UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2019
Commission File Number 001-11302

Exact name of registrant as specified in its charter:

Ohio 34-6542451
State or other jurisdiction of incorporation or organization: I.R.S. Employer Identification Number:
127 Public Square, Cleveland, Ohio 44114-1306
Address of principal executive offices: Zip Code:
(216) 689-3000
Registrant's telephone number, including area code:

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer
Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

<u>Title of each class</u>	<u>Trading Symbol(s)</u>	<u>Name of each exchange on which registered</u>
Common Shares, \$1 par value	KEY	New York Stock Exchange
Depository Shares (each representing a 1/40 th interest in a share of Fixed-to-Floating Rate Perpetual Non-Cumulative Preferred Stock, Series E)	KEY PrI	New York Stock Exchange

PART I. FINANCIAL INFORMATION

Item 2. Management’s Discussion & Analysis of Financial Condition & Results of Operations

Introduction

This section reviews the financial condition and results of operations of KeyCorp and its subsidiaries for the quarterly periods ended March 31, 2019, and March 31, 2018. Some tables may include additional periods to comply with disclosure requirements or to illustrate trends in greater depth. When you read this discussion, you should also refer to the consolidated financial statements and related notes in this report. The page locations of specific sections and notes that we refer to are presented in the Table of Contents.

References to our “2018 Form 10-K” refer to our Form 10-K for the year ended December 31, 2018, which has been filed with the SEC and is available on its website (www.sec.gov) and on our website (www.key.com/ir).

Terminology

Throughout this discussion, references to “Key,” “we,” “our,” “us,” and similar terms refer to the consolidated entity consisting of KeyCorp and its subsidiaries. “KeyCorp” refers solely to the parent holding company, and “KeyBank” refers to KeyCorp’s subsidiary bank, KeyBank National Association.

We want to explain some industry-specific terms at the outset so you can better understand the discussion that follows.

We use the phrase **continuing operations** in this document to mean all of our businesses other than our government-guaranteed and private education lending businesses and Austin. The education lending business and Austin have been accounted for as **discontinued operations** since 2009.

We engage in **capital markets activities** primarily through business conducted by our Commercial Bank segment. These activities encompass a variety of products and services. Among other things, we trade securities as a dealer, enter into derivative contracts (both to accommodate clients’ financing needs and to mitigate certain risks), and conduct transactions in foreign currencies (both to accommodate clients’ needs and to benefit from fluctuations in exchange rates).

For regulatory purposes, capital is divided into two classes. Federal regulations currently prescribe that at least one-half of a bank or BHC’s **total risk-based capital** must qualify as **Tier 1 capital**. Both total and Tier 1 capital serve as bases for several measures of capital adequacy, which is an important indicator of financial stability and condition. Banking regulators evaluate a component of Tier 1 capital, known as **Common Equity Tier 1**, under the **Regulatory Capital Rules**. The “Capital” section of this report under the heading “Capital adequacy” provides more information on total capital, Tier 1 capital, and the Regulatory Capital Rules, including Common Equity Tier 1, and describes how these measures are calculated.

Table of contents

The acronyms and abbreviations identified below are used in the Management’s Discussion & Analysis of Financial Condition & Results of Operations as well as in the Notes to Consolidated Financial Statements (Unaudited). You may find it helpful to refer back to this page as you read this report.

ALCO: Asset/Liability Management Committee.	KBCM: KeyBanc Capital Markets, Inc.
ALLL: Allowance for loan and lease losses.	KCC: Key Capital Corporation.
A/LM: Asset/liability management.	KCDC: Key Community Development Corporation.
AOCI: Accumulated other comprehensive income (loss).	KEF: Key Equipment Finance.
APBO: Accumulated postretirement benefit obligation.	KEF: Key Equipment Finance.
ASC: Accounting Standards Codification.	KIBS: Key Insurance & Benefits Services, Inc.
Austin: Austin Capital Management, Ltd.	KMS: Key Merchant Services, LLC.
BHCs: Bank holding companies.	KPP: Key Principal Partners.
Board: KeyCorp Board of Directors.	KREEC: Key Real Estate Equity Capital, Inc.
Cain Brothers: Cain Brothers & Company, LLC.	LCR: Liquidity coverage ratio.
CCAR: Comprehensive Capital Analysis and Review.	LIBOR: London Interbank Offered Rate.
CMBS: Commercial mortgage-backed securities.	LIHTC: Low-income housing tax credit.
CME: Chicago Mercantile Exchange.	LTV: Loan-to-value.
CMO: Collateralized mortgage obligation.	Moody’s: Moody’s Investor Services, Inc.
Common Shares: KeyCorp common shares, \$1 par value.	MRC: Market Risk Committee.

HelloWallet: HelloWallet, LLC.	TDR: Troubled debt restructuring.
HTC: Historic tax credit.	TE: Taxable-equivalent.
	U.S. Treasury: United States Department of the Treasury.
	VaR: Value at risk.
	VEBA: Voluntary Employee Beneficiary Association.

ISDA: International Swaps and Derivatives Association. VIE: Variable interest entity.
KAHC: Key Affordable Housing Corporation.

Forward-looking statements

From time to time, we have made or will make forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements do not relate strictly to historical or current facts. Forward-looking statements usually can be identified by the use of words such as “goal,” “objective,” “plan,” “expect,” “assume,” “anticipate,” “intend,” “project,” “believe,” “estimate,” or other words of similar meaning. Forward-looking statements provide our current expectations or forecasts of future events, circumstances, results or aspirations. Our disclosures in this report contain forward-looking statements. We may also make forward-looking

Table of contents

statements in other documents filed with or furnished to the SEC. In addition, we may make forward-looking statements orally to analysts, investors, representatives of the media, and others.

Forward-looking statements, by their nature, are subject to assumptions, risks, and uncertainties, many of which are outside of our control. Our actual results may differ materially from those set forth in our forward-looking statements. There is no assurance that any list of risks and uncertainties or risk factors is complete. Factors that could cause our actual results to differ from those described in forward-looking statements include, but are not limited to:

- deterioration of commercial real estate market fundamentals;
- defaults by our loan counterparties or clients;
- adverse changes in credit quality trends;
- declining asset prices;
- our concentrated credit exposure in commercial and industrial loans;
- the extensive regulation of the U.S. financial services industry;
- changes in accounting policies, standards, and interpretations;
- operational or risk management failures by us or critical third parties;
- breaches of security or failures of our technology systems due to technological or other factors and cybersecurity threats;
- negative outcomes from claims or litigation;
- failure or circumvention of our controls and procedures;
- the occurrence of natural or man-made disasters, conflicts, or terrorist attacks, or other adverse external events;
- evolving capital and liquidity standards under applicable regulatory rules;
- disruption of the U.S. financial system;
- our ability to receive dividends from our subsidiaries, including KeyBank;
- unanticipated changes in our liquidity position, including but not limited to, changes in our access to or the cost of funding and our ability to secure alternative funding sources;
- downgrades in our credit ratings or those of KeyBank;
- a reversal of the U.S. economic recovery due to financial, political or other shocks;
- our ability to anticipate interest rate changes and manage interest rate risk;
- uncertainty regarding the future of LIBOR;
- deterioration of economic conditions in the geographic regions where we operate;
- the soundness of other financial institutions;
- tax reform and other changes in tax laws, including the impact of the TCJ Act;
- our ability to attract and retain talented executives and employees and to manage our reputational risks;
- our ability to timely and effectively implement our strategic initiatives;
- increased competitive pressure;
- our ability to adapt our products and services to industry standards and consumer preferences;
- unanticipated adverse effects of strategic partnerships or acquisitions and dispositions of assets or businesses;
- our ability to realize the anticipated benefits of the First Niagara merger; and
- our ability to develop and effectively use the quantitative models we rely upon in our business planning.

Any forward-looking statements made by us or on our behalf speak only as of the date they are made, and we do not undertake any obligation to update any forward-looking statement to reflect the impact of subsequent events or circumstances. Before making an investment decision, you should carefully consider all risks and uncertainties disclosed in our 2018 Form 10-K and any subsequent reports filed with the SEC

by Key as well as our registration statements under the Securities Act of 1933, as amended, all of which are or will upon filing be accessible on the SEC's website at www.sec.gov and on our website at www.key.com/ir.

Table of contents

Long-term financial targets

(a) See the section entitled "GAAP to Non-GAAP Reconciliations," which presents the computations of certain financial measures related to "cash efficiency." The section includes tables that reconcile the GAAP performance measures to the corresponding non-GAAP measures, which provides a basis for period-to-period comparisons.

(a) See the section entitled "GAAP to Non-GAAP Reconciliations," which presents the computations of certain financial measures related to "tangible common equity." The section includes tables that reconcile the GAAP performance measures to the corresponding non-GAAP measures, which provides a basis for period-to-period comparisons.

Positive Operating Leverage

Generate positive operating leverage and a cash efficiency ratio in the range of 54.0% to 56.0%.

During the first quarter of 2019, total revenue was down 2.1% while noninterest expense continued to be a positive story as it was down 4.3% from the year-ago quarter. Overall, our cash efficiency ratio was down 100 basis points from the year-ago quarter. We expect to reach our targeted cash efficiency ratio range of 54.0% to 56.0% in the second half of 2019.

Moderate Risk Profile

Maintain a moderate risk profile by targeting a net loan charge-offs to average loans ratio in the range of .40% to .60% through a credit cycle.

During the first quarter of 2019, our net loan charge-offs to average loans ratio remained below our targeted range. We continue to remain consistent and disciplined in our credit underwriting and portfolio management and are committed to maintaining our moderate risk profile in 2019.

Financial Return

A return on average tangible common equity in the range of 16.00% to 19.00%.

During the first quarter of 2019, we repurchased \$199 million of Common Shares. On April 18, 2019, we announced our 2019 capital plan which included \$1.0 billion of Common Share repurchases beginning in the third quarter of 2019. We remain committed to consistently delivering on our stated priorities of supporting organic growth, increasing dividends, and prudently repurchasing Common Shares.

Table of contents**Selected financial data**

Our financial performance for each of the last five quarters is summarized in Figure 1.

(d) Represents period-end consolidated total loans and loans held for sale divided by period-end consolidated total deposits.

Table of contents**Strategic developments**

Our actions and results during the first quarter of 2019 supported our corporate strategy described in the “Introduction” section under the “Corporate strategy” heading on page 39 of our 2018 Form 10-K.

We continued to **grow profitably** during the first quarter of 2019. Excluding our efficiency initiative expenses, net income from continuing operations attributable to Key common shareholders increased from the first quarter of 2018. Our cash efficiency ratio improved to 61.9%, a decrease of over 100 basis points when compared to the year-ago quarter. Compared to the year-ago period, noninterest expense declined \$43 million. Our lower expense level reflects Key's efficiency initiative efforts across the franchise, both in personnel and nonpersonnel, reflecting lower average full-time equivalent employees and significant progress on our \$200 million cost savings target. Net interest income increased \$33 million compared to the year-ago quarter, driven by earning asset growth and the benefit from higher interest rates.

On April 3, 2019, we closed our acquisition of Laurel Road Bank's digital lending business as **we acquire and expand targeted client relationships**. The acquisition of Laurel Road allows us to expand national, digital-only lending capabilities, boost our client experience through compelling digital tools, and deliver a holistic banking experience to a targeted segment of consumers.

During the first quarter of 2019, we **effectively managed risk and rewards** as net loan charge-offs were .29% of average loans, below our targeted range. Net loan charge-offs for the three months ended March 31, 2019, increased from the same period one year ago, this was primarily due to an increase in gross loans charged off in our commercial lease financing portfolio.

Maintaining financial strength while driving long-term shareholder value was again a focus during the first quarter of 2019. At March 31, 2019, our Common Equity Tier 1 and Tier 1 risk-based capital ratios stood at 9.81% and 10.94%, respectively. Consistent with our 2018 capital plan, we completed \$199 million of Common Share repurchases and the Board declared a common share dividend of \$.17 per Common Share. On April 18, 2019, we announced our 2019 capital plan. Share repurchases of up to \$1.0 billion were included in the 2019 capital plan which is effective from the third quarter of 2019 through the second quarter of 2020. A potential dividend increase was also included in our 2019 capital plan. In the third quarter of 2019, the Board plans to consider a potential increase in our quarterly Common Share dividend, up to \$.185 per Common Share.

During the first quarter, we were recognized for our efforts to **engage a high-performing, talented, and diverse workforce**. The Association of ERGs and Councils announced Key made their annual list of Top 25 US Employee Resource Groups, Business Resource Groups, and Diversity Councils. Also, during the first quarter, the Human Rights Campaign named us one of the Best Places to Work for LGBT Equality. These awards reflect the environment we have created where employees are treated with respect and are empowered to bring their authentic selves to work.

Demographics

In the first quarter of 2019, Key revised its management structure and changed its basis of presentation into two business segments, Consumer Bank and Commercial Bank. Note 19 (“Business Segment Reporting”) describes the products and services offered by each of these business segments and provides more detailed financial information pertaining to the segments, including changes in basis of presentation.

Consumer Bank serves individuals and small businesses throughout our 15-state branch footprint by offering a variety of deposit and investment products, personal finance and financial wellness services, lending, mortgage and home equity, credit card, treasury services, and business advisory services. The Consumer Bank also purchases retail auto sales contracts via a network of auto dealerships. The auto

dealerships finance the sale of automobiles as the initial lender and then assign the contracts to us pursuant to dealer agreements. In addition, wealth management and investment services are offered to assist non-profit and high-net-worth clients with their banking, trust, portfolio management, life insurance, charitable giving, and related needs.

Commercial Bank delivers a broad suite of banking and capital markets products to its clients, including syndicated finance, debt and equity capital markets, commercial payments, equipment finance, commercial mortgage banking, derivatives, foreign exchange, financial advisory, and public finance. Commercial Bank is also a significant servicer of commercial mortgage loans and a significant special servicer of CMBS.

Table of contents**Supervision and regulation**

The following discussion provides a summary of recent regulatory developments and should be read in conjunction with the disclosure included in our 2018 Form 10-K under the heading “Supervision and Regulation” in Item 1. Business and under the heading “II. Compliance Risk” in Item 1A. Risk Factors.

Regulatory capital requirements

The final rule to implement the Basel III international capital framework (“Basel III”) was effective January 1, 2015, with a multi-year transition period ending on December 31, 2018 (“Regulatory Capital Rules”). The Basel III capital framework and the U.S. implementation of the Basel III capital framework are discussed in more detail in Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Regulatory capital requirements.”

Under the Regulatory Capital Rules, standardized approach banking organizations, such as KeyCorp and KeyBank, are required to meet the minimum capital and leverage ratios set forth in Figure 2 below. At March 31, 2019, Key had an estimated Common Equity Tier 1 Capital Ratio of 9.74% under the fully phased-in Regulatory Capital Rules. Also, at March 31, 2019, based on the fully phased-in Regulatory Capital Rules, Key estimates that its capital and leverage ratios, after adjustment for market risk, would be as set forth in Figure 2.

Figure 2. Pro Forma Ratios vs. Minimum Capital Ratios Calculated Under the Fully Phased-In Regulatory Capital Rules

Ratios (including capital conservation buffer)	Key	
	March 31, 2019	Minimum January 1, 2019 Pro forma
Common Equity Tier 1 ^(a)	9.74	% 4.5
Capital conservation buffer ^(b)		2.5
Common Equity Tier 1 + Capital conservation buffer		7.0
Tier 1 Capital	10.86	% 6.0
Tier 1 Capital + Capital conservation buffer		8.5
Total Capital	12.87	% 8.0
Total Capital + Capital conservation buffer		10.5
Leverage ^(c)	9.89	% 4.0

(a) See section entitled “GAAP to Non-GAAP Reconciliations,” which presents the computation of Common Equity Tier 1 capital under the fully phased-in regulatory capital rules.

(b) Capital conservation buffer must consist of Common Equity Tier 1 capital. As a standardized approach banking organization, KeyCorp is not subject to the countercyclical capital buffer of up to 2.5% imposed upon an advanced approaches banking organization under the Regulatory Capital Rules.

(c) As a standardized approach banking organization, KeyCorp is not subject to the 3% supplemental leverage ratio requirement, which became effective January 1, 2018.

Revised prompt corrective action framework

The federal prompt corrective action (“PCA”) framework under the FDIA groups FDIC-insured depository institutions into one of five prompt corrective action capital categories: “well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized,” and “critically undercapitalized.” In addition to implementing the Basel III capital framework in the United States, the Regulatory Capital Rules also revised the PCA capital category threshold ratios applicable to FDIC-insured depository institutions such as KeyBank, with an effective date of January 1, 2015. The revised PCA framework table in Figure 3 identifies the capital category thresholds for a “well capitalized” and an “adequately capitalized” institution under the PCA Framework.

Figure 3. "Well Capitalized" and "Adequately Capitalized" Capital Category Ratios under Revised PCA Framework

Prompt Corrective Action Ratio	Capital Category	
	Well Capitalized	Adequately Capitalized
Common Equity Tier 1 Risk-Based	6.5 %	4.5 %
Tier 1 Risk-Based	8.0	6.0
Total Risk-Based	10.0	8.0
Tier 1 Leverage ^(b)	5.0	4.0

(a) A "well capitalized" institution also must not be subject to any written agreement, order, or directive to meet and maintain a specific capital level for any capital measure.

(b) As a "standardized approach" banking organization, KeyBank is not subject to the 3% supplemental leverage ratio requirement, which became effective January 1, 2018.

We believe that, as of March 31, 2019, KeyBank (consolidated) satisfied the risk-based and leverage capital requirements necessary to be considered "well capitalized" for purposes of the PCA framework. However, investors should not regard this determination as a representation of the overall financial condition or prospects of KeyBank

Table of contents

because the PCA framework is intended to serve a limited supervisory function. Moreover, it is important to note that the PCA framework does not apply to BHCs, like KeyCorp.

Recent regulatory capital-related developments

See Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Regulatory capital requirements — Recent regulatory capital-related developments” for a discussion of recent regulatory capital-related developments.

Capital planning and stress testing

See Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Regulatory capital requirements — Capital planning and stress testing” and “Supervision and Regulation — Regulatory capital requirements — Recent developments in capital planning and stress testing” for an overview of capital planning and stress testing requirements as well as recent developments in those areas.

Additional recent developments regarding capital planning and stress testing are discussed in Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Other Regulatory Developments — Economic Growth, Regulatory Relief, and Consumer Protection Act.”

Liquidity requirements

See Item. 1 Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Regulatory capital requirements — Liquidity requirements” for a discussion of liquidity requirements, including the Liquidity Coverage Rules.

Recent developments regarding liquidity requirements are discussed in Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Other Regulatory Developments — Economic Growth, Regulatory Relief, and Consumer Protection Act.”

Resolution planning

BHCs with at least \$50 billion in total consolidated assets, like KeyCorp, are required to periodically submit to the Federal Reserve and FDIC a plan discussing how the company could be rapidly and efficiently resolved if the company failed or experienced material financial distress. Insured depository institutions with at least \$50 billion in total consolidated assets, like KeyBank, are also required to submit a resolution plan to the FDIC. These plans are due annually unless the requirement to submit the plans is deferred by the regulators. On December 1, 2017, KeyCorp submitted its resolution plan to the Federal Reserve and the FDIC. KeyBank submitted its resolution plan to the FDIC on June 20, 2018. KeyCorp was not required to submit a resolution plan to the Federal Reserve and FDIC for 2018 because the FDIC and Federal Reserve deferred such requirement (for 14 firms, including KeyCorp) until December 2019. KeyBank will not be required to submit a resolution plan to the FDIC in 2019 because the FDIC extended the next filing due date for all depository institution resolution plan submissions until no sooner than July 1, 2020. The Federal Reserve and FDIC make available on their websites the public sections of resolution plans for the companies, including KeyCorp and KeyBank, that submitted plans. The public sections of the resolution plans of KeyCorp and KeyBank are available at <http://www.federalreserve.gov/supervisionreg/resolution-plans.htm> and <https://www.fdic.gov/regulations/reform/resplans/>.

In April 2019, the Federal Reserve and FDIC released a proposal to modify the resolution planning requirements applicable to large BHCs. Under this proposal, BHCs with less than \$250 billion in total consolidated assets would no longer be required to submit a resolution plan unless they have \$75 billion or more in certain risk-based indicators. If this proposal is adopted, KeyCorp will no longer be subject to resolution planning requirements. Comments on this proposal are due by June 21, 2019. On April 16, 2019, the FDIC issued an advance notice of proposed rulemaking (“ANPR”) requesting public comment on potential changes to its rule imposing resolution planning requirements on large insured depository institutions, including potential modifications to the rule in the following areas: (i) creation of tiered resolution planning requirements based on institution size, complexity, and other factors; (ii) revisions to the frequency and required content of plan submissions, including elimination of plan submissions for a category of smaller and less complex institutions; (iii) improvements to the process for periodic engagements between the FDIC and institutions on resolution-related matters; and (iv) revision of the \$50 billion asset threshold in the current rule. The FDIC indicated that it is considering two alternate approaches with respect

Table of contents

to the tiering of resolution plan requirements. Under each of these approaches, institutions would be placed into three groups with the first two groups required to submit resolution plans with streamlined content requirements and the third group not required to submit a resolution plan. The FDIC would engage with institutions in all three groups on a periodic basis on a limited number of items related to resolution planning and would conduct periodic testing of the resolution planning capabilities of these institutions. Comments on this ANPR are due by June 21, 2019. Any changes to this rule will impact KeyBank. The FDIC extended the due date for the next resolution plan submission for all institutions until after the rulemaking is completed.

Economic Growth, Regulatory Relief, and Consumer Protection Act

See Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Other Regulatory Developments — Economic Growth, Regulatory Relief, and Consumer Protection Act” (“EGRRCPA”) for a discussion of the EGRRCPA and NPRs related to its implementation.

Volcker Rule

The Volcker Rule is discussed in detail in Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Other Regulatory Developments — Volcker Rule.”

Deposit insurance

In December 2016, the FDIC issued a final rule that imposes recordkeeping requirements on insured depository institutions with two million or more deposit accounts (including KeyBank) in order to facilitate rapid payment of insured deposits to customers if the institutions were to fail. The rule requires those insured depository institutions to: (i) maintain complete and accurate data on each depositor’s ownership interest by right and capacity for all of the institution’s deposit accounts; and (ii) develop the capability to calculate the insured and uninsured amounts for each deposit owner within 24 hours of failure. The FDIC will conduct periodic testing of compliance with these requirements, and institutions subject to the rule must submit to the FDIC a certification of compliance, signed by the bank’s chief executive officer, and a deposit insurance coverage summary report on or before the mandatory compliance date and annually thereafter. The final rule became effective on April 1, 2017, with a mandatory compliance date of April 1, 2020. On March 29, 2019, the FDIC issued a proposal to amend certain aspects of this rule. Among other things, the proposal would (i) provide covered institutions with the option to extend the compliance date to no later than April 1, 2021, upon notification to the FDIC; (ii) clarify the certification requirement; (iii) revise the actions that must be taken for deposit accounts insured on a pass-through basis (where the bank’s account holder is holding funds on behalf of the beneficial owners of the funds); and (iv) streamline the process for submitting exception requests to the FDIC. Comments on this proposal are due by May 13, 2019.

Community Reinvestment Act

See Item 1. Business of our 2018 Form 10-K under the heading “Supervision and Regulation — Other Regulatory Developments — Community Reinvestment Act” for an overview of the Community Reinvestment Act and recent developments related to it.

Table of contents

Results of Operations

Earnings overview

The following chart provides a reconciliation of net income from continuing operations attributable to Key common shareholders for the three months ended March 31, 2018, to the three months ended March 31, 2019 (dollars in millions):

The following discussion explains the key factors that caused these elements to change.

Net interest income

One of our principal sources of revenue is net interest income. Net interest income is the difference between interest income received on earning assets (such as loans and securities) and loan-related fee income, and interest expense paid on deposits and borrowings. There are several factors that affect net interest income, including:

- the volume, pricing, mix, and maturity of earning assets and interest-bearing liabilities;
- the volume and value of net free funds, such as noninterest-bearing deposits and equity capital;
- the use of derivative instruments to manage interest rate risk;
- interest rate fluctuations and competitive conditions within the marketplace;
- asset quality; and
- fair value accounting of acquired earning assets and interest-bearing liabilities.

To make it easier to compare both the results across several periods and the yields on various types of earning assets (some taxable, some not), we present net interest income in this discussion on a “TE basis” (i.e., as if all income were taxable and at the same rate). For example, \$100 of tax-exempt income would be presented as \$126, an amount that, if taxed at the statutory federal income tax rate of 21%, would yield \$100.

Figure 4 shows the various components of our balance sheet that affect interest income and expense and their respective yields or rates over the past five quarters. This figure also presents a reconciliation of TE net interest income to net interest income reported in accordance with GAAP for each of those quarters. The net interest margin, which is an indicator of the profitability of the earning assets portfolio less cost of funding, is calculated by dividing annualized TE net interest income by average earning assets.

Table of contents

TE net interest income was \$985 million for the first quarter of 2019, compared to TE net interest income of \$952 million for the first quarter of 2018. The increase in net interest income reflects the benefit from higher interest rates and higher earning asset balances, partially offset by a decline in purchase accounting accretion and lower loan fees. First quarter 2019 net interest income included \$22 million of purchase accounting accretion, a decline of \$11 million from the first quarter of 2018. In 2019, we expect TE net interest income to be in the range of \$4.0 billion to \$4.1 billion, with our outlook assuming no additional interest rate increases in 2019.

Average loans were \$89.6 billion for the first quarter of 2019, an increase of \$2.7 billion compared to the first quarter of 2018, reflecting broad-based growth in commercial and industrial loans and growth in indirect auto lending, partially offset by continued paydowns in home equity lines of credit. For 2019, we anticipate average loans to be in the range of \$90 billion to \$91 billion.

Average deposits totaled \$107.6 billion for the first quarter of 2019, an increase of \$5.0 billion compared to the year-ago quarter, reflecting growth in higher-yielding deposit products, as well as strength in our retail banking franchise and growth from commercial relationships. For 2019, we anticipate average deposits to be in the range of \$108 billion to \$109 billion.

Table of contents**Figure 4. Consolidated Average Balance Sheets, Net Interest Income, and Yields/Rates and Components of Net Interest Income Changes from Continuing Operations**

Interest rate spread (TE)	2.75 %		2.88 %	
Net interest income (TE) and net interest margin (TE)	985	3.13 %	952	3.15 %
TE adjustment ^(b)	8		8	
Net interest income, GAAP basis	\$ 977		\$ 944	

- (a) Results are from continuing operations. Interest excludes the interest associated with the liabilities referred to in (g), calculated using a matched funds transfer pricing methodology.
- (b) Interest income on tax-exempt securities and loans has been adjusted to a taxable-equivalent basis using the statutory federal income tax rate of 21% for the three months ended March 31, 2019, and March 31, 2018.
- (c) For purposes of these computations, nonaccrual loans are included in average loan balances.
- (d) Commercial and industrial average balances include \$133 million and \$120 million of assets from commercial credit cards for the three months ended March 31, 2019, and March 31, 2018, respectively.
- (e) Yield is calculated on the basis of amortized cost.
- (f) Rate calculation excludes basis adjustments related to fair value hedges.
- (g) A portion of long-term debt and the related interest expense is allocated to discontinued liabilities as a result of applying our matched funds transfer pricing methodology to discontinued operations.

Table of contents

Provision for credit losses

Our provision for credit losses was \$62 million for the three months ended March 31, 2019, compared to \$61 million for the three months ended March 31, 2018. The increase of \$1 million in our provision for credit losses was related to an increase in net loan-charge offs during the first quarter of 2019 compared to one year ago. In 2019, we expect the provision to slightly exceed net loan charge-offs to provide for loan growth.

Noninterest income

As shown in Figure 5, noninterest income was \$536 million for the first quarter of 2019, compared to \$601 million for the year-ago quarter. Noninterest income represented 35% of total revenue for the three months ended March 31, 2019, compared to 39% for the three months ended March 31, 2018. In 2019, we expect noninterest income to be in the range of \$2.5 billion to \$2.6 billion.

The following discussion explains the composition of certain elements of our noninterest income and the factors that caused those elements to change.

Figure 5. Noninterest Income

^(a) Other noninterest income includes operating lease income and other leasing gains, corporate services income, corporate-owned life insurance income, consumer mortgage income, mortgage servicing fees, and other income. See the "Consolidated Statements of Income" in Item 1. Financial Statements of this report.

Table of contentsTrust and investment services income

Trust and investment services income consists of brokerage commissions, trust and asset management fees, and insurance income. The assets under management that primarily generate these revenues are shown in Figure 6. For the three months ended March 31, 2019, trust and investment services income decreased \$18 million, or 13.5%, compared to the same period one year ago. This decrease was primarily related to the sale of KIBS in May of 2018, which contributed \$15 million of income in the first quarter of 2018.

A significant portion of our trust and investment services income depends on the value and mix of assets under management. At March 31, 2019, our bank, trust, and registered investment advisory subsidiaries had assets under management of \$38.7 billion, compared to \$39.0 billion at March 31, 2018. Assets under management were down, as shown in Figure 6, as the market continued to recover from the market decline that occurred during the second half of 2018.

Figure 6. Assets Under Management

<i>in millions</i>	March 31, 2019	December 31, 2018	September 30, 2018	June 30, 2018	March 31, 2018
Assets under management by investment type:					
Equity	\$ 23,299	\$ 21,325	\$ 24,958	\$ 24,125	\$ 23,629
Securities lending	761	774	1,049	977	837
Fixed income	10,817	10,696	10,946	11,276	11,098
Money market	3,865	3,980	3,622	3,285	3,439
Total assets under management	\$ 38,742	\$ 36,775	\$ 40,575	\$ 39,663	\$ 39,003

Investment banking and debt placement fees

Investment banking and debt placement fees consists of syndication fees, debt and equity financing fees, financial adviser fees, gains on sales of commercial mortgages, and agency origination fees. Investment banking and debt placement fees decreased \$33 million, or 23.1%, from the year-ago quarter. The decline reflected market disruption from the government shutdown early in the first quarter of 2019, as well as the timing of closing certain transactions.

Table of contents

Cards and payments income

Cards and payments income, which consists of debit card, consumer and commercial credit card, and merchant services income, increased \$4 million, or 6.5%, from the year-ago quarter. The increase was primarily due to higher debit card, credit card, and merchant fees.

Service charges on deposit accounts

Service charges on deposit accounts decreased \$7 million, or 7.9%, for the three months ended March 31, 2019, compared to the same period one year ago.

Other noninterest income

Other noninterest income includes operating lease income and other leasing gains, corporate services income, corporate-owned life insurance income, consumer mortgage income, mortgage servicing fees, and other income. Other noninterest income decreased \$11 million, or 6.3%, from the year-ago quarter. This decrease was primarily attributable to a decrease in other income due to higher losses on principal investments and lower recoveries in excess of charge-offs. Corporate services income was also lower as a result of a decrease in derivative trading income. Partially offsetting these decreases was an increase in operating lease income and other leasing gains due to higher rental income earned on operating leases.

Noninterest expense

As shown in Figure 7, noninterest expense was \$963 million for the first quarter of 2019, compared to \$1 billion for the first quarter of 2018. Figure 7 gives a breakdown of our major categories of noninterest expense as a percentage of total noninterest expense for the first quarter of 2019. In 2019, we expect noninterest expense to be in the range of \$3.85 billion to \$3.95 billion.

Table of contents

Figure 7. Noninterest Expense

(a) Other noninterest expense includes equipment, operating lease expense, marketing, FDIC assessment, intangible asset amortization, OREO expense, net, and other expense. See the "Consolidated Statements of Income" in Item 1. Financial Statements of this report.

Personnel

Personnel expense, the largest category of our noninterest expense, decreased by \$31 million, or 5.2%, for the three months ended March 31, 2019, compared to the same period one year ago. This decrease was driven by lower salaries expense, incentive compensation, and employee benefits costs, and was partially offset by higher severance expense related to efficiency initiative actions taken during the quarter.

Net occupancy

Net occupancy expense decreased \$6 million, or 7.7%, for the first quarter of 2019, compared to the same period one year ago. The decrease during the first quarter of 2019 was primarily due to lower rental expenses and real estate taxes. These decreases were partially offset by an increase in lease termination fees.

Other noninterest expense

Other noninterest expense includes equipment, operating lease expense, marketing, FDIC assessment, intangible asset amortization, OREO expense, and other miscellaneous expense categories. Other noninterest expense decreased \$11 million, or 4.6%, from the year-ago quarter. The decline in other expense was primarily driven by lower FDIC assessment expense, which reflected the elimination of the FDIC quarterly surcharge, a decrease in marketing expenses, and a decrease in intangible asset amortization. These declines were partially offset by an increase in other miscellaneous expenses partially as a result of the announced closure of branches.

Table of contents

Income taxes

We recorded tax expense of \$82 million for the first quarter of 2019 and \$62 million for the first quarter of 2018.

Our federal tax expense differs from the amount that would be calculated using the federal statutory tax rate, primarily because we generate income from investments in tax-advantaged assets, such as corporate-owned life insurance and credits associated with renewable energy and low-income housing investments, and make periodic adjustments to our tax reserves. Tax expense for the three months ended March 31, 2019, and March 31, 2018, was affected by net discrete income tax benefits of \$5 million and \$26 million, respectively. Excluding the discrete income tax expense, the tax expense for the first quarter of 2019 was \$87 million.

Additional information pertaining to how our tax expense (benefit) and the resulting effective tax rates were derived is included in Note 13 (“Income Taxes”) beginning on page 144 of our 2018 Form 10-K.

Business Segment Results

Key previously reported its results of operations through two business segments, Key Community Bank and Key Corporate Bank, with the remaining operations recorded in Other. In the first quarter of 2019, Key underwent a company-wide organizational change, resulting in the realignment of its businesses into two reportable business segments, Consumer Bank and Commercial Bank, with the remaining operations that do not meet the criteria for disclosure as a separate reportable business recorded in Other. The new business segment structure aligns with how management reviews performance and makes decisions by client, segment and business unit. Prior period information was restated to conform to the new business segment structure.

This section summarizes the highlights and segment imperatives, market and business overview, and financial performance of our two major business segments (operating segments): Consumer Bank and Commercial Bank. Note 19 (“Business Segment Reporting”) describes the products and services offered by each of these business segments and provides more detailed financial information pertaining to the segments. Dollars in the charts are presented in millions.

Consumer Bank

Highlights and segment imperatives

- ◊ Simplification and digitalization to drive growth and operating leverage
- ◊ Relationship-based strategy with a focus on financial wellness as a differentiator
- ◊ Deliver ease, value, and expertise to help guide our clients to the right approach to meet their goals

Market and business overview

As the banking industry moves forward, so do our clients. Anticipating our client's needs not only today, but for tomorrow and into the future, has become one of the biggest challenges for the banking industry. We view these challenges as an opportunity to help our current client base meet their own goals, as well as attract new and diverse clients. In an increasingly digital world focused on specialized convenience, we have made meaningful steps to meet those demands through new digital portals and the acquisitions of HelloWallet in 2017 and Laurel Road in 2019. These platforms place us in a unique position to develop long

lasting and meaningful relationships with our current and prospective clients. Financial wellness is a core tenet of our customer relationships and we see it in three different ways: diagnose, enhance, and sustain. Our goal is to get our clients to a place where they can comfortably sustain their current financial position so we can be there for them when they are ready to grow. Clients no longer go to a branch to conduct transactions only, they go to seek advice and gain new perspectives on issues they may be facing. Overall, we have a passion to help our clients through:

Ease - enabling simple and clear banking with no surprises

Value - knowing our clients and valuing each relationship

Expertise - provide our clients with industry-leading expertise and personalized service

Table of contents

Summary of operations

Net income of \$164 million for the first quarter of 2019 is an increase of \$33 million, or 25.2%, from the year-ago quarter.

Taxable-equivalent net interest income increased by \$41 million, or 7.4%, from the first quarter of 2018.

The increase in net interest income was primarily driven by strong growth in deposits.

Average loans and leases decreased \$244 million, or .8%. This is largely driven by a \$854 million, or 7.3%, decline in home equity balances which is in line with industry trends. This decline in home equity balances was partially offset by growth in indirect auto loans.

Average deposits increased \$3.9 billion, or 5.7%, driven by growth in money market and certificates of deposit, reflecting strength in Key's relationship strategy.

Provision for credit losses increased \$11 million as compared to the first quarter of 2018 to reflect modest shifts in asset quality.

Noninterest income decreased \$15 million, or 6.6%, from the year-ago quarter driven by lower service charges on deposit accounts.

Noninterest expense decreased \$29 million, or 5.0%, from the year-ago quarter demonstrating strong expense management and the elimination of the FDIC quarterly surcharge.

Commercial Bank

Highlights and segment imperatives

Solve complex client needs through a differentiated product set of banking and capital markets capabilities

Drive targeted scale through distinct product capabilities delivered to a broad set of clients

Table of contents

Utilize industry expertise and broad capabilities to build relationships with narrowly targeted client sets

Market and business overview

Building relationships and delivering complex solutions for middle market clients requires a distinct operating model that understands their business and can provide a broad set of product capabilities. As competition for these clients intensifies, we have positioned the business to maintain and grow our competitive advantage by building targeted scale in businesses and client segments. Strong market share in businesses such as real estate loan servicing and equipment finance highlight our ability to successfully meet customer needs through targeted scale in distinct product capabilities. Clients expect us to understand every aspect of their business. Our seven industry verticals are aligned to drive targeted scale in segments where we have a deep breadth of industry expertise. Healthcare is the largest sector of the economy and one of our targeted verticals. Our acquisition of Cain Brothers in 2017 is one example of how we have expanded our business capabilities to further enhance our reputation as a trusted advisor to current and prospective clients. Our business model is positioned to meet our client needs because our focus is not on being a universal bank, but rather being the right bank for our clients.

Summary of operations

Recorded net income attributable to Key of \$253 million for the first quarter of 2019, compared to \$276 million for the year-ago quarter.

Taxable-equivalent net interest income decreased by \$6 million, or 1.5%, compared to the first quarter of 2018, driven by lower purchase accounting accretion and loan spread compression.

Average loan and lease balances increased \$3.1 billion, or 5.7%, compared to the first quarter of 2018 driven by broad-based growth in commercial and industrial loans.

Average deposit balances increased \$1.6 billion, or 5.0%, compared to the first quarter of 2018, driven by growth in core deposits.

Provision for credit losses decreased \$13 million compared to the first quarter of 2018, as credit quality remained stable.

Noninterest income decreased \$25 million, or 7.7%, from the prior year. The decline was largely due to lower investment banking and debt placement fees and corporate services income, which reflected less favorable market conditions. This decrease was partially offset by higher core business growth.

Noninterest expense decreased by \$14 million, or 3.7%, from the first quarter of 2019. The decline reflects the benefit of efficiency initiatives, strong expense discipline, and the elimination of the FDIC quarterly surcharge.

Figure 8. Breakdown of Loans at March 31, 2019

^(a) Other consumer loans include Consumer direct loans, Credit cards, and Consumer indirect loans. See Note 3 ("Loan Portfolio") Item 1. Financial Statements of this report.

At March 31, 2019, total loans outstanding from continuing operations were \$90.2 billion, compared to \$89.6 billion at December 31, 2018. For more information on balance sheet carrying value, see Note 1 ("Summary of Significant Accounting Policies") under the headings "Loans" and "Loans Held for Sale" on page 99 of our 2018 Form 10-K.

Commercial loan portfolio

Commercial loans outstanding were \$66.7 billion at March 31, 2019, an increase of \$435 million, or .7%, compared to December 31, 2018, primarily driven by an increase in commercial and industrial loans. Figure 9 provides our commercial loan portfolios by industry classification at March 31, 2019, and December 31, 2018.

Commercial and industrial. Commercial and industrial loans are the largest component of our loan portfolio, representing 52% of our total loan portfolio at March 31, 2019, and 51% at December 31, 2018. This portfolio is approximately 84% variable rate and consists of loans originated primarily to large corporate, middle market, and small business clients.

Commercial and industrial loans totaled \$46.5 billion at March 31, 2019, an increase of \$721 million, or 1.6%, compared to December 31, 2018. The growth was broad-based and spread across most industry categories, including increased lending in the finance, healthcare, utilities, and construction materials and contractors.

Commercial real estate loans. Our commercial real estate portfolio includes both mortgage and construction loans, and is originated through two primary sources: our 15-state banking franchise, and KeyBank

Real Estate Capital, a national line of business within the Commercial Bank that cultivates relationships with owners of commercial real estate located both within and beyond the branch system.

Nonowner-occupied properties, generally properties for which at least 50% of the debt service is provided by rental income from nonaffiliated third parties, represented 80% of total commercial real estate loans outstanding at March 31, 2019. Construction loans, which provide a stream of funding for properties not fully leased at origination to support debt service payments over the term of the contract or project, represented 9% of commercial real estate loans at period end.

Table of contents

At March 31, 2019, commercial real estate loans totaled \$15.8 billion, which includes \$1.4 billion of construction loans. Compared to December 31, 2018, this portfolio decreased \$187 million, or 1.2%. We continue to focus primarily on owners of completed and stabilized commercial real estate in accordance with our relationship strategy.

As shown in Figure 10, our commercial real estate loan portfolio includes various property types and geographic locations of the underlying collateral. These loans include commercial mortgage and construction loans in both Consumer Bank and Commercial Bank.

Consumer loan portfolio

Consumer loans outstanding increased by \$191 million, or .8%, from December 31, 2018, driven by approximately \$400 million of consumer direct loans purchased from Laurel Road Bank prior to the acquisition of Laurel Road Bank's digital lending business. We also experienced growth in indirect auto lending, partly offset by continued declines in home equity lines of credit.

Table of contents

The home equity portfolio is comprised of loans originated by our Consumer Bank within our 15-state footprint and is the largest segment of our consumer loan portfolio, representing 46% of consumer loans outstanding at March 31, 2019.

We held the first lien position for approximately 60% of the home equity portfolio at both March 31, 2019, and March 31, 2018. For loans with real estate collateral, we track borrower performance monthly. Regardless of the lien position, credit metrics are refreshed quarterly, including recent FICO scores as well as updated loan-to-value ratios. This information is used in establishing the ALLL. Our methodology is described in Note 1 (“Summary of Significant Accounting Policies”) under the heading “Allowance for Loan and Lease Losses” beginning on page 101 of our 2018 Form 10-K.

Commercial lease financing	924	916	892	915	873
Commercial loans	562	549	534	518	498
Total	\$ 308,506	\$ 298,598	\$ 278,047	\$ 263,233	\$ 252,933

In the event of default by a borrower, we are subject to recourse with respect to approximately \$4.2 billion of the \$308.5 billion of loans administered or serviced at March 31, 2019. Additional information about this recourse arrangement is included in Note 16 (“Contingent Liabilities and Guarantees”) under the heading “Recourse agreement with FNMA.”

We derive income from several sources when retaining the right to administer or service loans that are sold. We earn noninterest income (recorded as “mortgage servicing fees”) from fees for servicing or administering loans. This fee income is reduced by the amortization of related servicing assets. In addition, we earn interest income from investing funds generated by escrow deposits collected in connection with the servicing loans. Additional information about our mortgage servicing assets is included in Note 8 (“Mortgage Servicing Assets”).

Securities

Our securities portfolio totaled \$32.1 billion at March 31, 2019, compared to \$30.9 billion at December 31, 2018. Available-for-sale securities were \$20.9 billion at March 31, 2019, compared to \$19.4 billion at December 31, 2018. Held-to-maturity securities were \$11.2 billion at March 31, 2019, and \$11.5 billion at December 31, 2018.

As shown in Figure 14, all of our mortgage-backed securities, which include both securities available for sale and held-to-maturity securities, are issued by government-sponsored enterprises or GNMA and traded in liquid secondary markets. These securities are recorded on the balance sheet at fair value for the available-for-sale portfolio and at amortized cost for the held-to-maturity portfolio. For more information about these securities, see Note 5 (“Fair Value Measurements”) under the heading “Qualitative Disclosures of Valuation Techniques” and Note 6 (“Securities”).

GNMA	14,108	13,637
Total ^(a)	\$ 31,772	\$ 30,761

(a) Includes securities held in the available-for-sale and held-to-maturity portfolios.

Securities available for sale

The majority of our securities available for sale portfolio consists of federal agency CMOs and mortgage-backed securities. CMOs are debt securities secured by a pool of mortgages or mortgage-backed securities. These mortgage securities generate interest income, serve as collateral to support certain pledging agreements, and provide liquidity value under regulatory requirements.

Figure 15 shows the composition, yields, and remaining maturities of our securities available for sale. For more information about these securities, including gross unrealized gains and losses by type of security and securities pledged, see Note 6 (“Securities”).

(b) Weighted-average yields are calculated based on amortized cost. Such yields have been adjusted to a TE basis using the statutory federal income tax rate of 21%.

Held-to-maturity securities

Federal agency CMOs and mortgage-backed securities constitute essentially all of our held-to-maturity securities. The remaining balance is comprised of foreign bonds. Figure 16 shows the composition, yields, and remaining maturities of these securities.

Table of contents**Figure 16. Held-to-Maturity Securities**

<i>dollars in millions</i>	Agency Residential Collateralized Mortgage Obligations (a)	Agency Residential Mortgage-backed Securities (a)	Agency Commercial Mortgage-backed Securities (a)	Other Securities	Total	Weighted-Average Yield (b)

Deposits and other sources of funds**Figure 17. Breakdown of Deposits at March 31, 2019**

Deposits are our primary source of funding. At March 31, 2019, our deposits totaled \$108.2 billion, an increase of \$866 million compared to December 31, 2018. The increase reflects strength in our franchise through the penetration of existing retail and commercial relationships, as well as clients shifting to higher-yielding deposit products.

Wholesale funds, consisting of short-term borrowings and long-term debt, totaled \$15.1 billion at March 31, 2019, compared to \$14.6 billion at December 31, 2018. The increase from December 31, 2018, was largely the result of an increase in long-term debt.

Capital

The objective of capital management is to maintain capital levels consistent with our risk appetite and of a sufficient amount to operate under a wide range of economic conditions. We have identified three primary uses of capital:

1. Investing in our businesses, supporting our clients, and loan growth;
2. Maintaining or increasing our Common Share dividend; and
3. Returning capital in the form of Common Share repurchases to our shareholders.

The following sections discuss certain ways we have deployed our capital. For further information, see the Consolidated Statements of Changes in Equity and Note 18 (“Shareholders’ Equity”).

Table of contents2019 capital plan

On April 18, 2019, we announced our 2019 capital plan. Share repurchases of up to \$1.0 billion were included in the 2019 capital plan which is effective from the third quarter of 2019 through the second quarter of 2020. A potential dividend increase was also included in our 2019 capital plan. In the third quarter of 2019, the Board plans to consider a potential increase in our quarterly Common Share dividend, up to \$.185 per Common Share.

Dividends

Consistent with our 2018 capital plan, we paid a quarterly dividend of \$.17 per Common Share for the first quarter of 2019. Further information regarding the capital planning process and CCAR is included under the heading “Capital planning and stress testing” in the “Supervision and Regulation” section beginning on page 15 of our 2018 Form 10-K.

Common shares outstanding

Our Common Shares are traded on the NYSE under the symbol KEY with 34,241 holders of record at March 31, 2019. Our book value per Common Share was \$14.31 based on 1.013 billion shares outstanding at March 31, 2019, compared to \$13.90 per Common Share based on 1.020 billion shares outstanding at December 31, 2018. At March 31, 2019, our tangible book value per Common Share was \$11.55, compared to \$11.14 per Common Share at December 31, 2018.

Figure 18 shows activities that caused the change in outstanding common shares over the past five quarters.

Figure 18. Changes in Common Shares Outstanding

	2019		2018		
	First	Fourth	Third	Second	First
<i>in thousands</i>					
Shares outstanding at beginning of period	1,019,503	1,034,287	1,058,944	1,064,939	1,069,084
Open market repurchases and return of shares under employee compensation plans	(11,791)	(15,216)	(25,418)	(6,259)	(9,399)
Shares issued under employee compensation plans (net of cancellations)	5,474	432	761	264	5,254
Shares outstanding at end of period	1,013,186	1,019,503	1,034,287	1,058,944	1,064,939

As shown above, Common Shares outstanding decreased by 6.3 million shares during the first quarter of 2019.

At March 31, 2019, we had 243.5 million treasury shares, compared to 237.2 million treasury shares at December 31, 2018. Going forward we expect to reissue treasury shares as needed in connection with stock-based compensation awards and for other corporate purposes.

Information on repurchases of Common Shares by KeyCorp is included in Part II, Item 2. “Unregistered Sales of Equity Securities and Use of Proceeds” of this report.

Table of contentsCapital adequacy

Capital adequacy is an important indicator of financial stability and performance. All of our capital ratios remained in excess of regulatory requirements at March 31, 2019. Our capital and liquidity levels are intended to position us to weather an adverse operating environment while continuing to serve our clients' needs, as well as to meet the Regulatory Capital Rules described in Item 1. Business of our 2018 Form 10-K under the heading "Supervision and Regulation." Our shareholders' equity to assets ratio was 11.25% at March 31, 2019, compared to 11.17% at December 31, 2018. Our tangible common equity to tangible assets ratio was 8.43% at March 31, 2019, compared to 8.30% at December 31, 2018. The minimum capital and leverage ratios under the Regulatory Capital Rules together with the estimated ratios of KeyCorp at March 31, 2019, calculated on a fully phased-in basis, are set forth in the "Supervision and regulation — Regulatory capital requirements" section in Item 2 of this report.

Figure 19 represents the details of our regulatory capital positions at March 31, 2019, and December 31, 2018, under the Regulatory Capital Rules. Information regarding the regulatory capital ratios of KeyCorp's banking subsidiaries is presented annually, in Note 23 ("Shareholders' Equity") beginning on page 167 of our 2018 Form 10-K.

Leverage ^(c)	9.89	9.89	
Common Equity Tier 1	9.81	9.93	

(a) Net of capital surplus.

The ALLL included in Tier 2 capital is limited by regulation to 1.25% of the institution's standardized total risk-weighted assets (excluding its standardized market risk-weighted assets). The ALLL

(b) includes \$13 million and \$14 million of allowance classified as "discontinued assets" on the balance sheet at March 31, 2019, and December 31, 2018, respectively.

(c) This ratio is Tier 1 capital divided by average quarterly total assets as defined by the Federal Reserve less: (i) goodwill, (ii) the disallowed intangible and deferred tax assets, and (iii) other deductions from assets for leverage capital purposes.

Table of contents

Risk Management

Overview

Like all financial services companies, we engage in business activities and assume the related risks. The most significant risks we face are credit, compliance, operational, liquidity, market, reputation, strategic, and model risks. Our risk management activities are focused on ensuring that we properly identify, measure, and manage such risks across the entire enterprise to maintain safety and soundness, and to maximize profitability. There have been no significant changes in our Risk Management practices as described under the heading “Risk Management” beginning on page 65 of our 2018 Form 10-K.

Market risk management

Market risk is the risk that movements in market risk factors, including interest rates, foreign exchange rates, equity prices, commodity prices, credit spreads, and volatilities will reduce Key’s income and the value of its portfolios. These factors influence prospective yields, values, or prices associated with the instrument. We are exposed to market risk both in our trading and nontrading activities, which include asset and liability management activities. Information regarding our fair value policies, procedures, and methodologies is provided in Note 1 (“Summary of Significant Accounting Policies”) under the heading “Fair Value Measurements” on page 102 of our 2018 Form 10-K and Note 5 (“Fair Value Measurements”) in this report.

Trading market risk

Key incurs market risk as a result of trading activities that are used in support of client facilitation and hedging activities, principally within our investment banking and capital markets businesses. Key has exposures to a wide range of risk factors including interest rates, equity prices, foreign exchange rates, credit spreads, and commodity prices, as well as the associated implied volatilities and spreads. Our primary market risk exposures are a result of trading and hedging activities in the derivative, fixed income, and foreign exchange markets, including securitization exposures. At March 31, 2019, we did not have any re-securitization positions. We maintain modest trading inventories to facilitate customer flow, make markets in securities, and hedge certain risks including but not limited to credit risk and interest rate risk. The risks associated with these activities are mitigated in accordance with the Market Risk hedging policy. The majority of our positions are traded in active markets.

Market risk management is an integral part of Key’s risk culture. The Risk Committee of our Board provides oversight of trading market risks. The ERM Committee and the Market Risk Committee regularly review and discuss market risk reports prepared by our MRM that contain our market risk exposures and results of monitoring activities. Market risk policies and procedures have been defined and approved by the Market Risk Committee, a Tier 2 Risk Governance Committee, and take into account our tolerance for risk and consideration for the business environment. For more information regarding monitoring of trading positions and the activities related to the Market Risk Rule compliance see “Market Risk Management” beginning on page 66 of our 2018 Form 10-K.

VaR and stressed VaR. VaR is the estimate of the maximum amount of loss on an instrument or portfolio due to adverse market conditions during a given time interval within a stated confidence level. Stressed VaR is used to assess extreme conditions on market risk within our trading portfolios. The MRM calculates VaR and stressed VaR on a daily basis, and the results are distributed to appropriate management. VaR and stressed VaR results are also provided to our regulators and utilized in regulatory capital calculations.

We use a historical simulation VaR model to measure the potential adverse effect of changes in interest rates, foreign exchange rates, equity prices, and credit spreads on the fair value of our covered positions and other non-covered positions. We analyze market risk by portfolios and do not separately measure and monitor our portfolios by risk type. VaR is calculated using daily observations over a one-year time horizon and approximates a 95% confidence level. Statistically, this means that we would expect to incur losses greater than VaR, on average, five out of 100 trading days, or three to four times each quarter. We also calculate VaR and stressed VaR at a 99% confidence level. For more information regarding our VaR model, its governance and assumptions, see "Market Risk Management" on page 66 of our 2018 Form 10-K.

Actual losses for the total covered positions did not exceed aggregate daily VaR on any day during the quarters ended March 31, 2019, and March 31, 2018. The MRM backtests our VaR model on a daily basis to evaluate its predictive power. The test compares VaR model results at the 99% confidence level to daily held profit and loss.

Table of contents

Results of backtesting are provided to the MRC. Backtesting exceptions occur when trading losses exceed VaR. We do not engage in correlation trading or utilize the internal model approach for measuring default and credit migration risk. Our net VaR approach incorporates diversification, but our VaR calculation does not include the impact of counterparty risk and our own credit spreads on derivatives.

The aggregate VaR at the 99% confidence level with a one day holding period for all covered positions was \$.8 million at March 31, 2019, and \$1 million at March 31, 2018. Figure 20 summarizes our VaR at the 99% confidence level with a one day holding period for significant portfolios of covered positions for the three months ended March 31, 2019, and March 31, 2018.

Figure 20. VaR for Significant Portfolios of Covered Positions

in millions	2019 Three months ended March 31,				2018 Three months ended March 31,			
	High	Low	Mean	March 31,	High	Low	Mean	March 31,
Trading account assets:								
Fixed income	\$.8	\$.4	\$.6	\$.6	\$ 1.0	\$.3	\$.7	\$.8
Derivatives:								
Interest rate	\$.1	—	\$.1	\$.1	\$.1	\$ —	\$.1	\$.1

Stressed VaR is calculated by running the portfolios through a predetermined stress period which is approved by the MRC and is calculated at the 99% confidence level using the same model and assumptions used for general VaR. The aggregate stressed VaR for all covered positions was \$6.0 million at March 31, 2019, and \$5.2 million at March 31, 2018. Figure 21 summarizes our stressed VaR at the 99% confidence level with a one day holding period for significant portfolios of covered positions for the three months ended March 31, 2019, and March 31, 2018.

Figure 21. Stressed VaR for Significant Portfolios of Covered Positions

in millions	2019 Three months ended March 31,				2018 Three months ended March 31,			
	High	Low	Mean	March 31,	High	Low	Mean	March 31,
Trading account assets:								
Fixed income	\$ 6.8	\$ 3.6	\$ 4.8	\$ 4.6	\$ 6.0	\$ 3.0	\$ 4.7	\$ 4.1
Derivatives:								
Interest rate	\$.7	\$.3	\$.4	\$.5	\$.5	\$.3	\$.4	\$.4

Internal capital adequacy assessment. Market risk is a component of our internal capital adequacy assessment. Our risk-weighted assets include a market risk-equivalent asset amount, which consists of a VaR component, stressed VaR component, a *de minimis* exposure amount, and a specific risk add-on including the securitization positions. The aggregate market value of the securitization positions as defined by the Market Risk Rule was \$115 million at March 31, 2019. This amount included \$80 million of mortgage-backed securities positions and \$35 million of asset-backed securities positions. Specific risk is the price risk of individual financial instruments, which is not accounted for by changes in broad market risk factors and is measured through a standardized approach. Market risk weighted assets, including the specific risk calculations, are run quarterly by the MRM in accordance with the Market Risk Rule, and approved by the Chief Market Risk Officer.

Nontrading market risk

Most of our nontrading market risk is derived from interest rate fluctuations and its impacts on our traditional loan and deposit products, as well as investments, hedging relationships, long-term debt, and certain short-term borrowings. Interest rate risk, which is inherent in the banking industry, is measured by the potential for fluctuations in net interest income and the EVE that result from changes in interest rates and differences in the repricing and maturity characteristics of assets and liabilities. We manage the exposure to changes in net interest income and the EVE in accordance with our risk appetite and in accordance with the Board approved ERM policy.

Interest rate risk positions are influenced by a number of factors, including the balance sheet positioning that arises out of customer preferences for loan and deposit products, economic conditions, the competitive environment within our markets, changes in market interest rates that affect client activity, and our hedging, investing, funding, and capital positions. The primary components of interest rate risk exposure consist of reprice risk, basis risk, yield curve risk, and option risk.

Table of contents

“Reprice risk” is the exposure to changes in the level of interest rates and occurs when the volume of interest-bearing liabilities and the volume of interest-earning assets they fund (e.g., deposits used to fund loans) do not mature or reprice at the same time.

“Basis risk” is the exposure to asymmetrical changes in interest rate indices and occurs when floating-rate assets and floating-rate liabilities reprice at the same time, but in response to different market factors or indexes.

“Yield curve risk” is the exposure to nonparallel changes in the slope of the yield curve (where the yield curve depicts the relationship between the yield on a particular type of security and its term to maturity) and occurs when interest-bearing liabilities and the interest-earning assets that they fund do not price or reprice to the same term point on the yield curve.

“Option risk” is the exposure to a customer or counterparty’s ability to take advantage of the interest rate environment and terminate or reprice one of our assets, liabilities, or off-balance sheet instruments prior to contractual maturity without a penalty. Option risk occurs when exposures to customer and counterparty early withdrawals or prepayments are not mitigated with an offsetting position or appropriate compensation.

The management of nontrading market risk is centralized within Corporate Treasury. The Risk Committee of our Board provides oversight of nontrading market risk. The ERM Committee and the ALCO review reports on the interest rate risk exposures described above. In addition, the ALCO reviews reports on stress tests and sensitivity analyses related to interest rate risk. The ERM Committee and the ALCO have various responsibilities related to managing nontrading market risk, including recommending, approving, and monitoring strategies that maintain risk positions within approved tolerance ranges. The A/LM policy provides the framework for the oversight and management of interest rate risk and is administered by the ALCO. The MRM, as the second line of defense, provides additional oversight.

Net interest income simulation analysis. The primary tool we use to measure our interest rate risk is simulation analysis. For purposes of this analysis, we estimate our net interest income based on the current and projected composition of our on- and off-balance sheet positions, accounting for recent and anticipated trends in customer activity. The analysis also incorporates assumptions for the current and projected interest rate environments, and balance sheet growth projections based on a most likely macroeconomic view. The results of this simulation analysis reflect management’s desired interest rate risk positioning. The modeling incorporates investment portfolio and swap portfolio balances consistent with management’s desired interest rate risk positioning. The simulation model estimates the amount of net interest income at risk by simulating the change in net interest income that would occur if interest rates were to gradually increase or decrease over the next 12 months. Due to the low interest rate environment as of year-end 2017, our standard decrease scenario was modified to a gradual, parallel decrease of 125 basis points over eight months with no change over the following four months. As of March 31, 2019, the standard 200 basis point decline has been reinstated.

Figure 22 presents the results of the simulation analysis at March 31, 2019, and March 31, 2018. At March 31, 2019, our simulated impact to changes in interest rates was modest. The asset sensitive position declined from 2018 as a result of hedging actions executed to guide the position closer to neutral over time. Tolerance levels for risk management require the development of remediation plans to maintain residual risk within tolerance if simulation modeling demonstrates that a gradual, parallel 200 basis point increase or 200 basis point decrease in interest rates over the next 12 months would adversely affect net interest income over the same period by more than 5.5%. Current modeled exposure is within Board approved tolerances.

Figure 22. Simulated Change in Net Interest Income

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

	March 31, 2019		March 31, 2018	
Basis point change assumption (short-term rates)	-200	+200	-150	+200
Tolerance level	-5.50%	-5.50%	-5.50%	-5.50%
Interest rate risk assessment	-2.92%	-.02%	-5.46%	3.22%

Simulation analysis produces a sophisticated estimate of interest rate exposure based on assumptions input into the model. We tailor certain assumptions to the specific interest rate environment and yield curve shape being modeled and validate those assumptions on a regular basis. However, actual results may differ from those derived in simulation analysis due to unanticipated changes to the balance sheet composition, customer behavior, product pricing, market interest rates, changes in management's desired interest rate risk positioning, investment, funding and hedging activities, and repercussions from unanticipated or unknown events.

Table of contents

We also perform regular stress tests and sensitivity analyses on the model inputs that could materially change the resulting risk assessments. Assessments are performed using different shapes of the yield curve, including steepening or flattening of the yield curve, immediate changes in market interest rates, and changes in the relationship of money market interest rates. Assessments are also performed on changes to the following assumptions: loan and deposit balances, the pricing of deposits without contractual maturities, changes in lending spreads, prepayments on loans and securities, investment, funding and hedging activities, and liquidity and capital management strategies.

The results of additional assessments indicate that net interest income could increase or decrease from the base simulation results presented in Figure 22. Net interest income is highly dependent on the timing, magnitude, frequency, and path of interest rate increases and the associated assumptions for deposit repricing relationships, lending spreads, and the balance behavior of transaction accounts. If fixed rate assets increase by \$1 billion, or fixed rate liabilities decrease by \$1 billion, then the benefit to rising rates would decrease by approximately 25 basis points. If the interest-bearing liquid deposit beta assumption increases or decreases by 5% (e.g., 40% to 45%), then the benefit to rising rates would decrease or increase by approximately 85 basis points.

Our current interest rate risk position could fluctuate to higher or lower levels of risk depending on the competitive environment and client behavior that may affect the actual volume, mix, maturity, and repricing characteristics of loan and deposit flows. Corporate Treasury discretionary activities related to funding, investing, and hedging may also change as a result of changes in customer business flows or changes in management's desired interest rate risk positioning. As changes occur to both the configuration of the balance sheet and the outlook for the economy, management proactively evaluates hedging opportunities that may change our interest rate risk profile.

We also conduct simulations that measure the effect of changes in market interest rates in the second and third years of a three-year horizon. These simulations are conducted in a manner similar to those based on a 12-month horizon. To capture longer-term exposures, we calculate exposures to changes of the EVE as discussed in the following section.

Economic value of equity modeling. EVE complements net interest income simulation analysis as it estimates risk exposure beyond 12-, 24-, and 36-month horizons. EVE modeling measures the extent to which the economic values of assets, liabilities and off-balance sheet instruments may change in response to fluctuations in interest rates. EVE is calculated by subjecting the balance sheet to an immediate 200 basis point increase or decrease in interest rates, measuring the resulting change in the values of assets, liabilities, and off-balance sheet instruments, and comparing those amounts with the base case of the current interest rate environment. This analysis is highly dependent upon assumptions applied to assets and liabilities with non-contractual maturities. Those assumptions are based on historical behaviors, as well as our expectations. We develop remediation plans that would maintain residual risk within tolerance if this analysis indicates that our EVE will decrease by more than 15% in response to an immediate increase or decrease in interest rates. We are operating within these guidelines as of March 31, 2019.

Management of interest rate exposure. We use the results of our various interest rate risk analyses to formulate A/LM strategies to achieve the desired risk profile while managing to our objectives for capital adequacy and liquidity risk exposures. Specifically, we manage interest rate risk positions by purchasing securities, issuing term debt with floating or fixed interest rates, and using derivatives. We predominantly use interest rate swaps and options, which modify the interest rate characteristics of certain assets and liabilities.

Figure 23 shows all swap positions that we hold for A/LM purposes. These positions are used to convert the contractual interest rate index of agreed-upon amounts of assets and liabilities (i.e., notional amounts) to another interest rate index. For example, fixed-rate debt is converted to a floating rate through a “receive fixed/pay variable” interest rate swap. The volume, maturity, and mix of portfolio swaps change frequently as we adjust our broader A/LM objectives and the balance sheet positions to be hedged. For more information about how we use interest rate swaps to manage our risk profile, see Note 7 (“Derivatives and Hedging Activities”).

Table of contents**Figure 23. Portfolio Swaps by Interest Rate Risk Management Strategy**

<i>dollars in millions</i>	March 31, 2019				December 31, 2018		
	Notional Amount	Fair Value	Weighted-Average Maturity (Years)	Receive Rate	Pay Rate	Notional Amount	Fair Value
Receive fixed/pay variable — conventional A/LM ^(a)	\$14,620	\$11	2.6	2.2 %	2.5 %	\$10,720	\$(87)
Receive fixed/pay variable — conventional debt	9,877	87	3.4	2.1	2.4	9,923	(7)
Receive fixed/pay variable — forward A/LM	3,050	71	3.6	3.0	2.3	3,050	45
Pay fixed/receive variable — conventional debt	50	(5)	9.3	2.8	3.6	50	(4)
Total portfolio swaps	\$27,597	\$164	3.0	2.3 %	2.5 %	\$23,743	\$(53)
Floors — conventional A/LM ^(b)	\$4,760	—	.5	—	—	\$4,760	—
Floors — forward A/LM ^(b)	300	\$1	2.0	—	—	—	—

(a) Portfolio swaps designated as A/LM are used to manage interest rate risk tied to both assets and liabilities.

(b) Conventional A/LM and forward A/LM floors do not have a stated receive rate or pay rate and are given a strike price on the option.

(c) Excludes accrued interest of \$145 million and \$114 million at March 31, 2019, and December 31, 2018, respectively.

Liquidity risk management

Liquidity risk, which is inherent in the banking industry, is measured by our ability to accommodate liability maturities and deposit withdrawals, meet contractual obligations, and fund new business opportunities at a reasonable cost, in a timely manner, and without adverse consequences. Liquidity management involves maintaining sufficient and diverse sources of funding to accommodate planned, as well as unanticipated, changes in assets and liabilities under both normal and adverse conditions.

Factors affecting liquidity

Our liquidity could be adversely affected by both direct and indirect events. An example of a direct event would be a downgrade in our public credit ratings by a rating agency. Examples of indirect events (events unrelated to us) that could impair our access to liquidity would be an act of terrorism or war, natural disasters, political events, or the default or bankruptcy of a major corporation, mutual fund or hedge fund. Similarly, market speculation, or rumors about us or the banking industry in general, may adversely affect the cost and availability of normal funding sources.

Our credit ratings at March 31, 2019, are shown in Figure 24. We believe these credit ratings, under normal conditions in the capital markets, would enable KeyCorp or KeyBank to issue fixed income securities to investors.

Figure 24. Credit Ratings

Sources of liquidity

Our primary source of funding for KeyBank is retail and commercial deposits. As of March 31, 2019, our consolidated loan-to-deposit ratio was 85%. In addition, we also have access to various sources of wholesale funding, maintain a portfolio of liquid assets, and have borrowing capacity at the FHLB and Federal Reserve Bank of Cleveland. Our liquid asset portfolio at March 31, 2019, totaled \$25.4 billion, consisting of \$22.9 billion of unpledged securities, \$187 million of securities available for secured funding at the FHLB, and \$2.3 billion of net balances of federal funds sold and balances in our Federal Reserve account. Additionally, as of March 31, 2019, our unused borrowing capacity secured by loan collateral was \$26.2 billion at the Federal Reserve Bank of

Table of contents

Cleveland and \$7.3 billion at the FHLB. During the first quarter of 2019, our outstanding FHLB advances decreased as \$2 million of term advances were added.

On February 2, 2019, KeyBank issued \$600 million of 3.300% Senior Bank Notes due February 1, 2022, and \$400 million of Floating Rate Senior Bank Notes due February 1, 2022. On March 13, 2019, KeyBank issued \$350 million of 3.900% Subordinated Bank Notes due April 13, 2029.

Liquidity for KeyCorp

The primary source of liquidity for KeyCorp is from subsidiary dividends, primarily from KeyBank. KeyCorp has sufficient liquidity when it can service its debt, support customary corporate operations and activities (including acquisitions), support occasional guarantees of subsidiaries' obligations in transactions with third parties at a reasonable cost, in a timely manner, and without adverse consequences, and pay dividends to shareholders.

At March 31, 2019, KeyCorp held \$3.3 billion in cash, which we projected to be sufficient to meet our projected obligations, including the repayment of our maturing debt obligations for the periods prescribed by our risk tolerance.

Typically, KeyCorp meets its liquidity requirements through regular dividends from KeyBank. During the first quarter of 2019, KeyBank paid \$525 million in dividends to KeyCorp. As of March 31, 2019, KeyBank had regulatory capacity to pay \$980 million in dividends to KeyCorp without prior regulatory approval.

Our liquidity position and recent activity

Over the past quarter, our liquid asset portfolio, which includes overnight and short-term investments, as well as unencumbered, high quality liquid securities held as protection against a range of potential liquidity stress scenarios, has increased as a result of an increase in unpledged securities. The liquid asset portfolio continues to exceed the amount that we estimate would be necessary to manage through an adverse liquidity event by providing sufficient time to develop and execute a longer-term solution.

The Consolidated Statements of Cash Flows summarize our sources and uses of cash by type of activity for the three-month periods ended March 31, 2019, and March 31, 2018.

For more information regarding liquidity governance structure, factorings affecting liquidity, management of liquidity risk at KeyBank and KeyCorp, long-term liquidity strategies, and other liquidity programs, see "Liquidity Risk Management" beginning on page 71 of our 2018 Form 10-K.

Credit risk management

Credit risk is the risk of loss to us arising from an obligor's inability or failure to meet contractual payment or performance terms. Like other financial services institutions, we make loans, extend credit, purchase securities, add financial and payments products, and enter into financial derivative contracts, all of which have related credit risk.

Credit policy, approval, and evaluation

We manage credit risk exposure through a multifaceted program. The Credit Risk Committee approves management credit policies and recommends for approval significant credit policies to the appropriate Board committee or to the Board. These policies are communicated throughout the organization to foster a consistent approach to granting credit. There have been no significant changes in our Credit Risk Management practices as described under the heading "Credit risk management" beginning on page 74 of our 2018 Form 10-K.

Allowance for loan and lease losses

We estimate the appropriate level of the ALLL on at least a quarterly basis. The methodology used is described in Note 1 ("Summary of Significant Accounting Policies") under the heading "Allowance for Loan and Lease Losses" beginning on page 101 of our 2018 Form 10-K. Briefly, our allowance applies incurred loss rates to existing loans with similar risk characteristics. We exercise judgment to assess any adjustment to the incurred loss rates for the impact of factors such as changes in economic conditions, lending policies including underwriting standards, and

Table of contents

the level of credit risk associated with specific industries and markets. The ALLL at March 31, 2019, represents our best estimate of the incurred credit losses inherent in the loan portfolio at that date. For more information about impaired loans, see Note 4 (“Asset Quality”).

As shown in Figure 25, our ALLL from continuing operations was flat from December 31, 2018. Our commercial ALLL decreased by \$6 million, or .8%, from December 31, 2018, primarily due to favorable credit quality migration, primarily in our criticized loan portfolio. Our consumer ALLL increased by \$6 million, or 4.3%, from December 31, 2018, primarily due to modest shifts in credit quality metrics.

Net loan charge-offs

Figure 26 shows the trend in our net loan charge-offs by loan type, while the composition of loan charge-offs and recoveries by type of loan is presented in Figure 27.

Net loan charge-offs for the three months ended March 31, 2019, increased \$10 million compared to the year-ago quarter. This increase was primarily due to an increase in gross loans charged off in our commercial lease financing portfolio. In 2019, we expect net loan charge-offs to average loans to remain below our long-term targeted range of 40 to 60 basis points.

Table of contentsNonperforming assets

Figure 28 shows the composition of our nonperforming assets. As shown in Figure 28, nonperforming assets at March 31, 2019, increased \$20 million from December 31, 2018. This increase was largely driven by an account that was moved from nonperforming loans to nonperforming assets and an increase in our consumer OREO portfolio. Overall, our credit quality trends remain benign. For a summary of our nonaccrual and charge-off policies, see Note 1 (“Summary of Significant Accounting Policies”) under the headings “Nonperforming Loans,” “Impaired Loans,” and “Allowance for Loan and Lease Losses” beginning on page 100 of our 2018 Form 10-K.

(a) See Figure 10 and the accompanying discussion in the “Loans and loans held for sale” section for more information related to our commercial real estate loan portfolio.

(b) See Figure 9 and the accompanying discussion in the “Loans and loans held for sale” section for more information related to our commercial loan portfolio.

(c) Nonperforming loan balances exclude \$551 million, \$575 million, \$606 million, \$629 million, and \$690 million of PCI loans at March 31, 2019, December 31, 2018, September 30, 2018, June 30, 2018, and March 31, 2018, respectively.

(d) Restructured loans (i.e., TDRs) are those for which Key, for reasons related to a borrower’s financial difficulties, grants a concession to the borrower that it would not otherwise consider. These concessions are made to improve the collectability of the loan and generally take the form of a reduction of the interest rate, extension of the maturity date or reduction in the principal balance.

Figure 29 shows the types of activity that caused the change in our nonperforming loan balance during each of the last five quarters.

Table of contents

Operational and compliance risk management

Like all businesses, we are subject to operational risk, which is the risk of loss resulting from human error or malfeasance, inadequate or failed internal processes and systems, and external events. These events include, among other things, threats to our cybersecurity, as we are reliant upon information systems and the Internet to conduct our business activities. Operational risk also encompasses compliance risk, which is the risk of loss from violations of, or noncompliance with, laws, rules and regulations, prescribed practices, and ethical standards. Under the Dodd-Frank Act, large financial companies like Key are subject to heightened prudential standards and regulation. This heightened level of regulation has increased our operational risk. Resulting operational risk losses and/or additional regulatory compliance costs could take the form of explicit charges, increased operational costs, harm to our reputation, or foregone opportunities.

We seek to mitigate operational risk through identification and measurement of risk, alignment of business strategies with risk appetite and tolerance, and a system of internal controls and reporting. We continuously strive to strengthen our system of internal controls to improve the oversight of our operational risk and to ensure compliance with laws, rules, and regulations. For example, an operational event database tracks the amounts and sources of operational risk and losses. This tracking mechanism helps to identify weaknesses and to highlight the need to take corrective action. We also rely upon software programs designed to assist in assessing operational risk and monitoring our control processes. This technology has enhanced the reporting of the effectiveness of our controls to senior management and the Board.

The Operational Risk Management Program provides the framework for the structure, governance, roles, and responsibilities, as well as the content, to manage operational risk for Key. The Compliance Risk Committee serves the same function in managing compliance risk for Key. The Operational Risk Committee supports the ERM Committee by identifying early warning events and trends, escalating emerging risks, and discussing forward-looking assessments. The Operational Risk Committee includes attendees from each of the Three Lines of Defense. Primary responsibility for managing and monitoring internal control mechanisms lies with the managers of our various lines of business. The Operational Risk Committee and Compliance Risk Committee are senior management committees that oversee our level of operational and compliance risk and direct and support our operational and compliance infrastructure and related activities. These committees and the Operational Risk Management and Compliance functions are an integral part of our ERM Program. Our Risk Review function regularly assesses the overall effectiveness of our Operational Risk Management and Compliance Programs and our system of internal controls. Risk Review reports the results of reviews on internal controls and systems to senior management and the Risk and Audit Committees and independently supports the Risk Committee's oversight of these controls.

Cybersecurity

We maintain comprehensive Cyber Incident Response Plans, and we devote significant time and resources to maintaining and regularly updating our technology systems and processes to protect the security of our computer systems, software, networks, and other technology assets against attempts by third parties to obtain unauthorized access to confidential information, destroy data, disrupt or degrade service, sabotage systems, shut down access to systems for ransom, or cause other damage. We and many other U.S. financial institutions have experienced distributed denial-of-service attacks from technologically sophisticated third parties. These attacks are intended to disrupt or disable online banking services and prevent banking transactions. We also periodically experience other attempts to breach the security of our systems and data. Financial institutions have also been the target of scams that use social engineering to trick employees into wiring funds by making it appear the request is coming from a trusted source. These cyberattacks have not, to date, resulted in any material disruption of our operations or material harm to our

customers, and have not had a material adverse effect on our results of operations.

Cyberattack risks may also occur with our third-party technology service providers and may result in financial loss or liability that could adversely affect our financial condition or results of operations. Cyberattacks could also interfere with third-party providers' ability to fulfill their contractual obligations to us. Recent high-profile cyberattacks have targeted retailers, credit bureaus, and other businesses for the purpose of acquiring the confidential information (including personal, financial, and credit card information) of customers, some of whom are customers of ours. We may incur expenses related to the investigation of such attacks or related to the protection of our customers from identity theft as a result of such attacks. We may also incur expenses to enhance our systems or processes to protect against cyber or other security incidents. Risks and exposures related to cyberattacks are expected to remain high for the foreseeable future due to the rapidly evolving nature and sophistication of these

Table of contents

threats, as well as due to the expanding use of Internet banking, mobile banking, and other technology-based products and services by us and our clients.

As described in more detail starting on page 65 of our 2018 Form 10-K under the heading “Risk Management — Overview,” the Board serves in an oversight capacity ensuring that Key’s risks are managed in a manner that is effective and balanced and adds value for the shareholders. The Board’s Risk Committee has primary oversight for enterprise-wide risk at KeyCorp, including operational risk (which includes cybersecurity). The Risk Committee reviews and provides oversight of management’s activities related to the enterprise-wide risk management framework, including cyber-related risk. The ERM Committee, chaired by the Chief Executive Officer and comprising other senior level executives, is responsible for managing risk (including cyber-related risk) and ensuring that the corporate risk profile is managed in a manner consistent with our risk appetite. The ERM Committee reports to the Board’s Risk Committee.

GAAP to Non-GAAP Reconciliations

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although these non-GAAP financial measures are frequently used by investors to evaluate a company, they have limitations as analytical tools, and should not be considered in isolation, nor as a substitute for analyses of results as reported under GAAP.

The tangible common equity ratio and the return on tangible common equity ratio have been a focus for some investors, and management believes that these ratios may assist investors in analyzing Key’s capital position without regard to the effects of intangible assets and preferred stock. Since analysts and banking regulators may assess our capital adequacy using tangible common equity, we believe it is useful to enable investors to assess our capital adequacy on these same bases.

(a) For the three months ended March 31, 2019, December 31, 2018, September 30, 2018, June 30, 2018, and March 31, 2018, intangible assets exclude \$12 million, \$14 million, \$17 million, \$20 million, and \$23 million, respectively, of period-end purchased credit card receivables.

(b) Net of capital surplus.

(c) For the three months ended March 31, 2019, December 31, 2018, September 30, 2018, June 30, 2018, and March 31, 2018, average intangible assets exclude \$13 million, \$15 million, \$18 million, \$21 million, and \$24 million, respectively, of average purchased credit card receivables

The cash efficiency ratio is a ratio of two non-GAAP performance measures, adjusted noninterest expense and total taxable-equivalent revenue. Accordingly, there is no directly comparable GAAP performance measure. The cash efficiency ratio excludes the impact of our intangible asset amortization from the calculation. We believe this ratio provides greater consistency and comparability between our results and those of our peer banks. Additionally, this ratio is used by analysts and investors to evaluate how effectively management is controlling noninterest expenses in generating revenue, as they develop earnings forecasts and peer bank analysis.

Critical Accounting Policies and Estimates

Our business is dynamic and complex. Consequently, we must exercise judgment in choosing and applying accounting policies and methodologies. These choices are critical – not only are they necessary to comply with GAAP, they also reflect our view of the appropriate way to record and report our overall financial performance. All accounting policies are important, and all policies described in Note 1 (“Summary of Significant Accounting Policies”) beginning on page 99 of our 2018 Form 10-K should be reviewed for a greater understanding of how we record and report our financial performance. Note 1 (“Basis of Presentation and Accounting Policies”) of this report should also be reviewed for more information on accounting standards that have been adopted during the period.

In our opinion, some accounting policies are more likely than others to have a critical effect on our financial results and to expose those results to potentially greater volatility. These policies apply to areas of relatively greater business importance or require us to exercise judgment and to make assumptions and estimates that affect amounts reported in the financial statements. Because these assumptions and estimates are based on current circumstances, they may prove to be inaccurate, or we may find it necessary to change them.

We rely heavily on the use of judgment, assumptions, and estimates to make a number of core decisions, including accounting for the ALLL; contingent liabilities, guarantees and income taxes; derivatives and related hedging activities; and assets and liabilities that involve valuation methodologies. In addition, we may employ outside valuation experts to assist us in determining fair values of certain assets and liabilities. A brief discussion of each of these areas appears on pages 84 through 87 of our 2018 Form 10-K.

During the first three months of 2019, we did not significantly alter the manner in which we applied our critical accounting policies or developed related assumptions and estimates.

Accounting and Reporting Developments**Accounting Guidance Pending Adoption at March 31, 2019**

Standard	Required Adoption	Description	Effect on Financial Statements or Other Significant Matters
ASU 2016-13, <i>Measurement of Credit Losses on Financial Instruments</i>	January 1, 2020 Early adoption is permitted as of January	The ASUs amend ASC Topic 326, <i>Financial Instruments-Credit Losses</i> , and significantly change how entities will measure credit losses for most financial assets and certain other instruments that are not measured at fair value through net income. The standard replaces today’s “incurred loss” approach with an “expected	This new guidance will affect the accounting for our loans, debt securities held to maturity and available for sale, and liabilities for credit losses on unfunded lending related commitments as well as purchased financial assets with a more-than insignificant amount of credit deterioration since origination.

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

ASU 2018-19 <i>Codification Improvements to Topic 326, Financial Instruments—Credit Losses</i>	1, 2019	loss” model for instruments such as loans and held-to-maturity securities that are measured at amortized cost. The standard requires credit losses relating to available-for-sale debt securities to be recorded through an allowance rather than a reduction of the carrying amount. It also changes the accounting for purchased credit-impaired debt securities and loans. The ASUs retain many of the current disclosure requirements in current GAAP and expand certain disclosure requirements.	<p>Key has formed cross-functional implementation working groups comprised of teams throughout Key, including finance, credit, and modeling. The implementation team has completed the development of initial loss forecasting models, including establishment of macroeconomic forecasting methodologies and approaches to meet the requirements of the new guidance. Key will conduct limited parallel runs in the first half of 2019, focusing on finalizing models and challenging model outputs, with plans of running a complete parallel production in the second half of 2019.</p> <p>Key expects that the new guidance will generally result in an increase in its allowance for credit losses for loans, primarily for long-term consumer loans, as it will cover credit losses over the full remaining expected life of loans and commitments and will consider future changes in macroeconomic conditions. Since the magnitude of the anticipated increase in the allowance for credit losses will be impacted by economic conditions and trends in the Company’s portfolio at the time of adoption, the quantitative impact cannot yet be reasonably estimated. While we are still assessing the new standard, the adoption of this guidance is not anticipated to have a material impact on the available-for-sale debt securities or held-to-maturity securities measured at amortized cost.</p>
---	---------	---	---

Table of contents

Standard	Required Adoption	Description	Effect on Financial Statements or Other Significant Matters
ASU 2017-04, <i>Simplifying the Test for Goodwill Impairment</i>	January 1, 2020 Early adoption is permitted	The ASU amends ASC Topic 350, <i>Intangibles - Goodwill and Other</i> and eliminates the second step of the test for goodwill impairment. Under the new guidance, entities will compare the fair value of a reporting unit with its carrying amount. If the carrying amount exceeds the reporting unit's fair value, the entity is required to recognize an impairment charge for this amount. The new method applies to all reporting units and the performance of a qualitative assessment is still allowable.	The adoption of this accounting guidance is not expected to have a material effect on our financial condition or results of operations.
ASU 2018-14, <i>Changes to the Disclosure Requirements for Defined Benefit Plans</i>	January 1, 2020 Early adoption is permitted	The ASU amends the disclosure requirements for sponsors of defined benefit plans. Entities are required to provide new disclosures, including the weighted-average interest crediting rate for cash balance plans and explanations for the significant gains and losses related to changes in the benefit obligation for the period. Certain existing disclosure requirements are eliminated. The guidance should be adopted using a retrospective approach.	The adoption of this standard will not result in significant changes to Key's disclosures, and there will be no effect to our financial condition or results of operations.

European Sovereign and Nonsovereign Debt Exposures

Our total European sovereign and Nonsovereign debt exposure is presented in Figure 30.

(a) Represents our outstanding leases.

(b) Represents contracts to hedge our balance sheet asset and liability needs and to accommodate our clients' trading and/or hedging needs. Our derivative mark-to-market exposures are calculated and reported on a daily basis. These exposures are largely covered by cash or highly marketable securities collateral with daily collateral calls.

Our credit risk exposure is largely concentrated in developed countries with emerging market exposure essentially limited to commercial facilities; these exposures are actively monitored by management. We do not have at-risk exposures in the rest of the world.

Notes to Consolidated Financial Statements (Unaudited)

1. Basis of Presentation and Accounting Policies

The consolidated financial statements include the accounts of KeyCorp and its subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. Some previously reported amounts have been reclassified to conform to current reporting practices.

The consolidated financial statements include any voting rights entities in which we have a controlling financial interest. In accordance with the applicable accounting guidance for consolidations, we consolidate a VIE if we have: (i) a variable interest in the entity; (ii) the power to direct activities of the VIE that most significantly affect the entity's economic performance; and (iii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE (i.e., we are considered to be the primary beneficiary). Variable interests can include equity interests, subordinated debt, derivative contracts, leases, service agreements, guarantees, standby letters of credit, loan commitments, and other contracts, agreements, and financial instruments. See Note 10 ("Variable Interest Entities") for information on our involvement with VIEs.

We use the equity method to account for unconsolidated investments in voting rights entities or VIEs if we have significant influence over the entity's operating and financing decisions (usually defined as a voting or economic interest of 20% to 50%, but not controlling). Unconsolidated investments in voting rights entities or VIEs in which we have a voting or economic interest of less than 20% are carried at the cost measurement alternative or at fair value. Investments held by our registered broker-dealer and investment company subsidiaries (principal investing entities and Real Estate Capital line of business) are carried at fair value.

We believe that the unaudited consolidated interim financial statements reflect all adjustments of a normal recurring nature and disclosures that are necessary for a fair presentation of the results for the interim periods presented. The results of operations for the interim period are not necessarily indicative of the results of operations to be expected for the full year. The interim financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in our 2018 Form 10-K.

In preparing these financial statements, subsequent events were evaluated through the time the financial statements were issued. Financial statements are considered issued when they are widely distributed to all shareholders and other financial statement users or filed with the SEC.

Table of contents**Accounting Guidance Adopted in 2019**

Standard	Date of Adoption	Description	Effect on Financial Statements or Other Significant Matters
ASU 2016-02, <i>Leases (Topic 842)</i>			Key adopted this guidance on January 1, 2019, using the package of practical expedients, which allowed Key to maintain historic lease identification and classification, and permitted Key not to reassess initial direct costs under the new guidance. Key also elected the practical expedient on not separating lease components from nonlease components for all of its leases.
ASU 2018-01, <i>Leases (Topic 842): Land Easement Practical Expedient</i>		The ASUs create and amend ASC Topic 842, <i>Leases</i> , and supersede Topic 840, <i>Leases</i> . The new guidance requires that a lessee recognize assets and liabilities for leases with lease terms of more than 12 months. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. Leveraged leases that commenced before the effective date of the new guidance are grandfathered. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. However, both types of leases are required to be recognized on the balance sheet. ASC 842 requires enhanced disclosures to better understand the amount, timing, and uncertainty of cash flows arising from leases. Qualitative and quantitative disclosures are required to provide additional information about the amounts recorded in the financial statements. Although substantially unchanged, certain amendments provide clarifications related to lessor accounting.	Adoption resulted in an increase in right-of-use assets and associated lease liabilities arising from operating leases in which Key is the lessee of approximately \$710 million on our Consolidated Balance Sheets at January 1, 2019. Right of use assets, lease liabilities, and other changes as a result of adoption are not reflected in comparable periods presented prior to that date. The adoption of this guidance did not have a material impact on the recognition of operating lease expense in our Consolidated Statements of Income. The amount of the right-of-use assets and associated lease liabilities recorded at adoption was based on the present value of unpaid future minimum lease payments. These payments were discounted using Key's incremental borrowing rate, consistent with what Key would pay to borrow on a collateralized basis over a term similar to each lease.
ASU 2018-10, <i>Codification Improvements to Topic 842</i>			
ASU 2018-11, <i>Leases (Topic 842): Targeted Improvements</i>	January 1, 2019		
ASU 2018-20, <i>Leases (Topic 842): Narrow Scope Improvements for Lessors</i>		The guidance should be implemented using a modified retrospective approach. However, entities may choose to measure and present the changes at the beginning of the earliest period presented or to reflect the changes as of the adoption date.	
ASU 2019-01, <i>Codification Improvements to Topic 842</i>			For more information, please see Note 9 ("Leases").
ASU 2017-08, <i>Premium Amortization on Purchased Callable Debt Securities</i>	January 1, 2019	The ASU amends ASC Topic 310-20, <i>Receivables — Nonrefundable Fees and Other Costs</i> , and shortens the amortization period to the earliest call date for certain callable debt securities held at a premium. Securities held at a discount will continue to be amortized to maturity. The guidance should be implemented on a modified retrospective basis using a cumulative-effect adjustment.	The adoption of this guidance did not have a material effect on our financial condition or results of operations.
ASU 2018-07, <i>Stock Compensation - Improvements to Nonemployee Share-Based Payment Accounting</i>	January 1, 2019	The ASU amends ASC Topic 718, <i>Stock Compensation</i> , and simplifies the accounting for share based payments granted to nonemployees for goods and services. The guidance should be implemented on a modified retrospective basis using a cumulative-effect adjustment.	The adoption of this guidance did not affect our financial condition or results of operations.
ASU 2018-13, <i>Fair Value Measurement: Disclosure Framework</i>	September 30, 2018 (removed disclosures only); January 1, 2019, remaining requirements	The ASU amends disclosure requirements related to fair value measurements. Specifically, entities are no longer required to disclose transfers between Level 1 and Level 2 of the fair value hierarchy, or qualitatively disclose the valuation process for Level 3 fair value measurements. The updated guidance requires disclosure of the changes in unrealized gains and losses for the period included in Other Comprehensive Income for recurring Level 3 fair value	Key removed the disclosures no longer required by the guidance as of September 30, 2018, and early adopted the additional provisions of the standard in the first quarter of 2019. The adoption of this standard did not result in significant changes to Key's disclosures, and there was no effect to our financial condition or results of operations.

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

An entity is permitted to early adopt any removed or modified disclosures upon issuance of this ASU and delay adoption of the additional disclosures until their effective date.

measurements. Entities also will be required to disclose the range and weighted average used to develop significant unobservable inputs for Level 3 fair value measurements.

The additional provisions of the guidance should be adopted prospectively, while the eliminated requirements should be adopted retrospectively.

Table of contents

Standard	Date of Adoption	Description	Effect on Financial Statements or Other Significant Matters
ASU 2018-15, <i>Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract</i>	January 1, 2019 Early adoption.	The ASU amends ASC Topic 350-40 to align the accounting for costs incurred in a cloud computing arrangement with the guidance on developing internal use software. Specifically, if a cloud computing arrangement is deemed to be a service contract, certain implementation costs are eligible for capitalization. The new guidance prescribes the balance sheet and income statement presentation and cash flow classification for the capitalized costs and related amortization expense. It also requires additional quantitative and qualitative disclosures. The guidance may be adopted prospectively or retrospectively.	Key early adopted this guidance effective January 1, 2019, on a prospective basis. The adoption of this guidance did not have a material effect on our financial condition or results of operations.

2. Earnings Per Common Share

Basic earnings per share is the amount of earnings (adjusted for dividends declared on our preferred stock) available to each Common Share outstanding during the reporting periods. Diluted earnings per share is the amount of earnings available to each Common Share outstanding during the reporting periods adjusted to include the effects of potentially dilutive Common Shares. Potentially dilutive Common Shares include stock options and other stock-based awards. Potentially dilutive Common Shares are excluded from the computation of diluted earnings per share in the periods where the effect would be antidilutive.

Our basic and diluted earnings per Common Share are calculated as follows:

<i>dollars in millions, except per share amounts</i>	Three months ended March 31,	
	2019	2018
EARNINGS		
Income (loss) from continuing operations	\$406	\$ 416
Less: Net income (loss) attributable to noncontrolling interests	—	—
Income (loss) from continuing operations attributable to Key	406	416
Less: Dividends on Preferred Stock	20	14
Income (loss) from continuing operations attributable to Key common shareholders	386	402
Income (loss) from discontinued operations, net of taxes	1	2
Net income (loss) attributable to Key common shareholders	\$387	\$ 404
WEIGHTED-AVERAGE COMMON SHARES		
Weighted-average Common Shares outstanding (000)	1,006,703	1,036,037
Effect of Common Share options and other stock awards	9,787	15,749
Weighted-average Common Shares and potential Common Shares outstanding (000) ^(a)	1,016,507	1,051,786
EARNINGS PER COMMON SHARE		
Income (loss) from continuing operations attributable to Key common shareholders	\$.38	\$.38
Income (loss) from discontinued operations, net of taxes	—	—
Net income (loss) attributable to Key common shareholders ^(b)	.38	.38
Income (loss) from continuing operations attributable to Key common shareholders — assuming dilution	\$.38	\$.38
Income (loss) from discontinued operations, net of taxes — assuming dilution	—	—
Net income (loss) attributable to Key common shareholders — assuming dilution ^(b)	.38	.38

(a) Assumes conversion of Common Share options and other stock awards and/or convertible preferred stock, as applicable.

(b) EPS may not foot due to rounding.

Table of contents**3. Loan Portfolio**

<i>in millions</i>	March 31, 2019	December 31, 2018
Commercial and industrial ^(a)	\$ 46,474	\$ 45,753
Commercial real estate:		
Commercial mortgage	14,344	14,285
Construction	1,420	1,666
Total commercial real estate loans	15,764	15,951
Commercial lease financing ^(b)	4,507	4,606
Total commercial loans	66,745	66,310

Credit cards	1,086	1,144
Consumer indirect loans	3,721	3,634
Total consumer loans	23,433	23,242
Total loans ^(c)	\$ 90,178	\$ 89,552

(a) Loan balances include \$135 million and \$132 million of commercial credit card balances at March 31, 2019, and December 31, 2018, respectively.

Commercial lease financing includes receivables held as collateral for a secured borrowing of \$12 million and \$10 million at March 31, 2019, and December 31, 2018, respectively. Principal

(b) reductions are based on the cash payments received from these related receivables. Additional information pertaining to this secured borrowing is included in Note 19 ("Long-Term Debt") beginning on page 160 of our 2018 Form 10-K.

(c) Total loans exclude loans of \$1.0 billion at March 31, 2019, and \$1.1 billion at December 31, 2018, related to the discontinued operations of the education lending business.

4. Asset Quality

We assess the credit quality of the loan portfolio by monitoring net credit losses, levels of nonperforming assets, delinquencies, and credit quality ratings as defined by management.

Credit Quality Indicators

The prevalent risk characteristic for both commercial and consumer loans is the risk of loss arising from an obligor's inability or failure to meet contractual payment or performance terms. Evaluation of this risk is stratified and monitored by the loan risk rating grades assigned for the commercial loan portfolios and the refreshed FICO score assigned for the consumer loan portfolios. Additional information pertaining to loan grading and scoring is included in Note 5 ("Asset Quality") on page 165 of our 2018 Form 10-K.

Nonperforming and Past Due Loans

Our policies for determining past due loans, placing loans on nonaccrual, applying payments on nonaccrual loans, and resuming accrual of interest for our commercial and consumer loan portfolios are disclosed in Note 1 ("Summary of Significant Accounting Policies") under the heading "Nonperforming Loans" beginning on page 100 of our 2018 Form 10-K.

The following aging analysis of past due and current loans as of March 31, 2019, and December 31, 2018, provides further information regarding Key's credit exposure.

Aging Analysis of Loan Portfolio (a)

in millions	March 31, 2019		30-59 Days Past Due (b)		60-89 Days Past Due (b)		90 and Greater Days Past Due (b)		Non-performing Loans	Total Past Due and Non-performing Loans	Purchased Credit Impaired	Total Loans (c), (d)

Total loans	\$88,011	\$ 218	\$ 94	\$ 112	\$ 542	\$ 966	\$ 575	\$89,552

(a) Amounts in table represent recorded investment and exclude loans held for sale. Recorded investment represents the face amount of the loan increased or decreased by applicable accrued interest, net deferred loan fees and costs, and unamortized premium or discount, and reflects direct charge-offs.

(b) Past due loan amounts exclude PCI, even if contractually past due (or if we do not expect to collect principal or interest in full based on the original contractual terms), as we are currently accruing income over the remaining term of the loans.

(c) Net of unearned income, net deferred loan fees and costs, and unamortized discounts and premiums.

(d) Future accretable yield related to purchased credit impaired loans is not included in the analysis of the loan portfolio.

At March 31, 2019, the approximate carrying amount of our commercial nonperforming loans outstanding represented 79% of their original contractual amount owed, total nonperforming loans outstanding represented 82% of their original contractual amount owed, and nonperforming assets in total were carried at 86% of their original contractual amount owed.

Nonperforming loans and loans held for sale reduced expected interest income by \$8 million for the three months ended March 31, 2019, and \$7 million for the three months ended March 31, 2018.

Table of contents

The following tables set forth a further breakdown of individually impaired loans as of March 31, 2019, and December 31, 2018:

<i>in millions</i>	March 31, 2019			December 31, 2018

Consumer direct loans	4	4	

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

Credit cards	3	3
Consumer indirect loans	36	35
Total consumer loans	219	211
Total	\$448	\$376

(a) The Recorded Investment represents the face amount of the loan increased or decreased by applicable accrued interest, net deferred loan fees and costs, and unamortized premium or discount, and reflects direct charge-offs. This amount is a component of total loans on our Consolidated Balance Sheet.

For the three months ended March 31, 2019, and March 31, 2018, interest income recognized on the outstanding balances of accruing impaired loans totaled \$3 million and \$2 million, respectively.

TDRs

We classify loan modifications as TDRs when a borrower is experiencing financial difficulties and we have granted a concession without commensurate financial, structural, or legal consideration. Additional information pertaining to TDRs is included in Note 5 (“Asset Quality”) on page 117 of our 2018 Form 10-K.

As TDRs are individually evaluated for impairment under the specific reserve methodology, subsequent defaults do not generally have a significant additional impact on the ALLL. Commitments outstanding to lend additional funds to

Table of contents

borrowers whose loan terms have been modified in TDRs were \$4 million and \$5 million at March 31, 2019, and December 31, 2018, respectively.

At March 31, 2019, and December 31, 2018, the recorded investment of consumer residential mortgage loans in the process of foreclosure was approximately \$96 million and \$113 million, respectively. At March 31, 2019, and December 31, 2018, we had \$40 million and \$35 million, respectively, of OREO which included the carrying value of foreclosed residential real estate of approximately \$39 million and \$35 million, respectively.

The following table shows the post-modification outstanding recorded investment by concession type for our commercial and consumer accruing and nonaccruing TDRs that occurred during the periods indicated:

	Three Months Ended March 31, 2019		2018

^(a) All TDRs that were restructured prior to January 1, 2019, and January 1, 2018, and are fully accruing.

Commercial loan TDRs are considered defaulted when principal and interest payments are 90 days past due. Consumer loan TDRs are considered defaulted when principal and interest payments are more than 60 days past due. During the three months ended March 31, 2019, there were no commercial loan TDRs and 74 consumer loan TDRs with a combined recorded investment of \$2 million that experienced payment defaults after modifications resulting in TDR status during 2018. During the three months ended March 31, 2018, there were no commercial loan TDRs and 41 consumer loan TDRs with a combined recorded investment of \$1 million that experienced payment defaults after modifications resulting in TDR status during 2017.

ALLL and Liability for Credit Losses on Unfunded Lending-Related Commitments

We determine the appropriate level of the ALLL on at least a quarterly basis. The methodology is described in Note 1 (“Summary of Significant Accounting Policies”) under the heading “Allowance for Loan and Lease Losses” beginning on page 101 of our 2018 Form 10-K.

The ALLL on the acquired non-impaired loan portfolio is estimated using the same methodology as the originated portfolio, however, the estimated ALLL is compared to the remaining accretable yield to determine if an ALLL must be recorded. For PCI loans, Key estimates cash flows expected to be collected quarterly. Decreases in expected cash flows are recognized as impairment through a provision for loan and lease losses and an increase in the ALLL.

The ALLL at March 31, 2019, represents our best estimate of the incurred credit losses inherent in the loan portfolio at that date. The changes in the ALLL by loan category for the periods indicated are as follows:

58

Table of contents**Three months ended March 31, 2019:**

Discontinued operations	2	12	—	1,073	(a) 23	1,050	(a) —
Total ALLL — including discontinued operations	\$21	\$ 871	\$ 5	\$90,625	\$ 470	\$ 89,580	\$ 575

(a) Amount includes \$2 million of loans carried at fair value that are excluded from ALLL consideration.

The liability for credit losses inherent in unfunded lending-related commitments, such as letters of credit and unfunded loan commitments, is included in “accrued expense and other liabilities” on the balance sheet. We establish the amount of this reserve by considering both historical trends and current market conditions quarterly, or more often if deemed necessary.

Changes in the liability for credit losses on unfunded lending-related commitments are summarized as follows:

<i>in millions</i>	Three months ended March 31, 2019 2018	
Balance at beginning of period	\$64	\$ 57
Provision (credit) for losses on lending-related commitments	(2)3
Balance at end of period	\$62	\$ 60

Table of contents**PCI Loans**

Purchased loans that have evidence of deterioration in credit quality since origination and for which it is probable, at acquisition, that all contractually required payments will not be collected are deemed PCI. Our policies for determining, recording payments on, and derecognizing PCI loans are disclosed in Note 1 (“Summary of Significant Accounting Policies”) under the heading “Purchased Loans” beginning on page 105 of our 2018 Form 10-K.

We have PCI loans from two separate acquisitions, one in 2012 and one in 2016. The following tables present the roll-forward of the accretible yield and the beginning and ending outstanding unpaid principal balance and carrying amount of all PCI loans for the three months ended March 31, 2019, and the twelve months ended December 31, 2018.

<i>in millions</i>	Three Months Ended March 31, 2019		
	Accretible Yield	Carrying Amount	Outstanding Unpaid Principal Balance
Balance at beginning of period	\$ 117	\$ 571	\$ 607
Accretion	(10)		
Net reclassifications from nonaccretible to accretible	13		
Payments received, net	(2)		
Balance at end of period	\$ 118	\$ 547	\$ 578

<i>in millions</i>	Twelve Months Ended December 31, 2018		
	Accretible Yield	Carrying Amount	Outstanding Unpaid Principal Balance
Balance at beginning of period	\$ 131	\$ 738	\$ 803
Accretion	(42)		
Net reclassifications from nonaccretible to accretible	50		
Payments received, net	(21)		
Loans charged off	(1)		
Balance at end of period	\$ 117	\$ 571	\$ 607

5. Fair Value Measurements

In accordance with GAAP, Key measures certain assets and liabilities at fair value. Fair value is defined as the price to sell an asset or transfer a liability in an orderly transaction between market participants in our principal market. Additional information regarding our accounting policies for determining fair value is provided in Note 6 (“Fair Value Measurements”) and Note 1 (“Summary of Significant Accounting Policies”) under the heading “Fair Value Measurements” of our 2018 Form 10-K.

Table of contents**Assets and Liabilities Measured at Fair Value on a Recurring Basis**

Certain assets and liabilities are measured at fair value on a recurring basis in accordance with GAAP. The following tables present these assets and liabilities at March 31, 2019, and December 31, 2018.

<i>in millions</i>	March 31, 2019				December 31, 2018

(a) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the consolidated balance sheet.

Netting adjustments represent the amounts recorded to convert our derivative assets and liabilities from a gross basis to a net basis in accordance with the applicable accounting guidance. The (b) net basis takes into account the impact of bilateral collateral and master netting agreements that allow us to settle all derivative contracts with a single counterparty on a net basis and to offset the net derivative position with the related cash collateral. Total derivative assets and liabilities include these netting adjustments.

Table of contents

Qualitative Disclosures of Valuation Techniques

The following table describes the valuation techniques and significant inputs used to measure the classes of assets and liabilities reported at fair value on a recurring basis, as well as the classification of each within the valuation hierarchy.

Asset/liability class	Valuation technique	Valuation hierarchy classification(s)
Securities (trading account assets and available for sale)	<p>Fair value of level 1 securities is determined by:</p> <ul style="list-style-type: none"> • Quoted market prices available in an active market for identical securities. This includes exchange-traded equity securities. <p>Fair value of level 2 securities is determined by:</p> <ul style="list-style-type: none"> • Pricing models (either by a third party pricing service or internally). Inputs include: yields, benchmark securities, bids, offers, actual trade data (i.e., spreads, credit ratings, and interest rates) for comparable assets, spread tables, matrices, high-grade scales, and option-adjusted spreads. • Observable market prices of similar securities. <p>Fair value of level 3 securities is determined by:</p> <ul style="list-style-type: none"> • Internal models, principally discounted cash flow models (income approach). • Revenue multiples of comparable public companies (market approach). <p>For level 3 securities, increases (decreases) in the discount rate and marketability discount used in the discounted cash flow models would have resulted in lower (higher) fair value measurements. Higher volatility factors would have further magnified changes in fair value.</p>	Level 1, 2, and 3 (primarily Level 2)
Commercial loans (trading account assets)	<p>The valuations provided by the third-party pricing service are based on observable market inputs, which include benchmark yields, reported trades, issuer spreads, benchmark securities, bids, offers, and reference data obtained from market research publications. Inputs used by the third-party pricing service in valuing CMOs and other mortgage-backed securities also include new issue data, monthly payment information, whole loan collateral performance, and "To Be Announced" prices. In valuations of securities issued by state and political subdivisions, inputs used by the third-party pricing service also include material event notices.</p> <p>Fair value is based on:</p> <ul style="list-style-type: none"> • Observable market price spreads for similar loans. Valuations reflect prices within the bid-ask spread that are most representative of fair value. <p>Direct principal investments consist of equity and debt instruments of private companies made by our principal investing entities. Fair value is determined using:</p> <ul style="list-style-type: none"> • Operating performance and market multiples of comparable businesses • Other unique facts and circumstances related to each individual investment 	Level 2
Principal investments (direct)	<p>Direct principal investments are accounted for as investment companies in accordance with the applicable accounting guidance, whereby each investment is adjusted to fair value with any net realized or unrealized gain/loss recorded in the current period's earnings.</p>	Level 3
Principal investments (indirect)	<p>We are in the process of winding down our direct principal investment portfolio. As of March 31, 2019, the balance is less than \$1 million.</p> <p>Indirect principal investments include primary and secondary investments in private equity funds engaged mainly in venture- and growth-oriented investing. These investments do not have readily determinable fair values and qualify for the practical expedient to estimate fair value based upon net asset value per share (or its equivalent, such as member units or an ownership interest in partners' capital to which a proportionate share of net assets is attributed).</p> <p>Indirect principal investments are also accounted for as investment companies, whereby each investment is adjusted to fair value with any net realized or unrealized gain/loss recorded in the current period's earnings.</p> <p>Under the provisions of the Volcker Rule, we are required to dispose or conform our indirect investments to the requirements of the statute by no later than July 21, 2022. As of March 31, 2019, we have not committed to a plan to sell these investments. Therefore, these investments continue to be valued using the net asset value per share methodology.</p>	NAV

The following table presents the fair value of our direct and indirect principal investments and related unfunded commitments at March 31, 2019, as well as financial support provided for the three months ended March 31, 2019, and March 31, 2018.

Table of contents

	Financial support provided					
	Three months ended March 31,					
	March 31, 2019		2019		2018	
<i>in millions</i>	Fair Value	Unfunded Commitments	Funded Commitments	Unfunded Commitments	Funded Commitments	Funded Commitments
INVESTMENT TYPE						
Direct investments	\$ 1	—	—	\$ 1	—	—
Indirect investments (measured at NAV) ^(a)	\$ 83	\$ 25	\$ 1	—	—	—
Total	\$ 84	\$ 25	1	\$ 1	—	—

(a) Our indirect investments consist of buyout funds, venture capital funds, and fund of funds. These investments are generally not redeemable. Instead, distributions are received through the liquidation of the underlying investments of the fund. An investment in any one of these funds typically can be sold only with the approval of the fund's general partners. At March 31, 2019, no significant liquidation of the underlying investments has been communicated to Key. The purpose of funding our capital commitments to these investments is to allow the funds to make additional follow-on investments and pay fund expenses until the fund dissolves. We, and all other investors in the fund, are obligated to fund the full amount of our respective capital commitments to the fund based on our and their respective ownership percentages, as noted in the applicable Limited Partnership Agreement.

Asset/liability class	Valuation technique	Valuation hierarchy classification(s)
Other direct equity investments	<p>Fair value is determined using:</p> <ul style="list-style-type: none"> Discounted cash flows Operating performance and market/exit multiples of comparable businesses Other unique facts and circumstances related to each individual investment <p>For level 3 securities, increases (decreases) in the discount rate and marketability discount used in the discounted cash flow models would have resulted in lower (higher) fair value measurements. Higher volatility factors would have further magnified changes in fair value. Level 2 investments reflect the price of recent investments, which is deemed representative of fair value.</p>	Level 2 and 3
Other direct and indirect equity investments (NAV)	<p>Certain direct investments do not have readily determinable fair values and qualify for the practical expedient in the accounting guidance that allows us to estimate fair value based upon net asset value per share.</p> <p>Residential mortgage loans held for sale are accounted for at fair value. The election of the fair value option aligns the accounting for these assets with the related forward loan sale commitments. Fair values are based on:</p> <ul style="list-style-type: none"> Quoted market prices, where available Prices for other traded mortgage loans with similar characteristics Purchase commitments and bid information received from market participants <p>Prices are adjusted as necessary to include:</p> <ul style="list-style-type: none"> The embedded servicing value in the loans The specific characteristics of certain loans that are priced based on the pricing of similar loans. <p>(These adjustments represent unobservable inputs to the valuation but are not considered significant given the relative insensitivity of the value to changes in these inputs to the fair value of the loans.)</p> <p>Residential loans held for investment: Certain residential loans held for sale contain salability exceptions that make them unable to be sold into the performing loan sales market. Loans in this category are transferred to the held to maturity loan portfolio and are included in "Loans, net of unearned income" on the balance sheet. This type of loan is classified as level 3 in the valuation hierarchy as transaction details regarding sales of this type of loan are often unavailable.</p> <p>Fair value is based upon:</p> <ul style="list-style-type: none"> Unobservable bid information from brokers and investors <p>Higher (lower) unobservable bid information would have resulted in higher (lower) fair value measurements.</p> <p>Exchange-traded derivatives are valued using quoted prices in active markets and, therefore, are classified as Level 1 instruments.</p>	NAV
Loans held for sale and held for investment (residential)	<p>Residential mortgage loans held for sale are accounted for at fair value. The election of the fair value option aligns the accounting for these assets with the related forward loan sale commitments. Fair values are based on:</p> <ul style="list-style-type: none"> Quoted market prices, where available Prices for other traded mortgage loans with similar characteristics Purchase commitments and bid information received from market participants <p>Prices are adjusted as necessary to include:</p> <ul style="list-style-type: none"> The embedded servicing value in the loans The specific characteristics of certain loans that are priced based on the pricing of similar loans. <p>(These adjustments represent unobservable inputs to the valuation but are not considered significant given the relative insensitivity of the value to changes in these inputs to the fair value of the loans.)</p> <p>Residential loans held for investment: Certain residential loans held for sale contain salability exceptions that make them unable to be sold into the performing loan sales market. Loans in this category are transferred to the held to maturity loan portfolio and are included in "Loans, net of unearned income" on the balance sheet. This type of loan is classified as level 3 in the valuation hierarchy as transaction details regarding sales of this type of loan are often unavailable.</p> <p>Fair value is based upon:</p> <ul style="list-style-type: none"> Unobservable bid information from brokers and investors <p>Higher (lower) unobservable bid information would have resulted in higher (lower) fair value measurements.</p> <p>Exchange-traded derivatives are valued using quoted prices in active markets and, therefore, are classified as Level 1 instruments.</p>	Level 1, 2 and 3 (primarily level 2)
Derivatives	<p>The majority of our derivative positions are level 2 and are valued using internally developed models based on market convention and observable market inputs. These derivative contracts include interest rate swaps, certain options, floors, cross currency swaps, credit default swaps, and forward mortgage loan sale commitments. Significant inputs used in the valuation models include:</p> <ul style="list-style-type: none"> Interest rate curves Yield curves LIBOR and Overnight Index Swap (OIS) discount rates LIBOR and OIS curves, index pricing curves, foreign currency curves Volatility surfaces (a three-dimensional graph of implied volatility against strike price and maturity) 	Level 1, 2, and 3 (primarily level 2)

Table of contents

Asset/liability class	Valuation technique	Valuation hierarchy classification(s)
Derivatives (continued)	<p>We have several customized derivative instruments and risk participations that are classified as Level 3 instruments. These derivative positions are valued using internally developed models, with inputs consisting of available market data, such as:</p> <ul style="list-style-type: none"> • Bond spreads and asset values <p>The unobservable internally derived assumptions include:</p> <ul style="list-style-type: none"> • Loss probabilities • Internal risk ratings of customers <p>The fair value represents an estimate of the amount that the risk participation counterparty would need to pay/receive as of the measurement date based on the probability of customer default on the swap transaction and the fair value of the underlying customer swap. Therefore, higher (lower) loss probabilities and internal risk ratings would have resulted in a lower (higher) fair value measurement of the risk participations. A directionally similar change would have also applied to other customized derivative instruments classified as Level 3.</p>	Level 1, 2, and 3 (primarily level 2)
	<p>We use interest rate lock commitments for our residential mortgage business, which are classified as Level 3 instruments. The significant components of the valuation model include:</p> <ul style="list-style-type: none"> • Interest rates observable in the market • Investor supplied prices for similar securities • The probability of the loan closing (i.e. the "pull-through" amount, a significant unobservable input). Increases (decreases) in the probability of the loan closing would have resulted in higher (lower) fair value measurements. <p>Valuation of residential mortgage forward sale commitments utilizes observable market prices of comparable commitments and mortgage securities (Level 2). This includes fixed income securities held by our broker dealer in its trading inventory. Fair value of level 1 securities is determined by:</p> <ul style="list-style-type: none"> • Quoted market prices available in an active market for identical securities 	
Liability for short positions	<p>Fair value of level 2 securities is determined by:</p> <ul style="list-style-type: none"> • Observable market prices of similar securities • Market activity, spreads, credit ratings and interest rates for each security type 	Level 1 and 2

Changes in Level 3 Fair Value Measurements

The following table shows the components of the change in the fair values of our Level 3 financial instruments for the three months ended March 31, 2019, and March 31, 2018.

- (a) Realized and unrealized gains and losses on principal investments are reported in "other income" on the income statement.
- (b) Amounts represent Level 3 derivative assets less Level 3 derivative liabilities.
- (c) Realized and unrealized gains and losses on derivative instruments are reported in "corporate services income" and "other income" on the income statement.
- (d) Certain derivatives previously classified as Level 2 were transferred to Level 3 because Level 3 unobservable inputs became significant. Certain derivatives previously classified as Level 3 were transferred to Level 2 because Level 3 unobservable inputs became less significant.
- (e) Amounts represent Level 3 interest rate lock commitments.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis in accordance with GAAP. The adjustments to fair value generally result from the application of accounting guidance that requires assets and liabilities to be recorded at the lower of cost or fair value, or assessed for impairment. There were no liabilities measured at fair value on a nonrecurring basis at March 31, 2019, and December 31, 2018.

The following table presents our assets measured at fair value on a nonrecurring basis at March 31, 2019, and December 31, 2018:

<i>in millions</i>	March 31, 2019			December 31, 2018		
	Level 2	Level 3	Total	Level 2	Level 3	Total
ASSETS MEASURED ON A NONRECURRING BASIS						
Impaired loans and leases	\$—	\$ 17	\$ 17	—	\$ 42	\$ 42
Accrued income and other assets	—	2	2	\$—	16	16
Total assets on a nonrecurring basis at fair value	\$—	\$ 19	\$ 19	\$—	\$ 58	\$ 58

Qualitative Disclosures of Valuation Techniques

The following table describes the valuation techniques and significant inputs used to measure the significant classes of assets and liabilities reported at fair value on a nonrecurring basis, as well as the classification of each within the valuation hierarchy.

Asset/liability class	Valuation technique	Valuation hierarchy classification(s)
Impaired loans and leases	Loans are evaluated for impairment on a quarterly basis; impairment typically occurs when there is evidence of a probable loss and the expected value of the loan is less than the contractual value of the loan. The amount of the impairment may be determined based on the estimated present value of future cash flows, the fair value of the underlying collateral (Level 3), or the loan's observable market price based on recent sales of similar loans and collateral (Level 2).	Level 2 and 3

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

Cash flow analysis considers internally developed inputs including:

- Discount rates
- Default rates
- Changes in collateral values and costs of foreclosure
Through a quarterly analysis of our loan portfolios held for sale, which include both performing and nonperforming commercial loans, we determine any adjustments necessary to record the portfolios at the lower of cost or fair value in accordance with GAAP. Valuation inputs include:

Commercial
loans held for
sale

- Non-binding bids for the respective loans or similar loans
- Recent sales transactions
- Internal models that emulate recent securitizations

Level 2 and 3

66

Table of contents

Asset/liability class	Valuation technique	Valuation hierarchy classification(s)
	Valuations of direct financing leases and operating lease assets held for sale are performed using an internal model that relies on market data, including:	
Direct financing leases and operating lease assets held for sale	<ul style="list-style-type: none"> • Swap rates and bond ratings • Our own assumptions about the exit market for the leases • Details about the individual leases in the portfolio Leases for which we receive a current nonbinding bid, and for which the sale is considered probable, may be classified as Level 2. Valuations of lease and operating lease assets held for sale that employ our own assumptions are classified as Level 3 assets. The inputs based on our own assumptions include changes in the value of leased items and internal credit ratings. OREO and other repossessed properties are valued based on:	Level 2 and 3
OREO and other repossessed personal property	<ul style="list-style-type: none"> • Appraisals and third-party price opinions, less estimated selling costs Generally, we classify these assets as Level 3, but OREO and other repossessed properties for which we receive binding purchase agreements are classified as Level 2. Returned lease inventory is valued based on market data for similar assets and is classified as Level 2.	Level 2 and 3
LIHTC, HTC, and NMTC investments	Valuation of LIHTC, HTC and NMTC involves measuring the present value of future tax benefits and comparing that value against the current carrying value of the investment. Expected future tax benefit are discounted to their present value using discounted cash flow modeling that incorporates an appropriate risk premium. LIHTC and HTC investments are impaired when it is more likely than not that the carrying amount of the investment will not be realized. We have other investments in equity securities that do not have readily determinable fair values and do not qualify for the practical expedient to measure the investment using a net asset value per share. We have elected to measure these securities at cost less impairment plus or minus adjustments due to observable orderly transactions.	Level 3
Other equity investments	Impairment is recorded when there is evidence that the expected fair value of the investment has declined to below the recorded cost. At each reporting period, we assess if these investments continue to qualify for this measurement alternative. At March 31, 2019, and December 31, 2018, the carrying amount of equity investments under this method was \$127 million and \$107 million, respectively. No impairment was recorded for the three months ended March 31, 2019.	Level 3
Mortgage Servicing Rights	Refer to Note 8. Mortgage Servicing Assets	Level 3

Quantitative Information about Level 3 Fair Value Measurements

The following table describes the significant unobservable inputs of our level 3 assets and liabilities:

March 31, 2019 <i>dollars in millions</i>	Level 3 Asset (Liability)	Valuation Technique	Significant Unobservable Input	Range (Weighted-Average) ^{(b), (c)}
Recurring				
Securities available-for-sale:

Valuation Methods and Assumptions

- (a) Fair value equals or approximates carrying amount. The fair value of deposits with no stated maturity does not take into consideration the value ascribed to core deposit intangibles.
- (b) Information pertaining to our methodology for measuring the fair values of these assets and liabilities is included in the sections entitled "Qualitative Disclosures of Valuation Techniques" and "Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis" in this Note. Investments accounted for under the cost method (or cost less impairment adjusted for observable price changes for certain equity investments) are classified as Level 3 assets. These investments are not actively traded in an open market as sales for these types of investments are rare. The carrying amount of the investments carried at cost are adjusted for declines in value if they are considered to be other-than-temporary (or due to observable orderly transactions of the same issuer for equity investments eligible for the cost less impairment measurement alternative). These adjustments are included in "other income" on the income statement.
- (c) Fair values of held-to-maturity securities are determined by using models that are based on security-specific details, as well as relevant industry and economic factors. The most significant of these inputs are quoted market prices, interest rate spreads on relevant benchmark securities, and certain prepayment assumptions. We review the valuations derived from the models to ensure that they are reasonable and consistent with the values placed on similar securities traded in the secondary markets.
- (d) The fair value of loans is based on the present value of the expected cash flows. The projected cash flows are based on the contractual terms of the loans, adjusted for prepayments and use of a discount rate based on the relative risk of the cash flows, taking into account the loan type, maturity of the loan, liquidity risk, servicing costs, and a required return on debt and capital. In addition, an incremental liquidity discount is applied to certain loans, using historical sales of loans during periods of similar economic conditions as a benchmark. The fair value of loans includes lease financing receivables at their aggregate carrying amount, which is equivalent to their fair value.
- (e) Fair values of time deposits and long-term debt are based on discounted cash flows utilizing relevant market inputs.
- (f) Netting adjustments represent the amounts recorded to convert our derivative assets and liabilities from a gross basis to a net basis in accordance with the applicable accounting guidance. The net basis takes into account the impact of bilateral collateral and master netting agreements that allow us to settle all derivative contracts with a single counterparty on a net basis and to offset the net derivative position with the related cash collateral. Total derivative assets and liabilities include these netting adjustments.
- (g) Derivative assets-hedging and derivative liabilities-hedging includes both cash flow and fair value hedges. Additional information regarding our accounting policies for cash flow and fair value hedges is provided in Note 1 ("1. Summary of Significant Accounting Policies") under the heading "Derivatives and Hedging" beginning on page 103 of our 2018 Form 10-K.

Education lending business. The discontinued education lending business consists of loans in portfolio recorded at carrying value with appropriate valuation reserves, and loans in portfolio recorded at fair value. All of these loans were excluded from the table above as follows:

- Loans at carrying value, net of allowance, of \$1.0 billion (\$0.8 billion at fair value) at March 31, 2019, and \$1.1 billion (\$0.9 billion at fair value) at December 31, 2018;
- Portfolio loans at fair value of \$2 million at March 31, 2019, and \$2 million at December 31, 2018.

These loans and securities are classified as Level 3 because we rely on unobservable inputs when determining fair value since observable market data is not available.

6. Securities

The amortized cost, unrealized gains and losses, and approximate fair value of our securities available for sale and held-to-maturity securities are presented in the following tables. Gross unrealized gains and losses represent the difference between the amortized cost and the fair value of securities on the balance sheet as of the dates indicated. Accordingly, the amount of these gains and losses may change in the future as market conditions change.

69

Edgar Filing: KEYCORP /NEW/ - Form 10-Q

- (a) At March 31, 2019, gross unrealized losses totaled less than \$1 million for agency residential mortgage-backed securities available for sale and less than \$1 million for all held-to-maturity securities with a loss duration of less than 12 months.
- (b) At December 31, 2018, gross unrealized losses totaled less than \$1 million for agency residential mortgage-backed securities available for sale with a loss duration of less than 12 months and less than \$1 million for agency commercial mortgage-backed securities held-to-maturity with a loss duration of less than 12 months.

At March 31, 2019, we had \$242 million of gross unrealized losses related to 403 fixed-rate agency residential CMOs that we invested in as part of our overall A/LM strategy. These securities had a weighted-average maturity of 4.21 years at March 31, 2019. At March 31, 2019, we also had \$22 million of gross unrealized losses related to 240 agency residential mortgage-backed securities positions and \$108 million of gross unrealized losses related to 14 agency commercial mortgage backed securities positions with weighted-average maturities of 3.94 years and 4.06 years, respectively. Because these securities have a fixed interest rate, their fair value is sensitive to movements in market interest rates. These unrealized losses are considered temporary since we expect to collect all contractually due amounts from these securities. Accordingly, these investments were reduced to their fair value through OCI, not through earnings.

Table of contents

We regularly assess our securities portfolio for OTTI. The assessments are based on the nature of the securities, the underlying collateral, the financial condition of the issuer, the extent and duration of the loss, our intent related to the individual securities, and the likelihood that we will have to sell securities prior to expected recovery. We did not have any impairment losses recognized in earnings for the three months ended March 31, 2019.

At March 31, 2019, securities available for sale and held-to-maturity securities totaling \$9.0 billion were pledged to secure securities sold under repurchase agreements, to secure public and trust deposits, to facilitate access to secured funding, and for other purposes required or permitted by law.

The following table shows our securities by remaining maturity. CMOs and other mortgage-backed securities in the available for sale portfolio and held-to-maturity portfolio are presented based on their expected average lives. The remaining securities, in both the available-for-sale and held-to-maturity portfolios, are presented based on their remaining contractual maturity. Actual maturities may differ from expected or contractual maturities since borrowers have the right to prepay obligations with or without prepayment penalties.

March 31, 2019	Securities Available for Sale		Held to Maturity Securities	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
<i>in millions</i>				
Due in one year or less	\$271	\$276	\$52	\$52
Due after one through five years	15,750	15,510	6,791	6,647
Due after five through ten years	5,071	5,057	4,391	4,298
Due after ten years	10	11	—	—
Total	\$21,102	\$20,854	\$11,234	\$10,997

7. Derivatives and Hedging Activities

We are a party to various derivative instruments, mainly through our subsidiary, KeyBank. The primary derivatives that we use are interest rate swaps, caps, floors, and futures; foreign exchange contracts; commodity derivatives; and credit derivatives. Generally, these instruments help us manage exposure to interest rate risk, mitigate the credit risk inherent in our loan portfolio, hedge against changes in foreign currency exchange rates, and meet client financing and hedging needs.

At March 31, 2019, after taking into account the effects of bilateral collateral and master netting agreements, we had \$37 million of derivative assets and \$5 million of derivative liabilities that relate to contracts entered into for hedging purposes. As of the same date, after taking into account the effects of bilateral collateral and master netting agreements and a reserve for potential future losses, we had derivative assets of \$489 million and derivative liabilities of \$198 million that were not designated as hedging instruments. These positions are primarily comprised of derivative contracts entered into for client accommodation purposes.

Additional information regarding our accounting policies for derivatives is provided in Note 1 (“Summary of Significant Accounting Policies”) under the heading “Derivatives and Hedging” beginning on page 103 of our 2018 Form 10-K. Our derivative strategies and related risk management objectives are described in Note 8 (“Derivatives and Hedging Activities”) beginning on page 132 of our 2018 Form 10-K.

Fair Values, Volume of Activity, and Gain/Loss Information Related to Derivative Instruments

The following table summarizes the fair values of our derivative instruments on a gross and net basis as of March 31, 2019, and December 31, 2018. The derivative asset and liability balances are presented on a gross basis, prior to the application of bilateral collateral and master netting agreements, but after the variation margin payments with central clearing organizations have been applied as settlement, as applicable. Total derivative assets and liabilities are adjusted to take into account the impact of legally enforceable master netting agreements that allow us to settle all derivative contracts with a single counterparty on a net basis and to offset the net derivative position with the related cash collateral. Securities collateral related to legally enforceable master netting agreements is not offset on the balance sheet. Our derivative instruments are included in “accrued income and other assets” or “accrued expenses and other liabilities” on the balance sheet, as follows:

<i>in millions</i>	March 31, 2019			December 31, 2018		
	Fair Value			Fair Value		
	Notional Amount	Derivative Assets	Derivative Liabilities	Notional Amount	Derivative Assets	Derivative Liabilities
Derivatives designated as hedging instruments:						
Interest rate	\$ 32,840	\$ 24	\$ 10	\$ 28,546	\$ 50	\$ (10)
Foreign exchange	122	—	—	122	2	—
Total	32,962	24	10	28,668	52	(10)
Derivatives not designated as hedging instruments:						
Interest rate	65,136	505	227	63,454	365	307
Foreign exchange	5,664	76	68	6,829	104	95
Commodity	6,622	233	223	2,002	333	323
Credit	415	1	3	226	1	1
Other ^(a)	3,266	11	8	1,466	9	7
Total	81,103	826	529	73,977	812	733
Netting adjustments ^(b)	—	(324)	(336)	—	(333)	(337)
Net derivatives in the balance sheet	114,065	526	203	102,645	531	386
Other collateral ^(c)	—	(2)	(46)	—	(2)	(33)
Net derivative amounts	\$ 114,065	\$ 524	\$ 157	\$ 102,645	\$ 529	\$ 353

(a) Other derivatives include interest rate lock commitments and forward sale commitments related to our residential mortgage banking activities, forward purchase and sales contracts consisting of contractual commitments associated with "to be announced" securities and when-issued securities, and other customized derivative contracts.
 (b) Netting adjustments represent the amounts recorded to convert our derivative assets and liabilities from a gross basis to a net basis in accordance with the applicable accounting guidance.
 (c) Other collateral represents the amount that cannot be used to offset our derivative assets and liabilities from a gross basis to a net basis in accordance with the applicable accounting guidance. The other collateral consists of securities and is exchanged under bilateral collateral and master netting agreements that allow us to offset the net derivative position with the related collateral. The application of the other collateral cannot reduce the net derivative position below zero. Therefore, excess other collateral, if any, is not reflected above.

Fair value hedges. During the three-month period ended March 31, 2019, we did not exclude any portion of fair value hedging instruments from the assessment of hedge effectiveness.

The following tables summarize the amounts that were recorded on the balance sheet as of March 31, 2019, and December 31, 2018, related to cumulative basis adjustments for fair value hedges.

March 31, 2019		CarryingHedge amount accounting of basis hedged adjustment item ^(a) ^(b)	
<i>in millions</i>	Balance sheet line item in which the hedge item is included		
Interest rate contracts	Long-term debt	\$ 9,400	\$ 87
Interest rate contracts	Certificate of deposit (\$100,000 or more)	340	—
Interest rate contracts	Other time deposits	176	—

December 31, 2018		CarryingHedge amount accounting of basis hedged adjustment item ^(a) ^(b)	
	Balance sheet line item in which the hedge item is included		
Interest rate contracts	Long-term debt	\$ 9,363	\$ (6)
Interest rate contracts	Certificate of deposit (\$100,000 or more)	343	(1)
Interest rate contracts	Other time deposits	178	—

(a) The carrying amount represents the portion of the liability designated as the hedged item.

(b) Basis adjustments related to de-designated hedged items that no longer qualify as fair value hedges reduced the hedge accounting basis adjustment by \$10 million and \$10 million at March 31, 2019, and December 31, 2018, respectively,

Cash flow hedges. During the three-month period ended March 31, 2019, we did not exclude any portion of cash flow hedging instruments from the assessment of hedge effectiveness.

Considering the interest rates, yield curves, and notional amounts as of March 31, 2019, we expect to reclassify an estimated \$22 million of after-tax net gains on derivative instruments designated as cash flow hedges from AOCI to income during the next 12 months. In addition, we expect to reclassify approximately \$17 million of net losses related to terminated cash flow hedges from AOCI to income during the next 12 months. As of March 31, 2019, the maximum length of time over which we hedge forecasted transactions is 10 years.

The following tables summarize the effect of fair value and cash flow hedge accounting on the income statement for the three-month periods ended March 31, 2019, and March 31, 2018.

Table of contents

<i>in millions</i>	Location and amount of net gains (losses) recognized in income on fair value and cash flow hedging relationships (a)			
	Interest expense - long-term debt	Interest income - loans	Interest expense - deposits	Other income

Net income (expense) recognized on cash flow hedges	\$ (1)	\$ (2)	—	—

(a) Prior period gain or loss amounts were not restated to conform to the new hedge accounting guidance adopted in 2018.

Net investment hedges. We enter into foreign currency forward contracts to hedge our exposure to changes in the carrying value of our investments as a result of changes in the related foreign exchange rates. At March 31, 2019, AOCI reflected unrecognized, after-tax gains totaling \$26 million related to cumulative changes in the fair value of our net investment hedges, which offset the unrecognized, after-tax foreign currency losses on net investment balances. We did not exclude any portion of our hedging instruments from the assessment of hedge effectiveness during the three-month period ended March 31, 2019.

The following tables summarize the pre-tax net gains (losses) on our cash flow and net investment hedges for the three-month periods ended March 31, 2019, and March 31, 2018, and where they are recorded on the income statement. The table includes net gains (losses) recognized in OCI during the period and net gains (losses) reclassified from OCI into income during the current period.

<i>in millions</i>	Net Gains (Losses) Recognized in OCI	Income Statement Location of Net Gains (Losses) Reclassified From OCI Into Income	Net Gains (Losses) Reclassified From OCI Into Income	Net Gains (Losses) Recognized in Other Income

Counterparty Credit Risk

We hold collateral in the form of cash and highly rated securities issued by the U.S. Treasury, government-sponsored enterprises, or GNMA. Cash collateral of \$68 million was netted against derivative assets on the balance sheet at March 31, 2019, compared to \$33 million of cash collateral netted against derivative assets at December 31, 2018. The cash collateral netted against derivative liabilities totaled \$80 million at March 31, 2019, and \$37 million at December 31, 2018. Our means of mitigating and managing exposure to credit risk on derivative contracts is described in Note 8 (“Derivatives and Hedging Activities”) beginning on page 136 of our 2018 Form 10-K under the heading “Counterparty Credit Risk.”

The following table summarizes the fair value of our derivative assets by type at the dates indicated. These assets represent our gross exposure to potential loss after taking into account the effects of bilateral collateral and master netting agreements and other means used to mitigate risk.

<i>in millions</i>	March 31, 2019	December 31, 2018
Interest rate	\$ 438	\$ 308
Foreign exchange	49	60
Commodity	96	187
Credit	—	—
Other	11	9
Derivative assets before collateral	594	564
Less: Related collateral	68	33
Total derivative assets	\$ 526	\$ 531

We enter into derivative transactions with two primary groups: broker-dealers and banks, and clients. Given that these groups have different economic characteristics, we have different methods for managing counterparty credit exposure and credit risk.

We enter into transactions with broker-dealers and banks for various risk management purposes. At March 31, 2019, we had gross exposure of \$244 million to broker-dealers and banks. We had net exposure

of \$87 million after the application of master netting agreements and cash collateral, where such qualifying agreements exist. We had net exposure of \$83 million after considering \$4 million of additional collateral held in the form of securities.

We enter into transactions with clients to accommodate their business needs. Due to the smaller size and magnitude of the individual contracts with clients, we generally do not exchange collateral in connection with these derivative transactions. To address the risk of default associated with the uncollateralized contracts, we have established a credit valuation adjustment (included in "accrued income and other assets") in the amount of \$5 million at March 31, 2019, which we estimate to be the potential future losses on amounts due from client counterparties in the event of default. At March 31, 2019, we had gross exposure of \$490 million to client counterparties and other entities that are not broker-dealers or banks for derivatives that have associated master netting agreements. We had net exposure of \$439 million on our derivatives with these counterparties after the application of master netting agreements, collateral, and the related reserve.

Table of contents**Credit Derivatives**

We are a buyer and, under limited circumstances, may be a seller of credit protection through the credit derivative market. We purchase credit derivatives to manage the credit risk associated with specific commercial lending and swap obligations as well as exposures to debt securities. Our credit derivative portfolio was in a net liability position of \$2 million as of March 31, 2019, and \$1 million as of December 31, 2018. Our credit derivative portfolio consists of single-name credit default swaps, traded credit default swap indices, and risk participation agreements. Additional descriptions of our credit derivatives are provided in Note 8 (“Derivatives and Hedging Activities”) beginning on page 137 of our 2018 Form 10-K under the heading “Credit Derivatives.”

The following table provides information on the types of credit derivatives sold by us and held on the balance sheet at March 31, 2019, and December 31, 2018. The sold credit derivatives represented in the following table include only Risk Participation Agreements; there were no traded indexes sold. The notional amount represents the maximum amount that the seller could be required to pay. The payment/performance risk assessment at March 31, 2019, is based on the internal probability of default of the reference entity consistent with our Fair Value Methodology. The payment/performance risk shown in the table represents a weighted-average of the default probabilities for all reference entities. These default probabilities are directly correlated to the probability that we will have to make a payment under the credit derivative contracts.

<i>dollars in millions</i>	March 31, 2019			December 31, 2018		
	Notional Amount	Average Term (Years)	Payment / Performance Risk	Notional Amount	Average Term (Years)	Payment / Performance Risk
Other	\$64	14.06	2.98 %	\$22	13.43	17.18 %
Total credit derivatives sold	\$64	—	—	\$22	—	—

Credit Risk Contingent Features

We have entered into certain derivative contracts that require us to post collateral to the counterparties when these contracts are in a net liability position. The amount of collateral to be posted is based on the amount of the net liability and thresholds generally related to our long-term senior unsecured credit ratings with Moody’s and S&P. Collateral requirements also are based on minimum transfer amounts, which are specific to each Credit Support Annex (a component of the ISDA Master Agreement) that we have signed with the counterparties. In a limited number of instances, counterparties have the right to terminate their ISDA Master Agreements with us if our ratings fall below a certain level, usually investment-grade level (i.e., “Baa3” for Moody’s and “BBB-” for S&P). As of March 31, 2019, KeyBank’s rating was “A3” with Moody’s and “A-” with S&P, and KeyCorp’s rating was “Baa1” with Moody’s and “BBB+” with S&P. As of March 31, 2019, the aggregate fair value of all derivative contracts with credit risk contingent features (i.e., those containing collateral posting or termination provisions based on our ratings) held by KeyBank that were in a net liability position totaled \$78 million, which was comprised of \$70 million in derivative assets and \$148 million in derivative liabilities. We had \$6 million in cash and securities collateral posted to cover those positions as of March 31, 2019. There were no derivative contracts with credit risk contingent features held by KeyCorp at March 31, 2019.

The following table summarizes the additional cash and securities collateral that KeyBank would have been required to deliver under the ISDA Master Agreements had the credit risk contingent features been triggered for the derivative contracts in a net liability position as of March 31, 2019, and December 31,

2018. The additional collateral amounts were calculated based on scenarios under which KeyBank’s ratings are downgraded one, two, or three ratings as of March 31, 2019, and December 31, 2018, and take into account all collateral already posted. A similar calculation was performed for KeyCorp, and no additional collateral would have been required as of March 31, 2019, and December 31, 2018. For more information about the credit ratings for KeyBank and KeyCorp, see the discussion under the heading “Factors affecting liquidity” in the section entitled “Liquidity risk management” in Item 2 of this report.

<i>in millions</i>	March 31, December 31,			
	2019		2018	
	Moody	S&P	Moody	S&P
KeyBank’s long-term senior unsecured credit ratings	A3	A-	A3	A-
One rating downgrade	\$ 2	\$ 2	\$ 2	\$ 2
Two rating downgrades	2	2	2	2
Three rating downgrades	2	2	2	2

Table of contents

KeyBank's long-term senior unsecured credit rating was four ratings above noninvestment grade at Moody's and S&P as of March 31, 2019, and December 31, 2018. If KeyBank's ratings had been downgraded below investment grade as of March 31, 2019, or December 31, 2018, payments of less than \$1 million and \$4 million, respectively, would have been required to either terminate the contracts or post additional collateral for those contracts in a net liability position, taking into account all collateral already posted. If KeyCorp's ratings had been downgraded below investment grade as of March 31, 2019, or December 31, 2018, no payments would have been required to either terminate the contracts or post additional collateral for those contracts in a net liability position, taking into account all collateral already posted.

8. Mortgage Servicing Assets

We originate and periodically sell commercial and residential mortgage loans but continue to service those loans for the buyers. We also may purchase the right to service commercial mortgage loans for other lenders. We record a servicing asset if we purchase or retain the right to service loans in exchange for servicing fees that exceed the going market servicing rate and are considered more than adequate compensation for servicing. Additional information pertaining to the accounting for mortgage and other servicing assets is included in Note 1 ("Summary of Significant Accounting Policies") under the heading "Servicing Assets" beginning on page 106 of our 2018 Form 10-K.

Commercial

Changes in the carrying amount of commercial mortgage servicing assets are summarized as follows:

<i>in millions</i>	Three months ended	
	March 31, 2019	March 31, 2018
Balance at beginning of period	\$502	\$412
Servicing retained from loan sales	18	27
Purchases	6	21
Amortization	(29)	(25)
Balance at end of period	\$497	\$435
Fair value at end of period	\$727	\$537

The fair value of commercial mortgage servicing assets is determined by calculating the present value of future cash flows associated with servicing the loans. This calculation uses a number of assumptions that are based on current market conditions. The range and weighted average of the significant unobservable inputs used to determine the fair value of our commercial mortgage servicing assets at March 31, 2019, and March 31, 2018, along with the valuation techniques, are shown in the following table:

<i>dollars in millions</i>		March 31, 2019	March 31, 2018
Valuation Technique	Significant Unobservable Input	Range (Weighted Average)	
Discounted cash flow	Expected defaults	1.00 - 2.00% (1.14%)	1.00 - 3.00% (1.18%)
	Residual cash flows discount rate	7.00 - 15.00% (9.19%)	7.00 - 15.00% (8.99%)
	Escrow earn rate	2.22 - 3.70% (2.98%)	2.17 - 3.45% (2.84%)
	Loan assumption rate	0.00 - 3.18% (1.39%)	

0.00 - 2.84%
(1.18%)

If these economic assumptions change or prove incorrect, the fair value of commercial mortgage servicing assets may also change. Expected credit losses, escrow earning rates, and discount rates are critical to the valuation of commercial mortgage servicing assets. Estimates of these assumptions are based on how a market participant would view the respective rates, and reflect historical data associated with the commercial mortgage loans, industry trends, and other considerations. Actual rates may differ from those estimated due to changes in a variety of economic factors. A decrease in the value assigned to the escrow earning rates would cause a decrease in the fair value of our commercial mortgage servicing assets. An increase in the assumed default rates of commercial mortgage loans or an increase in the assigned discount rates would cause a decrease in the fair value of our commercial mortgage servicing assets. Prepayment activity on commercial serviced loans does not significantly affect the valuation of our commercial mortgage servicing assets. Unlike residential mortgages, commercial mortgages experience significantly lower prepayments due to certain contractual restrictions affecting the borrower's ability to prepay the mortgage.

Table of contents

The amortization of commercial servicing assets is determined in proportion to, and over the period of, the estimated net servicing income. The amortization of commercial servicing assets for each period, as shown in the table at the beginning of this note, is recorded as a reduction to contractual fee income. The contractual fee income from servicing commercial mortgage loans totaled \$46 million for the three-month period ended March 31, 2019, and \$42 million for the three-month period ended March 31, 2018. This fee income was offset by \$29 million of amortization for the three-month period ended March 31, 2019, and \$25 million for the three-month period ended March 31, 2018. Both the contractual fee income and the amortization are recorded, net, in “mortgage servicing fees” on the income statement.

Residential

Changes in the carrying amount of residential mortgage servicing assets are summarized as follows:

<i>in millions</i>	Three months ended March 31, 2019 2018	
Balance at beginning of period	\$37	\$31
Servicing retained from loan sales	2	2
Purchases	—	—
Amortization	(1)	(1)
Balance at end of period	\$38	\$32
Fair value at end of period	\$50	\$42

The fair value of mortgage servicing assets is determined by calculating the present value of future cash flows associated with servicing the loans. This calculation uses a number of assumptions that are based on current market conditions. The range and weighted-average of the significant unobservable inputs used to fair value our mortgage servicing assets at March 31, 2019, and March 31, 2018, along with the valuation techniques, are shown in the following table:

<i>dollars in millions</i>		March 31, 2019	March 31, 2018
Valuation Technique	Significant Unobservable Input	Range (Weighted Average)	
Discounted cash flow	Prepayment speed	9.32 - 58.76% (9.93%)	8.37 - 48.63% (9.12%)
	Discount rate	7.50 - 10.00% (7.54%)	8.50 - 11.00% (8.54%)
	Servicing cost	\$62 - \$4,375 (\$68.23)	\$76 - \$4,385 (\$83.05)

If these economic assumptions change or prove incorrect, the fair value of residential mortgage servicing assets may also change. Prepayment speed, discount rates, and servicing cost are critical to the valuation of servicing assets. Estimates of these assumptions are based on how a market participant would view the respective rates, and reflect historical data associated with the loans, industry trends, and other considerations. Actual rates may differ from those estimated due to changes in a variety of economic factors. An increase in the prepayment speed, assigned discount rates, and servicing cost assumptions would also cause a negative impact on the fair value of our residential mortgage servicing assets.

The amortization of residential servicing assets is determined in proportion to, and over the period of, the estimated net residential servicing income. The amortization of servicing assets for March 31, 2019, as

shown in the table above, is recorded as a reduction to contractual fee income. The contractual fee income from servicing residential mortgage loans totaled \$4 million for the three-month period ended March 31, 2019, and \$3 million for the three-month period ended March 31, 2018. This fee income was offset by \$1 million of amortization for both the three-month periods ended March 31, 2019, and March 31, 2018. Both the contractual fee income and the amortization are recorded, net, in “mortgage servicing fees” on the income statement.

9. Leases

As a lessee, we enter into leases of land, buildings and equipment. Our real estate leases primarily relate to bank branches and office space. The leases of equipment principally relate to technology assets for data processing and data storage. As a lessor, we primarily provide financing through our equipment leasing business.

Table of contents**Lessee**

Our leases are classified as either operating or financing and have remaining terms ranging from 1 to 20 years with the exception of certain ground leases that have terms over 30 years. Leases with an initial term of less than 1 year are not recorded on the balance sheet. The related expense is recognized on a straight-line basis over the lease term. For leases with initial terms greater than one year, right-of-use assets are reported on the balance sheet.

Certain leases contain options to extend the lease term for up to five years. Most leases also give us the option to terminate at our discretion. Leases with variable payments are primarily based on adjustments for inflation over the term of the lease based on a contractually defined index. Certain ATM leases include variable payments based on volume of transactions.

Operating lease expense is recognized in "net occupancy" and "equipment" on the statement of income. The components of lease expense are summarized as follows:

Three months ended March 31,

<i>in millions</i>	2019 (a), (b)
Operating lease cost	\$ 34
Variable lease cost	5
Total lease cost	\$ 39

(a) The amortization of right-of-use assets and interest on lease liabilities for finance leases were each less than \$1 million for the three months ended March 31, 2019.

(b) Short-term lease cost was less than less than \$1 million for the three months ended March 31, 2019.

Cash flows related to leases are summarized as follows:

Three months ended March 31,

<i>in millions</i>	2019 (a), (b)
Cash paid for amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	\$ 36
Right-of-use assets obtained in exchange for lease obligations:	
Operating leases	\$ 28

(a) Operating and financing cash flows from finance leases were each less than \$1 million for the three months ended March 31, 2019.

(b) There were no right-of-use assets obtained in exchange for finance lease obligations for the three months ended March 31, 2019.

Additional balance sheet information related to leases is summarized as follows:

March 31,

<i>in millions</i>	Balance sheet classification	2019
Operating lease assets	Accrued income and other assets	\$ 694
Operating lease liabilities	Accrued expense and other liabilities	787
Finance leases:		
Property and equipment, gross	Premises and equipment	28
Accumulated depreciation	Premises and equipment	(16)
Property and equipment, net		12
Finance lease liabilities	Long-term debt	15

Information pertaining to the lease term and weighted-average discount rate is summarized as follows:

March 31,	2019	
Weighted-average remaining lease term:		
Operating leases	7.9 years	
Finance leases	7.6 years	
Weighted-average discount rate:		
Operating leases	3.28	%
Finance leases	4.12	%

Table of contents

Maturities of lease liabilities are summarized as follows:

<i>in millions</i>	Operating Leases	Finance Leases	Total
2019	\$ 108	\$ 2	\$ 110
2020	139	3	142
2021	123	3	126
2022	108	3	111
2023	93	2	95
Thereafter	332	5	337
Total lease payments	903	18	921
Less imputed interest	116	3	119
Total	\$ 787	\$ 15	\$ 802

Lessor Equipment Leasing

Leases may have fixed or floating rate terms. Variable payments are based on an index or other specified rate and are included in rental payments. Certain leases contain an option to extend the lease term or the option to terminate at the discretion of the lessee. Under certain conditions, lease agreements may also contain the option for a lessee to purchase the underlying asset.

Interest income from sales-type and direct financing leases is recognized in "interest income — loans" on the statement of income. Income related to operating leases is recognized in "operating lease income and other leasing gains" on the statement of income. The components of equipment leasing income are summarized in the table below:

<i>in millions</i>	2019
Three months ended March 31,	
<i>in millions</i>	
Sales-type and direct financing leases	
Interest income on lease receivable	\$ 30
Interest income related to accretion of unguaranteed residual asset	3
Interest income on deferred fees and costs	—
Total sales-type and direct financing lease income	33
Operating leases	
Operating lease income related to lease payments	33
Other operating leasing gains	4
Total operating lease income and other leasing gains	37
Total lease income	\$ 70

Equipment leasing receivables relate to sales-type and direct financing leases. The composition of the net investment in sales-type and direct financing leases is as follows:

<i>in millions</i>	March 31, 2019
Lease receivables	\$ 3,597
Unearned income	(346)
Unguaranteed residual value	428
Deferred fees and costs	17
Net investment in sales-type and direct financing leases	\$ 3,696

The residual value component of a lease represents the fair value of the leased asset at the end of the lease term. We rely on industry data, historical experience, independent appraisals and the experience of the equipment leasing asset management team to value lease residuals. Relationships with a number of equipment vendors give the asset management team insight into the life cycle of the leased equipment, pending product upgrades and competing products. The carrying amount of residual assets covered by residual value guarantees was \$269 million at March 31, 2019.

Table of contents

At March 31, 2019, minimum future lease payments to be received for sales-type and direct financing leases are as follows:

<i>in millions</i>	Sales-type and direct financing lease payments
2019	\$ 843
2020	928
2021	659
2022	435
2023	269
Thereafter	463
Total lease payments	3,597

At March 31, 2019, minimum future lease payments to be received for operating leases are as follows:

<i>in millions</i>	Operating lease payments
2019	\$ 97
2020	121
2021	103
2022	87
2023	73
Thereafter	217
Total lease payments	\$ 698

The carrying amount of operating lease assets at March 31, 2019, was \$961 million.

10. Variable Interest Entities

Our significant VIEs are summarized below. Additional information pertaining to the criteria used in determining if an entity is a VIE is included in Note 12 ("Variable Interest Entities") beginning on page 142 of our 2018 Form 10-K.

LIHTC investments. We had \$1.4 billion and \$1.4 billion of investments in LIHTC operating partnerships at March 31, 2019, and December 31, 2018, respectively. These investments are recorded in "accrued income and other assets" on our balance sheet. We do not have any loss reserves recorded related to these investments because we believe the likelihood of any loss to be remote. For all legally binding, unfunded equity commitments, we increase our recognized investment and recognize a liability. As of March 31, 2019, and December 31, 2018, we had liabilities of \$499 million and \$532 million, respectively, related to investments in qualified affordable housing projects, which are recorded in "accrued expenses and other liabilities" on our balance sheet. We continue to invest in these LIHTC operating partnerships.

The assets and liabilities presented in the table below convey the size of KCDC's direct and indirect investments at March 31, 2019, and December 31, 2018. As these investments represent unconsolidated

VIEs, the assets and liabilities of the investments themselves are not recorded on our balance sheet. Additional information pertaining to our LIHTC investments is included in Note 12 (“Variable Interest Entities”) beginning on page 142 of our 2018 Form 10-K.

<i>in millions</i>	Unconsolidated VIEs		
	Total Assets	Total Liabilities	Maximum Exposure to Loss
March 31, 2019			
LIHTC investments	\$5,948	\$ 2,568	\$ 1,715
December 31, 2018			
LIHTC investments	\$5,932	\$ 2,569	\$ 1,740

We amortize our LIHTC investments over the period that we expect to receive the tax benefits. During the first three months of 2019, we recognized \$46 million of amortization and \$45 million of tax credits associated with these investments within “income taxes” on our income statement. During the first three months of 2018, we recognized \$41 million of amortization and \$40 million of tax credits associated with these investments within “income taxes” on our income statement.

Table of contents

Principal investments. Our maximum exposure to loss associated with indirect principal investments consists of the investments' fair value plus any unfunded equity commitments. The fair value of our indirect principal investments totaled \$83 million and \$96 million at March 31, 2019, and December 31, 2018, respectively. These investments are recorded in "other investments" on our balance sheet. The table below reflects the size of the private equity funds in which we were invested as well as our maximum exposure to loss in connection with these investments at March 31, 2019, and December 31, 2018.

<i>in millions</i>	Unconsolidated VIEs		
	Total Assets	Total Liabilities	Maximum Exposure to Loss
March 31, 2019			
Indirect investments	\$ 16,285	\$ 299	\$ 108
December 31, 2018			
Indirect investments	\$ 19,659	\$ 376	\$ 122

Through our principal investing entities, we have formed and funded operating entities that provide management and other related services to our investment company funds, which directly invest in portfolio companies. These entities had no assets at March 31, 2019, and December 31, 2018 that can only be used to settle the entities' obligations. The entities had no liabilities at March 31, 2019, and December 31, 2018, and other equity investors have no recourse to our general credit.

Additional information on our indirect and direct principal investments is provided in Note 5 ("Fair Value Measurements") and in Note 12 ("Variable Interest Entities") beginning on page 142 of our 2018 Form 10-K.

Other unconsolidated VIEs. We are involved with other various entities in the normal course of business which we have determined to be VIEs. We have determined that we are not the primary beneficiary of these VIEs because we do not have the power to direct the activities that most significantly impact their economic performance. Our assets associated with these unconsolidated VIEs totaled \$269 million at March 31, 2019, and \$248 million at December 31, 2018. These assets are recorded in "accrued income and other assets," "other investments," "securities available for sale," and "loans, net of unearned income" on our balance sheet. We had liabilities totaling \$2 million and \$2 million associated with these unconsolidated VIEs at March 31, 2019, and December 31, 2018, respectively. Additional information pertaining to our other unconsolidated VIEs is included in Note 12 ("Variable Interest Entities") under the heading "Other unconsolidated VIEs on page 142 of our 2018 Form 10-K.

11. Income Taxes

Income Tax Provision

In accordance with the applicable accounting guidance, the principal method established for computing the provision for income taxes in interim periods requires us to make our best estimate of the effective tax rate expected to be applicable for the full year. This estimated effective tax rate is then applied to interim consolidated pre-tax operating income to determine the interim provision for income taxes.

The effective tax rate, which is the provision for income taxes as a percentage of income before income taxes, was 17.0% for the first quarter of 2019 and 12.9% for the first quarter of 2018. The effective tax rates are less than our combined federal and state statutory tax rate of 23.7%, primarily due to income from investments in tax-advantaged assets such as corporate-owned life insurance and credits associated with renewable energy and low-income housing investments. The effective tax rates for the three months ended

March 31, 2019, and March 31, 2018, were affected by a net discrete income tax benefit of .9% and 5.5%, respectively.

Deferred Tax Asset

At March 31, 2019, we had a net deferred tax asset of \$24 million, compared to a net deferred tax asset of \$222 million at December 31, 2018, included in “accrued income and other assets” on the balance sheet.

To determine the amount of deferred tax assets that are more likely than not to be realized, and therefore recorded, we conduct a quarterly assessment of all available evidence. This evidence includes, but is not limited to, taxable income in prior periods, projected future taxable income, and projected future reversals of deferred tax items. These

Table of contents

assessments involve a degree of subjectivity and may undergo change. Based on these criteria, we had a valuation allowance of \$11 million at March 31, 2019, and \$11 million at December 31, 2018. The valuation allowance is associated with certain state net operating loss carryforwards, state credit carryforwards, and federal and state capital loss carryforwards.

Unrecognized Tax Benefits

As permitted under the applicable accounting guidance for income taxes, it is our policy to recognize interest and penalties related to unrecognized tax benefits in "income tax expense." As of March 31, 2019, Key's unrecognized tax benefits were \$36 million.

Pre-1988 Bank Reserves Acquired in a Business Combination

Retained earnings of KeyBank included approximately \$92 million of allocated bad debt deductions for which no income taxes have been recorded. Under current federal law, these reserves are subject to recapture into taxable income if KeyBank, or any successor, fails to maintain its bank status under the Internal Revenue Code or makes non-dividend distributions or distributions greater than its accumulated earnings and profits. No deferred tax liability has been established as these events are not expected to occur in the foreseeable future.

12. Acquisitions, Divestiture, and Discontinued Operations

Acquisitions

Laurel Road Digital Lending Business. On January 16, 2019, we announced that KeyBank entered into a definitive agreement with Laurel Road Bank to acquire Laurel Road's digital lending business. Laurel Road's three bank branches located in southeast Connecticut are not part of this transaction. Through the acquisition, KeyBank expects to enhance its digital capabilities with state-of-the-art, customer-centric technology and to leverage Laurel Road's proven ability to attract and serve professional millennial clients. The acquisition, which will be accounted for as a business combination, closed on April 3, 2019. Accordingly, we will begin consolidating Laurel Road's financial results in our consolidated financial statements in the second quarter of 2019.

Divestiture

Key Insurance & Benefits Services, Inc. On March 29, 2018, we announced that we had entered into a definitive agreement to sell KIBS to USI Insurance Services. We acquired KIBS as a part of the 2016 merger with First Niagara. We completed the sale to USI Insurance Services on May 4, 2018. At the close of the sale, we recognized a \$73 million net gain on sale. In the third quarter of 2018, we recognized an additional \$5 million gain upon the finalization of the purchase price.

Discontinued operations

Discontinued operations primarily includes our government-guaranteed education lending business. At March 31, 2019, and December 31, 2018, approximately \$1.0 billion and \$1.1 billion, respectively, of education loans are included in discontinued assets on the consolidated balance sheets. Net interest income after provision for credit losses for this business is not material and is included in income (loss) from discontinued operations, net of taxes on the consolidated statements of income.

Table of contents**13. Securities Financing Activities**

We enter into repurchase agreements to finance overnight customer sweep deposits. We also enter into repurchase and reverse repurchase agreements to settle other securities obligations. We account for these securities financing agreements as collateralized financing transactions. Repurchase and reverse repurchase agreements are recorded on the balance sheet at the amounts for which the securities will be subsequently sold or repurchased. Securities borrowed transactions are recorded on the balance sheet at the amounts of cash collateral advanced. While our securities financing agreements incorporate a right of set off, the assets and liabilities are reported on a gross basis. Reverse repurchase agreements and securities borrowed transactions are included in “short-term investments” on the balance sheet; repurchase agreements are included in “federal funds purchased and securities sold under repurchase agreements.” Additional information regarding our securities financing activities, including risk management activities, is provided in Note 16 (“Securities Financing Activities”) beginning on page 148 of our 2018 Form 10-K.

The following table summarizes our securities financing agreements at March 31, 2019, and December 31, 2018:

<i>in millions</i>	March 31, 2019				December 31, 2018			
	Gross Amount Presented in Balance Sheet	Netting Adjustments (a)	Collateral (b)	Net Amounts	Gross Amount Presented in Balance Sheet	Netting Adjustments (a)	Collateral (b)	Net Amounts
Offsetting of financial assets:								
Reverse repurchase agreements	\$ 12	\$ (5)	\$ (7)	—	\$ 14	\$ (14)	—	—
Total	\$ 12	\$ (5)	\$ (7)	—	\$ 14	\$ (14)	—	—
Offsetting of financial liabilities:								
Repurchase agreements ^(c)	\$ 266	\$ (5)	\$ (261)	—	\$ 319	\$ (14)	\$ (305)	—
Total	\$ 266	\$ (5)	\$ (261)	—	\$ 319	\$ (14)	\$ (305)	—

(a) Netting adjustments take into account the impact of master netting agreements that allow us to settle with a single counterparty on a net basis.

(b) These adjustments take into account the impact of bilateral collateral agreements that allow us to offset the net positions with the related collateral. The application of collateral cannot reduce the net position below zero. Therefore, excess collateral, if any, is not reflected above.

(c) Repurchase agreements are collateralized by mortgaged-backed agency securities and are contracted on an overnight or continuous basis.

As of March 31, 2019, the carrying amount of assets pledged as collateral against repurchase agreements totaled \$370 million. Assets pledged as collateral are reported in “securities available for sale” and “held-to-maturity securities” on our balance sheet. As of March 31, 2019, the liabilities associated with collateral pledged were solely comprised of customer sweep financing activity and had a carrying value of \$261 million. The collateral pledged under customer sweep repurchase agreements is posted to a third-party custodian and cannot be sold or repledged by the secured party. The risk related to a decline in the market value of collateral pledged is minimal given the collateral's high credit quality and the overnight duration of the repurchase agreements.

14. Employee Benefits**Pension Plans**

The components of net pension cost (benefit) for all funded and unfunded plans are recorded in “other expense” and are summarized in the following table. For more information on our Pension Plans and Other Postretirement Benefit Plans, see Note 17 (“Employee Benefits”) beginning on page 151 of our 2018 Form 10-K.

<i>in millions</i>	Three months ended March 31, 2019 2018	
Interest cost on PBO	\$11	\$10
Expected return on plan assets	(12)	(13)
Amortization of losses	4	4
Net pension cost	\$3	\$1

15. Trust Preferred Securities Issued by Unconsolidated Subsidiaries

We own the outstanding common stock of business trusts formed by us that issued corporation-obligated, mandatorily redeemable, trust preferred securities. The trusts used the proceeds from the issuance of their trust preferred securities and common stock to buy debentures issued by KeyCorp. These debentures are the trusts' only

Table of contents

assets; the interest payments from the debentures finance the distributions paid on the mandatorily redeemable trust preferred securities. The outstanding common stock of these business trusts is recorded in "other investments" on our balance sheet.

We unconditionally guarantee the following payments or distributions on behalf of the trusts:

required distributions on the trust preferred securities;
the redemption price when a capital security is redeemed; and
the amounts due if a trust is liquidated or terminated.

The Regulatory Capital Rules, discussed in "Supervision and regulation" in Item 2 of this report, require us to treat our mandatorily redeemable trust preferred securities as Tier 2 capital.

The trust preferred securities, common stock, and related debentures are summarized as follows:

<i>dollars in millions</i>	Trust Preferred Securities, Net of Discount (a)	Common Stock	Principal Amount of Debentures, Net of Discount (b)	Interest Rate of Trust Preferred Securities and Debentures (c)	Maturity of Trust Preferred Securities and Debentures
March 31, 2019					
KeyCorp Capital I	\$ 156	\$ 6	\$ 162	3.537 %	2028
KeyCorp Capital II	102	4	106	6.875	2029
KeyCorp Capital III	134	4	138	7.750	2029
HNC Statutory Trust III	19	1	20	4.051	2035
Willow Grove Statutory Trust I	18	1	19	3.921	2036
HNC Statutory Trust IV	16	1	17	4.031	2037
Westbank Capital Trust II	7	—	7	4.823	2034
Westbank Capital Trust III	7	—	7	4.823	2034
Total	\$ 459	\$ 17	\$ 476	5.604 %	—
December 31, 2018	\$ 454	\$ 17	\$ 471	5.447 %	—

The trust preferred securities must be redeemed when the related debentures mature, or earlier if provided in the governing indenture. Each issue of trust preferred securities carries an interest (a) rate identical to that of the related debenture. Certain trust preferred securities include basis adjustments related to fair value hedges totaling \$51 million at March 31, 2019, and \$46 million at

December 31, 2018. See Note 7 ("Derivatives and Hedging Activities") for an explanation of fair value hedges.

We have the right to redeem these debentures. If the debentures purchased by KeyCorp Capital I, HNC Statutory Trust III, Willow Grove Statutory Trust I, HNC Statutory Trust IV, Westbank Capital Trust II, or Westbank Capital Trust III are redeemed before they mature, the redemption price will be the principal amount, plus any accrued but unpaid interest. If the debentures purchased by KeyCorp Capital II or KeyCorp Capital III are redeemed before they mature, the redemption price will be the greater of: (i) the principal amount, plus any accrued but unpaid interest, or (ii) the sum of the present values of principal and interest payments discounted at the Treasury Rate (as defined in the applicable indenture), plus 20 basis points for KeyCorp Capital (b) II or 25 basis points for KeyCorp Capital III, or 50 basis points in the case of redemption upon either a tax or a capital treatment event for either KeyCorp Capital II or KeyCorp Capital III, plus any accrued but unpaid interest. The principal amount of certain debentures includes basis adjustments related to fair value hedges totaling \$51 million at March 31, 2019, and \$46 million at

December 31, 2018. See Note 7 ("Derivatives and Hedging Activities") for an explanation of fair value hedges. The principal amount of debentures, net of discounts, is included in "long-term debt" on the balance sheet.

The interest rates for the trust preferred securities issued by KeyCorp Capital II and KeyCorp Capital III are fixed. The trust preferred securities issued by KeyCorp Capital I have a floating interest rate, equal to three-month LIBOR plus 74 basis points, that reprices quarterly. The trust preferred securities issued by HNC Statutory Trust III have a floating interest rate, equal to three-month LIBOR plus 140 basis points, that reprices quarterly. The trust preferred securities issued by Willow Grove Statutory Trust I have a floating interest rate, equal to three-month LIBOR (c) plus 131 basis points, that reprices quarterly. The trust preferred securities issued by HNC Statutory Trust IV have a floating interest rate, equal to three-month LIBOR plus 128 basis points, that reprices quarterly. The trust preferred securities issued by Westbank Capital Trust II and Westbank Capital Trust III each have a floating interest rate, equal to three-month LIBOR plus 219 basis points, that reprices quarterly. The total interest rates are weighted-average rates.

16. Contingent Liabilities and Guarantees

Legal Proceedings

Litigation. From time to time, in the ordinary course of business, we and our subsidiaries are subject to various litigation, investigations, and administrative proceedings. Private, civil litigations may range from individual actions involving a single plaintiff to putative class action lawsuits with potentially thousands of

class members. Investigations may involve both formal and informal proceedings, by both government agencies and self-regulatory bodies. These matters may involve claims for substantial monetary relief. At times, these matters may present novel claims or legal theories. Due to the complex nature of these various other matters, it may be years before some matters are resolved. While it is impossible to ascertain the ultimate resolution or range of financial liability, based on information presently known to us, we do not believe there is any matter to which we are a party, or involving any of our properties that, individually or in the aggregate, would reasonably be expected to have a material adverse effect on our financial condition. We continually monitor and reassess the potential materiality of these litigation matters. We note, however, that in light of the inherent uncertainty in legal proceedings there can be no assurance that the ultimate resolution will not exceed established reserves. As a result, the outcome of a particular matter, or a combination of matters, may be material to our results of operations for a particular period, depending upon the size of the loss or our income for that particular period.

Table of contents**Guarantees**

We are a guarantor in various agreements with third parties. The following table shows the types of guarantees that we had outstanding at March 31, 2019. Information pertaining to the basis for determining the liabilities recorded in connection with these guarantees is included in Note 1 (“Summary of Significant Accounting Policies”) under the heading “Guarantees” beginning on page 106 of our 2018 Form 10-K.

March 31, 2019 <i>in millions</i>	Maximum Potential Undiscounted Future Payments	Liability Recorded
Financial guarantees:		
Standby letters of credit	\$ 3,112	\$ 76
Recourse agreement with FNMA	4,185	6
Residential mortgage reserve	1,576	6
Written put options ^(a)	3,065	46
Total	\$ 11,938	\$ 134

(a) The maximum potential undiscounted future payments represent notional amounts of derivatives qualifying as guarantees.

We determine the payment/performance risk associated with each type of guarantee described below based on the probability that we could be required to make the maximum potential undiscounted future payments shown in the preceding table. We use a scale of low (0% to 30% probability of payment), moderate (greater than 30% to 70% probability of payment), or high (greater than 70% probability of payment) to assess the payment/performance risk, and have determined that the payment/performance risk associated with each type of guarantee outstanding at March 31, 2019, is low. Information pertaining to the nature of each of the guarantees listed below is included in Note 21 (“Commitments, Contingent Liabilities, and Guarantees”) under the heading “Guarantees” beginning on page 163 of our 2018 Form 10-K.

Standby letters of credit. At March 31, 2019, our standby letters of credit had a remaining weighted-average life of two years, with remaining actual lives ranging from less than one year to as many as 16 years.

Recourse agreement with FNMA. At March 31, 2019, the outstanding commercial mortgage loans in this program had a weighted-average remaining term of 7.8 years, and the unpaid principal balance outstanding of loans sold by us as a participant was \$14.5 billion. The maximum potential amount of undiscounted future payments that we could be required to make under this program, as shown in the preceding table, is equal to approximately 29% of the principal balance of loans outstanding at March 31, 2019.

Residential Mortgage Banking. At March 31, 2019, the outstanding residential mortgage loans in this program had a weighted-average LTV ratio of 74%, and the unpaid principal balance outstanding of loans sold by us was \$5.3 billion. The risk assessment is low for the residential mortgage product. The maximum potential amount of undiscounted future payments that we could be required to make under this program, as shown in the preceding table, is equal to approximately 30% of the principal balance of loans outstanding at March 31, 2019.

Our liability for estimated repurchase obligations on loans sold, which is included in other liabilities on our balance sheet, was \$6 million at March 31, 2019. For more information on our residential mortgages, see Note 8 (“Mortgage Servicing Assets”).

Written put options. At March 31, 2019, our written put options had an average life of three years. These written put options are accounted for as derivatives at fair value, as further discussed in Note 7 (“Derivatives and Hedging Activities”).

Written put options where the counterparty is a broker-dealer or bank are accounted for as derivatives at fair value but are not considered guarantees since these counterparties typically do not hold the underlying instruments. In addition, we are a purchaser and seller of credit derivatives, which are further discussed in Note 7 (“Derivatives and Hedging Activities”).

Other Off-Balance Sheet Risk

Other off-balance sheet risk stems from financial instruments that do not meet the definition of a guarantee as specified in the applicable accounting guidance, and from other relationships. Additional information pertaining to types other off-balance sheet risk is included in Note 21 (“Commitments, Contingent Liabilities, and Guarantees”) under the heading “Other Off-Balance Sheet Risk” on page 165 of our 2018 Form 10-K.

Table of contents**17. Accumulated Other Comprehensive Income**

Our changes in AOCI for the three months ended March 31, 2019, and March 31, 2018, are as follows:

<i>in millions</i>	Unrealized gains (losses) on securities available for sale	Unrealized gains (losses) on derivative financial instruments	Foreign currency translation adjustment	Net pension and postretirement benefit costs	Total
Balance at December 31, 2018	\$ (373)	\$ (50)	\$ (14)	\$ (381)	\$ (818)
Other comprehensive income before reclassification, net of income taxes	184	80	3	(1)	266
Amounts reclassified from AOCI, net of income taxes ^(a)	—	19	—	3	22
Net current-period other comprehensive income, net of income taxes	184	99	3	2	288
Balance at March 31, 2019	\$ (189)	\$ 49	\$ (11)	\$ (379)	\$ (530)
Balance at December 31, 2017	\$ (311)	\$ (86)	\$ 9	\$ (391)	\$ (779)
Other comprehensive income before reclassification, net of income taxes	(150)	(65)	(2)	—	(217)
Amounts reclassified from AOCI, net of income taxes ^(a)	—	2	—	3	5
Net current-period other comprehensive income, net of income taxes	(150)	(63)	(2)	3	(212)
Balance at March 31, 2018	\$ (461)	\$ (149)	\$ 7	\$ (388)	\$ (991)

(a) See table below for details about these reclassifications.

Our reclassifications out of AOCI for the three months ended March 31, 2019, and March 31, 2018, are as follows:

<i>in millions</i>	Three months ended March 31, 2019	Three months ended March 31, 2018	Affected Line Item in the Statement Where Net Income is Presented
Unrealized gains (losses) on derivative financial instruments			
Interest rate	\$(24)	\$(2)	Interest income — Loans
Interest rate	(1)	(1)	Interest expense — Long-term debt
	(25)	(3)	Income (loss) from continuing operations before income taxes
	(6)	(1)	Income taxes
	\$(19)	\$(2)	Income (loss) from continuing operations
Net pension and postretirement benefit costs			
Amortization of losses	\$(4)	\$(4)	Personnel expense
	(4)	(4)	Income (loss) from continuing operations before income taxes
	(1)	(1)	Income taxes
	\$(3)	\$(3)	Income (loss) from continuing operations

18. Shareholders' Equity**Comprehensive Capital Plan**

As previously reported and as authorized by the Board and pursuant to our 2018 capital plan (which is effective through the second quarter of 2019) submitted and not objected to by the Federal Reserve, we have authority to repurchase up to \$1.225 billion of our Common Shares. We completed \$199 million of Common Share repurchases, including \$167 million of Common Share repurchases in the open market

and \$32 million of Common Share repurchases related to employee equity compensation programs, in the first quarter of 2019 under this authorization.

Consistent with our 2018 capital plan, the Board declared a quarterly dividend of \$.17 per Common Share for the first quarter of 2019.

On April 18, 2019, we announced our 2019 capital plan. Share repurchases of up to \$1.0 billion were included in the 2019 capital plan which is effective from the third quarter of 2019 through the second quarter of 2020. A potential dividend increase was also included in our 2019 capital plan. In the third quarter of 2019, the Board plans to consider a potential increase in our quarterly Common Share dividend, up to \$.185 per Common Share.

Table of contents**Preferred Stock**

Preferred stock series	Amount outstanding (in millions)	Shares authorized and outstanding	Par value	Liquidation preference	Ownership interest per depositary share	First quarter preference per depositary share	2019 dividends paid per depositary share
Fixed-to-Floating Rate Perpetual Noncumulative Series D	\$ 525	21,000	\$ 1	\$ 25,000	1/25th	\$ 1,000	\$ 12.50
Fixed-to-Floating Rate Perpetual Noncumulative Series E	500	500,000	1	1,000	1/40th	25	.382813
Fixed Rate Perpetual Noncumulative Series F	425	425,000	1	1,000	1/40th	25	.353125

On April 29, 2019, we issued \$450 million of depositary shares, each representing a 1/40th ownership interest in a share of our Fixed Rate Perpetual Non-Cumulative Series G Preferred Stock. Our Series G Preferred Stock has a \$1 par value with a \$1,000 liquidation preference (equivalent to \$25 per depositary share).

19. Business Segment Reporting

Key previously reported its results of operations through two reportable business segments, Key Community Bank and Key Corporate Bank. In the first quarter of 2019, Key underwent a company-wide organizational change, resulting in the realignment of its businesses into two reportable business segments, Consumer Bank and Commercial Bank, with the remaining operations that do not meet the criteria for disclosure as a separate reportable business recorded in Other. The new business segment structure aligns with how management reviews performance and makes decisions by client, segment and business unit. Prior period information was restated to conform to the new business segment structure. Additionally, goodwill was reallocated to the new segments on a relative fair value basis. On March 31, 2019, the Consumer Bank was allocated goodwill in the amount of \$1.6 billion and the Commercial Bank was allocated goodwill in the amount of \$912 million.

The following is a description of the segments and their primary businesses at March 31, 2019.

Consumer Bank

The Consumer Bank serves individuals and small businesses throughout our 15-state branch footprint by offering a variety of deposit and investment products, personal finance and financial wellness services, lending, mortgage and home equity, credit card, treasury services, and business advisory services. The Consumer Bank also purchases retail auto sales contracts via a network of auto dealerships. The auto dealerships finance the sale of automobiles as the initial lender and then assign the contracts to us pursuant to dealer agreements. In addition, wealth management and investment services are offered to assist institutional, non-profit, and high-net-worth clients with their banking, trust, portfolio management, life insurance, charitable giving, and related needs.

Commercial Bank

The Commercial Bank is an aggregation of our Institutional and Commercial operating segments. The Commercial operating segment is a full-service corporate bank focused principally on serving the needs of

middle market clients in seven industry sectors: consumer, energy, healthcare, industrial, public sector, real estate, and technology. The Commercial operating segment is also a significant servicer of commercial mortgage loans and a significant special servicer of CMBS. The Institutional operating segment delivers a broad suite of banking and capital markets products to its clients, including syndicated finance, debt and equity capital markets, commercial payments, equipment finance, commercial mortgage banking, derivatives, foreign exchange, financial advisory, and public finance.

Other

Other includes various corporate treasury activities such as management of our investment securities portfolio, long-term debt, short-term liquidity and funding activities, and balance sheet risk management, our principal investing unit, and various exit portfolios as well as reconciling items which primarily represents the unallocated portion of nonearning assets of corporate support functions. Charges related to the funding of these assets are part of net interest income and are allocated to the business segments through noninterest expense. Reconciling items also include intercompany eliminations and certain items that are not allocated to the business segments because they do not reflect their normal operations.

Table of contents

The development and application of the methodologies that we use to allocate items among our business segments is a dynamic process. Accordingly, financial results may be revised periodically to reflect enhanced alignment of expense base allocations drivers, changes in the risk profile of a particular business, or changes in our organizational structure.

The table below shows selected financial data for our business segments for the three-month periods ended March 31, 2019, and March 31, 2018.

Three months ended March 31, <i>dollars in millions</i>	Consumer Bank		Commercial Bank		Other		Total Key

^(b) From continuing operations.

^(c) The number of average full-time equivalent employees was not adjusted for discontinued operations.

Table of contents**20. Revenue from Contracts with Customers**

The following table represents a disaggregation of revenue from contracts with customers, by business segment, for the three-month periods ended March 31, 2019, and March 31, 2018. Refer to Note 19 (“Business Segment Reporting”) for a description of the company-wide organizational change which occurred in the first quarter of 2019 resulting in the realignment of Key’s businesses into two reportable business segments, Consumer Bank and Commercial Bank. Prior period information was restated to conform to the new business segment structure.

<i>dollars in millions</i>	Three months ended March 31, 2019			Three months ended March 31, 2018		
	Consumer Bank	Commercial Bank	Total Contract Revenue	Consumer Bank	Commercial Bank	Total Contract Revenue
NONINTEREST INCOME						
Trust and investment services income	\$ 85	\$ 15	\$ 100	\$ 99	\$ 20	\$ 119
Investment banking and debt placement fees	—	45	45	—	47	47
Services charges on deposit accounts	60	27	87	61	28	89
Cards and payments income	38	26	64	34	26	60
Other noninterest income	3	—	3	5	—	5
Total revenue from contracts with customers	\$ 186	\$ 113	\$ 299	\$ 199	\$ 121	\$ 320
Other noninterest income ^(a)			\$ 215			\$ 234
Noninterest income from Other ^(b)			22			47
Total noninterest income			\$ 536			\$ 601

(a) Noninterest income considered earned outside the scope of contracts with customers.

Other includes other segments that consists of corporate treasury, our principal investing unit, and various exit portfolios as well as reconciling items which primarily represents the unallocated portion of nonearning assets of corporate support functions. Charges related to the funding of these assets are part of net interest income and are allocated to the business segments through

(b) noninterest expense. Reconciling items also includes intercompany eliminations and certain items that are not allocated to the business segments because they do not reflect their normal operations. Refer to Note 19 (“Business Segment Reporting”) for more information.

We had no material contract assets or contract liabilities as of March 31, 2019, and March 31, 2018.

Report of Ernst & Young LLP, Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of KeyCorp

Results of Review of Interim Financial Statements

We have reviewed the accompanying consolidated balance sheet of KeyCorp as of March 31, 2019, the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the three-month periods ended March 31, 2019 and 2018, and the related notes (collectively referred to as the “consolidated interim financial statements”). Based on our reviews, we are not aware of any material modifications that should be made to the consolidated interim financial statements for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheet of KeyCorp as of December 31, 2018, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and the related notes (not presented herein); and in our report dated February 25, 2019, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2018 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Basis for Review Results

These financial statements are the responsibility of the KeyCorp's management. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to KeyCorp in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC and the PCAOB. We conducted our review in accordance with the standards of the PCAOB. A review of interim financial statements consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Table of contents

Item 3. Quantitative and Qualitative Disclosure about Market Risk

The information presented in the “Market risk management” section of the Management’s Discussion & Analysis of Financial Condition & Results of Operations is incorporated herein by reference.

Item 4. Controls and Procedures

As of the end of the period covered by this report, KeyCorp carried out an evaluation, under the supervision and with the participation of KeyCorp’s management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of KeyCorp’s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the “Exchange Act”)), to ensure that information required to be disclosed by KeyCorp in reports that it files or submits under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to KeyCorp’s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Based upon that evaluation, KeyCorp’s Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective, in all material respects, as of the end of the period covered by this report.

No changes were made to KeyCorp’s internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the last quarter that materially affected, or are reasonably likely to materially affect, KeyCorp’s internal control over financial reporting. There were no significant changes to our internal control over financial reporting due to the adoption of the new lease accounting standard on January 1, 2019.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information presented in the Legal Proceedings section of Note 16 (“Contingent Liabilities and Guarantees”) of the Notes to Consolidated Financial Statements (Unaudited) is incorporated herein by reference.

On at least a quarterly basis, we assess our liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. Where it is probable that we will incur a loss and the amount of the loss can be reasonably estimated, we record a liability in our consolidated financial statements. These legal reserves may be increased or decreased to reflect any relevant developments on a quarterly basis. Where a loss is not probable or the amount of the loss is not estimable, we have not accrued legal reserves, consistent with applicable accounting guidance. Based on information currently available to us, advice of counsel, and available insurance coverage, we believe that our established reserves are adequate and the liabilities arising from the legal proceedings will not have a material adverse effect on our consolidated financial condition. We note, however, that in light of the inherent uncertainty in legal proceedings there can be no assurance that the ultimate resolution will not exceed established reserves. As a result, the outcome of a particular matter or a combination of matters may be material to our results of operations for a particular period, depending upon the size of the loss or our income for that particular period.

Item 1A. Risk Factors

For a discussion of certain risk factors affecting us, see the section titled “Supervision and Regulation” in Part I, Item 1. Business, on pages 10-23 of our 2018 Form 10-K; Part I, Item 1A. Risk Factors, on pages 23-34 of our 2018 Form 10-K; the section titled “Supervision and regulation” in this Form 10-Q; and our disclosure regarding forward-looking statements in this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

From time to time, KeyCorp or its principal subsidiary, KeyBank, may seek to retire, repurchase, or exchange outstanding debt of KeyCorp or KeyBank, and capital securities or preferred stock of KeyCorp, through cash purchase, privately negotiated transactions, or otherwise. Such transactions, if any, depend on prevailing market conditions, our liquidity and capital requirements, contractual restrictions, and other factors. The amounts involved may be material.

Table of contents

In April 2018, we submitted to the Federal Reserve and provided to the OCC our 2018 capital plan under the annual CCAR process. On June 28, 2018, the Federal Reserve announced that it did not object to our 2018 capital plan. Share repurchases of up to \$1.225 billion were included in the 2018 capital plan, which is effective from the third quarter of 2018 through the second quarter of 2019.

We completed \$199 million of Common Share repurchases, including \$167 million of Common Share repurchases in the open market and \$32 million of Common Share repurchases related to employee equity compensation programs, in the first quarter of 2019 under our 2018 capital plan authorization.

The following table summarizes our repurchases of our Common Shares for the three months ended March 31, 2019.

Calendar month	Total number of shares purchased ^(a)	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased as part of publicly announced plans or programs ^(b)
January 1-31	5,816,525	16.77	5,816,525	18,706,866
February 1-28	5,505,830	16.92	5,505,830	12,171,330
March 1-31	469,060	17.06	469,060	13,139,413
Total	11,791,415	16.85	11,791,415	

(a) Includes Common Shares deemed surrendered by employees in connection with our stock compensation and benefit plans to satisfy tax obligations.

(b) Calculated using the remaining general repurchase amount divided by the closing price of KeyCorp Common Shares as follows: on January 31, 2019 at \$16.47; on February 28, 2019, at \$17.66; and on March 31, 2019, at \$15.75

Item 6. Exhibits

10.1 KeyCorp Executive Annual Performance Plan, filed as Exhibit 10.1 to Form 8-K on March 15, 2019. #

10.2 KeyCorp Second Deferred Savings Plan (effective January 1, 2019), filed as Exhibit 10.30 to Form 10-K on February 25, 2019. #

15 Acknowledgment of Independent Registered Public Accounting Firm.

31.1 Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification of Chief Executive Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.*

32.2 Certification of Chief Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.*

The following materials from KeyCorp's Form 10-Q Report for the quarterly period ended March 31, 2019, formatted in inline XBRL: (i) the Consolidated Balance Sheets; (ii) the Consolidated Statements of Income and Consolidated Statements of Comprehensive Income; (iii) the Consolidated Statements of Changes in Equity; (iv) the Consolidated Statements of Cash Flows; and (v) the Notes to Consolidated Financial Statements.

Indicates management contract or compensatory plan or arrangement.

* Furnished herewith.

Information Available on Website

KeyCorp makes available free of charge on its website, www.key.com, its 2018 Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports as soon as reasonably practicable after KeyCorp electronically files such material with, or furnishes it to, the SEC. We also make available a summary of filings made with the SEC of statements of beneficial ownership of our equity securities filed by our directors and officers under Section 16 of the Exchange Act. The "Regulatory Disclosures and Filings" tab of the investor relations section of our website includes public disclosures

concerning our annual and mid-year stress-testing activities under the Dodd-Frank Act. Information contained on or accessible through our website or any other website referenced in this report is not part of this report.
