ACME Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)
For the Nine months ended September 30, 2001 and September 30, 2002

(1) Formation and Description of the Business**Formation**

ACME Communications, Inc. (the Company) was formed on July 23, 1999, in preparation for and in conjunction with an initial public offering of its stock.

On September 27, 1999, the Board of Advisors of ACME Television Holdings, LLC and its members and the Board of Directors of the Company and its stockholder approved a merger and reorganization (the Reorganization), whereby the Company became the direct parent of ACME Television Holdings. As a result of the Reorganization, the Company is the ultimate parent of ACME Intermediate Holdings, LLC, (ACME Intermediate) and its wholly-owned subsidiary ACME Television, LLC. All transactions contemplated as part of The Reorganization closed on October 5, 1999.

Description of the Business

ACME Communications is a holding company with no independent operations other than through its wholly-owned subsidiary, ACME Television. ACME Television, through its wholly-owned subsidiaries, owns and operates a television production company and the following ten commercially licensed broadcast television stations located throughout the United States:

Station	Channel	Market	U.S. Market Rank*	Network Affiliation
KPLR	11	St. Louis, MO	22	WB
KWBP 32 Portland, OR 23 WBKUWB 30 Salt Lake City, UT 36 WBKWBQ				
19 Albuquerque-Santa Fe, NM 49 WBKASY				
50 Albuquerque-Santa Fe, NM 49 UPNWBDT				
26 Dayton, OH 58 WBWBXX				
20 Knoxville, TN 63 WBWIWB 14 Green Bay-Appleton, WI 69 WBWTVK 46 Ft. Myers-Naples, FL 70 WBWBUI				
23 Champaign-Springfield-Decatur, IL 82 WB				

* Based on Nielsen Media Research estimate of television households, September 2002.

In March 2002, we entered into a court-approved asset purchase agreement to buy substantially all of the broadcast assets of station WHPN, the UPN affiliate that served the Madison, Wisconsin marketplace, for a cash purchase price of \$5.6 million, \$200,000 of which we deposited into escrow earlier this year. We began operating the station under an interim local marketing agreement (LMA) on April 1, 2002. The affiliation was switched to The WB Television Network (The WB) at the end of August 2002 and the call letters changed to WBWU. We expect to close the transaction during the fourth quarter of 2002. Net costs associated with the LMA for the three and nine months ended September 30, 2002 were \$70,000 and \$74,000, respectively.

Edgar Filing: ACME COMMUNICATIONS INC - Form 10-Q

In August 2002, we founded ACME Television Productions, LLC, (ATP) a wholly owned subsidiary which produces our new daily morning news program, The Daily Buzz . All of our stations began broadcasting The Daily Buzz in September 2002. During the fourth quarter, we began to license the show to certain cable

Table of Contents

programmers in smaller markets. We expect to continue to market the program, subject to demand, to both other cable and broadcast stations as well as sell barter advertising time in the show to national advertisers.

We also own the rights to acquire construction permits to build four other stations three to be new WB Network affiliates in Lexington, KY, Richmond, VA and Flint-Saginaw-Bay Cities, MI and the fourth to be a second station, operated as an independent, in Portland, OR. The acquisition of these construction permits is dependent upon the Federal Communications Commission's approval, the timing of which is uncertain. The aggregate purchase price for these four construction permits is approximately \$18.4 million.

(2) Presentation of Interim Financial Statements

Unless the context requires otherwise, references to the Company refer to ACME Communications, Inc and its wholly-owned subsidiaries. Segment information is not presented because all of our revenues are attributed to a single reportable segment television broadcasting.

The accompanying consolidated financial statements for the three and nine-month periods ended September 30, 2001 and 2002 are unaudited and have been prepared in accordance with the accounting principles generally accepted in the United States of America, the instructions to this Form 10-Q and Article 10 of Regulation S-X. In our opinion, such financial statements include all adjustments (consisting of normal recurring accruals) considered necessary for the fair presentation of the financial position, results of operations, and cash flows for these periods. As permitted under the applicable rules and regulations of the Securities and Exchange Commission, these financial statements do not include all disclosures and footnotes normally included with annual consolidated financial statements, and accordingly, should be read in conjunction with the consolidated financial statements, and the notes thereto, included in our Annual Report on Form 10-K filed with the SEC on April 1, 2002. The results of operations presented in the accompanying financial statements are not necessarily indicative of the results that may be expected for the year ending December 31, 2002.

Certain amounts previously reported in 2001 have been reclassified to conform to the 2002 financial statement presentation.

(3) Long-Lived Assets, Goodwill and Intangible Assets Adoption of Statements 142 and 144

We adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets effective January 1, 2002. Under SFAS No. 142, we will no longer amortize goodwill or intangible assets. In connection with the transitional goodwill impairment evaluation, SFAS 142 required us to perform an assessment of whether there was any indication that goodwill was impaired at the date of adoption. We performed the assessment on a consolidated basis and determined that there was not an indication of impairment. In addition, we determined that our intangible assets, comprised of FCC licenses, represented intangible assets with an indefinite life. We evaluated each asset for impairment in accordance with SFAS No. 142, based on the fair value of the intangibles. Based on this evaluation, we did not record any impairment of FCC licenses. The evaluation of impairment of goodwill and FCC licenses must be done at least annually and more frequently if events or circumstances indicate that the assets may be impaired. As of December 31, 2001 and September 30, 2002, we had \$106.3 million in unamortized goodwill and \$165.0 million in unamortized broadcast licenses.

Following is a reconciliation of the September 30, 2001 reported net loss to the net loss as it would have been if SFAS No. 142 had been effective on January 1, 2001:

Adjusted net loss
 \$(0.32) \$(0.21) \$(2.91) \$(0.62)

Prior to January 1, 2002, we recorded deferred tax liabilities relating to the difference in the book basis and tax basis of goodwill and intangibles. The reversals of those deferred tax liabilities were utilized to support the realization of deferred tax assets (primarily consisting of net operating loss carryforwards) and the corresponding deferred tax benefits were recorded. As a result of the adoption of SFAS No. 142, those deferred tax liabilities will no longer reverse on a scheduled basis and can no longer be utilized to support the realization of deferred tax assets. Accordingly, we recorded a one-time, non-cash charge totaling \$28.4 million to deferred income tax expense in the first quarter of 2002 to establish a valuation allowance against its deferred tax assets.

We also adopted the provisions of SFAS No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets effective January 1, 2002. SFAS 144 requires us to evaluate long-lived assets for impairment when certain conditions exist, including a current period operating loss combined with a history of operating losses. In evaluating whether there is impairment, the carrying value of the assets is compared to the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the assets. We evaluate long-lived assets at the station level. As of September 30, 2002, we have not recorded any impairment related to long-lived assets. Future adverse changes in market conditions, changes in technology and other factors could reduce the expected future cash flows and result in an impairment charge.

(4) Revolving Credit Facility

In February 2002, we completed our new revolving credit facility with Foothill Capital Corporation, as both agent and lender. In June 2002, GE Capital became a co-lender under the agreement and maximum borrowings under the facility were increased to \$40 million. The new facility is secured by all of our television station assets and expires May 31, 2004. Under this agreement, we have the option to borrow at an interest rate determined by either a base rate (Wells Fargo Bank's prime rate) plus 3 percentage points, or at the LIBOR rate plus 4.25 percentage points. The financial covenants, which are quarterly tests, included in the new facility are (a) minimum EBITDA, (b) maximum total leverage, (c) minimum net tangible worth and (d) maximum capital expenditures (annual basis only). In addition to the financial covenants, the facility contains negative covenants, which, among other restrictions, require the lenders' approval for certain station acquisitions and dispositions. At September 30, 2002 we had borrowings under the facility totaling \$14.6 million, bearing an average interest rate of 6.1%, and had \$25.4 million available under the facility. We were in compliance with all covenants at September 30, 2002.

Costs associated with the procuring of bank credit facilities, including loan fees and related professional fees, are included in long-term other assets and are amortized over the term of the facilities. Approximately \$292,000 in capitalized costs that related to the prior facility were expensed in the first quarter of 2002.

Table of Contents

(5) Loss Per Common Share

We calculate loss per share in accordance with Statement of SFAS No. 128, Earnings Per Share. SFAS No. 128 requires a presentation of basic earnings per share (EPS) and diluted EPS. Basic EPS includes no dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution from securities that could share in our earnings, similar to fully diluted EPS under APB No. 15. In calculating diluted EPS, no potential shares of common stock are to be included in the computation when a loss from continuing operations available to common stockholders exists as this would be antidilutive. The statement requires dual presentation of basic and diluted EPS by entities with complex capital structures.

Stock options outstanding amounting to 2,514,673 shares at September 30, 2002 and 3,181,016 shares at September 30, 2001 were not included in the computation of diluted EPS because to do so would have been antidilutive.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-looking Statements

This Quarterly Report on Form 10-Q includes forward-looking statements. In addition, when used in this Quarterly Report on Form 10-Q, the words anticipate, may, could, should, believe, expect, or might and similar expressions are intended to identify forward-looking statements. Such statements are subject to a number of risks and uncertainties. Actual results in the future could differ materially and adversely from those described in the forward-looking statements as a result of various important factors, including (but not limited to) the impact of changes in national and regional economies, including advertising demand, pricing fluctuations in local and national advertising, volatility in programming costs, the inability to close the Madison acquisition, the inability to secure Federal Communications Commission approval for construction permits, the possibility of borrowing limitations under our credit facilities, the inability to make interest payments on the Company's long-term debt, potential preemptions of regular programming for national news events and the other risk factors set forth in the Company's 2002 Form 10-K filed with the SEC on April 1, 2002. The Company undertakes no obligation to publicly update or release any revisions to these forward-looking statements that may be made to reflect any future events or circumstances after the date of this Quarterly Report on Form 10-Q.

The following discussion should be read in conjunction with our consolidated financial statements and related notes included elsewhere in this report on Form 10-Q.

Overview

Our ten owned and operated television stations are regionally diverse and range in size (based on television households) from the 22nd through the 82nd largest markets in the nation. All but one of our stations are affiliates of The WB. Our second station in the Albuquerque-Santa Fe marketplace is a UPN affiliate. KPLR-St. Louis, our only VHF station, has been broadcasting in that market for over 40 years and is considered a mature television station. Our other nine stations (our Developing Stations) have only been on the air, or achieving measurable ratings, for 2-5 years. In addition we currently operate, under an LMA, the WB affiliate in Madison, WI. We expect to complete our acquisition of this station in the fourth quarter of 2002.

We derive revenues primarily from the sale of advertising time to local, regional and national advertisers. Our revenues depend on popular programming that attracts audiences in the demographic groups targeted by advertisers, allowing us to sell advertising time at satisfactory rates. Our revenues also depend significantly on factors such as the national and local economy and the level of local competition.

Our revenues are generally highest during the fourth quarter of each year, primarily due to increased expenditures by advertisers in anticipation of holiday season consumer spending and an increase in viewership during this period. We generally pay commissions to advertising agencies on local, regional and national advertising and to national sales representatives on national advertising. Our revenues reflect deductions from gross revenues for commissions payable to advertising agencies and national sales representatives.

Table of Contents

Our primary ongoing operating expenses are programming costs, employee compensation, sales related costs, advertising and promotion expenditures and depreciation. Programming expense consists primarily of amortization of broadcast rights relating to syndicated programs as well as news production costs and music licensing fees. Changes in employee compensation expense result primarily from increases in total staffing levels, from adjustments to fixed salaries based on individual performance and inflation and from changes in sales commissions paid to our sales staff based on levels of advertising revenues. Apart from salaries and commissions, most of our sales related expenses consist of rating and other subscription services. Advertising and promotion expenses consist primarily of media and related production costs resulting from the promotion of our stations and programs. This amount is net of any reimbursement received or due to us for such advertisement and promotion from The WB, UPN or from other program suppliers.

Results of Operations

The following table sets forth our calculation of broadcast cash flow and EBITDA along with a summary of our statement of cash flow data for the periods indicated:

	Three Months ended September 30,		Nine Months ended September 30,	
	2002	2001	2002	2001
Broadcast cash flow and adjusted EBITDA(1):	(Unaudited)		(Unaudited)	
Operating income (loss)	\$ 1,662	\$ (2,729)	\$ 3,895	\$ (8,042)

Add back:

Equity-based compensation	115	132	346	397
Depreciation and amortization	1,325	5,217	3,777	15,614
LMA fees	70	74		
Amortization of program rights	4,123	3,411	12,140	10,487
Corporate expenses	884	836	2,810	2,847
Adjusted program payments (1)	(4,171)	(3,426)	(12,255)	(10,486)

Broadcast cash flow	4,008	3,441	10,787	10,817
---------------------	-------	-------	--------	--------

Less:

Corporate expenses	884	836	2,810	2,847
--------------------	-----	-----	-------	-------

EBITDA	\$3,124	\$2,605	\$7,977	\$7,970
Broadcast cash flow margin (1)	20.0%	20.6%	18.7%	20.8%
EBITDA margin (1)	15.6%	15.6%	13.8%	15.3%
Cash flows provided by (used in):				

Operating activities				
	\$(15,144)			\$(1,097)
Investing activities				
	\$(12,213)			\$(4,512)
Financing activities				
	\$12,652			\$1,223

(1) We define:

broadcast cash flow as operating income, plus equity-based compensation, depreciation and amortization, LMA fees, amortization of program rights, and corporate expenses, less program payments the latter as adjusted to reflect reductions for liabilities relating to expired rights or rights that have been written-off in connection with acquisitions;

EBITDA as broadcast cash flow less corporate expenses;

Broadcast cash flow margin as broadcast cash flow as a percentage of net revenues; and

EBITDA margin as EBITDA as a percentage of net revenues.

We have included broadcast cash flow, broadcast cash flow margin, EBITDA and EBITDA margin data because management believes that these measures are useful to an investor to evaluate our ability to service debt and to assess the earning ability of our stations operations. However, you should not consider these items in isolation or as substitutes for net income, cash flows from operating activities and other statement of operations or cash flows data prepared in accordance with accounting principles generally accepted in the United States of America. These measures are not necessarily comparable to similarly titled measures employed by other companies.

Table of Contents

Quarter and Nine Months ended September 30, 2002 vs. September 30, 2001

Net revenues increased 20% to \$20.0 million for the third quarter of 2002 compared to \$16.7 million for the same period a year ago while year-to-date net revenues were up 11% to \$57.8 million for 2002 compared to \$52.1 million for the first nine months of 2001. This double-digit revenue growth was driven by a combination of strengthening advertiser demand in our markets and ratings-driven increased market share performance at our Developing Stations. We accomplished this growth without any significant benefit of the political advertising in our markets as politicians continue to pass up the opportunity to campaign for our typically younger aged viewers.

Station operating expenses increased 21% to \$16.0 million for the third quarter of 2002 compared to \$13.2 million for the same period a year ago and increased 14% to \$46.9 million for the nine-month period ended September 30, 2002 compared with \$41.3 million for the corresponding period in 2001. These increases are primarily due to increased programming expense which was up 30% for the quarter and 19% for the nine-month period compared to 2001 due to our continued investment in, and upgrade to, our program schedule, which also included the addition of our new morning news show *The Daily Buzz* launched in September 2002. Sales and related expenses were up 5% for the quarter and 16% for the nine-month period as compared to the same periods in 2001, principally due to increased Nielsen rating service charges and sales incentive programs. Engineering expenses increased 12% for the quarter and 11% for the nine-month period due to costs associated with our new digital facilities. Also, last year's third quarter expenses benefited from the reversal (due to the combined adverse effects of a major advertising recession and 9/11) of the first two quarters' incentive compensation accruals.

Depreciation and amortization decreased 75% to \$1.3 million in the third quarter of 2002 compared to \$5.2 million in the same period a year ago and for the nine-month period depreciation and amortization decreased 76% to \$3.8 million, compared to \$15.6 million for the same period in 2001, primarily due to our adoption of SFAS No. 142. Under SFAS No. 142, our goodwill and other intangible assets are no longer amortized. This reduced our depreciation and amortization expense by \$4.1 million and \$12.3 million for the three and nine-month periods ended September 30, 2002, respectively. Depreciation expense relating to fixed assets increased \$214,000 (19%) for the three months and \$477,000 (14%) for the nine months ended September 30, 2002 compared to the same periods in 2001 because of our capital expenditures to convert to digital broadcasting, upgrade existing equipment and launch *The Daily Buzz*.

Corporate expenses increased 6% to \$884,000 for the third quarter of 2002 as compared to \$836,000 for the same period a year ago. The increase in the quarter is primarily related to insurance costs. For the nine-month period, corporate expenses were basically unchanged from the nine-months ended September 30, 2001 at \$2.8 million with decreases in professional fees and incentive compensation provisions offset by increased insurance costs.

Equity-based compensation of \$115,000 in the third quarter of 2002 and \$132,000 in the third quarter of 2001 and \$346,000 and \$397,000 for the nine-months ended September 30, 2002 and 2001, respectively, relates to stock options issued upon the conversion of our long-term incentive plan awards during our IPO in September of 1999. These options were issued at a price below market value at the date of grant and therefore generate compensation expense over the life of the option. The decrease of \$17,000 for the quarter and \$51,000 year-to-date in 2002 is due to stock options that were forfeited by former employees.

Interest expense increased to \$7.9 million in the third quarter of 2002 compared to \$7.3 million in the same period a year ago. For the nine months ended September 30, 2002 interest expense increased to \$23.4 million compared to \$21.8 million for the same period in 2001. This third quarter 2002 increase was primarily due to increased interest expense on the higher accreted principal balance for our 12% senior secured notes, increased interest expense on our capital lease facilities and to interest expense on our borrowings under our revolving credit facility. Interest expense for the nine-month period also includes the accelerated amortization of prepaid financing costs associated with our former credit facility that was terminated in February 2002 (see *Liquidity and Capital Resources* below).

Table of Contents

We recorded a net income tax benefit of \$848,000 during the third quarter of 2002 compared to a benefit of \$3.1 million in the corresponding quarter of 2001. We have recorded an income tax expense of \$29.1 million compared to a benefit of \$9.2 million for the nine month periods ended September 30, 2002 and 2001, respectively. The tax benefit in the three months ended September 30, 2002 reflects an adjustment to the Company's effective tax rate for 2002. The tax expense for the nine months ended September 30, 2002 relates primarily to the implementation of SFAS No. 142 on January 1, 2002. Prior to January 1, 2002, we recorded deferred tax liabilities relating to the difference in the book basis and tax basis of goodwill and intangibles. The reversals of those deferred tax liabilities were utilized to support the realization of deferred tax assets (primarily consisting of net operating loss carryforwards) and the corresponding deferred tax benefits were recorded. As a result of the adoption of SFAS 142, those deferred tax liabilities will no longer reverse on a scheduled basis and can no longer be utilized to support the realization of deferred tax assets. Accordingly, in the first quarter of 2002 we recorded a one-time, non-cash charge totaling \$28.4 million to deferred income tax expense to establish a valuation allowance against our deferred tax assets.

Broadcast cash flow (as defined) for the third quarter increased 16% to \$4.0 million compared to \$3.4 million in the same period a year ago due to our revenue growth. On a year-to-date basis, broadcast cash flow remained flat at \$10.8 million as the growth in our revenues equaled the growth in our expenditures.

EBITDA (as defined) increased 20% to \$3.1 million for the third quarter of 2002 compared to \$2.6 million EBITDA for the third quarter of 2001 based upon increased broadcast cash flow. On a year-to-date basis, EBITDA remained flat at \$8.0 million.

Our net loss for the third quarter was \$5.4 million compared to a net loss for the third quarter of 2001 of \$6.7 million. For the nine months ended September 30, 2002 our net loss was \$48.7 million compared to \$19.9 million for the same period in 2001. The \$1.3 million decreased net loss for the third quarter is primarily the result of increased operating income (which includes the \$4.1 million decrease in amortization expense resulting from the adoption of SFAS No. 142) partially offset by increased depreciation expense, increased interest expense and a reduction in our income tax benefit. The \$28.8 million increase in net loss for the nine-month period is primarily attributable to the deferred tax expense (compared to the deferred tax benefits in the prior year period) which included the one-time tax charge of \$28.4 million we recognized in January 2002 upon our adoption of SFAS No. 142, offset by reduced amortization of intangibles (\$12.3 million reduction), which also resulted from the adoption of SFAS No. 142, and increased interest and depreciation expense.

Liquidity and Capital Resources

Cash flow used in operating activities was \$15.1 million for the nine months ended September 30, 2002 compared to cash flow used in operating activities of \$1.1 million for the first nine months of 2001. This increase in the use of cash relates primarily to the timing of the cash interest payment on our 10 7/8% Senior Discount Notes. The payment, which is due on September 30th, was paid on October 1st in 2001 due to September 30th falling on a Sunday. Interest expense was also higher for the nine months ended September 30, 2002 compared to the prior year due to higher revolver and capital lease debt during 2002.

Cash flow used in investing activities during the first nine months of 2002 was \$12.2 million compared to \$4.5 million used during the first nine months of 2001. The \$7.7 million increase is attributable to the purchases of broadcast and other equipment while we continue to improve technical facilities at our stations, a minority investment in an automobile-related website and the deposit made in connection with our pending purchase of WBUW, Madison, Wisconsin.

Cash flow provided by financing activities of \$12.7 million for the first nine months of 2002 constitutes an increase of \$11.4 million over 2001, which relates to borrowings on our credit facility offset by the payment of financing costs and decreased net borrowings on our capital lease facilities (net of repayments and cash placed on deposit to secure such borrowings).

In February 2002, we entered into a credit agreement for a revolving credit facility with Foothill Capital Corporation, as both agent and lender. In June 2002, GE Capital became a co-lender under the agreement and

Table of Contents

maximum borrowings under the facility were increased to \$40 million. The facility is secured by all of our television station assets and expires May 31, 2004. Under this agreement, we have the option to borrow at an interest rate determined by either a base rate (Wells Fargo Bank's prime rate) plus 3 percentage points, or at the LIBOR rate plus 4.25 percentage points. The financial covenants, which are quarterly tests, included in the new facility are (a) minimum EBITDA, (b) maximum total leverage, (c) minimum net tangible worth and (d) maximum capital expenditures (annual basis only). In addition to the financial covenants, the facility contains negative covenants, which, among other restrictions, require the lenders' approval for certain station acquisitions and dispositions. At September 30, 2002 we had borrowings under the facility totaling \$14.6 million, bearing an average interest rate of 6.1%, and had \$25.4 million available under the facility. We were in compliance with all covenants at September 30, 2002.

In March 2002, upon posting an additional \$1.1 million of restricted cash as collateral, we borrowed the final \$3.3 million of our most recent capital lease facility. Borrowings under our various capital lease facilities are generally paid over four to five years. At September 30, 2002, amounts due under all capital lease facilities totaled \$13.2 million bearing an implicit average interest rate of 8.4% per annum.

We expect to incur approximately \$1.0 million in additional capital expenditures in 2002 as we conclude our transition to digital broadcasting and defer the expected upgrade of the Madison, WI station we anticipate purchasing, until 2003. We expect that our capital expenditures after 2002, apart from those related to any pending and future acquisitions, will approximate \$3.5 million per year.

Effective October 1, 2000, our \$175 million 10 7/8% Senior Discount Notes due September 30, 2004 began accruing cash interest. The interest payment on these notes amounts to approximately \$9.5 million every six months and the payments are due on March 31st and September 30th. Our \$71.6 million 12% Senior Secured Notes began accruing cash interest on October 1, 2002, with the first semi-annual payment of \$4.3 million due on March 31, 2003.

At September 30, 2002, we had \$5.5 million of cash, \$2.9 million of which is restricted to collateralize capital lease obligations, and working capital of \$4.6 million.

We believe that existing unrestricted cash balances, funds generated from operations and borrowings under our credit facility will be sufficient to satisfy our cash requirements for existing operations until September 30, 2003. However, these sources of funds may not be adequate to make the entire interest payment of approximately \$13.8 million on our Senior Discount and Senior Secured Notes on September 30, 2003. The Company believes it should be able to find alternative sources of debt or equity financing or liquidity through the sale of selected assets. There is no guarantee that the Company will be able to complete the sale of selected assets or complete additional debt or equity transactions, if at all, on terms which are acceptable to the Company. The Company's next interest payment following September 30, 2003 of approximately \$13.8 million is due on March 31, 2004. Although the Company currently does not expect to generate adequate pre-interest operating cash flow to fund that interest payment, the Company expects that funds from any transaction described above that is successfully completed would satisfy that payment.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to broadcast rights, bad debts, intangible assets, income taxes, and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Table of Contents

Revenue Recognition

We record revenue from the sale of airtime related to advertising and contracted time at the time of broadcast and maintain an allowance for doubtful accounts for the estimated losses that may result from the inability of our customers to make required payments. We utilize information available to us, including the timing of payments and the financial condition of our customers, to estimate the allowance for doubtful accounts. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. We do not have a significant concentration of accounts receivable from any single customer or industry segment.

Under many of our syndicated programming agreements, the Company provides advertising time to the supplier as full or partial consideration for the program rights. We record revenue and corresponding expenses associated with such barter agreements based on the estimated value of the advertising time exchanged. This barter revenue and expense was \$1.8 million and \$5.1 million for the three and nine-months ended September 30, 2002, respectively. The corresponding barter revenue and expense for the three and nine-months ended September 30, 2001 was \$1.4 million and \$4.4 million, respectively.

Programming Rights

Our programming rights are stated, on a gross basis, at the lower of amortized cost or estimated realizable value. We evaluate estimated realizable value of programming rights based on current usage and revenue performance and projected future revenue and usage of such programs. Changes in our programming schedule could impact the estimated realizable value of programming. For the quarter and nine-month periods ended September 30, 2001 programming rights impairment charges totaled \$150,000 and \$196,000, respectively. For both the quarter and nine-month periods ended September 30, 2002 programming rights impairment charges totaled \$100,000.

Long-Lived Assets, Goodwill and Intangible Assets

We evaluate long-lived assets in accordance with SFAS No. 144. SFAS 144 requires us to evaluate long-lived assets for impairment when certain conditions exist, including a current period operating loss combined with a history of operating losses. In evaluating whether there is impairment, the carrying value of the assets is compared to the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the assets. We evaluate long-lived assets at the station level. As of September 30, 2002, we have not recorded any impairment related to long-lived assets. Future adverse changes in market conditions, changes in technology and other factors could reduce the expected future cash flows and result in an impairment charge.

We evaluate goodwill and intangibles in accordance with SFAS No. 142. In connection with the transitional goodwill impairment evaluation, SFAS 142 required us to perform an assessment of whether there was any indication that goodwill was impaired at the date of adoption. We performed the assessment on a consolidated basis and determined that there was not an indication of impairment. In addition, we determined that our intangible assets, comprised of FCC licenses, represented intangible assets with an indefinite life. We evaluated each asset for impairment in accordance with SFAS No. 142, based on the fair value of the intangibles. Based on this evaluation, we did not record any impairment of FCC licenses. The evaluation of impairment of goodwill and FCC licenses must be done at least annually and more frequently if events or circumstances indicate that the assets may be impaired.

Accounting for Income Taxes

Prior to January 1, 2002, we recorded deferred tax liabilities relating to the difference in the book basis and tax basis of goodwill and intangibles. The reversals of those deferred tax liabilities were utilized to support the realization of deferred tax assets (primarily consisting of net operating loss carryforwards) and the corresponding deferred tax benefits recorded. As a result of the adoption of SFAS No. 142, those deferred tax liabilities will no longer reverse on a scheduled basis and can no longer be utilized to support the realization of deferred tax assets. Accordingly, we recorded a one-time, non-cash charge totaling \$28.4 million to deferred income tax expense in the first quarter of 2002 to establish a valuation allowance against our deferred tax assets. If we were to determine that we would be able to realize a deferred tax asset in the future that is in excess of the net recorded amount, we would record an adjustment to the valuation allowance and a tax benefit.

Table of Contents

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Our credit facility has a variable interest rate. Accordingly, our interest expense could be materially affected by future fluctuations in the applicable interest rate. At September 30, 2002, we had borrowings of \$14.6 million, bearing an average interest rate of 6.1%, and \$25.4 million available under our credit facility.

We are also exposed to risk from a change in interest rates to the extent we are required to refinance existing fixed rate indebtedness at rates higher than those prevailing at the time the existing indebtedness was incurred. We have senior discount notes totaling \$175 million and senior secured discount notes totaling \$71.6 million due in the years 2004 and 2005, respectively. Effective October 1, 2000, the senior discount notes began accruing cash interest. The interest payment on these notes amounts to approximately \$9.5 million every six months. Effective October 1, 2002, the senior secured notes began accruing cash interest and the first semi-annual interest payment of approximately \$4.3 million will be due on March 31, 2003. Based upon the quoted market price, the fair value of the senior discount notes and senior secured discount notes was \$171.5 and \$63.0 million, respectively, as of September 30, 2002.

Item 4. *Controls and Procedures*

Our management, including our Chief Executive Officer and our Chief Financial Officer, have evaluated our disclosure controls and procedures within the 90 days proceeding the date of this filing. Under the Securities and Exchange Commission (SEC) rules, disclosure controls and procedures are defined as those controls or other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports filed or submitted by it under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and form . Based on the evaluation of our disclosure controls and procedures, our CEO and CFO concluded that such controls and procedures were effective as of November 11, 2002, the date of the conclusion of the evaluation.

Further, there were no significant changes in the internal controls or in other factors that could significantly affect these controls after November 11, 2002, the date of the conclusion of the evaluation of disclosure controls and procedures.

PART II OTHER INFORMATION

Item 1. *Legal Proceedings*

We currently and from time to time are involved in litigation incidental to the conduct of our business. We maintain comprehensive general liability and other insurance, which we believe to be adequate for the purpose. We are not currently a party to any lawsuit or proceeding that we believe would have a material adverse affect on our financial condition or results of operations.

Item 6. *Exhibits and Reports on Form 8-K.*

(a) **Exhibits.**

None

(b) **Reports on Form 8-K**

None.

I, Jamie Kellner, certify that:

1. I have reviewed this quarterly report on Form 10-Q of ACME Communications, Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors:
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officer and I have indicated in this quarterly report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
