### Explanatory Note

This Amendment No. 1 to Form 10-KSB is being filed by the Registrant to correct certain disclosures included under Part I, Item 2, Description of Property, of the Registrant's Annual Report on Form 10-KSB for the period ended December 31, 2004, which was filed by the Registrant on March 31, 2005 (the "Form 10-KSB"). This Amendment No. 1 to Form 10-KSB amends and restates such Part I, Item 2 in its entirety. There are no other changes to the Form 10-KSB.

### PART I

#### ITEM 2. DESCRIPTION OF PROPERTY

##### Cheyenne River Prospect - Powder River Basin, Wyoming

As of December 31, 2004, the Cheyenne River Prospect consists of approximately 36,810 gross acres of federal, state and fee leases, all of which are located in Niobrara County, Wyoming. The land in the Cheyenne River Prospect consists of gently rolling ranch land with a substantial network of ranch roads, which permit easy access to most areas of the Prospect. The Prospect is located near a mature producing area with an established pipeline and service network.

Numerous wells were drilled within the Prospect area in the 1950's through the 1970's, with initial potential flowing rates in the range of 200 to 1,500 barrels of oil per day. Management believes that these wells may identify a fractured reservoir with the potential for significant oil and gas production, which would be most effectively exploited utilizing horizontal drilling technology.

Pursuant to the 2000 Farmout Agreement, the Timber Draw #1-AH well was drilled on the Prospect using horizontal drilling technology. The Company has retained a 33.33% interest in such well. For more information on the Timber Draw #1-AH well and the 2000 Farmout Agreement see "Oil and Gas Development Prospects" under Item 1, Description of Business.

The Company's leases in the Cheyenne River Prospect are predominately federal leases with 10 year terms, most of which have three years remaining. Since the Company did not commence drilling another well by August 12, 2002, the BLM informed the Company the Timber Draw Unit was terminated. Unless a new unit is formed, a well will need to be drilled on each federal, state or fee lease in order to extend such lease for the life of its producing capability. A new unit known as the Hooligan Draw Unit was formed in 2004 consisting of leases covering 2,560 acres. Pursuant to the 2004 Farmout Agreement, a third party carried out a seismic program in 2003 and, based on the results of such survey, the third party drilled a test well in 2004. For more information on this 2004 Farmout Agreement and the test well, see "Oil and Gas Development Prospects" under Item 1, Description of Business. The Company had approved a new federal
