## BHP Billiton Production Report for the Quarter

Ended 30 September 2001

BHP Billiton today released its production report for the quarter ended 30 September, 2001. Production of most major commodities was in line with both the corresponding period last year and the June 2001 quarter.

### • Aluminium

production was five per cent higher than the corresponding period last year and slightly lower than the June 2001 quarter. Compared to the September 2000 quarter, higher production largely reflects the commencement of full production at Mozal (Mozambique) in December 2000. Compared to the June 2001 quarter, lower production and sales were recorded at Alumar and Valesul as a result of temporary power usage restrictions in Brazil. Illegal industrial action at the Mozal aluminium smelter is being progressively resolved and had no impact on production during the quarter.

- **Copper** production was five per cent lower than the corresponding period last year and 20 per cent lower than the June 2001 quarter. Compared to the September 2000 quarter, lower production was due to the write-off of BHP Billiton's share of the net assets in the Ok Tedi copper project (Papua New Guinea) in June 2001. As such, production from the September 2001 quarter at Ok Tedi has not been included in this report. Excluding Ok Tedi, production was in line with the June 2001 quarter. Higher copper cathode production was reported at Escondida (Chile) following operational improvements during the last half of FY01, which increased the capacity of the oxide plant.

### • Iron Ore

production was in line with both the corresponding period last year and the June 2001 quarter. Increased production was recorded at Newman (Western Australia) during the quarter following higher demand for iron ore fines, particularly from China. Record shipments of 18.9 million wet tonnes were also made during the September quarter following strong demand for Newman lump and fines product from China and Korea.

### • Boodarie Iron

(previously WA HBI) production was slightly higher than forecast reflecting consistent three-train operation and the continued ramp up of the facility. A successful four-train trial was run in October for six days, providing further positive information on the plant's capabilities. The realised price for Boodarie™ Iron product has improved over the past twelve months, reflecting increased delivery performance, higher quality and market acceptance of the product. Prices for Boodarie™ Iron product are now trading within the forecast range between scrap and pig iron, however the near term outlook for the underlying global steel market remains weak.

### • Metallurgical Coal

production was five per cent higher than the corresponding period last year and 23 per cent lower than the June 2001 quarter. Compared to the September 2000 quarter, increased production was recorded at Riverside (Australia) and South Walker Creek (Australia) due to operational improvements. Compared to the June 2001 quarter, the lower recorded production follows the equalisation of Queensland (Australia) coal interests with Mitsubishi to form the BHP Billiton Mitsubishi Alliance.

### • Energy Coal

production was seven per cent higher than the corresponding period last year and three per cent lower than the June 2001 quarter. Compared to the September 2000 quarter, higher production was largely due to the acquisition of CDC and CZN (Colombia) in September and November 2000 respectively. Compared to the June 2001 quarter, lower production was reported at BHP Billiton's New Mexico (United States) operations

## Edgar Filing: BHP BILLITON LTD - Form 6-K

following planned maintenance shutdowns. On 23 October 2001, BHP Billiton announced the sale of its 80 per cent interest in the PT Arutmin energy coal assets (Indonesia) to PT Bumi Resources.

### • Oil and Condensate

production was six per cent lower than the corresponding period last year and six per cent higher than the June 2001 quarter. Compared to the September 2000 quarter, production figures were impacted by natural field decline at Bass Strait (Australia) and Laminaria (Timor Sea). Compared to the June 2001 quarter, higher production was recorded at Bass Strait due to the Tuna and West Tuna well workovers and an infill drilling program. Record production of about 68,000 bopd (gross) was reported at Liverpool Bay (UK) during the September 2001 quarter and higher oil production was recorded in the Gulf of Mexico (United States) following the start up of the Typhoon field in July 2001.

### • Natural Gas

production was 15 per cent higher than the corresponding period last year and in line with the June 2001 quarter. Compared to the September 2000 quarter, the increase in production was due to higher domestic gas sales at the North West Shelf Project (Western Australia), improved plant availability at the Griffin project (Western Australia) and the commencement of gas production at the Zamzama extended well test in Pakistan. Higher gas production was also recorded in the Gulf of Mexico (United States) following the start up of the Typhoon field in July 2001.

### • Raw Steel

production was five per cent lower than the corresponding period last year and four per cent higher than the June 2001 quarter. Compared to the June 2001 quarter, a strengthening Australian market resulted in higher domestic sales during the current quarter. This was offset in part by reduced export sales.

### • Ekati

<sup>TM</sup> **Diamond** production was 148 per cent higher than the corresponding period last year and 80 per cent higher than the June 2001 quarter following the acquisition of Dia Met Minerals Ltd, effective 1 July 2001. This increased BHP Billiton's ownership of the Ekati<sup>TM</sup> diamond mine (Canada) to 80 per cent. Higher carat grades were also recorded during the September 2001 quarter as a result of high concentrate ore.

\*\*\*

EXPLORATION, TECH & NEW BUSINESS									
DIAMONDS									
Production ('000 carats)									
	Ekati™ (n)	80%	309	318	375	427	767	767	309
	(a) Interest in Worsley increased from 30% to 86% effective January 2001.								
	(b) Mozal produced its first metal in June 2000 and achieved full commissioning of its 253,000 tpa capacity in December 2000.								
	(c) BHP Billiton Base Metals has adopted payable metal as its production reporting basis effective this quarterly report. Prior								
	period mine production figures have been restated from the previous basis of metal contained in concentrate.								
	(d) Shown on 100% basis. BHP Billiton holds a 52% equity interest in Ok Tedi. BHP Billiton announced in August 2001 that no								
	profit would be recognised for Ok Tedi from 1 July 2001 onwards except to the extent that dividends are received.								
	Accordingly, Ok Tedi September 2001 quarter production (100% basis) of 48,200 tonnes of copper and 104,855 ounces of gold								
	has not been recognised in this quarterly report.								
	(e) Included from 1 October 2000, the effective date of the acquisition of Rio Algom.								
	(f) Coal production is reported on the basis of saleable product. Production figures include some thermal coal.								
	(g) BHP Billiton interest is 50% from 28 June 2001 (previously CQCA joint venture 52.1% and Gregory joint venture 64.14%).								
	(h) Shown on 100% basis before 20% outside equity interest.								
	(i) Production reported represents BHP Billiton's 50% equity interest in MetCoal Holdings. MetCoal Holdings is equally owned by								
	BHP Billiton and Mitsubishi Development Pty Ltd and acquired QCT Resources Limited in November 2000. In June 2001,								
	Mitsubishi acquired the balance of the shares in QCT from BHP Billiton.								
	(j) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.								
	(k) BHP Billiton ceased its investment in Orinoco in March 2001.								

	(l) Production shown on 86.5% basis after allowing for Indonesian state owned corporation's 13.5% share of production.									
	(m) Colombian thermal coal interests acquired in September and November 2000.									
	(n) Interest in Ekati™ increased from 51% to 80% effective July 2001.
