DOLLAR TREE, INC.
AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of Dollar Tree, Inc. and its wholly-owned subsidiaries (the "Company") have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and are presented in accordance with the requirements of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended January 30, 2010 contained in the Company's Annual Report on Form 10-K filed March 19, 2010. The results of operations for the 13 weeks and 26 weeks ended July 31, 2010 are not necessarily indicative of the results to be expected for the entire fiscal year ending January 29, 2011.

In the Company's opinion, the unaudited condensed consolidated financial statements included herein contain all adjustments (consisting of those of a normal recurring nature) considered necessary for a fair presentation of its financial position as of July 31, 2010 and August 1, 2009 and the results of its operations and cash flows for the periods presented. The January 30, 2010 balance sheet information was derived from the audited consolidated financial statements as of that date.

On May 26, 2010, the Company's Board of Directors approved a 3-for-2 stock split in the form of a 50% common stock dividend. New shares were distributed on June 24, 2010 to shareholders of record as of the close of business on June 10, 2010. As a result, all share and per share data in these condensed consolidated financial statements and accompanying notes have been retroactively adjusted to reflect this stock split.

2. MERCHANDISE INVENTORIES

The Company assigns cost to store inventories using the retail inventory method, determined on a weighted average cost basis. Since inception through fiscal 2009, the Company used one inventory pool for this calculation. Over the years, the Company has invested in retail technology systems, that has allowed it to refine the estimate of inventory cost under the retail method. On January 31, 2010, the first day of fiscal 2010, the Company began using approximately thirty inventory pools in its retail inventory calculation. As a result of this change, the Company recorded a non-cash charge to gross profit and a corresponding reduction in inventory, at cost, of approximately \$26.3 million in the first quarter of 2010. This is a prospective change and will not have any effect on prior periods. This change in estimate to include thirty inventory pools in the retail method calculation is preferable to using one pool in the calculation as this will give the Company a more accurate estimate of cost of store level inventories.

3. FUEL DERIVATIVE CONTRACTS

In order to manage fluctuations in cash flows resulting from changes in diesel fuel costs, the Company entered into fuel derivative contracts with third parties for approximately 4.2 million gallons of diesel fuel, or approximately 65% of the Company's fuel needs from August 2010 through January 2011 and approximately 0.6 million gallons of diesel fuel or approximately 20% of the Company's fuel needs from February 2011 through April 2011. Under these contracts, the Company pays the third party a fixed price for diesel fuel and receives variable diesel fuel prices at amounts approximating current diesel fuel costs, thereby creating the economic equivalent of a fixed-rate

obligation. These derivative contracts do not qualify for hedge accounting and therefore all changes in fair value for these derivatives are included in earnings. The fair value of these contracts at July 31, 2010 was a liability of \$0.5 million.

4. FAIR VALUE MEASUREMENTS

The Company's cash and cash equivalents, short-term investments, restricted investments and interest rate and diesel fuel swaps represent the financial assets and liabilities that were accounted for at fair value on a recurring basis as of July 31, 2010. As required, financial assets and liabilities are classified in the fair value hierarchy in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels. The fair value of the Company's cash and cash equivalents, short-term investments and restricted investments was \$429.3 million, \$51.0 million and \$62.7 million, respectively at July 31, 2010. These fair values were determined using Level 1 measurements in the fair value hierarchy. The fair value of the interest rate swaps as of July 31, 2010 was a liability of \$2.5 million and the fair value of the diesel fuel swaps as of July 31, 2010 was a liability of \$0.5 million. These fair values were estimated using Level 2 measurements in the fair value hierarchy. These estimates used discounted cash flow calculations based upon forward interest-rate yield and diesel cost curves.

The carrying value of the Company's long-term debt approximates its fair value because the debt's interest rates vary with market interest rates.

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the assets and liabilities are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (e.g., when there is evidence of impairment). There were no changes in fair value related to these assets during the 13 or 26 weeks ended July 31, 2010.

5. INCOME TAXES

During the second quarter of 2010, the Company adjusted its balance of unrecognized tax benefits primarily as a result of recording accrued interest on uncertain tax liabilities. Accordingly, "Income taxes payable long-term" was increased by \$0.2 million. The total amount of unrecognized tax benefits at July 31, 2010, that, if recognized, would affect the effective tax rate was \$10.1 million (net of federal tax benefit).

6. NET INCOME PER SHARE

The following table sets forth the calculation of basic and diluted net income per share:

	13 Weeks Ended		26 Weeks Ended	
	July 31,	August 1,	July 31,	August 1,
(In millions, except per share data)	2010	2009	2010	2009
Basic net income per share:				
Net income	\$ 78.0	\$ 56.9	\$ 141.6	\$ 117.3
Weighted average number of shares outstanding	127.3	134.6	128.3	135.2
Basic net income per share	\$ 0.61	\$ 0.42	\$ 1.10	\$ 0.87
Diluted net income per share:				
Net income	\$ 78.0	\$ 56.9	\$ 141.6	\$ 117.3
Weighted average number of shares outstanding	127.3	134.6	128.3	135.2
Dilutive effect of stock options and				

restricted stock units (as determined				
by applying the treasury stock method)	0.8	0.8	0.9	0.9
Weighted average number of shares and				
dilutive potential shares outstanding	128.1	135.4	129.2	136.1
Diluted net income per share	\$ 0.61	\$ 0.42	\$ 1.10	\$ 0.86

For the 13 and 26 weeks ended July 31, 2010 and the 13 and 26 weeks ended August 1, 2009, substantially all of the stock options outstanding were included in the calculation of the weighted average number of shares and dilutive potential shares outstanding.

7. STOCK-BASED COMPENSATION

The Company's stock-based compensation expense includes the fair value of granted stock options and restricted stock units (RSUs) and employees' purchase rights under the Company's Employee Stock Purchase Plan. Stock-based compensation expense was \$7.3 million and \$14.4 million, during the 13 and 26 weeks ended July 31, 2010, respectively. Stock-based compensation expense was \$5.5 million and \$10.9 million, during the 13 and 26 weeks ended August 1, 2009, respectively.

The Company granted approximately 0.6 million service-based RSUs from the Equity Incentive Plan (EIP) and the Executive Officer Equity Incentive Plan (EOEP) to employees and officers in the 26 weeks ended July 31, 2010. The estimated \$24.0 million fair value of these RSUs is being expensed ratably over the three-year vesting periods, or a shorter period based on the retirement eligibility of certain grantees. The fair value was determined using the Company's closing stock price on the date of grant. The Company recognized \$2.3 million and \$4.3 million of expense related to these RSUs for the 13 and 26 weeks ended July 31, 2010, respectively.

In fiscal 2010 the Company granted 0.2 million RSUs from the EIP and the EOEP to certain officers of the Company, contingent on the Company meeting certain performance targets in fiscal 2010. If the Company meets these performance targets in fiscal 2010, then the RSUs will vest ratably over three years, ending April 1, 2013. The Company recognized \$1.4 million and \$1.9 million of expense related to these RSUs in the 13 and 26 weeks ended July 31, 2010, respectively.

The Company recognized \$2.9 million and \$6.4 million of expense related to RSUs granted prior to fiscal 2010 in the 13 and 26 weeks ended July 31, 2010, respectively. For the 13 and 26 weeks ended August 1, 2009, the Company recognized \$4.3 million and \$8.2 million of expense related to RSUs, respectively.

In the 26 weeks ended July 31, 2010, approximately 0.7 million RSUs vested and approximately 0.5 million shares, net of taxes were issued. During the 26 weeks ended August 1, 2009, approximately 0.4 million RSUs vested and approximately 0.3 million shares, net of taxes were issued. Less than 0.1 million RSUs vested in the 13 weeks ended July 31, 2010 and August 1, 2009.

8. SHAREHOLDERS' EQUITY

Comprehensive Income

The Company's comprehensive income reflects the effect of recording the interest rate swaps entered into in March 2008 at fair value. The following table provides a reconciliation of Net income to Total comprehensive income:

(In millions)	13 Weeks Ended		26 Weeks Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Net income	\$ 78.0	\$ 56.9	\$ 141.6	\$ 117.3
Fair value adjustment-derivative	0.7	0.3	1.5	(0.1)

Edgar Filing: DOLLAR TREE INC - Form 10-Q

cash flow hedging
instrument

Income tax expense	(0.3)	(0.1)	(0.6)	-
Fair value adjustment, net of tax	0.4	0.2	0.9	(0.1)
Total comprehensive income	\$ 78.4	\$ 57.1	\$ 142.5	\$ 117.2

Share Repurchase Program

On March 19, 2010, the Company entered into an agreement to repurchase \$200.0 million of the Company's common shares under an Accelerated Share Repurchase Agreement (ASR). The entire \$200.0 million was subject to a "collar" agreement. Under this agreement, the Company initially received 4.6 million shares through March 31, 2010, representing the minimum number of shares to be received based on a calculation using the "cap" or high-end of the price range of the collar. The maximum number of shares that could have been received under the agreement was 5.2 million. The number of shares was determined based on the weighted average market price of the Company's common stock, less a discount, during a specified period of time. The repurchase period ranged from one and one-half to four months following the two week maximum hedge completion period. The weighted average market price through July 31, 2010 as defined in the "collared" agreement was \$41.29. Therefore, if the transaction had settled on July 31, 2010, the Company would have received an additional 0.4 million shares under the "collared" agreement. Based on the applicable accounting literature, these additional shares were not included in the weighted average diluted earnings per share calculation because their effect would be antidilutive. Based on the hedge period reference price of \$39.61, there is approximately \$18.2 million of the \$200.0 million related to the agreement, as of July 31, 2010, that is recorded as a reduction to shareholders' equity pending final settlement of the agreement. The ASR concluded on August 6, 2010 and the weighted average market price through August 6, 2010 as defined in the "collared" agreement was \$41.41. Therefore, on August 6, 2010, the Company received an additional 0.4 million shares under the "collared" agreement resulting in 5.0 million total shares being repurchased under the ASR.

The Company also repurchased approximately 0.6 million additional shares of common stock for approximately \$18.4 million during the 26 weeks ended July 31, 2010. No share repurchases were made during the 13 weeks ended July 31, 2010. The Company also had 0.1 million shares totaling \$2.4 million that were accrued as share repurchases at January 30, 2010 that settled during the 26 weeks ended July 31, 2010. The Company repurchased approximately 1.5 and 3.1 million shares of common stock for approximately \$42.5 million and \$85.3 million during the 13 and 26 weeks ended August 1, 2009.

In June 2010, the Company's Board of Directors authorized the repurchase of an additional \$500.0 million of the Company's common stock. This authorization was in addition to the October 2007 authorization which had \$42.2 million remaining. As of July 31, 2010, the Company has \$542.2 million remaining under repurchase authorizations.

Share Authorization

On June 17, 2010, the shareholders approved an amendment to the Company's Articles of Incorporation to increase the authorized shares of the Company's common stock from Three Hundred Million to Four Hundred Million shares.

9. LITIGATION MATTERS

In 2006, a former store manager filed a collective action against the Company in Alabama federal court. She claims that she and other store managers should have been classified as non-exempt employees under the Fair Labor Standards Act and received overtime compensation. The Court preliminarily allowed nationwide (except California) notice to be sent to all store managers employed for the three years immediately preceding the filing of the suit. Approximately 480 individuals are included in the collective action. The Court on its own motion continued the case from its previously scheduled July 2010 trial date. The Company's motion to decertify the collective action has been fully briefed by the parties and is scheduled for oral argument in September 2010. At present, there is no trial date. The Company will continue to vigorously defend itself in this matter.

In 2007, two store managers filed a class action against the Company in California federal court, claiming they and other California store managers should have been classified as non-exempt employees under California and federal law. The Court has allowed notice to be sent to all California store managers employed since December 12, 2004, and a class of approximately 720 individuals exists. The Company has filed a motion to decertify the class, and the parties now await the Court's ruling. If that motion is denied, the case is scheduled to proceed to trial in March of 2011. The

Company is vigorously defending itself in this matter.

In 2008, the Company was sued under the Equal Pay Act in Alabama federal court by two female store managers alleging that they and other female store managers were paid less than male store managers. Among other things, they seek monetary damages and back pay. The Court ordered that notice be sent to potential plaintiffs and there are now approximately 360 opt-in plaintiffs. The Company expects that the Court will consider a motion by the Company to decertify the collective action later in 2010. In October 2009, 34 plaintiffs, most of whom are opt-in plaintiffs in the Alabama action, filed a new class action Complaint in a federal court in Virginia, alleging gender pay and promotion discrimination under Title VII. On March 11, 2010, the case was dismissed with prejudice. Plaintiffs then filed a motion requesting the Court to alter, amend and vacate its dismissal Order which the trial Court denied. Plaintiffs have filed an appeal to the U.S. Court of Appeals for the Fourth Circuit. It is anticipated the appellate process may take approximately a year.

The Company does not believe that any of these matters will, individually or in the aggregate, have a material adverse effect on its business or financial condition. The Company cannot give assurance, however, that one or more of these lawsuits will not have a material adverse effect on its results of operations for the period in which they are resolved.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

INTRODUCTORY NOTE: Unless otherwise stated, references to "we," "our" and "us" generally refer to Dollar Tree, Inc. and its direct and indirect subsidiaries on a consolidated basis.

A WARNING ABOUT FORWARD-LOOKING STATEMENTS: This document contains "forward-looking statements" as that term is used in the Private Securities Litigation Reform Act of 1995. Forward-looking statements address future events, developments or results and typically use words such as "believe," "anticipate," "expect," "intend," "plan," "view," "target" or "estimate." For example, our forward-looking statements include statements regarding:

- our anticipated sales, including comparable store net sales, net sales growth, earnings growth and new store growth;
 - costs of pending and possible future legal claims;
 - the average size of our stores and their performance compared with other store sizes;
- the effect of the continued shift in merchandise mix to include more consumables and the continued roll-out of frozen and refrigerated merchandise on gross profit margin and sales;
 - the effect on quarterly gross profit of using the new retail inventory calculation;
- the possible effect of the current economic downturn, inflation and other economic changes on our costs and profitability, including future changes in domestic and foreign freight costs, shipping rates, fuel costs and wage and benefit costs;
- our cash needs, including our ability to fund our future capital expenditures and working capital requirements; and,
- the future reliability of, and cost associated with, our sources of supply, particularly imported goods such as those sourced from China and Hong Kong.

For a discussion of the risks, uncertainties and assumptions that could affect our future events, developments or results, you should carefully review the risk factors summarized below and the more detailed discussions in the "Risk Factors" and "Business" sections in our Annual Report on Form 10-K filed March 19, 2010. Also see section 1A. "Risk Factors" in Part II of this Quarterly Report on Form 10-Q.

- Our profitability is especially vulnerable to cost increases.
 - Litigation may adversely affect our business, financial condition and results of operations.
- Changes in federal, state or local law, or our failure to comply with such laws, could increase our expenses and expose us to legal risks.
 - We could encounter disruptions or additional costs in receiving and distributing merchandise.
 - We may be unable to expand our square footage as timely and profitably as planned.
- Sales below our expectations during peak seasons may cause our operating results to suffer materially.

- Our sales and profits rely on directly and indirectly imported merchandise which may increase in cost or become unavailable.

- A downturn in economic conditions could adversely affect our sales.
- Our profitability is affected by the mix of products we sell.
- Pressure from competitors, including competition for merchandise, may reduce our sales and profits.
- The price of our common shares as traded on the Nasdaq Global Select Market may be volatile.
- Certain provisions in our articles of incorporation and bylaws could delay or discourage a takeover attempt.

Our forward-looking statements could be wrong in light of these and other risks, uncertainties and assumptions. The future events, developments or results described in this report could turn out to be materially different. We have no obligation to publicly update or revise our forward-looking statements after the date of this quarterly report and you should not expect us to do so.

Investors should also be aware that while we do, from time to time, communicate with securities analysts and others, it is against our policy to selectively disclose to them any material nonpublic information or other confidential commercial information. Accordingly, shareholders should not assume that we agree with any statement or report issued by any analyst regardless of the content of the statement or report, as we have a policy against confirming information issued by others. Thus, to the extent that reports issued by securities analysts contain any financial projections, forecasts or opinions, such reports are not our responsibility.

Overview

Our net sales are derived from the sale of merchandise. Two major factors tend to affect our net sales trends. First is our success at opening new stores or adding new stores through mergers or acquisitions. Second is the performance of stores once they are open. Sales vary at our existing stores from one year to the next. We refer to this change as a change in comparable store net sales, because we include only those stores that are open throughout both of the periods being compared, beginning after the first fifteen months of operation. We include sales from stores expanded during the period in the calculation of comparable store net sales, which has the effect of increasing our comparable store net sales. The term “expanded” also includes stores that are relocated.

At July 31, 2010 we operated 3,925 stores in 48 states, with 33.6 million selling square feet compared to 3,717 stores with 31.4 million selling square feet at August 1, 2009. During the 26 weeks ended July 31, 2010, we opened 130 stores, expanded 68 stores and closed 11 stores, compared to 139 stores opened, 41 stores expanded and 13 stores closed during the 26 weeks ended August 1, 2009. In the 26 weeks ended July 31, 2010 and August 1, 2009, we added approximately 1.3 million and 1.1 million selling square feet, respectively, of which approximately 0.3 million and 0.2 million, respectively, was added through expanding existing stores. The average size of stores opened during the 26 weeks ended July 31, 2010 was approximately 8,400 selling square feet. We believe that this size store is in the range of our optimal size operationally and that this size also gives our customers a shopping environment which invites them to shop longer, buy more and make return visits, which increases our customer traffic.

For the 13 and 26 weeks ended July 31, 2010, comparable store net sales increased 6.7% and 6.6%, respectively due to increased traffic and increased average ticket. We believe comparable store net sales continue to be positively affected by a number of our initiatives, as debit and credit card penetration continued to increase in the 13 and 26 weeks ended July 31, 2010, and we continued the roll-out of frozen and refrigerated merchandise to more of our stores. At July 31, 2010, we had frozen and refrigerated merchandise in approximately 1,680 stores compared to approximately 1,400 stores at August 1, 2009. We believe that this has and will continue to enable us to increase sales and earnings by increasing the number of shopping trips made by our customers. In addition, we now accept food stamps (under the Supplemental Nutrition Assistance Program (“SNAP”)) in approximately 3,085 qualified stores

compared to approximately 2,400 stores at August 1, 2009.

We have continued to see increases in the demand for basic, consumable products in 2010. As a result, we have shifted the mix of inventory carried in our stores to more consumer product merchandise. While this merchandise has lower margins, it is more frequently purchased and we believe carrying this merchandise increases the customer visits to our stores, which has helped increase our overall sales and earnings. While the higher sales will leverage our fixed costs, we believe that this increase in basic, consumer product merchandise along with higher freight costs will negatively impact our gross margin rate for the remainder of 2010.

We assign cost to store inventories using the retail inventory method, determined on a weighted average cost basis. Since inception through fiscal 2009, we used one inventory pool for this calculation. Over the years, we have invested in our retail technology systems, that has allowed us to refine the estimate of inventory cost under the retail method. On January, 31, 2010, the first day of fiscal 2010, we began using approximately thirty inventory pools in our retail inventory calculation. This change gives us a more accurate inventory cost which will facilitate improved decision making and will enhance our assortment planning process. As a result of this change, we recorded a non-cash charge to gross profit and a corresponding reduction in inventory, at cost, of approximately \$26.3 million in the first quarter of 2010. This is a prospective change and will not have any effect on prior periods. This change could result in more variability in gross profit margin between quarters compared to the previous calculation.

Results of Operations

13 Weeks Ended July 31, 2010 Compared to the 13 Weeks Ended August 1, 2009

Net sales. Net sales increased 12.7%, or \$155.1 million, over last year's second quarter resulting from a 6.7% increase in comparable store net sales and sales in our new stores. Comparable store net sales are positively affected by our expanded and relocated stores, which we include in the calculation, and are negatively affected when we open new stores or expand stores near existing stores.

Gross Profit. Gross profit margin increased to 35.1% in the current quarter compared to 34.5% for the same quarter last year. This increase can be attributed to the following:

- Occupancy and distribution costs decreased 40 basis points in the quarter resulting from the leveraging of the comparable store net sales increase.
- Shrink costs decreased 25 basis points in the quarter due to favorable adjustments to shrink estimates in the current quarter based on actual inventory results.

Selling, General and Administrative Expenses. Selling, general, and administrative expenses for the current quarter decreased to 25.8%, as a percentage of net sales, compared to 27.2% for the same period last year. This decrease was primarily due to the following:

- Payroll-related expenses decreased 85 basis points due primarily to the leverage associated with the comparable store sales increase and a decrease in our workers compensation accruals as a result of favorable development of prior year claims.
- Depreciation decreased 30 basis points primarily due to the leveraging associated with the increase in comparable store net sales in the current quarter.
- Store operating costs decreased 20 basis points primarily due to the leveraging associated with the increase in comparable store net sales.

Operating Income. Operating income for the current quarter was 9.3% as a percentage of net sales compared to 7.3% for the same period last year reflecting the increased gross profit margin and decreased selling, general and administrative expenses, as a percentage of net sales, noted above.

Income Taxes. Our effective tax rate for the 13 weeks ended July 31, 2010 was 37.6% compared to 35.3% for the 13 weeks ended August 1, 2009. The lower rate in the prior year quarter reflects a reduction in tax expense of \$2.3 million resulting from an immaterial correction of deferred tax assets relating to fixed assets.

26 Weeks Ended July 31, 2010 Compared to the 26 Weeks Ended August 1, 2009

Net sales. Net sales increased 12.6%, or \$306.6 million, over the same period last year resulting from a 6.6% increase in comparable store net sales and sales in our new stores. Comparable store net sales are positively affected by our expanded and relocated stores, which we include in the calculation, and are negatively affected when we open new stores or expand stores near existing stores.

Gross Profit. For the 26 weeks ended July 31, 2010, our gross profit margin decreased to 34.2% compared to our gross profit margin of 34.5% for the 26 weeks ended August 1, 2009, as a result of the \$26.3 million non-cash beginning inventory adjustment. This adjustment reflects our refined estimate of inventory cost as of January 31, 2010 using approximately thirty inventory pools in our retail inventory calculation, whereas, prior to the first quarter of 2010, we used one inventory pool for this calculation. Without this charge, our gross profit margin increased to 35.2% for the 26 weeks ended July 31, 2010 compared to 34.5% for the 26 weeks ended August 1, 2009. This increase can be attributed to the following:

- Occupancy and distribution costs decreased 40 basis points in the current year resulting from the leveraging of the comparable store net sales increase.
- Shrink costs decreased 20 basis points in the current year due to favorable adjustments to shrink estimates in the current quarter based on actual inventory results.

Selling, General and Administrative Expenses. Selling, general, and administrative expenses for the 26 weeks ended July 31, 2010 decreased to 25.8%, as a percentage of net sales, compared to 26.8% for the same period last year. This decrease was primarily due to the following:

- Payroll-related expenses decreased 55 basis points due primarily to the leveraging of the comparable store sales increase and a decrease in our workers compensation accruals as a result of favorable development of prior year claims.
- Depreciation decreased 30 basis points primarily due to the leveraging associated with the increase in comparable store net sales in the current year.
- Store operating costs decreased 25 basis points primarily due to the leveraging associated with the increase in comparable store net sales.

Operating Income. Operating income for the 26 weeks ended July 31, 2010 was 8.4% as a percentage of net sales compared to 7.7% for the same period last year. This increase reflects increased gross profit margin and decreased selling, general and administrative expenses, as a percentage of net sales, noted above including the \$26.3 million adjustment to reduce beginning inventory on the first day of fiscal 2010. Without this adjustment, our operating income for the 26 weeks ended July 31, 2010, as a percentage of sales, was 9.4%.

Income Taxes. Our effective tax rate for the 26 weeks ended July 31, 2010 was 37.7% compared to 36.5% for the 26 weeks ended August 1, 2009. The lower rate in the prior year period reflects a reduction in tax expense of \$2.3 million resulting from an immaterial correction of deferred tax assets relating to fixed assets.

Liquidity and Capital Resources

Our business requires capital to open new stores, expand our distribution network and operate our existing business. Our working capital requirements for our existing business are seasonal in nature and typically reach their peak in the months of September and October. Historically, we have satisfied our seasonal working capital requirements, funded our store opening and expansion programs and repurchased shares from internally generated funds and borrowings under our credit facilities.

The following table compares cash flow information for the 26 weeks ended July 31, 2010 and August 1, 2009:

	26 Weeks Ended	
	July 31,	August
(In millions)	2010	1,
Net cash provided by (used in):		2009
Operating activities	\$ 153.8	\$ 134.0
Investing activities	(97.8)	(72.1)
Financing activities	(198.3)	(68.1)

Net cash provided by operating activities increased \$19.8 million due primarily to increased earnings before depreciation and amortization and increased other non-cash adjustments resulting primarily from the \$26.3 million adjustment to reduce beginning inventory. Partially offsetting these increases in cash provided by operations were uses of cash for increased inventory levels due to the timing of receipts and increased incentive compensation payouts in the current year resulting from the higher accruals at the end of fiscal 2009.

Net cash used in investing activities increased \$25.7 million primarily due to short-term investment purchases in the current year and increased capital expenditures. Capital expenditures increased in the current year primarily resulting from an increase in the number of freezers installed in the current year and payments for our new distribution center in San Bernardino, CA that opened during the first quarter of fiscal 2010.

Net cash used in financing activities increased \$130.2 million compared with the prior year, primarily due to increased share repurchases in the current year.

At July 31, 2010, our long-term borrowings were \$266.5 million, our capital lease commitments were \$0.2 million and we had \$300.0 million available on the revolving credit portion of our Unsecured Credit Agreement. We also have \$121.5 million and \$50.0 million Letter of Credit Reimbursement and Security Agreements, under which approximately \$159.4 million was committed to letters of credit issued for routine purchases of imported merchandise as of July 31, 2010.

On March 19, 2010, we entered into an agreement to repurchase \$200.0 million of our common shares under an Accelerated Share Repurchase Agreement (ASR). The entire \$200.0 million was subject to a “collar” agreement. Under this agreement, we initially received 4.6 million shares through March 31, 2010, representing the minimum number of shares to be received based on a calculation using the “cap” or high-end of the price range of the collar. The maximum number of shares that could have been received under the agreement was 5.2 million. The number of shares was determined based on the weighted average market price of our common stock, less a discount, during a specified period of time. The repurchase period ranged from one and one-half to four months following the two week maximum hedge completion period. The weighted average market price through July 31, 2010 as defined in the “collared” agreement was \$41.29. Therefore, if the transaction had settled on July 31, 2010, we would have received an additional 0.4 million shares under the “collared” agreement. Based on the applicable accounting literature, these additional shares were not included in the weighted average diluted earnings per share calculation because their effect would be antidilutive. Based on the hedge period reference price of \$39.61, there is approximately \$18.2 million of the \$200.0 million related to the agreement, as of July 31, 2010, that is recorded as a reduction to shareholders’ equity pending final settlement of the agreement. The ASR concluded on August 6, 2010 and the weighted average market price through August 6, 2010 as defined in the “collared” agreement was \$41.41. Therefore, on August 6, 2010, we

received an additional 0.4 million shares under the “collared” agreement resulting in 5.0 million total shares being repurchased under the ASR.

We also repurchased approximately 0.6 million additional shares of common stock for approximately \$18.4 million during the 26 weeks ended July 31, 2010. No share repurchases were made during the 13 weeks ended July 31, 2010. We also had 0.1 million shares totaling \$2.4 million that were accrued as share repurchases at January 30, 2010 that settled during the 26 weeks ended July 31, 2010. We repurchased approximately 1.5 and 3.1 million shares of common stock for approximately \$42.5 million and \$85.3 million during the 13 and 26 weeks ended August 1, 2009.

In June 2010, our Board of Directors authorized the repurchase of an additional \$500.0 million of our common stock. This authorization was in addition to the October 2007 authorization which had \$42.2 million remaining. As of July 31, 2010, we had \$542.2 million remaining under repurchase authorizations.

On June 17, 2010, the shareholders approved an amendment to our Articles of Incorporation to increase the authorized shares of our common stock from Three Hundred Million to Four Hundred Million shares.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to various types of market risk in the normal course of our business, including the impact of interest rate changes, fuel costs and foreign currency rate fluctuations. We may enter into interest rate swaps, fuel hedges and foreign currency forward contracts to manage our exposure to market risk. We do not enter into derivative instruments for any purpose other than cash flow hedging purposes.

On March 20, 2008, we entered into two \$75.0 million interest rate swap agreements. These interest rate swaps are used to manage the risk associated with interest rate fluctuations on a portion of our variable rate debt. Under these agreements, we pay interest to financial institutions at a fixed rate of 2.8%. In exchange, the financial institutions pay us at a variable rate, which equals the variable rate on the debt, excluding the credit spread. These swaps qualify for hedge accounting treatment and expire in March 2011. The fair value of these swaps as of July 31, 2010 and August 1, 2009 was a liability of \$2.5 million and \$4.4 million, respectively.

In order to manage fluctuations in cash flows resulting from changes in diesel fuel costs, we entered into fuel derivative contracts with third parties for approximately 4.2 million gallons of diesel fuel, or approximately 65% of our fuel needs from August 2010 through January 2011 and approximately 0.6 million gallons of diesel fuel, or approximately 20% of our fuel needs from February 2011 through April 2011. Under these contracts, we pay the third party a fixed price for diesel fuel and receive variable diesel fuel prices at amounts approximating current diesel fuel costs, thereby creating the economic equivalent of a fixed-rate obligation. These derivative contracts do not qualify for hedge accounting and therefore all changes in fair value for these derivatives are included in earnings. The fair value of these contracts at July 31, 2010 was a liability of \$0.5 million.

Item 4. CONTROLS AND PROCEDURES.

Our management has carried out, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act as of the end of the period covered by this report. Based upon this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that, as of July 31, 2010, the Company's disclosure controls and procedures were designed and functioning effectively to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

There have been no changes in our internal control over financial reporting during the quarter ended July 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

From time to time, we are defendants in ordinary, routine litigation or proceedings incidental to our business, including allegations regarding:

- employment-related matters;
- infringement of intellectual property rights;
- product safety matters, which may include product recalls in cooperation with the Consumer Products Safety Commission or other jurisdictions;
- personal injury/wrongful death claims; and
- real estate matters related to store leases.

In addition, we are defendants in several class or collective action lawsuits. For a discussion of these lawsuits, please refer to “Note 9. Litigation Matters”, included in “Part I. Financial Information, Item 1. Financial Statements” of this Form 10-Q.

We will vigorously defend ourselves in these lawsuits. We do not believe that any of these matters will, individually or in the aggregate, have a material adverse effect on our business or financial condition. We cannot give assurance, however, that one or more of these lawsuits will not have a material adverse effect on our results of operations for the period in which they are resolved.

Item 1A. RISK FACTORS

There have been no material changes to the risk factors described in Item 1A. “Risk Factors” in the Company’s Annual Report on Form 10-K, filed with the SEC on March 19, 2010.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

There was no share repurchase activity for the 13 weeks ended July 31, 2010:

Item 3. DEFAULTS UPON SENIOR SECURITIES.

None.

Item 4. REMOVED AND RESERVED.

Item 5. OTHER INFORMATION.

None.

Item 6. EXHIBITS.

3.1 Articles of Incorporation of Dollar Tree, Inc. (as amended, effective June 17, 2010) (Exhibit 3.1 to the Company's June 17, 2010 Current Report on Form 8-K, incorporated herein by this reference)

3.2 Bylaws of Dollar Tree, Inc., as amended (Exhibit 3.1 to the Company's June 17, 2010 Current Report on Form 8-K, incorporated herein by this reference)

4.1 Form of Common Stock Certificate (Exhibit 4.1 to the Company's March 13, 2008 Current Report on Form 8-K, incorporated herein by this reference)

31.1 Certification required under Section 302 of the Sarbanes-Oxley Act of Chief Executive Officer

31.2 Certification required under Section 302 of the Sarbanes-Oxley Act of Chief Financial Officer

32.1 Certification required under Section 906 of the Sarbanes-Oxley Act of Chief Executive Officer

32.2 Certification required under Section 906 of the Sarbanes-Oxley Act of Chief Financial Officer
