Notes to Condensed Consolidated Financial Statements (Unaudited)

1. **Basis of Presentation.** In the opinion of the management of FFLC Bancorp, Inc. (the "Holding Company"), the accompanying condensed consolidated financial statements contain all adjustments (consisting of normal recurring accruals) necessary to present fairly the financial position at March 31, 2003 and the results of operations and cash flows for the three-month periods ended March 31, 2003 and 2002. The results of operations for the three-month period ended March 31, 2003, are not necessarily indicative of results that may be expected for the year ending December 31, 2003.

The condensed consolidated financial statements include the accounts of the Holding Company and its three subsidiaries, First Federal Savings Bank of Lake County (the "Bank"), First Alliance Title, LLC and FFLC Statutory Trust I and the Bank's wholly-owned subsidiary, Lake County Service Corporation (together, the "Company"). All significant intercompany accounts and transactions have been eliminated in consolidation.

2. **Loans.** The following table sets forth the composition of the Bank's loan portfolio in dollar amounts and percentages at the dates indicated (in thousands):

has been computed by dividing the net income for the period by the weighted-average number of shares outstanding. Shares of common stock purchased by the RRP incentive plans are only considered outstanding when the shares are released or committed to be released for allocation to participants. Diluted income per share is computed by dividing net income by the weighted-average number of shares outstanding including the dilutive effect of stock options computed using the treasury stock method. All per share amounts reflect the three-for-two stock split declared on February 14, 2003. The following table presents the calculation of basic and diluted income per share of common stock:

5. Stock Split. On February 14, 2003, the Board of Directors declared a three-for-two stock split on all outstanding common shares for shareholders of record on February 28, 2003, which were distributed on March 14, 2003. Any fractional shares resulting from the split were paid in cash based on the closing price on the record date.

(continued)

Edgar Filing: FFLC BANCORP INC - Form 10-Q

6. Stock Option Plans. During 2002, the Company adopted a new stock option plan (the "2002 Plan") which authorizes the Company to issue up to 375,000 shares (adjusted) in connection with options granted to directors, officers or employees of the Company. The terms and vesting periods will be determined as each option is granted, but the option price cannot be less than the then current market value of the common stock at the grant date. No options have been granted under the 2002 Plan through March 31, 2003.

The Company also has a 1993 stock option plan (the "Plan") under which common shares are authorized to be issued in connection with options granted to directors, officers and employees of the Company. Options granted under the Plan are exercisable at the market price of the common stock at the date of grant. Such incentive stock options granted to officers and employees are exercisable in three equal annual installments, with the first installment becoming exercisable one year from the date of grant. Options granted to outside directors are exercisable immediately, but any common shares obtained from exercise of the options may not be sold prior to one year from the date of grant. All options expire at the earlier of ten years for officers and employees or twenty years for directors from the date of grant or one year following the date which the outside director, officer or employee ceases to serve in such capacity. At March 31, 2003, 50,570 options (adjusted) remain available under the Plan for grant to future directors, officers and employees.

The following is a summary of stock option transactions during the three-month periods ended March 31, 2003 and 2002 (All options and option price per share information has been adjusted to reflect the three-for-two stock split in 2003):

	Number of Options	Range of Per Share Option Price	Weighted- Average Per Share Price

6. Stock Option Plans, Continued

No stock options were granted under the Plans during the three-month periods ended March 31, 2003 or 2002. SFAS No. 123 requires pro forma fair value disclosures if the intrinsic value method is being utilized to value stock-based compensation awards. For purposes of pro forma disclosures, the estimated fair value of stock options granted is included in expense in the period vesting occurs. The proforma information has been determined as if the Company had accounted for its stock options under the fair value method of SFAS No. 123. The Company accounts for their stock option plans under the recognition and measurement principles of APB No. 25. No stock-based employee compensation cost is reflected in net income during the periods presented, as all stock options granted under the plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and basic and diluted income per share as if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation (in thousands, except per share amounts):

Review by Independent Certified Public Accountants

Hacker, Johnson & Smith PA, the Company's independent certified public accountants, have made a limited review of the financial data as of March 31, 2003, and for the three-month periods ended March 31, 2003 and 2002 presented in this document, in accordance with standards established by the American Institute of Certified Public Accountants.

Their report furnished pursuant to Article 10 of Regulation S-X is included herein.

Report on Review by Independent Certified Public Accountants

The Board of Directors
FFLC Bancorp, Inc.
Leesburg, Florida:

We have reviewed the accompanying condensed consolidated balance sheet of FFLC Bancorp, Inc. and Subsidiaries (the "Company") as of March 31, 2003, and the related condensed consolidated statements of income, changes in stockholders' equity and cash flows for the three-month periods ended March 31, 2003 and 2002. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated interim financial statements referred to above for them to be in conformity with accounting principles

generally accepted in the United States of America.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet as of December 31, 2002, and the related consolidated statements of income, changes in stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated January 15, 2003 we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2002, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Management's Discussion and Analysis of Financial Condition and Results of Operations

General

FFLC Bancorp, Inc., (the "Holding Company") is the holding company for its three subsidiaries, First Federal Savings Bank of Lake County (the "Bank"), First Alliance Title, LLC and FFLC Statutory Trust I and the Bank's wholly-owned subsidiary, Lake County Service Corporation (together, the "Company"). The Company's consolidated results of operations are primarily those of the Bank.

The Bank's principal business continues to be attracting retail deposits from the general public and investing those deposits, together with principal repayments on loans and investments and funds generated from operations, primarily in mortgage loans secured by one-to-four-family, owner-occupied homes, commercial loans, consumer loans and, to a lesser extent, construction loans, other loans, and multi-family residential mortgage loans. In addition, the Bank holds investments permitted by federal laws and regulations including securities issued by the U.S. Government and agencies thereof. The Bank's revenues are derived principally from interest on its loan and mortgage-backed securities portfolios and interest and dividends on its investment securities. The Bank is a member of the Federal Home Loan Bank ("FHLB") system and its deposits are insured up to the applicable limits by the Savings Association Insurance Fund ("SAIF") of the Federal Deposit Insurance Corporation (the "FDIC"). The Bank is subject to regulation by the Office of Thrift Supervision (the "OTS") as its chartering agency, and the FDIC as its deposit insurer.

The Bank has 14 full-service banking facilities in Lake, Sumter, Citrus and Marion Counties, Florida. The Bank has plans to begin construction on two new branches during 2003, one in Citrus County and the other in Sumter County.

Edgar Filing: FFLC BANCORP INC - Form 10-Q

The Company's results of operations depend primarily on net interest income, which is the difference between the interest income earned primarily on its loan and securities portfolios, and its cost of funds, consisting of the interest paid on its deposits and borrowings. The Company's operating results are also affected, to a lesser extent, by fee income. The Company's operating expenses consist primarily of salaries and employee benefits, occupancy expenses, and other general and administrative expenses. The Company's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government policies, and actions of regulatory authorities.

FFLC BANCORP, INC.

Capital Resources

The Bank's primary sources of funds include proceeds from payments and prepayments on mortgage loans and mortgage-backed securities, proceeds from maturities of investment securities, increases in deposits and advances from the Federal Home Loan Bank. While maturities and scheduled amortization of loans and investment securities are predictable sources of funds, deposit inflows and mortgage prepayments are greatly influenced by local conditions, general interest rates, and regulatory changes.

The Bank is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. The Bank's exposure to credit loss in the event of nonperformance by the other party to the off-balance-sheet financial instrument is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments as it does for on-balance-sheet instruments. A summary of the contractual amounts of the Bank's financial instruments with off-balance-sheet risk at March 31, 2003 follows (in thousands):

Commitments to extend credit	\$ 32,582
	=====
Unused lines of credit	\$ 54,432
	=====
Undisbursed portion of loans in process	\$ 17,123
	=====
Standby letters of credit	\$ 2,499
	=====

The Bank believes that it will have sufficient funds available to meet its commitments. At March 31, 2003, certificates of deposit which were scheduled to mature in one year or less totaled \$253.5 million. Based on past experience, management believes, that a significant portion of those funds will remain with the Bank.

The Bank is subject to various regulatory capital requirements administered

Edgar Filing: FFLC BANCORP INC - Form 10-Q

by the Federal banking agencies. Failure to meet minimum capital requirements can require regulators to initiate certain mandatory- and possibly additional discretionary-actions that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgements by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts (set forth in the table) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined). Management believes that, as of March 31, 2003, the Bank meets all capital adequacy requirements to which it is subject.

17

FFLC BANCORP, INC.

As of March 31, 2003, the most recent notification from the OTS categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum tangible, Tier I (core), Tier I (risk-based) and total risk-based capital percentages as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category.

The Bank's actual capital amounts and percentages at March 31, 2003 are also presented in the table.

Changes in Financial Condition

Total assets increased \$34.9 million or 3.8%, from \$915.8 million at December 31, 2002 to \$950.7 million at March 31, 2003 primarily as a result of a \$24.9 million increase in cash and cash equivalents and an increase in securities available for sale of \$11.4 million. Deposits increased \$26.2 million from \$668.0 million at December 31, 2002 to \$694.2 million at March 31, 2003. The \$1.7 million net increase in stockholders' equity during the three months ended March 31, 2003 resulted from net income of \$2.4 million and proceeds of \$40,000 from stock options exercised, partially offset by repurchases of the Company's stock of \$89,000, dividends paid of \$544,000 and a \$96,000, net of tax benefit decrease in accumulated other comprehensive income.

Results of Operations

The following table sets forth, for the periods indicated, information regarding (i) the total dollar amount of interest and dividend income of the Company from interest-earning assets and the resultant average yields; (ii) the total dollar amount of interest expense on interest-bearing liabilities and the resultant

average costs; (iii) net interest/dividend income; (iv) interest-rate spread; and (v) net interest margin. Yields and costs were derived by dividing annualized income or expense by the average balance of assets or liabilities, respectively, for the periods shown. The average balance of loans includes loans on which the Company has discontinued accruing interest. The yields and costs include certain fees which are considered to constitute adjustments to yields.

FFLC BANCORP, INC.

Comparison of the Three-Month Periods Ended March 31, 2003 and 2002

General Operating Results. Net income for the three-month period ended March 31, 2003 was \$2.4 million, or \$.44 per basic share and \$.43 per diluted share, compared to \$2.2 million, or \$.41 per basic share and \$.41 per diluted share, for the comparable period in 2002. All per share information has been adjusted to reflect the three-for-two stock split in 2003. The increase in net income was primarily a result of an increase of \$683,000 in net interest income and an increase of \$390,000 in noninterest income, partially offset by an increase of \$678,000 in noninterest expense.

Interest Income. Interest income decreased \$266,000 to \$13.6 million for the three-month period ended March 31, 2003. The decrease was due to a decrease in the average yield earned on interest-earning assets from 6.96% for the three months ended March 31, 2002 to 6.17% for the three months ended March 31, 2003, partially offset by a \$85.2 million or 10.7% increase in average interest-earning assets outstanding for the three months ended March 31, 2003 compared to the 2002 period.

Interest Expense. Interest expense decreased \$949,000 or 12.7%, from \$7.5 million for the three-month period ended March 31, 2002 to \$6.5 million for the three-month period ended March 31, 2003. The decrease was primarily due to a decrease in the average cost of interest-bearing liabilities from 4.02% for the three months ended March 31, 2002 to 3.16% for the comparable 2003 period, partially offset by increases of \$79.9 million and \$1.2 million in average interest-bearing deposits and borrowings outstanding, respectively. Average interest-bearing deposits increased from \$577.8 million outstanding during the three months ended March 31, 2002 to \$657.7 million outstanding during the comparable period for 2003. Average borrowings increased from \$168.0 million during the three months ended March 31, 2002 to \$169.2 million for the comparable 2003 period.

Provision for Loan Losses. The provision for loan losses is charged to income to increase the total allowance to a level deemed appropriate by management. It is based upon the volume and type of lending conducted by the Company,

Edgar Filing: FFLC BANCORP INC - Form 10-Q

the Company's charge-off experience, industry standards, the amount of nonperforming loans, general economic conditions, particularly as they relate to the Company's market area, and other factors related to the collectibility of the Company's loan portfolio. The Company recorded provisions for loan losses for the three-month periods ended March 31, 2003 and 2002 of \$406,000 and \$258,000, respectively. Net loans charged off for the three-month periods ended March 31, 2003 and 2002 were \$276,000 and \$274,000, respectively. Management believes that the allowance for loan losses, which was \$5.3 million or .70% of gross loans at March 31, 2003 is adequate.

Noninterest Income. Noninterest income increased \$390,000 or 43.7% from \$893,000 during the 2002 period to \$1.3 million during the 2003 period. The increase was mainly due to a \$225,000 increase in gain on sales of loans held for sale. The Company has decided to sell an increased number of fixed-rate residential mortgage loans it originates in the secondary market due to the low interest-rate environment.

Noninterest Expense. Noninterest expense increased by \$678,000 or 19.7% from \$3.4 million for the three-month period ended March 31, 2002 to \$4.1 million for the three-month period ended March 31, 2003. The increase was primarily due to increases of \$430,000 in salaries and employee benefits and \$75,000 in occupancy expense related to the overall growth of the Company.

Income Taxes. The income tax provision increased from \$1.3 million for the three-month period ended March 31, 2002 (an effective tax rate of 37.7%) to \$1.4 million (an effective tax rate of 37.9%) for the corresponding period in 2003.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest-rate risk inherent in its lending and deposit taking activities. The Company has little or no risk related to trading accounts, commodities or foreign exchange.

Management actively monitors and manages its interest rate risk exposure. The primary objective in managing interest-rate risk is to limit, within established guidelines, the adverse impact of changes in interest rates on the Company's net interest income and capital, while adjusting the Company's asset-liability structure to obtain the maximum yield-cost spread on that structure. Management relies primarily on its asset-liability structure to control interest rate risk. However, a sudden and substantial increase in interest rates could adversely impact the Company's earnings, to the extent that the interest rates borne by assets and liabilities do not change at the same speed, to the same extent, or on the same basis. There have been no significant changes in the Company's market risk exposure since December 31, 2002. The Company does not believe that the interest rate swap entered into in September 2002 exposes the Company to significant interest rate risk.
