QUESTAR NET INCOME GROWS 10% IN FIRST QUARTER 2007**Company Revises 2007 Earnings Guidance, Raises Production Estimate**

SALT LAKE CITY Questar Corp. (NYSE:STR) a natural gas-focused energy company grew net income 10% in the first quarter of 2007 to \$151.1 million, or \$1.72 per diluted share, compared to \$137.2 million, or \$1.57 per diluted share, for the first quarter of 2006. Net mark-to-market gains on NYMEX/Rockies natural gas basis swaps increased first quarter 2007 net income \$7.4 million, or \$0.08 per diluted share.

We're off to a good start in 2007," said Keith Rattie, Questar chairman, president and CEO. Accordingly, we're raising our 2007 production guidance. We're also raising the bottom end of the range for our 2007 earnings guidance, even after adjusting for the likelihood that Rockies natural gas prices will be significantly lower this summer than we had assumed in our previous guidance.

First Quarter 2007 Highlights

-

Questar E&P grew natural gas, oil and natural gas liquids (NGL) production to 34.9 billion cubic feet of natural gas equivalent (Bcfe) compared to 32.3 Bcfe for the 2006 period, an 8% increase. Natural gas comprised 88% of reported volumes.

-

Realized natural gas prices at Questar E&P increased \$0.09 per thousand cubic feet (Mcf), or 1%, while realized crude oil and NGL prices declined \$1.81 per barrel (bbl), or 4%. Natural gas hedges increased reported revenues by \$30.2 million, while oil hedges increased revenues by \$0.9 million.

-

Net mark-to-market gains on NYMEX/Rockies natural gas basis swaps increased net income \$7.4 million in the 2007 quarter.

-

Wexpro investment base grew 23% to \$263.4 million at March 31, 2007, compared to \$214.5 million a year earlier. Wexpro produced 10.6 Bcf of cost-of-service gas for delivery to affiliate Questar Gas.

- A 43% increase in third-party volumes helped boost Gas Management gathering revenues 31% to \$23.1 million compared to \$17.6 million a year earlier. Processing volumes increased 2% while net processing revenues decreased 2% to \$11.8 million due to reduced frac-spread margin.

- Energy Trading net income was up 140% to \$6.0 million, driven primarily by increased storage-trading margins. Gross marketing margin totaled \$8.9 million compared to \$4.1 million in the year-ago period.

- Questar Pipeline net income declined 7% compared to the 2006 period, primarily because of higher costs.

- Questar Gas net income declined 1% from a year ago, primarily the result of a June 2006 rate reduction.

- Questar earned a 17.3% return on assets (ROA defined as earnings before interest and income taxes divided by average total assets) for the trailing 12-month period ended March 31, 2007. Market Resources ROA was 21.6%, Questar Pipeline ROA was 11.6%, and Questar Gas ROA was 7.9%.

Questar Revises 2007 Earnings Guidance and Production Estimate

Questar now expects full-year 2007 earnings to range from \$5.20 to \$5.35 per diluted share, compared to previous guidance of \$5.15 to \$5.35 per diluted share. The increase in the lower end of the guidance range is due to better-than-forecast results from Market Resources in the first quarter of 2007 and better visibility on Questar E&P production growth for the remainder of the year. The company now expects Questar E&P 2007 production to range from 135 to 138 Bcfe compared to previous guidance of 133 to 136 Bcfe. The revised production forecast is primarily due to anticipated earlier completion of Pinedale wells drilled during the 2006/2007 winter drilling season, an increase in the total number of Pinedale wells the company expects to complete in 2007, and better-than-previously forecast performance from Midcontinent properties, particularly the Elm Grove field. The company's revised earnings guidance now assumes Rockies basis differential will average \$3.25 per MMBtu for the remainder of 2007, compared to \$2.00 per MMBtu assumed in previous guidance. Rockies basis differential is the difference between the NYMEX/Henry Hub price of natural gas and the price the company realizes for natural gas produced and sold in the local market. The basis differential has widened because interstate pipelines that move natural gas from Rocky Mountain producing basins to markets outside the region are operating at close to capacity. The lower end of the guidance range assumes an average NYMEX price of \$7.25 per MMBtu for currently unhedged 2007 natural gas production for the rest of the year and an average prompt-month NYMEX oil price of \$60.00 per bbl applied to unhedged volumes. The upper end assumes an average NYMEX gas price of \$8.25 per MMBtu and an average prompt-month NYMEX oil price of \$65.00 per bbl applied to unhedged 2007 production. The guidance excludes one-time items, assumes hedges in place on the date of this release, and assumes natural gas and oil prices and basis differentials as summarized in the

following table:

Earnings Guidance Assumptions

	2007 <u>Current</u>	2007 <u>Previous</u>
Earnings per diluted share	\$5.20-\$5.35	\$5.15-\$5.35
Average diluted shares (millions)	88.1	88.1
Questar E&P production Bcfe	135-138	133-136
Pinedale well completions	48-52	45-48
NYMEX gas price per MMBtu*	\$7.25-\$8.25	\$7.25-\$8.25
NYMEX/Rockies basis differential per MMBtu*	\$3.25	\$2.00
NYMEX/Midcontinent basis differential per MMBtu*	\$1.00	\$1.00
NYMEX crude oil price per bbl*	\$60.00-\$65.00	\$60.00-\$65.00

* On unhedged volumes for the remainder of 2007

•

Questar E&P has hedged about 74% of forecast natural gas and oil-equivalent production for the remainder of 2007 with fixed-price swaps. Additionally, the company has hedged about 5% of forecast remainder-of-2007 production with NYMEX/Rockies basis-only swaps (see table at the end of this release).

•

The company estimates that a \$1.00-per-MMBtu change in the average NYMEX price of natural gas for the remainder of 2007 would result in about a \$0.08 change in earnings per diluted share.

•

A \$10.00-per-bbl change in the average NYMEX price of oil for the remainder of 2007 would result in about a \$0.05 change in earnings per diluted share.

Questar E&P Net Income Increases 10% in First Quarter 2007

Questar E&P a Market Resources subsidiary that acquires, explores for, develops and produces natural gas and oil grew production 8% to 34.9 Bcfe in the 2007 period. Growing production, combined with essentially flat realized prices for natural gas, crude oil and NGL and a 15% higher average cost structure, resulted in nearly flat first quarter 2007 net income compared to the year-earlier quarter, excluding net mark-to-market gains on NYMEX/Rockies natural gas basis swaps. Basis swaps increased net income \$7.4 million in the 2007 quarter.

Questar E&P Realized Prices and Hedging Impact

3 Months Ended

Edgar Filing: QUESTAR CORP - Form 8-K

	March 31,		
	<u>2007</u>	<u>2006</u>	<u>% Change</u>
Realized natural gas price (per Mcf)	\$6.35	\$ 6.26	1%
Hedge impact on realized price (per Mcf)	0.98	(0.56)	
Realized oil and NGL price (per bbl)	\$48.61	\$50.42	(4)
Hedge impact on realized price (per bbl)	1.26	(5.97)	
Net mark-to-market gain on basis swaps (millions before tax)	\$11.8	\$0.0	

Questar may hedge sales prices on up to 100% of forecast production from proved reserves to lock in acceptable returns on invested capital and to protect returns, cash flow and net income from a decline in commodity prices. The company uses NYMEX/Rockies basis-only swaps to protect cash flows and net income from widening natural gas-price basis differentials that may result from capacity constraints on regional gas pipelines.

Questar E&P production costs (the sum of depreciation, depletion and amortization expense, lease operating expense, general and administrative expense, allocated interest expense, and production taxes) per unit of gas-equivalent production increased 15% compared to the 2006 period.

Questar E&P Production Cost Structure

(Per Mcfe)

3 Months Ended

March 31,

	<u>2007</u>	<u>2006</u>	<u>% Change</u>
Depreciation, depletion and amortization	\$1.69	\$1.28	32%
Lease operating expense	0.59	0.54	9
General and administrative expense	0.35	0.34	3
Allocated interest expense	0.18	0.19	(5)
Production taxes	<u>0.47</u>	<u>0.51</u>	(8)
Production costs	<u>\$3.28</u>	<u>\$2.86</u>	15%

- Production volume-weighted average depreciation, depletion and amortization rate increased due to higher costs for drilling, completion and related services, increased cost of steel casing, other tubulars and wellhead equipment, the ongoing depletion of older, lower-cost reserves and the increasing component of Questar E&P production derived from higher-cost fields such as Elm Grove in the Midcontinent and Vermillion Basin and Wamsutter in the Rockies.

- Lease operating expense per Mcfe increased due to increased costs of materials and consumables, increased produced-water disposal costs and increased well-workover activity.

- General and administrative expense per Mcfe increased due primarily to increased labor expense partially offset by decreased legal expenses.

- Allocated interest expense per unit of production decreased in the 2007 period due to increased production and relatively constant interest expense.

- Production taxes per unit decreased due to lower natural gas and oil sales prices in the 2007 period.

Wexpro Net Income Up 16% in First Quarter 2007

Wexpro a Market Resources subsidiary that develops and produces cost-of-service reserves for Questar Gas reported higher net income driven by a 23% increase in its investment base at March 31, 2007, to \$263.4 million compared to \$214.5 million a year ago. Realized oil and NGL prices declined 14% compared to the 2006 quarter. Under a long-standing agreement with the states of Utah and Wyoming, Wexpro recovers its costs and earns an unlevered after-tax return of about 19 to 20% on its investment base the investment in commercial wells and related facilities, adjusted for working capital and reduced for deferred income taxes and accumulated depreciation.

Gas Management Net Income Up 28% in First Quarter 2007

Questar Gas Management (Gas Management) Market Resources gas-gathering and processing-services business posted higher net income driven by higher gathering volumes. Gas-gathering throughput grew 26% or 15.9 million MMBtu compared to the first quarter of 2006, primarily due to a 43% increase in third-party volumes. Fee-based gas-processing volumes were 30.6 million MMBtu in the first quarter of 2007, a 2% increase compared to the 2006 period. Fee-based gas-processing revenues increased 14% or \$0.6 million, while gross margin from keep-whole processing declined 11% or \$0.8 million in the 2007 period. Approximately 83% of Gas Management net operating revenue (total revenue less processing plant-shrink) is derived from fee-based contracts, up from 77% in the 2006 period.

Questar Pipeline Net Income Down 7% in First Quarter 2007

Questar Pipeline a subsidiary that provides interstate natural gas transportation and storage services reported lower net income primarily from increased operating, depreciation and interest expense from a phased system expansion placed in service at the first of the year. The company began collecting revenues from this project a year earlier at an interim delivery point pending construction and startup of new pipeline facilities, which were

completed at the end of the year. First-quarter revenues from this project remained essentially the same as a year ago, but first-quarter 2007 costs included depreciation and operating costs for the new facilities. Total pipeline revenues increased \$2.2 million from higher transportation and gas processing services. Operating, maintenance, general and administrative expenses totaled \$0.13 per decatherm transported, about the same as the year-earlier quarter, as a result of a 15% increase in both transportation volumes and expenses.

Questar Gas Net Income Down 1% in First Quarter 2007

Questar Gas which provides retail natural gas distribution services in Utah, Wyoming and Idaho reported slightly lower net income in the quarter as a result of a June 2006 rate reduction. First-quarter 2007 margin declined a net \$0.7 million as a result of this \$5.2 million rate reduction, mostly offset by a \$4.1 million increase from customer growth. The rate reduction was partially offset by \$2.3 million lower depreciation expense due to a change in depreciation rates. At March 31, 2007, Questar Gas served 861,000 customers, up 27,000 or 3.2% from March 31, 2006. Operating, maintenance, general and administrative expenses totaled \$38 per customer in the first quarter of 2007 compared to \$37 per customer in the 2006 period. A pilot conservation-enabling tariff, which decouples gas margin from customer volumes, increased margin \$1.8 million in the quarter, offsetting a decrease in temperature-adjusted usage per customer.

First Quarter 2007 Earnings Teleconference

Questar management will discuss first quarter 2007 results and the outlook for the remainder of 2007 in a conference call with investors Thursday, April 26, beginning at 9:30 a.m. EDT. The call can be accessed on the company Internet site at www.questar.com.

About Questar

Questar Corp. (NYSE:STR) is a natural gas-focused energy company with an enterprise value of about \$9 billion. Questar finds, develops, produces, gathers, processes, transports, stores and distributes natural gas.

Forward-Looking Statements

This release includes forward-looking statements within the meaning of Section 27(a) of the Securities Act of 1933, as amended, and Section 21(e) of the Securities Exchange Act of 1934, as amended. Such statements are based on management's current expectations, estimates and projections, which are subject to a wide range of uncertainties and business risks. Factors that could cause actual results to differ from those anticipated are discussed in the company's periodic filings with the Securities and Exchange Commission, including its annual report on Form 10-K for the year ended December 31, 2006. Questar undertakes no obligation to publicly correct or update the forward-looking statements in this news release, in other documents, or on the Web site to reflect future events or circumstances. All such statements are expressly qualified by this cautionary statement.
