OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____
Commission File No. 1-6300

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
(Exact name of Registrant as specified in its charter)

Pennsylvania 23-6216339
(State or other jurisdiction of (IRS Employer
incorporation or organization) Identification No.)

The Bellevue 19102
200 South Broad Street
Philadelphia, Pennsylvania
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: (215) 875-0700

Securities Registered Pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Shares of Beneficial Interest, par value \$1.00 per share	New York Stock Exchange
Series A Preferred Shares, par value \$0.01 per share	New York Stock Exchange
Series B Preferred Shares, par value \$0.01 per share	New York Stock Exchange

Securities Registered Pursuant to Section 12(g) of the Act: None

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes " No ý

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes " No ý

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the Registrant was

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in the definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value, as of June 30, 2013, of the shares of beneficial interest, par value \$1.00 per share, of the Registrant held by non-affiliates of the Registrant was approximately \$1,232.3 million. (Aggregate market value is estimated solely for the purposes of this report and shall not be construed as an admission for the purposes of determining affiliate status.)

On February 25, 2014, 68,411,463 shares of beneficial interest, par value \$1.00 per share, of the Registrant were outstanding.

Documents Incorporated by Reference

Portions of the Registrant's definitive proxy statement for its 2014 Annual Meeting of Shareholders are incorporated by reference in Part III of this Form 10-K.

FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K for the year ended December 31, 2013, together with other statements and information publicly disseminated by us, contain certain “forward-looking statements” within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans, strategies, anticipated events, trends and other matters that are not historical facts. These forward-looking statements reflect our current views about future events, achievements or results and are subject to risks, uncertainties and changes in circumstances that might cause future events, achievements or results to differ materially from those expressed or implied by the forward-looking statements. In particular, our business might be materially and adversely affected by uncertainties affecting real estate businesses generally as well as the following, among other factors:

- our substantial debt and stated value of preferred shares and our high leverage ratio;
- constraining leverage, interest and tangible net worth covenants under our 2013 Revolving Facility and our 2014 Term Loans;
- potential losses on impairment of certain long-lived assets, such as real estate, or of intangible assets, such as goodwill, including such losses that we might be required to record in connection with any dispositions of assets;
- changes to our corporate management team and any resulting modifications to our business strategies;
- our ability to refinance our existing indebtedness when it matures, on favorable terms or at all;
- our ability to raise capital, including through the issuance of equity or equity-related securities if market conditions are favorable, through joint ventures or other partnerships, through sales of properties or interests in properties, or through other actions;
- our ability to identify and execute on suitable acquisition opportunities and to integrate acquired properties into our portfolio;
- our short and long-term liquidity position;
- current economic conditions and their effect on employment and consumer confidence and spending, and the corresponding effects on tenant business performance, prospects, solvency and leasing decisions and on our cash flows, and the value and potential impairment of our properties;
- changes in the retail industry, including consolidation and store closings, particularly among anchor tenants;
 - the effects of online shopping and other uses of technology on, and by competitors of, our retail tenants;
- general economic, financial and political conditions, including credit and capital market conditions, changes in interest rates or unemployment;
- risks related to development and redevelopment activities;
- inability to sell properties that we seek to dispose of or the inability to obtain estimated sale prices;
- our ability to maintain and increase property occupancy, sales and rental rates, in light of the relatively high number of leases that have expired or are expiring in the next two years;
- acts of violence at malls, including our properties, or at other similar spaces, and the potential effect on traffic and sales;
- increases in operating costs that cannot be passed on to tenants;
- concentration of our properties in the Mid-Atlantic region;
- changes in local market conditions, such as the supply of or demand for retail space, or other competitive factors; and
- potential dilution from any capital raising transactions or other equity issuances.

Additional factors that might cause future events, achievements or results to differ materially from those expressed or implied by our forward-looking statements include those discussed in the section entitled “Item 1A. Risk Factors.” We do not intend to update or revise any forward-looking statements to reflect new information, future events or otherwise.

Except as the context otherwise requires, references in this Annual Report on Form 10-K to “we,” “our,” “us,” the “Company” and “PREIT” refer to Pennsylvania Real Estate Investment Trust and its subsidiaries, including our operating partnership, PREIT Associates, L.P. References in this Annual Report on Form 10-K to “PREIT Associates” refer to PREIT Associates, L.P. References in this Annual Report on Form 10-K to “PRI” refer to PREIT-RUBIN, Inc., which is

a taxable REIT subsidiary of the Company.

1

PART I

ITEM 1. BUSINESS.

OVERVIEW

Pennsylvania Real Estate Investment Trust, a Pennsylvania business trust founded in 1960 and one of the first equity real estate investment trusts (“REITs”) in the United States, has a primary investment focus on retail shopping malls located in the eastern half of the United States, primarily in the Mid-Atlantic region.

We currently own interests in 43 retail properties, of which 40 are operating properties and three are development properties. The 40 operating properties, which are classified in continuing operations, include 35 enclosed malls and five power and strip centers, have a total of 30.4 million square feet and operate in 11 states. We and partnerships in which we own an interest own 23.6 million square feet at these properties (excluding space owned by anchors).

There are 33 operating retail properties in our portfolio that we consolidate for financial reporting purposes. These consolidated properties have a total of 25.8 million square feet, of which we own 20.5 million square feet. The seven operating retail properties that are owned by unconsolidated partnerships with third parties have a total of 4.6 million square feet, of which 3.1 million square feet are owned by such partnerships.

The development portion of our portfolio contains three properties in two states, with two classified as “mixed use” (a combination of retail and other uses) and one classified as “other.”

We are a fully integrated, self-managed and self-administered REIT that has elected to be treated as a REIT for federal income tax purposes. In general, we are required each year to distribute to our shareholders at least 90% of our net taxable income and to meet certain other requirements in order to maintain the favorable tax treatment associated with qualifying as a REIT.

PREIT’S BUSINESS

We are primarily engaged in the ownership, management, leasing, acquisition, redevelopment, development and disposition of enclosed malls. In general, our malls include tenants that are national or regional department stores, large format retailers or other anchors and a diverse mix of national, regional and local in-line stores offering apparel (women’s, family, teen, children’s, men’s), shoes, eyewear, cards and gifts, jewelry, sporting goods, home furnishings, drug stores, electronics and books/music/movies, among other things.

To enhance the experience for shoppers, most of our malls have restaurants and/or food courts, and some of the malls have multi-screen movie theaters and other entertainment options, either as part of the mall or on outparcels around the perimeter of the mall property. In addition, many of our malls have outparcels containing restaurants, banks or other stores. In their geographic trade areas, our malls frequently serve as a central place for community, promotional and charitable events.

The largest mall in our retail portfolio is 1.4 million square feet and contains 108 stores, and the smallest is 0.4 million square feet and contains 46 stores. The power and strip centers in our retail portfolio range from 285,000 to 780,000 square feet.

We derive the substantial majority of our revenue from rent received under leases with tenants for space at retail properties in our real estate portfolio. In-line stores typically generate a majority of the revenue of a mall, with a relatively small proportion coming from anchor tenants, junior anchors or large format retailers. In general, our leases require tenants to pay minimum rent, which is a fixed amount specified in the lease, and which is often subject to scheduled increases during the term of the lease for longer term leases. In 2013, 80% of the new leases that we signed contained scheduled rent increases, and these increases, which are typically scheduled to occur on one or two occasions during the term, ranged from 1.3% to 215.0% with approximately 90% of the increases ranging from 2% to 5%. In addition or in the alternative, certain tenants are required to pay percentage rent, which can be either a percentage of their sales revenue that exceeds certain levels specified in their lease agreements, or a percentage of their total sales revenue.

Also, the majority of our leases provide that the tenant will reimburse us for certain expenses relating to the property for common area maintenance (“CAM”), real estate taxes, utilities, insurance and other operating expenses incurred in the operation of the property subject, in some cases, to certain limitations. The proportion of the expenses for which tenants are responsible is traditionally related to the tenant’s pro rata share of space at the property. As discussed

below, we have begun to shift the provision in our leases that addresses these items to be a fixed amount, which gives greater predictability to tenants.

Retail real estate industry participants sometimes classify malls based on the average sales per square foot of non anchor mall tenants, the population and average household income of the trade area and the geographic market, the growth rates of the population and average household income in the trade area and geographic market, and numerous other factors. Based on these

factors, in general, malls that have high average sales per square foot and are in trade areas with large populations and high household incomes and/or growth rates are considered Class A malls, malls with average sales per square foot that are in the middle range of population or household income and/or growth rates are considered Class B malls, and malls with lower average sales and smaller populations and lower household incomes and/or growth rates are considered Class C malls. Although these classifications are defined differently by different market participants, in general, some of our malls are in the Class A range and many might be classified as Class B or Class C properties. The classification of a mall can change, and one of the goals of our current property strategic plans, remerchandising programs and non-core property disposition program is to increase the average sales per square foot of certain of our properties and correspondingly increase their rental income and cash flows, and thus potentially their class, in order to maximize the value of the property.

RECENT DEVELOPMENTS

Operating Performance

For the year ended December 31, 2013, we demonstrated progress over 2012 in a number of our key operating metrics.

Same Store net operating income ("Same Store NOI"), a non-GAAP measure, excluding lease termination revenue increased 2.7% compared to 2012. Same store NOI increased 2.6% over the prior year.

Funds From Operations ("FFO") as adjusted, a non-GAAP measure, increased 19.6% from the prior year, and FFO as adjusted per share increased 4.9% over 2012, due in part to the effects of an underwritten public offering of common shares. Adjustments included employee separation expense, hedging loss and accelerated amortization of financing costs.

Net income was \$37.2 million, an increase of \$79.8 million compared to a net loss for 2012 of \$42.6 million, primarily as a result of gains on sales and decreased interest expense.

Retail portfolio occupancy at year end was 95.0%, an increase of 60 basis points. Non anchor occupancy was 93.5%, an increase of 150 basis points. Same store mall occupancy was 95.0%, an increase of 60 basis points.

Seven properties generated sales per square foot in excess of \$400, including consolidated and unconsolidated properties, up from six in 2012. Sales per square foot at our mall properties were \$380, essentially unchanged from 2012, including consolidated and unconsolidated properties.

Renewal spreads increased 4.3% for leases under 10,000 square feet. Renewal spreads increased 1.2% for all leases. Average gross rent increased 3.1%.

Since 2012, our Board of Trustees has raised the dividend on common shares by 25%.

Descriptions of each non-GAAP measure mentioned above and the related reconciliation to the comparable GAAP measures are located in "—Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Reconciliation of GAAP Net Income (Loss) to Non-GAAP Measures."

Portfolio Stratification. As discussed in our 2012 Form 10-K for 2012 sales, when listing our malls in order by individual property 2013 sales per square foot, there is a group of six malls at the top of that list that collectively had an average sales per square foot of \$526, average non anchor occupancy of 97.1% and that contributed approximately 32.5% of our net operating income ("NOI") in 2013. This "premier" group includes such properties as Cherry Hill Mall in Cherry Hill, New Jersey and Willow Grove Park in suburban Philadelphia, Pennsylvania.

The next 18 properties on the list are a collection of solidly performing properties that had an average sales per square foot of \$356, average non anchor occupancy of 93.5% and contributed approximately 47.2% of our NOI in 2013. This "core growth" group includes such properties as Capital City Mall near Harrisburg, Pennsylvania and Valley Mall in Hagerstown, Maryland.

The next eight properties on the list, which exhibit moderate performance, had 2013 average sales per square foot of \$266, non anchor occupancy of 90.3% and contributed 11.2% of our NOI in 2013, and, we believe, present opportunities for improvement. This "opportunistic" group includes such properties as Lycoming Mall near Williamsport, Pennsylvania and New River Valley Mall in Christiansburg, Virginia.

The remaining three mall properties (Nittany Mall in State College, Pennsylvania, North Hanover Mall in Hanover, Pennsylvania and South Mall in Allentown, Pennsylvania) constitute "non-core" properties and contributed 2.9% of our NOI in 2013. As discussed below, we sold three mall properties and three power and strip centers that were non-core

properties in 2013, and we have undertaken efforts to dispose of these other three non-core properties.

3

Our portfolio also includes five power and strip centers. These power and strip centers had total occupancy of 95.0%, and contributed approximately 4.0% of our NOI in 2013. The balance of our 2013 NOI came mostly from properties we sold during the year.

Financing Activity

Leverage. As of December 31, 2013, our ratio of Total Liabilities to Gross Asset Value under our 2013 Revolving Facility was 48.36%, down significantly from 62.44% at the end of 2012, and 66.87% at the end of 2011. This decrease was a result of certain transactions completed in 2013 and certain other actions, as described below.

2013 Unsecured Revolving Facility. In April, we entered into a Credit Agreement (the “2013 Revolving Facility”) with Wells Fargo Bank, National Association, and other financial institutions for a \$400.0 million senior unsecured revolving credit facility. The 2013 Revolving Facility replaced the previously existing \$250.0 million secured 2010 Credit Facility. The 2013 Revolving Facility provides for reduced interest rate margins at various leverage levels, a longer term until maturity and the use of lower capitalization rates in determining leverage for those properties meeting certain sales criteria.

Common Share Offering. In May 2013, we issued 11,500,000 common shares in a public offering at \$20.00 per share, near our high price for the year. We received net proceeds from the offering of \$220.5 million, after deducting payment of the underwriting discount and offering expenses. We used a portion of the net proceeds from this offering to repay all \$192.5 million of then-outstanding borrowings under our 2013 Revolving Facility.

2014 Unsecured Term Loans. In January 2014, we entered into two senior unsecured term loans for an aggregate amount of \$250.0 million. We entered into a 5 Year Term Loan Agreement with Wells Fargo Bank, National Association, U.S. Bank National Association and other financial institutions, for \$150.0 million, which may be expanded to \$300.0 million, and a 7 Year Term Loan Agreement with Wells Fargo Bank, National Association, Capital One, National Association and other financial institutions, for \$100.0 million, which may be expanded to \$200.0 million (collectively, the “2014 Term Loans”). We made initial borrowings of \$100.0 million under the 5 Year Term Loan Agreement and \$30.0 million under the 7 Year Term Loan Agreement, and used the proceeds to repay the \$130.0 million then-outstanding balance under our 2013 Revolving Facility.

Mortgage Loan Activity. In 2013, we completed \$291.1 million of mortgage loan financings relating to five properties at a weighted average interest rate of 4.26%, a 127 basis point reduction versus the average interest rate on the previous mortgage loans on these properties, and yielding approximately \$31.7 million in proceeds. The following table presents the mortgage loans that we have entered into or extended since January 1, 2013 relating to our consolidated properties:

Financing Date	Property	Amount Financed or Extended (in millions of dollars)	Stated Interest Rate	Maturity
February	Francis Scott Key Mall ⁽¹⁾⁽²⁾	\$62.6	LIBOR plus 2.60%	March 2018
February	Lycoming Mall ⁽³⁾	35.5	LIBOR plus 2.75%	March 2018
February	Viewmont Mall ⁽¹⁾	48.0	LIBOR plus 2.60%	March 2018
March	Dartmouth Mall	67.0	3.97% fixed	April 2018
September	Logan Valley Mall ⁽⁴⁾	51.0	LIBOR plus 2.10%	September 2014
December	Wyoming Valley Mall ⁽⁵⁾	78.0	5.17% fixed	December 2023

(1) Interest only payments.

(2) The mortgage loan may be increased by \$7.9 million subject to certain prescribed conditions.

The initial amount of the mortgage loan was \$28.0 million. We took additional draws of \$5.0 million in October 2009 and \$2.5 million in March 2010. The mortgage loan was amended in February 2013 to lower the interest rate to LIBOR plus 2.75% and to extend the maturity date to March 2018. We borrowed an additional \$2.1 million to bring the total amount financed to \$35.5 million.

The initial amount of the mortgage loan was \$68.0 million. We repaid \$5.0 million in September 2011 and \$12.0 million in September 2013. We exercised our right under the loan in September 2013 to extend the maturity date to September 2014.

⁽⁵⁾ Interest only payments until March 2015. Principal and interest payments commencing in April 2015.

4

Also in 2013, we repaid in full an aggregate of \$218.6 million of mortgage loans secured by four of our properties. These properties are currently unencumbered.

Repayment of Debt Using Sale Proceeds. In 2013, we sold two power centers, as described below, yielding net proceeds that we generally used to repay outstanding borrowings under various debt agreements.

Recent Dispositions and Acquisition

In continuing to execute our strategy of elevating the quality of our portfolio, in 2013 we disposed of three non-core mall properties, we acquired one property and we also realized the value of three of our power and strip center properties by selling them.

Dispositions. The table below presents our dispositions since January 1, 2013:

Sale Date	Property and Location	Description of Real Estate Sold	Capitalization Rate	Sale Price (in millions) (in millions of dollars)	Gain/ (Loss)
January	Phillipsburg Mall, Phillipsburg, New Jersey	Mall ⁽¹⁾	9.8	% \$ 11.5	\$—
	Paxton Towne Centre, Harrisburg, Pennsylvania	Power center ⁽²⁾⁽³⁾	6.9	% 76.8	32.7
February	Orlando Fashion Square, Orlando, Florida	Mall ⁽⁴⁾	9.8	% 35.0	0.7
September	Commons at Magnolia, Florence, South Carolina	Strip Center ⁽⁵⁾	8.9	% 12.3	4.3
	Christiana Center, Newark, Delaware	Power Center ⁽²⁾⁽⁵⁾⁽⁶⁾	6.5	% 75.0	40.8
November	Chambersburg Mall, Chambersburg, Pennsylvania	Mall ⁽⁷⁾	NM ⁽⁸⁾	8.5	—

(1) We used proceeds of \$11.5 million plus \$4.5 million of available working capital to pay for the release of the lien on this collateral property, which secured a portion of our 2010 Credit Facility.

(2) We divested goodwill of \$0.7 million and \$0.8 million in connection with the dispositions of Paxton Towne Centre and Christiana Center, respectively.

(3) We used proceeds from the sale of this property to repay the \$50.0 million mortgage loan secured by the property.

(4) We used proceeds of \$35.0 million plus a nominal amount of available working capital to pay for the release of the lien on this collateral property, which secured a portion of our 2010 Credit Facility.

(5) We used combined proceeds from the sales of these properties to repay \$35.0 million of amounts outstanding under our 2013 Revolving Facility, and we used the remaining proceeds for general corporate purposes.

(6) The buyer of this property assumed the \$49.2 million mortgage loan secured by this property.

(7) In the third quarter of 2013, we recorded a loss on impairment of assets at Chambersburg Mall of \$23.7 million. We used proceeds from the sale of this property for general corporate purposes.

(8) The capitalization rate was not meaningful in the context of this transaction.

In addition, in September 2013, we sold a condominium interest in connection with a ground lease located at Voorhees Town Center in Voorhees, New Jersey for \$10.5 million.

Acquisition. In April 2013, we acquired a building located contiguous to The Gallery at Market East in Philadelphia, Pennsylvania for \$59.6 million, representing a capitalization rate of approximately 5.7%. In January 2014, the main tenant of the building announced that it is closing its store in the first half of 2014.

BUSINESS STRATEGY

Our primary objective is to maximize the long-term value of the Company for our shareholders. To that end, our business goals are to obtain the highest possible rental income, tenant sales and occupancy at our properties in order to maximize our cash flows, net operating income, funds from operations, funds available for distribution to shareholders

and other operating measures and results, and ultimately to maximize the values of our properties.

5

To achieve this primary goal, we have developed a business strategy focused on increasing the values of our properties, and ultimately of the Company, which includes:

- Raising the overall level of quality of the assets in our portfolio;
- Improving the operating results of our properties;
- Taking steps to position the Company for future growth opportunities; and
- Improving our balance sheet by reducing debt and leverage, and maintaining a solid liquidity position.

Raising the Overall Level of Quality of the Assets in Our Portfolio

A key element of our strategy is to elevate the overall level of quality of our portfolio. We intend to accomplish this by enhancing the value of some of the properties (most of which are in our core growth group), as well as by disposing of lower productivity non-core properties.

Mall-Specific Plans. We believe that certain of our properties, including ones which are in trade areas around major cities or are leading properties in secondary markets, can benefit from strategic remerchandising strategies. Based on the demographics of the trade area or the relevant competition, we believe that this subset of properties provides opportunities for meaningful value creation at the property level. We believe that we can successfully implement particular strategies at these assets, such as adding restaurants, making fashion and certain fashion categories the focus of the retailers at the property, and relocating and right-sizing certain stores. We also continuously work to optimize the match between the demographics of the trade area, such as the household income level, and the nature and mix of tenants at the property. We strive to work closely with tenants to enhance their merchandising opportunities at our properties. We believe that these approaches can attract more national and other tenants to the property and can lead to higher occupancy and net operating income. In 2013, we developed specific plans for substantially all of our core growth properties, and began or continued to execute and deliver on these plans, with notable progress at malls such as Moorestown Mall, Viewmont Mall and Washington Crown Center.

Shopper Experiences. In addition to such property-wide remerchandising efforts, we also seek to offer unique shopper experiences at our properties by having tenants that provide products, services or interactions that are unlike other offerings in the trade area. In particular, we are striving to add the restaurants of recognized chefs or dining options with unique concepts, as studies indicate that mall restaurant customers spend more and stay on the property longer. We also seek to add first-to-market tenants, entertainment options, beauty and fashion purveyors, and unique tenants like a popular upscale flea market, as well as providing amenities like children's play areas and mall shopping smartphone apps.

Portfolio Actions. Another avenue for raising the level of quality of our portfolio is to dispose of certain non-core assets, which have sales productivity or occupancy below the average for our portfolio. In January and February 2013, we sold Phillipsburg Mall and Orlando Fashion Square, respectively. In November 2013, we sold Chambersburg Mall. We are also seeking to sell a small number of other malls. We anticipate that the proposed disposition of these lower-performing properties, together with the property sales that have already closed, will result in improved operating metrics of the remaining collection of assets (other things being equal), which are measures of the quality of our portfolio. As discussed below under “—Improving the Operating Results of Our Properties,” we believe that this will also aid our bargaining position in lease negotiations and potentially help increase rental rates.

Improving the Operating Results of Our Properties

We aim to improve the overall performance of our portfolio of properties with a multi-pronged approach.

Occupancy. We continue to work to increase non anchor and total occupancy in our properties. In connection with the remerchandising plans at several of our properties described above in “—Raising the Overall Level of Quality of the Assets in Our Portfolio,” we are seeking or have obtained tenants for remerchandised space and for new space of different types such as pads or kiosks, and we are also seeking tenants that have not previously been prevalent at our mall properties. In addition, following our completed redevelopments of several properties in recent years, we gave high priority to our efforts to lease the available space at those assets, and have secured a number of new and renewal tenants to help increase or maintain occupancy at the redeveloped properties and throughout our portfolio. In connection with these efforts, over the past two years, non anchor occupancy at our malls increased by 290 basis points and total occupancy increased by 180 basis points.

Key Tenants; Mall Leasing. We continue to recruit, and expand our relationships with, certain high profile retailers, and to initiate and expand our relationships with other quality and first-to-market retailers or concepts. We coordinate closely with tenants on new store locations in an effort to position our properties for our tenants' latest concept or store prototype, in order to

6

drive traffic to our malls and stimulate customer spending. We have added experienced new members to our team of veteran leasing representatives. We believe that increasing our occupancy in ways that are tailored to particular properties will be helpful to our leasing efforts and will help increase rental rates.

Rental Rates. For the year ended December 31, 2013, we generated sales per square foot of \$380 from our properties, essentially consistent with the prior year level and higher than the \$373 generated in 2011 and the \$358 generated in 2010. This improved level has helped attract new tenants and helped us retain current tenants that seek to take advantage of the property's increased productivity. We have worked to capitalize on the increase in sales per square foot over the past few years by seeking positive rent renewal spreads, including from renewals and new leases following expirations of leases entered into during the economic downturn of recent years. In 2013, renewal spreads increased 4.3% on leases under 10,000 square feet. More than half of the near-term lease expirations in our portfolio are in the premier and core growth groups of properties. Hence, we believe that there is a meaningful opportunity to increase rent and replace underperforming tenants at these properties, and potentially to increase their NOI and net asset values.

As discussed above in “—Raising the Overall Level of Quality of the Assets in Our Portfolio,” we have sold three non-core malls in 2013 and are seeking to dispose of certain other non-core malls with lower sales productivity. We believe that the disposition of these less productive malls will help improve our negotiating position with retailers with multiple stores in our portfolio (including stores at these properties), and potentially enable us to obtain higher rental rates from them.

Specialty Leasing and Partnership Marketing. Some space at our properties might be available for a shorter period of time, pending a lease with a permanent tenant or in connection with a redevelopment. We strive to manage the use of this space through our specialty leasing function, which manages the short term leasing of stores and the licensing of income-generating carts and kiosks, with the goal of maximizing the rent we receive during the period when a space is not subject to a longer term lease.

In 2012 and 2013, we accelerated our efforts to generate ancillary revenue (such as sponsorship marketing revenue and promotional income) from the properties in our portfolio. In 2013, we have added further resources to this function, and we believe that increased efforts in this area can enable us to increase the proportion of net operating income derived from ancillary revenue.

Operating Expenses and CAM Charges. Our strategy for improving operating results also includes efforts to control or reduce the costs of operating our properties. With respect to operating expenses, we have taken steps to manage a significant proportion of them through contracts with third party vendors for housekeeping and maintenance, security services, landscaping and trash. These contracts provide reasonable control, certainty and predictability. For example, we renegotiated our security contract in 2013 to better control our operating expenses in the future. We also seek to contain certain expenses through our active programs for managing utility expense and real estate taxes. We have taken advantage of opportunities to buy electricity economically in states that have opened their energy markets to competition, thereby reducing operating expenses, and we expect to continue with this approach. We also review the annual tax assessments of our properties and, when appropriate, pursue appeals.

With respect to CAM charges, we have continued to offer tenants an option of fixed CAM, in contrast to the traditional pro rata CAM. Fixed CAM, while shifting some risk to us as landlord, can offer tenants increased predictability of their costs, decrease the number of items to be negotiated in a lease thus speeding lease execution, and reduce the need for detailed CAM billings, reconciliations and collections. It will take several years for all tenants of our properties to be subject to leases with a fixed CAM provision, but we believe there is an opportunity for costs to be reduced.

Taking Steps to Position the Company for Future Growth Opportunities

We are taking steps to position the Company to generate future growth. We have implemented processes designed to ensure strong internal discipline in the use, harvesting and recycling of our capital, and these processes will be applied in connection with proposals to acquire properties and to redevelop properties or to reposition properties with a mix of uses.

External Opportunities. We seek to acquire, in an opportunistic, selective and disciplined manner, properties that are well-located, that are in trade areas with growing or stable demographics, that have operating metrics that are better

than or equal to our existing portfolio averages, and that we believe have strong potential for increased cash flows and appreciation in value if we call upon our relationships with retailers and apply our skills in asset management and redevelopment. We also seek to acquire additional parcels or properties that are included within, or adjacent to, the properties already in our portfolio in order to gain greater control over the merchandising and tenant mix of a property. Depending on the nature of the acquisition opportunity, we might involve a partner. Taking advantage of any such opportunities will likely involve some use of debt or equity capital.

7

We pursue development of retail and mixed use projects that we expect can meet the financial and strategic criteria we apply, given economic, market and other circumstances. We seek to leverage our skill sets in site selection, entitlement and planning, cost estimation and project management to develop new retail and mixed use properties. We seek properties in trade areas that we believe have sufficient demand for such properties, once developed, to generate cash flows that meet the financial thresholds we establish in the given environment. We manage all aspects of these undertakings, including market and trade area research, site selection, acquisition, preliminary development work, construction and leasing.

Organic Opportunities. We might also seek to increase the potential value of properties in our portfolio and to maintain or enhance their competitive positions by redeveloping them in order to attract more customers and retailers, which we expect to lead to increases in sales, occupancy and rental rates. Redevelopments are generally more involved than strategic property plans or remerchandising programs that include the elements described above under “—Improving the Operating Results of Our Properties,” and usually require some use of capital. To assist in these efforts, in 2013 we added an experienced senior development professional to our team.

In 2013, we acquired a building at 907 Market Street in Philadelphia, Pennsylvania that is located adjacent to The Gallery at Market East, which we own. This building was the last remaining major parcel that we did not already control along three city blocks on Market Street in Center City Philadelphia between City Hall, Reading Terminal Market, the Convention Center and the Historic District. We have begun researching and analyzing possible strategies and plans for redeveloping this group of properties. While there are several complex aspects to a redevelopment of this scale and with these unique attributes, we believe that this organic opportunity has significant potential for value creation.

In addition, we look for ways to maximize the value of our assets by adding a mix of uses, such as office or multi-family residential housing, initiated either by ourselves or with a partner, that are designed to attract a greater number of people to the property. Multiple constituencies, from local governments to city planners to citizen groups, have indicated a preference for in-place development, development near transportation hubs, the addition of uses to existing properties, and sustainable development, as opposed to locating, acquiring and developing new green field sites. Also, if appropriate, we will seek to attract certain nontraditional tenants to these properties, including tenants using the space for purposes such as entertainment, education, health care, government and child care, which can bring larger numbers of people to the property, as well as regional, local or nontraditional retailers. Such uses will, we believe, increase traffic and enable us to generate additional revenue and grow the value of the property.

Improving Our Balance Sheet by Reducing Debt and Leverage; Maintaining Liquidity

Leverage. As discussed above under “—Recent Developments —Financing Activity,” in 2013, we reduced our ratio of Total Liabilities to Gross Asset Value as defined under the 2013 Revolving Facility to 48.36% following certain transactions and events, including: our entry into the 2013 Revolving Facility, a common equity offering, the sale of certain properties with application of the net proceeds to debt repayment, and the refinancing of several mortgage loans with the use of proceeds for debt repayment. As a result, we believe that our leverage is more in line with peer companies in our market segment.

We continue to contemplate ways to reduce our leverage further through a variety of means available to us. These means might include selling properties or interests in properties with values in excess of their mortgage loans and applying any excess proceeds to debt reduction; issuing common or preferred equity or equity-related securities if market conditions are favorable; entering into joint ventures or other partnerships or arrangements involving our contribution of assets; or through other actions. We are also striving to reduce further our ratio of Total Liabilities to Gross Asset Value by increasing our Gross Asset Value through improving our operating performance. See “—Improving the Operating Results of Our Properties.”

Mortgage Loan Refinancings and Repayments. In addition, we might pursue opportunities to make favorable changes to individual mortgage loans on our properties. When we refinance such loans, we might seek a new term, better rates and excess proceeds. An aspect of our approach to debt financing is that we strive to lengthen and stagger the maturities of our debt obligations in order to better manage our future capital requirements. As we did in 2013, we might again seek to repay certain mortgage loans in full in order to unencumber the associated properties, which enables us to increase our pool of unencumbered assets and provide greater financial flexibility or support additional

financing, like the unsecured 2013 Revolving Facility and the unsecured 2014 Term Loans.

Deployment of Capital. As discussed above under “—Taking Steps to Position the Company for Future Growth Opportunities,” our external and organic growth opportunities might require the use of capital, including debt or equity capital.

Liquidity. As of December 31, 2013, our balance sheet reflected \$34.2 million in cash and cash equivalents. In addition, as of January 8, 2014, the 2013 Revolving Facility had the maximum availability of \$400.0 million. We believe that our net cash

provided by operations, together with the available credit under the 2013 Revolving Facility and the 2014 Term Loans, provide sufficient liquidity to meet our liquidity requirements and to take advantage of opportunities in the short to intermediate term.

Capital Recycling. We regularly conduct portfolio property reviews and, if appropriate, we seek to dispose of properties or outparcels that we do not believe meet the financial and strategic criteria we apply, given economic, market and other circumstances. Disposing of these properties can enable us to redeploy or recycle our capital to other uses, such as to repay debt, to reinvest in other real estate assets and development and redevelopment projects, and for other corporate purposes.

CAPITAL STRATEGY

In support of the business strategies described above, our long-term corporate finance objective is to maximize the availability and minimize the cost of the capital we employ to fund our operations. In pursuit of this objective and for other business reasons, we seek the broadest range of funding sources (including commercial banks, institutional lenders, equity and debt investors and joint venture partners) and funding vehicles (including mortgage loans, commercial loans and debt and equity securities) available to us on the most favorable terms. We pursue this goal by maintaining relationships with various capital sources and utilizing a variety of financing instruments, enhancing our flexibility to execute our business strategy in different economic environments or at different points in the business cycle.

In the past year, as discussed above, we entered into a number of new mortgage loans, repaid other mortgage loans, issued common equity in a public offering and entered into a new unsecured revolving facility and two unsecured term loans.

Through the end of 2014, one mortgage loan with a balance of \$51.0 million secured by a consolidated property is scheduled to mature, but we expect to be able to extend the maturity date pursuant to the applicable loan agreement, subject to lender approval. Three mortgage loans with an aggregate balance of \$283.7 million secured by consolidated properties are scheduled to mature in 2015, and we expect to be able to refinance these mortgage loans. We believe that, in the aggregate, the values of these properties will be sufficient to support replacement financing. While mortgage interest rates remain relatively low, we will seek to extend these mortgage loans to the maximum extent possible, or to replace them with longer term mortgage loans. See “Item 1A. Risk Factors” and “—Business Strategy—Improving Our Balance Sheet by Reducing Debt and Leverage; Maintaining Liquidity.”

In general, in determining the amount and type of debt capital to employ in our business, we consider several factors, including: general economic conditions, the capital market environment, prevailing and forecasted interest rates for various debt instruments, the cost of equity capital, property values, capitalization rates for mall properties, our financing needs for acquisition, redevelopment and development opportunities, the debt ratios of other mall REITs and publicly-traded real estate companies, and the federal tax law requirement that REITs distribute at least 90% of net taxable income, among other factors.

In the normal course of business, we are exposed to financial market risks, including interest rate risk on our interest-bearing liabilities. We attempt to limit these risks by following established risk management policies, procedures and strategies, including the use of various types of financial instruments. To manage interest rate risk and limit overall interest cost, we may employ interest rate swaps, options, forwards, caps and floors or a combination thereof depending on our underlying exposure, and subject to our ability to satisfy collateral requirements.

Capital Availability

To maintain our status as a REIT, we are required, under federal tax laws, to distribute to shareholders 90% of our net taxable income, which generally leaves insufficient funds to finance major initiatives internally. Because of these requirements, we ordinarily fund most of our significant capital requirements, such as the capital for acquisitions, redevelopments and developments, through secured and unsecured indebtedness and, when appropriate, the issuance of additional debt, equity or equity-related securities.

In April 2013, we entered into the 2013 Revolving Facility, for a \$400.0 million senior unsecured revolving credit facility. The 2013 Revolving Facility replaced our prior \$250.0 million secured credit facility. In January 2014, we

entered into two senior unsecured term loans for an aggregate amount of \$250.0 million, a five year agreement for a \$150.0 million facility, expandable to \$300.0 million, and a seven year agreement for a \$100.0 million facility, expandable to \$200.0 million. During the term of the 2013 Revolving Facility and the 2014 Term Loans, certain covenants and provisions might restrict our ability to use our cash flows and any debt or equity capital we obtain to execute our strategy.

In addition, our ability to finance our growth using these sources depends, in part, on our creditworthiness, the availability of credit to us or the market for our securities at the time or times we need capital. Uncertainty in the capital and credit markets might negatively affect our ability to access additional financing at reasonable terms, which might negatively affect our ability

to fund our long-term strategies and other business initiatives. See “Item 1A. Risk Factors—Risks Related to Our Indebtedness and Our Financing.”

OWNERSHIP STRUCTURE

We hold our interests in our portfolio of properties through our operating partnership, PREIT Associates. We are the sole general partner of PREIT Associates and, as of December 31, 2013, held a 97.0% controlling interest in PREIT Associates. We consolidate PREIT Associates for financial reporting purposes. We own our interests in our properties through various ownership structures, including partnerships and tenancy in common arrangements (collectively, “partnerships”). PREIT owns interests in some of these properties directly and has pledged the entire economic benefit of ownership to PREIT Associates. PREIT Associates’ direct or indirect economic interest in the properties ranges from 40% or 50% (for eight partnership properties) up to 100%. See “Item 2. Properties—Retail Properties.”

We provide our management, leasing and real estate development services through our subsidiaries PREIT Services, LLC (“PREIT Services”), which generally develops and manages properties that we consolidate for financial reporting purposes, and PRI, which generally develops and manages properties that we do not consolidate for financial reporting purposes, including properties in which we own interests through partnerships with third parties and properties that are owned by third parties in which we do not own an interest. PRI is a taxable REIT subsidiary, as defined by federal tax laws, which means that it is able to offer an expanded menu of services to tenants without jeopardizing our continuing qualification as a REIT under federal tax law.

COMPETITION

Competition in the retail real estate industry is intense. We compete with other public and private retail real estate companies, including companies that own or manage malls, power centers, strip centers, lifestyle centers, factory outlet centers, theme/festival centers and community centers, as well as other commercial real estate developers and real estate owners, particularly those with properties near our properties, on the basis of several factors, including location and rent charged. We compete with these companies to attract customers to our properties, as well as to attract anchor and in-line store and other tenants. We also compete to acquire land for new site development or to add to our existing properties. Our malls and our power and strip centers face competition from similar retail centers, including more recently developed or renovated centers that are near our retail properties. We also face competition from a variety of different retail formats, including internet retailers, discount or value retailers, home shopping networks, mail order operators, catalogs, and telemarketers. Our tenants face competition from companies at the same and other properties and from other retail channels or formats as well, including internet retailers. This competition could have a material adverse effect on our ability to lease space and on the amount of rent and expense reimbursements that we receive.

The existence or development of competing retail properties and the related increased competition for tenants might, subject to the terms and conditions of our Credit Agreements, lead us to make capital improvements to properties that we would have deferred or would not have otherwise planned to make and might affect occupancy and net operating income of such properties. Any such capital improvements, undertaken individually or collectively, would involve costs and expenses that could adversely affect our results of operations.

We compete with many other entities engaged in real estate investment activities for acquisitions of malls, other retail properties and prime development sites or sites adjacent to our properties, including institutional pension funds, other REITs and other owner-operators of retail properties. When we seek to make acquisitions, competitors might drive up the price we must pay for properties, parcels, other assets or other companies or might themselves succeed in acquiring those properties, parcels, assets or companies. In addition, our potential acquisition targets might find our competitors to be more attractive suitors if they have greater resources, are willing to pay more, or have a more compatible operating philosophy. In particular, larger REITs might enjoy significant competitive advantages that result from, among other things, a lower cost of capital, a better ability to raise capital, a better ability to finance an acquisition, and enhanced operating efficiencies. We might not succeed in acquiring retail properties or development sites that we seek, or, if we pay a higher price for a property or site, or generate lower cash flow from an acquired property or site than we expect, our investment returns will be reduced, which will adversely affect the value of our securities.

ENVIRONMENTAL

Under various federal, state and local laws, ordinances, regulations and case law, an owner, former owner or operator of real estate might be liable for the costs of removal or remediation of hazardous or toxic substances present at, on, under, in or released from its property, regardless of whether the owner, operator or other responsible party knew of or was at fault for the release or presence of hazardous or toxic substances. Contamination might adversely affect the owner's ability to sell or lease real estate or borrow with real estate as collateral. In connection with our ownership, operation, management, development and redevelopment of properties, or any other properties we acquire in the future, we might be liable under these laws and might incur costs in responding to these liabilities.

Each of our retail properties has been subjected to a Phase I or similar environmental audit (which involves a visual property inspection and a review of records, but not soil sampling or ground water analysis) by environmental consultants. These audits have not revealed, and we are not aware of, any environmental liability that we believe would have a material adverse effect on our results of operations. It is possible, however, that there are material environmental liabilities of which we are unaware.

We are aware of certain past environmental matters at some of our properties. We have, in the past, investigated and, where appropriate, performed remediation of such environmental matters, but we might be required in the future to perform testing relating to these matters and further remediation might be required, or we might incur liability as a result of such environmental matters. See "Item 1A. Risk Factors—We might incur costs to comply with environmental laws, which could have an adverse effect on our results of operations."

EMPLOYEES

We had 610 employees at our properties and in our corporate office as of December 31, 2013. None of our employees are represented by a labor union.

INSURANCE

We have comprehensive liability, fire, flood, terrorism, extended coverage and rental loss insurance that we believe is adequate and consistent with the level of coverage that is standard in our industry. We cannot assure you, however, that our insurance coverage will be adequate to protect against a loss of our invested capital or anticipated profits, or that we will be able to obtain adequate coverage at a reasonable cost in the future.

STATUS AS A REIT

We conduct our operations in a manner intended to maintain our qualification as a REIT under the Internal Revenue Code of 1986, as amended. Generally, as a REIT, we will not be subject to federal or state income taxes on our net taxable income that we currently distribute to our shareholders. Our qualification and taxation as a REIT depend on our ability to meet various qualification tests (including dividend distribution, asset ownership and income tests) and certain share ownership requirements prescribed in the Internal Revenue Code.

CORPORATE HEADQUARTERS

Our principal executive offices are located at The Bellevue, 200 South Broad Street, Philadelphia, Pennsylvania 19102.

SEASONALITY

There is seasonality in the retail real estate industry. Retail property leases often provide for the payment of all or a portion of rent based on a percentage of a tenant's sales revenue, or sales revenue over certain levels. Income from such rent is recorded only after the minimum sales levels have been met. The sales levels are often met in the fourth quarter, during the December holiday season. Also, many new and temporary leases are entered into later in the year in anticipation of the holiday season and a higher number of tenants vacate their space early in the year. As a result, our occupancy and cash flows are generally higher in the fourth quarter and lower in the first and second quarters. Our concentration in the retail sector increases our exposure to seasonality and has resulted, and is expected to continue to result, in a greater percentage of our cash flows being received in the fourth quarter.

AVAILABLE INFORMATION

We maintain a website with the address www.preit.com. We are not including or incorporating by reference the information contained on our website into this report. We make available on our website, free of charge and as soon as practicable after filing with the SEC, copies of our most recently filed Annual Report on Form 10-K, all Quarterly Reports on Form 10-Q and all Current Reports on Form 8-K filed during each year, including all amendments to these reports, if any. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to these reports are also available on the SEC's website at <http://www.sec.gov>. In addition, copies of our corporate governance guidelines, codes of business conduct and ethics (which include the code of ethics applicable to our chief executive officer, principal financial officer and principal accounting officer) and the governing charters for the audit, nominating and governance, and executive compensation and human resources committees of our Board of Trustees are available free of charge on our website, as well as in print to any shareholder upon request. The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. We intend to comply with the requirements of Item 5.05 of Form 8-K regarding amendments to and waivers under the code of business conduct and ethics applicable to our chief executive officer, principal financial officer and principal accounting officer by providing such information on our website within four days after effecting any amendment to, or granting any waiver under, that code, and we will maintain such information on our website for at least twelve months.

ITEM 1A. RISK FACTORS.

RISKS RELATED TO OUR INDEBTEDNESS AND OUR FINANCING

We have substantial debt and stated value of preferred shares outstanding, which could adversely affect our overall financial health and our operating flexibility. We require significant cash flows to satisfy our debt service and dividends on our preferred shares outstanding. These obligations may prevent us from using our cash flows for other purposes. If we are unable to satisfy these obligations, we might default on our debt or reduce, defer or suspend our dividend payments on preferred shares.

We use a substantial amount of debt and preferred shares outstanding to finance our business. As of December 31, 2013, we had an aggregate consolidated indebtedness of \$1,632.7 million, the majority of which represented mortgage loans secured by our properties. As of December 31, 2013, \$130.0 million was outstanding under the 2013 Revolving Facility. In 2013, we obtained new mortgage loans of \$154.7 million and we repaid \$403.7 million of existing mortgage loan debts. These aggregate debt amounts do not include our proportionate share of indebtedness of our partnership properties, which was \$198.5 million at December 31, 2013. Our consolidated debt represented 51.5% of our total market capitalization as of December 31, 2013. As of December 31, 2013, under the 2013 Revolving Facility, our ratio of Total Liabilities to Gross Asset Value was 48.36%. We also had outstanding, in aggregate, \$115.0 million of 8.25% Series A Preferred Shares and \$86.3 million of 7.375% Series B Preferred Shares. In January 2014, we entered into the 2014 Term Loans, pursuant to which we have borrowed \$130.0 million of the \$250.0 million available, which we used to pay off the \$130.0 million outstanding under the 2013 Revolving Facility. Our substantial indebtedness and preferred shares outstanding involve significant obligations for the payment of interest, principal and dividends. If we do not have sufficient cash flow from operations to meet these obligations, we might be forced to sell assets to generate cash, which might be on unfavorable terms, or we might not be able to make all required payments of principal and interest on our debt, which could result in a default or have a material adverse effect on our financial condition and results of operations, and which might adversely affect the value of our preferred shares or our common shares, or our ability to make distributions to shareholders.

Our substantial obligations arising from our indebtedness and preferred shares could also have other negative consequences to our shareholders, including the acceleration of a significant amount of our debt if we are not in compliance with the terms of such debt or, if such debt contains cross-default or cross-acceleration provisions, other debt. If we fail to meet our obligations under our debt and our preferred shares, we could lose assets due to foreclosure or sale on unfavorable terms, which could create taxable income without accompanying cash proceeds, or such failure could harm our ability to obtain additional financing in the future for working capital, capital expenditures, debt service requirements, acquisitions, redevelopment and development activities, execution of our business strategy or other general corporate purposes. Also, our indebtedness and mandated debt service might limit our ability to refinance existing debt or to do so at a reasonable cost, might make us more vulnerable to adverse economic and market conditions, might limit our ability to respond to competition or to take advantage of opportunities, and might discourage business partners from working with us or counterparties from entering into hedging transactions with us. In addition to our current debt, we might incur additional debt in the future in the form of mortgage loans, unsecured borrowings, additional borrowing under our 2013 Revolving Facility or 2014 Term Loans, other term loan borrowings or other financing vehicles, or issue additional preferred shares. We might do so in order to finance acquisitions, to develop or redevelop properties or for other general corporate purposes, subject to the terms and conditions of our 2013 Revolving Facility and 2014 Term Loans, which could exacerbate the risks set forth above.

If we are unable to comply with the covenants in our 2013 Revolving Facility and 2014 Term Loans (which are identical), we might be adversely affected.

The 2013 Revolving Facility and 2014 Term Loans (collectively, the "Credit Agreements") require us to satisfy certain customary affirmative and negative covenants and to meet numerous financial tests, including tests relating to our leverage, interest coverage, fixed charge coverage, tangible net worth, corporate debt yield and facility debt yield. We expect the current conditions in the economy and the retail industry to continue to affect our operating results. The leverage covenant in the Credit Agreements generally takes our net operating income and applies capitalization rates to calculate Gross Asset Value, and consequently, deterioration in our operating performance also affects the calculation of our leverage. In addition, a material decline in future operating results could affect our ability to comply with other financial ratio covenants contained in our Credit Agreements, which are calculated on a trailing four quarter basis. Also, we might be restricted in the amount we can borrow based on the Unencumbered Debt Yield covenant under the Credit Agreements. These covenants could restrict our ability to pursue acquisitions, redevelopment and development projects or limit our ability to respond to changes and competition, and reduce our flexibility in conducting our operations by limiting our ability to borrow money, sell or place liens on assets, manage our cash flows, repurchase securities, make capital expenditures or make distributions to shareholders.

An inability to comply with these covenants would require us to seek waivers or amendments. There is no assurance that we could obtain such waivers or amendments, and even if obtained, we would likely incur additional costs. Our inability to obtain any such waiver or amendment could result in a breach and a possible event of default under our Credit Agreements, which could allow the lenders to discontinue lending or issuing letters of credit, terminate any commitments they have made to provide us with additional funds, and/or declare amounts outstanding to be immediately due and payable. If a default were to occur, we might have to refinance the debt through secured or unsecured debt financing or private or public offerings of debt or equity securities. If we are unable to do so, we might have to liquidate assets, potentially on unfavorable terms. Any of such consequences could negatively affect our financial position, results of operations, cash flow and ability to make capital expenditures and distributions to shareholders.

We might not be able to refinance our existing obligations or obtain the capital required to finance our activities.

The REIT provisions of the Internal Revenue Code of 1986, as amended, generally require the distribution to shareholders of 90% of a REIT's net taxable income, excluding net capital gains, which generally leaves insufficient funds to finance major initiatives internally. Due to these requirements, and subject to the terms of the Credit Agreements, we generally fund certain capital requirements, such as the capital for renovations, expansions, redevelopments, other non-recurring capital improvements, scheduled debt maturities, and acquisitions of properties or other assets, through secured and unsecured indebtedness and, when available and market conditions are favorable, the issuance of additional equity securities.

As of December 31, 2013, we had \$334.7 million of indebtedness with initial maturities on or before December 31, 2015 at our consolidated properties. Also, subject to the terms and conditions of our Credit Agreements, we estimate that we will need \$20.8 million of additional capital to complete our current active development and redevelopment projects, excluding any project we undertake at The Gallery at Market East. Our ability to finance growth from financing sources depends, in part, on our creditworthiness, the availability of credit to us from financing sources, or the market for our debt, equity or equity-related securities when we need capital, and on conditions in the capital markets generally. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources" for information about our available sources of funds.

Much of our indebtedness does not require significant principal payments prior to maturity, and we might enter into agreements on similar terms in future transactions. If our mortgage loans and other debts cannot be repaid in full, refinanced or extended at maturity on acceptable terms, or at all, a lender could foreclose upon the mortgaged property and receive an assignment of rent and leases or pursue other remedies, or we might be forced to dispose of one or more of our properties on unfavorable terms, which could have a material adverse effect on our financial condition and results of operations and which might adversely affect our cash flow and our ability to make distributions to shareholders.

Conditions in the U.S. economy continue to be challenging, and might adversely affect our cash flows from operations.

The U.S. economy has continued to experience relatively slow job growth, and high unemployment and reduced or fluctuating business and consumer confidence and retail sales. These conditions have negatively affected consumer spending on retail goods. This lower demand has led to decreased operating performance of several retailer tenants, which has led to delays or deferred decisions regarding lease renewals and the openings of new retail stores at our properties, and has in some cases affected the ability of our current tenants to meet their obligations to us. This could adversely affect our ability to generate cash flows, meet our debt service requirements, comply with the covenants under our Credit Agreements, make capital expenditures and make distributions to shareholders. These conditions could also have a material adverse effect on our financial condition and results of operations.

Payments by our direct and indirect subsidiaries of dividends and distributions to us might be adversely affected by their obligations to make prior payments to the creditors of these subsidiaries.

We own substantially all of our assets through our interest in PREIT Associates. PREIT Associates holds substantially all of its properties and assets through subsidiaries, including subsidiary partnerships and limited liability companies, and derives substantially all of its cash flow from cash distributions to it by its subsidiaries. We, in turn, derive substantially all of our cash flow from cash distributions to us by PREIT Associates. Our direct and indirect subsidiaries must make payments on their obligations to their creditors when due and payable before they may make distributions to us. Thus, PREIT Associates' ability to make distributions to its partners, including us, depends on its subsidiaries' ability first to satisfy their obligations to their creditors. Similarly, our ability to pay dividends to holders of our shares depends on PREIT Associates' ability first to satisfy its obligations to its creditors before making distributions to us. If the subsidiaries were unable to make payments to their creditors when due and payable, or if the subsidiaries had insufficient funds both to make payments to creditors and distribute funds to PREIT Associates, we might not have sufficient cash to satisfy our obligations and/or make distributions to our shareholders.

In addition, we will only have the right to participate in any distribution of the assets of any of our direct or indirect subsidiaries upon the liquidation, reorganization or insolvency of such subsidiary after the claims of the creditors, including mortgage lenders and trade creditors, of that subsidiary are satisfied. Our shareholders, in turn, will have the right to participate in any distribution of our assets upon our liquidation, reorganization or insolvency only after the claims of our creditors, including trade creditors, are satisfied.

The profitability of each partnership we enter into with third parties that has short-term financing or debt requiring a balloon payment is dependent on the availability of long-term financing on satisfactory terms. If satisfactory long-term financing is not available, we might have to rely on other sources of short-term financing or equity contributions. Although these partnerships are not wholly-owned by us, we might be required to pay the full amount of any obligation of the partnership, or we might elect to pay all of the obligations of such a partnership to protect our equity interest in its properties and assets. This could cause us to utilize a substantial portion of our liquidity sources or funds from operations and could have a material adverse effect on our operating results and reduce amounts available for distribution to shareholders.

Some of our properties are owned or ground-leased by subsidiaries that we created solely to own or ground-lease those properties. The mortgaged properties and related assets are restricted solely for the payment of the related loans and are not available to pay our other debts, which could impair our ability to borrow, which in turn could have a material adverse effect on our operating results and reduce amounts available for distribution to shareholders.

Our hedging arrangements might not be successful in limiting our risk exposure, and we might incur expenses in connection with these arrangements or their termination that could harm our results of operations or financial condition.

In the normal course of business, we are exposed to financial market risks, including interest rate risk on our interest-bearing liabilities. We use interest rate hedging arrangements to manage our exposure to interest rate volatility, but these arrangements might expose us to additional risks, such as requiring that we fund our contractual payment obligations under such arrangements in relatively large amounts or on short notice. As of December 31, 2013, the aggregate fair value of our derivative instruments was an unrealized loss of \$0.1 million, which is expected to be subsequently reclassified into earnings in the period that the hedged forecasted transactions affect earnings. Developing an effective interest rate risk strategy is complex, and no strategy can completely insulate us from risks associated with interest rate fluctuations. We might enter into interest rate swaps as hedges in connection with forecasted debt transactions or payments, and if we repay such debt earlier than expected and are no longer obligated to make such payments, then we might determine that the swaps no longer meet the criteria for effective hedges, and we might incur gain or loss on such ineffectiveness. For the year ended December 31, 2013, we recorded a net loss on hedge ineffectiveness of \$3.4 million in connection with our early and anticipated early repayment of variable interest rate debt. We cannot assure you that our hedging activities will have a positive impact, and it is possible that our strategies could adversely affect our financial condition or results of operations. We might be subject to additional costs, such as transaction fees or breakage costs, if we terminate these arrangements.

We are subject to risks associated with increases in interest rates, including in connection with our variable interest rate debt.

As of December 31, 2013, we had \$380.7 million of indebtedness with variable interest rates, including the 2013 Revolving Facility. In January 2014, we entered into the 2014 Term Loans, which also carry variable interest rates, and have borrowed \$130.0 million of the available \$250.0 million. We have fixed the interest rates on substantially all of our variable rate debt using derivative instruments, including the 2014 Term Loans. We might incur additional variable rate debt in the future, through borrowings under the 2013 Revolving Facility, 2014 Term Loans or otherwise, and, if we do so, the proportion of our debt with variable interest rates might increase. See “Item 7A. Quantitative and Qualitative Disclosures About Market Risk.”

An increase in market interest rates applicable to the variable portion of the debt portfolio would increase the interest incurred and cash flows necessary to service such debt, subject to our hedging arrangements on such debt. This has and could, in the future, adversely affect our results of operations and our ability to make distributions to shareholders. Also, in coming years, as our current mortgage loans mature, if these mortgage loans are refinanced at higher interest rates than the rates in effect at the time of the prior loans, our interest expense in connection with debt secured by our properties will increase, and could adversely affect our results of operations and ability to make distributions to shareholders.

RISKS RELATED TO OUR BUSINESS AND OUR PROPERTIES

Changes in the retail industry, particularly among anchor tenant retailers, could adversely affect our results of operations and financial condition.

The income we generate depends in part on our anchor tenants' ability to attract customers to our properties and generate traffic, which affects the property's ability to attract non anchor tenants, and thus the revenue generated by the property. In recent years, in connection with economic conditions and other changes in the retail industry, including customers' use of smartphones and websites and the continued expansion of ecommerce generally, some anchor tenant retailers have experienced decreases in operating performance, and in response, they are contemplating strategic, operational and other changes. The strategic and operational changes being considered by anchor tenants include combinations and other consolidation designed to increase scale, leverage with suppliers like landlords, and other efficiencies, which might result in the restructuring of these companies, which could involve withdrawal from certain geographic areas, such as secondary or tertiary trade areas, or the closure or sale of stores operated by them. For example, in January 2014, jcpenny announced that it is closing 33 stores, including one in a mall in our portfolio (Exton Square Mall), following an attempted significant repositioning under the prior CEO. Also, in August 2013, Sears Holdings, whose brands include Sears and Kmart, closed the Sears store at New River Valley Mall, and in January 2014, announced that it is closing its Kmart store at The Gallery at Market East in the first half of 2014. We cannot assure you that there will not be additional store closings by jcpenny, or Sears and Kmart, or any other anchor tenant in the future, which could affect our results of operations, cash flows, and ability to make cash distributions. The closure of one or more anchor stores would have a negative effect on the affected properties, on our portfolio and on our results of operations, particularly if the affected properties are not classified as Class A malls. In addition, a lease termination by an anchor for any reason, a failure by an anchor to occupy the premises, or any other cessation of operations by an anchor could result in lease terminations or reductions in rent by other tenants of the same property whose leases permit cancellation or rent reduction (i.e., co-tenancy provisions) if an anchor's lease is terminated or the anchor otherwise ceases occupancy or operations. In that event, we might be unable to re-lease the vacated space of the anchor or non anchor stores in a timely manner, or at all. In addition, the leases of some anchors might permit the anchor to transfer its lease, including any attendant approval rights, to another retailer. The transfer to a new anchor could cause customer traffic in the property to decrease or to be composed of different types of customers, which could reduce the income generated by that property. A transfer of a lease to a new anchor also could allow other tenants to make reduced rental payments or to terminate their leases at the property, which could adversely affect our results of operations.

Approximately 39% of our non anchor leases and 16% of our anchor leases will expire in 2014 or 2015 or are in holdover status, and if we are unable to renew these leases or re-lease the space covered by these leases on equivalent terms, we might experience reduced occupancy and traffic at our properties and lower rental revenue, net operating income, cash flows and funds available for distributions.

The current conditions in the economy continue to negatively affect employment and have caused fluctuations and variations in retail sales, consumer confidence and consumer spending on retail goods. The weaker operating performance of certain retailers has resulted in delays or deferred decisions regarding the openings of new retail stores at some of our properties and regarding renewals of both anchor and non anchor leases.

In recent years, in connection with the factors described above, we frequently renewed or entered into leases with terms of one year, two years or three years, rather than the more typical five years or ten years. These shorter term leases enabled both the tenant and us, before entering into a longer term lease, to evaluate the advantages and disadvantages of a longer term lease at a later time in the economic cycle, at least in part with the view that there will be greater visibility into expected future conditions in the economy and expected future trends. As a result, we have higher percentages of such leases that are in holdover status or will expire in the next few years, including some leases with our top 20 tenants, and including both anchor and non anchor leases. See "Item 2. Properties—Retail Lease Expiration Schedule" and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Leasing Activity." We might not be successful in renewing the leases for, or re-leasing, the space covered by leases that are in holdover status or that are expiring in 2014 and 2015, or doing so on terms comparable to those of the expiring leases. If we are not successful, we will be likely to experience reduced

occupancy, traffic, rental revenue and net operating income, which could have a material adverse effect on our financial condition, results of operations and ability to make distributions to shareholders.

Expense reimbursements are relatively low and might continue to be relatively low. Also, operating expense amounts have increased and, in the future, are likely to continue to increase, reducing our cash flow and funds available for future distributions.

Our leases have historically provided that the tenant is liable for a portion of common area maintenance (“CAM”) costs, real estate taxes and other operating expenses. If these expenses increase, then under such provisions, the tenant’s portion of such expenses also increases. Our leases have begun to incorporate terms providing for fixed CAM or caps on the rate of annual

increases in CAM. In these cases, a tenant will pay a set or capped expense reimbursement amount, regardless of the actual amount of operating expenses. The tenant's payment remains the same even if operating expenses increase, causing us to be responsible for the excess amount. To the extent that existing leases, new leases or renewals of leases do not require a pro rata contribution from tenants, and to the extent that any new fixed CAM provision sets an amount below actual expense levels, we are liable for the cost of such expenses in excess of the portion paid by tenants, if any. This has and could, in the future, adversely affect our net effective rent, our results of operations and our ability to make distributions to shareholders. Further, if a property is not fully occupied, as it typically is not, we would be required to pay the portion of the expenses allocable to the vacant space that is otherwise typically paid by our tenants, which would adversely affect our results of operations and our ability to make distributions to shareholders.

Our properties are also subject to the risk of increases in CAM and other operating expenses, which typically include real estate taxes, energy and other utility costs, repairs, maintenance on and capital improvements to common areas, security, housekeeping, property and liability insurance and administrative costs. For example, municipalities might seek to raise real estate taxes paid by our property in their jurisdiction because of their strained budgets, our recent redevelopment of such property or for other reasons. In 2013, real estate taxes on our properties in New Jersey increased by a material amount. In some cases, our mall might be the largest single taxpayer in a jurisdiction, which could make real estate tax increases significant to us. If operating expenses increase, the availability of other comparable retail space in our specific geographic markets might limit our ability to pass these increases through to tenants, or, if we do pass all or a part of these increases on, might lead tenants to seek retail space elsewhere, which, in either case, could adversely affect our results of operations and limit our ability to make distributions to shareholders. The valuation and accounting treatment of certain long-lived assets, such as real estate, or of intangible assets, such as goodwill, could result in future asset impairments, which would be recorded as operating losses.

Real estate investments and related intangible assets are reviewed for impairment whenever events or changes in circumstances, such as a decrease in net operating income, the loss of an anchor tenant or an agreement of sale at a price below book value, indicate that the carrying amount of the property might not be recoverable. An operating property to be held and used is considered impaired only if management's estimate of the aggregate future cash flows to be generated by the property, undiscounted and without interest charges, is less than the carrying value of the property. In addition, this estimate may consider a probability weighted cash flow estimation approach when alternative courses of action to recover the carrying amount of a long-lived asset are under consideration or when a range of possible values is estimated. This estimate takes into consideration factors such as expected future net operating income, trends and prospects, and upcoming lease maturities, as well as the effects of demand, competition and other factors. The current conditions in the economy have negatively affected retail sales, employment and consumer spending on retail goods. We have set our estimates of future cash flows generated by our properties accordingly, and these factors might cause changes in our estimates in the future. If we find that the carrying value of real estate investments and related intangible assets has been impaired, as we did in 2013, 2012, and 2011, we will recognize impairment with respect to such assets. Applicable accounting principles require that goodwill and certain intangible assets be tested annually for impairment or earlier upon the occurrence of certain events or substantive changes in circumstances. If we find that the carrying value of goodwill or certain intangible assets exceeds estimated fair value, we will reduce the carrying value of the real estate investment or goodwill or intangible asset to the estimated fair value, and we will recognize impairment with respect to such investments or goodwill or intangible assets.

Impairment of long-lived assets is required to be recorded as a noncash operating expense. Our 2013, 2012 and 2011 impairment analyses resulted in noncash impairment charges on long lived assets of \$30.0 million, \$3.8 million and \$52.3 million, respectively, and, as a result, the carrying values of our impaired assets were reset to their estimated fair values as of the respective dates on which the impairments were recognized. Any further decline in the estimated fair values of these assets could result in additional impairment charges. It is possible that such impairments, if required, could be material. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies—Asset Impairment."

Any store closings, leasing delays, lease terminations, tenant financial difficulties or tenant bankruptcies we encounter could adversely affect our financial condition and results of operations.

We receive a substantial portion of our operating income as rent under leases with tenants. At any time, any tenant having space in one or more of our properties could experience a downturn in its business that might weaken its financial condition. Such tenants might enter into or renew leases with relatively shorter terms. Such tenants might also defer or fail to make rental payments when due, delay or defer lease commencement, voluntarily vacate the premises or declare bankruptcy, which could result in the termination of the tenant's lease, or preclude the collection of rent in connection with the space for a period of time, and could result in material losses to us and harm to our results of operations. Also, it might take time to terminate leases of underperforming or nonperforming tenants, and we might incur costs to remove such tenants. Some of our tenants occupy

stores at multiple locations in our portfolio, and so the effect of any bankruptcy or store closing of those tenants might be more significant to us than the bankruptcy or store closings of other tenants. See “Item 2. Properties—Major Tenants.” In addition, under many of our leases, our tenants pay rent based, in whole or in part, on a percentage of their sales. See “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Real Estate Revenue.” Accordingly, declines in these tenants’ sales directly affect our results of operations. Also, if tenants are unable to comply with the terms of our leases, or otherwise seek changes to the terms, including changes to the amount of rent, we might modify lease terms in ways that are less favorable to us.

If a tenant files for bankruptcy, the tenant might have the right to reject and terminate its leases, and we cannot be sure that it will affirm its leases and continue to make rental payments in a timely manner. A bankruptcy filing by, or relating to, one of our tenants would bar all efforts by us to collect pre-bankruptcy debts from that tenant, or from their property, unless we receive an order permitting us to do so from the bankruptcy court. In addition, we cannot evict a tenant solely because of its bankruptcy. If a lease is assumed by the tenant in bankruptcy, all pre-bankruptcy balances due under the lease must be paid to us in full. However, if a lease is rejected by a tenant in bankruptcy, we would have only a general unsecured claim for damages in connection with such balances. If a bankrupt tenant vacates a space, it might not do so in a timely manner, and we might be unable to re-lease the vacated space during that time, or at all. In addition, such a scenario with one tenant could result in lease terminations or reductions in rent by other tenants of the same property whose leases have co-tenancy provisions. These other tenants might seek changes to the terms of their leases, including changes to the amount of rent. Any unsecured claim we hold against a bankrupt tenant might be paid only to the extent that funds are available and only in the same percentage as is paid to all other holders of unsecured claims, and there are restrictions under bankruptcy laws that limit the amount of the claim we can make if a lease is rejected. As a result, it is likely that we would recover substantially less than the full value of any unsecured claims we hold, which would adversely affect our financial condition and results of operations. In some instances retailers that have sought protection from creditors under bankruptcy law have had difficulty in obtaining debtor-in-possession financing, which has decreased the likelihood that such retailers will emerge from bankruptcy protection and has limited their alternatives. Tenant bankruptcies and liquidations have adversely affected, and are likely in the future to adversely affect, our financial condition and results of operations.

The investments we have made in redeveloping older properties and developing new properties could be subject to delays or other risks and might not yield the returns we anticipate, which would harm our financial condition and operating results.

Before 2011, we completed construction at the properties in our recent major redevelopment program. Currently, we are planning or engaged in redevelopment projects at a few of our properties, including The Gallery at Market East, which is a significant project. We are also engaged in various early stage development steps at three mixed use and other projects, although we do not expect to make material investments in these projects in the short term, except some amounts that we expect will be reimbursed. To the extent we continue current redevelopment or development projects or enter into new redevelopment or development projects in the longer term, they will be subject to a number of risks that could negatively affect our return on investment, financial condition, results of operations and our ability to make distributions to shareholders, including, among others:

- delayed ability or inability to reach projected occupancy, rental rates, profitability, and investment return;
- timing delays due to tenant decision delays and other factors outside our control, which might make a project less profitable or unprofitable, or delay profitability;
- expenditure of money and time on projects that might be significantly delayed before stabilization.

Some of our retail properties were constructed or last renovated more than 10 years ago. Older, unrenovated properties tend to generate lower rent and might require significant expense for maintenance or renovations to maintain competitiveness, which, if incurred, could harm our results of operations. Subject to the terms and conditions of our Credit Agreements, as a key component of our growth strategy, we plan to continue to redevelop existing properties and develop new properties, and we might develop or redevelop other projects as opportunities arise. These plans are

subject to then-prevailing economic, capital market and retail industry conditions.

We might elect not to proceed with certain development projects after they are begun. In general, when we elect not to proceed with a project, development costs for such a project will be expensed in the then-current period. The accelerated recognition of these expenses could have a material adverse effect on our results of operations for the period in which the expenses are recognized.

Online shopping and other uses of smartphones and other technology could affect the business models and viability of retailers, which could, in turn, affect their demand for retail real estate.

Online retailing and shopping and the use of technology to aid purchase decisions have increased in recent years, and are expected to continue to increase in the future. Also, small businesses and specialty retailers, who have previously been limited to marketing and selling their products within their immediate geographical area, are now able to reach a broader group of consumers and compete with a broader group of retailers, including the retailers at our properties. In certain categories, such as books, music and electronics, online retailing has become a significant proportion of total sales, and has affected retailers in those categories significantly. The information available online empowers consumers with knowledge about products and information about prices and other offers in a different way than is available in a single physical store with sales associates. Consumers are able to compare more products than are typically found in a single retail location, and they are able to read product reviews and to compare product features and pricing. In addition, retailers have recently begun to experience the phenomenon of customers, who are physically present in their stores to evaluate merchandise, checking competitors' product offerings and prices while in their stores using technology, including smart phones. Some tenants utilize our shopping centers as showrooms or as part of an omni-channel strategy (allowing for customers to shop online or in stores and for order fulfillment to take place in stores or via shipping). In this model, customers may make purchases during or immediately after visiting our malls, with such sales not currently being captured in our tenant sales figures or monetized in our minimum or percentage rents.

Online shopping and technology, such as smartphone applications, might affect the business models, sales and profitability of retailers, which might, in turn, affect the demand for retail real estate, occupancy at our properties and the amount of rent that we receive. Any resulting decreases in rental revenue could have a material adverse effect on our financial condition, results of operations and ability to make distributions to shareholders.

There is a concentration of our retail properties in the Eastern United States, particularly in the Mid-Atlantic region, and adverse market conditions in that region might affect the ability of our tenants to make lease payments and the interest of prospective tenants to enter into leases, which might reduce the amount of revenue generated by our properties.

Our retail properties are concentrated in the Eastern United States, particularly in the Mid-Atlantic region, including a number of properties in the Philadelphia, Pennsylvania metropolitan area. To the extent adverse conditions affecting retail properties, such as economic conditions, population trends and changing demographics, availability and costs of financing, construction costs, income, sales and property tax laws, and weather conditions, are particularly adverse in Pennsylvania, New Jersey or in the Mid-Atlantic region more broadly, as the weather conditions have been during the winter of 2013-2014, our results of operations will be affected to a greater degree than companies that do not have a concentration in this region. If the sales of stores operating at our properties were to decline significantly due to adverse regional conditions, the risk that our tenants, including anchors, will be unable to fulfill the terms of their leases to pay rent or will enter into bankruptcy might increase. Furthermore, such adverse regional conditions might affect the likelihood or timing of lease commitments by new tenants or lease renewals by existing tenants as such parties delay their leasing decisions in order to obtain the most current information about trends in their businesses or industries. If, as a result of prolonged adverse regional conditions, occupancy at our properties decreases or our properties do not generate sufficient revenue to meet our operating and other expenses, including debt service, our financial position, results of operations, cash flow and ability to make distributions to shareholders would be adversely affected.

We have invested and expect to invest in the future in partnerships with third parties to acquire or develop properties, and we might not control the management, redevelopment or disposition of these properties, or we might be exposed to other risks.

We have invested and expect to invest in the future as a partner with third parties in the acquisition or ownership of existing properties or the development of new properties, in contrast to acquiring or owning properties or developing projects by ourselves. Entering into partnerships with third parties involves risks not present where we act alone, in that we might not have primary control over the acquisition, development, redevelopment, financing, leasing, management, budgeting and other aspects of the property or project. These limitations might adversely affect our

ability to develop, redevelop or sell these properties at the most advantageous time for us. Also, there might be restrictive provisions and rights that apply to sales or transfers of interests in our partnership properties, which might require us to make decisions about buying or selling interests at a disadvantageous time.

Some of our retail properties are owned by partnerships in which we are a general partner. Under the terms of those partnership agreements, major decisions, such as a sale, lease, refinancing, redevelopment, expansion or rehabilitation of a property, or a change of property manager, require the consent of all partners. Accordingly, because decisions must be unanimous, necessary

actions might be delayed significantly and it might be difficult or even impossible to remove a partner that is serving as the property manager. We might not be able to favorably resolve any conflicts which arise with respect to such decisions, or we might be required to provide financial or other inducements to our partners to obtain a resolution. In cases where we are not the controlling partner or where we are only one of the general partners, there are many decisions that do not relate to fundamental matters that do not require our approval and that we do not control. Also, in cases in which we serve as managing general partner of the partnership that owns the property, we might have certain fiduciary responsibilities to the other partners in those partnerships.

Business disagreements with partners might arise. We might incur substantial expenses in resolving these disputes. To preserve our investment, we might be required to make commitments to or on behalf of a partnership during a dispute that might not be credited or repaid in full. Moreover, we cannot assure you that our resolution of a dispute with a partner will be on terms that are favorable to us.

Other risks of investments in partnerships with third parties include:

- partners might become bankrupt or fail to fund their share of required capital contributions, which might inhibit our ability to make important decisions in a timely fashion or necessitate our funding their share to preserve our investment, which might be at a disadvantageous time or in a significant amount;
- partners might have business interests or goals that are inconsistent with our business interests or goals;
- partners might be in a position to take action contrary to our policies or objectives;
- we might incur liability for the actions of our partners; and
- third-party managers might not be sensitive to publicly-traded company or REIT tax compliance matters.

The retail real estate industry is highly competitive, and this competition could harm our ability to operate profitably. Competition in the retail real estate industry is intense. We compete with other public and private retail real estate companies, including companies that own or manage malls, power centers, strip centers, lifestyle centers, factory outlet centers, theme/festival centers and community centers, as well as other commercial real estate developers and real estate owners, particularly those with properties near our properties, on the basis of several factors, including location and rent charged. We compete with these companies to attract customers to our properties, as well as to attract anchor, non anchor and other tenants. We also compete to acquire land for new site development or to add to our existing properties. Our properties face competition from similar retail centers, including more recently developed or renovated centers that are near our retail properties. We also face competition from a variety of different retail formats, including internet retailers, discount or value retailers, home shopping networks, mail order operators, catalogs, and telemarketers. Our tenants face competition from companies at the same and other properties and from other retail formats as well, including online retailers. This competition could have a material adverse effect on our ability to lease space and on the amount of rent and expense reimbursements that we receive.

The existence or development of competing retail properties and the related increased competition for tenants might, subject to the terms and conditions of our Credit Agreements, require us to make capital improvements to properties that we would have deferred or would not have otherwise planned to make, and might affect the occupancy and net operating income of such properties. Any such capital improvements, undertaken individually or collectively, would involve costs and expenses that could adversely affect our results of operations.

We might be unable to effectively manage any redevelopment and development projects involving a mix of uses, which could affect our financial condition and results of operations.

The complex nature of redevelopment and development projects calls for substantial management time, attention and skill. Some of our redevelopment and development projects currently, and in the future, might involve mixed uses of the properties, including residential, office and other uses. We might not have all of the necessary or desirable skill sets to manage such projects. If a development project includes a non-retail use, we might seek to sell the rights to that component to a third-party developer with experience in that use, or we might seek to partner with such a developer. If we are not able to sell the rights to, or partner with, such a developer, or if we choose to develop the other component ourselves, we would be exposed not only to those risks typically associated with the development of commercial real

estate generally, and of retail real estate, but also to specific risks associated with the development, ownership and property management of non-retail real estate, such as the demand for residential or office space of the types to be developed and the effects of general economic conditions on such property types, as opposed to the effects on retail real estate, with which we are more familiar. In addition, even if we sell the rights to develop the other component or elect to participate in the development through a partnership, we might be exposed to the risks associated with the failure of the other party to complete the development as expected. These include the risk that the other party would default on its obligations, necessitating that we complete the other component ourselves (including providing any necessary financing). The lack of sufficient management resources, or of the necessary skill sets to execute our plans, or the

failure of a partner in connection with a joint, mixed-use development, could delay or prevent us from realizing our expectations with respect to any such projects and could adversely affect our results of operations and financial condition.

We face competition for the acquisition of properties, development sites and other assets, which might impede our ability to make future acquisitions or might increase the cost of these acquisitions.

We compete with many other entities engaged in real estate investment activities for acquisitions of malls, other retail properties and other prime development sites or sites adjacent to our properties, including institutional pension funds, other REITs and other owner-operators of retail properties. Our efforts to compete for acquisitions are also subject to the terms and conditions of our Credit Agreements. When we seek to make acquisitions, competitors might drive up the price we must pay for properties, parcels, other assets or other companies, or might themselves succeed in acquiring those properties, parcels, assets or companies. In addition, our potential acquisition targets might find our competitors to be more attractive suitors if they have greater resources, are willing to pay more, or have a more compatible operating philosophy. In particular, larger REITs might enjoy significant competitive advantages that result from, among other things, a lower cost of capital, a better ability to raise capital, a better ability to finance an acquisition, and enhanced operating efficiencies. We might not succeed in acquiring retail properties or development sites that we seek, or, if we pay a higher price for a property or site, or generate lower cash flow from an acquired property or site than we expect, our investment returns will be reduced, which will adversely affect the value of our securities.

We might not be successful in identifying suitable acquisitions that meet the criteria we apply, given economic, market or other circumstances, which might impede our growth.

Acquisitions of retail properties have historically been an important component of our growth strategy. Expanding by acquisitions requires us to identify suitable acquisition candidates or investment opportunities that meet the criteria we apply, given economic, market or other circumstances, and that are compatible with our growth strategy. We must also typically obtain financing on terms that are acceptable to us. See “Item 1A. Risk Factors—Risks Related to Our Indebtedness and Our Financing.” We analyze potential acquisitions on a property-by-property and market-by-market basis. We might not be successful in identifying suitable properties or other assets in our existing geographic markets or in markets new to us that meet the acquisition criteria we apply, given economic, market or other circumstances, in financing such properties or other assets or in consummating acquisitions or investments on satisfactory terms. In connection with prospective acquisitions, we generally conduct a due diligence review of the target property or portfolio or investment. While the process of due diligence is intended to provide us with an independent basis to evaluate a prospective acquisition, in some cases we might be given limited time or be given limited materials to review, or pertinent facts might not be adequately uncovered. In such cases, the decision of whether to pursue acquiring the property or portfolio might be based on insufficient, incomplete or inaccurate information, which might lead us to make acquisitions that might have additional or larger issues than we anticipated. If so, these issues might reduce the returns on our investment and affect our financial condition and results of operations. An inability to successfully identify, consummate or finance acquisitions could reduce the number of acquisitions we complete and impede our growth, which could adversely affect our results of operations.

We might be unable to integrate effectively any additional properties we might acquire, which might result in disruptions to our business and additional expense.

Subject to the terms and conditions of our Credit Agreements, to the extent that we pursue acquisitions of additional properties or portfolios of properties that meet the investment criteria we apply, given economic, market and other circumstances, we might not be able to adapt our management and operational systems to effectively manage any such acquired properties or portfolios.

Specific risks for our ongoing operations posed by acquisitions we have completed or that we might complete in the future include:

- we might not achieve the expected value-creation potential, operating efficiencies, economies of scale or other benefits of such transactions;

- we might not have adequate personnel, personnel with necessary skill sets or financial and other resources to successfully handle our increased operations;
- we might not be successful in leasing space in acquired properties or renewing leases of existing tenants after our acquisition of the property;
- the combined portfolio might not perform at the level we anticipate;
- the additional property or portfolio might require excessive time and financial resources to make necessary improvements or renovations and might divert the attention of management away from our other operations;

- we might experience difficulties and incur unforeseen expenses in connection with assimilating and retaining employees working at acquired properties, and in assimilating any acquired properties;

- we might experience problems and incur unforeseen expenses in connection with upgrading and expanding our systems and processes to incorporate any such acquisitions; and

- we might incur unexpected liabilities in connection with the properties and businesses we acquire.

If we fail to successfully integrate any properties, portfolios, assets or companies we acquire, or fail to effectively handle our increased operations or to realize the intended benefits of any such transactions, our financial condition and results of operations, and our ability to make distributions to shareholders, might be adversely affected.

Our business could be harmed if members of our senior management team terminate their employment with us or otherwise are unable to continue in their current capacity.

Our future success depends, to a meaningful extent, upon the continued services of Ronald Rubin, our executive chairman, and Joseph F. Coradino, our chief executive officer, and the services of our corporate management team. These executives have substantial experience in managing, developing and acquiring retail real estate. Although we have entered into employment agreements with Joseph F. Coradino and Ronald Rubin and certain other members of our corporate management team, they could elect to terminate those agreements at any time. The loss of services of one or more members of our corporate management team could harm our business and our prospects.

If we suffer losses that are not covered by insurance or that are in excess of our insurance coverage limits, we could lose invested capital and anticipated profits.

There are some types of losses, including those of a catastrophic nature, such as losses due to wars, earthquakes, floods, hurricanes, pollution, environmental matters, information technology system failures and lease and contract claims, that are generally uninsurable or not economically insurable, or might be subject to insurance coverage limitations, including large deductibles or co-payments or caps on coverage amounts. Under federal terrorism risk insurance legislation, the United States government provides reinsurance coverage to insurance companies following a declared terrorism event. The legislation's intent is to reinsure declared events of terrorism that cause more than \$100.0 million in damages or losses. The current legislation expires at the end of 2014, and if it is not extended, the government's reinsurance for such events could be terminated. There is a generally similar program relating to flood insurance. If either or both of these programs were no longer in effect, it might become prohibitively expensive, or impossible, to obtain insurance that covers damages or losses from those types of events. Tenants might also encounter difficulty obtaining coverage.

If one of these events occurred to, or caused the destruction of, one or more of our properties, we could lose both our invested capital and anticipated profits from that property. We also might remain obligated for any mortgage loan or other financial obligation related to the property. In addition, if we are unable to obtain insurance in the future at acceptable levels and at a reasonable cost, the possibility of losses in excess of our insurance coverage might increase and we might not be able to comply with covenants under our debt agreements, which could adversely affect our financial condition. If any of our properties were to experience a significant, uninsured loss, it could seriously disrupt our operations, delay our receipt of revenue and result in large expense to repair or rebuild the property. These types of events could adversely affect our cash flow, results of operations and ability to make distributions to shareholders. We might incur costs to comply with environmental laws, which could have an adverse effect on our results of operations.

Under various federal, state and local laws, ordinances, regulations and case law, an owner, former owner or operator of real estate might be liable for the costs of removal or remediation of hazardous or toxic substances present at, on, under, in or released from its property, regardless of whether the owner, operator or other responsible party knew of or was at fault for the release or presence of hazardous or toxic substances. The responsible party also might be liable to the government or to third parties for substantial property damage and investigation and cleanup costs. Even if more than one person might have been responsible for the contamination, each person covered by the environmental laws might be held responsible for all of the clean-up costs incurred. In addition, some environmental laws create a lien on the contaminated site in favor of the government for damages and costs the government incurs in connection with the contamination. Contamination might adversely affect the owner's ability to sell or lease real estate or borrow with that

real estate as collateral. In connection with our ownership, operation, management, development and redevelopment of properties, or any other properties we acquire in the future, we might be liable under these laws and might incur costs in responding to these liabilities.

We are aware of certain environmental matters at some of our properties. We have, in the past, investigated and, where appropriate, performed remediation of such environmental matters, but we might be required in the future to perform testing

relating to these matters and further remediation might be required, or we might incur liability as a result of such environmental matters. Environmental matters at our properties include the following:

Asbestos. Asbestos-containing materials are present at a number of our properties, primarily in the form of floor tiles, mastics, roofing materials and adhesives. Fire-proofing material containing asbestos is present at some of our properties in limited concentrations or in limited areas. Under applicable laws and practices, asbestos-containing material in good, non-friable condition are allowed to be present, although removal might be required in certain circumstances. In particular, in the course of any redevelopment, renovation, construction or build out of tenant space, asbestos-containing materials are generally removed.

Underground and Above Ground Storage Tanks. Underground and above ground storage tanks are or were present at some of our properties. These tanks were used to store waste oils or other petroleum products primarily related to the operation of automobile service center establishments at those properties. In some cases, the underground storage tanks have been abandoned in place, filled in with inert materials or removed and replaced with above ground tanks. Some of these tanks might have leaked into the soil, leading to ground water and soil contamination. Where leakage has occurred, we might incur investigation, remediation and monitoring costs if responsible current or former tenants, or other responsible parties, are unavailable to pay such costs.

Ground Water and Soil Contamination. Ground water contamination has been found at some properties in which we currently or formerly had an interest. At some properties, dry cleaning operations, which might have used solvents, contributed to ground water and soil contamination.

Each of our retail properties has been subjected to a Phase I or similar environmental audit (which involves a visual property inspection and a review of records, but not soil sampling or ground water analysis) by environmental consultants. These audits have not revealed, and we are not aware of, any environmental liability that we believe would have a material adverse effect on our results of operations. It is possible, however, that there are material environmental liabilities of which we are unaware. Also, we cannot assure you that future laws will not impose any material environmental liability, or that the current environmental condition of our properties will not be affected by the operations of our tenants, by the existing condition of the land, by operations in the vicinity of the properties (such as the presence of underground storage tanks) or by the activities of unrelated third parties.

We have environmental liability insurance coverage for the types of environmental liabilities described above, which currently covers liability for pollution and on-site remediation of up to \$10.0 million per occurrence and \$20.0 million in the aggregate. We cannot assure you that this coverage will be adequate to cover future environmental liabilities. If this environmental coverage were inadequate, we would be obligated to fund those liabilities. We might be unable to continue to obtain insurance for environmental matters, at a reasonable cost or at all, in the future.

In addition to the costs of remediation, we might incur additional costs to comply with federal, state and local laws relating to environmental protection and human health and safety generally. There are also various federal, state and local fire, health, life-safety and similar regulations that might be applicable to our operations and that might subject us to liability in the form of fines or damages for noncompliance. The cost described above, individually or in the aggregate, could adversely affect our results of operations.

Inflation may adversely affect our financial condition and results of operations.

Inflationary price increases could have an adverse effect on consumer spending, which could impact our tenants' sales and, in turn, our tenants' business operations. This could affect the amount of rent these tenants pay, including if their leases provide for percentage rent or percentage of sales rent, and their ability to pay rent. Also, inflation could cause increases in operating expenses, which could increase occupancy costs for tenants and, to the extent that we are unable to recover operating expenses from tenants, could increase operating expenses for us. In addition, if the rate of inflation exceeds the scheduled rent increases included in our leases, then our net operating income and our profitability would decrease. Inflation could also result in increases in market interest rates, which would increase the borrowing costs associated with our existing or any future variable rate debt.

RISKS RELATED TO THE REAL ESTATE INDUSTRY

Acts of violence or war or other terrorist activity, including at our properties, could adversely affect our financial condition and results of operations.

Violent activities or terrorist or other attacks could directly affect the value of our properties as a result of casualties or through property damage, destruction or loss, or by making shoppers afraid to patronize such properties. The availability of insurance for such acts, or of insurance generally, might decrease, or cost more, which could increase our operating expenses and

adversely affect our financial condition and results of operations. Future acts of violence or terrorist attacks in the United States might result in declining economic activity, which could harm the demand for goods and services offered by our tenants and the value of our properties, and might adversely affect the value of an investment in our securities. Such a decrease in retail demand could make it difficult for us to renew leases or enter into new leases at our properties at lease rates equal to or above historical rates. To the extent that our tenants are directly or indirectly affected by future attacks, their businesses similarly could be adversely affected, including their ability to continue to meet obligations under their existing leases. Customers of the tenants at an affected property, and at other properties, might be less inclined to shop at an affected location or at a retail property generally. Such acts might erode business and consumer confidence and spending, and might result in increased volatility in national and international financial markets and economies. Any such acts could decrease demand for retail goods or real estate, decrease or delay the occupancy of our properties, and limit our access to capital or increase our cost of raising capital.

The illiquidity of real estate investments might delay or prevent us from selling properties that we determine no longer meet the strategic and financial criteria we apply and could significantly affect our ability to respond in a timely manner to adverse changes in the performance of our properties and harm our financial condition.

Substantially all of our assets consist of investments in real properties. We review all of the assets in our portfolio regularly and we make determinations about which assets have growth potential and which properties do not meet the strategic or financial criteria we apply and should be divested. We consider a few properties as “non-core” and intend to dispose of them. In 2013, we sold three mall properties and three power and strip center properties. Because real estate investments are relatively illiquid, our ability to quickly sell one or more properties in our portfolio in response to our evaluation or to changing economic and financial conditions is limited, particularly given current economic and retail industry conditions. The real estate market is affected by many factors that are beyond our control, such as general economic conditions, the availability of financing, interest rates, and the supply and demand for space. We cannot predict whether we will be able to sell any property for the price or on the terms we set, or whether any price or other terms offered by a prospective purchaser would be acceptable to us. The number of prospective buyers interested in purchasing malls is limited. We also cannot predict the length of time needed to find a willing purchaser and to close the sale of a property. In addition, current economic conditions might make it more difficult for us to sell properties or might adversely affect the price we receive for properties that we do sell, as prospective buyers might experience increased costs of debt financing or other difficulties in obtaining debt financing. There are also limitations under federal income tax laws applicable to REITs that could limit our ability to sell assets. Therefore, if we want to sell one or more of our properties, we might not be able to make such dispositions in the desired time period, or at all, and might receive less consideration than we seek or than we originally invested in the property.

Before a property can be sold, we might be required to make expenditures to correct defects or to make improvements. We cannot assure you that we will have funds available to correct those defects or to make those improvements, and if we cannot do so, we might not be able to sell the property, or might be required to sell the property on unfavorable terms. In acquiring a property, we might agree with the sellers or others to provisions that materially restrict us from selling that property for a period of time or impose other restrictions, such as limitations on the amount of debt that can be placed or repaid on that property. These factors and any others that would impede our ability to respond to adverse changes in the performance of our properties could significantly harm our financial condition and results of operations.

We are subject to risks that affect the retail real estate environment generally.

Our business focuses on retail real estate, predominantly malls. As such, we are subject to certain risks that can affect the ability of our retail properties to generate sufficient revenue to meet our operating and other expenses, including debt service, to make capital expenditures and to make distributions to our shareholders, subject to the terms and conditions of our Credit Agreements. Currently, we face continuing challenges because the conditions in the economy have reduced employment and have caused fluctuations and variations in retail sales and in business and consumer confidence and consumer spending on retail goods. In general, a number of factors can negatively affect the income generated by a retail property or the value of a property, including: a downturn in the national, regional or local

economy; a decrease in employment or consumer confidence or spending; increases in operating costs, such as common area maintenance, real estate taxes, utility rates and insurance premiums; higher energy or fuel costs resulting from adverse weather conditions, natural disasters, geopolitical concerns, terrorist activities and other factors; changes in interest rate levels and the cost and availability of financing; a weakening of local real estate conditions, such as an oversupply of, or a reduction in demand for, retail space or retail goods, and the availability and creditworthiness of current and prospective tenants; trends in the retail industry; seasonality; changes in perceptions by retailers or shoppers of the safety, convenience and attractiveness of a retail property; perceived changes in the convenience and quality of competing retail properties and other retailing options such as internet retailers or other strategies, such as using smartphones or other technologies to determine where to make and assist in making purchases; and changes in laws and regulations applicable to real property, including tax and zoning laws. Changes in one or more of these factors can

lead to a decrease in the revenue or income generated by our properties and can have a material adverse effect on our financial condition and results of operations.

RISKS RELATING TO OUR ORGANIZATION AND STRUCTURE

Our organizational documents contain provisions that might discourage a takeover of us and depress our share price. Our organizational documents contain provisions that might have an anti-takeover effect and might inhibit a change in our management and the opportunity to realize a premium over the then-prevailing market price of our securities. These provisions include:

(1) There are ownership limits and restrictions on transferability in our trust agreement. In order to protect our status as a REIT, no more than 50% of the value of our outstanding shares (after taking into account options to acquire shares) may be owned, directly or constructively, by five or fewer individuals (as defined in the Internal Revenue Code of 1986, as amended), and the shares must be beneficially owned by 100 or more persons during at least 335 days of a taxable year of 12 months or during a proportionate part of a shorter taxable year. To assist us in satisfying these tests, subject to some exceptions, our trust agreement prohibits any shareholder from owning more than 9.9% of our outstanding shares of beneficial interest (exclusive of preferred shares) or more than 9.9% of any class or series of preferred shares. The trust agreement also prohibits transfers of shares that would cause a shareholder to exceed the 9.9% limit or cause our shares to be beneficially owned by fewer than 100 persons. Our Board of Trustees may exempt a person from the 9.9% ownership limit if it receives a ruling from the Internal Revenue Service or an opinion of counsel or tax accountants that exceeding the 9.9% ownership limit as to that person would not jeopardize our tax status as a REIT. Absent an exemption, this restriction might discourage, delay or prevent a tender offer or other transaction or a change in control of management that might involve a premium price for our shares or otherwise be in the best interests of our shareholders; or compel a shareholder who had acquired more than 9.9% of our shares to transfer the additional shares to a trust and, as a result, to forfeit the benefits of owning the additional shares.

(2) Our trust agreement permits our Board of Trustees to issue preferred shares with terms that might discourage a third party from acquiring the Company. Our trust agreement permits our Board of Trustees to create and issue multiple classes and series of preferred shares, and classes and series of preferred shares having preferences to the existing shares on any matter, without a vote of shareholders, including preferences in rights in liquidation or to dividends and option rights, and other securities having conversion or option rights. Also, the Board might authorize the creation and issuance by our subsidiaries and affiliates of securities having conversion and option rights in respect of our shares. Our trust agreement further provides that the terms of such rights or other securities might provide for disparate treatment of certain holders or groups of holders of such rights or other securities. The issuance of such rights or other securities could have the effect of discouraging, delaying or preventing a change in control of us, even if a change in control were in our shareholders' interest or would give the shareholders the opportunity to realize a premium over the then-prevailing market price of our securities.

(3) Advance Notice Requirements for Shareholder Nominations of Trustees. The Company's advance notice procedures with regard to shareholder proposals relating to the nomination of candidates for election as trustees, as provided in our amended and restated Trust Agreement, require, among other things, that advance written notice of any such proposals, containing prescribed information, be given to our Secretary at our principal executive offices not less than 90 days nor more than 120 days prior to the anniversary date of the prior year's meeting (or within 10 business days of the day notice is given of the annual meeting date, if the annual meeting date is not within 30 days of the anniversary date of the immediately preceding annual meeting).

Limited partners of PREIT Associates may vote on certain fundamental changes we propose, which could inhibit a change in control that might otherwise result in a premium to our shareholders.

Our assets generally are held through our interests in PREIT Associates. We currently hold a majority of the outstanding units of limited partnership interest in PREIT Associates. However, PREIT Associates might, from time to time, issue additional units to third parties in exchange for contributions of property to PREIT Associates in amounts that could, individually or in the aggregate, be substantial. These issuances will dilute our percentage ownership of PREIT Associates. Units generally do not carry a right to vote on any matter voted on by our shareholders, although units of limited partnership interests might, under certain circumstances, be redeemed for our shares. However, before the date on which at least half of the units issued on September 30, 1997 in connection with our acquisition of The Rubin Organization have been redeemed, the holders of units issued on September 30, 1997 are entitled to vote such units together with our shareholders, as a single class, on any proposal to merge, consolidate or sell substantially all of our assets. Ronald Rubin, George F. Rubin and Joseph F. Coradino are among the holders of these units. Our partnership interest in PREIT Associates is not included for purposes of determining when half of the partnership interests issued on September 30, 1997 have been redeemed, nor are they counted as votes. These existing rights could inhibit a change in control that might otherwise result in a premium to our shareholders. In addition, we cannot assure you that we will not agree to extend comparable rights to other limited partners in PREIT Associates. We have, in the past, and might again, in the future, enter into tax protection agreements for the benefit of certain former property owners, including some limited partners of PREIT Associates, that might affect our ability to sell or refinance some of our properties that we might otherwise want to sell or refinance, which could harm our financial condition.

As the general partner of PREIT Associates, we have agreed to indemnify certain former property owners, including some who are our officers or trustees or who have become limited partners of PREIT Associates, against tax liabilities that they might incur if we sell a property in a taxable transaction or significantly reduce the debt secured by a property acquired from them within a certain number of years after we acquired it, and we might do so again in the future. In some cases, these agreements might make it uneconomical for us to sell or refinance these properties, even in circumstances in which it otherwise would be advantageous to do so, which could interfere with our ability to execute strategic dispositions, harm our ability to address liquidity needs in the future or otherwise harm our financial condition.

Some of our officers and trustees have interests in properties that we manage and therefore might have conflicts of interest that could adversely affect our business.

We provide management, leasing and development services for partnerships and other ventures in which some of our officers and trustees, including Ronald Rubin, a trustee and our executive chairman, and George F. Rubin, a trustee and our vice chairman, have indirect ownership interests. In addition, we lease substantial office space from an entity in which the Rubins have an interest. Although we have a related party transaction policy and provision for a Special Committee of the Board of Trustees that reviews such transactions, our officers or trustees who have interests in the other parties to these transactions have a conflict of interest in deciding to enter into these agreements and in negotiating their terms, which could result in our obtaining terms that are less favorable than we might otherwise obtain, which could adversely affect our business.

RISKS RELATING TO OUR SECURITIES

Holders of our common shares might have their interest in us diluted by actions we take in the future.

Our May 2013 common share offering and our 2012 preferred share offerings were dilutive to our shareholders, and we continue to contemplate ways to reduce our leverage through a variety of means available to us, subject to the terms of the Credit Agreements. These means might include obtaining equity capital, including through the issuance of common or preferred equity or equity-related securities if market conditions are favorable. In addition, we might contemplate acquisitions of properties or portfolios, and we might issue equity, in the form of common shares or units of limited partnership of PREIT Associates, in consideration for such acquisitions, potentially in substantial amounts. Any issuance of equity securities might result in substantial dilution in the percentage of our common shares held by our then existing shareholders, and the interest of our shareholders might be materially adversely affected. The market

price of our common shares could decline as a result of sales of a large number of shares in the market or the perception that such sales could occur. Additionally, future sales or issuances of substantial amounts of our common shares might be at prices below the then-current market price of our common shares and might adversely affect the market price of our common shares.

27

Many factors, including changes in interest rates and the negative perceptions of the retail sector generally, can have an adverse effect on the market value of our securities.

As is the case with other publicly traded companies, a number of factors might adversely affect the price of our securities, many of which are beyond our control. These factors include:

Increases in market interest rates, relative to the dividend yield on our shares. If market interest rates increase, prospective purchasers of our securities might require a higher yield. Higher market interest rates would not, however, result in more funds being available for us to distribute to shareholders and, to the contrary, would likely increase our borrowing costs and potentially decrease funds available for distribution to our shareholders. Thus, higher market interest rates could cause the market price of our shares to decrease;

Possible future issuances of equity, equity-related or convertible securities, including securities senior as to distributions or liquidation rights;

A decline in the anticipated benefits of an investment in our securities as compared to an investment in securities of companies in other industries (including benefits associated with the tax treatment of dividends and distributions);

Perception, by market professionals and participants, of REITs generally and REITs in the retail sector, and malls, in particular. Our portfolio of properties consists almost entirely of retail properties and we expect to continue to focus primarily on acquiring retail properties in the future;

Perception by market participants of our potential for payment of cash distributions and for growth;

Levels of institutional investor and research analyst interest in our securities;

Relatively low trading volumes in securities of REITs;

Our results of operations and financial condition; and

Investor confidence in the stock market or the real estate sector generally.

The issuances of preferred shares and any additional issuances of preferred shares in the future might adversely affect the earnings per share available to common shareholders and amounts available to common shareholders for payments of dividends.

We are not restricted by our organizational documents, contractual arrangements or otherwise from issuing additional preferred shares, including any securities that are convertible into or exchangeable or exercisable for, or that represent the right to receive, preferred shares or any substantially similar securities in the future.

The market value of our common shares is based primarily upon the market's perception of our liquidity and capital resources, our growth potential and our current and potential future earnings, net operating income, funds from operations and cash distributions. Consequently, our common shares might trade at prices that are higher or lower than our net asset value per common share. If our future earnings, net operating income, funds from operations or cash distributions are less than expected, it is likely that the market price of our common shares will decrease. These metrics might be adversely affected by the existence of preferred shares, including our existing preferred shares and additional preferred shares that we might issue.

We might change the dividend policy for our common shares in the future.

In February 2014, our Board of Trustees declared a cash dividend of \$0.20 per share, payable in March 2014. Our future payment of distributions will be at the discretion of our Board of Trustees and will depend on numerous factors, including our cash flow, financial condition, capital requirements, annual distribution requirements under the REIT provisions of the Internal Revenue Code, the terms and conditions of our Credit Agreements and other factors that our Board of Trustees deems relevant. Any change in our dividend policy could have a material adverse effect on the market price of our common shares.

In addition, the Credit Agreements provide generally that dividends may not exceed 110% of REIT Taxable Income for a fiscal year, or 95% of funds from operations (unless necessary for us to maintain our status as a REIT). All capitalized terms used in this section and not otherwise defined have the meanings ascribed to such terms in the Credit Agreements. We must maintain our status as a REIT at all times.

Some of the distributions we make might be classified as a return of capital. In general, if the distributions are in excess of our current and accumulated earnings and profits (determined under the Internal Revenue Code of 1986, as

amended), then such distributions would be considered a return of capital for federal income tax purposes to the extent of a holder's adjusted basis in its shares. A return of capital is not taxable, but has the effect of reducing the holder's adjusted tax basis in the investment. To the extent that distributions exceed the adjusted tax basis of a holder's shares, the distributions will be treated as gain from the sale or exchange of such shares.

Individual taxpayers might perceive REIT securities as less desirable relative to the securities of other corporations because of the lower tax rate on certain dividends from such corporations, which might have an adverse effect on the market value of our securities.

Historically, the dividends of corporations other than REITs have been taxed at ordinary income rates, which range as high as 39.6%. In 2003, the maximum tax rate on certain corporate dividends received by individuals was reduced to an historically low maximum rate of 15%. Beginning January 1, 2013, this maximum rate was increased to 23.8% (including the tax on net investment income). However, dividends from REITs do not generally qualify for the lower tax rate on corporate dividends because REITs generally do not pay corporate-level tax on income that they distribute currently to shareholders, and instead are taxed at ordinary income rates. This differing treatment of dividends received from REITs and from corporations that are not REITs might cause individual investors to view an investment in the shares of a non-REIT corporation as more attractive than shares in REITs, which might negatively affect the value of our shares.

TAX RISKS

If we were to fail to qualify as a REIT, our shareholders would be adversely affected.

We believe that we have qualified as a REIT since our inception and intend to continue to qualify as a REIT. To qualify as a REIT, however, we must comply with certain highly technical and complex requirements under the Internal Revenue Code, which is complicated in the case of a REIT such as ours that holds its assets primarily in partnership form. We cannot be certain we have complied with these requirements because there are very limited judicial and administrative interpretations of these provisions, and even a technical or inadvertent mistake could jeopardize our REIT status. In addition, facts and circumstances that might be beyond our control might affect our ability to qualify as a REIT. We cannot assure you that new legislation, regulations, administrative interpretations or court decisions will not change the tax laws significantly with respect to our qualification as a REIT or with respect to the federal income tax consequences of qualification.

If we were to fail to qualify as a REIT, we would be subject to federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates. Also, unless the Internal Revenue Service granted us relief under statutory provisions, we would remain disqualified from treatment as a REIT for the four taxable years following the year during which we first failed to qualify. The additional tax incurred at regular corporate rates would significantly reduce the cash flow available for distribution to shareholders and for debt service. In addition, we would no longer be required to make any distributions to shareholders and our securities could be delisted from the exchange on which they are listed. If there were a determination that we do not qualify as a REIT, there would be a material adverse effect on our results of operations and there could be a material reduction in the value of our common shares. Furthermore, as a REIT, we might be subject to a 100% “prohibited transactions” tax on the gain from dispositions of property if we are deemed to hold the property primarily for sale to customers in the ordinary course of business, unless the disposition qualifies under a safe harbor exception for properties that have been held for at least two years and with respect to which certain other requirements are met. The potential application of the prohibited transactions tax could cause us to forego or delay potential dispositions of property or other opportunities that might otherwise be attractive to us, or to undertake such dispositions or other opportunities through a taxable REIT subsidiary, which would generally result in income taxes being incurred.

We might be unable to comply with the strict income distribution requirements applicable to REITs, or compliance with such requirements could adversely affect our financial condition or cause us to forego otherwise attractive opportunities.

To obtain the favorable tax treatment associated with qualifying as a REIT, in general, we are required each year to distribute to our shareholders at least 90% of our net taxable income. In addition, we are subject to a tax on any undistributed portion of our income at regular corporate rates and might also be subject to a 4% excise tax on this undistributed income. We could be required to borrow funds on a short-term basis to meet the distribution requirements that are necessary to achieve the tax benefits associated with qualifying as a REIT, even if conditions are not favorable for borrowing, which could adversely affect our financial condition and results of operations. In addition, compliance with these REIT requirements might cause us to forego opportunities we would otherwise

pursue.

29

We could face possible adverse changes in state and local tax laws, which might result in an increase in our tax liability.

From time to time, changes in state and local tax laws or regulations are enacted, which might result in an increase in our tax liability. The shortfall in tax revenue for states and municipalities in recent years might lead to an increase in the frequency and size of such changes. If such changes occur, we might be required to pay additional taxes on our assets, including our properties, or income. These increased tax costs could adversely affect our financial condition and results of operations and our ability to make distributions to shareholders.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

30

ITEM 2. PROPERTIES.

RETAIL PROPERTIES

We currently own interests in 43 retail properties, of which 40 are operating properties and three are development properties. The 40 operating properties, which are classified in continuing operations, include 35 enclosed malls and five power and strip centers, have a total of 30.4 million square feet and operate in 11 states. We and partnerships in which we own an interest own 23.6 million square feet at these properties (excluding space owned by anchors).

There are 33 operating retail properties in our portfolio that we consolidate for financial reporting purposes. These consolidated properties have a total of 25.8 million square feet, of which we own 20.5 million square feet. The seven operating retail properties that are owned by unconsolidated partnerships with third parties have a total of 4.6 million square feet, of which 3.1 million square feet are owned by such partnerships.

The development portion of our portfolio contains three properties in two states, with two classified as “mixed use” (a combination of retail and other uses) and one classified as “other.”

PREIT Services currently manages 34 of the operating properties, 33 of which we consolidate for financial reporting purposes, and one that is owned by a partnership in which we hold a 50% interest. PRI co-manages one property, which is owned by a partnership that is not consolidated by us. The remaining five properties are also owned by partnerships that are not consolidated by us and are managed by our partners, or by an entity we or our partners designated.

In general, we own the land underlying our properties in fee or, in the case of our properties held by partnerships with others, ownership by the partnership entity is in fee. At certain properties, however, the underlying land is owned by third parties and leased to us or the partnership in which we hold an interest pursuant to long-term ground leases. In a ground lease, the building owner pays rent for the use of the land and is responsible for all costs and expenses related to the building and improvements.

See financial statement Schedule III for financial statement information regarding the properties.

The following tables present information regarding our retail properties. We refer to the total retail space of these properties, including anchors and non anchor stores, as “total square feet,” and the portion that we own as “owned square feet.”

Consolidated Retail Properties

(1) The location stated is the major city or town nearest to the property and is not necessarily the local jurisdiction in which the property is located.

(2) Total square feet includes space owned by us and space owned by tenants or other lessors.

(3) Owned square feet includes only space owned by us and excludes space owned by tenants or other lessors.

(4) Occupancy is calculated based on space owned by us, excludes space owned by tenants or other lessors and includes space occupied by both anchor and non anchor tenants, irrespective of the term of their agreements.

(5) Includes anchors/major tenants that own their space or lease from lessors other than us and do not pay rent to us.

(6) A portion of the underlying land at this property is subject to a ground lease.

(7) Includes a store located at the Exton Square Mall that the tenant has announced that it intends to close in 2014.

(8) The owned square feet for The Gallery at Market East includes the former Strawbridge's department store building that is currently partially vacant. This vacant portion of the department store represents 16.4% of the owned square feet for The Gallery at Market East.

(9)

Includes a store located at 907 Market Street, part of The Gallery at Market East, that the tenant has announced that it intends to close in the first half of 2014.

(10) Tenant currently holds a long-term ground lease with an option to purchase the related store and parking area at a nominal purchase price. These locations are deemed owned by their anchor occupants as they only pay a nominal rent.

2011 ⁽¹⁾	4.12	31.45
2012	4.83	32.03

2013

5.36

33.02

⁽¹⁾ Prior periods reflect the exclusion of tenants that have vacated their space and are not paying rent.

34

LARGE FORMAT RETAILERS AND ANCHORS

Historically, large format retailers and anchors have been an important element of attracting customers to a mall, and they have generally been department stores whose merchandise appeals to a broad range of customers, although in recent years we have attracted some non-traditional large format retailers. These large format retailers and anchors either own their stores, the land under them and adjacent parking areas, or enter into long-term leases at rent that is generally lower than the rent charged to in-line tenants. Well-known, large format retailers and anchors continue to play an important role in generating customer traffic and making malls desirable locations for in-line store tenants, even though the market share of traditional department store anchors has been declining and such companies have experienced significant changes. See “Item 1A. Risk Factors—Risks Related to Our Business and Our Properties.” The following table indicates the parent company of each of our large format retailers and anchors and sets forth the number of stores and square feet owned or leased by each at our retail properties, including consolidated and unconsolidated properties, as of December 31, 2013:

To qualify as a large format retailer or an anchor for inclusion in this table, a tenant must occupy at least 50,000 square feet or be part of a chain that has stores in our portfolio occupying at least 50,000 square feet. This table lists all stores from such chains, regardless of the size of the individual stores.

- (1) square feet or be part of a chain that has stores in our portfolio occupying at least 50,000 square feet. This table lists all stores from such chains, regardless of the size of the individual stores.
- (2) Number of stores and gross leasable area (“GLA”) include anchors that own their own space or lease from lessors other than us and do not pay rent to us.
- (3) Percent of Total GLA is calculated based on the total GLA of all properties.
- (4) Includes a store located at the Exton Square Mall that the tenant has announced that it intends to close in 2014.
- (5) Includes a store located at 907 Market Street, part of The Gallery at Market East, that the tenant has announced that it intends to close in the first half of 2014.

MAJOR TENANTS

The following table presents information regarding the top 20 tenants at our retail properties, including consolidated and unconsolidated properties, by gross rent as of December 31, 2013:

Primary Tenant ⁽¹⁾	Total Stores	Annual Gross Rent ⁽²⁾	Percent of PREIT's Annual Gross Rent	
Gap, Inc.	41	\$11,746	2.9	%

Total/Average	2,809	11,527,487	\$345,720	\$29.99	100.0	% 4,920	\$219	\$44.51	100.0	%	

(1) As described above under “Item 1A. Risk Factors,” if a tenant files for bankruptcy, the tenant might have the right to reject and terminate its leases, and we cannot be sure that it will affirm its leases and continue to make rental payments in a timely manner. If a lease is rejected by a tenant in bankruptcy, we would have only a general unsecured claim for damages in connection with such balances.

(2) In thousands of dollars. Includes our proportionate share of tenant rent from partnership properties that are not consolidated by us, based on our ownership percentage in the respective partnerships. Annualized gross rent is calculated based only on gross monthly rent as of December 31, 2013.

(3) Includes all tenant leases that had expired and were on a month to month basis as of December 31, 2013.

See “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Leasing Activity” for information regarding rent in leases signed in 2013.

RETAIL LEASE EXPIRATION SCHEDULE—ANCHORS

The following table presents scheduled lease expirations of anchor tenants as of December 31, 2013 (includes leases with tenants that have filed for bankruptcy protection, depending on the current status of the lease):

For the Year Ending December 31,	Number of Leases Expiring	GLA of Expiring Leases	PREIT's Share of Gross Rent in Expiring Year ⁽¹⁾⁽²⁾	Average Expiring Gross Rent psf	Percent of PREIT's Total	
2014	4	⁽³⁾ 320,649	\$1,770	\$5.52	3.3	%
2015	12	1,210,881	6,137	5.07	11.6	%
2016	19	1,872,374	7,618	4.07	14.3	%
2017	10	1,400,890	4,207	3.00	7.9	%
2018	14	1,325,258	5,973	4.51	11.2	%
2019	16	⁽⁴⁾ 1,774,333	6,035	3.40	11.4	%
2020	4	450,227	1,267	2.81	2.4	%
2021	4	481,791	4,182	8.68	7.9	%
2022	4	521,173	2,645	5.08	5.0	%
Thereafter	10	1,034,771	13,293	12.85	25.0	%
Total/Average	97	10,392,347	\$53,127	\$5.11	100.0	%

In thousands of dollars. Includes our proportionate share of tenant rent from partnership properties that are not

⁽¹⁾ consolidated by us, based on our ownership percentage in the respective partnerships. Annualized gross rent is calculated based only on gross monthly rent as of December 31, 2013.

⁽²⁾ None of the amounts shown in this column are associated with tenants that have filed for bankruptcy protection.

⁽³⁾ Includes a store located at 907 Market Street, part of The Gallery at Market East, that the tenant has announced that it intends to close in the first half of 2014.

⁽⁴⁾ Includes a store located at the Exton Square Mall that the tenant has announced that it intends to close in 2014.

See “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Leasing Activity” for information regarding rent in leases signed in 2013.

DEVELOPMENT PROPERTIES

The development portion of our portfolio contains three properties in two states, with two classified as “mixed use” (a combination of retail and other uses) and one classified as “other.”

OFFICE SPACE

We lease our principal executive offices from Bellevue Associates (the “Landlord”), an entity in which certain of our officers/trustees have an interest. Ronald Rubin and George F. Rubin, collectively with members of their immediate families and affiliated entities, own approximately a 50% interest in the Landlord. Total rent expense under this lease was \$1.4 million, \$1.5 million and \$1.8 million for the years ended December 31, 2013, 2012 and 2011, respectively. In April 2012, we entered into an amendment to our office lease with the Landlord, effective June 1, 2012. Under this amendment, the term was extended for five years to October 31, 2019, and we have the option to renew the amended office lease for up to two additional periods for an aggregate of 10 years, at the then-current market base rental rate calculated in accordance with the terms of the amended office lease. The first extension period shall be no less than three and no more than seven years, at our discretion, and the second must be for 10 years less the number of years of the first extension. The base rent under the amended lease is approximately \$1.2 million per year, increasing incrementally to approximately \$1.4 million in 2019.

In accordance with PREIT’s related party transactions policy, PREIT’s Special Committee considered and approved the terms of the transaction.

ITEM 3. LEGAL PROCEEDINGS.

In the normal course of business, we have become, and might in the future become, involved in legal actions relating to the ownership and operation of our properties and the properties we manage for third parties. In management's opinion, the resolutions of any such pending legal actions are not expected to have a material adverse effect on our consolidated financial condition or results of operations.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

40

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Common Shares

Our common shares of beneficial interest are listed on the New York Stock Exchange under the symbol "PEI." The following table presents the high and low sales prices for our common shares of beneficial interest, as reported by the New York Stock Exchange, and cash distributions paid per share for the periods indicated:

	High	Low	Dividend Paid
Quarter ended March 31, 2013	\$19.86	\$17.77	\$0.18
Quarter ended June 30, 2013	\$22.54	\$14.20	0.18
Quarter ended September 30, 2013	\$22.19	\$17.71	0.18
Quarter ended December 31, 2013	\$19.58	\$16.61	0.20
			\$0.74
	High	Low	Dividend Paid
Quarter ended March 31, 2012	\$15.74	\$10.49	\$0.15
Quarter ended June 30, 2012	\$15.69	\$11.81	0.16
Quarter ended September 30, 2012	\$17.44	\$13.86	0.16
Quarter ended December 31, 2012	\$17.90	\$15.42	0.16
			\$0.63

As of December 31, 2013, there were approximately 2,900 holders of record of our common shares and approximately 15,000 beneficial holders of our common shares.

We currently anticipate that cash distributions will continue to be paid in March, June, September and December. In February 2014, our Board of Trustees declared a cash dividend of \$0.20 per share payable in March 2014. Our future payment of distributions will be at the discretion of our Board of Trustees and will depend upon numerous factors, including our cash flow, financial condition, capital requirements, annual distribution requirements under the REIT provisions of the Internal Revenue Code, the terms and conditions of our 2013 Revolving Facility and 2014 Term Loans, and other factors that our Board of Trustees deems relevant.

The 2013 Revolving Facility and 2014 Term Loans provide generally that dividends may not exceed 110% of REIT Taxable Income for a fiscal year, or 95% of FFO (unless necessary for us to maintain our status as a REIT). All capitalized terms used in this section and not otherwise defined have the meanings ascribed to such terms in the 2013 Revolving Facility. We must maintain our status as a REIT at all times.

Units

Class A and Class B Units of PREIT Associates ("OP Units") are redeemable by PREIT Associates at the election of the limited partner holding the Units at the time and for the consideration set forth in PREIT Associates' partnership agreement. In general, and subject to exceptions and limitations, beginning one year following the respective issue dates, "qualifying parties" may give one or more notices of redemption with respect to all or any part of the Class A Units then held by that party. Class B Units are redeemable at the option of the holder at any time after issuance. If a notice of redemption is given, we have the right to elect to acquire the OP Units tendered for redemption for our own account, either in exchange for the issuance of a like number of our common shares, subject to adjustments for stock splits, recapitalizations and like events, or a cash payment equal to the average of the closing prices of our shares on the ten consecutive trading days immediately before our receipt, in our capacity as general partner of PREIT Associates, of the notice

of redemption. If we decline to exercise this right, then PREIT Associates will pay a cash amount equal to the number of OP Units tendered multiplied by such average closing price.

Issuer Purchases of Equity Securities

We did not acquire any shares in the fourth quarter of 2013.

ITEM 6. SELECTED FINANCIAL DATA.

The following table sets forth Selected Financial Data for the Company as of and for the years ended December 31, 2013, 2012, 2011, 2010 and 2009. The information set forth below should be read in conjunction with “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements and notes thereto appearing elsewhere in this Annual Report on Form 10-K. Certain prior period amounts have been reclassified to conform to the current year presentation.

(in thousands, except per share amounts)	For the Year Ended December 31,				
	2013	2012	2011	2010	2009
Operating Results:					
Total revenue	\$438,678	\$419,347	\$419,138	\$418,163	\$411,877

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following analysis of our consolidated financial condition and results of operations should be read in conjunction with our consolidated financial statements and the notes thereto included elsewhere in this report.

OVERVIEW

Pennsylvania Real Estate Investment Trust, a Pennsylvania business trust founded in 1960 and one of the first equity real estate investment trusts ("REITs") in the United States, has a primary investment focus on retail shopping malls located in the eastern half of the United States, primarily in the Mid-Atlantic region.

We currently own interests in 43 retail properties, of which 40 are operating properties and three are development properties. The 40 operating properties, which are classified in continuing operations, include 35 enclosed malls and five power and strip centers, have a total of 30.4 million square feet and operate in 11 states. We and partnerships in which we own an interest own 23.6 million square feet at these properties (excluding space owned by anchors).

There are 33 operating retail properties in our portfolio that we consolidate for financial reporting purposes. These consolidated properties have a total of 25.8 million square feet, of which we own 20.5 million square feet. The seven operating retail properties that are owned by unconsolidated partnerships with third parties have a total of 4.6 million square feet, of which 3.1 million square feet are owned by such partnerships.

The development portion of our portfolio contains three properties in two states, with two classified as "mixed use" (a combination of retail and other uses) and one classified as "other."

Our primary business is owning and operating retail shopping malls, which we do primarily through our operating partnership, PREIT Associates, L.P. ("PREIT Associates" or the "Operating Partnership"). We provide management, leasing and real estate development services through PREIT Services, LLC ("PREIT Services"), which generally develops and manages properties that we consolidate for financial reporting purposes, and PREIT-RUBIN, Inc. ("PRI"), which generally develops and manages properties that we do not consolidate for financial reporting purposes, including properties we own interests in through partnerships with third parties and properties that are owned by third parties in which we do not have an interest. PRI is a taxable REIT subsidiary, as defined by federal tax laws, which means that it is able to offer additional services to tenants without jeopardizing our continuing qualification as a REIT under federal tax law.

Our revenue consists primarily of fixed rental income, additional rent in the form of expense reimbursements, and percentage rent (rent that is based on a percentage of our tenants' sales or a percentage of sales in excess of thresholds that are specified in the leases) derived from our income producing properties. We also receive income from our real estate partnership investments and from the management and leasing services PRI provides.

Our net income increased by \$79.8 million to \$37.2 million for 2013 from a net loss of \$42.6 million for the year ended December 31, 2012. The change in our 2013 results of operations from the prior year was primarily due to gains on sales of discontinued operations of \$78.5 million in connection with the sales of Orlando Fashion Square, Paxton Towne Centre, Christiana Center and Commons at Magnolia, a \$23.4 million decrease in interest expense, increased net operating income ("NOI") of \$10.3 million at same store and properties acquired in 2013 and a decrease of \$7.1 million in employee separation expenses. These favorable changes were partially offset by \$30.0 million of impairment losses at Chambersburg Mall and North Hanover Mall, and an increase of \$13.0 million in depreciation and amortization expenses.

We evaluate operating results and allocate resources on a property-by-property basis, and do not distinguish or evaluate our consolidated operations on a geographic basis. Due to the nature of our operating properties, which involve retail shopping, we have concluded that our individual properties have similar economic characteristics and meet all other aggregation criteria. Accordingly, we have aggregated our individual properties into one reportable segment. In addition, no single tenant accounts for 10% or more of our consolidated revenue, and none of our properties are located outside the United States.

We hold our interest in our portfolio of properties through the Operating Partnership. We are the sole general partner of the Operating Partnership and, as of December 31, 2013, held a 97.0% controlling interest in the Operating Partnership, and consolidated it for reporting purposes. We hold our investments in seven of the 40 retail properties and one of the three development properties in our portfolio through unconsolidated partnerships with third parties in

which we own a 40% to 50% interest. We hold a non-controlling interest in each unconsolidated partnership, and account for such partnerships using the equity method of accounting. We do not control any of these equity method investees for the following reasons:

44

Except for two properties that we co-manage with our partner, all of the other entities are managed on a day-to-day basis by one of our other partners as the managing general partner in each of the respective partnerships. In the case of the co-managed properties, all decisions in the ordinary course of business are made jointly.

The managing general partner is responsible for establishing the operating and capital decisions of the partnership, including budgets, in the ordinary course of business.

All major decisions of each partnership, such as the sale, refinancing, expansion or rehabilitation of the property, require the approval of all partners.

Voting rights and the sharing of profits and losses are generally in proportion to the ownership percentages of each partner.

We record the earnings from the unconsolidated partnerships using the equity method of accounting under the statements of operations caption entitled "Equity in income of partnerships," rather than consolidating the results of the unconsolidated partnerships with our results. Changes in our investments in these entities are recorded in the balance sheet caption entitled "Investment in partnerships, at equity." In the case of deficit investment balances, such amounts are recorded in "Distributions in excess of partnership investments."

We hold our interests in three of our unconsolidated partnerships through tenancy in common arrangements. For each of these properties, title is held by us and another person or persons, and each has an undivided interest in the property. With respect to each of the three properties, under the applicable agreements between us and the other persons with ownership interests, we and such other persons have joint control because decisions regarding matters such as the sale, refinancing, expansion or rehabilitation of the property require the approval of both us and the other person (or at least one of the other persons) owning an interest in the property. Hence, we account for each of the properties using the equity method of accounting. The balance sheet items arising from these properties appear under the caption "Investments in partnerships, at equity."

For further information regarding our unconsolidated partnerships, see note 3 to our consolidated financial statements. Current Economic Conditions and Our Near Term Capital Needs

The conditions in the economy have caused unemployment to remain relatively high and have caused fluctuations and variations in retail sales, business and consumer confidence and consumer spending on retail goods. As a result, the sales and profit performance of certain retailers has fluctuated. We continue to adjust our plans and actions to take into account the current environment. In particular, we continue to contemplate ways to maintain or reduce our leverage through a variety of means available to us, subject to and in accordance with the terms of our 2013 Revolving Facility and 2014 Term Loans. These steps might include obtaining additional equity capital, including through the issuance of common or preferred equity securities if market conditions are favorable, through joint ventures or other partnerships or arrangements involving our contribution of assets with institutional investors, private equity investors or other REITs, through sales of properties or interests in properties with values in excess of their mortgage loans and application of the excess proceeds to debt reduction, or through other actions.

Capital Improvement Projects and Development

At our operating properties, we might engage in various types of capital improvement projects. Such projects vary in cost and complexity, and can include building out new or existing space for individual tenants, upgrading common areas or exterior areas such as parking lots, or redeveloping the entire property, among other projects. Project costs are accumulated in "Construction in progress" on our consolidated balance sheet until the asset is placed into service, and amounted to \$68.8 million as of December 31, 2013.

At our development properties, we are also engaged in several types of projects. However, we do not expect to make any significant investment in these projects in the short term. As of December 31, 2013, we had incurred \$54.0 million of costs, net of impairment charges recorded in prior years, related to our activity at development properties.

As of December 31, 2013, we had unaccrued contractual and other commitments related to our capital improvement projects and development projects of \$1.7 million in the form of tenant allowances and contracts with general service providers and other professional service providers.

Acquisitions and Dispositions

See note 2 to our consolidated financial statements for a description of our dispositions and acquisition in 2013, 2012 and 2011.

45

CRITICAL ACCOUNTING POLICIES

Critical Accounting Policies are those that require the application of management's most difficult, subjective, or complex judgments, often because of the need to make estimates about the effect of matters that are inherently uncertain and that might change in subsequent periods. In preparing the consolidated financial statements, management has made estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting periods. In preparing the financial statements, management has utilized available information, including our past history, industry standards and the current economic environment, among other factors, in forming its estimates and judgments, giving due consideration to materiality. Management has also considered events and changes in property, market and economic conditions, estimated future cash flows from property operations and the risk of loss on specific accounts or amounts in determining its estimates and judgments. Actual results may differ from these estimates. In addition, other companies may utilize different estimates, which may affect comparability of our results of operations to those of companies in similar businesses. The estimates and assumptions made by management in applying critical accounting policies have not changed materially during 2013, 2012 and 2011, except as otherwise noted, and none of these estimates or assumptions have proven to be materially incorrect or resulted in our recording any significant adjustments relating to prior periods. We will continue to monitor the key factors underlying our estimates and judgments, but no change is currently expected.

Set forth below is a summary of the accounting policy that management believes is critical to the preparation of the consolidated financial statements. This summary should be read in conjunction with the more complete discussion of our accounting policies included in note 1 to our consolidated financial statements.

Asset Impairment

Real estate investments and related intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the property might not be recoverable. A property to be held and used is considered impaired only if our management's estimate of the aggregate future cash flows, less estimated capital expenditures, to be generated by the property, undiscounted and without interest charges, are less than the carrying value of the property. This estimate takes into consideration factors such as expected future operating income, trends and prospects, as well as the effects of demand, competition and other factors. In addition, these estimates may consider a probability weighted cash flow estimation approach when alternative courses of action to recover the carrying amount of a long-lived asset are under consideration or when a range of possible values is estimated.

The determination of undiscounted cash flows requires significant estimates by management, including the expected course of action at the balance sheet date that would lead to such cash flows. Subsequent changes in estimated undiscounted cash flows arising from changes in the anticipated action to be taken with respect to the property could impact the determination of whether an impairment exists and whether the effects could materially affect our net income. To the extent estimated undiscounted cash flows are less than the carrying value of the property, the loss will be measured as the excess of the carrying amount of the property over the estimated fair value of the property. Assessment of our ability to recover certain lease related costs must be made when we have a reason to believe that the tenant might not be able to perform under the terms of the lease as originally expected. This requires us to make estimates as to the recoverability of such costs.

An other than temporary impairment of an investment in an unconsolidated joint venture is recognized when the carrying value of the investment is not considered recoverable based on evaluation of the severity and duration of the decline in value. To the extent impairment has occurred, the excess carrying value of the asset over its estimated fair value is charged to income.

If there is a triggering event in relation to a property to be held and used, we will estimate the aggregate future cash flows, less estimated capital expenditures, to be generated by the property, undiscounted and without interest charges. In addition, this estimate may consider a probability weighted cash flow estimation approach when alternative courses of action to recover the carrying amount of a long-lived asset are under consideration or when a range of possible values is estimated.

In determining the estimated undiscounted cash flows of the properties that are being analyzed for impairment of assets, we take the sum of the estimated undiscounted cash flows, generally assuming a holding period of 10 years, plus a terminal value calculated using the estimated net operating income in the eleventh year and terminal capitalization rates, which in 2012 and 2013 ranged from 6.25% to 12.0%. In 2013, two properties had triggering events that required further review for impairment. The fair values of the properties (Chambersburg Mall and North Hanover Mall) were determined based on negotiated sale prices of the properties as discussed further in note 2 to our consolidated financial statements. In 2012, one property had a triggering event that required further review for impairment. In 2011, after two properties had triggering events that required

further review for impairment, we estimated the fair value of the properties that experienced impairment of assets using discount rates applied to estimated cash flows ranging from 13% to 14%.

Chambersburg Mall

In 2013, we recorded a loss on impairment of assets at Chambersburg Mall in Chambersburg, Pennsylvania of \$23.7 million to write down the carrying value of the property's long-lived assets to the property's estimated fair value of \$8.2 million. During the third quarter of 2013, we entered into negotiations with a potential buyer of the property. As a result of this factor, we determined that the holding period for the property was less than had been previously estimated, which we concluded to be a triggering event, leading us to conduct an analysis of possible asset impairment at this property. Using updated assumptions based on this factor, we determined that the estimated undiscounted cash flows, net of estimated capital expenditures, for Chambersburg Mall were less than the carrying value of the property, and recorded the impairment loss. We recorded the impairment loss in discontinued operations in the third quarter of 2013 and sold this property in the fourth quarter of 2013.

North Hanover Mall

In 2011, we recorded a loss on impairment of assets at North Hanover Mall in Hanover, Pennsylvania of \$24.1 million to write down the carrying value of the property's long-lived assets to the property's then estimated fair value of \$22.5 million. In 2008, we had constructed anchor space that was to be leased and occupied by department store Boscov's, Inc. ("Boscov's"). Prior to taking occupancy of the newly built store, Boscov's declared bankruptcy, and the lease was subsequently rejected. We had attempted to execute a lease with a suitable retail replacement or non-retail user for this anchor location. In 2011, a newly-constructed power center opened in the trade area, increasing the competition for new tenants. After entering into lease negotiations in 2011, in January 2012, we entered into a lease with J.C. Penney Company, Inc. for it to move from its then-current location to a significant portion of the newly constructed anchor space. The economic terms of this transaction, which were substantially completed in 2011, were less favorable than the terms of the original Boscov's lease. During the third quarter of 2011, in connection with our 2012 business plan and budgeting process, we concluded that there was a low likelihood that we would be able to lease the vacant department store space on favorable terms. We further concluded that these factors constituted a triggering event, leading us to conduct an analysis of possible asset impairment at this property. Using updated assumptions based on these factors, we determined that the estimated undiscounted cash flows, net of estimated capital expenditures, for North Hanover Mall were less than the carrying value of the property, and recorded the impairment loss.

In 2013, we recorded a further loss on impairment of assets at North Hanover Mall of \$6.3 million to write down the carrying value of the property's long-lived assets to the property's estimated fair value of \$16.7 million. Since 2011, the property experienced further declines in net operating income and occupancy. During the third quarter of 2013, we entered into negotiations with a potential buyer of the property, which are ongoing and could result in changes to our underlying assumptions. As a result of these factors, we determined that the holding period for the property was less than had previously been estimated, which we concluded to be a triggering event, leading us to conduct an analysis of possible asset impairment at this property. Using updated assumptions based on these factors, we determined that the estimated undiscounted cash flows, net of estimated capital expenditures, for North Hanover Mall were less than the carrying value of the property, and recorded the impairment loss.

Phillipsburg Mall

In 2011, we recorded a loss on impairment of assets at Phillipsburg Mall in Phillipsburg, New Jersey of \$28.0 million to write down the carrying value of the property's long-lived assets to the property's then-estimated fair value of \$15.0 million. During 2011, Phillipsburg Mall experienced significant decreases in non anchor occupancy and net operating income as a result of unfavorable economic conditions in the Phillipsburg, New Jersey trade area, combined with negative trends in the retail sector. The occupancy declines resulted from store closings of underperforming tenants. Net operating income at this property was also affected by an increase in the number of tenants paying a percentage of their sales in lieu of minimum rent, combined with declining tenant sales. As a result of these conditions, during the

third quarter of 2011, in connection with the preparation of our 2012 business plan and budgets, we determined that the estimated undiscounted future cash flows, net of estimated capital expenditures, to be generated by the property were less than the carrying value of the property, and recorded the impairment loss.

In the fourth quarter of 2012, we recorded an additional impairment loss on Phillipsburg Mall of \$3.8 million. The amount of the impairment loss was determined based on the sale price of the property. We sold this property in the first quarter of 2013.

OFF BALANCE SHEET ARRANGEMENTS

We have no material off-balance sheet items other than the partnerships described in note 3 to the consolidated financial statements and in the “Overview” section above.

48

RESULTS OF OPERATIONS

Overview

Net income for the year ended December 31, 2013 was \$37.2 million, an increase of \$79.8 million compared to a net loss for the year ended December 31, 2012 of \$42.6 million. Our 2013 and 2012 results of operations were primarily affected by the following:

- gains on sales of discontinued operations of \$78.5 million in 2013 resulting from our sales of Christiana Center, Paxton Towne Centre, Commons at Magnolia and Orlando Fashion Square;
- a decrease in interest expense of \$26.0 million (excluding the effects of loss on hedge ineffectiveness and accelerated amortization of deferred financing costs) resulting from lower overall debt balances and lower average interest rates;
- a decrease of \$7.1 million in provision for employee separation expense;
- an increase of \$6.9 million in Same Store NOI (presented using the “proportionate consolidation method;” See “—Net Operating Income”); and
- an increase of \$3.3 million in net operating income from 907 Market Street, which was acquired in April 2013; partially offset by
- impairment of assets in 2013 of \$23.7 million related to Chambersburg Mall and \$6.3 million related to North Hanover Mall;
- an increase of \$13.0 million in depreciation and amortization expense;
- an increase of \$3.4 million in interest expense primarily due to net loss on hedge ineffectiveness that was recorded in interest expense; and
- accelerated amortization of deferred financing fees of \$1.1 million related to the repayment of the 2010 Term Loan and two other mortgage loans.

Net loss for the year ended December 31, 2012 was \$42.6 million, a decrease of \$51.4 million compared to a net loss for the year ended December 31, 2011 of \$93.9 million. Our 2012 and 2011 results of operations were primarily affected by the following:

- impairment charges of \$3.8 million in 2012 related to Phillipsburg Mall in Phillipsburg, New Jersey, and impairment charges of \$52.3 million in 2011, including \$24.1 million related to North Hanover Mall in Hanover, Pennsylvania and \$28.0 million related to Phillipsburg Mall;
- \$9.4 million in employee separation expense in 2012 in connection with terminations or contract modifications of executive officers and others;
- a decrease of \$6.9 million in interest expense (excluding the effects of loss on hedge ineffectiveness and accelerated amortization of deferred financing costs) resulting from lower overall debt balances (from repayments following issuances of preferred shares) and lower weighted average interest rates;
- an increase of \$3.0 million in net operating income (presented using the “proportionate-consolidation method;” see “—Net Operating Income”);
- gains on sales of real estate of \$1.6 million in 2011 resulting from parcel sales at New River Valley Mall in Christiansburg, Virginia and Pitney Road Plaza in Lancaster, Pennsylvania and the sale of a condominium interest in the mall at Voorhees Town Center in Voorhees, New Jersey;
- a \$1.5 million bankruptcy settlement received in September 2011 in connection with the Valley View Downs project;
- a loss on hedge ineffectiveness of \$1.2 million in 2012; and
- accelerated amortization of \$0.7 million of financing costs recorded in 2012 in connection with the permanent repayment of a portion of the amounts outstanding under the 2010 Credit Facility using the proceeds from our Series B preferred share issuance in October 2012.

Occupancy

The tables below set forth certain occupancy statistics for our retail properties as of December 31, 2013, 2012 and 2011:

	Occupancy ⁽¹⁾ as of December 31,									
	Consolidated Properties			Unconsolidated Properties			Combined ⁽²⁾			
	2013	2012	2011	2013	2012	2011	2013	2012	2011	
Retail portfolio weighted average:										
Total excluding anchors	93.2	% 91.6	% 90.3	% 94.7	% 93.9	% 94.6	% 93.5	% 92.0	% 91.0	%
Total including anchors	94.8	% 94.2	% 93.1	% 96.2	% 95.6	% 94.1	% 95.0	% 94.4	% 93.2	%
Enclosed malls weighted average:										
Total excluding anchors	93.2	% 91.6	% 90.3	% 97.3	% 96.3	% 95.5	% 93.5	% 92.0	% 90.6	%
Total including anchors	94.8	% 94.2	% 93.1	% 98.1	% 97.5	% 96.5	% 95.0	% 94.4	% 93.2	%
Power and Strip Center weighted average:	N/A	N/A	N/A	95.0	% 94.5	% 92.8	% 95.0	% 94.5	% 92.8	%

(1) Occupancy for all periods presented includes all tenants irrespective of the term of their agreement.

(2) Combined occupancy is calculated by using occupied gross leasable area ("GLA") for consolidated and unconsolidated properties and dividing by total GLA for consolidated and unconsolidated properties.

From 2012 to 2013, total occupancy for our retail portfolio increased 60 basis points to 95.0%, and mall occupancy increased 60 basis points to 95.0%, including consolidated and unconsolidated properties (and including all tenants irrespective of the term of their agreement).

Leasing Activity

The table below sets forth summary leasing activity information with respect to our properties for the year ended December 31, 2013, including anchor and non anchor space at consolidated and unconsolidated properties:

	Number	Gross Leasable Area ("GLA")	Average Gross Rent psf		Increase (decrease) in Gross Rent psf		Annualized Tenant Improvements psf ⁽²⁾
			Previous	New ⁽¹⁾	Dollar	%	
New Leases: ⁽³⁾							
1st Quarter	33	95,895	N/A	\$ 39.60	\$39.60	N/A	\$ 7.82
2nd Quarter ⁽⁴⁾	53	144,481	N/A	39.73	39.73	N/A	7.36
3rd Quarter ⁽⁵⁾	60	234,946	N/A	26.74	26.74	N/A	6.31
4th Quarter ⁽⁶⁾	31	141,916	N/A	25.03	25.03	N/A	4.47
Total/Average	177	617,238	N/A	\$ 31.39	\$31.39	N/A	\$ 6.37
Renewal - non anchor tenants 10,000 square feet and under: ⁽⁷⁾							
1st Quarter	73	216,780	\$ 35.21	\$ 36.93	\$ 1.72	4.9 %	\$ 0.04

⁽¹⁾ New rent is the initial amount payable upon rent commencement.

⁽²⁾ These leasing costs are presented as annualized costs per square foot and are spread uniformly over the initial lease term.

⁽³⁾ This category includes newly constructed and recommissioned space.

⁽⁴⁾ Excluding tenants greater than 10,000 square feet, average gross rent per square foot for new leases was \$51.11.

⁽⁵⁾ Excluding tenants greater than 10,000 square feet, average gross rent per square foot for new leases was \$30.91.

⁽⁶⁾ Excluding tenants greater than 10,000 square feet, average gross rent per square foot for new leases was \$34.31.

⁽⁷⁾ This category includes expansions, relocations and lease extensions.

See "Item 2. Properties—Retail Lease Expiration Schedule" for information regarding average minimum rent on expiring leases.

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

The following table sets forth our results of operations for the years ended December 31, 2013, 2012 and 2011:

(in thousands of dollars)	For the Year Ended December 31, 2013	% Change 2012 to 2013	For the Year Ended December 31, 2012	% Change 2011 to 2012	For the Year Ended December 31, 2011

⁽¹⁾ The percentage change is not meaningful.

The amounts in the preceding table reflect our consolidated properties, with the exception of properties that are classified as discontinued operations, which are presented in the line items “Operating results from discontinued operations,” “Impairment of assets of discontinued operations” and “Gains on sales of discontinued operations,” and unconsolidated properties, which are presented under the equity method of accounting in the line item “Equity in income of partnerships.”

Real Estate Revenue

Real estate revenue increased by \$17.9 million, or 4%, in 2013 as compared to 2012, primarily due to: an increase of \$11.0 million in base rent, including \$4.0 million related to the April 2013 acquisition of 907 Market Street, Philadelphia, Pennsylvania and \$1.3 million associated with the July 2012 lease commencement date of the Philadelphia Media Network at The Gallery at Market East. Base rent also increased due to new store openings and lease renewals with higher base rent, with notable increases at Willow Grove Park, Cherry Hill Mall and Plymouth Meeting Mall; and an increase of \$6.9 million in expense reimbursements, following increases in real estate tax and common area maintenance expenses (see “—Operating Expenses”). In addition, utility reimbursements increased by \$1.4 million, due primarily to an increase in tenant utility billing rates at Cherry Hill Mall.

Real estate revenue increased by \$1.4 million, or 0%, in 2012 as compared to 2011, primarily due to: an increase of \$5.2 million in base rent, including \$1.2 million associated with the July 2012 lease commencement date of the Philadelphia Media Network at The Gallery at Market East. Base rent also increased due to new store openings and lease renewals with higher base rent, with notable increases at Cherry Hill Mall, Crossroads Mall, The

Mall at Prince Georges and Jacksonville Mall;

an increase of \$0.7 million in lease terminations, primarily due to termination payments received from one tenant totaling \$0.5 million during 2012; and

an increase of \$0.3 million in other revenue, including a \$0.3 million increase in promotional income; partially offset by

a decrease of \$4.1 million in expense reimbursements, including decreases of \$3.2 million in utility reimbursements and \$0.9 million in common area maintenance and real estate tax reimbursements. The decrease in utility

reimbursements was partially due to a \$2.0 million decrease in utility expenses. In addition, during 2011, utility reimbursements at three of our properties were affected by a temporary increase in tenant utility billing rates resulting in additional utility reimbursements of \$0.5 million. Also, during 2012, our properties continued to experience a trend towards more gross leases (leases that provide that tenants pay a higher minimum rent in lieu of contributing toward common area maintenance costs and real estate taxes); and

a decrease of \$0.7 million in percentage rent, primarily due to lease renewals with higher base rents and corresponding higher sales breakpoints for calculating percentage rent.

Operating Expenses

Operating expenses increased by \$9.1 million, or 5%, in 2013 as compared to 2012, primarily due to:

an increase of \$7.4 million in real estate tax expense, including a \$6.4 million increase at our four properties located in New Jersey, due to a combination of increases in the real estate tax assessment values and real estate tax rates; and an increase of \$2.4 million in common area maintenance expenses, including increases of \$0.7 million related to the April 2013 acquisition of 907 Market Street, \$1.0 million in snow removal expense and \$0.5 million in insurance expense. Snow removal expense was higher during 2013 due to a mild and dry winter during 2012 across the Mid-Atlantic states where many of our properties are located; partially offset by

a decrease of \$0.6 million in ground rent expense, including a \$0.4 million decrease at The Gallery at Market East due to the April 2013 acquisition of 907 Market Street. The acquisition of 907 Market Street included the purchase of the land under The Gallery at Market East food court which was leased from the previous owner prior to the acquisition.

Operating expenses decreased by \$2.7 million, or 2%, in 2012 as compared to 2011, primarily due to:

- a decrease of \$2.0 million in non-common area utility expense due in part to a mild 2012 winter with above average temperatures across the Mid-Atlantic states where many of our properties are located and in part to lower electric rates as a result of deregulation and alternate supplier contracts executed during 2012; and
- a decrease of \$1.2 million in bad debt expense due to favorable collections resulting in lower accounts receivable balances, as well as fewer tenant bankruptcies compared to 2011; partially offset by
- an increase of \$0.8 million in common area maintenance expenses, including increases of \$0.8 million in repairs and maintenance and \$1.3 million in housekeeping and security as a result of stipulated contractual increases. These increases were partially offset by a \$1.3 million decrease in snow removal expense due to the mild and dry 2012 winter as noted above.

Net Operating Income ("NOI")

NOI (a non-GAAP measure) is derived from real estate revenue (determined in accordance with generally accepted accounting principles, or GAAP, including lease termination revenue) minus operating expenses (determined in accordance with GAAP), plus our share of revenue and operating expenses of our partnership investments as described below, and includes real estate revenue and operating expenses from properties included in discontinued operations. It does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (determined in accordance with GAAP) as an indication of our financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of our liquidity. It is not indicative of funds available for our cash needs, including our ability to make cash distributions. We believe that NOI is helpful to management and investors as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time. We believe that net income is the most directly comparable GAAP measurement to NOI. NOI excludes other income, general and administrative expenses, provision for employee separation expense, interest expense, depreciation and amortization, gains on sales of interests in real estate, gains or sales of non-operating real estate, gains on sales of discontinued operations, gain on extinguishment of debt, impairment losses, project costs and other expenses.

The following table presents NOI for the years ended December 31, 2013, 2012 and 2011. The results are presented using the “proportionate-consolidation method” (a non-GAAP measure), which includes our share of the results of our partnership investments. Under GAAP, we account for our partnership investments under the equity method of accounting. Operating results for retail properties that we owned for the full periods presented (“Same Store”) exclude properties acquired or disposed of during the periods presented. A reconciliation of NOI to net income (loss) calculated in accordance with GAAP appears under the heading “Reconciliation of GAAP Net Income (Loss) to Non-GAAP Measures.”

(in thousands of dollars)	For the Year Ended December 31, 2013			For the Year Ended December 31, 2012			For the Year Ended December 31, 2011		
	Real Estate Revenue	Operating Expenses	Net Operating Income	Real Estate Revenue	Operating Expenses	Net Operating Income	Real Estate Revenue	Operating Expenses	Net Operating Income
Same Store	\$465,473	\$(191,141)	\$274,332	\$450,280	\$(182,851)	\$267,429	\$448,340	\$(185,567)	\$262,773
Non Same Store	16,464	(7,386)	9,078	35,031	(17,077)	17,954	37,170	(17,549)	19,621
Total	\$481,937	\$(198,527)	\$283,410	\$485,311	\$(199,928)	\$285,383	\$485,510	\$(203,116)	\$282,394

	% Change 2012 to 2013			% Change 2011 to 2012		
	Same Store	Total		Same Store	Total	
Real estate revenue	3.4	% (0.7))% 0.4	% —	%	
Operating expenses	4.5	% (0.7))% (1.5)	% (1.6))%	
NOI	2.6	% (0.7))% 1.8	% 1.1	%	

Total NOI decreased by \$2.0 million, or 0.7%, in 2013 as compared to 2012. NOI from Non Same Store properties decreased \$8.9 million. This decrease consisted of a decrease of \$12.0 million in NOI from properties in discontinued operations (properties sold), and was partially offset by \$3.3 million of NOI from 907 Market Street which we acquired in 2013. Same Store NOI increased \$6.9 million. See the “Results of Operations—Discontinued Operations” discussion below for further information about properties in “Non Same Store.” Lease termination revenue was \$1.8 million in 2013 and \$1.9 million in 2012.

Total NOI increased by \$3.0 million, or 1.1%, in 2012 as compared to 2011. Same Store NOI increased \$4.7 million, offset by a \$1.7 million decrease in Non Same Store NOI which was primarily due to discontinued operations. See the “Results of Operations—Discontinued Operations” discussion below for further information about properties in “Non Same Store.” Lease termination revenue was \$1.9 million in each of 2012 and 2011.

Other Income

Other income increased by \$1.4 million, or 26%, in 2013 as compared to 2012 primarily due to an increase of \$0.7 million from historic tax credits and an increase of \$0.6 million in third-party management and leasing fees.

Other income decreased by \$1.2 million, or 18%, in 2012 as compared to 2011 primarily due to a \$1.5 million bankruptcy settlement received in 2011.

General and Administrative Expenses

General and administrative expenses decreased by \$0.6 million, or 1%, in 2013 as compared to 2012. This decrease was primarily due to a decrease of \$1.1 million in executive compensation and benefit costs offset by a \$0.5 million increase in other general and administrative expenses.

General and administrative expenses decreased by \$1.4 million, or 4%, in 2012 as compared to 2011 primarily due to a \$1.0 million decrease in incentive compensation expense and a \$0.3 million decrease in rent expense.

Provision for employee separation expense

Provision for employee separation expense was \$2.3 million in 2013. In 2013, we recorded expense of \$1.9 million in connection with the terms of the amended employment agreement with Ronald Ruben, our Executive Chairman. We

also recorded \$0.3 million in connection with Mr. Rubin's 2013 restricted share award which was amortized through June 7, 2013, the date on which Mr. Rubin became eligible to voluntarily terminate his employment agreement and receive his founder's retirement payment, at which time such restricted shares would vest.

Provision for employee separation expense was \$9.4 million in 2012. In 2012, we recorded \$4.1 million in connection with the separation of Edward A. Glickman, our former President and Chief Operating Officer, \$2.6 million in connection with the amended employment agreement of Mr. Rubin, our Executive Chairman, and \$2.7 million in connection with the separation of certain employees.

No provision for employee separation expense was recorded in 2011.

Impairment of Assets

As further described in the “Overview” section and in note 2 to our consolidated financial statements, in 2011, we recorded impairment of assets of \$24.1 million on North Hanover Mall in Hanover, Pennsylvania. In 2013, we recorded an additional impairment of assets of \$6.3 million on North Hanover Mall. See also “—Discontinued Operations” for a discussion of impairment charges related to Phillipsburg Mall in Phillipsburg, New Jersey and the Chambersburg Mall in Chambersburg, Pennsylvania.

Interest Expense

Interest expense decreased by \$23.4 million, or 19%, in 2013 as compared to 2012. The decrease was primarily due to a \$26.0 million decrease resulting from a lower overall debt balance (an average of \$1,727.8 million in 2013 compared to \$1,995.4 million in 2012) and a lower weighted average effective borrowing rate (5.57% for 2013 as compared to 6.17% for 2012). This decrease was offset by a loss on hedge ineffectiveness of \$2.9 million related to a forward starting swap on the mortgage loan payoff that had been secured by Jacksonville Mall, accelerated amortization of deferred financing costs of \$1.1 million related to the repayment of our 2010 Term Loan and net losses on hedge ineffectiveness of \$0.5 million due to the accelerated amortization in connection with the partial mortgage loan repayments at Logan Valley Mall.

Interest expense decreased by \$5.0 million, or 4%, in 2012 as compared to 2011. The decrease was primarily due to a \$6.9 million decrease resulting from lower overall debt balance (an average of \$1,995.4 million in 2012 compared to \$2,098.7 million in 2011). The lower overall debt balance was primarily due to the repayment of our \$136.9 million in Exchangeable Notes in June 2012 and a \$58.0 million permanent paydown of a portion of the 2010 Term Loan in October 2012, which also resulted in \$0.7 million in accelerated amortization of deferred financing costs. The 2012 interest expense was also affected by a \$1.2 million loss on hedge ineffectiveness that is included in interest expense. Our weighted average effective borrowing rate was 6.17% for 2012 as compared to 6.16% for 2011.

Depreciation and Amortization

Depreciation and amortization expense increased by \$13.0 million, or 10%, in 2013 as compared to 2012, primarily due to:

- an increase of \$10.1 million primarily due to a higher asset base resulting from capital improvements related to new tenants at our properties; and

- an increase of \$3.3 million associated with the April 2013 acquisition of 907 Market Street; partially offset by

- a decrease of \$0.3 million because certain lease intangibles at two properties purchased during 2005 became fully amortized during 2012.

Depreciation and amortization expense decreased by \$0.2 million, or 0%, in 2012 as compared to 2011, primarily due to:

- a decrease of \$2.0 million because certain lease intangibles at three properties purchased during 2004 and 2005 became fully amortized during 2011 and 2012; partially offset by

- an increase of \$1.8 million primarily due to a higher asset base resulting from capital improvements related to new tenants at our properties.

Equity in Income of Partnerships

Equity in income of partnerships increased by \$1.4 million, or 17%, for 2013 compared to 2012 primarily due to an increase in partnership revenue of \$1.7 million and a decrease of \$0.2 million in partnership mortgage interest expense, partially offset by an increase of \$0.5 million in partnership property operating expenses.

Equity in income of partnerships increased by \$1.7 million, or 26%, for 2012 compared to 2011 primarily due to an increase in partnership revenue of \$0.9 million and a decrease of \$0.8 million in depreciation and amortization

expense.

55

Gains on Sales of Real Estate

Gains on sales of real estate were \$1.6 million in 2011, including the following transactions:

- a \$0.7 million gain from the sale of a parcel and related land improvements at Pitney Road Plaza in Lancaster, Pennsylvania; and
 - a \$0.7 million gain from the sale of a condominium interest in Voorhees Town Center in Voorhees, New Jersey.
- There were no gains on sales of real estate in 2013 or 2012.

Discontinued Operations

We have presented as discontinued operations the operating results of Orlando Fashion Square, Phillipsburg Mall, Chambersburg Mall, Paxton Towne Centre, Christiana Center and Commons at Magnolia which are properties that were sold in 2013.

Operating results, gains on sales of discontinued operations and impairment of assets for the properties in discontinued operations were as follows:

(in thousands of dollars)	For the Year Ended		
	December 31,		
	2013	2012	2011
Operating results of:			
Orlando Fashion Square	\$ 330	\$ 627	\$(1,298)
Phillipsburg Mall	(66)	(116)	891)
Chambersburg Mall	536	908	820
Paxton Towne Centre	(101)	1,132	(579)
Christiana Center	1,633	1,557	1,602
Commons at Magnolia	480	519	482
Operating results from discontinued operations	2,812	4,627	1,918
Impairment of assets of discontinued operations	(23,662)	(3,805)	(27,977)
Gains on sales of discontinued operations	78,512	947	—
Income (loss) from discontinued operations	\$ 57,662	\$ 1,769	\$(26,059)

As further described in the “Overview” section and note 2 to our consolidated financial statements, we recorded \$23.7 million and \$3.8 million of impairment of assets on discontinued operations for 2013 and 2012, respectively.

Gains on Sales of Discontinued Operations

Gains on sales of discontinued operations were \$78.5 million in 2013 due to:

- a \$40.8 million gain on sale of Christiana Center;
- a \$32.7 million gain on sale of Paxton Towne Centre;
- a \$4.3 million gain on sale of Commons at Magnolia; and
- a \$0.7 million gain on sale of Orlando Fashion Square.

Gains on sales of discontinued operations were \$0.9 million in 2012 due to gain on the sale of our remaining interest in Northeast Tower Center.

There were no gains on sales of discontinued operations in 2011.

Funds From Operations

The National Association of Real Estate Investment Trusts (“NAREIT”) defines Funds From Operations (“FFO”), which is a non-GAAP measure commonly used by REITs, as net income excluding gains and losses on sales of operating properties, extraordinary items (computed in accordance with GAAP) and significant non-recurring events that materially distort the comparative measurement of company performance over time; plus real estate depreciation and amortization; and after adjustments for unconsolidated partnerships and joint ventures to reflect funds from operations on the same basis. We compute FFO in accordance with standards established by NAREIT, which may not be comparable to FFO reported by other REITs that

do not define the term in accordance with the current NAREIT definition, or that interpret the current NAREIT definition differently than we do. NAREIT's established guidance provides that excluding impairment write downs of depreciable real estate is consistent with the NAREIT definition.

FFO is a commonly used measure of operating performance and profitability among REITs. We use FFO and FFO per diluted share and unit of limited partnership interest in our operating partnership ("OP Unit") in measuring our performance against our peers and as one of the performance measures for determining incentive compensation amounts earned under certain of our performance-based executive compensation programs.

FFO does not include gains and losses on sales of operating real estate assets or impairment write-downs of depreciable real estate, which are included in the determination of net income in accordance with GAAP.

Accordingly, FFO is not a comprehensive measure of our operating cash flows. In addition, since FFO does not include depreciation on real estate assets, FFO may not be a useful performance measure when comparing our operating performance to that of other non-real estate commercial enterprises. We compensate for these limitations by using FFO in conjunction with other GAAP financial performance measures, such as net income and net cash provided by operating activities, and other non-GAAP financial performance measures, such as NOI. FFO does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (determined in accordance with GAAP) as an indication of our financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of our liquidity, nor is it indicative of funds available for our cash needs, including our ability to make cash distributions. We believe that net income is the most directly comparable GAAP measurement to FFO.

We also present Funds From Operations, as adjusted, and Funds From Operations per diluted share and OP Unit, as adjusted, which are non-GAAP measures, to show the effect of provision for employee separation expense, loss on hedge ineffectiveness and accelerated amortization of deferred financing costs, which had a significant effect on our results of operations, but are not, in our opinion, indicative of our operating performance. We believe that FFO is helpful to management and investors as a measure of operating performance because it excludes various items included in net income that do not relate to or are not indicative of operating performance, such as gains on sales of operating real estate and depreciation and amortization of real estate, among others. We believe that Funds From Operations, as adjusted, is helpful to management and investors as a measure of operating performance because it adjusts FFO to exclude items that management does not believe are indicative of its operating performance, specifically provision for employee separation expense, loss on hedge ineffectiveness and accelerated amortization of deferred financing costs.

The following table presents FFO and FFO per diluted share and OP Unit, and Funds From Operations, as adjusted, and Funds From Operations per diluted share and OP Unit, as adjusted, for the years ended December 31, 2013, 2012 and 2011:

(in thousands of dollars, except per share amounts)	For the Year Ended December 31,				
	2013	% Change 2012 to 2013	2012	% Change 2011 to 2012	2011
Funds from operations ⁽¹⁾	\$ 121,101	26.7	% \$ 95,617	(9.4)%	\$ 105,585
Provision for employee separation expense	2,314		9,437		—
Loss on hedge ineffectiveness	3,409		1,162		—

Weighted average effect of full conversion of OP Units	2,194	2,310	2,329
Effect of common share equivalents	876	1,131	502
Total weighted average shares outstanding, including OP Units	66,732	58,563	57,470

57

(1) In accordance with NAREIT guidance regarding the definition of FFO, impairment losses of depreciable real estate are excluded from FFO. FFO, Funds From Operations, as adjusted, FFO per diluted share and OP Unit and Funds From Operations per diluted share and OP Unit, as adjusted, for all periods presented reflect this NAREIT guidance.

(2) In 2013, accelerated amortization of deferred financing costs includes \$0.9 million from 2010 Term Loan repayments and \$0.2 million from mortgage loan repayments. In 2012, accelerated amortization of deferred financing costs includes \$0.7 million from a 2010 Term Loan repayment.

FFO was \$121.1 million for 2013, an increase of \$25.5 million, or 26.7%, compared to \$95.6 million for 2012. This increase was primarily due to:

- a decrease of \$28.6 million in interest expense (including our proportionate share of interest expense of our partnership properties and excluding the effects of loss on hedge ineffectiveness and accelerated amortization of deferred financing costs) resulting from lower overall debt balances and lower average interest rates;
- an increase of \$6.9 million in Same Store NOI (presented using the “proportionate-consolidation” method; See “—Net Operating Income”);
- a decrease of \$7.1 million in provision for employee separation expense;
- an increase of \$3.3 million in NOI from 907 Market Street, which was acquired in April 2013; and
- a decrease of \$0.6 million in general and administrative expense; partially offset by
- a decrease of \$12.0 million in NOI related to properties in discontinued operations;
- an increase of \$7.9 million in preferred share dividends resulting from the Series A Preferred Shares issued in April 2012 and the Series B Preferred Shares issued on October 2012;
- an increase of \$3.4 million in interest expense due to net loss on hedge ineffectiveness that was recorded in interest expense; and
- an increase of \$1.1 million of accelerated deferred financing costs primarily related to the permanent repayment of the 2010 Term Loan in 2013.

FFO per diluted share increased \$0.18 per share to \$1.81 per share for 2013, compared to \$1.63 per share for 2012. FFO per diluted share increased by \$0.43 per share due to the \$25.5 million increase in FFO, partially offset by a decrease of \$0.25 per share primarily due to the weighted average effect of the 11,500,000 common shares issued in May 2013 and other common share issuances since January 1, 2012.

FFO was \$95.6 million for 2012, a decrease of \$10.0 million, or 9.4%, compared to \$105.6 million for 2011. This decrease was primarily due to:

- provision for employee separation expense of \$9.4 million recorded in 2012;
- preferred dividends of \$8.0 million related to the Series A Preferred Shares issued in April 2012 and the Series B Preferred Shares issued in October 2012;
- a \$1.5 million bankruptcy settlement received in 2011 in connection with our investment in the Valley View Downs project;
- a \$1.2 million loss on hedge ineffectiveness in 2012;
- accelerated amortization of \$0.7 million of financing costs recorded in 2012 in connection with the repayment of a portion of the 2010 Credit Facility; and
- gains on sales of non-operating real estate of \$0.9 million in 2011; partially offset by
- a decrease in interest expense of \$7.9 million (including our proportionate share of interest expense of our partnership properties and excluding the effects of loss on hedge ineffectiveness and accelerated amortization of deferred financing costs) in 2012 compared to 2011 resulting from lower overall debt balances and lower average interest rates; and
- an increase of \$3.0 million in NOI (presented using the “proportionate-consolidation” method; See “—Net Operating Income”).

FFO per diluted share decreased \$0.21 per share to \$1.63 per share for 2012, compared to \$1.84 per share for 2011.

FFO per diluted share decreased by \$0.18 per share due to the \$10.0 million decrease in FFO and a decrease of \$0.03

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K
per share primarily due to the weighted average effect of common share issuances since January 1, 2011.

58

Reconciliation of GAAP Net Income (Loss) to Non-GAAP Measures

The preceding discussions compare our Consolidated Statements of Operations results for different periods based on GAAP. Also, the non-GAAP measures of NOI and FFO have been discussed. We believe that NOI is helpful to management and investors as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time. We believe that FFO is helpful to management and investors as a measure of operating performance because it excludes various items included in net income that do not relate to or are not indicative of operating performance, such as gains on sales of operating real estate and depreciation and amortization of real estate, among others. We believe that Funds From Operations as adjusted is helpful to management and investors as a measure of operating performance because it adjusts FFO to exclude items that management does not believe are indicative of its ongoing operations, specifically provision for employee separation expense, loss on hedge ineffectiveness and accelerated amortization of deferred financing costs. FFO is a commonly used measure of operating performance and profitability among REITs, and we use FFO, FFO per diluted share and OP Unit, Funds From Operations as adjusted and Funds From Operations per diluted share and OP Unit as adjusted as supplemental non-GAAP measures to compare our performance for different periods to that of our industry peers.

The following information is provided to reconcile NOI and FFO, which are non-GAAP measures, to net income (loss), a GAAP measure:

(in thousands of dollars)	For the Year Ended December 31, 2013

LIQUIDITY AND CAPITAL RESOURCES

This “Liquidity and Capital Resources” section contains certain “forward-looking statements” that relate to expectations and projections that are not historical facts. These forward-looking statements reflect our current views about our future liquidity and capital resources, and are subject to risks and uncertainties that might cause our actual liquidity and capital resources to differ materially from the forward-looking statements. Additional factors that might affect our liquidity and capital resources include those discussed in the section entitled “Item 1A. Risk Factors.” We do not intend to update or revise any forward-looking statements about our liquidity and capital resources to reflect new information, future events or otherwise.

Capital Resources

We expect to meet our short-term liquidity requirements, including distributions to shareholders, recurring capital expenditures, tenant improvements and leasing commissions, but excluding acquisitions and redevelopment and development projects, generally through our available working capital and net cash provided by operations, and subject to the terms and conditions of our 2013 Revolving Facility and our 2014 Term Loans (collectively, the “Credit Agreements”). We believe that our net cash provided by operations will be sufficient to allow us to make any distributions necessary to enable us to continue to qualify as a REIT under the Internal Revenue Code of 1986, as amended. The aggregate distributions made to preferred shareholders, common shareholders and OP Unit holders for 2013 were \$65.8 million, based on distributions of \$2.0625 per Series A Preferred Share, distributions of \$1.8438 per Series B Preferred Share and \$0.74 per common share and OP Unit. For the first quarter of 2014, we have announced a distribution of \$0.20 per common share and OP Unit. The following are some of the factors that could affect our cash flows and require the funding of future cash distributions, recurring capital expenditures, tenant improvements or leasing commissions with sources other than operating cash flows:

adverse changes or prolonged downturns in general, local or retail industry economic, financial, credit or capital market or competitive conditions, leading to a reduction in real estate revenue or cash flows or an increase in expenses;

deterioration in our tenants’ business operations and financial stability, including anchor or non anchor tenant bankruptcies, leasing delays or terminations, or lower sales, causing deferrals or declines in rent, percentage rent and cash flows;

inability to achieve targets for, or decreases in, property occupancy and rental rates, resulting in lower or delayed real estate revenue and operating income;

increases in operating costs, including increases that cannot be passed on to tenants, resulting in reduced operating income and cash flows; and

increases in interest rates, resulting in higher borrowing costs.

We expect to meet certain of our longer-term requirements, such as obligations to fund redevelopment and development projects, certain capital requirements (including scheduled debt maturities), future property and portfolio acquisitions, renovations, expansions and other non-recurring capital improvements, through a variety of capital sources, subject to the terms and conditions of our Credit Agreements.

In January 2012, the SEC declared effective our \$1.0 billion universal shelf registration statement. We may use the availability under our shelf registration statement to offer and sell common shares of beneficial interest, preferred shares and various types of debt securities, among other types of securities, to the public. In April 2012, we issued \$115.0 million of Series A Preferred Shares and in October 2012, we issued \$86.3 million of Series B Preferred Shares in underwritten public offerings under this registration statement. In May 2013, we issued 11,500,000 common shares in an underwritten public offering at \$20.00 per share. However, in the future, we may be unable to issue securities under the shelf registration statement, or otherwise, on terms that are favorable to us, or at all.

2013 Revolving Facility, as amended

In April 2013, PREIT, PREIT Associates and PRI (collectively, the “Borrower”) entered into a Credit Agreement (the “2013 Revolving Facility”) with Wells Fargo Bank, National Association, and the other financial institutions signatory

thereto, for a \$400.0 million senior unsecured revolving credit facility. The 2013 Revolving Facility replaced the previously existing 2010 Credit Facility. In December 2013, we amended the 2013 Revolving Facility to make certain terms of the 2013 Revolving Facility consistent with the terms of the 2014 Term Loans (discussed below). All capitalized terms used in this "Liquidity and Capital Resources" section and not otherwise defined herein have the meanings ascribed to such terms in the 2013 Revolving Facility, as amended.

As of December 31, 2013, \$130.0 million was outstanding under our 2013 Revolving Facility and the unused portion that was available to us was \$270.0 million.

The weighted average interest rate on outstanding 2013 Revolving Facility borrowings as of December 31, 2013 was 1.87%. Interest expense related to the 2013 Revolving Facility was \$2.5 million for the year ended December 31, 2013. Deferred financing fee amortization associated with the 2013 Revolving Facility was \$1.1 million for the year ended December 31, 2013.

The initial maturity of the 2013 Revolving Facility is April 17, 2016, and the Borrower has options for two one-year extensions of the initial maturity date, subject to certain conditions and to the payment of extension fees of 0.15% and 0.20% of the Facility Amount for the first and second options, respectively.

The Borrower has the option to increase the maximum amount available under the 2013 Revolving Facility, through an accordion option, from \$400.0 million to as much as \$600.0 million, in increments of \$5.0 million (with a minimum increase of \$25.0 million), based on Wells Fargo Bank's ability to obtain increases in Revolving Commitments from the current lenders or Revolving Commitments from new lenders. No increase to the maximum amount available under the 2013 Revolving Facility has been exercised by the Borrower.

Amounts borrowed under the 2013 Revolving Facility bear interest at a rate between 1.50% and 2.05% per annum, depending on PREIT's leverage, in excess of LIBOR, with no floor, as set forth in the table below. The rate in effect at December 31, 2013 was 1.70% per annum in excess of LIBOR. In determining PREIT's leverage (the ratio of Total Liabilities to Gross Asset Value), the capitalization rate used to calculate Gross Asset Value is (a) 6.50% for each Property having an average sales per square foot of more than \$500 for the most recent period of 12 consecutive months, and (b) 7.50% for any other Property.

Level	Ratio of Total Liabilities to Gross Asset Value	Applicable Margin
1	Less than 0.450 to 1.00	1.50 %
2	Equal to or greater than 0.450 to 1.00 but less than 0.500 to 1.00	1.70 %
3	Equal to or greater than 0.500 to 1.00 but less than 0.550 to 1.00	1.85 %
4	Equal to or greater than 0.550 to 1.00	2.05 %

In the event that we seek and obtain an investment grade credit rating and notify the lenders, alternative interest rates would apply. The unused portion of the 2013 Revolving Facility is subject to a facility fee of 0.30% per annum. In the event that we seek and obtain an investment grade credit rating, alternative facility fees would apply.

PREIT and the subsidiaries of PREIT that either (1) account for more than 2.5% of adjusted Gross Asset Value (other than an Excluded Subsidiary), (2) own or lease an Unencumbered Property, or (3) own, directly or indirectly, a subsidiary described in clause (2) will serve as guarantors for funds borrowed under the 2013 Credit Facility. In the event that we seek and obtain an investment grade credit rating, we may request that a subsidiary guarantor be released, unless such guarantor becomes obligated in respect of the debt of the Borrower or another subsidiary or owns Unencumbered Property or incurs recourse debt.

PREIT may not permit the amount of the Gross Asset Value attributable to assets directly owned by the Borrowers and the guarantors to be less than 95% of Gross Asset Value excluding assets owned by Excluded Subsidiaries or Unconsolidated Affiliates.

The 2013 Revolving Facility and the 2014 Term Loans (discussed below) are cross-defaulted with one another.

The 2013 Revolving Facility and the 2014 Term Loans contain certain affirmative and negative covenants which are identical and which are described in detail below in the section entitled "Identical covenants contained in the 2013

Revolving Facility and 2014 Term Loans.” As of December 31, 2013, the Borrower was in compliance with all such financial covenants.

The Borrower may prepay the 2013 Revolving Facility at any time without premium or penalty, subject to reimbursement obligations for the lenders’ breakage costs for LIBOR borrowings. The Borrower must repay the entire principal amount outstanding under the 2013 Revolving Facility at the end of its term, as the term may have been extended.

Upon the expiration of any applicable cure period following an event of default, the lenders may declare all of the obligations in connection with the 2013 Revolving Facility immediately due and payable, and the Commitments of the lenders to make further loans under the 2013 Revolving Facility will terminate. Upon the occurrence of a voluntary or involuntary bankruptcy proceeding of PREIT, PREIT Associates, PRI, any Material Subsidiary, any subsidiary that owns or leases an Unencumbered Property or certain other subsidiaries, all outstanding amounts will automatically become immediately due and payable and the Commitments of the lenders to make further loans will automatically terminate.

The Borrower used the initial proceeds from the 2013 Revolving Facility to repay both \$97.5 million outstanding under the 2010 Term Loan and \$95.0 million outstanding under the 2010 Revolving Facility.

2014 Term Loans

On January 8, 2014, the Borrower entered into two unsecured term loans in the initial aggregate amount of \$250.0 million, comprised of:

(1) a 5 Year Term Loan Agreement (the “5 Year Term Loan”) with Wells Fargo Bank, National Association, U.S. Bank National Association and the other financial institutions signatory thereto, for a \$150.0 million senior unsecured 5 year term loan facility; and

(2) a 7 Year Term Loan Agreement (the “7 Year Term Loan” and, together with the 5 Year Term Loan, the “2014 Term Loans”) with Wells Fargo Bank, National Association, Capital One, National Association and the other financial institutions signatory thereto, for a \$100.0 million senior unsecured 7 year term loan facility.

Amounts borrowed under the 2014 Term Loans bear interest at the rate specified below per annum, depending on PREIT’s leverage, in excess of LIBOR, with no floor. In determining PREIT’s leverage (the ratio of Total Liabilities to Gross Asset Value), the capitalization rate used to calculate Gross Asset Value is (a) 6.50% for each Property having an average sales per square foot of more than \$500 for the most recent period of 12 consecutive months, and (b) 7.50% for any other Property.

Level	Ratio of Total Liabilities to Gross Asset Value	5 Year Term Loan Applicable Margin	7 Year Term Loan Applicable Margin
1	Less than 0.450 to 1.00	1.35%	1.80%
2	Equal to or greater than 0.450 to 1.00 but less than 0.500 to 1.00	1.45%	1.95%
3	Equal to or greater than 0.500 to 1.00 but less than 0.550 to 1.00	1.60%	2.15%
4	Equal to or greater than 0.550 to 1.00	1.90%	2.35%

The initial rate in effect under the 5 Year Term Loan was 1.45% per annum in excess of LIBOR. The initial rate in effect under the 7 Year Term Loan was 1.95% per annum in excess of LIBOR.

If PREIT seeks and obtains an investment grade credit rating and so notifies the lenders under the respective 2014 Term Loans, alternative interest rates would apply.

The table set forth below presents the initial amount outstanding, initial interest rate (inclusive of the initial LIBOR spread) in effect and the maturity dates of the 2014 Term Loans:

(in millions of dollars)	5 Year Term Loan	7 Year Term Loan	
Total facility	\$150.0	\$100.0	
Initial borrowing	\$100.0	\$30.0	
Initial interest rate	1.61	% 2.11	%
Maturity date	January 2019	January 2021	

Under the 2014 Term Loans, there is a deferred draw feature that enables PREIT to borrow the amounts specified in each of the term loans over a period of up to one year. From the effective date until either one year later or until the maximum amount under the respective loan is borrowed (or until the lenders' commitments are otherwise terminated), the unused portion of the 2014 Term Loans is subject to a fee of 0.20%, in the case of the 5 Year Term Loan, and 0.35%, in the case of the 7 Year Term Loan, per annum. There is an additional commitment termination fee under the 7 Year Term Loan if the maximum amount is not borrowed within one year.

PREIT and the subsidiaries of PREIT that either (1) account for more than 2.5% of adjusted Gross Asset Value (other than an Excluded Subsidiary), (2) own or lease an Unencumbered Property, (3) own, directly or indirectly, a subsidiary described in clause (2), or (4) are guarantors under the 2013 Revolving Facility will serve as guarantors for funds borrowed under the 2014

Term Loans.

The Borrower has the option to increase the maximum amount available under the 5 Year Term Loan, through an accordion option (subject to certain conditions), from \$150.0 million to as much as \$300.0 million, in increments of \$5.0 million (with a minimum increase of \$25.0 million), based on Wells Fargo Bank's ability to obtain increases in commitments from the current lenders or from new lenders.

The Borrower has the option to increase the maximum amount available under the 7 Year Term Loan, through an accordion option (subject to certain conditions), from \$100.0 million to as much as \$200.0 million, in increments of \$5.0 million (with a minimum increase of \$25.0 million), based on Wells Fargo Bank's ability to obtain increases in commitments from the current lenders or from new lenders.

The 2014 Term Loans and 2013 Revolving Facility contain certain affirmative and negative covenants which are identical and which are described in detail below in the section entitled "Identical covenants contained in the 2013 Revolving Facility and 2014 Term Loans." The 2014 Term Loans also contain an additional covenant that PREIT may not permit the amount of the Gross Asset Value attributable to assets directly owned by PREIT, PREIT Associates, PRI and the guarantors to be less than 95% of Gross Asset Value excluding assets owned by Excluded Subsidiaries or Unconsolidated Affiliates.

The Borrower may prepay the 5 Year Term Loan at any time without premium or penalty, subject to reimbursement obligations for the lenders' breakage costs for LIBOR borrowings. The payment of the 7 Year Term Loan prior to its maturity is subject to reimbursement obligations for the lenders' breakage costs for LIBOR borrowings and a declining prepayment penalty ranging from 3% for one year after closing, to 2% after two years, to 1% after three years and without penalty thereafter.

Upon the expiration of any applicable cure period following an event of default, the lenders may declare all of the obligations in connection with the 2014 Term Loans immediately due and payable, and before the one year anniversary of the effective date, the commitments of the lenders to make further loans, if any, under the 2014 Term Loans would terminate. Upon the occurrence of a voluntary or involuntary bankruptcy proceeding of PREIT, PREIT Associates, PRI, any material subsidiary, any subsidiary that owns or leases an Unencumbered Property or certain other subsidiaries, all outstanding amounts would automatically become immediately due and payable and, before the one year anniversary of the effective date, the commitments of the lenders to make further loans will automatically terminate.

PREIT may use the proceeds of the 2014 Term Loans for the repayment of debt, for the payment of development or redevelopment costs and for working capital and general corporate purposes.

Identical covenants contained in the 2013 Revolving Facility and 2014 Term Loans

The 2013 Revolving Facility and 2014 Term Loans contain certain affirmative and negative covenants which are identical, including, without limitation, requirements that PREIT maintain, on a consolidated basis: (1) minimum Tangible Net Worth of not less than 75% of the Company's tangible net worth on December 31, 2012, plus 75% of the Net Proceeds of all Equity Issuances effected at any time after December 31, 2012; (2) maximum ratio of Total Liabilities to Gross Asset Value of 0.60:1, provided that it will not be a Default if the ratio exceeds 0.60:1 but does not exceed 0.625:1 for more than two consecutive quarters on more than two occasions during the term; (3) minimum ratio of Adjusted EBITDA to Fixed Charges of 1.45:1 on or before June 30, 2014, or 1.50:1 thereafter; (4) minimum Unencumbered Debt Yield of 12.0%; (5) minimum Unencumbered NOI to Unsecured Interest Expense of 1.75:1; (6) maximum ratio of Secured Indebtedness to Gross Asset Value of 0.60:1; (7) maximum Investments in unimproved real estate and predevelopment costs not in excess of 5.0% of Gross Asset Value; (8) maximum Investments in

Persons other than Subsidiaries, Consolidated Affiliates and Unconsolidated Affiliates not in excess of 5.0% of Gross Asset Value; (9) maximum Mortgages in favor of the Borrower or any other Subsidiary not in excess of 5.0% of Gross Asset Value; (10) the aggregate value of the Investments and the other items subject to the preceding clauses (7) through (9) not in excess of 10.0% of Gross Asset Value; (11) maximum Investments in Consolidation Exempt Entities not in excess of 25.0% of Gross Asset Value; (12) maximum Projects Under Development not in excess of 15.0% of Gross Asset Value; (13) the aggregate value of the Investments and the other items subject to the preceding clauses (7) through (9) and (11) and (12) not in excess of 35.0% of Gross Asset Value; and (14) Distributions may not exceed (A) with respect to our preferred shares, the amounts required by the terms of the preferred shares, and (B) with respect to our common shares, the greater of (i) 95.0% of Funds From Operations (FFO) and (ii) 110% of REIT taxable income for a fiscal year. These covenants and restrictions limit PREIT's ability to incur additional indebtedness, grant liens on assets and enter into negative pledge agreements, merge, consolidate or sell all or substantially all of its assets and enter into certain transactions with affiliates. The 2013 Revolving Facility and 2014 Term Loans are subject to customary events of default and are cross-defaulted with one another.

Common Share Offering

In May 2013, we issued 11,500,000 common shares in a public offering at \$20.00 per share. We received net proceeds from the offering of \$220.5 million after deducting payment of the underwriting discount of \$0.80 per share and offering expenses. We used a portion of the net proceeds from this offering to repay all \$192.5 million of then-outstanding borrowings under the 2013 Revolving Facility.

Preferred Share Offerings

In April 2012, we issued 4,600,000 8.25% Series A Cumulative Redeemable Perpetual Preferred Shares (the “Series A Preferred Shares”) in a public offering at \$25.00 per share. We received net proceeds from the offering of \$110.9 million after deducting payment of the underwriting discount of \$3.6 million (\$0.7875 per Series A Preferred Share) and estimated offering expenses of \$0.5 million. We used a portion of the net proceeds from this offering to repay all \$30.0 million of then-outstanding borrowings under the 2010 Revolving Facility.

In October 2012, we issued 3,450,000 7.375% Series B Cumulative Redeemable Perpetual Preferred Shares (the “Series B Preferred Shares”) in a public offering at \$25.00 per share. We received net proceeds from the offering of \$83.3 million after deducting payment of the underwriting discount of \$2.7 million (\$0.7875 per Series B Preferred Share) and estimated offering expenses of \$0.3 million. We used a portion of the net proceeds from this offering to repay all \$15.0 million of then-outstanding borrowings under the 2010 Revolving Facility and \$58.0 million of then-outstanding borrowings under the 2010 Term Loan.

We may not redeem the Series A Preferred Shares or the Series B Preferred Shares before April 20, 2017 and October 11, 2017, respectively, except to preserve our status as a REIT or upon the occurrence of a Change of Control, as defined in the Trust Agreement addendums designating the Series A and Series B Preferred Shares, respectively. On and after April 20, 2017 and October 11, 2017, we may redeem any or all of the Series A Preferred Shares or the Series B Preferred Shares, respectively, at \$25.00 per share plus any accrued and unpaid dividends. In addition, upon the occurrence of a Change of Control, we may redeem any or all of the Series A Preferred Shares or the Series B Preferred Shares for cash within 120 days after the first date on which such Change of Control occurred at \$25.00 per share plus any accrued and unpaid dividends. The Series A Preferred Shares and the Series B Preferred Shares have no stated maturity, are not subject to any sinking fund or mandatory redemption and will remain outstanding indefinitely unless we redeem or otherwise repurchase them or they are converted.

As of December 31, 2012, there was \$0.7 million in accumulated but unpaid dividends relating to the Series A and Series B Preferred Shares. This amount was deducted from net loss to determine net loss attributable to common shareholders.

Mortgage Loan Activity—Consolidated Properties

The following table presents the mortgage loans we have entered into or extended since January 1, 2012 related to our consolidated properties:

Financing Date	Property	Amount Financed or Extended (in millions of dollars)	Stated Interest Rate	Maturity
2013 Activity:				
February	Francis Scott Key Mall ⁽¹⁾⁽²⁾	\$62.6	LIBOR plus 2.60%	March 2018
February	Lycoming Mall ⁽³⁾	35.5	LIBOR plus 2.75%	March 2018
February	Viewmont Mall ⁽¹⁾	48.0	LIBOR plus 2.60%	March 2018
March	Dartmouth Mall	67.0	3.97% fixed	April 2018
September	Logan Valley Mall ⁽⁴⁾	51.0	LIBOR plus 2.10%	September 2014
December	Wyoming Valley Mall ⁽⁵⁾	78.0	5.17% fixed	December 2023
2012 Activity:				
January	New River Valley Mall ⁽⁶⁾	28.1	LIBOR plus 3.00%	January 2019
February	Capital City Mall	65.8	5.30% fixed	March 2022

Edgar Filing: PENNSYLVANIA REAL ESTATE INVESTMENT TRUST - Form 10-K

July	Christiana Center ⁽⁷⁾	50.0	4.64% fixed	August 2022
August	Cumberland Mall	52.0	4.40% fixed	August 2022
August	Cherry Hill Mall ⁽⁸⁾	300.0	3.90% fixed	September 2022

65

- (1) Interest only payments.
- (2) The mortgage loan may be increased by \$7.9 million subject to certain prescribed conditions.
The initial amount of the mortgage loan was \$28.0 million. We took additional draws of \$5.0 million in October 2009 and \$2.5 million in March 2010. The mortgage loan was amended in February 2013 to lower the interest rate
- (3) to LIBOR plus 2.75% and to extend the maturity date to March 2018. In February 2013, the unamortized balance of the mortgage loan was \$33.4 million before we borrowed an additional \$2.1 million to bring the total amount financed to \$35.5 million.
The initial amount of the mortgage loan was \$68.0 million. We repaid \$5.0 million in September 2011 and \$12.0
- (4) million in September 2013. We exercised our right under the loan in September 2013 to extend the maturity date to September 2014.
- (5) Interest only payments until March 2015. Principal and interest payments commencing in April 2015.
Extension option modified the mortgage rate and payment terms. Interest only payments for the first five years.
- (6) Principal and interest commence January 2017 based on a 25 year amortization schedule, with a balloon payment due in January 2019.
- (7) The property was sold in September 2013 and the buyer assumed the remaining \$49.2 million mortgage loan.
- (8) Interest only payments for the first two years. Principal and interest payments commencing on October 1, 2014, with a balloon payment due in September 2022.

Other 2013 Activity

In February 2013, we repaid a \$53.2 million mortgage loan on Moorestown Mall in Moorestown, New Jersey using \$50.0 million from our 2010 Revolving Facility and \$3.2 million from available working capital.

In May 2013, we repaid a \$56.3 million mortgage loan on Jacksonville Mall in Jacksonville, North Carolina using \$35.0 million from our 2013 Revolving Facility and \$21.3 million from available working capital. See note 6 to our consolidated financial statements for additional information on the \$2.9 million loss on hedge ineffectiveness that was recorded during the three months ended June 30, 2013 in connection with this transaction.

In September 2013, we repaid a \$65.0 million mortgage loan on Wyoming Valley Mall in Wilkes-Barre, Pennsylvania using \$65.0 million from our 2013 Revolving Facility.

In October 2013, we repaid a \$66.9 million mortgage loan on Exton Square Mall in Exton, Pennsylvania using \$60.0 million from our 2013 Revolving Facility and \$6.9 million from available working capital.

In December 2013, we repaid a \$42.2 million mortgage loan on Beaver Valley Mall in Monaca, Pennsylvania using proceeds from the December 2013 financing of Wyoming Valley Mall.

Mortgage Loans

Our mortgage loans, which are secured by 18 of our consolidated properties, are due in installments over various terms extending to the year 2023. Twelve of these mortgage loans bear interest at fixed interest rates that range from 3.90% to 6.34% and had a weighted average interest rate of 5.05% at December 31, 2013. Six of our mortgage loans bear interest at variable rates and had a weighted average interest rate of 2.68% at December 31, 2013. The weighted average interest rate of all consolidated mortgage loans was 4.65% at December 31, 2013. Mortgage loans for properties owned by unconsolidated partnerships are accounted for in "Investments in partnerships, at equity" and "Distributions in excess of partnership investments," and are not included in the table below.

The following table outlines the timing of principal payments and balloon payments pursuant to the terms of our mortgage loans on our consolidated properties as of December 31, 2013:

(in thousands of dollars)	Payments by Period					
	Total	2014	2015	2016	2017-2018	Thereafter
Principal payments	\$ 124,929	\$ 17,457	\$ 22,198	\$ 13,321	\$ 24,476	\$ 47,477
Balloon payments ⁽¹⁾	1,377,721	51,000	270,799	243,745	291,532	520,645
Total	\$ 1,502,650	\$ 68,457	\$ 292,997	\$ 257,066	\$ 316,008	\$ 568,122

⁽¹⁾The maturity date for the balloon payment due in 2014 may be extended pursuant to the terms of the applicable loan agreement.

Contractual Obligations

The following table presents our consolidated aggregate contractual obligations as of December 31, 2013 for the periods presented:

(in thousands of dollars)	Total	2014	2015	2016	2017-2018	Thereafter
Mortgage loans	\$ 1,502,650	\$ 68,457	\$ 292,997	\$ 257,066	\$ 316,008	\$ 568,122
2013 Revolving Facility	130,000	—	—	130,000	—	—
Interest on indebtedness ⁽¹⁾	346,463	72,241	70,702	43,865	65,610	94,045
Operating leases	9,800	2,111	1,929	1,691	2,917	1,152
Ground leases	41,824	558	558	552	1,070	39,086
Development and redevelopment commitments ⁽²⁾	1,713	1,713	—	—	—	—
Total	\$ 2,032,450	\$ 145,080	\$ 366,186	\$ 433,174	\$ 385,605	\$ 702,405

⁽¹⁾Includes payments expected to be made, including those in connection with interest rate swap agreements.

⁽²⁾The timing of the payments of these amounts is uncertain. We expect that the majority of such payments will be made prior to December 31, 2014, but cannot provide any assurance that changed circumstances at these projects will not delay the settlement of these obligations.

Mortgage Loan Activity—Unconsolidated Properties

The following table presents the mortgage loans secured by our unconsolidated properties entered into since January 1, 2012:

Financing Date	Property	Amount Financed or Extended (in millions of dollars)	Stated Interest Rate	Maturity
2012 Activity:				
July	Pavilion East ⁽¹⁾	\$9.4	LIBOR plus 2.75%	August 2017

⁽¹⁾The unconsolidated entity that owns Pavilion East entered into the mortgage loan. Our interest in the unconsolidated entity is 40%. The mortgage loan has a term of five years.

Interest Rate Derivative Agreements

As of December 31, 2013, we had entered into six interest rate swap agreements with a weighted average interest swap rate of 1.61% on a notional amount of \$198.6 million maturing on various dates through January 1, 2018. We entered into these interest rate swap agreements in order to hedge the interest payments associated with our issuances

of variable rate long term debt. We assessed the effectiveness of these swap agreements as hedges at inception and do so on a quarterly basis. On December 31, 2013, except as set forth below, we considered these interest rate swap agreements to be highly effective as cash flow hedges. The interest rate swap agreements are net settled monthly.

In January 2014, we entered into six forward starting interest rate swap agreements with a weighted average interest swap rate of 1.78% on a notional amount of \$130.0 million, each with an effective date of February 3, 2014 and each maturing on January 2, 2019. We entered into these forward starting swap agreements in order to hedge the interest payments associated with our initial borrowings under our 2014 Term Loans.

In the year ended December 31, 2013, we recorded net losses on hedge ineffectiveness of \$3.4 million. We recorded \$2.9 million in net losses on hedge ineffectiveness relating to a forward starting swap that was cash settled in 2008 in connection with the May 2013 Jacksonville Mall mortgage loan repayment. The mortgage loan repayment made it probable that the hedged transaction identified in our original hedge documentation would not occur, and we therefore reclassified \$2.9 million from "Accumulated other comprehensive income (loss)" to "Interest expense, net." We also recorded \$0.5 million in net losses on hedge ineffectiveness due to the accelerated amortization of \$0.5 million in connection with the partial mortgage loan repayments at Logan Valley Mall.

In the year ended December 31, 2012, we recorded net losses on hedge ineffectiveness of \$1.2 million. As the result of our permanent paydown of a portion of our 2010 Credit Facility in 2012 and expected repayments of mortgage loans secured by properties expected to be sold in 2013, we anticipated that we would not have sufficient 1-month LIBOR based interest payments to meet the entire swap notional amount related to three of our swaps. Therefore, it was probable that a portion of the hedged forecasted transactions (1-month LIBOR interest payments) associated with the three swaps would not occur by the end of the originally specified time period as documented at the inception of the hedging relationships. As such, previously deferred losses in other comprehensive income in the amount of \$0.6 million related to these three interest rate swaps were reclassified into interest expense during 2012. One of those swaps with a notional amount of \$40.0 million no longer qualified for hedge accounting as a result of the missed forecasted transactions and was marked to market through earnings prospectively. These swaps expired by their terms in March 2013. Additionally, certain of the properties that were under contract to be sold as of December 31, 2012 served as security for mortgage loans that were previously hedged. Since it was probable because of the pending sales that the hedged transactions as identified in our original hedge documentation would not occur, we reclassified \$0.6 million from other comprehensive income to interest expense.

As of December 31, 2013, the fair value of derivatives in a net liability position, which excludes accrued interest but includes any adjustment for nonperformance risk related to these agreements, was \$0.1 million in the aggregate. The carrying amount of the associated assets are recorded in "Deferred costs and other assets," liabilities are reflected in "Fair value of derivative instruments" and the net unrealized loss is reflected in "Accumulated other comprehensive loss" in the accompanying consolidated balance sheets and consolidated statements of comprehensive income.

CASH FLOWS

Net cash provided by operating activities totaled \$136.2 million for 2013 compared to \$120.3 million for 2012 and \$105.3 million for 2011. This increase in cash from operating activities in 2013 was primarily due to increased NOI, lower interest expense, and other working capital changes.

Cash flows provided by investing activities were \$30.7 million for 2013 compared to cash flows used in investing activities of \$88.2 million for 2012 and cash flows used in investing activities of \$21.8 million for 2011. Investing activities for 2013 reflected acquisitions of \$60.9 million, investment in construction in progress of \$36.5 million and real estate improvements of \$44.8 million, primarily related to ongoing improvements at our properties. Investing activities for 2012 reflected investment in construction in progress of \$38.1 million and real estate improvements of \$43.5 million, primarily related to ongoing improvements at our properties.

Cash flows used in financing activities were \$166.7 million for 2013 compared to cash flows used in financing activities of \$20.0 million for 2012 and \$104.0 million for 2011. Cash flows used in financing activities for 2013 included a \$182.0 million repayment of the 2010 Term Loan, and the repayment or paydown of \$403.7 million of mortgage loans. Cash flows used in financing activities for 2012 included the principal repayment of Exchangeable Notes of \$136.9 million, a net \$95.0 million paydown of the Revolving Facility, a \$58.0 million repayment of the 2010 Term Loan, dividends and distributions of \$44.5 million, principal installments on mortgage loans of \$20.3 million and a \$4.0 million principal payment on one mortgage loan. We also received \$110.9 million in net proceeds from the issuance of Series A Preferred Shares, \$83.3 million from the issuance of Series B Preferred Shares, and

\$151.0 million in net proceeds from new mortgage loans on Capital City Mall, Cherry Hill Mall, Cumberland Mall and Christiana Center in 2012.

See note 1 to our consolidated financial statements for detail regarding costs capitalized during 2013 and 2012.

COMMITMENTS

As of December 31, 2013, we had unaccrued contractual and other commitments related to our capital improvement projects and development projects of \$1.7 million in the form of tenant allowances, lease termination fees, and contracts with general service providers and other professional service providers.

ENVIRONMENTAL

We are aware of certain environmental matters at some of our properties. We have, in the past, performed remediation of such environmental matters, and we are not aware of any significant remaining potential liability relating to these environmental matters. We may be required in the future to perform testing relating to these matters. We have insurance coverage for certain environmental claims up to \$10.0 million per occurrence and up to \$20.0 million in the aggregate. See “Item 1A. Risk Factors—We might incur costs to comply with environmental laws, which could have an adverse effect on our results of operations.”

COMPETITION AND TENANT CREDIT RISK

Competition in the retail real estate industry is intense. We compete with other public and private retail real estate companies, including companies that own or manage malls, power centers, strip centers, lifestyle centers, factory outlet centers, theme/festival centers and community centers, as well as other commercial real estate developers and real estate owners, particularly those with properties near our properties, on the basis of several factors, including location and rent charged. We compete with these companies to attract customers to our properties, as well as to attract anchor and non anchor store and other tenants. We also compete to acquire land for new site development or to add to our existing properties. Our malls and our power and strip centers face competition from similar retail centers, including more recently developed or renovated centers that are near our retail properties. We also face competition from a variety of different retail formats, including internet retailers, discount or value retailers, home shopping networks, mail order operators, catalogs, and telemarketers. Our tenants face competition from companies at the same and other properties and from other retail formats as well, including internet retailers. This competition could have a material adverse effect on our ability to lease space and on the amount of rent and expense reimbursements that we receive.

The existence or development of competing retail properties and the related increased competition for tenants might, subject to the terms and conditions of the Credit Agreements, require us to make capital improvements to properties that we would have deferred or would not have otherwise planned to make and might also affect the total sales, sales per square foot, occupancy and net operating income of such properties. Any such capital improvements, undertaken individually or collectively, would involve costs and expenses that could adversely affect our results of operations. We compete with many other entities engaged in real estate investment activities for acquisitions of malls, other retail properties and prime development sites or sites adjacent to our properties, including institutional pension funds, other REITs and other owner-operators of retail properties. When we seek to make acquisitions, competitors might drive up the price we must pay for properties, parcels, other assets or other companies or might themselves succeed in acquiring those properties, parcels, assets or companies. In addition, our potential acquisition targets might find our competitors to be more attractive suitors if they have greater resources, are willing to pay more, or have a more compatible operating philosophy. In particular, larger REITs might enjoy significant competitive advantages that result from, among other things, a lower cost of capital, a better ability to raise capital, a better ability to finance an acquisition, and enhanced operating efficiencies. We might not succeed in acquiring retail properties or development sites that we seek, or, if we pay a higher price for a property and/or generate lower cash flow from an acquired property than we expect, our investment returns will be reduced, which will adversely affect the value of our securities.

We receive a substantial portion of our operating income as rent under leases with tenants. At any time, any tenant having space in one or more of our properties could experience a downturn in its business that might weaken its financial condition. Such tenants might enter into or renew leases with relatively shorter terms. Such tenants might also defer or fail to make rental payments when due, delay or defer lease commencement, voluntarily vacate the premises or declare bankruptcy, which could result in the termination of the tenant’s lease or preclude the collection of rent in connection with the space for a period of time, and could result in material losses to us and harm to our results of operations. Also, it might take time to terminate leases of underperforming or nonperforming tenants and we might

incur costs to remove such tenants. Some of our tenants occupy stores at multiple locations in our portfolio, and so the effect of any bankruptcy or store closings of those tenants might be more significant to us than the bankruptcy or store closings of other tenants. See “Item 2. Properties—Major Tenants.” In addition, under many of our leases, our tenants pay rent based, in whole or in part, on a percentage of their sales. Accordingly, declines in these tenants’ sales directly affect our results of operations. Also, if tenants are unable to comply with the terms of their leases, or otherwise seek changes to the terms, including changes to the amount of rent, we might modify lease terms in ways that are less favorable to us. Given current conditions in the economy, certain industries and the capital markets, in some instances retailers that have sought protection from creditors under bankruptcy law have had difficulty in obtaining debtor-in-possession

financing, which has decreased the likelihood that such retailers will emerge from bankruptcy protection and has limited their alternatives.

SEASONALITY

There is seasonality in the retail real estate industry. Retail property leases often provide for the payment of all or a portion of rent based on a percentage of a tenant's sales revenue, or sales revenue over certain levels. Income from such rent is recorded only after the minimum sales levels have been met. The sales levels are often met in the fourth quarter, during the December holiday season. Also, many new and temporary leases are entered into later in the year in anticipation of the holiday season and a higher number of tenants vacate their space early in the year. As a result, our occupancy and cash flows are generally higher in the fourth quarter and lower in the first and second quarters. Our concentration in the retail sector increases our exposure to seasonality and has resulted, and is expected to continue to result, in a greater percentage of our cash flows being received in the fourth quarter.

INFLATION

Inflation can have many effects on financial performance. Retail property leases often provide for the payment of rent based on a percentage of sales, which might increase with inflation. Leases might also provide for tenants to bear all or a portion of operating expenses, which might reduce the impact of such increases on us. However, rent increases might not keep up with inflation, or if we recover a smaller proportion of property operating expenses, we might bear more costs if such expenses increase because of inflation.

FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K for the year ended December 31, 2013, together with other statements and information publicly disseminated by us, contain certain “forward-looking statements” within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans, strategies, anticipated events, trends and other matters that are not historical facts. These forward-looking statements reflect our current views about future events, achievements or results and are subject to risks, uncertainties and changes in circumstances that might cause future events, achievements or results to differ materially from those expressed or implied by the forward-looking statements. In particular, our business might be materially and adversely affected by uncertainties affecting real estate businesses generally as well as the following, among other factors:

- our substantial debt and stated value of preferred shares and our high leverage ratio;
- constraining leverage, interest and tangible net worth covenants under our 2013 Revolving Facility and our 2014 Term Loans;
- potential losses on impairment of certain long-lived assets, such as real estate, or of intangible assets, such as goodwill, including such losses that we might be required to record in connection with any dispositions of assets;
- changes to our corporate management team and any resulting modifications to our business strategies;
- our ability to refinance our existing indebtedness when it matures, on favorable terms or at all;
- our ability to raise capital, including through the issuance of equity or equity-related securities if market conditions are favorable, through joint ventures or other partnerships, through sales of properties or interests in properties, or through other actions;
- our ability to identify and execute on suitable acquisition opportunities and to integrate acquired properties into our portfolio;
- our short and long-term liquidity position;
- current economic conditions and their effect on employment and consumer confidence and spending, and the corresponding effects on tenant business performance, prospects, solvency and leasing decisions and on our cash flows, and the value and potential impairment of our properties;
- changes in the retail industry, including consolidation and store closings, particularly among anchor tenants;
 - the effects of online shopping and other uses of technology on, and by competitors of, our retail tenants;
- general economic, financial and political conditions, including credit and capital market conditions, changes in interest rates or unemployment;
- risks relating to development and redevelopment activities;
- inability to sell properties that we seek to dispose of or the inability to obtain estimated sale prices;
- our ability to maintain and increase property occupancy, sales and rental rates, in light of the relatively high number of leases that have expired or are expiring in the next two years;
- acts of violence at malls, including our properties, or at other similar spaces, and the potential effect on traffic and sales;
- increases in operating costs that cannot be passed on to tenants;
- concentration of our properties in the Mid-Atlantic region;
- changes in local market conditions, such as the supply of or demand for retail space, or other competitive factors; and
- potential dilution from any capital raising transactions or other equity issuances.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The analysis below presents the sensitivity of the market value of our financial instruments to selected changes in market interest rates. As of December 31, 2013, our consolidated debt portfolio consisted primarily of \$1,502.7 million of fixed and variable rate mortgage loans and \$130.0 million borrowed under our 2013 Revolving Facility, which bore interest at a rate of 1.87%.

Our mortgage loans, which are secured by 18 of our consolidated properties, are due in installments over various terms extending to the year 2023. Twelve of these mortgage loans bear interest at fixed interest rates that range from 3.90% to 6.34% and had a weighted average interest rate of 5.05% at December 31, 2013. Six of our mortgage loans bear interest at variable rates and had a weighted average interest rate of 2.68% at December 31, 2013. The weighted average interest rate of all consolidated mortgage loans was 4.65% at December 31, 2013. Mortgage loans for properties owned by unconsolidated partnerships are accounted for in “Investments in partnerships, at equity” and “Distributions in excess of partnership investments,” and are not included in the table below.

Our interest rate risk is monitored using a variety of techniques. The table below presents the principal amounts of the expected annual maturities and the weighted average interest rates for the principal payments in the specified periods:

(in thousands of dollars) For the Year Ending December 31,	Fixed Rate Debt		Variable Rate Debt		
	Principal Payments	Weighted Average Interest Rate	Principal Payments	Weighted Average Interest Rate	
2014	\$ 15,867	5.33	% \$ 52,590	2.28	% ⁽¹⁾
2015	\$ 291,342	5.75	% \$ 1,655	2.63	% ⁽¹⁾
2016	\$ 231,340	5.38	% \$ 155,726	1.98	% ⁽¹⁾
2017	\$ 161,400	5.36	% \$ 1,001	2.92	% ⁽¹⁾
2018 and thereafter	\$ 551,980	4.37	% \$ 169,749	3.10	% ⁽¹⁾

⁽¹⁾ Based on the weighted average interest rate in effect as of December 31, 2013.

⁽²⁾ Includes 2013 Revolving Facility borrowings of \$130.0 million with a weighted average interest rate of 1.87% as of December 31, 2013.

At December 31, 2013, we had \$380.7 million of variable rate debt. To manage interest rate risk and limit overall interest cost, we may employ interest rate swaps, options, forwards, caps and floors, or a combination thereof, depending on the underlying exposure. Interest rate differentials that arise under swap contracts are recognized in interest expense over the life of the contracts. If interest rates rise, the resulting cost of funds is expected to be lower than that which would have been available if debt with matching characteristics was issued directly. Conversely, if interest rates fall, the resulting costs would be expected to be higher. We may also employ forwards or purchased options to hedge qualifying anticipated transactions. Gains and losses are deferred and recognized in net income in the same period that the underlying transaction occurs, expires or is otherwise terminated. See note 6 to our consolidated financial statements.

As of December 31, 2013, we had entered into six interest rate swap agreements with a weighted average interest rate of 1.61% on a notional amount of \$198.6 million maturing on various dates through January 2018. We entered into these interest rate swap agreements in order to hedge the interest payments associated with our issuances of variable interest rate long-term debt.

Changes in market interest rates have different effects on the fixed and variable portions of our debt portfolio. A change in market interest rates applicable to the fixed portion of the debt portfolio affects the fair value, but it has no effect on interest incurred or cash flows. A change in market interest rates applicable to the variable portion of the debt portfolio affects the interest incurred and cash flows, but does not affect the fair value. The following sensitivity analysis related to the fixed debt portfolio, which includes the effects of our interest rate swap agreements, assumes an immediate 100 basis point change in interest rates from their actual December 31, 2013 levels, with all other variables held constant.

A 100 basis point increase in market interest rates would have resulted in a decrease in our net financial instrument position of \$56.9 million at December 31, 2013. A 100 basis point decrease in market interest rates would have resulted in an increase in our net financial instrument position of \$59.7 million at December 31, 2013. The majority of the payments on our variable rate debt included in our debt portfolio as of December 31, 2013 have been swapped to fixed interest rates. A 100 basis point increase in interest rates would have resulted in an additional \$1.8 million in interest annually. A 100 basis point decrease would have reduced interest incurred by \$1.8 million annually.

Because the information presented above includes only those exposures that existed as of December 31, 2013, it does not consider changes, exposures or positions which could arise after that date. The information presented herein has limited predictive value. As a result, the ultimate realized gain or loss or expense with respect to interest rate fluctuations will depend on the exposures that arise during the period, our hedging strategies at the time and interest rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

Our consolidated balance sheets as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, equity and cash flows for the years ended December 31, 2013, 2012 and 2011, and the notes thereto, our report on internal control over financial reporting, the reports of our independent registered public accounting firm thereon, our summary of unaudited quarterly financial information for the years ended December 31, 2013 and 2012, and the financial statement schedule begin on page F-1 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

We are committed to providing accurate and timely disclosure in satisfaction of our SEC reporting obligations. In 2002, we established a Disclosure Committee to formalize our disclosure controls and procedures, which are periodically assessed by our Chief Executive Officer and Chief Financial Officer for effectiveness. In October 2013, due to a technological error in utilizing new software to transmit our filings to the SEC through the EDGAR reporting system, we inadvertently filed our Quarterly Report on Form 10-Q for the period ended September 30, 2013 without attaching the signed certifications by our Chief Executive Officer and Chief Financial Officer to be included as Exhibits 31.1 through 32.2. The certificates have since been added by amendment. Notwithstanding this error, our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2013, and have concluded as follows:

Our disclosure controls and procedures are designed to ensure that the information that we are required to disclose in our reports under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Our disclosure controls and procedures are effective to ensure that information that we are required to disclose in our Exchange Act reports is accumulated and communicated to management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

There was no change in our internal controls over financial reporting that occurred during the fourth quarter of 2013 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting. See "Management's Report on Internal Control Over Financial Reporting" included before the financial statements contained in this report.

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. TRUSTEES, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement, and thus we have omitted such information in accordance with General Instruction G(3) to Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION.

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement, and thus we have omitted such information in accordance with General Instruction G(3) to Form 10-K.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS.

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement, and thus we have omitted such information in accordance with General Instruction G(3) to Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND TRUSTEE INDEPENDENCE.

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement, and thus we have omitted such information in accordance with General Instruction G(3) to Form 10-K.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement, and thus we have omitted such information in accordance with General Instruction G(3) to Form 10-K.

Management's Report on Internal Control Over Financial Reporting

Management of Pennsylvania Real Estate Investment Trust ("us" or the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in the rules of the Securities and Exchange Commission, internal control over financial reporting is a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our Board of Trustees, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Our internal control over financial reporting includes those policies and procedures that:

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the Company's transactions and the dispositions of assets of the Company;
Provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Company's management and trustees; and
- (2) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.
- (3)

Because of its inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In connection with the preparation of the Company's annual consolidated financial statements, management has conducted an assessment of the effectiveness of our internal control over financial reporting based on the framework set forth in Internal Control—Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management's assessment included an evaluation of the design of the Company's internal control over financial reporting and testing of the operational effectiveness of those controls. Based on this evaluation, we have concluded that, as of December 31, 2013, our internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Our independent registered public accounting firm, KPMG LLP, independently assessed the effectiveness of the Company's internal control over financial reporting. KPMG LLP has issued a report on the effectiveness of internal control over financial reporting that is included on page F-3 in this report.

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders

Pennsylvania Real Estate Investment Trust:

We have audited the accompanying consolidated balance sheets of Pennsylvania Real Estate Investment Trust (a Pennsylvania business trust) and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2013. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule III. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Pennsylvania Real Estate Investment Trust and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Pennsylvania Real Estate Investment Trust's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2014 expressed an unqualified opinion on the effectiveness of Pennsylvania Real Estate Investment Trust's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm
The Board of Trustees and Shareholders
Pennsylvania Real Estate Investment Trust:

We have audited Pennsylvania Real Estate Investment Trust's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Pennsylvania Real Estate Investment Trust's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on Pennsylvania Real Estate Investment Trust's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Pennsylvania Real Estate Investment Trust maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Pennsylvania Real Estate Investment Trust and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2013, and our report dated February 28, 2014 expressed an unqualified opinion on those consolidated financial statements.

PENNSYLVANIA REAL ESTATE INVESTMENT TRUST
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the Years Ended December 31, 2013, 2012 and 2011

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Pennsylvania Real Estate Investment Trust (“PREIT”), a Pennsylvania business trust founded in 1960 and one of the first equity real estate investment trusts (“REITs”) in the United States, has a primary investment focus on retail shopping malls located in the eastern half of the United States, primarily in the Mid-Atlantic region. As of December 31, 2013, our portfolio consisted of a total of 43 properties located in 12 states and operating in 11 states, including 35 shopping malls, five power and strip centers and three development properties, with two of the development properties classified as “mixed use” (a combination of retail and other uses), and one of the development properties classified as “other.” In 2013, we sold three of our mall properties and three of our power and strip centers. We hold our interest in our portfolio of properties through our operating partnership, PREIT Associates, L.P. (“PREIT Associates” or the “Operating Partnership”). We are the sole general partner of the Operating Partnership and, as of December 31, 2013, held a 97.0% controlling interest in the Operating Partnership, and consolidated it for reporting purposes. The presentation of consolidated financial statements does not itself imply that the assets of any consolidated entity (including any special-purpose entity formed for a particular project) are available to pay the liabilities of any other consolidated entity, or that the liabilities of any consolidated entity (including any special-purpose entity formed for a particular project) are obligations of any other consolidated entity.

Pursuant to the terms of the partnership agreement of the Operating Partnership, each of the limited partners has the right to redeem such partner’s units of limited partnership interest in the Operating Partnership (“OP Units”) for cash or, at our election, we may acquire such OP Units in exchange for our common shares on a one-for-one basis, in some cases beginning one year following the respective issue date of the OP Units and in other cases immediately. If all of the outstanding OP Units held by limited partners had been redeemed for cash as of December 31, 2013, the total amount that would have been distributed would have been \$40.4 million, which is calculated using our December 31, 2013 closing share price on the New York Stock Exchange of \$18.98 multiplied by the number of outstanding OP Units held by limited partners, which was 2,129,202 as of December 31, 2013.

We provide management, leasing and real estate development services through two of our subsidiaries: PREIT Services, LLC (“PREIT Services”), which generally develops and manages properties that we consolidate for financial reporting purposes, and PREIT-RUBIN, Inc. (“PRI”), which generally develops and manages properties that we do not consolidate for financial reporting purposes, including properties owned by partnerships in which we own an interest and properties that are owned by third parties in which we do not have an interest. PREIT Services and PRI are consolidated. PRI is a taxable REIT subsidiary, as defined by federal tax laws, which means that it is able to offer an expanded menu of services to tenants without jeopardizing our continuing qualification as a REIT under federal tax law.

We evaluate operating results and allocate resources on a property-by-property basis, and do not distinguish or evaluate our consolidated operations on a geographic basis. Due to the nature of our operating properties, which involve retail shopping, we have concluded that our individual properties have similar economic characteristics and meet all other aggregation criteria. Accordingly, we have aggregated our individual properties into one reportable segment. In addition, no single tenant accounts for 10% or more of our consolidated revenue, and none of our properties are located outside the United States.

Consolidation

We consolidate our accounts and the accounts of the Operating Partnership and other controlled subsidiaries, and we reflect the remaining interest in such entities as noncontrolling interest. All significant intercompany accounts and transactions have been eliminated in consolidation.

Partnership Investments

We account for our investments in partnerships that we do not control using the equity method of accounting. These investments, each of which represents a 40% to 50% noncontrolling ownership interest at December 31, 2013, are

recorded initially at our cost and subsequently adjusted for our share of net equity in income and cash contributions and distributions. We do not control any of these equity method investees for the following reasons:

F-10

Except for two properties that we co-manage with our partner, the other entities are managed on a day-to-day basis by one of our other partners as the managing general partner in each of the respective partnerships. In the case of the co-managed properties, all decisions in the ordinary course of business are made jointly.

The managing general partner is responsible for establishing the operating and capital decisions of the partnership, including budgets, in the ordinary course of business.

All major decisions of each partnership, such as the sale, refinancing, expansion or rehabilitation of the property, require the approval of all partners.

Voting rights and the sharing of profits and losses are in proportion to the ownership percentages of each partner.

Statements of Cash Flows

We consider all highly liquid short-term investments with an original maturity of three months or less to be cash equivalents. At December 31, 2013 and 2012, cash and cash equivalents totaled \$34.2 million and \$34.0 million, respectively, and included tenant security deposits of \$3.8 million and \$4.2 million, respectively. Cash paid for interest, including interest related to discontinued operations, was \$94.1 million, \$116.4 million and \$124.1 million for the years ended December 31, 2013, 2012 and 2011, respectively, net of amounts capitalized of \$0.9 million, \$1.5 million and \$2.1 million, respectively.

Significant Non-Cash Transactions

In December 2012, we sold our remaining interest in Northeast Tower Center in exchange for the cancellation of a \$3.8 million note payable to the buyer. We recorded a gain of \$0.9 million from this sale in 2012.

In connection with the June 2011 amendment to the 2010 Credit Facility, we reduced the amount outstanding under the 2010 Term Loan by \$100.0 million and increased the amount outstanding under the 2010 Revolving Facility by \$100.0 million.

Accrued construction costs increased by \$2.4 million in the year ended December 31, 2013, and decreased by \$0.3 million and \$0.1 million in the years ended December 31, 2012 and 2011, respectively, representing non-cash changes in construction in progress.

Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expense during the reporting periods. Actual results could differ from those estimates. We believe that our most significant and subjective accounting estimates and assumptions are those relating to asset impairment, fair value and accounts receivable reserves.

Our management makes complex or subjective assumptions and judgments in applying its critical accounting policies. In making these judgments and assumptions, our management considers, among other factors, events and changes in property, market and economic conditions, estimated future cash flows from property operations, and the risk of loss on specific accounts or amounts.

Revenue Recognition

We derive over 95% of our revenue from tenant rent and other tenant-related activities. Tenant rent includes base rent, percentage rent, expense reimbursements (such as reimbursements of costs of common area maintenance ("CAM"), real estate taxes and utilities), amortization of above-market and below-market lease intangibles (as described below under "Intangible Assets") and straight-line rent. We record base rent on a straight-line basis, which means that the monthly base rent revenue according to the terms of our leases with our tenants is adjusted so that an average monthly rent is recorded for each tenant over the term of its lease. When tenants vacate prior to the end of their lease, we accelerate amortization of any related unamortized straight-line rent balances, and unamortized above-market and below-market intangible balances are amortized as a decrease or increase to real estate revenue, respectively. The straight-line rent adjustment increased revenue by \$1.4 million, \$2.2 million and \$0.3 million in the years ended December 31, 2013, 2012 and 2011, respectively. The straight-line rent receivable balances included in tenant and other receivables on the accompanying balance sheet as of December 31, 2013 and 2012 were \$26.5 million and \$27.7 million, respectively.

Percentage rent represents rental revenue that the tenant pays based on a percentage of its sales, either as a percentage of its total sales or as a percentage of sales over a certain threshold. In the latter case, we do not record percentage rent until the sales threshold has been reached.

F-11

Revenue for rent received from tenants prior to their due dates is deferred until the period to which the rent applies. In addition to base rent, certain lease agreements contain provisions that require tenants to reimburse a fixed or pro rata share of certain CAM costs, real estate taxes and utilities. Tenants generally make expense reimbursement payments monthly based on a budgeted amount determined at the beginning of the year. During the year, our income increases or decreases based on actual expense levels and changes in other factors that influence the reimbursement amounts, such as occupancy levels. As of December 31, 2013 and 2012, our accounts receivable included accrued income of \$7.7 million and \$4.0 million, respectively, because actual reimbursable expense amounts eligible to be billed to tenants under applicable contracts exceeded amounts actually billed.

Certain lease agreements contain cotenancy clauses that can change the amount of rent or the type of rent that tenants are required to pay, or, in some cases, can allow a tenant to terminate their lease, in the event that certain events take place, such as a decline in property occupancy levels below certain defined levels or the vacating of an anchor store. Cotenancy clauses do not generally have any retroactive effect when they are triggered. The effect of cotenancy clauses is applied on a prospective basis to recognize the new rent that is in effect.

Payments made to tenants as inducements to enter into a lease are treated as deferred costs that are amortized as a reduction of rental revenue over the term of the related lease.

Lease termination fee revenue is recognized in the period when a termination agreement is signed, collectibility is assured and we are no longer obligated to provide space to the tenant. In the event that a tenant is in bankruptcy when the termination agreement is signed, termination fee income is deferred and recognized when it is received.

We also generate revenue by providing management services to third parties, including property management, brokerage, leasing and development. Management fees generally are a percentage of managed property revenue or cash receipts. Leasing fees are earned upon the consummation of new leases. Development fees are earned over the time period of the development activity and are recognized on the percentage of completion method. These activities are collectively included in "Other income" in the consolidated statements of operations.

Fair Value

Fair value accounting applies to reported balances that are required or permitted to be measured at fair value under existing accounting authority.

Fair value measurements are determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, these accounting requirements establish a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access.

Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs might include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs for the asset or liability and are typically based on an entity's own assumptions, as there is little, if any, related market activity.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. We utilize the fair value hierarchy in our accounting for derivatives (Level 2) and financial instruments (Level 2) and in our reviews for impairment of real estate assets (Level 3) and goodwill (Level 3).

Financial Instruments

Carrying amounts reported on the balance sheet for cash and cash equivalents, tenant and other receivables, accrued expenses, other liabilities and the 2013 Revolving Facility approximate fair value due to the short-term nature of these instruments. The majority of our variable rate debt is subject to interest rate derivative instruments that have effectively fixed the interest rates on the underlying debt. The estimated fair value for fixed rate debt, which is calculated for disclosure purposes, is based on the borrowing rates available to us for fixed rate mortgage loans with similar terms and maturities.

Impairment of Assets

Real estate investments and related intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the property might not be recoverable, which is referred to as a “triggering event.” In connection with our review of our long-lived assets for impairment, we utilize qualitative and quantitative factors in order to estimate fair value. The significant qualitative factors that we use include age and condition of the property, market conditions in the property’s trade area, competition with other shopping centers within the property’s trade area and the creditworthiness and performance of the property’s tenants. The significant quantitative factors that we use include historical and forecasted financial and operating information relating to the property, such as net operating income, occupancy statistics, vacancy projections and tenants’ sales levels. Our fair value assumptions relating to real estate assets are within Level 3 of the fair value hierarchy.

If there is a triggering event in relation to a property to be held and used, we will estimate the aggregate future cash flows, less estimated capital expenditures, to be generated by the property, undiscounted and without interest charges. In addition, this estimate may consider a probability weighted cash flow estimation approach when alternative courses of action to recover the carrying amount of a long-lived asset are under consideration or when a range of possible values is estimated.

The determination of undiscounted cash flows requires significant estimates by our management, including the expected course of action at the balance sheet date that would lead to such cash flows. Subsequent changes in estimated undiscounted cash flows arising from changes in the anticipated action to be taken with respect to the property could affect the determination of whether an impairment exists and whether the effects of such changes could materially affect our net income. If the estimated undiscounted cash flows are less than the carrying value of the property, the carrying value is written down to its fair value.

In determining the estimated undiscounted cash flows of the properties that are being analyzed for impairment of assets, we take the sum of the estimated undiscounted cash flows, generally assuming a holding period of 10 years, plus a terminal value calculated using the estimated net operating income in the eleventh year and terminal capitalization rates, which in 2012 and 2013 ranged from 6.25% to 12.0%. In 2013, two properties had triggering events that required further review for impairment. The fair values of the properties (Chambersburg Mall and North Hanover Mall) were determined based on negotiated sale prices of the properties as discussed further in note 2. In 2012, one property had a triggering event that required further review for impairment. The fair value of the property (Phillipsburg Mall) was determined based on the sale price of the property as further discussed in note 2. In 2011, after two properties had triggering events that required further review for impairment, we estimated the fair value of the properties that experienced triggering events using discount rates applied to estimated cash flows ranging from 13% to 14%.

Assessment of our ability to recover certain lease related costs must be made when we have a reason to believe that a tenant might not be able to perform under the terms of the lease as originally expected. This requires us to make estimates as to the recoverability of such costs.

An other than temporary impairment of an investment in an unconsolidated joint venture is recognized when the carrying value of the investment is not considered recoverable based on evaluation of the severity and duration of the decline in value. To the extent impairment has occurred, the excess carrying value of the asset over its estimated fair value is recorded as a reduction to income.

We conduct an annual review of our goodwill balances for impairment to determine whether an adjustment to the carrying value of goodwill is required. We have determined the fair value of our properties and the amount of

goodwill that is associated with certain of our properties, and we have concluded that goodwill was not impaired as of December 31, 2013. Fair value is determined by applying a capitalization rate to our estimate of projected income at those properties. We also consider factors such as property sales performance, market position and current and future operating results. This amount is compared to the aggregate of the property basis and the goodwill that has been assigned to that property. If the fair value is less than the property basis and the goodwill, we evaluate whether impairment has occurred.

F-13

Real Estate

Land, buildings, fixtures and tenant improvements are recorded at cost and stated at cost less accumulated depreciation. Expenditures for maintenance and repairs are charged to operations as incurred. Renovations or replacements, which improve or extend the life of an asset, are capitalized and depreciated over their estimated useful lives. For financial reporting purposes, properties are depreciated using the straight-line method over the estimated useful lives of the assets. The estimated useful lives are as follows:

Buildings	20-40 years
Land improvements	15 years
Furniture/fixtures	3-10 years
Tenant improvements	Lease term

We are required to make subjective assessments as to the useful lives of our real estate assets for purposes of determining the amount of depreciation to reflect on an annual basis with respect to those assets based on various factors, including industry standards, historical experience and the condition of the asset at the time of acquisition. These assessments affect our annual net income. If we were to determine that a different estimated useful life was appropriate for a particular asset, it would be depreciated over the newly estimated useful life, and, other things being equal, result in changes in annual depreciation expense and annual net income.

Gains from sales of real estate properties and interests in partnerships generally are recognized using the full accrual method, provided that various criteria are met relating to the terms of sale and any subsequent involvement by us with the properties sold.

Real Estate Acquisitions

We account for our property acquisitions by allocating the purchase price of a property to the property's assets based on management's estimates of their fair value. Debt assumed in connection with property acquisitions is recorded at fair value at the acquisition date, and the resulting premium or discount is amortized through interest expense over the remaining term of the debt, resulting in a non-cash decrease (in the case of a premium) or increase (in the case of a discount) in interest expense. The determination of the fair value of intangible assets requires significant estimates by management and considers many factors, including our expectations about the underlying property, the general market conditions in which the property operates and conditions in the economy. The judgment and subjectivity inherent in such assumptions can have a significant effect on the magnitude of the intangible assets or the changes to such assets that we record.

Intangible Assets

Our intangible assets on the accompanying consolidated balance sheets as of December 31, 2013 and 2012 included \$5.7 million and \$7.2 million, respectively (in each case, net of \$1.1 million of amortization expense recognized prior to January 1, 2002), of goodwill recognized in connection with the acquisition of The Rubin Organization in 1997. Changes in the carrying amount of goodwill for the three years ended December 31, 2013 were as follows:

(in thousands of dollars)	Basis	Accumulated Amortization	Impairment Write-Offs	Divestitures	Total
Balance, January 1, 2011	\$12,877	\$(1,073)	\$(4,648)	\$—	\$7,156
Changes in Goodwill	—	—	—	—	—
Balance, December 31, 2011	12,877	(1,073)	(4,648)	—	7,156
Changes in Goodwill	—	—	—	—	—
Balance, December 31, 2012	12,877	(1,073)	(4,648)	—	7,156
Changes in Goodwill	—	—	—	(1,494)	(1,494)
Balance, December 31, 2013	\$12,877	\$(1,073)	\$(4,648)	\$(1,494)	\$5,662

In 2013, we divested goodwill of \$0.7 million and \$0.8 million in connection with the sales of Paxton Towne Centre and Christiana Center, respectively (see note 2).

We allocate a portion of the purchase price of a property to intangible assets. Our methodology for this allocation includes estimating an “as-if vacant” fair value of the physical property, which is allocated to land, building and improvements. The difference between the purchase price and the “as-if vacant” fair value is allocated to intangible assets. There are three categories of intangible assets to be considered: (i) value of in-place leases, (ii) above- and below-market value of in-place leases and (iii) customer relationship value.

The value of in-place leases is estimated based on the value associated with the costs avoided in originating leases comparable to the acquired in-place leases, as well as the value associated with lost rental revenue during the assumed lease-up period. The value of in-place leases is amortized as real estate amortization over the remaining lease term. Above-market and below-market in-place lease values for acquired properties are recorded based on the present value of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management’s estimates of fair market lease rates for comparable in-place leases, based on factors such as historical experience, recently executed transactions and specific property issues, measured over a period equal to the remaining non-cancelable term of the lease. Above-market lease values are amortized as a reduction of rental income over the remaining terms of the respective leases. Below-market lease values are amortized as an increase to rental income over the remaining terms of the respective leases, including any below-market optional renewal periods, and are included in “Accrued expenses and other liabilities” in the consolidated balance sheets.

We allocate purchase price to customer relationship intangibles based on management’s assessment of the value of such relationships.

The following table presents our intangible assets and liabilities, net of accumulated amortization, as of December 31, 2013 and 2012:

(in thousands of dollars)	As of December 31, 2013	As of December 31, 2012
Value of in-place lease intangibles	\$3,151	\$1,009
Above-market lease intangibles	262	508
Subtotal	3,413	1,517
Goodwill	5,662	7,156
Total intangible assets	\$9,075	\$8,673
Below-market lease intangibles	\$(4,815)	\$(3,083)

Amortization of in-place lease intangibles was \$1.6 million, \$0.8 million and \$2.9 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Amortization of above-market and below-market lease intangibles increased revenue by \$1.0 million for the year ended December 31, 2013, increased revenue by \$0.3 million for the year ended December 31, 2012 and decreased revenue by \$0.1 million for the year ended December 31, 2011. In the normal course of business, our intangible assets will amortize in the next five years and thereafter as follows:

(in thousands of dollars)	Value of In-Place Lease Intangibles	Above/(Below) Market Leases, net
For the Year Ending December 31,		
2014	1,391	(960)
2015	371	(441)
2016	288	(421)
2017	282	(456)
2018	259	(438)
2019 and thereafter	560	(1,837)
Total	\$3,151	\$(4,553)

Assets Classified as Held for Sale and Discontinued Operations

The determination to classify an asset as held for sale requires significant estimates by us about the property and the expected market for the property, which are based on factors including recent sales of comparable properties, recent expressions of interest in the property, financial metrics of the property and the physical condition of the property. We must also determine if it will be possible under those market conditions to sell the property for an acceptable price within one year. When assets are identified by our management as held for sale, we discontinue depreciating the assets and estimate the sales price, net of selling costs, of such assets. We generally consider operating properties to be held for sale when they meet criteria such as whether the sale transaction has been approved by the appropriate level of management and there are no known material contingencies relating to the sale such that the sale is probable and is expected to qualify for recognition as a completed sale within one year. If, in management's opinion, the expected net sales price of the asset that has been identified as held for sale is less than the net book value of the asset, the asset is written down to fair value less the cost to sell. Assets and liabilities related to assets classified as held for sale are presented separately in the consolidated balance sheet.

Assuming that there is no significant continuing involvement, an operating real estate property that is classified as held for sale or sold is considered a discontinued operation. Operating properties classified as discontinued operations are reclassified as such in the consolidated statements of operations for each period presented. Interest expense that is specifically identifiable to the property is used in the computation of interest expense attributable to discontinued operations. See note 2 for a description of the properties included in discontinued operations. Land parcels and other portions of operating properties, non-operating real estate and investments in partnerships are excluded from discontinued operations treatment.

Capitalization of Costs

Costs incurred in relation to development and redevelopment projects for interest, property taxes and insurance are capitalized only during periods in which activities necessary to prepare the property for its intended use are in progress. Costs incurred for such items after the property is substantially complete and ready for its intended use are charged to expense as incurred. Capitalized costs, as well as tenant inducement amounts and internal and external commissions, are recorded in construction in progress. We capitalize a portion of development department employees' compensation and benefits related to time spent involved in development and redevelopment projects.

We capitalize payments made to obtain options to acquire real property. Other related costs that are incurred before acquisition that are expected to have ongoing value to the project are capitalized if the acquisition of the property is probable. If the property is acquired, such costs are included in the amount recorded as the initial value of the asset. When it is probable that the property will not be acquired, capitalized pre-acquisition costs are charged to expense. We capitalize salaries, commissions and benefits related to time spent by leasing and legal department personnel involved in originating leases with third-party tenants.

The following table summarizes our capitalized salaries, commissions and benefits, real estate taxes and interest for the years ended December 31, 2013, 2012 and 2011:

(in thousands of dollars)	For the Year Ended December 31,		
	2013	2012	2011
Development/Redevelopment:			
Salaries and benefits	\$ 1,059	\$ 805	\$ 765
Real estate taxes	\$ 5	\$ 277	\$ 280
Interest	\$ 874	\$ 1,549	\$ 2,087
Leasing:			
Salaries, commissions and benefits	\$ 5,261	\$ 5,336	\$ 4,999
Tenant Receivables			

We make estimates of the collectibility of our tenant receivables related to tenant rent including base rent, straight-line rent, expense reimbursements and other revenue or income. We specifically analyze accounts receivable, including straight-line rent receivable, historical bad debts, customer creditworthiness and current economic and industry trends,

when evaluating the adequacy of the allowance for doubtful accounts. The receivables analysis places particular emphasis on past-due accounts and considers the nature and age of the receivables, the payment history and financial condition of the payor, the basis for any disputes or negotiations with the payor, and other information that could affect collectibility. In addition, with respect to tenants

F-16

in bankruptcy, we make estimates of the expected recovery of pre-petition and post-petition claims in assessing the estimated collectibility of the related receivable. In some cases, the time required to reach an ultimate resolution of these claims can exceed one year. For straight-line rent, the collectibility analysis considers the probability of collection of the unbilled deferred rent receivable, given our experience regarding such amounts.

Income Taxes

We have elected to qualify as a real estate investment trust, or REIT, under Sections 856-860 of the Internal Revenue Code of 1986, as amended, and intend to remain so qualified.

In some instances, we follow methods of accounting for income tax purposes that differ from generally accepted accounting principles.

Earnings and profits, which determine the taxability of distributions to shareholders, will differ from net income or loss reported for financial reporting purposes due to differences in cost basis, differences in the estimated useful lives used to compute depreciation, and differences between the allocation of our net income or loss for financial reporting purposes and for tax reporting purposes.

The following table summarizes the aggregate cost basis and depreciated basis for federal income tax purposes of our investment in real estate for the years ended December 31, 2013 and 2012:

(in millions of dollars)	As of December 31, 2013	As of December 31, 2012
Aggregate cost basis for federal income tax purposes	\$3,710.1	\$3,979.2
Aggregate depreciated basis for federal income tax purposes	\$2,692.9	\$2,908.5

We are subject to a federal excise tax computed on a calendar year basis in accordance with the Internal Revenue Code. We have, in the past, distributed a substantial portion of our taxable income in the subsequent fiscal year and might also follow this policy in the future. No provision for excise tax was made for the years ended December 31, 2013, 2012 and 2011, as no excise tax was due in those years.

The per share distributions paid to common shareholders had the following components for the years ended December 31, 2013, 2012 and 2011:

	For the Year Ended December 31,		
	2013	2012	2011
Ordinary income	\$—	\$—	\$0.37
Capital gains	—	—	0.01
Non-dividend distributions	0.74	0.63	0.22
	\$0.74	\$0.63	\$0.60

In April 2012, we issued Series A Preferred Shares and in October 2012, we issued Series B Preferred Shares. The per share distributions paid to Series A preferred shareholders and Series B preferred shareholders had the following components for the years ended December 31, 2013 and 2012:

	For the Year Ended December 31,	
	2013	2012
Series A Preferred Share Dividends		
Ordinary income	\$ 1.96	\$—
Capital gains	—	—
Non-dividend distributions	0.10	1.35
	\$2.06	\$1.35
Series B Preferred Share Dividends		
Ordinary income	\$ 1.75	\$—
Capital gains	—	—
Non-dividend distributions	0.09	0.33
	\$1.84	\$0.33

We follow accounting requirements that prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. We must determine whether it is “more likely than not” that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the “more likely than not” recognition threshold, the position is measured at the largest amount of benefit that is greater than 50% likely to be realized upon settlement to determine the amount of benefit to recognize in the financial statements.

PRI is subject to federal, state and local income taxes. We had no provision or benefit for federal or state income taxes in the years ended December 31, 2013, 2012 and 2011. We had net deferred tax assets of \$8.7 million and \$9.1 million for the years ended December 31, 2013 and 2012, respectively. The deferred tax assets are primarily the result of net operating losses. A valuation allowance has been established for the full amount of the net deferred tax assets, since it is more likely than not that these assets will not be realized because we anticipate that the net operating losses that we have historically experienced at our taxable REIT subsidiaries will continue to occur.

Deferred Financing Costs

Deferred financing costs include fees and costs incurred to obtain financing. Such costs are amortized to interest expense over the terms of the related indebtedness. Interest expense is determined using the effective interest method in the case of costs associated with mortgage loans, or on a straight line basis in the case of costs associated with our 2013 Revolving Facility (see note 4).

Derivatives

In the normal course of business, we are exposed to financial market risks, including interest rate risk on our interest-bearing liabilities. We attempt to limit these risks by following established risk management policies, procedures and strategies, including the use of derivative financial instruments. We do not use derivative financial instruments for trading or speculative purposes.

Currently, we use interest rate swaps to manage our interest rate risk. The valuation of these instruments is determined using widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs.

Derivative financial instruments are recorded on the balance sheet as assets or liabilities based on the fair value of the instrument. Changes in the fair value of derivative financial instruments are recognized currently in earnings, unless the derivative financial instrument meets the criteria for hedge accounting. If the derivative financial instruments meet the criteria for a cash flow hedge, the gains and losses in the fair value of the instrument are deferred in other

comprehensive income. Gains and losses on a cash flow hedge are reclassified into earnings when the forecasted transaction affects earnings. A contract

F-18

that is designated as a hedge of an anticipated transaction that is no longer likely to occur is immediately recognized in earnings.

The anticipated transaction to be hedged must expose us to interest rate risk, and the hedging instrument must reduce the exposure and meet the requirements for hedge accounting. We must formally designate the instrument as a hedge and document and assess the effectiveness of the hedge at inception and on a quarterly basis. Interest rate hedges that are designated as cash flow hedges are designed to mitigate the risks associated with future cash outflows on debt.

We incorporate credit valuation adjustments to appropriately reflect both our own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of our derivative contracts for the effect of nonperformance risk, we have considered the impact of netting and any applicable credit enhancements. Although we have determined that the majority of the inputs used to value our derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with our derivatives utilize Level 3 inputs, such as estimates of current credit spreads, to evaluate the likelihood of default by us and our counterparties. As of December 31, 2013, we have assessed the significance of the effect of the credit valuation adjustments on the overall valuation of our derivative positions and have determined that the credit valuation adjustments are not significant to the overall valuation of our derivatives. As a result, we have determined that our derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

Operating Partnership Unit Redemptions

Shares issued upon redemption of OP Units are recorded at the book value of the OP Units surrendered.

Share-Based Compensation Expense

Share based payments to employees and non-employee trustees, including grants of share options and restricted shares, are valued at fair value on the date of grant, and are expensed over the applicable vesting period.

Earnings Per Share

The difference between basic weighted average shares outstanding and diluted weighted average shares outstanding is the dilutive effect of common share equivalents. Common share equivalents consist primarily of shares that are issued under employee share compensation programs and outstanding share options whose exercise price is less than the average market price of our common shares during these periods.

Correction of Prior Period Presentation

Certain prior period amounts have been reclassified to conform with the current year presentation.

Our previously reported results of operations for the years ended December 31, 2012 and 2011 and interim periods for 2013 and 2012 have been corrected to eliminate certain immaterial intercompany revenues and expenses. These immaterial corrections had no effect on net income (loss), basic or diluted earnings (loss) per share amounts, comprehensive income (loss), shareholders' equity or cash flows. The immaterial corrections reduced other real estate revenue and other operating expenses by approximately \$2.1 million for each of the years ended December 31, 2012 and 2011.

New Accounting Developments

In 2013, we adopted new accounting requirements relating to the presentation of comprehensive income. The new accounting requirements mandate disclosure about items reclassified out of accumulated other comprehensive income and into net income, and require reference to other disclosures about items that are not reclassified in their entirety into net income. The adoption of these new accounting requirements did not have a material effect on our financial statements.

Effective January 1, 2012, in conjunction with our implementation of updates to the fair value measurements guidance, we made an accounting policy election to measure derivative financial instruments that are subject to master netting agreements on a net basis. This accounting policy election did not have a material effect on our financial statements.

In 2011, we adopted new accounting requirements relating to the presentation of comprehensive income. These accounting requirements have increased the prominence of other comprehensive income in our financial

statements. We now present the components of net income and comprehensive income in two financial statements under the heading “Consolidated Statements of Operations.”
