Deutsche Telekom

Outlook and Guidance -- 2002

- o First and second quarter revenue comparisons remain difficult
- o In a flat full-year revenue scenario, EPS grows 15%
 - If full year revenue increases, each 1% of revenue growth generates an incremental 2% EPS growth
 - If full year revenue declines, margins will equal or exceed 2000 level

----- Cautionary Statement

This document contains forward-looking statements. Statements that are not historical fact, including statements about Interpublic's beliefs and expectations constitute forward-looking statements. These statements are based on current plans, estimates and projections, and therefore undue reliance should not be placed on them. Forward-looking statements speak only as of the date they are made, and Interpublic undertakes no obligation to update publicly any of them in light of new information or future events.

Forward-looking statements involve inherent risks and uncertainties. Interpublic cautions that a number of important factors could cause actual results to differ materially from those contained in any forward-looking statement. Such factors include, but are not limited to, those associated with the effect of national and regional economic conditions, the ability of Interpublic to attract new clients and retain existing clients, the financial success of the clients of Interpublic, and developments from changes in the regulatory and legal environment for advertising companies around the world, and the successful completion and integration of acquisitions which complement and expand Interpublic's business capabilities.

Another important factor is Interpublic's acquisition strategy. One of Interpublic's business strategies is to acquire businesses that complement and expand its current business capabilities. Accordingly, Interpublic is usually

Edgar Filing: INTERPUBLIC GROUP OF COMPANIES INC - Form 8-K

engaged in evaluating potential acquisition candidates. Interpublic is currently engaged in a number of preliminary discussions that may result in one or more substantial acquisitions. These acquisition opportunities require confidentiality and from time to time give rise to bidding scenarios that require quick responses by Interpublic. Although there is uncertainty that any of these discussions will result in definitive agreements or the completion of any transactions, the announcement of any such transaction may lead to increased volatility in the trading price of the shares of Interpublic.

Moreover, the success of recent or contemplated future acquisitions will depend on the effective integration of newly-acquired businesses into Interpublic's current activities. Important factors for integration include realization of anticipated synergies and the ability to retain new personnel and clients.

This document includes financial information calculated on a "pro forma" basis. This "pro forma" financial information, by its very nature, departs from traditional accounting conventions. Accordingly, "pro forma" financial information should be read in conjunction with, and should not be viewed as a substitute for, the information prepared in accordance with Generally Accepted Accounting Principles (GAAP) contained in this document, including the GAAP numbers under the "actual reported" columns in the unaudited "consolidated summaries of earnings" contained in this document.

Investors should evaluate any statements in light of these important factors.
