Special Note Regarding Forward-Looking Statements

This Form 10-K contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, that involve risks and uncertainties. All statements other than statements of historical information provided herein are forward-looking statements and may contain information about financial results, economic conditions, trends and known uncertainties. Our actual results could differ materially from those discussed in the forward-looking statements as a result of a number of factors, which include those discussed in this section and elsewhere in this report and the risks discussed in our other filings with the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis, judgment, belief or expectation only as of the date hereof. We undertake no obligation to publicly reissue these forward-looking statements to reflect events or circumstances that arise after the date hereof.

Item 1. Business

Company Overview

NaviSite is a leading provider of managed website and application hosting services for businesses who operate mission critical Internet applications. Our managed application hosting services allow businesses to outsource the deployment, configuration, hosting, management and support of their Internet applications and Web sites in a cost-effective and rapid manner. This outsourcing allows customers to control IT resources and capital expenses. Our focus on enhanced management services, beyond basic co-location hosting services, allows us to meet the expanding needs of businesses as their Web sites and Internet applications become more complex. We also provide our customers with access to our state-of-the-art data centers and the benefit of our direct private transit Internet connections to multiple leading Internet backbone providers, increasing reliability, download speeds and providing extremely high levels of redundancy.

The scalability of our infrastructure and cost-effectiveness of our solutions allow us to offer a comprehensive suite of services to meet the current and future hosting and management needs of our customers. Our suite of service offerings includes:

Managed Applications--for customers who want to outsource the end-to-end management of their e-business application.

Edgar Filing: NAVISITE INC - Form 10-K

Managed Servers--for customers who intend to manage the application, but want to outsource the management of the infrastructure software--OS, web servers, database servers, application servers--to a trusted third party.

Managed Infrastructure--for customers who want to be able to select value added security, network and storage options on an a la carte basis, knowing that they are designed to be used either alone or together.

Managed Facilities--for customers with significant IT resources who want a vendor to manage the underlying data center and bandwidth facilities.

Professional Services--for customers who want to leverage industry experts to design and implement solutions that address their unique business needs, enable execution of their e-strategy and exploit the full advantages of their managed hosting environment.

Recent Developments

On October 29, 2001, we entered into an agreement under which we will receive a total of \$65 million in financing from Compaq Financial Services Corporation, or CFS, a wholly owned subsidiary of Compaq Computer Corporation, and CMGI. Under the terms of the agreement, CFS and CMGI will provide us with cash investments of \$20 million and \$10 million respectively in exchange for convertible notes. Additionally,

2

CFS has agreed to restructure certain outstanding NaviSite lease obligations. We have agreed to purchase equipment from CFS leased under operating leases in exchange for a six-year, \$35 million convertible note. As a result, we expect to substantially reduce cash expenditures on operating leases over the next two fiscal years. This note also allows us to finance past due lease payments, the sales tax on the equipment purchase and the outright purchase of the equipment.

The notes bear interest at 12% and will require payment of interest only for the first three years from the date of issuance and then repayment of interest and principal, on a straight-line basis, over the next three years until maturity on the sixth anniversary of the date of issuance. The principal amount may be convertible into our common stock at the option of the noteholders at any time prior to or at maturity. Should CFS convert its notes into NaviSite common stock, they would own a controlling stake in NaviSite. Additionally, the agreement includes a provision for non-voting participation rights by CFS on our board of directors.

As a part of this agreement, CMGI has also agreed to convert its existing \$80 million in outstanding notes into approximately 14.5 million shares of our common stock and an additional \$16.2 million of other amounts due CMGI into approximately 9.9 million shares of our common stock. The result of this agreement is that \$7 million in remaining interest payments due to CMGI, \$9.2 million in unamortized debt issuance costs and the repayment of the \$80 million principal amount due in December 2003 will be converted to equity.

This agreement has been approved by the boards of directors of each of NaviSite, CMGI and CFS. Certain NaviSite terms relating to the authorization and issuance of shares of our common stock upon conversion of the senior secured convertible notes issued under the agreements will be subject to approval by our stockholders.

Industry Background

Edgar Filing: NAVISITE INC - Form 10-K

Growth of Internet Business Applications. The dramatic growth in Internet usage combined with enhanced functionality, accessibility and security, has made the Internet increasingly attractive to businesses as a medium for communication and commerce. Initial use of the Internet was, for the most part, focused on consumer applications. Businesses are now deploying Internet applications on a large scale, to enhance their core business operations.

As business use of the Internet grows, we believe that businesses utilizing the Internet are seeking to identify and implement increasingly sophisticated Internet applications. These new applications permit businesses to:

- . Increase operating efficiencies and reduce SG&A costs;
- . Engage in business-to-business and business-to-consumer e-commerce;
- . Build and enhance customer relationships by providing Internet-based customer service and technical support;
- . Manage vendor and supplier relationships through Web-based technologies such as online training, e-commerce enablement, and streaming; and
- . Communicate and conduct business more rapidly and cost-effectively with customers, suppliers and employees worldwide.

As a result, the proliferation of business Web sites and Internet applications has created a strong underlying demand for specialized information technology support and application expertise.

Movement Toward Outsourcing. A growing number of businesses using the Internet as part of their business strategy have chosen to outsource Internet application development, implementation and support, particularly the hosting and management of their Web sites and Internet applications. According to Gartner Dataquest, hosting will rise from 6% of the IT management services market to better than 13% by 2004, and a Forrester Research report revealed that 62% of the Global 3500 companies surveyed hire hosters to run their Web sites. We believe that the growth in outsourced hosting and management of Web sites and Internet applications is driven by a number of factors, including:

- . Need to improve the reliability, availability and overall performance of their Internet applications and Web sites as those applications increase in importance and complexity;

3

- . Requirements for rapid time to market, and a reduced time to deploy operationally efficient Internet applications;
- . Challenges faced by businesses in hiring, training and retaining application engineers and information technology employees with the requisite range of IT expertise;
- . Increasing complexity of managing the operations of Web sites; and
- . Deployment risk and the risk of technological obsolescence as businesses attempt to capitalize on leading-edge technologies.

Forrester Research has estimated that the market for managed Web site hosting in the United States will grow from \$1.4 billion in 1999 to \$19.8 billion in 2004.

Need for Providers of Managed Application Hosting Services. An increasing

Edgar Filing: NAVISITE INC - Form 10-K

number of businesses are outsourcing the hosting and management of their Web sites and Internet applications. However, many Web site hosting companies developed their businesses to provide co-location hosting services and lack the requisite expertise to implement and manage increasingly sophisticated Internet applications. Moreover, many of these providers lack the scalable capacity, high-speed connectivity, monitoring capabilities and levels of reliability and availability which businesses demand. System integrators and application developers often have the requisite expertise and resources to supply businesses with highly customized application solutions, but these solutions are expensive and time consuming to implement, and project-oriented integrators and developers are not focused on supporting customer's applications on an ongoing basis. Some businesses attempt to reduce costs and shorten time to deployment by utilizing multiple vendors, each of which provides only a partial solution. This has created significant opportunity for managed application hosting providers who can offer Web site and Internet application deployment, configuration, hosting, management and support.

The NaviSite Solution

NaviSite provides a range of integrated, scalable Internet application and Web site hosting and application management services that can be deployed in a cost-effective and rapid manner. We specialize in deploying and managing dedicated, mission critical web solutions for our customers. We serve as the single point of management for their Internet applications and focus on enhanced management services that allow us to meet the expanding set of customer needs as Web sites and their applications become more complex. Key advantages of our solution include:

Comprehensive and Integrated Solutions. We provide an integrated suite of products and services that span the full application stack including data center, bandwidth, storage, servers, security, databases, OS and Web and application servers. We provide our services across both Unix and Windows platforms and in highly secure, highly available and redundant environments.

Cost-Effective Management Services. The combination of our scalable infrastructure, the repeatability of our management processes and our extensive base of expertise allows us to provide our customers with Web site and Internet application hosting and management services on a cost-effective basis. Because NaviSite has already deployed state-of-the-art infrastructure from the industry's leading providers, our customers can immediately leverage equipment and services that would typically not be cost effective for them to purchase and deploy themselves. Second, we have made significant investments in our operating platform and our automation capabilities. Furthermore, we have refined these processes over time and across a large base of customers. By leveraging this expertise, we can more efficiently configure, deploy and manage complex applications and, thus, save our customers from hiring or developing that same expertise in-house. By off-loading these resource and time-intensive Web site operations, we allow our customers to focus on their core business. We believe that our customers would otherwise be required to make significant expenditures to replicate our performance, reliability and expertise either internally or by using outside vendors.

Rapid Deployment. We offer our customers the ability to rapidly deploy, scale and adapt their Internet applications, often in a matter of days or weeks, rather than months. Because NaviSite has already deployed sophisticated infrastructure components and has the experience of deploying similar applications for hundreds

of customers, we believe that we can deploy sophisticated Web sites much more

Edgar Filing: NAVISITE INC - Form 10-K

rapidly than businesses can in-house. This is especially important to many of our customers who deploy mission critical applications for revenue enhancement or cost improvement objectives. These applications need to be in place immediately.

High-Performance, World-Class Infrastructure. Our infrastructure has been built by integrating "best of breed" components and designed specifically to meet the more demanding technical requirements of providing managed application hosting, compared to "co-location" hosting services. Our high-performance infrastructure, together with our trained and experienced staff enable us to offer levels of service which are backed by service level guarantees we believe are among the highest and most comprehensive in the industry.

Strategy

NaviSite's objective is to service our customers by being the single point of management for their outsourced IP applications. We plan to achieve this goal by continuing to enhance and leverage our expertise, service offerings and infrastructure to provide customers with integrated, reliable and secure Internet-based business solutions. Four key components of our strategy include:

Deliver Industry-Leading Operational Metrics. NaviSite has developed, and delivers to its customers, consistently high levels of operational metrics across the areas that are most critical to businesses, including the performance of customer applications, network elements, and service levels. NaviSite's operating metrics are believed to be among the highest metrics in the managed services industry. Because the quality and service level of our managed services is transparent, we believe that our operating metrics are a critical differentiator in the marketplace. NaviSite plans to continue driving improvements in its operating metrics and corresponding improvements in the quality of its customer service.

Focus on High Value-Added Managed Services. NaviSite currently provides horizontal infrastructure and application services that have broad appeal across most market segments, including a wide range of industry segments, including enterprises, ISV (Independent Software Vendors) and E-commerce companies. To meet the changing needs of our current and prospective customer base, we intend to augment our current service offerings by focusing on a subset of complex, scale and expertise driven services that build on our value proposition of outsourced IT operations. As a practice, we focus on network and application services that are repeatable, meaning that they require minimal additional customization and integration. We believe that this repeatability decreases our time to market, reduces our operating risks and produces a higher return on our investment and provides higher levels of consistency to our customers.

Partner to Deliver Customized Application Solutions. We believe that companies will require an increasingly diverse range of capabilities and point technologies as their applications increase in complexity. While NaviSite specializes in delivering highly scalable management services for the infrastructure, network and foundation application layers of the application stack, we intend to leverage relationships with key system integration and technology partners for services that extend beyond our product range. Driven by differences in economic models, these are services that we will not perform ourselves, but rather, will leverage partners in order to deliver integrated, customized and complete solutions to our end-user customers.

Leverage Distribution Channels with Strategic Partners. Historically, NaviSite built strong industry relationships with leading technology companies including hardware vendors, software manufacturers and system integrators. We

Edgar Filing: NAVISITE INC - Form 10-K

work closely with a small and select group of partners to jointly develop higher value proposition offerings and distribute them through joint marketing and sales efforts. By leveraging our industry relationships, and our partners' distribution capabilities, we are able to increase visibility and sales productivity.

Services

We offer a comprehensive suite of services to meet the current and future hosting needs of our customers.

Internet Application and Web Site Management. We provide both enhanced server management and specialized application management. Both types of management services permit us to provide customers with a

5

single point of problem resolution management, from identification to resolution to post-resolution analysis and reporting. To provide these services, our trained technical personnel utilize advanced network monitoring and management tools for Web site and application troubleshooting, together with internal policies and procedures designed to ensure rapid, effective solutions to technical problems. Our enhanced server management services include custom reporting, hardware options, network and application load balancing, system security, advanced back-up options, remote management and the services of our business solution managers.

Application Rentals. We offer select Internet application rentals to customers and application developers who need to access sophisticated Internet applications or application components, which can be customized by developers as part of a complete software solution. We typically manage all or elements of the applications. In addition, these applications may require experienced personnel to deploy and configure them. Additionally, customers benefit from the "one-stop shopping" aspect of procuring their applications in this manner.

Basic Web Site and Application Hosting. Our Web site and Internet application hosting services provide customers with the ability to leverage our state-of-the-art data centers, redundant bandwidth and back-up, storage, monitoring and reporting services. Customers are able to access their servers 24 hours a day, seven days a week. In fiscal 2001, less than 17% of our revenue was derived from basic co-location customers to whom we provide no enhanced or specialized management services. However, this is an attractive entry point for some customers, from which they can purchase more enhanced services from NaviSite, and migrate to enhanced managed services.

Comprehensive Streaming Media Services. Through our Streaming Media Division we offer managed streaming media services as a means of incorporating streaming into e-business applications by providing companies with comprehensive digital media production and distribution services. Our streaming services include the production, encoding and broadcasting of customers' content, the immediate integration of live event and on-demand streaming media into customers' Web sites and the enhancement of customers' Web sites with high-speed multi-media features. Our streaming services complement current customers' application management and service offerings centered on e-commerce and enhance our customers' online marketing efforts. These comprehensive streaming services are now also being adopted by enterprises and other businesses seeking to use streaming services for traditional business applications.

Professional Services. We supply consulting and other professional services such as, network and system configuration and architecture, scalability and performance testing, project implementation, bandwidth planning and, in limited

Edgar Filing: NAVISITE INC - Form 10-K

cases, basic software development and system integration.

Sales and Marketing

Our sales and marketing strategy is to achieve broad market penetration by focusing on market segments that deploy mission critical Web sites and are structured to realize the economic value of outsourcing. While NaviSite initially focused on companies that adopted the Internet as an integral part of their business strategy, the focus has evolved to include more traditional enterprises as they incorporate the Internet in their business operations. Here, NaviSite has been able to leverage its extensive experience and expertise in delivering complex managed services to service the needs of evolving enterprises.

We sell our services through a direct sales force and we receive referrals through an extensive network of business and channel partners.

Direct Sales. Our direct sales professionals are organized into three groups:

- . Sales representatives, who conduct sales campaigns, identify targeted prospects, oversee sales territories and manage customer relationships;
- . Sales engineers, who discuss prospective customers' Web site and Internet application hosting and management business needs and technical requirements; and
- . Telesales representatives, who qualify customer leads.

6

Our direct sales teams are currently located in: Andover, Massachusetts; New York, New York; San Francisco, San Jose and Los Angeles, California; Atlanta, Georgia; and Vienna, Virginia.

Channel Sales. We have developed important industry relationships to enhance our channel sales and marketing capabilities. We have developed a range of partnerships, including relationships with many companies that have formally joined NaviSite's Alliance program. Types of companies include Web and application developers, system integrators/consultants, ISV (Independent Software Vendors), and technology partners. These partners provide complementary services and, thus, allow NaviSite customers to benefit from more comprehensive solutions, and this allows NaviSite to focus on its core value-added services. Many of these partners also provide a significant source of lead referrals to NaviSite and in some cases are also our customers. As a result, many of our partners' customers become NaviSite customers. Historically, we have worked closely with our partners. Going forward, we intend to strengthen these relationships to develop customer referrals, mutual referral relationships, enhanced service offerings, and in some cases, co-selling, cross-selling and reselling opportunities.

Marketing. Our marketing group is responsible for building brand awareness through public relations and marketing communications, identifying key market and customer segments and creating marketing programs to target those segments. The marketing organization focuses on supporting the direct sales as well as developing and enhancing channel partner relationships. The primary mechanisms include:

- . Comprehensive lead generation through telemarketing, direct marketing, direct mail programs, select electronic and print advertising, electronic and face-face seminars and targeted shows and events;

Edgar Filing: NAVISITE INC - Form 10-K

- . Interactive, online marketing programs;
- . Sponsorships of targeted partner and customer events;
- . Marketing communications and public relations materials to sustain press coverage in both trade and business publications;
- . Market development activities targeted to Internet application developers and consultants; and
- . Lead generation, referrals, mutual Web site links or co-marketing activities, leveraging close strategic relationships with technology partners such as Cisco Systems, Dell Corporation, Compaq Computer Corporation, BMC, Inc. and EMC Corporation.

Customers

We were organized in 1996 by CMGI to support the networks and host the Web sites of CMGI companies and a number of CMGI affiliates. In the fall of 1997, we began supplying Web site hosting and management services to companies unaffiliated with CMGI. As of July 31, 2001, we had approximately 288 customers, down from 362 as of July 31, 2000.

A representative list of our hosting customers as of July 31, 2001 includes: Biogen, Inc., Levi Strauss, Inc., Stop and Shop Supermarket Company, Optika, Inc., Fuel Spot, Inc., Wolters Kluwer nv, Blue Cross Blue Shield of Central New York, Sun Microsystems, Inc., SLI, Inc., The Premier Insurance Company of Massachusetts and Restoration Hardware.

A representative list of our streaming customers as of July 31, 2001 includes: St. Jude Hospital, MSN, Anheuser-Busch, NFL Films, TWI Interactive and Northeast Utilities.

Product Management and Product Development

Our product management and development organizations work together in developing a broad range of "horizontal" managed infrastructure, network and application services. Our teams identify and evaluate new Internet applications and technologies; we develop monitoring and management services specifically for these applications, and then incorporate these applications into our suite of service offerings. We focus on Internet applications that permit us to offer our customers repeatable, scalable services. Our goal is to introduce services

7

capable of utilization by a large number of customers, seeking to maximize revenue production and minimize the incremental operating cost for each additional customer utilizing that service. As new applications are introduced, our personnel integrate the application into our management and billing systems, provide technical documentation and training and ensure the security of the offering. This process is critical to our ability to provide integrated, scalable applications to our customers and is designed to result in increased operating margins, faster product delivery and improved customer service.

Customer Service and Support

We believe high levels of customer service and support are critical to our continued success and future growth. Our customer care staff is focused on direct and indirect customer service and support. We have developed a customized, life-cycle project management approach to our operations. For some

Edgar Filing: NAVISITE INC - Form 10-K

of our customers, we assign a single business solutions manager who services the customer from deployment through the entire customer relationship. This approach is designed to enhance our responsiveness to customer requests, problem troubleshooting and technology upgrades.

NaviSite offers a single point of problem resolution management for all of our customers. Problems with a customer's Web sites can occur in any one of six to eight layers. NaviSite can diagnose, identify and rapidly fix problems at each of these levels, from the network to the operating system, from the server hardware to the database, from the application-server to selected end-user applications. The result is a single point of problem resolution management for customers, a key value added service where NaviSite takes responsibility for fixing problems or managing the process of getting problems fixed.

To do this, we utilize a number of state-of-the-art automated systems, including a knowledge-based problem resolution and trouble ticketing system, and enterprise system monitoring platform, sophisticated data storage, an enterprise tape backup system and a corporate intranet with a built-in document management and source control system. We believe that our approach to customer service and support and our ability to rapidly respond to customer needs provides us with a significant competitive advantage.

Network Infrastructure, Technology, and Operations

NaviSite entered the Internet application Web service market with the advantage of a sophisticated and experience-tested infrastructure established to support CMGI and a number of its affiliates, which were deploying some of the most demanding, high-traffic Web applications. We have differentiated our infrastructure from competing application service providers and co-location hosting providers through our superior operational metrics that directly impact customer performance and reliability, our experience with high-performance Internet applications and our comprehensive managed service offerings. We designed our infrastructure specifically to provide superior performance for our Internet application and Web site hosting and management services, including multi-level network redundancy to provide the highest levels of network uptime, reliable and customized network security and fast, guaranteed response time and availability of customers' content, which we deliver through our private transit Internet connections. Our infrastructure is also designed to scale to support continued growth. We believe that our sophisticated and highly redundant infrastructure provides us with a competitive advantage over other hosting vendors and most Internet service providers. Key elements of our infrastructure include:

Data Centers. NaviSite has built a select number of high performance managed application data centers in order to provide our customers with a critical mass of expertise in Internet applications and management services from each data center, while capturing the benefits of centralized infrastructure and staffing. We currently serve customers from two primary data centers, located in Andover, Massachusetts and in San Jose California. These state-of-the-art data centers incorporate technically sophisticated components, which are designed to be fault-tolerant. The components used in our data centers include Cisco redundant core routers, Cisco redundant core switching hubs and secure, virtual local area networks. We utilize the equipment and tools necessary for our data center operations, including our infrastructure hardware, networking and software products, from industry leaders such as BMC, Cisco Systems, Compaq Computer Corporation, Dell, EMC, Microsoft Corporation, Oracle, and Sun Microsystems.

Private Transit Internet Connectivity. Our use of direct private transit

Edgar Filing: NAVISITE INC - Form 10-K

Internet connections to three major Internet backbone providers differentiates our network infrastructure from those of our competitors. We have redundant high-capacity Internet connections to UUNet, InterNap, and Cable and Wireless on the East Coast and UUNet and InterNap on the West Coast. We have deployed direct private transit Internet connections specifically to avoid congestion and data loss at public Internet exchange points and the resulting degradation of performance. Our private transit system enables us to provide fast, reliable access for our customers' Web sites and Internet applications. Because we have direct private transit links to Internet providers, we can directly monitor the capacity of all of our connections and intend that we will have the aggregate bandwidth to move large quantities of data at high transmission speeds. We believe that our private transit Internet connections also enable us to more effectively launch new applications, such as streaming, which require high bandwidth availability and run more effectively in a private transit model.

Service Level Agreements. The combination of our state-of-the-art infrastructure, our customer-focused operations group and our hosting and management expertise enable us to offer our customers service levels backed by guarantees that we believe are among the highest and most comprehensive in the industry. For example, one of our offerings is a 99.99% full site high availability SLA that covers their entire application stack.

Network Security. Our network incorporates host-based security with CheckPoint back-end firewalls and Cisco router access control lists, as well as SecureID token-based authentication. In addition to these physical security measures, we have a formal security policy in place, including employee training, that governs all facets of our business and guidelines governing internal and external access to information housed in our network system.

Network Operations Centers. We monitor the operations of our infrastructure and customer Web Sites using our own network operations centers. Each network operations center is fully staffed 24 hours a day, seven days a week with Windows NT, UNIX, application and support personnel. Our network operations centers perform first-level problem identification and resolution. The design of our network operations centers allows network engineers and support personnel to be promptly alerted to problems, and we have established procedures for rapidly resolving any technical issues that arise. Network management and monitoring tools continuously monitor the network and server performance.

Competition

We compete in the managed application hosting service market. The overall hosting market is evolving rapidly, is highly competitive and is likely to be characterized by an increasing number of market entrants and by industry consolidation. We believe that NaviSite's focus on higher-level managed application services provides significant differentiation from traditional co-location hosting providers, and provides significantly higher customer value. We believe that participants in this market must grow rapidly and achieve a significant presence to compete effectively. We believe that managed applications services are difficult to provide well and require an infrastructure, work processes and management systems tuned to this business model. We believe that the primary competitive factors determining success in our market include:

- . quality of service delivered;
- . ability to consistently measure, track and report on operational metrics;
- . Web site and Internet application hosting and management expertise;
- . fast, redundant, and reliable Internet connectivity;

Edgar Filing: NAVISITE INC - Form 10-K

- . a state-of-the-art infrastructure providing availability, speed, scalability and security;

- . comprehensive and diverse service offerings and timely addition of value-added services;

- . brand recognition;

- . competitive pricing; and

- . adequate capital to permit continued investment in infrastructure, customer service and support and sales and marketing.

9

Our current and prospective competitors include:

- . other providers of co-location or high-end Web site hosting and related services, including AboveNet Communications, Inc., Digex Corporation, Exodus Communications, Inc., Globix Corporation, Genuity, Inc., Data Return Corporation, and a large number of local and regional hosting providers;

- . companies that focus on customized Internet application services and application hosting, including CORIO, Inc., IBM Global Services and LoudCloud;

- . large system integrators and information technology outsourcing firms, including Electronic Data Systems Corporation and International Business Machines Corporation; and

- . global telecommunications companies, including AT&T Corp., Quest and Sprint Corporation, and regional and local telecommunications companies, including AT&T Broadband.

Many of our competitors may be able to develop and expand their network infrastructures and service offerings more rapidly, adapt to new or emerging technologies and changes in customer requirements more quickly, take advantage of acquisitions and other opportunities more readily, devote greater resources to the marketing and sale of their services and adopt more aggressive pricing policies than we can. Because of these competitive factors and due to our comparatively small size and our lack of financial resources, we may be unable to successfully compete in the Internet application service market.

In addition, we believe that there will be continued consolidation within the Internet hosting market in which we compete. Our competitors may consolidate with one another, or acquire software application vendors or technology providers, enabling them to more effectively compete with us. This consolidation could affect prices and other competitive factors in ways, which would impede our ability to compete successfully in the Internet application service market.

Proprietary Rights

We rely on a combination of trademark, service mark, copyright and trade secret laws and contractual restrictions to establish and protect our proprietary rights and promote our reputation and the growth of our business. We do not own any patents that would prevent or inhibit competitors from using our technology or entering our market. While it is our practice to require all

Edgar Filing: NAVISITE INC - Form 10-K

of our employees, consultants and independent contractors to enter into agreements containing non-disclosure, non-competition and non-solicitation restrictions and covenants, and while our agreements with some of our customers and suppliers include provisions prohibiting or restricting the disclosure of proprietary information, we can not assure you that these contractual arrangements or the other steps taken by us to protect our proprietary rights will prove sufficient to prevent misappropriation of our proprietary rights or to deter independent, third-party development of similar proprietary assets. In addition, we offer our services in other countries where the laws may not afford adequate protection for our proprietary rights.

We license or lease most technologies used in our Internet application services. Our technology suppliers may become subject to third-party infringement claims, or other claims or assertions, which could result in their inability or unwillingness to continue to license their technology to us. The loss of certain of our technologies could impair our ability to provide services to our customers or require us to obtain substitute technologies of lower quality or performance standards or at greater cost. We expect that we and our customers increasingly will be subject to third-party infringement claims as the number of Web sites and third-party service providers for Web-based businesses grows. In addition, we have received notices alleging that our use of our service marks infringes the trademark rights of third parties. Although we do not believe that any of these allegations have merit, or that our technologies or services otherwise infringe the proprietary rights of any third parties, we cannot assure you that third parties will not assert claims against us in the future or that these claims will not be successful. Any infringement claim as to our technologies or services, regardless of its merit, could be time-consuming, result in costly litigation, cause delays in service, installation or upgrades, adversely impact our relationships with suppliers or customers or require us to enter into royalty or licensing agreements.

10

Government Regulation

While there currently are few laws or regulations directly applicable to the Internet or to managed application hosting service providers, due to the increasing popularity of the Internet and Web-based applications it is likely that such laws and regulations may be adopted. These laws may cover a variety of issues including, for example, user privacy and the pricing, characteristics and quality of products and services. The adoption or modification of laws or regulations relating to commerce over the Internet could substantially impair the future growth of our business or expose us to unanticipated liabilities. Moreover, the applicability of existing laws to the Internet and managed application hosting service providers is uncertain. These existing laws could expose us to substantial liability if they are found to be applicable to our business. For example, we offer services over the Internet in many states in the United States and internationally and we facilitate the activities of our customers in those jurisdictions. As a result, we may be required to qualify to do business, be subject to taxation or be subject to other laws and regulations in these jurisdictions, even if we do not have a physical presence or employees or property there. The application of existing laws and regulations to the Internet or our business, or the adoption of any new legislation or regulations applicable to the Internet or our business, could materially adversely affect our financial condition and operating results.

Employees

As of July 31, 2001, we had 386 employees. Of these employees, 215 were principally engaged in operations, 65 were principally engaged in sales and marketing, 54 were principally engaged in product development and 52 were

Edgar Filing: NAVISITE INC - Form 10-K

principally engaged in finance and administration. None of our employees is party to a collective bargaining agreement and we believe our relationship with our employees is good. We also employ consultants and independent contractors on a regular basis to assist in the completion of projects. It is our practice to require all of our employees, consultants and independent contractors to enter into agreements containing non-disclosure, non-competition and non-solicitation restrictions or covenants.

Certain Factors That May Affect Future Results

The risks and uncertainties described below are not the only risks we face. Additional risks and uncertainties not presently known to us or that are currently deemed immaterial may also impair our business operations. If any of the following risks actually occur, our financial condition and operating results could be materially adversely affected.

We have a history of operating losses and expect future losses. We cannot assure you that we will ever achieve profitability on a quarterly or annual basis or, if we achieve profitability, that it will be sustainable. We were organized in 1996 by CMGI to support the networks and host the Web sites of CMGI and a number of CMGI affiliates. It was not until the fall of 1997 that we began providing Web site hosting and Internet application management services to companies unaffiliated with CMGI. Since our inception in 1996, we have experienced operating losses and negative cash flows for each quarterly and annual period. As of July 31, 2001, we had an accumulated deficit of \$215.7 million. We anticipate increased expenses as we continue to improve our infrastructure, introduce new services, enhance our application management expertise, expand our sales and marketing efforts and pursue additional industry relationships. As a result, we expect to incur operating losses for at least the next fiscal year.

Fluctuations in our quarterly operating results may negatively impact our stock price. Our quarterly operating results may fluctuate significantly in the future as a result of a variety of factors, many of which are outside our control. These factors include: reduction of market demand and or acceptance for our Web site and Internet application hosting and management services; oversupply of data center space in the industry; our ability to develop, market and introduce new services on a timely basis; downward price adjustments by our competitors; changes in the mix of services provided by our competitors; technical difficulties or system downtime affecting the Internet generally or our hosting operations specifically; our ability to meet any increased technological demands of our customers; the amount and timing of costs related to our marketing efforts and service introductions; and economic conditions specific to the Internet application service provider industry. Our operating results for any particular quarter may fall short of our expectations or those of investors or securities analysts. In this event, the market price of our common stock would be likely to fall.

11

CMGI is currently a majority stockholder and CFS is a potential majority stockholder, and both may have interests that conflict with the interests of our other stockholders. As of July 31, 2001, CMGI beneficially owned approximately 76.74% of our outstanding common stock. Accordingly, CMGI has the power, acting alone, to elect a majority of our board of directors and has the ability to determine the outcome of any corporate actions requiring stockholder approval, regardless of how our other stockholders may vote. Under Delaware law, CMGI may exercise its voting power by written consent, without convening a meeting of the stockholders, meaning that CMGI could affect a sale or merger of our company without prior notice to, or the consent of, our other stockholders. CMGI's interests could conflict with the interests of our other stockholders.

Edgar Filing: NAVISITE INC - Form 10-K

The possible need of CMGI to maintain control of us in order to avoid becoming a registered investment company could influence future decisions by CMGI as to the disposition of any or all of its ownership position in our company. CMGI would be subject to numerous regulatory requirements with which it would have difficulty complying if it were required to register as an investment company. As a result, CMGI may be motivated to maintain at least a majority ownership position in us, even if our other stockholders might consider a sale of control of our company to be in their best interests. As long as it is a majority stockholder, CMGI has contractual rights to purchase shares in any of our future financing sufficient to maintain its majority ownership position. CMGI's ownership may have the effect of delaying, deferring or preventing a change in control of our company or discouraging a potential acquirer from attempting to obtain control of us, which in turn could adversely affect the market price of our common stock.

As of October 29, 2001, in conjunction with the restructuring of certain of our lease obligations, we have agreed to issue CFS convertible notes which, upon conversion, would give CFS a controlling interest in NaviSite. Accordingly, CFS would have the power, acting alone, to elect a majority of our board of directors. If CFS becomes a majority stockholder, it may have interests that conflict with the interests of our other stockholders, as described above for CMGI.

A significant portion of our revenue currently is generated by services provided to CMGI and companies affiliated with CMGI, and the loss of this revenue would substantially impair the growth of our business. We anticipate that we will continue to receive a significant portion of our revenue in the future from CMGI and CMGI affiliates. CMGI and CMGI affiliates accounted for approximately 35% of our revenue in the fiscal year ended July 31, 2001, approximately 50% of our revenue in the fiscal year ended July 31, 2000, and approximately 68% of our revenue in the fiscal year ended July 31, 1999. We cannot assure you that revenues generated by CMGI and CMGI affiliates will continue or that we will be able to secure business from unaffiliated customers to replace this revenue in the future. The loss of revenue from CMGI and CMGI affiliates, or our inability to replace this operating revenue, would substantially impair the growth of our business.

Our ability to grow our business would be substantially impaired if we were unable to obtain, on commercially reasonable terms, certain equipment that is currently provided under leases. Certain of the equipment that we use or provide to our customers for their use in connection with our services is provided under leases. We or our customers will have to obtain this equipment for new leases and renewal of existing leases directly, on a stand alone basis. Our business would be substantially impaired if we were unable to obtain or continue these leases on commercially reasonable terms.

We are attempting to renegotiate certain lease obligations. During the renegotiations of our equipment lease obligations, we have not paid certain scheduled lease payments to certain vendors. Our total remaining lease obligation to these vendors is approximately \$57 million. Of this amount, approximately \$27 million will be restructured in the CFS agreement, which provides for our purchase of equipment under operating lease. During these renegotiations, we have been notified by certain lessors that we are in default of our lease agreements. Remedies under these leases, if the event of default is not cured, include the demand of all remaining lease payments under the original lease terms, payment of stipulated loss amounts or return of the underlying equipment. We plan to cure these defaults within 60 days of closing the CFS agreement. In the event we do not cure these defaults, these lessors may enforce their rights.

If the market for Internet commerce and communication does not continue, or it continues to decrease, there may be insufficient demand for our services,

Edgar Filing: NAVISITE INC - Form 10-K

and as a result, our business strategy may not be successful. The increased use of the Internet for retrieving, sharing and transferring information among businesses and consumers has developed only recently, and the market for the purchase of products and

12

services over the Internet is new and emerging. If acceptance and growth of the Internet as a medium for commerce and communication does not continue, our business strategy may not be successful because there may not be a continuing market demand for our Web site and Internet application hosting and management services. Our business could be substantially impaired if the market for Internet application services fails to continue to develop or if we cannot continue to achieve broad market acceptance. The market for Internet application services has recently developed and is evolving.

Our ability to successfully market our services could be substantially impaired if we are unable to deploy new Internet applications or if new Internet applications deployed by us prove to be unreliable, defective or incompatible. We cannot assure you that we will not experience difficulties that could delay or prevent the successful development, introduction or marketing of Internet application services in the future. If any newly introduced Internet applications suffer from reliability, quality or compatibility problems, market acceptance of our services could be greatly hindered and our ability to attract new customers could be adversely affected. We cannot assure you that new applications deployed by us will be free from any reliability, quality, or compatibility problems. If we incur increased costs or are unable, for technical or other reasons, to host and manage new Internet applications or enhancements of existing applications, our ability to successfully market our services could be substantially impaired.

The market we serve is highly competitive, and we may lack the financial and other resources, expertise or capability needed to capture increased market share or maintain market share. We compete in the Internet application service market. This market is rapidly evolving, highly competitive and likely to be characterized by over capacity and industry consolidation. We believe that participants in this market must grow rapidly and achieve a significant presence to compete effectively. Our business is not as developed as that of many of our competitors. Many of our competitors have substantially greater financial, technical and marketing resources, greater name recognition and more established relationships in the industry. We may lack the financial and other resources, expertise or capability needed to capture increased or maintain market share in this environment in the future.

Any interruptions in, or degradation of, our private transit Internet connections could result in the loss of customers or hinder our ability to attract new customers. Our customers rely on our ability to move their digital content as efficiently as possible to the people accessing their Web sites and Internet applications. We utilize our direct private transit Internet connections to major backbone providers as a means of avoiding congestion and resulting performance degradation at public Internet exchange points. We rely on these telecommunications network suppliers to maintain the operational integrity of their backbones so that our private transit Internet connections operate effectively.

Increased costs associated with our private transit Internet connections could result in the loss of customers or significant increases in operating costs. Our private transit Internet connections are already more costly than alternative arrangements commonly utilized to move Internet traffic. If providers increase the pricing associated with utilizing their bandwidth, we may be required to identify alternative methods to distribute our customers'

Edgar Filing: NAVISITE INC - Form 10-K

digital content. We cannot assure you that our customers will continue to be willing to pay the higher costs associated with direct private transit or that we could effectively move to another network approach. If we are unable to access alternative networks to distribute our customers' digital content on a cost-effective basis or to pass any additional costs on to our customers, our operating costs would increase significantly.

If we are unable to maintain existing and develop additional relationships with Internet application software vendors, the sale, marketing and provision of our Internet application services may be unsuccessful. We believe that to penetrate the market for Web site and Internet application hosting and management services we must maintain existing and develop additional relationships with industry-leading Internet application software vendors and other third parties. We license or lease select software applications from Internet application software vendors. The loss of our ability to continually obtain and utilize any of these applications could materially impair our ability to provide services to our customers or require us to obtain

13

substitute software applications of lower quality or performance standards or at greater cost. In addition, because we generally license applications on a non-exclusive basis, our competitors may license and utilize the same software applications. In fact, many of the companies with which we have strategic relationships currently have, or could enter into, similar license agreements with our competitors or prospective competitors. We cannot assure you that software applications will continue to be available to us from Internet application software vendors on commercially reasonable terms. If we are unable to identify and license software applications which meet our targeted criteria for new application introductions, we may have to discontinue or delay introduction of services relating to these applications.

We purchase from a limited number of suppliers key components of our infrastructure, including networking equipment. We cannot assure you that we will have the necessary hardware or parts on hand or that our suppliers will be able to provide them in a timely manner in the event of equipment failure. Our dependency to obtain and continue to maintain the necessary hardware or parts on a timely basis could result in sustained equipment failure and a loss of revenue due to customer loss or claims for service credits under our service level guarantees.

Our inability to scale our infrastructure or manage customer growth and the related expansion of our operations could result in decreased revenue and continued operating losses. In order to service our customer base, we will need to continue to improve our network infrastructure. Our ability to continue to meet the needs of a substantial number of customers while maintaining superior performance is largely unproven. If our network infrastructure is not scalable, we may not be able to provide our services to additional customers, which would result in decreased revenue.

Our customer base includes a significant number of dot.com businesses that face increased risk of loss of funding depending upon the availability of the private and/or public funding. Many of our customers are small start-up Internet based businesses that have traditionally been initially funded by venture capital firms and then through public securities offerings. If the market for technology and Internet based businesses is not supported by the private investors who have funded these customers, we face the risk that these customers may cease, curtail or limit Website operations hosted by us. We have experienced and may continue to experience a loss of revenue associated with these customers and will then have to increase sales to other businesses using the Internet in order to preserve and grow our revenue.

Edgar Filing: NAVISITE INC - Form 10-K

You may experience dilution because of our recent financing arrangements with CFS and CMGI. The financing arrangement, as of October 29, 2001, with CFS and CMGI includes terms which allow CFS and CMGI at their discretion, to convert the debt obligation of \$65 million into our common stock at a conversion price of \$0.26 per share, subject to our stockholder approval. This conversion will increase the number of our common stock shares issued by approximately 250 million shares. In addition, we may pay a portion of interest due to CFS and all interest due to CMGI with our common shares. Moreover, if additional funds are raised through the issuance of additional equity or convertible debt securities, your percentage of ownership in us will be reduced and you may experience additional dilution. In certain circumstances, if we issue equity or convertible debt securities at values below those provided to CFS, we must issue CFS additional shares of our common stock which will further dilute existing stockholders.

Funding may not be available to us on favorable terms, if at all. We may need to raise additional funds from time to time, and we cannot assure you that additional financing will be available on terms favorable to us, if at all. In addition, pursuant to our financing arrangements with CFS as of October 29, 2001, we may need to obtain approval from CFS for incremental funding, and we may not obtain this approval from CFS.

Our network infrastructure could fail, which would impair our ability to provide guaranteed levels of service and could result in significant operating losses. To provide our customers with guaranteed levels of service, we must operate our network infrastructure 24 hours a day, seven days a week without interruption. In order to operate in this manner, we must protect our network infrastructure, equipment and customer files against damage from human error, natural disasters, unexpected equipment failure, power loss or

14

telecommunications failures, sabotage or other intentional acts of vandalism. Even if we take precautions, the occurrence of a natural disaster, equipment failure or other unanticipated problem at one or more of our data centers could result in interruptions in the services we provide to our customers. We cannot assure you that our disaster recovery plan will address all, or even most, of the problems we may encounter in the event of such a disaster.

We have experienced service interruptions in the past, and any future service interruptions could: require us to spend substantial amounts of money to replace equipment or facilities; entitle customers to claim service credits under our service level guarantees; cause customers to seek damages for losses incurred; or make it more difficult for us to attract new customers, retain current customers or enter into additional strategic relationships. Any of these occurrences could result in significant operating losses.

The misappropriation of our proprietary rights could result in the loss of our competitive advantage in the market. We rely on a combination of trademark, service mark, copyright and trade secret laws and contractual restrictions to establish and protect our proprietary rights. We do not own any patents that would prevent or inhibit competitors from using our technology or entering our market. We cannot assure you that the contractual arrangements or other steps taken by us to protect our proprietary rights will prove sufficient to prevent misappropriation of our proprietary rights or to deter independent, third-party development of similar proprietary assets. In addition, we provide our services in other countries where the laws may not afford adequate protection for our proprietary rights.

Third-party infringement claims against our technology suppliers, customers

Edgar Filing: NAVISITE INC - Form 10-K

or us could result in disruptions in service, the loss of customers or costly and time-consuming litigation. We license or lease most technologies used in the Internet application services that we offer. Our technology suppliers may become subject to third-party infringement claims or other claims and assertions, which could result in their inability or unwillingness to continue to license their technology to us. We expect that we and our customers increasingly will be subject to third-party infringement claims as the number of Web sites and third-party service providers for Web-based businesses grows. In addition, we have received notices alleging that our service marks infringe the trademark rights of third parties. We cannot assure you that third parties will not assert claims against us in the future or that these claims will not be successful. Any infringement claim as to our technologies or services, regardless of its merit, could result in delays in service, installation or upgrades, the loss of customers or costly and time-consuming litigation, or require us to enter into royalty or licensing agreements.

The loss of key officers, key management, and other personnel could impair our ability to successfully execute our business strategy, because we substantially rely on their experience and management skills, or could jeopardize our ability to continue to provide service to our customers. We believe that the continued service of key personnel, including Tricia Gilligan, our President and Chief Executive Officer, is a key component of the future success of our business. None of our key officers or personnel is currently a party to an employment agreement with us. This means that any officer or employee can terminate his or her relationship with us at any time. In addition, we do not carry life insurance for any of our key personnel to insure our business in the event of their death. In addition, the loss of key members of our sales and marketing teams or key technical service personnel could jeopardize our positive relations with our customers. Any loss of key technical personnel would jeopardize the stability of our infrastructure and our ability to provide the guaranteed service levels our customers expect. On July 31, 2001, we initiated a reduction in force eliminating 126 full- and part-time employees, representing approximately 25 percent of our total staff. We also announced the departure of 7 of 13 vice presidents, in the areas of sales, human resources, international, strategic planning, managed services, marketing and technology planning, as well as our general counsel. In addition, since July 31, 2001, both Joel B. Rosen, our then Chief Executive Officer, and Kenneth W. Hale, our then Chief Financial Officer, have left our company. Although further reductions are not presently anticipated, we cannot assure you that such reductions will not be necessary in the future.

If we fail to attract or retain skilled personnel, our ability to provide Web site and Internet application management and technical support may be limited, and as a result, we may be unable to attract customers. Our business requires individuals with significant levels of Internet application expertise, in particular, to win

15

consumer confidence in outsourcing the hosting and management of mission-critical applications. Qualified technical personnel are likely to remain a limited resource for the foreseeable future. We may not be able to retain or hire the necessary personnel to implement our business strategy or may need to provide higher compensation to such personnel than we currently anticipate.

Any future acquisitions we make of companies or technologies may result in disruptions to our business or distractions of our management due to difficulties in assimilating acquired personnel and operations. Our business strategy contemplates future acquisitions of complementary technologies. If we do pursue additional acquisitions, our risks may increase because our ongoing business may be disrupted and management's attention and resources may be

Edgar Filing: NAVISITE INC - Form 10-K

diverted from other business concerns. In addition, through acquisitions, we may enter into markets or market segments in which we have limited prior experience.

Once we complete an acquisition, we will face additional risks. These risks include: difficulty assimilating acquired operations, technologies and personnel; inability to retain management and other key personnel of the acquired business; and changes in management or other key personnel that may harm relationships with the acquired business's customers and employees. We cannot assure you that any acquisitions will be successfully identified and completed or that, if one or more acquisitions are completed, the acquired business, assets or technologies will generate sufficient revenue to offset the associated costs or other adverse effects.

The emergence and growth of a market for our Internet application services will be impaired if third parties do not continue to develop and improve the Internet infrastructure. The recent growth in the use of the Internet has caused frequent periods of performance degradation, requiring the upgrade of routers and switches, telecommunications links and other components forming the infrastructure of the Internet-by-Internet service providers and other organizations with links to the Internet. Any perceived degradation in the performance of the Internet as a means to transact business and communicate could undermine the benefits and market acceptance of our Web site and Internet application hosting and management services. Our services are ultimately limited by, and dependent upon, the speed and reliability of hardware, communications services and networks operated by third parties. Consequently, the market for our Internet application services may be impaired if improvements are not made to the entire Internet infrastructure to alleviate overloading and congestion.

We could be subject to increased operating costs, as well as claims, litigation or other potential liability, in connection with risks associated with Internet security and the security of our systems. A significant barrier to the growth of e-commerce and communications over the Internet has been the need for secure transmission of confidential information. Several of our Internet application services utilize encryption and authentication technology licensed from third parties to provide the protections necessary to ensure secure transmission of confidential information. We also rely on security systems designed by third parties and the personnel in our network operations centers to secure those data centers. Any unauthorized access, computer viruses, accidental or intentional actions and other disruptions could result in increased operating costs. For example, we may incur additional significant costs to protect against these interruptions and the threat of security breaches or to alleviate problems caused by such interruptions or breaches, and we may expend additional financial resources in the future to equip our data centers with enhanced security measures. If a third party were able to misappropriate a consumer's personal or proprietary information, including credit card information, during the use of an application solution provided by us, we could be subject to claims, litigation or other potential liability.

We may become subject to burdensome government regulation and legal uncertainties that could substantially impair our business or expose us to unanticipated liabilities. It is likely that laws and regulations directly applicable to the Internet or to Internet application service providers may be adopted. These laws may cover a variety of issues, including user privacy and the pricing, characteristics and quality of products and services. The adoption or modification of laws or regulations relating to commerce over the Internet could substantially impair our business or expose us to unanticipated liabilities. Moreover, the applicability of existing laws to the Internet and Internet application service providers is uncertain. These existing laws could

Edgar Filing: NAVISITE INC - Form 10-K

expose us to substantial liability if they are found to be applicable to our business. For example, we provide services over the Internet in many states in the United States and elsewhere and facilitate the activities of our customers in such jurisdictions. As a result, we may be required to qualify to do business, be subject to taxation or be subject to other laws and regulations in these jurisdictions, even if we do not have a physical presence, employees or property there.

We may be subject to legal claims in connection with the information disseminated through our network, which could have the effect of diverting management's attention and require us to expend significant financial resources. We may face potential direct and indirect liability for claims of defamation, negligence, copyright, patent or trademark infringement, violation of securities laws and other claims based on the nature and content of the materials disseminated through our network. For example, lawsuits may be brought against us claiming that content distributed by some of our current or future customers may be regulated or banned. In these and other instances, we may be required to engage in protracted and expensive litigation that could have the effect of diverting management's attention and require us to expend significant financial resources. Our general liability insurance may not necessarily cover any of these claims or may not be adequate to protect us against all liability that may be imposed.

In addition, on a limited number of occasions in the past, businesses, organizations and individuals have sent unsolicited commercial e-mails from servers hosted at our facilities to a number of people, typically to advertise products or services. This practice, known as "spamming," can lead to complaints against service providers that enable such activities, particularly where recipients view the materials received as offensive. We have in the past received, and may in the future receive, letters from recipients of information transmitted by our customers and service providers objecting to such transmission. Although we prohibit our customers by contract from spamming, we cannot assure you that our customers will not engage in this practice, which could subject us to claims for damages.

The market price of our common stock may experience extreme price and volume fluctuations. The market price of our common stock may fluctuate substantially due to a variety of factors, including: any actual or anticipated fluctuations in our financial condition and operating results; public announcements concerning us or our competitors, or the Internet industry; the introduction or market acceptance of new service offerings by us or our competitors; changes in industry research analysts' earnings estimates; changes in accounting principles; sales of our common stock by existing stockholders; and the loss of any of our key personnel.

In addition, the stock market has experienced extreme price and volume fluctuations. The market prices of the securities of technology and Internet-related companies have been especially volatile. This volatility often has been unrelated to the operating performance of particular companies. In the past, securities class action litigation often has been brought against companies that experience volatility in the market price of their securities. Whether or not meritorious, litigation brought against us could result in substantial costs and a diversion of management's attention and resources.

Our common stock may be delisted from Nasdaq. On September 5, 2001, we received a deficiency notice from Nasdaq indicating that our common stock had failed to maintain a minimum bid price of \$1.00 over the previous 30 consecutive trading days and that we had until December 4, 2001 to regain compliance with Nasdaq's listing requirements. Nasdaq informed us that if we failed to demonstrate compliance with Nasdaq's listing requirements on or

Edgar Filing: NAVISITE INC - Form 10-K

before December 4, 2001, Nasdaq would provide us with written notification that it had determined that we do not meet the standards for continued listing, and our securities would be delisted from Nasdaq. However, on September 27, 2001, Nasdaq announced that it had suspended its minimum bid and market value of public float requirements for continued listing until January 2, 2002. Nasdaq adopted this measure to help companies remain listed in view of the extraordinary market conditions following the tragedy of September 11, 2001. Under the temporary relief provided by the new rules, companies will not be cited for bid price or market value of public float deficiencies and companies, such as NaviSite, currently under review for deficiencies or in the hearings process will be taken out of the process with respect to the bid price or market value of public float requirements and no deficiencies will accrue during the proposed suspension process.

17

Nevertheless, if the minimum bid price requirement for continued listing on Nasdaq is reinstated on January 2, 2002, new delisting proceedings may be initiated against our common stock. If we are unable to regain compliance with this requirement, our common stock may be delisted from trading on Nasdaq. If our common stock were delisted from Nasdaq, among other things, this could result in a number of negative implications, including reduced liquidity in our common stock as a result of the loss of market efficiencies associated with Nasdaq and the loss of federal preemption of state securities laws as well as the potential loss of confidence by suppliers, customers and employees, the loss of analyst coverage and institutional investor interest, fewer business development opportunities and greater difficulty in obtaining financing.

Item 2. Properties

Facilities

Our executive offices are located at 400 Minuteman Road, Andover, Massachusetts, in an approximately 150,000 square foot facility leased pursuant to an agreement, which expires in 2011. The 400 Minuteman facility is also partly utilized as a data center (52,000 square feet of raised floor).

Data centers

We currently have two domestic data center locations, with a total of approximately 74,000 square feet of raised floor. In addition to the 400 Minuteman Road data center, we also occupy a 66,000 square foot facility located in the Valley Technology Centre, 2720 Zanker Road, San Jose, California (22,000 square feet of raised floor), part of which is utilized as a data center, leased pursuant to an agreement which expires in 2006.

On July 31, 2001, we closed a 22,000 square foot facility located at 300 Federal Street, Andover, Massachusetts (10,000 square feet of raised floor). In addition, we also closed our 14,100 square foot facility at 1700 Green Hill Road, Scotts Valley, California (4,000 square feet of raised floor). The closing of these original data centers will allow us to operate our data centers more efficiently. In addition to our existing data centers, we presently utilize approximately 10,000 square feet of space in Sunnyvale, California and approximately 2,000 square feet of space in New York through an arrangement with Level 3.

Sales and Marketing Space:

In connection with our sales and marketing efforts, we occupy offices at 11601 Wilshire Boulevard, Suite 500, Los Angeles, California; 680 Third Avenue 10th Floor, New York, New York; 2720 Zanker Road, San Jose, California; 8300

Edgar Filing: NAVISITE INC - Form 10-K

Boone Boulevard, Suite 540, Vienna, Virginia; 3340 Peachtree Road, Atlanta, GA; 575 Market Street, San Francisco, California; and 400 Minuteman Road, Andover, Massachusetts.

Streaming Media Division

Our Streaming Media Division currently occupies approximately 16,800 square feet at 4225 Executive Square, LaJolla, California, pursuant to an agreement that expires November 2006. This location is used as both the production facility and as the administrative offices of the Streaming Media Division.

Item 3. Legal Proceedings

On or about June 13, 2001, Stuart Werman and Lynn McFarlane filed a lawsuit against us, BancBoston Robertson Stephens, Inc., an underwriter of our initial public offering in October 1999, Joel B. Rosen, our then Chief Executive Officer, and Kenneth W. Hale, our then Chief Financial Officer. The suit was filed in the United States District Court for the Southern District of New York. The suit generally alleges that the defendants violated federal securities laws by not disclosing certain actions allegedly taken by Robertson

18

Stephens in connection with our initial public offering. The suit alleges specifically that Robertson Stephens, in exchange for the allocation to its customers of shares of our common stock sold in our initial public offering, solicited and received from its customers undisclosed commissions on transactions in other securities and required its customers to purchase additional shares of our common stock in the aftermarket at pre-determined prices. The suit seeks unspecified monetary damages and certification of a plaintiff class consisting of all persons who acquired shares of our common stock between October 22, 1999 and December 6, 2000.

On or about June 21, 2001, David Federico filed in the United States District Court for the Southern District of New York a lawsuit against us, Mr. Rosen, Mr. Hale, FleetBoston Robertson Stephens, Inc. and other underwriter defendants including J.P. Morgan Chase, First Albany Companies, Inc., Bank of America Securities, LLC, Bear Stearns & Co., Inc., B.T. Alex.Brown, Inc., Chase Securities, Inc., CIBC World Markets, Credit Suisse First Boston Corp., Dain Rauscher, Inc., Deutsche Bank Securities, Inc., The Goldman Sachs Group, Inc., J.P. Morgan & Co., J.P. Morgan Securities, Lehman Brothers, Inc., Merrill Lynch, Pierce, Fenner & Smith, Inc., Morgan Stanley Dean Witter & Co., Robert Fleming, Inc. and Salomon Smith Barney, Inc. The suit generally alleges that the defendants violated the anti-trust laws and the federal securities laws by conspiring and agreeing to raise and increase the compensation received by the underwriter defendants by requiring those who received allocation of initial public offering stock to agree to purchase shares of manipulated securities in the after-market of the initial public offering at escalating price levels designed to inflate the price of the manipulated stock, thus artificially creating an appearance of demand and high prices for that stock, and initial public offering stock in general, leading to further stock offerings. The suit also alleges that the defendants arranged for the underwriter defendants to receive undisclosed and excessive brokerage commissions and that, as a consequence, the underwriter defendants successfully increased investor interest in the manipulated initial public offering securities and increased the underwriter defendants' individual and collective underwritings, compensation and revenues. The suit further alleges that the defendants violated the federal securities laws by issuing and selling securities pursuant to the initial public offering without disclosing to investors that the underwriter defendants in the offering, including the lead underwriters, had solicited and received excessive and undisclosed commissions from certain

Edgar Filing: NAVISITE INC - Form 10-K

investors. The suit seeks unspecified monetary damages and certification of a plaintiff class consisting of all persons who acquired shares of our common stock between October 22, 1999 and June 12, 2001.

We believe that the allegations are without merit and we intend to vigorously defend against the plaintiffs' claims. As the litigation is in an initial stage, we are not able to predict the possible outcome of the suits and their ultimate effect, if any, on our financial condition.

We are also subject to other legal proceedings and claims which arise in the ordinary course of our business. In the opinion of management, the amount of ultimate liability with respect to these actions will not materially affect the consolidated financial position or results from operations of our company.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders during the fourth quarter of fiscal year ended July 31, 2001.

Executive Officers of NaviSite

Patricia Gilligan, age 50, has served as NaviSite's President and Chief Executive Officer since July 2001. From June 2000 to July 2001, Ms. Gilligan served as Navisite's Chief Operating Officer. From January 1999 to June 2000, Ms. Gilligan served as Vice President of Worldwide Services of Incentive Systems, an incentive compensation application developer. From April 1997 to January 1999, Ms. Gilligan served as Vice President of East Coast Operations of Razorfish, Inc., a digital solutions provider. From January 1992 to April 1997, Ms. Gilligan served as Chief Information Officer of Cahners Publishing Company, a business information company.

19

Anthony Amato, age 36, has served as NaviSite's Vice President of Finance since September 2001. From August 2000 to August 2001, Mr. Amato served as Director of Finance at CMGI, Inc. From July 1999 to August 2000, Mr. Amato served as Director of Finance and Administration at Raging Bull, Inc., a financial messaging board provider and subsidiary of CMGI. From April 1998 to July 1999, Mr. Amato served as Controller for Software Emancipation Technology, Inc., a software developer of information systems. From December 1996 to April 1998, Mr. Amato was Controller at MyWay.com Corporation, formerly known as Planet Direct Corporation, a personal on-line content service and subsidiary of CMGI.

Kevin Lo, age 28, has served as NaviSite's Vice President of Products, Services and Business Development since July, 2001 and has served as Chief Technology Officer since January 2001. From October 2000 to January 2001, Mr. Lo served NaviSite as the Director of Utility Infrastructure Services. From August 1997 to October 2000, Mr. Lo served as Chairman and Chief Executive Officer at X-Collaboration Software Corporation, an application infrastructure provider of collaborative Web services. From September 1995 to August 1997, Mr. Lo was a Strategy Consultant at Bain & Company.

Martin Sinozich, age 39, has served as NaviSite's Vice President of Operations since March 2001. Mr. Sinozich served as Chief Operating Officer of Epesi, a web services firm, from November 2000 to March 2001. From June 1999 to November 2000, Mr. Sinozich served as Vice President of Operations for Engage, Inc., a subsidiary of CMGI. From November 1996 to June 1999, Mr. Sinozich served as Vice President at Fidelity Investments. From April 1995 to November 1996, Mr. Sinozich served as Vice President of Desktop Computing for MBNA

Edgar Filing: NAVISITE INC - Form 10-K

America Bank.

Wayne Whitcomb, age 42, has served as NaviSite's Vice President of Engineering since October 2001. From February 2001 to September 2001, Mr. Whitcomb served as Chief Infrastructure Architect for NaviSite. From August 2000 to February 2001, Mr. Whitcomb was Vice President of Engineering for Mirror Image, a content delivery network. From August 1998 to August 2000, Mr. Whitcomb was Vice President of Engineering at MyWay.com Corporation, formerly known as Planet Direct Corporation, a subsidiary of CMGI. From May 1997 to August 1998, Mr. Whitcomb was Director of Information Services at MyWay.com. From February 1997 to May 1997, Mr. Whitcomb was a consultant for OceanOne Technologies LLC, a technology consulting firm. From April 1995 to February 1997, Mr. Whitcomb was a Manager and Team Leader of Integrated Business Systems at Borden Global Packaging.

PART II

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters

Price Range of Common Stock

Our common stock commenced trading on the Nasdaq National Market on October 22, 1999 and is traded under the symbol "NAVI." As of September 30, 2001, there were 118 holders of record of our common stock. Because brokers and other institutions on behalf of stockholders hold many of such shares, we are unable to estimate the total number of stockholders represented by these record holders. The following table sets forth for the periods indicated the high and low sales prices for our common stock as reported on the Nasdaq National Market, adjusted to reflect the effect of the April 5, 2000 two-for-one stock split.

	Closing Price	
	High	Low
Fiscal Year Ending July 31, 2001:		
May 1, 2001 through July 31, 2001.....	\$ 2.85	\$ 0.75
February 1, 2001 through April 30, 2001.....	3.59	1.03
November 1, 2000 through January 31, 2001.....	12.75	2.03
August 1, 2000 through October 31, 2000.....	53.00	7.78
Fiscal Year Ending July 31, 2000:		
May 1, 2000 through July 31, 2000.....	\$ 58.88	\$34.00
February 1, 2000 through April 30, 2000.....	164.94	26.50
November 1, 1999 through January 31, 2000.....	63.25	21.50
October 22, 1999 through October 31, 1999.....	25.50	14.06

We believe that a number of factors may cause the market price of our common stock to fluctuate significantly. See "Item 1. Business--Certain Factors That May Affect Future Results."

We have never paid cash dividends on our capital stock. We currently anticipate retaining all available funds, if any, to finance internal growth and product development. Payment of dividends in the future will depend upon our earnings and financial condition and such other factors as the directors may consider or deem appropriate at the time.

Edgar Filing: NAVISITE INC - Form 10-K

Recent Sales of Unregistered Securities

On June 11, 2001, we issued 158,956 shares of our common stock to CMGI for payment of interest in an amount of \$586,155 related to the \$80 million convertible notes payable to CMGI. These shares were issued on June 11, 2001, representing the number of shares of common stock equal to \$586,155 divided by the average of the closing prices per share of common stock as reported on the Nasdaq National Market on January 24, 25, 26, 29 and 30, 2001, rounded up to the nearest whole share. On June 11, 2001, we issued 801,675 shares of our common stock to CMGI for payment of interest in an amount of \$1,518,375 related to the notes. These shares were issued on June 11, 2001, representing the number of shares of common stock equal to \$1,518,375 divided by the average of the closing prices per share of common stock as reported on the Nasdaq National Market on April 23, 24, 25, 26 and 27, 2001, rounded up to the nearest whole share. On July 31, 2001, we issued 1,829,075 shares of our common stock to CMGI for payment of interest in an amount of \$1,503,500 related to the notes. These shares were issued on July 31, 2001, representing the number of shares of common stock equal to \$1,503,500 divided by the average of the closing prices per share of common stock as reported on the Nasdaq National Market on July 24, 25, 26, 27 and 30, 2001, rounded up to the nearest whole share. The common stock was issued in reliance upon the exemptions from registration under Section 4(2) of the Securities Act and Regulation D promulgated thereunder, relative to sales by an issuer not involving a public offering. No underwriters were involved in the sale of these securities.

21

Item 6. Selected Consolidated Financial Data

The following selected consolidated financial data should be read in conjunction with our consolidated financial statements and related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this Form 10-K. Historical results are not necessarily indicative of results of any future period.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

In March 2000, our board of directors approved a two-for-one common stock split, affected in the form of a stock dividend of one share of common stock for each share of common stock outstanding. The stock dividend was paid on April 5, 2000 to stockholders of record at the close of business on March 22, 2000. Accordingly, the consolidated financial statements have been retroactively adjusted for all periods presented to reflect this event. Unless otherwise indicated, all share information in this Management's Discussion and Analysis of Financial Condition and Results of Operations reflects the two-for-one stock split.

Overview

Edgar Filing: NAVISITE INC - Form 10-K

We provide outsourced Web hosting and managed application services for companies conducting business on the Internet, including enterprises and other businesses deploying Internet applications. Our goal is to help customers focus on their core competencies by outsourcing the management and hosting of their Web operations and applications, allowing customers to fundamentally improve the efficiency of their Web operations. We also provide related professional and consulting services. Our focus on enhanced management services, beyond basic co-location services, allows us to meet the expanding needs of businesses as their Web sites and Internet applications become more complex. We believe that we are one of only a relatively small number of companies that combine a highly scalable and developed infrastructure with experience, intellectual property, skill sets, processes and procedures for delivering managed hosting services. The cost for our services varies from customer to customer based on the number of managed servers and the nature, extent and level of services provided.

We were incorporated in Delaware in December 1998 as a wholly owned subsidiary of NaviSite Internet Services Corporation as part of a corporate reorganization of NaviSite Internet Services Corporation. At that time, we received a contribution of assets from NaviSite Internet Services Corporation in exchange for 60,589 shares of our common stock and 1,323,953 shares of our Series A convertible preferred stock. At the same time, NaviSite Internet Services Corporation contributed the remainder of its assets to NaviNet, Inc., another newly formed subsidiary of NaviSite Internet Services Corporation. Effective as of October 1, 1999, NaviSite Internet Services Corporation was merged with and into CMGI, leaving NaviSite and NaviNet, Inc. as direct subsidiaries of CMGI.

Our predecessor, NaviSite Internet Services Corporation, was incorporated in Delaware in February 1997 under the name CMG Information Technology, Inc. and changed its name to NaviSite Internet Services Corporation in May 1997. We commenced operations in July 1996, funded by CMGI, to support the networks and host the Web sites of CMGI and a number of CMGI affiliates. CMGI affiliates include all entities in which CMGI holds an equity interest. We began providing Web site hosting and Internet application management services to companies unaffiliated with CMGI in the fall of 1997.

All financial information presented here refers only to NaviSite, including the hosting and Internet application management segments of NaviSite Internet Services Corporation, and does not include the financial condition or results of operations of NaviNet, Inc., including the dial-up operations of NaviSite Internet Services Corporation.

In July 1998, we acquired Servercast Communications, L.L.C., a Delaware limited liability company and developer and integrator of Internet applications, for \$1.0 million in notes, plus bridge notes receivable of \$25,000 and \$20,000 in acquisition costs. We acquired Servercast principally for its expertise in application management, online advertising, e-commerce, content management and streaming media. In February 2000, we acquired ClickHear, Inc. for consideration valued at approximately \$4,693,000, including approximately \$50,000 of direct costs of the acquisition. We acquired ClickHear principally for its expertise in streaming media management and development.

Since January 31, 2000, our corporate headquarters has been located at 400 Minuteman Road, Andover, Massachusetts. Before this date, our corporate headquarters was shared with CMGI and several other CMGI

affiliates. CMGI allocated rent, facility maintenance and service costs among these affiliates based upon headcount within each affiliate and within each

Edgar Filing: NAVISITE INC - Form 10-K

department of each affiliate. Other services provided by CMGI to us included support for enterprise services, human resources and benefits and Internet marketing and business development. Management believes that costs approximate the fair value of the services received. Actual expenses could have varied had we been operating on a stand-alone basis. Costs are allocated to us on the basis of the fair market value for the facilities used and the services provided. Through July 31, 2001, we operated two data centers in California and two data centers in Andover, Massachusetts. On July 31, 2001, we announced the closure of our two original data centers, one in Andover, Massachusetts and one in Scotts Valley, California.

We derive our revenue primarily from managed hosting services, but within that framework, from a variety of services, including: Web site and Internet application hosting, which includes access to our state-of-the-art data centers, a range of bandwidth services, Content Distribution Network services, advanced back-up options, managed storage and monitoring services; enhanced server management, which includes custom reporting, hardware options, network and application load balancing, system security, and the services of our technical account managers; specialized application management, which includes management of e-commerce and other sophisticated applications support services, including scalability testing, streaming services for managed hosting customers, databases and transaction processing services. We also derive revenue from related consulting and other professional services, and from providing a full suite of streaming services for the production, management, reporting, and tracking of live and on-demand web events. Revenue also includes income from the rental of equipment to customers, termination fees and one-time installation fees. Revenue is recognized in the period in which the services are performed. Installation fees are recognized over the period of the customer contract. Previous to fiscal year 2001, installation revenue was recognized at the time installation services were provided. Our customer contracts generally are a one to three year commitment.

We have incurred significant net losses and negative cash flows from operations since our inception and, as of July 31, 2001, had an accumulated deficit of approximately \$215.7 million. These losses primarily have been funded by CMGI through the issuance of common stock, preferred stock and convertible debt, our initial public offering and related underwriters' over-allotment in October 1999 and November 1999, respectively, and the sale-leaseback of certain assets. We intend to continue to invest in sales, marketing, promotion, technology and infrastructure development as we grow. We believe that we will continue to incur operating losses and negative cash flows from operations for at least the next fiscal year.

Recent Developments

On October 29, 2001, we entered into an agreement under which we will receive a total of \$65 million in financing from CFS and CMGI. Under the terms of the agreement, CFS and CMGI will provide us with cash investments of \$20 million and \$10 million respectively in exchange for convertible notes. Additionally, CFS has agreed to restructure certain outstanding NaviSite lease obligations. We have agreed to purchase equipment from CFS leased under operating leases in exchange for a six-year, \$35 million convertible note. As a result, we expect to substantially reduce cash expenditures on operating leases over the next two fiscal years. This note also allows us to finance past due lease payments, the sales tax on the equipment purchase and the outright purchase of the equipment.

The notes bear interest at 12% and will require payment of interest only for the first three years from the date of issuance and then repayment of interest and principal, on a straight-line basis, over the next three years until maturity on the sixth anniversary of the date of issuance. The principal amount may be convertible into our common stock at the option of the noteholders at

Edgar Filing: NAVISITE INC - Form 10-K

any time prior to or at maturity. Should CFS convert its notes into NaviSite common stock, they would own a controlling stake in NaviSite. Additionally, the agreement includes a provision for non-voting participation rights by CFS on our board of directors.

As a part of this agreement, CMGI has also agreed to convert its existing \$80 million in outstanding notes into approximately 14.5 million shares of our common stock and an additional \$16.2 million of other amounts

24

due CMGI into approximately 9.9 million shares of our common stock. The result of this agreement is that \$7 million in remaining interest payments due to CMGI, \$9.2 million in unamortized debt issuance costs and the repayment of the \$80 million principal amount due in December 2003 will be converted to equity.

This agreement has been approved by the boards of directors of each of NaviSite, CMGI and CFS. Certain NaviSite terms relating to the authorization and issuance of shares of our common stock upon conversion of the senior secured convertible notes issued under the agreements will be subject to approval by our stockholders.

Results of Operations

The following table sets forth the consolidated statement of operations data for the periods indicated as a percentage of revenues:

	Year Ended July 31

	=====	=====	=====

Comparison of Fiscal Years Ended July 31, 2001 and 2000

Revenue

Our revenue from sales to related parties principally consists of sales of services to CMGI and other customers that are CMGI affiliates. In general, in pricing the services provided to CMGI and its affiliates, we have: negotiated the services and levels of service to be provided; calculated the price of the services at those service levels based on our then-current, standard prices; and, in exchange for customer referrals provided to us by CMGI, discounted these prices by 10%. In fiscal 2001, we sold services to CMGI and CMGI affiliates totaling approximately \$36.4 million, or 35% of revenue. Four of these customers accounted for approximately 24.64%, 17.14%, 15.07% and 13.57% of revenue, respectively. As of July 31, 2001, CMGI owned approximately 69.35% of our outstanding common stock, the balance of the common stock owned by the public.

25

Total revenue increased 106% to approximately \$102.7 million in fiscal 2001, from approximately \$49.8 million in fiscal 2000. The increase in revenue is due primarily to an increase of approximately \$13.8 million of revenue related to the 114 new unaffiliated customers in the fiscal year and additional business with both existing unaffiliated customers, and affiliated customers of CMGI. Revenue from unaffiliated customers increased to approximately \$66.4 million or 65% of total revenue, from approximately \$24.8 million or 50% of total revenue for fiscal year 2000. The number of unaffiliated customers decreased 19% to 273 at July 31, 2001 from 338 as of July 31, 2000. We will continue to focus our efforts to expand our revenues with new unaffiliated enterprise customers over the near term. However, there can be no assurance that we will be successful or that the industry trend towards outsourcing IT functions and Web hosting applications will increase in the future. For fiscal year 2002, we are anticipating a 10 to 15% decrease in revenue from the fiscal year 2001 levels.

During fiscal year 2001, we adopted SEC Staff Accounting Bulletin No. 101-- Revenue Recognition in Financial Statements ("SAB 101"). Under SAB 101, installation fees are recognized over the life of the related customer contracts. Prior to fiscal year 2001, we recognized installation fees at the time the installation occurred. The cumulative effect of the change in accounting principle on all prior years resulted in a \$4.3 million increase in net loss for the year ended July 31, 2001 and is reflected as a cumulative effect of change in accounting principle. Revenue for the year ended July 31, 2001 includes \$1.5 million that was included in the cumulative effect adjustment. The \$1.5 million of 2001 revenue was primarily attributable to the recognition of previously deferred revenue on customers lost during 2001.

Cost of Revenue

Cost of revenue consists primarily of salaries and benefits for operations personnel, bandwidth fees and related Internet connectivity charges, equipment costs and related depreciation and costs to run our four data centers, such as rent and utilities. With the growth of our business, we expect these costs to increase in dollar terms, but decline on a percentage of revenue basis. We also expect to achieve economies of scale as a result of spreading more volume over fixed assets, increasing productivity and using new technological tools. For

Edgar Filing: NAVISITE INC - Form 10-K

fiscal year 2002, we are anticipating that the cost of sales will decrease from the fiscal year 2001 levels. The anticipated decrease is a result of our fiscal year 2001 restructuring efforts. The restructuring efforts are expected to result in decreased labor costs and reduced equipment and infrastructure expenses going forward.

Cost of revenue in dollars increased 88% to approximately \$129.1 million in fiscal 2001, from approximately \$68.5 million in fiscal 2000. As a percentage of revenue, cost of revenue decreased to 126% in fiscal 2001, from 138% in fiscal 2000. The dollar-value increase is due primarily to the costs associated with increased investment in our data centers. These costs principally include labor and headcount expenses, additional equipment and maintenance costs and increased bandwidth. Included in the fiscal year 2001 cost of revenue is a charge of approximately \$1.9 million related to certain equipment under operating leases, which has been deemed not to have a future economic benefit us.

Gross Margin

Gross margin improved to approximately a negative (25.7%) of total revenue for fiscal year 2001, from approximately a negative (37.6%) of total revenue for fiscal year 2000. The improvement in the gross margin is a direct result of scaling the fixed infrastructure and labor costs across a larger customer base. Our business model requires that we make "up-front" fixed investments in both equipment and personnel. These costs are leveraged across our data centers. We anticipate that our gross margins will continue to improve, based on current estimates and expectations and barring unforeseen circumstances, as our occupancy rate increases and we achieve higher operational efficiencies and economies of scale.

Operating Expenses

Product Development. Product development expenses consist mainly of salaries and related costs. Our product development staff focuses on Internet applications and network architecture. This group identifies new

26

Internet application software offerings, incorporates these new offerings into our suite of service offerings and positions these new offerings for marketing, sale and deployment. Our product development group also implements the various technologies, including network storage and back-up, that provide the infrastructure for both our internal network and the solutions we offer our customers. As with sales and marketing, we believe that increased investment in product development is critical to attaining our strategic objectives and maintaining our competitive edge. For fiscal year 2002, we expect the dollar value of product development expenses to decline on a percentage of revenue basis. Product development expenses increased to \$14.1 million in fiscal 2001, from approximately \$5.2 million in fiscal 2000. As a percentage of revenue, product development expenses increased to 14% in fiscal 2001, from 10% in fiscal 2000. The dollar-value increase in product development expenses is primarily related to the headcount and related costs resulting from the increase in product development personnel to 54 at July 31, 2001 from 31 at July 31, 2000. This growth in product development personnel reflects our increased service offerings and emphasis on application services.

Selling and Marketing. Selling and marketing expenses consist primarily of salaries and related benefits, commissions and marketing expenses such as advertising, product literature, trade shows, marketing and direct mail programs. For fiscal year 2002, we expect selling and marketing expenses to decline in dollar terms. We continue to make targeted investments in areas that

Edgar Filing: NAVISITE INC - Form 10-K

promote brand recognition and increase new customer acquisitions. We intend to accomplish this by adding capabilities in our direct sales and marketing organizations, building leveraged distribution channels with selected technology partners and increasing spending in targeted PR and marketing programs.

Selling and marketing expenses increased 41% to approximately \$32.3 million in fiscal 2001, from approximately \$22.8 million in fiscal 2000. As a percentage of revenue, selling and marketing expenses decreased to 31% in fiscal 2001, from 46% in fiscal 2000. The dollar-value increase is due primarily to increased headcount, salaries and commissions and expenses for marketing programs, advertising and product literature.

General and Administrative. General and administrative expenses include the costs of financial, leasing, human resources, IT and administrative personnel, professional services, bad debt, and corporate overhead. Also included are intercompany charges from CMGI for facilities (prior to our move to our new headquarters in January 2000), human resource support and business development. With the growth of our business, we expect the dollar value of these expenses to increase, but decline on a percentage of revenue basis, as we hire additional personnel and incur additional costs related to the growth of our business.

General and administrative expenses increased 170% to approximately \$33.0 million in fiscal 2001, from approximately \$12.3 million in fiscal 2000. As a percentage of revenue, general and administrative expenses increased to 32% in fiscal 2001, from 25% in fiscal 2000. The dollar-value increase in general and administrative expenses is primarily due to an increase in headcount, salaries and related costs, to approximately \$9.9 million in fiscal 2001, from approximately \$4.3 million in fiscal 2000, resulting from the hiring of additional administrative, legal, human resource, IT and finance personnel to support our growing and expanding operations and an increase in bad debt expense to approximately \$11.9 million in fiscal 2001, from approximately \$1.0 million in fiscal 2000. For fiscal year 2002, we are anticipating a decrease in general and administrative expense resulting from the fiscal year 2001 restructuring, lower labor levels and decreased bad debt expense.

Restructuring. During July 2001, we announced a plan, approved by our board of directors, to restructure our operations and consolidate data centers, which resulted in a charge of \$8,011,000. Of the total restructuring charge, approximately \$1,810,000 is related to employee termination benefits. We terminated 126 employees on July 31, 2001 and paid all termination benefits in the first fiscal quarter 2002. The restructuring charge also includes approximately \$6,201,000 of costs related to the closing of our original data centers (Scotts Valley, California and Andover, Massachusetts). The components of the facility closing costs included \$3,829,000 of lease costs and other contractual obligations, to be paid over the term of the respective agreements, and \$2,372,000 of write-offs of leasehold improvements.

27

Interest Income

Interest income increased to approximately \$2.8 million in fiscal 2001, from approximately \$2.1 million in fiscal 2000. The increase is due primarily to the increase of average cash on hand due to additional financing events during the fiscal year.

Interest Expense

Interest expense increased to approximately \$8.0 million in fiscal 2001,

Edgar Filing: NAVISITE INC - Form 10-K

from approximately \$1.0 million in fiscal 2000. This increase is due primarily to the interest on the \$80.0 million CMGI Notes and related warrant amortization.

Comparison of Fiscal Years Ended July 31, 2000 and 1999

Revenue

Total revenue increased 373% to approximately \$49.8 million in fiscal 2000, from approximately \$10.5 million in fiscal 1999. The increase in revenue is due primarily to an increase of approximately \$18.5 million of revenue related to the 275 new unaffiliated customers in the quarter and additional business with both existing unaffiliated customers, and affiliated customers of CMGI. Revenue from unaffiliated customers increased to approximately \$24.9 million or 50% of total revenue, from approximately \$3.5 million or 33% of total revenue for fiscal year 1999. The number of unaffiliated customers increased 68.6% to 338 at July 31, 2000 from 106 as of July 31, 1999.

Cost of Revenue

Cost of revenue increased 237% to approximately \$68.5 million in fiscal 2000, from approximately \$20.3 million in fiscal 1999. As a percentage of revenue, cost of revenue decreased to 138% in fiscal 2000, from 193% in fiscal 1999. The dollar-value increase in each period was due primarily to the costs associated with increased investment in our existing data centers. These costs principally included labor and headcount expenses, additional equipment and maintenance costs and increased bandwidth and connectivity charges.

Gross Margin

Gross margin improved to approximately a negative (38%) of total revenue for fiscal year 2000, from approximately a negative (93%) of total revenue for fiscal year 1999. The improvement in the gross margin is a direct result of scaling the fixed infrastructure and labor costs across a larger customer base. Our business model requires that we make "up-front" fixed investments in both equipment and personnel. These costs are leveraged across our data centers. We anticipate that our gross margins should continue to improve, based on current estimates and expectations and barring unforeseen circumstances, as our occupancy rate increases and we achieve higher operational efficiencies and economies of scale.

Operating Expenses

Product Development. Product development expenses increased to \$5.2 million in fiscal 2000, from approximately \$2.6 million in fiscal 1999. This increase was due primarily to the costs associated with an increase in product development personnel by July 31, 2000 to 31, from 20 at July 31, 1999. This growth in product development personnel reflects our increased service offerings and emphasis on application services.

Selling and Marketing. Selling and marketing expenses increased 231% to approximately \$22.8 million in fiscal 2000, from approximately \$6.9 million in fiscal 1999. This increase was due primarily to the development of NaviSite's sales and marketing capability in connection with the commencement of sales to unaffiliated customers. These costs primarily included salaries and commissions and expenses for marketing programs, advertising and product literature.

General and Administrative. General and administrative expenses increased 154% to approximately \$12.3 million in fiscal 2000, from approximately \$4.8

Edgar Filing: NAVISITE INC - Form 10-K

million in fiscal 1999. The dollar-value increase in general and administrative expenses was due to both an increase in salaries and related costs, to approximately \$4.3 million in fiscal 2000, from approximately \$1.7 million in fiscal 1999, resulting from the hiring of additional administrative and finance personnel to support our growing operations and expanding operations.

Interest Income

Interest income increased to approximately \$2.1 million in fiscal 2000, from approximately \$4,000 in fiscal 1999. The increase is due primarily to the funds available for investment resulting from our various fiscal year 2000 financing activities, including our \$80.4 million initial public offering, a \$50.0 million private placement of common stock and a \$30.0 million sale-leaseback of certain assets.

Interest Expense

Interest expense, increased to approximately \$1.0 million in fiscal 2000, from \$347,000 in fiscal 1999. This increase is due primarily to interest incurred on capital lease obligations.

Liquidity and Capital Resources

Since our inception, our operations have been funded primarily by CMGI through the issuance of common stock, preferred stock and convertible debt, our initial public offering the issuance of preferred stock to strategic investors and related underwriters' over-allotment in October 1999 and November 1999, respectively.

Our cash and cash equivalents decreased to \$22.2 million at July 31, 2001 from \$77.9 million at July 31, 2000 and we had a working capital deficit of \$9.7 million at July 31, 2001. Net cash used in operating activities was \$88.8 million for the year ended July 31, 2001, resulting primarily from net losses and increases in accounts receivable, and decreases in accounts payable, accrued expenses and deferred revenue, partially offset by increases in amounts due to CMGI, bad debt expense, and depreciation and amortization. The increases in accounts receivable are a direct result of the related increase in revenue during 2001 compared to 2000, net of increased bad debt expense associated primarily with customers concentrated in the Internet and dot.com sector.

Net cash used in investing activities was \$17.4 million for the year ended July 30, 2001, primarily associated with the acquisition of property and equipment and restricted cash required to secure lease commitments, partially offset by proceeds on the sale-leaseback of certain equipment. Net cash provided by financing activities was \$50.5 million for the year ended July 31, 2001, comprised primarily of \$80 million received through the issuance of convertible notes payable to CMGI offset by payments under capital lease obligations.

During fiscal 2000, we sold certain of our equipment and leasehold improvements in our two new data centers in a sale-leaseback transaction (referred to as the capital lease) to a bank for approximately \$30.0 million. During fiscal year 2001, we repaid the remaining balance of the capital lease obligation totaling approximately \$27.0 million.

During fiscal year 2001, we sold certain equipment in a sale-leaseback transaction to an equipment vendor for approximately \$13.9 million. We simultaneously entered into an operating lease of the equipment with the vendor. The lease is payable in monthly installments through December 2002.

Edgar Filing: NAVISITE INC - Form 10-K

During fiscal year 2001, we renewed a letter of credit for the lease of our Andover, Massachusetts facility. The terms of the letter of credit require a pledge of approximately \$4.4 million, which is reflected on the balance sheet as restricted cash at July 31, 2001.

During fiscal year 2001, we entered into a letter of credit for the lease of our San Diego, California facility. The terms of the letter of credit require a pledge of approximately \$555,000, which is also reflected on the balance sheet as restricted cash at July 31, 2001. On October 3, 2001, the bank did not renew the letter of credit and the funds were remitted to the landlord.

During fiscal year 2001, we entered into a Note and Warrant Purchase Agreement (referred to as the Agreement) with CMGI. The Agreement provided for the sale of a subordinated, unsecured, convertible note in the principal amount of \$50 million and a subordinated, unsecured, convertible note in the principal amount of \$30 million (collectively referred to as the Notes). The Notes are convertible at CMGI's option, and by NaviSite under defined circumstances, into our common stock at a conversion price equal to \$5.535 per share. We received gross proceeds of \$80 million from the issuance of the Notes. The annual interest rate on the notes is 7.5% payable quarterly in, at our discretion, either cash or our common stock. The principal amount is due in full by December 12, 2003. In connection with the Agreement, we granted CMGI, effective December 15, 2000, a warrant to purchase 2,601,625 shares of our common stock at \$5.77 per share, and a warrant to purchase 2,601,625 shares of our common stock at \$6.92 per share. The warrants are exercisable upon issuance and expire on December 15, 2005. We ascribed a fair value of \$12.9 million to the warrants using the Black-Scholes model and are amortizing this fair value over the life of the Notes as an additional component of interest expense.

On October 29, 2001, we entered into an agreement between CMGI and CFS. Under the terms of the agreement, we have agreed to purchase equipment from CFS leased by us under operating lease agreements expiring through 2003 in exchange for a note of approximately \$35 million. This note also allows us to finance past due lease payments, the sales tax on the equipment purchase and the outright purchase of the equipment. Additionally, we will receive \$20 million and \$10 million in cash from CFS and CMGI, respectively, in exchange for six-year convertible notes. The notes bear interest at 12% and require payment of interest only for the first three years from date of issuance. All interest to CMGI and a portion of the interest payable to CFS in the first two years may be paid in our common stock. Principal and interest payments are due on a straight line basis commencing in year four until maturity on the sixth anniversary from the issuance date. The convertible notes will be secured by substantially all of our assets and cannot be prepaid. Holders of the convertible notes are entitled to both demand and "piggyback" registration rights, and CFS is entitled to anti-dilution protection under certain circumstances. The agreement with CFS also contains certain restrictive covenants, including but not limited to limitations on the issuance of additional debt, the sale of equity securities to affiliates and certain acquisitions and dispositions of assets.

The principal balances may be converted into our common stock at the option of the holders at any time prior to or at maturity, at a conversion price of \$0.26 per share. CMGI also agreed to convert its existing \$80 million in principal outstanding under the notes into approximately 14.5 million shares of our common stock. CMGI also agreed to convert approximately \$16.2 million in other amounts due by us to CMGI into approximately 9.9 million shares of our common stock. Should CFS convert its notes into our common stock, they would own a controlling interest in our company.

During the renegotiations of our equipment lease obligations, we have not paid certain scheduled lease payments to certain vendors. Our total remaining lease obligation to these vendors is approximately \$57 million. Of this amount,

Edgar Filing: NAVISITE INC - Form 10-K

approximately \$27 million was restructured in the CFS agreement, which provides for our purchase of equipment under operating leases. During the renegotiations, we have been notified by certain lessors that we are in default of our lease agreements.

30

Remedies under these leases, if the event of default is not cured, include the demand of all remaining lease payments under the original lease terms, payment of stipulated loss amounts, or return of the underlying equipment. We plan to cure these defaults within 60 days of closing the transactions contemplated by the CFS agreement.

We have experienced a substantial increase in our expenditures since inception consistent with our growth in operations and staffing. We anticipate that expenditures will continue to increase as we grow our business. Additionally, we will continue to evaluate investment opportunities in businesses that management believes will complement our technologies and market strategies.

We currently anticipate that our available cash resources at July 31, 2001 combined with the cash to be received from CMGI and CFS, as described above will be sufficient to meet our anticipated needs, barring unforeseen circumstances, for working capital and capital expenditures over the next twelve months. However, we may need to raise additional funds in order to develop new, or enhance existing, services or products, to respond to competitive pressures or to acquire complementary businesses, products or technologies. In addition, on a long-term basis, we may require additional external financing for working capital and capital expenditures through credit facilities, sales of additional equity or other financing vehicles. Under our arrangement with CFS, we must obtain their consent in order to issue debt securities or sell shares of our common stock to affiliates. We may not receive their consent. If additional funds are raised through the issuance of equity or convertible debt securities, the percentage ownership of our stockholders will be reduced and our stockholders may experience additional dilution. We cannot assure you that additional financing will be available on terms favorable to us, if at all. If adequate funds are not available or are not available on acceptable terms, our ability to fund our expansion, take advantage of unanticipated opportunities, develop or enhance services or products or otherwise respond to competitive pressures would be significantly limited.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Our exposure to market rate risk for changes in interest rates relates primarily to our cash equivalents. We invest our cash primarily in money market funds. An increase or decrease in interest rates would not significantly increase or decrease interest expense on capital lease obligations due to the fixed nature of such obligations. We also have fixed rate notes payable to CMGI. On October 29, 2001, CMGI agreed to convert these notes, including unamortized debt issuance costs, into our common stock. We do not currently have any foreign operations and thus are not exposed to foreign currency fluctuations.

31

Item 8. Financial Statements and Supplementary Data.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
NaviSite, Inc. and Subsidiary:

We have audited the accompanying consolidated balance sheets of NaviSite, Inc. and subsidiary as of July 31, 2001 and 2000, and the related consolidated statements of operations, changes in stockholders' equity (deficit), and cash flows for each of the years in the three-year period ended July 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of NaviSite, Inc. and subsidiary as of July 31, 2001 and 2000, and the results of their operations and their cash flows for each of the years in the three-year period ended July 31, 2001, in conformity with accounting principles generally accepted in the United States of America.

As discussed in note 2 to the consolidated financial statements, effective August 1, 2000, the Company changed its method of accounting for installation

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Description of Business

NaviSite, Inc. (the "Company" or "NaviSite") is a provider of business critical Internet outsourcing solutions, specializing in high-end Web hosting and application services for companies conducting business on the Internet. Substantially all revenues are generated from customers in the United States.

(2) Summary of Significant Accounting Policies

(a) Basis of Presentation

The Company is a majority owned subsidiary of CMGI, Inc. ("CMGI") or ("Parent"). The consolidated financial statements include certain allocations from CMGI for certain general and administrative expenses such as rent, legal services, insurance, and employee benefits. Allocations are based primarily on headcount. Management believes that the method used to allocate the costs and expenses is reasonable; however, such allocated amounts may or may not necessarily be indicative of what actual expenses would have been incurred had the Company operated independently of CMGI.

(b) Principles of Consolidation

The accompanying financial statements include the accounts of the Company and its wholly owned subsidiary, ClickHear, Inc. ("ClickHear") after elimination of all significant intercompany balances and transactions.

(c) Liquidity

At July 31, 2001, the Company had cash and cash equivalents of \$22.2 million, a working capital deficit of \$9.7 million and an accumulated deficit of \$215.6 million. Additionally, the Company has incurred losses since its inception as infrastructure costs were incurred in advance of obtaining customers. Subsequent to year end, the Company ceased making payments due under certain operating lease agreements as part of an effort to restructure payment terms.

Management has taken several actions to ensure that the Company will continue as a going concern through July 31, 2001, including the closing of two data centers, headcount reductions, and reductions in discretionary expenditures. Further, as discussed in note 15, the Company has entered into an agreement in which it will receive \$30 million in additional cash, amounts due to CMGI will be converted into equity and restructured lease payments subsequent to year end. Management believes that these actions will enable the Company to continue as a going concern through July 31, 2002.

Edgar Filing: NAVISITE INC - Form 10-K

(d) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

(e) Revenue Recognition and Accounting Change

Revenue consists of monthly fees for Web site and Internet application management, application rentals, and hosting. Revenue (other than installation fees) is generally billed and recognized over the term of the contract, generally one to three years, based on actual usage. Payments received in advance of providing

38

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

services are deferred until the period such services are provided. Effective August 1, 2001, the Company adopted SEC Staff Accounting Bulletin No. 101-- Revenue Recognition in Financial Statements ("SAB 101"). Under SAB 101, installation fees are recognized over the life of the related customer contract. Prior to fiscal year 2001, the Company recognized installation fees at the time that the installation occurred. The cumulative effect of the change in accounting for installation services on all prior years resulted in a \$4.3 million increase in net loss for the year ended July 31, 2001 and is reflected as a cumulative effect of change in accounting principle. Revenue for the year ended July 31, 2001 includes \$1.5 million that was included in the cumulative effect adjustment.

(f) Cash

Cash equivalents consist of a money market fund, which invests, in high quality short-term debt obligations, including commercial paper, asset-backed commercial paper, corporate bonds, U.S. government agency obligations, taxable municipal securities and repurchase agreements.

On February 3, 2001, the Company renewed two letters of credit related to certain of its leased facilities. Under the terms of the letters of credit, the Company was required to pledge approximately \$5.0 million in cash, which is reflected as restricted cash on the accompanying balance sheet at July 31, 2001. Subsequent to July 31, 2001, the letter of credit related to the La Jolla, California facility was not renewed and the landlord drew down the related \$555,000 of restricted cash.

During Fiscal 2000, non-cash financing activities included the issuance of 175,096 shares of the Company's Series B Convertible Preferred Stock ("Series B Preferred Stock") in exchange for a \$12,256,694 reduction in debt to CMGI (see note 5).

During fiscal 2000, in connection with the closing of the Company's initial public offering on October 27, 1999, all of the outstanding shares of Series A, Series B, Series C and Series D convertible preferred stock, par value \$0.01 per share, of the Company automatically converted into 43,244,630 shares of common stock, \$.01 par value per share (the "Common Stock").

Edgar Filing: NAVISITE INC - Form 10-K

During fiscal 1999, non-cash financing activities included the issuance of 1,323,953 shares of the Company's Series A Convertible Preferred Stock ("Series A Preferred Stock") in exchange for 8,000,000 shares of the Company's Common Stock and \$15,767,600 reduction in debt to CMGI and the issuance of 541,859 shares of the Company's Series B Convertible Preferred Stock ("Series B Preferred Stock") in exchange for a \$14,713,000 reduction in debt to CMGI (see note 9). Non-cash financing activities also included a software licensing arrangement, including services and maintenance of \$923,000, for an aggregate of \$2.5 million, payable over a three-year period. The Company has recorded deferred IPO costs of \$496,000, which are included in accrued expenses at July 31, 1999.

(g) Software Development Costs

Software development costs are accounted for under Statement of Financial Accounting Standard No. 86, Accounting for Costs of Computer Software to be Sold, Leased or Otherwise Marketed ("SFAS 86"). Capitalization of software development costs commences upon the establishment of technological feasibility. To date, all such amounts have been insignificant, and, accordingly, the Company has charged all such costs to product development expense.

The Company accounts for costs incurred for computer software developed or obtained for internal use in accordance with AICPA Statement of Position 98-1, "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use."

39

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(h) Property and Equipment

Property and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. Leasehold improvements and assets acquired under capital leases are amortized using the straight-line method over the shorter of the lease term or estimated useful life of the asset. Assets acquired under capital leases in which title transfers to the Company at the end of the agreement are amortized over the useful life of the asset. Expenditures for maintenance and repairs are charged to expense as incurred.

(i) Goodwill

Goodwill relates to the Company's purchase of Servercast in July 1998 and the Company's purchase of its wholly owned subsidiary ClickHear in February 2000 (see note 3). Such costs are being amortized on a straight-line basis over five years, the period expected to be benefited.

(j) Accounting for Impairment of Long-Lived Assets

The Company assesses the need to record impairment losses on long-lived assets used in operations when indicators of impairment are present. On an ongoing basis, management reviews the value and period of amortization or depreciation of long-lived assets, including goodwill. During this review, the significant assumptions used in determining the original cost of long-lived assets are reevaluated. Although the assumptions may vary from transaction to

Edgar Filing: NAVISITE INC - Form 10-K

transaction, they generally include revenue growth, operating results, cash flows and other indicators of value. Management then determines whether there has been a permanent impairment of the value of long-lived assets by comparing future undiscounted cash flows to the asset's carrying value. If the estimated future undiscounted cash flows are less than the carrying value of the asset, a loss is recorded based on the excess of the asset's carrying value over fair value.

(k) Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Previous to the fiscal year ended July 31, 2000, the Company was greater than 80% owned by CMGI, and as such, CMGI realized the full benefit of all federal and part of the state net operating losses that had been incurred by the Company for those periods before the fiscal year ended July 31, 2000. Therefore, such net operating losses incurred by the Company were not available to the Company. The tax sharing agreement between the Company and CMGI required the Company to reimburse CMGI for the amounts it contributed to the consolidated tax liability of the CMGI group; however, under the policy, CMGI was not obligated to reimburse the Company for any losses utilized in the consolidated CMGI group. After the Company's public offering, CMGI's ownership fell below 80% and the Company is no longer included in the federal consolidated group of CMGI. Thus, the Company's federal and state net operating losses can be carried forward to offset its future taxable income.

(l) Advertising Costs

The Company recognizes advertising costs as incurred. Advertising expense was approximately \$3,126,000, \$1,462,000 and \$417,000 for the fiscal years ended July 31, 2001, 2000 and 1999, respectively, and is included in the accompanying statement of operations as a component of selling and marketing expenses.

40

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(m) Stock-Based Compensation Plans

The Company applies the intrinsic value-based method of accounting prescribed by Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations, in accounting for its fixed plan stock options. As such, compensation expense would be recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price. SFAS No. 123, "Accounting for Stock-Based Compensation," established accounting and disclosure requirements using a fair value-based method of accounting for stock-based employee compensation plans. As allowed by SFAS No. 123, the Company has elected to continue to apply the

Edgar Filing: NAVISITE INC - Form 10-K

intrinsic value-based method of accounting described above, and has adopted the disclosure requirements of SFAS No. 123.

(n) Financial Instruments

The Company's financial instruments include cash, accounts receivable, obligations under capital leases, software agreements, accounts payable and accrued expenses. As of July 31, 2001, the carrying cost of these instruments approximated their fair value. The Company also has fixed rate notes payable to CMGI. On October 29, 2001, CMGI agreed to convert these notes into equity (Note 15).

(o) Historical and Unaudited Pro Forma Basic and Diluted Net Loss per Share

Basic earnings (loss) per share is computed using the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share is computed using the weighted average number of common and diluted common equivalent shares outstanding during the period, using either the "if-converted" method for convertible preferred stock or the treasury stock method for options, unless amounts are anti-dilutive.

For fiscal years ended July 31, 2001, 2000, and 1999, net loss per basic and diluted share is based on weighted average common shares and excludes any Common Stock equivalents, as they would be anti-dilutive due to the reported loss. For fiscal 2001, 2,516,907 of diluted shares related to employee stock options were excluded as they have an anti-dilutive effect due to the loss. For the fiscal years ended July 31, 2000 and 1999, a pro forma basic and diluted loss per share calculation, assuming the conversion of all amounts due to CMGI and all outstanding shares of preferred stock into Common Stock using the "if-converted" method from the later of the date of issuance or beginning of the period, is presented. The following table provides a reconciliation of the denominators used in calculating the pro forma basic and diluted earnings (loss) per share for the fiscal years ended July 31, 2000 and 1999.

	Fiscal Year Ended July 31,	
	2000	1999
Numerator:

See also Note 15.

Edgar Filing: NAVISITE INC - Form 10-K

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(p) Segment Reporting

The Company currently operates in one segment, Internet web hosting and application services.

(q) New Accounting Pronouncements

In June 1998, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities ("SFAS 133"). SFAS 133 was amended by SFAS 138 in June 2000. The Company adopted these statements on August 1, 2000. SFAS 133 requires that the Company record all derivatives on the balance sheet as either an asset or liability measured at fair value. The adoption of SFAS 133 and SFAS 138 did not have a material impact on the Company's consolidated financial statements.

In June 2001, the FASB issued SFAS No. 141, "Business Combinations," and SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 141 will apply to all business combinations that the Company enters into after June 30, 2001, and eliminates the pooling-of-interests method of accounting. SFAS No. 142 is effective for fiscal years beginning after December 15, 2001. Under the new Statements, goodwill and intangible assets deemed to have indefinite lives will no longer be amortized but will be subject to annual impairment tests in accordance with the Statements. Other intangible assets will continue to be amortized over their useful lives.

The Company is required to adopt these Statements for accounting for goodwill and other intangible assets beginning in the first quarter of fiscal year 2003. Application of the non-amortization provisions of the Statement is indeterminable at July 31, 2001 as the Company intends to continue to perform an impairment analysis of the remaining goodwill through the end of fiscal year 2002. Upon adoption on August 1, 2002, the Company will perform the required impairment tests of goodwill and has not yet determined what effect these tests will have on the earnings and financial position of the Company.

(3) Business Combinations

On February 22, 2000, NaviSite acquired ClickHear for consideration valued at approximately \$4,693,000, including approximately \$50,000 of direct costs of the acquisition. The consideration for the acquisition consisted of 41,968 shares of CMGI common stock valued at the closing price of CMGI common stock on February 22, 2000, resulting in consideration value of approximately \$4,643,000. On February 22, 2000, CMGI contributed their ClickHear common stock to NaviSite in exchange for 67,906 shares of NaviSite Common Stock. NaviSite's direct costs of acquisition were recorded as a component of the purchase price. Based on the terms of the acquisition agreement, the value of the CMGI shares issued were recorded as deferred compensation by NaviSite. The CMGI shares issued were subject to forfeiture by the ClickHear stockholders based on employment criteria as well as performance goals. The deferred compensation component of the consideration initially valued at \$4,643,000 was accounted for on a variable basis at market value at the end of each reporting period, and was amortized to compensation expense over the eleven-month performance contingency period. Compensation expense of \$1,051,000 and \$827,000 was recognized in fiscal years ended July 31, 2001 and 2000, respectively.

The acquisition was accounted for using the purchase method, and, accordingly, the purchase price has been allocated to the assets purchased and liabilities assumed based upon their fair values at the dates of acquisition.

Edgar Filing: NAVISITE INC - Form 10-K

The results of operations of Clickhear, Inc. have been included in the Company's consolidated financial statements from the acquisition date.

		=====	=====

During fiscal year 2001, the Company wrote-off leasehold improvements of \$2,372,000 related to the closing of two data centers (see Note 11).

(5) Debt to CMGI

On December 12, 2000, the Company entered into a Note and Warrant Purchase Agreement the "Agreement") with CMGI. The Agreement provides for the sale of a

Edgar Filing: NAVISITE INC - Form 10-K

subordinated, unsecured, convertible note in the principal amount of \$50,000,000 and a subordinated, unsecured, convertible note in the principal amount of \$30,000,000 (collectively, the "Notes"). The Notes are convertible at CMGI's option, and by NaviSite under defined circumstances, into NaviSite common stock, \$.01 par value per share ("Common Stock"), at a conversion price of \$5.535 per share. In connection with the Agreement, the Company granted to CMGI, effective December 15, 2000, two warrants, each totaling 2,601,626 shares of Common Stock, for a combined total of 5,203,252 shares of Common Stock. The exercise price for each warrant is \$5.77 and \$6.92 per share, respectively. These warrants are exercisable upon issuance and expire on December 15, 2005. The Company ascribed a fair value, using the Black-Scholes method, to the warrants of approximately \$12.9 million and is amortizing this value over the life of the Notes as an additional component of interest expense. During fiscal year 2001, the Company recognized \$2,691,000 of expense related to the amortization of the warrants.

During the quarter ended January 31, 2001, the Company received gross proceeds of \$80.0 million from the issuance of the Notes. The annual interest rate of the Notes is 7.5% payable quarterly in, at the Company's discretion, either cash or Common Stock. In the fourth fiscal quarter of fiscal year 2001, the Company elected to pay the interest related to the Notes for fiscal year 2001 in the form of 2,789,706 shares of Common Stock. The principal amount of the Notes is due in full by December 12, 2003.

In conjunction with the refinancing of certain operating lease obligations, on October 29, 2001, CMGI has agreed to convert the Notes into shares of NaviSite common stock (see Note 15).

43

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

In May 1999, the Company formalized its borrowing arrangement with CMGI and executed a secured convertible demand note with CMGI dated as of May 1, 1999 (the "Secured Convertible Demand Note"). The Secured Convertible Demand Note covers advances made by CMGI to the Company for periods commencing in November 1998. Effective June 4, 1999, CMGI elected to convert advances and accrued interest outstanding at May 31, 1999 in the amount of \$14,713,000 into 541,859 shares of Series B Convertible Preferred Stock. Effective October 27, 1999, CMGI elected to convert advances and accrued interest outstanding at October 21, 1999 in the amount of \$12,256,594 into \$175,096 shares of Series B Convertible Preferred Stock. All shares of Series B Convertible Preferred Stock were converted to Common Stock on October 27, 1999. See also Note 9.

(6) Accrued Expenses

Accrued expenses consist of the following:

	July 31,	
	2001	2000
	(in thousands)	
Accrued payroll, benefits and commissions.....	\$ 2,772	\$ 6,503
Accrued accounts payable.....	3,078	3,099

Edgar Filing: NAVISITE INC - Form 10-K

Other.....	2,183	6,492
	\$19,299	\$27,079
	=====	=====

(7) Commitments and Contingencies

(a) Leases

The Company is obligated under various capital and operating leases for facilities and equipment. CMGI has entered into noncancelable operating and capital leases on behalf of the Company covering certain of its office facilities and equipment, which expire through 2007. In addition, until the Company moved its headquarters in January 2000, the Company paid CMGI for office facilities used as the Company's headquarters for which it was charged based upon an allocation of the total costs for the facilities at market rates. Prior to the Company's IPO substantially all leases for real property were guaranteed by CMGI. CMGI charges the Company the actual lease fees under these arrangements. Total rent expense amounted to \$50,416,000, \$18,509,000 and \$5,983,000 for the fiscal years ended July 31, 2001, 2000 and 1999, respectively.

On October 29, 2001, the Company renegotiated certain of its operating lease obligations. See Note 15.

In June 2000, the Company sold certain equipment and leasehold improvements in its two new data centers in a sale-leaseback transaction to a bank for approximately \$30.0 million. The Company entered into a capital lease (the "Capital Lease") for the leaseback of those assets. In January 2001, the Company paid-off the Capital Lease obligation for approximately \$27.0 million.

During the second quarter of fiscal year 2001, the Company sold certain equipment in sale-leaseback transactions for a total of approximately \$13.9 million. Simultaneously with the sales, the Company entered into operating leases for the equipment. The leases are payable in monthly installments of principal and interest totaling approximately \$607,000 through December 31, 2002.

44

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

The Company charged \$1.9 million to cost of revenue during fiscal 2001 related to remaining operating lease obligations for permanently idle equipment.

(b) Legal Matters

On or about June 13, 2001, Stuart Werman and Lynn McFarlane filed a lawsuit against the Company, BancBoston Robertson Stephens, Inc., an underwriter of the Company's initial public offering in October 1999, Joel B. Rosen, the Company's then Chief Executive Officer, and Kenneth W. Hale, the Company's then Chief Financial Officer. The suit was filed in the United States District Court for the Southern District of New York. The suit generally alleges that the defendants violated federal securities laws by not disclosing certain actions allegedly taken by Robertson Stephens in connection with the Company's initial public offering. The suit alleges specifically that Robertson Stephens, in exchange for the allocation to its customers of shares of the Company's common stock sold in the Company's initial public offering, solicited and received from its customers undisclosed commissions on transactions in other securities and required its customers to purchase additional shares of the Company's common stock in the aftermarket at pre-determined prices. The suit seeks unspecified monetary damages and certification of a plaintiff class consisting of all persons who acquired shares of the Company's common stock between October 22, 1999 and December 6, 2000.

On or about June 21, 2001, David Federico filed in the United States District Court for the Southern District of New York a lawsuit against the Company, Mr. Rosen, Mr. Hale, FleetBoston Robertson Stephens, Inc. and other underwriter defendants including J.P. Morgan Chase, First Albany Companies, Inc., Bank of America Securities, LLC, Bear Stearns & Co., Inc., B.T. Alex.Brown, Inc., Chase Securities, Inc., CIBC World Markets, Credit Suisse First Boston Corp., Dain Rauscher, Inc., Deutsche Bank Securities, Inc., The Goldman Sachs Group, Inc., J.P.Morgan & Co., J.P. Morgan Securities, Lehman Brothers, Inc., Merrill Lynch, Pierce, Fenner & Smith, Inc., Morgan Stanley Dean Witter & Co., Robert Fleming, Inc. and Salomon Smith Barney, Inc. The suit generally alleges that the defendants violated the anti-trust laws and the federal securities laws by conspiring and agreeing to raise and increase the compensation received by the underwriter defendants by requiring those who received allocation of initial public offering stock to agree to purchase shares of manipulated securities in the after-market of the initial public offering at escalating price levels designed to inflate the price of the manipulated stock, thus artificially creating an appearance of demand and high prices for that stock, and initial public offering stock in general, leading to further stock offerings. The suit also alleges that the defendants arranged for the underwriter defendants to receive undisclosed and excessive brokerage commissions and that, as a consequence, the underwriter defendants successfully increased investor interest in

Edgar Filing: NAVISITE INC - Form 10-K

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

the manipulated initial public offering securities and increased the underwriter defendants' individual and collective underwritings, compensation and revenues. The suit further alleges that the defendants violated the federal securities laws by issuing and selling securities pursuant to the initial public offering without disclosing to investors that the underwriter defendants in the offering, including the lead underwriters, had solicited and received excessive and undisclosed commissions from certain investors. The suit seeks unspecified monetary damages and certification of a plaintiff class consisting of all persons who acquired shares of the Company's common stock between October 22, 1999 and June 12, 2001.

The Company believes that the allegations are without merit and it intends to vigorously defend against the plaintiffs' claims. As the litigation is in an initial stage, the Company is not able to predict the possible outcome of the suits and their ultimate effect, if any, on its financial condition.

The Company is also subject to other legal proceedings and claims which arise in the ordinary course of its business. In the opinion of management, the amount of ultimate liability with respect to these actions will not materially affect the consolidated financial position or results from operations of the Company.

(8) Income Taxes

No provision for federal or state income taxes has been recorded as the Company incurred net operating losses for all periods presented. Prior to the Company's initial public offering on October 21, 1999, the Company was included in the federal consolidated group of CMGI. As a result, substantially all of the federal and state net operating losses incurred prior to the public offering have been utilized by the parent. After the Company's public offering, CMGI's ownership in NaviSite fell below 80% and NaviSite is no longer included in the federal consolidated group of CMGI. Thus, the Company's federal and state net operating losses can be carried forward to offset its future taxable income. The Company has recorded a full valuation allowance against its deferred tax assets since management believes that, after considering all the available objective evidence, both positive and negative, historical and prospective, with greater weight given to historical evidence, it is not more likely than not that these assets will be realized. No income tax benefit has been recorded for all periods presented because of the valuation allowance.

Temporary differences between the financial statement carrying and tax bases of assets and liabilities that give rise to significant portions of deferred tax assets (liabilities) are comprised of the following:

	2001	2000
	-----	-----
	(in thousands)	
	-----	-----
Deferred tax assets:		
Accruals and reserves.....	\$ 5,614	\$ 1,451
Loss carryforwards.....	86,487	18,279
Depreciation and amortization.....	3,390	2,263
	-----	-----
Total deferred tax asset.....	\$ 95,491	\$ 21,993

Edgar Filing: NAVISITE INC - Form 10-K

Less: valuation allowance.....	\$(95,491)	\$(21,993)
	-----	-----
Net deferred taxes.....	\$ --	\$ --
	=====	=====

Valuation allowance increased by \$73.5 million and \$21.5 million for the years ended July 31, 2001 and 2000, respectively. Approximately reported tax benefits related to \$27.8 million of the valuation allowance at July 31, 2001, will be recorded as an increase to paid-in capital, when realized or recognized, as it relates to tax benefits from stock-based compensation.

The Company has net operating loss carryforward for federal tax purposes of approximately \$219.0 million, expiring from 2020 to 2021. The Company also has state net operating loss carryforwards for

46

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

approximately \$223.0 million, expiring from 2003 to 2006. The utilization of these net operating losses may be limited pursuant to Internal Revenue Code Section 382 as a result of ownership changes.

(9) Stockholders' Equity

(a) Issuance of Common Stock

On October 21, 1999, the Company's Registration Statement for an initial public offering was declared effective. The Company sold 11,000,000 shares of its Common Stock par value \$0.01 per share at \$7 per share. On November 18, 1999, the underwriters of the Company's initial public offering exercised their over-allotment option in full to purchase an additional 1,650,000 shares of Common Stock at \$7 per share. The closing in connection with the exercise of the over-allotment option was held on November 23, 1999. The Company received proceeds of approximately \$80.4 million, net of offering costs of approximately \$8.2 million from its initial public offering and the subsequent exercise by the underwriters of the over-allotment option.

In connection with the closing of the Company's initial public offering on October 27, 1999, all of the outstanding shares of Series A, Series B, Series C and Series D convertible preferred stock, par value \$0.01 per share, of the Company automatically converted into 43,244,630 shares of Common Stock. Immediately following the automatic conversion of all of the Company's outstanding shares of convertible preferred stock the Company filed an amended and restated certificate of incorporation. Under the amended and restated certificate of incorporation, the Company is authorized to issue 150,000,000 shares of Common Stock and 5,000,000 shares of preferred stock, par value \$0.01 per share. There currently are no shares of preferred stock issued and outstanding.

On June 8, 2000, the Company sold 980,873 shares of its Common Stock to CMGI for the sum of \$49.8 million, net of offering costs, in a private placement transaction. The number of shares was determined by dividing \$50.0 million by the average of the closing prices per share of the Company's Common Stock as reported on the Nasdaq National Market System five-day, rounded up to the nearest whole share.

On October 29, 2001, CMGI has agreed to convert the \$80 million notes

Edgar Filing: NAVISITE INC - Form 10-K

payable and certain other amounts due to CMGI into shares of NaviSite common stock (Note 15).

(b) Two-For-One Stock Split

The consolidated financial statements have been retroactively adjusted to reflect the two-for-one stock split, effected in the form of a stock dividend of one share of Common Stock for each share of Common Stock outstanding. The stock dividend was paid on April 5, 2000 to stockholders of record at the close of business on March 22, 2000.

(c) Preferred Stock

In October 1998, the Company's stockholders authorized 5,000,000 shares of preferred stock of which 1,323,953 shares have been designated as Series A Preferred Stock. In May 1999, the Company's Board of Directors designated 1,000,000 shares as Series B Preferred Stock, 1,095,472 shares to be designated as Series C Convertible Preferred Stock ("Series C Preferred Stock") and 993,243 shares to be designated as Series D Convertible Preferred Stock ("Series D Preferred Stock").

Series A Preferred Stock

In December 1998, the Board of Directors authorized and issued 1,323,953 shares of Series A Preferred Stock in exchange for 8,000,000 shares of Common Stock and \$15,767,600 in principal amount of Debt to

47

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

CMGI. The Series A Preferred Stock entitled to receive annual dividends at 7% commencing November 1, 1998, as and if declared. No cash dividends were declared or paid by the Company. The Series A Preferred Stock was voting and convertible into 10 shares of Common Stock subject to certain adjustments. In October 1999, all of the Series A preferred shares were converted into 13,259,530 shares of Common Stock.

Series B Preferred Stock

In May 1999, the Board of Directors approved the designation of 1,000,000 shares of the Company's preferred stock as Series B Preferred Stock. Effective June 4, 1999, CMGI elected to convert the advances and accrued interest outstanding under the Secured Convertible Demand Note as of January 31, 1999, April 30 and May 31, 1999, in the aggregate amount of \$14,713,000 into 541,859 shares of Series B Preferred Stock. The Series B Preferred Stock was entitled to received noncumulative annual dividends at 7%, as and if declared. No cash dividends were declared or paid by the Company. The Series B Preferred Stock was fully participating, voting and convertible into 10 shares of Common Stock, subject to certain adjustments. In October 1999, all of the Series B preferred shares were converted into 5,418,590 shares of Common Stock.

Series C Preferred Stock

In May 1999, the Board of Directors approved the designation of 1,095,472 shares of the Company's preferred stock as Series C Preferred Stock. The Series C Preferred Stock was entitled to receive noncumulative annual dividends at 7%, as and if declared. No cash dividends were declared or paid by the Company. The Series C Preferred Stock was fully participating, voting and convertible at the

Edgar Filing: NAVISITE INC - Form 10-K

option of the holder into shares of Common Stock at \$7.40 per share, subject to certain adjustments. In June 1999 the Company sold 1,095,422 Series C preferred shares for \$7,997,493, net of issuance costs of \$109,000. In October 1999, all of the Series C preferred shares were converted into 1,095,472 of Common Stock.

Series D Preferred Stock

In May 1999, the Board of Directors approved the designation of 993,243 shares of the Company's preferred stock as Series D Preferred Stock. The Series D Preferred Stock was entitled to receive noncumulative annual dividends at 7%, as and if declared. No cash dividends were declared or paid by the Company. The Series D Preferred Stock was fully participating, voting and convertible at the option of the holder into shares of Common Stock at \$7.40 per share, subject to certain adjustments. In June 1999, the Company sold 993,243 Series D preferred shares for \$7,252,000, net of issuance costs of \$99,000. In October 1999, all of the Series D preferred shares were converted into 993,243 of Common Stock.

(10) Stock Option Plans

(a) 1999 Employee Stock Purchase Plan

The 1999 Employee Stock Purchase Plan (the "Stock Purchase Plan") was adopted by the Company's Board of Directors and Stockholders in October 1999. The Stock Purchase Plan provides for the issuance of a maximum of 100,000 shares of the Company's Common Stock. During fiscal year 2000, 62,671 shares were issued under this plan.

On March 2, 2001, an additional 150,000 shares were authorized for issuance under the Stock Purchase Plan. During fiscal year 2001, 187,189 shares were issued under this plan.

(b) Deferred Compensation Plan

A Deferred Compensation Plan (the "Deferred Compensation Plan") was adopted by the Company's Board of Directors in October 1999. Under the terms of the Deferred Compensation Plan, the Company's

48

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

employees who are selected by the Board of Directors (as well as certain of the Company's employees who previously participated in a deferred compensation plan sponsored by CMGI) will be able to elect to defer a portion of their compensation for the following calendar year. The Company also may make discretionary contributions to a participant's account, to which the participant generally will become entitled after five years of service with the Company. During 2001 and 2000, no discretionary contributions were made by the Company.

(c) 1999 Director Stock Option Plan

In October 1999, the Company ceased issuing options under the 1998 Director Plan and the Board of Directors and the Stockholders approved and adopted the 1999 Stock Option Plan for Non-Employee Directors (the "1999 Director Plan"). A total of 500,000 shares of Common Stock are reserved for issuance under the 1999 Director Plan. Directors who are not NaviSite employees or otherwise affiliates, employees or designees of an institutional or corporate investor that owns more than 5% of outstanding Common Stock will be eligible to receive

Edgar Filing: NAVISITE INC - Form 10-K

non-statutory stock options under the 1999 Director Plan. Under the 1999 Director Plan, the Company will grant an initial option to acquire 25,000 shares of Common Stock to each eligible director who is elected a director for the first time.

The Company also will grant to eligible directors an additional option for the purchase of 6,250 shares of Common Stock on the first, and each subsequent, anniversary of the grant of each director's initial option if the director is still serving as one of the Company's directors on that anniversary date.

The Board of Directors has discretion to increase to up to 100,000 shares the number of shares of Common Stock subject to any initial option or additional option covering any vesting period of up to 48 months that may be granted to an eligible director after the date of the increase.

As of July 31, 2001, 60,000 options were granted and 90,000 options were outstanding under the 1999 Director Plan with a weighted average exercise price of \$16.79.

(d) 1998 Director Stock Option Plan

In December 1998, the Company's Board of Directors and Stockholders approved the 1998 Director Stock Option Plan (the "1998 Director Plan"). In October 1999 the Company ceased issuing options under the 1998 Director Plan upon the adoption of the 1999 Director Plan, each NaviSite director (who is not also an employee of NaviSite, any subsidiary of NaviSite or of CMGI) was entitled to receive, upon the date of his or her election, a non-statutory option to purchase Common Stock as defined. A maximum number of 250,000 shares of Common Stock were authorized for issuance under the 1998 Director Plan. Each automatic grant had an exercise price equal to the current fair market value of the Common Stock at the time of grant and a maximum term of ten years, subject to earlier termination following the optionee's cessation of service on the board of directors.

During fiscal 2001, no options were granted and 150,000 options were outstanding under the 1998 Director Plan with a weighted average exercise price of \$2.45.

(e) NaviSite 2000 Stock Option Plan

In November 2000, the Company's Board of Directors approved the 2000 Stock Option Plan ("the Plan"). Under the Plan, non-qualified stock options or incentive stock options may be granted to the Company's employees, other than those who are also officers or directors, and the Company's consultants and advisors, as defined, up to a maximum number of shares of Common Stock not to exceed 1,000,000 shares. The Board of Directors administers this plan, selects the individuals who are eligible to be granted options under the Plan and determines the number of shares and exercise price of each option. Options granted under the Plan have a five-year maximum term and typically vest over a one-year period. The following table reflects activity of stock options under the Company's Plan for the year ended July 31, 2001:

Edgar Filing: NAVISITE INC - Form 10-K

	2001	
	Number of Shares	Weighted Average Exercise Price
Options outstanding, beginning of year.....	--	\$ --
Granted.....	795,560	\$8.5625

Options outstanding, end of year.....	482,356	\$8.5625
Options exercisable, end of year.....	--	\$ --
Options available for grant, end of year.....	517,644	

As of July 31, 2001, 482,356 options were outstanding under the Plan with a weighted average exercise price of \$8.56.

(f) NaviSite 1998 Equity Incentive Plan

In December 1998, the Company's Board of Directors and Stockholders approved the 1998 Equity Incentive Plan, as amended (the "1998 Plan"). The 1998 plan replaced NaviSite Internet Services Corporation's 1997 Equity Incentive Plan (the "1997 Plan"). All options outstanding under the 1997 Plan were cancelled and replaced with an equivalent amount of options issued in accordance with the 1998 Plan. Under the original 1998 Plan, non-qualified stock options or incentive stock options may be granted to the Company's or its affiliates' employees, directors and consultants, as defined, up to a maximum number of shares of Common Stock not to exceed 5,000,000 shares. In August 1999, the Board of Directors approved an increase in the number of shares authorized under the 1998 Plan to 11,124,424. In December 2000, the Board of Directors approved an additional increase in the number of shares authorized under the 1998 Plan to 15,000,000 shares. The Board of Directors administers this plan, selects the individuals who are eligible to be granted options under the 1998 Plan and determines the number of shares and exercise price of each option. The Chief Executive Officer, upon authority, granted by the Board of Directors, is authorized to approve the grant of options to purchase Common Stock under the 1998 Plan to certain persons. Options are granted at fair market value. Options granted under the 1998 Plan have a five-year maximum term and typically vest over a four year period, with 25% of options granted becoming exercisable one year from the date of grant and the remaining 75% vesting monthly for the next thirty-six (36) months. The following table reflects activity and historical exercise prices of stock options under the Company's 1998 Plan for the three years ended July 31, 2001:

(g) CMGI 1986 Stock Option Plan

Certain NaviSite employees have been granted options for the purchase of CMGI Common Stock under the CMGI 1986 Stock Option Plan (the "1986 Plan"). Options under the 1986 Plan are granted at fair market value on the date of the grant and are generally exercisable in equal cumulative installments over a four-to-ten year period beginning one year after the date of grant. Outstanding options under the 1986 Plan expire through 2007. Under the 1986 Plan, non-qualified stock options or incentive stock options may be granted to CMGI's or its subsidiaries' employees, as defined. The Board of Directors of CMGI administers this plan, selects the individuals to whom options will be granted and determines the number of shares and exercise price of each option.

Edgar Filing: NAVISITE INC - Form 10-K

The following table reflects activity and historical exercise prices of stock options granted to Company employees under the 1986 Plan for the three years ended July 31, 2001. Options held by employees who transferred to NaviSite from CMGI or CMGI subsidiaries during fiscal year 2001 are shown as transfers into the 1986 plan.

(h) Other Stock Option Grants

During fiscal 2001, the Company granted 20,000 stock options outside of existing plans to certain directors at an exercise price of \$2.00. These stock options were fully vested and have a contractual life of 10 years.

SFAS No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123"), sets forth a fair-value based method of recognizing stock-based compensation expense. As permitted by SFAS No. 123, the Company has elected to continue to apply APB No. 25 to account for the stock-based compensation plans in which the Company's employees participate.

Had compensation cost for awards in fiscal 2001, 2000 and 1999 under the stock-based compensation plans in which the Company's employees and directors participate been determined based on the fair value method set forth under SFAS 123, the pro forma effect on the Company's net loss would have been as follows:

	Year Ended July 31, 2001		Year Ended July 31, 2000		Year Ended July 31, 1999	
	-----		-----		-----	
	As Reported	Pro Forma	As Reported	Pro Forma	As Reported	Pro Forma
	-----	-----	-----	-----	-----	-----
Net loss applicable to common stockholders' (in thousands).....	\$ (122,996)	\$ (163,068)	\$ (57,970)	\$ (86,269)	\$ (24,704)	\$ (26,161)
	=====	=====	=====	=====	=====	=====
Net loss per share.....	\$ (2.08)	\$ (2.76)	\$ (1.37)	\$ (1.50)	\$ (3.71)	\$ (3.93)
	=====	=====	=====	=====	=====	=====

The pro forma per share net loss reflects the fair-value compensation cost associated with option grants to the Company's employees and directors under the Company's stock based compensation plans and the CMGI 1986 Stock Option Plan.

The fair value of each stock option granted under the Company's plans have been estimated on the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions for fiscal 2001, 2000 and 1999, respectively: volatility of 185.1%, 167.5% and 100%; risk-free interest rate of 4.5%, 6.3% and 5.16%; 2.08 year expected life of options for 2001 and 2.8 for years 2000 and 1999; and 0% dividend yield for all years. The weighted average fair value per share of options granted during fiscal 2001, 2000 and 1999 was \$14.62, \$46.24 and \$1.35, respectively.

The fair value of each stock option granted under the CMGI 1986 Plan has been estimated on the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions for fiscal 2001, 2000 and 1999, respectively: volatility of 126.95%, 103.4% and 100%; risk-free interest rate of 4.19%,

Edgar Filing: NAVISITE INC - Form 10-K

6.28% and 5.16%; expected life of options of 2.91, 3.03 and 4.3 years respectively; and 0% dividend yield for all years. The weighted average fair value per share of options granted during fiscal 2001, 2000 and 1999 was \$12.85, \$0 and \$31.58, respectively.

(11) Restructuring Charge

During July 2001, the Company announced a plan, approved by its Board of Directors, to restructure its operations and consolidate data centers, which resulted in a charge of \$8,011,000.

Of the total restructuring charge, approximately \$1,810,000 is related to employee termination benefits. The Company terminated 126 employees on July 31, 2001 and paid all termination benefits in the first fiscal quarter 2002.

The restructuring charge also includes approximately \$6,201,000 of costs related to the closing of the Company's original data centers (Scotts Valley, California and Andover, Massachusetts). The components of the facility closing costs included \$3,829,000 of lease costs and other contractual obligations, to be paid over the term of the respective agreements through 2002, and \$2,372,000 of write-offs of leasehold improvements.

(12) Related Party Transactions

CMGI has provided the Company with accounting, systems and related services at amounts that approximated the fair value of services received in each of the periods presented in these financial statements. The Company also occupied facilities through January 2000 that are leased by CMGI, whereby CMGI charges the Company for its share of rent and related facility costs for CMGI's corporate headquarters through an allocation based upon the company's headcount located on the premises in relation to total headcount for all CMGI companies located in the premises. The Company has also purchased certain employee benefits (including 401(k) plan participation by employees of the Company) and insurance (including property and casualty insurance) through CMGI. CMGI also has provided the Company with Internet marketing and business development services. Amounts due to CMGI totaled approximately \$14,821,000 and \$5,310,000 as of July 31, 2001 and 2000, respectively. See also Note 15.

The following table summarizes the expenses allocated to the Company by CMGI for enterprise services, rent and facilities, human resources and benefits and Internet marketing and business development:

	Year Ended July 31,		
	2001	2000	1999
Enterprise services.....	\$ --	\$ 315	\$240
Rent and facilities.....	222	248	251
Human resources and benefits.....	3,638	1,507	530
Internet marketing and business development.....	1,238	585	325

The Company sells its products and services to companies in which CMGI has an investment interest or a significant ownership interest. Total revenue realized from services to related parties was \$36,368,000, \$24,893,000 and \$7,058,000 for the fiscal years ended July 31, 2001, 2000 and 1999, respectively. These related parties typically receive a 10% discount for services provided by the Company. The related cost of revenue is consistent

Edgar Filing: NAVISITE INC - Form 10-K

with the costs incurred on similar transactions with unrelated parties.

The Company provides administrative services to CMGI and related entities as they relate to lease schedules for equipment ordered by NaviSite prior to October 22, 1999. These lease schedules include equipment leased for both NaviSite and CMGI, however, the majority of the equipment is used by NaviSite. As

53

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

part of this agreement, CMGI provides administrative services for leases that include equipment for both NaviSite and CMGI under which CMGI or a related entity is the majority equipment user. The administrative services include the payment of the lessor's monthly lease charges. In both cases, the entire providing the administrative services charges the other for the actual lease fees, however in all of these cases, CMGI bears all liability for the payment and NaviSite is not financially obligated under the leases.

(13) Concentration of Credit Risk

Amounts included in the consolidated balance sheets for accounts receivable, debt to CMGI, accounts payable, accrued expenses and notes payable approximate their fair value due to their short maturities. Financial instruments that potentially subject the Company to concentration of credit risk consist primarily of trade receivables. The Company performs periodic credit evaluations of its customers' financial condition and generally does not require collateral or other security against trade receivable balances; however, it does maintain an allowance for potential credit losses and such losses have been within management's expectations.

For the fiscal year ended July 31, 2001, 35.4% (\$36,368,000) of the Company's revenue was earned from related parties. Four of these related parties accounted for 24.64%, 17.14%, 15.07%, and 13.57% of revenue earned for the fiscal year ended July 31, 2001. For the fiscal year ended July 31, 2000, 50% (\$24,893,000) of the Company's revenue was earned from related parties. Three of these related parties accounted for 12.05%, 9.96% and 9.35% of revenue earned during the fiscal year ended July 31, 2000. For the fiscal year ended July 31, 1999, 67% (\$7,058,000) of the Company's revenue was earned from related parties. Two of these related parties accounted for 22%, and 16% of revenue earned for the fiscal year ended July 31, 1999.

(14) Selected Quarterly Financial Data (Unaudited)

Financial information for interim periods were as follows:

	Fiscal Year Ended July 31, 2001			
	Q1	Q2	Q3	Q4
Net revenue.....	\$ 26,036	\$ 27,698	\$ 26,163	\$ 22,829

54

NAVISITE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

- (a) Net loss per common share is computed independently for each of the quarters based on the weighted average number of shares outstanding during the quarter. Therefore, the aggregate per share amount for the quarters may not equal the amount calculated for the full year.
- (b) See note 2 (o).

(15) Subsequent Events

On October 29, 2001, the Company entered into an agreement between CMGI and Compaq Financial Services ("CFS"), a wholly-owned subsidiary of Compaq Computer Corporation (a shareholder of CMGI). Under the terms of the agreement, the Company has agreed to purchase equipment from CFS leased by the Company under operating lease agreements expiring through 2003 in exchange for a note payable of approximately \$35 million. This note also allows the Company to finance past due lease payments, the sales tax on the equipment purchase and the outright purchase of the equipment. Additionally, the Company will receive \$20 million and \$10 million in cash from CFS and CMGI, respectively, in exchange for six-year convertible notes payable. The notes bear interest at 12% and require payment of interest only for the first three years from the date of issuance. All interest to CMGI and a portion of the interest payable to CFS in the first two years may be paid in NaviSite common stock. Principal and interest payments are due on a straight line basis commencing in year four until maturity on the sixth anniversary from the issuance date. The convertible notes payable will be secured by substantially all assets of the Company and cannot be prepaid.

Holders of the convertible notes payable are entitled to both demand and "piggyback" registration rights, and CFS is entitled to anti-dilution protection under certain circumstances. The agreement with CFS also contains certain restrictive covenants, including but not limited to limitations on the issuance of additional debt, the sale of equity securities to affiliates and certain acquisitions and dispositions of assets.

The principal balances may be converted into NaviSite common stock at the option of the holders at any time prior to maturity at a conversion rate of \$0.26 per share. CMGI also agreed to convert its \$80 million in principal

Edgar Filing: NAVISITE INC - Form 10-K

outstanding under the existing notes payable into approximately 14.5 million shares of NaviSite common stock. CMGI also agreed to convert approximately \$16.2 million in other amounts due by NaviSite to CMGI into approximately 9.9 million shares of NaviSite common stock. Should CFS convert its notes payable into the Company's common stock, they would own a controlling interest in NaviSite.

During the renegotiations of the equipment lease obligations, the Company did not make certain scheduled lease payments to certain vendors. The Company's total remaining lease obligation to these vendors is approximately \$57 million. Of this amount, approximately \$27 million was restructured in the CFS agreement. The Company has been notified by certain other lessors that it is in default of the respective lease agreements. Remedies under these leases, if the event of default is not cured, include the demand of all remaining lease payments under the original lease terms, payment of stipulated loss amounts or return of the underlying equipment. The Company plans to cure these defaults within 60 days of closing the CFS agreement.

INDEPENDENT AUDITORS REPORT ON FINANCIAL STATEMENT SCHEDULE

The Board of Directors and Stockholders
NaviSite, Inc. and Subsidiary:

Under date of September 25, 2001, except as to note 15, which is as of October 29, 2001, we reported on the consolidated balance sheets of NaviSite, Inc. as of July 31, 2001 and 2000 and the related consolidated statements of operations, changes in stockholders' equity (deficit) and cash flows for each of the fiscal years in the three-year period ended July 31, 2001, which are included in the Form 10-K for the year ended July 31, 2001. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related consolidated financial statement schedule of Valuation and Qualifying Accounts in the Form 10-K. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits. In our opinion, such financial statement schedule when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

PART III

Certain information required by Part III of this Form 10-K is omitted because we will file a definitive proxy statement pursuant to Regulation 14A (the "Proxy Statement") not later than 120 days after the end of the fiscal year covered by this Form 10-K, and certain information to be included therein is incorporated herein by reference.

Item 10. Directors and Executive Officers of the Registrant

The information regarding directors and compliance with Section 16(a) of the Securities Exchange Act of 1934, as amended, required by Item 10 of this Form 10-K is incorporated herein by reference to our Proxy Statement. The information regarding executive officers is included in Part I of this Form 10-K under the section captioned "Election of Directors."

Item 11. Executive Compensation

The information required by Item 11 of Form 10-K is incorporated herein by reference to our Proxy Statement under the section captioned "Executive Compensation and Other Information." The information specified in Item 402 (k) and (l) of Regulation S-K and set forth in our Proxy Statement is not incorporated by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management

The information required by Item 12 of Form 10-K is incorporated herein by reference to our Proxy Statement under the section captioned "Security Ownership of Certain Beneficial Owners and Management."

Item 13. Certain Relationships and Related Transactions

The information required by Item 13 of Form 10-K is incorporated herein by reference to our Proxy Statement under the section captioned "Certain Relationships and Related Transactions."
