1. Description of Business and Significant Accounting Policies

Description of Business

The Company is a fully-integrated, self-administered and self-managed equity real estate investment trust (“REIT”) that operates in the Southeastern and Midwestern United States. The Company conducts virtually all of its activities through the Operating Partnership. At March 31, 2010, the Company and/or the Operating Partnership wholly owned 308 in-service office, industrial and retail properties, comprising 27.9 million square feet; 96 rental residential units; 581 acres of undeveloped land suitable for future development, of which 490 acres are considered core holdings; and an additional one office property and one industrial property that are in service but not yet stabilized and 35 for-sale condominiums (which are owned through a consolidated, majority-owned joint venture).

The Company is the sole general partner of the Operating Partnership. At March 31, 2010, the Company owned all of the Preferred Units and 71.2 million, or 95.0%, of the Common Units. Limited partners (including one officer and two directors of the Company) own the remaining 3.8 million Common Units. Generally, the Operating Partnership is obligated to redeem each Common Unit at the request of the holder thereof for cash equal to the value of one share of Common Stock, \$.01 par value, based on the average of the market price for the 10 trading days immediately preceding the notice date of such redemption provided that the Company, at its option, may elect to acquire any such Common Units presented for redemption for cash or one share of Common Stock. The Common Units owned by the Company are not redeemable. During the three months ended March 31, 2010, the Company redeemed 92,971 Common Units for a like number of shares of Common Stock, which increased the percentage of Common Units owned by the Company from 94.8% at December 31, 2009 to 95.0% at March 31, 2010.

Basis of Presentation

Our Consolidated Financial Statements are prepared in conformity with accounting principles generally accepted in the United States (“GAAP”). Our Consolidated Statement of Income for the three months ended March 31, 2009 was revised from previously reported amounts to reflect in discontinued operations the operations for those properties sold or held for sale during 2009 and the first three months of 2010 which qualified for discontinued operations presentation. Prior period amounts related to additions to allowance for doubtful accounts and amortization of lease commissions in our Consolidated Statements of Cash Flows have been reclassified to conform to the current period presentation.

Our Consolidated Financial Statements include the Operating Partnership, wholly owned subsidiaries and those entities in which we have the controlling financial interest. All significant intercompany transactions and accounts have been eliminated. At March 31, 2010 and December 31, 2009, we were not involved with any entities that were deemed to be variable interest entities.

The unaudited interim consolidated financial statements and accompanying unaudited consolidated financial information, in the opinion of management, contain all adjustments (including normal recurring accruals) necessary for a fair presentation of our financial position, results of operations and cash flows. We have omitted certain notes and other information from the interim consolidated financial statements presented in this Quarterly Report on Form 10-Q as permitted by SEC rules and regulations. These Consolidated Financial Statements should be read in conjunction with our 2009 Annual Report on Form 10-K.

1. Description of Business and Significant Accounting Policies - Continued

Use of Estimates

The preparation of these Consolidated Financial Statements in accordance with GAAP requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

2. Real Estate Assets

Dispositions

In connection with the disposition of a building located in Raleigh, NC in the fourth quarter of 2009, the buyer had a limited right to put the building to us in exchange for the sales price plus certain costs if we were unable to satisfy a certain post-closing requirement by March 1, 2010. Accordingly, the assets, liabilities and operations of the building remained in our Consolidated Financial Statements during this contingency period. We satisfied this post-closing requirement prior to the required date and as a result, the buyer's right to put the building to us was terminated. Accordingly, we recognized a completed sale of the property and recognized a gain of \$0.2 million in the first quarter of 2010.

3. Investments in Affiliates

Unconsolidated Affiliates

We have equity interests ranging from 10.0% to 50.0% in various joint ventures with unrelated third parties. The combined, summarized income statements for our unconsolidated joint ventures were as follows:

	Three Months Ended March 31,	
	2010	2009
Income Statements:		
Revenues	\$ 35,588	\$ 38,869
Expenses:		
Rental property and other expenses	17,167	18,640
Depreciation and amortization	9,600	8,872
Interest expense	8,565	8,975
Total expenses	35,332	36,487
Net income	\$ 256	\$ 2,382
Our share of:		
Net income (1)	\$ 795	\$ 1,300
Depreciation and amortization of real estate assets	\$ 3,341	\$ 3,250
Interest expense	\$ 3,423	\$ 3,578

(1) Our share of net income differs from our weighted average ownership percentage in the joint ventures' net income due to our purchase accounting and other adjustments related primarily to management and leasing fees.

3. Investments in Affiliates – Continued

Consolidated Affiliates

We own a majority interest in Plaza Residential, LLC, a joint venture which was formed to develop and sell 139 for-sale residential condominiums constructed above an office tower developed by us in Raleigh, NC. For-sale residential condominiums in our Consolidated Balance Sheets include completed, but unsold, condominium inventory owned by Plaza Residential at March 31, 2010 and December 31, 2009. We initially record receipt of deposits as accounts payable, accrued expenses and other liabilities in our Consolidated Balance Sheets in accordance with the deposit method. We then record completed sales when units close and the remaining net cash is received. We recognize forfeiture of earnest money deposits into income when entitled to claim the forfeited deposit upon legal default. During the three months ended March 31, 2010 and 2009, we received \$2.1 million and \$3.3 million, respectively, in gross proceeds and recorded \$1.9 million and \$2.9 million, respectively, of cost of goods sold from condominium sales activity.

4. Deferred Financing and Leasing Costs

The following table sets forth total deferred financing and leasing costs, net of accumulated amortization:

5. Mortgages and Notes Payable

Our consolidated mortgages and notes payable consisted of the following:

	March 31, 2010	December 31, 2009
Secured mortgage loans	\$ 717,984	\$ 720,727
Unsecured loans	748,457	748,428
Total	\$ 1,466,441	\$ 1,469,155

At March 31, 2010, our secured mortgage loans were secured by real estate assets with an aggregate un depreciated book value of \$1.2 billion.

Our \$400.0 million unsecured revolving credit facility is scheduled to mature on February 21, 2013 and includes an accordion feature that allows for an additional \$50.0 million of borrowing capacity subject to additional lender commitments. Assuming we continue to have three publicly announced ratings from the credit rating agencies, the interest rate and facility fee under our revolving credit facility are based on the lower of the two highest publicly announced ratings. Based on our current credit ratings, the interest rate is LIBOR plus 290 basis points and the annual facility fee is 60 basis points. There were no amounts outstanding under our revolving credit facility at March 31, 2010 and April 22, 2010. At March 31, 2010 and April 22, 2010, we had \$1.1 million of outstanding letters of credit, which reduces the availability on our revolving credit facility. As a result, the unused capacity of our revolving credit facility at March 31, 2010 and April 22, 2010 was \$398.9 million.

Our \$70.0 million secured construction facility, of which \$41.7 million was outstanding at March 31, 2010, is initially scheduled to mature on December 20, 2010. Assuming no defaults have occurred, we have options to extend the maturity date for two successive one-year periods. The interest rate is LIBOR plus 85 basis points. Our secured construction facility had \$28.3 million of availability at March 31, 2010 and April 22, 2010.

We are currently in compliance with all debt covenants and requirements.

6. Derivative Financial Instruments

We had no outstanding interest rate hedge contracts at March 31, 2010 or December 31, 2009. The following table sets forth the effect of our past cash-flow hedges on accumulated other comprehensive loss (“AOCL”) and interest expense:

8. Disclosure About Fair Value of Financial Instruments

The following summarizes the three levels of inputs that we use to measure fair value, as well as the assets, noncontrolling interests in the Operating Partnership and liabilities that we recognize at fair value using those levels of inputs.

Level 1. Quoted prices in active markets for identical assets or liabilities.

Our Level 1 assets are investments in marketable securities which we use to pay benefits under our non-qualified deferred compensation plan. Our Level 1 noncontrolling interests in the Operating Partnership are comprised of Common Units not owned by the Company. Our Level 1 liabilities are our obligations to pay benefits under our deferred compensation plan.

Level 2. Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities. We had no Level 2 assets or liabilities at March 31, 2010 and December 31, 2009.

Level 3. Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Our Level 3 asset is our tax increment financing bond that we acquired in the fourth quarter of 2007, which is not routinely traded but whose fair value is determined using an estimate of projected redemption value based on quoted bid/ask prices for similar unrated municipal bonds, and real estate assets recorded at fair value on a non-recurring basis as a result of our December 31, 2009 impairment analysis, which were valued using independent appraisals.

Our Level 3 liability is our SF-HIW Harborview Plaza, LP financing obligation that is not traded but whose fair value is determined based on our partner's share of the joint venture's working capital, fair market value of real estate assets and fair market value of mortgage payable. The fair value of the joint venture's working capital approximates its carrying value. The fair values of the joint venture's real estate assets and mortgage payable were determined using the income approach to approximate the price that would be paid in an orderly transaction between market participants on the measurement date.

The following tables set forth the assets and liabilities that we measure at fair value on a recurring basis by level within the fair value hierarchy. We determine the level based on the lowest level of substantive input used to determine fair value.

8. Disclosure About Fair Value of Financial Instruments – Continued

We acquired our tax increment financing bond in the fourth quarter of 2007. This bond amortizes to maturity in 2020 and is carried at estimated fair value in prepaid expenses and other assets with unrealized gains/losses reported in AOCL. The estimated fair value at March 31, 2010 was \$2.1 million below the outstanding principal due on the bond. We currently intend to hold this bond and do not believe that we will be required to sell this bond before recovery of the bond principal. Payment of the principal and interest for the bond is guaranteed by us and, therefore, we have recorded no credit losses related to the bond in the three months ended March 31, 2010 and 2009. There is no legal right of offset with the liability, which we report as a financing obligation related to this tax increment financing bond.

Our SF-Harborview Plaza, LP financing obligation is carried at the greater of estimated fair value, net of the related valuation allowance, or original financing obligation of \$12.7 million. The fair value was \$12.4 million and \$12.2 million at March 31, 2010 and December 31, 2009, respectively.

The following table sets forth the carrying amounts and fair values of our financial instruments:

	Carrying Amount	Fair Value

9. Share-Based Payments

During the three months ended March 31, 2010, we granted under our 2009 Long Term Equity Incentive Plan (the "Plan") 190,826 stock options at an exercise price equal to the closing market price of a share of our common stock on the date of grant. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model, which resulted in a weighted-average grant date fair value per share of \$4.96. During the three months ended March 31, 2010, we also granted under the Plan 88,674 shares of time-based restricted stock and 78,151 shares of total return-based restricted stock with weighted-average grant date fair values per share of \$29.05 and \$29.40, respectively. We recorded stock-based compensation expense of \$2.1 million and \$1.8 million during the three months ended March 31, 2010 and 2009, respectively. At March 31, 2010, there was \$11.0 million of total unrecognized stock-based compensation costs, which will be recognized over a weighted average remaining contractual term of 1.6 years.

13. Segment Information

Our principal business is the operation, acquisition and development of rental real estate properties. We evaluate our business by product type and by geographic location. Each product type has different customers and economic characteristics as to rental rates and terms, cost per square foot of buildings, the purposes for which customers use the space, the degree of maintenance and customer support required and customer dependency on different economic drivers, among others. The operating results by geographic grouping are also regularly reviewed by our chief operating decision maker for assessing performance and other purposes. There are no material inter-segment transactions.

Our accounting policies of the segments are the same as those used in our Consolidated Financial Statements. All operations are within the United States and, at March 31, 2010, no single customer of the Wholly Owned Properties generated more than 9.2% of our consolidated revenues on an annualized basis.

The following table summarizes the rental income and other revenues and net operating income, the primary industry property-level performance metric which is defined as rental and other revenues less rental property and other expenses, for each reportable segment:

1. Description of Business and Significant Accounting Policies

Description of Business

The Company is a fully-integrated, self-administered and self-managed equity real estate investment trust (“REIT”) that operates in the Southeastern and Midwestern United States. The Company conducts virtually all of its activities through the Operating Partnership. At March 31, 2010, the Company and/or the Operating Partnership wholly owned: 308 in-service office, industrial and retail properties, comprising 27.9 million square feet; 96 rental residential units; 581 acres of undeveloped land suitable for future development, of which 490 acres are considered core holdings; and an additional one office property and one industrial property that are in service but not yet stabilized and 35 for-sale condominiums (which are owned through a consolidated, majority-owned joint venture).

The Company is the sole general partner of the Operating Partnership. At March 31, 2010, the Company owned all of the Preferred Units and 71.2 million, or 95.0%, of the Common Units. Limited partners (including one officer and two directors of the Company) own the remaining 3.8 million Common Units. Generally, the Operating Partnership is obligated to redeem each Common Unit at the request of the holder thereof for cash equal to the value of one share of Common Stock, \$.01 par value, based on the average of the market price for the 10 trading days immediately preceding the notice date of such redemption provided that the Company, at its option, may elect to acquire any such Common Units presented for redemption for cash or one share of Common Stock. The Common Units owned by the Company are not redeemable. During the three months ended March 31, 2010, the Company redeemed 92,971 Common Units for a like number of shares of Common Stock, which increased the percentage of Common Units owned by the Company from 94.8% at December 31, 2009 to 95.0% at March 31, 2010.

Basis of Presentation

Our Consolidated Financial Statements are prepared in conformity with accounting principles generally accepted in the United States (“GAAP”). Our Consolidated Statement of Income for the three months ended March 31, 2009 was revised from previously reported amounts to reflect in discontinued operations the operations for those properties sold or held for sale during 2009 and the first three months of 2010 which qualified for discontinued operations presentation. Prior period amounts related to additions to allowance for doubtful accounts and amortization of lease commissions in our Consolidated Statement of Cash Flows have been reclassified to conform to the current period presentation.

Our Consolidated Financial Statements include wholly owned subsidiaries and those entities in which we have the controlling financial interest. All significant intercompany transactions and accounts have been eliminated. At March 31, 2010 and December 31, 2009, we were not involved with any entities that were deemed to be variable interest entities.

The unaudited interim consolidated financial statements and accompanying unaudited consolidated financial information, in the opinion of management, contain all adjustments (including normal recurring accruals) necessary for a fair presentation of our financial position, results of operations and cash flows. We have omitted certain notes and other information from the interim consolidated financial statements presented in this Quarterly Report on Form 10-Q as permitted by SEC rules and regulations. These Consolidated Financial Statements should be read in conjunction with our 2009 Annual Report on Form 10-K.

1. Description of Business and Significant Accounting Policies - Continued

Use of Estimates

The preparation of these Consolidated Financial Statements in accordance with GAAP requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

2. Real Estate Assets

Dispositions

In connection with the disposition of a building located in Raleigh, NC in the fourth quarter of 2009, the buyer had a limited right to put the building to us in exchange for the sales price plus certain costs if we were unable to satisfy a certain post-closing requirement by March 1, 2010. Accordingly, the assets, liabilities and operations of the building remained in our Consolidated Financial Statements during this contingency period. We satisfied this post-closing requirement prior to the required date and as a result, the buyer's right to put the building to us was terminated. Accordingly, we recognized a completed sale of the property and recognized a gain of \$0.2 million in the first quarter of 2010.

3. Investments in Affiliates

Unconsolidated Affiliates

We have equity interests ranging from 10.0% to 50.0% in various joint ventures with unrelated third parties. The combined, summarized income statements for our unconsolidated joint ventures were as follows:

	Three Months Ended March 31,	
	2010	2009
Income Statements:		
Revenues	\$ 34,569	\$ 37,493
Expenses:		
Rental property and other expenses	16,527	18,100

Depreciation and amortization of real estate assets	\$ 3,302	\$ 3,204
Interest expense	\$ 3,398	\$ 3,551

(1) Our share of net income differs from our weighted average ownership percentage in the joint ventures' net income due to our purchase accounting and other adjustments related primarily to management and leasing fees.

3. Investments in Affiliates - Continued

Consolidated Affiliates

We own a majority interest in Plaza Residential, LLC, a joint venture which was formed to develop and sell 139 for-sale residential condominiums constructed above an office tower developed by us in Raleigh, NC. For-sale residential condominiums in our Consolidated Balance Sheets include completed, but unsold, condominium inventory owned by Plaza Residential at March 31, 2010 and December 31, 2009. We initially record receipt of deposits as accounts payable, accrued expenses and other liabilities in our Consolidated Balance Sheets in accordance with the deposit method. We then record completed sales when units close and the remaining net cash is received. We recognize forfeiture of earnest money deposits into income when entitled to claim the forfeited deposit upon legal default. During the three months ended March 31, 2010 and 2009, we received \$2.1 million and \$3.3 million, respectively, in gross proceeds and recorded \$1.9 million and \$2.9 million, respectively, of cost of goods sold from condominium sales activity.

4. Deferred Financing and Leasing Costs

The following table sets forth total deferred financing and leasing costs, net of accumulated amortization:

5. Mortgages and Notes Payable

Our consolidated mortgages and notes payable consisted of the following:

	March 31, 2010	December 31, 2009
Secured mortgage loans	\$ 717,984	\$ 720,727
Unsecured loans	748,457	748,428
Total	\$ 1,466,441	\$ 1,469,155

At March 31, 2010, our secured mortgage loans were secured by real estate assets with an aggregate un depreciated book value of \$1.2 billion.

Our \$400.0 million unsecured revolving credit facility is scheduled to mature on February 21, 2013 and includes an accordion feature that allows for an additional \$50.0 million of borrowing capacity subject to additional lender commitments. Assuming we continue to have three publicly announced ratings from the credit rating agencies, the interest rate and facility fee under our revolving credit facility are based on the lower of the two highest publicly announced ratings. Based on our current credit ratings, the interest rate is LIBOR plus 290 basis points and the annual facility fee is 60 basis points. There were no amounts outstanding under our revolving credit facility at March 31, 2010 and April 22, 2010. At March 31, 2010 and April 22, 2010, we had \$1.1 million of outstanding letters of credit, which reduces the availability on our revolving credit facility. As a result, the unused capacity of our revolving credit facility at March 31, 2010 and April 22, 2010 was \$398.9 million.

Our \$70.0 million secured construction facility, of which \$41.7 million was outstanding at March 31, 2010, is initially scheduled to mature on December 20, 2010. Assuming no defaults have occurred, we have options to extend the maturity date for two successive one-year periods. The interest rate is LIBOR plus 85 basis points. Our secured construction facility had \$28.3 million of availability at March 31, 2010 and April 22, 2010.

We are currently in compliance with all debt covenants and requirements.

6. Derivative Financial Instruments

We had no outstanding interest rate hedge contracts at March 31, 2010 or December 31, 2009. The following table sets forth the effect of our past cash-flow hedges on accumulated other comprehensive loss (“AOCL”) and interest expense:

7. Noncontrolling Interests

Noncontrolling interests in consolidated affiliates, a component of equity, relates to our respective joint venture partners' 50.0% interest in Markel and estimated 14% economic interest in Plaza Residential. Each of our joint venture partners is an unrelated third party.

8. Disclosure About Fair Value of Financial Instruments

The following summarizes the three levels of inputs that we use to measure fair value, as well as the assets, noncontrolling interests in the Operating Partnership and liabilities that we recognize at fair value using those levels of inputs.

Level 1. Quoted prices in active markets for identical assets or liabilities.

Our Level 1 assets are investments in marketable securities which we use to pay benefits under our non-qualified deferred compensation plan. Our Level 1 noncontrolling interests in the Operating Partnership are comprised of Common Units not owned by the Company. Our Level 1 liabilities are our obligations to pay benefits under our deferred compensation plan.

Level 2. Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities. We had no Level 2 assets or liabilities at March 31, 2010 and December 31, 2009.

Level 3. Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Our Level 3 asset is our tax increment financing bond that we acquired in the fourth quarter of 2007, which is not routinely traded but whose fair value is determined using an estimate of projected redemption value based on quoted bid/ask prices for similar unrated municipal bonds, and real estate assets recorded at fair value on a non-recurring basis as a result of our December 31, 2009 impairment analysis, which were valued using independent appraisals.

Our Level 3 liability is our SF-HIW Harborview Plaza, LP financing obligation that is not traded but whose fair value is determined based on our partner's share of the joint venture's working capital, fair market value of real estate assets and fair market value of mortgage payable. The fair value of the joint venture's working capital approximates its carrying value. The fair values of the joint venture's real estate assets and mortgage payable were determined using the income approach to approximate the price that would be paid in an orderly transaction between market participants on the measurement date.

The following tables set forth the assets and liabilities that we measure at fair value on a recurring basis by level within the fair value hierarchy. We determine the level based on the lowest level of substantive input used to determine fair value.

We acquired our tax increment financing bond in the fourth quarter of 2007. This bond amortizes to maturity in 2020 and is carried at estimated fair value in prepaid expenses and other assets with unrealized gains/losses reported in AOCL. The estimated fair value at March 31, 2010 was \$2.1 million below the outstanding principal due on the bond. We currently intend to hold this bond and do not believe that we will be required to sell this bond before recovery of the bond principal. Payment of the principal and interest for the bond is guaranteed by us and, therefore, we have recorded no credit losses related to the bond in the three months ended March 31, 2010 and 2009. There is no legal right of offset with the liability, which we report as a financing obligation related to this tax increment financing bond.

8. Disclosure About Fair Value of Financial Instruments - Continued

Our SF-Harborview Plaza, LP financing obligation is carried at the greater of estimated fair value, net of the related valuation allowance, or original financing obligation of \$12.7 million. The fair value was \$12.4 million and \$12.2 million at March 31, 2010 and December 31, 2009, respectively.

The following table sets forth the carrying amounts and fair values of our financial instruments:

	Carrying Amount	Fair Value
March 31, 2010		
Cash and cash equivalents	\$ 14,324	\$ 14,324
Restricted cash	\$ 6,301	\$ 6,301
Accounts and notes receivable	\$ 25,876	\$ 25,876

9. Share-Based Payments

During the three months ended March 31, 2010, we granted under our 2009 Long Term Equity Incentive Plan (the "Plan") 190,826 stock options at an exercise price equal to the closing market price of a share of our common stock on the date of grant. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model, which resulted in a weighted-average grant date fair value per share of \$4.96. During the three months ended March 31, 2010, we also granted under the Plan 88,674 shares of time-based restricted stock and 78,151 shares of total return-based restricted stock with weighted-average grant date fair values per share of \$29.05 and \$29.40, respectively. We recorded stock-based compensation expense of \$2.1 million and \$1.8 million during the three months ended March 31, 2010 and 2009, respectively. At March 31, 2010, there was \$11.0 million of total unrecognized stock-based compensation costs, which will be recognized over a weighted average remaining contractual term of 1.6 years.

13. Segment Information

Our principal business is the operation, acquisition and development of rental real estate properties. We evaluate our business by product type and by geographic location. Each product type has different customers and economic characteristics as to rental rates and terms, cost per square foot of buildings, the purposes for which customers use the space, the degree of maintenance and customer support required and customer dependency on different economic drivers, among others. The operating results by geographic grouping are also regularly reviewed by our chief operating decision maker for assessing performance and other purposes. There are no material inter-segment transactions.

Our accounting policies of the segments are the same as those used in our Consolidated Financial Statements. All operations are within the United States and, at March 31, 2010, no single customer of the Wholly Owned Properties generated more than 9.2% of our consolidated revenues on an annualized basis.

The following table summarizes the rental income and other revenues and net operating income, the primary industry property-level performance metric which is defined as rental and other revenues less rental property and other expenses, for each reportable segment:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Company is a fully integrated, self-administered and self-managed equity REIT that provides leasing, management, development, construction and other customer-related services for our properties and for third parties. The Company conducts virtually all of its activities through the Operating Partnership and is its sole general partner. At March 31, 2010, we owned or had an interest in 378 in-service office, industrial and retail properties, encompassing approximately 35.7 million square feet, which includes one office development property and one industrial development property that had not yet reached the earlier of original projected stabilization date or 95% occupancy aggregating 348,000 square feet and a 12.5% interest in a 261,000 square foot office property directly owned by the Company (included in the Company's Consolidated Financial Statements, but not included in the Operating Partnership's Consolidated Financial Statements), 35 for-sale residential condominiums and 514 rental residential units. We are based in Raleigh, North Carolina, and our properties and development land are located in Florida, Georgia, Iowa, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennessee and Virginia. Additional information about us can be found on our website at www.highwoods.com. Information on our website is not part of this Quarterly Report.

You should read the following discussion and analysis in conjunction with the accompanying Consolidated Financial Statements and related notes contained elsewhere in this Quarterly Report.

Disclosure Regarding Forward-Looking Statements

Some of the information in this Quarterly Report may contain forward-looking statements. Such statements include, in particular, statements about our plans, strategies and prospects under this section and under the heading "Business." You can identify forward-looking statements by our use of forward-looking terminology such as "may," "will," "expect," "anticipate," "estimate," "continue" or other similar words. Although we believe that our plans, intentions and expectations reflected in or suggested by such forward-looking statements are reasonable, we cannot assure you that our plans, intentions or expectations will be achieved. When considering such forward-looking statements, you should keep in mind the following important factors that could cause our actual results to differ materially from those contained in any forward-looking statement:

- the financial condition of our customers could deteriorate;
- we may not be able to lease or release second generation space, defined as previously occupied space that becomes available for lease, quickly or on as favorable terms as old leases;
- we may not be able to lease our newly constructed buildings as quickly or on as favorable terms as originally anticipated;
- we may not be able to complete development, acquisition, reinvestment, disposition or joint venture projects as quickly or on as favorable terms as anticipated;
- development activity by our competitors in our existing markets could result in an excessive supply of office, industrial and retail properties relative to customer demand;
- our Southeastern and Midwestern United States markets may suffer declines in economic growth;

- unanticipated increases in interest rates could increase our debt service costs;
- we may not be able to meet our liquidity requirements or obtain capital on favorable terms to fund our working capital needs and growth initiatives or to repay or refinance outstanding debt upon maturity; and
 - the Company could lose key executive officers.

(Table of Contents)

This list of risks and uncertainties, however, is not intended to be exhaustive. You should also review the other cautionary statements we make in “Item 1A. Business – Risk Factors” set forth in our 2009 Annual Report on Form 10-K. Given these uncertainties, you should not place undue reliance on forward-looking statements. We undertake no obligation to publicly release the results of any revisions to these forward-looking statements to reflect any future events or circumstances or to reflect the occurrence of unanticipated events.

Executive Summary

Our Strategic Plan focuses on:

- owning high-quality, differentiated real estate assets in the best submarkets in our primary markets; and
- maintaining a conservative, flexible balance sheet with ample liquidity to meet our funding needs.

Execution of our Plan includes (1) growing net operating income at our existing properties through concentrated leasing, asset management and customer service efforts and (2) developing properties in in-fill locations and acquiring strategic properties that are accretive to long-term earnings and stockholder value. While we own and operate a limited number of industrial, retail and residential properties, our operating results depend heavily on successfully leasing and operating our office properties. Economic growth in Florida, Georgia, North Carolina and Tennessee is and will continue to be an important determinative factor in predicting our future operating results. Our portfolio has changed significantly over the past five years and now consists of a higher proportion of Class A and B properties, which are generally expected to outperform competitive properties in our core markets. We have repositioned our portfolio primarily by selling non-core properties and developing properties in in-fill locations. Our real estate professionals are seasoned and cycle-tested. Our senior leadership team has significant experience and maintains important relationships with market participants in each of our primary markets. Our focus for the remainder of 2010 is to lease and operate our existing portfolio as effectively and efficiently as possible, dispose of certain non-core real estate assets and acquire and develop additional real estate assets that improve the overall quality of our portfolio and generate attractive returns over the long-term for our stockholders.

Results of Operations

Results for the three months ended March 31, 2009 were revised from previously reported amounts to reflect in discontinued operations the operations for those properties sold or held for sale during 2009 and the first three months of 2010 which qualified for discontinued operations presentation.

Three Months Ended March 31, 2010 and 2009

Rental and Other Revenues

Rental and other revenues from continuing operations were 2.3% higher in the first three months of 2010 as compared to the first three months of 2009 primarily due to higher average rental rates in our same property portfolio, the acquisition of the 4200 Cypress building in Tampa, FL in the fourth quarter of 2009 and the contribution of development properties placed in service in 2009, partly offset by lower termination fees and lower occupancy levels in our same property portfolio resulting from continued economic weakness and lower demand for office and industrial space.

We expect rental and other revenues for the remainder of 2010, adjusted for any discontinued operations in 2010, to increase over the same period in 2009 due to the contribution of acquisitions made during 2009 and 2010 and development projects delivered during 2009, partly offset by lower occupancy levels in our same property portfolio.

(Table of Contents)

Operating Expenses

Rental property and other expenses were 3.5% higher in the first three months of 2010 as compared to the first three months of 2009 primarily due to the acquisition of the 4200 Cypress building in Tampa, FL in the fourth quarter of 2009 and the contribution of development properties delivered in 2009, partly offset by 1.1% lower expenses in our same property portfolio from management's efforts to reduce operating expenses. As a result, operating margin, defined as rental and other revenues less rental property and other expenses expressed as a percentage of rental and other revenues, was slightly lower at 63.7% in the first three months of 2010 as compared to 64.1% in the first three months of 2009.

Depreciation and amortization was relatively unchanged in the first three months of 2010 as compared to the first three months of 2009 primarily due to the acquisition of the 4200 Cypress building in Tampa, FL in the fourth quarter of 2009 and the contribution of development properties placed in service in 2009, offset by lower depreciation as a result of early lease terminations.

General and administrative expenses were relatively unchanged in the first three months of 2010 as compared to the first three months of 2009 primarily due to higher deferred compensation expense caused by an increase in the value of marketable securities held under our non-qualified deferred compensation plan, offset by lower compensation costs resulting from lower headcount and lower aggregate short and long-term incentive compensation.

Other Income

Other income was \$0.7 million higher in the first three months of 2010 as compared to the first three months of 2009 primarily due to the year-over-year change in the valuation adjustment of marketable securities held under our non-qualified deferred compensation plan.

Interest Expense

Interest expense was 5.9% higher in the first three months of 2010 as compared to the first three months of 2009 primarily due to lower capitalized interest resulting from decreased development in process. We anticipate interest expense will continue to increase in the remainder of 2010 due to higher rates on our floating rate debt, higher fees on our new revolving credit facility, higher amortization of deferred financing costs and lower capitalized interest.

Equity in Earnings of Unconsolidated Affiliates

Equity in earnings of unconsolidated affiliates was \$0.5 million lower in the first three months of 2010 as compared to the first three months of 2009 primarily due to early lease terminations in one of our joint ventures.

Discontinued Operations

The Company classified income of \$0.2 million and \$1.2 million as discontinued operations in the first three months of 2010 and 2009, respectively. These amounts relate to 0.5 million square feet of office and retail properties sold during 2009 and the first three months of 2010, and include net gains on the sale of these properties of \$0.2 million and \$0.1 million in the first three months of 2010 and 2009, respectively.

(Table of Contents)

Liquidity and Capital Resources

Overview

Our goal is to maintain a conservative and flexible balance sheet with access to multiple sources of debt and equity capital and sufficient availability under our credit facilities. We generally use rents received from customers to fund our operating expenses, capital expenditures and distributions. To fund property acquisitions, development activity or building renovations and repay debt upon maturity, we may use current cash balances, sell assets, obtain new debt, use our revolving credit facility and/or issue equity. Our debt generally consists of mortgage debt, unsecured debt securities and borrowings under our secured and unsecured credit facilities.

Statements of Cash Flows

We report and analyze our cash flows based on operating activities, investing activities and financing activities. The following table sets forth the changes in the Company's cash flows (\$ in thousands):

	Three Months Ended March 31,		
	2010	2009	Change
C a s h P r o v i d e d B y O p e r a t i n g Activities	\$ 39,750	\$ 45,621	\$ (5,871)
C a s h (U s e d I n) I n v e s t i n g Activities	(13,522)	(34,839)	21,317
C a s h (U s e d I n) F i n a n c i n g Activities	(35,589)	(16,782)	(18,807)
T o t a l C a s h Flows	\$ (9,361)	\$ (6,000)	\$ (3,361)

In calculating cash flow from operating activities, depreciation and amortization, which are non-cash expenses, are added back to net income. As a result, we have historically generated a positive amount of cash from operating activities. From period to period, cash flow from operations depends primarily upon changes in our net income, as discussed more fully above under "Results of Operations," changes in receivables and payables, and net additions or decreases in our overall portfolio, which affect the amount of depreciation and amortization expense.

Cash used in or provided by investing activities generally relates to capitalized costs incurred for leasing and major building improvements and our acquisition, development, disposition and joint venture capital activity. During periods of significant net acquisition and/or development activity, our cash used in such investing activities will generally exceed cash provided by investing activities, which typically consists of cash received upon the sale of properties and distributions of capital from our joint ventures.

Cash used in or provided by financing activities generally relates to distributions, incurrence and repayment of debt and issuances, repurchases or redemptions of Common Stock, Common Units and Preferred Stock. As discussed previously, we use a significant amount of our cash to fund distributions. Whether or not we have increases in the outstanding balances of debt during a period depends generally upon the net effect of our acquisition, disposition, development and joint venture activity. We generally use our revolving credit facility for working capital purposes, which means that during any given period, in order to minimize interest expense, we may record significant repayments and borrowings under our revolving credit facility.

The decrease of \$5.9 million in cash provided by operating activities of the Company in the first three months of 2010 compared to the first three months of 2009 was primarily the result of the net decrease in the change in operating assets and liabilities as well as lower cash flows from net income.

The decrease of \$21.3 million in cash used in investing activities in the first three months of 2010 compared to the first three months of 2009 was primarily the result of lower capital expenditures, lower contributions to unconsolidated affiliates and increases in changes in restricted cash and other investing activities, partly offset by lower proceeds from disposition of for-sale residential condominiums.

(Table of Contents)

The increase of \$18.8 million in cash used in financing activities in the first three months of 2010 compared to the first three months of 2009 was primarily the result of lower net borrowings on our revolving credit facility and higher common dividends resulting from an increase in the number of shares of Common Stock outstanding, partly offset by lower net repayments on mortgages and notes payable and higher net proceeds from the sale of Common Stock.

Capitalization

The following table sets forth the Company's capitalization (in thousands, except per share amounts):

	March 31, 2010	December 31, 2009
Mortgages and notes payable, at recorded book value	\$ 1,466,441	\$ 1,469,155
Financing obligations	\$ 33,574	\$ 37,706
Preferred Stock, at liquidation value	\$ 81,592	\$ 81,592
Common Stock outstanding	71,602	71,285
Common Units outstanding (not owned by the Company)	3,798	3,891
Per share stock price at period end	\$ 31.73	\$ 33.35
Market value of Common Stock and Common Units	\$ 2,392,442	\$ 2,507,120
Total market capitalization with debt and obligations	\$ 3,974,049	\$ 4,095,573

Based on our total market capitalization of approximately \$4.0 billion at March 31, 2010 (at the March 31, 2010 per share stock price of \$31.73 and assuming the redemption for shares of Common Stock of the approximate 3.8 million Common Units not owned by the Company), our mortgages and notes payable represented 37.0% of our total market capitalization.

Mortgages and notes payable at March 31, 2010 was comprised of \$718.0 million of secured indebtedness with a weighted average interest rate of 6.21% and \$748.4 million of unsecured indebtedness with a weighted average interest rate of 5.41%. At March 31, 2010, our outstanding mortgages and notes payable and financing obligations were secured by real estate assets with an aggregate undepreciated book value of \$1.2 billion.

Current and Future Cash Needs

Rental and other revenues are our principal source of funds to meet our short-term liquidity requirements. Other sources of funds for short-term liquidity needs include available working capital and borrowings under our existing revolving credit facility and revolving construction credit facility (which had \$398.9 million and \$28.3 million of availability, respectively, at April 22, 2010). Our short-term liquidity requirements primarily consist of operating expenses, interest and principal amortization on our debt, distributions and capital expenditures, including building improvement costs, tenant improvement costs and lease commissions. Building improvements are capital costs not related to a specific customer to maintain existing buildings. Tenant improvements are the costs required to customize space for the specific needs of customers in spaces other than in new development projects. We anticipate that our available cash and cash equivalents and cash provided by operating activities, together with cash available from

borrowings under our credit facilities, will be adequate to meet our short-term liquidity requirements.

Our long-term liquidity uses generally consist of the retirement or refinancing of debt upon maturity (including mortgage debt, our revolving and construction credit facilities, term loans and other unsecured debt), funding of existing and new building development or land infrastructure projects and funding acquisitions of buildings and development land. Excluding capital expenditures for leasing costs and tenant improvements and for normal building improvements, our expected future capital expenditures for started and/or committed new development projects were approximately \$2.3 million at March 31, 2010. Additionally, we may, from time to time, retire some or all of our remaining outstanding Preferred Stock and/or unsecured debt securities through redemptions, open market repurchases, privately negotiated acquisitions or otherwise.

We expect to meet our liquidity needs through a combination of:

(Table of Contents)

- cash flow from operating activities;
- borrowings under our credit facilities;
 - the issuance of unsecured debt;
 - the issuance of secured debt;
- the issuance of equity securities by the Company or the Operating Partnership; and
 - the disposition of non-core assets.

Financing Activity

Our \$400.0 million unsecured revolving credit facility is scheduled to mature on February 21, 2013 and includes an accordion feature that allows for an additional \$50.0 million of borrowing capacity subject to additional lender commitments. Assuming we continue to have three publicly announced ratings from the credit rating agencies, the interest rate and facility fee under our revolving credit facility are based on the lower of the two highest publicly announced ratings. Based on our current credit ratings, the interest rate is LIBOR plus 290 basis points and the annual facility fee is 60 basis points. We expect to use our revolving credit facility for working capital purposes and for the short-term funding of our development and acquisition activity and, in certain instances, the repayment of other debt. Continuing ability to borrow under the revolving credit facility allows us to quickly capitalize on strategic opportunities at short-term interest rates. There were no amounts outstanding under our revolving credit facility at March 31, 2010 and April 22, 2010. At March 31, 2010 and April 22, 2010, we had \$1.1 million of outstanding letters of credit, which reduces the availability on our revolving credit facility. As a result, the unused capacity of our revolving credit facility at March 31, 2010 and April 22, 2010 was \$398.9 million.

Our \$70.0 million secured construction facility, of which \$41.7 million was outstanding at March 31, 2010, is initially scheduled to mature on December 20, 2010. Assuming no defaults have occurred, we have options to extend the maturity date for two successive one-year periods. The interest rate is LIBOR plus 85 basis points. Our secured construction facility had \$28.3 million of availability at March 31, 2010 and April 22, 2010.

We regularly evaluate the financial condition of the lenders that participate in our credit facilities using publicly available information. Based on this review, we currently expect our lenders, which are major financial institutions, to perform their obligations under our existing facilities.

Covenant Compliance

We are currently in compliance with all debt covenants and requirements. Although we expect to remain in compliance with these covenants and ratios for at least the next year, depending upon our future operating performance, property and financing transactions and general economic conditions, we cannot assure you that we will continue to be in compliance.

Our revolving credit facility, \$137.5 million bank term loan due in February 2011 and \$20.0 million bank term loan due in March 2012 also require us to comply with customary operating covenants and various financial requirements, including a requirement that we maintain a ratio of total liabilities to total asset value, as defined in the respective agreements, of no more than 60%. Total asset value depends upon the effective economic capitalization rate (after deducting capital expenditures) used to determine the value of our buildings. Depending upon general economic

conditions, the lenders have the good faith right to unilaterally increase the capitalization rate by up to 25 basis points once in any twelve-month period. The lenders have not previously exercised this right. Any such increase in capitalization rates, without a corresponding reduction in total liabilities, could make it more difficult for us to maintain a ratio of total liabilities to total asset value of no more than 60%, which could have an adverse effect on our ability to borrow additional funds under the revolving credit facility. If we were to fail to make a payment when due with respect to any of our other obligations with aggregate unpaid principal of \$10.0 million, and such failure remains uncured for more than 120 days, the lenders under our credit facility could provide notice of their intent to accelerate all amounts due thereunder. Upon an event of default on the revolving credit facility, the lenders having at least 66.7% of the total commitments under the revolving credit facility can accelerate all borrowings then outstanding, and we could be prohibited from borrowing any further amounts under our revolving credit facility, which would adversely affect our ability to fund our operations.

(Table of Contents)

The Operating Partnership has \$390.9 million principal amount of 2017 bonds outstanding and \$200.0 million principal amount of 2018 bonds outstanding. The indenture that governs these outstanding notes requires us to comply with customary operating covenants and various financial ratios, including a requirement that we maintain unencumbered assets of at least 200% of all outstanding unsecured debt. The trustee or the holders of at least 25% in principal amount of either series of bonds can accelerate the principal amount of such series upon written notice of a default that remains uncured after 60 days.

We may not be able to repay, refinance or extend any or all of our debt at maturity or upon any acceleration. If any refinancing is done at higher interest rates, the increased interest expense could adversely affect our cash flow and ability to pay distributions. Any such refinancing could also impose tighter financial ratios and other covenants that restrict our ability to take actions that could otherwise be in our best interest, such as funding new development activity, making opportunistic acquisitions, repurchasing our securities or paying distributions.

Off Balance Sheet Arrangements

There were no material changes to our off balance sheet arrangements in the three months ended March 31, 2010. For information regarding our off balance sheet arrangements at December 31, 2009, see Note 8 to the Consolidated Financial Statements in our 2009 Annual Report on Form 10-K.

Interest Rate Hedging Activities

To meet, in part, our liquidity requirements, we borrow funds at a combination of fixed and variable rates. Borrowings under our revolving credit facility, construction facility and bank term loans bear interest at variable rates. Our long-term debt, which consists of secured and unsecured long-term financings and the issuance of unsecured debt securities, typically bears interest at fixed rates although some loans bear interest at variable rates. Our interest rate risk management objectives are to limit the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, from time to time, we enter into interest rate hedge contracts such as collars, swaps, caps and treasury lock agreements in order to mitigate our interest rate risk with respect to various debt instruments. We do not hold or issue these derivative contracts for trading or speculative purposes. The interest rate on all of our variable rate debt is generally adjusted at one or three month intervals, subject to settlements under these interest rate hedge contracts. We also enter into treasury lock or similar agreements from time to time in order to limit our exposure to an increase in interest rates with respect to future debt offerings. We had no outstanding interest rate hedge contracts at March 31, 2010.

Critical Accounting Estimates

There were no changes made by management to the critical accounting policies in the three months ended March 31, 2010. For a description of our critical accounting estimates, see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Estimates" in our 2009 Annual Report on Form 10-K.

Funds From Operations

The Company believes that FFO and FFO per share are beneficial to management and investors and are important indicators of the performance of any equity REIT. Because FFO and FFO per share calculations exclude such factors

as depreciation and amortization of real estate assets and gains or losses from sales of operating real estate assets, which can vary among owners of identical assets in similar conditions based on historical cost accounting and useful life estimates, they facilitate comparisons of operating performance between periods and between other REITs. Management believes that historical cost accounting for real estate assets in accordance with GAAP implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered the presentation of operating results for real estate companies that use historical cost accounting to be insufficient on a stand-alone basis. As a result, management believes that the use of FFO and FFO per share, together with the required GAAP presentations, provide a more complete understanding of the Company's performance relative to its competitors and a more informed and appropriate basis on which to make decisions involving operating, financing and investing activities.

(Table of Contents)

FFO and FFO per share are non-GAAP financial measures and therefore do not represent net income or net income per share as defined by GAAP. Net income and net income per share as defined by GAAP are the most relevant measures in determining the Company's operating performance because FFO and FFO per share include adjustments that investors may deem subjective, such as adding back expenses such as depreciation and amortization. Furthermore, FFO per share does not depict the amount that accrues directly to the stockholders' benefit. Accordingly, FFO and FFO per share should never be considered as alternatives to net income or net income per share as indicators of the Company's operating performance.

The Company's presentation of FFO is consistent with FFO as defined by the National Association of Real Estate Investment Trusts ("NAREIT"), which is calculated as follows:

- Net income/(loss) computed in accordance with GAAP;
- Less dividends to holders of Preferred Stock and less excess of Preferred Stock redemption cost over carrying value;
- Less net income attributable to noncontrolling interests;
- Plus depreciation and amortization of real estate assets;
- Less gains, or plus losses, from sales of depreciable operating properties (but excluding impairment losses) and excluding items that are classified as extraordinary items under GAAP;
- Plus or minus adjustments for unconsolidated partnerships and joint ventures (to reflect funds from operations on the same basis); and
- Plus or minus adjustments for depreciation and amortization and gains/(losses) on sales related to discontinued operations.

In calculating FFO, the Company adds back net income attributable to noncontrolling interests in the Operating Partnership, which the Company believes is consistent with standard industry practice for REITs that operate through an UPREIT structure. The Company believes that it is important to present FFO on an as-converted basis since all of the Common Units not owned by the Company are redeemable on a one-for-one basis for shares of its Common Stock.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information about our market risk as of December 31, 2009, see “Quantitative and Qualitative Disclosures About Market Risk” in our 2009 Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

SEC rules require us to maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our annual and periodic reports filed with the SEC is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. As defined in Rule 13a-15(e) under the Exchange Act, disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us is accumulated and communicated to management, including the Company’s CEO and CFO, to allow timely decisions regarding required disclosure. The Company’s CEO and CFO believe that the disclosure controls and procedures of the Company and the Operating Partnership were each effective at the end of the period covered by this Quarterly Report.

SEC rules also require us to establish and maintain internal control over financial reporting designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepting accounting principles. As defined in Rule 13a-15(f) under the Exchange Act, internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect transactions and dispositions of assets;
 - provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures are being made only in accordance with authorizations of management and directors; and
 - provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the financial statements.

There were no changes in internal control over financial reporting during the three months ended March 31, 2010 that materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting. There were also no changes in internal control over financial reporting during the three months ended March 31, 2010 that materially affected, or are reasonably likely to materially affect, the Operating Partnership’s internal control over financial reporting.
