QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-6364

SOUTH JERSEY INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

New Jersey 22-1901645

(State of incorporation) (IRS employer identification no.)

1 South Jersey Plaza, Folsom, NJ 08037

(Address of principal executive offices, including zip code)

(609) 561-9000

(Registrant's telephone number, including area code)

Common Stock

(\$1.25 par value per share) New York Stock Exchange

(Title of each class) (Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of November 1, 2016 there were 79,477,822 shares of the registrant's common stock outstanding.

Table of Contents

Notes to Unaudited Condensed Consolidated Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

GENERAL - South Jersey Industries, Inc. (SJI or the Company) currently provides a variety of energy-related products and services primarily through the following wholly-owned subsidiaries:

South Jersey Gas Company (SJG) is a regulated natural gas utility. SJG distributes natural gas in the seven southernmost counties of New Jersey.

South Jersey Energy Company (SJE) acquires and markets natural gas and electricity to retail end users and provides total energy management services to commercial, industrial and residential customers.

South Jersey Resources Group, LLC (SJRG) markets natural gas storage, commodity and transportation assets along with fuel management services on a wholesale basis in the mid-Atlantic, Appalachian and southern states.

South Jersey Exploration, LLC (SJEX) owns oil, gas and mineral rights in the Marcellus Shale region of Pennsylvania.

Marina Energy, LLC (Marina) develops and operates on-site energy-related projects. The following entities have been wholly-owned subsidiaries of Marina since December 31, 2015 (see Note 3):

- ACB Energy Partners, LLC (ACB) owns and operates a natural gas fueled combined heating, cooling and power facility located in Atlantic City, New Jersey.

- AC Landfill Energy, LLC (ACLE), BC Landfill Energy, LLC (BCLE), SC Landfill Energy, LLC (SCLE) and SX Landfill Energy, LLC (SXLE) own and operate landfill gas-fired electric production facilities in Atlantic, Burlington, Salem and Sussex Counties located in New Jersey.

- MCS Energy Partners, LLC (MCS), NBS Energy Partners, LLC (NBS) and SBS Energy Partners, LLC (SBS) own and operate solar-generation sites located in New Jersey.

South Jersey Energy Service Plus, LLC (SJESP) services residential and small commercial HVAC systems, installs small commercial HVAC systems, provides plumbing services and services appliances under warranty via a subcontractor arrangement as well as on a time and materials basis.

SJI Midstream, LLC was formed in 2014 to invest in infrastructure and other midstream projects, including a current project to build a 100-mile natural gas pipeline in Pennsylvania and New Jersey.

BASIS OF PRESENTATION — The condensed consolidated financial statements include the accounts of SJI, its wholly-owned subsidiaries and subsidiaries in which SJI has a controlling interest. SJI eliminates all significant intercompany accounts and transactions. In management's opinion, the condensed consolidated financial statements reflect all normal and recurring adjustments needed to fairly present SJI's financial position, operating results and cash flows at the dates and for the periods presented. SJI's businesses are subject to seasonal fluctuations and, accordingly, this interim financial information should not be the basis for estimating the full year's operating results. As permitted by the rules and regulations of the Securities and Exchange Commission (SEC), the accompanying unaudited condensed consolidated financial statements contain certain condensed financial information and exclude certain footnote disclosures normally included in annual audited consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). These financial statements

should be read in conjunction with SJI's 2015 Annual Report on Form 10-K for a more complete discussion of the Company's accounting policies and certain other information.

Certain reclassifications have been made to the prior period's condensed consolidated balance sheets, as well as the prior period's long-term debt carrying value and prior period's segment disclosures in Notes 5 and 6, respectively, to conform to the current period presentation. The unamortized debt issuance costs previously included in "Regulatory and Other Noncurrent Assets" on the condensed consolidated balance sheets were reclassified to Long-Term Debt to conform to ASU 2015-03, which is described below under "New Accounting Pronouncements." This reclassification caused the prior period long-term debt carrying value in Note 5 to be adjusted, along with the prior period unamortized debt issuance costs recorded as Identifiable Assets in the Gas Utility Operations, On-Site Energy Production and Corporate and Services segments in Note 6 to be removed.

Table of Contents

REVENUE-BASED TAXES — SJG collects certain revenue-based energy taxes from its customers. Such taxes include the New Jersey State Sales Tax and Public Utilities Assessment (PUA). State sales tax is recorded as a liability when billed to customers and is not included in revenue or operating expenses. The PUA is included in both utility revenue and energy and other taxes and totaled \$0.2 million for both the three months ended September 30, 2016 and 2015, and \$0.7 million and \$1.0 million for the nine months ended September 30, 2016 and 2015, respectively.

IMPAIRMENT OF LONG-LIVED ASSETS - SJI reviews the carrying amount of long-lived assets for possible impairment whenever events or changes in circumstances indicate that such amounts may not be recoverable. For the nine months ended September 30, 2016 and 2015, no impairments were identified.

GAS EXPLORATION AND DEVELOPMENT - The Company capitalizes all costs associated with gas property acquisition, exploration and development activities under the full cost method of accounting. Capitalized costs include costs related to unproved properties, which are not amortized until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. No impairment charges were recorded during the nine months ended September 30, 2016 or 2015. As of September 30, 2016 and December 31, 2015, \$8.8 million and \$8.9 million, respectively, related to interests in proved and unproved properties in Pennsylvania, net of amortization, is included with Nonutility Property and Equipment and Other Noncurrent Assets on the condensed consolidated balance sheets.

TREASURY STOCK – SJI uses the par value method of accounting for treasury stock. As of September 30, 2016 and December 31, 2015, SJI held 209,296 and 236,571 shares of treasury stock, respectively. These shares are related to deferred compensation arrangements where the amounts earned are held in the stock of SJI.

INCOME TAXES — Deferred income taxes are provided for all significant temporary differences between the book and taxable bases of assets and liabilities in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 740 - “Income Taxes.” A valuation allowance is established when it is determined that it is more likely than not that a deferred tax asset will not be realized. Investment tax credits related to renewable energy facilities of Marina are recognized on the flow-through method, which may result in variations in the customary relationship between income taxes and pre-tax income for interim periods.

GOODWILL - Goodwill was acquired as part of the acquisition of Energenic projects discussed in Note 3 and is a part of the on-site energy production segment. Goodwill represents the excess of the consideration paid over the fair value of identifiable net assets acquired. Goodwill is not amortized, but instead is subject to impairment testing on an annual basis, and between annual tests whenever events or changes in circumstances indicate that the fair value of a reporting unit may be below its carrying amount. No such events have occurred during the nine months ended September 30, 2016. Goodwill totaled \$8.1 million and \$8.9 million on the condensed consolidated balance sheets as of September 30, 2016 and December 31, 2015, respectively.

The following table summarizes the changes in Goodwill for the nine months ended September 30, 2016 (in thousands):

	2016
Beginning Balance, January 1	\$8,880
Fair Value Adjustments During Measurement Period (See Note 3)	(741)
Ending Balance, September 30	\$8,139

Table of Contents

NEW ACCOUNTING PRONOUNCEMENTS — Other than as described below, no new accounting pronouncement issued or effective during 2016 or 2015 had, or are expected to have, a material impact on the condensed consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). This ASU supersedes the revenue recognition requirements in FASB ASC 605, Revenue Recognition, and in most industry-specific topics. The new guidance identifies how and when entities should recognize revenue. The new rules establish a core principle requiring the recognition of revenue to depict the transfer of promised goods or services to customers in an amount reflecting the consideration to which the entity expects to be entitled in exchange for such goods or services. The new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Management has formed an implementation team that is currently inventorying the contracts with customers and evaluating the impact that adoption of this guidance will have on the Company's financial statement results, as well as the transition method the Company will elect to adopt the guidance.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements - Going Concern (Subtopic 205-40); Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. The new guidance requires management of a company to evaluate whether there is substantial doubt about the company's ability to continue as a going concern. This ASU is effective for the annual reporting period ending after December 15, 2016, and for interim and annual reporting periods thereafter, with early adoption permitted. The Company does not expect this standard to have an impact on its consolidated financial statements upon adoption.

In April 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. This ASU requires debt issuance costs to be presented in the balance sheet as a direct deduction from the associated debt liability. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Adoption of this guidance did not have an impact on the Company's results of operations; however, balance sheet presentations were modified to conform to this guidance.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory. This ASU states that inventory for which cost is determined using a method other than last-in, first-out (LIFO) or the retail method should be subsequently measured at the lower of cost or net realizable value (NRV), rather than at the lower of cost or market. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2016. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, which enhances the reporting model for financial instruments and includes amendments to address aspects of recognition, measurement, presentation and disclosure. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2017. Early adoption is permitted for only certain portions of the new guidance. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In March 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which establishes a new lease accounting model for lessees. The new standard requires substantially all leases be recognized by lessees on their balance sheet as a right-of-use asset and corresponding lease liability, including leases currently accounted for as operating leases. The new standard also will result in enhanced quantitative and qualitative disclosures, including significant judgments made by management, to provide greater insight into the extent of revenue and expense recognized and expected to be recognized from existing leases. The accounting for leases by the lessor remains relatively the same. The standard is

effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2018, with early adoption permitted. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In March 2016, the FASB issued ASU 2016-05, Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships. The amendments in this guidance clarify that a change in the counterparty to a derivative instrument that has been designated as a hedging instrument under Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2016, with early adoption permitted. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

Table of Contents

In March 2016, the FASB issued ASU 2016-07, Investments- Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting, which eliminates the requirement to apply the equity method of accounting retrospectively when a reporting entity obtains significant influence over a previously held investment. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2016, with early adoption permitted. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In March 2016, the FASB issued ASU 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net). This standard amends ASU 2014-09 (discussed above), to improve the implementation guidance on principal versus agent considerations and whether an entity reports revenue on a gross or net basis. This standard will have the same effective date and transition requirements as ASU 2014-09. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In March 2016, the FASB issued ASU 2016-09, Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, which simplifies various aspects of accounting for share-based payment arrangements. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2016, with early adoption permitted. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In April 2016, the FASB issued ASU 2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing. This standard amends ASU 2014-09 (discussed above) to clarify identifying performance obligations and the licensing implementation guidance. This standard will have the same effective date and transition requirements as ASU 2014-09. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In May 2016, the FASB issued ASU 2016-12, Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients. This standard amends ASU 2014-09 (discussed above) to provide additional guidance on (a) the objective of the collectibility criterion, (b) the presentation of sales tax collected from customers, (c) the measurement date of non-cash consideration received, (d) practical expedients in respect of contract modifications and completed contracts at transition, and (e) disclosure of the effects of the accounting change in the period of adoption. This standard will have the same effective date and transition requirements as ASU 2014-09. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This standard is intended to provide guidance concerning the classification of certain cash receipts and cash payments in the statement of cash flows and to eliminate the diversity in practice related to such classifications. This standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2017, with early adoption permitted. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

2. STOCK-BASED COMPENSATION PLAN:

On April 30, 2015, the shareholders of SJI approved the adoption of the Company's 2015 Omnibus Equity Compensation Plan (Plan), replacing the Amended and Restated 1997 Stock-Based Compensation Plan that had terminated on January 26, 2015. Under the Plan, shares may be issued to SJI's officers (Officers), non-employee directors (Directors) and other key employees. No options were granted or outstanding during the nine months ended September 30, 2016 and 2015. No stock appreciation rights have been issued under the plans. During the nine months

ended September 30, 2016 and 2015, SJI granted 193,670 and 158,929 restricted shares, respectively, to Officers and other key employees under the plans. Performance-based restricted shares vest over a three-year period and are subject to SJI achieving certain market and earnings-based performance targets, which can cause the actual amount of shares that ultimately vest to range from 0% to 200% of the original share units granted.

Beginning in 2015, SJI grants time-based shares of restricted stock, one-third of which vest annually over a three-year period and is limited to a 100% payout. Vesting of time-based grants is contingent upon SJI achieving a return on equity (ROE) of at least 7% during the initial year of the grant and meeting the service requirement. Provided that the 7% ROE requirement is met in the initial year, payout is solely contingent upon the service requirement being met in years two and three of the grant. During the nine months ended September 30, 2016 and 2015, Officers and other key employees were granted 58,101 and 47,678 shares of time-based restricted stock, respectively, which are included in the shares noted above.

Table of Contents

Grants containing market-based performance targets use SJI's total shareholder return (TSR) relative to a peer group to measure performance. As TSR-based grants are contingent upon market and service conditions, SJI is required to measure and recognize stock-based compensation expense based on the fair value at the date of grant on a straight-line basis over the requisite three-year period of each award. In addition, SJI identifies specific forfeitures of share-based awards, and compensation expense is adjusted accordingly over the requisite service period. Compensation expense is not adjusted based on the actual achievement of performance goals. The fair value of TSR-based restricted stock awards on the date of grant is estimated using a Monte Carlo simulation model.

Through 2014, grants containing earnings-based targets were based on SJI's earnings growth rate per share (EGR) relative to a peer group to measure performance. In 2015, earning-based performance targets included pre-defined EGR and return on equity (ROE) goals to measure performance. Beginning in 2016, performance targets include pre-defined compounded earnings annual growth rate (CEGR) for SJI. As EGR-based, ROE-based and CEGR-based grants are contingent upon performance and service conditions, SJI is required to measure and recognize stock-based compensation expense based on the fair value at the date of grant over the requisite three-year period of each award. The fair value is measured as the market price at the date of grant. The initial accruals of compensation expense are based on the estimated number of shares expected to vest, assuming the requisite service is rendered and probable outcome of the performance condition is achieved. That estimate is revised if subsequent information indicates that the actual number of shares is likely to differ from previous estimates. Compensation expense is ultimately adjusted based on the actual achievement of service and performance targets.

During the nine months ended September 30, 2016 and 2015, SJI granted 35,197 and 26,338 restricted shares, respectively, to Directors. Shares issued to Directors vest over twelve months and contain no performance conditions. As a result, 100% of the shares granted generally vest.

The following table summarizes the nonvested restricted stock awards outstanding at September 30, 2016 and the assumptions used to estimate the fair value of the awards:

Grants	Shares Outstanding	Fair Value Per Share	Expected Volatility	Risk-Free Interest Rate
Officers & Key Employees - 2014 - TSR	50,335	\$21.31	20.0 %	0.80 %
2014 - EGR	50,335	\$27.22	N/A	N/A
2015 - TSR	33,537	\$26.31	16.0 %	1.10 %
2015 - EGR, ROE, Time	73,118	\$29.47	N/A	N/A
2016 - TSR	65,864	\$22.53	18.1 %	1.31 %
2016 - CEGR, Time	122,319	\$23.52	N/A	N/A
Directors - 2016	35,197	\$23.88	N/A	N/A

Expected volatility is based on the actual volatility of SJI's share price over the preceding three-year period as of the valuation date. The risk-free interest rate is based on the zero-coupon U.S. Treasury Bond, with a term equal to the three-year term of the Officers' and other key employees' restricted shares. As notional dividend equivalents are credited to the holders during the three-year service period, no reduction to the fair value of the award is required. As the Directors' restricted stock awards contain no performance conditions and dividends are paid or credited to the holder during the requisite service period, the fair value of these awards are equal to the market value of the shares on the date of grant.

Table of Contents

The following table summarizes the total stock-based compensation cost for the three and nine months ended September 30, 2016 and 2015 (in thousands):

	Three		Nine Months	
	Months		Months	
	Ended		Ended	
	September		September 30,	
	30,		30,	
	2016	2015	2016	2015
Officers & Key Employees	\$781	\$654	\$2,396	\$1,964
Directors	210	205	630	577
Total Cost	991	859	3,026	2,541
Capitalized	(77)	(92)	(289)	(270)
Net Expense	\$914	\$767	\$2,737	\$2,271

As of September 30, 2016, there was \$5.0 million of total unrecognized compensation cost related to nonvested stock-based compensation awards granted under the plans. That cost is expected to be recognized over a weighted average period of 1.8 years.

The following table summarizes information regarding restricted stock award activity during the nine months ended September 30, 2016, excluding accrued dividend equivalents:

	Officers & Other Key Employees	Directors	Weighted Average Fair Value
Nonvested Shares Outstanding, January 1, 2016	226,191	26,338	\$ 26.89
Granted	193,670	35,197	\$ 23.28
Cancelled/Forfeited	(11,106)	—	\$ 25.11
Vested	(13,247)	(26,338)	\$ 29.30
Nonvested Shares Outstanding, September 30, 2016	395,508	35,197	\$ 24.80

Performance targets during the three-year vesting period were not attained for the 2012 or 2013 Officer and other key employee grants that vested at December 31, 2014 and 2015, respectively. As a result, no shares were awarded in 2015 or 2016 associated with those grants. However, the initial performance hurdle for the 2015 time-based grant was met. As a result, 13,247 shares were awarded to Officers and other key employees during the nine months ended September 30, 2016 at a market value of \$0.3 million. During the nine months ended September 30, 2016 and 2015, SJI granted 35,197 and 26,338 shares to its Directors at a market value of \$0.8 million in each of the periods. The Company has a policy of issuing new shares to satisfy its obligations under the Plan; therefore, there are no cash payment requirements resulting from the normal operation of the Plan. However, a change in control could result in such shares becoming nonforfeitable or immediately payable in cash. At the discretion of the Officers, Directors and other key employees, the receipt of vested shares can be deferred until future periods. These deferred shares are included in Treasury Stock on the condensed consolidated balance sheets.

Table of Contents

3. AFFILIATIONS AND DISCONTINUED OPERATIONS:

AFFILIATIONS — The following affiliated entities are accounted for under the equity method:

Energenic – US, LLC (Energenic) - Marina and a joint venture partner formed Energenic, in which Marina has a 50% equity interest. Energenic developed and operated on-site, self-contained, energy-related projects.

On December 31, 2015, Energenic, Marina and its joint venture partner entered into two Equity Distribution and Purchase Agreements (the "Transaction"), pursuant to which Marina became the sole owner of eight of the Energenic projects ("Marina Projects") and its joint venture partner became the sole owner of seven other Energenic projects ("Partner Projects"). The Transaction has been accounted for as a distribution of member interests by Energenic to its owners and a business combination through the exchange of member interests in various projects between Marina and its joint venture partner. In connection with the exchange, the joint venture partner provided a \$19.5 million note payable to Marina. The note and other existing obligations of the joint venture partner to Marina are included in Notes Receivable on the condensed consolidated balance sheets, with approximately \$1.8 million being included as a current asset as of September 30, 2016, as it is due within one year. This note is collateralized by security interests in various energy project assets owned by the joint venture partner, as well as personal guarantees from its principals.

As part of the transaction, each party is relieved of any guarantees related to the Projects in which it no longer has an ownership interest.

The projects that are now wholly-owned by Marina are ACB, ACLE, BCLE, SCLE, SXLE, MCS, NBS and SBS.

Through December 31, 2015, Marina's investment in Energenic was accounted for under the equity method of accounting. As such, Marina's share of the equity value of the projects was included within Investment in Affiliates on the condensed consolidated balance sheets and Marina's share of the loss or earnings from the projects for the nine months ended September 30, 2015 was included within Equity in Earnings (Losses) of Affiliated Companies on the condensed consolidated statements of income. As of December 31, 2015, the assets and liabilities of the projects that are now wholly-owned by Marina are consolidated into the condensed consolidated balance sheets. Beginning in 2016, the respective results from operations and cash flows of the projects that are now wholly-owned by Marina are consolidated into the condensed consolidated statements of income and cash flows, respectively. The results of the acquired projects are included in the On-Site Energy Production segment.

The following table summarizes the preliminary purchase price allocation and reflects 100% of the fair values of the assets acquired and the liabilities assumed by the Company in connection with the Transaction. The Company is still awaiting final valuation reports supporting the allocation of the purchase price to certain identifiable intangibles. Total consideration for the step acquisition of the remaining interest in the Marina Projects was \$46.0 million, which represents the fair value of the Company's interest in the Partner Projects exchanged (\$31.5 million) as well as the existing value of the Marina Projects immediately prior to the exchange (\$14.5 million) (in thousands):

Current assets (excluding inventory)	\$7,804
Inventory	3,154
Note Receivable Received	19,504
Fixed Assets	46,460
Intangible Assets:	
Identifiable Intangibles	16,950
Goodwill	8,139
Non-Current Assets	1,873

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-Q

Current Liabilities	(8,196)
Note Payable - Affiliate	(16,986)
Long-Term Debt, including current portion	(21,642)
Capital Lease Payable	(10,458)
Other Non-Current Liabilities	(572)
Fair Value of Consolidated Assets and Liabilities of Acquired Projects	\$46,030

13

Table of Contents

The recorded amounts for assets and liabilities represent the Company's best estimate as of September 30, 2016. The measurement period adjustments recorded during the nine months ended September 30, 2016 did not have a significant impact on the Company's condensed consolidated balance sheet. The pro forma impact of this transaction on the operations of the Company is not significant.

Potato Creek, LLC (Potato Creek) - SJI and a joint venture partner formed Potato Creek, in which SJI has a 30% equity interest. Potato Creek owns and manages the oil, gas and mineral rights of certain real estate in Pennsylvania.

PennEast Pipeline Company, LLC (PennEast) - Midstream has a 20% investment in PennEast, which is planning to construct an approximately 100-mile natural gas pipeline that will extend from Northeastern Pennsylvania into New Jersey, with a target completion of 2018.

During the first nine months of 2016 and 2015, the Company made net investments in unconsolidated affiliates of \$2.2 million and \$4.4 million, respectively. As of September 30, 2016 and December 31, 2015, the outstanding balance of Notes Receivable – Affiliate was \$15.0 million and \$16.4 million, respectively. As of September 30, 2016, approximately \$13.6 million of these notes are secured by property, plant and equipment of the affiliates, accrue interest at 7.5% and are to be repaid through 2025. The remaining \$1.4 million of these notes are unsecured and accrue interest at variable rates.

SJI holds significant variable interests in these entities but is not the primary beneficiary. Consequently, these entities are accounted for under the equity method because SJI does not have both (a) the power to direct the activities of the entity that most significantly impact the entity's economic performance and (b) the obligation to absorb losses of the entity that could potentially be significant to the entity or the right to receive benefits from the entity that could potentially be significant to the entity. As of September 30, 2016, the Company had a net asset of approximately \$24.4 million included in Investment in Affiliates on the condensed consolidated balance sheets related to equity method investees, in addition to Notes Receivable – Affiliate as discussed above. SJI's maximum exposure to loss from these entities as of September 30, 2016, is limited to its combined equity contributions and the Notes Receivable-Affiliate in the aggregate amount of \$39.4 million.

DISCONTINUED OPERATIONS - Discontinued Operations consist of the environmental remediation activities related to the properties of South Jersey Fuel, Inc. (SJF) and the product liability litigation and environmental remediation activities related to the prior business of The Morie Company, Inc. (Morie). SJF is a subsidiary of Energy & Minerals, Inc. (EMI), an SJI subsidiary, which previously operated a fuel oil business. Morie is the former sand mining and processing subsidiary of EMI. EMI sold the common stock of Morie in 1996.

SJI conducts tests annually to estimate the environmental remediation costs for these properties.

Summarized operating results of the discontinued operations for the three and nine months ended September 30, 2016 and 2015, were (in thousands, except per share amounts):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Loss before Income Taxes:				
Sand Mining	\$(20)	\$(17)	(184)	(381)
Fuel Oil	(24)	(123)	(86)	(286)

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-Q

Income Tax Benefits	15	49	94	226
Loss from Discontinued Operations — Net	\$(29)	\$(91)	\$(176)	\$(441)
Earnings Per Common Share from Discontinued Operations — Net:				
Basic and Diluted	\$—	\$—	\$—	\$(0.01)

14

Table of Contents

4. COMMON STOCK:

The following shares were issued and outstanding:

	2016
Beginning Balance, January 1	70,965,622
New Issuances During the Period:	
Dividend Reinvestment Plan	416,862
Stock-Based Compensation Plan	45,338
Public Equity Offering	8,050,000
Ending Balance, September 30	79,477,822

The par value (\$1.25 per share) of stock issued was recorded in Common Stock and the net excess over par value of approximately \$206.6 million was recorded in Premium on Common Stock.

In May 2016, the Company issued and sold 8,050,000 shares of its common stock, par value \$1.25 per share at a public offering, raising net proceeds of approximately \$203.6 million. The net proceeds from this offering were or will be used for capital expenditures, primarily for regulated businesses, including infrastructure investments at its utility business.

EARNINGS PER COMMON SHARE (EPS) - Basic EPS is based on the weighted-average number of common shares outstanding. The incremental shares required for inclusion in the denominator for the diluted EPS calculation were 156,673 for the three months ended September 30, 2016, and 94,997 and 198,222 for the nine months ended September 30, 2016 and 2015, respectively. For the three months ended September 30, 2015, incremental shares of 187,758 were not included in the denominator for the diluted EPS calculation because they would have an antidilutive effect on EPS. These additional shares relate to SJI's restricted stock as discussed in Note 2.

DIVIDEND REINVESTMENT PLAN (DRP) - The Company offers a DRP which allows participating shareholders to purchase shares of SJI common stock by automatic reinvestment of dividends or optional purchases. Shares of common stock offered by the DRP have been issued directly by SJI from its authorized but unissued shares of common stock. The Company raised \$10.8 million and \$9.7 million of equity capital through the DRP during the nine months ended September 30, 2016 and 2015, respectively. Effective May 1, 2016, SJI switched to purchasing shares on the open market to fund share purchases by DRP participants. SJI does not intend to issue any more new equity capital via the DRP in 2016.

5. FINANCIAL INSTRUMENTS:

RESTRICTED INVESTMENTS — Marina is required to maintain escrow accounts related to ongoing capital projects as well as unused loan proceeds pending approval of construction expenditures. As of September 30, 2016 and December 31, 2015, the escrowed funds, including interest earned, totaled \$2.3 million and \$3.4 million, respectively.

The Company maintains margin accounts with selected counterparties to support its risk management activities. The balances required to be held in these margin accounts increase as the net value of the outstanding energy-related contracts with the respective counterparties decrease. As of September 30, 2016 and December 31, 2015, the balances in these accounts totaled \$33.2 million and \$43.7 million, respectively.

In September 2016, SJG placed \$8.3 million in an escrow account to construct SJG's building in Atlantic City, New Jersey. The money is restricted until the final contracts are approved, at which time the money will be released for use in constructing SJG's building.

As of December 31, 2015, in accordance with an outstanding loan agreement with a third party, ACB was required to maintain control accounts, which included a debt service reserve of \$1.7 million. In January 2016, the remaining debt on the loan agreement was paid (see Note 14); as such, there was no reserve as of September 30, 2016.

The carrying amounts of the Restricted Investments approximate their fair values at September 30, 2016 and December 31, 2015, which would be included in Level 1 of the fair value hierarchy (see Note 13).

Table of Contents

INVESTMENT IN AFFILIATES - During 2011, subsidiaries of Energenic, in which Marina has a 50% equity interest, entered into 20-year contracts to build, own and operate a central energy center and energy distribution system for a new hotel, casino and entertainment complex in Atlantic City, New Jersey. The complex commenced operations in April 2012, and as a result, Energenic subsidiaries began providing full energy services to the complex.

In June 2014, the parent company of the hotel, casino and entertainment complex filed petitions in U.S. Bankruptcy Court to facilitate a sale of substantially all of its assets. The complex ceased normal business operations in September 2014. Energenic subsidiaries continued to provide limited energy services to the complex during the shutdown period under a temporary agreement with the trustee. The hotel, casino and entertainment complex was sold in April 2015. As of December 31, 2015, the Energenic subsidiaries were providing limited services to the complex under a short-term agreement with the new owner. However, the Energenic subsidiaries had not been able to secure a permanent or long-term energy services agreement with the new owner.

In 2015, management of the Company and Energenic evaluated the carrying value of the investment in this project and a related note receivable. Based on the inability of the Energenic subsidiaries to secure a permanent or long-term energy services agreement, the Company recorded a \$7.7 million (net of tax) non-cash charge to earnings during the second quarter of 2015 due to the reduction in the carrying value of the investment in this project recorded by Energenic. This charge was included in Equity in Loss of Affiliated Companies during the second quarter of 2015 on the condensed consolidated statements of income.

The central energy center and energy distribution system owned by the Energenic subsidiaries was financed in part by the issuance of bonds during 2011. These bonds were collateralized primarily by certain assets of the central energy center and revenue from the energy services agreement with the hotel, casino and entertainment complex. During 2015, due to the cessation of normal business operations of the complex and the inability of the Energenic subsidiaries to meet its obligations under the bonds, the trustee for the bondholders filed suit to foreclose on certain assets of the central energy center. In November 2015 during settlement discussions, the bondholders alleged, among other things, that they were entitled to recover from Energenic itself, any amounts owed under the bonds that were not covered by the collateral, including principal, interest and attorney's fees. The bondholders' assertion was based on inconsistent language in the bond documents. In January 2016, Energenic and certain subsidiaries reached a multi-party settlement with the bondholders. This agreement resolves all outstanding litigation and transfers ownership of the bondholders' collateral to the owners of the entertainment complex. The Company's share of this settlement was \$7.5 million, which was accrued by Energenic as of December 31, 2015 and paid in 2016. The Company entered into agreements with its insurance carrier and external legal advisors to recover, net of legal costs, approximately \$7.0 million of costs associated with the bondholder settlement discussed above. The Company received \$2.1 million in the second quarter of 2016, which is included in Other Income on the condensed consolidated statements of income for the nine months ended September 30, 2016, and \$5.3 million was received in the third quarter of 2016 and is included in Equity in Earnings of Affiliated Companies on the condensed consolidated statements of income for the three and nine months ended September 30, 2016.

As of September 30, 2016, the Company, through its investment in Energenic, had a remaining net asset of approximately \$0.9 million included in Investment in Affiliates on the condensed consolidated balance sheets related to cogeneration assets for this project. In addition, the Company had approximately \$13.9 million included in Notes Receivable - Affiliate on the condensed consolidated balance sheets, due from Energenic, which is secured by those cogeneration assets. This note is subject to a reimbursement agreement that secures reimbursement for the Company, from its joint venture partner, of a proportionate share of any amounts that are not repaid.

Management will continue to monitor the situation surrounding the complex and will evaluate the carrying value of the investment and the note receivable as future events occur.

NOTE RECEIVABLE - In June 2015, SJG advanced \$10.0 million to a not-for-profit organization formed to spur economic development in Atlantic City, New Jersey. The note included interest at 1.0% for an initial term of six months, with the borrower's option to extend the term for two additional terms of three months each. In December

2015 and February 2016, the borrower exercised each option, respectively. In July 2016, the note was repaid in full, including interest.

Table of Contents

LONG-TERM RECEIVABLES — SJG provides financing to customers for the purpose of attracting conversions to natural gas heating systems from competing fuel sources. The terms of these loans call for customers to make monthly payments over a period of up to five to ten years with no interest. The carrying amounts of such loans were \$10.2 million and \$12.9 million as of September 30, 2016 and December 31, 2015, respectively. The current portion of these receivables is reflected in Accounts Receivable and the non-current portion is reflected in Contract Receivables on the condensed consolidated balance sheets. The carrying amounts noted above are net of unamortized discounts resulting from imputed interest in the amount of \$1.0 million and \$1.3 million as of September 30, 2016 and December 31, 2015, respectively. The annualized amortization to interest is not material to the Company's condensed consolidated financial statements. The carrying amounts of these receivables approximate their fair value at September 30, 2016 and December 31, 2015, which would be included in Level 2 of the fair value hierarchy (see Note 13).

CREDIT RISK - As of September 30, 2016, approximately \$9.1 million, or 13.9%, of the current and noncurrent Derivatives – Energy Related Assets are transacted with two counterparties. One counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assigned to SJI in the event of default by the counterparty. The second counterparty is investment-grade rated.

FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE - The fair value of a financial instrument is the market price to sell an asset or transfer a liability at the measurement date. The carrying amounts of SJI's financial instruments approximate their fair values at September 30, 2016 and December 31, 2015, except as noted below. For Long-Term Debt, in estimating the fair value, we use the present value of remaining cash flows at the balance sheet date. We based the estimates on interest rates available to SJI at the end of each period for debt with similar terms and maturities (Level 2 in the fair value hierarchy, see Note 13). The estimated fair values of SJI's long-term debt, including current maturities, as of September 30, 2016 and December 31, 2015, were \$1,110.4 million and \$1,079.0 million, respectively. The carrying amounts of SJI's long-term debt, including current maturities, as of September 30, 2016 and December 31, 2015, were \$1,040.6 million and \$1,026.9 million, respectively. The carrying amounts as of September 30, 2016 and December 31, 2015 are net of unamortized debt issuance costs of \$7.8 million and \$9.0 million, respectively (see Note 1).

OTHER FINANCIAL INSTRUMENTS - The carrying amounts of SJI's other financial instruments approximate their fair values at September 30, 2016 and December 31, 2015.

6. SEGMENTS OF BUSINESS:

SJI operates in several different reportable operating segments which reflect the financial information regularly evaluated by the chief operating decision maker. These segments are as follows:

Gas utility operations (SJG) consist primarily of natural gas distribution to residential, commercial and industrial customers.

Wholesale energy operations include the activities of SJRG and SJEX.

SJE is involved in both retail gas and retail electric activities.

Retail gas and other operations include natural gas acquisition and transportation service business lines.

Retail electric operations consist of electricity acquisition and transportation to commercial, industrial and residential customers.

On-site energy production consists of Marina's thermal energy facility and other energy-related projects. Also included in this segment are the activities of ACB, ACLE, BCLE, SCLE, SXLE, MCS, NBS and SBS. These entities became wholly-owned subsidiaries of Marina on December 31, 2015 (see Note 3).

Appliance service operations includes SJESP, which services residential and small commercial HVAC systems, installs small commercial HVAC systems, provides plumbing services and services appliances under warranty via a

subcontractor arrangement as well as on a time and materials basis.

¶The activities of Midstream are a part of the Corporate and Services segment.

SJI groups its nonutility operations into two categories: Energy Group and Energy Services. Energy Group includes wholesale energy, retail gas and other, and retail electric operations. Energy Services includes on-site energy production and appliance service operations. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Intersegment sales and transfers are treated as if the sales or transfers were to third parties at current market prices.

Table of Contents

Information about SJI's operations in different reportable operating segments is presented below (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2016	2015	2016	2015

Table of Contents

7. RATES AND REGULATORY ACTIONS:

SJG is subject to the rules and regulations of the New Jersey Board of Public Utilities (BPU).

In January 2016, SJG provided a Basic Gas Supply Service (BGSS) bill credit of approximately \$20.0 million to its residential and small commercial customers. This credit is in addition to an overall rate reduction of 10.3% that was approved by the BPU and took effect in October 2015. SJG's ability to offer the BGSS bill credit is a direct result of lower wholesale natural gas prices and the overall management of its gas supply portfolio. The BGSS clause serves as a method to pass along increases or decreases in gas costs to customers; therefore, SJG's income is not affected by BGSS rate adjustments or bill credits.

In February 2016, SJG filed a petition with the BPU for approval to continue its Accelerated Infrastructure Replacement Program (AIRP), which will expire at the end of 2016. In its petition, SJG has requested approval to continue its AIRP for an additional seven years, with program investments totaling approximately \$500.0 million, to retire and replace bare steel and cast iron mains, bare steel services, and other aging infrastructure. The petition proposes to recover the costs of, and a return on, future AIRP investments through annual base rate adjustments. The petition also includes a request to reflect in base rates approximately \$76.0 million of AIRP investments that will have been made since the conclusion of SJG's last base rate case in October 2014 through the end 2016. This petition was approved in October 2016 (see Note 16).

Also in February 2016, the BPU approved a \$7.9 million revenue decrease to SJG's Energy Efficiency Tracker (EET), which recovers the cost of, and an allowed return on, investments in Energy Efficiency Programs (EEP). SJG's original EEPs and its first EEP Extension, approved by the BPU in 2009 and 2013, respectively, ended in July 2013 and August 2015, respectively. The revenue requirements associated with these prior investments decrease over time as they are amortized and recovered. SJG is continuing to make energy efficiency investments under its most recent EEP Extension, which was approved by the BPU in August 2015, and is recovering the costs, and the allowed return on, those investments through the EET.

In April 2016, the BPU approved a \$2.6 million net decrease, including taxes, in annual revenues collected from SJG customers through the Societal Benefits Clause (SBC) charge and the Transportation Initiation Clause (TIC) charge, comprised of a \$5.2 million increase in revenues from the Remediation Adjustment Clause (RAC) component of the SBC, a \$7.1 million decrease in revenues from the Clean Energy Program (CLEP) component of the SBC, and a \$0.7 million decrease in TIC revenues, effective May 7, 2016. The increase in the RAC is driven by an increase in costs associated with the remediation of former Manufactured Gas Plants. The decrease in the CLEP component of the SBC is primarily driven by the accumulation of prior year over-recoveries. The decrease in the TIC is driven by a decrease in costs. The SBC and TIC allow SJG to recover costs associated with certain State-mandated programs. SJG does not earn any profit from these charges.

In June 2016, SJG filed its annual EET rate adjustment petition, requesting a \$0.8 million decrease in revenues to continue recovering the costs of, and the allowed return on, prior investments associated with EEP's. The revenue adjustment was subsequently updated in September 2016 to reflect a revenue decrease of \$1.6 million. The EET rate recovers the forecasted revenue requirements for the upcoming EET year of October 2016 to September 2017. The requested revenue decrease is the result of the investments associated with SJG's original EEPs, approved by the BPU in 2009, and its EEP extension, approved by the BPU in 2013, which ended in July 2013 and August 2015, respectively. The revenue requirements associated with these prior investments decreases over time as they are amortized. This petition was approved in October 2016.

In September 2016, the BPU approved an increase in annual revenues from base rates of \$3.9 million, including taxes, to reflect the roll-in of \$33.7 million of investments made from July 1, 2015 through June 30, 2016 under SJG's Storm

Hardening and Reliability Program (SHARP), with rates effective as of October 1, 2016.

Also in September 2016, the BPU approved a \$0.6 million net decrease in annual revenues to be implemented on October 1, 2016, comprised of a \$47.1 million decrease in BGSS revenues and a \$46.5 million increase in Conservation Incentive Program (CIP) revenues, both including taxes. The level of BGSS revenues requested in annual BGSS filings is based on forecasted gas costs and customer usage information for the upcoming BGSS/CIP year, which runs from October 1, 2016 to September 30, 2017. SJG's request for a decrease of BGSS revenues was caused primarily by decreases in forecasted gas commodity costs for the upcoming BGSS/CIP year. The level of CIP revenues requested in annual CIP filings is based on historical customer usage information, comparing prior CIP year customer usage to normal customer usage. SJG's request for an increase in CIP revenues was primarily due to lower than normal customer usage caused by weather that was 16.4% warmer than normal during the 2015- 2016 winter.

Additionally, in September 2016, the BPU approved the statewide Universal Service Fund (USF) budget of \$56.0 million for all the State's gas utilities. SJG's portion of the total budget is approximately \$5.6 million. Effective October 1, 2016, the BPU approved a \$1.1 million increase in SJG's USF recoveries.

Table of Contents

The BGSS, CIP and USF approvals discussed above do not impact SJG's earnings. They represent changes in the cash requirements of SJG corresponding to cost changes and/or the return of previously under-recovered costs associated with each respective mechanism.

There have been no other significant regulatory actions or changes to SJG's rate structure since December 31, 2015. See Note 10 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015.

8. REGULATORY ASSETS AND REGULATORY LIABILITIES:

There have been no significant changes to the nature of the Company's regulatory assets and liabilities since December 31, 2015, which are described in Note 11 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015.

Regulatory Assets consisted of the following items (in thousands):

	September 30, 2016	December 31, 2015
Environmental Remediation Costs:		
Expended - Net	\$ 57,100	\$ 42,032
Liability for Future Expenditures	160,587	123,194
Deferred Asset Retirement Obligation Costs	42,768	42,430
Deferred Pension and Other Postretirement Benefit Costs	79,779	79,779
Deferred Gas Costs - Net	—	2,701
Conservation Incentive Program Receivable	23,485	2,624
Deferred Interest Rate Contracts	10,346	7,631
Energy Efficiency Tracker	—	496
Pipeline Supplier Service Charges	2,527	3,776
Pipeline Integrity Cost	4,595	4,596
AFUDC - Equity Related Deferrals	12,357	11,423
Other Regulatory Assets	3,527	2,752
Total Regulatory Assets	\$ 397,071	\$ 323,434

ENVIRONMENTAL REMEDIATION COSTS - SJG has two regulatory assets associated with environmental costs related to the cleanup of 12 sites where SJG or its predecessors previously operated gas manufacturing plants. The first asset, "Environmental Remediation Cost: Expended - Net," represents what was actually spent to clean up the sites, less recoveries through the Remediation Adjustment Clause (RAC) and insurance carriers. These costs meet the deferral requirements of GAAP, as the BPU allows SJG to recover such expenditures through the RAC. The other asset, "Environmental Remediation Cost: Liability for Future Expenditures," relates to estimated future expenditures required to complete the remediation of these sites. SJG recorded this estimated amount as a regulatory asset with the corresponding current and noncurrent liabilities on the balance sheets under the captions "Current Liabilities" and "Deferred Credits and Other Noncurrent Liabilities." The BPU allows SJG to recover the deferred costs over seven-year periods after they are spent. The increase from December 31, 2015 is a result of expenditures made during the first nine months of 2016 and an increase in the expected future expenditures for remediation activities, primarily due to an increase in the scope of the remediation at a site related to additional contamination being discovered.

DEFERRED GAS COSTS - NET - See discussion under "Deferred Revenues - Net" below.

CONSERVATION INCENTIVE PROGRAM (CIP) RECEIVABLE – The CIP tracking mechanism adjusts earnings when actual usage per customer experienced during the period varies from an established baseline usage per customer. Actual usage per customer was less than the established baseline during the 2015 - 2016 winter season and during the first nine months of 2016, resulting in an increase in the receivable. This is primarily the result of warm weather experienced in the region.

Table of Contents

Regulatory Liabilities consisted of the following items (in thousands):

	September 30, December 31,	
	2016	2015
Excess Plant Removal Costs	\$ 30,324	\$ 32,644
Deferred Revenues - Net	14,418	—
Societal Benefit Costs	5,907	10,197
Energy Efficiency Tracker	401	—
Total Regulatory Liabilities	\$ 51,050	\$ 42,841

DEFERRED REVENUES - NET - Over/under collections of gas costs are monitored through SJG's BGSS mechanism. Net under collected gas costs are classified as a regulatory asset and net over collected gas costs are classified as a regulatory liability. Derivative contracts used to hedge natural gas purchases are also included in the BGSS, subject to BPU approval. The BGSS changed from a \$2.7 million regulatory asset at December 31, 2015 to a \$14.4 million regulatory liability at September 30, 2016, primarily due to the gas costs recovered from customers exceeding the actual cost of the commodity.

ENERGY EFFICIENCY TRACKER (EET) - This regulatory liability primarily represents energy efficiency measures installed in customer homes and businesses. The change from a \$0.5 million regulatory asset at December 31, 2015 to a \$0.4 million regulatory liability at September 30, 2016 is due to recoveries being greater than the cost of, and allowed return on, investments in the EEP's. In February 2016, the BPU approved a \$7.9 million revenue decrease to SJG's EET (see Note 7).

Table of Contents

9. PENSION AND OTHER POSTRETIREMENT BENEFITS:

For the three and nine months ended September 30, 2016 and 2015, net periodic benefit cost related to the employee and officer pension and other postretirement benefit plans consisted of the following components (in thousands):

	Pension Benefits			
	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Service Cost	\$1,210	\$1,334	\$3,632	\$4,003
Interest Cost	3,031	2,792	9,094	8,376
Expected Return on Plan Assets	(3,377)	(3,697)	(10,131)	(11,092)
Amortizations:				
Prior Service Cost	53	53	158	159
Actuarial Loss	2,349	2,652	7,046	7,956
Net Periodic Benefit Cost	3,266	3,134	9,799	9,402
Capitalized Benefit Cost	(1,251)	(1,216)	(3,651)	(3,649)
Deferred Benefit Cost	(161)	(341)	(484)	(666)
Total Net Periodic Benefit Expense	\$1,854	\$1,577	\$5,664	\$5,087

	Other Postretirement Benefits			
	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Service Cost	\$213	\$279	\$638	\$837
Interest Cost	654	743	1,961	2,230
Expected Return on Plan Assets	(776)	(748)	(2,328)	(2,245)
Amortizations:				
Prior Service Cost	(86)	152	(258)	456
Actuarial Loss	277	336	832	1,007
Net Periodic Benefit Cost	282	762	845	2,285
Capitalized Benefit Cost	(73)	(264)	(219)	(792)
Deferred Benefit Cost	—	(89)	—	(168)
Total Net Periodic Benefit Expense	\$209	\$409	\$626	\$1,325

Capitalized benefit costs reflected in the table above relate to SJG's construction program. Deferred benefit costs relate to SJG's deferral of incremental expense associated with the adoption of new mortality tables effective December 31, 2014 and 2015. Deferred benefit costs are expected to be recovered through rates as part of SJG's next base rate case.

SJI contributed \$15.0 million to the pension plans in January 2015. No contributions were made to the pension plans during the nine months ended September 30, 2016. SJI does not expect to make any contributions to the pension plans in 2016; however, changes in future investment performance and discount rates may ultimately result in a contribution. Payments related to the unfunded supplemental executive retirement plan (SERP) are expected to approximate \$2.3 million in 2016. SJG also has a regulatory obligation to contribute approximately \$3.6 million annually to the other postretirement benefit plans' trusts, less direct costs incurred.

See Note 12 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015 for additional information related to SJI's pension and other postretirement benefits.

Table of Contents

10. LINES OF CREDIT:

Credit facilities and available liquidity as of September 30, 2016 were as follows (in thousands):

Company	Total Facility	Usage	Available Liquidity	Expiration Date
SJG:				
Commercial Paper Program/Revolving Credit Facility	\$200,000	\$81,800	(A) \$118,200	May 2018
Uncommitted Bank Line	10,000	—	10,000	August 2017
Total SJG	210,000	81,800	128,200	
SJI:				
Revolving Credit Facilities	450,000	152,000	(B) 298,000	Various (C)
Total SJI	450,000	152,000	298,000	
Total	\$660,000	\$233,800	\$426,200	

(A) Includes letters of credit outstanding in the amount of \$0.8 million.

(B) Includes letters of credit outstanding in the amount of \$2.8 million.

(C) In September 2016, the Company entered into an unsecured \$50.0 million, 364-day revolving credit agreement. The agreement matures September 2017, at which time the principal and any accrued but unpaid interest must be paid. At the annual request of the Company, but on not more than two occasions, the credit agreement may be extended for an additional period of 364 days. The 364-day revolving facility bears interest at a variable base rate or a variable London Interbank Offered Rate (LIBOR), at the Company's election.

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary, the SJI facilities can also be used to support SJG's liquidity needs. Borrowings under these credit facilities are at market rates. The weighted average interest rate on these borrowings, which changes daily, was 1.28% and 1.03% at September 30, 2016 and 2015, respectively. Average borrowings outstanding under these credit facilities, not including letters of credit, during the nine months ended September 30, 2016 and 2015 were \$336.5 million and \$310.8 million, respectively. The maximum amounts outstanding under these credit facilities, not including letters of credit, during the nine months ended September 30, 2016 and 2015 were \$467.7 million and \$432.4 million, respectively.

The SJI and SJG facilities are provided by a syndicate of banks and contain one financial covenant limiting the ratio of indebtedness to total capitalization (as defined in the respective credit agreements) to not more than 0.65 to 1, measured at the end of each fiscal quarter. SJI and SJG were in compliance with this covenant as of September 30, 2016.

SJG has a commercial paper program under which SJG may issue short-term, unsecured promissory notes to qualified investors up to a maximum aggregate amount outstanding at any time of \$200.0 million. The notes have fixed maturities which vary by note, but may not exceed 270 days from the date of issue. Proceeds from the notes are used for general corporate purposes. SJG uses the commercial paper program in tandem with its \$200.0 million revolving credit facility and does not expect the principal amount of borrowings outstanding under the commercial paper program and the credit facility at any time to exceed an aggregate of \$200.0 million.

Table of Contents

11. COMMITMENTS AND CONTINGENCIES:

GUARANTEES — As part of the Transaction involving the Energenic projects (see Note 3), the Company is relieved of any guarantees from prior periods related to the projects in which it no longer has an ownership interest.

As of September 30, 2016, SJI had issued \$5.9 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

COLLECTIVE BARGAINING AGREEMENTS — Unionized personnel represent approximately 45% of our workforce at September 30, 2016. The Company has collective bargaining agreements with two unions that represent these employees: the International Brotherhood of Electrical Workers (IBEW) Local 1293 and the International Association of Machinists and Aerospace Workers (IAM) Local 76. SJG and SJESP employees represented by the IBEW operate under collective bargaining agreements that run through February 2017. The remaining unionized employees are represented by the IAM and operate under collective bargaining agreements that run through August 2017.

STANDBY LETTERS OF CREDIT — As of September 30, 2016, SJI provided \$2.8 million of standby letters of credit through its revolving credit facility to enable SJE to market retail electricity and for various construction and operating activities. SJG provided a \$0.8 million letter of credit under its revolving credit facility to support the remediation of environmental conditions at certain locations in SJG's service territory. The Company has also provided \$87.5 million of additional letters of credit under separate facilities outside of the revolving credit facilities to support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance the expansion of SJG's natural gas distribution system and to finance Marina's initial thermal plant project.

PENDING LITIGATION — The Company is subject to claims arising in the ordinary course of business and other legal proceedings. The Company has been named in, among other actions, certain gas supply and capacity management contract disputes and certain product liability claims related to our former sand mining subsidiary.

The Company is currently involved in a pricing dispute related to two long-term gas supply contracts whereby the Company had sued the supplier to recover amounts that were improperly invoiced. Subsequently, the supplier countersued the Company claiming it is owed an amount which we extrapolate to be \$14.3 million from SJG and \$37.2 million from SJRG, plus interest, through September 30, 2016. We believe any monies received or paid associated with the SJG claims would be passed along to SJG's customers through adjusted rates.

The Company is also involved in a dispute related to a three-year capacity management contract with a counterparty whereby the Company is the manager. The counterparty is claiming that it is owed approximately \$10.0 million plus interest from SJRG under a sharing credit within the contract.

Liabilities related to these claims are accrued when the amount or range of amounts of probable settlement costs or other charges for these claims can be reasonably estimated. The Company has accrued approximately \$3.1 million and \$3.2 million related to all of these claims in the aggregate as of September 30, 2016 and December 31, 2015, respectively. Although the Company does not presently believe that these matters will have a material adverse effect on its business, given the inherent uncertainties in such situations, the Company can provide no assurance regarding the outcome of litigation.

ENVIRONMENTAL REMEDIATION COSTS — SJI incurred and recorded costs for environmental cleanup of 12 sites where SJG or its predecessors operated gas manufacturing plants. SJG stopped manufacturing gas in the 1950s. SJI and some of its nonutility subsidiaries also recorded costs for environmental cleanup of sites where SJF previously operated a fuel oil business and Morie maintained equipment, fueling stations and storage. Other than the changes

discussed in Note 8 to the condensed consolidated financial statements, there have been no changes to the status of the Company's environmental remediation efforts since December 31, 2015, as described in Note 15 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015.

Table of Contents

12. DERIVATIVE INSTRUMENTS:

Certain SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for third parties. These subsidiaries are subject to market risk on expected future purchases and sales due to commodity price fluctuations. The Company uses a variety of derivative instruments to limit this exposure to market risk in accordance with strict corporate guidelines. These derivative instruments include forward contracts, swap agreements, options contracts and futures contracts. As of September 30, 2016, the Company had outstanding derivative contracts intended to limit the exposure to market risk on 62.9 MMDts (1 MMDts = one million decatherms) of expected future purchases of natural gas, 65.0 MMDts of expected future sales of natural gas, 2.1 Mmmwh (1 Mmmwh = one million megawatt hours) of expected future purchases of electricity and 2.0 Mmmwh of expected future sales of electricity. In addition to these derivative contracts, the Company has basis and index related purchase and sales contracts totaling 126.1 MMDts. These contracts, which have not been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives - Energy Related Assets or Derivatives - Energy Related Liabilities on the condensed consolidated balance sheets. The net unrealized pre-tax gains and losses for these energy-related commodity contracts are included with realized gains and losses in Operating Revenues – Nonutility.

The Company has also entered into interest rate derivatives to hedge exposure to increasing interest rates and the impact of those rates on cash flows of variable-rate debt. These interest rate derivatives, some of which had been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives - Other on the condensed consolidated balance sheets. Hedge accounting has been discontinued for these derivatives. As a result, unrealized gains and losses on these derivatives, that were previously included in Accumulated Other Comprehensive Loss (AOCL) on the condensed consolidated balance sheets, are being recorded in earnings over the remaining life of the derivative. These derivatives are expected to mature in 2026.

As of September 30, 2016, SJI's active interest rate swaps were as follows:

Notional Amount	Fixed Interest Rate	Start Date	Maturity	Type	Obligor
\$14,500,000	3.905%	3/17/2006	1/15/2026	Tax-exempt	Marina
\$500,000	3.905%	3/17/2006	1/15/2026	Tax-exempt	Marina
\$330,000	3.905%	3/17/2006	1/15/2026	Tax-exempt	Marina
\$12,500,000	3.530%	12/1/2006	2/1/2036	Tax-exempt	SJG
\$12,500,000	3.430%	12/1/2006	2/1/2036	Tax-exempt	SJG

The fair values of all derivative instruments, as reflected in the condensed consolidated balance sheets as of September 30, 2016 and December 31, 2015, are as follows (in thousands):

Derivatives not designated as hedging instruments under GAAP	September 30, 2016		December 31, 2015	
	Assets	Liabilities	Assets	Liabilities
Energy-related commodity contracts:				
Derivatives – Energy Related – Current	\$53,780	\$ 66,906	\$83,093	\$90,708
Derivatives – Energy Related – Non-Current	11,566	7,841	16,238	21,697
Interest rate contracts:				
Derivatives - Other - Current	—	939	—	—
Derivatives - Other - Noncurrent	—	13,157	—	10,943
Total derivatives not designated as hedging instruments under GAAP	\$65,346	\$ 88,843	\$99,331	\$123,348

Total Derivatives	\$65,346	\$ 88,843	\$99,331	\$ 123,348
-------------------	----------	-----------	----------	------------

The Company enters into derivative contracts with counterparties, some of which are subject to master netting arrangements, which allow net settlements under certain conditions. The Company presents derivatives at gross fair values on the condensed consolidated balance sheets.

27

Table of Contents

As of September 30, 2016 and December 31, 2015, information related to these offsetting arrangements were as follows (in thousands):

As of September 30, 2016

Description	Gross amounts of recognized assets/liabilities	Gross amount offset in the balance sheet	Net amounts of assets/liabilities in balance sheet	Gross amounts not offset in the balance sheet		Net amount
				Financial Instruments	Cash Collateral Posted	
Derivatives - Energy Related Assets	\$ 65,346	\$	—\$ 65,346	\$(19,902)(A)	\$ —	\$45,444
Derivatives - Energy Related Liabilities	\$ (74,747)	\$	—\$ (74,747)	\$19,902 (B)	\$ 18,448	\$(36,397)
Derivatives - Other	\$ (14,096)	\$	—\$ (14,096)	\$—	\$ —	\$(14,096)

As of December 31, 2015

Description	Gross amounts of recognized assets/liabilities	Gross amount offset in the balance sheet	Net amounts of assets/liabilities in balance sheet	Gross amounts not offset in the balance sheet		Net amount
				Financial Instruments	Cash Collateral Posted	
Derivatives - Energy Related Assets	\$ 99,331	\$	—\$ 99,331	\$(35,491)(A)	\$ —	\$63,840
Derivatives - Energy Related Liabilities	\$ (112,405)	\$	—\$ (112,405)	\$35,491 (B)	\$ 23,045	\$(53,869)
Derivatives - Other	\$ (10,943)	\$	—\$ (10,943)	\$—	\$ —	\$(10,943)

(A) The balances at September 30, 2016 and December 31, 2015 were related to derivative liabilities which can be net settled against derivative assets.

(B) The balances at September 30, 2016 and December 31, 2015 were related to derivative assets which can be net settled against derivative liabilities.

The effect of derivative instruments on the condensed consolidated statements of income for the three and nine months ended September 30, 2016 and 2015 are as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Derivatives in Cash Flow Hedging Relationships under GAAP				
Interest Rate Contracts:				
Losses recognized in AOCL on effective portion	\$—	\$—	\$—	\$—
Losses reclassified from AOCL into income (a)	\$(82)	\$(93)	\$(250)	\$(303)
Gains (losses) recognized in income on ineffective portion (a)	\$—	\$—	\$—	\$—

(a) Included in Interest Charges

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Derivatives Not Designated as Hedging Instruments under GAAP				
Gains (losses) on energy-related commodity contracts (a)	\$9,003	\$(11,992)	\$6,287	\$(4,014)
Gains (losses) on interest rate contracts (b)	218	(435)	(438)	(192)
Total	\$9,221	\$(12,427)	\$5,849	\$(4,206)

(a) Included in Operating Revenues - Nonutility

(b) Included in Interest Charges

A net realized gain of \$0.9 million and a net realized loss of \$1.6 million for the three months ended September 30, 2016 and 2015, respectively, and a net realized loss of \$3.5 million and \$6.4 million for the nine months ended September 30, 2016 and 2015, respectively, associated with SJG's energy-related financial commodity contracts are not included in the above table. These contracts are part of SJG's regulated risk management activities that serve to mitigate BGSS costs passed on to its customers. As these transactions are entered into pursuant to, and recoverable through, regulatory riders, any changes in the value of SJG's energy-related financial commodity contracts are deferred in Regulatory Assets or Liabilities, as applicable, and there is no impact to earnings.

Certain of the Company's derivative instruments contain provisions that require immediate payment or demand immediate and ongoing collateralization on derivative instruments in net liability positions in the event of a material adverse change in the credit standing of the Company. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on September 30, 2016, is \$17.8 million. If the credit-risk-related contingent features underlying these agreements were triggered on September 30, 2016, the Company would have been required to settle the instruments immediately or post collateral to its counterparties of approximately \$15.9 million after offsetting asset positions with the same counterparties under master netting arrangements.

13. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES:

GAAP establishes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques. The levels of the hierarchy are described below:

Level 1: Observable inputs, such as quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of financial assets and financial liabilities and their placement within the fair value hierarchy.

For financial assets and financial liabilities measured at fair value on a recurring basis, information about the fair value measurements for each major category is as follows (in thousands):

Table of Contents

As of September 30, 2016	Total	Level 1	Level 2	Level 3
Assets				
Available-for-Sale Securities (A)	\$ 15,604	\$ 3,099	\$ 12,505	\$—
Derivatives – Energy Related Assets (B)	65,346	11,239	10,643	43,464
	\$ 80,950	\$ 14,338	\$ 23,148	\$ 43,464
Liabilities				
Derivatives – Energy Related Liabilities (B)	\$ 74,747	\$ 13,409	\$ 25,759	\$ 35,579
Derivatives – Other (C)	14,096	—	14,096	—
	\$ 88,843	\$ 13,409	\$ 39,855	\$ 35,579
As of December 31, 2015				
Assets				
Available-for-Sale Securities (A)	\$ 14,810	\$ 2,925	\$ 11,885	\$—
Derivatives – Energy Related Assets (B)	99,331	16,006	24,730	58,595
	\$ 114,141	\$ 18,931	\$ 36,615	\$ 58,595
Liabilities				
Derivatives – Energy Related Liabilities (B)	\$ 112,405	\$ 42,170	\$ 11,008	\$ 59,227
Derivatives – Other (C)	10,943	—	10,943	—
	\$ 123,348	\$ 42,170	\$ 21,951	\$ 59,227

(A) Available-for-Sale Securities include securities that are traded in active markets and securities that are not traded publicly. The securities traded in active markets are valued using the quoted principal market close prices that are provided by the trustees and are categorized in Level 1 in the fair value hierarchy. The remaining securities consist of funds that are not publicly traded. These funds, which consist of stocks and bonds that are traded individually in active markets, are valued using quoted prices for similar assets and are categorized in Level 2 in the fair value hierarchy.

(B) Derivatives – Energy Related Assets and Liabilities are traded in both exchange-based and non-exchange-based markets. Exchange-based contracts are valued using unadjusted quoted market sources in active markets and are categorized in Level 1 in the fair value hierarchy. Certain non-exchange-based contracts are valued using indicative price quotations available through brokers or over-the-counter, on-line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid-ask mid-point prices and are obtained from sources that management believes provide the most liquid market. For non-exchange-based derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable inputs. In instances where observable data is unavailable, management considers the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility and contract duration. Such instruments are categorized in Level 3 as the model inputs generally are not observable.

Significant Unobservable Inputs - Management uses the discounted cash flow model to value Level 3 physical and financial forward contracts, which calculates mark-to-market valuations based on forward market prices, original transaction prices, volumes, risk-free rate of return and credit spreads. Inputs to the valuation model are reviewed and revised as needed, based on historical information, updated market data, market liquidity and relationships, and changes in third party pricing sources. The validity of the mark-to-market valuations and changes in mark-to-market valuations from period to period are examined and qualified against historical expectations by the risk management function. If any discrepancies are identified during this process, the mark-to-market valuations or the market pricing

information is evaluated further and adjusted, if necessary.

30

Table of Contents

Level 3 valuation methods for natural gas derivative contracts include utilizing another location in close proximity adjusted for certain pipeline charges to derive a basis value. The significant unobservable inputs used in the fair value measurement of certain natural gas contracts consist of forward prices developed based on industry-standard methodologies. Significant increases (decreases) in these forward prices for purchases of natural gas would result in a directionally similar impact to the fair value measurement and for sales of natural gas would result in a directionally opposite impact to the fair value measurement. Level 3 valuation methods for electric represent the value of the contract marked to the forward wholesale curve, as provided by daily exchange quotes for delivered electricity. The significant unobservable inputs used in the fair value measurement of electric contracts consist of fixed contracted electric load profiles; therefore, no change in unobservable inputs would occur. Unobservable inputs are updated daily using industry-standard techniques. Management reviews and corroborates the price quotations to ensure the prices are observable which includes consideration of actual transaction volumes, market delivery points, bid-ask spreads and contract duration.

(C) Derivatives – Other are valued using quoted prices on commonly quoted intervals, which are interpolated for periods different than the quoted intervals, as inputs to a market valuation model. Market inputs can generally be verified and model selection does not involve significant management judgment.

The following table provides quantitative information regarding significant unobservable inputs in Level 3 fair value measurements (in thousands):

Type	Fair Value at September 30, 2016		Valuation Technique	Significant Unobservable Input	Range [Weighted Average]	
	Assets	Liabilities				
Forward Contract - Natural Gas	\$27,534	\$21,753	Discounted Cash Flow	Forward price (per dt)	\$0.71 - \$9.27 [\$2.07]	(A)
Forward Contract - Electric	\$15,930	\$13,826	Discounted Cash Flow	Fixed electric load profile (on-peak)	21.43% - 100.00% [56.05%]	(B)
				Fixed electric load profile (off-peak)	0.00% - 78.57% [43.95%]	(B)
Type	Fair Value at December 31, 2015		Valuation Technique	Significant Unobservable Input	Range [Weighted Average]	
	Assets	Liabilities				
Forward Contract - Natural Gas	\$29,459	\$31,733	Discounted Cash Flow	Forward price (per dt)	\$(0.77) - \$10.00 [\$2.15]	(A)
Forward Contract - Electric	\$29,136	\$27,494	Discounted Cash Flow	Fixed electric load profile (on-peak)	8.47% - 100.00% [56.20%]	(B)
				Fixed electric load profile (off-peak)	0.00% - 91.53% [43.80%]	(B)

(A) Represents the range, along with the weighted average, of forward prices for the sale and purchase of natural gas.

(B) Represents the range, along with the weighted average, of the percentage of contracted usage that is loaded during on-peak hours versus off-peak.

Table of Contents

The changes in fair value measurements of Derivatives – Energy Related Assets and Liabilities for the three and nine months ended September 30, 2016 and 2015, using significant unobservable inputs (Level 3), are as follows (in thousands):

	Three Months Ended September 30, 2016	Nine Months Ended September 30, 2016
Balance at beginning of period	\$ (2,096)	\$ (632)
Other changes in fair value from continuing and new contracts, net Settlements	10,404 (423)	8,346 171
Balance at end of period	\$ 7,885	\$ 7,885
	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2015
Balance at beginning of period	\$ (2,544)	\$ (5,608)
Other changes in fair value from continuing and new contracts, net Transfers in/(out) of Level 3 (A) Settlements	(10,725) — (1,396)	(12,787) 2,054 1,676
Balance at end of period	\$ (14,665)	\$ (14,665)

(A) Transfers between different levels of the fair value hierarchy may occur based on the level of observable inputs used to value the instruments from period to period. During the nine months ended September 30, 2015, \$2.1 million of net derivative assets were transferred from Level 2 to Level 3, due to decreased observability of market data.

Total gains included in earnings for the three and nine months ended September 30, 2016 that are attributable to the change in unrealized gains relating to those assets and liabilities included in Level 3 still held as of September 30, 2016, are \$10.4 million and \$8.3 million, respectively. These gains are included in Operating Revenues-Nonutility on the condensed consolidated statements of income.

14. LONG-TERM DEBT:

In January 2016, the Company paid \$12.7 million to retire outstanding debt for ACB.

In January 2016, SJG issued \$61.0 million of long-term debt at an average interest rate of 1.37% under a \$200.0 million aggregate syndicated bank term facility. The facility is now fully drawn. The total outstanding amount under this facility as of September 30, 2016 is \$200.0 million, which is classified in current portion of long-term debt on the condensed consolidated balance sheets as it is due within one year. SJG is evaluating alternatives, including refinancing or renewing the facility.

As of June 30, 2016, \$16.0 million of aggregate principal amount of 2.71% Senior Notes, due June 2017, were reclassified to current portion of long-term debt on the condensed consolidated balance sheets. At this time, the Company plans to pay off this debt at maturity.

In July 2016, SJG retired \$17.0 million of 4.60% Medium Term Notes (MTN's) at maturity.

In August 2016, SJG retired \$10.0 million of 5.437% MTN's at maturity.

In August 2016, the Company paid an aggregate \$8.3 million to retire outstanding long-term debt for ACLE, SCLE and SXLE.

The Company did not issue or retire any other long-term debt during the nine months ended September 30, 2016.

Table of Contents

15. ACCUMULATED OTHER COMPREHENSIVE LOSS:

The following tables summarize the changes in accumulated other comprehensive loss (AOCL) for the three and nine months ended September 30, 2016 (in thousands):

	Postretirement Liability Adjustment	Unrealized Gain (Loss) on Derivatives-Other	Unrealized Gain (Loss) on Available-for-Sale Securities	Other Comprehensive Income (Loss) of Affiliated Companies	Total
Balance at July 1, 2016 (a)	\$ (22,145)	\$ (2,029)	\$ (24)	\$ (97)	\$ (24,295)
Other comprehensive income before reclassifications	—	—	167	—	167
Amounts reclassified from AOCL (b)	—	49	(13)	—	36
Net current period other comprehensive income	—	49	154	—	203
Balance at September 30, 2016 (a)	\$ (22,145)	\$ (1,980)	\$ 130	\$ (97)	\$ (24,092)

	Postretirement Liability Adjustment	Unrealized Gain (Loss) on Derivatives-Other	Unrealized Gain (Loss) on Available-for-Sale Securities	Other Comprehensive Income (Loss) of Affiliated Companies	Total
Balance at January 1, 2016 (a)	\$ (22,145)	\$ (2,129)	\$ (128)	\$ (97)	\$ (24,499)
Other comprehensive income before reclassifications	—	—	304	—	304
Amounts reclassified from AOCL (b)	—	149	(46)	—	103
Net current period other comprehensive income	—	149	258	—	407
Balance at September 30, 2016 (a)	\$ (22,145)	\$ (1,980)	\$ 130	\$ (97)	\$ (24,092)

(a) Determined using a combined average statutory tax rate of 40%.

(b) See table below.

Table of Contents

The following table provides details about reclassifications out of AOCL for the three and nine months ended September 30, 2016:

	Amounts Reclassified from AOCL (in thousands)		Affected Line Item in the Condensed Consolidated Statements of Income
	Three Months Ended September 30, 2016	Nine Months Ended September 30, 2016	
Unrealized Loss on Derivatives-Other - interest rate contracts designated as cash flow hedges	\$82	\$ 250	Interest Charges
Income Taxes	(33)	(101)	Income Taxes (a)
	\$49	\$ 149	
Unrealized Gain on Available-for-Sale Securities	\$(24)	\$ (84)	Other Income
Income Taxes	11	38	Income Taxes (a)
	\$(13)	\$ (46)	
Losses from reclassifications for the period net of tax	\$36	\$ 103	

(a) Determined using a combined average statutory tax rate of 40%.

16. SUBSEQUENT EVENT:

In October 2016, the BPU approved SJG's request to extend its AIRP for a five-year period commencing October 1, 2016 and ending September 30, 2021, with authorized investments of up to \$302.5 million to continue replacing cast iron and unprotected bare steel mains and associated services (AIRP II). Cost recovery of AIRP II investments, including a return on SJG's investments, will be accomplished through annual base rate adjustments that will occur on October 1st of each year of the program. The BPU also approved an increase in annual revenues from base rates of \$11.0 million, including taxes, to reflect the roll-in of the remaining \$74.5 million of prior AIRP investments, made from the time of SJG's last base rate case through the end of the first AIRP program, that were not yet reflected in rates. These rates will be effective as of December 1, 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements and Risk Factors — This Quarterly Report, including information incorporated by reference, contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995.

All statements other than statements of historical fact, including statements regarding future results of operations or financial position, expected sources of incremental margin, strategy, financing needs, future capital expenditures and the outcome or effect of ongoing litigation, are forward-looking. This Quarterly Report uses words such as "anticipate," "believe," "expect," "estimate," "forecast," "goal," "intend," "objective," "plan," "project," "seek," "strategy," "target," "will" and similar expressions to identify forward-looking statements. These forward-looking statements are based on the beliefs and assumptions of management at the time that these statements were made and are inherently uncertain. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. These risks and uncertainties include, but are not limited to, general economic conditions on an international, national, state and local level; weather conditions in SJI's marketing areas; changes in commodity costs; changes in the availability of natural gas; "non-routine" or "extraordinary" disruptions in SJI's distribution system; regulatory, legislative and court decisions; competition; the availability and cost of capital; costs and effects of legal proceedings and environmental liabilities; the failure of customers, suppliers or business partners to fulfill their contractual obligations; and changes in business strategies. These risks and uncertainties, as well as other risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements, are described in greater detail under the heading "Item 1A. Risk factors" in this Quarterly Report and in SJI's Annual Report on Form 10-K for the year ended December 31, 2015 and in any other SEC filings incorporated by reference into this Quarterly Report. No assurance can be given that any goal or plan set forth in any forward-looking statement can or will be achieved, and readers are cautioned not to place undue reliance on such statements, which speak only as of the date they are made. SJI undertakes no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Critical Accounting Policies — Estimates and Assumptions — Management must make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and related disclosures. Actual results could differ from those estimates. Five types of transactions presented in our condensed consolidated financial statements require a significant amount of judgment and estimation. These relate to regulatory accounting, derivatives, environmental remediation costs, pension and other postretirement employee benefit costs, and revenue recognition. A discussion of these estimates and assumptions may be found in SJI's Annual Report on Form 10-K for the year ended December 31, 2015.

New Accounting Pronouncements — See detailed discussions concerning New Accounting Pronouncements and their impact on SJI in Note 1 to the condensed consolidated financial statements.

Regulatory Actions — Other than the changes discussed in Note 7 to the condensed consolidated financial statements, there have been no significant regulatory actions since December 31, 2015. See detailed discussion concerning Regulatory Actions in Note 10 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015.

Environmental Remediation — Other than the changes discussed in Note 8 to the condensed consolidated financial statements, there have been no significant changes to the status of the Company's environmental remediation efforts since December 31, 2015. See detailed discussion concerning Environmental Remediation Costs in Note 15 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015.

Table of Contents

RESULTS OF OPERATIONS:

SJI operates in several different reportable operating segments. These segments are as follows:

Gas utility operations (SJG) consist primarily of natural gas distribution to residential, commercial and industrial customers.

Wholesale energy operations include the activities of South Jersey Resources Group, LLC (SJRG) and South Jersey Exploration, LLC (SJEX).

South Jersey Energy Company (SJE) is involved in both retail gas and retail electric activities.

Retail gas and other operations include natural gas acquisition and transportation service business lines.

Retail electric operations consist of electricity acquisition and transportation to commercial, industrial and residential customers.

On-site energy production consists of Marina Energy, LLC (Marina's) thermal energy facility and other energy-related projects. Also included in this segment are the activities of ACB Energy Partners, LLC (ACB), AC Landfill Energy, LLC (ACLE), BC Landfill Energy, LLC (BCLE), SC Landfill Energy, LLC (SCLE), SX Landfill Energy, LLC (SXLE), MCS Energy Partners, LLC (MCS), NBS Energy Partners, LLC (NBS) and SBS Energy Partners, LLC (SBS). These entities became wholly-owned subsidiaries of Marina on December 31, 2015 (see Note 3 to the condensed consolidated financial statements).

Appliance service operations includes South Jersey Energy Service Plus, LLC (SJESP), which services residential and small commercial HVAC systems, installs small commercial HVAC systems, provides plumbing services and services appliances under warranty via a subcontractor arrangement as well as on a time and materials basis.

SJI Midstream, LLC (Midstream) was formed in 2014 to invest in infrastructure and other midstream projects, including a current project to build a 100-mile natural gas pipeline in Pennsylvania and New Jersey. The activities of Midstream are a part of the Corporate and Services segment.

SJI groups its nonutility operations into two categories: Energy Group and Energy Services. Energy Group includes wholesale energy, retail gas and other, and retail electric operations. Energy Services includes on-site energy production and appliance service operations.

SJI's net income for the three months ended September 30, 2016 increased \$22.3 million to \$9.6 million compared with the same period in 2015, primarily as a result of the following:

The net income contribution from the wholesale energy operations at SJRG for the three months ended September 30, 2016 increased \$12.3 million to \$5.0 million, primarily due to the change in unrealized gains and losses on derivatives used by the wholesale energy operations to mitigate natural gas commodity price risk, as discussed under "Operating Revenues - Energy Group" below.

The net income contribution from on-site energy production at Marina for the three months ended September 30, 2016 increased \$8.3 million to \$8.6 million. This was primarily due to the following:

\$5.1 million increase due to several new renewable energy projects that began operations over the past twelve months, along with higher prices on solar renewable energy credits (SRECs) compared to the previous year, as discussed in "Gross Margin - Energy Services" below.

\$3.2 million increase due to a settlement at Marina in 2016 (see in Note 5 to the condensed consolidated financial statements).

The net income contribution from retail gas and electric operations at SJE for the three months ended September 30, 2016 increased \$1.5 million to a net loss of \$0.8 million, primarily due to the change in unrealized gains and losses on

forward financial contracts used to mitigate price risk on retail gas as discussed under "Operating Revenues – Energy Group" below.

Table of Contents

SJI's net income for the nine months ended September 30, 2016 increased \$18.7 million to \$72.9 million compared with the same period in 2015, primarily as a result of the following:

The net income contribution from the wholesale energy operations at SJRG for the nine months ended September 30, 2016 increased \$7.5 million to \$9.6 million. This was primarily due to an approximately \$6.2 million increase related to additional capacity and increased storage volumes sold, as discussed under "Gross Margin - Energy Group" below, along with an approximately \$1.3 million increase resulting from the change in unrealized gains and losses on derivatives used by the wholesale energy operations to mitigate natural gas commodity price risk, as discussed under "Operating Revenues - Energy Group" below.

The net income contribution from on-site energy production at Marina for the nine months ended September 30, 2016 increased \$6.1 million to \$12.3 million, primarily due to the following:

\$8.7 million increase due to the impact of a reduction in the carrying amount of an investment at one of Energenic's operating subsidiaries, which occurred in 2015 (see Note 5 to the condensed consolidated financial statements).

\$6.9 million increase due to several new renewable energy projects that began operations over the past twelve months, along with higher prices on SRECs compared to the previous year as discussed in "Gross Margin - Energy Services" below.

\$4.5 million increase due to a settlement at Marina in 2016 (see in Note 5 to the condensed consolidated financial statements).

\$14.0 million decrease due to a projected decrease in the investment tax credits available on renewable energy facilities, as compared to the same period in 2015. This reduction is consistent with the Company's previously announced strategy of substantially reducing solar development in 2016.

The net income contribution from retail gas and electric operations at SJE for the nine months ended September 30, 2016 increased \$4.3 million to \$4.4 million, primarily due to the change in unrealized gains and losses on forward financial contracts used to mitigate price risk on retail gas as discussed under "Operating Revenues – Energy Group" below.

A significant portion of the volatility in operating results is due to the impact of the accounting methods associated with SJI's derivative activities. The Company uses derivatives to limit its exposure to market risk on transactions to buy, sell, transport and store natural gas and to buy and sell retail electricity. The Company also uses derivatives to limit its exposure to increasing interest rates on variable-rate debt.

The types of transactions that cause the most significant volatility in operating results are as follows:

The wholesale energy operations at SJRG purchases and holds natural gas in storage and maintains capacity on interstate pipelines to earn profit margins in the future. The wholesale energy operations utilize derivatives to mitigate price risk in order to substantially lock-in the profit margin that will ultimately be realized. However, both gas stored in inventory and pipeline capacity are not considered derivatives and are not subject to fair value accounting. Conversely, the derivatives used to reduce the risk associated with a change in the value of the inventory and pipeline capacity are accounted for at fair value, with changes in fair value recorded in operating results in the period of change. As a result, earnings are subject to volatility as the market price of derivatives change, even when the underlying hedged value of the inventory and pipeline capacity are unchanged. Additionally, volatility in earnings is created when realized gains and losses on derivatives used to mitigate commodity price risk on expected future purchases of gas injected into storage are recognized in earnings when the derivatives settle, but the cost of the related gas in storage is not recognized in earnings until the period of withdrawal. This volatility can be significant from period to period. Over time, gains or losses on the sale of gas in storage, as well as use of capacity, will be offset by losses or gains on the derivatives, resulting in the realization of the profit margin expected when the transactions were

initiated.

The retail electric operations at SJE use forward contracts to mitigate commodity price risk on fixed price electric contracts with customers. In accordance with GAAP, the forward contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. Several related customer contracts are not considered derivatives and, therefore, are not recorded in earnings until the electricity is delivered. As a result, earnings are subject to volatility as the market price of the forward contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward contracts, resulting in the realization of the profit margin expected when the transactions were initiated.

Table of Contents

As a result, management also uses the non-generally accepted accounting principles (non-GAAP) financial measures of Economic Earnings and Economic Earnings per share when evaluating the results of operations for its nonutility operations. These non-GAAP financial measures should not be considered as an alternative to GAAP measures, such as net income, operating income, earnings per share from continuing operations or any other GAAP measure of liquidity or financial performance.

We define Economic Earnings as: Income from continuing operations, (a) less the change in unrealized gains and plus the change in unrealized losses, as applicable and in each case after tax, on all derivative transactions; (b) less realized gains and plus realized losses, as applicable and in each case after tax, on all commodity derivative transactions attributed to expected purchases of gas in storage to match the recognition of these gains and losses with the recognition of the related cost of the gas in storage in the period of withdrawal; and (c) less the impact of transactions or contractual arrangements where the true economic impact will be realized in a future period. With respect to the third part of the definition of Economic Earnings:

For the three and nine months ended September 30, 2016 and 2015, Economic Earnings includes additional depreciation expense on a solar generating facility. During 2012, an impairment charge was recorded within Income from Continuing Operations on a solar generating facility which reduced its depreciable basis and recurring depreciation expense. This impairment charge was excluded from Economic Earnings and, therefore, the related reduction in depreciation expense is being added back.

For the nine months ended September 30, 2015, Economic Earnings includes a pre-tax loss of \$2.5 million from affiliated companies that, in the periods prior to the second quarter of 2015, were not included in Economic Earnings. These adjustments are the result of a reserve for uncollectible accounts recorded by an Energenic subsidiary that owned and operated a central energy center and energy distribution system for a hotel, casino and entertainment complex in Atlantic City, New Jersey (see Note 5 to the condensed consolidated financial statements). In the periods prior to the second quarter of 2015, this charge was excluded from Economic Earnings until the total economic impact of the proceedings was realized. During the second quarter of 2015, the Company, through its investment in Energenic, reduced the carrying value of the investment in this project. As such, this charge is included in Economic Earnings for the nine months ended September 30, 2015.

Economic Earnings is a significant performance metric used by our management to indicate the amount and timing of income from continuing operations that we expect to earn after taking into account the impact of derivative instruments on the related transactions and transactions or contractual arrangements where the true economic impact will be realized in a future period. Specifically, we believe that this financial measure indicates to investors the profitability of the entire derivative-related transaction and not just the portion that is subject to mark-to-market valuation under GAAP. Considering only the change in market value on the derivative side of the transaction can produce a false sense as to the ultimate profitability of the total transaction as no change in value is reflected for the non-derivative portion of the transaction.

Economic Earnings for the three months ended September 30, 2016 increased \$8.9 million to \$3.9 million compared with the same period in 2015, primarily as a result of the following:

The income contribution from on-site energy production at Marina for the three months ended September 30, 2016 increased \$7.9 million to \$8.5 million, primarily due to the following:

\$4.7 million increase due to several new renewable energy projects that began operations over the past twelve months, along with higher prices on solar renewable energy credits (SRECs) compared to the previous year as discussed in "Gross Margin - Energy Services" below.

\$3.2 million increase due to a settlement at Marina in 2016 (see in Note 5 to the condensed consolidated financial statements).

Table of Contents

Economic Earnings for the nine months ended September 30, 2016 increased \$13.9 million to \$69.6 million compared with the same period in 2015 primarily as a result of the following:

The income contribution from on-site energy production at Marina for the nine months ended September 30, 2016 increased \$7.8 million to \$12.6 million primarily due to the following:

\$11.1 million increase due to the impact of a reduction in the carrying amount of an investment at one of Energenic's operating subsidiaries, which occurred in 2015 (see Note 5 to the condensed consolidated financial statements), \$6.2 million increase due to several new renewable energy projects that began operations over the past twelve months, along with higher prices on SRECs compared to the previous year as discussed in "Gross Margin - Energy Services" below.

\$4.5 million increase due to a settlement at Marina in 2016 (see in Note 5 to the condensed consolidated financial statements)

\$14.0 million decrease due to a projected decrease in the investment tax credits available on renewable energy facilities as compared to the same period in 2015. This reduction is consistent with the Company's previously announced strategy of substantially reducing solar development in 2016.

The income contribution from the wholesale energy operations at SJRG for the nine months ended September 30, 2016 increased \$6.2 million to \$9.0 million primarily due to additional capacity along with increased storage volumes sold as discussed under "Gross Margin - Energy Group" below.

The following table presents a reconciliation of our income from continuing operations and earnings per share from continuing operations to Economic Earnings and Economic Earnings per share for the three and nine months ended September 30 (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Income (Loss) from Continuing Operations	\$9,664	\$(12,532)	\$73,053	\$54,662
Minus/Plus:				
Unrealized Mark-to-Market (Gains) Losses on Derivatives*	(9,459)	12,600	(5,548)	4,449
Realized (Gains) Losses on Inventory Injection Hedges*	(39)	24	(12)	87
Net Loss from Affiliated Companies (A)*	—	—	—	(2,540)
Other (B)*	(41)	(41)	(124)	(124)
Income Taxes (C)	3,816	(5,033)	2,273	(749)
Economic Earnings	\$3,941	\$(4,982)	\$69,642	\$55,785
Earnings per Share from Continuing Operations	\$0.12	\$(0.18)	\$0.97	\$0.80
Minus/Plus:				
Unrealized Mark-to-Market (Gains) Losses on Derivatives*	(0.12)	0.18	(0.08)	0.07

Income Taxes (C)	0.05	(0.07)	0.03	(0.01)
Economic Earnings per Share	\$0.05	\$(0.07)	\$0.92	\$0.82

Table of Contents

The effect of derivative instruments not designated as hedging instruments under GAAP in the condensed consolidated statements of income (see Note 12 to the condensed consolidated financial statements) is as follows (gains (losses) in thousands):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Gains (losses) on energy related commodity contracts	\$9,003	\$(11,992)	\$6,287	\$(4,014)
Gains (losses) on interest rate contracts	218	(435)	(438)	(192)
Total before income taxes	9,221	(12,427)	5,849	(4,206)
Unrealized mark-to-market gains (losses) on derivatives held by affiliated companies, before taxes*	238	(173)	(301)	(243)
Total unrealized mark-to-market gains (losses) on derivatives*	9,459	(12,600)	5,548	(4,449)
Realized gains (losses) on inventory injection hedges*	39	(24)	12	(87)
Net Loss from Affiliated Companies (A)*	—	—	—	2,540
Other (B)*	41	41	124	124
Income taxes (C)	(3,816)	5,033	(2,273)	749
Total reconciling items between income (losses) from continuing operations and economic earnings	\$5,723	\$(7,550)	\$3,411	\$(1,123)

* Certain reclassifications have been made to the prior period numbers in these tables to conform to the current period presentation. The prior period numbers in these line items have been adjusted to be presented before income taxes.

(A) Resulting from a reserve for uncollectible accounts recorded by an Energenic subsidiary that owned and operated a central energy center and energy distribution system for a hotel, casino and entertainment complex in Atlantic City, New Jersey (see Note 5 to the condensed consolidated financial statements). In the periods prior to the second quarter of 2015, this charge was excluded from Economic Earnings until the total economic impact of the proceedings was realized. During the second quarter of 2015, the Company, through its investment in Energenic, reduced the carrying value of the investment in this project. As such, this charge is included in Economic Earnings for the nine months ended September 30, 2015.

(B) Represents additional depreciation expense within Economic Earnings on a solar generating facility. During 2012, an impairment charge was recorded within Income from Continuing Operations on a solar generating facility which reduced its depreciable basis and recurring depreciation expense. This impairment charge was excluded from Economic Earnings and, therefore, the related reduction in depreciation expense is being added back.

(C) Determined using a combined average statutory tax rate of 40%.

Table of Contents

The following tables summarize the composition of selected gas utility operations data for the three and nine months ended September 30 (in thousands, except for degree day data):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Utility Throughput – decatherms (dt):				
Firm Sales -				
Residential	1,320	1,499	15,490	18,788
Commercial	470	593	3,557	4,944

Degree Days:	14	3	2,810	3,343

*Represents expenses for which there is a corresponding credit in operating revenues. Therefore, such recoveries have no impact on SJG's financial results.

**Utility Margin is further defined under the caption "Margin - Gas Utility Operations" below.

Throughput - Gas Utility Operations -Total gas throughput increased by 4.8 MMdts and 5.6 MMdts during the three and nine months ended September 30, 2016, respectively, compared to the same periods in 2015, primarily due to increases in capacity release in both periods in 2016. The increases in capacity release volume are primarily related to specific releases made of Columbia pipeline capacity that did not occur in the same periods in 2015. An increase in third-party supplier deliveries on Columbia pipeline to SJG's system freed up capacity at SJG and allowed for additional capacity release of 3.3 MMdts and 8.2 MMdts during the three and nine month periods ended September 30, 2016, respectively, compared to the same periods in 2015. Off-System Sales (OSS) volume also increased 1.4 MMdts and 2.5 MMdts during the three and nine months ended September 30, 2016, respectively, compared to the same periods in 2015, primarily due to increased opportunity to supply natural gas to gas-fired power generation facilities during the summer months of 2016.

Table of Contents

Total firm throughput was relatively unchanged during the three months ended September 30, 2016, compared with the same period in 2015. Total firm throughput decreased 4.9 MMDts, or 10.6%, for the nine months ended September 30, 2016, compared to the same period in 2015. The primary reason for the decrease was unseasonably warm weather that was 16.0% warmer during the first nine months of 2016, compared to the same period in 2015. The negative impact of weather on firm throughput was partially offset by the addition of 4,830 customers, a 1.3% increase over the last twelve months.

Conservation Incentive Program (CIP) - Gas Utility Operations - The effects of the CIP on net income of the gas utility operations for the three and nine months ended September 30, 2016 and 2015 and the associated weather comparisons are as follows (dollars in millions):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Net Income Impact:				
CIP – Weather Related	\$—	\$—	\$2.9	\$(7.3)
CIP – Usage Related	0.3	(1.1)	2.1	(4.7)
Total Net Income Impact	\$0.3	\$(1.1)	\$5.0	\$(12.0)
Weather Compared to 20-Year Average	n/a	n/a	7.1%	14.7%
			Warmer	Colder
Weather Compared to Prior Year	n/a	n/a	15.9%	1.7%
			Warmer	Colder

Operating Revenues - Gas Utility Operations - Revenues increased \$3.5 million, or 6.1%, during the three months ended September 30, 2016, compared with the same period in 2015, after eliminating intercompany transactions. Total firm revenue was relatively unchanged during the three months ended September 30, 2016, compared with the same period in 2015.

The increase in OSS volume, discussed above under "Throughput - Gas Utility Operations," coupled with a 6% increase in unit prices, resulted in a corresponding increase in revenue during the nine months ended September 30, 2016, compared with the same period in 2015. While capacity release throughput increased significantly during the third quarter, lower unit prices prevailed in the market, which netted to a slight revenue decrease in the third quarter of 2016, compared with the same period last year. The impact of changes in OSS and capacity release activity does not have a material impact on the earnings of SJG, as SJG is required to return 85% of the profits of such activity to its ratepayers. Earnings from OSS and capacity release can be seen in the "Margin" table above.

Revenues decreased \$86.4 million, or 21.6%, during the nine months ended September 30, 2016, compared with the same period in 2015 after eliminating intercompany transactions. Total firm revenue was \$82.5 million lower during the nine months ended September 30, 2016 compared to the same period in the prior year, due to several factors. Firm throughput was significantly lower during the first nine months of 2016, compared to the same period in the prior year, as discussed above under "Throughput - Gas Utility Operations." The impact of this reduction in throughput lowered SJG's recovery of natural gas costs through its Basic Gas Supply Service (BGSS) mechanism by \$44.2 million. In addition, SJG reduced its BGSS rate effective October 1, 2015 by 18.6%, further reducing revenue by \$25.9 million during the first nine months of 2016. Finally, SJG provided a \$20.0 million BGSS bill credit to its residential and small commercial customers in January 2016, of which \$18.7 million reduced revenue for the first nine

months of 2016, after consideration for sales tax. While changes in natural gas costs and BGSS recoveries/refunds fluctuate from period to period, SJG does not profit from the sale of the commodity. Therefore, fluctuations in Operating Revenue and Cost of Sales, such as those discussed above, did not have an impact on SJG's profitability.

Despite the increase in OSS discussed above under "Throughput - Gas Utility Operations," a 33% reduction in unit prices resulted in a net decrease of \$4.6 million in OSS revenues during the nine months ended September 30, 2016 compared with the same period in 2015. Capacity release revenue increased \$4.5 million as a result of specific releases to Transco Zone 5 at a relatively high value, which primarily occurred during the first quarter of 2016. However, as previously discussed, the impact of changes in OSS and capacity release activity does not have a material impact on the earnings of SJG.

Operating Revenues - Energy Group - Combined revenues for Energy Group, net of intercompany transactions, increased \$65.0 million, or 102.1%, to \$128.6 million, and increased \$71.7 million, or 28.5%, to \$323.2 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Table of Contents

Revenues from retail gas operations at SJE, net of intercompany transactions, decreased \$0.3 million, or 2.5%, and \$5.0 million, or 7.4%, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Excluding the change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(2.6) million and \$(8.1) million, revenues decreased \$2.9 million, or 18.0%, and \$13.1 million, or 18.5%, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

A summary of SJE's retail gas revenue is as follows (in millions):

	Three Months Ended			Nine Months Ended		
	September 30,			September 30,		
	2016	2015	Change	2016	2015	Change
SJE Retail Gas Revenue	\$11.5	\$11.8	\$(0.3)	\$62.6	\$67.6	\$(5.0)
Add: Unrealized Losses (Subtract: Unrealized Gains)	1.7	4.3	(2.6)	(4.8)	3.3	(8.1)
SJE Retail Gas Revenue, Excluding Unrealized Losses (Gains)	\$13.2	\$16.1	\$(2.9)	\$57.8	\$70.9	\$(13.1)

The decrease in revenues for the three months ended September 30, 2016 compared with the same period in 2015 was mainly due to an 8.8% decrease in sales volumes, partially offset by a 2.0% increase in the average monthly New York Mercantile Exchange (NYMEX) settle price. The decrease in revenues for the nine months ended September 30, 2016 compared with the same period in 2015 was mainly due to an 18.0% decrease in the average monthly NYMEX settle price.

Revenues from retail electric operations at SJE, net of intercompany transactions, increased \$6.7 million, or 15.7%, and \$23.2 million, or 21.8%, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$0.6 million and \$(0.2) million, revenues increased \$7.3 million, or 17.2%, and \$23.0 million, or 21.7%, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

A summary of revenues from retail electric operations at SJE is as follows (in millions):

	Three Months Ended			Nine Months Ended		
	September 30,			September 30,		
	2016	2015	Change	2016	2015	Change
SJE Retail Electric Revenue	\$49.3	\$42.6	\$ 6.7	\$129.5	\$106.3	\$23.2
Add: Unrealized Losses (Subtract: Unrealized Gains)	0.4	(0.2)	0.6	(0.5)	(0.3)	(0.2)
SJE Retail Electric Revenue, Excluding Unrealized Losses (Gains)	\$49.7	\$42.4	\$ 7.3	\$129.0	\$106.0	\$23.0

The increase in revenues from retail electric operations at SJE, as defined above, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015, was mainly due to a 13.5% and 18.6% increase, respectively, in sales volumes, partially offset by a 32.6% and 26.2% decrease, respectively, in the average monthly sales price, which was driven by a lower average Locational Marginal Price (LMP) per megawatt hour. SJE uses forward financial contracts to mitigate commodity price risk on fixed price electric contracts. In accordance with GAAP, the forward financial contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. The related customer contracts are not considered derivatives and, therefore, are not recorded in earnings until the electricity is delivered. As a result, earnings are subject to volatility as the market price of the forward financial contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward financial contracts, resulting in the realization of the profit margin expected when the transactions were

initiated. The retail electric operations at SJE serve both fixed and market-priced customers.

Revenues from wholesale energy operations at SJRG, net of intercompany transactions, increased \$58.6 million and \$54.1 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(18.8) million and \$(2.0) million, revenues from the wholesale energy operations at SJRG increased \$39.8 million and \$52.1 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Table of Contents

A summary of revenues from wholesale energy operations at SJRG is as follows (in millions):

	Three Months Ended			Nine Months Ended		
	September 30,			September 30,		
	2016	2015	Change	2016	2015	Change
SJRG Revenue	\$67.9	\$9.3	\$58.6	\$131.6	\$77.5	\$54.1
Add: Unrealized Losses (Subtract: Unrealized Gains)	(11.0)	7.8	(18.8)	(1.0)	1.0	(2.0)
Add: Realized Losses (Subtract: Realized Gains) on Inventory Injection Hedges	—	—	—	0.1	0.1	—
SJRG Revenue, Excluding Unrealized Losses (Gains) and Realized Losses (Gains) on Inventory Injection Hedges	\$56.9	\$17.1	\$39.8	\$130.7	\$78.6	\$52.1

The increase in revenues from the wholesale energy operations at SJRG, as defined above, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015, was primarily due to revenues earned on gas supply contracts with two electric generation facilities, along with additional capacity and an 85.1% and 24.2% increase, respectively, in storage volumes sold. The nine month comparative period increase was partially offset by an 18.0% decrease in the average monthly NYMEX settle price. As discussed in Note 1 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015, revenues and expenses related to the energy trading activities of the wholesale energy operations at SJRG are presented on a net basis in Operating Revenues – Nonutility on the condensed consolidated income statement.

Operating Revenues - Energy Services - Combined revenues for Energy Services, net of intercompany transactions, increased \$9.6 million, or 48.0%, to \$29.5 million and \$19.5 million, or 38.3%, to \$70.4 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Revenues from on-site energy production at Marina, net of intercompany transactions, increased \$10.0 million, or 57.0%, to \$27.7 million and \$21.1 million, or 48.4%, to \$64.7 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. These increases were primarily due to higher prices on SREC's compared to the previous periods, an increase in SRECs transferred due to new solar projects and the revenues earned at several entities that became wholly owned by Marina as of December 31, 2015 (see Note 3 to the condensed consolidated financial statements). Solar revenues, net of intercompany transactions, which is included in revenues from on-site energy production above, increased \$3.1 million, or 20.5%, to \$18.4 million and \$11.2 million, or 38.8%, to \$40.0 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

SRECs represent the renewable energy attribute of the solar electricity generated, which can be sold to customers. Marina does not recognize revenue, or the related margin, until the SREC is certified and transferred to the customer's electronic account. Customers may purchase SRECs to comply with solar requirements under various state renewable energy regulations. Approximately 77% of Marina's solar production is in New Jersey.

Marina hedges a portion of its anticipated SREC production through the use of forward sales contracts. The hedged percentage of projected SREC production related to in-service assets in New Jersey is 94% and 56% for energy years ending May 31, 2017 and 2018, respectively.

Installed capacity was 194 MW and 130 MW at September 30, 2016 and 2015, respectively.

Revenues from appliance service operations at SJESP, net of intercompany transactions, did not change significantly for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Table of Contents

Margin - Gas Utility Operations - Total margin increased \$1.0 million, or 3.3%, and \$7.0 million, or 4.0%, for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. The rolling into base rates of Storm Hardening and Reliability Program (SHARP) investments of approximately \$36.6 million on October 1, 2015 contributed approximately \$0.6 million and \$3.4 million of additional margin for the three and nine months ended September 30, 2016, respectively, compared with the same period in 2015. In addition, SJG added 4,830 customers over the 12-month period ended September 30, 2016, contributing approximately \$0.3 million and \$3.0 million in additional margin during the three and nine months ended September 30, 2016, compared with the same periods of 2015, respectively.

The CIP tracking mechanism adjusts earnings when actual usage per customer experienced during the period varies from an established baseline usage per customer. As reflected in the margin and CIP tables as previously disclosed, the CIP mechanism protected margin by \$0.5 million, or \$0.3 million after taxes, for the three months ended September 30, 2016, primarily due to lower customer usage related to energy conservation. For the three months ended September 30, 2015, the CIP mechanism reduced margin by \$1.8 million, or \$1.1 million after taxes, primarily due to higher customer usage. The CIP mechanism protected \$8.4 million, or \$5.0 million after taxes, of margin for the nine months ended September 30, 2016 that would have been lost due to weather that was warmer than average and lower customer usage. The CIP mechanism reduced margin by \$20.2 million, or \$12.0 million after taxes, for the nine months ended September 30, 2015, primarily due to weather that was colder than normal.

Gross Margin - Nonutility - Gross margin for the nonutility businesses is defined as revenue less all costs that are directly related to the production, sale and delivery of the Company's products and services. These costs primarily include natural gas and electric commodity costs as well as certain payroll and related benefits. On the statements of condensed consolidated income, revenue is reflected in Operating Revenues - Nonutility and the costs are reflected in Cost of Sales - Nonutility. As discussed in Note 16 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015, revenues and expenses related to the energy trading activities of the wholesale energy operations at SJRG are presented on a net basis in Operating Revenues - Nonutility on the condensed consolidated income statement.

Gross Margin - Energy Group - Combined gross margins for Energy Group increased \$23.3 million to \$13.3 million and \$20.9 million to \$41.1 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. These changes were primarily due to the following:

Gross margin from SJE's retail gas and other operations increased \$3.0 million to a loss of \$0.5 million and \$6.8 million to \$9.1 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Excluding the change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(2.6) million and \$(8.1) million, gross margin increased \$0.4 million and decreased \$1.3 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. The three-month comparative period change was not significant. The nine-month comparative period decrease is primarily due to warmer weather conditions in the first quarter of 2016 compared with the same period in 2015. Excluding the impact of the unrealized gains/losses discussed above, gross margin as a percentage of Operating Revenues did not change significantly for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Gross margin from SJE's retail electric operations decreased \$0.1 million to \$2.0 million and increased \$1.8 million to \$6.5 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$0.6 million and \$(0.2) million, gross margin increased \$0.5 million and \$1.6 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. These increases are mainly due to increased sales volumes as discussed in "Operating Revenues - Energy Group" above.

Excluding the impact of the unrealized gains/losses discussed above, gross margin as a percentage of Operating Revenues did not change significantly for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Gross margin from the wholesale energy operations at SJRG increased \$20.4 million to \$11.8 million and \$12.3 million to \$25.6 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(18.8) million and \$(2.0) million, gross margin for the wholesale energy operations at SJRG increased \$1.6 million and \$10.3 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. These increases were primarily due to additional capacity and increases in storage volumes sold as discussed in "Operating Revenues - Energy Group" above.

Table of Contents

The wholesale energy operations at SJRG expect to continue to add incremental margin from marketing and related opportunities in the Marcellus region, capitalizing on its established presence in the area. Future margins could fluctuate significantly due to the volatile nature of wholesale gas prices. As of September 30, 2016, the wholesale energy operations had 7.9 Bcf of storage and 295,264 dts/day of transportation under contract.

Gross Margin - Energy Services - Combined gross margins for Energy Services increased \$10.9 million to \$27.2 million and \$26.1 million to \$68.2 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. These changes were primarily due to the following:

Gross margin from on-site energy production at Marina increased \$11.0 million to \$26.1 million and \$26.5 million to \$65.2 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. Gross margin as a percentage of Operating Revenues increased 8.9 and 12.1 percentage points for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. These increases are primarily due to several new higher margin renewable energy projects that began operations over the past twelve months, along with higher prices on SRECs compared to the previous year. Also contributing to the increase were margins earned at several entities that became wholly owned by Marina as of December 31, 2015 (see Note 3 to the condensed consolidated financial statements).

Gross margin from appliance service operations at SJESP did not change significantly for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015.

Operating Expenses - A summary of net changes in operations expense for the three and nine months ended September 30, follows (in thousands):

	Three Months Ended September 30, 2016 vs. 2015	Nine Months Ended September 30, 2016 vs. 2015
Gas Utility Operations	\$ (1,426)	\$ (10,129)
Nonutility:		
Energy Group:		
Wholesale Energy Operations	601	623
Retail Gas and Other Operations	260	474
Retail Electric Operations	109	382
Subtotal Energy Group	970	1,479
Energy Services:		
On-Site Energy Production	1,764	9,169
Appliance Service Operations	(199)	(545)
Subtotal Energy Services	1,565	8,624
Total Nonutility	2,535	10,103
Intercompany Eliminations and Other	537	1,056
Total Operations Expense	\$ 1,646	\$ 1,030

Operations - Gas utility operations expense decreased \$1.4 million and \$10.1 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. The decreases primarily resulted from the operation of SJG's New Jersey Clean Energy Program and Energy Efficiency Programs. Such costs are recovered on a dollar-for-dollar basis; therefore, SJG experienced an offsetting decrease in revenue during the three

and nine months ended September 30, 2016, compared with the same periods in the prior year. This was due to a reduction in the approved rates used to recover such costs, as well as lower recoveries resulting from warmer weather primarily during the first quarter of 2016, as previously discussed under "Throughput-Gas Utility Operations" above.

Nonutility operations expense increased \$2.5 million and \$10.1 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015, primarily due to operating expenses incurred at several entities that became wholly owned by Marina as of December 31, 2015 (see Note 3 to the condensed consolidated financial statements) along with operating expenses at several new renewable energy projects that began operations over the past twelve months. Also contributing to the increase is additional personnel, governance and compliance costs incurred to support continued growth.

Table of Contents

Maintenance - The change in maintenance expense for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015, was not significant.

Depreciation - Depreciation increased \$4.7 million and \$13.4 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015, primarily due to depreciation incurred at several entities that became wholly owned by Marina as of December 31, 2015 (see Note 3 to the condensed consolidated financial statements), along with increased investment in property, plant and equipment by the gas utility operations of SJG and on-site energy production at Marina.

Energy and Other Taxes - The change in energy and other taxes for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015, was not significant.

Other Income and Expense - The change in other income and expense for the three months ended September 30, 2016 compared with the same period in 2015 was not significant. Other income increased \$1.3 million for the nine months ended September 30, 2016 compared with the same period in 2015 primarily due to a settlement at Marina in the second quarter of 2016 as discussed in Note 5 to the condensed consolidated financial statements.

Interest Charges – Interest charges decreased \$0.8 million for the three months ended September 30, 2016 compared with the same period in 2015 primarily due to higher capitalization of interest costs on construction during 2016. This was a result of accumulating capital investments under the Company's Accelerated Infrastructure Replacement Program (AIRP). AIRP investments are approved by the New Jersey Board of Public Utilities (BPU) to accrue interest on construction until such time they are rolled into base rates. Interest charges increased \$0.6 million for the nine months ended September 30, 2016 compared with the same period in 2015 primarily due to higher amounts of long-term debt outstanding at SJI and SJG, partially offset by higher capitalization of interest costs as discussed above.

Income Taxes – Income taxes changed from an \$11.0 million benefit for the three months ended September 30, 2015 to a \$2.8 million expense for the three months ended September 30, 2016 primarily due to income before income taxes earned during the three months ended September 30, 2016 compared to a loss in the prior period, along with a higher effective tax rate due to a projected decrease in the investment tax credits available on renewable energy facilities at Marina. Income tax expense increased \$32.5 million for the nine months ended September 30, 2016 compared with the same period in 2015 primarily due to higher income before income taxes along with a higher effective tax rate due to a projected decrease in the investment tax credits available on renewable energy facilities at Marina.

Equity in Earnings (Losses) of Affiliated Companies – Equity in earnings of affiliated companies increased \$7.6 million and \$23.0 million for the three and nine months ended September 30, 2016, respectively, compared with the same periods in 2015. The three month comparative period increase is primarily due to a settlement at Marina in the third quarter of 2016 as discussed in Note 5 to the condensed consolidated financial statements. The nine month comparative period increase is primarily due to the impact of a reduction in the carrying amount of an investment at one of Energenic's operating subsidiaries, which occurred in the second quarter of 2015, along with a settlement at Marina in the third quarter of 2016 (see Note 5 to the condensed consolidated financial statements).

Discontinued Operations — The results are primarily comprised of environmental remediation and product liability litigation associated with previously disposed of businesses.

LIQUIDITY AND CAPITAL RESOURCES:

Liquidity needs are driven by factors that include natural gas commodity prices; the impact of weather on customer bills; lags in fully collecting gas costs from customers under the BGSS charge and other regulatory clauses; working

capital needs of our energy trading and marketing activities; the timing of construction and remediation expenditures and related permanent financings; the timing of equity contributions to unconsolidated affiliates; mandated tax payment dates; both discretionary and required repayments of long-term debt; and the amounts and timing of dividend payments.

Table of Contents

Cash Flows from Operating Activities — Liquidity needs are first met with net cash provided by operating activities. Net cash provided by operating activities totaled \$196.4 million and \$151.9 million in the first nine months of 2016 and 2015, respectively. Net cash provided by operating activities varies from year-to-year primarily due to the impact of weather on customer demand and related gas purchases, customer usage factors related to conservation efforts and the price of the natural gas commodity, inventory utilization, and gas cost recoveries. Operating activities in the first nine months of 2016 produced more net cash than the same period in 2015, primarily due to improvements in working capital as a result of lower payments for gas purchases driven by warmer weather experienced during the first quarter of 2016. Also, SJI did not make a pension payment in 2016. In 2015, SJI made a \$15.0 million pension contribution as a result of a decline in the discount rate and new mortality tables released at the end of 2014, both of which negatively impacted the funding status of its pension plans. The Company strives to keep its pension plans fully funded. When factors such as lesser than expected asset performance and/or declining discount rates negatively impact the funding status of the plans, the Company increases its contributions to supplant that funding shortfall.

Cash Flows from Investing Activities — SJI has a continuing need for cash resources and capital, primarily to invest in new and replacement facilities and equipment. Net cash outflows from investing activities, which are primarily construction projects, for the first nine months of 2016 and 2015 amounted to \$179.1 million and \$240.9 million, respectively. We estimate the net cash outflows for investing activities for fiscal years 2016, 2017 and 2018 at SJI to be approximately \$292.2 million, \$302.2 million and \$416.9 million, respectively. The high level of investing activities for 2016, 2017 and 2018 is due to a combination of the accelerated infrastructure investment programs and a major pipeline project to support an electric generation facility, both at SJG. Also contributing to the high level of investing activities are potential SJI Midstream investments in 2016 through 2018 and limited solar projects at Marina in 2016. The Company expects to use short-term borrowings under lines of credit from commercial banks and the commercial paper program to finance these investing activities as incurred. From time to time, the Company may refinance the short-term debt with long-term debt.

In support of its risk management activities, the Company is required to maintain margin accounts with selected counterparties as collateral for its forward contracts, swap agreements, options contracts and futures contracts. These margin accounts are included in Restricted Investments or Margin Account Liability, depending upon the value of the related contracts (the change in the Margin Account Liability is reflected in cash flows from Operating Activities) on the condensed consolidated balance sheets. The required amount of restricted investments changes on a daily basis due to fluctuations in the market value of the related outstanding contracts and is difficult to predict. Margin posted by the Company decreased by \$10.5 million in the first nine months of 2016, compared with a decrease of \$22.9 million in the same period of 2015.

During the first nine months of 2016 and 2015, the Company made net investments in unconsolidated affiliates of \$2.2 million and \$4.4 million, respectively.

In June 2015, SJG advanced \$10.0 million to a not-for-profit organization formed to spur economic development in Atlantic City, New Jersey. The note included interest at 1.0% for an initial term of six months, with the borrower's option to extend the term for two additional terms of three months each. In December 2015 and February 2016, the borrower exercised each option, respectively. In July 2016, the note was repaid in full, including interest.

In September 2016, SJG placed \$8.3 million in an escrow account to construct SJG's building in Atlantic City, New Jersey. The money is restricted until the final contracts are approved, at which time the money will be released for use in constructing SJG's building.

Cash Flows from Financing Activities — Short-term borrowings from the commercial paper program and lines of credit from commercial banks are used to supplement cash flows from operations, to support working capital needs and to finance capital expenditures as incurred. From time to time, short-term debt incurred to finance capital expenditures is

refinanced with long-term debt.

Table of Contents

Credit facilities and available liquidity as of September 30, 2016 were as follows (in thousands):

Company	Total Facility	Usage	Available Liquidity	Expiration Date
SJG:				
Commercial Paper Program/Revolving Credit Facility	\$200,000	\$81,800	(A) \$118,200	May 2018
Uncommitted Bank Lines	10,000	—	10,000	August 2017
Total SJG	210,000	81,800	128,200	
SJI:				
Revolving Credit Facilities	450,000	152,000	(B) 298,000	Various (C)
Total SJI	450,000	152,000	298,000	
Total	\$660,000	\$233,800	\$426,200	

(A) Includes letters of credit outstanding in the amount of \$0.8 million.

(B) Includes letters of credit outstanding in the amount of \$2.8 million.

(C) In September 2016, the Company entered into an unsecured \$50.0 million, 364-day revolving credit agreement. The agreement matures September 2017, at which time the principal and any accrued but unpaid interest must be paid. At the annual request of the Company, but on not more than two occasions, the credit agreement may be extended for an additional period of 364 days. The 364-day revolving facility bears interest at a variable base rate or a variable London Interbank Offered Rate (“LIBOR”), at the Company’s election.

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary the SJI facilities can also be used to support SJG’s liquidity needs. All committed facilities contain one financial covenant limiting the ratio of indebtedness to total capitalization (as defined in the respective credit agreements), measured on a quarterly basis. SJI and SJG were in compliance with these covenants as of September 30, 2016. Borrowings under these credit facilities are at market rates. The weighted average interest rate on these borrowings, which changes daily, was 1.28% and 1.03% at September 30, 2016 and 2015, respectively. Average borrowings outstanding under these credit facilities, not including letters of credit, during the nine months ended September 30, 2016 and 2015 were \$336.5 million and \$310.8 million, respectively. The maximum amounts outstanding under these credit facilities, not including letters of credit, during the nine months ended September 30, 2016 and 2015 were \$467.7 million and \$432.4 million, respectively. Based upon the existing credit facilities and a regular dialogue with our banks, we believe there will continue to be sufficient credit available to meet our business’ future liquidity needs.

SJG has a commercial paper program under which SJG may issue short-term, unsecured promissory notes to qualified investors up to a maximum aggregate amount outstanding at any time of \$200.0 million. The notes have fixed maturities which vary by note, but may not exceed 270 days from the date of issue. Proceeds from the notes are used for general corporate purposes. SJG uses the commercial paper program in tandem with its \$200.0 million revolving credit facility and does not expect the principal amount of borrowings outstanding under the commercial paper program and the credit facility at any time to exceed an aggregate of \$200.0 million.

SJI supplements its operating cash flow, commercial paper program and credit lines with both debt and equity capital. Over the years, SJG has used long-term debt, primarily in the form of First Mortgage Bonds and Medium Term Notes

(MTN's), secured by the same pool of utility assets, to finance its long-term borrowing needs. These needs are primarily capital expenditures for property, plant and equipment.

In January 2016, the Company paid \$12.7 million to retire outstanding debt of ACB.

Table of Contents

In January 2016, SJG issued \$61.0 million of long-term debt under a \$200.0 million aggregate syndicated bank term facility. The facility is now fully drawn. The total outstanding amount under this facility as of September 30, 2016 is \$200.0 million, which is classified in current portion of long-term debt on the condensed consolidated balance sheets as it is due within one year. SJG is evaluating alternatives, including refinancing or renewing the facility.

As of September 30, 2016, \$16.0 million of aggregate principal amount of 2.71% Senior Notes, due June 2017 are classified in current portion of long-term debt on the condensed consolidated balance sheets. At this time, the Company plans to pay off this debt at maturity.

In July 2016, SJG redeemed \$17.0 million of 4.60% Medium Term Notes (MTN's) at maturity.

In August 2016, SJG retired \$10.0 million of 5.437% MTN's at maturity.

In August 2016, the Company paid an aggregate \$8.3 million to retire outstanding long-term debt for ACLE, SCLE and SXLE.

In May 2016, the Company issued and sold 8,050,000 shares of its common stock, par value \$1.25 per share at a public offering, raising net proceeds of \$203.6 million. The net proceeds from this offering were or will be used for capital expenditures primarily for regulated businesses, including infrastructure investments at its utility business.

SJI raises equity capital through its Dividend Reinvestment Plan (DRP). Shares of common stock offered by the DRP have been issued directly by SJI from its authorized but unissued shares of common stock. SJI raised \$10.8 million and \$9.7 million of equity capital through the DRP during the nine months ended September 30, 2016 and 2015, respectively. Effective May 1, 2016, SJI switched to purchasing shares on the open market to fund share purchases by DRP participants. SJI does not intend to issue any more new equity capital via the DRP in 2016.

SJI's capital structure was as follows:

	As of September 30, 2016	%	As of December (A) 31, 2015	%
Equity	49.9	%	41.6	%
Long-Term Debt	41.0	%	41.1	%
Short-Term Debt	9.1	%	17.3	%
Total	100.0	%	100.0	%

(A) Certain reclassifications have been made to the prior period condensed consolidated balance sheets to conform to the current period presentation, causing the amounts as of December 31, 2015 to be adjusted. See Note 1 to the condensed consolidated financial statements.

SJI has paid dividends on its common stock for 65 consecutive years and has increased that dividend each year for the last 16 years. The Company currently looks to grow that dividend consistent with earnings growth while targeting a payout ratio of between 50% and 60% of Economic Earnings. In setting the dividend rate, the Board of Directors of SJI considers future earnings expectations, payout ratio, and dividend yield relative to those at peer companies, as well as returns available on other income-oriented investments. However, there can be no assurance that the Company will be able to continue to increase the dividend, meet the targeted payout ratio or pay a dividend at all in the future.

COMMITMENTS AND CONTINGENCIES:

Environmental Remediation - Costs for remediation projects, net of recoveries from ratepayers, for the first nine months of 2016 and 2015 amounted to net cash outflows of \$23.3 million and \$10.9 million, respectively. Total net cash outflows for remediation projects are expected to be \$35.5 million, \$42.6 million and \$28.7 million for 2016, 2017 and 2018, respectively. As discussed in Notes 10 and 15 to the Consolidated Financial Statements in Item 8 of SJI's 10-K for the year ended December 31, 2015, certain environmental costs are subject to recovery from and ratepayers.

Table of Contents

Standby Letters of Credit - As of September 30, 2016, SJI provided \$2.8 million of standby letters of credit through its revolving credit facility to enable SJE to market retail electricity and for various construction and operating activities. SJG provided a \$0.8 million letter of credit under its revolving credit facility to support the remediation of environmental conditions at certain locations in SJG's service territory. The Company also provided \$87.5 million of additional letters of credit under separate facilities outside of the revolving credit facilities to support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance the expansion of SJG's natural gas distribution system and to finance Marina's initial thermal plant project.

Contractual Obligations - There were no significant changes to the Company's contractual obligations described in Note 15 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K for the year ended December 31, 2015, except for (a) commodity supply purchase obligations, which decreased approximately \$145.5 million due to payments made during the first nine months of 2016 on commitments at SJE and SJRG; (b) construction obligations, which increased \$84.5 million in total due mainly to an increase in vendor agreements regarding contractor payments at SJG; and (c) long-term debt, which increased approximately \$12.5 million due to the issuance of \$61.0 million of long-term debt at SJG, partially offset by retirement of debt at SJG, ACB, ACLE, SCLE and SXLE (see Note 14 to the condensed consolidated financial statements);

Off-Balance Sheet Arrangements – An off-balance sheet arrangement is any contractual arrangement involving an unconsolidated entity under which the Company has either made guarantees, or has certain other interests or obligations.

As part of the transaction involving the Energenic projects (see Note 3 to the condensed consolidated financial statements), the Company was relieved of its guarantees related to the projects in which it no longer has an ownership interest.

As of September 30, 2016, SJI had issued \$5.9 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

During 2011, subsidiaries of Energenic, in which Marina has a 50% equity interest, entered into 20-year contracts to build, own and operate a central energy center and energy distribution system for a new hotel, casino and entertainment complex in Atlantic City, New Jersey. The complex commenced operations in April 2012, and as a result, Energenic subsidiaries began providing full energy services to the complex.

In June 2014 the parent company of the hotel, casino and entertainment complex filed petitions in U. S. Bankruptcy Court to facilitate a sale of substantially all of its assets. The complex ceased normal business operations in September 2014. Energenic subsidiaries continued to provide limited energy services to the complex during the shutdown period under a temporary agreement with the trustee. The hotel, casino and entertainment complex was sold in April 2015. As of December 31, 2015, the Energenic subsidiaries were providing limited services to the complex under a short-term agreement with the new owner. However, the Energenic subsidiaries had not been able to secure a permanent or long-term energy services agreement with the new owner.

In 2015, management of the Company and Energenic evaluated the carrying value of the investment in this project and a related note receivable. Based on the inability of the Energenic subsidiaries to secure a permanent or long-term energy services agreement, the Company recorded a \$7.7 million (net of tax) non-cash charge to earnings during the second quarter of 2015 due to the reduction in the carrying value of the investment in this project recorded by Energenic. This charge was included in Equity in Loss of Affiliated Companies in 2015 on the condensed consolidated statements of income.

The central energy center and energy distribution system owned by the Energenic subsidiaries was financed in part by the issuance of bonds during 2011. These bonds were collateralized primarily by certain assets of the central energy center and revenue from the energy services agreement with the hotel, casino and entertainment complex. During 2015, due to the cessation of normal business operations of the complex and the inability of the Energenic subsidiaries to meet its obligations under the bonds, the trustee for the bondholders filed suit to foreclose on certain assets of the central energy center. In November 2015 during settlement discussions, the bondholders alleged, among other things, that they were entitled to recover from Energenic itself, any amounts owed under the bonds that were not covered by the collateral, including principal, interest and attorney's fees. The bondholders' assertion was based on inconsistent language in the bond documents. In January 2016, Energenic and certain subsidiaries reached a multi-party settlement with the bondholders. This agreement resolves all outstanding litigation and transfers ownership of the bondholders' collateral to the owners of the entertainment complex. The Company's share of this settlement was \$7.5 million, which was accrued by Energenic as of December 31, 2015 and paid in 2016. The Company entered into agreements with its insurance carrier and external legal advisors to recover, net of legal costs, approximately \$7.0 million of costs associated with the bondholder settlement discussed above. The Company received \$2.1 million in the second quarter of 2016, which is included in Other Income on the condensed consolidated statements of income for the nine months ended September 30, 2016, and \$5.3 million was received in the third quarter of 2016 and is included in Equity in Earnings of Affiliated Companies on the condensed consolidated statements of income for the three and nine months ended September 30, 2016.

Table of Contents

As of September 30, 2016, the Company, through its investment in Energenic, had a remaining net asset of approximately \$0.9 million included in Investment in Affiliates on the condensed consolidated balance sheets related to cogeneration assets for this project. In addition, the Company had approximately \$13.9 million included in Notes Receivable - Affiliate on the condensed consolidated balance sheets, due from Energenic, which is secured by those cogeneration assets. This note is subject to a reimbursement agreement that secures reimbursement for the Company, from its joint venture partner, of a proportionate share of any amounts that are not repaid.

Management will continue to monitor the situation surrounding the complex and will evaluate the carrying value of the investment and the note receivable as future events occur.

Pending Litigation — The Company is subject to claims arising in the ordinary course of business and other legal proceedings. The Company has been named in, among other actions, certain gas supply and capacity management contract disputes and certain product liability claims related to our former sand mining subsidiary.

The Company is currently involved in a pricing dispute related to two long-term gas supply contracts whereby the Company had sued the supplier to recover amounts that were improperly invoiced. Subsequently, the supplier countersued the Company claiming it is owed an amount which we extrapolate to be \$14.3 million from SJG and \$37.2 million from SJRG, plus interest, through September 30, 2016. We believe any monies received or paid associated with the SJG claims would be passed along to SJG's customers through adjusted rates.

The Company is also involved in a dispute related to a three-year capacity management contract with a counterparty whereby the Company is the manager. The counterparty is claiming that it is owed approximately \$10.0 million plus interest from SJRG under a sharing credit within the contract.

Liabilities related to these claims are accrued when the amount or range of amounts of probable settlement costs or other charges for these claims can be reasonably estimated. The Company has accrued approximately \$3.1 million and \$3.2 million related to all of these claims in the aggregate as of September 30, 2016 and December 31, 2015, respectively. Although the Company does not presently believe that these matters will have a material adverse effect on its business, given the inherent uncertainties in such situations, the Company can provide no assurance regarding the outcome of litigation.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Commodity Market Risks — Certain regulated and nonregulated SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for third parties. These subsidiaries are subject to market risk due to price fluctuations. To hedge against this risk, we enter into a variety of physical and financial transactions including forward contracts, swaps, futures and options agreements. To manage these transactions, SJI has a well-defined risk management policy approved by our Board of Directors that includes volumetric and monetary limits. Management reviews reports detailing activity daily. Generally, the derivative activities described above are entered into for risk management purposes.

As part of its gas purchasing strategy, SJG uses financial contracts to hedge against forward price risk. These contracts are recoverable through SJG's BGSS, subject to BPU approval.

The retail gas operations of SJE transact commodities on a physical basis, and SJE typically does not enter into financial derivative positions directly. SJRG manages risk in the natural gas markets for SJE as well as for its own portfolio by entering into the types of transactions noted above. The retail electric operations of SJE use forward physical and financial contracts to mitigate commodity price risk on fixed price electric contracts. It is management's

policy, to the extent practical, within predetermined risk management policy guidelines, to have limited unmatched positions on a deal or portfolio basis while conducting these activities. As a result of holding open positions to a minimal level, the economic impact of changes in value of a particular transaction is substantially offset by an opposite change in the related hedge transaction.

SJI has entered into certain contracts to buy, sell, and transport natural gas and to buy and sell retail electricity. SJI recorded a net pre-tax unrealized gain (loss) of \$9.0 million and \$(12.0) million during the three months ended September 30, 2016 and 2015, respectively, and a net pre-tax unrealized gain (loss) of \$6.3 million and \$(4.0) million during the nine months ended September 30, 2016 and 2015, respectively, which are included with realized (losses) gains in Operating Revenues — Nonutility.

Table of Contents

The fair value and maturity of these energy-related contracts determined under the mark-to-market method as of September 30, 2016 is as follows (in thousands):

Assets

Source of Fair Value	Maturity < 1 Year	Maturity 1 -3 Years	Maturity Beyond 3 Years	Total
Prices actively quoted	\$9,811	\$1,425	\$ 3	\$11,239
Prices provided by other external sources	8,526	2,103	14	10,643
Prices based on internal models or other valuation methods	35,443	7,619	402	43,464
Total	\$53,780	\$11,147	\$ 419	\$65,346

Liabilities

Source of Fair Value	Maturity <1 Year	Maturity 1 -3 Years	Maturity Beyond 3 Years	Total
Prices actively quoted	\$11,821	\$1,510	\$ 78	\$13,409
Prices provided by other external sources	24,300	1,459	—	25,759
Prices based on internal models or other valuation methods	30,785	4,017	777	35,579
Total	\$66,906	\$6,986	\$ 855	\$74,747

NYMEX (New York Mercantile Exchange) is the primary national commodities exchange on which natural gas is traded. Volumes of our NYMEX contracts included in the table above under "Prices actively quoted" are 20.2 million dekatherms (dts) with a weighted average settlement price of \$2.96 per dt.

Basis represents the differential to the NYMEX natural gas futures contract for delivering gas to a specific location. Volumes of our basis contracts, along with volumes of our discounted index related purchase and sales contracts, included in the table above under "Prices provided by other external sources" and "Prices based on internal models or other valuation methods" are 126.1 million dts with a weighted average settlement price of \$(0.74) per dt.

Fixed Price Gas Daily represents the price of a NYMEX natural gas futures contract adjusted for the difference in price for delivering the gas at another location. Volumes of our Fixed Price Gas Daily contracts included in the table above under "Prices provided by other external sources" are 22.3 million dts with a weighted average settlement price of \$2.59 per dt.

Volumes of electric included in the table above under "Prices based on internal models or other valuation methods" are 0.1 million mwh with a weighted average settlement price of \$40.77 per mwh.

A reconciliation of SJI's estimated net fair value of energy-related derivatives follows (in thousands):

Net Derivatives — Energy Related Liabilities, January 1, 2016	\$(13,074)
Contracts Settled During Nine Months Ended September 30, 2016, Net	6,275
Other Changes in Fair Value from Continuing and New Contracts, Net	(2,602)
Net Derivatives — Energy Related Liabilities, September 30, 2016	\$(9,401)

Interest Rate Risk — Our exposure to interest-rate risk relates to short-term and long-term variable-rate borrowings. Variable-rate debt outstanding, including short-term and long-term debt, at September 30, 2016 was \$626.3 million and averaged \$674.5 million during the first nine months of 2016. A hypothetical 100 basis point (1%) increase in interest rates on our average variable-rate debt outstanding would result in a \$6.7 million increase in our annual

interest expense, net of tax. The 100 basis point increase was chosen for illustrative purposes, as it provides a simple basis for calculating the impact of interest rate changes under a variety of interest rate scenarios. Over the past five years, the change in basis points (b.p.) of our average monthly interest rates from the beginning to end of each year was as follows: 2015 - 14 b.p. increase; 2014 - 1 b.p. decrease; 2013 - 16 b.p. decrease; 2012 - 9 b.p. decrease; and 2011 - 33 b.p. increase. At September 30, 2016, our average interest rate on variable-rate debt was 1.50%.

Table of Contents

We typically issue long-term debt either at fixed rates or use interest rate derivatives to limit our exposure to changes in interest rates on variable rate, long-term debt. As of September 30, 2016, the interest costs on \$652.3 million of our long-term debt was either at a fixed rate or hedged via an interest rate derivative.

As of September 30, 2016, SJI's active interest rate swaps were as follows:

Notional Amount	Fixed Interest Rate	Start Date	Maturity	Type	Obligor
\$14,500,000	3.905%	3/17/2006	1/15/2026	Tax-exempt	Marina
\$500,000	3.905%	3/17/2006	1/15/2026	Tax-exempt	Marina
\$330,000	3.905%	3/17/2006	1/15/2026	Tax-exempt	Marina
\$12,500,000	3.530%	12/1/2006	2/1/2036	Tax-exempt	SJG
\$12,500,000	3.430%	12/1/2006	2/1/2036	Tax-exempt	SJG

Credit Risk - As of September 30, 2016, approximately \$9.1 million, or 13.9%, of the current and noncurrent Derivatives – Energy Related Assets are transacted with two counterparties. One counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assigned to SJI in the event of default by the counterparty. The second counterparty is investment-grade rated.

As of September 30, 2016, SJRG had \$74.3 million of Accounts Receivable under sales contracts. Of that total, 69.3% were with regulated utilities or companies rated investment-grade or guaranteed by an investment-grade-rated parent or were with companies where we have a collateral arrangement or insurance coverage. The remainder of the Accounts Receivable were within approved credit limits.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of its chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of September 30, 2016. Based on that evaluation, the Company's chief executive officer and chief financial officer concluded that the disclosure controls and procedures employed at the Company are effective.

Changes in Internal Control Over Financial Reporting

There has not been any change in the Company's internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act, during the fiscal quarter ended September 30, 2016 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

Information required by this Item is incorporated by reference to Part I, Item 2, Pending Litigation, beginning on page 53.

Item 1A. Risk Factors

Other than as set forth below, there have been no material changes in our risk factors from those disclosed in Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Our stated long-term goals are based on various assumptions and beliefs that may not prove to be accurate, and we may not achieve our stated long-term goals by 2020 or at all.

Our current long-term goals are to (i) grow Economic Earnings to \$150 million by 2020; (ii) improve the quality of our earnings; (iii) strengthen our balance sheet; and (iv) maintain a low-to-moderate risk profile. Management established those goals in conjunction with our board of directors based upon a number of different internal and external factors that characterize and influence our current and expected future activities. For example, these long-term goals are based on certain assumptions regarding our participation in a current project to build a 100-mile natural gas pipeline in Pennsylvania and New Jersey. However, construction on this project has not yet begun, and this project is subject to a number of regulatory approvals, including approval from the Federal Energy Regulatory Commission, which is not expected until the first quarter of fiscal 2017. The target completion date for this project has been delayed until the second half of 2018, and is subject to further delay. As a result, no assurance can be given that this project will be completed on time or at all. Further, the economy of Southern New Jersey has remained depressed relative to other regions, which could cause customer delinquencies or otherwise negatively affect achievement of our long-term earnings goals. Due to a term limit, the upcoming 2017 New Jersey gubernatorial election will result in a change in administration, which could lead to unfavorable local regulatory changes that could delay approvals, require environmental remediation or capital or other expenditures or otherwise adversely affect our results of operations, financial condition or cash flows. Other factors, assumptions and beliefs of management and our board of directors on which our long-term goals were based may also prove to differ materially from actual future results. Accordingly, we may not achieve our stated long-term goals by 2020 or at all, or our stated long-term goals may be negatively revised as a result of less than expected progress toward achieving these goals, and you are therefore cautioned not to place undue reliance on these goals.

Our business could be harmed by cybersecurity threats and related disruptions

We rely extensively on information technology systems to process transactions, transmit and store information and manage our business. Disruption or failure of our information technology systems could shut down our facilities or otherwise harm our ability to safely deliver natural gas to our customers, serve our customers effectively, or manage our assets, or otherwise materially disrupt our business.

Cyber threats are constantly evolving, increasing the difficulty of detecting and successfully defending against them. SJI has experienced such attacks in the past; however, based on information currently available to SJI, none have had a material impact on its business, financial condition, results of operations or cash flows. In response, we have invested in expanded cybersecurity systems and procedures designed to ensure the continuous and uninterrupted performance of our information technology systems and protect against unauthorized access. However, all information technology systems are potentially vulnerable to security threats, including hacking, viruses, other malicious software, and other unlawful attempts to disrupt or gain access to such systems. There is no guarantee that our cybersecurity systems and procedures will prevent or detect the unauthorized access by experienced computer programmers, hackers

or others. An attack on or failure of our information technology systems could result in the unauthorized disclosure, theft, misuse or destruction of customer or employee data or business or confidential information, or disrupt the performance of our information technology systems. These events could expose us to potential liability, litigation, governmental inquiries, investigations or regulatory actions, harm our brand and reputation, diminish customer confidence, disrupt operations, and subject us to payment of fines or other penalties, legal claims by our clients and significant remediation costs.
