CABOT OIL & GAS CORPORATION

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Financial Statement Presentation

During interim periods, Cabot Oil & Gas Corporation (the Company) follows the same accounting policies disclosed in its Annual Report on Form 10-K for the year ended December 31, 2015 (Form 10-K) filed with the Securities and Exchange Commission (SEC). The interim financial statements should be read in conjunction with the notes to the consolidated financial statements and information presented in the Form 10-K. In management's opinion, the accompanying interim condensed consolidated financial statements contain all material adjustments, consisting only of normal recurring adjustments, necessary for a fair statement. The results for any interim period are not necessarily indicative of the expected results for the entire year.

Certain reclassifications have been made to prior year statements to conform with the current year presentation. These reclassifications have no impact on previously reported net income (loss).

Recently Adopted Accounting Pronouncements

In March 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-03, Simplifying the Presentation of Debt Issuance Costs. The amendments in this update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. In August 2015, the FASB issued ASU No. 2015-15, Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements. The update provides authoritative guidance for debt issuance costs related to line-of-credit arrangements, noting the SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The guidance is effective for interim and annual periods beginning after December 15, 2015.

Effective January 1, 2016, the Company adopted ASU No. 2015-03 as a change in accounting principle. The Condensed Consolidated Balance Sheet as of December 31, 2015 has been retrospectively adjusted to reflect the adoption of this guidance, resulting in a \$8.9 million decrease in both other assets and long term debt related to the debt issuance costs on our senior notes. There was no impact to the Company's Condensed Consolidated Statement of Operations or Statement of Cash Flows.

Recently Issued Accounting Pronouncements

In March 2016, the FASB issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting, as a new Topic, Accounting Standards Codification Topic 718. The areas for simplification in this update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Some of the areas for simplification apply only to nonpublic entities. The guidance is effective for interim and annual periods beginning after December 15, 2016. Early adoption is permitted. An entity that elects early adoption must adopt all of the amendments in the same period. Amendments related to the timing of when excess tax benefits are recognized, minimum statutory withholding requirements, forfeitures, and intrinsic value should be applied using a modified retrospective transition method by means of a cumulative-effect adjustment to equity as of the beginning of the period in which the guidance is adopted. Amendments related to the presentation of employee taxes paid on the statement of cash flows when an employer withholds shares to meet the minimum statutory withholding requirement should be applied retrospectively. Amendments requiring recognition of excess tax benefits and tax deficiencies in the income statement and the practical expedient for estimating expected term should be applied prospectively. An entity may elect to apply the amendments related to the presentation of excess tax benefits on the statement of cash flows using either a prospective transition method or a retrospective transition method. The Company is currently evaluating the effect that adopting this guidance will have on its financial position, results of operations or cash flows.

In February 2016, the FASB issued ASU No. 2016-02, Leases, as a new Topic, Accounting Standards Codification Topic 842. The new lease guidance supersedes Topic 840. The core principle of the guidance is that a company should recognize the assets and liabilities that arise from leases. The guidance is effective for interim and annual periods

beginning after December 15, 2018. This ASU can be adopted using a modified retrospective approach. The Company is currently evaluating the effect that adopting this guidance will have on its financial position, results of operations or cash flows.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, as a new Topic, Accounting Standards Codification Topic 606. The new revenue recognition standard provides a five-step analysis of

Table of Contents

transactions to determine when and how revenue is recognized. The core principle of the guidance is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606), which deferred the effective date of ASU No. 2014-09 by one year, making the new standard effective for interim and annual periods beginning after December 15, 2017. This ASU can be adopted either retrospectively or as a cumulative-effect adjustment as of the date of adoption; however, entities reporting under U.S. GAAP are not permitted to adopt the standard earlier than the original effective date for public entities (that is, no earlier than 2017 for calendar year-end entities).

Additionally, in March 2016, the FASB issued ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus agent considerations (reporting revenue gross versus net), which clarifies the implementation guidance on principal versus agent considerations on such matters. The Company is currently evaluating the effect that adopting this guidance will have on its financial position, results of operations or cash flows.

2. Properties and Equipment, Net

Properties and equipment, net are comprised of the following:

(In thousands)	March 31, 2016	December 31, 2015
Proved oil and gas properties	\$7,483,181	\$ 8,821,146
Unproved oil and gas properties	324,488	390,434
Gathering and pipeline systems	242,962	243,672
Land, building and other equipment	114,596	117,848
	8,165,227	9,573,100
Accumulated depreciation, depletion and amortization	(3,327,413)	(4,596,221)
	\$4,837,814	\$ 4,976,879

At March 31, 2016, the Company did not have any projects that had exploratory well costs capitalized for a period of greater than one year after drilling.

In February 2016, the Company completed the divestiture of certain proved and unproved oil and gas properties in east Texas for approximately \$55.9 million (subject to customary post close adjustments) and recognized a \$1.4 million gain on sale of assets. The purchase price included a \$6.3 million deposit that was received in the fourth quarter of 2015.

3. Equity Method Investments

The Company holds a 25% equity interest in Constitution Pipeline Company, LLC (Constitution) and a 20% equity interest in Meade Pipeline Co LLC (Meade). Activity related to these equity method investments is as follows:

(In thousands)	Constitution		Meade		Total	
	Three Months Ended March 31,		Three Months Ended March 31,		Three Months Ended March 31,	
	2016	2015	2016	2015	2016	2015
Balance at beginning of period	\$90,345	\$64,268	\$13,172	\$3,761	\$103,517	\$68,029
Contributions	6,250	3,000	5,402	2,078	11,652	5,078
Earnings (loss) on equity method investments	2,011	1,427	(2)	(6)	2,009	1,421
Balance at end of period	\$98,606	\$68,695	\$18,572	\$5,833	\$117,178	\$74,528

On April 22, 2016, Constitution announced that the New York State Department of Environmental Conservation (NYSDEC) denied Constitution's application for a section 401 Water Quality Certification (Certification) for the New York State portion of its proposed 124-mile route. Constitution stated that it remains committed to pursuing the project and that it intends to pursue all available options to challenge the legality and appropriateness of NYDEC's decision.

In light of the denial of the Certification and the anticipated actions to challenge the decision, Constitution has revised its target in-service date to the second half of 2018, assuming that the challenge process is satisfactorily and promptly

Table of Contents

concluded. Constitution is evaluating the impacts of the denial of the certification on the project, and the Company is evaluating the impact on its investment in Constitution.

During 2016, the Company expects to contribute between approximately \$30.0 million and \$35.0 million to its equity method investments. For further information regarding the Company's equity method investments, refer to Note 4 of the Notes to the Consolidated Financial Statements in the Form 10-K.

4. Debt and Credit Agreements

The Company's debt and credit agreements consisted of the following:

(In thousands)	March 31, 2016	December 31, 2015
Total Debt		
7.33% weighted-average senior notes	\$20,000	\$20,000
6.51% weighted-average senior notes	425,000	425,000
9.78% senior notes	67,000	67,000
5.58% weighted-average senior notes	175,000	175,000
3.65% weighted-average senior notes	925,000	925,000
Revolving credit facility	—	413,000
	\$1,612,000	\$2,025,000
Unamortized debt issuance costs	(8,808)	(8,861)
Total debt, net⁽¹⁾	\$1,603,192	\$2,016,139

(1) Includes \$20.0 million of current portion of long-term debt at March 31, 2016 and December 31, 2015, respectively.

At March 31, 2016, the Company was in compliance with all restrictive financial covenants, as amended, for both its revolving credit facility and senior notes. As of March 31, 2016, based on the Company's asset coverage and leverage ratios, there were no interest rate adjustments required for the Company's senior notes.

At March 31, 2016, the Company had no borrowings outstanding under its credit facility and had unused commitments of \$1.8 billion. The Company's weighted-average effective interest rates for the revolving credit facility for the three months ended March 31, 2016 and 2015 were approximately 2.3% and 2.6%, respectively.

Subsequent Event

The borrowing base is redetermined annually under the terms of the revolving credit facility on April 1. In addition, either the Company or the banks may request an interim redetermination twice a year or in connection with certain acquisitions or sales of oil and gas properties. Effective April 19, 2016, the Company's borrowing base was reduced from \$3.4 billion to \$3.2 billion. The maximum credit amount under the revolving credit facility remained unchanged at \$1.8 billion; however, the available commitments were reduced to \$1.6 billion.

5. Derivative Instruments and Hedging Activities

As of March 31, 2016, the Company had the following outstanding commodity derivatives:

Type of Contract	Volume	Contract Period	Collars		Weighted-Average Range	Swaps	
			Floor	Ceiling		Weighted-Average	Weighted-Average
Natural gas	52.0Bcf	Apr. 2016 - Oct. 2016					\$ 2.51
Crude oil	1.4 Mmbbl	Apr. 2016 - Dec. 2016	\$38.00	\$ 38.00	\$47.10-\$47.50	\$ 47.28	

In the table above, natural gas prices are stated per Mcf and crude oil prices are stated per barrel.

	\$ 18,994	\$ 34,123

6. Fair Value Measurements

The Company follows the authoritative guidance for measuring fair value of assets and liabilities in its financial statements. For further information regarding the fair value hierarchy, refer to Note 1 of the Notes to the Consolidated Financial Statements in the Form 10-K.

Financial Assets and Liabilities

The following fair value hierarchy table presents information about the Company's financial assets and liabilities measured at fair value on a recurring basis:

(In thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at March 31, 2016
Assets				
Deferred compensation plan	\$ 13,013	\$ —	\$ —	\$ 13,013
Derivative instruments	—	15,347	3,647	18,994
Total assets	\$ 13,013	\$ 15,347	\$ 3,647	\$ 32,007
Liabilities				
Deferred compensation plan	\$ 25,144	\$ —	\$ —	\$ 25,144
Total liabilities	\$ 25,144	\$ —	\$ —	\$ 25,144

Table of Contents

(In thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at December 31, 2015
Assets				
Deferred compensation plan	\$ 12,921	\$ —	\$ —	\$ 12,921
Total assets	\$ 12,921	\$ —	\$ —	\$ 12,921
Liabilities				
Deferred compensation plan	\$ 22,371	\$ —	\$ —	\$ 22,371
Total liabilities	\$ 22,371	\$ —	\$ —	\$ 22,371

The Company's investments associated with its deferred compensation plan consist of mutual funds and deferred shares of the Company's common stock that are publicly traded and for which market prices are readily available. The derivative instruments were measured based on quotes from the Company's counterparties. Such quotes have been derived using an income approach that considers various inputs including current market and contractual prices for the underlying instruments, quoted forward prices for natural gas and crude oil, basis differentials, volatility factors and interest rates, such as a LIBOR curve for a similar length of time as the derivative contract term as applicable. Estimates are verified using relevant NYMEX futures contracts and/or are compared to multiple quotes obtained from counterparties for reasonableness. The determination of the fair values presented above also incorporates a credit adjustment for non-performance risk. The Company measured the non-performance risk of its counterparties by reviewing credit default swap spreads for the various financial institutions with which it has derivative transactions, while non-performance risk of the Company is evaluated using a market credit spread provided by the Company's bank. The Company has not incurred any losses related to non-performance risk of its counterparties and does not anticipate any material impact on its financial results due to non-performance by third parties. The most significant unobservable inputs relative to the Company's Level 3 derivative contracts are basis differentials and volatility factors. An increase (decrease) in these unobservable inputs would result in an increase (decrease) in fair value, respectively. The Company does not have access to the specific assumptions used in its counterparties' valuation models. Consequently, additional disclosures regarding significant Level 3 unobservable inputs were not provided. The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as Level 3 in the fair value hierarchy:

(In thousands)	Three Months Ended March 31,	
	2016	2015
Balance at beginning of period	\$—	\$85,958
Total gains (losses) (realized or unrealized):		
Included in earnings	3,647	17,840
Included in other comprehensive income	—	—
Settlements	—	(20,473)
Transfers in and/or out of level 3	—	—
Balance at end of period	\$3,647	\$83,325

Change in unrealized gains (losses) relating to assets and liabilities still held at the end of the period \$3,647 \$(2,663)
There were no transfers between Level 1 and Level 2 fair value measurements for the three months ended March 31, 2016 and 2015.

Non-Financial Assets and Liabilities

The Company discloses or recognizes its non-financial assets and liabilities, such as impairments, at fair value on a nonrecurring basis. As none of the Company's non-financial assets and liabilities were measured at fair value as of March 31, 2016 and 2015, additional disclosures were not required.

The estimated fair value of the Company's asset retirement obligation at inception is determined by utilizing the income approach by applying a credit-adjusted risk-free rate, which takes into account the Company's credit risk, the time

10

Table of Contents

value of money, and the current economic state to the undiscounted expected abandonment cash flows. Given the unobservable nature of the inputs, the measurement of the asset retirement obligations was classified as Level 3 in the fair value hierarchy.

Fair Value of Other Financial Instruments

The estimated fair value of other financial instruments is the amount at which the instrument could be exchanged currently between willing parties. The carrying amount reported in the Condensed Consolidated Balance Sheet for cash and cash equivalents approximates fair value due to the short-term maturities of these instruments. Cash and cash equivalents are classified as Level 1 in the fair value hierarchy and the remaining financial instruments are classified as Level 2.

The Company uses available market data and valuation methodologies to estimate the fair value of debt. The fair value of debt is the estimated amount the Company would have to pay a third party to assume the debt, including a credit spread for the difference between the issue rate and the period end market rate. The credit spread is the Company's default or repayment risk. The credit spread (premium or discount) is determined by comparing the Company's senior notes and revolving credit facility to new issuances (secured and unsecured) and secondary trades of similar size and credit statistics for both public and private debt. The fair value of all senior notes and the revolving credit facility is based on interest rates currently available to the Company. The Company's debt is valued using an income approach and classified as Level 3 in the fair value hierarchy.

The carrying amount and fair value of debt is as follows:

	March 31, 2016		December 31, 2015	
(In thousands)	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Debt	\$ 1,603,192	\$ 1,506,177	\$ 2,016,139	\$ 1,839,530
Current maturities	(20,000)	(20,219)	(20,000)	(20,378)
Long-term debt	\$ 1,583,192	\$ 1,485,958	\$ 1,996,139	\$ 1,819,152

7. Asset Retirement Obligations

Activity related to the Company's asset retirement obligations is as follows:

(In thousands)	Three Months Ended March 31, 2016
Balance at beginning of period	\$ 145,606
Liabilities incurred	1,746
Liabilities settled	(53)
Liabilities divested	(16,353)
Accretion expense	1,849
Balance at end of period	\$ 132,795

As of March 31, 2016 and December 31, 2015, approximately \$2.0 million is included in accrued liabilities in the Condensed Consolidated Balance Sheet, which represents the current portion of the Company's asset retirement obligation.

8. Commitments and Contingencies**Contractual Obligations**

The Company has various contractual obligations in the normal course of its operations. There have been no material changes to the Company's contractual obligations described under "Transportation and Gathering Agreements," "Drilling Rig Commitments" and "Lease Commitments" as disclosed in Note 9 in the Notes to Consolidated Financial Statements included in the Form 10-K.

Legal Matters

The Company is a defendant in various other legal proceedings arising in the normal course of business. All known liabilities are accrued when management determines they are probable based on its best estimate of the potential loss.

While the outcome and impact of these legal proceedings on the Company cannot be predicted with certainty, management believes that the resolution of these proceedings will not have a material effect on the Company's financial position, results of operations or cash flows.

Table of Contents

Contingency Reserves

When deemed necessary, the Company establishes reserves for certain legal proceedings. The establishment of a reserve is based on an estimation process that includes the advice of legal counsel and subjective judgment of management. While management believes these reserves to be adequate, it is reasonably possible that the Company could incur additional losses with respect to those matters in which reserves have been established. The Company believes that any such amount above the amounts accrued would not be material to the Condensed Consolidated Financial Statements. Future changes in facts and circumstances not currently foreseeable could result in the actual liability exceeding the estimated ranges of loss and amounts accrued.

9. Capital Stock

On February 22, 2016, the Company entered into an underwriting agreement, pursuant to which the Company sold an aggregate of 44,000,000 shares of common stock at a price to the Company of \$19.675 per share. On February 26, 2016, the Company received \$865.7 million in net proceeds, after deducting underwriting discounts and commissions. On March 2, 2016, the Company sold an additional 6,600,000 shares of common stock as a result of the exercise of the underwriters' option to purchase additional shares and received \$129.9 million in net proceeds. These net proceeds were used for general corporate purposes, including repaying indebtedness under the Company's revolving credit facility and funding a portion of our capital program.

10. Stock-based Compensation

General

Stock-based compensation expense in the first quarter of 2016 and 2015 was \$10.6 million and \$5.9 million, respectively, and is included in general and administrative expense in the Condensed Consolidated Statement of Operations.

During the first three months of 2016, the Company recorded a shortfall of \$2.0 million as a result of book compensation cost for employee stock-based compensation exceeding the federal and state tax deductions for certain awards that vested during the period, resulting in a reduction of the Company's windfall tax benefit that is recorded in additional paid in capital in the Condensed Consolidated Balance Sheet. During the first three months of 2015, the Company realized a \$3.4 million tax benefit related to the federal and state tax deductions in excess of book compensation cost for employee stock-based compensation. The Company is able to recognize a tax benefit only to the extent it reduces the Company's income taxes payable.

Refer to Note 13 of the Notes to the Consolidated Financial Statements in the Form 10-K for further description of the various types of stock-based compensation awards and the applicable award terms.

Restricted Stock Units

During the first three months of 2016, 61,805 restricted stock units were granted to non-employee directors of the Company with a weighted-average grant date value of \$20.28 per unit. The fair value of these units is measured based on the closing stock price on grant date and compensation expense is recorded immediately. These units immediately vest and are issued when the director ceases to be a director of the Company.

Performance Share Awards

The performance period for the awards granted in 2016 commenced on January 1, 2016 and ends on December 31, 2018. The Company used an annual forfeiture rate assumption ranging from 0% to 5% for purposes of recognizing stock-based compensation expense for its performance share awards.

Performance Share Awards Based on Internal Performance Metrics

The fair value of performance share award grants based on internal performance metrics is based on the closing stock price on the grant date. Each performance share award represents the right to receive up to 100% of the award in shares of common stock.

Employee Performance Share Awards. During the first three months of 2016, 435,990 Employee Performance Share Awards were granted at a grant date value of \$20.49 per share. The performance metrics are set by the Company's compensation committee and are based on the Company's average production, average finding costs and average reserve replacement over a three-year performance period. Based on the Company's probability assessment at March 31, 2016, it is considered probable that the criteria for these awards will be met.

Table of Contents

Hybrid Performance Share Awards. During the first three months of 2016, 271,938 Hybrid Performance Share Awards were granted at a grant date value of \$20.49 per share. The 2016 awards vest 25% on each of the first and second anniversary dates and 50% on the third anniversary, provided that the Company has \$100 million or more of operating cash flow for the year preceding the vesting date, as set by the Company's compensation committee. If the Company does not meet the performance metric for the applicable period, then the portion of the performance shares that would have been issued on that anniversary date will be forfeited. Based on the Company's probability assessment at March 31, 2016, it is considered probable that the criteria for these awards will be met.

Performance Share Awards Based on Market Conditions

These awards have both an equity and liability component, with the right to receive up to the first 100% of the award in shares of common stock and the right to receive up to an additional 100% of the value of the award in excess of the equity component in cash. The equity portion of these awards is valued on the grant date and is not marked to market, while the liability portion of the awards is valued as of the end of each reporting period on a mark-to-market basis. The Company calculates the fair value of the equity and liability portions of the awards using a Monte Carlo simulation model.

TSR Performance Share Awards. During the first three months of 2016, 407,907 TSR Performance Share Awards were granted and are earned, or not earned, based on the comparative performance of the Company's common stock measured against a predetermined group of companies in the Company's peer group over a three-year performance period.

The following assumptions were used to determine the grant date fair value of the equity component (February 17, 2016) and the period-end fair value of the liability component of the TSR Performance Share Awards:

	Grant Date March 31, 2016	
Fair value per performance share award	\$ 18.57	\$5.40 - \$11.24

Assumptions:

Stock price volatility	34.4	%	36.1% - 51.9%
Risk free rate of return	0.9	%	0.5% - 0.8%

11. Earnings per Common Share

Basic earnings per share (EPS) is computed by dividing net income by the weighted-average number of common shares outstanding for the period. Diluted EPS is similarly calculated except that the common shares outstanding for the period is increased using the treasury stock method to reflect the potential dilution that could occur if outstanding stock appreciation rights were exercised and stock awards were vested at the end of the applicable period.

The following is a calculation of basic and diluted weighted-average shares outstanding:

	Three Months Ended March 31,	
(In thousands)	2016	2015
Weighted-average shares - basic	431,841	413,344
Dilution effect of stock appreciation rights and stock awards at end of period	—	1,427
Weighted-average shares - diluted	431,841	414,771
Weighted-average shares excluded from diluted EPS due to the anti-dilutive effect	700	401

Table of Contents

12. Additional Balance Sheet Information

Certain balance sheet amounts are comprised of the following:

(In thousands)	March 31, 2016	December 31, 2015
Accounts receivable, net		
Trade accounts	\$97,205	\$ 116,772
Joint interest accounts	2,215	2,013
Other accounts	2,484	2,557
	101,904	121,342
Allowance for doubtful accounts	(1,033)	(1,113)
	\$100,871	\$ 120,229

Inventories

Tubular goods and well equipment	\$14,186	\$ 14,655
Natural gas in storage	1,762	2,364
Other accounts	—	30
	\$15,948	\$ 17,049

Other assets

Deferred compensation plan	\$13,013	\$ 12,921
Debt issuance costs	13,957	14,871
Other accounts	59	64
	\$27,029	\$ 27,856

Accounts payable

Trade accounts	\$28,942	\$ 30,038
Natural gas purchases	1,101	2,231
Royalty and other owners	69,776	75,106
Accrued capital costs	26,930	27,479
Taxes other than income	16,904	14,628
Other accounts	4,341	10,925
	\$147,994	\$ 160,407

Accrued liabilities

Employee benefits	\$8,725	\$ 13,870
Taxes other than income	6,104	5,073
Income taxes payable	97	—
Other accounts	2,900	5,980
	\$17,826	\$ 24,923

Other liabilities

Deferred compensation plan	\$25,144	\$ 22,371
Other accounts	3,596	3,653
	\$28,740	\$ 26,024

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following review of operations for the three month periods ended March 31, 2016 and 2015 should be read in conjunction with our Condensed Consolidated Financial Statements and the Notes included in this Form 10-Q and with the Consolidated Financial Statements, Notes and Management's Discussion and Analysis included in the Cabot Oil & Gas Corporation Annual Report on Form 10-K for the year ended December 31, 2015 (Form 10-K).

OVERVIEW

Financial and Operating Overview

Financial and operating results for the three months ended March 31, 2016 compared to the three months ended March 31, 2015 are as follows:

14

Table of Contents

Equivalent production decreased 11.0 Bcfe, or 6%, from 171.4 Bcfe, or 1.9 Bcfe per day, in 2015 to 160.3 Bcfe, or 1.8 Bcfe per day, in 2016.

Natural gas production decreased 8.7 Bcf, or 5%, from 161.8 Bcf in 2015 to 153.1 Bcf in 2016, as a result of reduced drilling activity in Pennsylvania due to the current commodity price environment.

Crude oil/condensate/NGL production decreased 0.4 Mmbbls, or 25%, from 1.6 Mmbbls in 2015 to 1.2 Mmbbls in 2016, as a result of a decrease in drilling activity in south Texas due to the current commodity price environment.

Average realized natural gas price was \$1.49 per Mcf, 39% lower than the \$2.46 per Mcf realized in the comparable period of the prior year.

Average realized crude oil price was \$27.65 per Bbl, 37% lower than the \$43.82 per Bbl realized in the comparable period of the prior year.

Drilled 10 gross wells (10.0 net) with a success rate of 100% compared to 43 gross wells (41.9 net) with a success rate of 100% for the comparable period of the prior year.

Total capital expenditures were \$91.7 million compared to \$303.4 million in the comparable period of the prior year.

Average rig count during 2016 was approximately 1.2 rigs in the Marcellus Shale and approximately 0.5 rigs in the Eagle Ford Shale, compared to an average rig count in the Marcellus Shale of approximately 4.7 rigs and approximately 3.4 rigs in the Eagle Ford Shale in the comparable period of the prior year.

In the first quarter of 2016, we completed a public offering of our common stock and received net proceeds of \$995.6 million, after deducting underwriting discounts and commissions.

Market Conditions and Commodity Prices

Our financial results depend on many factors, particularly the price of natural gas and crude oil and our ability to market our production on economically attractive terms. Commodity prices are affected by many factors outside of our control, including changes in market supply and demand, which are impacted by weather conditions, pipeline capacity constraints, inventory storage levels, basis differentials and other factors. In addition, our realized prices are further impacted by our derivative and hedging activities. As a result, we cannot accurately predict future commodity prices and, therefore, we cannot determine with any degree of certainty what effect increases or decreases in these prices will have on our capital program, production volumes or revenues. Location differentials have increased in certain regions, such as in the Appalachian region, resulting in further declines in natural gas prices. We expect natural gas and crude oil prices to remain volatile. In addition to production volumes and commodity prices, finding and developing sufficient amounts of natural gas and crude oil reserves at economical costs are critical to our long-term success. For information about the impact of realized commodity prices on our natural gas and crude oil and condensate revenues, refer to “Results of Operations” below.

We account for our derivative instruments on a mark-to-market basis with changes in fair value recognized in operating revenues in the Condensed Consolidated Statement of Operations. As a result of these mark-to-market adjustments associated with our derivative instruments, we will likely experience volatility in our earnings due to commodity price volatility. Refer to “Impact of Derivative Instruments on Operating Revenues” below and Note 5 to the Condensed Consolidated Financial Statements for more information.

Commodity prices have continued to remain low or decline during 2016 compared to 2015. In the event that commodity prices significantly decline, management would test the recoverability of the carrying value of its oil and gas properties and, if necessary, record an impairment charge. However, following the \$771.0 million and \$114.9 million impairments recorded in the fourth quarter of 2014 and 2015, respectively, we do not believe that further impairment of our oil and gas properties is reasonably likely to occur in the near future; however, in the event that commodity prices significantly decline from current levels, additional impairments of our oil and gas properties may be required.

We believe that we are well-positioned to manage the challenges presented in the lower commodity pricing environment, and that we can endure the current cyclical downturn in the oil and gas industry and the continued volatility in current and future commodity prices by:

Continuing to exercise discipline in our capital program by reducing our capital expenditures and number of wells drilled compared to the prior year.

Table of Contents

Continuing to optimize our drilling, completion and operational efficiencies, resulting in lower operating costs per unit of production.

Continuing to manage our balance sheet, including the recent issuance of common stock which allowed us to pay down the outstanding balance under our revolving credit facility, leaving us with sufficient availability under our revolving credit facility to meet our capital requirements and maintain compliance with our debt covenants.

Continuing to manage price risk by strategically hedging our natural gas and crude oil production.

Outlook

Our full year 2016 capital spending program includes approximately \$325.0 million in capital expenditures related to our drilling program and contributions between approximately \$30.0 million and \$35.0 million to our equity method investments. All such expenditures are expected to be funded by existing cash, operating cash flow and if required, borrowings under our revolving credit facility.

We plan to drill approximately 30 gross wells (30.0 net) in 2016 compared to 142 gross wells (132.8 net) in 2015. We allocate our planned program for capital expenditures among our various operating areas based on market conditions, return expectations, availability of services and human resources. We will continue to assess the natural gas and crude oil price environment along with our liquidity position and may increase or decrease our capital expenditures accordingly. As a result of sustained lower natural gas and crude oil prices expected in 2016, we reduced our budgeted capital expenditures compared to 2015. In addition, we plan to operate an average of approximately 1.3 rigs in 2016, a decrease from an average of approximately 5.4 rigs in 2015.

Financial Condition

Capital Resources and Liquidity

Our primary sources of cash for the three months ended March 31, 2016 were from funds generated from the sale of common stock, the sale of natural gas and crude oil production and proceeds from the sale of assets. These cash flows were primarily used to fund our capital expenditures (including contributions to our equity method investments), repayment of indebtedness under our revolving credit facility, interest payments and payment of dividends. See below for additional discussion and analysis of cash flow.

In the first quarter of 2016, we sold an aggregate of 50.6 million shares of common stock at a price of \$19.675 per share and received \$995.6 million in net proceeds, after deducting underwriting discounts and commissions. These net proceeds were used for general corporate purposes, including repaying indebtedness under our revolving credit facility and funding a portion of our capital program.

Our borrowing base is redetermined annually under the terms of the revolving credit facility on April 1. In addition, either we or the banks may request an interim redetermination twice a year or in connection with certain acquisitions or sales of oil and gas properties. Effective April 19, 2016, our borrowing base was reduced from \$3.4 billion to \$3.2 billion. The maximum credit amount under the revolving credit facility remain unchanged at \$1.8 billion; however, the available commitments were reduced to \$1.6 billion. We do not believe these reductions would have a significant impact on our ability to service our debt and fund our drilling program and related operations.

We strive to manage our debt at a level below the available credit line in order to maintain borrowing capacity. Our revolving credit facility includes a covenant limiting our total debt. We believe that, with the proceeds received from our recent equity offering, internally generated cash flow and availability under our revolving credit facility, we have the capacity to finance our spending plans.

We were in compliance with all restrictive financial covenants, as amended, for both the revolving credit facility and senior notes as of March 31, 2016. As of March 31, 2016, based on our asset coverage and leverage ratios, there were no interest rate adjustments required for our senior notes. See our Form 10-K for further discussion of our restrictive financial covenants.

Table of Contents

Cash Flows

Our cash flows from operations, investing activities and financing activities are as follows:

(In thousands)	Three Months Ended	
	March 31,	
	2016	2015
Cash flows provided by operating activities	\$62,090	\$267,381
Cash flows used in investing activities	(54,061)	(397,239)
Cash flows provided by financing activities	570,773	122,852
Net increase (decrease) in cash and cash equivalents	\$578,802	\$(7,006)

Operating Activities. Operating cash flow fluctuations are substantially driven by commodity prices and changes in our production volumes and operating expenses. Prices for natural gas and crude oil have historically been volatile, primarily as a result of supply and demand for natural gas and crude oil, pipeline infrastructure constraints and seasonal influences. In addition, fluctuations in cash flow may result in an increase or decrease in our capital expenditures. See “Results of Operations” for a review of the impact of prices and volumes on revenues.

Our working capital is substantially influenced by the variables discussed above and fluctuates based on the timing and amount of borrowings and repayments under our revolving credit facility, the timing of cash collections and payments on our trade accounts receivable and payable, respectively, the issuance of common stock and changes in the fair value of our commodity derivative activity. From time to time, our working capital will reflect a deficit, while at other times it will reflect a surplus. This fluctuation is not unusual. At March 31, 2016 and December 31, 2015, we had a working capital surplus (deficit) of \$521.3 million and \$(90.8) million, respectively. We believe we have adequate liquidity and availability under our revolving credit facility to meet our working capital requirements.

Net cash provided by operating activities in the first three months of 2016 decreased by \$205.3 million over the first three months of 2015. This decrease was primarily due to lower operating revenues and unfavorable changes in working capital and other assets and liabilities, partially offset by lower operating expenses (excluding non-cash expenses). The decrease in operating revenues was primarily due to a decrease in realized natural gas and crude oil prices and a decrease in equivalent production. Average realized natural gas and crude oil prices decreased by 39% and 37%, respectively, for the first three months of 2016 compared to the first three months of 2015. Equivalent production decreased by 6% for the first three months of 2016 compared to the first three months of 2015 due to lower natural gas production in the Marcellus Shale and lower oil production in the Eagle Ford Shale.

See “Results of Operations” for additional information relative to commodity price, production and operating expense fluctuations. We are unable to predict future commodity prices and, as a result, cannot provide any assurance about future levels of net cash provided by operating activities.

Investing Activities. Cash flows used in investing activities decreased by \$343.2 million for the first three months of 2016 compared to the first three months of 2015. The decrease was due to \$303.0 million lower capital expenditures, \$46.7 million higher proceeds from the sale of assets, partially offset by \$6.6 million higher capital contributions associated with our equity method investments.

Financing Activities. Cash flows provided by financing activities increased by \$447.9 million for the first three months of 2016 compared to the first three months of 2015. This increase was primarily due to \$1.0 billion of net of proceeds related to the issuance of common stock, partially offset by \$538.0 million of lower net borrowings due to the repayment of the outstanding balance on our revolving credit facility, higher capitalized debt issuance costs of \$3.2 million related to the amendment of our revolving credit facility in December 2015, a decrease of \$3.4 million in tax benefits associated with our stock-based compensation and a decrease of \$2.6 million in other items.

Table of Contents

Capitalization

Information about our capitalization is as follows:

(Dollars in thousands)	March 31, 2016	December 31, 2015
Debt	\$1,603,192	\$2,016,139
Stockholders' equity	2,944,060	2,009,188
Total capitalization	\$4,547,252	\$4,025,327
Debt to total capitalization	35	% 50
Cash and cash equivalents	\$579,316	\$514

During the three months ended March 31, 2016 and 2015, we paid dividends of \$8.3 million (\$0.02 per share) on our common stock, respectively.

Capital and Exploration Expenditures

On an annual basis, we generally fund most of our capital expenditures, excluding any significant property acquisitions, with cash generated from operations, and if required, borrowings under our revolving credit facility. We budget these expenditures based on our projected cash flows for the year. In 2016, our budgeted capital expenditures are expected to exceed cash flows from operations, requiring us to fund a portion of our capital through cash on hand, and if required, borrowings under our revolving credit facility.

The following table presents major components of our capital and exploration expenditures:

(In thousands)	Three Months Ended March 31,	
	2016	2015
Capital expenditures		
Drilling and facilities	\$90,913	\$293,501
Leasehold acquisitions	344	9,415
Property acquisitions	—	151
Pipeline and gathering	269	186
Other	162	183
	91,688	303,436
Exploration expenditures	6,383	8,732
Total	\$98,071	\$312,168

For the full year of 2016, we plan to drill approximately 30 gross wells (30.0 net). In 2016, our drilling program includes approximately \$325.0 million in total capital expenditures compared to \$773.5 million in 2015. See “Financial and Operating Overview” for additional information regarding the current year drilling program. We will continue to assess the natural gas and crude oil price environment along with our liquidity position and may increase or decrease our capital expenditures accordingly. Due to the current commodity price environment, our overall capital spending in 2016 is expected to be lower than our expenditures in 2015.

Contractual Obligations

We have various contractual obligations in the normal course of our operations. There have been no material changes to our contractual obligations described under “Transportation and Gathering Agreements,” “Drilling Rig Commitments” and “Lease Commitments” as disclosed in Note 9 in the Notes to Consolidated Financial Statements and the obligations described under “Contractual Obligations” in Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in our Form 10-K.

Table of Contents

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our Condensed Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. See our Form 10-K for further discussion of our critical accounting policies.

Recently Adopted Accounting Pronouncements

In March 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-03, Simplifying the Presentation of Debt Issuance Costs. The amendments in this update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. In August 2015, the FASB issued ASU No. 2015-15, Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements. The update provides authoritative guidance for debt issuance costs related to line-of-credit arrangements, noting the SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The guidance is effective for interim and annual periods beginning after December 15, 2015.

Effective January 1, 2016, we adopted ASU No. 2015-03 as a change in accounting principle. The Condensed Consolidated Balance Sheet as of December 31, 2015 has been retrospectively adjusted to reflect the adoption of this guidance, resulting in a \$8.9 million decrease in both other assets and long term debt related to the debt issuance costs on our senior notes. There was no impact to our Condensed Consolidated Statement of Operations or Statement of Cash Flows.

Recently Issued Accounting Pronouncements

In March 2016, the FASB issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting, as a new Topic, Accounting Standards Codification Topic 718. The areas for simplification in this update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Some of the areas for simplification apply only to nonpublic entities. The guidance is effective for interim and annual periods beginning after December 15, 2016. Early adoption is permitted. An entity that elects early adoption must adopt all of the amendments in the same period. Amendments related to the timing of when excess tax benefits are recognized, minimum statutory withholding requirements, forfeitures, and intrinsic value should be applied using a modified retrospective transition method by means of a cumulative-effect adjustment to equity as of the beginning of the period in which the guidance is adopted. Amendments related to the presentation of employee taxes paid on the statement of cash flows when an employer withholds shares to meet the minimum statutory withholding requirement should be applied retrospectively. Amendments requiring recognition of excess tax benefits and tax deficiencies in the income statement and the practical expedient for estimating expected term should be applied prospectively. An entity may elect to apply the amendments related to the presentation of excess tax benefits on the statement of cash flows using either a prospective transition method or a retrospective transition method. We are currently evaluating the effect that adopting this guidance will have on our financial position, results of operations or cash flows.

In February 2016, the FASB issued ASU No. 2016-02, Leases, as a new Topic, Accounting Standards Codification Topic 842. The new lease guidance supercedes Topic 840. The core principle of the guidance is that a company should recognize the assets and liabilities that arise from leases. The guidance is effective for interim and annual periods beginning after December 15, 2018. This ASU can be adopted using a modified retrospective approach. We are currently evaluating the effect that adopting this guidance will have on our financial position, results of operations or cash flows.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, as a new Topic, Accounting Standards Codification Topic 606. The new revenue recognition standard provides a five-step analysis of transactions to determine when and how revenue is recognized. The core principle of the guidance is that a company

should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606), which deferred the effective date of ASU No. 2014-09 by one year, making the new standard effective for interim and annual periods beginning after December 15, 2017. This ASU can be adopted either retrospectively or as a cumulative-effect adjustment as of the date of adoption; however, entities reporting under U.S. GAAP are not permitted to adopt the standard earlier than the original effective date for public entities (that is, no earlier than 2017 for calendar year-end entities).

Table of Contents

Additionally, in March 2016, the FASB issued ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus agent considerations (reporting revenue gross versus net), which clarifies the implementation guidance on principal versus agent considerations on such matters. We are currently evaluating the effect that adopting this guidance will have on our financial position, results of operations or cash flows.

Results of Operations

First Three Months of 2016 and 2015 Compared

We reported a net loss in the first three months of 2016 of \$51.2 million, or \$0.12 per share, compared to net income of \$40.3 million, or \$0.10 per share, in the first three months of 2015. The decrease in net income was due to lower operating revenues and higher interest expense, partially offset by lower operating expenses and income taxes and higher gain on sale of assets and earnings on equity method investments.

Revenue, Price and Volume Variances

Our revenues vary from year to year as a result of changes in commodity prices and production volumes. Below is a discussion of revenue, price and volume variances.

Revenue Variances (In thousands)	Three Months Ended March 31,		Variance	
	2016	2015	Amount	Percent
Natural gas	\$227,578	\$360,191	\$(132,613)	(37)%
Crude oil and condensate	30,676	62,558	(31,882)	(51)%
Gain (loss) on derivative instruments	18,994	34,123	(15,129)	(44)%
Brokered natural gas	3,180	4,827	(1,647)	(34)%
Other	1,513	3,066	(1,553)	(51)%
	\$281,941	\$464,765	\$(182,824)	(39)%

Price Variances	Three Months Ended March 31,		Variance		Increase (Decrease) (In thousands)
	2016	2015	Amount	Percent	
Natural gas	\$1.49	\$2.23	\$(0.74)	(33)%	\$(113,212)
Crude oil and condensate	\$27.65	\$43.82	\$(16.17)	(37)%	(17,947)
Total					\$(131,159)
Volume Variances					
Natural gas (Bcf)	153.1	161.8	(8.7)	(5)%	\$(19,401)
Crude oil and condensate (Mbbbl)	1,110	1,428	(318)	(22)%	(13,935)
Total					\$(33,336)

Natural Gas Revenues

The decrease in natural gas revenues of \$132.6 million was due to lower natural gas prices and lower production due to reduced drilling activity in Pennsylvania due to the current commodity price environment.

Crude Oil and Condensate Revenues

The decrease in crude oil and condensate revenues of \$31.9 million was due to lower crude oil prices and lower production. The decrease in production was as a result of a decrease in drilling activity in south Texas due to the current commodity price environment.

Table of Contents

Impact of Derivative Instruments on Operating Revenues

(In thousands)	Three Months Ended March 31,	
	2016	2015
Cash received (paid) on settlement of derivative instruments		
Gain (loss) on derivative instruments	\$—	\$37,685
Non-cash gain (loss) on derivative instruments		
Gain (loss) on derivative instruments	18,994	(3,562)
	\$18,994	\$34,123

Brokered Natural Gas

	Three Months Ended March 31,		Variance Amount Percent	Price and Volume Variances (In thousands)
	2016	2015		
Brokered Natural Gas Sales				
Sales price (\$/Mcf)	\$2.20	\$3.29	\$(1.09) (33)%	\$ (1,573)
Volume brokered (Mmcf)	x 1,443	x 1,468	(25) (2)%	(74)
Brokered natural gas (In thousands)	\$3,180	\$4,827		\$ (1,647)

Brokered Natural Gas Purchases

Purchase price (\$/Mcf)	\$1.78	\$2.55	\$(0.77) (30)%	\$ 1,109
Volume brokered (Mmcf)	x 1,443	x 1,468	(25) (2)%	64
Brokered natural gas (In thousands)	\$2,566	\$3,739		\$ 1,173

Brokered natural gas margin (In thousands) \$614 \$1,088 \$ (474)

The \$0.5 million decrease in brokered natural gas margin is a result of a decrease in sales price that outpaced the decrease in purchase price.

Operating and Other Expenses

(In thousands)	Three Months Ended March 31,		Variance	
	2016	2015	Amount	Percent
Operating and Other Expenses				
Direct operations	\$26,035	\$36,017	\$(9,982)	(28)%
Transportation and gathering	109,652	121,235	(11,583)	(10)%
Brokered natural gas	2,566	3,739	(1,173)	(31)%
Taxes other than income	5,994	11,280	(5,286)	(47)%
Exploration	6,383	8,732	(2,349)	(27)%
Depreciation, depletion and amortization	161,887	175,497	(13,610)	(8)%
General and administrative	28,376	22,529	5,847	26 %
	\$340,893	\$379,029	\$(38,136)	(10)%
Earnings (loss) on equity method investments	\$2,009	\$1,421	\$588	41 %
Gain (loss) on sale of assets	1,354	138	1,216	(881)%
Interest expense	24,375	23,566	809	3 %
Income tax (benefit) expense	(28,770)	23,474	(52,244)	(223)%

Table of Contents

Total costs and expenses from operations decreased by \$38.1 million, or 10%, in the first three months of 2016 compared to the same period of 2015. The primary reasons for this fluctuation are as follows:

- Direct operations decreased \$10.0 million largely due to lower production, improved operational efficiencies, cost reductions from suppliers, and lower workover costs in 2016 compared to 2015.

- Transportation and gathering decreased \$11.6 million due to lower throughput as a result of lower Marcellus Shale production and the release of certain capacity to third parties, partially offset by higher transportation rates and the commencement of various transportation and gathering agreements in the Marcellus Shale throughout 2015.

- Brokered natural gas decreased \$1.2 million. See the preceding table titled “Brokered Natural Gas” for further analysis.

- Taxes other than income decreased \$5.3 million due to \$3.5 million lower production taxes due to lower natural gas and crude oil prices and production and the receipt of a production tax refund of \$1.9 million. Drilling impact fees also decreased \$1.9 million as a result of reduced drilling activities in the Marcellus Shale and lower rates due to a decrease in natural gas prices.

- Exploration expense decreased \$2.3 million as a result of a decrease in charges related to the release of certain drilling rig contracts in south Texas. In the first three months of 2016, we recorded a charge of \$3.2 million compared to \$5.1 million in the first three months of 2015.

- Depreciation, depletion and amortization decreased \$13.6 million, of which \$10.7 million was due to lower equivalent production volumes and \$4.8 million was due to a lower DD&A rate of \$0.94 per Mcfe for the first three months of 2016 compared to \$0.97 per Mcfe for the first three months of 2015. The lower DD&A rate was primarily due to lower cost reserve additions associated with our Marcellus Shale drilling program and the impairment charge recorded in the fourth quarter of 2015 associated with higher DD&A rate fields. In addition, amortization of unproved properties increased \$1.5 million as a result of ongoing evaluation of our unproved properties.

- General and administrative increased \$5.8 million due to higher stock-based compensation expense of \$4.6 million primarily due to an increase in the Company's stock price during the first three months of 2016 compared to the first three months of 2015 and \$1.6 million higher legal expenses. The remaining increases and decreases in other expenses were not individually significant.

Interest Expense

Interest expense increased \$0.8 million due to an increase in weighted-average borrowings associated with our revolving credit facility based on daily balances of approximately \$356.6 million and approximately \$196.8 million during the first three months of 2016 and 2015, respectively. Interest rates under our revolving credit facility were relatively flat quarter over quarter.

Income Tax (Benefit) Expense

Income tax expense decreased \$52.2 million due to lower pretax income and a lower effective tax rate. The effective tax rate for the first three months of 2016 and 2015 was 36.0% and 36.8%, respectively.

Forward-Looking Information

The statements regarding future financial and operating performance and results, strategic pursuits and goals, market prices, future hedging and risk management activities, and other statements that are not historical facts contained in this report are forward-looking statements. The words “expect,” “project,” “estimate,” “believe,” “anticipate,” “intend,” “budget,” “plan,” “forecast,” “predict,” “may,” “should,” “could,” “will” and similar expressions are also intended to identify forward-looking statements. Such statements involve risks and uncertainties, including, but not limited to, market factors, market prices (including geographic basis differentials) of natural gas and crude oil, results of future drilling and marketing activity, future production and costs, legislative and regulatory initiatives, electronic, cyber or physical security breaches and other factors detailed herein and in our other Securities and Exchange Commission filings. See “Risk Factors” in Item 1A of the Form 10-K for additional information about these risks and uncertainties. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated.

Table of Contents

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

Market Risk

Our primary market risk is exposure to natural gas and crude oil prices. Realized prices are mainly driven by worldwide prices for crude oil and spot market prices for North American natural gas production. Commodity prices can be volatile and unpredictable.

Derivative Instruments and Risk Management Activities

Our risk management strategy is designed to reduce the risk of price volatility for our production in the natural gas and crude oil markets through the use of commodity derivatives. A committee that consists of members of senior management oversees our risk management activities. Our commodity derivatives generally cover a portion of our production and provide only partial price protection by limiting the benefit to us of increases in prices, while protecting us in the event of price declines. Further, if any of our counterparties defaulted, this protection might be limited as we might not receive the full benefit of our commodity derivatives. Please read the discussion below as well as Note 6 of the Notes to the Consolidated Financial Statements in our Form 10-K for a more detailed discussion of our derivative and risk management activities.

Periodically, we enter into commodity derivatives, including collar and swap agreements, to protect against exposure to price declines related to our natural gas and crude oil production. Our credit agreement restricts our ability to enter into commodity derivatives other than to hedge or mitigate risks to which we have actual or projected exposure or as permitted under our risk management policies and not subjecting us to material speculative risks. All of our derivatives are used for risk management purposes and are not held for trading purposes. Under the collar agreements, if the index price rises above the ceiling price, we pay the counterparty. If the index price falls below the floor price, the counterparty pays us. Under the swap agreements, we receive a fixed price on a notional quantity of natural gas or crude oil in exchange for paying a variable price based on a market-based index, such as the NYMEX gas and crude oil futures.

As of March 31, 2016, we had the following outstanding commodity derivatives:

Type of Contract	Volume	Contract Period	Collars		Swaps		Estimated Fair Value Asset (Liability) (In thousands)
			Floor	Ceiling	Weighted-Average	Weighted-Average	
Natural gas	52.0Bcf	Apr. 2016 - Oct. 2016				2.51	\$ 18,623
Crude oil	1.4 Mmbbl	Apr. 2016 - Dec. 2016	\$38.00	\$38.00	\$47.10-\$47.50	\$ 47.28	\$ 387
							\$ 19,010

In the table above, natural gas prices are stated per Mcf and crude oil prices are stated per barrel.

The amounts set forth in the table above represent our derivative position at March 31, 2016 and exclude the impact of non-performance risk. Non-performance risk is considered in the fair value of our derivative instruments that are recorded in our Condensed Consolidated Financial Statements and is primarily evaluated by reviewing credit default swap spreads for the various financial institutions in which we have derivative transactions, while our non-performance risk is evaluated using a market credit spread provided by one of our banks.

We are exposed to market risk on commodity derivative instruments to the extent of changes in market prices of natural gas and crude oil. However, the market risk exposure on these derivative contracts is generally offset by the gain or loss recognized upon the ultimate sale of the commodity. Although notional contract amounts are used to express the volume of natural gas agreements, the amounts that can be subject to credit risk in the event of non-performance by third parties are substantially smaller. Our counterparties are primarily commercial banks and financial service institutions that management believes present minimal credit risk and our derivative contracts are with multiple counterparties to minimize our exposure to any individual counterparty. We perform both quantitative and qualitative assessments of these counterparties based on their credit ratings and credit default swap rates where

applicable. We have not incurred any losses related to non-performance risk of our counterparties and we do not anticipate any material impact on our financial results due to non-performance by third parties. However, we cannot be certain that we will not experience such losses in the future.

The preceding paragraphs contain forward-looking information concerning future production and projected gains and losses, which may be impacted both by production and by changes in the future commodity prices. See “Forward-Looking Information” for further details.

Table of Contents

Fair Value of Other Financial Instruments

The estimated fair value of other financial instruments is the amount at which the instrument could be exchanged currently between willing parties. The carrying amount reported in the Condensed Consolidated Balance Sheet for cash and cash equivalents approximates fair value due to the short-term maturities of these instruments.

We use available market data and valuation methodologies to estimate the fair value of debt. The fair value of debt is the estimated amount we would have to pay a third party to assume the debt, including a credit spread for the difference between the issue rate and the period end market rate. The credit spread is our default or repayment risk. The credit spread (premium or discount) is determined by comparing our senior notes and revolving credit facility to new issuances (secured and unsecured) and secondary trades of similar size and credit statistics for both public and private debt. The fair value of all senior notes and the revolving credit facility is based on interest rates currently available to us.

The carrying amount and fair value of debt is as follows:

(In thousands)	March 31, 2016		December 31, 2015	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Debt	\$1,603,192	\$1,506,177	\$2,016,139	\$1,839,530
Current maturities	(20,000)	(20,219)	(20,000)	(20,378)
Long-term debt, excluding current maturities	\$1,583,192	\$1,485,958	\$1,996,139	\$1,819,152

(1) Excludes debt issuance cost of \$8.8 million and \$8.9 million at March 31, 2016 and December 31, 2015, respectively.

ITEM 4. Controls and Procedures

As of March 31, 2016, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934 (the "Exchange Act"). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective, in all material respects, with respect to the recording, processing, summarizing and reporting, within the time periods specified in the Commission's rules and forms, of information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

There were no changes in the Company's internal control over financial reporting that occurred during the first quarter of 2016 that have materially affected, or are reasonably likely to materially effect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

Legal Matters

The information set forth under the heading "Legal Matters" in Note 8 of the Notes to Condensed Consolidated Financial Statements included in Item 1 of Part I of this quarterly report is incorporated by reference in response to this item.

Environmental Matters

On November 12, 2015, we received a proposed Consent Order and Agreement from the Pennsylvania Department of Environmental Protection (PaDEP) relating to gas migration allegations in an area surrounding several wells owned and operated by us in Susquehanna County, Pennsylvania. The allegations relating to these wells were initially raised by residents in the area in August 2011. We received a Notice of Violation from the PaDEP in September 2011 for failure to prevent the migration of gas into fresh groundwater sources in the area surrounding these wells. Since then, we have been engaged with the PaDEP in investigating the incident and have performed appropriate remediation efforts, including the provision of alternative sources of drinking water to affected residents. We believe the source of methane has been remediated and are working with the PaDEP to reach agreement on the disposition of this matter. The proposed Consent Order and Agreement is the culmination of this effort and, if finalized, would result in

the payment of a civil monetary penalty in an amount likely to exceed \$100,000, up

24

Table of Contents

to approximately \$300,000. We will continue to work with the PaDEP to finalize the Consent Order and Agreement and bring this matter to a close.

From time to time we receive notices of violation from governmental and regulatory authorities in areas in which we operate relating to alleged violations of environmental statutes or the rules and regulations promulgated thereunder. While we cannot predict with certainty whether these notices of violation will result in fines and/or penalties, if fines and/or penalties are imposed, they may result in monetary sanctions individually or in the aggregate in excess of \$100,000.

ITEM 1A. Risk Factors

For additional information about the risk factors that affect us, see Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2015.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Our Board of Directors has authorized a share repurchase program under which we may purchase shares of common stock in the open market or in negotiated transactions. There is no expiration date associated with the authorization. The maximum number of remaining shares that may be purchased under the plan as of March 31, 2016 was 10.1 million shares.
