived from internal models. Certain securities classified as Level 3 are excluded from the table below due to limitations in our ability to obtain the underlying inputs used by external pricing sources.

Note 3 - Fair Values of Financial Instruments - Continued

Isolated increases in unobservable inputs other than market convention will result in a lower fair value measurement, whereas isolated decreases will result in a higher fair value measurement. The unobservable input for market convention is not sensitive to input movements. The projected liability cash flows used in the fair value measurement of our Level 3 embedded derivative are based on expected claim payments. If claim payments increase, the projected liability cash flows will increase, resulting in a decrease in the fair value of the embedded derivative. Decreases in projected liability cash flows will result in an increase in the fair value of the embedded derivative.

Note 4 - Investments

Fixed Maturity Securities

At September 30, 2017 and December 31, 2016, all fixed maturity securities were classified as available-for-sale. The amortized cost and fair values of securities by security type are shown as follows:

Total Fixed Maturity Securities	\$39,552.7	\$ 4,883.2	\$ 38,748.1	\$ 218.6	\$ 5,469.2

At September 30, 2017, the fair value of investment-grade fixed maturity securities was \$42,034.7 million, with a gross unrealized gain of \$5,506.7 million and a gross unrealized loss of \$52.7 million. The gross unrealized loss on investment-grade fixed maturity securities was 47.6 percent of the total gross unrealized loss on fixed maturity securities. Unrealized losses on investment-grade fixed maturity securities principally relate to changes in interest rates or changes in market or sector credit spreads which occurred subsequent to the acquisition of the securities.

At September 30, 2017, the fair value of below-investment-grade fixed maturity securities was \$3,387.9 million, with a gross unrealized gain of \$191.6 million and a gross unrealized loss of \$57.9 million. The gross unrealized loss on below-investment-grade fixed maturity securities was 52.4 percent of the total gross unrealized loss on fixed maturity securities. Generally, below-investment-grade fixed maturity securities are more likely to develop credit concerns than investment-grade securities. At September 30, 2017, the unrealized losses in our below-investment-grade fixed maturity securities were generally due to credit spreads in certain industries or sectors and, to a lesser extent, credit concerns related to specific securities. For each specific security in an unrealized loss position, we believe that there are positive factors which mitigate credit concerns and that the securities for which we have not recorded an other-than-temporary impairment will recover in value.

Edgar Filing: Unum Group - Form 10-Q

As of September 30, 2017, we held 206 individual investment-grade fixed maturity securities and 37 individual below-investment-grade fixed maturity securities that were in an unrealized loss position, of which 109 investment-grade fixed maturity securities and 27 below-investment-grade fixed maturity securities had been in an unrealized loss position continuously for over one year. Of the 206 individual investment-grade securities in an unrealized loss position, 106 are held in the portfolio acquired through our 2016 purchase of H&J Capital, L.L.C., parent of Starmount Life Insurance Company and AlwaysCare Benefits (which collectively we refer to as Starmount). The fair value of the Starmount portfolio was \$38.7 million and had a net unrealized loss of \$0.5 million at September 30, 2017.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 4 - Investments - Continued

In determining when a decline in fair value below amortized cost of a fixed maturity security is other than temporary, we evaluate the following factors:

- Whether we expect to recover the entire amortized cost basis of the security
- Whether we intend to sell the security or will be required to sell the security before the recovery of its amortized cost basis
- Whether the security is current as to principal and interest payments
- The significance of the decline in value
 - The time period during which there has been a significant decline in value
- Current and future business prospects and trends of earnings
- The valuation of the security's underlying collateral
- Relevant industry conditions and trends relative to their historical cycles
- Market conditions
- Rating agency and governmental actions
- Bid and offering prices and the level of trading activity
- Adverse changes in estimated cash flows for securitized investments
- Changes in fair value subsequent to the balance sheet date
- Any other key measures for the related security

While determining other-than-temporary impairments is a judgmental area, we utilize a formal, well-defined, and disciplined process to monitor and evaluate our fixed income investment portfolio, supported by issuer specific research and documentation as of the end of each period. The process results in a thorough evaluation of problem investments and the recording of losses on a timely basis for investments determined to have an other-than-temporary impairment.

We held no fixed maturity securities as of September 30, 2017 or December 31, 2016 for which a portion of an other-than-temporary impairment was recognized in accumulated other comprehensive income.

At September 30, 2017, we had commitments of \$133.4 million to fund private placement fixed maturity securities, the amount of which may or may not be funded.

Variable Interest Entities

We invest in variable interests issued by variable interest entities. These investments include tax credit partnerships, private equity partnerships, and special purpose entities. For those variable interests that are not consolidated in our financial statements, we are not the primary beneficiary because we have neither the power to direct the activities that are most significant to economic performance nor the responsibility to absorb a majority of the expected losses. The determination of whether we are the primary beneficiary is performed at the time of our initial investment and at the date of each subsequent reporting period.

As of September 30, 2017, the carrying amount of our variable interest entity investments that are not consolidated in our financial statements was \$543.4 million, comprised of \$137.4 million of tax credit partnerships and \$406.0 million of private equity partnerships. At December 31, 2016, the carrying amount of our variable interest entity investments that are not consolidated in our financial statements was \$509.3 million, comprised of \$165.2 million of tax credit

Edgar Filing: Unum Group - Form 10-Q

partnerships and \$344.1 million of private equity partnerships. These variable interest entity investments are reported as other long-term investments in our consolidated balance sheets.

The Company invests in tax credit partnerships primarily for the receipt of income tax credits and tax benefits derived from passive losses on the investments. Amounts recognized in the consolidated statements of income are as follows:

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2017	2016	2017	2016
	(in millions of dollars)			
Income Tax Credits	\$10.4	\$10.4	\$31.3	\$31.3
Amortization, net of tax	(5.8)	(5.8)	(17.4)	(17.4)
Income Tax Benefit	\$4.6	\$4.6	\$13.9	\$13.9

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 4 - Investments - Continued

Contractually, we are a limited partner in these tax credit partnerships, and our maximum exposure to loss is limited to the carrying value of our investment, which includes \$4.4 million of unfunded unconditional commitments at September 30, 2017. At September 30, 2017, we also have unfunded unconditional commitments of \$0.1 million to fund certain private equity partnerships as well as commitments of \$366.1 million, the amount of which may or may not be funded.

We are the sole beneficiary of a special purpose entity which is consolidated in our financial statements. This entity is a securitized asset trust containing a highly rated bond for principal protection which we contributed into the trust at the time it was established. There are no restrictions on the asset held in this trust, and the trust is free to dispose of the asset at any time. The fair values of the bond were \$154.2 million and \$151.9 million as of September 30, 2017 and December 31, 2016, respectively. The bond is reported as a component of fixed maturity securities in our consolidated balance sheets. At December 31, 2016, the trust also contained a private equity partnership which we contributed into the trust at the time it was established with a fair value of \$1.0 million. During the first quarter of 2017, we received the final distribution from the partnership and recorded a loss of \$0.2 million on the disposal. The loss is reported as a component of net realized investments gains and losses in our consolidated statements of income.

Mortgage Loans

Our mortgage loan portfolio is well diversified by both geographic region and property type to reduce risk of concentration. All of our mortgage loans are collateralized by commercial real estate. When issuing a new loan, our general policy is not to exceed a loan-to-value ratio, or the ratio of the loan balance to the estimated fair value of the underlying collateral, of 75 percent. We update the loan-to-value ratios at least every three years for each loan, and properties undergo a general inspection at least every two years. Our general policy for newly issued loans is to have a debt service coverage ratio greater than 1.25 times on a normalized 25 year amortization period. We update our debt service coverage ratios annually.

Mortgage loans by property type and geographic region are presented below.

	September 30, 2017		December 31, 2016	
	(in millions of dollars)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 4 - Investments - Continued

We evaluate each of our mortgage loans individually for impairment and assign an internal credit quality rating based on a comprehensive rating system used to evaluate the credit risk of the loan. The factors we use to derive our internal credit ratings may include the following:

- Loan-to-value ratio
- Debt service coverage ratio based on current operating income
- Property location, including regional economics, trends and demographics
- Age, condition, and construction quality of property
- Current and historical occupancy of property
- Lease terms relative to market
- Tenant size and financial strength
- Borrower's financial strength
- Borrower's equity in transaction
- Additional collateral, if any

Although all available and applicable factors are considered in our analysis, loan-to-value and debt service coverage ratios are the most critical factors in determining whether we will initially issue the loan and also in assigning values and determining impairment. We assign an overall rating to each loan using an internal rating scale of Aa (highest quality) to B (lowest quality). We review and adjust, as needed, our internal credit quality ratings on an annual basis. This review process is performed more frequently for mortgage loans deemed to have a higher risk of delinquency.

Mortgage loans, sorted by the applicable credit quality indicators, are as follows:

	September 30, 2017	December 31, 2016
	(in millions of dollars)	
Internal Rating		
Aa	\$0.4	\$ 0.7
A	482.8	488.2
Baa	1,625.5	1,506.6
Ba	36.6	43.4
Total	\$2,145.3	\$ 2,038.9
Loan-to-Value Ratio		
<= 65%	\$967.2	\$917.9
> 65% <= 75%	1,080.1	1,011.5
> 75% <= 85%	46.1	50.8
> 85%	51.9	58.7
Total	\$2,145.3	\$2,038.9

There were no troubled debt restructurings during the three and nine months ended September 30, 2017. During the third quarter of 2016, we foreclosed on a mortgage loan with a carrying value of \$5.4 million. We did not recognize a loss at foreclosure as the value of the underlying property exceeded the carrying value of the loan. There were no other troubled debt restructurings during 2016. At September 30, 2017 and December 31, 2016, we held no mortgage loans that were greater than 90 days past due regarding principal and/or interest payments.

There have been no changes to our accounting policies or methodology from the prior period regarding estimating the allowance for credit losses on our mortgage loans. As of September 30, 2017 and December 31, 2016, we had no allowance for credit losses, and there was no activity in the allowance for credit losses during the three and nine months ended September 30, 2017 or 2016.

We did not hold any impaired mortgage loans during the three and nine months ended September 30, 2017. Our average investment in impaired mortgage loans was \$3.6 million and \$3.0 million for the three and nine months ended September 30,

30

September 30, 2017

Note 4 - Investments - Continued

2016, respectively. We did not recognize any interest income on mortgage loans subsequent to impairment during the three and nine months ended September 30, 2017 or 2016.

At September 30, 2017, we had commitments of \$93.0 million to fund certain commercial mortgage loans, the amount of which may or may not be funded.

Transfers of Financial Assets

To manage our cash position more efficiently, we may enter into repurchase agreements with unaffiliated financial institutions. We generally use repurchase agreements as a means to finance the purchase of invested assets or for short-term general business purposes until projected cash flows become available from our operations or existing investments. Our repurchase agreements are typically outstanding for less than 30 days. We post collateral through our repurchase agreement transactions whereby the counterparty commits to purchase securities with the agreement to resell them to us at a later, specified date. The fair value of collateral posted is generally 102 percent of the cash received.

Our investment policy also permits us to lend fixed maturity securities to unaffiliated financial institutions in short-term securities lending agreements. These agreements increase our investment income with minimal risk. Our securities lending policy requires that a minimum of 102 percent of the fair value of the securities loaned be maintained as collateral. We may receive cash and/or securities as collateral under these agreements. Cash received as collateral is typically reinvested in short-term investments. If securities are received as collateral, we are not permitted to sell or re-post them.

As of September 30, 2017, the carrying amount of fixed maturity securities loaned to third parties under our securities lending program was \$169.9 million, for which we received collateral in the form of cash and securities of \$32.3 million and \$146.1 million, respectively. As of December 31, 2016, the carrying amount of fixed maturity securities loaned to third parties under our securities lending program was \$178.5 million, for which we received collateral in the form of cash and securities of \$29.9 million and \$155.3 million, respectively. We had no outstanding repurchase agreements at September 30, 2017 or December 31, 2016.

The remaining contractual maturities of our securities lending agreements disaggregated by class of collateral pledged are as follows:

Certain of our U.S. insurance subsidiaries are members of regional FHLBs. Membership, which requires that we purchase a minimum amount of FHLB common stock on which we receive dividends, provides access to low-cost funding. As of September 30, 2017 and December 31, 2016, we owned \$34.2 million and \$31.6 million, respectively, of FHLB common stock. Advances from the regional FHLBs for the purpose of purchasing fixed maturity securities totaled \$350.0 million as of September 30, 2017 and December 31, 2016. As of September 30, 2017, the carrying value of fixed maturity securities and commercial mortgage loans posted as collateral to the regional FHLBs was \$207.1 million and \$343.8 million, respectively. As of December 31, 2016, the carrying value of fixed maturity securities and commercial mortgage loans posted as collateral to the regional FHLBs was \$323.7 million and \$288.5 million, respectively. Additional common stock purchases may be required, based on the amount of funds we borrow from the FHLBs.

Offsetting of Financial Instruments

We enter into master netting agreements with each of our derivatives counterparties. These agreements provide for conditional rights of set-off upon the occurrence of an early termination event. An early termination event is considered a default, and it allows the non-defaulting party to offset its contracts in a loss position against any gain positions or payments due to the defaulting party. Under our agreements, default type events are defined as failure to pay or deliver as contractually agreed, misrepresentation, bankruptcy, or merger without assumption. See Note 5 for further discussion of collateral related to our derivative contracts.

We have securities lending agreements with unaffiliated financial institutions that post collateral to us in return for the use of our fixed maturity securities. A right of set-off exists that allows us to keep and apply collateral received in the event of default by the counterparty. Default within a securities lending agreement would typically occur if the counterparty failed to return the securities borrowed from us as contractually agreed. In addition, if we default by not returning collateral received, the counterparty has a right of set-off against our securities or any other amounts due to us.

Shown below are our financial instruments that either meet the accounting requirements that allow them to be offset in our balance sheets or that are subject to an enforceable master netting arrangement or similar agreement. Our accounting policy is to not offset these financial instruments in our balance sheets. Net amounts disclosed below have been reduced by the amount of collateral pledged to or received from our counterparties.

Note 5 - Derivative Financial Instruments

Purpose of Derivatives

We are exposed to certain risks relating to our ongoing business operations. The primary risks managed by using derivative instruments are interest rate risk, risk related to matching duration for our assets and liabilities, foreign currency risk, and credit risk. Historically, we have utilized current and forward interest rate swaps, current and forward currency swaps, forward treasury locks, currency forward contracts, forward contracts on specific fixed income securities, and credit default swaps. Transactions hedging interest rate risk are primarily associated with our individual and group long-term care and individual and group disability products. All other product portfolios are periodically reviewed to determine if hedging strategies would be appropriate for risk management purposes. We do not use derivative financial instruments for speculative purposes.

Note 5 - Derivative Financial Instruments - Continued

Derivatives designated as cash flow hedges and used to reduce our exposure to interest rate and duration risk are as follows:

Interest rate swaps are used to hedge interest rate risks and to improve the matching of assets and liabilities. An interest rate swap is an agreement in which we agree with other parties to exchange, at specified intervals, the difference between fixed rate and variable rate interest amounts. We use interest rate swaps to hedge the anticipated purchase of fixed maturity securities thereby protecting us from the potential adverse impact of declining interest rates on the associated policy reserves. We also use interest rate swaps to hedge the potential adverse impact of rising interest rates in anticipation of issuing fixed rate long-term debt.

Forward treasury locks are used to minimize interest rate risk associated with the anticipated purchase or disposal of fixed maturity securities. A forward treasury lock is a derivative contract without an initial investment where we and the counterparty agree to purchase or sell a specific U.S. Treasury bond at a future date at a pre-determined price.

Derivatives designated as fair value hedges and used to reduce our exposure to interest rate and duration risk are as follows:

Interest rate swaps are used to effectively convert certain of our fixed rate securities into floating rate securities which are used to fund our floating rate long-term debt. Under these swap agreements, we receive a variable rate of interest and pay a fixed rate of interest. Additionally, we use interest rate swaps to effectively convert certain fixed rate, long-term debt into floating rate long-term debt. Under these swap agreements, we receive a fixed rate of interest and pay a variable rate of interest.

Derivatives designated as cash flow hedges and used to reduce our exposure to foreign currency risk are as follows:

Foreign currency interest rate swaps have historically been used to hedge the currency risk of certain foreign currency-denominated fixed maturity securities owned for portfolio diversification and to hedge the currency risk associated with certain of the principal and interest payments of the U.S. dollar-denominated debt issued by one of our U.K. subsidiaries. For hedges of fixed maturity securities, we agree to pay, at specified intervals, fixed rate foreign currency-denominated principal and interest payments in exchange for fixed rate payments in the functional currency of the operating segment. For hedges of debt issued, we paid, at specified intervals, fixed rate foreign currency-denominated principal and interest payments to the counterparty in exchange for fixed rate U.S. dollar-denominated principal and interest payments.

Derivatives not designated as hedging instruments and used to reduce our exposure to foreign currency risk, credit losses on securities owned, and interest rate risk are as follows:

Foreign currency interest rate swaps previously designated as hedges were used to hedge the currency risk of certain foreign currency-denominated fixed maturity securities owned for portfolio diversification. These derivatives were effective hedges prior to novation to a new counterparty. In conjunction with the novation, these derivatives were re-designated as hedges. We agree to pay, at specified intervals, fixed rate foreign currency-denominated principal and interest payments in exchange for fixed rate payments in the functional currency of the operating segment. We hold offsetting swaps wherein we agree to pay fixed rate principal and interest payments in the functional currency of the operating segment in exchange for fixed rate foreign currency-denominated payments.

Credit default swaps are used as economic hedges against credit risk but do not qualify for hedge accounting. A credit default swap is an agreement in which we agree with another party to pay, at specified intervals, a fixed-rate fee in exchange for insurance against a credit event on a specific investment. If a defined credit event occurs, our counterparty may either pay us a net cash settlement or we may surrender the specific investment to them in exchange for cash equal to the full notional amount of the swap. Credit events typically include events such as bankruptcy, failure to pay, or certain types of debt restructuring.

Interest rate swap is used to effectively convert certain of our floating rate, long-term debt into fixed rate long-term debt. Under this swap agreement, we receive a variable rate of interest and pay a fixed rate of interest.

Note 5 - Derivative Financial Instruments - Continued

Derivative Risks

The basic types of risks associated with derivatives are market risk (that the value of the derivative will be adversely impacted by changes in the market, primarily the change in interest and exchange rates) and credit risk (that the counterparty will not perform according to the terms of the contract). The market risk of the derivatives should generally offset the market risk associated with the hedged financial instrument or liability. To help limit the credit exposure of the derivatives, we enter into master netting agreements with our counterparties whereby contracts in a gain position can be offset against contracts in a loss position. We also typically enter into bilateral, cross-collateralization agreements with our counterparties to help limit the credit exposure of the derivatives. These agreements require the counterparty in a loss position to submit acceptable collateral with the other counterparty in the event the net loss position meets or exceeds an agreed upon amount. Credit exposure on derivatives is limited to the value of those contracts in a net gain position, including accrued interest receivable less collateral held. Our current credit exposure on derivatives, which is limited to the value of those contracts in a net gain position, including accrued interest receivable less collateral held, was \$0.2 million at September 30, 2017. We held \$16.0 million and \$26.1 million cash collateral from our counterparties at September 30, 2017 and December 31, 2016, respectively. We post either fixed maturity securities or cash as collateral to our counterparties. The carrying value of fixed maturity securities posted as collateral to our counterparties was \$50.1 million and \$35.2 million at September 30, 2017 and December 31, 2016, respectively. We had no cash posted as collateral to our counterparties at September 30, 2017 or December 31, 2016. See Note 4 for further discussion of our master netting agreements.

The majority of our derivative instruments contain provisions that require us to maintain specified issuer credit ratings and financial strength ratings. Should our ratings fall below these specified levels, we would be in violation of the provisions, and our derivatives counterparties could terminate our contracts and request immediate payment. The aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a liability position was \$52.2 million and \$52.8 million at September 30, 2017 and December 31, 2016, respectively.

Derivative Transactions

The table below summarizes, by notional amounts, the activity for each category of derivatives. The notional amounts represent the basis upon which our counterparty pay and receive amounts are calculated.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 5 - Derivative Financial Instruments - Continued

Cash Flow Hedges

As of September 30, 2017 and December 31, 2016, we had \$350.5 million and \$394.1 million, respectively, notional amount of receive fixed, pay fixed, open current and forward foreign currency interest rate swaps to hedge fixed income foreign currency-denominated securities.

For the three and nine months ended September 30, 2017 and 2016, there was no material ineffectiveness related to our cash flow hedges, and no component of the derivative instruments' gain or loss was excluded from the assessment of hedge effectiveness.

As of September 30, 2017, we expect to amortize approximately \$62.1 million of net deferred gains on derivative instruments during the next twelve months. This amount will be reclassified from accumulated other comprehensive income into earnings and reported on the same income statement line item as the hedged item. The income statement line items that will be affected by this amortization are net investment income and interest and debt expense. Additional amounts that may be reclassified from accumulated other comprehensive income into earnings to offset the earnings impact of foreign currency translation of hedged items are not estimable.

As of September 30, 2017, we are hedging the variability of future cash flows associated with forecasted transactions through the year 2038.

Fair Value Hedges

As of September 30, 2017 and December 31, 2016, we had \$48.0 million and \$102.0 million, respectively, notional amount of receive variable, pay fixed interest rate swaps to hedge the changes in fair value of certain fixed rate securities held. These swaps effectively convert the associated fixed rate securities into floating rate securities, which are used to fund our floating rate long-term debt. The change in fair value of the hedged fixed maturity securities attributable to the hedged benchmark interest rate resulted in a loss of \$0.8 million and \$2.8 million for the three and nine months ended September 30, 2017, and \$1.7 million and \$4.6 million for the three and nine months ended September 30, 2016, respectively, with an offsetting gain on the related interest rate swaps. During the first quarter of 2016, we terminated \$24.0 million notional amount of receive variable, pay fixed interest rate swaps in connection with the sale of the hedged securities and recorded a loss on the swap terminations of \$1.2 million in our consolidated statements of income as a component of net realized investment gains and losses.

As of September 30, 2017 and December 31, 2016, we had \$250.0 million notional amount of receive fixed, pay variable interest rate swaps to hedge the changes in the fair value of certain fixed rate long-term debt. These swaps effectively convert the associated fixed rate long-term debt into floating rate debt and provide for a better matching of interest rates with our short-term investments, which have frequent interest rate resets similar to a floating rate security. The change in fair value of the hedged debt attributable to the hedged benchmark interest rate resulted in a gain (loss) of \$0.3 million and \$(0.3) million for the three and nine months ended September 30, 2017, and \$3.1 million and \$(3.5) million for the three and nine months ended September 30, 2016, respectively, with an offsetting gain (loss) on the related interest rate swaps. During the third quarter of 2016, \$350.0 million notional amount of receive fixed, pay variable interest rate swaps matured in conjunction with the maturity of the \$350.0 million hedged fixed rate debt.

For the three and nine months ended September 30, 2017 and 2016, there was no material ineffectiveness related to our fair value hedges, and no component of the derivative instruments' gain or loss was excluded from the assessment of hedge effectiveness. There were no instances wherein we discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Derivatives not Designated as Hedging Instruments

As of September 30, 2017 and December 31, 2016, we held \$192.6 million and \$222.4 million, respectively, notional amount of receive fixed, pay fixed, foreign currency interest rate swaps. These derivatives were not designated as hedges, and as such, changes in fair value related to these derivatives will be reported in earnings as a component of net realized investment gain or loss.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 5 - Derivative Financial Instruments - Continued

As of September 30, 2017 and December 31, 2016, we held \$70.0 million notional amount of single name credit default swaps. We entered into these swaps in order to mitigate the credit risk associated with specific securities owned.

As of December 31, 2016, we held \$3.5 million notional amount of a receive variable, pay fixed interest rate swap acquired through our purchase of Starmount in the third quarter of 2016. This swap effectively converted Starmount's floating rate long-term debt into fixed rate debt. During the second quarter of 2017, we purchased and retired the debt and terminated the interest rate swap. We recorded a loss of \$0.1 million on the swap termination in our consolidated statements of income as a component of net realized investment gains and losses. See Note 12.

We have an embedded derivative in a modified coinsurance arrangement for which we include in our realized investment gains and losses a calculation intended to estimate the value of the option of our reinsurance counterparty to cancel the reinsurance contract with us. However, neither party can unilaterally terminate the reinsurance agreement except in extreme circumstances resulting from regulatory supervision, delinquency proceedings, or other direct regulatory action. Cash settlements or collateral related to this embedded derivative are not required at any time during the reinsurance contract or at termination of the reinsurance contract. There are no credit-related counterparty triggers, and any accumulated embedded derivative gain or loss reduces to zero over time as the reinsured business winds down.

Locations and Amounts of Derivative Financial Instruments

Note 7 - Liability for Unpaid Claims and Claim Adjustment Expenses

Changes in the liability for unpaid claims and claim adjustment expenses are as follows:

	2017	2016
	(in millions of dollars)	
Balance at January 1	\$23,249.5	\$23,796.1
Less Reinsurance Recoverable	2,163.6	2,064.6
Net Balance at January 1	21,085.9	21,731.5
Incurred Related to		
Current Year	4,046.2	3,902.8
Prior Years		
Interest	836.5	875.8
All Other Incurred	(143.3)	(72.4)
Foreign Currency	150.0	(250.3)
Total Incurred	4,889.4	4,455.9
Paid Related to		
Current Year	(1,463.9)	(1,370.3)
Prior Years	(3,478.8)	(3,504.4)
Total Paid	(4,942.7)	(4,874.7)
Net Balance at September 30	21,032.6	21,312.7
Plus Reinsurance Recoverable	2,163.9	2,055.6
Balance at September 30	\$23,196.5	\$23,368.3

The majority of the net balances are related to disability claims with long-tail payouts on which interest earned on assets backing liabilities is an integral part of pricing and reserving. Interest accrued on prior year reserves has been calculated on the opening reserve balance less one-half of the period's claim payments relative to prior years at our average reserve discount rate for the respective periods.

"Incurred Related to Prior Years - All Other Incurred" shown in the preceding chart is primarily impacted by the level of claim resolutions in the period relative to the long-term expectations reflected in the reserves. Our claim resolution rate assumption used in determining reserves is our expectation of the resolution rate we will experience over the life of the block of business and will vary from actual experience in any one period, both favorably and unfavorably.

Unum Group and Subsidiaries

September 30, 2017

Note 7 - Liability for Unpaid Claims and Claim Adjustment Expenses - Continued

Reconciliation

A reconciliation of policy and contract benefits and reserves for future policy and contract benefits as reported in our consolidated balance sheets to the liability for unpaid claims and claim adjustment expenses is as follows:

	September 30	
	2017	2016
	(in millions of dollars)	
Policy and Contract Benefits	\$1,539.0	\$1,483.5
Reserves for Future Policy and Contract Benefits	45,456.9	45,745.1
Total	46,995.9	47,228.6
Less:		
Life Reserves for Future Policy and Contract Benefits	8,209.6	8,031.2
Accident and Health Active Life Reserves	10,532.4	10,053.6
Adjustment Related to Unrealized Investment Gains and Losses	5,057.4	5,775.5
Liability for Unpaid Claims and Claim Adjustment Expenses	\$23,196.5	\$23,368.3

The adjustment related to unrealized investment gains and losses reflects the changes that would be necessary to policyholder liabilities if the unrealized investment gains and losses related to the corresponding available-for-sale securities had been realized. Changes in this adjustment are reported as a component of other comprehensive income or loss.

We measure and analyze our segment performance on the basis of "operating revenue" and "operating income" or "operating loss", which differ from total revenue and income before income tax as presented in our consolidated statements of income due to the exclusion of net realized investment gains and losses and certain other items as specified in the reconciliations below. We believe operating revenue and operating income or loss are better performance measures and better indicators of the revenue and

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2017

Note 8 - Segment Information - Continued

profitability and underlying trends in our business. These performance measures are in accordance with GAAP guidance for segment reporting, but they should not be viewed as a substitute for total revenue, income before income tax, or net income.

Realized investment gains or losses depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our segments. Our investment focus is on investment income to support our insurance liabilities as opposed to the generation of realized investment gains or losses. Although we may experience realized investment gains or losses which will affect future earnings levels, a long-term focus is necessary to maintain profitability over the life of the business since our underlying business is long-term in nature, and we need to earn the interest rates assumed in calculating our liabilities.

We previously excluded the amortization of prior period actuarial gains or losses, a component of the net periodic benefit cost for our pension and other postretirement benefit plans. Effective January 1, 2017, the amortization of prior period actuarial gains or losses is now reported as a component of "operating income" in the following chart. Amounts for periods prior to January 1, 2017 have been adjusted to conform to current year reporting.

We may at other times exclude certain other items from our discussion of financial ratios and metrics in order to enhance the understanding and comparability of our operational performance and the underlying fundamentals, but this exclusion is not an indication that similar items may not recur and does not replace net income or net loss as a measure of our overall profitability. See Note 11 for further discussion regarding the loss from a guaranty fund assessment.

A reconciliation of total revenue to "operating revenue" and income before income tax to "operating income" is as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
	(in millions of dollars)			
Total Revenue	\$2,819.1	\$2,763.3	\$8,447.6	\$8,250.0

Unum Group and Subsidiaries

September 30, 2017

Note 9 - Employee Benefit Plans

Defined Benefit Pension and Other Postretirement Benefit (OPEB) Plans

We sponsor several defined benefit pension and OPEB plans for our employees, including non-qualified pension plans. The U.S. qualified and non-qualified defined benefit pension plans comprise the majority of our total benefit obligation and benefit cost. We maintain a separate defined benefit plan for eligible employees in our U.K. operation. The U.S. defined benefit pension plans were closed to new entrants on December 31, 2013, the OPEB plan was closed to new entrants on December 31, 2012, and the U.K. plan was closed to new entrants on December 31, 2002.

Effective August 1, 2016, we amended the retiree medical benefits portion of our OPEB plan to transition a majority of participants to a private exchange for their health insurance coverage. Prior to the plan amendment, participants paid a subsidized premium for their health insurance coverage, but if they elect to continue participation in the plan they will now purchase coverage on a private exchange and will subsequently be reimbursed through a Health Reimbursement Account (HRA) for an amount equivalent to the subsidy that was previously provided. Participants who continued in the plan received a one-time subsidy to minimize the initial out-of-pocket cost of purchasing health insurance. The amendment did not materially change the benefit obligation of the plan.

The following table provides the components of the net periodic benefit cost (credit) for the defined benefit pension and OPEB plans.

	Three Months Ended September 30

Unum Group and Subsidiaries

September 30, 2017

Note 10 - Stockholders' Equity and Earnings Per Common Share

Earnings Per Common Share

Net income per common share is determined as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
	(in millions of dollars, except share data)			
Numerator				
Net Income	\$252.3	\$ 236.0	\$727.3	\$ 683.4
Denominator (000s)				
Weighted Average Common Shares - Basic	225,288	233,752.0	227,375	236,744.3
Dilution for Assumed Exercises of Stock Options and Nonvested Stock Awards	741.7	461.5	805.0	399.5
Weighted Average Common Shares - Assuming Dilution	226,029	234,213.5	228,180	237,143.8
Net Income Per Common Share				
Basic	\$1.12	\$ 1.01	\$3.20	\$ 2.89
Assuming Dilution	\$1.12	\$ 1.01	\$3.19	\$ 2.88

We use the treasury stock method to account for the effect of outstanding stock options, nonvested restricted stock units, and nonvested performance share units on the computation of diluted earnings per share. Under this method, these potential common shares will each have a dilutive effect, as individually measured, when the average market price of Unum Group common stock during the period exceeds the exercise price of the stock options and the grant price of the nonvested restricted stock units and the nonvested performance share units. The outstanding stock options have exercise prices ranging from \$20.78 to \$26.29. Both the nonvested restricted stock units and nonvested performance share units have grant prices ranging from \$27.85 to \$49.86.

In computing earnings per share assuming dilution, only potential common shares that are dilutive (those that reduce earnings per share) are included. For the three and nine months ended September 30, 2017, there were approximately 0.4 million potential common shares that were excluded in the computation of diluted earnings per share because the impact would be antidilutive, based on then current market prices. There were approximately 0.5 million potential common shares that were antidilutive for the three and nine months ended September 30, 2016, respectively.

Common Stock

During the second quarter of 2017, our board of directors authorized the repurchase of up to \$750.0 million of Unum Group's outstanding common stock through November 25, 2018. This authorization replaced the previous authorization of \$750.0 million that was scheduled to expire on November 26, 2017. The remaining repurchase amount under the new program was \$612.8 million at September 30, 2017.

Common stock repurchases, which are accounted for using the cost method and classified as treasury stock until otherwise retired, were as follows:

Edgar Filing: Unum Group - Form 10-Q

	Three Months		Nine Months	
	Ended		Ended	
	September 30		September 30	
	2017	2016	2017	2016
	(in millions)

Note 10 - Stockholders' Equity and Earnings Per Common Share - Continued

Preferred Stock

Unum Group has 25.0 million shares of preferred stock authorized with a par value of \$0.10 per share. No preferred stock has been issued to date.

Note 11 - Commitments and Contingent Liabilities

Contingent Liabilities

We are a defendant in a number of litigation matters. In some of these matters, no specified amount is sought. In others, very large or indeterminate amounts, including punitive and treble damages, are asserted. There is a wide variation of pleading practice permitted in the United States courts with respect to requests for monetary damages, including some courts in which no specified amount is required and others which allow the plaintiff to state only that the amount sought is sufficient to invoke the jurisdiction of that court. Further, some jurisdictions permit plaintiffs to allege damages well in excess of reasonably possible verdicts. Based on our extensive experience and that of others in the industry with respect to litigating or resolving claims through settlement over an extended period of time, we believe that the monetary damages asserted in a lawsuit or claim bear little relation to the merits of the case, or the likely disposition value. Therefore, the specific monetary relief sought is not stated.

Unless indicated otherwise in the descriptions below, reserves have not been established for litigation and contingencies. An estimated loss is accrued when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated.

Claims Handling Matters

We and our insurance subsidiaries, in the ordinary course of our business, are engaged in claim litigation where disputes arise as a result of a denial or termination of benefits. Most typically these lawsuits are filed on behalf of a single claimant or policyholder, and in some of these individual actions punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. For our general claim litigation, we maintain reserves based on experience to satisfy judgments and settlements in the normal course. We expect that the ultimate liability, if any, with respect to general claim litigation, after consideration of the reserves maintained, will not be material to our consolidated financial condition. Nevertheless, given the inherent unpredictability of litigation, it is possible that an adverse outcome in certain claim litigation involving punitive damages could, from time to time, have a material adverse effect on our consolidated results of operations in a period, depending on the results of operations for the particular period.

From time to time class action allegations are pursued where the claimant or policyholder purports to represent a larger number of individuals who are similarly situated. Since each insurance claim is evaluated based on its own merits, there is rarely a single act or series of actions which can properly be addressed by a class action. Nevertheless, we monitor these cases closely and defend ourselves appropriately where these allegations are made.

Miscellaneous Matters

Beginning in 2011, a number of state regulators began requiring insurers to cross-check specified insurance policies with the Social Security Administration's Death Master File to identify potential matches. If a potential match was identified, insurers were requested to determine if benefits were due, locate beneficiaries, and make payments where

appropriate. We initiated this process where requested, and in 2012 we began implementing this process in all states on a forward-looking basis. In addition to implementing this on a forward-looking basis, in 2013 we began an initiative to search for potential claims from previous years. During 2013, we completed our assessment of benefits which we estimate will be paid under this initiative, and as such, established additional reserves for payment of these benefits. Similar to other insurers, we are undergoing an examination by a third party acting on behalf of a number of state treasurers concerning our compliance with the unclaimed property laws of the participating states. We are cooperating fully with this examination, as well as with a Delaware Market Conduct examination involving the same issue. The legal and regulatory environment around unclaimed death benefits continues to evolve. It is possible that the current examination and/or similar investigations by other state jurisdictions may result in additional payments to beneficiaries, the payment of abandoned funds under state law, and/or administrative penalties, the total of which may be in excess of the reserves established.

Note 11 - Commitments and Contingent Liabilities - Continued

In December 2012, State of West Virginia ex rel. John D. Perdue v. Provident Life and Accident Insurance Company and State of West Virginia ex rel. John D. Perdue v. Colonial Life & Accident Insurance Company were filed in the Circuit Court of Putnam County, West Virginia. These two separate complaints alleged violations of the West Virginia Uniform Unclaimed Property Act by failing to identify and report all unclaimed insurance policy proceeds due to be escheated to West Virginia. The complaints sought to examine company records and assess penalties and costs in an undetermined amount. In December 2013, the court dismissed both complaints, holding that the West Virginia Uniform Unclaimed Property Act does not require insurance companies to periodically search the Social Security Administrations' Death Master File or escheat unclaimed life insurance benefits until a claim has been submitted. In January 2014, the plaintiff appealed the dismissal of both complaints. In June 2015, the appellate court reinstated the case, holding that the West Virginia Uniform Unclaimed Property Act requires insurers to make reasonable efforts to determine whether their insureds are still living. The case was remanded to the trial court where we answered the complaints. In 2016, the West Virginia Legislature enacted a law defining insurers' duties with regard to unclaimed benefits for life insurance policies, annuity contracts, and retained asset accounts issued in West Virginia. In December 2016, we filed a motion to dismiss the complaints in light of this law. In June 2017, the court denied the motion. The case is proceeding through the discovery phase.

In 2009, a Pennsylvania-based insurance company and its affiliates were ordered into rehabilitation, and the Pennsylvania Insurance Commissioner, who was appointed as the Rehabilitator, filed petitions for liquidation with the Commonwealth Court of Pennsylvania. Under Pennsylvania law, payment of covered claims and other related insurance obligations are provided, within prescribed limits, by state guaranty associations. These guaranty associations assess fees to meet these obligations on insurance companies that sell insurance within the state, which are generally based on a company's pro rata portion of average premiums written or received for several years prior to the insolvency. Under Pennsylvania statutes, an insurer is declared insolvent only after it is placed under an order of liquidation by a court of competent jurisdiction with a finding for insolvency. In March 2017, a formal order of liquidation was issued, and as such, we were subject to an assessment by those guaranty associations that are responsible for policyholder claims, and accordingly accrued an estimated loss contingency of \$13.4 million. This amount is net of expected recoverable premium tax offsets of \$44.0 million and net of income tax of \$7.2 million.

Summary

Various lawsuits against us, in addition to those discussed above, have arisen in the normal course of business. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning our compliance with applicable insurance and other laws and regulations.

Given the complexity and scope of our litigation and regulatory matters, it is not possible to predict the ultimate outcome of all pending investigations or legal proceedings or provide reasonable estimates of potential losses, except if noted in connection with specific matters. It is possible that our results of operations or cash flows in a particular period could be materially affected by an ultimate unfavorable outcome of pending litigation or regulatory matters depending, in part, on our results of operations or cash flows for the particular period. We believe, however, that the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on our financial position.

Note 12 - Other

Debt

At September 30, 2017, short-term debt consisted entirely of our senior unsecured notes due in the third quarter of 2018. Also included in the carrying amount of short-term debt are deferred debt costs of \$0.1 million.

During the nine months ended September 30, 2017, we made principal payments of \$45.0 million on our senior secured non-recourse notes issued by Northwind Holdings, LLC.

In June 2017, we purchased and retired the remaining \$3.4 million of principal on our senior secured floating rate notes acquired through our purchase of Starmount. In conjunction with this retirement, we also terminated the interest rate swap associated

Note 12 - Other - Continued

with the hedge of these notes and recorded a \$0.1 million loss in our consolidated statements of income as a component of net realized investment gains and losses. See Note 5 for further discussion.

At September 30, 2017, letters of credit totaling \$2.1 million had been issued from the credit facility, but there were no borrowed amounts outstanding.

Income Tax

As of September 30, 2017, we have net operating loss carryforwards for state income tax of \$155.4 million which will expire between 2017 and 2037, as compared to \$156.4 million in the third quarter of 2016. We recorded a deferred tax asset for future state income tax benefits of \$18.0 million and \$16.0 million as of September 30, 2017 and 2016, respectively. We have a corresponding valuation allowance on the deferred tax asset of \$15.7 million and \$14.1 million as of September 30, 2017 and 2016, respectively, to reduce the deferred tax asset to the amount that is more likely than not to be realized.

During the third quarter of 2016, the U.K. government enacted an income tax rate reduction that will reduce the rate to 17 percent effective April 2020. Prior to this enactment, the rate had been scheduled to reduce to 18 percent in 2020. We are required to adjust deferred tax assets and liabilities through income on the date of enactment of a rate change. As a result, we recorded income tax benefits of \$4.5 million during the third quarter of 2016.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Summary

Unum Group, a Delaware general business corporation, and its insurance and non-insurance subsidiaries, which collectively with Unum Group we refer to as the Company, operate in the United States, the United Kingdom, and, to a limited extent, in certain other countries. The principal operating subsidiaries in the United States are Unum Life Insurance Company of America, Provident Life and Accident Insurance Company, The Paul Revere Life Insurance Company, and Colonial Life & Accident Insurance Company, and in the United Kingdom, Unum Limited. We are a leading provider of financial protection benefits in the United States and the United Kingdom. Our products include disability, life, accident, critical illness, dental and vision, and other related services. We market our products primarily through the workplace.

We have three principal operating business segments: Unum US, Unum UK, and Colonial Life. Our other segments are the Closed Block and Corporate segments. These segments are discussed more fully under "Segment Results" included herein in this Item 2.

The benefits we provide help protect people from the financial hardship of illness, injury, or loss of life by providing support when it is needed most. As one of the leading providers of employee benefits in the U.S. and the U.K., we offer a broad portfolio of products and services through the workplace.

Specifically, we offer group, individual, and voluntary benefits, either as stand-alone products or combined with other coverages, that help employers of all sizes attract and retain a stronger workforce while protecting the incomes and livelihood of their employees. We believe employer-sponsored benefits represent the single most effective way to provide workers with access to the information and options they need to protect their financial stability. Working people and their families, particularly those at lower and middle incomes, are perhaps the most vulnerable in today's economy yet are often overlooked by many providers of financial services and products. For many of these people, employer-sponsored benefits are the primary defense against the potentially catastrophic fallout of death, illness, or injury.

We have established a corporate culture consistent with the social values our products provide. We are committed not only to meeting the needs of our customers who depend on us, but also to operating with integrity and being accountable for our actions. Our sound and consistent business practices, strong internal compliance program, and comprehensive risk management strategy enable us to operate efficiently as well as to identify and address potential areas of risk in our business. We have also applied these same values to our social responsibility efforts. Because we see important links between the obligations we have to all of our stakeholders, we place a strong emphasis on contributing to positive change in our communities.

This discussion and analysis should be read in conjunction with the consolidated financial statements and notes thereto in Part I, Item 1 contained in this Form 10-Q and with the "Cautionary Statement Regarding Forward-Looking Statements" included below the Table of Contents, as well as the discussion, analysis, and consolidated financial statements and notes thereto in Part I, Items 1 and 1A, and Part II, Items 6, 7, 7A, and 8 of our annual report on Form 10-K for the year ended December 31, 2016.

Operating Performance and Capital Management

For the third quarter of 2017, we reported net income of \$252.3 million, or \$1.12 per diluted common share, compared to net income of \$236.0 million, or \$1.01 per diluted common share, in the same period of 2016. For the first nine

months of 2017, net income was \$727.3 million or \$3.19 per diluted common share, compared to net income of \$683.4 million or \$2.88 per diluted common share in the same period of 2016. Included in these results are net realized investment gains and losses and also, in the nine months ended September 30, 2017, a loss from a guaranty fund assessment related to an unaffiliated insurer that was declared insolvent of \$20.6 million before tax and \$13.4 million after tax, or \$0.06 per diluted common share. Excluding these items, after-tax operating income was \$246.1 million, or \$1.09 per diluted common share, in the third quarter of 2017, compared to \$228.7 million, or \$0.98 per diluted common share, in the same period of 2016. After-tax operating income was \$722.6 million, or \$3.17 per diluted common share, in the first nine months of 2017, compared to \$685.9 million, or \$2.90 per diluted common share, in the same period of 2016. See additional information in Note 11 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 and "Reconciliation of Non-GAAP and Other Financial Measures" contained in this Item 2 for further discussion and a reconciliation of these items.

Our Unum US segment reported an increase in operating income of 11.9 percent and 10.6 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016, with growth in premium income and overall favorable

benefits experience, partially offset by lower net investment income. The benefit ratio for our Unum US segment for both the third quarter and first nine months of 2017 was 67.7 percent, compared to 69.4 percent and 69.3 percent in the same periods of 2016. Unum US sales increased 21.1 percent and 13.4 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016 aided by our addition of the dental and vision product offering in the third quarter of 2016. Persistency declined relative to the prior year but remains within our expectations.

Our Unum UK segment reported a decrease in operating income, as measured in Unum UK's local currency, of 6.0 percent and 9.2 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016, due to less favorable benefits experience, partially offset by increases in premium income and net investment income. The benefit ratio for Unum UK was 74.9 percent and 74.0 percent in the third quarter and first nine months of 2017, respectively, compared to 71.8 percent and 70.0 percent in the same periods of 2016. Unum UK sales in local currency decreased 14.2 percent and increased 11.0 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016. Persistency was generally stable relative to the prior year and is consistent with our expectations.

Our Colonial Life segment reported an increase in operating income of 3.4 percent and 5.0 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016, due primarily to growth in premium income. The benefit ratio for Colonial Life was 51.8 percent and 51.3 percent in the third quarter and first nine months of 2017, respectively, compared to 51.6 percent and 51.2 percent in the same periods of 2016. Colonial Life sales increased 2.6 percent and 5.7 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016. Persistency was generally stable relative to the prior year and is consistent with our expectations.

Our Closed Block segment reported a decrease in operating income of 7.0 percent and 4.3 percent in the third quarter and first nine months of 2017, respectively, compared to the same periods of 2016, due primarily to an expected decline in premium income and declining investment yields. Benefits experience in our individual disability line of business remains within our range of expectations. Benefits experience in our long-term care line of business resulted in interest adjusted loss ratios that were favorable in the third quarter and first nine months of 2017 relative to the same prior year periods but were slightly higher than our range of expectations.

Although our profit margins continue to be pressured by the impact of the low interest rate environment on our net investment income yields, our invested asset quality remains strong. The net unrealized gain on our fixed maturity securities was \$5.6 billion at September 30, 2017 compared to \$4.7 billion at December 31, 2016, with the increase due to a decrease in U.S. Treasury rates and credit spreads during the first nine months of 2017. The earned book yield on our investment portfolio was 5.21 percent for the first nine months of 2017 compared to a yield of 5.30 percent for full year 2016.

We believe our capital and financial positions are strong. At September 30, 2017, the risk-based capital (RBC) ratio for our traditional U.S. insurance subsidiaries, calculated on a weighted average basis using the NAIC Company Action Level formula, was approximately 410 percent, which is above our long-range target. During the first nine months of 2017, we repurchased 6.3 million shares of Unum Group common stock under our share repurchase program, at a cost of approximately \$300 million. Our weighted average common shares outstanding, assuming dilution, equaled 226.0 million and 234.2 million for the third quarter of 2017 and 2016, respectively, and 228.2 million and 237.1 million for the first nine months of 2017 and 2016, respectively, reflecting our capital management strategy of returning capital to shareholders through repurchases of our common stock. As of September 30, 2017, Unum Group and our intermediate holding companies held fixed maturity securities, short-term investments, and cash of \$771 million excluding amounts committed for subsidiary contributions.

U.K. Referendum

During 2016, the U.K. held a referendum and voted to leave the EU. In March of 2017, the U.K. gave formal notice to initiate the withdrawal process from the EU and to begin negotiations on the withdrawal agreement during a maximum two-year period. We may see some dampening of growth in the U.K. due to the current disruption and uncertainty in the U.K. economy. We may experience volatility in the fair values of our investments in U.K. and EU-based issuers, but we do not expect a material increase in other-than-temporary impairments or defaults, nor do we believe this volatility will impact our ability to hold these investments. The magnitude and longevity of potential negative economic impacts on our growth will depend on the agreements reached by the U.K. and EU as a result of exit negotiations and the resulting response of the U.K. marketplace. There are currently no indications that capital requirements for our U.K. operations will change, but economic conditions may cause volatility in our solvency ratios. Our reported consolidated financial results may continue to be impacted by fluctuations in the British pound sterling to dollar exchange rate. Further discussion is contained herein in "Unum UK Segment" in this Item 2.

Consolidated Company Outlook

We believe our disciplined approach to providing financial protection products at the workplace puts us in a position of strength as we seek to capitalize on the growing and largely unfilled need for our products and services. We believe the need for our products and services remains strong, and we intend to continue protecting our solid margins and returns through our pricing and risk actions. We continue to invest in our infrastructure and our employees, with a focus on quality and simplification of processes and offerings. Our strategy is centered on market expansion, enhancing the customer experience, providing an innovative product portfolio of financial protection choices, and investing in new solutions to further improve productivity. Our outlook for the remainder of 2017 is for continued solid premium growth trends in our core businesses, with stable persistency and a disciplined approach to sales growth. We expect to have generally stable benefits experience due to our focus on disciplined pricing, risk selection, and management of renewals. We will maintain our commitment to expense discipline and improving our operational efficiencies. The low interest rate environment continues to place pressure on our profit margins and could unfavorably impact the adequacy of our reserves for some products. Tax reform may impact our operating results or the statutory capital of our U.S. insurance subsidiaries. Our reported consolidated financial results may continue to be impacted by fluctuations in the British pound sterling to dollar exchange rate. We continue to analyze and employ strategies that we believe will help us navigate the current environment and allow us to maintain solid operating margins and significant financial flexibility to support the needs of our businesses, while also continuing to return capital to our shareholders. We have substantial leverage to rising interest rates and an improving economy which generates payroll growth and wage inflation. We believe that consistent operating results, combined with the implementation of strategic initiatives and the effective deployment of capital, will allow us to meet our long-term financial objectives.

Further discussion is contained in this Item 2 and in the "Notes to Consolidated Financial Statements" contained herein in Item 1.

Reconciliation of Non-GAAP and Other Financial Measures

We analyze our performance using non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. The non-GAAP financial measure of "after-tax operating income" differs from net income as presented in our consolidated operating results and income statements prepared in accordance with GAAP due to the exclusion of net realized investment gains and losses and certain other items as specified in the reconciliations below. We believe operating income is a better performance measure and better indicator of the profitability and underlying trends in our business.

Realized investment gains or losses depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our segments. Our investment focus is on investment income to support our insurance liabilities as opposed to the generation of realized investment gains or losses. Although we may experience realized investment gains or losses which will affect future earnings levels, a long-term focus is necessary to maintain profitability over the life of the business since our underlying business is long-term in nature, and we need to earn the interest rates assumed in calculating our liabilities.

We previously excluded the amortization of prior period actuarial gains or losses, a component of the net periodic benefit cost for our pension and other postretirement benefit plans. Effective January 1, 2017, the amortization of prior period actuarial gains or losses is now included in "after-tax operating income" and "operating income" in the following charts. Amounts for periods prior to January 1, 2017 have been adjusted to conform to current year reporting.

We may at other times exclude certain other items from our discussion of financial ratios and metrics in order to enhance the understanding and comparability of our operational performance and the underlying fundamentals, but this exclusion is not an indication that similar items may not recur and does not replace net income or net loss as a measure of our overall profitability. See Note 11 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further discussion regarding the loss from a guaranty fund assessment.

Edgar Filing: Unum Group - Form 10-Q

A reconciliation of GAAP financial measures to our non-GAAP financial measures is as follows:

	Three Months Ended September 30			
	2017		2016	
	(in millions)	per share [*]	(in millions)	per share [*]
Net Income	\$252.3	\$1.12	\$236.0	\$1.01
Excluding:				
Net Realized Investment Gain (net of tax expense of \$3.6; \$3.7)	6.2	0.03	7.3	0.03
After-tax Operating Income	\$246.1	\$1.09	\$228.7	\$0.98
	Nine Months Ended September 30			
	2017		2016	
	(in millions)	per share [*]	(in millions)	per share [*]
Net Income	\$727.3	\$3.19	\$683.4	\$2.88
Excluding:				
Net Realized Investment Gain (Loss) (net of tax expense (benefit) of \$10.8; \$(1.7))	18.1	0.08	(2.5)	(0.02)
Loss from Guaranty Fund Assessment (net of tax benefit of \$7.2; \$-)	(13.4)	(0.06)	—	—
After-tax Operating Income	\$722.6	\$3.17	\$685.9	\$2.90

* Assuming Dilution

We measure and analyze our segment performance on the basis of "operating revenue" and "operating income" or "operating loss", which differ from total revenue and income before income tax as presented in our consolidated statements of income due to the exclusion of net realized investment gains and losses and certain other items as specified in the reconciliations below. These performance measures are in accordance with GAAP guidance for segment reporting, but they should not be viewed as a substitute for total revenue, income before income tax, or net income.

A reconciliation of total revenue to "operating revenue" and income before income tax to "operating income" is as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
	(in millions of dollars)			
Total Revenue	\$2,819.1	\$2,763.3	\$8,447.6	\$8,250.0
Excluding:				
Net Realized Investment Gain (Loss)	9.8	11.0	28.9	(4.2)
Operating Revenue	\$2,809.3	\$2,752.3	\$8,418.7	\$8,254.2
Income Before Income Tax	\$366.8	\$332.1	\$1,058.7	\$976.5
Excluding:				
Net Realized Investment Gain (Loss)	9.8	11.0	28.9	(4.2)
Loss from Guaranty Fund Assessment	—	—	(20.6)	—

Operating Income	\$357.0	\$321.1	\$1,050.4	\$980.7
------------------	---------	---------	-----------	---------

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect amounts reported in our financial statements and accompanying notes. Estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed in our financial statements.

The accounting estimates deemed to be most critical to our financial position and results of operations are those related to reserves for policy and contract benefits, deferred acquisition costs, valuation of investments, pension and postretirement benefit plans, income taxes, and contingent liabilities. There have been no significant changes in our critical accounting estimates during the first nine months of 2017.

For additional information, refer to our significant accounting policies in Note 1 of the "Notes to Consolidated Financial Statements" in Part II, Item 8 and "Critical Accounting Estimates" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2016.

Accounting Developments

See Note 2 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information on accounting developments.

Consolidated Operating Results (in millions of dollars)

	Three Months Ended September 30			Nine Months Ended September 30		
	2017	% Change	2016	2017	% Change	2016

Net Income	\$252.3	6.9	\$236.0	\$727.3	6.4	\$683.4

N.M. = not a meaningful percentage

The comparability of our financial results between years is affected by the fluctuation in the British pound sterling to dollar exchange rate. The functional currency of our U.K. operations is the British pound sterling. In periods when the pound weakens relative to the preceding period, translating pounds into dollars decreases current period results relative to the prior period. In periods when the pound strengthens, translating pounds into dollars increases current period results relative to the prior period.

Our weighted average pound/dollar exchange rate was 1.312 for both the three months ended September 30, 2017 and 2016, and 1.277 and 1.396 for the nine months ended September 30, 2017 and 2016, respectively. If the results for the first nine months of 2016 for our U.K. operations had been translated at the lower exchange rate of 2017, our

operating revenue and operating income by segment would have been lower by approximately \$42 million and \$8 million, respectively. However, it is important to distinguish between translating and converting foreign currency. Except for a limited number of transactions, we do not actually convert pounds into dollars. As a result, we view foreign currency translation as a financial reporting item and not a reflection of operations or profitability in the U.K.

Premium income for the third quarter and the first nine months of 2017 increased relative to the same periods of 2016, with growth in each of our principal operating business segments, as measured in local currency, due to overall sales growth and the addition of the dental and vision product offerings, partially offset by lower persistency in certain of our product lines. Premium income continues to decline, as expected, in our Closed Block segment.

Net investment income decreased slightly in the third quarter and the first nine months of 2017, relative to the same periods of 2016 due to a decline in the yield on invested assets, mostly offset by an increase in the level of invested assets, higher income from inflation index-linked bonds in our Unum UK segment, and higher miscellaneous income. Net investment income for the first nine months of 2017 also declined relative to the same prior year period due to the unfavorable impact of the lower foreign currency exchange rate on translated financial results.

There were no other-than-temporary impairment losses on fixed maturity securities included in net realized investment gains and losses for the third quarters of 2017 and 2016 or for the first nine months of 2017. Other-than-temporary impairment losses on fixed maturity securities included in net realized investment gains and losses were \$30.5 million for the first nine months of 2016. Also included in net realized investment gains and losses were changes in the fair value of an embedded derivative in a modified coinsurance arrangement, which resulted in realized gains of \$6.7 million and \$9.7 million in the third quarters of 2017 and 2016, respectively, and \$21.5 million and \$14.3 million in the first nine months of 2017 and 2016, respectively. See Note 4 in the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information on realized investment gains and losses.

Overall benefits experience was favorable in the third quarter and first nine months of 2017 relative to the same prior year periods. The benefits experience for each of our operating business segments is discussed more fully in "Segment Results" as follows.

Commissions and the deferral of acquisition costs increased in the third quarter and first nine months of 2017 relative to the same periods of 2016 driven primarily by sales growth in our Unum US and Colonial Life segments. Growth in the level of the deferred asset resulted in higher amortization in the third quarter and first nine months of 2017 compared to the same prior year periods.

Interest and debt expense was lower in the third quarter and first nine months of 2017 relative to the same periods of 2016 due primarily to a lower level of outstanding debt offset partially by a higher overall rate of interest.

Other expenses and compensation expense, on a combined basis, declined slightly in the third quarter of 2017 relative to the same period in 2016 due to our continued focus on expense management and operating efficiencies, but increased in the first nine months of 2017 compared to the same period of 2016 due primarily to a loss incurred from a guaranty fund assessment related to an unaffiliated insurer that was declared insolvent in the first quarter of 2017. Excluding the loss from a guaranty fund assessment, the premium growth rate in the first nine months of 2017 more than offset the growth rate in compensation and other expenses as we continue to focus on expense management and operating efficiencies, resulting in a decline in the ratio of compensation and other expenses to premium income. See Note 11 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further discussion regarding the loss from a guaranty fund assessment.

Our effective income tax rates for the third quarter and first nine months of 2017 were 31.2 percent and 31.3 percent of income before income tax, respectively, compared to 28.9 percent and 30.0 percent for the prior year periods. Our effective tax rate differs from the U.S. statutory rate of 35 percent primarily due to the impact of tax credits as well as foreign earnings which are taxed at lower rates than the U.S. statutory rate. Our 2016 effective tax rates were favorably impacted by the enactment of an income tax rate reduction by the U.K. government which reduced the net deferred tax liability related to our U.K. operations by \$4.5 million during the third quarter of 2016. See Note 12 in the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further discussion of our income tax.

Consolidated Sales Results

Shown below are sales results for our three principal operating business segments.
(in millions)

Edgar Filing: Unum Group - Form 10-Q

	Three Months Ended			Nine Months Ended		
	September 30			September 30		
	2017	% Change	2016	2017	% Change	2016
Unum US	\$161.8	21.1 %	\$133.6	\$633.3	13.4 %	\$558.6
Unum UK	£12.7	(14.2)%	£14.8	£48.4	11.0 %	£43.6
Colonial Life	\$106.9	2.6 %	\$104.2	\$319.9	5.7 %	\$302.6

57

Sales shown in the preceding chart generally represent the annualized premium income on new sales which we expect to receive and report as premium income during the next 12 months following or beginning in the initial quarter in which the sale is reported, depending on the effective date of the new sale. Sales do not correspond to premium income reported as revenue in accordance with GAAP. This is because new annualized sales premiums reflect current sales performance and what we expect to recognize as premium income over a 12 month period, while premium income reported in our financial statements is reported on an "as earned" basis rather than an annualized basis and also includes renewals and persistency of in-force policies written in prior years as well as current new sales.

Sales, persistency of the existing block of business, employment and salary growth, and the effectiveness of a renewal program are indicators of growth in premium income. Trends in new sales, as well as existing market share, also indicate the potential for growth in our respective markets and the level of market acceptance of price changes and new product offerings. Sales results may fluctuate significantly due to case size and timing of sales submissions.

See "Segment Results" as follows for a discussion of sales by segment.

Segment Results

Our reporting segments are comprised of the following: Unum US, Unum UK, Colonial Life, Closed Block, and Corporate.

Unum US Segment

The Unum US segment includes group long-term and short-term disability insurance, group life and accidental death and dismemberment products, and supplemental and voluntary lines of business, which are comprised of individual disability, voluntary benefits, and dental and vision products.

Unum US Operating Results

Shown below are financial results for the Unum US segment. In the sections following, financial results and key ratios are also presented for the major lines of business within the segment.

Persistency:							
Group Long-term Disability				89.5 %		90.5 %	
Group Short-term Disability				86.3 %		87.4 %	

Premium income in the third quarter and first nine months of 2017 increased compared to the same periods of 2016 with growth in the in-force block due to higher sales, partially offset by a decline in persistency. Net investment income was lower in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to a decline in yield and a lower level of invested assets, partially offset by higher miscellaneous income. Other income is comprised primarily of fees from administrative services products.

Benefits experience was favorable in the third quarter and first nine months of 2017 compared to the same periods of 2016 due primarily to continued favorable claims incidence trends in our group long-term disability product line and lower prevalence rates in our group short-term disability product line. Partially offsetting the favorable claims experience was a 50 basis point decrease in the discount rate for group long-term disability claim incurrrals which we implemented in the fourth quarter of 2016.

Commissions and the deferral of acquisition costs were higher in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to sales growth. The amortization of deferred acquisition costs increased in

the third quarter and first nine months of 2017 relative to the same periods of 2016 due to growth in the level of the deferred asset. Our other expense ratio improved in the third quarter and was level in the first nine months of 2017 compared to the same periods of 2016 due to growth in premium income and our continued focus on expense management and operating efficiencies.

Premium income increased in the third quarter and first nine months of 2017 compared to the same periods of 2016 with growth in the in-force block due to higher sales, partially offset by a decline in persistency. Net investment income was lower in the third quarter and first nine months of 2017 compared to the same periods of 2016 due to a decline in yield and a lower level of invested assets, partially offset by higher miscellaneous income.

Benefits experience was favorable in the third quarter and first nine months of 2017 compared to the same periods of 2016, driven primarily by favorable average claim size in our group life product line. Also contributing to the favorable third quarter of 2017 benefits experience was lower incidence.

Commissions and the deferral of acquisition costs were higher in the third quarter and first nine months of 2017 compared to the same periods of 2016 due primarily to sales growth. The amortization of deferred acquisition costs increased in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to growth in the level of the deferred asset. The other expense ratio improved in the third quarter and first nine months of 2017

compared to the same periods of 2016 due to growth in premium income and our continued focus on expense management and operating efficiencies.

Dental and Vision				84.2	%	84.5	%

N.M. = not a meaningful percentage

Premium income increased in the third quarter and first nine months of 2017 compared to the same periods of 2016, driven by growth in the dental and vision product line associated with the acquisition of Starmount during the third quarter of 2016 as well as growth in the voluntary benefits product line due to higher sales. Premium income for our individual disability product line declined in the third quarter and first nine months 2017 compared to the same periods of 2016 due to the impact of a reinsurance agreement we entered into during the fourth quarter of 2016 whereby we ceded 30 percent of the risk for certain blocks of our individual disability business on a non-proportional modified coinsurance basis. Excluding the impact of this agreement, premium income for our individual disability

product line increased relative to the same periods of 2016, driven by higher sales.

Net investment income was higher in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to an increase in the level of invested assets and higher miscellaneous income, partially offset by a decline in yield. Other income is comprised primarily of surrender fees in our voluntary benefits product line, which continue to decline as our interest sensitive life products mature.

Benefits experience for the individual disability product line in the third quarter and first nine months of 2017 was favorable to the same prior year periods due to lower claim volumes, partially offset by the impact to our benefit ratio from the reinsurance agreement we entered into during the fourth quarter of 2016. The benefit ratio for the voluntary benefits product line in the third quarter and first nine months of 2017 was lower relative to the same periods of 2016 primarily driven by favorable benefits experience across most of our product lines. The dental and vision product line will typically have a higher benefit ratio than the other product lines reported in our supplemental and voluntary line of business, but did experience less favorable claims experience in the third quarter and first nine months of 2017 compared to the same prior year period.

Commissions were lower for the third quarter and first nine months of 2017 relative to the same periods of 2016 due to the commissions ceded in the individual disability product line related to the fourth quarter of 2016 reinsurance agreement, partially offset by commissions related to sales growth in the voluntary benefits and dental and vision product lines. The deferral of acquisition costs increased in the third quarter and first nine months of 2017 compared to the same periods in 2016 due primarily to sales growth in our voluntary benefits and dental and vision product lines. The amortization of deferred acquisition costs decreased slightly in the third quarter of 2017 compared to the same period in 2016 due to a lower level of policy terminations in 2017 relative to assumptions for certain issue years in the voluntary benefits product line, but was higher in the first nine months of 2017 relative to the same period of 2016 due to growth in the level of the deferred asset. Our other expense ratio improved in the third quarter and first nine months of 2017 compared to the same periods of 2016 due to growth in premium income as well as expense allowances received related to the individual disability product line reinsurance agreement and our continued focus on expense management and operating efficiencies.

N.M. = not a meaningful percentage

Group sales increased in the third quarter and first nine months of 2017 compared to the same periods of 2016, primarily driven by higher sales to new customers in both the core market segment, which we define as employee groups with fewer than 2,000 employees, and large case market segment. Partially offsetting the increase for the first nine months of 2017 relative to the same period of 2016 was a decrease in sales to existing customers in our large case market. The sales mix in the group market sector for the first nine months of 2017 was approximately 68 percent core market and 32 percent large case market.

Individual disability sales, which are primarily concentrated in the multi-life market, increased in the third quarter and first nine months of 2017 compared to the same periods of 2016, primarily driven by higher sales to new and existing customers. Sales of voluntary benefits decreased in the third quarter of 2017 compared to the same period of 2016, primarily driven by a decrease in sales to new customers in both the core and large case markets, partially offset by higher sales to existing customers in the core

market. The growth in the first nine months of 2017 relative to the same period of 2016 was primarily driven by higher sales to both new and existing customers in the large case market as well as an increase in sales to existing customers in the core market, partially offset by a decline in sales to new customers in the core market. Also contributing to supplemental and voluntary sales in the third quarter and first nine months of 2017 were higher sales of the dental and vision products resulting from the Starmount acquisition in the third quarter of 2016.

Segment Outlook

We remain committed to offering consumers a broad set of financial protection benefit products at the worksite. During the remainder of 2017, we will focus on client expansion, consumer engagement, and collaborative partnerships, all underpinned by strong risk management. We intend to broaden our client relationships and build additional partnerships to open new digital channels. We also aim to enhance the customer experience through new product offerings such as dental and vision, investing in processes with a focus on quality and simplification, and the utilization of technology to enhance enrollment, underwriting, and online claims. We believe our active client management and differentiated integrated customer experience across our product lines will continue to enable us to grow our market.

We anticipate operating income growth to remain strong in 2017, with disciplined sales and premium growth, consistent risk management, and improving operational efficiency. We believe further improvement in our premium and sales growth rates will occur if overall economic conditions continue to improve and/or industry pricing levels increase to better align with our view of adequate premium rates. We believe our underlying profitability will remain strong throughout the year, driven primarily by our continued product mix shift, expense efficiencies, and consistent operating effectiveness. Underpinning our strategy is our continued commitment to risk management discipline, talent development, and our core values.

The low interest rate environment continues to place pressure on our profit margins by impacting net investment income yields as well as discount rates on our insurance liabilities. Our net investment income may be impacted, either favorably or unfavorably, by fluctuations in miscellaneous investment income. As part of our continued pricing discipline and our reserving strategy, we continuously monitor emerging interest rate experience and adjust our pricing and reserve discount rates, as appropriate. We believe the group long-term disability reserve discount rate reduction during 2016 provides a strong balance sheet position for 2017. We expect continued improvement in our group disability benefit ratio for full year 2017 compared to 2016, although unfavorable economic conditions could lead to a higher rate of claim incidence or lower levels of claim recoveries. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

Unum UK Segment

The Unum UK segment includes insurance for group long-term disability, group life, and supplemental lines of business which include dental, individual disability, and critical illness products. Unum UK's products are sold primarily in the United Kingdom through field sales personnel and independent brokers and consultants.

Foreign Currency Translation

The functional currency of Unum UK is the British pound sterling. Unum UK's premium income, net investment income, claims, and expenses are received or paid in pounds, and we hold pound-denominated assets to support Unum UK's pound-denominated policy reserves and liabilities. We translate Unum UK's pound-denominated financial statement items into dollars for our consolidated financial reporting. We translate income statement items using an average exchange rate for the reporting period, and we translate balance sheet items using the exchange rate at the end of the period. We report unrealized foreign currency translation gains and losses in accumulated other comprehensive income in our consolidated balance sheets.

Fluctuations in the pound to dollar exchange rate have an effect on Unum UK's reported financial results and our consolidated financial results. In periods when the pound strengthens relative to the preceding period, translating pounds into dollars increases current period results relative to the prior period. In periods when the pound weakens, translating pounds into dollars decreases current period results relative to the prior period. The discussion of financial and sales results as follows is based on local currency.

Premium income increased in the third quarter and first nine months of 2017 compared to the same periods of 2016 driven by growth in the in-force block, resulting from prior period sales and stable persistency.

65

Net investment income was higher in the third quarter and first nine months of 2017 relative to the prior year periods due primarily to higher investment income from inflation index-linked bonds, which we invest in to support the claim reserves associated with certain of our group policies that provide for inflation-linked increases in benefits. The increase in net investment income attributable to these index-linked bonds was mostly offset by an increase in the reserves for future claims payments related to the inflation index-linked group long-term disability and group life policies. Also impacting the increase in the third quarter and first nine months of 2017 relative to the same periods of 2016 was growth in the level of invested assets, partially offset by a decline in yield on our fixed-rate bonds.

Overall benefits experience was less favorable in the third quarter of 2017 relative to the same prior year period, due primarily to higher claim incidence and unfavorable claim resolutions in our group long-term disability product line, partially offset by a lower average claim size in our group life product line. Overall benefits experience in the first nine months of 2017 relative to the same prior year period was less favorable due to a higher average claim size and unfavorable claim incidence in our group long-term disability product line, partially offset by favorable claim incidence in our group life product line. Also contributing to the less favorable benefits experience was the impact of inflation-linked increases in benefits and an 80 basis point decrease in the discount rate on new claim incurrrals implemented in the first quarter of 2017 across several of our products.

Commissions were generally consistent in the third quarter of 2017 relative to the same prior year period. Commissions increased in the first nine months of 2017 compared to the same period of 2016 due to overall sales growth. The deferral of acquisition costs decreased in the third quarter and first nine months of 2017 relative to the same prior year periods due to lower deferrable commissions and operating expenses. The amortization of acquisition costs during the third quarter and first nine months of 2017 was generally consistent with the same prior year periods. The other expense ratio was lower for the third quarter and first nine months of 2017 relative to the prior year periods due to higher premiums and our continued focus on expense management and operating efficiencies.

The decrease in group long-term disability sales for the third quarter of 2017 relative to the same period of 2016 is primarily driven by lower sales to new customers in both the core market, which we define as employee groups with fewer than 500 employees, and large case market, partially offset by an increase in sales to existing customers in our core market. For the first nine months of 2017, group long-term disability sales decreased relative to the same period of 2016, primarily driven by lower sales to both new customers in our core market and existing customers in our large case market, partially offset by higher sales to new customers in our large case market. Group life sales increased during the third quarter and first nine months of 2017 driven primarily by higher sales to new customers in our large case market, partially offset by a decline in sales to new and existing customers in our core market.

The increase in supplemental sales during the third quarter and first nine months of 2017 compared to the same periods of 2016 was due primarily to an increase in sales in the group critical illness and dental product lines.

Segment Outlook

We remain committed to driving growth in the U.K. market, and during the remainder of 2017 we will continue to build on those capabilities that we believe will generate growth and profitability in our businesses. Expanding our group long-term disability market position remains a significant opportunity and priority. Our key priorities in 2017 include the implementation of price increases across interest sensitive product lines, while maintaining solid persistency results, and continuing to follow a disciplined approach to new sales activity in the competitive pricing environment. We intend to accelerate growth in non-interest sensitive product lines such as group life, critical illness, and dental. We will expand our distribution and build marketing and digital capabilities which we believe will drive sustainable growth. We are simplifying our processes and operations to deliver efficiencies and maintain service levels. We will remain focused on risk discipline and putting our customers first.

We may see some near-term dampening of growth in Unum UK due to the current disruption and uncertainty in the U.K. economy as a result of the U.K.'s formal notice to withdraw from the EU. The magnitude and longevity of potential negative economic impacts on our growth will depend on the agreements reached by the U.K. and EU as a result of exit negotiations and the resulting response of the U.K. marketplace. We anticipate returning to more normal levels of premium growth when economic conditions improve and there are higher levels of employment, increases in corporate payrolls, and expansion of benefit spending.

We expect the lower interest rate environment to continue to have a negative impact on our growth expectations in the near-term, and unfavorable economic conditions may also lead to a higher rate of claim incidence, lower levels of claim recoveries, or lower claim discount rates. As part of our continued pricing discipline and our reserving strategy, we continuously monitor emerging interest rate experience and adjust our pricing and reserve discount rates, as appropriate. We will likely continue to experience volatility in net investment income and our benefit ratio due to fluctuations in the level of inflation in the U.K., however, we do not expect this to have a significant impact on operating income. There are no indications currently that capital requirements for our U.K. operations will change, but economic conditions may in the near term cause volatility in our solvency ratios. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

Colonial Life Segment

The Colonial Life segment includes insurance for accident, sickness, and disability products, life products, and cancer and critical illness products issued primarily by Colonial Life & Accident Insurance Company and marketed to employees, on both a group and an individual basis, at the workplace through an independent contractor agency sales force and brokers.

Operating Results

Shown below are financial results and key performance indicators for the Colonial Life segment.

Cancer and Critical Illness				82.6	%	82.6	%

Premium income increased in the third quarter and first nine months of 2017 relative to the same periods of 2016 as a result of overall sales growth and stable persistency. Net investment income was generally consistent in the third quarter of 2017 compared to the same period of 2016 and higher in the first nine months of 2017 compared to the same period of 2016 due to an increase in the level of invested assets, partially offset by a decline in yields and lower miscellaneous income.

Benefits experience in the third quarter of 2017 was slightly less favorable compared to the same period of 2016, with less favorable experience in the cancer and critical illness line of business, mostly offset by favorable experience in the life and accident, sickness, and disability lines of business. Benefits experience in the first nine months of 2017 was generally consistent with the same period of 2016, with less favorable experience in the cancer and critical illness and accident, sickness, and disability lines of business, mostly offset by favorable experience in the life line of business.

Commissions and the deferral of acquisition costs were higher in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to overall sales growth. The amortization of deferred acquisition costs increased during the third quarter and first nine months of 2017 relative to the same periods of 2016 due to growth in the level of the deferred asset. The

other expense ratio improved in the third quarter and first nine months of 2017 due to growth in premium income and our continued focus on operating effectiveness and expense management.

Total Sales	\$106.9	2.6	\$104.2	\$319.9	5.7	\$302.6

Sales in aggregate were higher in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to overall growth in both new and existing customer account sales. Commercial market sales decreased in the third quarter of 2017 as compared to the same period of 2016 due to lower sales to both new and existing customers in the large case market, partially offset by higher sales to existing customer accounts in the core market, which we define as accounts with fewer than 1,000 employees. Commercial market sales increased for the first nine months of 2017 as compared to the same period of 2016 due to higher sales to both new and existing customers in the core market, partially offset by lower sales to new and existing customers in the large case market. Public sector market sales were higher for the third quarter and first nine months of 2017 primarily due to an increase in sales to new customers. The number of new accounts decreased 1.4 percent and increased 6.7 percent, respectively, in the third quarter and first nine months of 2017 relative to the same periods of 2016, and the average new case size increased 6.3 percent and 2.0 percent, respectively.

Segment Outlook

We remain committed to providing employees and their families with simple, modern, and personal benefit solutions. During the remainder of 2017, we intend to focus on expanding our distribution, introducing new products and services, enhancing the customer experience, and investing in new solutions to further improve productivity. We believe there is significant opportunity for growth in our core market, particularly those employers with fewer than 100 employees. This market is currently underserved, and we believe having a large national distribution system is critical to reaching those markets. We intend to focus on accelerating growth during the remainder of 2017 through territory expansion, territory growth, and persistency investments. We believe our distribution system, enrollment capabilities, public sector expertise, and ability to serve all market sizes position us well for future growth.

We expect to see continued favorable sales and premium growth trends in the remainder of 2017. The lower interest rate environment will continue to have an unfavorable impact on our profit margins, and volatility in miscellaneous investment income is likely to occur. We expect our annual benefit ratio for 2017 to be generally consistent with the level of 2016. While we believe our underlying profitability will remain strong, current economic conditions and increasing competition in the voluntary workplace market are seen as external risks to achievement of our business

plans. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

Closed Block Segment

The Closed Block segment consists of individual disability, group and individual long-term care, and other insurance products no longer actively marketed. The individual disability line of business in this segment generally consists of policies we sold prior to the mid-1990s and entirely discontinued selling in 2004, other than update features contractually allowable on existing policies. We discontinued offering individual long-term care in 2009 and group long-term care in 2012. Other insurance products include group pension, individual life and corporate-owned life insurance, reinsurance pools and management operations, and other miscellaneous product lines.

Persistency:								
Individual Disability				89.8	%		90.7	%
Long-term Care				95.5	%		94.8	%

Premium income for individual disability decreased in the third quarter and first nine months of 2017 compared to the same periods of 2016 due to expected policy terminations and maturities. Premium income for long-term care

increased slightly due primarily to rate increases. We continue to file requests with various state insurance departments for premium rate increases on certain of our individual and group long-term care policies. The rate increases reflect current interest rates and claims experience, higher expected future claims, longevity, persistency, and other factors related to pricing long-term care coverage. In states for which a rate increase is submitted and approved, we routinely provide customers options for coverage changes or other approaches that might fit their current financial and insurance needs.

Net investment income was higher in the third quarter and first nine months of 2017 relative to the same periods of 2016 due to a higher level of invested assets, partially offset by a lower yield. The increase in net investment income for the first nine months of 2017 relative to the same period of 2016 was also partially offset by lower miscellaneous investment income.

Other income, which includes the underlying results of certain blocks of individual disability reinsured business and the net investment income of portfolios held by those ceding companies to support the block we have reinsured, continues to decline due to expected terminations and maturities.

Individual disability benefits experience was unfavorable in the third quarter of 2017 compared to the same period of 2016 due primarily to unfavorable mortality experience. During the first nine months of 2017, individual disability benefits experience was favorable relative to the same prior period due primarily to a reduction in the claim reserve discount rate taken in the prior year to recognize the impact on future portfolio yields from increased levels experienced for bond tenders and calls. Long-term care benefits experience was favorable in the third quarter and first nine months of 2017 compared to the same periods of 2016 due to the impact of a large group case moving to an individual policy ported status during 2016. Somewhat offsetting the favorable benefits experience during the third quarter of 2017 were unfavorable policyholder lapses.

The other expense ratio was slightly higher in the third quarter and first nine months of 2017 compared to the same periods of 2016 due to the expected decline in premium income for individual disability.

Segment Outlook

Our strategy for our Closed Block remains substantially unchanged. During the remainder of 2017, we intend to continue our focus on long-term care premium rate increases and the offer of policyholder options, operational effectiveness, financial analysis, and capital management. Despite continued anticipated premium rate increases in our long-term care business, we expect overall premium income and operating revenue to decline over time as these closed blocks of business wind down. We will likely experience volatility in net investment income due to fluctuations of miscellaneous investment income. We expect the low interest rate environment to continue to place pressure on our earnings and the adequacy of our reserves. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

Profitability of our long-tailed products is affected by claims experience related to mortality and morbidity, investment returns, premium rate increases, and persistency. We believe that the interest adjusted loss ratios for the individual disability and long-term care lines of business will be relatively flat over the long term, but these product lines may continue to experience quarterly volatility, particularly in the near term for our long-term care product lines as our claim block matures. We also believe the implementation of our long-term care rate increases have contributed to higher claim submissions in prior periods and could occur again in the future. Claim resolution rates, which measure the resolution of claims from recovery, deaths, settlements, and benefit expirations, are very sensitive to operational and external factors and can be volatile. Our claim resolution rate assumption used in determining reserves is our expectation of the resolution rate we will experience over the life of the block of business and will vary from actual experience in any one period. It is possible that variability in any of our reserve assumptions, including, but not limited to, interest rates, mortality, morbidity, premium rate increases, benefit change elections, and persistency, could result in a material impact on the adequacy of our reserves, including adjustments to reserves established under loss recognition.

Corporate Segment

The Corporate segment includes investment income on corporate assets not specifically allocated to a line of business, interest expense on corporate debt other than non-recourse debt, and certain other corporate income and expense not allocated to a line of business. We previously excluded the amortization of prior period actuarial gains or losses, a component of the net periodic benefit cost for our pension and other postretirement benefit plans, from the results of our Corporate segment. Effective January 1, 2017, the amortization of prior period actuarial gains or losses is now reported in our Corporate segment as a component of "interest and other expenses" in the following chart. Amounts for periods prior to January 1, 2017 have been adjusted to conform to current year reporting.

Operating Results

Operating Loss	\$(36.2)	20.8	\$(45.7)	\$(113.6)	6.3	\$(121.3)

Net investment income was higher in the third quarter of 2017 relative to the same period of 2016 due to a higher yield on invested assets, partially offset by a lower asset level. Net investment income was lower in the first nine months of 2017 compared to the same period of 2016 due primarily to a decline in the yield on invested assets.

Interest and other expenses were lower in the third quarter of 2017 compared to the same period of 2016 due to a lower level of outstanding debt, partially offset by a higher overall rate of interest. Interest and other expenses were higher in the first nine months of 2017 relative to the same period of 2016 due primarily to a \$20.6 million loss incurred in the first quarter of 2017 from a guaranty fund assessment related to an unaffiliated insurer that was declared insolvent. Favorably impacting the comparison for the third quarter and first nine months of 2017 relative to the same periods of 2016 were expenses related to the acquisition of Starmount in the third quarter of 2016. See Note 11 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further discussion on the loss from a guaranty fund assessment.

Segment Outlook

We expect the low interest rate environment to continue to place pressure on investment income. We are currently holding capital at our insurance subsidiaries and holding companies at levels that exceed our long-term requirements, and we expect to continue to generate excess capital on an annual basis through our statutory earnings. While we intend to maintain our disciplined approach to risk management, we believe we are well positioned with substantial flexibility to preserve our capital strength and at the same time explore opportunities to deploy the excess capital that is generated.

Investments

Overview

Investment activities are an integral part of our business, and profitability is significantly affected by investment results. We segment our invested assets into portfolios that support our various product lines. Generally, our investment strategy for our portfolios is to match the effective asset cash flows and durations with related expected liability cash flows and durations to consistently meet the liability funding requirements of our businesses. We seek to earn investment income while assuming credit risk in a prudent and selective manner, subject to constraints of quality, liquidity, diversification, and regulatory considerations. Our overall investment philosophy is to invest in a portfolio of high quality assets that provide investment returns consistent with

that assumed in the pricing of our insurance products. Assets are invested predominately in fixed maturity securities. Changes in interest rates may affect the amount and timing of cash flows.

We actively manage our asset and liability cash flow match and our asset and liability duration match to limit interest rate risk. We may redistribute investments among our different lines of business, when necessary, to adjust the cash flow and/or duration of the asset portfolios to better match the cash flow and duration of the liability portfolios. Asset and liability portfolio modeling is updated on a quarterly basis and is used as part of the overall interest rate risk management strategy. Cash flows from the in-force asset and liability portfolios are projected at current interest rate levels and also at levels reflecting an increase and a decrease in interest rates to obtain a range of projected cash flows under the different interest rate scenarios. These results enable us to assess the impact of projected changes in cash flows and duration resulting from potential changes in interest rates. Testing the asset and liability portfolios under various interest rate scenarios enables us to choose what we believe to be the most appropriate investment strategy, as well as to limit the risk of disadvantageous outcomes. Although we test the asset and liability portfolios under various interest rate scenarios as part of our modeling, the majority of our liabilities related to insurance contracts are not interest rate sensitive, and we therefore have minimal exposure to policy withdrawal risk. Our determination of investment strategy relies on long-term measures such as reserve adequacy analysis and the relationship between the portfolio yields supporting our various product lines and the aggregate discount rate assumptions embedded in the reserves. We also use this analysis in determining hedging strategies and utilizing derivative financial instruments for managing interest rate risk and the risk related to matching duration for our assets and liabilities. We do not use derivative financial instruments for speculative purposes.

Our investment portfolio is well diversified by type of investment and industry sector. We have established an investment strategy that we believe will provide for adequate cash flows from operations and allow us to hold our securities through periods where significant decreases in fair value occur. We believe our emphasis on risk management in our investment portfolio, including credit and interest rate management, has positioned us well and generally reduced the volatility in our results.

Fixed Maturity Securities

The fair values and associated unrealized gains and losses of our fixed maturity securities portfolio, by industry classification, are as follows:

Fixed Maturity Securities - By Industry Classification As of September 30, 2017

(in millions of dollars)

Classification	Fair Value	Net Unrealized Gain	Fair Value of Fixed Maturity Securities with Gross Unrealized Loss	Gross Unrealized Loss	Fair Value of Fixed Maturity Securities with Gross Unrealized Gain	Gross Unrealized Gain
